Psychological Studies, Minor

Western Sydney University Minor Code: 0029

Previous Code: SM1115.1

Available to students in other Western Sydney University

Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The Psychological Studies minor comprises subjects in the discipline of psychology that focus on the field of inquiry that uses scientific techniques and methods to understand and explain behaviour and experience. Areas of study include: the brain and behaviour, learning, motivation and emotion, social psychology, lifespan development, perception and cognitive processes. A Psychological Studies minor does not meet APAC requirements for an accredited sequence in Psychology. Students wishing to enrol in an accredited Psychology sequence should complete the Psychology sequence of 160 credit points.

Psychology Extension, Minor

Western Sydney University Minor Code: 0186

Previous Code: SM1124.1

Available to students in other Western Sydney University

Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The Psychology Extension minor is designed to give students enrolled in an accredited psychology sequence the opportunity to study some areas of psychology in greater depth. To complete the minor students must choose four subjects from a prescribed pool. Students enrolled in non-Psychology degrees are welcome to select the minor, but they should carefully check the prerequisites of subjects in the pool as many of them require completion of subjects from the psychology core.

Psychology, Major

Western Sydney University Major Code: 0001

Previous Code: KT1000.1

Available to students in other Western Sydney University programs?

No

Psychology is the field of inquiry that uses scientific techniques and methods to understand and explain behaviour and experience. As a profession, it involves the application of psychological knowledge to practical problems in human behaviour. Subjects in the program are drawn from the following core areas of psychology: brain and behaviour, learning, motivation and emotion, social psychology, lifespan development, perception and cognitive processes.

Public Health Nutrition, Testamur Major

Western Sydney University Major Code: T068

Previous Code: ST3079.1

Available to students in other Western Sydney University

Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

This postgraduate major is designed for science graduates seeking to further their career in public health and health promotion; working in a variety of settings, such as local, state or national health organisations, non-government organisations, population health units, community health centres, and international aid agencies. Roles may include health promotion officer, research and evaluation officer, monitoring and surveillance officer, and health policy officer. This major builds an integrated understanding of relevant aspects of community and public health nutrition and its interrelation with other relevant disciplines. A capstone subject involving a public health nutrition research project allows students to integrate their knowledge and skills developed from the whole program and build on research skills that are scaffolded through the curriculum.

Location

Campus	Mode	Advice
Parramatta Campus - Victoria Road	Internal	Dr Mark Williams (https://directory.westernsydney.edu.au/search/email/m.williams@westernsydney.edu.a)

Major Structure

Qualification for the award of Master of Science (Public Health Nutrition) requires the successful completion of 160 credit points comprising:

- 20 credit points of core subjects,
- 20 credit points of research capstone subjects,
- 40 credit points of major subjects as follows

Subject	Title	Credit Points
HLTH 7003	Community and Public Health Nutrition	10
PUBH 7031	Health Systems and Policy	10
HLTH 7011	Nutritional Assessment Methods	10
HLTH 7010	Nutrition Promotion	10
Total Credit Points		40

- and at least 40 credit points from Alternate Pool 1 and up to 40 credit points from Alternate Pool 2.

Students should note that the subjects available in Alternate Pool 1 and Alternate Pool 2 are listed under the Structure tab of the Master of Science (p. 666) page.

Recommended Sequence

Public Health, Major

Western Sydney University Major Code: 0055

Previous Code: M4021.1

Available to students in other Western Sydney University

Programs: Yes, however the following restrictions apply.

Public health is the science of disease prevention, prolonging life and improving health for individuals and their communities. This work is achieved by promoting healthy lifestyles, researching disease prevention, conducting population health assessment

and measurement, improving environmental health, engaging the community and detecting, preventing and responding to infectious diseases. Public health professionals are required to assess and respond to emerging public health issues and work in a variety of settings, including national and state health departments, community organisations and the global health sector. The Public Health major builds a student's knowledge of the biological, social, cultural, economic and physical factors that underpin the health of a population and how to promote health for all. Students will also develop and use skills in epidemiology and biostatistics, surveillance and prevention, and public health policy. Students in T109 Clinical Science, who would not otherwise have the opportunity to take the 140- hour subject MEDI 3007 Professional Health Placement may choose to do so. This Major will be identified on the Student's Academic Transcript following completion of the course

Electives

Students must take at least one level 3 subject as an elective

Most electives are 10 credit points.

Students may wish to consider using elective choices to complete another health sciences field of study, such as Majors: Health

Promotion, Health Services Management. Minors: Health Promotion, Public Health and Nutrition, Health Informatics, Global Sustainability

Minors

Health Promotion, Minor (p. 825)
Health Practice Management, Minor (p. 824)
Global Sustainability, Minor (p. 818)
Health Informatics, Minor (p. 823)

Majors

Health Services Management, Major (p. 828)

Related Programs

Bachelor of Health Science (p. 160)
Diploma in Health Science/Bachelor of Health Science (p. 411)

Public Relations, Major

Western Sydney University Major Code: 0160

Previous Code: M1122.1

Available to students in other Western Sydney University

Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The Public Relations major covers the skills and knowledge required in the profession of public relations, including event management, issues and crisis management and campaign development. The major focuses on the role of the public relations practitioner or adviser and provides a theoretical framework of the industry. Students engage with both theory and practical projects and may complete an internship placement.

Location

Campus	Mode	Advice

Penrith Campus	Internal	EnquiriesHCA@westernsydney.edu

Major Structure

Bachelor of Business Students

Bachelor of Business students must complete the structure under the heading for Bachelor of Business below.

Creative Industries Students

Creative Industries students must complete their Introduction to major subject, as part of the core requirements of the program, prior to enrolling in this major.

Subject	Title	Credit Points
MKTG 1009	Public Relations Theory and Practice	10

Students must complete 80 credit points as follows

Subject	Title	Credit Points
Level 2		
COMM 2001	Account and Client Management	10
COMM 2011	Communication Strategies	10
COMM 2015	Events Management	10

MKTG 2005	Issues, Risk and Crisis Communication	10
Level 3		
MKTG 3018	Public Relations: Campaigns	10
COMM 3014	Digital Communication	20
Select one of the following:		
COMM 3018	Internship	10
COMM 3037	Transmedia Production	
Total Credit Points		80

Bachelor of Business Students

Students must complete 80 credit points as follows

Subject	Title	Credit Points
Level 1		
MKTG 1009	Public Relations Theory and Practice	10
Level 2		
COMM 2001	Account and Client Management	10
COMM 2011	Communication Strategies	10
COMM 2015	Events Management	10
MKTG 2005	Issues, Risk and Crisis Communication	10
Level 3		
MKTG 3018	Public Relations: Campaigns	10
COMM 3014	Digital Communication	20
Total Credit Points		80

Equivalent Alternate Subjects

The alternate subject listed below counts towards completion of this program for students who passed this subject in 2019 or earlier.

COMM 3007 - Communication Campaigns, replaced by COMM 3045 Advertising: Campaigns

Related Programs

Public Relations, Minor

Western Sydney University Minor Code: 0160

Previous Code: SM1122.1

Available to students in other Western Sydney University

Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The Public Relations minor covers the skills and knowledge required in the profession of public relations, including event management, issues and crisis management and campaign development. The minor focuses on the role of the public relations practitioner or adviser and provides a theoretical framework of the industry. Students engage with both theory and practical projects.

Location

Campus	Mode	Advice
Parramatta Campus - Victoria Road	Internal	EnquiriesHCA@westernsydney.edu
Penrith Campus	Internal	EnquiriesHCA@westernsydney.edu

Minor Structure

Creative Industries students must first complete MKTG 1009 Public Relations Theory and Practice as their Introductory Major subject in order to undertake this minor.

Students must complete 40 credit points, consisting of 20 credit points at level 2 and 20 credit points at level 3 from the following subjects.

Note: Please plan enrolment in minor subjects carefully - subjects at Level 2 and Level 3 may have pre-requisites. Students should consult their Academic Program Advisors if they require further information.

Level 2

Subject	Title	Credit Points
COMM 2001	Account and Client Management	10
COMM 2011	Communication Strategies	10
COMM 2015	Events Management	10
MKTG 2005	Issues, Risk and Crisis Communication	10

Level 3

Subject	Title	Credit Points

B Construction Management

Recreational Therapy, Testamur Major

Western Sydney University Major Code: T110

Previous Code: MT4004.1

Available to students in other Western Sydney University programs?
No

Recreational Therapy links leisure and health improvement.

Recreational Therapy graduates work with patients to use leisure activities to improve health and life quality, for example in rehabilitation centres, psychiatric units, special schools, day care centres, aged care facilities, and in a range of local government or community services settings. The major combines theory and practice in learning, education programming, aged care, disability and mental health, with a comprehensive foundation of the health sciences. Students will develop the professional competencies important for ethical and safe practice and high-quality care, and the skills to work in multidisciplinary teams. Evidence-based practice is one of the most important trends in healthcare today and is a strong feature of the major. The recreational therapy program is offered on campus or fully online. Students may combine this testamur major in recreational therapy with a minor in health promotion, therapeutic modalities, psychology or exercise and physical activity, or the option to choose up to 40cp of electives based on the student's interest. This flexibility will help diversify the knowledge-base and skillset of students. The course includes 160 hours of compulsory practical placement in second year and a third-year internship of 560 hours - meeting the practice placement requirement for eligibility as a Certified Recreation Therapist with the National Council of Therapeutic Recreation Certification (NCTRC).

 Diploma in Health Science/Bachelor of Health Science (p. 411)

Robotics and Mechatronics Engineering, Testamur Major

Western Sydney University Major Code: T104

Previous Code: KT3174.1, MT3055

Available to students in other Western Sydney University programs?
 No

Robotics and Mechatronic engineering combines electrical, computing and mechanical engineering and is at the forefront in designing smart machines and systems, such as pilotless spacecraft, car cruise control, automated factories and medical telerobotics. Students explore intelligent mechanical systems and automation through an extensive and integrated hands-on laboratory program, as well as work-integrated industry projects. Students learn in-depth knowledge about the design and construction of these systems to integrate, evaluate and address

their performance. The multidisciplinary skills students develop are sought after by leading edge industries, including aerospace and biomedical engineering. This major includes a mandatory 12 weeks of industrial placement as a completion requirement.

Optional Electives

The following subject is an optional elective subject offered to students who are engaged in a School approved project. This subject can be taken during the third year of this program, however, permission is required to enrol in the subject.

Subject	Title	Credit Points
ENGR 3022	Special Technical Project	10

Bachelor of Engineering Science

The following applies to students enrolled in 3761 Bachelor of Engineering Science.

This Major will be offered at Parramatta City and Penrith campuses.

Course	Title	Credit Points
Year 1		
Autumn session		
ELEC 1006	Engineering Computing	10
ENGR 1011	Engineering Physics	10
ENGR 1024	Introduction to Engineering Practice	10
Select one of the following:		10
MATH 1021	Mathematics for Engineers Preliminary	
MATH 1016	Mathematics for Engineers 1	

Note: All students are required to enrol in MATH 1021 Mathematics for Engineers Preliminary first and undertake a readiness test at the beginning of their study.

This test will be conducted at the beginning of the first semester of enrolment and the result will determine whether a student will remain in MATH 1021 Mathematics for Engineers Preliminary or be transferred by the School to MATH 1016 Mathematics for Engineers 1.

The students who finish MATH 1021 Mathematics for Engineers Preliminary will then use this unit as an elective.

Credit Points		40
Spring session		
ENGR 1018	Fundamentals of Mechanics	10
ENGR 1008	Engineering Materials	10
Select one of the following:		10
MATH 1016	Mathematics for Engineers 1	
MATH 1019	Mathematics for Engineers 2	
Select one elective		10
Note: Students who remained in MATH 1021 Mathematics for Engineers Preliminary during the first semester will be required to complete MATH 1016 Mathematics for Engineers 1 during second semester.		
These students must then complete MATH 1019 Mathematics for Engineers 2 during the Summer session.		
Credit Points		40

Year 2

Autumn session		
MECH 2001	Kinematics and Kinetics of Machines	10
MECH 2003	Mechanics of Materials	10
ELEC 2001	Circuit Theory	10

Western Sydney University Major Code: T037

Previous Codes: KT3127.1, KT3158.1, KT3163.1, KT7003.1

Available to students in other Western Sydney University programs?
No

This major provides the skills necessary for the design of smart machines of all types: cruise control in automobiles, pilotless spacecraft, automated factories and medical telerobotics. The major, accompanied by an extensive and integrated hands-on laboratory program, is essentially concerned with the design of intelligent mechanical systems and automation, and includes the study of robotics, computer control, automated manufacturing, microprocessor applications and machine design. Graduates in the major acquire the combined skills of mechanical and computer/electrical engineering that are needed in leading-edge industries such as aerospace systems, the car industry, automation and robotic applications, biomedical engineering, laser systems, and building materials manufacture.

Major Structure

Students must complete three units as follows

Subject	Title	Credit Points
Select at least one of the following subjects:		
MECH 2002	Kinematics and Kinetics of Machines (WSTC AssocD)	10
MECH 2004	Mechanics of Materials (WSTC AssocD)	10
Choose either one or two of the following subjects depending on how many subjects have been completed from the list above.		
ELEC 2002	Circuit Theory (WSTC AssocD)	10
ELEC 1002	Digital Systems 1 (WSTC AssocD)	10
ELEC 2005	Electronics (WSTC AssocD)	10
MATH 1020	Mathematics for Engineers 2 (WSTC AssocD)	10

Please note: Offerings of alternate units are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate unit.

Bachelor of Engineering (Honours)

Major Structure

Qualification for this award requires the successful completion of 320 credit points, which include the subjects listed in the recommended sequence below.

* All students undertaking the Bachelor of Engineering (Honours) are required to enrol in MATH 1021 Mathematics for Engineers Preliminary and undertake a readiness test at the beginning of their study.

The readiness test will be conducted at the beginning of the first semester of enrolment and the result will be used to determine whether a student will remain in MATH 1021 Mathematics for Engineers

Preliminary or be transferred by the School to MATH 1016 Mathematics for Engineers 1

Students remaining in MATH 1021 Mathematics for Engineers Preliminary will be required to complete MATH 1016 Mathematics for Engineers 1 during second semester and will be encouraged to complete MATH 1019 Mathematics for Engineers 2 during the Summer session.

Screen Media Design, Minor

Western Sydney University Minor Code: 0204

Previous Code: SM1135.1

Available to students in other Western Sydney University programs?
No

This Screen Media Design minor is comprised of subjects that focus on principles of screen and sound media, video production and interactive design production as a tool for strategic communication. Students who complete this minor will satisfy the NESA requirements for teaching Graphics and Multimedia as a second teaching area within the Technological and Applied Studies discipline.

Location

Campus	Mode	Advice
Parramatta Campus - Victoria Road	Internal	Dan Johnston (d.johnston@westernsydney.edu.au)

Minor Structure

Students must successfully complete 40 credit points as follows.

Subject	Title	Credit Points
COMM 2019	Interactive Design: Games	10
DESN 3008	Interactive Design: Apps	10
Select 20 credit points of the following:		20
COMM 2035	Screen and Sound Practices 1

Screen Media, Major

Western Sydney University Major Code: 0268

Previous Code: M1135.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The Screen Media major provides students with fundamental skills and knowledge in screen media. Areas of study include the exploration of different screen genres and approaches, practical hands-on experience creating commercial, narrative and documentary projects, enhancing screen content using animation and visual effects, plus the application of immersive augmented/virtual reality. This major enables professional communicators to effectively create impactful content in a range of diverse industries (for example within a corporation or for their own business, or within a Public Relations/Advertising Agency).

Location

Campus	Mode	Advice
Parramatta Campus - Victoria Road	Internal	Jacki Montgomery (https://directory.westernsydney.edu.au/search/email/j.montgomery@westernsydney.edu.au)

Major Structure

Students must complete 80 credit points, with at least 30 credit points at Level 3, as follows.

Please note the Screen Media program is currently being enhanced and further details will be available in due course. Subjects under development are not yet accessible by hyperlink.

Creative Industries Students

Note: Creative Industries students must complete either COMM 1015 Foundations of Media Arts and Production or COMM 1039 Introduction to Screen Media prior to enrolling in the Screen Media major.

Secondary Education, Major

Western Sydney University Major Code: 0272

Previous Code: M1133.1

Available to students in other Western Sydney University

Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Students in the Secondary Education Major will study subjects that deal with educational concepts such as sustainability, creativity, social justice and adolescent development. These subjects are broadly structured for students to investigate and critique contemporary education issues. Students will study the first four subjects of the Master of Teaching (Secondary). This major facilitates a transition into a Master of Teaching postgraduate qualification in Secondary Teaching.

Location

Campus	Mode	Advice
Bankstown Campus	Internal	Jaydene Barnes (https://directory.westernsydney.edu.au/search/email/j.barnes@westernsydney.edu.au)
Parramatta Campus - Victoria Road	Internal	Jaydene Barnes (https://directory.westernsydney.edu.au/search/email/j.barnes@westernsydney.edu.au)
Penrith Campus	Internal	Jaydene Barnes (https://directory.westernsydney.edu.au/search/email/j.barnes@westernsydney.edu.au)

Major Structure

Students must successfully complete 80 credit points as per the recommended sequence below.

All subjects in this major are 10 credit points and are arranged in two pools:

- the Education Studies Learning in Context Pool Subjects (Levels 1, 2 and 3), and
- the (Level 7) Master of Teaching (Secondary) Subjects.

Students must complete 10 credit points at Level 1 and at least 30 credit points at Level 3 or higher.

Subject	Title	Credit Points
---------	-------	---------------

Education Studies Learning in Context Pool Subjects

Students must complete at least four subjects: one subject at Level 1 and three subjects at Level 2 or 3 or higher (a minimum of 30 credit points at level 3 is required overall for this major).

Level 1 subject

Students must complete the following Level 1 subject

HUMN 1013	Contextualising Indigenous Australia (Day Mode)	10
-----------	---	----

Level 2 subjects

TEAC 2017	Education and Transformation	10
TEAC 2018	Education for Sustainability	10
TEAC 2037	Learning and Creativity	10
TEAC 2009	Contemporary Childhoods	10
TEAC 3042	Digital Childhoods	10
TEAC 2062	Teachers as Change Makers	10

Level 3 subjects

TEAC 3009	Ethical Futures	10
TEAC 3006	Education in a Cosmopolitan Society	10
TEAC 3031	The Brain and Learning	10

Master of Teaching (Secondary) Subjects

Students must have completed 160 credit points before enrolling in the following subjects

Level 7 subjects

TEAC 7004	Adolescent Development and Teaching	10
TEAC 7032	Diversity, Social Justice and Learning	10
TEAC 7027	Designing Teaching and Learning	10
TEAC 7108	Professional Practice Community Engagement	10

Secondary Teaching, Major

Western Sydney University Major Code: 0164

Previous Code: M1134.1

Available to students in other Western Sydney University

Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The Secondary Teaching major is comprised of the four initial subjects from the Master of Teaching (Secondary) or three subjects from the Master of Teaching (Secondary) STEM. These subjects are broadly structured for students to investigate the underlying principles and concepts in adolescent development, diversity and social justice, skills in the design of learning experiences along these principles, and putting their application into practice. Available to all students in a Pathway to Teaching (Secondary) degree, enrolment is dependent on the successful completion of 160 credit points in the undergraduate program. Students are also offered the flexibility to study subject content subjects in either Modern History, Geography and Urban Studies, Mathematics, Studies of Religion or English to form their second teaching area. This major, together with a Business major articulates into a Master of Teaching postgraduate qualification in Secondary Teaching, and leads to opportunities for employment across Australia as well as internationally.

Location

Campus	Mode	Advice
Parramatta Campus - Victoria Road	Internal	Jaydene Barnes (https://directory.westernsydney.edu.au/search/email/j.barnes@westernsydney.edu.au)
Penrith Campus	Internal	Jaydene Barnes (https://directory.westernsydney.edu.au/search/email/j.barnes@westernsydney.edu.au)

Major Structure

Students must successfully complete 80 credit points as per the recommended sequence below.

All subjects in this major are 10 credit points and are arranged in pools of which the Secondary Teaching Pool is mandatory.

Students have a choice of either History and Political Thought, Geography and Urban Studies, Mathematics, Studies of Religion or English, as shown below.

Subject	Title	Credit Points
Students must complete the following four compulsory core subjects		
Secondary Teaching Pool		
IMPORTANT NOTE: Students must have successfully completed 160 credit points before enrolling in any of the following four post graduate subjects.		
TEAC 7004	Adolescent Development and Teaching	10

TEAC 7032	Diversity, Social Justice and Learning	10
TEAC 7027	Designing Teaching and Learning	10
TEAC 7108	Professional Practice Community Engagement	10
Total Credit Points		40

Students must then choose one of the following five areas

1. History and Political Thought or
2. Geography and Urban Studies or
3. Mathematics or
4. Studies of Religion or
5. English

See the below links for more structure details

History and Political Thought

Subject	Title	Credit Points
Important Note: To meet NESA subject area teaching requirements students who aim to qualify as modern history teachers must complete one subject of Ancient History. This may be attained by completing one of the following subjects: HUMN 2067 History of the Ancient World, HUMN 2011 Ancient Western Culture: Periclean Athens, or HUMN 3020 Catastrophe: The Environmental History of the Ancient and Modern World. It is also strongly recommended that students select at least one Australian history subject.		
Not all subjects will be offered each year. Subjects will be offered on a rotational basis.		
Students must complete one of the following:		10
HUMN 1054	When Worlds Collide: European Empires and the World, c.1600-1950	
HUMN 1039	Modern European History and Politics	
Students must then complete three subjects from the following pool:		30
HUMN 2067	History of the Ancient World	
HUMN 2001	A History of Modern Global Buddhism	
HUMN 2011	Ancient Western Culture: Periclean Athens	
LANG 2015	Cultural History of Books and Reading	
HUMN 2023	Empire: European Colonial Rule and its Subjects, 1750-1920	
HUMN 2034	Keeping the Past	
HUMN 2043	Religion and the Origins of Modern Science	
HUMN 3093	War	
HUMN 3013	Australian Colonial History	
HUMN 3109	Catastrophe: The Environmental History of the Ancient World	
HUMN 3026	Convicts and Settlers - Australian History 1788 - 1840	
HUMN 3087	Twentieth Century Australia	
HUMN 3104	Historical Methodologies	
HUMN 3092	WWII in Asia and the Pacific	
HUMN 3024	Comparative Nationalism	
HUMN 3036	Ethics in Historical Perspective	
HUMN 3015	Australian History Around Us	
Total Credit Points		40

Geography and Urban Studies

Subject	Title	Credit Points
Students must complete the following subjects:		
ENVL 2001	Analysis of Spatial Data	10

ENVL 3006	Transport, Access and Equity	10
Students must then complete two subjects from the following pool: 20		
HUMN 1008	Cities: Introduction to Urban Studies	
HUMN 2018	Cultural and Social Geographies	
HUMN 2053	The Economics of Cities and Regions	
HUMN 3041	Geographies of Migration	

Total Credit Points 40

Mathematics

Subject	Title	Credit Points
Students must complete the following for subjects:		
MATH 1014	Mathematics 1A	10
MATH 1015	Mathematics 1B	10
MATH 2001	Advanced Calculus	10
MATH 2010	Linear Algebra	10

Total Credit Points 40

Studies of Religion

Subject	Title	Credit Points
Students must complete at least one of the following subjects: 10		
HUMN 3075	Sociology of Religion	
PHIL 3016	Philosophy of Religion	
HUMN 3105	History of Religion	

Students must then complete three additional subjects. Additional 30 subjects to complete the minor can be chosen from the above three subjects or from the pool subjects listed below

HUMN 1061	Islam: Past, Present and Future	
HUMN 2031	Islam in the Modern World	
HUMN 2043	Religion and the Origins of Modern Science	
HUMN 2001	A History of Modern Global Buddhism	
HUMN 3047	History of Muslim Civilisations and Ideas	
HUMN 3061	Mystical Islam: The Emergence of Sufism in World History	

Total Credit Points 40

English

Subject	Title	Credit Points
Students must complete the following two subjects: 20		
COMM 1004	Approaches to Text	
LANG 1015	Introduction to Literary Studies	

Students must then complete two subjects from the following pool: 20

LANG 2035	Methods of Reading	
LANG 3094	The Value of Literature	
HUMN 2044	Representing Everyday Life in Literary and Visual Cultures	
LANG 3019	Children's and Young Adult Fiction	
LANG 3086	The Novel	
COMM 2020	Introduction to Film Studies	

Total Credit Points 40

Western Sydney University Major Code: T119

Previous Code: MT3041.1

Available to students in other Western Sydney University programs?
No

There is a high demand for mathematics teachers throughout Australia, with Western Sydney identified as a particular high-demand location by the NSW Department of Education. Building on the Bachelor of Mathematics, this major equips graduates with additional knowledge and skills in contemporary educational concepts. After completing the Bachelor of Mathematics (Secondary Education), graduates can enrol in a postgraduate course to become accredited teachers. The core subjects of the Bachelor of Mathematics meet the NESA requirements for Mathematics as a first teaching area, and students can choose elective subjects to qualify for another teaching area to gain additional options for employment.

Major Structure

All students must complete Education Studies, Minor (p. 787) plus four subjects from one of the alternate pools.

A minimum of 30 credit points at Level 3 is required across all Secondary Teaching major subjects.

Note: The core subjects of 3778 Bachelor of Mathematics meet the NESA requirements for Mathematics as a first teaching area.

Subject	Title	Credit Points
Students may choose four subjects from the following alternate pools 40		
Mathematics/Physics		
PHYS 1002	Physics 1	
PHYS 1006	Physics 2	
PHYS 2005	Classical Physics and Advanced Technologies	
PHYS 3007	Quantum Physics	
PHYS 3006	Classical Physics	

Note: In combination with the core subjects of 3778 Bachelor of Mathematics, completing four units from this pool meets the NESA requirements for Mathematics/Physics as a first teaching area.

Equivalent Subjects:

The subjects listed below count towards completion of this major for students who passed these subjects in 2020 or earlier.

CHEM 2003 Classical Physics and Advanced Technologies replaced by PHYS 2005 Classical Physics and Advanced Technologies

CHEM 3016 Quantum Physics replaced by PHYS 3007 Quantum Physics

The Social Ecology minor explores the rich diversity of relationships between the individual, society and environment. Social Ecology embraces a transdisciplinary approach to learning emphasising reflective thinking, criticality, creativity, participation and communication. Students develop skills in ecologically informed analysis, creative thinking and action, social and environmental relationships and transformative education with an emphasis on sustainability, social change and leadership. The minor in Social Ecology is available as an elective package to students across all

degrees. Students may also choose any Social Ecology subject as a single elective.

Social media is the pulse of the world. Analysing the enormous amount of data generated by such sites as Facebook, Twitter and LinkedIn can be used to inform business decisions and understand how and why society reacts to certain situations. This minor will introduce the statistical methods needed to analyse the data from these sites so that businesses are able to use the customer feedback received about their products to inform their business strategy and the impact social media has on society.

A minor in Social Research provides students with training in the methods and theories of social research for their application to social issues and social policy. In addition to interviewing and observation skills, quantitative analysis, spatial analysis, and Indigenous methodologies, the minor offers students the opportunity to apply these skills across a range of themes including ethnography, ethnicity and migration, urban planning and criminology. A Bachelor of Social Science with a minor in Social Research will prepare students for both employment and/or a research higher degree.

The major in Sociology provides students with a thorough training in the methods, theories and select leading areas of contemporary sociology. As well as subjects in which methods and theories are taught, through the social science core, students enrolled in the Sociology major will have opportunities to study a number of particular themes from a sociological perspective, including inequalities, deviance, identities, gender, religion, medicine and health care, ethnicity and migration, and the family, among other possibilities. A Bachelor of Social Science (BSS) with a major in Sociology will prepare students for both employment and a research higher degree.

Software Engineering, Testamur Major

Western Sydney University Major Code: T105

Previous Code: KT3175.1

Available to students in other Western Sydney University programs?
No

The Software Engineering major provides a solid foundation in theoretical knowledge on computer software systems with practical acquisition of relevant industry skills. The program examines the processes of software design, development and maintenance. It also covers software specification, analysis, design, testing, implementation and maintenance. The program is designed in response to the growing demand for innovative, reliable and efficient software systems which are utilized in a broad field of industries. The program is offered inside an industry hub which provides students with direct access and firsthand experience with these industries.

Sound Production, Minor

Western Sydney University Minor Code: 0242

Previous Code: SM1133.1

Available to students in other Western Sydney University

Programs: Yes, however the following restrictions apply.

The Sound Production minor equips students with fundamental skills and knowledge of current practice in music production, sound design, new electronic media, interactive electronic media, and their applications to music performance and composition. Two foundation level subjects present an overview of the basic concepts and practical applications of electronic and digital music technology to music production and sound design in current music and media arts practice. The minor's final two subjects build on this foundational knowledge, offering progressively more challenging instruction in music technology and its applied contexts. In these subjects, students will undertake self-directed technology-based projects as sound designers, composers and performers.

Sport Management, Testamur Major

Western Sydney University Major Code: T045

Previous Code: MT2036.1

Available to students in other Western Sydney University programs?
No

The Sport Management major is designed for people who seek careers in Australian and international Sport management. Specialist subjects provide students with a capacity to understand and function within the increasingly dedicated context in which sport is played, organised and managed. Students who complete this major will be equipped with the skills and knowledge to manage sport experiences

pertaining to globalisation and emerging contemporary issues in sport. Graduates find career employment at all levels of government as well as within the private sector for both commercial and non-commercial organisations. Positions include project management of facilities and events, management and coordination of leisure, sport and civic event departments, sport marketing, player management and sport public relations, elite sport development, sport and leisure programming.

Studies of Religion, Minor

Western Sydney University Minor Code: 0200

Previous Code: SM1136.1

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Studies of Religion is a multidisciplinary minor that provides a critical study of religion that is inclusive and diverse. Students will have the opportunity to develop their understanding of religion and explore the significance of religion to people and society. The minor includes subjects from history, philosophy and sociology. It examines the nature of religion and belief systems, including the influence, expression and relevance of religion and belief systems to contemporary Australia. This minor meets NSW Education Standards (NES) content requirements for students who wish to teach Studies of Religion in NSW Secondary Schools. The skills and knowledge acquired can also be used for career pathways in the public sector, teaching, research, curating, law or politics.

Minor Structure

To complete a minor in Studies of Religion, students are required to successfully complete 40 credit points as follows.

Note: Not all subjects will be offered each year. Subjects will be offered on a rotational basis. Not all subjects will be available on all campuses.

Students must complete at least one of the following subjects.

Subject	Title	Credit Points
HUMN 3075	Sociology of Religion	10
PHIL 3016	Philosophy of Religion	10
HUMN 3105	History of Religion	10

Additional subjects to complete the minor can be chosen from the above three subjects or from the pool subjects listed below.

Subject	Title	Credit Points
Level 1 Subject Pool		
HUMN 1061	Islam: Past, Present and Future	10
Level 2 Subject Pool		
HUMN 2031	Islam in the Modern World	10
HUMN 2043	Religion and the Origins of Modern Science	10
HUMN 2001	A History of Modern Global Buddhism	10
Level 3 Subject Pool		
HUMN 3047	History of Muslim Civilisations and Ideas	10
TEAC 7122	Science for Contemporary Learners	10

Equivalent subject

The subject listed below counts towards completion of this minor for students who passed the subject in 2020 or earlier.

HUMN 1047 - Understanding Islam and Muslim Societies

Sustainability Engineering, Testamur Major

Western Sydney University Major Code: T129

Previous Code: MT3050.1

Available to students in other Western Sydney University programs?
No

Engineers are leaders in developing novel approaches to solving the biggest challenges faced by environmental and interrelated systems. In this Major, students assess the impact of industrial development

then propose design solutions using holistic, futuristic and sustainable technologies and strategies. Through hands-on, real-life projects, students explore solutions that integrate technical, technological (IoT), social, cultural, geographical, regulatory and ethical factors particularly in relation to water, air and land. This major will benefit students aiming for careers such as Environmental Engineer/Scientist/Consultant, Natural Resources Manager, Waste Engineer/Manager/Consultant, and Sustainability Engineer/Manager/Consultant. This major includes a mandatory 300 to 450 hour industrial placement as a completion requirement.

Recommended Sequence

This major is included in Bachelor of Engineering Science, Bachelor of Engineering (Honours), Bachelor of Engineering Advanced (Honours) and Bachelor of Engineering (Honours)/Bachelor of Business.

Please follow the recommended sequence for your course as noted below.

Select the link for your program below to see details of the major

Bachelor of Engineering (Honours)

Qualification for this award requires the successful completion of 320 credit points, which include the subjects listed in the recommended sequence below.

*** All students undertaking the Bachelor of Engineering (Honours) are required to enrol in MATH 1021 Mathematics for Engineers Preliminary and undertake a readiness test at the beginning of their study.**

The readiness test will be conducted at the beginning of the first semester of enrolment and the result will be used to determine whether a student will remain in MATH 1021 Mathematics for Engineers Preliminary or be transferred by the School to MATH 1016 Mathematics for Engineers 1.

Students remaining in MATH 1021 Mathematics for Engineers Preliminary will be required to complete MATH 1016 Mathematics for Engineers 1 during second semester and will be encouraged to complete MATH 1019 Mathematics for Engineers 2 during the Summer session.

Available to students in other Western Sydney University

Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

Students undertaking this major will gain skills and knowledge to act on sustainability and social responsibility issues in business recognising the need for financial and business solutions to maintain a competitive edge. Acting on these issues, students enhance critical thinking and problem solving skills, justifying solutions and aligning with the principles of UN SDGs for complex and challenging scenarios that also address social and environmental concerns. Through business projects and research tasks, students build ethical and responsible characteristics, create innovative strategy, and develop skills in judgement, scenario planning and creativity for business environmental management.

Sustainable Environmental Futures, Testamur Major

Western Sydney University Major Code: T120

Previous code: MT3043.1

Available to students in other Western Sydney University programs?
No

This testamur major is available as an elective major for Bachelor of Medical Science students only.

Managing our environment sustainably requires professionals who are trained in new technologies across multiple disciplines, including biological and physical sciences, risk assessment, policy and management. Understanding how life interacts with water, soil and the atmosphere empowers us to develop sustainable management solutions for our most pressing environmental challenges. You will learn how to apply fundamental scientific knowledge to evaluate and mitigate the impacts of human activities on natural and managed ecosystems, including the built environment. You will have access to world class ecological and environmental research facilities, and will engage in hands-on, field-based learning, taught by a team at the cutting edge of research in this field. As a graduate, you are prepared for a career in environmental management, consultancy and biological conservation. All students must complete 60 credit points of study at Level 3 to meet course requirements. Students will need to select at least 10 credit points of elective study at Level 3 to meet this requirement.

Location

Total Credit Points		240

Diploma in Science/Bachelor of Science

Qualification for this award requires the successful completion of 250 credit points which include the units listed in the recommended sequence below.

Course	Title	Credit Points
Year 1		
Year 1: College Subjects		
Standard 3-term year		
Preparatory subject		
CHEM 0001	Chemistry (WSTC Prep)	10
Eight university-level subjects as follows:		
BIOS 1014	Cell Biology (WSTC)	10
CHEM 1006	Essential Chemistry 2 (WSTC)	10
NATS 1020	Scientific Literacy (WSTC)	10
CHEM 1009	Introductory Chemistry (WSTC)	10
BIOS 1003	Biodiversity (WSTC)	10
MATH 1027	Quantitative Thinking (WSTC)	10
BIOS 1034	Management of Aquatic Environments (WSTC)	10
One unit from the following (depending on the testamur major chosen)		
PROC 1003	Food Science 1 (WSTC)	10

BIOS 1023	Introduction to Human Biology (WSTC)	10
NATS 1021	Concepts in Human Physiology (WSTC)	10
ENVL 1003	Environmental Issues and Solutions (WSTC)	10
AGEN 1002	Water Quality Assessment and Management (WSTC)	10
NATS 1002	Concepts in Human Anatomy (WSTC)	10
Credit Points		140

Year 2**Autumn session**

NATS 2025	Natural Science Research Methods	10
ENVL 2007	Environmental Monitoring and Assessment	10
EART 2001	Climate Change Science	10
Select one elective		10
Credit Points		40

Spring session

BIOS 2008	Ecology	10

Systems Programming, Major

Western Sydney University Major Code: 0064

Previous Code: M3114.1

Available to students in other Western Sydney University programs?
No

This major aims to develop graduates with sound skills in the discipline of programming. The focus is on programming at the level of system calls to the underlying operating system and many of the subjects use the industry standard language for systems programming, namely C/C++, as the vehicle of instruction. There is a strong emphasis on the development of highly efficient and reliable code that can provide support services for higher level application oriented programs, as well as the development of programs suitable for systems administration and management. Practical work utilises the Unix environment. This major is appropriate where a career in systems programming or systems administration is planned, or where the student wishes to develop advanced systems programming skills.

Taxation, Testamur Major

Western Sydney University Major Code: T023

Previous Code: MT2038.1

Available to students in other Western Sydney University programs?
No

The Taxation major is available in the Bachelor of Accounting. The specialised subjects in this major analyse core and contemporary issues in taxation using case studies and discussion. The major is designed to meet the additional educational requirements for graduates to apply for registration as tax agents and tax (financial) advisers (subject to relevant work experience). Details regarding these

professional requirements can be found on the program 2783 Bachelor of Accounting (p. 16) page.

Location

Campus	Mode	Advice
Parramatta City Campus-Macquarie Street	Internal	Program Advice (https:// directory.westernsydney.edu.au/ search/email/ business.courses@westernsydney.edu.au)

Major Structure

Qualification for the major requires the successful completion of the eight subjects (80 credit points) below. The first four subjects listed are core subjects in 2783 Bachelor of Accounting. Students who select this major will have three electives remaining in their program.

Subject	Title	Credit Points
LAWS 4003	Advanced Taxation Law	10
LAWS 1001	Enterprise Law	10
LAWS 2005	Financial Services Law	10
LAWS 2010	Law of Business Organisations	10
JUST 2011	Law of Commercial Obligations	10
FINC 3014	Retirement and Succession Planning	10
LAWS 3067	Self-Managed Superannuation and Trusts	10
LAWS 3070	Taxation Law	10
Total Credit Points		80

Elective subjects can be chosen from among those subjects available within the University.

Technology Entrepreneurship, Major

Western Sydney University Major Code: 0261

Previous Code: M3126.1

Available to students in other Western Sydney University programs?

No

The Technology Entrepreneurship major is focused on guiding students through all stages of turning their innovative idea into a start-up company. In an entrepreneurial ecosystem, you will learn the knowledge and techniques for opportunity discovery, impact analysis, customer analysis, strategic team-building and leadership, the psychology and ethics of the start-up, funding modelling and financial analysis, growth and exit strategies. We will be helping you with defining your idea, forming a team around it, building a prototype, developing a pitch for investors and running a start-up company.

Tourism, Major

Western Sydney University Major Code: 0161

Previous Code: M1105.1

Available to students in other Western Sydney University

Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any

requisite requirements must also be met. Consult your Program Advisor for further advice.

The Tourism major introduces contemporary tourism issues and provides an in-depth understanding of tourism as a social phenomenon in a highly mobile world. Successful tourism planning and management relies on a full appreciation of the context in which it is operating. This suite of subjects enables a critical examination of the relationship between tourism and the assets which underpin it - the heritage of places - natural, social and cultural. It is these attributes which provide much of the incentive and attractions for travel, and which provide the business of tourism. Graduates with a tourism major can contemplate careers within a diverse range of government, non-government organization and businesses that require understanding, insight and skills related to tourism policy, planning and management.

No

The aim of the Tuberculosis Management major is to provide Registered Nurses with the specialist theoretical knowledge and critical thinking skills to prepare them for advanced practice in the clinical management of Tuberculosis among individuals and communities. Students will be able to align their career goals with their professional knowledge and skills in the major. Opportunities will be provided for students completing the Masters level major to synthesise and apply advanced nursing concepts through a capstone project relevant to their professional specialty area.

Graduate Diploma in Nursing (Tuberculosis Management) - 60 cp 1 year pathway

One year Pathway Structure

Qualification for this award requires the successful completion of 60 credit points including the subjects listed below

Subject	Title	Credit Points
PUBH 7021	Primary Health Care and its Applications	10
NURS 7050	Clinical Management of Tuberculosis (TB)	10
NURS 7058	Public Health Management of Tuberculosis (TB)	10
NURS 7049	Care of People with Tuberculosis (TB)	10
NURS 7023	Evidence Based Health Care	10
Select one elective		10
Total Credit Points		60

Graduate Diploma in Nursing (Tuberculosis Management) - 80 cp 1 year pathway

One year Pathway Structure

Qualification for this award requires the successful completion of 80 credit points including the subjects listed below

Subject	Title	Credit Points
PUBH 7021	Primary Health Care and its Applications	10
NURS 7050	Clinical Management of Tuberculosis (TB)	10
NURS 7058	Public Health Management of Tuberculosis (TB)	10
NURS 7049	Care of People with Tuberculosis (TB)	10
NURS 7023	Evidence Based Health Care	10
Select one alternate subject		10

Select two electives	20
Total Credit Points	80

Alternate subjects

Subject	Title	Credit Points
NURS 7019	Cultural and Social Diversity in Health Care	10
NURS 7065	Capstone Experience in Health Care	20

Replaced Subjects

The subjects listed below count towards completion of this Major for students who passed these subjects in Autumn 2021 or earlier.

NURS 7008 - Capstone Experience in Health Care, replaced by NURS 7065 Capstone Experience in Health Care

Master of Nursing (Tuberculosis Management) - 1 year pathway

One year Pathway Structure

Qualification for this award requires the successful completion of 80 credit points including the subjects listed below

Subject	Title	Credit Points
PUBH 7021	Primary Health Care and its Applications	10
NURS 7050	Clinical Management of Tuberculosis (TB)	10
NURS 7058	Public Health Management of Tuberculosis (TB)	10
NURS 7049	Care of People with Tuberculosis (TB)	10
NURS 7023	Evidence Based Health Care	10
NURS 7065	Capstone Experience in Health Care	20
Select one elective		10
Total Credit Points		80

Replaced Subjects

The subjects listed below count towards completion of this Major for students who passed these subjects in Autumn 2021 or earlier.

NURS 7008 - Capstone Experience in Health Care, replaced by NURS 7065 Capstone Experience in Health Care

Master of Nursing (Tuberculosis Management) - 1.5 year pathway

1.5 year Pathway Structure

Qualification for this award requires the successful completion of 120 credit points including the subjects listed below

Subject	Title	Credit Points
PUBH 7021	Primary Health Care and its Applications	10
NURS 7050	Clinical Management of Tuberculosis (TB)	10
NURS 7058	Public Health Management of Tuberculosis (TB)	10
NURS 7049	Care of People with Tuberculosis (TB)	10
NURS 7023	Evidence Based Health Care	10
NURS 7028	Leadership in Clinical Practice	10
NURS 7016	Collaborative Inquiry for Primary Health Care Action	10
NURS 7065	Capstone Experience in Health Care	20
Select three elective		30
Total Credit Points		120

Replaced Subjects

The subjects listed below count towards completion of this Major for students who passed these subjects in Autumn 2021 or earlier.

NURS 7008 - Capstone Experience in Health Care, replaced by NURS 7065 Capstone Experience in Health Care

Urban Studies, Major

Western Sydney University Major Code: 0162

Previous Code: M1106.1

Available to students in other Western Sydney University programs?

No

This major is available to students enrolled in the program Bachelor of Business (p. 75) from 2016. In the Urban Studies major you will examine the geography of contemporary Australian cities and regions. Urban Studies is focused on social justice within the city, through its critical assessments of peoples' access to scarce urban resources, such as housing, transport, education and employment. The political, economic, and cultural forces that shape cities and urban policy are the key concerns of the Urban Studies curriculum. These applied interests in urban wellbeing and city structure are basis for informed urban management.

Web and Mobile Computing, Testamur Major

Western Sydney University Major Code: T010

Previous Code: ST3082

Available to students in other Western Sydney University programs?

No

The widespread deployment of web and mobile devices has made them a target of choice for companies to carry out their everyday business. The contemporary developers are expected to understand the strengths and limitations of web and mobile technologies and fit these to create successful user-friendly web and/or mobile applications. This specialisation is aimed at developing knowledge and skills in theoretical concepts and practical technologies needed to design and develop complex software applications across a range of web and mobile platforms. Students with these knowledge and skills will have greater prospects of finding employment with reputable companies or building their career as self-employed developers.

Zoology, Testamur Major

Western Sydney University Major Code: T029

Previous code: MT3014.1

Available to students in other Western Sydney University programs?

No

This testamur major is available as an elective major for Bachelor of Medical Science students only.

A Zoology major provides you with the opportunity to study Australia's unique animals and their habitats. Zoologists have a detailed understanding of the diversity of the animal kingdom and are equipped with scientific understanding of how animals function and interact with their environment: ranging from their ecology, behaviour and evolution, to the physiology and biochemistry of cells, tissues and major organ systems. Zoology underpins conservation and sustainability, including major contributions to current research in climate change and ecosystem management. On-campus animal facilities include those for reptiles, small marsupials and rodents, sheep and cattle, as well as over 1000ha of native, rural and aquatic habitats with an abundance of native wildlife. Zoologists graduate with practical laboratory and fieldwork skills that prepare them for a wide variety of vocations in this field. All students must complete 60 credit points of study at Level 3 to meet program requirements. Students will need to select at least 10 credit points of elective study at Level 3 to meet this requirement.

Accounting (ACCT)

ACCT 0002 Accounting Fundamentals (WSTC) (5 Credit Points)

Legacy Code: 900010

Accounting is the practice of recording, classifying, summarising, analysing and interpreting information, of a commercial nature for the purpose of helping people make decisions. In the world of business, the role of accounting is to support management in providing timely and accurate financial information about the business so that informed decisions can be made. This unit examines the basic principles underpinning accounting and connects the accounting process to financial decision making for a business.

Level: Undergraduate Level 0 Preparatory subject

Equivalent Subjects: ACCT 0001 - Accounting Fundamentals (WSTC Prep)

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/acct0002/>)

ACCT 0003 Fundamentals of Finance and Accounting (10 Credit Points)**Legacy Code:** 201034

In this unit, students will be introduced to the fundamentals of finance and accounting for business. Students will learn to apply numerical skills within the areas of finance and accounting in preparation for post-graduate study. Financial information will be analysed and interpreted for the purpose of decision-making in a range of corporate contexts. Students will be required to demonstrate an understanding of ethical conduct and best practice reporting in undertaking financial and accounting processes.

Level: Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct0003/>)**ACCT 1001 Accounting Information for Managers (10 Credit Points)****Legacy Code:** 200101

This unit provides exposure to financial and management accounting information from the viewpoint of a non-accounting specialist. The unit aims to provide breadth of awareness and knowledge in relevant fields of accounting essential to decision making for managers.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** LGYA 9762 - Introduction to Financial Accounting ACCT 1004 - Accounting Reports and Decisions ACCT 1003 - Accounting Information for Managers (WSTC) ACCT 1002 - Accounting Information for Managers (Creative Industries) ACCT 1006 - Accounting in Context (WSTC)**Incompatible Subjects:** ACCT 1005 - Accounting in Context**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct1001/>)**ACCT 1003 Accounting Information for Managers (WSTC) (10 Credit Points)****Legacy Code:** 700005

This unit provides exposure to financial and management accounting information from the viewpoint of a non-accounting specialist. The unit aims to provide breadth of awareness and knowledge in relevant fields of accounting essential to decision making for managers.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** ACCT 1001 - Accounting Information for Managers**Incompatible Subjects:** ACCT 1005 Accounting in Context ACCT 1006 Accounting in Context (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct1003/>)**ACCT 1005 Accounting in Context (10 Credit Points)****Legacy Code:** 200972

Accounting in Context is the first core unit required in the accredited accounting program, but can be included as an elective in other courses. It is designed to provide an overarching context about the purpose and usefulness of accounting information and explain a range of definitions and terms used in accounting and business. Accounting in Context will introduce accounting reports and their interpretation, and explore the impact of policy and measurement methods on accounting information and business decisions. Successful completion of the unit will equip participants with an understanding of the importance of accounting to society and allow them to engage with the next core accounting unit; Financial Accounting Applications.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** ACCT 1006 - Accounting in Context (WSTC) ACCT 1004 - Accounting Reports and Decisions ACCT 1003 - Accounting Information for Managers (WSTC) ACCT 1002 - Accounting Information for Managers (Creative Industries) LGYA 9762 - Introductory Financial Accounting**Incompatible Subjects:** ACCT 1001 - Accounting Information for Managers**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct1005/>)**ACCT 1006 Accounting in Context (WSTC) (10 Credit Points)****Legacy Code:** 700274

Level: Undergraduate Level 1 subject**Pre-requisite(s):** ACCT 0001**Equivalent Subjects:** ACCT 1005 - Accounting in Context ACCT 1001 - Accounting Information for Managers LGYA 9762 - Introduction to Financial Accounting ACCT 1004 - Accounting Reports and Decisions ACCT 1002 - Accounting Information for Managers (Creative Industries) ACCT 1003 - Accounting Information for Managers (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct1006/>)**ACCT 1007 Financial Accounting Applications (10 Credit Points)****Legacy Code:** 200111

This unit gives students the practical skills necessary to analyse the accounting transactions of an entity, and then be able to measure and record these transactions in a systematic manner for the preparation of simple financial statements.

Level: Undergraduate Level 1 subject**Pre-requisite(s):** ACCT 1001 OR

ACCT 1005

Equivalent Subjects: LGYB 3521 - Introductory Financial Accounting ACCT 1008 - Financial Accounting Applications (UWSC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct1007/>)

ACCT 1008 Financial Accounting Applications (WSTC) (10 Credit Points)**Legacy Code:** 700029

This unit gives students the practical skills necessary to analyse the accounting transactions of an entity, and then be able to measure and record these transactions in a systematic manner for the preparation of simple financial statements.

Level: Undergraduate Level 1 subject**Pre-requisite(s):** ACCT 1006**Equivalent Subjects:** ACCT 1007 - Financial Accounting Applications**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct1008/>)**ACCT 2001 Contemporary Management Accounting (10 Credit Points)****Legacy Code:** 200108

This unit critically examines the limitations of traditional management accounting techniques and consider the factors that influence the design of management accounting systems (MAS) and choice of management accounting technique in the contemporary business environment.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** FINC 1001**Equivalent Subjects:** LGYA 9774 - Advanced Management Accounting LGYB 3530 - Advanced Management Accounting (V1) LGYB 8951 - Management Accounting**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct2001/>)**ACCT 2003 Financial Statement Analysis (UG) (10 Credit Points)****Legacy Code:** 200582

This unit provides a substantial grounding in the theories and practices of financial statement analysis so as to enable the student to make knowledgeable decisions relating to the financial analysis of firms. Topics covered include an overview of financial reporting, income vs cash flows, overview of financial statement analysis, data issues in analysing financial statements, GAAP and income recognition and asset valuation, GAAP and liability recognition and related expenses, GAAP inter-corporate entities, profitability analysis, risk analysis, pro forma financial statements, valuation using cash flows and valuation using earnings.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** ACCT 2002 - Financial Statement Analysis**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct2003/>)**ACCT 2004 Intermediate Financial Accounting (10 Credit Points)****Legacy Code:** 200536

This unit extends the knowledge and understanding of financial accounting through the application of problem solving to selected entities drawing upon accounting theory and critical analysis.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** ACCT 1007**Equivalent Subjects:** ACCT 3008 - Financial Accounting Issues LGYA 9763 - The Anatomy of Financial Accounting**Incompatible Subjects:** LGYB 3531 - Advanced Financial Accounting LGYB 8985 - Financial Accounting 3**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct2004/>)**ACCT 2005 Techniques in Financial Accounting (10 Credit Points)****Legacy Code:** 200973

Techniques in Financial Accounting is the third unit in the financial accounting stream and builds upon Financial Accounting Applications as part of the accredited accounting program. It introduces a company as a business structure and the accounting requirements for their formation and operations. The unit advances tools required for accurate record keeping leading to compilation of financial statements. The unit teaches participants how to account for receivables and payables, the disposal of non-current assets, and preparation of cash flow statements. Successful completion of the unit will equip participants with a practical and theoretical understanding of usefulness of general purpose financial reports.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** ACCT 1007**Incompatible Subjects:** ACCT 2004 Intermediate Financial Accounting
Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct2005/>)**ACCT 3001 Accounting Information Systems (10 Credit Points)****Legacy Code:** 200534

This unit considers the design and implementation of accounting information systems as a data model for resource allocation and management of an organisation. It includes consideration of current trends in information management and the changing regulatory requirements.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** FINC 1001**Equivalent Subjects:** LGYB 3524 - Accounting Information Systems LGYA 9783 - Accounting Information Systems ACCT 3010 - Issues in Accounting Information Systems**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct3001/>)**ACCT 3003 Accounting Standards and Governance (10 Credit Points)****Legacy Code:** 200974

This unit builds on the first and second year accounting units, exploring financial reporting issues in greater depth and challenging students to question the foundations of financial reporting. Based on International Financial Reporting Standards (IFRS) and the Australian Accounting Standards Board equivalents (AASB), topics include the regulatory, theoretical and conceptual foundations of financial reporting; corporate social responsibility; accounting for revenue, expenses, liabilities, equity and intangibles; recognition, measurement, revaluation and impairment of different types of assets; accounting for leases; Accounting for financial instruments: accounting for employee benefits; revenue recognition and other comprehensive income; and financial statement analysis. The unit develops graduate capabilities centred upon critical thinking skills, technical skills and professional judgement and their application for solving practical financial reporting and environmental social governance issues.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ACCT 2005**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct3003/>)

ACCT 3004 Advanced Accounting (10 Credit Points)**Legacy Code:** 200267

This unit addresses the advanced aspects of accounting. Accounting theories are discussed in terms of how they assist us in understanding current accounting practice and accounting standards. In addition, theoretical concepts are applied to current news and real world events.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ACCT 3007**Equivalent Subjects:** ACCT 3002 - Accounting Philosophies and Theories LGYB 3531 - Advanced Financial Accounting (V1)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct3004/>)**ACCT 3006 Auditing and Assurance Services (10 Credit Points)****Legacy Code:** 200535

This unit studies the roles and responsibilities of the auditor, auditing principles and standards and the application of those standards, particularly in an electronic environment.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ACCT 3007**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct3006/>)**ACCT 3007 Corporate Accounting Systems (10 Credit Points)****Legacy Code:** 200109

This unit builds on the fundamental knowledge of accounting procedures gained in prerequisite units. It involves the comprehensive study of aspects of corporate accounting and reporting which are regulated by legislation, accounting standards, Australian Securities and Investment Commission and Stock Exchange requirements. This unit is designed to provide students with grounding in the regulation and practice of corporate reporting in Australia. The major orientation is towards the theoretical and practical aspects of corporate reporting, whilst at the same time exploring the reasons for regulatory disclosures.

Level: Undergraduate Level 3 subject**Co-requisite(s):** ACCT 2004 OR ACCT 3003**Equivalent Subjects:** LGYB 3525 Corporate Accounting LGYB 8944 Corporate Accounting LGYA 9764 Corporate Accounting**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct3007/>)**ACCT 3009 Incubator 4: Commercial and Financial Setting of Entrepreneurship (10 Credit Points)****Legacy Code:** 301169

Operating a start-up is not just about being creative and innovative; it is also about having the necessary management and operational skills, understanding the commercial and financial setting within which the organisation needs to operate it. This unit aims to provide vital details that set the background to run your organisation whether your customer base is local, national or even international. This objective is driven through a number of topics such as: setting up a business entity, accounting fundamentals, taxation fundamentals. The unit will be delivered through a number of modules. As a vital part of the unit, students are expected to engage and work in "start-up co-working space" on a regular basis. At the successful completion of this unit, students would set up as a business entity for their start-up organisation.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct3009/>)**ACCT 3011 The Accountant as a Consultant (10 Credit Points)****Legacy Code:** 200118

This unit aims to provide students with a 'hands on' flexible and practical work integrated learning (WIL) experience in the Accounting degree. This is mainly done through working in groups on projects as accountants would do when they engage with clients and entrepreneurs as professional consultants. Students come to understand the role of an accountant in the effective management of the business to sustain, grow and expand the business to higher levels consulting problems involving a wide range of business related issues. This unit is designed to give students an opportunity to apply the theoretical knowledge gained in other units in their degree program thus enabling them to bring knowledge to life. On successful completion of this unit students will be able to appreciate the relevance of their business subjects/units in real business situations and to become business consultants.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ACCT 2001**Equivalent Subjects:** LGYB 8986 - The Accountant as a Management Consultant**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct3011/>)**ACCT 7002 Accounting Professional Engagement (10 Credit Points)****Legacy Code:** 200693

This unit aims to provide students with a 'hands on' flexible and practical work integrated learning experience in the Accounting degree. This unit focuses on the role that accountants play in the effective management of businesses. Appropriate accounting research methods are used to investigate and report on problems and "real" case studies involving a wide range of business related issues. This is mainly done through working as groups on projects as accountants do when they engage with clients and entrepreneurs as professional consultants.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** ACCT 7005**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct7002/>)

ACCT 7005 Accounting Theory and Applications (10 Credit Points)**Legacy Code:** 200401

Basic questions of the role accounting performs in society are considered from economic, social and environmental perspectives. The nature of the statements advanced to give accounting legitimacy, together with their philosophical underpinnings, are examined. Selected accounting theories and philosophies will be examined and advanced applications in alternative accounting models considered. Accounting research and appropriate methodologies are introduced.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** ACCT 7010**Equivalent Subjects:** LGYA 8980 - Financial Accounting D (PG)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct7005/>)**ACCT 7007 Accounting: A Business Perspective (10 Credit Points)****Legacy Code:** 200495

Accounting: A Business Perspective focuses on the analytical uses of accounting information by managers. It emphasizes the role of both financial and management accounting in measuring, processing and communicating information that is useful in making economic decisions

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** ACCT 7001 - Accounting Perspectives for Management**Incompatible Subjects:** ACCT 7018 - Introductory Accounting**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct7007/>)**ACCT 7009 Auditing (10 Credit Points)****Legacy Code:** 200398

The aim of this unit is to introduce students to the practice of auditing and the underlying concepts, auditor's responsibilities and the audit environment. The focus of attention is on audits carried out under the provisions of corporations legislation and reference is also made to other forms of audit. The unit uses blended learning and case study approaches and students will learn to apply professional, ethical and legal requirements and responsibilities in completing and reporting on auditing and assurance tasks.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** ACCT 7010**Equivalent Subjects:** LGYA 8983 - Auditing (PG)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct7009/>)**ACCT 7010 Company Accounting (10 Credit Points)****Legacy Code:** 200400

The aim of this unit is to extend the fundamental accounting skills gained in Introductory Accounting to application of the more advanced accounting and reporting issues created by corporate structures. Students will learn how to prepare consolidated financial statements, with associated disclosures, to ensure compliance with accounting standards, corporations legislation and Australian Stock Exchange (ASX) requirements. Through a range of practical individual and collaborative means students will explore corporate accountability and the reasons for regulatory disclosure.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** ACCT 7018**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct7010/>)**ACCT 7012 Corporate Finance (10 Credit Points)****Legacy Code:** 200426

As an introductory finance unit, Corporate Finance introduces students to the fundamental concepts of finance theory - the time value of money, risk and return, capital budgeting and capital structure - and to the tools of financial decision-making in the context of the Australian institutional environment. Students examine the investment, financing and dividend decisions of corporations and develop an understanding of the basic practices of financial management from the perspective of both large and small firms.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 8876 - Finance LGYA 8986 - Corporate Finance (PG)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct7012/>)**ACCT 7013 Financial Decision Making (10 Credit Points)****Legacy Code:** 200784

Students will gain financial literacy through practical understanding of the information contained in financial reports. Appreciating the variety of uses of accounting information for planning and controlling enhances the ability to extract relevant data. This unit emphasises the function of both financial and management accounting in measuring, processing and communicating information useful for decision making.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** ACCT 7001 - Accounting Perspectives for Managers**Incompatible Subjects:** ACCT 7018 -Introductory Accounting

ACCT 7007 - Accounting A Business Perspective

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct7013/>)**ACCT 7015 Financial Reports for Decision Making (10 Credit Points)****Legacy Code:** 200821

This unit focuses on developing the ability to use accounting information, as extracted from financial reports, to assist with managerial decision making. Students will gain financial literacy through developing an understanding of the information contained in financial reports and applying this information to practical decisions. This unit emphasises the function of both financial and management accounting in measuring, processing and communicating information useful for decision making.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct7015/>)

ACCT 7016 Information Systems for Accountants (10 Credit Points)**Legacy Code:** 200399

The aim of this unit is to examine the theory and application of information technology on the accounting discipline. This unit covers principles of systems analysis, design and database management relating to accounting information systems. The functions, control, data and processes of accounting information systems are discussed in the context of businesses. Students learn about the communication of accounting information through the internet and explore further the development of integrated systems using a blended learning design approach.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** ACCT 7018**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct7016/>)**ACCT 7018 Introductory Accounting (10 Credit Points)****Legacy Code:** 200396

The aim of this unit is to provide a comprehensive introduction to contemporary financial accounting. This is an essential component in the understanding of the production and use of accounting information in business. This unit applies accounting concepts, standards and principles enabling students to be competent in the technical skills in accounting which is a fundamental tool for making economic decisions and for analysing and solving business problems. Students will learn to apply such concepts, standards and principles through a range of individual and collaborative means using a blended learning design that draws on current and future trends in the broad international context.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 8941 - Financial Accounting A LGYA 8966 - Financial Accounting B**Incompatible Subjects:** ACCT 7007 - Accounting A Business Perspective (PG) ACCT 7015 - Financial Reports for Decision Making**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct7018/>)**ACCT 7019 Management Accounting (10 Credit Points)****Legacy Code:** 200494

The fundamental purpose of any management accounting system in an organisation is to provide appropriate information for (i) costing of products and services; (ii) support functions such as planning, controlling, evaluation, continuous improvement and decision making; and (iii) competitive support. This provides financial and non-financial services to the management team to enhance the firm's competitiveness. The unit is designed to provide an understanding of these areas of information through applying concepts, theories and models in a range of individual and collaborative activities.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** ACCT 7018**Equivalent Subjects:** LGYA 89821 - Management Accounting (PG)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct7019/>)**ACCT 7026 Behavioural Finance (PG) (10 Credit Points)****Legacy Code:** 201038

Cognitive biases and emotional influences have the potential to influence the decision-making of advisors, managers and investors. This unit provides students with the skills to advise clients such that their investment decisions are soundly based. Various biases and influences are introduced to students to demonstrate how they undermine rational investment decision-making. Students are then taught how to apply methods that advisers can use to overcome and correct these biases. Ensuring clients are fully educated about investment decisions is integral to the investment process, and necessary to ensure advisers meet the best interest duty of their profession. This unit is available as a stand-alone bridging unit which is accredited by the Financial Adviser Standards and Ethics Authority (FASEA) having met the FASEA curriculum and standards requirements.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct7026/>)**ACCT 9001 Higher Degree Research Thesis - Accounting (20 Credit Points)****Legacy Code:** 800031**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/acct9001/>)

Agriculture (AGRI)

AGRI 1003 Animal Science (10 Credit Points)**Legacy Code:** 300801

This unit will provide students with an understanding of comparative physiological and anatomical concepts of a range of mammalian and avian species. Students will develop the skills to apply these concepts in practical situations through the use of field observations and the relationship of these to functional anatomy and physiology of production animals. In addition students will develop many of the principles and concepts employed in animal production. Concepts discussed in lectures are reinforced by practical classes held in the laboratory and in the outdoor laboratories.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** AGRI 1002 - Animal Science**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/agri1003/>)

AGRI 1004 Feeding the Planet (10 Credit Points)**Legacy Code:** 300804

This unit will explore the concepts driving current food production science (population growth, urbanization, emerging affluence, resource constraints, and underlying biological limits) in terms of their universal life cycles, constraints to production and societal issues. Throughout the unit, key questions will be addressed: What are the major health benefits and potential concerns regarding the intensification of production and consumption of food? How does agricultural production affect the efficient use of resources and impact our environment? Can costs of production be reduced to meet the growing demand for food products around the globe while maintaining health and safety for consumers? What are the different types of food production systems? Myths and misconceptions surrounding the food systems will be discussed and analysed. The unit is geared towards learners who seek a greater understanding of food systems and have a desire to learn more about issues surrounding sustainability.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** LGYA 6095 - Primary Production**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/agri1004/>)**AGRI 1005 Human Animal Interactions (10 Credit Points)****Legacy Code:** 300807

This unit introduces students to the varying relationships between humans and animals including domestication, the role of animals for companionship, as workers, the traditional role of animals in agriculture, wildlife and zoo animals and their increasingly recognised aesthetic and therapeutic roles. Students will work with a variety of domesticated animals, captive native mammals, and reptiles on-campus, and in a variety of animal industries off campus, including wildlife parks and zoos. The unit includes a balance of theoretical and practical work in the areas of behaviour and handling, basic husbandry, health care, and ethical management.

Level: Undergraduate Level 1 subject**Incompatible Subjects:** AGRI 1006 - Introduction to Animal Science
AGRI 1007 - Human Animal Interactions**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/agri1005/>)**AGRI 1009 Wildlife Studies (10 Credit Points)****Legacy Code:** 300813

This unit involves the study of basic biology, ecology, conservation and management of selected wildlife. Students will learn different management systems and research methods used in the conservation and management of wildlife. The use of wildlife as a sustainable resource will also be analysed within the context of ecological sustainable development and animal ethics.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** AGRI 1008 - Introduction to Wildlife Studies**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/agri1009/>)**AGRI 1010 Protected Cropping Climate Control and Technology (10 Credit Points)****Legacy Code:** 301263

This unit will teach students the intricacies of crop management in a highly controlled growing environment and the interplay between environmental response and plant behavior. In doing so, it will incorporate one nationally recognized unit of competency, "AHCPT503 - Manage a controlled growing environment". Students will also identify controlled environment technologies including those available, under-development and being researched, such as robotics, sensors and gene technologies. Students will gain an appreciation for the science and technology that drives high-tech greenhouse production and apply their skills in Western Sydney University's state of the art National Vegetable and Protected Cropping Centre (NVPC) and its PRIVA operating system at the Hawkesbury campus.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/agri1010/>)**AGRI 2001 Agronomy (10 Credit Points)****Legacy Code:** 300863

This unit enables students to develop understanding of basic crop and pasture agronomy including plant identification, crop/pasture establishment, growth, development, adaptation, plant protection, and grazing management. Students manage a crop in the field and a pot trial in the glasshouse and interact with researchers and industry professionals in understanding broad principles involved in the production and management of crops, pasture and animal production issues. The practical sessions enable students to apply the management principles and become familiar with various measuring techniques.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LGYA 6118 - Agronomy**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/agri2001/>)**AGRI 2003 Animal Health and Welfare (10 Credit Points)****Legacy Code:** 300834

This unit will introduce students to the major issues related to animal health and welfare that form essential knowledge for those working with animals. In particular, students will gain an understanding of disease and methods for disease control as well as an introduction to disease diagnosis. In addition, students will gain knowledge about the relationships between animal management and the health and welfare expectations for domesticated and wild animals. The causes of common animal diseases will be introduced as well as the legal obligations of those owning, working or observing animals with respect to maintaining and monitoring their health and welfare.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** BIOS 1001**Equivalent Subjects:** AGRI 2002 - Animal Health and Welfare**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/agri2003/>)

AGRI 2004 Animal Reproduction (10 Credit Points)**Legacy Code:** 300835

Reproduction is the origin of life. The aim of this unit is to provide students with a sound understanding of reproduction of both domestic and non domestic animals so that they can design and manage a breeding program for a species of choice. Topics will include anatomy and physiology of male and female reproductive tracts; hormonal control of reproduction; fertilisation, pregnancy, parturition and lactation and advanced reproductive technologies. These topics will be explored in a range of species across different taxonomic groups.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LGYB 3711 - Equine Reproduction and Stud Management AGRI 3006 - Animal Reproduction**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/agri2004/>)**AGRI 2005 Sustainable Food Production (10 Credit Points)****Legacy Code:** 300791

Sustainable Food Production provides students with the knowledge and skills required to analyse current and future food production systems with an emphasis on water and energy efficiency. The subject material integrates agronomic principles with food supply chain analysis. This approach facilitates an analytical framework that goes beyond farm-gate productivity by including aspects of the food supply chain. Key concepts include water use efficiency, nitrogen balance, energy balance, life cycle assessment, and greenhouse gas emissions. Case studies will be drawn from a range of food production systems, emphasising productivity per unit of input.

Level: Undergraduate Level 2 subject**Incompatible Subjects:** LGYA 6125 - Advances in Agonomy**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/agri2005/>)**AGRI 2006 Agriculture, Food and Health (10 Credit Points)**

This unit is designed to strengthen student understanding of the important interactions between food, agriculture, environment and health. Traditionally the topics of food, agriculture, environment and health have been taught mainly in isolation from each other. It is becoming increasingly apparent that this traditional approach bears little relevance to real world issues and in some cases acts as an impediment to progress. Alternatives to the current 'western industrialised' food production system will be explored. These include organic agriculture, local farmer markets, and consumer driven changes to food production systems.

Level: Undergraduate Level 2 subject**Incompatible Subjects:** LGYA 6185 - Ecology of Production**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/agri2006/>)**AGRI 2007 Introduction to Agrifood (10 Credit Points)**

This unit introduces the concepts driving current food production science in terms of universal life cycles, constraints to production and societal issues. Throughout the unit, key questions will be addressed: What are the major health benefits and potential concerns regarding the intensification of production and consumption of food? How does agricultural production affect the efficient use of resources and impact our environment? Can costs of production be reduced to meet the growing demand for food products around the globe while maintaining health and safety for consumers? What are the different types of food production systems? The unit is geared towards learners who seek a greater understanding of food systems and have a desire to learn more about issues surrounding sustainability.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/agri2007/>)**AGRI 3001 Analysis of Agricultural Supply and Demand (10 Credit Points)****Legacy Code:** 301098

Students will develop understanding of the integrated nature of the agri-food value chain (supply and demand) from economic, environmental and social perspectives. Integrative processes and tools from established value chains will be evaluated in the context of changing consumer sentiment. Through analysis of economic and environmental gains (e.g. water and energy savings), students will identify emerging opportunities and challenges for improved and/or alternative food distribution systems. Analytical and reporting tools will be used to develop competence in data management, with emphasis on increasing communication from consumer to producer.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYA 6131 - Analysis of Agricultural Supply Chains**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/agri3001/>)**AGRI 3002 Animal Nutrition and Feeding (10 Credit Points)****Legacy Code:** 300853

Animal nutrition and feeding is fundamental to many aspects of animal production and wildlife systems. This unit aims to provide students with knowledge of nutrient requirements for different types of animals and the nutrient composition of common feeds. Students will evaluate and formulate rations to meet a range of animal requirements at different stages of growth, reproduction, lactation and production.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** AGRI 3003 - Animal Nutrition and Feeding**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/agri3002/>)

AGRI 3005 Animal Production (10 Credit Points)**Legacy Code:** 300854

Animal production is about producing animals for food, companionship and conservation. This unit aims to develop an understanding of the major animal production systems used for food and fibre and other resources in Australia (intensive and wildlife), and to apply this knowledge to improving problematic issues and understanding topical issues. Topics will focus on the application of animal production principles to these production systems.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** AGRI 3004 - Animal Production**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/agri3005/>)**AGRI 3007 Water in the Landscape (10 Credit Points)****Legacy Code:** 300870

Many land and water use activities in both urban and rural landscape result in hydrologic changes that have environmental, economic and social consequences. These activities require appropriate management strategies for sustainable water use in catchment. In this unit, the hydrologic cycle will be explored at varying spatial scales in urban and rural contexts. Hydrologic, environmental, economic and social perspectives will be used in the examination of the demand and the use of water.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYA 6246 - Water in the Landscape**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/agri3007/>)**AGRI 3008 Animal Health, Ethics and Welfare (10 Credit Points)****Legacy Code:** 301255

This unit will ensure students will be able to evaluate the major issues related to animal health, welfare and ethical frameworks that govern working with animals. In particular, students will gain knowledge of the diseases impacting animals and methods for disease diagnosis and control. In addition, students will apply this knowledge to the relationships between animal management and the health and welfare expectations for domesticated and wild animals. The legal obligations of the impact of legislative regulation for those owning, working or observing animals with respect to approval processes, maintaining and monitoring animal health and welfare is also addressed. Students may need to travel to another campus to complete this unit.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BIOS 1001 AND

AGRI 1003

Incompatible Subjects: AGRI 2002 Animal Health and Welfare

AGRI 2003 Animal Health and Welfare

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/agri3008/>)**AGRI 3009 Agricultural Technology (10 Credit Points)**

Agricultural Biotechnology is rapidly developing and this unit will assure you the knowledge and skills that contribute to the future of sustainable food production. The subject material integrates agronomic principles with current and emerging biotechnology, highlighting issues and solutions based around case studies. This approach facilitates an analytical framework that goes beyond traditional production systems including eco-farming, life-cycle and regenerative agriculture, along with development of innovative and integrated production and waste systems. Key concepts include sustainable resource use, nitrogen balance, energy efficiency, and greenhouse gas emissions and market analysis.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/agri3009/>)**AGRI 7001 Agricultural Biosecurity (10 Credit Points)**

Biosecurity is a set of measures to prevent, respond to and recover crops and livestock from pests and diseases that threaten the economy and environment. Comprehensive biosecurity systems help ensure food security and food safety, which is crucial for community health, competitiveness for agricultural export and conservation of natural environments. This unit studies the epidemiologic triangle consisting of the host, disease and the environment in which the disease develops, and the series of measures and practices to detect and prevent entry and spread of pests, diseases and weeds. The potential for future biosecurity mega shocks to the agricultural industry, preparedness for rapid emergency responses to an exotic incursion, and management of invasion of pests and diseases will be discussed.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/agri7001/>)**AGRI 7002 Agricultural Biotechnology (10 Credit Points)**

Biotechnology is a powerful enabling technology that is revolutionising agriculture by delivering improved productivity and nutrition, better management of pests and diseases, improved ability to cope with environmental challenges, and development and production of medicines and functional products. The discovery and applications of gene editing by CRISPR-Cas technology as well as modification of organisms using recombinant DNA, RNAi and other molecular technologies are seen as key to providing solutions to global food crisis, climate change associated disasters and health and disease-related issues. This unit focuses on modern and cutting-edge techniques used in cell culture and tissue engineering, genome editing, transformation and transgenesis, rapid breeding and selection and synthetic biology to address contemporary issues in sustainable agriculture.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/agri7002/>)

AGRI 7003 Agricultural Technologies (10 Credit Points)

This unit will provide students with knowledge and practical experience of new technologies associated with broad-acre and intensive cropping and pastures, and their role in mixed farming systems. A major focus of this unit is how new technologies such as drones, machine learning, remote sensing and imaging science technologies are contributing to more productive and sustainable land management systems.

The advanced agronomy component of the unit will explore keys to successful crop and pasture management - recognising variability in performance within the paddock and farm, diagnosing the underlying causes of spatial and temporal variability, and using precision agriculture tools to produce better informed enterprise management decisions, plant yield, sustainability and quality for end-users.

Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/agri7003/>)

AGRI 7004 Livestock Production Systems (10 Credit Points)

This unit covers the principles of animal production required to develop sustainable and efficient production systems to meet the challenges of domestic and global needs. It will cover the scientific principles (biochemical, anatomical and physiological) that underpin intensive and extensive animal production. These principles will be related to key production parameters and indicators including growth, reproduction, lactation and milk production, fibre production and breeding. Students will apply scientific principles to the planning of production in farming simulation models. Through these simulation programs students will explore production case studies and develop advisory plans. Focus areas include animal health and management, whole farm production systems and the challenges to animal production from changing climate, food safety and quality, consumer requirements and animal welfare.

Architecture and Urban Envir. (ARCH)

ARCH 1003 Graphic Communication and Design (WSTC) (10 Credit Points)

Legacy Code: 700150

This unit has been replaced by 700306 Drawing and CAD (WSTC) from Spring 2021. This unit is designed to provide students with the knowledge and skills necessary to develop graphic communication, basic CAD skills and elementary design skills suitable for application within the building industry. This unit provides students with an introduction to elements of graphic communication skills necessary to comprehend various building types in plan, section, elevation, isometric and perspective views. The unit also introduces students to basic CAD (Computer Aided Design and Drafting) concepts and skills. Students will also be required to develop appropriate analytical and problem solving skills in dealing with a realistic building project.

Level: Undergraduate Level 1 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/arch1003/>)

ARCH 1004 Drawing and CAD (10 Credit Points)

Legacy Code: 301228

This unit is designed to provide students with the knowledge and skills necessary to develop elementary design skills and basic CAD (Computer Aided Design) proficiency suitable for application within the building industry. Students will learn to describe building designs in plan, section, elevation, isometric and perspective views. Basic drafting concepts and skills will be acquired in the context of individual detached housing designs. Students will also be required to develop appropriate analytical and problem solving skills in dealing with a realistic house building project.

Level: Undergraduate Level 1 subject

Equivalent Subjects: ARCH 1003 Graphic Communication and Design (WSTC)

ARCH 1001 Graphic Communication and Design

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/arch1005/>)

ARCH 2001 Architecture Studio - Fundamentals of Analogue Design (20 Credit Points)**Legacy Code:** 301197

This unit will introduce students to fundamentals of spatial composition as it relates to visual and temporal experience in architectural contexts. Project-based assessments will involve the creation of 2D and 3D compositions that explore traditional organisational strategies, classical principles of geometry, materiality, experiential phenomena, and representation. Students will work with analogue and traditional tools including freehand drawing and conventional shop equipment. The unit will also provide an introduction to the history, theory, and discourse of architecture from 4000BC to the Enlightenment.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/arch2001/>)**ARCH 2002 Architecture Studio - Fundamentals of Digital Design (20 Credit Points)****Legacy Code:** 301198

This unit introduces students to fundamentals of spatial organisation and human experience in the built environment. Principles of making will be practiced and analysed for their relationship to architectural outcomes, the study of Modern organisational strategies, materiality, experiential phenomena, and abstraction. Students work on project-based assessments that involve an iterative process of reflection and refinement, the use of digital techniques of 3D design including NURBS modelling and rapid prototyping to explore architectural concepts. This work is contextualised as students learn about the history, theory, and discourse of architecture from the Industrial Revolution to the Present.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/arch2002/>)**ARCH 2003 Development Control (10 Credit Points)****Legacy Code:** 300723

This unit provides an overview of development control and associated legislation. These include: interpretation of planning law as it relates to the development application process; the assessment of applications for approval for development as an integrated process; the evaluation of the impact assessment process; appropriate consideration of urban design, streetscape, heritage and conservation issues; and the evaluation of the impact of parking, traffic, landscape and services in development proposals.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** ARCH 2004 - Development Control**Incompatible Subjects:** BLDG 1012 - Property Development Controls**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/arch2003/>)**ARCH 3002 Architecture Studio - Global Cities (20 Credit Points)****Legacy Code:** 301201

This unit will situate learning in the context of the Global City.

Projects will be used to investigate scenarios that are common to the contemporary condition of the developing world and the expanding metropolis in various international contexts. Students will either travel to international sites, work with international partners, or work remotely on problems beyond the Australian context. Work integrated learning will be a key feature of the Global Cities studio and will involve relevant members of the professional community to help lead studio investigations. Assessments will include complex urban projects at a large scale, developed using the design, communications, technical, and theoretical studies that have underpinned their education.

Assessments will be project-based in real world scenarios and will incorporate sustainable strategies of design. Studies will be supplemented by tuition in structural design and will also be informed by concurrent studies in building science.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ARCH 3004 AND

ARCH 3003

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/arch3002/>)**ARCH 3003 Architecture Studio - Rethinking Urbanism (20 Credit Points)****Legacy Code:** 301200

This unit will extend the concept of Urban Transformation, where the architect is an agent of progress and change in the built environment. Students will refine their use of architectural design as a medium for speculation and advocacy in the public realm and in daily life of the city. Rethinking Urbanism will investigate architecture and civic space at the scale of public projects. Students will use various models of three-dimensional representation for communication and experimentation with new ways of building the urban fabric. Assessments will be project-based in real world scenarios and will incorporate sustainable strategies of design.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ARCH 2001 AND

ARCH 2002

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/arch3003/>)**ARCH 3004 Architecture Studio - Rethinking the Sub-urban (20 Credit Points)****Legacy Code:** 301199

This unit will introduce the concept of Sub-urban Transformation, where the architect is an agent of progress and change in the built environment. Students will learn to use architectural design techniques as a medium for speculation and advocacy in the public realm and in daily life of the city. Rethinking the Sub-urban will investigate domesticity at the scale of residential projects and communities. Students will be concurrently trained in the use of Building Information Modelling (BIM) as a means to develop project work and collaborate as they explore new ways of building the suburban fabric. Assessments will be project-based in real world scenarios and will incorporate sustainable strategies of design.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ARCH 2001 AND

ARCH 2002

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/arch3004/>)

ARCH 3005 Architecture Studio - The Infrastructural (20 Credit Points)**Legacy Code:** 301202

This unit situates learning in the context of the major urban public projects that sit at the intersection of architecture, infrastructure, and urban design and which highlight the pressure of population growth, climate change, or other significant demographic, economic, political, or ecological transformations. Work integrated learning is a key feature of the Rethinking Infrastructure studio which involve relevant members of the professional community to help lead studio investigations and/or embed students in professional practices. Projects include architectural responses to complex urban and infrastructural projects at a large scale such as transit oriented development, high density housing, landscape urbanism. Students develop professional practice skills on these real world projects and incorporate sustainable strategies of design as well as learning skills in advocacy, entrepreneurship, and professional readiness.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ARCH 3004 AND

ARCH 3003

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/arch3005/>)**ARCH 3006 Urban Design (10 Credit Points)****Legacy Code:** 102070

The unit aims to provide students with an understanding of the nature, role and relevance of urban design. It will examine the issue of urban design at both the micro and macro scale. It also aims to promote awareness of, and sensitivity to, design considerations, and to enable students to critically evaluate urban spaces and places. A key feature of the course will be the development of the graphical communication skills of students.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** ARCH 3001 - An Introduction to Urban Design
LGYA 1333 - Local Planning**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/arch3006/>)**ARCH 4001 Architecture Studio: Urban Architecture (20 Credit Points)****Legacy Code:** 301316

This unit will introduce students to urban architecture with complex brief requirements, site conditions and technological considerations. Emphasis is on design resolution considering historical, geographical and social aspects. Experimentation at various theoretical levels is expected and students are encouraged to deliver ambitious and imaginative architectural responses.

Level: Undergraduate Level 4 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/arch4001/>)**ARCH 7001 Developing Sustainable Places (10 Credit Points)****Legacy Code:** 101636

This unit provides an understanding of environmental, economic and social issues arising from the effects of urban development within city regions and examines the relationship between sustainable development and metropolitan planning in the Australian and global context. It focuses on the concepts related to sustainability, sustainable development and sustainable cities. It also looks into recent initiatives towards the realisation of sustainable cities.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 1340 - Land Use Strategy Design LGYA 1294 - Urban Challenges Developing Sustainable Places**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/arch7001/>)**ARCH 7002 Heritage and Planning (10 Credit Points)****Legacy Code:** 102069

This unit explores the values behind, and practicalities regarding, heritage and planning, from federal and state perspectives in Australia. With a specific focus on Sydney, the unit explores how planning applications, within the urban development sphere, impact upon heritage assets, and how these impacts are mitigated through heritage planning legislation. The unit asks students to step into the shoes of heritage planning professionals and to identify and research a heritage asset that is to be impacted by a potential planning proposal and then to design an appropriate mitigation response within the bounds of relevant heritage legislation.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** ARCH 3001 - Introduction to Urban Design**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/arch7002/>)**ARCH 7003 Managing Cities: History and Theory (10 Credit Points)****Legacy Code:** 101633

This unit concerns philosophical thought and critical thinking in public planning. It develops an understanding of planning theories and examines past and present trends in this area. It reviews the theoretical frameworks for an insight into planning processes and analyses the economic, spatial and socio-political dimensions of activities involved.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 1293 - Metropolitan Structures Cities in Transformation**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/arch7003/>)

ARCH 7004 Planning and Development Control (10 Credit Points)**Legacy Code:** 300708

This unit describes the general planning issues relevant to developments in rural and urban areas. The content covers the factors important in determining the allocation and use of land and resources together with the contributions of development to the built and natural environment. Topics include: urban and rural design issues; the impact of the 3 tiers of Government process on development control, and the legal, political and technical issues relevant to impact assessments. Particular attention will be paid to the role of the private sector in developing controls, self-regulation and appeal processes. Planning in both the micro and macro environments is examined in the context of sustainability, indigenous culture and heritage, private land conservation, community resources and its strategic effects on the recycling of existing land and non-renewable natural resources.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/arch7004/>)**ARCH 7005 Urban Management Practice: Governance and Power in the City (10 Credit Points)****Legacy Code:** 101314

Governance is a central but often overlooked issue in Urban Management. What is governance? What are the principles of good governance? What are some of the governance challenges in major metropolitan cities that cover multiple jurisdictions? How do statutory local governments engage with specialist state agencies in fields such as economic development, environmental planning, and infrastructure planning? This unit answers these questions, reviews governance practices in major cities across the world and provides students with knowledge of key governance tools. Students will prepare a research report dealing with a significant urban governance challenge, and provide recommendations about how to implement solutions to that challenge. The central objective of the course is to provide students with a sound framework and set of tools with which to address governance issues.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/arch7005/>)**ARCH 7006 Urban Planning Placement Project (10 Credit Points)****Legacy Code:** 102604

This Urban Planning Placement Project unit provides Master of Urban Management and Planning and Master of Planning students with an understanding of the planning/urban management workplace. Students are placed with local planning or urban management employers to work on a variety of planning tasks. Placements are structured for student engagement in professional work in planning. Placement agencies ensure that students are supervised by experienced planners, are mentored through site visits and work on planning projects in a professional capacity. Agreements with supervisors and clear communication lines are set to clarify student engagement and their involvement in meaningful professional tasks that contribute to an authentic learning experience, rather than simply unpaid or irrelevant labour.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 1297 - Urban Management Placement Project LGYC 4646 - Urban Management Placement Project**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/arch7006/>)**ARCH 7007 Advanced Design Communication (10 Credit Points)****Legacy Code:** 301239

Advanced Design Communication is a core architecture seminar in the Master of Architecture (Urban Transformation) course that will explore contemporary methods of design generation and visualisation, representation techniques, and collaboration tools, including but not limited to digital fabrication, computational and algorithmic design, simulation, virtual and augmented reality, building information modelling, parametric design, and scripting. Students will undertake case studies from the community of practice and precedents in this disciplinary domain, including an investigation of how emerging technologies are used in existing professional settings locally and internationally. Students will develop their own design-based enquiry to apply knowledge and skills acquired in the seminar that result in a project and report of their work.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/arch7007/>)**ARCH 7008 Integrated Building Technology (10 Credit Points)****Legacy Code:** 301240

Integrated Building Technology is a core unit in the Master of Architecture (Urban Transformation) course that will introduce students to the range of specialist consultants in structural and civil engineering, mechanical, electrical, communications, and transport systems, fire safety and egress, and environmental systems (acoustics, lighting, thermal) that are required to complete real projects in practice. Students gain an insight into the principles and concepts of each discipline which provides sufficient depth of knowledge and understanding of the role of the architect to meaningfully engage and collaborate with the allied specialists. Understanding how to communicate and document the integration and coordination of systems in a building is developed through exposure to case studies, specialist presentations, and field trips. Students apply concepts introduced in the unit to the design studio project they are concurrently developing in unit Practice Research Studio Housing and demonstrate their understanding of system integration through graphic representation techniques and a design report.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/arch7008/>)

ARCH 7012 Urban Transformation Thesis Studio 2 (20 Credit Points)**Legacy Code:** 301242

From Autumn 2021 this unit is replaced by 301400 Urban Transformation Studio Global. Urban Transformation Thesis Studio 2 (UTTS2) is the final postgraduate architecture and urban transformation design studio in the Masters sequence. UTTS2 is the culmination of the 2-semester thesis investigation that is required of all Master of Architecture (Urban Transformation) students. The thesis consists of a comprehensive design project which will represent the synthesis and mastery of professional competencies, disciplinary knowledge, independent thinking, and critical reasoning skills through the development of an architectural proposition. During UTTS2, students will work closely with academic staff and a professional/industry mentor to independently resolve their design thesis topic as an architectural proposition that is attendant to professional, social, and environmental concerns, and through the written research document. Students will spend an intensive block of time placed in a professional office setting as they develop their design research proposition and/or writing. The work of UTTS2 shall culminate in an urban building proposal, or relevant research enquiry of demonstrated equivalence, that is developed to a significant degree of resolution in terms of spatial and experiential quality, contextual, cultural, social and environmental considerations, technical proficiency, and conceptual rigour.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/arch7012/>)**ARCH 7014 Health, Wellbeing and Place (10 Credit Points)****Legacy Code:** 102769

Planning for health and wellbeing is essential for ensuring human flourishing in our cities and regions. This unit investigates geographies of health, wellbeing and place through analysis of physical, mental and environmental health and spaces of wellbeing. Drawing on insights from geography, planning and related disciplines it asks how built environment professionals can create healthy futures through place making. Through local, national and international case studies the unit will explore how cities can be better designed to counter growing lifestyle epidemics, motivate active living and respond to the opportunities of population ageing and challenges of environmental change.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/arch7014/>)**ARCH 7015 Practice Research Studio Civic (20 Credit Points)**

Practice Research Studio Civic shall focus upon the research and design of a single, comprehensive architectural project over the duration of the semester through either a civic, residential, or hybrid project type. Students will explore topics related to the broad umbrella of urban transformation and to contemporary architectural practices through the studio work, and will engage with a broad community of professionals, stakeholders, and programmatic conditions.

Projects shall be representative of the often-contested intersection of competing interests of the urban environment, where the designer must conduct rigorous analysis and research to inform high-quality design outcomes that are attendant to social, ethical, regulatory, technical, procurement, and environmental issues. Students are expected to develop projects to a high degree of resolution in terms of spatial and experiential quality, technical proficiency, and conceptual rigour, underpinned by theoretical and historical knowledge, and communicated clearly. Projects in the studio will vary in scale, setting, building type, and complexity from year to year, with a thematic emphasis that contributes to the overall research direction of the architecture program at WSU. Students will be expected to engage in the studio with a high degree of individual motivation, resourcefulness, and inquisitiveness as would be expected of professional level studies.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/arch7015/>)**ARCH 7016 Practice Research Studio Housing (20 Credit Points)**

Practice Research Studio Housing shall focus upon the research and design of a comprehensive architectural project over the duration of the semester through either a civic, residential, or hybrid project type (as distinct from Practice Research Studio Civic in the preceding semester). Students will explore topics related to the umbrella of urban transformation and to contemporary architectural practices through the studio work, and will engage with a broad community of professionals, stakeholders, and programmatic situations.

Projects shall be representative of the often-contested intersection of competing interests of the urban environment, where the designer must conduct rigorous analysis and research to inform high-quality design outcomes that are attendant to social, ethical, regulatory, technical, procurement, and environmental issues. Students will undertake projects that involve international sites, project contexts, programs, or collaborations. Students are expected to develop project work to a high degree of resolution in terms of spatial and experiential quality, demonstrating through clear communication and representation techniques the technical proficiency, conceptual rigour, and theoretical and historical knowledge that support the project outcomes. Projects in the studio will vary in scale, setting, building type, and complexity from year to year, with a thematic emphasis that contributes to the overall research direction of the architecture program at WSU. Students will be expected to engage in the studio with a high degree of individual motivation, resourcefulness, and inquisitiveness as would be expected of professional level studies.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** ARCH 7008**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/arch7016/>)

ARCH 7017 Urban Transformation Studio Local (20 Credit Points)

Urban Transformation Studio Local incorporates work integrated learning with a real world design project and expert mentoring giving students' opportunities to implement aspects of professional architectural practice. Students extend their skills in creating a project that includes conducting site analyses, defining the program and designing conceptual models. This requires critical reasoning as well as ethical and aesthetic judgement for designing projects for presentations in concise written, oral and visual professional formats. Through the design process, students combine contemporary urban and architectural theory with architectural practice to create exciting visions of urban environments while integrating technical and legal regulations, and realising ethical obligations.

Level: Postgraduate Coursework Level 7 subject

ARCH 7018 Architectural Professional Practice (10 Credit Points)

This unit introduces students to the expectations and the requirements that are needed for a professional practice in Architecture. As such students will require to critically examine a broad range of real life professional, legal, business and ethical challenges that are likely to face in practice and apply critical thinking in order to resolve these problems. The intention here is to assist students in navigating through complex real life challenges and to bring a common sense and real world approach to solving a problem. Transitioning from university to the workplace can be quite daunting thus, the aim here is to allow students to gain the knowledge and skills to make informed decisions but most importantly to build confidence in themselves as they move forward with their career.

ARCH 7019 Urban Transformation Studio Global (20 Credit Points)

In this high-level, project unit, students apply theory and practice to their urban transformation project relating to Greater Western Sydney region while being mentored in developing ethical and aesthetic judgement, creative imagination, independent and critical reasoning skills. Students learn to present a project design that is well resolved integrating spatial and experiential quality, contextual, cultural, social and environmental considerations, technical proficiency, and conceptual rigour. The design contributes to the students' portfolio of work demonstrating concept, resolution and presentation design skills leading towards ethical architectural practice as well as showcasing a civic project for Australia's greatest megatropolis.

ARCH 7020 Cool Green Cities (10 Credit Points)

Climate change, urban expansion and densification result in hotter microclimates and loss of green infrastructure. The increasing frequency and severity of heatwaves, floods and droughts require changes to how we design and retrofit existing neighbourhoods and build new suburbs. Contemporary urban planning and design principles recognise blue and green infrastructure as a 'must have'. Blue and green infrastructure is key to building cool and resilient cities capable of functioning well within the social, environmental and economic challenges of the 21st century. This unit provides knowledge about what it takes to deliver cool green cities. Focusing on practical applications at precinct or suburb scale, it enables students to implement learned principles in their professional practice.

Banking, Finance and Related (FINC)

FINC 1001 Management Accounting Fundamentals (10 Credit Points)

Legacy Code: 200116

This unit provides an introduction to management accounting in an e-commerce environment. The interrelations of management accounting to other functional areas, to suppliers, to customers, and to other sources of external information relevant to planning and control are examined. Topics include the development and logic of routine and non-routine analysis performed to support management decision making.

Level: Undergraduate Level 1 subject

Pre-requisite(s): ACCT 1007

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/finc1001/>)

FINC 1003 Professional Relationships and Communication in Business (10 Credit Points)**Legacy Code:** 200747

This unit will introduce students to and assist them in the development of a broad range of necessary skills required by today's professional advisers. Such skills are highly valued, transferable and universally recognised in the world of work and will assist students in managing their day to day relationships with clients and colleagues. Skills include: * Creation and on going maintenance of the client adviser relationship and a recognition of the importance of trust as the foundation of that relationship; * Identification of the broad needs of clients and an appreciation of differing levels of client financial literacy; * Communication and interpersonal skills which contribute to productive relationships with clients and colleagues; * Professional/Academic research and writing skills; * Enhanced team based skills that contribute to productive working relationships and outcomes.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** LGYA 4516 - Financial Advisory Relationships**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc1003/>)**FINC 2002 Personal Asset Management (10 Credit Points)****Legacy Code:** 200265

This unit provides students with necessary knowledge and skills to construct and manage a portfolio of personal assets. Emphasis is placed on how the individual, rather than the firm, approaches financing and investing decisions. The unit will consider the theories of portfolio construction, concepts of investment risk, return and diversification, matching asset allocation based on client's individual risk profile, design and management of a personal investment portfolio and the law as it relates to investments.

Level: Undergraduate Level 2 subject**Incompatible Subjects:** LGYB 6459 - Investments**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc2002/>)**FINC 3001 Bank Management (10 Credit Points)****Legacy Code:** 200818

Bank Management provides students with an understanding of modern banking by identifying the main types of risk confronted by banks and applying relevant techniques to measure and manage those risks. Students will recognise that the risks faced, and the methods and markets through which these risks are managed, are similar for the managers of other types of financial institutions such as building societies, investment banks and insurance companies as well as, to some extent, non-financial corporates. Consequently, the unit will prepare students for careers throughout the financial services sector and will also be beneficial for other business professionals.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc3001/>)**FINC 3002 Behavioural Finance (10 Credit Points)****Legacy Code:** 200518

Traditional theories of finance are based the assumption that investors are both rational and utility maximizing. The Efficient Markets Hypothesis in particular has assumptions about investor behaviour which underpin its key predictions. The tenants of behavioural finance disputes the validity of these assumptions. This unit challenges traditional theory by examining how decision making and investor behaviour may be driven by personal and market psychology.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc3002/>)**FINC 3004 Financial Planning (10 Credit Points)****Legacy Code:** 200627

The unit endeavours to provide students with an understanding of the complex process and contextualisation of the Australian Financial Planning Industry. This unit aims to introduce students to the principles of personal financial planning and the provision of personal financial advice including the preparation of a Statement of Advice (SOA). Topics covered include the current Australian regulatory environment, strategies for the accumulation of wealth and risk protection, retirement planning, estate planning, taxation consequences, debt and credit management and home ownership. This unit meets ASIC requirements (PS146) in relation to both knowledge and skills.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ECON 2002**Equivalent Subjects:** FINC 3005 - Financial Planning**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc3004/>)**FINC 3006 Insurance Advising - Theory and Practice (10 Credit Points)****Legacy Code:** 200272

This unit provides a substantial grounding in the theories and practices of insurance and risk management so as to enable students to make knowledgeable and sound risk management decisions, to understand advisory functions and the role and legal obligations of the adviser in the insurance process. The course is useful to students who wish to increase their knowledge generally of personal risk management but also for students specifically interested in the insurance aspects of the financial planning process. The unit is designed to include an understanding and exploration of managing personal risk, the operation of insurance markets, regulation, insurance products including life, general, health and mandated policies and recommendations for using insurance products for individuals, their families and small business.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYB 6470 - Insurance and Risk Management**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc3006/>)

FINC 3007 International Property (10 Credit Points)**Legacy Code:** 200545

This unit examines international property, with particular attention given to international property investment and the factors influencing international property markets. The development of international property markets is assessed, including the structure of mature, developing and emerging property markets. The performance analysis of both direct and indirect international property is also examined to assess the strategic contribution of international property in an investment portfolio.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc3007/>)**FINC 3008 Investment Management (10 Credit Points)****Legacy Code:** 200819

Investment Management describes the theory and practice of investment decision-making. The general objective of the unit is to introduce students to the tools of financial investment by providing a conceptual framework within which the key financial decision of investment can be analysed. This unit provides an overview of the theory of investing by describing investor indifference curves and optimal portfolios. The unit will include evaluating asset allocation, security selection and security analysis within an active portfolio management framework, measuring portfolio performance and security selection decisions.

Level: Undergraduate Level 3 subject**Incompatible Subjects:** ECON 3015 - Investment Management ECON 3020 - Portfolio Management**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc3008/>)**FINC 3009 Property Finance (10 Credit Points)****Legacy Code:** 200875

The aim of this unit is to provide insight into property finance in Australia and overseas. Students critically review equity and debt financing and examine the financing alternatives available, as well as methods for evaluating these alternatives. Students also examine the impact of debt financing on a property and evaluate the taxation aspects of property transactions. In addition, students gain both a theoretical and an applied understanding of an after-tax cash flow projection in this unit. International property finance is also addressed.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYB 6469 Property Finance and Tax FINC 3010 Property Finance and Tax**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc3009/>)**FINC 3011 Property Investment (10 Credit Points)****Legacy Code:** 200749

Property Investment addresses critical issues in property investment analysis. The characteristics and fundamentals of property investment will be addressed. Students will learn and apply the concepts of property economics, market analysis, valuation, financial analysis and risk analysis in making property investment decision. The subject pays special attention to the discounted cash flow method as the basis of analysis for investment properties. Finally, students will be introduced to property finance, taxation and international property investment issues.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYA 4694 - Property Investment**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc3011/>)**FINC 3013 Property Portfolio Management (10 Credit Points)****Legacy Code:** 200873

This unit examines the role of property in an investment portfolio, with particular attention given to property portfolio performance analysis and property investment strategy. Indirect property investment vehicles in Australia and overseas are assessed, including Real Estate Investment Trusts, property syndicates, property securities funds and unlisted property funds. The performance analysis of both direct and indirect property is also examined to assess the strategic contribution of property to an investment portfolio.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** FINC 3012 Property Portfolio Analysis (V2) LGYA 4695 Property Portfolio Analysis (V2)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc3013/>)**FINC 3014 Retirement and Succession Planning (10 Credit Points)****Legacy Code:** 200899

Retirement and Succession Planning aims to provide a study of the legislative framework and financial planning issues that impact on advice and decisions relating to retirement planning and estate and succession planning. The unit focuses on identifying practical and strategic planning opportunities and outcomes. The unit will be run with students discussing case studies and preparing critical analysis reports on contemporary issues. Successful completion of the unit will introduce students to retirement planning and superannuation concepts which could lead to careers in these fields.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 1004**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc3014/>)

FINC 3015 Security Analysis and Business Valuation (10 Credit Points)**Legacy Code:** 200921

This unit analyses companies from a fundamental perspective in order to derive an intrinsic value for securities. The focus is on the attempt by active investors to identify mispriced securities using publicly available information, company reports and financial market information. The analytical techniques of financial statement analysis (e.g. fundamental analysis, free cash flow analysis and pro-forma analysis) and the issue of the "reliability" and "quality" of publicly available information are discussed and explored. Those contemplating careers in investment banking, financial consulting, trust funds, superannuation funds, hedge funds, and brokerage firms will find this applied unit both useful and interesting.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ECON 2002**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc3015/>)**FINC 7001 Communication and Ethics for Financial Planners (10 Credit Points)****Legacy Code:** 201008

Students are immersed in an ethical framework in which to practice an array of essential skills required, by financial advisers, to create and maintain professional client adviser relationships. The unit investigates the importance of interpersonal skills and various approaches to dealing with the broad needs of clients - communication, psychological aspects of client decision making, culture and the creation of trust in the adviser-client relationship. This unit also includes professional writing skills, team work, time management, financial literacy and the promotion of professional services.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** FINC 7002 - Communication and Ethics for Financial Planner**Incompatible Subjects:** FINC 7004 - Financial Adviser Skills**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc7001/>)**FINC 7002 Communication and Ethics for Financial Planners (EO) (10 Credit Points)****Legacy Code:** 900660**Level:** Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc7002/>)**FINC 7004 Financial Adviser Communication Skills (10 Credit Points)****Legacy Code:** 200987

In this practical unit students develop the ability to write up a risk profile with objectives for clients with varying needs. Students analyse investment decisions and provide advice to clients which is informed by regulatory issues relevant to the finance industry. Students are required to demonstrate the ability to create a Statement of Advice for clients of different risk preference and investor profile.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** BUSM 7007 - Business Communication Skills**Incompatible Subjects:** FINC 7001 - Communication and Ethics for Financial Planners**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc7004/>)**FINC 7005 Financial Adviser Communication Skills (EO) (10 Credit Points)****Legacy Code:** 900654**Level:** Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc7005/>)**FINC 7006 Financial Modelling (10 Credit Points)****Legacy Code:** 51054

This unit is essential in preparing students for applied financial analysis and modelling applications used extensively in a number of postgraduate finance units. It familiarises students with the strengths and limitations of contemporary quantitative modelling techniques using multivariate statistical procedures and optimisation approaches. Students are also familiarised with relevant software.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc7006/>)**FINC 7007 Financial Planning Research Project (10 Credit Points)****Legacy Code:** 200959

Financial Planning Research Project encompasses a major research project and presentation. This equips students with skills to address challenges through research and the ability to apply knowledge developed in earlier units of study. This student-centered unit provides supervision of research and analytical practices to enhance skill development and capacity to engage with the problems confronting the financial planning industry. Students will have scope to focus on issues that are of particular concern to the financial planning industry. As an integrating unit, it demands participants bringing their knowledge together and with curiosity to develop recommendations in a format that can showcase their achievements.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc7007/>)**FINC 7008 Financial Products and Markets (10 Credit Points)****Legacy Code:** 200986

This unit introduces students to the wide range of investment products and financial securities. Importantly, it develops students' ability to analyse investment opportunities and understand their respective risk and reward profiles. Students will also develop the computational skills necessary for transactions in financial markets, which enable an informed comparison of securities for the purposes of investment decisions.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc7008/>)**FINC 7009 Financial Products and Markets (EO) (10 Credit Points)****Legacy Code:** 900653**Level:** Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc7009/>)

FINC 7010 Insurance and Risk Management (10 Credit Points)**Legacy Code:** 200870

This unit introduces students to the use of a range of insurance types and products to manage risk for individuals and small business. It aims to identify, evaluate and manage risk as part of the financial planning process to produce a compliant statement of advice. A number of risk management strategies are identified and the importance of life insurance, total and permanent disablement, trauma policies, property insurance, health cover, income protection and business insurance in managing risk is addressed. The unit provides an understanding of the various issues that can arise with respect to insurance policies and premiums and uses both the multiple and needs analysis approaches to calculate the level of cover required. A holistic approach to the risk management process is provided where a variety of insurance covers are considered in the context of a full financial plan that is adequate and affordable to the client and their specific needs as identified in the data collection process.

Investment Planning is one of the core units in the Master of Commerce (Financial Planning). The course is designed to provide the educational basis to enable students to increase competence as professional financial advisers and enable them to gain an advanced knowledge and understanding of the financial planning industry. The unit introduces basic concepts of risk and return in relation to investment planning. Various investment vehicles are covered including shares and fixed interest investments.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYB 6482 Principles of Investment Planning (PG)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc7011/>)**FINC 7012 Investment Planning (EO) (10 Credit Points)****Legacy Code:** 900656**Level:** Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc7012/>)**FINC 7013 Planning for Retirement (10 Credit Points)****Legacy Code:** 200871

This unit provides an understanding of key issues, decisions and frameworks involved in financial planning for later life and succession. It enables the student to provide advice on business succession planning strategies, to evaluate the most appropriate estate planning for different types of clients at different stages of their life, to analyse wills, trusts and social security provisions, to apply relevant analytical and decision making tools to succession, trust administration, tax strategy and similar post-retirement decisions.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** FINC 7020**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc7013/>)**FINC 7014 Planning for Retirement (EO) (10 Credit Points)****Legacy Code:** 900657**Level:** Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc7014/>)**FINC 7015 Principles of Financial Planning (10 Credit Points)****Legacy Code:** 200866

This introductory unit describes the nature and process of financial planning and financial planning participants within the Australian economic, legal, social, cultural and ethical environment. The key influences affecting the client relationship are identified along with a focus on the use of verbal and non-verbal communication skills to develop client rapport. The unit also involves evaluating data collection and risk tolerance tools and identifying the impact of the regulatory and economic environment on stakeholders. Other topics involve budgetary analysis, term structure, investment decisions, ethics, client goal-setting and statement of advice compliance. The unit provides the foundational knowledge essential to develop and apply comprehensive knowledge across all financial planning areas.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYB 6479 Principles of Financial Planning (PG)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc7015/>)**FINC 7016 Principles of Financial Planning (EO) (10 Credit Points)****Legacy Code:** 900658**Level:** Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc7016/>)**FINC 7017 Property Investment Analysis (10 Credit Points)****Legacy Code:** 200696

This unit introduces the concept of investment analysis in the context of property. It explores the unique features of income-producing property and examines the performance of these properties, their loans and their taxation through the application of a variety of investment techniques. Also covered are risk analysis techniques for income-producing properties and portfolios.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYB 6499 - Property Investment Analysis (V2)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc7017/>)

FINC 7019 Statement of Advice Research Project (10 Credit Points)**Legacy Code:** 200960

Statement of Advice Research Project encompasses a major research project, a Statement of Advice (SOA). This SOA equips students with knowledge and skills to address challenges through research and the ability to apply knowledge developed in earlier units of study. This student-centered unit provides skill development and capacity to engage with the requirements of the profession. Students will have scope to focus on issues relevant to a case study as a means of developing a comprehensive SOA for a client (in the case study). As an integrating unit, it demands participants bringing together their knowledge to develop recommendations based on learning from earlier units. This unit also ensures students meet the regulatory and accreditation education requirements to be a registered financial adviser.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** Students enrolled in 2793 Masters of Financial Planning or 2807 Master of Stockbroking and Financial Advising must have successfully completed 60 credit points**Equivalent Subjects:** LGYB 6493 - Current Issues in Financial Planning**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc7019/>)**FINC 7020 Superannuation (10 Credit Points)****Legacy Code:** 200867

This unit provides an understanding of the key issues, decisions and frameworks that affect financial planning for retirement. The unit focuses on superannuation and effective financing of retirement. It includes key concepts in prudential supervision of Australian superannuation, exploration of types of funds relevant to retirement, appreciating trends in retirement financing policies and their effects on providing advice, understanding the social security and age care systems' effect on retirement planning strategies; and correctly computing tax liabilities on superannuation, pensions, and estate management. This unit is the principal one for learning about self-managed superannuation funds, for whom they are suitable and for whom they are not.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc7020/>)**FINC 7021 Superannuation (EO) (10 Credit Points)****Legacy Code:** 900659**Level:** Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/finc7021/>)**FINC 7022 Applied Project (Finance and Property) (10 Credit Points)**

Applied Project (Finance and Property) is the integrating capstone unit, which brings together the skills that property students have developed during the course in preparing a high quality professional report in the finance or property industry. The unit encourages property students to demonstrate their ability to solve multi-disciplinary problems in relation to current and future issues that affect the finance or property sectors. The unit will also allow students to critically evaluate issues in their industry to determine and assess potential industry implications. The topics are determined from year to year by discussions between the individual student, the unit coordinator and the student's chosen supervisor.

This unit provides an introduction to the psychology of health and behaviour relevant to understanding patient health decisions and outcomes. Students will be introduced to psychology and health to understand the tradition and relevance of psychology to nursing. This unit also includes foundation topics such as models of health and illness, health-behaviour change models, risk-taking behaviour, stress and health, learning and conditioning, personality and health, human development over the lifespan, death and dying, as well as group dynamics in health. These topics are offered as basic principles, theories, and models of psychology related to health behaviours, future learning, and professional practice in nursing.

Level: Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv0008/>)**BEHV 1001 Behaviour and Environment (10 Credit Points)****Legacy Code:** 101182

This is a fully online unit. Everything we do depends on our environment, but rarely do we ask the question "what is the environment?" In this unit, we examine our various environments, the natural world, our built physical spaces and things, and the social, biological, and psychological domains. We then examine questions of: How do we interact with these environments, and how do they shape and influence our behaviour? How does understanding this interaction help us improve the human condition, while also maintaining the integrity of the environment? Drawing from psychology to understand human behaviour, the unit has application to as many discipline areas as there are spheres of human activity.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** LGYB 4217 - Computer Models in Psychology**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv1001/>)**BEHV 1003 Introduction to Research Methods (10 Credit Points)****Legacy Code:** 101190

This unit covers the conceptual underpinnings of research in psychology, including research designs such as experimental, quasi-experimental, non-experimental and qualitative research. Conducting ethical research will be covered, including consideration of how research participants are positioned, issues related to conducting research with diverse populations, as well research validity. Writing research proposals and reports according to the conventions of the Publication Manual of the American Psychological Association (APA) are also considered.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv1003/>)**BEHV 1009 Living, Learning and Working on the Web (10 Credit Points)****Legacy Code:** 102502

This unit prepares students for living, learning and working in a digital society. We examine how the web mediates behaviour, communication and culture in contemporary times. Students learn by participating and enterprising in online spaces as part of a supportive learning community. This unit also provides an important opportunity for students to develop a professional online web presence and identity that is relevant for their university studies, employability and the future of work.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv1009/>)**BEHV 1010 Positive Psychology: The Science of Happiness, Resilience, and Wellbeing (10 Credit Points)****Legacy Code:** 102606

We live in an increasingly volatile, uncertain, complex, and ambiguous (VUCA) world which places greater emotional demands on people and organisations. This unit introduces the Positive Psychology theory, research and the practical evidence-based techniques to enhance wellbeing and resilience in an increasingly VUCA world. Positive psychology is an emerging field of academic study and practical application in personal and work settings which focuses on the creation of individual resilience, strengths and virtues, creativity and other indicators of human flourishing. Throughout this unit, students will be encouraged to actively engage and apply the positive psychology concepts taught within the course and to critically reflect on these experiences to bring about personal change.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv1010/>)

BEHV 1014 Psychology and Health (10 Credit Points)**Legacy Code:** 101614

This unit provides an introduction to the psychology of health, mental health, and health-related behaviour, as relevant to health science professions. Students will be introduced to the principles and applications of psychology and health behaviour, using a biopsychosocial framework. This will be followed by an examination of the psychological aspects of injury and illness and an introduction to psychological interventions related to health concerns. Emphasis is upon understanding health status and mental illness in light of relevant theory and research.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** BEHV 1006 - Introduction to the Psychology of Health BEHV 1015 - Psychology and Health (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv1014/>)**BEHV 1015 Psychology and Health (WSTC) (10 Credit Points)****Legacy Code:** 700060

This unit provides an introduction to the psychology of health, mental health, and health-related behaviour as relevant to health science professions. Students will be introduced to the principles and applications of psychology and health behaviour, using a biopsychosocial framework. This will be followed by an examination of the psychological aspects of injury and illness and an introduction to psychological interventions related to health concerns. Emphasis is upon understanding health status and mental illness in light of relevant theory and research.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** BEHV 1014 - Psychology and Health**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv1015/>)**BEHV 1016 Psychology: Behavioural Science (10 Credit Points)****Legacy Code:** 101183

This unit expands on the nature and history of psychology as a scientific discipline by focussing on the study of the biological bases of human behaviour, memory, language and thought, sensation and perception, motivation, emotion and learning. Research methods to scientifically study behaviour are introduced, including ethical research and practice with reference to diverse cultural contexts.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv1016/>)**BEHV 1018 Psychology: Human Behaviour (10 Credit Points)****Legacy Code:** 101184

Psychology is a field of scientific inquiry that uses a set of scientific techniques and methods to explain and understand the causes of behaviour. As a profession, psychology applies its knowledge to practical problems in human behaviour. This unit covers a range of topics in psychology at an introductory level including: the history of psychology, intelligence, social psychology, developmental psychology, Australian Indigenous and cross-cultural psychology, personality, and abnormal psychology.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv1018/>)**BEHV 1021 The Individual in Society (10 Credit Points)****Legacy Code:** 101557

This unit introduces the main theoretical perspectives for understanding the 'individual in society', including: humanistic, biological, cognitive, behavioural and socio-cultural explanations of individual behaviour. These perspectives are further understood through application of the 'levels of analysis' framework. The content then moves on to social psychology and covers topics such as: self and identity, attitudes and attitude change, conformity and obedience, prejudice and discrimination, aggression, pro-social behaviour and attraction and close relationships. Students explore the relevance of these topics to everyday life and contemporary issues.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** BEHV 1002 - Interpersonal Interaction BEHV 1006 - Introduction to the Psychology of Health BEHV 1023 - The Individual in Society**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv1021/>)**BEHV 1022 The Individual in Society (Block Mode) (10 Credit Points)****Legacy Code:** 101764

In this unit students focus on understanding individuals within their social and physical context. They are introduced to psychology as the scientific study of behaviour and mental experience. Students examine how individual psychology interacts with society, culture, and the physical environments. Featured topics include self and identity, close relationships, social relations and groups, empathy and pro-social behaviour, prejudice, conflict and aggression. Students are guided to explore Aboriginal and Torres Strait Islander perspectives, and the emerging field of indigenous psychology, and to consider what implications these have for a better understanding of psychology and the individual in context.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** BEHV 1021 - The Individual in Society**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv1022/>)**BEHV 1023 The Individual in Society (WSTC) (10 Credit Points)****Legacy Code:** 700051

This unit introduces the main theoretical perspectives for understanding the 'individual in society', including: humanistic, biological, cognitive, behavioural and socio-cultural explanations of individual behaviour. These perspectives are further understood through application of the 'levels of analysis' framework. The content then moves on to social psychology and covers topics such as: self and identity, attitudes and attitude change, conformity and obedience, prejudice and discrimination, aggression, pro-social behaviour and attraction and close relationships. Students explore the relevance of these topics to everyday life and contemporary issues.

Level: Undergraduate Level 1 subject**Pre-requisite(s):** BEHV 0001**Equivalent Subjects:** BEHV 1021 - The Individual in Society**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv1023/>)

BEHV 1024 Applied Psychology (10 Credit Points)**Legacy Code:** 102706

Psychology is the scientific discipline of understanding, explaining and predicting human behaviour and cognition. This introductory unit will explore the topics of Psychology most relevant to its application in the world - particularly as it applies to industry. This unit will teach the basics of Psychology and psychological research such as report writing and the APA style. Topics will include the history of psychology, cognitive psychology, social psychology, sensation & perception, motivation, learning and research methods. Students should note that this unit is not part of an accredited sequence as specified by the Australian Psychology Accreditation Council (APAC), and is not appropriate for students seeking future registration as a psychologist.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv1024/>)**BEHV 1025 Usable Design (10 Credit Points)****Legacy Code:** 102716

This unit examines the psychological principles underlying users' experience of design. After introducing fundamental principles of human perception and cognition, we will explore the way these principles shape the experience of users when interacting with a designed product. The unit will also introduce the experimental approaches used to study perceptual and cognitive processes, focussing on critical evaluation of design principles and highlighting techniques relevant to user experience evaluation.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv1025/>)**BEHV 2002 Brain and Behaviour (10 Credit Points)****Legacy Code:** 101684

This unit provides an introduction to the biological and neuroscientific bases of human behaviour. Topics covered include the chemistry of life, the molecular basis of life, the cell and some of the major organ systems of the human body with particular reference to the nervous, endocrine and sensory systems. The unit has a significant laboratory component which reinforces lecture and text material. Students will be introduced to the biological and neuroscientific concepts necessary for a thorough understanding of areas of psychology such as abnormal psychology, cognitive processes, developmental psychology, human learning, and physiological psychology.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LGYA 0972 - Neuroscience**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv2002/>)**BEHV 2005 Human Learning (10 Credit Points)****Legacy Code:** 101676

Human Learning is concerned with the experimental analysis of human and animal behaviour and focuses upon associative learning, including classical conditioning, operant conditioning, and social learning approaches. Definitions, assumptions, and basic phenomena associated with the study of learning are described and evaluated in terms of their ability to account for various aspects of human behaviour and experience. The practical work highlights important concepts introduced in the lecture program and focuses upon practical techniques of use in everyday situations.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv2005/>)**BEHV 2007 Internship and Community Engagement (10 Credit Points)****Legacy Code:** 102212

The aim of this unit is to provide second/third year Academy students with an opportunity to develop professional identity through exposure to workplaces, community settings or research processes related to their chosen field of study. Students will be encouraged to identify, examine and discuss the multiplicity of leadership factors in such environments while providing work experience. This is a cross-disciplinary unit that will employ experiential learning to achieve the learning outcomes. This placement will be chosen by the student in consultation with staff of The Academy and will be undertaken either as an individual or part of a project team.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv2007/>)**BEHV 2008 Mental Health in the Community (10 Credit Points)****Legacy Code:** 101594

Mental health service delivery in the community is now the main form of care for people across the lifespan living with mental and emotional disorders. The development of a wider range of pharmacological, psychological and psychosocial treatments has enabled many people to live productively in the community. This unit explores the changes in policy and practice in the development of integrated mental health care and the impact of these changes on the lives of people living with mental illness and their communities. Early intervention, resilience and recovery are concepts explored in this unit in terms of mental health and wellbeing.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv2008/>)

BEHV 2010 Perception (10 Credit Points)**Legacy Code:** 101680

This unit examines the fundamental principles underlying human perception and expands upon the sensation and perception content introduced in the foundational psychology units. After reviewing the biological basis of sensing and perceiving, we will explore the way this relatively raw information is processed and organised into the complex perceptions of the visual, auditory, olfactory, gustatory and somatosensory systems, which constitute the fundamental basis of our experience of the world. The unit will also examine the history of perceptual theories and the use of psychophysical methods and experimental approaches to the study of perceptual processes

Level: Undergraduate Level 2 subject**Pre-requisite(s):** BEHV 1016**Equivalent Subjects:** BEHV 2001 - Biological Psychology and Perceptual Processes**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv2010/>)**BEHV 2015 Mental Health in the Community (WSTC) (10 Credit Points)****Legacy Code:** 700301

Mental health service delivery in the community is now the main form of care for people across the lifespan living with mental and emotional disorders. The development of a wider range of pharmacological, psychological and psychosocial treatments has enabled many people to live productively in the community. This unit explores the changes in policy and practice in the development of integrated mental health care and the impact of these changes on the lives of people living with mental illness and their communities. Early intervention, resilience and recovery are concepts explored in this unit in terms of mental health and wellbeing.

BEHV 2015 - Mental Health in the Community (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv2017/>)**BEHV 2018 Personality (10 Credit Points)**

Most of us probably use the term 'personality' almost every day. Yet the conceptualisation and definition of personality is far from settled. This unit introduces the controversies and debates in the psychology of personality, as well as the major theoretical and applied approaches to its measurement. Emphasis is placed on an understanding of personality research and its implications for the practice of psychology.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** BEHV 2011 - Personality Motivation and Emotion
BEHV 3017 - Personality**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv2018/>)**BEHV 3002 Abnormal Psychology (10 Credit Points)****Legacy Code:** 101681

Abnormal Psychology is the study of behaviours that cause distress or dysfunction or are judged as deviant within the individual's culture. This unit examines definitions of abnormality, ways of assessing and diagnosing abnormality, theories of the causation of psychological abnormality and treatments for recognized psychological disorders. Diagnostic criteria from the latest edition of the Diagnostic and Statistical Manual of Mental Disorders are applied to illustrative cases with emphasis on contemporary Australian research and theory. The development of integrated models of abnormality, including biological, psychological and social factors, is a significant theme of the unit.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BEHV 1016 AND

BEHV 1018

Equivalent Subjects: BEHV 3001 - Abnormal Behaviour and Psychological Testing**Incompatible Subjects:** BEHV 3003 - Abnormal Psychology (online)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv3002/>)**BEHV 3004 Advanced Research Methods (10 Credit Points)****Legacy Code:** 101689

This unit advances the research methods and statistics in the prerequisite unit, Experimental Design and Analysis. It introduces students to non-experimental, correlational research design, and survey research, including questionnaire design, sampling and administration, with reference to ethics particularly related to cultural contexts and specific groups. Knowledge and skills in the construction and evaluation of psychological tests are also taught. Related correlational statistical techniques are taught, together with advanced analysis of variance, and instruction in the use of SPSS. The unit also develops skills in conducting and reporting psychological research and provides an introduction to qualitative research.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** MATH 2006**Equivalent Subjects:** MATH 3002 - Advanced Survey Design and Analysis**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv3004/>)

BEHV 3007 Cognitive Processes (10 Credit Points)**Legacy Code:** 101677

Cognitive Processes is the study of the mental processes that underpin attention, perception, decision-making, language, and memory.

Conceptual and research questions include: What are the structures and mechanisms of human memory? What processes underpin acquisition of language, and are the processes similar when we learn a second language? What factors affect attention? How do some people become expert problem solvers? Why do humans make irrational decisions? Contemporary theories will be discussed and evaluated. Investigative research methods including experiments, computer modelling, clinical case studies, and brain imaging are evaluated.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BEHV 1016**Equivalent Subjects:** BEHV 3012 - Human Learning and Cognition**Restrictions:** Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/behv3007/>)

BEHV 3009 Developmental Psychology (10 Credit Points)**Legacy Code:** 101682

Structured around an overview of lifespan development including diversity, this unit explores the holistic nature of growth and development through developmental theory and research. This unit highlights the interactive nature of three main areas of development: biological, cognitive, and psychosocial changes that affect the individual from conception to end of life. The unit encourages observation as a means for understanding development and promoting individual wellbeing. Indigenous Australian knowledges and perspectives are integrated into the unit alongside an appreciation of the richness of diverse cultural contexts.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BEHV 1018**Restrictions:** Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/behv3009/>)

BEHV 3010 Health Psychology (10 Credit Points)**Legacy Code:** 101193

Health Psychology is a branch of psychology concerned with the inter-relationship between psychological factors and physical health. It addresses such issues as the possible role of psychological characteristics in health maintenance and promotion, and in the development of illness. Other aspects include reactions to illness, the contribution of psychology to treatment, and explicit means by which health-relevant behaviours might be modified. This unit provides an introduction to Health Psychology and covers theoretical and research issues, the nature and management of stress and pain, issues concerning the receipt of health care and a selection of specific health problems.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BEHV 1016 AND

BEHV 1018

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/behv3010/>)

BEHV 3011 History and Philosophy of Psychology (10 Credit Points)**Legacy Code:** 100015

This unit provides an overview of the origins and historical development of psychology. It examines the major landmarks in the history of psychology, focusing on important individuals, schools of thought, and recurrent ideas and themes. Historical conceptual problems are related to areas of controversy within contemporary psychology, and an insight is provided into the philosophical underpinnings of the various new movements and major theoretical conflicts within psychology today. The unit also provides a critical appraisal of psychology's status as a science, and explores the limits of psychological inquiry.

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/behv3011/>)

BEHV 3013 Humanities Internship (10 Credit Points)**Legacy Code:** 100961

This unit aims to provide humanities students with first-hand knowledge of workplaces or research processes related to their chosen field of study (specialisation). Internships may be undertaken in organisations including Western Sydney University, historical societies, museums, libraries, local and state government, non-government organisations, tourism and administration. Internships may also take the form of an individual research project under the supervision of one or more academics. The internship can be in Australia or - through one of Western's partners such as CISAustralia - overseas. The unit will introduce students to various fields in which the skills and knowledge developed in their study of the humanities can be applied. It will augment their study and provide much needed work or research experience.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYA 1894 - Art History Internship LGYB 0114

- History Internship LGYA 0506 - Asian and International Studies

Internship LGYA 0906 - Cultural and Social Analysis Practicum

BEHV 3014 Motivation and Emotion (10 Credit Points)**Legacy Code:** 101678

The study of motivation and emotion explores the reasons behind people's behaviours, thoughts, and feelings. This unit examines core research and theory on motivational and emotional systems, exploring how these systems function in general and how that functioning varies due to gender, culture, and other sources of difference. Concepts of motivation and emotion are central to understanding human psychology. The unit positions the topic in relation to other areas of psychological theory (such as learning theory, social psychology, personality, and cognition), investigates its role in psychological practice, and addresses its impact upon practical and philosophical debates within the discipline. Students are encouraged to explore and reflect upon the role of motivational systems in their own lives.

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/behv3014/>)

BEHV 3015 Motor Control and Skill Acquisition (10 Credit Points)**Legacy Code:** 400886

Motor Control and Skill Acquisition is an investigation of the physiological and psychological processes involved in both the control and the learning of movement. As such, it considers the control mechanisms which are innate to the learner, how these mechanisms change by virtue of both maturation and experience, and how the latter type of changes may be facilitated by manipulation of the learning environment.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** BEHV 2009 - Motor Control and Learning SPRT 3002 - Aquatic Sports**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv3015/>)**BEHV 3017 Personality (10 Credit Points)****Legacy Code:** 101679

In 2022 this unit replaced by 102906 - Personality. Personality is the study of the mental and behavioural factors on which individual human beings vary. In other words, the study of personality is the attempt to understand why a given individual is the way he/she is. This unit involves an examination of the major personality theories, applications to individual differences, and contemporary research. Emphasis is placed on a critical understanding of personality research and its implications for the practice of psychology.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BEHV 1018**Equivalent Subjects:** BEHV 2011 - Personality Motivation and Emotion**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv3017/>)**BEHV 3018 Psychology and the Online World (10 Credit Points)****Legacy Code:** 102350

The world has seen an enormous explosion of activity that takes place in online environments that include the Internet, intranets, gaming platforms and peer to peer phone communication (e.g. SMS). There are wide ranging debates about the use and effects of online communication with concerns about hacking, trolling, bullying, scamming, online addiction appearing on a daily basis. Others celebrate the potential of the Internet to produce profound social change. Is the online world quite as bad or as good as it is made out to be? What are the psychological processes behind these and other online behaviours? Why not find out?

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BEHV 1018 AND

BEHV 1016

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv3018/>)**BEHV 3019 Psychology of Language (10 Credit Points)****Legacy Code:** 100023

This unit acquaints students with major issues in the psychology of language. Through a series of online modules, it examines different approaches to research and theory on questions such as: the acquisition and development of language; the relationship between language and thought; bilingualism and multilingualism; speech perception and production; sign language; reading and writing; the neurophysiological underpinnings of language; patterns of language breakdown and communication disorders; social aspects of language; language in non-human animals. The tutorials take a hands-on approach, where students learn new skills, such as reading and producing phonetic symbols, creating stimuli for use in psycholinguistic research, and analysing children's speech.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv3019/>)**BEHV 3021 Psychology, Crime and Law (10 Credit Points)****Legacy Code:** 102399

This unit covers a broad spectrum of issues relevant to legal and forensic psychology. How accurate is a witness's memory? How good are we at identifying a suspect in a line-up? Why do people confess to crimes they never committed? What are good interviewing and interrogation techniques for understanding the truth? How accurate are repressed memories, and how are false memories implanted?

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv3021/>)**BEHV 3023 Social Psychology (10 Credit Points)****Legacy Code:** 101683

Social psychology is the study of human behaviour and mental processes in their social context. Social psychology examines social behaviour and social thinking using scientific psychological research methods. This unit considers both classic and recent theories, research and applications in core areas of social psychology such as: attitudes, stereotyping and prejudice, social cognition, group processes, cross-cultural and Indigenous Australian psychology, and social influence. Emphasis is placed upon the role of contemporary research and theory in increasing our understanding of social phenomena and the relevance of this to everyday life.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** MATH 2006**Equivalent Subjects:** BEHV 2013 - Social and Developmental Psychology**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv3023/>)

BEHV 3025 Sport and Exercise Psychology (10 Credit Points)**Legacy Code:** 401055

This unit explores psychological factors that affect sport performance (e.g., self-efficacy and concentration), psychological factors that predict and increase participation in physical activity (e.g., motivation), and psychological outcomes of physical activity (e.g., mental health, resilience, and cognitive development). Students will examine theory and research and draw upon their own experiences, to apply sport and exercise psychology principles to a variety of real-world scenarios, and design strategies relevant to different contexts such as physical education, personal training, exercise physiology, coaching, and health promotion.

Level: Undergraduate Level 3 subject**Co-requisite(s):** BEHV 1014 - Psychology and Health For Students enrolled in 4658 Bachelor of Health Science (Sport and Exercise Science)

4742 Bachelor of Health Science (Health and Physical Education)- Pathway to Teaching (Secondary)

4747 Bachelor of Health Science (Health and Physical Education) and 6001 Diploma in Health Science Bachelor of Health Science (Health and Physical Education)

Equivalent Subjects: LGYA 1536 - Sport and Exercise Psychology BEHV 2014 - Sport and Exercise Psychology**Incompatible Subjects:** BEHV 1005 - Introduction to Sport Psychology BEHV 2004 - Exercise Psychology LGYA 7219 - Sociological Aspects**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv3025/>)**BEHV 3026 Service Learning (10 Credit Points)****Legacy Code:** 102740

In this unit, the learning experience combines civic engagement with training, and personal and scholarly reflection. Service learning focuses on the application and development of a broad range of knowledges, capacities and skills in the context of voluntary effort to benefit the community. For example, depending on the site selected, students may: extend their capacity to communicate and work effectively in culturally diverse contexts; gain a better understanding of social inclusion and exclusion in Australia or overseas, or; become more confident about their personal and professional capacity to contribute to the well-being of others or protection of the natural environment. The unit may be taken in Australia or overseas - through one of Western's Partners such as CISaustralia - completed individually or as part of a group and in any session of study. For further information please contact the unit coordinator.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv3026/>)**BEHV 4001 Advanced Topics in Psychology (10 Credit Points)****Legacy Code:** 101541

In 2022 this unit replaced by 102907 - Advanced Topics in Contemporary Psychology. In this unit students develop an advanced level of theoretical and empirical knowledge in selected core topics of psychology, an awareness of how this knowledge underpins evidence-based approaches to psychological intervention, and an enhanced capacity for conducting research in selected topic areas. The unit fosters an appreciation of psychology as a scientific discipline, and of how sound research provides the foundation for solving problems of human mental processes and behaviour. Skills in the critical evaluation of knowledge and research are developed.

Level: Undergraduate Level 4 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv4001/>)**BEHV 4004 Psychology Research Thesis (15 Credit Points)****Legacy Code:** 102528

The unit connects students to a community of research scholars. It allows them to complete a specialised piece of individual research in an area of interest in psychology. Students work closely with supervisors to conduct research and produce a 3000-word literature review or draft preregistration proposal (as agreed with the supervisor) and 6000-8000 words report in form of a submission ready journal article.

Level: Undergraduate Level 4 subject**Co-requisite(s):** BEHV 4006**Equivalent Subjects:** LGYB 5257 - Psychology (Honours) FT YL LGYB 5258 - Psychology (Honours) PT YL BEHV 4003 - Empirical Research Project**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv4004/>)**BEHV 4005 Theory and Practice of Psychological Assessment and Intervention (10 Credit Points)****Legacy Code:** 101420

This unit has been designed to introduce students to psychological assessment by providing practical and theoretical input regarding the administration, scoring, and interpretation of frequently used standardised measures. The scientific and ethical underpinnings of psychological testing and assessment are introduced providing a general context for the employment of standardised psychological tests. Emphasis will then be placed on familiarisation with i) the processes that practitioners go through during a testing session and ii) current research on employing the standardised tests presented in this unit. Students will practise with testing data, reporting results in compliance with American Psychological Association (APA) conventions.

Level: Undergraduate Level 4 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv4005/>)

BEHV 4006 Research Methods Seminar (10 Credit Points)

The aim of this unit is to advance students' awareness, and critical appreciation of interrelated research processes: epistemological frameworks of research; the appropriate interpretation of research data; ethical issues in the conduct of research; the cultural, social, economic, and political contexts of research; and Indigenous Australian knowledges and research practices. Skills will be consolidated in the use of quantitative and qualitative research designs, methods, and analysis techniques to address research questions in psychology and the behavioural sciences.

Level: Undergraduate Level 4 subject

Equivalent Subjects: BEHV 4002 - Empirical Research Methods Seminar

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/behv4006/>)

BEHV 4008 Psychology Honours Thesis (20 Credit Points)

The unit introduces students to a community of research scholars. It allows them to complete a specialised piece of individual research in an area of interest in psychology. Students work closely with supervisors to conduct research and produce a written thesis of 10,000 words. Formulation of the research proposal is supported by training activities such as Honours colloquia.

Level: Undergraduate Level 4 subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/behv4008/>)

BEHV 4009 Advanced Topics in Contemporary Psychology (10 Credit Points)

Psychological research and practice exist in a cultural, historical and social context. This unit provides students with knowledge and skills for working in Psychology in the complex, unpredictable and diverse contemporary Australian society. In this unit students develop an advanced level of theoretical and empirical knowledge in selected topics of psychology, an awareness of how this knowledge underpins evidence-based approaches to psychological intervention, and an enhanced capacity for conducting research in selected topic areas. The unit fosters an appreciation of psychology as a scientific discipline and the interplay between psychological research and real-world psychology practice.

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/behv4009/>)

BEHV 7001 Advanced Therapeutic Modalities (10 Credit Points)

Legacy Code: 102361

This unit follows from 102360 Core Therapeutic Modalities. Students in this unit will develop foundational skills in assessment, case formulation and treatment planning through understanding and developing skills in further evidence-based psychological therapies that may be modified based on an evolving case formulation and evaluation and tailored to the client as appropriate to their wider social and cultural context. Further, students will be guided in critical examination of similarities and differences across those therapeutic approaches and their application across conditions, populations, settings and cultural contexts. Please note: some of the activities in this unit may include experiential learning, for example where students may be asked to take on the client role using their own lived experience, to provide opportunity for training in therapeutic modalities that are more "real life". Students may opt-out of these activities without consequence through speaking to the unit coordinator and alternative arrangements for student learning opportunities will be organised.

Level: Postgraduate Coursework Level 7 subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/behv7001/>)

BEHV 7003 Assessment: Cognitive Functions (10 Credit Points)

Legacy Code: 102400

This unit provides a comprehensive introduction to the cognitive psychological assessment of children, adolescents and adults. It is designed to assist students in the professional psychology programs to develop theoretical knowledge and practical skills in the cognitive assessment of clients. Students will become familiar with the current theoretical and empirical foundations of psychological assessment, and the application of these theories and research findings to assessment practice in empirically valid and culturally responsive ways. Students will be introduced to contemporary practice in the assessment of cognition, personality and behaviour. Training in the administration of key instruments will be provided. Students will be instructed in the integration of assessment data into clinically-useful reports, including inter-disciplinary communication. Different approaches to psychological assessment will be compared and evaluated. Ethical and professional issues in psychological assessment will be discussed.

Level: Postgraduate Coursework Level 7 subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/behv7003/>)

BEHV 7004 Assessment: Psychological Practice (10 Credit Points)**Legacy Code:** 102359

This unit will provide students with the skills to psychologically assess and diagnose a range of psychological disorders in adults and in children that are presented in psychological practice. This unit will be complemented by 102400 Assessment: Cognitive Functions in the second semester which will focus more on cognitive assessments. Upon completion of this unit, students will have an understanding of a range of assessment tools, their psychometric qualities, application and utility in a psychological practice. They will also develop skills in applying and interpreting assessment tools and how those tools may aid diagnostic and therapeutic processes.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv7004/>)**BEHV 7005 Child Clinical Psychology (10 Credit Points)****Legacy Code:** 101210

This unit introduces the nature, assessment and treatment of psychological disorders in children and adolescents. Students will examine the diagnostic classification, epidemiology and aetiology of a range of psychological problems in childhood and adolescence, including anxiety disorders, mood disorders, behavioural disorders, trauma and stressor-related disorders, eating disorders, learning disabilities, and attention-deficit disorder. The theoretical and empirical foundations of a range of cognitive and behavioural techniques will be discussed along with a number of major conceptual and practical issues in the treatment of psychological disorders in childhood and adolescence, including cultural and inter-professional contexts.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 0486 - Clinical Problems in Children and Adolescents BEHV 7004 - Assessment Psychological Practice**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv7005/>)**BEHV 7006 Clinic Placement A (10 Credit Points)****Legacy Code:** 101815

This introductory placement unit comprises 180 hours of placement activity accrued one-day a week over 24 weeks and is designed to allow students to apply the theoretical knowledge they have gained in the following coursework units, Core Skills & Ethical Practice; Psychological Assessment; Psychopathology: Theory and Practice and Psychological Interventions 1. The aim of the unit is to establish and enhance, under close supervision, a range of clinical psychology assessment and intervention skills applied to real clients. Regular and systematic video-recording of trainee-client sessions and supervisor feedback guided by competency-based principles provide trainees with an excellent opportunity to acquire, consolidate and generalise a wide range of competencies important for clinical psychology practice.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** BEHV 7014 AND

BEHV 7003 AND

BEHV 7029 AND

BEHV 7027

Co-requisite(s): BEHV 7005**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv7006/>)**BEHV 7008 Clinical Health Psychology (10 Credit Points)****Legacy Code:** 101220

In this unit students acquire an understanding of how biological, psychological, social factors interact in health and illness, and how the principles of biopsychosocial models of health inform clinical psychology intervention strategies that can be applied to the management of physical disorders. This unit will cover psychological assessment, formulation that integrates medicine and psychology, clinical health psychology treatments and assessment of their outcomes. Given that comorbidity has an impact on health outcomes, psychological practice when working with co-morbid substance use disorders will also be addressed. Practice within this branch of clinical psychology requires working within inter-disciplinary treatment contexts that include medical interventions and the tailoring of psychological interventions to help manage a medical condition and enhance quality of life. The unit includes culturally responsive attitudes and skills in clinical health psychology practice, including when working with Aboriginal and Torres Strait Islander Australians.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** BEHV 7027 AND

BEHV 7029

Equivalent Subjects: LGYB 5193 - Clinical Health Psychology

BEHV 7011 - Clinical Psychopathology 2

This unit provides a comprehensive grounding in contemporary neuropsychological theories, methods and measures, including understanding of neurocognitive disorders. The nature of the cognitive systems involved in attention, memory, language, spatial processing, and executive functions will be reviewed, with discussion of the neuropsychological assessment of each of these systems. The unit also includes coverage of the classification, use and efficacy of common psychopharmacological agents. The unit will stress the importance of neural abnormalities in patients, and how these are related to symptoms and behavioural dysfunction. Working within inter-disciplinary contexts that include psychological, pharmacological and surgical treatments for neuropsychological disorders will also be discussed.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** BEHV 7003**Equivalent Subjects:** LGYA 1205 - Clinical and Forensic Neuropsychology**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv7009/>)

BEHV 7010 Clinical Psychopathology 1 (10 Credit Points)**Legacy Code:** 101812

This unit provides a comprehensive examination of the nature, context and assessment of adult psychopathology. Students will review and critically evaluate the origins and structure of current diagnostic systems, and examine the diagnostic criteria for a range of major psychopathological syndromes and the range of contexts within which they may arise. Skills in balancing the assessment of adult disorders with counselling and engagement through a clinical diagnostic interview will be acquired. Beginning level skills in the formation of adult disorders will also be acquired.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 1201 - Clinical Psychopathology LGYA 0485 - Advanced Psychopathology**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv7010/>)**BEHV 7011 Clinical Psychopathology 2 (10 Credit Points)****Legacy Code:** 101813

This unit continues the study of clinical psychopathology. Students will examine the nature and assessment of a range of complex psychopathological syndromes, including schizophrenia and other psychotic disorders; eating disorders; personality disorders; substance-related disorders; dissociative disorders; and sexual and gender identity disorders and psychopathology presentations in diverse contexts (such as forensic settings and working with families).

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** BEHV 7010**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv7011/>)**BEHV 7012 Clinical Research Methods (10 Credit Points)****Legacy Code:** 101814

The ability to understand and critique empirical research findings, and to evaluate the efficacy of therapeutic interventions, is essential to the professional psychologist as a scientist-practitioner. This unit equips students with advanced skills in utilising the research literature to guide and enhance their professional practice, design interventions to test clinically relevant hypotheses, and critically evaluate the effectiveness of existing research based on empirical evidence. It includes instruction in both quantitative and qualitative research design, program evaluation, single case designs and pilot studies.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 0492 - Advanced Research Design**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv7012/>)**BEHV 7013 Cognitive Science: Research and Application (10 Credit Points)****Legacy Code:** 800173

Cognitive science is the interdisciplinary scientific investigation of the mind. Contemporary research in cognitive science conducted by members of the MARCS Institute forms the core of the unit. Research areas to be addressed: plasticity and learning; action and coordination; nonverbal communication; and ageing and cognition. Examples of research questions: Can learning be unconscious? What mechanisms enable interpersonal coordination as seen in music and dance ensembles? Why is it that music elicits strong emotions? How does attention influence perception? How does conditioning explain human preferences? Does social facilitation apply to humans interacting with robots? In what way does ageing impact upon decision making? Applications to the arts, education, health, aging, design, human-machine interaction and artificial intelligence will be discussed.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv7013/>)**BEHV 7014 Core Skills and Ethical Practice (10 Credit Points)****Legacy Code:** 101810

In this unit students apply core evidence-based counselling and intervention skills that are responsive to working within culturally and linguistically diverse communities, including and Aboriginal and Torres Strait Islander Australians. This unit addresses key cultural ethical, legal, and professional aspects of psychological practice; including working within one's competency and within inter-disciplinary contexts and the management of risk across the lifespan, including child protection. The theoretical underpinnings of evidence-based intervention strategies and ethical practice across the lifespan are critically examined, including from Aboriginal and Torres Strait Islander perspectives. Students develop their professional understanding of the codes and guidelines of the Australian Psychological Society and Psychology Board of Australia, and the relevant State and Commonwealth Acts and Regulations of Parliament. Major practice problems faced by psychologists and modes of resolution acceptable within the profession are considered. Students reflect on professionalism in psychology practice and how their own perspectives, world views, values and competencies may inform their processes ethical decision-making. Students will also identify areas for ongoing professional development.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 0477 - Core Skills and Ethical Practice LGYA 1198 - Core Skills Counselling and Ethical Practice**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv7014/>)

BEHV 7015 Core Therapeutic Modalities (10 Credit Points)**Legacy Code:** 102360

This unit provides an introduction to the theory and practice of Cognitive Behaviour Therapy (CBT), an evidence-based form of therapy and an important therapeutic tool for psychologists working in diverse settings. Students in this unit will develop foundational skills in CBT assessment, formulation and treatment and a critical understanding of CBT application across conditions, populations and social settings. In addition, students will be introduced to family therapy (FT), including different models of FT, assessment, case formulation and FT application across different family situations. CBT and FT will be contrasted and examined for their application to a range of common psychological presentations, including ways to tailor responsive interventions in Aboriginal and Torres Strait Islander and multicultural contexts.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv7015/>)**BEHV 7016 Digital Social Research in Action (10 Credit Points)****Legacy Code:** 102253

This unit engages students in the practices of digital social research through a simulation of a professional research consultancy. Students will construct and apply a digital social science approach for an internal or external client brief. Students will engage with client and stakeholder needs through their role as a consultant as they carry out the digital social research project for their client. In doing so, students engage with the ethical and moral implications of using digital social data and discover the opportunities to apply and communicate digital social research methods in real world settings.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv7016/>)**BEHV 7018 Integrated Practices 3: Emotions, Embodiment and Connection (20 Credit Points)****Legacy Code:** 102372

This unit presents and explores ways of working therapeutically with trauma. The interpersonal neurobiologists' focus of Mind/Body connection features in detail in this unit. Work with emotions, embodiment and the counsellor/client relationship as instruments of therapeutic change will be considered. Students will learn what it means to be a trauma-sensitive therapist and develop techniques and methods for working across the spectrum of trauma responses including dissociation. A range of psychotherapeutic models will feature such as somatic therapies, sensorimotor psychotherapy, emotionally focused therapy, and notions of 'felt sense'. Complementary modes of healing, such as mindfulness, breathwork and the practices of yoga and meditation will be considered for what they can offer to a trauma-informed approach to therapy. Students will develop skills in working with emotions and nonverbal communication, as well as recognizing how the 'spoken' incorporates the physical.

Co-requisite(s): WELF 7002**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv7018/>)**BEHV 7020 Learning and Processing Human Language (10 Credit Points)****Legacy Code:** 800171

How do humans learn and process language, in its spoken, gestural, and written forms? This unit will equip students with theoretical foundations and practical understandings of how to read and conduct research in this area. Topics may include research areas such as language acquisition, language use and communication, word recognition, reading development and disorders, speech perception and production. In addition, a review of data collection and analysis techniques will be provided. The unit will include lecture and laboratory experimental work. The unit will be focused on research currently conducted by members of the MARCS Institute.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv7020/>)**BEHV 7021 Neuroscience Methods (10 Credit Points)****Legacy Code:** 800192

A multidisciplinary team will provide an introduction to several aspects of neuroscience including cellular, computational, behavioural and biomedical neuroscience. The program will provide a strong foundation in modern neuroscience for those wishing to pursue further independent research in the field. With a focus on real-world neuroscience research, topics include introductory biology, computational modelling, biosignal acquisition, signal processing and data mining. The unit will include lecture and laboratory work.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** BEHV 7030 - Quantitative Methods in Neuroscience**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv7021/>)**BEHV 7025 Professional Psychology Placement (0 Credit Points)****Legacy Code:** 102539

This placement unit provides students with an opportunity to apply knowledge gained in coursework units to professional practice and to practice, under clinical supervision, basic assessment and intervention skills with real clients. Each student must undertake a minimum of 300 hours of supervised placements, participate in the mandatory workshops and present at a case presentation to complete the course. This requirement is consistent with standards prescribed by APAC, the course accrediting body.

BEHV 7027 Psychological Interventions 1 (10 Credit Points)**Legacy Code:** 101213

This unit covers the theory and practice of Cognitive Behaviour (CBT) from a competency-based perspective. The competency paradigm is introduced first before key competencies including CB-Assessment, formulation, psychoeducation, behavioural (behavioural activation, exposure therapy and behavioural experiments) and cognitive intervention techniques are discussed. For each competency domain, knowledge (theory, models and principles), knowledge-application (procedural knowledge), technical skills (e.g., socratic dialogue) and relationship skills (engagement, collaboration, and collaborative empiricism) are addressed. Higher-order integrative competencies including the use of CBT in multicultural contexts, and meta-competencies such as scientist-practitioner and reflective-practitioner competencies are discussed towards the end of the unit. In alignment with competency-based pedagogies, learning activities include didactic presentations, knowledge-application tasks and skills training within small groups, and assessments include a demonstration of competence appropriate for a developing CB practitioner.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYB 5195 - Psychological Interventions 1 LGYA 1202 - Cognitive Behaviour Therapy Theory and Practice**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv7027/>)**BEHV 7029 Psychopathology: Theory and Practice (10 Credit Points)****Legacy Code:** 102362

This unit provides an examination of a range of major categories of psychopathology, including more typical presentations for psychological treatment and inter-professional indications and communication. Students will critically evaluate the common diagnostic systems of adult psychopathology, and examine the diagnostic criteria for a range of major psychopathology presentations. The unit will equip students with skills in the application of diagnostic and psychometric assessment of these psychological disorders and the ability to construct a case formulation with systemic and cultural considerations, including for Aboriginal and Torres Strait Islander people to inform psychological treatment interventions. Students will also develop skills in discerning when, why and how to collaborate and communicate with multidisciplinary teams in inter-professional context.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** BEHV 7010 - Clinical Psychopathology 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv7029/>)**BEHV 7031 Applied Research Project (10 Credit Points)****Legacy Code:** 102696

The research project provides an opportunity to construct an informed research question or hypothesis. This justified research proposal is completed and investigated independently by students under supervision, over a one-year period. It is conducted in an area of relevance to professional practice, with a central focus on the scientific analysis of a problem or hypotheses. Students can choose from a range of approved research designs, but must undertake and write an analytic review of the relevant literature, formulate a research question, design of an appropriate method, collect and analyse data, interpret findings, and effectively communicate their research in the form of an empirical research report.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** BEHV 7012**Equivalent Subjects:** LGYA 0494 Applied Research Project and Thesis**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv7031/>)**BEHV 7032 Clinic Placement B (10 Credit Points)****Legacy Code:** 102693

This placement unit comprises 180 hours of placement activity accrued one-day a week over 24 weeks, builds on knowledge and skills acquired in coursework units and extends and consolidates competencies acquired in Clinic Placement A. The aim of the unit is to establish and enhance, under close supervision, a range of clinical psychology assessment and intervention skills applied to real clients. Regular and systematic video-recording of trainee-client sessions and supervisor feedback guided by competency-based principles provide trainees with an excellent opportunity to acquire, consolidate and generalise a wide range of competencies important for clinical psychology practice.

This placement unit is an external placement that provides students the opportunity to practise, under clinical supervision, clinical psychological assessment and intervention to a range of clients across age ranges, severity levels and psychological disorders. The aim is to build upon and extend knowledge, skills, relationship and professional attitude competencies acquired during a supervised University Clinic placement while working with real clients seeking clinical psychological services within an external agency. Each external placement must comprise a minimum of 200 hours of clinical psychology practicum work of which at least 80 hours must be in face-to-face client work, and all internal and external placements together must comprise a minimum of 1000 practicum hours of which 400 hours must be in face-to-face client work as defined by APAC. Placements are arranged by the Placement Coordinator who is responsible for ensuring that the placement and supervision meet APAC requirements. Students must participate in the mandatory workshops and present a case at the relevant Case Presentation Day (or equivalent by permission in special circumstances).

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** BEHV 7006**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv7033/>)

BEHV 7034 Professional Placement 2 (10 Credit Points)**Legacy Code:** 102695

This placement unit is an external placement that provides students the opportunity to practise, under clinical supervision, clinical psychological assessment and intervention to a range of clients across age ranges, severity levels and psychological disorders. The aim is to build upon and extend knowledge, skills, relationship and professional attitude competencies acquired during a supervised University Clinic placement while working with real clients seeking clinical psychological services within an external agency. Each external placement must comprise a minimum of 200 hours of clinical psychology practicum work of which at least 80 hours must be in face-to-face client work, and all internal and external placements together must comprise a minimum of 1000 practicum hours of which 400 hours must be in face-to-face client work as defined by APAC. Placement are arranged by the Placement Coordinator who is responsible for ensuring that the placement and supervision meet APAC requirements. Students must participate in the mandatory workshops and present a case at the relevant Case Presentation Day (or equivalent by permission in special circumstances).

This unit offers students a contemporary understanding of the psychological assessment, intervention and evaluation techniques relevant to the support of people with disability. Biological, psychological social and community factors contributing to support will be presented. Ecological, functional and clinical approaches to planning across the life span will be taken, addressing early intervention, childhood, adolescence, adulthood and ageing. A key focus of the unit will be advancing inclusion and quality of life outcomes to enable people with disability to fully participate in society. Current legal, policy and ethical issues will also be discussed, including professional standards for working effectively across multicultural and multidisciplinary contexts.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv7035/>)**BEHV 7036 Research Internship and Engagement (10 Credit Points)**

The aim of this unit is to provide MRes candidates with a research development and training opportunity through a cross disciplinary, supportive, experiential learning environment. Through exposure to workplaces, research institutes, community settings, and research processes, students will have the opportunity to apply their research and technical skills and develop their professional identity in their chosen field of research. The placement will be chosen by the student in consultation with the unit coordinator and will be undertaken either as an individual or part of a project team. If students enrolled in B Research Studies/M Research wish to take this unit before having completed the prerequisite unit 800218 Researcher Development 1: Reading, Writing, and the Business of Research, contact the unit coordinator to obtain permission to complete a rule waiver (this will be on a case by case basis only).

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** HUMN 4001**Equivalent Subjects:** BEHV 7019 - Internship and Community Engagement (PG)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/behv7036/>)**BEHV 7037 Psychological Practice in Contemporary Contexts (10 Credit Points)**

The ability to work with mental health issues and psychological distress that arises within a range of contexts is an essential skill for Clinical Psychologists. This unit equips students with skills in assessment, formulation and tailored psychological interventions for those who experience psychological distress within family systems and broader socio-cultural contexts; including abuse and violence; working within medico-legal systems, and broader socio-cultural contexts. The unit will explore theories, psychological techniques and prepare students to working within these settings that include inter-disciplinary collaboration and communication with multidisciplinary health services and legal practitioners. Please note: some of the activities in this unit may include experiential learning, for example where students may be asked to take on the client role using their own lived experience, to provide opportunity for training in therapeutic modalities that are more "real life". Students may opt-out of these activities without consequence through speaking to the unit coordinator and alternative arrangements for student learning opportunities will be organised.

BEHV 7038 Assessment and Treatment of Complex Psychological Disorders (10 Credit Points)

clinical psychology is a fast-evolving discipline, and practitioners need to be able to respond to changing psychological health needs of a diverse population. This unit will prepare students to expand their skills in clinical assessment of psychopathology, diagnosis and psychological interventions to respond to the needs and preferences and cultural values of clients who experience complex and/or chronic psychological disorders. Responsive practice within the context of the changing demands for clinical psychology services is foregrounded, as is the unique context of Aboriginal and Torres Strait Islander people. This unit will explore the theories, techniques and effectiveness of new and emerging psychological therapies; prepare students for working in multidisciplinary teams; and introduce students to the practice of clinical psychology with more complex client groups. The unit will also examine the professional and organisational roles of clinical psychologists within these settings. Please note: some of the activities in this unit may include experiential learning, for example where students may be asked to take on the client role using their own lived experience, to provide opportunity for training in therapeutic modalities that are more "real life". Students may opt-out of these activities without consequence through speaking to the unit coordinator and alternative arrangements for student learning opportunities will be organised.

Biological Sciences (BIOS)

BIOS 0001 Biology (WSTC) (10 Credit Points)

Legacy Code: 900022

Biology is the study of the cellular processes that occur within organisms and the interactions that occur between organisms within the biosphere. The unit is therefore seen to have relevance to the lives of students. It is important for students to develop an understanding of the biological principles that will enable them to make informed decisions about the advances that are occurring in biotechnology and biomedical science. Undergraduate study in the life sciences requires the student to have acquired a basic body of knowledge that focuses on the diversity and the unity of living things as well as skills in collecting and analysing information and writing concise and coherent explanations.

Level: Undergraduate Level 0 Preparatory subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/bios0001/>)

BIOS 0002 Focus on Biology (WSTC Prep) (10 Credit Points)

Legacy Code: 700232

Biology is the study of integrated living systems, from the level of molecular systems that constitute cells to the interactions that occur within and between organisms that together make up the biosphere. This unit will equip students to undertake tertiary level biological units that emphasise both the unity (cell biology) and diversity (evolution) of living organisms. Students will learn about the basic molecular biological underpinnings of cellular structure and function within an integrated framework that proceeds through major themes of bioenergetics, gas exchange and transport systems within multicellular organisms, inheritance and evolution. Students will develop a fundamental body of essential biological concepts, as well as build skills in collecting and analysing information, and writing coherent explanations.

Level: Undergraduate Level 0 Preparatory subject

Equivalent Subjects: BIOS 0003 - Focus on Biology (WSTC) BIOS 0001 - Biology

Restrictions: Please see the Subject Details page for any restrictions for this subject

How many species walk, fly, swim or slither, crawl, hop, wriggle or just float, hitchhike or move so slowly that they appear not to move at all? No one knows and new species appear almost every day. This unit focuses on this spectacular diversity of living things and the process of evolution. Students explore and classify biodiversity and how organisms function, acquire and assimilate resources and co-ordinate growth and reproduction. Organisms interact with one another and their environment forming a complex set of interactions in ecosystems. It is these interactions that have driven evolution. Ultimately human survival depends on the sustainable use of this biodiversity and ecosystems.

This unit will be replaced from Autumn 2022 by 401469 Bioscience 1.

This unit introduces nursing and midwifery students to the terminology and major introductory concepts related to normal structure and function of the human body and its relationship to performances of activities of living and healthy lifestyle practices.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bios1010/>)**BIOS 1011 Bioscience 2 (10 Credit Points)****Legacy Code:** 401006

This unit will be replaced from Autumn 2022 by 401470 Bioscience 2.

This unit extends knowledge gained in Bioscience 1 and introduces nursing students to concepts associated with alterations in health and wellness as a consequence of life transition. It includes an introduction to pathophysiology, pharmacology, immunology and microbiology. The unit also focuses on the impact of microorganisms on the health of people and the body's natural defences, as well as pharmacological interventions, in dealing with infections and injuries and its significance for nursing.

Level: Undergraduate Level 1 subject**Co-requisite(s):** BIOS 1010**Equivalent Subjects:** BIOS 1021 - Introduction to Health Breakdown**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bios1011/>)**BIOS 1012 Cell Biology (10 Credit Points)****Legacy Code:** 300816

Cells are the most basic form of all life, and underlying normal cell function are the molecules used to build complex cellular structures, generate energy, and propagate dynamic life. The unit will study the fundamental processes through which key biomolecules, including lipids, carbohydrates, amino acids and nucleic acids are manipulated to generate and store energy, and build a broad array of important biological macromolecules including DNA, membranes and proteins. To sustain life, cells respire for energy and replicate for growth and sexual reproduction. Accordingly the unit will examine cellular respiration, transcription, translation, mitosis, meiosis, transmission and how genes are inherited and modified providing insight into the phenomena of life. The role of DNA technologies in the fields of medicine, biotechnology and environmental science will provide students with real world applications.

It also examines microbial organisms, their classification, how they differ from eukaryotic cells and how our body defends against them. Where appropriate, examples of functional diseases will be discussed.

Level: Undergraduate Level 1 subject**Pre-requisite(s):** Students must pass NATS 0006 - Fundamentals of Health Science (WSTC Prep) prior to enrolling in this unit (except for those enrolled in 7019 - Diploma in Health Science Fast Track as NATS 0006 is not in the Fast Track course structure)**Equivalent Subjects:** BIOS 1022 - Introduction to Human Biology**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bios1023/>)**BIOS 1027 Management of Aquatic Environments (10 Credit Points)****Legacy Code:** 300824

This unit introduces students to the physical, chemical and biological nature of water systems and the linkages to human activity. These linkages include a development of an appreciation of the essential services and broad uses and values of water in modern human society, and the natural environment. Students are challenged to examine the causes and effects of water pollution and environmental degradation. Students are introduced to scientific water sampling, analysis and reporting of water quality and pollution.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** BIOS 1028 - Management of Aquatic Environments**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bios1027/>)**BIOS 1030 Resource Sustainability (10 Credit Points)****Legacy Code:** 300810

Resource sustainability deals with the local, national, and global sustainability issues concerning human interactions with the environment. The unit uses current resource issues and scientific concepts to provide the practical and theoretical information needed for students to think critically about environmental issues and to contribute to the sustainable management of natural and built environments. Students will also learn how science and society interact in the management of resources. Using the concept of ecologically sustainable development as a foundation, students will use critical thinking skills to research a resource issue of their choice at the local, national and/or international level. Students will communicate their research using new media exploring the issue and make recommendations for improving sustainability.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** BIOS 1029 - Resource Sustainability BIOS 1031 - Resource Sustainability (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bios1030/>)**BIOS 1031 Resource Sustainability (WSTC) (10 Credit Points)****Legacy Code:** 700099

BIOS 1033 Concepts in Human Physiology (10 Credit Points)**Legacy Code:** 301254

This unit introduces the core concepts and terminology necessary to provide a basic understanding of the physiological responses of the human body using relevant examples. These include the processes of homeostasis, cell-cell interactions and the physical and chemical transport processes that are required to carry out integrated functions. Students will explore these key physiological concepts through practical hands-on experiments and in interactive group work in prac and tutorial classes, respectively. The unit provides the foundation to study the physiology of human organ systems.

This unit builds on fundamental assumed knowledge of anatomy and physiology and introduces the study of human disease processes or pathophysiology through the framework of human development as a way of examining growth, health and disease at different stages of the lifespan. General concepts underlying human diseases as well as disorders relating to the lifespan will be studied. Developmental changes in physical, cognitive, social, intellectual, perceptual, personality and emotional growth are discussed. Common communicable and non-communicable, acute, chronic and degenerative health conditions are discussed from a pathophysiological, psychosocial and epidemiological perspective, and their impact on the day to day function of individuals and populations is explored. Risk factors for conditions and disease trajectory are explored at individual and society level, as well as the impact of these conditions on individuals, the health system and wider society.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bios1036/>)**BIOS 1037 Human Development and Disease across the Lifespan (WSTC) (10 Credit Points)**

BIOS 2005 Botany (10 Credit Points)

Legacy Code: 300836

From microscopic algae to giant flowering angiosperms, this unit develops students knowledge and understanding of plants on earth. The unit covers the topics of plant anatomy and morphology, classification and systematics, and evolution. Students will examine the major groups of plants: green algae, bryophytes, lycophytes, monilophytes, gymnosperms and angiosperms. Laboratory and field work involves the study of common Australian plants and economically significant plants.

Level: Undergraduate Level 2 subject

BIOS 2006 Comparative Physiology (10 Credit Points)

Legacy Code: 300838

Building on the underlying physical and chemical principals/laws that define physiology, this unit from both a systems (e.g. Respiratory) and environmental (e.g. Marine) perspective, seeks to compare the functional physiology of organisms at all levels of organisation. Particular attention will be paid to respiration, temperature tolerance & regulation, living in water, sensory and neurophysiology. Students will have the opportunity to carry out a defined research project.

Level: Undergraduate Level 2 subject

BIOS 2008 Ecology (10 Credit Points)

Legacy Code: 300839

We live in a society where environmental problems dominate public debate. Ecology is one of the sciences required to find solutions to such problems; terms and ideas that came originally from ecology are used in public discussions, and in legislation. This unit will introduce students to ecology: what is studied, how it is studied, what are the strengths and limitations of ecology. Current ecological thinking will be covered, from the scale of individual organisms, through populations, and up to communities and ecosystems. Methods of study will be highlighted using evidence from molecular ecology through to field investigations.

BIOS 2011 Exercise Nutrition, Body Composition and Weight Control (10 Credit Points)

Legacy Code: 400884

In 2016, this unit is replaced by 401141 - Exercise Nutrition. This unit provides students with an understanding of the interdependent areas of nutrition, body composition and body weight control within the context of sport, physical activity, and exercise. Nutritional needs and recommendations for all levels and types of physical activity are covered along with the links between nutrition and health, body composition, control of body weight and composition. Students will develop skills in nutritional analysis, body composition assessment and the development of exercise programs for weight control. Students will use these skills and knowledge in the individualisation of advice on exercise nutrition and body composition control.

Level: Undergraduate Level 2 subject

Biochemistry is the study of the chemistry of life. By understanding the structure and roles of biological macromolecules found in cells students will develop the concept of self assembly of these molecules to form life. Topics include the structure of carbohydrates, lipids, proteins, and nucleic acids and how they function in the lipid and aqueous environments of the cell. Basic metabolism is introduced with an overview of the major pathways in cells, mechanisms of regulation, and an introduction into important cofactors and intermediary molecules. These concepts will be reinforced through practical classes that teach critical skills in experimental design, analysis and interpretation.

Organisms degrade food molecules to generate energy and converts excess food molecules into internal fuel stores. This unit will cover topics including: bioenergetics; the structures of key molecules; glycolysis, gluconeogenesis, glycogen synthesis and breakdown; fatty acid oxidation and synthesis; amino acid catabolism; urea synthesis; citric acid cycle; electron transport and oxidative phosphorylation. Emphasis will be on the regulation and integration of these pathways, including their responses to hormonal regulation. The effects of altered dietary and hormonal status on metabolic pathways and their consequences for the organism will be discussed.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** BIOS 2014**Equivalent Subjects:** BIOS 2002 - Biochemistry 2 CHEM 2005 - Human Metabolism Disease**Incompatible Subjects:** LGYA 5859 - General Biochemistry**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bios2021/>)**BIOS 2022 Microbiology 1 (10 Credit Points)****Legacy Code:** 300833

In this unit students will use an inquiry-based approach to explore the origin and diversity of microorganisms and their significance in the environment, in foods and industry as well as in health and disease. Students will be introduced to the structure, reproduction, classification, cultivation and enumeration of bacteria, viruses, fungi and protists. The conditions required for growth and survival of microorganisms will be studied as well as physical and chemical methods of control. In laboratory classes students will develop skills in culturing and observing microorganisms and in designing experiments to test microbiological concepts. This unit is a pre-requisite for Microbiology 2 and Level 3 Microbiology units.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** BIOS 2023 - Microbiology 1**Incompatible Subjects:** BIOS 2015 - General Microbiology**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bios2022/>)

BIOS 2024 Microbiology 2 (10 Credit Points)**Legacy Code:** 300896

The unit focuses on the origins of genetic variation and the process of gene regulation in prokaryotes and explores the metabolic diversity of microorganisms from a variety of habitats and their application in industry and biotechnology. Using published scientific literature, students will learn how scientists research functional microbial physiology in the postgenomic era. The principles and applications of recombinant DNA techniques are discussed. Laboratory classes introduce students to techniques used to study microbial physiology and biotechnology based on microbial metabolism, such as examining the activity of antimicrobials and biotechnology such as microbial fuel cells.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** BIOS 2022**Equivalent Subjects:** BIOS 2025 - Microbiology 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bios2024/>)**BIOS 2026 Molecular Biology (10 Credit Points)****Legacy Code:** 300817

Molecular biology is central to many fields of the biomedical and natural sciences, and includes genetics, immunology, cell biology, biochemistry, and forensics. Through comparative studies of different organisms, this unit will describe fundamental concepts and methods in the study of DNA and RNA and the application of molecular biology in advanced fields such as genomics. Subjects will include DNA replication; transcriptional, post-transcriptional and epigenetic regulation of gene expression; microarrays, and an introduction to bioinformatics. Practical work will provide opportunities to become familiar with the methods of molecular biology, with an emphasis on the development of problem solving and analytical skills

Level: Undergraduate Level 2 subject**Pre-requisite(s):** BIOS 2014 OR

BIOS 2018 OR

BIOS 2021

Plants are the primary producers of terrestrial ecosystems and moderators of climate change. This unit introduces students to how plants grow and interact with their environment. Students will learn how leaves turn sunlight energy into sugars; stems transport water, solutes and organic compounds; roots acquire water and mineral nutrients by themselves or in association with soil microbes; and hormones regulate plant development and responses to the environment. This knowledge set is crucial for managing our Century's key challenges of food security and climate change. Students will be required to travel to the Hawkesbury campus where the practicals take place.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LGYA 5946 - Introductory Plant Physiology BIOS 2033 - Plant Physiology**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bios2032/>)**BIOS 2034 Principles of Evolution (10 Credit Points)****Legacy Code:** 300980

This unit is designed to impart an understanding of the core concepts in modern evolutionary theory, and an appreciation of the central position it plays in unifying all sub-disciplines of biology. The unit will cover modern synthesis, phylogenetics, phylogeography, origin of variation, genetic drift, natural selection, and coevolution, with a major emphasis on evolutionary mechanisms and analytical techniques.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** BIOS 1001 AND

BIOS 1012

Explores the diversity of invertebrate and vertebrate life in a phylogenetic context. Taxonomy, anatomy, ecology, ethology and physiology of major groups of animals are examined. Patterns will be examined from an evolutionary perspective and the unit will focus on structure and function to examine specialisations and adaptations of animals to their environment. The unit will use lectures and laboratory sessions to allow an interactive appreciation of the diversity of biological mechanisms and processes in the Animal Kingdom.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** BIOS 1001**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bios2035/>)**BIOS 2040 Invertebrate Zoology (10 Credit Points)****Legacy Code:** 301256

More than 99% of animals are invertebrates and due to their key role in all ecosystems, renowned biologist E. O. Wilson famously described them as the 'little things that run the world'. Besides their ecological importance, many invertebrates are useful to humans, whereas others are harmful to agriculture, human and veterinary health. This unit introduces invertebrate diversity in the context of their ecological and economic importance. It also develops skills necessary to classify and distinguish between the major invertebrate taxa. This unit includes fundamental hands-on laboratory and field studies skills for students with broad career pathways in science (e.g. animal, environmental, forensic and medical sciences) as well as agriculture, environmental management, and education.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** BIOS 1001**Equivalent Subjects:** NATS 3026 Forensic Biology BIOS 2035 Principles of Zoology**Incompatible Subjects:** BIOS 3017 Invertebrate Biology**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bios2040/>)

BIOS 2041 Vertebrate Zoology (10 Credit Points)**Legacy Code:** 301257

This unit examines the functional ecology and diversity of vertebrate animals (fish, amphibians, reptiles, birds and mammals). It combines anatomy, physiology, ecology and behaviour, to explain how vertebrates survive and reproduce in relation to their environment. We will uncover the evolutionary relationships among vertebrate groups, and examine their adaptations to different environmental challenges. The unit also explores patterns in vertebrate diversity, with a focus on Australian ecosystems. Students further develop their knowledge of the scientific method to conduct their own project to investigate how environmental factors influence vertebrate animal abundance and diversity. Students may be required to travel to another campus to undertake this unit.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** BIOS 1001**Incompatible Subjects:** BIOS 3023 Vertebrate Biodiversity**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bios2041/>)**BIOS 2042 Biochemistry (10 Credit Points)**

Biochemistry is the study of the chemistry of life. By understanding the structure and roles of biological macromolecules found in cells students will develop the concept of self assembly of these molecules to form life. Topics include the structure of carbohydrates, lipids, proteins, and nucleic acids and how they function in the lipid and aqueous environments of the cell. Basic metabolism is introduced with an overview of the major pathways in cells, mechanisms of regulation, and an introduction into important cofactors and intermediary molecules. These concepts will be reinforced through practical classes that teach critical skills in experimental design, analysis and interpretation.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** BIOS 1012 AND CHEM 1012**Equivalent Subjects:** BIOS 2001 - Biochemistry 1 BIOS 2036 - Proteins and Genes BIOS 2014 - Functional Proteins and Genes**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bios2042/>)**BIOS 3001 Advanced Cell Biology (10 Credit Points)****Legacy Code:** 300850

Cells of the body are studied in the context of health and disease, including mechanisms by which cells respond to the environment and integrate in and around tissue. Fundamental cellular processes are discussed that are important in embryonic development, stem cells, haematology and cancer. This unit investigates the action of hormones, growth factors and morphogens; their receptors and signalling pathways and the cellular responses they trigger. This unit covers modern techniques in cell culture, tissue engineering, advanced microscopy and other modern experimental approaches that enable dynamic understanding of live cell function.

In 2017, this unit is replaced by 401146 - Applied Physiology. This unit presents the knowledge and laboratory skills essential to understanding the physiological demands on the sports participant, as well as to develop, implement and evaluate sports-specific training programs. Students will develop the knowledge and skills necessary to perform and interpret results for a number of standard laboratory and field-based physiological tests used in talent identification and the assessment of high performance athletes. Prescription focuses on the development and implementation of sport specific fitness programs. Also covered are the physiology of ergogenic aids, overtraining, muscle fatigue and soreness; physiological factors limiting performance; and physiological responses to exercise in challenging environments.

BIOS 3004 Analytical Microbiology (10 Credit Points)**Legacy Code:** 300866

The unit provides a theoretical and practical introduction to wide range of microbiological techniques that are commonly used in medical science, industrial and food microbiology, environmental science, and research. Building on a basic understanding of microbiology the unit shows how microorganisms can be isolated, identified, and enumerated using traditional microbiological methods, modern variations on traditional methods, and more recent immunological and molecular methods. The laboratory component is an integral component of the unit as the students use a variety of techniques, methods and commercial systems that are applied in microbiological laboratories, and incorporates problem solving and inquiry based exercises.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BIOS 2022**Equivalent Subjects:** BIOS 3031 - Analytical Microbiology**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bios3004/>)**BIOS 3005 Applied Biomechanics (10 Credit Points)****Legacy Code:** 401147

To fully understand the science underlying the optimisation of human movement, students require a comprehensive working knowledge of Biomechanics. This unit represents a theoretical and applied study of selected topics in Biomechanics. It builds on the basic principles of Biomechanics that are presented in the unit Biomechanics and applies this knowledge to the analysis of sporting and human exercise performance. To achieve this, advanced methods and concepts in the biomechanical analysis of human performance are identified and explored.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** HLTH 2003**Equivalent Subjects:** BIOS 3006 - Applied Biomechanics of Exercise BIOS 3007 - Applied Biomechanics of Sport and Exercise**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bios3005/>)**BIOS 3007 Applied Biomechanics of Sport and Exercise (10 Credit Points)****Legacy Code:** 400889

To fully understand the science underlying the optimisation of human movement, students require a comprehensive working knowledge of Biomechanics. This unit represents a theoretical and applied study of selected topics in Biomechanics. It builds on the basic principles of Biomechanics that are presented in the unit Introduction to Biomechanics and applies this knowledge to the analysis of sporting and human exercise performance. To achieve this, advanced methods and concepts in the biomechanical analysis of human performance are identified and explored.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** HLTH 2008**Equivalent Subjects:** BIOS 3006 - Applied Biomechanics of Exercise**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bios3007/>)**BIOS 3012 Conservation Biology (10 Credit Points)****Legacy Code:** 300855

Most species disappearances have occurred in major extinction events spread over geological time. Are we in the midst of and the cause of another mass extinction event? This unit will explore this idea by examining the processes that have led to, and are leading to species extinction and the current biodiversity crisis. Many of the methods and issues used in and associated with conservation will be covered in a variety of case studies, field and laboratory activities.

A critical part of society's response to climate change is to measure the movement of greenhouse gases. Once this is done, steps taken to reduce these gases can be correctly targeted and the impact of such steps monitored. This unit will introduce students to the scientific measurement of greenhouse gas uptake and emissions, including assessment of uncertainties and verifiability of measurement. Ecosystem-level models will be used to estimate and quantify movement of greenhouse gases, allowing quantification of the net greenhouse gas emissions over the life cycle of a product. These approaches are vital steps in moving our society to a sustainable future.

BIOS 3017 Invertebrate Biology (10 Credit Points)**Legacy Code:** 300918

Invertebrates are the most diverse and abundant organisms in aquatic and terrestrial environments. Due to their key role in many ecosystems, biologist E. O. Wilson coined the phrase of invertebrates as the 'little things that run the world'. Besides their ecological importance, many invertebrates are useful to humans, whereas others are harmful to agriculture, human and veterinary health. This unit highlights invertebrate diversity and life histories as well as their key ecological and economic importance. It also includes hands-on laboratory and field studies. This unit is designed for students with career pathways in science (e.g. animal, environmental, forensic and medical sciences) as well as agriculture, environmental management and education.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** BIOS 3018 - Invertebrate Biology NATS 3026 - Forensic Biology**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bios3017/>)**BIOS 3019 Marine and Aquatic Ecology (10 Credit Points)****Legacy Code:** 300978

Temperate freshwater, estuarine and marine aquatic ecosystems play vital roles in providing food, water, recreation and other ecosystem services to human society and habitats for important species that make up global biodiversity. Yet aquatic habitats are the most threatened ecosystems on earth, under threat from global climate change and urbanisation. Through inquiry and problem solving this unit will equip students with the necessary techniques in experimental design and analysis needed to investigate aquatic ecosystems and knowledge of the main animal and plants in aquatic and marine ecosystems. The logic and philosophy of science, scientific studies and experimental analyses will be used to understand temperate aquatic ecosystems throughout this unit. On completion students will have the background knowledge and skills communicate to a range of audiences, so that they can contribute beneficially to management and/or conservation of waterways and oceans and the biodiversity within.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** BIOS 3009 - Aquatic Ecology BIOS 3010 - Aquatic Ecology**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bios3019/>)**BIOS 3021 Plant Health and Biosecurity (10 Credit Points)****Legacy Code:** 300921

This unit explores needs of world food production systems for improved plant health and biosecurity, from paddock to plate and environmental consequences of management practices. Through their studies, students will learn to recognise the significance of plant pests (invertebrates, microorganisms and weeds) and their impact on human society and food security, and methods of reducing their damage to plants and plant products. Major areas of study include: recognition of pests and diseases and assessment of field damage; strategies for reducing pest damage (including legislative, physical, biological, genetic and chemical control methods) and their benefits and limitations; the theory and practice of integrated pest and disease management systems; and issues associated with quarantine and biosecurity.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYA 6250 - Plant Microbiology and Protection**Incompatible Subjects:** LGYA 5948 - Plant Microbiology Interactions LGYA 6200 - Plant Protection**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bios3021/>)**BIOS 3023 Vertebrate Biodiversity (10 Credit Points)****Legacy Code:** 300861

This unit examines the functional ecology and diversity of vertebrate animals (fish, amphibians, reptiles, birds and mammals). It takes an integrative approach, combining anatomy, physiology, ecology and behaviour, to explain how vertebrates survive and reproduce in relation to their environment. We will uncover the evolutionary relationships among vertebrate groups, and examine their adaptations to different environmental challenges. The unit also explores patterns in vertebrate diversity, with a focus on Australian ecosystems. Students will apply their knowledge of the scientific method to design and conduct their own research project to investigate how environmental factors influence vertebrate animal abundance and diversity.

BIOS 3026 Evolution and Genetics (10 Credit Points)**Legacy Code:** 301253

This unit will ensure students are able to understand the core concepts in modern evolutionary theory and the central position that evolution plays in unifying all sub-disciplines of biology. It will also enable students to distinguish the major genetic mechanisms that underpin these theories and critically assess the general importance of genetics in the evolutionary process. In particular, students will gain an in depth knowledge on speciation and population divergence, origin of genetic variation, genetic drift and founder effects, natural and sexual selection, migration, mutation and coevolution, with a major emphasis on genetic mechanisms and the analytical techniques used to assess them. Students may be required to travel to a different campus to undertake this unit.

BIOS 3033 Applied Bioinformatics (10 Credit Points)

The ability to perform computational experiments and analyse data is a key component for a successful career in the biological sciences. This unit focuses on how biology has been enhanced through advances in technology, genomics, transcriptomics, proteomics and metabolomics in the development of cell phenotype. Using model systems, this unit shows how research biologists use computational cell biology to form hypotheses, mine data, analyse experiments, and synthesise information. Students will apply bioinformatics and engage with next-generation DNA sequencing data. Students will apply web-based bioinformatics toolkits to construct and compare model genomes, transcriptome, proteome and metabolome information to profile cell genotype and phenotype. Students will undertake a project that interprets and communicates research findings in the context of real world applications, legal and ethical frameworks.

BIOS 3034 Molecular Biotechnology (10 Credit Points)

Molecular techniques in cell biology are rapidly developing and offer new solutions to disease mitigation, as well as sustainable solutions to environmental and industrial imperatives. The fundamental cellular processes along with stem cell development, transformation, transfection, cell engineering and re-programming are some of the advanced applications covered in this unit. Students will conduct guided projects investigating the action of hormones, growth factors, morphogens and bio-actives; their receptors and signalling pathways and the cellular responses they trigger. Molecular Biotechnology covers modern techniques in cell screening, cell culture, advanced characterization and experimental approaches enabling dynamic understanding of live microbial, animal and plant cells.

BIOS 3035 Sustainable Environments (10 Credit Points)

As a student in Sustainable Environments you will synthesise and apply your knowledge about how ecological systems are responding to human impacts in the Anthropocene and how adaptation and mitigation can moderate these impacts. You will demonstrate knowledge of the role of biological and physical processes in provision of ecosystem services. You will apply analytical skills to identify sustainable solutions in social-ecological systems. You will incorporate social and cultural contexts, including relevant Aboriginal perspectives, in communicating science-based knowledge related to the United Nations sustainable development goals in an independent, problem-based sustainability project.

Pre-requisite(s): BIOS 2008

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/bios3035/>)

BIOS 3036 Agricultural Biosecurity (10 Credit Points)

Students will be exposed to current and emerging biosecurity issues world food production systems are expected to comply with and develop to ensure sustainable and safe animal and plant products. This unit will enable you to recognise, monitor and control animal and plant pests (invertebrates, microorganisms and weeds) and their impact on human society and food security. Major areas of study include strategies and procedures to identify, record and assess damage to animal and plant products. Included in this unit are key issues related to legislative, physical, biological, genetic and chemical control methods, along their benefits and limitations. Theory and practice of integrated pest and disease management systems and issues associated with quarantine and biosecurity are contextually embedded in unit content and activity.

BIOS 4001 Science, Technology and Environment Honours Project (30 Credit Points)

The aim of this unit is to further develop the student's research and problem solving skills. The student is required to implement a research plan, complete a substantive piece of research in a relevant field within Science, Technology and the Environment and to communicate the results of that work to an interested and technically literate audience. Students will present their research as a thesis with a substantial chapter detailing research objectives, methodology and research outcomes. The thesis topic and structure will vary according to the area of interest of the student and the expertise of the supervisor. The project is meant to be a significant undertaking and to incorporate some element of innovation. Throughout this unit regular planned consultations between the student and supervisor(s) will occur and students will be required to attend seminar series or regular research meetings; these may be formal components of other units within the Bachelor (Honours) course. Students are expected to work to a schedule devised in consultation with their supervisor. The schedule will include dates set for progress reports and the presentation of draft chapters for review by the supervisor. The unit builds upon the skills developed in the undergraduate course, extending students' competencies in a range of practical techniques and processes of critical thinking. Students who successfully complete the Honours program will have achieved the appropriate background to enable them to pursue further postgraduate research and/or coursework in the sciences or pursue a career in industry or profession.

BIOS 7001 Emerging Technologies for Biological Science (10 Credit Points)**Legacy Code:** 800186

This unit serves to enhance the technological education and training for students undertaking research in biological, agricultural and medical sciences. The unit will teach current and emerging technologies utilised in biological investigations with a focus on model species of animals, plants, insects and microorganisms. The unit is structured around emerging technologies in research fields of: 1) whole organism physiology, 2) cell molecular biology and biochemistry, and 3) genomic and epigenomic processes encoded by the nucleus. Students will be exposed to a systems approach in order to investigate complex interactions with a view towards understanding the impacts of the environment on biological interactions. Teaching will be undertaken by Western Sydney University-HIE staff who are world leaders in their respective research fields.

Building (BLDG)

BLDG 0001 Academic Skills for Construction Management (WSTC Prep) (10 Credit Points)**Legacy Code:** 700200

This unit is designed to assist students to become successful independent and reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study. The unit also develops basic competencies in using computers and application software for the Building Design Management and Construction Management industries. The unit covers the use of word-processing software and spreadsheets. Students are also introduced to project management and design software.

Level: Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg0001/>)**BLDG 0002 Building Calculations (WSTC Prep) (10 Credit Points)**

This unit is designed to assist students to become competent in the field of introductory senior mathematics. It introduces and reinforces mathematical skills in the areas of scale, application of scale, Pythagoras theory, trigonometry, sine and cosine, application of sine and cosine, building volumes, application of building volumes, gradients, application of gradients and thermal flow. Emphasis is placed on developing key competencies in building calculations.

Level: Undergraduate Level 0 Preparatory subject**Equivalent Subjects:** MATH 0027 - Scientific Methods in Construction Management**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg0002/>)**BLDG 1006 Building 2 (WSTC) (10 Credit Points)****Legacy Code:** 700071

This unit has been replaced by equivalent unit 700305 from Term 3, 2021. The aim of this unit is to provide students with an overview of the design, classification, applicable Australian Standards, structural systems, construction techniques, materials handling systems, building services, fit-out and finishes for larger scale buildings.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** BLDG 1005 - Building 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg1006/>)**BLDG 1007 Construction Work Safety (10 Credit Points)****Legacy Code:** 301061

This introductory unit describes the context of safety management in the Australian construction industry. The topics covered include: The poor long-term record in the construction industry on Workplace Health and Safety (WHS); Strategies for improving the industry performance; Introduction to hazard identification and risk management; and Individual safety awareness and personal responsibility.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** BLDG 1008 - Construction Work Safety (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg1007/>)**BLDG 1008 Construction Work Safety (WSTC) (10 Credit Points)****Legacy Code:** 700256

This unit describes the context of safety management in the Australian construction industry. The topics covered include: The poor long-term record in the construction industry on Workplace Health and Safety (WHS); Strategies for improving the industry performance; Introduction to hazard identification and risk management; and Individual safety awareness and personal responsibility.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** BLDG 1007 - Construction Work Safety**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg1008/>)

BLDG 1009 Environmental Building Design (10 Credit Points)**Legacy Code:** 301062

This unit explores the important parameters that are used to facilitate sustainable change in the built environment. Building design is a tool to minimise the use of scarce resources and reduce the impact on the natural Australian landscape. Improving the standard of liveability in urban and peri-urban communities is addressed through the development of holistic building design solutions.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** BLDG 1010 - Environmental Building Design (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg1009/>)**BLDG 1010 Environmental Building Design (WSTC) (10 Credit Points)****Legacy Code:** 700255

This unit explores the important parameters that are used to facilitate sustainable change in the built environment. Building design is a tool to minimise the use of scarce resources and reduce the impact on the natural Australian landscape. Improving the standard of liveability in urban and peri-urban communities is addressed through the development of holistic building design solutions.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** BLDG 1009 - Environmental Building Design**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg1010/>)**BLDG 1011 Property Building (10 Credit Points)****Legacy Code:** 301157

This unit provides students with an overview of regulations and construction techniques with an emphasis on low-rise residential buildings in the Australian context. It covers general process; building regulations; environmental issues; surveying techniques; structural elements (footings, framing and bracing); envelope; services; fit-out and finishes.

Level: Undergraduate Level 1 subject**Incompatible Subjects:** BLDG 1001 Building 1 BLDG 1003 Building 1 (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg1011/>)**BLDG 1012 Property Development Controls (10 Credit Points)****Legacy Code:** 200435

Property Development Controls provides students with an understanding of the property planning process from both a State government and Local government perspective. The unit will cover the areas of planning instruments, planning process, property development control issues and planning applications. The unit will also address the areas of the valuation and development impact of planning and environment regulations, with specific reference to the regulatory framework that regulates planning and development in NSW and the impact on the property industry in Australia.

Level: Undergraduate Level 1 subject**Incompatible Subjects:** ARCH 2003 - Development Control**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg1012/>)**BLDG 1013 Building Science (10 Credit Points)****Legacy Code:** 301219

This unit provides students with an introductory overview of the way in which scientific principles impact on the structure, fabric and performance of the built environment. Areas covered will include the concepts of force, energy and work in building structures; properties of common building materials; and significant aspects of heat, light and sound in buildings. All the theoretical content will be contextualised within examples drawn from the construction industry. Students will be able to recognise the critical data required for practical decision-making in the area of building technology.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg1013/>)**BLDG 1014 Non-Residential Building (10 Credit Points)****Legacy Code:** 301227

The aim of this unit is to provide students with an introduction to the design, classification, applicable Australian Standards, structural systems, construction techniques, materials handling systems, building services, fit-out and finishes for larger scale buildings. The unit focusses on non-residential building projects such as shopping centres, factories, warehouses, office buildings and associated facilities.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** BLDG 1004 Building 2

BLDG 1006 Building 2 (WSTC)

BLDG 1005 Building 2

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg1014/>)**BLDG 1015 Residential Building (10 Credit Points)****Legacy Code:** 301226

This unit provides students with an overview of regulations and construction techniques with an emphasis on low-rise residential buildings in the Australian context. It covers general process, building regulations, environmental issues, surveying techniques, structural elements (footings, framing and bracing), envelope, services, fit-out and finishes.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** BLDG 1002 Building 1

BLDG 1003 Building 1 (WSTC)

BLDG 1001 Building 1

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg1015/>)**BLDG 1016 Building Science (WSTC) (10 Credit Points)**

This unit provides students with an introductory overview of the way in which scientific principles impact on the structure, fabric and performance of the built environment. Areas covered will include the concepts of force, energy and work in building structures; properties of common building materials; and significant aspects of heat, light and sound in buildings. All the theoretical content will be contextualised within examples drawn from the construction industry. Students will be able to recognise the critical data required for practical decision-making in the area of building technology.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** BLDG 1013 - Building Science**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg1016/>)

BLDG 1017 Non-Residential Building (WSTC) (10 Credit Points)

This unit provides students with an introduction to the design, classification, applicable Australian Standards, structural systems, construction techniques, materials handling systems, building services, fit-out and finishes for larger scale buildings. The unit focusses on non-residential building projects such as shopping centres, factories, warehouses, office buildings and associated facilities.

Level: Undergraduate Level 1 subject

Equivalent Subjects: BLDG 1004 - Building 2 BLDG 1006 - Building 2 (WSTC) BLDG 1005 - Building 2 BLDG 1014 - Non-Residential Building

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg1017/>)

BLDG 1018 Residential Building (WSTC) (10 Credit Points)

This unit provides students with an overview of regulations and construction techniques with an emphasis on low-rise residential buildings in the Australian context. It covers general process, building regulations, environmental issues, surveying techniques, structural elements (footings, framing and bracing), envelope, services, fit-out and finishes.

Level: Undergraduate Level 1 subject

Equivalent Subjects: BLDG 1002 - Building 1 BLDG 1003 - Building 1 (WSTC) BLDG 1001 - Building 1 BLDG 1015 - Residential Building

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg1018/>)

BLDG 2001 Building Estimates and Tendering (10 Credit Points)

Legacy Code: 301207

This unit will provide students with an understanding of the principles of design economics and the factors that affect the cost of buildings. Students will learn cost planning process and will be introduced to a range of estimating techniques that could be used at various stages of a building project. A particular focus would be to understand the tendering process and how to prepare detailed estimates using unit rate method.

Level: Undergraduate Level 2 subject

Equivalent Subjects: BLDG 2010 - Estimating 1

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg2001/>)

BLDG 2002 Building Measurement (10 Credit Points)

Legacy Code: 301208

This unit is designed to develop the techniques required to measure, quantify and prepare bills of quantities for residential construction using standard method of building measurements. It will help students to appreciate basic role of a quantity surveyor.

Level: Undergraduate Level 2 subject

Equivalent Subjects: GEOM 2001 - Quantity Surveying 1

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg2002/>)

BLDG 2003 Building Regulations Studies (10 Credit Points)

Legacy Code: 300885

This unit develops an awareness of the regulations used to control risk in buildings. Major sources of risk, such as fire and public health, are identified and controlled. Building regulations of high risk regions, such as cyclonic, seismic and bushfire-prone areas, are also discussed. The unit emphasises the safety of vulnerable occupants, such as young children, disabled people and the elderly. The unit also explores recent developments in the National Construction Code (NCC: formerly BCA) concerning energy efficiency.

Level: Undergraduate Level 2 subject

Equivalent Subjects: BLDG 3002 - Building Regulation Studies BLDG 3003 - Building Regulation Studies

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg2003/>)

BLDG 2004 Built Heritage (10 Credit Points)

Legacy Code: 301085

This unit explores the history of building design in Australia and applies this contextual knowledge to the design of additions to existing buildings, as well as, to infill development in heritage areas. Built form, scale, materials, finishes and streetscape are considered so that new structures complement rather than detract from existing heritage buildings. The appropriateness of preservation, restoration, renovation, retrofit and adaptation strategies for older buildings is examined in the context of market and regulatory constraints on built heritage.

Level: Undergraduate Level 2 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg2004/>)

BLDG 2011 Contract Administration (10 Credit Points)

Legacy Code: 301224

In this unit, students will examine and investigate the contractual aspects with respect to time, cost, quality and scope in building contracts. The students will develop technical skills for the administration of construction contracts and be able to prepare payment certificates and cash flow statements.

Level: Undergraduate Level 2 subject

Incompatible Subjects: GEOM 2002 Quantity Surveying 2

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg2011/>)

BLDG 2012 Contract Administration (WSTC) (10 Credit Points)

In this unit, students will examine and investigate the contractual aspects with respect to time, cost, quality and scope in building contracts. The students will develop technical skills for the administration of construction contracts and be able to prepare payment certificates and cash flow statements.

Level: Undergraduate Level 2 subject

Equivalent Subjects: BLDG 2011 Contract Administration

Incompatible Subjects: GEOM 2002 Quantity Surveying 2

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg2012/>)

BLDG 2013 Work-Integrated Learning in Advanced Digital Construction (20 Credit Points)

As increased digitalisation drives the construction industry, this unit engages students in industry project-based learning related to Advanced Digital Construction. Students will select a project with an agreed industry partner, which involves or anticipates involvement in any of the following advanced digital construction applications: BIM, e-procurement and tendering, smart contracts, robotics, drones, artificial intelligence, virtual reality, IoT, additive manufacturing (3D) and digital twins. This unit contributes towards the skills required for a work-ready graduate and allows the student to plan, undertake and report on a specific aspect of practice in the context of work.

Level: Undergraduate Level 2 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg2013/>)

BLDG 2014 Work-Integrated Learning in Sustainable Construction (10 Credit Points)

In this unit, students will engage in project-based learning related to Sustainable Construction to practice sustainable approaches in real construction projects. Students will select a project with an agreed industry partner, which will involve sustainable construction practices, for example: sustainability assessments, managing green building projects, carbon emission assessments, cost-benefit analysis and the circular economy. This unit contributes towards the skills required for a work-ready graduate and allows the student to plan, undertake and report on a specific aspect of practice in the context of work.

Level: Undergraduate Level 2 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg2014/>)

BLDG 3001 Building Design Process (10 Credit Points)

Legacy Code: 301087

Building design is an iterative process. In this unit students will gain experience in generating design proposals and responding to simulated client and stakeholder feedback. Holistic design solutions that address economic, environmental and social issues (triple bottom line assessment) will be generated for realistic building projects.

Level: Undergraduate Level 3 subject

Pre-requisite(s): BLDG 3007

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg3001/>)

BLDG 3004 Construction Information Systems (10 Credit Points)

Legacy Code: 200503

This unit is designed to provide skills and knowledge for information management technology and practice as it relates to the building industry. The unit gives an overview of information management, data collection and storage, information classification systems, communications, specialist computer applications and artificial intelligence.

Level: Undergraduate Level 3 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg3004/>)

BLDG 3006 Construction in Practice 1 (10 Credit Points)

Legacy Code: 300886

This unit is designed to allow the student to gain experience with the complexity of the construction industry by integrating knowledge from earlier units. The unit involves group work on construction planning and management, regulatory control and client liaison required for initiating and completing a residential construction project.

Level: Undergraduate Level 3 subject

Pre-requisite(s): BLDG 1001 AND

ARCH 1001 AND

BLDG 1005

Equivalent Subjects: BLDG 2008 - Construction in Practice 1

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg3006/>)

BLDG 3007 Design Brief Formulation (10 Credit Points)

Legacy Code: 301086

This unit explores the process of formulating the quantitative and qualitative requirements for a complex construction project. Students will analyse and evaluate competing parameters for a specific building project which contains residential, commercial and community facilities.

Level: Undergraduate Level 3 subject

Pre-requisite(s): ARCH 1001 OR

ARCH 1004 OR

ARCH 1004

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg3007/>)

BLDG 3008 Negotiation in the Built Environment (10 Credit Points)

Legacy Code: 301105

Construction and Property development is the most complex activity in the Australian economy. There are many professional groups involved in the sector. This unit will train students in the negotiation skills required to successfully complete projects from the perspective of a construction manager, building surveyor, planner, civil engineer, construction lawyer and property developer.

Level: Undergraduate Level 3 subject

Equivalent Subjects: BLDG 2009 - Decision Making for Construction Professionals

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg3008/>)

BLDG 3009 Quality and Value Management (10 Credit Points)

Legacy Code: 300748

Introduces students to the concepts of quality systems value management techniques and their application to the built environment. Students will gain knowledge of quality assurance and value management theories, techniques and principles so that they can apply as they enter into their professional careers.

Level: Undergraduate Level 3 subject

Equivalent Subjects: LGYA 4735 - Quality and Value Management

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg3009/>)

BLDG 3010 Building Cost Studies (10 Credit Points)**Legacy Code:** 301234

This unit is designed to provide students with experience of advanced quantity surveying techniques. Students will develop an ability to perform various cost studies, consider sustainability issues and make whole life cost choices. The aim of this unit is to give students a hands-on experience of the tendering process for construction professionals. Students will undertake a team research project to determine the optimum parameters for a building infrastructure estimation.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg3010/>)**BLDG 3011 Construction Business Management (10 Credit Points)**

This unit is centred around the dynamics of managing a construction contracting enterprise. Student groups act as a Board of Directors to plan, communicate, execute, and adjust strategy as they pursue to optimise their firm's outcomes in an online competitive game. Knowledge areas of staffing, finance, labour management, risk management and tendering are challenged. Each week, student groups are scored objectively and given feedback. This shows the team the strengths and weaknesses of the prior week's decision making. Academic staff will work with each student group to refine and improve understanding of the complex dynamics involved. Assessments will be based on decision-making improvement and mastery of strategic and operational principles.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg3011/>)**BLDG 3012 Work-Integrated Learning in Construction Procurement Management (20 Credit Points)**

In this unit, students will engage in project-based learning related to Construction Procurement to gain practical skills in managing complex and dynamic construction industry procurement practices. Students will select a project with an agreed industry partner on any of the following suggested topics: new procurement systems, commercial and business management implementations, ethics and trust-based relationships, risk management, sustainable and lean construction. This unit contributes towards the skills required for a work-ready graduate and allows the student to plan, undertake and report on a specific aspect of practice in the context of work.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg3012/>)**BLDG 3013 Work-Integrated Learning in Global Construction (10 Credit Points)**

In this unit, students will engage in project-based learning related to Global Construction practices in the industry. Students will select a project with an agreed industry partner on construction and management of mega or complex projects to study aspects such as stakeholder management and communication, modern construction methods, productivity and quality assurance. This unit contributes towards the skills required for a work-ready graduate and allows the student to plan, undertake and report on a specific aspect of practice in the context of work.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg3013/>)**BLDG 4001 Building Design Project 1 (20 Credit Points)****Legacy Code:** 301099

In this unit students will source a suitable design project to complete as a capstone work which illustrates the skills they have developed throughout their study program. The project will contain a level of complexity exceeding that of previous building designs produced in the program. Diverse stakeholder input on the projects impact will be gathered and assessed.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** BLDG 3001**Incompatible Subjects:** CIVL 4018 Building Design Project 1 (Honours)
Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg4001/>)**BLDG 4002 Building Design Project 2 (20 Credit Points)****Legacy Code:** 301100

In this unit students will develop the design solution they created in Building Design Project 1 into a fully resolved CAD model suitable for costing, scheduling and contracting. Construction Certificate documentation will be generated.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** BLDG 4001**Incompatible Subjects:** CIVL 4019 Building Project 2 (Honours)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg4002/>)**BLDG 4003 Construction Economics (10 Credit Points)****Legacy Code:** 200504

This subject is designed to provide students with: an understanding of economic principles, national and international economic issues; general investment issues; how the national and international economy functions; how the building industry and the building firm relates to the national and international economy; and how economic reasoning may be applied to various problems in the building industry.

Level: Undergraduate Level 4 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg4003/>)**BLDG 4004 Estimating 2 (10 Credit Points)****Legacy Code:** 300726

The aim of this unit is to give students a hands-on experience of the tendering process for construction professionals. Students undertake a team research project to determine the optimum parameters for a civil/building infrastructure estimation.

Level: Undergraduate Level 4 subject**Equivalent Subjects:** LGYB 5406 - Estimating 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg4004/>)

BLDG 4005 Major Project in Construction (10 Credit Points)**Legacy Code:** 300536

This unit will enhance the ability of students to investigate a selected topic with a construction industry focus and involves preparation of a literature review. Content includes mechanics of a literature review, use of research (or strategic planning) in the construction industry, development of high-value competencies in terms of marketing, organisational structure and project management.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** Successful completion of 200 credit points for students in 2607 Bachelor of Construction Management and 3697 Bachelor of Construction Management Studies (exit only)

Successful completion of 130 credit points for students enrolled in Bachelor of Construction Management Studies/Bachelor of Laws

Equivalent Subjects: LGYB 5398 - Major Project 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg4005/>)**BLDG 4006 Modern Construction Enterprises (10 Credit Points)****Legacy Code:** 301158

In this unit the pace of change in the construction industry will be addressed. Particular emphasis is placed on the ways in which construction businesses need to adapt their practices to deal with increased digitisation, industrialisation and globalisation. The impact of disruptive innovation on 'back of house' operations in construction enterprises will be studied and trends identified.

Level: Undergraduate Level 4 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg4006/>)**BLDG 4007 Modern Construction Projects (10 Credit Points)****Legacy Code:** 301159

In this unit, accelerating changes in the way construction projects are procured and delivered will be studied. Innovations relating to pre-site construction and to productivity measurement will be evaluated. Quality assurance and risk management will be considered in the light of new project delivery systems. Ways to improve end user satisfaction with construction project delivery will be addressed.

Level: Undergraduate Level 4 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg4007/>)**BLDG 4008 Digital Construction (10 Credit Points)****Legacy Code:** 301225

This unit offers knowledge and skills essential for a successful application of Building Information Modelling (BIM) in the context of built environment. Building Information Modelling (BIM) has the potential to improve integration between design and construction processes, reduce design discrepancies and rework, optimise project time and cost performance, and manage risks. Students will develop an understanding of the generation, reviewing and application of 3D, 4D and 5D BIM models in building projects. Virtual and augmented reality, spatial information capture and performance management systems will also be introduced. This unit will be taught through intensive practice-based workshops and computing labs, enabling students to build skills in virtual design and construction processes.

Level: Undergraduate Level 4 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg4008/>)**BLDG 4009 Residential Building Project (10 Credit Points)****Legacy Code:** 301231

This unit is designed to allow students to gain experience with the complexity of the construction industry by integrating knowledge from earlier units. The unit involves group work on construction planning and management, regulatory control and client liaison required for initiating and completing a complex residential construction project.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** BLDG 1015 AND

ARCH 1004

Equivalent Subjects: BLDG 2008 Construction in Practice 1

BLDG 3006 Construction in Practice 1

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg4009/>)**BLDG 4010 Construction Research Methods (20 Credit Points)**

This unit introduces students to various research methods that are applicable for research in the Built Environment and also guides students on how to carry out a literature review leading to identifying a clear research question. Students will be required to submit a research proposal for an identified research problem within a chosen research topic, under the supervision of an assigned research academic.

Level: Undergraduate Level 4 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg4010/>)**BLDG 4011 Construction Thesis (20 Credit Points)**

In this unit, students continue their research based on the literature review and research design submitted as part of the Construction Research Methods, under the close guidance of the same research supervisor. The research will be extended using appropriate research methods to perform data collection, data analysis and research conclusions. The students will submit an original thesis report on a research endeavour (continued from the research report in unit Construction Research Methods). In addition to the specialist knowledge on the chosen research topic, students will learn a range of skills including academic writing, project management, critical thinking and analytical skills.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** BLDG 4010**Incompatible Subjects:** ENGR 4024 - Construction Management Honours Thesis**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg4011/>)**BLDG 4012 Industry Based Learning (0 Credit Points)**

Students are required to undertake 1200 hours of industry based experience as required by course and professional accreditation bodies.

Level: Undergraduate Level 4 subject**Equivalent Subjects:** LGYB 5394 - Industry Based Learning**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg4012/>)

BLDG 4013 Work-Integrated Learning in Construction Leadership (10 Credit Points)

In this unit, students will engage in project-based learning related to Construction Leadership within an industry framework. Students will select a project with an agreed industry partner to develop any of the following managerial and leadership skills in construction settings: organisation management and applications, strategic management, change management, corporate social responsibility, human resource management, knowledge management and organisational resilience.

This unit contributes towards the skills required for a work-ready graduate and allows the student to plan, undertake and report on a specific aspect of practice in the context of work.

Level: Undergraduate Level 4 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg4013/>)

BLDG 7001 Advanced Contract Management (10 Credit Points)

Legacy Code: 301188

This unit introduces various contract types and risks involved in construction project management. The unit extends to examining contractual claims management and procedures together with alternative dispute resolution methods. The unit will further help students to understand change management process and develop a change management plan.

Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

BLDG 7002 Building Regulations (10 Credit Points)

Legacy Code: 300947

This unit introduces the role and functions of the building surveyor and the National Construction Code of Australia (NCCA). The topics include building legislation, NCCA general provisions, structure and philosophy. Students are required to understand the objectives, the function statements and the performance requirements of various sections of Volume One of NCCA. The concept of performance based approach is discussed and compared with the prescriptive approach. The content covers the relationship between research in the development of building codes and the role played by approval/certifying authorities in building assessment and approval. Legal obligations of building surveyors, their tasks of assessment, enforcement and documentation are also explained.

Level: Postgraduate Coursework Level 7 subject

Equivalent Subjects: BLDG 7010 - Fire and Building Regulations

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg7002/>)

BLDG 7003 Building Studies (10 Credit Points)

Legacy Code: 300716

This unit describes and analyses the technological, socio-economic and sustainability factors that influence the building industry. The topics include advances in contemporary issues affecting sustainability and energy conservation, access and adaptable housing, safety in special areas and building design in accordance with the relevant legislative requirements. Use of assessment tools for sustainability is covered. Discussions are also made on development management, the roles and the relationship between building owners / occupiers, developers and building surveyors.

Level: Postgraduate Coursework Level 7 subject

Equivalent Subjects: LGYB 5426 - Building Studies

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg7003/>)

BLDG 7004 Building in Bushfire Prone Areas (10 Credit Points)

Legacy Code: 200458

This unit describes the basis for the design and construction of buildings to withstand bushfire attack, the measures that can be incorporated into building design to achieve this and the legislative building requirements affecting bushfire environments. The unit examines the mechanisms of bushfire attack on structures, the role of landscaping on building survival and how materials perform in the presence of a bushfire event. The unit describes the role of the Building Code of Australia (BCA) and Australian Standards in the construction of various building types and the legislative and regulatory environment in which this operates.

Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg7004/>)

BLDG 7005 Egress and Risk Assessment (10 Credit Points)

Legacy Code: 300717

This unit introduces the concept of risk assessment for fire safety systems relevant to life safety and property protection. The unit helps students develop an understanding of building occupant characteristics and human behaviour during fire emergencies. Parameters, methods and criteria for risk and economic assessments are covered in this unit.

Level: Postgraduate Coursework Level 7 subject

Equivalent Subjects: LGYB 5424 - Fire Safety Systems 1 (Property)

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg7005/>)

BLDG 7006 Financing Cities in the Global Economy (10 Credit Points)**Legacy Code:** 101315

Financing infrastructure to keep cities running and growing at a time when governments face new financial constraints is a key challenge for urban managers. In order to be able to contribute to the debate about financing cities it is important for future urban managers to develop a basic financial literacy, understand and draw on the options for financing essential urban functions in Australia cities and elsewhere, and assess the tensions involved in public and private financing pathways. This unit addresses these needs through both theoretical and practical approaches to the city as a set of flows within a wider urban network of relations. Students develop their understanding via interactive lectures, case studies, fieldwork exercises and assignments.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg7006/>)**BLDG 7007 Interpreting Building Regulations (Residential Buildings) (10 Credit Points)****Legacy Code:** 301103

The basis of this unit is to ensure students become accustomed to reading and interpreting laws that specifically relate to building legislation. The unit provides students with an introduction to and sound working knowledge of the prescriptive provisions of the National Construction Code (BCA) Volume 1 & 2, associated Standards, codes and statutory interpretation as it applies to residential buildings. This unit will develop a sound knowledge of the National Construction Code (BCA) - Volume 2 and an introduction to rise in storeys, types of construction and the fire requirement for building elements in the National Construction Code (BCA) Vol. 1, Building Profession Act 2005 and other associated legislation. Residential building work includes work under the Home Building Act 1989, which involves the construction of a dwelling, and alterations or additions to a dwelling. It also will relate to repairing, renovating, decorating or applying protective treatment to a dwelling. The unit applies to residential buildings and associated structures and includes the evaluation and interpretation of performance requirements, classification of buildings according to National Construction Code (BCA) criteria, limitations of the referenced documents (National Construction Code (BCA) - Volume 2) and strategies for compliance. Students will need to relate the objectives of the National Construction Code (BCA) and the purpose of its respective provisions in relation to construction of residential buildings and the evaluation of associated documentation.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg7007/>)**BLDG 7008 Professional Practice and Building Law (10 Credit Points)****Legacy Code:** 301104

The basis of this unit is to ensure students become accustomed to reading and interpreting building and related laws. The unit provides students with background knowledge of the negligence, administrative law, life safety, proportional liability, contracts and statutory interpretation as it applies to architecture, building surveying, fire engineering and bushfire protection. The unit studies the codes of professional conduct, ethics, conflict of interest and the rules of evidence within the legal constraints when acting as certifiers and or experts. The jurisdictional requirements for certification are considered and assessed. These professions can act as expert witnesses and consequently need to understand codes of professional conduct, ethics, conflict of interest and the rules of providing expert evidence. In doing so, they are potentially required to brief solicitors or other legal professionals and will ultimately have a duty to the court or tribunal.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg7008/>)**BLDG 7009 Project Procurement Systems (10 Credit Points)****Legacy Code:** 301191

This unit examines contemporary practice in relation to procurement strategies such as traditional procurement, relational contracting, strategic project alliancing, and public-private partnerships / private finance initiatives within project environments. The unit will challenge students to examine built environment business ecologies which underpin strategic procurement decision making. Unique procurement environments will be explored, allowing the students to examine key themes of procurement management.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg7009/>)**BLDG 7011 Work-Integrated Learning in Project Management A (20 Credit Points)**

This work integrated learning unit will provide students enrolled in the Master of Project Management with an opportunity to undertake work placement focusing on project management (PM) in a professional organisation within an industry relevant to students' specialisation or generic option. The placement will allow students to observe and develop PM professional skills and behaviour, integrate theoretical and practical PM knowledge and conventions into a real world setting, and establish project management competency, all in line with recognised world standard in project management. This unit aims to promote greater engagement with career planning and progression and hence improve job readiness.

Level: Postgraduate Coursework Level 7 subject**Incompatible Subjects:** INFO 7010 - Research Project A INFO 7011 - Research Project B**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/bldg7011/>)

BLDG 7012 Work-Integrated Learning in Project Management B (20 Credit Points)

This WIL unit builds on its predecessor, Work-Integrated Learning in Project Management A and will provide students enrolled in the Master of Project Management with an opportunity to undertake work placement focusing on project management (PM) in a professional organisation within an industry relevant to students' specialisation or generic option. The placement will allow students to further develop PM professional skills and behaviour, integrate theoretical and practical PM knowledge and conventions into a real world setting, and establish project management competency, all in line with recognized world standard in project management. The unit aims to further promote greater engagement with career planning and progression and hence improve job readiness.

Level: Postgraduate Coursework Level 7 subject

BUSM 0011 Business Studies (WSTC Prep) (10 Credit Points)**Legacy Code:** 700206

This unit aims to develop an understanding of some of the key concepts, relationships and principles underpinning the operations of business in modern societies. At the same time, it is designed to develop a degree of competence in a suite of skills to prepare students for undergraduate study in business and to enable them to act responsibly and effectively in the local and global business environment.

Level: Undergraduate Level 0 Preparatory subject**Equivalent Subjects:** BUSM 0012 - Business Studies (UWSC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm0011/>)**BUSM 0012 Business Studies (WSTC) (10 Credit Points)****Legacy Code:** 900023

This unit aims to develop an understanding of some of the key concepts, relationships and principles underpinning the operations of business in modern societies. It is also designed to develop a degree of competence in a suite of skills to prepare students for undergraduate study in business and to enable them to act responsibly and effectively in the local and global business environment.

Level: Undergraduate Level 0 Preparatory subject**Equivalent Subjects:** BUSM 0011 - Business Studies (WSTC Prep)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm0012/>)**BUSM 0013 Corporate Social Responsibility, Sustainability and Ethics (WSTC Prep) (5 Credit Points)****Legacy Code:** 700261

This unit focuses on the topics of business ethics, corporate social responsibility and sustainability. Students will be introduced to the conceptual understandings required to identify the ethical dimension of business activities with reference to different functions of business and stakeholders. They will also develop an understanding of how and why social issues are now a key part of managing the business enterprise. Students will be given the opportunity to develop skills in selecting and evaluating sources and materials when preparing tasks, with an emphasis on reflective practice.

Level: Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm0013/>)**BUSM 0016 Foundations of Business (WSTC) (10 Credit Points)****Legacy Code:** 900052

Foundations of Business aims to familiarise students with some of the concepts and relationships of consumers and businesses in the Australian context. The subject builds upon understandings and skills developed with a focus on the activities of business and their role in a modern society like Australia. At the end of this course students should have a better knowledge and understanding of: The role of consumers and producers in the economy; the important role played by money in a modern economy; some important factors in commercial transactions; the main functions of business as producers of goods and services; the role and importance of business records for both business and customers; how businesses are affected by other sectors of the economy including governments, competitors and suppliers; some of the functions of government in a democratic market based society; the role of advertising; the Australian political framework.

This unit introduces students to the essential academic skills required for success in tertiary studies. It employs an explicit pedagogical approach to teach students how to become independent, active, and reflective learners. The unit also introduces essential research and writing skills specific to the Business discipline.

Level: Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm0023/>)**BUSM 0027 Management Fundamentals (10 Credit Points)****Legacy Code:** 201032

This unit introduces students to the fundamentals of management that are an essential component of preparing students for postgraduate studies in all business areas. Students will learn to identify operational systems and structures that underpin organisational design, decision-making and change within a variety of contexts. The unit will also address the multicultural dimensions of business management and how leadership styles and social pressures influence human resource management both in Australia and in a global environment. A consideration of contemporary issues such as sustainability and social responsibility will enable students to build their skills in organisational analysis and corporate problem-solving.

Level: Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm0027/>)

BUSM 0028 Verbal and Written Communication Skills (10 Credit Points)**Legacy Code:** 201033

This unit develops both verbal and written communication skills within a business context. Students will learn the underlying principles of academic research and writing in preparation for postgraduate study. These principles will be applied for the purpose of communicating effectively in both academic and professional environments. A consideration of non-verbal, intercultural and ethical issues will inform development of these verbal and written communication skills.

Level: Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm0028/>)**BUSM 0029 Decision Making for Business (WSTC Prep) (10 Credit Points)**

The world of business is a complex one, where decisions can have a major impact on a firm's success or failure. So how do you make a good business decision? In this unit students will explore the value of numerical data as a tool to help businesspeople make informed decisions using sound evidence. We start with the basics of quantitative data - statistics - as a way of calculating the probable outcomes of particular decisions. We then explore how another crucial set of numbers for a firm - the financials - can also empower businesspeople to make smart decisions.

Level: Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm0029/>)**BUSM 1001 Business Academic Skills (10 Credit Points)****Legacy Code:** 200336

This is a foundation unit that addresses academic essay writing skills relevant to business and economic issues. The unit is designed to develop basic student proficiencies such as information collection, analysis and evaluation, and logical reasoning skills. Through the analysis of ethical issues, this unit teaches students to research; reference using the College of Business and Law's Harvard style; analyse data; develop an argument; and write an academic essay.

This online unit in the Bachelor of Business Administration enables students to put work experience to practical use in the academic study of business and management. It provides an introduction to work-based learning and helps students to develop the study skills needed in higher education. This unit aims to develop skills to improve performance at work - and as such is quite different from many other units that are designed around a particular subject. In contrast, this unit provides an opportunity to make decisions about what to learn to improve performance in the workplace.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm1005/>)**BUSM 1006 Enterprise Innovation and Markets (10 Credit Points)****Legacy Code:** 200911

Enterprise Innovation and Markets introduces students to key concepts, business models and issues surrounding contemporary business. Students will develop an understanding of the private enterprise system and business ownership, the implications of marketing and economics on market structure together with managing innovation. Building on the foundation knowledge of the key principles of markets, students will be able to transfer this knowledge into their subsequent study of specialist areas. The unit also aims to develop students' communication skills by working in teams to enhance their literacy proficiency and enhance their critical thinking in preparation for the more advanced units of the degree.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm1006/>)**BUSM 1007 Enterprise Innovation and Markets (WSTC) (10 Credit Points)****Legacy Code:** 700251

This unit introduces students to key concepts, business models and issues surrounding contemporary business. Students will develop an understanding of the private enterprise system, competing on a global platform, business ethics and social responsibility, business ownership, market structure and innovation. Building on the foundation knowledge of the key principles of markets and public policy students will be able to transfer this knowledge into their subsequent study of specialist areas. The unit also aims to develop students' communication skills to enhance their literacy proficiency in preparation for the more advanced units of the degree.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** BUSM 1006 - Enterprise Innovation and Markets**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm1007/>)**BUSM 1008 Enterprise Leadership (10 Credit Points)****Legacy Code:** 200912

Enterprise Leadership begins the development of the understanding of the role and function of business management and enterprise leadership concepts. Enterprise leaders need to balance a range of stakeholder perspectives in dynamic internal and external environments at local and global levels. Students are introduced to people, managerial and organisational processes designed to achieve enterprise leadership. Problem solving scenarios and experiential learning provide students with a foundation to develop personal and professional skills required to effectively manage their careers.

This contemporary unit focuses on the importance of supply chain management in the success and profitability of organisations. Supply chain management is defined theoretically and practically, with critical issues in designing a global supply chain network discussed. Several case studies enabling students to understand issues within supply chain management are discussed throughout, covering areas such as collaboration, transport, warehousing and the various relationships within the supply chain.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** LGYA 4795 - Global Warehousing and Transport Management LGYA 4836 - Global Logistics and Supply Chain Management LGYA 4740 - Warehousing and Transport Management**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm1013/>)**BUSM 1014 Introduction to Business Studies (20 Credit Points)****Legacy Code:** 200879

This online unit is the first in the degree in business administration and is the introductory unit in business studies. It explores the question 'What is a business?' and investigates the business functions of human resource management, accounting and finance, and marketing. Different internal and external elements of a business are introduced, and the context in which a business operates is explained. Students will explore the common aims and characteristics of business - investigating what makes them different. Business structures, cultures and functions are identified and the political, social, economic, technological and ethical considerations affecting business are introduced.

Level: Undergraduate Level 1 subject**Incompatible Subjects:** BUSM 1038 Management Dynamics**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm1014/>)

BUSM 1015 Introduction to International Business (10 Credit Points)**Legacy Code:** 200591

This unit introduces students to the nature of international business operations in the world economy. The first part focuses on the basic concepts and theories of international trade, investment, and foreign exchange which form the foundation of a firm's international business activities. The second part is devoted to the economic, cultural, political and ethical environments and their effects on a firm's international business operations. The third and last part provides an overview of how the functional areas of business i.e. Marketing, production, human resource and finance are conducted in and affected by the multifaceted environment of an internationally oriented firm.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** LGYA 9780 - International Business and Asian Environment**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm1015/>)**BUSM 1016 Leadership in a Complex World (10 Credit Points)****Legacy Code:** 200855

This unit is designed for students from Advanced Degrees who are enrolled in The Academy. The focus here is the leadership of groups and teams in a cross-disciplinary environment and its application in various contexts. The unit encourages the examination of leadership through the lens of multiple disciplines thereby broadening perspectives of leadership and inspiring students to think and act outside the silos of their disciplines. Through the unit, students will be challenged to think about preparing for unknown futures and the nature of the skill sets necessary to prepare for and respond to change and innovations.

Level: Undergraduate Level 1 subject**Incompatible Subjects:** BUSM 1036 Leadership and Uncertainty**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm1016/>)**BUSM 1019 Management Foundations (10 Credit Points)****Legacy Code:** MG102A

'Management Foundations' provides an opportunity for students to understand the linkage between organisational processes and managerial practices. The aim of the unit is to identify the dynamic nature of managerial practice in changing social, economic, technological and global environments. The unit investigates management theory, roles, and managerial skills and addresses the ongoing needs of decision making, quality management and worksite safety management. This unit is offered specifically to the School of Computing, Engineering and Mathematics and the School of Social Sciences and Psychology.

Level: Undergraduate Level 1 subject**Incompatible Subjects:** BUSM 1038 - Management Dynamics**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm1019/>)**BUSM 1021 Management Practice (20 Credit Points)****Legacy Code:** 200890

This online unit introduces management ideas and uses activities to build on the students' existing knowledge and skills through the application of management theory. The unit will develop an understanding of management practice in the wider context of organisations. Students will critically evaluate their workplace context in relation to management practice and review their knowledge and skills. The unit is suitable for anyone who has undertaken workplace learning in the last three years and wants to develop an academic understanding of management disciplines such as operations, marketing, strategy, and their own management practice.

Level: Undergraduate Level 1 subject**Incompatible Subjects:** BUSM 1038 Management of Dynamics**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm1021/>)**BUSM 1023 Managing People at Work (10 Credit Points)****Legacy Code:** 200300

'Managing People at Work' provides an introductory framework for the study of employment relations. The unit is approached from a stakeholder perspective, emphasising the way that management, labour and the State, along with other key stakeholders, act, both separately and together, to structure the employment relationship. In doing so, the unit integrates industrial relations and human resource management theory and practice, illustrating the links between the two disciplines. The content of the unit is structured so as to provide an initial introduction to the disciplines of industrial relations, human resource management, and employment relations, and to the key stakeholders in the employment relationship. Building on this framework, a theoretical and empirical analysis of employment relations processes is provided, with particular emphasis given to recent changes in the role and perspectives of stakeholders.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** LGYA 4397 - Management of Employment Relations LGYA 9845 - Introductory Employment Relations BUSM 1024 - Managing People at Work (UWSC) LGYB 0478 - Managing People at Work (Creative Industries)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm1023/>)

BUSM 1024 Managing People at Work (WSTC) (10 Credit Points)**Legacy Code:** 700030

This online unit is for Bachelor of Business Administration students to develop specialised reading and writing skills for business study purposes. Students will study a range of business related material that have been especially designed to develop knowledge and reading and writing skills. Topics include areas of human resource management; finance and accounting; marketing and a number of business analysis methods. Some of the study materials are authentic texts from the business world, others have been adapted or designed for the unit. Different styles of writing from business studies and business are introduced. Through examining successful examples of student writing and work-related documents, and reflecting on what makes these texts successful, students will learn to analyse case studies and produce effective academic business documents.

Level: Undergraduate Level 1 subject**Incompatible Subjects:** BUSM 1001 Business Academic Skills**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm1028/>)**BUSM 1030 The Business of Hospitality (10 Credit Points)****Legacy Code:** 200988

The Business of Hospitality employs a case study approach to examine successful hospitality operations and develop an understanding of what is required to plan, design, deliver and manage engaging hospitality experience as the foundation of prosperous hospitality operation. In considering the broader context of the hospitality industry, students will be given the opportunity to explore where they may fit within a hospitality context.

Level: Undergraduate Level 1 subject**Incompatible Subjects:** BUSM 3047 - Managing Service and Experience**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm1030/>)**BUSM 1031 The World of Sport Business (10 Credit Points)****Legacy Code:** 201000

The World of Sport Business offers students a contemporary view of sport organisations which are uniquely situated within fluid and emergent social, cultural and political environments and necessitate unique/different managerial approaches. Students will explore key issues within the domestic and international sport management field including, but not limited to, sport professionalisation and commodification, globalisation and sport for development. Students will be introduced to sport leadership theories and practice, sport and its management as a context for ethical analysis, and approaches to sport marketing and promotions in the contemporary sport business context.

BUSM 2001 Business Organisations and Their Environments A (20 Credit Points)**Legacy Code:** 200882

This online unit introduces students to an examination of the environments in which business organisations operate. The unit adopts a practice-based learning approach, which means that students focus on how the ideas and issues discussed impact on organisations with which they are familiar. Students will begin by assessing their current knowledge and understanding of business organisations and then go on to explore how organisations we see today have been shaped. Drawing on individual experience of organisations as well as working collaboratively, students will develop a critical theoretical and practical understanding of the nature of business organisations and the internal and external factors that shape them.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm2001/>)**BUSM 2002 Business Organisations and Their Environments B (20 Credit Points)****Legacy Code:** 200884

This online unit extends the examination of the environments in which business organisations operate which was introduced in Business Organisations and their environment A. The unit focuses initially on three sets of debates that are current in the world of business - globalisation, corporate social responsibility and regulation. Students are then asked to consider what organisations might look like in the future. Are newer organisational forms, such as open-source networks and social enterprises, just a transient phase or the start of a revolution in the operation of business? What are the implications of this for the world of work? Each topic will be approached through case study material and theoretical debates and students will work collaboratively and individually to build skills and critical understanding.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** BUSM 2001**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm2002/>)**BUSM 2004 Business, Society and Policy (10 Credit Points)****Legacy Code:** 200158

Business organisations influence and evolve through ongoing social, political and technological change. Taking the perspective that businesses both affect and are affected by government and society, the unit examines the complexities of interactions between three sectors: business, society and government. The unit emphasises the social responsibility of business. The different ideologies used to legitimise the actions of business, the responses from society and the role of government (local, transnational and global) in regulating interactions, are critically evaluated.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** BUSM 2003 - Business Society and Policy (UWSC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm2004/>)**BUSM 2005 Cost Benefit Analysis (10 Credit Points)****Legacy Code:** 200924

Students will learn and apply Cost Benefit Analysis, the most commonly used economic tool in business, consultancy and government organisations. The unit is a core unit in the Economics major but is open to all students who have a basic understanding of economics and a desire to improve their analytical skills and employability. At the completion of the unit, students will be able to explain the economic foundations of cost-benefit analysis and they will have experience with analysing, critically evaluating and developing a cost-benefit analysis for a specific proposal. Students will also consider risk analysis and cost-effectiveness analysis.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** BUSM 1006 OR

ECON 1011 OR

MKTG 1005

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm2005/>)**BUSM 2014 Enterprise Industrial Relations (10 Credit Points)****Legacy Code:** 200614

Enterprise Industrial Relations builds participants' analytical and research abilities, developing capacity to identify, diagnose and engage with industrial relations challenges from different stakeholder perspectives. Participants work with real-world industrial relations, looking at individual employees' workplace and labour market experiences; the goals and activities of managers; and the role and practices of tribunals, enforcement agencies, employer associations and trade unions. This is done through activities that require working collaboratively on problems using online research to investigate contemporary practice, such as the drivers behind enterprise agreements and the implications of institutional arrangements and trade unions for productivity, equity and human resource utilisation. It is a core unit for the human resource management undergraduate program.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** BUSM 1023**Equivalent Subjects:** BUSM 2015 - Enterprise Industrial Relations**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm2014/>)**BUSM 2016 Entrepreneurial Management and Innovation (10 Credit Points)****Legacy Code:** 200154

This unit examines the theory, practice and nature of entrepreneurship, as a virtual but often neglected and misunderstood mode of management. A basic premise underlying this unit is that all business entities require enterprising management to enhance their survival ability. This proposition is relevant to new and older, small and large organisations. Additionally, contemporary management practice requires the modern manager to be creative in a learning context and the ways in which these creative environments are reached through entrepreneurship are explored.

Level: Undergraduate Level 2 subject**Co-requisite(s):** BUSM 1038**Equivalent Subjects:** LGYB 0476 - Entrepreneurial Management and Innovation (UWSC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm2016/>)

BUSM 2018 Food and Beverage Management (10 Credit Points)**Legacy Code:** 200992

A key component of the hospitality industry is the provision of food and beverages. Food and Beverage Management prepares the student to run his or her own business, or to take on management level positions in this field. It focuses on the managerial knowledge and skills required to supervise all components of a foodservice system: marketing, menu planning, production, service, financial controls and quality assurance. Those who wish to work in management positions within the foodservice industry, including in hospitals, restaurants, hotels, and other establishments will benefit from this unit.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** BUSM 2033 - Managing the Food and Beverage Experience

LGYA 4392 - Food Service Systems

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm2018/>)**BUSM 2020 Health Services Management (10 Credit Points)****Legacy Code:** 400277

The health workplace is a complex and sophisticated environment that can be understood in many different ways and mean different things to different members of an organisation. Assumptions about organisational structure and action are based on conceptualisations and beliefs about the nature and goals of an organisation. This unit aims to develop an introductory understanding of health administration and management practice and business skills required in an evolving health landscape in concordance with the international competency framework for health administrators and managers.

Level: Undergraduate Level 2 subject**Co-requisite(s):** Students enrolled in 3711 Bachelor of Information and Communications Technology (Health Information Management) must have completed or be enrolled in INFS 3010 Healthcare Data Environments**Equivalent Subjects:** BUSM 2021 - Health Services Management (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm2020/>)**BUSM 2021 Health Services Management (WSTC) (10 Credit Points)****Legacy Code:** 700068

The health workplace is a complex and sophisticated environment that can be understood in many different ways and mean different things to different members of an organisation. Assumptions about organisational structure and action are based on conceptualisations and beliefs about the nature and goals of an organisation. This unit aims to develop an understanding of organisational theory and its application to management practice and organisational analysis in the health arena.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** BUSM 2020 - Health Services Management**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm2021/>)**BUSM 2022 Human Resource Development (10 Credit Points)****Legacy Code:** 200859

'Human Resource Development' (HRD) looks at how the development of people and their skills is essential to the 21st century workplace. By examining the key processes of employee learning, development and career management, participants will understand HRD's impacts on workers' employability and careers, organisational effectiveness and economic sustainability. The unit introduces concepts of workplace learning and engages participants in case study discussion and research into current HRD trends in Australian and international workplaces. The goal of Human Resource Development is to support participants to ask questions about current practice and to encourage critical understanding of the field.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** BUSM 1023**Equivalent Subjects:** BUSM 2013 - Employee Training and Development
BUSM 2012 - Employee Training and Development**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm2022/>)**BUSM 2024 Incubator 2: Start-up Essentials (10 Credit Points)****Legacy Code:** 301206

There are unavoidable legal situations and ethical dilemmas in all professions. As an entrepreneur, facing these legal and ethical circumstances is much more formidable. This unit aims to prepare students to understand the legal and ethical landscape that applies to start-up (or any) organisation. As such, unit aims to cover the topics such as: creating a business plan, negotiating employment contracts, etc. The unit will be delivered through a number of modules. As an integral part of the unit, students are expected to engage and work in "start-up co-working space" on a regular basis. At the successful completion of this unit, students would have developed a thorough understanding of the local and international legal and ethical landscape within which modern start-up organisations operate. NOTE: This unit is offered at the Werrington Campus "Launch Pad".

Level: Undergraduate Level 2 subject**Equivalent Subjects:** BUSM 2023 - Incubator 2 Legal and Ethical Setting of Entrepreneurship**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm2024/>)**BUSM 2027 Leadership, Influence and Change A (20 Credit Points)****Legacy Code:** 200883

This online unit focuses on leadership and change practice, and has considerable potential to support employability. It is the first of two units on leadership, influence and change and lays the foundation for the evidence-based inquiry to be carried out in 200885 Leadership, influence and change B. Its strong work-based and reflective enquiry component will help students explore how to initiate and carry through improvements and projects to current work. Students will also develop skills to enable them to manage their learning in new work contexts. In this unit, the concept of 'work' is not limited to paid employment. However, for successful completion of this unit it will be very important to be involved in some ongoing project where students can influence others and initiate change.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm2027/>)

BUSM 2028 Management of E-Business Processes (10 Credit Points)**Legacy Code:** 200255

The Internet and WWW have recast the role of e-business systems in organizations and the management of these systems. Many organizations use web-based technologies to bring about fundamental changes in the way they interact with their suppliers and customers. It is becoming increasingly important to digitally enable the core business processes of their organization. A vital factor for successful e-business organizations is their ability to manage their core business processes and information resources. This unit covers e-business planning, strategies for managing information, knowledge and business networks in e-business, and strategic management for e-business systems including their connection to enterprise resource planning (ERP) systems, supply chain management systems (SCM) as well as customer relationship management systems (CRM).

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LGYA 4367 - Information Systems and Business Processes**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm2028/>)**BUSM 2029 Management of Projects (10 Credit Points)****Legacy Code:** 200528

Management of Projects introduces students to the role of projects in organizations and the associated issues in managing projects, including the management of project teams and project lifecycles. While project management is well understood in areas such as construction and information systems, this unit also covers its use in other business applications, such as product development, advertising and promotional campaigns, organizational change and the implementation of corporate strategy. The use of cases, simulations and other exercises allows students to gain a realistic appreciation of the issues involved in managing projects. A range of project management tools and techniques are demonstrated through these case studies.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LGYA 9898 - Facilities Location and Project Management LGYA 9931 - Business Modelling**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm2029/>)**BUSM 2030 Managing and Developing Careers (10 Credit Points)****Legacy Code:** 200376

Managing and Developing Careers focuses on employability and career progression. The unit is one of four units in the Management professional core in the Bachelor of Business but is open to all students with an interest in reflecting on career progression in leadership and management-related careers. The unit will utilise portfolio development, case studies, occupational and industry research to assist participants identify and reflect on strategies to facilitate achievement and employability. Successful completion of the unit will result in students creating an ongoing portfolio directed to future employability.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** BUSM 2041 - Working in Professions BUSM 2040 - The Service Enterprise**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm2030/>)**BUSM 2031 Managing in the Global Environment (10 Credit Points)****Legacy Code:** 200864

This unit introduces students to the complexities of managing in the changing economic, political, legal, technological and socio cultural factors that influence management practice. By addressing issues of cultural awareness, this unit provides an organisational behaviour approach to managing in a dynamic global environment. Management practice and theoretical knowledge are linked in this unit through experiential based learning and assessment activities such as critical analysis of contemporary media, research and case studies.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** BUSM 2009 Cross Cultural Management BUSM 2010 Cross Cultural Management LGYC 0038 Cross Cultural Management**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm2031/>)**BUSM 2037 Sport Entertainment (10 Credit Points)****Legacy Code:** 200996

Sport is now at the heart of many cultures with sport consumption, in a variety of forms, playing a significant role in the lives of many people. This unit explores and explains the sporting experience, providing an understanding of those who consume sport and the relationship between sport, its consumers, and the media. The unit equips students with the tools required to work with the media, producing resources, and to engage with and through social media platforms.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** BUSM 2038 - Strategic Communication in Sport LGYA 7216 - Sport Management 2 LGYA 4796 - Communication in Sport**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm2037/>)**BUSM 2039 The Accommodation Industry (10 Credit Points)****Legacy Code:** 200993

The Accommodation Industry is concerned with developing skills for managing people, operations and business in hotels and hospitality companies. It focuses on the business operations and management issues to be found in successful lodging enterprises. The unit incorporates the application of key aspects of marketing, service management, financial management, revenue management and business development within a hospitality context. It develops effective problem solving and critical thinking skills necessary to meet the service industry's ever-changing needs. Students can expect to find employment in a range of domestic and international accommodation management facilities such as hotels, resort groups, cruise ships and the accommodation sector.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** BUSM 2032 - Managing the Accommodation Experience LGYA 4391 - Managing the Accommodation Experience**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm2039/>)

BUSM 2040 The Service Enterprise (10 Credit Points)**Legacy Code:** 200915

Modern economies are increasingly service-based. Knowledge and skills in the field of services are required by people operating across various industries and in a range of roles. Business graduates will either work for firms whose central offering is service or be employed by organisations that use service as an integral supporting element in what they do and what they offer. The unit aims to expose students to relevant theory and practices in order to develop their abilities for potential career opportunities in a service environment.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** BUSM 2030 - Managing and Developing Careers
BUSM 2041 - Working in Professions MKTG 3011 - Marketing of Services**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm2040/>)**BUSM 2041 Working in Professions (10 Credit Points)****Legacy Code:** 200914

Working in Professions focuses on developing career understandings and appreciating the personal attributes required for employability in the 'real world' of accounting, banking, economics, finance and property. This is a professional unit in the Bachelor of Business, but is also open to participants with an interest in examining and developing their knowledge of employability in these career areas. The unit involves examination of the evolving nature of work in a dynamic globalised context; applied labour market and industry structure analysis; and an exploration of employability attributes, capacities and opportunities across a range of career paths. Successful completion of the unit allows participants to gauge employer expectations, and to identify and reflect on career opportunities in their chosen fields.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** BUSM 2030 - Managing and Developing Careers
BUSM 2040 - The Service Enterprise**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm2041/>)**BUSM 2043 Project Management in Humanitarian and Development Studies (10 Credit Points)****Legacy Code:** 102707

The primary aim of this unit is to equip students with the concepts, processes and major techniques employed in project management. By integrating theory and practice this unit provides a strong foundation for students in project management as an essential skill in the field of humanitarian and development studies. The unit uses the project management body of knowledge (PMBOK) which covers the required competencies in project management including planning, monitoring, control, implementation and evaluation.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm2043/>)**BUSM 2044 Health Service Management (10 Credit Points)****Legacy Code:** 401393

The unit builds on previous Health Services Management curriculum. It is focused on the changing role of the health services manager and competencies required to manage and lead health services efficiently and effectively in both current and emerging areas of healthcare and health management. Various management functions are explored through 140 hours of placement with blended learning activities including: strategic management, values-based healthcare, quality and safety, risk and governance, health services policy and performance management, finance and resource allocation.

Level: Undergraduate Level 2 subject**Co-requisite(s):** BUSM 1037**Incompatible Subjects:** BUSM 3015 - Health Services Management
Practice BUSM 3014 - Health Services Financial Management**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm2044/>)**BUSM 2045 Sport and Society (10 Credit Points)**

Sport plays a prominent role in the lives of many people across Australia and globally. It provides an opportunity for pleasure and a sense of freedom which may be missing in modern society. However, sport is a contested concept and can be a domain which both reinforces and challenges notions such as gender, ethnicity, and nation. This unit explores sport from a sociological perspective, examining the relationship between sport and society, and encourages students to challenge accepted norms and ideologies.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** SPRT 3004 - Contemporary Issues in Sport
Management BUSM 3068 Sport and Society**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm2045/>)**BUSM 2046 Managing in the Global Environment (Block) (10 Credit Points)**

This unit introduces students to the complexities of managing in the changing economic, political, legal, technological and sociocultural factors that influence management practice. By addressing issues of cultural awareness, this unit provides an organisational behaviour approach to managing in a dynamic global environment. Management practice and theoretical knowledge are linked in this unit through experiential based learning and assessment activities such as critical analysis of contemporary media, research and case studies.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** BUSM 2009 - Cross cultural management
BUSM 2010 - Cross cultural management (UWSC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm2046/>)**BUSM 3001 Advanced Business Seminars (10 Credit Points)****Legacy Code:** 200572

A seminar series involving speakers from outside the university will present on current theoretical or practical issues affecting business and commerce. Students interested in this unit should contact the Unit Coordinator to see whether they qualify.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** Students must have successfully completed at least 90 credit points in business related units**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3001/>)

BUSM 3002 Business Leadership (10 Credit Points)**Legacy Code:** 200573

Business Leadership explores the multiple opinions and complex perspectives regarding leadership in the global business context. Exploring the nature of leadership across different cultures and situations, students develop an insight into the highly sophisticated meanings of leadership emerging from the broad literature, history and accounts on the topic. Future leaders emerge from this unit recognising the importance and relevance of their personal leadership goals in the early stages of a business or commerce career.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** Students must have successfully completed at least 90 credit points of business related units**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3002/>)**BUSM 3004 Contemporary Management Issues (10 Credit Points)****Legacy Code:** 200568

This is an engaged unit that requires students to undertake real-world projects to support selected industry or community partners. The unit blends in-class and online activities as well as individual and group work, with self-directed problem-based learning. The focus of students' learning is on sustainable business, including the economic, social and environmental dimensions of business. The in-class workshops support students to conduct the required engagement activities with industry or community partners. As a third-year unit, attention is given to students' application of the knowledge and skills already acquired in their degree programs, and on the practice of business management skills.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BUSM 1038 OR

BUSM 1008 OR

BUSM 1019

Equivalent Subjects: LGYB 9012 - Contemporary Management Issues**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3004/>)**BUSM 3005 Creating Change and Innovation (10 Credit Points)****Legacy Code:** 200862

This unit introduces the concepts of change and innovation as they relate to organisational transformation. It explores change as a human and social process, looking at the vital roles of leadership, entrepreneurship, and creativity in change management. In doing so, it provides the theoretical and practical understandings that you will need as both a student of change and a future manager.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** BUSM 3038 Management of Change LGYB 9013 Management of Change**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3005/>)**BUSM 3006 Design Thinking for Creativity (10 Credit Points)****Legacy Code:** 200918

Innovation and creative thinking are important skills in strategy development. Part of this process is the ability to solve problems and discover new opportunities; or in other words, the notion of "design thinking". This unit introduces students to concepts and frameworks to create innovative products, services and systems for a range of enterprises, industries and markets. Students will explore and analyse business and social networks, clusters and ecosystems via practice based projects. Design thinking principles will be applied to systematically develop ideas into innovative solutions as a way to drive business growth.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3006/>)**BUSM 3007 Destination Management (10 Credit Points)****Legacy Code:** 101270

Destination Management provides students with a fundamental understanding of the concepts in destination management. This includes coordination of the destination in terms of the tourism industry's sectors, their relationship with each other and the challenges they face. An appreciation of the importance of a destination's unique cultural, natural and economic attributes is developed from the viewpoint of the visitor and industry representatives. The implications of organising urban spaces for the visitor experience and its influence on sustainability and competitiveness are explored.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3007/>)**BUSM 3008 Developing Sport Professionals (10 Credit Points)****Legacy Code:** 200997

The Sport Management Internship unit provides students with an opportunity to engage with the sport industry through a 120 hour [minimum] industry placement. Students are provided with a unique opportunity to observe sport management practitioners in action and learn in a practical "hands-on" setting. Experience in the field of study is an essential ingredient in preparing an individual for employment either during the period of study or after graduation. Students have the opportunity to apply theoretical concepts, knowledge and skills acquired in lectures and workshops in professional sport, recreation and aligned settings.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BUSM 1031**Equivalent Subjects:** LGYA 7605 - Professional Practice in Sport Management 3 LGYA 7603 - Professional Practice in Sport Management 2 LGYA 4807 - Professional Practice in Sport Management 1 BUSM 3066 - Sport Management Internship**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3008/>)

BUSM 3009 Enterprise Internship (10 Credit Points)**Legacy Code:** 200920

This unit is designed to bring to life the knowledge gained during the students' study whilst applying it practically to diverse business contexts through work integrated learning. The internship will build on the comprehensive, coherent and connected knowledge gained in business specialisations to allow the students to explore and develop attributes required to be successful in contributing to outcomes in a business environment. Assessment of the unit is through a practical application of the learned theory into an assessable business report framework. Entry to this unit is by application. Contact the unit coordinator for details.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** BUSM 3003 - Business Report**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3009/>)**BUSM 3010 Entrepreneurial Team (10 Credit Points)****Legacy Code:** 200609

This unit is intended to provide an opportunity for high performing students to participate in a team which will develop a business plan for a company division, a non-profit enterprise, an existing business or a new business opportunity.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** Successful completion of 160 credit points of business related units**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3010/>)**BUSM 3011 Frontiers of Business Theory and Analysis (10 Credit Points)****Legacy Code:** 200574

This unit looks at selected contemporary issues in business, industry and commerce. Each selected issue will be examined in terms of the way in which the problem is defined, competing definitions of the problem, components of the problems and relationships to other contemporary issues. Relevant theoretical perspectives will be examined and evaluated.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** Students must have successfully completed at least 90 credit points of business-related units**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3011/>)**BUSM 3012 Global Enterprise Resource Planning (10 Credit Points)****Legacy Code:** 200667

Global Enterprise Resource Planning (ERP) provides students with the knowledge and skills required in understanding broader concepts of managing within ERP system environments. Students are introduced to data, organisational structure, logistics and supply chain related processes and the role of enablers in understanding global logistics operations. Global ERP equips the students with basic decision-making tools, techniques and concepts. It also illustrates how technology can be utilised to better manage logistics across global supply chain with emphasis on the effective use of data and information, coordination and integration of cross functional activities and processes towards achieving best practice performance levels.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYA 4739 - Materials Management And Distribution (ERP) LGYA 4793 - Global Materials Management and Distribution (ERP)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3012/>)**BUSM 3014 Health Services Financial Management (10 Credit Points)****Legacy Code:** 400279

The Australian health care system must account for use of resources, and ensure their equitable and efficient use. Increasingly devolution of management function to cost centre level in health care organisations is occurring. Managers must consider the financial implications of clinical decisions, understand and act on accounting information. They are held responsible for the financial outcomes of their activities. This unit develops a basic knowledge of accounting principles, health services funding arrangements, government reforms, financial reporting, preparation of budgets, business cases and economic appraisals. There are 140 hours of placement in the field working with health managers on financial issues.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BUSM 3015**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3014/>)**BUSM 3015 Health Services Management Practice (10 Credit Points)****Legacy Code:** 400787

The unit begins with an overview of the complexity and variability of health services and provides an understanding of component organisations, federal and state policy issues and environmental factors including the role of the private sector and non-government organisations. The changing role of the health services manager and competencies required for effective managing are examined. Influences on organisations are reviewed, including structures, culture, power and politics. Various management functions are explored through 140 hours of placement e.g. strategic planning, performance management, people management including workplace relations, conflict resolution, resource management (financial and asset), risk management, health and safety in the workplace and quality assurance.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BUSM 2020**Equivalent Subjects:** LGYA 7186 - Health Services Management 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3015/>)

BUSM 3016 Health Services Quality Management (10 Credit Points)**Legacy Code:** 400284

The need to improve quality while reducing expenditure has forced health services to re-evaluate their strategies. For these reasons many have embraced the philosophies of Total Quality Management (TQM). Central to its practice is a focus on flexible, consultative management, with the needs of the customer seen as vital to guiding a continuous process of improvement. TQM is a whole system concept, which recognizes the need to manage sets of interacting technical, cultural and political issues. This unit explores the various aspects of TQM and in particular its application within the health services.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3016/>)**BUSM 3017 Health Services Workforce Management (10 Credit Points)****Legacy Code:** 400788

This is a flexible learning unit looking at human resource management (HRM) as a strategic activity of health organisations especially as workforce shortages pose significant challenges to the health and aged care sectors. The workforce, with appropriate knowledge and expertise, is essential to the efficient and effective delivery of quality health services. Successful organisations shape the workforce to anticipate current and future directions and goals. Workforce planning is a crucial element of this approach and its success.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BUSM 3015**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3017/>)**BUSM 3019 Hospitality Management Applied Project (10 Credit Points)****Legacy Code:** 200561

Students studying Hospitality Management Applied Project may have the opportunity to undertake an international field trip to experience the hospitality industry from an international perspective. This unit provides students a unique opportunity to integrate knowledge gained from operational and theoretical perspectives of hospitality studies into application in an engaged research project in hospitality management. Students will engage in comprehensive projects which bring together real world industry problems and hospitality theory.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BUSM 2036**Equivalent Subjects:** LGYA 4386 - Tourism and Hospitality Research Project**Incompatible Subjects:** LGYA 4813 - Sport Management Applied Project**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3019/>)**BUSM 3021 Hospitality Places and Spaces (10 Credit Points)****Legacy Code:** 200989

Contemporary hospitality settings often require specialised services and distinctive facilities. Matching the physical spaces and places with hospitality, to the services and experiences provided, is an integral part/consideration of contemporary hospitality practice. As future managers in the industry, it is imperative to have a sound basic knowledge of the design, development and commercial viability of such products, services and spaces, especially in the context of consumer expectations, in order to remain competitive and sustainable.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** BUSM 3055 - Planning and Design Hospitality Facilities**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3021/>)**BUSM 3022 Hospitality Profitability and Entrepreneurship (10 Credit Points)****Legacy Code:** 200994

This unit examines operations management in the hospitality sector, as a means to achieve profitability. Students will develop advanced knowledge and desirable attributes applicable to operational planning, financial management, risk management and legal compliance, human resource management, business relationship management and sustainability. Special emphasis is placed on providing students with knowledge and skills to make informed decisions to proceed and develop their own ventures or alternatively be more innovative within existing businesses.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** BUSM 3020 - Hospitality Management Operations**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3022/>)**BUSM 3023 Hospitality and Tourism in Practice (10 Credit Points)****Legacy Code:** 200995

Hospitality and tourism play an important role in society impacting directly and indirectly on many elements of everyday life. With the ability to both positively and negatively impact on individuals, communities and economies, hospitality and tourism are viewed from the perspective of different stakeholders. Within this unit a contextual understanding and analysis of hospitality and tourism is provided through interaction with industry practitioners and discussion of contemporary issues impacting the industry.

Level: Undergraduate Level 3 subject**Incompatible Subjects:** BUSM 3018 - Hospitality Industry**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3023/>)

BUSM 3024 Human Resource and Industrial Relations Strategy (10 Credit Points)**Legacy Code:** 200740

Students in 'Human Resource and Industrial Relations Strategy' analyse the human resource and industrial relations strategies of the major employment relations stakeholders. While the principal focus is on the organisational level of analysis and on the strategic interventions introduced by management, the unit also analyses the strategic roles of government, trade unions, and employer associations. Through a range of learning activities, students examine the relationship between business strategies and HR/IR strategies, strategic HR/IR interventions, the concept of strategic choice as it concerns stakeholders and the evaluation of strategy. Students also engage with the development of human resource management and industrial relations as a professional field and consider ethics and professional standards.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BUSM 1023 OR

BUSM 1021

Incompatible Subjects: LGYA 4824 - Human Resource Strategy LGYA 4823 - Industrial Relations Strategy**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3024/>)**BUSM 3025 Incubator 5: Operational Aspects of Entrepreneurship (10 Credit Points)****Legacy Code:** 301170

Planning is an important part of setting up a start-up business. This would require investigating into setting goals, figuring out how to track progress, what to do when things don't go to plan and also to communicate your business concept to others, such as potential investors. This unit aims to develop the skills and knowledge required for making a business plan for the start-up organisation through a number of theoretical topics, such as: developing marketing and operational plans, staffing and management. At the completion of this unit, students will have developed a viable business plan for their start-up. NOTE: This unit is offered at the Werrington Campus "Launch Pad".

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3025/>)**BUSM 3027 Innovation and Professional Practice (10 Credit Points)****Legacy Code:** 200919

Innovation and Professional Practice uses design thinking to develop participants' capacity to innovate across a range of changing organisational environments and future-oriented work roles. Networking, collaboration and team work around contemporary projects will develop the attitudes and abilities characteristic of ways that professionals lead and contribute to innovation in many contexts. The unit builds on study of organisation and leadership in the Bachelor of Business, and develops participants' innovative thinking through the prism of business acumen. The unit supports work integrated learning approaches that will enable participants to develop portfolio evidence of their professional capacity to lead and participate in sustainable business change.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3027/>)**BUSM 3028 Innovation, Enterprise and Society (10 Credit Points)****Legacy Code:** 200917

Innovation, Enterprise and Society focuses on forces driving innovation, creativity and technical change at the levels of entrepreneurship, enterprise, economy and society. It also examines the effects of innovation at these various levels. This unit is a professional core unit in the Bachelor of Business. The unit takes a multi-disciplinary approach utilising critical thinking, debates, problem solving, policy analysis and case studies. Students will understand the professional, social, public policy and global networks and systems informing and surrounding innovation. Successful completion of the unit equips students to appreciate the entrepreneurial, political and social dimensions of innovation.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3028/>)**BUSM 3029 International Business Finance (10 Credit Points)****Legacy Code:** 200595

The unit is designed to provide students with an overview of the economic, political and institutional environment in which international business is conducted. Particular attention is given to the historical development of the international monetary system, the transnational corporation and the impact of globalization upon international financial transactions and international business practices.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYA 9776 - International Business Finance**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3029/>)**BUSM 3030 International Business Project (10 Credit Points)****Legacy Code:** 200590

This is a capstone unit in International Business. The aim of the unit is to give students a real-life action learning project in which they undertake an international business strategic planning and analysis exercise for a client organisation. This project usually involves students working in small teams for a client organisation under the direct supervision of the lecturer.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BUSM 1015**Equivalent Subjects:** LGYA 9777 - International Business Project 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3030/>)

BUSM 3031 International Business Strategy (10 Credit Points)**Legacy Code:** 200626

In an environment where operating internationally is becoming the norm rather than the exception, firms are faced with ever increasing complexity when formulating their business strategy. This requires an understanding of how firms become and remain international, the basic modes of international involvement, the practice of multinational management and how firms can establish a balance between the sometimes conflicting demands of headquarters, the subsidiary and the governments of all the countries where the multinational enterprise operates. This unit will cover these issues and will deal with both large and small companies that must be global to survive.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** MKTG 1006 OR

BUSM 1015

Equivalent Subjects: LGYA 9771 - International Business Strategy**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3031/>)**BUSM 3032 International Human Resource Management (10 Credit Points)****Legacy Code:** 200621

'International Human Resource Management' examines the implications for human resource management that arise from the internationalisation of organisations. Through portfolio reports and case studies, students analyse a range of comparative systems and structures of employment relations and the strategic management of global organisations. This analysis includes a focus on key human resource functions including recruitment, training, reward and evaluation of the impact of society, politics, economics and culture of host countries on human resource strategies. Students examine also the role of global stakeholders and assess the implications for human rights that arise from globalisation.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BUSM 1023**Equivalent Subjects:** BUSM 2026 - International Human Resource Management**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3032/>)**BUSM 3033 International Management (10 Credit Points)****Legacy Code:** 200623

International Management provides an overview of issues confronting managers working in a complex globalised environment. Areas such as global and regional integration, the role of ethics and social responsibility, as well as the changing political, legal and technological environment require consideration by management in multinational organisations. The role of culture and human resource management is another significant area of failure by global managers. Finally global strategic issues such as managing political risk and government relations will be analysed to allow a deeper level of understanding of the complexities of managing in an internationally competitive marketplace.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYA 9900 - International Management**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3033/>)**BUSM 3036 Leadership and Entrepreneurship (10 Credit Points)****Legacy Code:** 200863

This unit explores the links between leadership and entrepreneurship in the context of dynamic domestic and global environments. It develops an understanding of how to initiate a business venture, taking advantages of perceived opportunities and mobilising the required resources. To this end, different theories and perspectives on leadership and entrepreneurship are examined, and students are encouraged to apply them to real-life situations. The knowledge and skills learned in this unit will enable future leaders to revitalise organisations and create value in the process of transforming innovations into goods or services.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3036/>)**BUSM 3037 Leadership, Influence and Change B (20 Credit Points)****Legacy Code:** 200885

This online unit builds on the work completed in Leadership, Influence and Change A. Students further their capacity to identify leadership, influence and change issues in their workplace. The work then focuses on an evidence based inquiry (EBI) report that demonstrates the learning across the two units. This will involve scoping, tightening the focus and then moving into an action phase for the EBI. In this way, the EBI will be the backbone of this unit.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BUSM 2027**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3037/>)**BUSM 3041 Managing Across Organisational and Cultural Boundaries (20 Credit Points)****Legacy Code:** 200889

This online unit makes a broad distinction between organisational, inter-organisational and international contexts. Students will explore what is involved in collaborating effectively within and across such different contexts. There are six study themes throughout this unit, all of which are central to understanding how different individuals perceive and experience the different contexts in which they work. The themes are: managing aims, power, politics and trust, cultural diversity, international management perspectives, the darker side of collaborative arrangements and paradoxes, tensions and dialectics.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3041/>)

BUSM 3042 Managing Diversity (10 Credit Points)**Legacy Code:** 200150

This unit explores the complexities and challenges of managing diverse workforces in contemporary organisations. Using applied learning approaches, students are required to formulate corporate policies relating to diversity and then evaluate the implications for implementing these policies in a real world setting. As a key component of human resource management, students are expected to appreciate both the theoretical and practical elements of managing diversity and are required to reflect on their own learning process throughout the unit.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BUSM 1023**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3042/>)**BUSM 3043 Managing Human Resources and Industrial Relations (10 Credit Points)****Legacy Code:** 200175

This unit integrates the study of strategic theory and practice in the management of human resource management and industrial relations as they co-exist together in the employment relations model. Emphasis is placed on a blended learning approach to teaching and learning.

Students undertaking this unit are required to participate in a HR Simulation exercise that explores the realities of employment relations in practice. Seminars feature role plays and case studies.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BUSM 1023**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3043/>)**BUSM 3044 Managing Marketing and Finance (20 Credit Points)****Legacy Code:** 200887

This practical online unit is divided into two sections - marketing and finance - which will be studied sequentially. Topics in both sections have been chosen for their relevance to the needs of managers who may not have direct responsibility for either marketing or finance as such, but whose practice will be enhanced by an understanding and application of marketing practices and financial concepts. As students work through activities, problems and solutions, they will come to understand the organisational and wider management context in which they work as well as the constraints, choices and demands that managers need to take into account when making decisions.

Level: Undergraduate Level 3 subject**Incompatible Subjects:** MKTG 3016 - Strategic Marketing Management**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3044/>)**BUSM 3045 Managing Operations (10 Credit Points)****Legacy Code:** 200865

Managing Operations is a comprehensive unit that focuses on the importance of operations in creating competitiveness and dynamic capabilities for individual organisations and organisations connected through supply chains and logistics processes within a global context. The unit is designed for students interested in enhancing their knowledge and skills in designing and improving critical operational processes used by organisations to provide products and services to customers. It encompasses internal and external operations for manufacturing and service organisations; their strategic choices; and tactical and operational decision-making processes for the management of critical and extended resources. The latest qualitative and quantitative tools and techniques, online business simulations and international case studies are used to practise problem solving processes to address challenges of a global nature in the business world.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** BUSM 3013 Global Operations and Logistics Management**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3045/>)**BUSM 3046 Managing Organisations and People (20 Credit Points)****Legacy Code:** 200886

This online unit will enable students to critically reflect on and analyse key management tasks including processes of people management. It also explores how context shapes management practice and the importance of understanding the management of organisational change. It takes a problem-based approach to management learning and combines academic understanding of management issues with opportunities to apply knowledge. Students will have the opportunity to identify problems in their own workplaces and use management concepts, tools and techniques learned in this unit to make recommendations to address the problem.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3046/>)**BUSM 3048 Negotiation, Bargaining and Advocacy (10 Credit Points)****Legacy Code:** 200613

In 'Negotiation, Bargaining and Advocacy' students identify and assess contrasting approaches to negotiation and identify the importance of strategy and judgement in negotiation. Students develop their skills through a team-based online negotiation and a critique of the experience of this negotiation. Through case studies, students examine conciliation, mediation and arbitration with a particular focus on advocacy practice in industrial tribunals. An important theme in the unit is the assessment of the contextual and regulatory factors that shape negotiation, bargaining and advocacy practice. This aspect draws on contemporary debates in these spheres most notably concerning the Australian context.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BUSM 1023**Equivalent Subjects:** LGYA 9847 - Negotiation Bargaining and Advocacy**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3048/>)

BUSM 3050 Operations and Logistics in Practice (10 Credit Points)**Legacy Code:** 200565

Students studying Operations and Logistics in Practice may have the opportunity to undertake an international field trip to experience operations and logistics environments from an international perspective. Operations and Logistics in Practice enable students to analyse and discuss contemporary operations and logistics issues in a workshop environment. This unit is designed to offer an advanced holistic view of operations and logistics and a framework to assist students in researching and assessing trends in industry. This unit offers a balance of class work and field trips to operations and logistics oriented organisations.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BUSM 3013**Equivalent Subjects:** LGYA 4652 - Logistics Management in Practice
LYGA 4406 - Operations Management in Practice**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3050/>)**BUSM 3052 Organisational Learning and Development (10 Credit Points)****Legacy Code:** 200157

Organisational Learning and Development is a Level 3 undergraduate unit which analyses practices and processes designed to transform and renew organisations, in order to enable them to respond effectively to change. This unit will use case studies and other experientially based activities to promote a better understanding of structural and human resources interventions used to ensure organisational survival in rapidly changing environments.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3052/>)**BUSM 3053 Our Sporting Future (10 Credit Points)****Legacy Code:** 201001

Sport has become increasingly globalised, commercialised and professionalised, and is influenced by advances in technology and innovation. It is now recognised that sport can play an important role in areas such as economic regeneration, diplomacy, social integration and improving health and wellbeing. This unit will develop students' understanding of how to encourage participation and drive growth in sports business in the face of a rapidly changing landscape.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BUSM 1031**Incompatible Subjects:** BUSM 3047 - Managing Service and Experience**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3053/>)**BUSM 3054 People, Work and Society (10 Credit Points)****Legacy Code:** 200860

'People, Work and Society' draws on psychology and sociology to deepen participants' practical human resource management (HRM) expertise. Designed for those aiming at careers as HRM professionals, participants will use HRM knowledge to develop policy and procedure that takes account of the psychology of individuals and groups as well as rising expectations for socially-responsible management. The complexities and rewards around managing diverse workforces receive particular attention. Through the challenge of real-world activities, participants are introduced to the difficult judgements that confront HRM professionals around people at work.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BUSM 1023**Equivalent Subjects:** BUSM 3075 - Workplace Behaviour
LYGA 9849 - Workplace Behaviour**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3054/>)**BUSM 3058 Practice Management for Health Professionals (10 Credit Points)****Legacy Code:** 400156

From 2017 students should take 401149 - Exercise Physiology Across the Lifespan. This unit is aimed to introduce the student to the management issues in establishing and working in a clinical practice. While the unit will cover issues related to health professionals and public sector management, the focus of the unit will be on issues in private practice. The aim of the unit is to introduce the student to a wide range of topics, including an over view of health care funding in Australia, private and public health system, developing a business plan, different business structures, financial management, managing staff and occupational health and safety issues.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3058/>)**BUSM 3059 Processes and Evaluation in Employment Relations (10 Credit Points)****Legacy Code:** 200575

This unit applies theory and skills developed throughout the discipline in Human Resource Management to real-world organisational and policy challenges and opportunities. Students will develop and use employment relations concepts and "metrics" to design implementation plans and to evaluate policies, practices and change initiatives. Students' skills in communication and problem solving will be assured in this unit.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BUSM 1023**Equivalent Subjects:** LGYA 4642 - Human Resources Development Seminar**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3059/>)

BUSM 3061 Project Management (10 Credit Points)**Legacy Code:** 300727

This unit is to give students an understanding of appropriate methods of managing construction projects and to develop skills in using these methods on the type of projects the students expect to undertake in their professional careers. Content: Major knowledge areas of project management.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** BUSM 3060 - Project Management**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3061/>)**BUSM 3062 Quality Management (10 Credit Points)****Legacy Code:** 200167

The principles taught in Quality Management underpin the successful management of all business enterprises. Students enrolled in this unit will be introduced to the latest concepts in performance excellence, with a strong emphasis on service quality. Various tools and techniques that support performance excellence are presented, including ISO9000, Six Sigma, and high-performance human resource practices. Contemporary areas covered in this unit involve identifying customers' needs, and involvement in organisational performance which is supported by continuous improvement and organisational learning.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3062/>)**BUSM 3063 Reward and Performance Management (10 Credit Points)****Legacy Code:** 200739

'Reward and Performance Management' introduces students to critical perspectives in reward management. Through case studies students consider the wider context in which reward strategies are devised and the strategic decisions that arise if reward is to meet regulatory requirements, organisation objectives and the expectations of the workforce. Students examine the component parts of contemporary reward and critically assess the relationship between performance and reward. Through engagement with different types of performance management systems, students identify and assess contrasting approaches to performance management.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BUSM 1023**Incompatible Subjects:** BUSM 3040 - Management of Employee Performance LGYA 4822 - Remuneration Theory and Practice**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3063/>)**BUSM 3064 Service Industry Analytics (10 Credit Points)****Legacy Code:** 200991

Service Industry Analytics is designed to provide a working knowledge of how to analyse and report information required in planning and operating a services business. It explores the methods, uses and limitations of contemporary research in the sport and hospitality industries. Students will gain experience with the planning and implementation of research and assessment of service research problems, utilising the collection and analysis of both quantitative and qualitative data.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** BUSM 2036 - Service Industry Studies

LGYA 4814 - Sport Management Research Methods

LGYA 4799 - Hospitality Business Research Methods

LGYA 4863 - Services Research Methods

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3064/>)**BUSM 3065 Special Event Management (10 Credit Points)****Legacy Code:** 200990

Special Event Management is designed to introduce students to event management in order to develop their skills and knowledge relating to the organisation of various event forms. The unit provides students the opportunity to practically apply management strategies, leadership theories, communication skills, and administration skills to facilitate the design, marketing, communication, innovation and planning of their own event. Careers in the industry can be found across diverse fields in the public and private sectors including hotels, event management companies, exhibition and sports venues, and in community organisations such as clubs, schools and charities.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** BUSM 3067 - Sport and Hospitality Event Management**Incompatible Subjects:** LGYA 4810 - Sport Event and Facility Management

LGYA 4864 - Convention and Special Event Management

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3065/>)**BUSM 3069 Strategic Management (10 Credit Points)****Legacy Code:** 200587

This unit explores the nature and essence of strategy and how this is created in various organisational, industry and economic contexts. The complexity of the strategy process, content and context means that there is not one clear position on strategy. The impact of this complexity on managers seeking to develop a strategic thinking capability is examined. The paradoxes and debates in the field of strategy are explored in an effort to understand the concept of sustainable competitive advantage. Students will utilise the theoretical knowledge presented in a dialectical enquiry framework to undertake strategic analysis, and develop a selection of strategic options, for case study scenarios and in a team strategy simulation.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BUSM 1038 OR

BUSM 1008 OR

BUSM 1019

Equivalent Subjects: LGYC 0040 - Strategic Management**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3069/>)

BUSM 3070 Strategic Sport Leadership (10 Credit Points)**Legacy Code:** 200998

In contemporary sport environments, sport practitioners require an in-depth understanding of strategic leadership processes and practices. In order to respond to sport's ongoing professionalisation, globalisation, demographic changes and emerging consumer needs, sport managers and government policy makers require knowledge and skills which will allow them to successfully manage these changes. Students will develop knowledge and skills in areas such as policy development and strategic planning, executive leadership and change management processes and practices. The unit content will be applied across diverse sport environments including high performance sport in not-for profit contexts and community sport with a focus on sport for development. Students will apply their strategic leadership knowledge and skills by formulating a policy or related initiative for a sport agency or organisation.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYA 4491 - Sport Management Planning and Development

SPRT 3016 - Sport Management Planning and Development

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3070/>)**BUSM 3071 Technology Management for Competitiveness (10 Credit Points)****Legacy Code:** 200668

This contemporary unit provides an understanding of technology management and productivity measurement/improvement concepts aimed to improve the competitiveness of organisations. Students are introduced to a range of tools and techniques to acquire and implement technology and develop productivity improvement programs within global operations and supply chain context. The interaction between technological change and competitiveness (productivity and other performance measurement systems) is also explored. The unit is relevant to managers or technologists with responsibilities for managing technological change

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYA 4405 - Productivity and Technology Management**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3071/>)**BUSM 3072 Tourism Industry Professional Placement (20 Credit Points)****Legacy Code:** 102385

Tourism Industry Professional Placement (TIPP) provides students with understanding and experience of the tourism or related industry workplace. Students work in a voluntary capacity with an industry host to gain work-ready skills and undertake professionally appropriate tasks. Students complete a Professional Placement Proposal and Professional Placement Report.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3072/>)**BUSM 3073 Tourism Policy and Planning (10 Credit Points)****Legacy Code:** 101904

This unit gives students a general understanding of planning theory as it relates to sustainable tourism policy and practice. Students will apply this knowledge to tourism sites, facilities and activities in Sydney with a major assignment focusing on Sydney Olympic Park. A self-guided field trip enables students to apply and understand various planning techniques, tourism policies, scenario mapping strategies and consider conflict resolution practices. Students will present their ideas by integrating quantitative and qualitative data, both in teams and individually. At the conclusion of this unit students will have the skills to apply planning theory to an analysis of tourism policies, sites, facilities and activities in a global city such as Sydney.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYA 1265 - Tourism Policy and Planning BUSM 2035 - Recreational Tourism Policy and Planning**Incompatible Subjects:** LGYB 8930 - Tourism Policy and Planning LGYA 6103 - Recreational Planning towards Sustainable Tourism LGYB 8197 - Sustainable Tourism and Recreational Planning**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3073/>)**BUSM 3074 Work Employment and the Labour Market (10 Credit Points)****Legacy Code:** 200243

This unit provides an in-depth study of the links between work, employment and wider labour market issues. An introductory framework will be provided emphasizing the historical perspectives of work and the key theories and concepts involved in industrial sociology. Current and future issues and trends in work organization and practice and their relationships to society will also be considered. The unit will then examine the relationship between labour markets, employment and government policy in both macro and micro settings. Particular emphasis will be placed upon the interaction of regional labour markets, policies and outcomes for key labour market segments.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BUSM 1023**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3074/>)**BUSM 3077 Construction Project Management (10 Credit Points)****Legacy Code:** 301229

This unit is to give students an understanding of appropriate methods of managing construction projects and to develop skills in using these methods on the type of projects expected to undertake in their professional careers. It covers the major knowledge areas of project management theory as they relate to construction.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** BUSM 3060 Project Management BUSM 3061 Project Management**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3077/>)

BUSM 3078 Business Report (20 Credit Points)**Legacy Code:** 201043

This unit is designed to bring to life the knowledge gained during the students' study whilst applying it practically to diverse business contexts through a work integrated learning research project. The project will build on the comprehensive, coherent and connected knowledge gained in business specialisations to allow the student to explore and develop attributes required to be successful in contributing to outcomes in a business environment. Students will have an opportunity to work under the supervision of an academic on a research project. Assessment of the unit will include a formal research presentation to academics and/or industry. Entry to this unit is on a competitive basis. Contact the unit coordinator for details.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3078/>)**BUSM 3079 Travel in the Digital Age (10 Credit Points)****Legacy Code:** 102779

This unit explores the ways in which digital technologies are reshaping travel, including travellers' experiences, and planning and management of the travel industry. Students will learn how digital technologies are being utilised, and the opportunities and challenges these technologies present. The unit will provide opportunities to engage with travel apps, virtual/augmented reality technologies, smart attractions and transport technologies. Students will also learn how to conceptualise and pitch their own digital travel products. Upon completion of the unit, students will be well placed to develop and manage innovative, socially responsible travel and mobility technologies.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3079/>)**BUSM 3080 Health Care Systems and Organisation Culture (10 Credit Points)****Legacy Code:** 401389

This unit identifies complexities associated with health care systems and processes, equipping students with the essential business skills to deal with challenges arising throughout the process of managing health services. A key focus of the unit is in the management of resources as a strategic activity of health organisations, particularly in relation to human resources, as workforce shortages pose a significant challenge to contemporary health management practice.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BUSM 1037**Equivalent Subjects:** BUSM 3017 - Health Services Workforce Management**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3080/>)**BUSM 3081 Business Analytics Project (10 Credit Points)**

This unit provides students with the experience of applying business analytics skills and knowledge gained throughout the course of their degree in general and from the Business Analytics major in particular. Students will undertake a project in a real-world case setting to transform data to knowledge providing analytical solution to a client-specified problem. In teams, students will develop a project proposal, final report and/or interactive project tool and presentation. Students will gain insight into the profession of business analytics through independent learning and reflective practice.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BUSM 1042**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm3081/>)**BUSM 4001 Business Analysis Seminars (10 Credit Points)**

This unit introduces students to exemplary research in selected contemporary issues in business practice and policy. Presented through a series of seminars by leading business academics, selected issues will be examined in terms of the competing definitions of the problem, the methods of analysis to be used to address the problem, components of the problems and relationships to other contemporary issues. As business research is inherently inter-disciplinary and involves multiple stakeholders, relevant and competing theoretical perspectives explaining selected issues will be examined. Different methods of investigation and analysis of issues will be evaluated.

Level: Undergraduate Level 4 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm4001/>)**BUSM 4002 Seminal Papers in Business (10 Credit Points)**

The aim of this unit is to develop skills in applying rigorous analysis and critical assessment to research-debates in business disciplines through an examination of seminal literature in particular business fields which often embrace conflicting theoretical approaches. This will provide candidates with the advanced skills needed to critically analyse debates in a business discipline, while also enabling them to gain more familiarity with theories, issues, and problems in a particular research area. Seminal business papers will be analysed through a balanced and constructive critique of their strengths and weaknesses, providing suggestions for how the work might be extended or improved. From this unit, students will be able to apply the rigorous analytical skills to their own work.

Level: Undergraduate Level 4 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm4002/>)

BUSM 4006 Business and Commerce Honours Thesis A (20 Credit Points)

The aim of this unit is to further develop the student's research and problem solving skills. The student is required to implement the research plan, complete a substantive piece of research in the relevant disciplinary field and to communicate the results of that work to an interested and technically literate audience. The thesis is expected to be at a high professional standard. The thesis topic and structure will vary according to the area of interest of the student and the expertise of the supervisor. Throughout this unit, regular planned consultations between the student and supervisor will occur. Students are expected to work to a schedule devised in consultation with their supervisor. The schedule will include set dates for the presentation of chapter outlines and draft chapters for review by the supervisor(s).

Level: Undergraduate Level 4 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/busm4006/>)

BUSM 4007 Business and Commerce Honours Thesis B (40 Credit Points)

The aim of this unit is to further develop the student's research and problem solving skills. The student is required to implement the research plan, complete a substantive piece of research in the relevant disciplinary field and to communicate the results of that work to an interested and technically literate audience. The thesis is expected to be at a high professional standard. The thesis topic and structure will vary according to the area of interest of the student and the expertise of the supervisor. Throughout this unit, regular planned consultations between the student and supervisor will occur. Students are expected to work to a schedule devised in consultation with their supervisor. The schedule will include set dates for the presentation of draft chapters for review by the supervisor and the final thesis submission.

BUSM 7001 Advanced Research Skills (20 Credit Points)

Legacy Code: 200745

Advanced Research Skills is designed for students who are undertaking Doctoral studies. This unit aims to equip participants with sound knowledge of research methods in business, their criteria for use, their basis of selection, their underlying assumptions and limitations, and their computational implications and processes. The unit will introduce candidates to different methodologies in management research and will also provide in-depth study of particular methods that candidates are expected to use in their thesis, e.g. case studies, surveys, questionnaire design, conducting interviews and focus groups as well as qualitative and quantitative data analysis.

Level: Postgraduate Coursework Level 7 subject

Pre-requisite(s): BUSM 7075

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7001/>)

BUSM 7003 Applied Business Project (10 Credit Points)

Legacy Code: 200798

This is a unit in which students will have individual responsibility for the timely completion of a significant project under the guidance of a member of the University's academic staff. Students will be required to take a real business issue or problem and apply the relevant theories, frameworks and/or concepts learned throughout the MBA. Projects should focus on issues that would be addressed by senior management within an organisation, and should apply a consultancy perspective. This is the capstone unit. Students should take it as their last unit of study.

BUSM 7004 Applied Project (Human Resources and Management) (10 Credit Points)

Legacy Code: 200954

Applied Project (Human Resources and Management) is an integrated capstone unit that brings together the skills and understandings HRM and management students have developed during their course of study. The unit encourages HRM and management students to demonstrate their ability to solve multidisciplinary problems in relation to current and future issues that affect the application of human resource and management functions in contemporary workplace and industry contexts. The unit will also allow students to critically evaluate issues critical to these professional domains to determine and assess effective solutions. The topics are determined from year to year by discussions between the individual student, the unit coordinator and the student's chosen supervisor.

Level: Postgraduate Coursework Level 7 subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7004/>)

BUSM 7007 Business Communication Skills (10 Credit Points)

Legacy Code: 200817

This unit is designed to assist students to enhance their ability to make written and oral reports suitable for presentation to employers and stakeholders in a modern business environment. More specifically, this foundation unit assists students to evaluate academic literature in various business contexts, to communicate effectively as an individual or within groups and to apply ethical practices in different business contexts. These traits can be applied in the workplace and any contemporary business environment.

Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7007/>)

BUSM 7008 Business Internship (10 Credit Points)**Legacy Code:** 200769

The Business Internship is designed for students who want to gain industry experience and further their studies through a 10-week business internship. This Business Internship unit is based on a project style unit which requires students to undertake a research project in their chosen field whilst attending an industry based internship.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** BUSM 7070 - Masters Project**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7008/>)**BUSM 7010 Business Operations Management (10 Credit Points)****Legacy Code:** 200782

This unit introduces participants to operations management in a range of organisational and industry contexts. Operations management is an important element of business strategy and integral to both service and manufacturing sectors alike. Students will develop an appreciation of the latest trends in operations management and the applications currently adopted in organisations. They will also learn to apply quantitative techniques for analysing problems and providing recommended solutions. This unit provides an excellent foundation for further specialist study in operations management but also works well for students in general business programs.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 4461 - Operations Management**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7010/>)**BUSM 7011 Business Operations and Logistics (10 Credit Points)****Legacy Code:** 200838

This unit introduces students to operations and logistics management theory and practice. Operations and logistics management is an important element of business strategy and it is integral to both service and manufacturing industries. Students will develop an appreciation of the latest trends in business operations and logistics management and the applications currently adopted in organisations and industries. They will also learn to apply quantitative techniques for formulating/analysing problems and providing recommended solutions. This unit provides an excellent foundation for further specialisation in logistics and supply chain management but also works well for students in general business operations programs.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** BUSM 7010 - Business Operations Management**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7011/>)**BUSM 7012 Business Project (10 Credit Points)****Legacy Code:** 200829

Business Project equips professionals to address contemporary challenges through research and applying knowledge developed in earlier units of study. This student-centred unit provides close supervision of research and analytical practices to enhance skill development and capacity to engage with problems confronting organisations, taking account of contexts and multiple stakeholders. Students will have scope to focus on issues that are of particular concern to organisations or interest for their careers. As an integrating unit, it demands participants bring together their knowledge and curiosity to develop recommendations in a format that can showcase their achievements. In order to complete this unit, students must have studied this unit over two teaching periods.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7012/>)**BUSM 7013 Business, Society and the Environment (10 Credit Points)****Legacy Code:** 200847

Business, Society and the Environment draws on social enquiry and reflection to explore the complex relationships between business and the stakeholders of business, by critically evaluating the social, environmental and political impacts of business decisions and practices. The unit focusses on the challenges and ethical dilemmas emerging from global capitalism, and addresses the significance of government in regulating the impact of business on society and the environment. The unit critically considers the nature of the firm and the role of ideology to justify business decisions.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7013/>)**BUSM 7014 Compliance Management (10 Credit Points)****Legacy Code:** 200776

This unit comprises three modules that focus on quality management, risk management, and performance measurement and benchmarking. The quality systems module explores quality management principles, systems, and frameworks, and the role that quality management plays in creating customer value, improving competitiveness and enhancing organisational effectiveness. The risk management module examines the important risks that need to be managed by businesses, especially in a global business setting, and introduces common frameworks that can be used to develop risk management strategies. The performance measurement and benchmarking module elaborates upon the evolution of performance measurement frameworks and introduces approaches that can be used by businesses to assess the status of their business processes and enhance performance through benchmarking. It will draw upon the concepts and theories covered in the quality and risk management modules. All three modules incorporate aspects related to economic, social and environmental responsibility. Students are required to study all three modules.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 4463 - Management of Quality**Incompatible Subjects:** BUSM 7074 - Performance Measurement and Benchmarking LGYB 9039 - Risk Management**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7014/>)

BUSM 7016 Contemporary Organisation Behaviour (10 Credit Points)**Legacy Code:** 200788

Contemporary Organisation Behaviour has been designed to offer you tools which can help you manage people in an increasingly complex organisational climate. Therefore, the objectives of the unit focus on critically evaluating how organisations, groups and teams, and individual behaviour, can affect work performance and productivity. You will explore in depth a range of Organisational Behaviour variables using theory as the foundation for evaluation and/or research while developing skills in professional practice for communicating, collaborating and critically reflecting. You will have opportunities to relate and apply concepts to your work experience and context learning what might be most relevant to your future plans in management.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** BUSM 7017 - Contemporary Organisation Behaviour**Incompatible Subjects:** BUSM 7060 Management Skills**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7016/>)**BUSM 7018 Contemporary People Management (10 Credit Points)****Legacy Code:** 200826

The unit serves as an introduction to human resource management for those considering careers in employment relations and those who will potentially have people management responsibilities. HR processes and practices are studied in contexts and with a consideration of stakeholders' interests, leading to an appreciation of the contribution of human resource management to organisational success. Students will evaluate particular approaches to human resource management through analysing real-world cases and practical activities.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 8572 - Human Resource Management LGYA 4898 - Human Resource Management**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7018/>)**BUSM 7019 Corporate Governance and the Global Environment (10 Credit Points)****Legacy Code:** 200795

Corporate governance is the set of processes, policies and laws affecting the way a firm is directed, administered or controlled. This unit examines corporate governance systems and how these may contribute to sustainable enterprise. Models of corporate governance are analysed, and decision-making processes are evaluated in various economic and social contexts. The unit also introduces the institutions of the legal system, with particular emphasis on domestic and international corporations law.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 8690 - Governance and Ethics**Incompatible Subjects:** LAWS 7009 - Commercial Law**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7019/>)**BUSM 7020 Creating Sustainable Organisations (10 Credit Points)****Legacy Code:** 200853

'Creating Sustainable Organisations' explores new pathways to sustainability and leadership for the 21st Century, encouraging continual reflection and discussion on the nature and implications of current debates on environmental and social issues. It examines different models and strategies designed to balance the need for business growth with responsiveness to social and environmental issues. 'Creating Sustainable Organisations' provides students with the skills to lead in ways that will enable them to be active participants in the solution to the planet's environmental and social problems.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 8728 - Creating Sustainable Organisations**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7020/>)**BUSM 7021 Credit and Lending Decisions (10 Credit Points)****Legacy Code:** 51166

Lending is one of the most important functions of any financial institution. If not managed properly, it can lead to credit quality problems, threatening the existence of the financial institution. This unit aims to provide an analysis of the various lending activities of financial institutions, emphasising the assessment of credit proposals and the management of credit risk.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7021/>)**BUSM 7022 Derivatives (10 Credit Points)****Legacy Code:** 51169

This unit provides an introduction to the major classes of derivatives: forwards, futures, swaps and options. These are studied in detail with the objective of elucidating the ways in which these instruments can be used for the purposes of hedging, speculation and arbitrage. In addition to the analysis of derivative usage and market growth, considerable attention is given to the objective of gaining an understanding of the fundamentals of derivative pricing.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7022/>)**BUSM 7023 Developing Business Expertise (10 Credit Points)****Legacy Code:** 200790

This unit addresses one of the key internal issues facing business today: understanding and using a range of business information to make strategic decisions. Students will use the knowledge gained from prior units to solve business problems, deal with unique situations or plan and manage changing circumstances. A multi-disciplinary approach to analyse business situations will be applied to enable students to recognise this inter-related nature of business disciplines. A simulated practice in the application of knowledge to complex situations will be applied to provide an experiential learning environment.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7023/>)

BUSM 7024 Developing Human Capital and Organisational Capability (10 Credit Points)**Legacy Code:** 200827

The unit equips students to lead human resource development initiatives by developing specialist knowledge and skills. Contemporary human resource development is studied within the context of strategic employment relations, challenges around talent management, the evolution of training and development in firms and in public institutions, and with some consideration of organisational learning. By working through stakeholder differences and labour market segments, students argue as they apply knowledge to different contexts. Through argument and application comes insight into critical perspectives on building human capability, career management and development, and current and future trends in human resource development in a number of countries.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 8882 - Employee Training and Development LGYA 4896 - Developing Human Capital**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7024/>)**BUSM 7025 Diversity, Labour Markets and Workforce Planning (10 Credit Points)****Legacy Code:** 200828

Demographic change, economic cycles and labour force participation patterns influence the manner in which HRM functions are conducted. This unit focuses on the way an organisation's external environment impacts on both strategic and workforce maintenance planning.

The unit is designed to enable employment relations professionals and managers to plan for organisational sustainability, managing workforce-related risk, and growth. The emphasis on labour markets, workforce diversity and planning allows for accommodation of demographic changes, human capital shortages and economic cycles when planning for labour supply and labour demand requirements.

While the aim is to identify gaps between the present and future human capital needs - and implementing solutions so the organisation can accomplish its mission, goals, and objectives - the difficulty of this systematic and proactive process increases with the complexity of an organisation and the longer the time horizon used in the planning.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 8596 - Work and Society LGYA 4899 - Work Society and Labour Markets LGYA 4901 - Workforce Planning**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7025/>)**BUSM 7026 Emerging Leaders (10 Credit Points)****Legacy Code:** 200789

Developing competitive advantage in a globalised business context demands that leaders recognise the imperative of managing stakeholders during periods of significant and complex organisational strategic change. The focus of 'Emerging Leaders' is the development of skills and knowledge that underpins capacities for successful strategic partnering both within and outside the organisation. Engaging with the research and debates on leadership as they relate to current leadership practice and principles in various international and organisational contexts means these newly emerging leaders will be in a position to lead and ensure the performance of individuals, teams and organisations.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7026/>)**BUSM 7027 Employment Relations Professional Practice (10 Credit Points)****Legacy Code:** 200717

Employment Relations Professional Practice concentrates on communicating and performing as employment relations professionals. Students practice the activities undertaken by professionals, such as advocacy and presentation, team work, information and knowledge management, research, analysis and problem solving, and producing reports, policies and analytical essays, with opportunities for feedback. The focus is knowledge of the ER professions, such as the role, function and ethics of human resource managers, industrial officers and the role of professional bodies in Australia and internationally. Support for academic practice will accompany professional activities. The unit is designed for those wanting to build a career in employment relations.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7027/>)**BUSM 7028 Entrepreneurial Management Capabilities (10 Credit Points)****Legacy Code:** 200850

Developing innovation and entrepreneurial capability is essential for small, medium and large businesses. This unit introduces students to practical and applied knowledge supported by theory, concepts, frameworks for understanding and developing innovation and entrepreneurial thought, capability, infrastructure and platforms. Students will be exposed to leadership and approaches to the development of new products, services, processes and business models, with support from Western Sydney University's Launch Pad Technology Business Incubator.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7028/>)**BUSM 7029 Event Management (10 Credit Points)****Legacy Code:** 200844

Event management draws on a wide range of skills involved in functioning in the hospitality industry. Whilst investigating the concept of events, students are asked to consider the logistics and management involved in creating an event-based experience for their guests. To facilitate the provision of an event experience, this unit investigates areas of risk management, planning and logistics, event stakeholders and media and volunteer management.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7029/>)

BUSM 7030 Facilities and Venue Management (10 Credit Points)**Legacy Code:** 200846

Increasingly, hospitality-orientated businesses involve large scale or specialist facilities and venues which require ongoing development, maintenance and redevelopment. This unit provides an understanding of key principles involved in the design and redesign of the use of space, drawing on the principles of servicescapes and planning for a customer experience. Consideration is given to the functional, organisational, environmental and aesthetic aspects of facilities and venues, in the context of organisations which need to manage revenue and distribution channels to remain competitive and sustainable.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7030/>)**BUSM 7031 Financial Institution Management (10 Credit Points)****Legacy Code:** 51165

This unit provides participants with an overview of the types of financial institutions and the regulatory context within which they operate. Financial risk management and corporate responsibility serve as an underpinning framework to consider the complexity associated with managing contemporary financial institutions in an Australian and International context. A focus of the unit is to provide participants with an opportunity to use techniques to measure and manage financial risk.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7031/>)**BUSM 7032 Financial Institutions and Markets (MAF) (10 Credit Points)****Legacy Code:** 51163

This unit helps students to: understand the role and nature of financial markets and institutions; develop computational skills for transactions in financial markets; understand the factors that determine share price, interest rates and exchange rates; and understand major derivative products and their use in financial markets. This subject contains financial institutions and markets and the transactions that take place in them.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7032/>)**BUSM 7033 Financial Statement Analysis (PG) (10 Credit Points)****Legacy Code:** 51214

The major sources of information on which to base judgements on borrowing capacity, liquidity, managerial effectiveness, and investment potential remain the financial statements of an organisation. This unit is a result of the claim made by Foster, an authority in the finance field, that developments in the fields of accounting, economics, finance and statistics (as they relate to financial statement analysis) are understood well enough to permit financial statement analysis to be studied intensively.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7033/>)**BUSM 7034 Foundations of Management (10 Credit Points)****Legacy Code:** 200785

Developing one's own professional skills, being able to assess and develop the skills of others, and astutely reading the environment, are core to high-achieving executives. Foundations of Management introduces new managers to the fundamentals of management. It takes an holistic view of the elements related to optimal performance of managers, drawing from and reflecting upon participants' experiences. The elements consist of the awareness of ones self as a manager, identifying and developing own management skills required for now and the future needed when working within a dynamic organisational environment. The focus is developing one's own management skills through the application of theory to management practice.

Level: Postgraduate Coursework Level 7 subject**Incompatible Subjects:** BUSM 7101 - Workplace Management Dynamics BUSM 7060 - Management Skills**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7034/>)**BUSM 7035 Funds Management and Portfolio Selection (10 Credit Points)****Legacy Code:** 51168

This unit provides an introduction to the theory, concepts, tools, techniques and applications of investment management, drawing on examples from the Australian financial system. The unit focuses on various asset pricing models including capital asset pricing model, single index model arbitrage pricing theory and Fama-French three factor model. The unit introduces various portfolio management strategies, asset classes including bonds and equity securities. The unit also highlights various fund performance measures.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7035/>)**BUSM 7036 Funds Management and Portfolio Selection (EO) (10 Credit Points)****Legacy Code:** 900655**Level:** Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7036/>)**BUSM 7037 Gastronomy and the Food and Beverage Experience (10 Credit Points)****Legacy Code:** 200842

This unit focuses on the provision of food and beverage - a fundamental operational component of the majority of hospitality businesses. As consumer understanding of food and beverage increases there is a need for the industry to advance their knowledge and for businesses to provide offerings which extend beyond the traditional food and beverage frameworks in order to stay competitive. The role of food within society and subsequent commercial implications, including gastronomic tourism, food quality and safety are discussed in this unit.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 4590 - Gastronomy and the Management of the Food Experience**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7037/>)

BUSM 7040 Governance, Ethics and Social Entrepreneurship (10 Credit Points)**Legacy Code:** 200848

There is a growing need for communities and not-for-profit organisations to maintain a degree of organisational and social sustainability, without recourse to philanthropy, government, or other sources of aid. This unit adopts business and entrepreneurial principles to identify and explain the management of a social venture, with a view to ensuring organisational and social sustainability. The unit provides an understanding of governance and ethical practice to support social outcomes.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7040/>)**BUSM 7042 Hospitality and Tourism in Society (10 Credit Points)****Legacy Code:** 200837

This unit unpacks the concept of hospitality and addresses the questions of what the hospitality industry is, and what its role is in the broader societal context. Linking together elements of tourism and leisure, consideration is given to the impacts, both positive and negative, of hospitality on individuals, communities and economies. Discussions of the integration, communication, planning, and interconnection between hospitality and tourism and their implications in society are also considered.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7042/>)**BUSM 7043 Industrial Relations and Workplace Change (10 Credit Points)****Legacy Code:** 200719

Industrial Relations and Workplace Change is designed to equip current and future employment relations professionals and practitioners with the knowledge necessary to analyse and implement the processes for workplace change and workplace-level bargaining. The understanding of workplace change covered in this unit includes an emphasis on rights, obligations and "voice". The unit focuses on workplace change problem solving for employee engagement and dispute resolution in both local and global workplace change contexts.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 8579 - The Industrial Relations Process**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7043/>)**BUSM 7044 Information for Business (10 Credit Points)****Legacy Code:** 200726

This unit examines the information requirement for effective marketing decisions. The unit explores approaches managers can use to identify information requirements and then to use different financial, environmental and market information. Topics include interpretation of business performance, preparation of marketing forecasts and budget allocations.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 4630 - Marketing Research LGYA 4627 - International Business Research**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7044/>)**BUSM 7045 Innovation Through Digital Technology (10 Credit Points)****Legacy Code:** 200845

Business innovation in the Digital Economy recognises that current economic development and leadership is based on digitisation of the global economy. This unit provides a framework for understanding management issues, business development and technology use and change in the areas of innovation and digital business. The unit introduces students to various digital technologies and applications that companies need to address for creating new business opportunities in the fast changing global business environment. Students will develop an appreciation of digital business as a form of organisational innovation and the importance of innovation in the digital economy. Students will learn to formulate a digital business strategy for an organisation and understand various issues involved in digital business innovation. Students will be exposed to the University's business and technology incubator environment.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7045/>)**BUSM 7046 Innovation for New Markets (10 Credit Points)****Legacy Code:** 200851

Entrepreneurship, innovation and new markets are pertinent activities that have collectively become cornerstones of how firms grow and interact with society. This unit introduces students to issues, principles and frameworks associated with exploring opportunities and challenges that relate to these three activities. Emerging and new markets are examples of markets that represent opportunities and challenges for innovation and entrepreneurial activities. Through selected readings that emphasise key themes and issues, students will be exposed to an understanding of what constitutes entrepreneurship, innovation, new markets and market development, how they are influenced by the ever-changing business environment, an examination of opportunities that emerge as a result of changing technology and consumer expectations taking place in emerging and new markets. Emerging markets have become a key source of innovation in products, services and business processes which calls for an examination as to whether these can be extended to developed markets. The unit provides students with an opportunity for continuous practical experiential learning through collaboration with industry Launch Pad partners.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7046/>)**BUSM 7047 Innovation, Creativity and Entrepreneurship (10 Credit Points)****Legacy Code:** 200792

The aim of this unit is to provide students with the necessary skills to understand, execute and manage entrepreneurial innovation processes in firms/organisations, and be more prepared to succeed within an increasingly complex, global and highly competitive entrepreneurial environment. Firms/organisations of various sizes, including small and medium enterprises (SMEs) that are innovative and entrepreneurial provide vision, nurture creativity and idea management as part of their everyday activities and in seeking long-term sustainability.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 8997 - Innovation and Entrepreneurship**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7047/>)

BUSM 7048 Innovation, Creativity and Foresight (10 Credit Points)**Legacy Code:** 200852

Creativity is a systematic, logical process mixing imaginative and creative thinking. Ideation is a process for forming and relating ideas derived through creativity. Innovation seeks to take ideas through invention and entrepreneurial processes to create new economic and social value. Students will be exposed to a variety of brainstorming, creativity and foresight methods and tools, with emphasis on scenario planning methods. Students will be introduced to workshop development, moderation and management approaches and methods. Selected key themes on economic, social, technological, and sustainable development for Australia over the next 10-30 years will be analysed and developed through a scenario planning workshop process, with outputs mapped to business and social innovation and entrepreneurship thinking, and platforms. Students will also be exposed to creativity and foresight methods used by the Western Sydney University Launch Pad Business Technology Incubator.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7048/>)**BUSM 7050 Integrated Business Experience 1 (10 Credit Points)****Legacy Code:** 200831

Successful professionals must be able to view issues and problems from multiple perspectives and be able to utilise a range of different skills to make appropriate decisions. This unit introduces this multi-faceted approach to business by taking the knowledge gained in earlier units and of the real-world of business and applying this via case studies. Students will be expected to work independently and in syndicate teams to solve common issues facing businesses and policy makers using critical, integrative and creative thinking. It is recommended that this unit be the final subject within the graduate certificate.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7050/>)**BUSM 7051 Integrated Business Experience 2 (10 Credit Points)****Legacy Code:** 200843

Successful professionals must be able to view organisational issues from multiple perspectives (range of stakeholders) and levels (from local to international), then be able to utilise a range of different skills to make appropriate decisions. This unit takes this multi-faceted approach by utilising the knowledge gained in earlier units and applying it to case studies. Building on the unit 'Integrated Business Experience 1', an international focus provides participants with the opportunity to consider issues on a broader scale. Students will be expected to work with a group simulation to solve common issues facing organisations and policy makers using critical, integrative and creative thinking.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** BUSM 7050**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7051/>)**BUSM 7053 International Finance (10 Credit Points)****Legacy Code:** 51211

This unit provides a comprehensive analysis and coverage of contemporary international finance by describing the international financial system, institutions and market practices; international finance theorems and their application; Euromarkets; international borrowing, lending and capital sourcing; measurement of foreign exchange risk; managing foreign exchange exposure; foreign currency derivatives, international investment; and globalisation and the MNC.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7053/>)**BUSM 7054 International and Global Employment Relations (10 Credit Points)****Legacy Code:** 200720

This unit is designed to put national-level employment relations into international and global perspectives. Students will be equipped to work in globalised labour markets and to assist organisations in responding effectively to international environments. The nature of globalisation, national systems of employment relations and significant contemporary human resource management issues are explored. The implications of social, cultural, political and economic factors in differing national, international and global contexts for employment relations strategies and practices are examined.

Level: Postgraduate Coursework Level 7 subject**Incompatible Subjects:** LGYA 8593 - International Human Resource Management LGYA 8584 - Themes in International and Comparative Employment Relations**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7054/>)**BUSM 7055 Internship (10 Credit Points)****Legacy Code:** 200830

Internship is designed for students who want to gain industry experience and further their studies through a 20-credit point business internship, conducted over two consecutive teaching sessions. This Internship unit is based on a 'project style' unit which requires students to undertake a research project in their chosen field whilst attending an industry-based internship. These highly sought after internships will be filled on a competitive basis.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7055/>)**BUSM 7058 Leading Contemporary Organisations (10 Credit Points)****Legacy Code:** 200833

This unit explores the processes and challenges encountered by leaders in contemporary organisations, taking into account rapidly changing environments. Through an in-depth appraisal of various leadership theories and concepts, it encourages students to reflect on the key competencies required for effective leadership. It also emphasises the importance of self-knowledge, values and ethics for contemporary leaders. Students will be required to design a leadership development program to address current and future leadership issues.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7058/>)

BUSM 7059 Logistics Processes in Enterprise Resource Planning (10 Credit Points)**Legacy Code:** 200836

This unit introduces key logistics processes supported by modern ERP (Enterprise Resource Planning) systems, using an integrated process perspective of the firm. Each process within broader logistics processes provides the basis for executing logistics operations in a range of organisations across manufacturing, service and government sectors. Logistics processes are introduced through key process cycles including manufacturing, planning and control (MPC) in production planning, procurement cycle in purchasing, sales order processing in sales and distribution, and logistics execution. Cross-integration of these process cycles is also illustrated using various integrations among the procurement, fulfilment, production and warehouse management processes. Logistics processes are demonstrated using data, application and technical integration within an ERP system environment.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7059/>)**BUSM 7060 Management Skills (10 Credit Points)****Legacy Code:** 200768

This unit explores the skills of managers and their effect on organisational leadership. The contemporary organisations in which we work bring together a complex array of relationships and processes that require ongoing development of a broad range of skills for the manager. Management and leadership, and the skills required for both, are not seen as separate in this unit. This unit focuses on building the skills which will best prepare managers and leaders for dynamic and changing organisational environments.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7060/>)**BUSM 7061 Managerial Economics (10 Credit Points)****Legacy Code:** 200793

This unit introduces students to the application of basic economic concepts to managerial decision-making and their use in a range of business environments. Students will learn how to apply microeconomic tools to common problems facing business managers, such as maximising profit, setting prices, creating efficient incentive structures, and selecting competitive strategies. Case studies are also used to demonstrate the value of microeconomic tools in making business decisions, and to foster the student's application of their learning to their own business environment.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 8716 - Economic Contexts for Managers
LGYA 8679 - International Financial Management ECON 7002 - International Trade and Industry Economics**Incompatible Subjects:** ECON 7001 - Economics (PG)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7061/>)**BUSM 7062 Managerial Finance (10 Credit Points)****Legacy Code:** 200787

This unit is designed to provide students with the knowledge and skills required for understanding, analysing and solving corporate financial management issues. The focus is corporate-oriented with emphasis on the practical application of economic theory in financial decisions confronting business today.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 8667 - Financial Management**Incompatible Subjects:** ACCT 7014 - Financial Management of Hospitality and Hotel Managers LGYA 7713 - Financial Management in Health Services HLTH 7005 - Health Financial Management**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7062/>)**BUSM 7064 Managing Project Teams and Stakeholders (10 Credit Points)****Legacy Code:** 301187

This unit is designed to provide students with essential behavioural knowledge areas for project management. Since project management occurs in a team setting, project managers need to master team leadership by understanding team dynamics and behaviour in different team settings, which is a main focus area in this unit. Students will also learn effective ways to identify and engage project stakeholders and communication concepts and tools that effectively influence stakeholders.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7064/>)**BUSM 7065 Managing in the Global Context (10 Credit Points)****Legacy Code:** 200835

Managing in the Global Context provides students with an understanding of the complexities of managing in the changing economic, political, legal, technological and within socio cultural factors that influence global business operations. By addressing areas of understanding the global business environment, managing political risk and government relations, understanding culture, cross cultural communication and negotiation, strategy and structures for global organisations, motivating and leading, business ethics and corporate responsibility and competencies for global managers this Unit provides an organisational behaviour approach to managing in a dynamic global context. Through critical analysis of contemporary media, research and case studies this Unit provides a basis for linking management practice to theoretical knowledge.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7065/>)

BUSM 7070 Masters Project (10 Credit Points)**Legacy Code:** 200280

Masters Project is an integrated capstone unit that brings together the skills and understanding marketing students have developed during their course of study. The unit encourages students to demonstrate their ability to solve problems in relation to current and future issues within a marketing context in contemporary business. The unit allows students to critically evaluate issues relevant to their topic and assess effective solutions. The topics are determined by discussions between the individual student, the unit coordinator and the student's chosen supervisor.

Level: Postgraduate Coursework Level 7 subject

BUSM 7071 Negotiation and Conflict Resolution Management (10 Credit Points)**Legacy Code:** 200796

Negotiation has become a strategic necessity for many firms wishing to survive and grow in today's increasingly competitive globalised economy. Negotiation and conflict resolution errors can be costly to direct and indirect stakeholders. As such, Negotiation and Conflict Resolution Management will provide theoretical frameworks for students to develop the practical skills needed to manage the negotiation and conflict resolution needs of any organisation. Through the use of role play and simulations, students will be required to analyse corporate data and apply strategies to create a negotiated agreement. It examines negotiation in different contexts including multiparty negotiations. Emphasis is also placed on causes of conflict and how to identify potential indicators, leading to an analysis of the different conflict modes and patterns.

Level: Postgraduate Coursework Level 7 subject

Equivalent Subjects: LGYA 8695 - Negotiation for Managers LGYA 8696 - Conflict Resolution

BUSM 7072 New Venture Finance (10 Credit Points)**Legacy Code:** 200849

New Venture Finance introduces students to essential theories, frameworks, principles and requirements for understanding and seeking funding for new ventures, with a focus on investor philosophy. A dynamic approach to seeking initial and subsequent funding for developing innovations and entrepreneurship is emphasised in this unit, recognizing that most new ventures are not fully funded as they launch. The unit also explores approaches related to new ventures at the stage at which they are maturing into defined businesses. Students will be introduced to commercialisation and strategies for the development of business plans designed to seek funding and support.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7072/>)

BUSM 7073 One Hundred Days (10 Credit Points)**Legacy Code:** 200797

This integrative unit focuses on the first one hundred days of a business executive who has commenced in a new management role. Students will gain insights into the challenges facing managers today and develop the skills in leadership and management expertise that were introduced in earlier units. The premise of this unit is that regardless of their level of experience, all managers undertaking new responsibilities need to understand who the key stakeholders are and what the business' personnel practices, financial objectives and marketing strategies are. Students will be given scenarios covering a range of business environments and are expected to problem solve these using the skills and knowledge learned in previous units.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** BUSM 7023**Restrictions:** Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7073/>)

BUSM 7075 Philosophical Foundations of Business Research (20 Credit Points)**Legacy Code:** 200743

This unit aims to develop a deeper understanding of the theoretical traditions in business research, the philosophy of science that informs research and the methodological approaches in business research. We discuss in depth the assumptions behind two major paradigms: The deductive (quantitative) and the inductive (qualitative) paradigms.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7075/>)

BUSM 7076 Practice Management for Health Professionals (PG) (10 Credit Points)**Legacy Code:** 400736

This unit is aimed to introduce the student to the management issues in establishing and working in a clinical practice. While the unit will cover issues related to health professionals and public sector management, the focus of the unit will be on issues in private practice. The aim of the unit is to introduce the student to a wide range of topics, including an over view of health care funding in Australia, private and public health system, developing a business plan, different business structures, financial management, managing staff and occupational health and safety issues.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7076/>)

BUSM 7077 Preparation for Postgraduate Study in Business (40 Credit Points)**Legacy Code:** 200942

Preparation for Postgraduate Study in Business complements and extends your prior learning providing advanced preparation in a range of business areas and a foundation for your further postgraduate business studies. An appreciation of the global economy will provide a framework for exploring people and culture as well as managing people in organisations. You will evaluate organisational performance using diverse data and intelligence and by interpreting financial statements. You will also explore essential aspects of financing enterprises and financial markets. This unit will enable you to develop the professional and academic skills necessary for ethical conduct in business and in preparation for advanced study in postgraduate business courses.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7077/>)**BUSM 7078 Project Management (10 Credit Points)****Legacy Code:** 51240

This unit introduces students to the philosophy, tools and techniques for effectively managing projects in an organisation. Participants will be required to apply lessons learned to real-world situations and cases, developing their professional expertise in project management in ways that are relevant to their careers. Topics include organisational strategy and project selection; project definition and criteria of merit; tools and techniques; team leadership and management; development of project plans; estimation of time and resources; risk analysis and management; scheduling and control; resource allocation; project tracking; project closure and review. Participants will be expected to use MS Project as a project management tool.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7078/>)**BUSM 7079 Purchasing and Materials Management (10 Credit Points)****Legacy Code:** 51259

This unit introduces purchasing and materials management through a number of concepts, processes and methods across a number of industry sectors including manufacturing, service and public sector. It covers a range of topics including purchasing strategy, organisational structure and responsibilities, global supply management, supplier selection and evaluation, procurement process, price/cost analysis, purchasing contract arrangements and inventory management. Students will develop an appreciation of theoretical knowledge in purchasing and materials management and applications and systems currently adopted in organisations. The knowledge and skills developed through lectures, case analyses and hands-on exercises will prepare students to manage a range of purchasing and materials management functions in global organisations.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7079/>)**BUSM 7081 Reward Management (10 Credit Points)****Legacy Code:** 200721

This unit enables employment relations professionals to deploy advanced practitioner skills in specific workplace and institutional contexts. The management and the negotiation of reward are emphasised. Innovations such as strategic and total reward strategies are critically examined. These innovations relate to the key issues of market-imperatives and fairness, including the balance between collective and individually-determined reward and reward strategies related to performance.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 9000 - Remuneration Theory and Practice**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7081/>)**BUSM 7082 Risk Management and Decision Making (10 Credit Points)****Legacy Code:** 301192

This unit introduces decision theory, concepts and techniques applicable in managing projects. These techniques provide the basis for understanding project risks. The risk management process is reviewed in detail and dynamics of applying it in specialisation domains is discussed. The unit also analyses the concept of value and how value management is applied in managing projects. The different approaches of applying value management in different specialisations are discussed.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7082/>)**BUSM 7083 Security Analysis and Portfolio Theory (10 Credit Points)****Legacy Code:** 51212

This unit examines the valuation of assets, firms and securities. The focus is on the attempt by active investors to identify mispriced securities through projection of a firm's future cash flows based on pro forma financial statements, translating those projections to values and dividing the firm value among the different security holders of the firm. Students develop their understanding of accounting, finance and economic concepts in this applied unit by building models of a firm and conducting analyses of the equity valuation.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7083/>)**BUSM 7084 Start-up (10 Credit Points)****Legacy Code:** 200971

Developing start-ups and rejuvenating existing businesses are essential for industry and regional development and regeneration. This unit integrates knowledge from the Master of Business Administration (MBA) Program into frameworks for students to experience developing an idea into prototype products and services and start-up businesses.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7084/>)

BUSM 7085 Strategic Bank Management (10 Credit Points)**Legacy Code:** 51173

This unit examines a range of contemporary issues facing financial services firms in the twenty-first century. The unit provides an in-depth examination of changing demands and needs of the various stakeholders of financial services firms and a major emphasis is put on the evaluation and analysis of resulting implications. For each identified issue, major conclusions are drawn and strategies developed to deal with the associated challenges and opportunities for management. Special topics are covered in line with pertinent events in the industry.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** BUSM 7031**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7085/>)**BUSM 7086 Strategic Business Management (10 Credit Points)****Legacy Code:** 200841

This unit critically examines strategic management processes in various business, industry and economic contexts. Students actively participate in experiential learning focussing on strategic leadership, visioning, situation analysis, objective setting and evaluation. Students apply current strategy models and theories to solving industry-specific problems and scenarios. The teaching methods are application-oriented using a variety of engaging technologies and media which simulate real-world strategic problem-solving.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7086/>)**BUSM 7087 Strategic Employment Relations (10 Credit Points)****Legacy Code:** 200722

This capstone unit aims for students to acquire the skills, knowledge and understanding of the challenges of managing people strategically in complex and turbulent environments. The unit examines theories on business strategy, strategic management, human resource strategy and industrial relations strategy. The use of knowledge of Human Resource Management and Industrial Relations in strategic analysis and evaluation for transforming the people management function is explained. Management practice is considered through examining ways of acting strategically relative to tendencies for the human resource function to become mired in tactical responses. The tools and techniques for analysing, implementing and evaluating strategy are emphasised.

Level: Postgraduate Coursework Level 7 subject**Incompatible Subjects:** LGYA 8573 - Employment Relations Strategy and Change**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7087/>)**BUSM 7088 Strategic Management (10 Credit Points)****Legacy Code:** 200794

Strategic Management integrates business functional knowledge. The practical approach provides opportunities to use a range of strategic analysis tools and to engage in problem-solving (individually and collaboratively). Simulated strategic decision-making that includes data interpretation and generating options requires exercise of communication, research, and information literacy capabilities. This unit will allow MBA graduates to interpret data, generate strategic options and contribute to strategic decision-making in a number of organisational contexts.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** BUSM 7104 - Strategic Analysis and Decision Making**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7088/>)**BUSM 7090 Strategic Project Management (10 Credit Points)****Legacy Code:** 301193

This unit teaches students the importance of aligning projects with the business strategy. Strategic alignment is a two-way process. Overall business strategy guides project planning, and, in turn, project success drives enterprise strategy. Students understand the bigger-picture goals, how to identify what is being accomplished and why, and how to achieve goals. Other topics include measuring project success and portfolio and program management.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7090/>)**BUSM 7091 Strategic Technology Management (10 Credit Points)****Legacy Code:** 200777

This unit provides participants with an understanding of the diverse and complex issues surrounding the strategic management of technology. Special emphasis will be placed on the basic concepts and theories that will be needed to understand, anticipate, acquire, and use technology strategically for attaining a competitive edge in the market. The unit is of particular relevance to managers, engineers, technologists, and scientists who have, or will have, responsibilities for managing technological change and innovation.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYB 9051 - Strategic Technology Management**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7091/>)

BUSM 7092 Supply Chain Management (10 Credit Points)**Legacy Code:** 200329

With a rapid increase in global trade and increasing customer expectations, firms are under considerable competitive pressure to find cost-effective and creative ways of delivering value to customers. Since the creation of customer value needs to be viewed holistically - from raw material movement from suppliers through to transformation in the factory and then on to distributors and customers - the effective management of the supply chain and related business networks is critical to achieving competitive advantage. Through formal lectures, case study discussions, and assignments, this unit provides the foundational knowledge, tools, and techniques needed to participate in the design, implementation, and management of an effective supply chain.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7092/>)**BUSM 7093 The Business Environment (10 Credit Points)****Legacy Code:** 200783

This unit introduces students to different aspects of the business environment so they develop a general understanding of a wide range of topics within the field of commerce. Management, marketing, legal and economic perspectives are explored as components of business structures taking into account the interactions between political, social, and fiscal environments. It is recommended that students undertake this unit in their first quarter of study.

Level: Postgraduate Coursework Level 7 subject**Incompatible Subjects:** LGYA 4461 - Operations Management
ECON 7001 - Economics (PG) BUSM 7010 - Business Operations Management
BUSM 7044 - Information for Business LGYA 8762 - International Business Environment**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7093/>)**BUSM 7094 The Contemporary Business Environment (10 Credit Points)****Legacy Code:** 200820

This unit provides foundational knowledge that is needed to appreciate the complexities involved in managing businesses in an uncertain and complex global setting. Emphasis is placed on the influence of the economic, socio-cultural, political, and technological environments on a business and the need for businesses to adopt a global perspective in formulating and implementing strategic interventions for enhancing competitiveness.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** BUSM 7093 - The Business Environment**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7094/>)**BUSM 7097 Time and Quality Management (10 Credit Points)****Legacy Code:** 301195

This unit introduces time and quality management using basic planning and quality concepts. The unit will cover concept of planning and critical path methods including Project Evaluation and Review Technique (PERT), Line of Balance (LoB), Resource Management and Network. Relevant time management software is to be introduced in this unit to plan and manage project activities. The unit will also help students to understand and analyse quality system accreditation process and manage scope and changes in a project.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7097/>)**BUSM 7098 Tourism Management (10 Credit Points)****Legacy Code:** 200839

This unit considers concepts of tourism management and explores the structure of tourism from a systems approach across an Australian and international context. Consideration is given to the tourist motivation to explore why tourism is undertaken, ranging from the traditional to special interest. The objectives and benefits/risks are considered from each stakeholder's perspective where stakeholders may include relevant government organisations, tour operators, consumers, and service providers throughout the Tourism Supply Chain. Planning of the tourist experience is also explored to provide an improved understanding and management of tourists

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7098/>)**BUSM 7099 Understanding Contemporary Organisations (10 Credit Points)****Legacy Code:** 200825

Understanding Contemporary Organisations introduces the theoretical perspectives offered by the disciplines of business and organisation studies to students who have not previously undertaken a business study program. Students will develop their understanding of organisational structure and design and then examine the processes and practices that flow from structure and design. Through this unit, students build an integrated understanding of marketing, finances and people management practices in contemporary organisational settings.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7099/>)

BUSM 7101 Workplace Management Dynamics (10 Credit Points)**Legacy Code:** 200725

Workplace interactions are dynamic, fluid and responsive to changing economic, social, political and technological circumstances. Adopting a critical approach, the focus is on the concerns of managers and workers in their day-to-day interactions. Participants will explore the impact of organisational and socio-economic change on organisation stakeholders with emphasis on the impact of the new forms of work and technology, economic developments, workforce diversity, and cross-cultural communication. Dynamics equips business students with the ability to analyse and address a changing business environment, appropriate for careers in Australia and internationally.

Level: Postgraduate Coursework Level 7 subject**Incompatible Subjects:** LGYA 4617 - Dynamics of Workplace Management LGYA 8768 - Managing Diversity**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7101/>)**BUSM 7105 Business Analytics in Practice (10 Credit Points)****Legacy Code:** 201019

This unit will explore and analyse ideas and concepts related to business intelligence and advanced analytics in business and broader economic contexts. The ability to identify, gather, extract, and analyse data is vital to organisations. Business analytics uses a variety of software applications to transform such data into useful information that can then be used for constructive decision making, improving operational effectiveness and efficiencies and identifying new business opportunities.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** MKTG 7002 - Applied Marketing Solutions**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7105/>)**BUSM 7106 Ethics and Professionalism in Financial Services (10 Credit Points)****Legacy Code:** 201037

This unit will address the ways in which ethics play a pivotal role in professional behaviour. The process of professionalism is an integral part of management and is responsible for effective decision making. This unit considers the challenges in the financial services environment that require strong ethical values and professional judgement. Ethical decision making is a fundamental requirement of good business practice. This unit will consider the importance of ethics, the FASEA Code of Ethics, how to apply different ethical frameworks for decision making and the meaning of being a professional in financial services. This unit is available as a standalone bridging unit which is accredited by the Financial Adviser Standards and Ethics Authority (FASEA) having met the FASEA curriculum and standards requirements.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7106/>)**BUSM 7109 Environmental Management: A Business Perspective (10 Credit Points)**

In this project oriented unit, students apply environmental management concepts within a business context. Students explore a range of practices and strategies to a sustainable business operation, learning why environmental sustainability is the world's most challenging and complex issue. As part of group work projects, students investigate methods and tools to analyse environmental management practices, determine environmental risks, and develop associated mitigation strategies. Additionally environmental management systems and relevant international standards are used to evaluate business environmental performance in real-world cases and emerging environmental management initiatives, such as the circular economy, natural capital accounting, and environmental and social profit and loss.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm7109/>)**BUSM 9001 Higher Degree Research Thesis - Business Management (20 Credit Points)****Legacy Code:** 800043**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm9001/>)**BUSM 9002 Higher Degree Research Thesis - Management (20 Credit Points)****Legacy Code:** 800041**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/busm9002/>)

Chemical Sciences (CHEM)

CHEM 0001 Chemistry (WSTC Prep) (10 Credit Points)**Legacy Code:** 700043

This unit is a platform to introduce Chemistry to students. It introduces students to the basic concepts required to satisfy the needs of most first year university science units in both skill and content areas. It is intended that students will gain a greater understanding of the theoretical concepts covered in the unit by completing the practical component of the unit. Students will also be introduced to professional pathways in science.

Level: Undergraduate Level 0 Preparatory subject**Equivalent Subjects:** CHEM 0002 - Chemistry (UWSC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/chem0001/>)

CHEM 0002 Chemistry (WSTC) (10 Credit Points)**Legacy Code:** 900024

This unit introduces students to the basic concepts required to satisfy the needs of most first year university science courses in both skill and content areas. It is intended that students will gain a greater understanding of the theoretical concepts covered in the course by completing the practical component of the course. Students will also be introduced to professional pathways in science.

Level: Undergraduate Level 0 Preparatory subject**Equivalent Subjects:** CHEM 0001 - Chemistry (WSTC Prep)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/chem0002/>)**CHEM 1003 Essential Chemistry 1 (10 Credit Points)****Legacy Code:** 300800

This unit provides an introduction to some of the essential knowledge, concepts and skills of chemistry, to serve the needs of students majoring in chemistry and those requiring a working knowledge of chemistry. Observable chemical facts and phenomena including structure, dynamics, and energetics, are explained in terms of current mathematical and visual models and further developed in Essential Chemistry 2. Evidence for chemical understanding is provided using IR spectroscopy, mass spectrometry, and computer molecular modelling. Laboratory skills relate theory to practice through the development of practical skills required to determine the concentration of an analyte using volumetric and spectrophotometric analysis.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** CHEM 1001 - Chemistry 1 CHEM 1011 - Principles of Chemistry CHEM 1004 Essential Chemistry 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/chem1003/>)**CHEM 1004 Essential Chemistry 1 (WSTC) (10 Credit Points)****Legacy Code:** 700121

This unit provides an introduction to some of the essential knowledge, concepts and skills of chemistry, to serve the needs of students majoring in chemistry and those requiring a working knowledge of chemistry. Observable chemical facts and phenomena including structure, dynamics, and energetics, are explained in terms of current mathematical and visual models and further developed in Essential Chemistry 2. Evidence for chemical understanding is provided using IR spectroscopy, mass spectrometry, and computer molecular modelling. Laboratory skills relate theory to practice through the development of practical skills required to determine the concentration of an analyte using volumetric and spectrophotometric analysis.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** CHEM 1001 - Chemistry 1 CHEM 1003 - Essential Chemistry 1 CHEM 1011 - Principles of Chemistry LGYB 0460 - Chemistry 1 (UWSC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/chem1004/>)**CHEM 1005 Essential Chemistry 2 (10 Credit Points)****Legacy Code:** 300803

This unit introduces an investigation of the reactivity of covalent molecules, in particular, of carbon-based compounds. Focusing on introductory chemical dynamics and thermodynamics, students will develop an in-depth understanding of the structure, nomenclature and reactivity of the principal organic functional groups, extending their basic principles of chemistry. They will also understand how molecules are synthesised and the ways they react being important in the function and role of chemistry in biological systems in our domestic and industrial worlds.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** CHEM 1002 - Chemistry 2 CHEM 1010 - Medicinal Chemistry CHEM 1006 - Essential Chemistry 2 (WSTC)**Incompatible Subjects:** LGYB 6352 - Biological Chemistry 12D**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/chem1005/>)**CHEM 1006 Essential Chemistry 2 (WSTC) (10 Credit Points)****Legacy Code:** 700122

This unit introduces an investigation of the reactivity of covalent molecules, in particular, of carbon-based compounds. Focussing on introductory chemical dynamics and thermodynamics, students will develop an in-depth understanding of the structure, nomenclature and reactivity of the principal organic functional groups, extending their basic principles of chemistry. They will also understand how molecules are synthesised and the ways they react being important in the function and role of chemistry in biological systems in our domestic and industrial worlds.

The chemical sciences underpin our understanding in the environmental, forensic, health, medical, biological and physical sciences. This unit familiarises students with the fundamental principles of chemistry and how chemistry shapes the world around us. Students will be introduced to the concepts of atomic structure, the reactivity of substances, the Periodic Table, stoichiometry, and will learn about the structure and reactivity of substances and mixtures in different chemical environments, and exposed to different forms of electromagnetic radiation. Students will explore real world problems and apply the fundamental principles of chemistry to better understand how we may shape our own future.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** CHEM 1007 - Introductory Chemistry CHEM 1009 - Introductory Chemistry (WSTC)**Incompatible Subjects:** CHEM 1003 - Essential Chemistry 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/chem1008/>)

CHEM 1009 Introductory Chemistry (WSTC) (10 Credit Points)**Legacy Code:** 700155

The chemical sciences underpin our understanding in the environmental, forensic, health, medical, biological and physical sciences. This unit familiarises students with the fundamental principles of chemistry and how chemistry shapes the world around us. Students will be introduced to the concepts of atomic structure, the reactivity of substances, the Periodic Table, stoichiometry, and will learn about the structure and reactivity of substances and mixtures in different chemical environments, and exposed to different forms of electromagnetic radiation. Students will explore real world problems and apply the fundamental principles of chemistry to better understand how we may shape our own future.

This unit provides insight into both classical methods of analytical analysis and an introduction to modern instrumental methods of analysis. Specifically, the classical methods of analysis include volumetric and gravimetric methods, while the modern instrumental methods include separation techniques and spectroscopy. The role of spreadsheets in data analysis and presentation is discussed and applied in the laboratory program.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** CHEM 1003 OR CHEM 1008**Equivalent Subjects:** CHEM 2002 - Analytical Chemistry 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/chem2001/>)**CHEM 2006 Inorganic Chemistry (10 Credit Points)****Legacy Code:** 300899

This unit introduces students to a thorough study of coordination chemistry (discussing complexes, ligands, structure, isomerism, stability, reaction mechanisms, oxidation states, elements in the first transition series, coordination chemistry in biological systems). The unit then moves on to areas of fundamental inorganic chemistry, including bonding, and solid state chemistry. Advanced Modules cover the following topics: spectroscopy in coordination complexes, physiology and inorganic chemistry, and medicinal inorganic chemistry. This unit also introduces many of the laboratory techniques and equipment that are used in synthetic procedures in coordination chemistry.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** CHEM 1003 OR CHEM 1008**Incompatible Subjects:** CHEM 2007 - Inorganic Chemistry 2 CHEM 2004 - Coordination Chemistry**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/chem2006/>)**CHEM 2008 Organic Chemistry (10 Credit Points)****Legacy Code:** 300876

Organic molecules are at the heart of the chemistry of life and industry. This unit builds on the fundamental chemical principles, exploring reaction mechanisms and the concept of reactivity and stereo- and regio-selectivity of many of the central reactions that form the basis of living processes, modern research, and contemporary industrial transformations. The unit contains a problem-based module on the application of spectroscopic methods to organic structure elucidation, focusing on spectroscopic data and a practical section on organic synthesis. The unit will focus on complex organic molecules including biologically relevant molecules, and examples from chemical industries, medicinal and pharmaceutical industries.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** CHEM 1005**Equivalent Subjects:** BIOS 2039 - Molecules of Life Synthesis and Reactivity CHEM 2009 - Organic Chemistry**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/chem2008/>)

CHEM 2010 Physical Chemistry (10 Credit Points)**Legacy Code:** 300849

Physical Chemistry describes the fundamentals of energy changes in chemical systems (thermodynamics), the rates and mechanisms of chemical reactions (kinetics), and electrochemistry and/or ion and electron transport. These concepts will be applied to a range of chemical and/or biochemical processes. A major focus of the unit will be to develop the ability to study quantitative chemical/biochemical problems, and develop useful physical chemistry experimental and data-analysis skills.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** CHEM 1003 OR

CHEM 1008 AND

CHEM 1005

Equivalent Subjects: LGYB 6359 - Chemistry 2 LGYB 9672 - Physical Chemistry 2 CHEM 2011 - Physical Chemistry 2 LGYA 6135 - Bimolecular Dynamics**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/chem2010/>)**CHEM 3001 Advanced Analytical Chemistry (10 Credit Points)****Legacy Code:** 300925

This unit builds on Analytical Chemistry 2 and focuses more on instrumental analysis, isolation and cleanup techniques and aspects of quality control and quality assurance in an analytical laboratory and in manufacturing are discussed. The instrumental methods covered include atomic spectroscopy (for example, atomic absorption and emission, x-ray fluorescence), molecular spectroscopy (for example, UV-Vis, IR, fluorometry, mass spectrometry), chromatography, electrochemistry, thermal methods and automated methods. The theory of the instrumental methods, their construction, operation and applications are covered. The theory and application of isolation and cleanup techniques in inorganic and organic residue analysis are given.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** CHEM 2001**Equivalent Subjects:** CHEM 3006 - Analytical Chemistry 3 CHEM 3002 - Advanced Chemical Analysis**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/chem3001/>)**CHEM 3003 Advanced Inorganic Chemistry (10 Credit Points)****Legacy Code:** 300907

Building on the foundations laid in Inorganic Chemistry, this unit focuses on structure and bonding in inorganic chemistry, and the stereochemistry of coordination complexes. Spectroscopic and magnetic properties of inorganic compounds are evaluated as a consequence of structure and bonding, and an introduction to X-ray methods for structure determination is given. Kinetics and mechanism of inorganic reactions are examined, and the area of bioinorganic chemistry is developed. Unique structures and reactions of organotransition metal chemistry are explored. Advanced Modules cover aqueous chemistry of cations and oxyanions, inorganic materials, molecular orbital theory in coordination complexes, group theory; lanthanides and actinides.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** CHEM 2004 OR

CHEM 2007 OR

CHEM 2006

Equivalent Subjects: LGYB 9729 - Inorganic Chemistry 3 CHEM 3011 - Inorganic Chemistry 3 LGYA 6134 - Advanced Inorganic Chemistry**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/chem3003/>)**CHEM 3004 Advanced Organic Chemistry (10 Credit Points)****Legacy Code:** 300906

This unit builds on the reactions learnt in the unit Organic Chemistry, extending the range of C-C bond forming reactions to include the most significant in modern synthesis. In the second stage students learn to develop multistep synthetic strategies to produce target molecules using their level 2 organic chemistry and the reactions above. Structural analysis by mass spectroscopy and more advanced NMR techniques is also investigated. The students use this chemistry in a lab course designed to highlight a number of these concepts (including the synthesis of 2 pharmaceutical compounds and a team experiment) and to extend their range of practical skills.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** CHEM 2008**Equivalent Subjects:** LGYA 6141 - Drug Design and Synthesis CHEM 3013 - Organic Chemistry 3**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/chem3004/>)**CHEM 3005 Advanced Physical Chemistry (10 Credit Points)****Legacy Code:** 300926

Advanced Physical Chemistry builds on the fundamental principals of energy changes in systems (thermodynamics), and the rates and mechanisms of reactions (kinetics) learnt in Physical Chemistry and extends this so that students gain an understanding of polymer and surface chemistries. This unit also will strengthen student's problem solving skills in quantitative chemical analysis, develop experimental techniques and advanced data-analysis skills.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** CHEM 2010**Equivalent Subjects:** CHEM 3015 - Physical Chemistry 3**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/chem3005/>)

CHEM 3008 Biodevices (10 Credit Points)**Legacy Code:** 300890

This unit replaces 300414 - Biodevices from Autumn 2014. The unit will investigate nature's nanomachines; lipids, DNA and proteins. The students will learn how only a few basic building blocks can self-assemble into more complex structures, which in turn self-assemble into more complex hierarchical structures from which one can build biodevices. These fascinating self-organising supramolecular structures generally involve some kind of non-covalent binding. Particular emphasis is placed on the underlying principles that govern the functioning of such machines and some coverage of the modelling of such processes using techniques such as statistical thermodynamics is given. Biological computing is also covered.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYA 6025 - Biodevices**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/chem3008/>)**CHEM 3010 Forensic Chemistry (10 Credit Points)****Legacy Code:** 300868

This unit extends the student's knowledge and understanding of chemical topics that are relevant to forensic investigations, and provides a deeper understanding of the underlying chemical and physical principles. Topics are taught in the context of the correct principles and procedures for collecting and conserving evidence, and the safe handling of chemical substances. Topics include an extended range of modern chemical instrumentation; the chemistry and analysis of various classes of drugs; clandestine drug laboratories; fire, arson and accelerants; explosions and explosives; and various forms of trace evidence (including textile fibres, glass and paint).

Level: Undergraduate Level 3 subject**Pre-requisite(s):** NATS 2019 OR
CHEM 2001**Equivalent Subjects:** CHEM 3009 - Forensic Chemistry**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/chem3010/>)**CHEM 3012 Nanochemistry (10 Credit Points)****Legacy Code:** 300895

The unit covers basic theory of surface chemistry, latest technologies of surface depositions and industrial and commercial applications of nanomaterials and nanopowders. Upon successful completion, the students will achieve an in-depth understanding of techniques of preparation of nanomaterials and nanopowders that includes plasma arching, chemical vapour deposition, electrodeposition, sol-gel synthesis, ball milling and the use of natural particles. Technical aspects of process control on the microstructure and properties of coatings will be discussed. Case studies of applications of nanopowders and nanomaterials such as biomedical implants, insulators, high power magnets, molecular sieves, supercomputers, jet engines and other industrial applications will be pursued.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** CHEM 1003**Equivalent Subjects:** LGYA 6162 - Nanochemistry LGYA 6030 -
Nanopowders and Nanomaterials**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/chem3012/>)**CHEM 3014 Pharmacological Chemistry (10 Credit Points)****Legacy Code:** 300920

This unit is aimed at undergraduates with grounding in chemistry and biochemistry who have an interest in a career related to medicinal chemistry. Because it concerns the manner in which foreign molecules can interact with the body's mechanisms it is of direct relevance not only to the pharmaceutical industry but also to the food, agricultural, cosmetic (etc) industries. It conveys the fascination of designing chemical structures for particular uses within biological systems and which overlap the disciplines of chemistry, biochemistry, cell biology and pharmacology. Emphasis is placed upon design of the chemical structure itself rather than an investigation of the specific chemical structure of its site of action in the body. This is reflected in the laboratory work which traces the historical development of drug design, essentially through a process of a series of inorganic syntheses, relevant to a range of common drugs.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYA 5935 - Pharmacological Chemistry**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/chem3014/>)**CHEM 9001 HDR Thesis - Functional Genomics (20 Credit Points)****Legacy Code:** 800144**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/chem9001/>)**CHEM 9002 HDR Thesis - Nanotechnology (20 Credit Points)****Legacy Code:** 800142**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/chem9002/>)**CHEM 9003 Higher Degree Research Thesis - Chemical Sciences (20 Credit Points)****Legacy Code:** 800075**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/chem9003/>)**CHEM 9004 Higher Degree Research Thesis - Chemistry (20 Credit Points)****Legacy Code:** 800132**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/chem9004/>)**CHEM 9005 Higher Degree Research Thesis - Forensics (20 Credit Points)****Legacy Code:** 800158**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/chem9005/>)

Civil Engineering (CIVL)

CIVL 1001 Surveying for Engineers (10 Credit Points)

Legacy Code: 300738

This is a core unit which provides students with basic skills that are required to carry-out Surveying. After the completion of this unit, students will be able to carry-out required preliminary surveying for most of the civil and construction engineering projects. This unit will also serve as a foundation for most of the units that follow in the course.

Level: Undergraduate Level 1 subject

Pre-requisite(s): MATH 1016

Equivalent Subjects: CIVL 1002 - Surveying for Engineering CIVL 1003 - Surveying for Engineers (WSTC AssocD)

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/civl1001/>)

CIVL 1003 Surveying for Engineers (WSTC AssocD) (10 Credit Points)

Legacy Code: 700120

This unit provides students with basic skills that are required to carry out surveying. After the completion of this unit, students will be able to carry out required preliminary surveying for most of the civil and construction engineering projects. Offerings of alternate units are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate unit.

Level: Undergraduate Level 1 subject

Equivalent Subjects: CIVL 1001 - Surveying for Engineers

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/civl1003/>)

CIVL 2002 Environmental Engineering (10 Credit Points)

Legacy Code: 300737

This unit teaches the fundamental theory and methods required for a civil engineer to solve environmental issues they would face in their professional life.

Level: Undergraduate Level 2 subject

Equivalent Subjects: CIVL 4006 - Environmental Engineering

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/civl2002/>)

CIVL 2003 Fluid Mechanics (10 Credit Points)

Legacy Code: 300762

This unit provides a basic understanding of fluid mechanics principles. Fluid mechanics is the study of the properties and movements of fluids, and key to understanding many of our engineering systems involving fluids, such as power generation, lubrication, irrigation and navigation. While the main focus is on incompressible fluids, effects of compressible fluids are also discussed. The theories learned in classes are reinforced in laboratory sessions. Students analyse fluid systems and apply principles in designing basic pipes and open-channels.

Level: Undergraduate Level 2 subject

Pre-requisite(s): MATH 1016 AND

ENGR 1011 OR

ENGR 1028

Equivalent Subjects: CIVL 2015 - Water Engineering CIVL 2004 - Fluid Mechanics (WSTC Assoc Deg)

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/civl2003/>)

CIVL 2004 Fluid Mechanics (WSTC AssocD) (10 Credit Points)

Legacy Code: 700111

The unit provides a basic understanding of fluid mechanics principles. While the main focus will remain on incompressible fluids, effects of compressible fluids will also be discussed. The theories learned in classes will be reinforced in laboratory sessions. Offerings of alternate units are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate unit.

Level: Undergraduate Level 2 subject

Pre-requisite(s): MATH 1017 AND

ENGR 1012

Equivalent Subjects: CIVL 2003 - Fluid Mechanics

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/civl2004/>)

CIVL 2007 Introduction to Structural Engineering (10 Credit Points)

Legacy Code: 300733

This unit covers the basic concepts in analysing and designing simple structural members. It consists of the fundamentals of structural analysis, concrete structures and steel structures

Level: Undergraduate Level 2 subject

Pre-requisite(s): MECH 2003

Equivalent Subjects: CIVL 2006 - Introduction to Structural Engineering

CIVL 2008 - Introduction to Structural Engineering (WSTC Assoc Deg)

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/civl2007/>)

CIVL 2008 Introduction to Structural Engineering (WSTC AssocD) (10 Credit Points)

Legacy Code: 700115

This unit covers the basic concepts in analysing and designing simple structural members. It consists of the fundamentals of structural analysis, concrete structures and steel structures. Offerings of alternate units are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate unit.

Level: Undergraduate Level 2 subject

Pre-requisite(s): MECH 2004

Equivalent Subjects: CIVL 2007 - Introduction to Structural Engineering

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/civl2008/>)

CIVL 2012 Soil Mechanics (10 Credit Points)

Legacy Code: 300985

This is an introductory unit covering the use of soil, and the water in it, as an engineering material. It will provide students with a basic understanding of the physical and mechanical properties of soils, simple soil testing methods to characterise soil strength and deformation behaviour, and how to apply basic techniques to assess the hydro-mechanical response of soils subjected to loading.

Level: Undergraduate Level 2 subject

Pre-requisite(s): MATH 1016

Equivalent Subjects: CIVL 2011 - Soil Engineering CIVL 2013 - Soil Mechanics (WSTC AssocD)

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/civl2012/>)

CIVL 2013 Soil Mechanics (WSTC AssocD) (10 Credit Points)**Legacy Code:** 700245

This unit is an introductory unit covering the use of soil, and the water in it, as an engineering material. It will provide students with a basic understanding of the physical and mechanical properties of soils, simple soil testing methods to characterise soil strength and deformation behaviour and how to apply basic techniques to assess the hydro-mechanical response of soils subjected to loading. Offerings of alternate units are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate unit.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** MATH 1017**Equivalent Subjects:** CIVL 2011 - Soil Engineering CIVL 2012 - Soil Mechanics**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl2013/>)**CIVL 2016 Civil and Substructure (10 Credit Points)****Legacy Code:** 301220

This unit provides an overview of civil construction and associated sub-structure works comprising footings, pilings and slabs and the high costs associated with these elements. Through site surveys, site assessments and design proposals students will apply their developing understanding of bulk excavation, site drainage, service mains (electricity, gas, water, sewerage, data), roads and retaining walls to real world examples. Students will also examine public infrastructure such as ports, tunnels, bridges and highways to deepen their knowledge base. Additionally, in order to further understand the high costs involved in sub structure works, students will learn to identify problems faced on sites including rock, chemically-aggressive soils and water-logged sites.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** BLDG 1001 OR

BLDG 1015 AND

BLDG 1005 OR

BLDG 1014

Equivalent Subjects: CIVL 2001 Construction Technology 1 (Civil)

BLDG 2007 Construction Technology 2 (Sub-structure)

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl2016/>)**CIVL 2017 Sustainable Construction Materials (10 Credit Points)**

This unit focusses on the suitability for purpose (performance, durability, sustainability and standards and regulatory compliance) of building and construction materials. Students investigate the physical properties and behaviour of various timbers, metals, concretes, polymers, new materials and composite systems, and their durability within Australia's diverse environments. Students also consider sustainable and eco-friendly construction materials in life-cycle assessment of construction systems and materials selection at the design stage.

Level: Undergraduate Level 2 subject**Incompatible Subjects:** CIVL 2009 - Material Science in Construction**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl2017/>)**CIVL 2018 Water Supply Systems Design (10 Credit Points)****Level:** Undergraduate Level 2 subject**Pre-requisite(s):** CIVL 2002 OR

ENGR 1050 AND

CIVL 2003

Co-requisite(s): CIVL 3011**Equivalent Subjects:** CIVL 4014 Water and Wastewater Treatment**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl2018/>)**CIVL 3002 Concrete Structures (UG) (10 Credit Points)****Legacy Code:** 300736

This unit covers the basic elements of structural behaviour and design with reinforced and pre-stressed concrete. Students will learn to analyse the section capacity of reinforced concrete beams, slabs, and columns, and design simple suspended structures. The unit places a strong emphasis on the process of structural design.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** CIVL 2007**Co-requisite(s):** CIVL 3014**Equivalent Subjects:** CIVL 3001 - Concrete Structures (UG)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl3002/>)**CIVL 3003 Construction Planning (10 Credit Points)****Legacy Code:** 300728

This unit is intended to provide students with the ability to organise the resources required for a major construction project; to plan the sequence and timing of construction operations; and to assess the risk inherent in achieving a construction schedule.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BLDG 1005 OR

GEOM 2001 OR

BLDG 2002

Equivalent Subjects: BLDG 3005 - Construction Planning**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl3003/>)**CIVL 3004 Construction Technology 3 (Concrete Construction) (10 Credit Points)****Legacy Code:** 200502

The aim of this unit is to introduce students to the concept of structures, loads and the effect of loads on structures in relation to concrete construction. Students will have an in-depth understanding of concrete as a construction material. It covers the construction technology aspects of concrete structural components and systems, including beams, columns, slabs and frames. Emphasis will be given to formwork design and construction. Students will be introduced to the relevant Australian Standards for concrete construction. The unit also aims at developing students' ability to deal professionally with other building professionals, including architects and structural engineers.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl3004/>)

CIVL 3005 Construction Technology 4 (Steel Construction) (10 Credit Points)**Legacy Code:** 200470

This unit deals with the construction of structural steelwork. Students will gain a better understanding of mechanical properties of steel. It covers various components in structural steelwork, and their behaviour under loads. Students will also be introduced to various frame systems in multi-story and high-rise construction and relevant Australian Standards for steel construction. Emphasis will be given to safe erection and assembly of structural steelwork. Due consideration will be given to the requirements of Workcover in relation to site safety and material handling. An introduction will also be given for Steel-concrete composite construction.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl3005/>)**CIVL 3007 Engineering Geomechanics (10 Credit Points)****Legacy Code:** 301001

This unit will present the application of principles of soil mechanics to the solution of foundation and geotechnical problems including the evaluation of allowable bearing capacity of shallow and pile foundations, the stability of earth retaining structures and the stability of slopes.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** CIVL 3014 AND

CIVL 2012 OR

CIVL 2011

Equivalent Subjects: CIVL 3008 - Foundation Engineering**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl3007/>)**CIVL 3010 Highway Infrastructure (10 Credit Points)****Legacy Code:** 300988

This unit focuses on two key aspects of highway infrastructure design, namely, the bridge superstructure design and the foundation soil preparation prior to construction of the highway pavement. It aims to provide students with specialised knowledge in bridge loading and structural design, methods to deal with soft and weak grounds, and building of earth embankments to support the highway pavement. These aspects will be discussed in relation to Australian design codes.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** CIVL 2007 AND

CIVL 2012

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl3010/>)**CIVL 3011 Hydraulics (10 Credit Points)****Legacy Code:** 300765

The unit covers the principles of open channel hydraulics, pipe hydraulics and culvert hydraulics. Specific topics in open channel hydraulics include uniform flow, resistance equations, specific energy principle, flow types, gradually varied flow and rapidly varied flow. The purpose is to enable design of efficient open channels to meet engineering requirements. In addition, principles of pipe and culvert hydraulics are introduced, enabling analysis and design of pipe networks and culverts.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** CIVL 2003**Equivalent Subjects:** CIVL 2015 - Water Engineering CIVL 2014 - Water Engineering**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl3011/>)**CIVL 3012 Steel Structures (10 Credit Points)****Legacy Code:** 300730

This unit covers the basic behaviour of steel members and structures, the appropriate methods to analyse them and the design criteria and methods used to proportion them.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** CIVL 2007**Co-requisite(s):** CIVL 3014**Equivalent Subjects:** CIVL 3013 - Steel Structures**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl3012/>)**CIVL 3014 Structural Analysis (10 Credit Points)****Legacy Code:** 300732

This unit introduces students to the aspects of structural analysis of trusses, beams and frames. It covers the first-order elastic analysis of statically determinate and indeterminate structures. This course aims to teach students to master basic skills in structural analysis as well as skills in using computer software to analyse complex structures.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** CIVL 2007**Equivalent Subjects:** CIVL 3015 - Structural Analysis**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl3014/>)**CIVL 3016 Building Superstructure (10 Credit Points)****Legacy Code:** 301221

The aim of this unit is to provide students with an understanding of the factors that contribute to the design and construction of a building superstructure. Students will be introduced to relevant Australian Standards for common construction materials and practices. The unit also aims to develop the ability of construction students to communicate professionally with other building professionals including structural engineers. Emphasis will be given to the strength, behaviour and failure of structural members, connections and frames.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** CIVL 3004 Construction Technology 3 (Concrete Construction)

CIVL 3005 Construction Technology 4 (Steel Construction)

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl3016/>)

CIVL 3017 Construction Scheduling (10 Credit Points)**Legacy Code:** 301230

This unit is intended to provide students with the skills and ability to organise the resources required for a major construction project, to plan the sequence and timing of construction operations, and to assess the risk inherent in achieving a construction schedule.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BLDG 1005 OR

BLDG 1014 OR

GEOM 2001 OR

BLDG 2002

Equivalent Subjects: BLDG 3005 Construction Planning

CIVL 3003 Construction Planning

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl3017/>)**CIVL 3018 Hydrogeology (10 Credit Points)**

This unit covers principles of hydrogeology. It contains concepts related to occurrence of groundwater, groundwater movement, groundwater hydraulics, water wells, quality of groundwater, groundwater modelling and groundwater management. The objectives of this unit are to enable students to learn the concept of groundwater and apply the learnt concepts in solving groundwater problems in engineering practice.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** CIVL 2003**Equivalent Subjects:** EART 3004 - Hydrogeology**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl3018/>)**CIVL 3019 Wastewater Systems Design (10 Credit Points)**

Providing clean water and sanitation is one of the United Nations Sustainable Development Goals. Students will gain knowledge and skills in designing and proposing modifications to current wastewater and sanitation practices. Students will examine conventional processes and explore how they should be modified to address emerging issues (contaminants, climate variability) and how the potential of wastewater as a resource can be realised. Students will also identify various ways smart technologies can be adopted in addressing the challenges facing wastewater disposal/resource recovery.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** CIVL 2003 AND

CIVL 2002 OR

ENGR 1050 OR

PROC 1006

Equivalent Subjects: CIVL 4014 - Water and Wastewater Treatment**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl3019/>)**CIVL 3020 Sustainable Waste Engineering (10 Credit Points)**

Sustainable waste management is an important consideration for any student who is training to become an engineer, as waste is produced in all engineering fields. In this unit students will identify and characterise sources of solid and hazardous waste generated in the community. The application of circular economy and zero waste principles are examined alongside real-world case studies to focus on sustainable management of waste incorporating minimisation, recycle, recovery and disposable options.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** CIVL 4011 Waste Management**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl3020/>)**CIVL 4001 Applied Mechanics (10 Credit Points)****Legacy Code:** 300986

Applied mechanics deals with the mechanical responses of structural components under various loading and support conditions. This unit will introduce the theoretical foundations and solution methods for the stability and dynamic responses of beams, columns and plates and their associated applications in engineering practices.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** CIVL 3014**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl4001/>)**CIVL 4002 Composite Structures (10 Credit Points)****Legacy Code:** 300987

This unit builds on knowledge gained in steel and concrete structures, especially the design of structural members using either steel or concrete. Students will learn the design of composite beams, floors, columns and connections based on Australian and International standards as well as mechanics of materials.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** CIVL 3012 AND

CIVL 3002

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl4002/>)**CIVL 4003 Construction Technology 5 (Envelope) (10 Credit Points)****Legacy Code:** 200471

After undertaking this unit, you should understand the way internal spaces are designed and constructed to optimise thermal, visual and acoustic comfort and for energy efficiency.

Level: Undergraduate Level 4 subject**Co-requisite(s):** Students in 2607 Bachelor of Construction

Management must enrol in BLDG 4012 Industry Based Learning before enrolling in this unit

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl4003/>)

CIVL 4004 Construction Technology 6 (Services) (10 Credit Points)**Legacy Code:** 300725

To provide students with a vehicle to develop knowledge and skills needed to comprehend the design of services in major buildings, and in so doing engender a life-long interpretation of the intricacies of physical installation and their critical sequence in the construction process.

Level: Undergraduate Level 4 subject**Equivalent Subjects:** LGYB 5400 Construction Technology 6 (Services)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl4004/>)**CIVL 4005 Construction in Practice 3 (10 Credit Points)****Legacy Code:** 200484

This unit enables students to integrate and develop knowledge gained earlier in the course allowing them to simulate industry practice.

Students are given a brief to undertake large and complex construction projects (eg. high rise buildings, airport construction, or sports stadium construction). They then take account of regulatory control, financial limitations, and stakeholder impacts whilst managing a team and being flexible and responsive to changing demands.

Level: Undergraduate Level 4 subject**Co-requisite(s):** Students in 2607 Bachelor of Construction

Management must enrol in BLDG 4012 Industry Based Learning before enrolling in this unit

Equivalent Subjects: LGYB 5402 - Building in Practice 3**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl4005/>)**CIVL 4008 Pile Foundations (10 Credit Points)****Legacy Code:** 300990

This unit covers analysis and design criteria for pile foundations subjected to axial, lateral and dynamic loading based on the Australian Standards. Computer software necessary to carry out analysis and design will be introduced. Also field testing methods available for pile integrity testing will be discussed.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** CIVL 3007 OR

CIVL 3008

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl4008/>)**CIVL 4009 Timber Structures (UG) (10 Credit Points)****Legacy Code:** 300739

Students learn about the engineering properties of timber and assess it as a construction material. Design methods based on structural mechanics are covered including the design of members and connections.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** CIVL 2007**Co-requisite(s):** CIVL 3014**Equivalent Subjects:** LGYB 1031 - Timber Structures (UG)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl4009/>)**CIVL 4010 Transportation Engineering (10 Credit Points)****Legacy Code:** 300982

This unit provides students with the course material that will assist them with the execution of Civil Engineering Construction and Urban Development / Town Planning projects. The unit mainly focuses on the planning, design and construction of transportation facilities for urban and rural areas. Students will have an opportunity to implement the skills learnt using a case of a subdivision development.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** CIVL 1001 AND

ENGR 2016 AND

EART 4001

Incompatible Subjects: CIVL 2005 - Infrastructure Engineering**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl4010/>)**CIVL 4011 Waste Management (10 Credit Points)****Legacy Code:** 300994

Sustainable waste management, to reduce climate impact, is an important consideration for any student who is getting trained as an engineer. In this unit students will identify and characterise sources of atmospheric, solid and hazardous waste generated from the community. Students will then focus on sustainable management of waste incorporating minimisation, recycle, recovery and disposable options as well as greenhouse gases and their impact on climate change.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** CIVL 2002**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl4011/>)**CIVL 4012 Water Resource Engineering (10 Credit Points)****Legacy Code:** 300993

This unit introduces optimisation theories applicable to water resources projects. The unit applies different optimisation models to select the best option available. Engineering economic theories specifically applicable to water resources projects are also discussed.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** CIVL 3011**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl4012/>)**CIVL 4015 Complex Building Project (10 Credit Points)****Legacy Code:** 301232

This unit enables students to integrate and develop knowledge gained earlier in the course allowing them to simulate industry practice. Students are given a brief to undertake large and complex construction projects (eg. high rise buildings, airport construction, or sports stadium construction). They then take account of regulatory control, financial limitations, and stakeholder impacts whilst managing a team and being flexible and responsive to changing demands.

Level: Undergraduate Level 4 subject**Co-requisite(s):** BLDG 4012**Equivalent Subjects:** LGYB 5402 Building in Practice 3

CIVL 4005 Construction in Practice 3

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl4015/>)

CIVL 4016 Envelope and Services (10 Credit Points)**Legacy Code:** 301222

The building envelope and its inter-relationship with building services are critical to the successful functioning of our modern built environment. In this unit students will learn how to minimise operational energy requirements by making good choices in terms of materials and systems which focus on end-user needs. Measurement of building performance and continuous improvement is addressed alongside compliance with building codes and relevant Australian standards.

Level: Undergraduate Level 4 subject**Equivalent Subjects:** CIVL 4003 Construction Technology 5 (Envelope)
CIVL 4004 Construction Technology 6 (Services)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl4016/>)**CIVL 4017 Surface Water Hydrology (10 Credit Points)**

Surface water hydrology covers the principles of hydrology as it pertains to surface water component of the hydrologic cycle. The principal focus is on the relationship between rainfall and surface runoff. The extent of flooding resulting from storm events will be evaluated through floodplain delineation process. Successful completion of this unit provides the competencies required to propose sustainable engineering solutions to potential adverse impacts of land-use changes. This unit builds on the hydraulic concepts acquired from the units completed earlier.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** CIVL 3011**Equivalent Subjects:** CIVL 4007 - Hydrology EART 4001 - Surface Water Hydrology**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl4017/>)**CIVL 4018 Building Design Project 1 (Honours) (20 Credit Points)**

In this unit, students who have a record of superior performance in the Building Design Management program, will source a suitable design project at their own initiative, to complete as a capstone work which illustrates the skills they have developed throughout their study program. The project will contain a high level of complexity exceeding that of previous building designs produced in the program. Both the complexity level and the number of design constraints will distinguish the project undertaken for this unit from the non-honours stream unit. Diverse stakeholder input on the project's impact will be gathered and assessed. The design solution generated will show mastery of complex design problems which integrate technical knowledge with economic and social responsibility. Superior skill in resolving design conflicts will be demonstrated.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** BLDG 3001**Incompatible Subjects:** BLDG 4001 Building Design Project 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl4018/>)**CIVL 4019 Building Design Project 2 (Honours) (20 Credit Points)**

In this unit, students who have a record of superior performance in the program will continue to develop the design solution they created in Building Design Project 1 (Honours) into a fully resolved CAD model suitable for costing, scheduling and contracting. Construction Certificate documentation of professional standard will be generated. Both the complexity level and the number of design constraints will distinguish the project undertaken for this unit from the non-honours stream unit. Diverse stakeholder input on the projects impact will be gathered and assessed. Complex constraints relating to buildability and efficient project delivery will be resolved. Strict budgetary constraints will be imposed and students will be expected to demonstrate a capacity to use lateral thinking and generate creative solutions in response to problematic situations which arise during project delivery but which were unknown at project commencement.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** CIVL 4018**Incompatible Subjects:** BLDG 4002 Building Design Project 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl4019/>)**CIVL 4020 Construction Research Project (20 Credit Points)**

In this unit students will undertake practical research into identified technical, managerial or economic problems in the construction industry. Groups of up to four students will collectively undertake these industry based research projects and produce an individual final report plus another tangible outcome as agreed at the project proposal stage. A wide range of indicative practical projects will be available to assist and direct the research effort.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** BLDG 4010**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl4020/>)**CIVL 7001 Advanced Applied Mechanics (10 Credit Points)****Legacy Code:** 301010

Applied mechanics deals with the mechanical responses of structural components under various loading and support conditions. This unit will introduce the theory of elasticity and study the bending, buckling and vibration behaviours of beams, plates and shells and their associated applications in engineering practices.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl7001/>)**CIVL 7002 Advanced Composite Structures (10 Credit Points)****Legacy Code:** 301008

This unit enables students to gain an in-depth knowledge into composite structures based on Australian Standards and International Standards. Recent advances in the design of composite beams, slabs, columns and connections will be introduced.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl7002/>)

CIVL 7003 Advanced Geotechnical Engineering (10 Credit Points)**Legacy Code:** 300604

This unit will provide an overview of soil mechanics concepts required for the solution of practical geotechnical engineering problems. Students will be taught soil and foundation analysis including design techniques. The topics will cover shallow foundations, pile foundations, the stability of earth retaining structures, excavations, soft soils, groundwater flow and stability of slopes. Practical engineering cases will be emphasized.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 6113 - Foundation Engineering (PG)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl7003/>)**CIVL 7004 Advanced Highway Infrastructure (10 Credit Points)****Legacy Code:** 301011

This unit teaches pavement design and ground engineering design as part of construction of the highway. The aim is to provide students with advanced knowledge in designing pavement structures and ground improvement techniques to deal with soft and weak grounds for construction of highway and highway embankments. These aspects will be taught in relation to Australian practices.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl7004/>)**CIVL 7005 Advanced Numerical Methods in Engineering (10 Credit Points)****Legacy Code:** 301024

The finite element method is an essential tool for the analysis and design of machine parts and civil engineering structures. The objective of this unit is to introduce the principles of finite element method and the applications of one, two and three dimensional elements in solving various engineering problems.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl7005/>)**CIVL 7006 Advanced Structural Analysis (10 Credit Points)****Legacy Code:** 300594

This unit will introduce students at postgraduate level to structural analysis of trusses, beams, frames and plates. It covers the slope deflection method and matrix method for analysis of beams, trusses and frames, and the bending and buckling analysis of beams and plates under various loading conditions. The theories learned in classes will be reinforced in practical sessions by using computer software packages.

Level: Postgraduate Coursework Level 7 subject**Incompatible Subjects:** LGYA 5845 - Linear and Nonlinear Analysis of Structures LGYA 5976 - Advanced Structural Engineering LGYA 5837 - Numerical and Finite Element Methods**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl7006/>)**CIVL 7007 Advanced Timber Structures (10 Credit Points)****Legacy Code:** 301009

This unit enables students to gain an in-depth knowledge into timber structures based on Australian Standards. Design of timber beams, floors, columns and connections will be introduced with a focus on the use of plywood, round timbers, glue-laminated timber and structural laminated veneer lumber.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl7007/>)**CIVL 7008 Advanced Waste Management (10 Credit Points)****Legacy Code:** 301017

This unit covers sources, identification and characterisation of solid and hazardous waste generated from the community. Sustainable management of waste incorporating minimisation, recycle, recovery and disposable options is discussed. Also, atmospheric pollutants and their control, greenhouse gases and their impact on climate change are examined.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl7008/>)**CIVL 7009 Advanced Water Engineering (10 Credit Points)****Legacy Code:** 300595

This unit introduces advanced principles of engineering hydrology as it pertains to the surface water component of the hydrologic cycle. Students are exposed to floodplain analysis techniques. The focus is on practical engineering solutions to issues originating from catchment development. Students are exposed to commonly used hydraulic and hydrologic software packages to delineate flooded areas resulting from such developments.

Level: Postgraduate Coursework Level 7 subject**Incompatible Subjects:** CIVL 4007 Hydrology EART 4001 Surface Water Hydrology**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl7009/>)**CIVL 7011 Building Engineering (10 Credit Points)****Legacy Code:** 300713

The aim of this unit is to provide students with an understanding of the factors that contribute to decisions in building design in respect of compliance with building regulations and standards. Topics include soil classification for construction, footing systems, loadings and their evaluation, structural materials and systems, structural behaviour and strength, and failure and rectification.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYB 8310 - Building Engineering**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl7011/>)

CIVL 7012 Building Fire Services (10 Credit Points)**Legacy Code:** 300711

This unit describes the various types and application of building services and fire safety systems. It introduces appropriate standards for building fire service system design and the methods of applying recommendations of fire engineering assessments with respect to building services and fire safety systems.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYC 0661 - Building Fire Services**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl7012/>)**CIVL 7013 Deep Foundations (10 Credit Points)****Legacy Code:** 301015

This unit covers advanced analysis and design criteria for deep foundations. Both statically and dynamically loaded deep foundations are covered including the site investigation methods and field testing methods adopted in practice for determining integrity and load carrying capacity. Appropriate computer software will be introduced to carry out the deep foundation design according to the Australian Standards.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl7013/>)**CIVL 7014 Sustainable Systems (10 Credit Points)****Legacy Code:** 301003

This unit teaches students the essential tools available to achieve environmental sustainability in various engineering/construction/industrial design professional settings. The focus of the unit is on the application of the tools and exploration of Australian regulatory and sustainable development practices.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl7014/>)**CIVL 7015 Water Resources Systems Analysis (10 Credit Points)****Legacy Code:** 301012

Water resources projects are large infrastructure projects requiring huge capital expenditure. In addition, multiple options are usually available to meet the project goals but at different costs and under varying constraints. This unit presents the application of optimisation techniques to select the best project from a list of competing projects. Applications of these techniques to optimally allocate available water resources are discussed. These are presented within the context of maximising the return of investment.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl7015/>)**CIVL 7017 Wastewater Treatment and Recycling (10 Credit Points)****Legacy Code:** 301278**Level:** Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl7017/>)**CIVL 7018 Water Treatment and Distribution (10 Credit Points)****Legacy Code:** 301279**Level:** Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl7018/>)**CIVL 9001 Higher Degree Research Thesis - Engineering (Civil) (20 Credit Points)****Legacy Code:** 800059**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/civl9001/>)

Communication and Media (COMM)

COMM 0001 Academic Literacy (WSTC) (10 Credit Points)**Legacy Code:** 900095**Level:** Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm0001/>)**COMM 0002 Academic Skills for Communication (WSTC Prep) (10 Credit Points)****Legacy Code:** 700218

This unit introduces students to the essential academic skills required for success in tertiary studies. It employs an explicit pedagogy approach to teach students how to become independent, active, and reflective learners. The unit also includes essential research and writing skills specific to the Communication Arts.

Level: Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm0002/>)**COMM 0003 Academic Skills for Design (WSTC Prep) (10 Credit Points)****Legacy Code:** 700221

This unit introduces students to the essential academic skills required for success in tertiary studies. It employs an explicit pedagogy approach to teach students how to become independent, active, and reflective learners. The unit also includes essential research and writing skills specific to the Diploma in Design.

Level: Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm0003/>)

COMM 0004 Communication and Media (WSTC Prep) (10 Credit Points)**Legacy Code:** 700260

Communication and Media introduces students to key terminology, concepts and debates in the fields of Communication and Media Studies. The unit looks at the role of communication in a variety of private, professional and public contexts, developing students' ability to identify, evaluate and adopt effective communication practices. Students will also be introduced to the basic critical vocabulary and tools necessary to analyse media discourse and advertising.

Level: Undergraduate Level 0 Preparatory subject**Equivalent Subjects:** COMM 0005 - Communication and Media (UWSC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm0004/>)**COMM 0005 Communication and Media (WSTC) (10 Credit Points)****Legacy Code:** 900026

The globalisation or interdependence caused by changes in economies and communications along with the influence of new forms of communication and mass media has led to the introduction of media and communications courses in secondary and tertiary education programs. This unit is one which will not only attempt to structure student interest in general communication principles, media, and information technology but also enhance their vocational, interpersonal and academic potential. It is designed to be an introduction to media and communication studies at university.

Level: Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm0005/>)**COMM 0008 Developing Academic Language and Literacy (10 Credit Points)****Legacy Code:** 900209**Level:** Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm0008/>)**COMM 0009 Grammar Workshop (WSTC) (10 Credit Points)****Legacy Code:** 900116**Level:** Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm0009/>)**COMM 0010 Successful University Writing (10 Credit Points)****Legacy Code:** 900210**Level:** Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm0010/>)**COMM 0011 Texts and Communication (WSTC Prep) (10 Credit Points)****Legacy Code:** 700192

This unit assists students to develop skills in reading and textual analysis. It introduces students to the basic principles of reader response theory and general strategies to improve reading resilience. Textual analysis skills are built through engagement with a diverse range of texts on a variety of themes, which are relevant both to the contemporary world and to later studies at both the Foundation and University level. By the end of this unit, students will be able to read, discuss, analyse and write about texts in ways appropriate to academic levels of study.

Level: Undergraduate Level 0 Preparatory subject**Equivalent Subjects:** COMM 0012 - Texts and Communication (UWSC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm0011/>)**COMM 0012 Texts and Communication (WSTC) (10 Credit Points)****Legacy Code:** 900092**Level:** Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm0012/>)**COMM 0013 Unistep Academic Literacy (10 Credit Points)****Legacy Code:** 900205**Level:** Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm0013/>)**COMM 0014 Graduate Research Literacy (WSTC) (10 Credit Points)****Legacy Code:** 900122**Level:** Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm0014/>)**COMM 0015 Communication Practices (WSTC Prep) (10 Credit Points)**

What does it mean to be a communication professional in the digital age? In this unit students will explore the various study and career options available to them in communication industries. They will engage with a range of skills and practices to boost their success in later units and to start thinking and working like a communication professional. Engaging in a case study of an Australian media professional and developing a professional profile of their own ensures that students can identify and develop their own strengths relevant to their communication journey.

Level: Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm0015/>)**COMM 1001 Advanced Standing for Communication 140 (0 Credit Points)****Legacy Code:** 102623**Level:** Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm1001/>)

COMM 1004 Approaches to Text (10 Credit Points)**Legacy Code:** 100641

Why do we read books? Reading literary texts is crucial to our ways of understanding the world and ourselves. In this unit students learn that reading resilience, close reading skills and the ability to identify specific literary techniques are foundational to studying literature. Students will read a range of Australian texts including fiction, poetry, short stories, drama and criticism. They will analyse how meanings in those texts are shaped by diverse cultural and international contexts. This unit builds reading capacity while engaging students in key debates about literature today: what it means, how it works, and why it matters.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** LGYB 0130 - Approaches to Text COMM 1005 - Approaches to Text (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm1004/>)**COMM 1007 Communication in Health (10 Credit Points)****Legacy Code:** 400732

Good communication within the health care setting is associated with improved health outcomes. This unit introduces students to foundation knowledge and skills required for effective communication with various stakeholders in varied and complex health situations. The unit is skills-based and uses case studies to create scenarios to which students learn to respond. There is a focus on the client interview and various questioning techniques designed to facilitate a therapeutic relationship as a means of developing rapport and trust. Strategies to promote communication within, between and across health professional disciplines, teams and government agencies is also explored. Written forms of documentation as well as communication skills required to communicate health information to clients, groups and the wider community are also presented. The unit uses a 'student capital' framework to facilitate reflection on current communication skills and those required for success at university and in future practice.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** LGYA 7034 - Communication for the Helping Professions COMM 1008 - Communication in Health (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm1007/>)**COMM 1008 Communication in Health (WSTC) (10 Credit Points)****Legacy Code:** 700062

Good communication within the health care setting is associated with improved health outcomes. This unit introduces students to foundation knowledge and skills required for effective communication with various stakeholders in varied and complex health situations. The unit is skills-based and uses case studies to create scenarios to which students learn to respond. There is a focus on the client interview and various questioning techniques designed to facilitate a therapeutic relationship as a means of developing rapport and trust. This is the second of two Level 1 foundation units in the Creative Writing Major. The unit focuses on developing students into writers by giving them the practical skills and theoretical knowledge needed to become published writers. Students will develop a body of original creative work while reflecting critically upon writing practice. The unit is built around participation in writing workshops, which emphasise improving your work via practical feedback from tutors and peers. Themes covered include writing the personal, writing about place, experimentation, specificity, originality, voice and starting a career in writing. No previous creative writing experience is necessary.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm1009/>)**COMM 1010 Creative Writing: The Imaginative Life (10 Credit Points)****Legacy Code:** 102436

How do we begin as creative writers? What is an imaginative life? This is the first of two Level 1 foundation units in the Creative Writing Major. Students will be oriented in the practice and knowledge of creative writing. They will learn techniques and strategies for becoming an effective creative writer, while studying writing as a mode of imaginative thinking and response. The unit involves face to face lectures and creative writing workshops overseen by experienced and widely-published writers, critics and publishers from the Writing and Society Research Centre and the School of HCA. No previous creative writing experience is necessary.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm1010/>)

COMM 1011 Data, Mediation and Power (WSTC) (10 Credit Points)**Legacy Code:** 700269

Data, Mediation and Power investigates the operation of power in contemporary digital media cultures and economy. The unit examines the primary role played by data in determining how we live in the world. This includes how we interact with the world, its people and digital artefacts, in terms of communication and meaning. The unit focuses on technologies of control and governance related to algorithmic architectures and data economies. Who benefits from data and mediation and what are the limits and possibilities of data? Ultimately, this kind of critical analysis invites us to think about what constitutes a just, democratic society and what constitutes an ethical media life.

Level: Undergraduate Level 1 subject**Co-requisite(s):** Students enrolled in the combined Diploma/Bachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year Two units**Equivalent Subjects:** COMM 1023 - Mediated Mobilities COMM 1012 - Data Mediation and Power**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm1011/>)**COMM 1012 Data, Mediation, Power (10 Credit Points)****Legacy Code:** 102421

Data, Mediation, Power investigates the operation of power in contemporary digital media cultures and economy. Level: Undergraduate Level 1 subject**Equivalent Subjects:** COMM 1023 - Mediated Mobilities COMM 1006 - Communication Research COMM 1024 - Mediated Mobilities (WSTC) COMM 1011 - Data Mediation and Power (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm1012/>)**COMM 1015 Foundations of Media Arts and Production (10 Credit Points)****Legacy Code:** 101927

In 2021, this unit replaced by unit 102825 - Introduction to Screen Media. This unit explores creative and independent media arts practices across moving image, audio and participatory forms, and introduces students to fundamental principles of sound and screen production. The unit maps theoretical and practical connections between the creation and study of images and sound across media formats through an integrated theory/practice programme focused on the processes through which media artefacts are created. Students learn how to analyse and critically evaluate screen media and also to plan and make simple short works of their own. It introduces students to relevant media arts histories and contexts (with a focus on cinema) in addition to a range of technologies, media practices and production techniques.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** LGYB 0161 - Image Sound Text COMM 1028 - Screen Media COMM 1039 - Introduction to Screen Media COMM 1016 - Foundations of Media Arts and Production (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm1015/>)**COMM 1018 Introduction to Journalism (10 Credit Points)****Legacy Code:** 100556

This unit introduces students to the fields of journalism and new media, covering the concepts of news values and news research for target audiences. It looks at the role of the journalist and the professional skills of news gathering and news writing. The subject also considers the legal and ethical obstacles and obligations faced by journalists operating in an environment of fast paced communication. The methodologies underlying professional practice as well as delivering news with speed for multimedia platforms are central to this unit.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** LGYB 0049 - Journalism News Reporting COMM 1019 - Introduction to Journalism (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm1018/>)**COMM 1019 Introduction to Journalism (WSTC) (10 Credit Points)****Legacy Code:** 700182

This unit introduces students to the fields of journalism and new media, covering the concepts of news values and news research for target audiences. It looks at the role of the journalist and the professional skills of news gathering and news writing. The unit also considers the legal and ethical obstacles and obligations faced by journalists operating in an environment of fast paced communication. The methodologies underlying professional practice as well as delivering news with speed for multimedia platforms are central to this unit.

Level: Undergraduate Level 1 subject**Co-requisite(s):** Students enrolled in the combined Diploma/Bachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year 2 units**Equivalent Subjects:** COMM 1018 - Introduction to Journalism**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm1019/>)

COMM 1020 Media Cultures and Industries (10 Credit Points)**Legacy Code:** 101926

This unit introduces students to the concept of media in terms of how it has changed, how it works and its impact on our lives and society. It builds the necessary foundation for further theoretical and practical study and understanding of the media in future years. Its approach brings practice-based research together with experiential learning and theoretical reflection. At the conclusion of this unit students will be able to demonstrate a fundamental critical understanding of the media. In addition, students will have developed their digital literacy through the creation of digital creative works.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** LGYB 0221 - Approaches to Communication COMM 1002 - Approaches to Communication COMM 1021 - Media Cultures and Industries (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm1020/>)**COMM 1021 Media Cultures and Industries (WSTC) (10 Credit Points)****Legacy Code:** 700180

This unit introduces students to key theories and approaches in communication (political economy, policy studies, medium theory, audience studies, game studies) in order to analyse the diversity and richness of media cultures. The unit situates media cultures within historical contexts that register the enormous impact communication technology has had in shaping culture and society. After examining the special properties of broadcast media (e.g. newspapers, radio, music) and the rise of the modern nation-state and consumer society, the unit attends to the massive transformation of society with the advent of digital media. Across the unit, policy issues will be addressed in order to demonstrate how policy holds substantial implications and effects with respect to media content, economies, and culture.

Level: Undergraduate Level 1 subject**Co-requisite(s):** Students enrolled in the combined Diploma/Bachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year Two units**Equivalent Subjects:** COMM 1020 - Media Cultures and Industries COMM 1002 - Approaches to Communication COMM 1003 - Approaches to Communication (UWSC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm1021/>)**COMM 1026 Principles of Professional Communication 1 (10 Credit Points)****Legacy Code:** 100483

The unit provides students with an introductory understanding of a range of communication theories and practices necessary for academic work and professional success.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** LGYB 0278 Written and Oral Presentation 2 LGYB 8920 Business Skills for Professionals LGYB 9625 Professional Skills for Science and Technology COMM 1027 Principles of Professional Communication 1 (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm1026/>)**COMM 1027 Principles of Professional Communication 1 (WSTC) (10 Credit Points)****Legacy Code:** 700040

This unit provides students with an introductory understanding of a range of communication theories and practices necessary for academic work and professional success.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** COMM 1026 - Principles of Professional Communication 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm1027/>)**COMM 1030 University Study and Communication Skills 1 (Block Mode) (10 Credit Points)****Legacy Code:** 102052

This unit aims to lay the foundations for academic literacy and study skills required for the successful completion of university study and for lifelong learning. It focuses on developing critical thinking and reflection skills; referencing for essay writing and assignments; oral and written communication skills; skills for reading and interpreting different texts; time-management, computer and e-learning skills for studying at UWS. The unit includes a general orientation to University life, familiarising students with academic language, procedures and the general requirements of progression and assessment at university level.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** COMM 1029 - University Study Skills (AREP) LGYA 1674 - University Study Skills (Day Mode) LGYA 1622 - University Study Skills (Block Mode)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm1030/>)**COMM 1031 University Study and Communication Skills 2 (Block Mode) (10 Credit Points)****Legacy Code:** 102053

This unit further develops skills acquired in University Study and Communication Skills 1. It also provides opportunities for students to: develop knowledge about working in teams; research a topic of their choice; practice and present a formal oral and visual presentation to their peers; and prepare an associated written report.

Level: Undergraduate Level 1 subject**Pre-requisite(s):** COMM 1030**Equivalent Subjects:** COMM 1025 - Practical Literacy/Communication Skills (Block Mode)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm1031/>)

COMM 1032 Writing Ecologies (10 Credit Points)**Legacy Code:** 101920

This unit introduces students to a set of theories and strategies for exploring storytelling in networked environments and the way social and cultural experiences continue to shape and inform the way we read, write and communicate. Grounded in contexts key to Communication Arts practice, the unit explores what it means to be digitally literate, the difference between newer and older storytelling environments, and the way networked technologies have re-shaped contemporary reading/writing practices. Students will complete a range of analytical and creative tasks that aim to build understanding of the dynamic nature of communication while further developing academic research and writing skills.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** LGYA 0212 - Writing as Communication COMM 1034 - Writing as Communication COMM 1002 - Approaches to Communication COMM 1033 - Writing Ecologies (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm1032/>)**COMM 1033 Writing Ecologies (WSTC) (10 Credit Points)****Legacy Code:** 700178

This unit introduces students to a set of theories and strategies for exploring digital literacy and the way social and cultural experiences shape and inform the way we read, write and communicate. Grounded in contexts key to communication arts practice, the unit explores what it means to be digitally literate, the difference between newer and older reading/writing environments and the way the digital is re-making contemporary reading/writing practices. Students will complete a range of analytical tasks that aim to build understanding of the dynamic nature of communications while further developing academic research and writing skills.

Level: Undergraduate Level 1 subject**Co-requisite(s):** Students enrolled in the combined Diploma/Bachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year 2 units**Equivalent Subjects:** COMM 1032 - Writing Ecologies**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm1033/>)**COMM 1036 Introduction to the Creative Industries (10 Credit Points)**

Careers in the Creative Industries are on the rise. They're innovation-led, mobile, global and adaptable. In the short-term success can be a matter of luck but a long-term career requires tactics, talent, and savvy business acumen. In this hands-on unit we'll introduce you to some of the key opportunities in the Creative Industries in fields as diverse as Communication, Media, Music, Design, Writing and associated aspects of Intellectual Property Law and Entrepreneurship. We'll look at the Creative Industries from historical and contemporary perspectives, and hear from industry contributors working in the field right now. You'll be introduced to 'future of work' skillsets, including entrepreneurship, leadership, collaboration and communication capabilities, and you'll learn how to situate your own creative knowledge within them.

Available to students from all disciplines, this unit will suit you if you're passionate about taking your creative career to the next level.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm1036/>)**COMM 1037 Digital Narrative (10 Credit Points)**

Effective storytelling is at the heart of engaging content. In this unit, you'll learn the basic principles of fictional, narrative storytelling used in screen media. Following on from Screen Media Fundamentals, you'll learn more advanced principles of screen media production, including genre, visual storytelling, camera coverage, lighting, visual style, editing, sound design and performance. You'll also develop an awareness of key narrative concepts such as narrative form, structure, conflict and basic scriptwriting techniques. You'll plan and create a short narrative screen media work, which will demonstrate your enhanced storytelling and production skills.

Level: Undergraduate Level 1 subject**Pre-requisite(s):** COMM 1041**Incompatible Subjects:** COMM 2036 - Screen and Sound Practices 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm1037/>)**COMM 1038 Digital Narrative (WSTC) (10 Credit Points)****Level:** Undergraduate Level 1 subject**Pre-requisite(s):** COMM 1042**Co-requisite(s):** Students enrolled in the combined Diploma/Bachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year Two units**Equivalent Subjects:** COMM 2036 - Screen and Sound Practices 2 COMM 1037 - Digital Narrative**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm1038/>)**COMM 1039 Introduction to Screen Media (10 Credit Points)**

Welcome to the dynamic and evolving world of Screen Media. In this unit you will learn how to analyse and critically evaluate cinema, from classic Hollywood to Arthouse and Australian films, along with a range of compelling documentary, animation, immersive and interactive content from around the globe. You'll reflect on the impact of technology and the different approaches to creating and producing powerful content. Inspired by best practice, you will have the opportunity to plan and create simple, short works of your own using accessible media.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** LGYB 0161 - Image Sound and Text COMM 1028 - Screen Media COMM 1015 - Foundations of Media Arts and Production COMM 1016 - Foundations of Media Arts and Production (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm1039/>)

COMM 1040 Introduction to Screen Media (WSTC) (10 Credit Points)

Welcome to the dynamic and evolving world of Screen Media. In this unit you will learn how to analyse and critically evaluate cinema, from classic Hollywood to Arthouse and Australian films, along with a range of compelling documentary, animation, immersive and interactive content from around the globe. You'll reflect on the impact of technology and the different approaches to creating and producing powerful content. Inspired by best practice, you will have the opportunity to plan and create simple, short works of your own using accessible media.

Level: Undergraduate Level 1 subject

Co-requisite(s): Students enrolled in the combined Diploma/Bachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year Two units

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comm1040/>)

COMM 1041 Screen Media Fundamentals (10 Credit Points)

Creating compelling video content requires more than just knowing how to use a camera or edit a video. In this hands-on, practical unit, you will develop an appreciation of different tools and techniques, and enhance your ability to be able to create more powerful moving visuals: from researching and planning ideas, composing and framing compelling images, recording, enhancing sound, and editing. You'll have the opportunity to create a range of short content using accessible media, and publish your work online. No prior skills required.

COMM 1043 Communication in Health (UG Cert) (10 Credit Points)

Communication is integral to professional relationships, whether working individually with a client, educating community members on health matters, or working with other professionals as part of a multidisciplinary team. This unit aims to develop written and verbal communication skills in preparation for work within the health professions across these areas. Communication skills will include those needed to form therapeutic relationships with individual clients and groups, as well as those required to communicate health information to clients, groups and the wider community. Students will develop skills to establish appropriate working relationships with professional colleagues.

Level: Undergraduate Level 1 subject

Equivalent Subjects: LGYA 7034 Communication for the Helping Professions COMM 1008 Communication in Health COMM 1007 Communication in Health

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comm1043/>)

COMM 2001 Account and Client Management (10 Credit Points)

Legacy Code: 101941

All communication staff, whether strategy planners, account managers, art directors and copywriters, media planners and media buyers, have some level of responsibility for client management and need a keen understanding of how this affects bottom-line results. In this unit, students will learn the basic principles of account management and how to nurture and foster an environment of trust, respect and partnership. Students will examine best practice in dealing with external stakeholders: proactive behaviour, managing client expectations, understanding clients business objectives and the marketplace, acquiring skills to deal with other disciplines, and understanding success metrics such as cost per acquisition/retention, and brand awareness. Internal stakeholder management skills include preparing and managing meetings, writing WIPs (work in progress) and contact reports, and understanding the financial implications of their actions within the Agency such as retainers, timesheets and other business contexts.

Level: Undergraduate Level 2 subject

Pre-requisite(s): MKTG 1001 OR MKTG 1009

Equivalent Subjects: COMM 2044 - Writing for the Professions

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2001/>)

COMM 2002 Advanced Standing for Creative Writing 210 (0 Credit Points)

Legacy Code: 102440

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2002/>)

COMM 2003 Advanced Standing for Creative Writing 220 (0 Credit Points)

Legacy Code: 102443

Level: Undergraduate Level 2 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2003/>)

COMM 2004 Advanced Standing for Film Studies 210 (0 Credit Points)**Legacy Code:** 102458**Level:** Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2004/>)**COMM 2005 Advanced Standing for Film Studies 220 (0 Credit Points)****Legacy Code:** 102461**Level:** Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2005/>)**COMM 2006 Advertising: Media (10 Credit Points)****Legacy Code:** 101034

This unit explores the critical role of Media in Advertising Campaigns. Through research, analysis and strategic thinking, students will develop media plans for clients. This unit covers media planning in depth: choosing different combinations of media to achieve campaign objectives - digital, outdoor, print, social, radio, TV, cinema, ambient; the use of consumer insight in planning, measures of performance, and creativity in planning and buying.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** MKTG 1001 OR MKTG 1006**Equivalent Subjects:** LGYA 0738 - Audience Analysis and Media Planning**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2006/>)**COMM 2009 Cinema and Censorship (10 Credit Points)****Legacy Code:** 102192

Censorship of the arts has long been a contentious issue. This unit examines the cultural contexts and debates surrounding censorship, as well as the institutions, policies, and people that figure prominently in the history of cinema censorship. Censorship discourses reveal shifts in how 'national morality' is constructed, and often display cultural anxieties about changing meanings of gender, sexuality, race, and class. This unit offers an historical survey of film censorship from the 1890s to today, utilising various theoretical approaches (feminist theory, critical race theory, queer theory, and cultural theory), with an emphasis on topics such as obscenity, pornography, violence, and blasphemy.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2009/>)**COMM 2011 Communication Strategies (10 Credit Points)****Legacy Code:** 102056

Communication Strategies is a dynamic practice-oriented unit designed to teach students how to interrogate and analyse real clients' products/services, issues and opportunities, markets and audiences, in order to develop effective communication strategies. Through discussion topics and project-based work, students will learn how to design and implement a holistic communications strategy that is relevant for a particular client.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** MKTG 2009 - Public Relations Tactics COMM 2007 - Advertising Strategy LGYA 1172 - Public Relations Strategy**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2011/>)**COMM 2014 Editing and Publishing (10 Credit Points)****Legacy Code:** 102435

What makes a good editor? How do editing and publishing work in Australia and the wider market? This unit provides an introduction to basic skills required when editing texts for publication, and a survey of key issues confronting literary publishing in Australia. Skills in editing and an understanding of Australian publishing are valuable assets for students of creative writing. They are also relevant to industry-based work in a range of related fields such as advertising, public relations and journalism. This unit will focus on three areas: the practice of editing, modes of publishing, and the economics of writing and publishing.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2014/>)**COMM 2015 Events Management (10 Credit Points)****Legacy Code:** 101940

This unit introduces understandings about events as forms of public relations typologies and promotional models. These include strategic public relations and management processes, researching the event promotion environment, infrastructure, organisational and event promotion processes and funding. Students will analyse behaviours of event publics, audiences and participants, matching event opportunities with publics, and conceptualising events as service experiences. Students will develop strategies for developing event partnerships, funding and sponsorship relationships. These include managing the development of the event setting/venue, programming and personnel affecting the on-site event experience, and developing appropriate merchandising strategies for events.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** MKTG 1009**Equivalent Subjects:** COMM 3017 - Events Management**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2015/>)

COMM 2016 Experimental Writing and Electronic Publication (10 Credit Points)**Legacy Code:** 100584

Experimental Writing and Electronic Publication is a practical and experiential exploration of modernist writing practices. Students will be introduced to a range of innovative writing techniques designed to stimulate creative thinking and assist in the development of a regular writing practice. Areas of study include: exploration of pre-writing processes; experimental writing genres; power of language; evaluative process; and the development of individual and collaborative techniques for planning and executing writing projects. A primary component of this unit includes working on writing exercises both at home and in class. These exercises will be used to develop the end-of-unit major project.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2016/>)**COMM 2017 Feature Writing (10 Credit Points)****Legacy Code:** 102061

This subject takes students beyond event and reactionary reporting towards an understanding of the proactive process of exploration, interpretation and exposure in journalism. Students learn how to find, filter and file information in a dynamic and constantly changing environment. Given a lot more time to explore issues, students learn to add value to information while keeping the story current, to deadline and in the public sphere, while negotiating with the media industry to get their stories out into the public sphere. Students are encouraged to develop their unique writing styles while also focusing on social issues such as trauma, violence, mental health and wellbeing.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** COMM 1018**Equivalent Subjects:** LGYA 0585 - Journalism Feature Writing COMM 2023 - Magazine Journalism**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2017/>)**COMM 2019 Interactive Design: Games (10 Credit Points)****Legacy Code:** 102272

This unit focuses on game design from an interactive design perspective. Approaches utilising current digital technologies for advanced interactive design are explored. Students will design and produce simple games for mobile and/or desktop delivery. The focus of the unit is about the communication and experience design, rather than technical implementation. Interactive game design examples are examined from the context of shifting production languages, convergent technologies and the design professional contexts. This unit includes game development concepts, platforms, goals and genres, player elements, simple story and character development, gameplay, levels, interface, and the game development process. Students will play games, analyse them, and complete a game design with appropriate documentation.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** COMM 2018 - Interactive Design II**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2019/>)**COMM 2020 Introduction to Film Studies (10 Credit Points)****Legacy Code:** 100964

The unit will introduce students to the key theoretical strands of film studies and key concepts in the analysis of film. The unit will explore techniques of narrative, performance, genre, realism and spectatorship, as well as introducing methods to analyse the use of editing, cinematography and sound. A case study of a key historical film movement or genre will introduce students to the study of cinema in its cultural contexts. The unit will also address the transformations in screen cultures as a result of digital technologies and new media.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2020/>)**COMM 2022 Journalism: Research and Investigation (10 Credit Points)****Legacy Code:** 102017

Investigation and research are fundamental to journalism and many other forms of writing. This unit provides students with the skills to dig deeper to uncover information with which they can build stories that have depth and impact. Students will analyse the role and power of investigative journalism within the information media industry.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** COMM 1018**Equivalent Subjects:** LGYA 0583 - Speciality News Reporting COMM 2021 - Investigative Journalism**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2022/>)**COMM 2024 Media Law and Ethics (10 Credit Points)****Legacy Code:** 101928

Media Law and Ethics focuses on the media and communication industries of public relations, journalism, advertising and media production, and examines issues including: the legal framework in which these creative communication industries operate, the role of ethics in decision-making in these industries, and the impact of regulation. It considers these issues in relation to their historical and philosophical contexts, and in terms of the contemporary context of digital networked media. This unit provides a foundation for professional practice in the Communication and Creative Industries key programs.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** COMM 2010 - Communication Law and Ethics**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2024/>)

COMM 2026 New Media Contexts (WSTC) (10 Credit Points)**Legacy Code:** 700084

The convergences and diversifications in the communications media industries of the past two decades have completely altered the environment within which they operate for producers and consumers alike. Issues about digitalisation, convergence, globalisation, the network society and communications media governance require a complete reconceptualisation of the media in order to be able to understand the impact of these changes upon professional practices and consumer habits. This unit will introduce students to international perspectives on issues in the new media contexts, and an appreciation of some of the social and cultural implications.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** COMM 2025 - New Media Contexts**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2026/>)**COMM 2027 News Reporting (10 Credit Points)****Legacy Code:** 102062

This unit introduces students to news gathering, research, story construction and news writing for delivery over a variety of platforms, from print-based to online, broadcast and social media. It gives students foundation skills which they can then apply in the subsequent electronic and feature units.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** COMM 1018**Equivalent Subjects:** LGYB 0129 - Online Journalism COMM 2028 - News Reporting for Convergent Media**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2027/>)**COMM 2029 Photo Journalism (10 Credit Points)****Legacy Code:** 100953

Students studying this unit examine the function of photojournalism in the process of newsgathering and production and examine the relationship between images and text and their communicative potential. The unit involves a variety of approaches to photojournalism using monochrome and colour photography and location lighting for social documentary for ultimate use in a range of published forms.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LGYA 0636 - Photo Journalism**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2029/>)**COMM 2032 Professional Writing and Editing (10 Credit Points)****Legacy Code:** 101929

Professional communicators require advanced writing and editing skills. This unit explores the nature of writing and preparation of texts for use across different media platforms and in various contexts. In particular, the unit develops skills in editing and re-purposing of writing, and further develops understanding of key writing tools such as voice, emphasis, tone, grammar and punctuation and Plain English for professional purposes. Through in-class workshops and time-restricted editing tasks, students will demonstrate a range of professional writing skills from corporate communications to advanced editing. Through in class presentations, discussions and short written tasks, students will demonstrate an applied understanding of conceptual and theoretical issues related to writing and editing for diverse audiences and applied to a range of current issues.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LGYA 0221 - Convergence and New Media COMM 2012 - Convergence and New Media COMM 2025 - New Media Contexts COMM 2026 - New Media Contexts (UWSC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2032/>)**COMM 2035 Screen and Sound Practices 1 (10 Credit Points)****Legacy Code:** 102406

This unit introduces students to the principles of screen and sound media production with an emphasis on digital video, new media, and short film drama production. Students develop an awareness of screen language through critical reflection upon classic and contemporary cinemas as well as practical exercises. Through a series of specialised modules and workshops, students develop their knowledge and skills in media production including camera coverage, visual storytelling, genre, narrative, montage, and sound design and editing. The unit is complemented by technical training in camera, sound and editing software.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** COMM 2034 Screen and Sound Practices**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2035/>)**COMM 2036 Screen and Sound Practices 2 (10 Credit Points)****Legacy Code:** 102407

Following on from Screen and Sound Practices 1, this unit introduces students to more advanced principles of screen and sound media production with an emphasis on digital video, new media, and short film drama production. Students develop a depth of awareness about screen language through critical reflection upon classic and contemporary cinemas as well as practical exercises. Through a series of specialised modules and workshops, students continue to develop their knowledge and skills in media production including camera coverage, visual storytelling, genre, narrative, montage, and sound design and editing. The unit is complemented by further technical training in camera, sound and editing software. Students produce a major creative media project for a video work under 10 minutes duration.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** COMM 2035**Equivalent Subjects:** COMM 2034 - Screen and Sound Practices**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2036/>)

COMM 2043 Writing Fiction (10 Credit Points)**Legacy Code:** 100896

In this unit students explore, critically examine, and write in a range of fictional and essay forms. They critique a wide variety of published fiction in order to enhance their understanding of approaches, possibilities, and techniques, thereby developing a greater capacity to write and critically evaluate their own work. Students create their own fiction in the form of written exercises and assignments, which they will have the opportunity to workshop and present to peers in a supportive and constructive critical environment.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LGYB 6562 - Creative Writing LGYB 4536 - Writing Fiction**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2043/>)**COMM 2047 Pitch: Podcasting Essentials (10 Credit Points)****Legacy Code:** 102697

This unit will teach students the fundamentals of podcasting, giving them the expertise needed to produce their own podcast feature. Working with academics and industry experts students will learn research and communication skills for finding, pitching and developing audio stories (backgrounding, writing, interviewing, presentation, critical review) and basic technical skills in sound and editing. This unit will show students how to get the most out of their software and hardware, and how to maximise their distribution channels to reach target audiences. Students will also learn how to recognise and evaluate key legal and ethical issues in research and recording content for publication. There is no need to know any of these things already, or have a story ready to tell; this unit is for all levels of experience and disciplinary backgrounds.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2047/>)**COMM 2048 Communicating for Sustainability (10 Credit Points)****Legacy Code:** 102705

This unit will enable you to become an environmental sustainability leader by building your capacity to be a confident and effective communicator. Environmental sustainability is vital to human wellbeing and planetary health. Effective communication is required to bring about transformation at individual, organisational and societal scales. In this unit you will participate in three modules focused on the key ingredients required for communicating sustainability: strategy, design and storytelling. Weekly learning pods developed by industry and academic leaders are designed to demonstrate what has worked well in practice, across business, government, community and not-for-profit sectors. Assessments provide you with an opportunity to implement the models, concepts and ideas you've learnt during the weekly learning content. This unit is recommended for all students, regardless of discipline.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2048/>)**COMM 2050 Multiliteracies (10 Credit Points)****Legacy Code:** 102739

This unit develops students' skills, knowledge and competencies to address a wide range of literacies across multiple technologies, platforms and contexts, including the digital, written, visual, aural, spatial, gestural, and tactile dimensions of meaning production. In any society there are a range of literacies, and contexts in which those literacies might be deployed. Multiliteracies go beyond the traditional textual models of literacy to describe the rich variety of cognitive and cultural tools we use to make sense of the everyday. Multiliteracy is key to our professional and personal effectiveness as well as to our functioning as individuals and citizens in a world characterised by increasing local diversity and global connectedness.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2050/>)**COMM 2051 Animation and Visual Effects (10 Credit Points)**

Explore the art and technology of animation and visual effects as applied to digital screen media production. In this unit, you will be introduced to the principles of animation and compositing and learn how to create effective motion sequences integrated with sound. Working with commercial software, you will explore the unique possibilities of animation and visual effects production and experiment with alternative, creative, narrative storytelling approaches. Develop critical, conceptual and practical skills within the context of animation and visual effects which will then enable you to deliver powerful and compelling visual stories on multiple media platforms.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** COMM 2008 - Animation and Visual Effects COMM 2031 - Principles of Non-Linear Editing COMM 2042 - Visual Effects
Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2051/>)**COMM 2052 Documentary: Factual Screen Media (10 Credit Points)**

Documentary is an evolving area that continues to flux and change. Due to developments in media distribution, technological change and convergence, audiences are increasingly engaging with factual content in new and innovative ways. This unit explores both conceptual and production approaches to documentary in various forms. Students are introduced to key documentary histories and modes and examine a range of traditional and evolving practices including animated, online interactive and transmedia documentary outcomes. Students produce a short documentary project and in doing so develop professional skills and approaches to production roles as well as ethical relationships and responsibilities with participants and topics.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** COMM 1015 OR
COMM 1039**Co-requisite(s):** COMM 1037**Equivalent Subjects:** COMM 2041 - Video Camera and Image Formation
COMM 2013 - Documentary Media**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2052/>)

COMM 2053 Narrative: Fictional Screen Media (10 Credit Points)

In the 21st Century the nature of storytelling has evolved. Fictional screen narratives are now delivered across multiple platforms, devices and spaces. At the same time different platforms are strategically used to extend and add new layers to stories while deepening audience interaction and engagement. This unit introduces students to more advanced principles and processes in the production of fictional screen media. Students will learn how to work effectively in collaborative production teams across various key roles in pre-production, production and post-production. Working in teams, students produce a creative cross-platform narrative screen media project.

Level: Undergraduate Level 2 subject

Pre-requisite(s): COMM 1015 OR COMM 1039

Equivalent Subjects: COMM 3020 - Media Arts Project

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comm2053/>)

COMM 3005 Australian Textual Studies (10 Credit Points)

Legacy Code: 100849

This unit aims to increase students' knowledge of the scope and variety of Australian writing. It examines a range of Australian texts from a number of contexts, usually organised along historical and/or thematic lines, and considers the role of writing both "high" literature and more popular forms in constructions of Australian culture. Issues of place, gender and race may be foregrounded, and consideration given to how these influence images of Australia. Film and television texts may also be included or emphasised.

Level: Undergraduate Level 3 subject

Equivalent Subjects: LGYB 0186 - Australian Textual Studies LGYB 4976 - Australian Authors Special Study LGYB 4974 - Australian Literature The City and The Bush

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comm3005/>)

COMM 3006 Cinema and Experience (10 Credit Points)

Legacy Code: 101984

Film Studies and Literary Studies share some common theoretical foundations and analytical methods. However, considered in its cultural contexts, the question of how a film is experienced by spectators becomes critical. Films engage spectators in an embodied and affective way. The unit will argue that we cannot understand how a film takes up thematic and cultural questions without exploring the dynamics of spectatorship. This unit will explore some key approaches to film spectatorship and will look at how cinematic techniques shape narrative, genre, character, and thematic and cultural questions into embodied and affective experience.

Level: Undergraduate Level 3 subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comm3006/>)

COMM 3008 Communication Research Project (10 Credit Points)

Legacy Code: 101930

This final year unit provides a capstone experience as a bridge into professional work or as a precursor to further research studies.

The 'open box' approach invites students to develop a concept for a research report or professional project, undertaking preparatory stages of collective and individual research in an area of interest that has emerged as a result of previous studies. Students will generate project options that draw on historical and contemporary research issues and approaches to guide the development of their own research questions and methods specific to their object of research. A range of methodological approaches will be explored, including practice-based methods, industry observation/shadowing, qualitative interviews, and quantitative digital methods. Students will develop their own reading lists, identify appropriate research methods and conduct some pilot testing and evaluation of findings for their project. Students will also learn how to read and consume academic and scholarly research in order to critique problematic issues in published research reports.

Level: Undergraduate Level 3 subject

Equivalent Subjects: COMM 3039 - Visual Thinking COMM 3019 - Media Analysis

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comm3008/>)

COMM 3010 Creative Industries Professional Project or Internship (10 Credit Points)

Legacy Code: 102433

Creative Industries Professional Project or Internship will allow students to work with Creative Industries practitioners in a 'real world' context. Students will collaborate with an industry partner, applying design thinking to achieve creative solutions within an internship placement or develop their own creative industry project.

Level: Undergraduate Level 3 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comm3010/>)

COMM 3011 Creative TEAMS 1 (10 Credit Points)**Legacy Code:** 102431

Creative TEAMS 1 will bring students together in interdisciplinary groups to work with Creative Industries practitioners in a 'real world' context. Students will learn how to collaborate to develop an original solution to a "wicked" problem set by the industry partner. Through research and planning, in relation to a set of relevant constraints: such as cultural, social, environmental, site and audience, students will develop a strategy that utilises the appropriate media, message and approach, to address the identified target audience, based on research findings.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm3011/>)**COMM 3012 Creative TEAMS 2 (10 Credit Points)****Legacy Code:** 102432

Creative TEAMS 2 will bring students together in interdisciplinary groups to work with Creative Industries practitioners on professional projects. Students will learn how to collaborate to develop original solutions with industry partners. Through research and planning, in relation to a set of relevant constraints: such as cultural, social, environmental, site and audience, students will develop a strategy that utilises the appropriate media, message and approach, to address the identified target audience, based on research findings.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** COMM 3011**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm3012/>)**COMM 3013 Creative Writing Project (10 Credit Points)****Legacy Code:** 100859

This unit extends students beyond the writing of individual stories and poems into larger areas of creative writing, such as the discontinuous narrative, the novella, and the cycle of related poems and/or stories. It involves students in the process of developing a major project from an initial set of ideas, through the stages of drafting to a "finished" product, using workshop techniques, individual interviews and peer critiquing. It aims to give each student some experience of a relationship with readers (fellow students) and an editor (the tutor).

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm3013/>)**COMM 3014 Digital Communication (20 Credit Points)****Legacy Code:** 102518

This unit covers the theory and practice of social/digital media (SDM) for marketing and communication in a variety of business, advertising and public relations agency contexts. It provides an introduction to the areas of strategy, creative writing and media planning for SDM. It examines trends and issues surrounding the usage of SDM and application and development of practical and tactical tools. Case studies and examples are used to demonstrate best practices. Students develop a major project where they demonstrate appropriate and professional usage of SDM strategies and tactics in a marketing communication context.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** MKTG 1001 OR

MKTG 1009 AND

COMM 2011

Equivalent Subjects: COMM 3016 - Digital and Social Media Communications**Incompatible Subjects:** LGYA 1699 - Digital and Social Media

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm3014/>)**COMM 3015 Digital Journalism Production (20 Credit Points)****Legacy Code:** 102057

Digital technologies have revolutionised news delivery. Journalists in every area of the profession now require video, audio, online and print skills to work across multiple platforms and contexts. This unit introduces students to multiplatform digital journalism and the ways in which multiple media can be used to tell stories for a range of contexts. Students develop their own blog site, that is populated using digital devices for working with video, audio and text to engage with a range of social media storytelling modes to extend stories across multiple media contexts. Based on an understanding of ethical and informed journalism practices, students are encouraged to develop their own voice as an independent thinker and writer into the public domain of online publishing.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** COMM 3036 - Television Journalism COMM 3030 - Radio Journalism**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm3015/>)**COMM 3018 Internship (10 Credit Points)****Legacy Code:** 101173

This unit provides students with the opportunity to apply the skills and knowledge they are developing during their studies to tasks within a workplace (the host organisation). The unit may involve substantial contact with the public through workplace placements and, for this reason, it is equivalent to a professional placement. The unit is recommended for students in their third year of study (or part time equivalent).

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYA 0737 - Advertising Internship LGYB 0070 - Professional Internship - Public Relations LGYB 0119 - Professional Internship - Journalism LGYB 0074 - Media Co-Productions DESN 3009 Professional Practice Design**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm3018/>)

COMM 3022 Media Memory (10 Credit Points)**Legacy Code:** 101931

Media memory is now a critical field of study in journalism, advertising, visual communication and media. The media builds local, national and transnational identities through the representation of the past. Media industries such as advertising rely upon collective memories to design campaigns in order to reach particular audiences. Journalists increasingly 'assemble' stories from digital archives, recombining similar or related events from the past to build stories and features of the present. Individuals increasingly contribute to news events through their own 'witnessing' of events, capturing and sharing material using mobile and social media. This unit addresses these processes by providing a brief history and overview of approaches to thinking about media and memory, in the context of the significance of media convergence and digital memory within contemporary media ecologies. The unit provides students with a series of case studies that approach the memory of particular events, drawing on examples from advertising, public relations, visual communication, animation, film, broadcasting and journalism. Students develop a media research project that engages with the material presented in the unit.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** COMM 3031 - Researching Media Audiences**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm3022/>)**COMM 3024 Modernity and Cinema (10 Credit Points)****Legacy Code:** 101001

This unit will engage with the question of how social and aesthetic issues interact in films by examining specific questions which are related to cinema history. Issues of identity will be used to focus upon the ways in which historical contexts interrelate with artistic practice. The unit will consider the process of creating emotions, the consideration of techniques of production and the manipulation of cinema language, the use of narrative or non-narrative form to convey the sense of reality, (or the unreal, the uncertain).

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYC 1620 - Modernity and Cinema**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm3024/>)**COMM 3025 News Teams (10 Credit Points)****Legacy Code:** 102063

This unit introduces students to the concept surrounding the editorial team process and the culture of the newsroom across all news media. It explores the social and organisational context of news production in commercial, public or community news organisations. It draws upon theory from communication, sociology, psychology, and management to provide a broad understanding of the principles and practices of effective and creative news teams. It critically analyses the structures, processes and techniques of news gathering to enable quality team outcomes. The unit encourages collaborative working relationships and develops students' own practice in a team.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** COMM 3026 - News Teams and Newsroom Cultures**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm3025/>)**COMM 3035 TV Production 2 (10 Credit Points)****Legacy Code:** 102409

In 2023, this unit replaced by 102834 - Screen Media: Capstone Production. Television Production 2 is a practical and vocational unit that provides students with a range of advanced skills for working in the television production and broadcast sector. The course encourages multiplatform conceptualisation and distribution of projects exploring the futures of television in online, mobile and networked environments. Students build on their knowledge and experience from TV Production 1 across a range of roles including project planning, scriptwriting and research, filming, sound recording, video editing, and post production. Working in small teams students develop and produce a TV series with professional production values for broadcast through public media contexts.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** COMM 3034**Co-requisite(s):** COMM 2036**Equivalent Subjects:** COMM 3021 - Media Arts Workshop COMM 3038 - Video Project COMM 3033 - TV Production COMM 3050 - Screen Media Capstone Production**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm3035/>)**COMM 3037 Transmedia Production (10 Credit Points)****Legacy Code:** 101939

In 2023, this unit replaced by 102833 - Screen Media: Capstone Development. Video is now delivered across multiple platforms and spaces, both online and offline via mobile networks; through festivals, public spaces and galleries and across social network sites. At the same time video productions are increasingly designed to be Transmedia where different platforms are strategically used to extend and add new layers to stories while deepening audience interaction and engagement. Students will learn about 360 degree storytelling as strategic communications. Students will develop a professional transmedia project proposal for a service, product or system that works across multiple platforms, engaging with audiences through social network sites. Students will explore how content can be meaningfully embedded and linked across multiple platforms to engage target audiences.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** COMM 3020 OR

COMM 3015 OR

DESN 2010 OR

COMM 2018 OR

COMM 2018 OR

COMM 2034 OR

COMM 2042

COMM 3041 Writing For Performance (10 Credit Points)**Legacy Code:** 100895

In this unit students will consider the history and theory of a selection of performance traditions including Greek tragedy, Elizabethan and Jacobean and modern drama and post-modern performance and write scripts for one or a number of media, including screen (film and television), dramatic theatre, performance poetry and song lyrics and contemporary performance.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYB 4928 - Writing for Performance LGYA 0302 - Writing for Screen and Stage**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm3041/>)**COMM 3042 Writing Poetry (10 Credit Points)****Legacy Code:** 101011

What does a poem look or sound like today? In this unit students examine poetic forms, styles and techniques from various cultures of the 20th and 21st centuries. Students are taught to analyse and write poetry via a series of guided workshop exercises. They learn that writing poetry also involves becoming a skilled reader of and about poetry. Students enrich their knowledge and love of poems by scrutinising a range of poetic types and methods including imagism, metaphor, free verse, humour, spoken word traditions, song-writing, ecological poetries, and visual and digital poetries. No previous experience in poetry writing is necessary.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYB 4537 - Writing Poetry**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm3042/>)**COMM 3043 Writing Portfolio (10 Credit Points)****Legacy Code:** 100582

In this level 3 foundation unit of the Creative Writing Major, students are guided by experienced, professional writers in producing an extended portfolio of original creative writing, in a genre (or genres) of their choice. Students will read closely from a wide range of literary texts while completing an intensive program of in-class writing and workshopping activities. They will gain skills in reading and interpreting texts from different genres, eras and contexts - including culturally diverse settings. Students will develop skills in drafting, editing and polishing their own creative work, and in situating their writing within the Australian literary and publishing industries.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm3043/>)**COMM 3045 Advertising: Campaigns (10 Credit Points)****Legacy Code:** 102730

In this capstone unit students will learn to professionalise key aspects of the advertising management process. The unit provides the opportunity to link and apply theoretical understanding with research, writing, planning, creative development and media, and presentation skills in response to a live client brief provided by a multi-national advertising agency. The 'real world' situation allows students to demonstrate their capacity for problem analysis and to develop appropriate and timely solutions. Students will work within an allocated budget and to realistic industry deadlines to produce a campaign they can include in their portfolio. Assessment tasks will enable students to demonstrate emerging professional capacity and prepare themselves for a communication position, either in an advertising agency, media agency or consultancy.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** COMM 2011 AND COMM 2006**Equivalent Subjects:** LGYA 1057 - Advertising Campaigns COMM 3007 - Communication Campaigns**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm3045/>)**COMM 3046 Personal Branding Strategies: Build and Manage Your Career Profile (10 Credit Points)****Legacy Code:** 102780

A strong personal brand can open doors to career opportunities, promotions and partnerships in all industries. This unit is essential for anyone who wants to propel their career, build a reputation, capitalise on opportunities and stand out to future employers. Using user-centred theories and approaches, we'll teach you how to create a personal brand aligned to your values and goals in a way that engenders confidence, trust and credibility. You'll learn the skills to network so you can connect with and leverage the influencers who can accelerate your reputation. How to build and showcase your brand, both online and offline, and how to manage it over time. How to craft short talks and presentations (based on the philosophies and techniques of TED), to inspire your audience to action. This unit is recommended for all students, regardless of discipline.

Level: Undergraduate Level 3 subject**Incompatible Subjects:** COMM 2049 - Personal Branding Strategies Build and Manage Your Career Profile**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm3046/>)**COMM 3047 Episodic Screen Media (10 Credit Points)**

In this unit students will analyse and develop an episodic narrative production using concepts and production strategies for serialised narrative storytelling for online platforms. Students will be introduced to the University's broadcast television studio and operation. Students will build their knowledge and practical skills in the conceptualisation, planning, editing of serialised online web and streamed based narratives. This unit will require students' attendance in workshops delivered in blocks and participation in studio recording.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** COMM 1037**Equivalent Subjects:** COMM 3021 - Media Arts Workshop COMM 3038 - Video Project COMM 3033 - TV Production COMM 3034 - TV Production 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm3047/>)

COMM 3048 Immersive Screen Media (10 Credit Points)

New technology developments have facilitated the integration and design of immersive technologies to more fully engage audiences with narratives and brands. In this unit students will study user engagement and visual effects theory and analyse the application of these theories and business models on innovative commercial and creative industries case studies. Students will be introduced to using immersive cross platform technologies and 360 filming. Students will develop a scoping and design template for their own project concept. The project proposal will outline the rationale, using visual design elements and compositing requirements, to build a multi-layered digital experience for a venue, project or brand.

Level: Undergraduate Level 3 subject

Pre-requisite(s): COMM 1037

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comm3048/>)

COMM 3049 Screen Media: Capstone Development (10 Credit Points)

In this unit students develop a major screen media project which will be produced in the unit Screen Media Capstone Production. The nature of the project may vary depending on students' interests and career aspirations. Projects may range from documentary, drama, episodic, animation, immersive, transmedia, interactive and other hybrid forms. Depending on the nature the project, projects maybe developed individually or in interdisciplinary groups. Projects may be original creative ideas or undertaken in collaboration with an industry and/or community partner.

COMM 3050 Screen Media: Capstone Production (10 Credit Points)

In this unit students produce projects that were planned and developed in the previous unit, Screen Media: Capstone Development. This unit provides the opportunity for students to consolidate theoretical knowledge and practise-based skills acquired throughout their course to produce a substantial screen media project. Students may choose to take on a leadership role such as producer or director, or students may choose develop their skills targeted to their own area of interest. This may involve a specific production area or crew role which may be undertaken on more than one project. Students will also produce an online portfolio featuring key achievements made throughout the course, for the purpose of enhancing graduate employment prospects.

Level: Undergraduate Level 3 subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comm3050/>)

COMM 7001 Adaptive Leadership, Management and Team Work (20 Credit Points)

Legacy Code: 102519

The Creative Industries provide opportunities for innovative and integrative working styles and methods, particularly in SMEs and multi-disciplinary collaborations. This industry-facing unit provides an understanding and application of specified theories and methods of leadership, management and collaboration, with a creative, technological and/or entrepreneurial focus. You will devise an individual, semester-long professional development challenge in leadership, management or collaboration and apply your learnings to problem-solve a current professional situation. A supplementary collaborative group project allows you to apply and customise industry roles, techniques and processes in a strategic response to a client brief. You will investigate and analyse one model of leadership, management or collaboration that is found in the creative industries.

Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comm7001/>)

COMM 7002 Convergent Media Internship (10 Credit Points)

Legacy Code: 101426

This professionally oriented unit consists of a work internship placement with a corporate media or community communications division of an organisation. These agencies may include WSU research centres, educational, community and cultural agencies within Sydney and corporate and professional organisations in Australia or off-shore, as agreed. The focus of the internship is to research and contribute to audience/community liaison and development, and/or to contribute to the cross media production and/or marketing plans of the organisation. During the placement students will develop documentation to capture and manage ideas about professional development, industry trends, professional links, case studies and associated documentation. On completion of the placement students will present a comprehensive report.

Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comm7002/>)

COMM 7003 Foundations of Media Arts Production (PG) (10 Credit Points)

Legacy Code: 102300

This unit explores creative and independent media arts practices across moving image, audio and participatory forms, and introduces students to fundamental principles of long-form sound and screen production. The unit maps theoretical and practical connections between the creation and study of images and sound across media formats through an integrated theory/practice programme focused on the processes through which long-form media artefacts are created. Students learn how to analyse and critically evaluate screen media and also to plan and make simple short works of their own. It introduces students to relevant media arts histories and contexts (with a focus on cinema) in addition to a range of technologies, media practices and production techniques.

Level: Postgraduate Coursework Level 7 subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comm7003/>)

COMM 7004 In the Realms of the Sensory: Ecologies of Word, Sound and Image (10 Credit Points)**Legacy Code:** 102342

This unit develops an awareness of the cultural, aesthetic and sensory contexts in which the communication, design and creative arts are practiced. It examines approaches to creative practice and the role that creativity and experimentation, as well as collaboration and social creativity, play in the research process. Particular attention is paid to visual, aural, and alphabetic technologies, and the form of augmented virtual realities and artefacts they create. Mimicry, novelty and improvisation, critique and speculation, 'handability' or tacit knowledge are some of the practices and concepts studied. While the unit is designed for students engaged in creative research, it has relevance for those analysing creative works as part of their research.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm7004/>)**COMM 7006 Media Project Production (20 Credit Points)****Legacy Code:** 101745

This unit offers an individual, or group of, student(s) the opportunity to develop, produce and evaluate a Media Project developed in the Media Project Proposal Unit. The project production will cover implementation and evaluation issues relevant to media products. The final product is intended to be a significant new media project prototype. Individual students can negotiate the project of their choice, but this should be based on the Media Project Proposal (or equivalent) developed in the Spring Semester, or first half of semester if you are a full time student. A 5,000 word report forms part of the assessment.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** COMM 7007**Equivalent Subjects:** LGYA 1411 - Media Production**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm7006/>)**COMM 7008 Media Research Project (20 Credit Points)****Legacy Code:** 102521

This research-focused unit enables students to develop and produce a major work on a convergent media subject and theme, such as: communications and design theories and practices, data visualisation, content creation for convergent media, and digital humanities.

The unit will cover methods for designing and implementing an academic or practice-based research project through workshops and exercises. Students may be introduced to techniques for: differentiating appropriate research methodologies; integrating research techniques into the planning and creation of a research project; field research, action research and research-creation; devising a literature review and constructing a logical argument; and critical reading.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm7008/>)**COMM 7009 Mobile Media (10 Credit Points)****Legacy Code:** 101743

The proliferation of the mobile device and the evolution of mobile networks has profoundly changed the social and interpersonal sphere and the global media landscape. This unit combines both theory and practice to engage with Mobile Communications and Society: the cultural, family and interpersonal consequences of mobile communication and its effect on every day life, social cohesion, political and economic activities, social development and change, and Mobile Media: current media production and distribution platforms, practices and trends. This unit includes the production of content for distribution via mobile devices.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm7009/>)**COMM 7010 New Genres in Research Writing (10 Credit Points)****Legacy Code:** 102662

This unit focuses on new, innovative, interdisciplinary genres of writing arising after the putative end of critique and with the rise of non-representational thought. These new writing practices mix genres and meld theoretical, critical and creative modes. Focusing on fictocriticism, creative nonfiction, documentary fiction and the multi-media essay, we explore the experimental ethos and affective and new materialist methodologies to which these forms lend themselves. Students will develop a body of original creative-critical work in any genre through a series of seminars and writing workshops.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm7010/>)**COMM 7011 Researching Convergent Media (10 Credit Points)****Legacy Code:** 101962

The contemporary creative industries landscape is characterised by the breakdown of traditional media silos and the transformation of media production and consumption practices. Media, marketing and creative professionals are now required to understand and connect with their audiences across multiple media platforms and to undertake diverse research deploying many new methodologies. The aim of this unit is to provide students with an historical, geopolitical and theoretical introduction to research in the creative industries. The case studies and topics covered vary from semester to semester and can include data visualisation, digital ethnography, digital games, community media, digital arts, activist networks, social media and cross platform projects. Using current media theory, design theories, and research methodologies, students will select, analyse and contextualise case studies.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 1632 - Methods and Case Studies in Convergent Media**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm7011/>)

COMM 7012 Strategic Communication (20 Credit Points)**Legacy Code:** 102292

Local and international industry trends show that strategic communication, particularly including agendas of innovation and ethics, are a growing force in the convergent media landscape. This unit introduces students to both the science and art of strategic communication. It is grounded in an advanced understanding of the complexity of human communication processes and driven by a conviction that systematic research and analysis is required to inform strategic communication responses. This unit is based around a series of assessments that require students to address a real-world business challenge or a social issue in ways that take advantage of convergent media environments.

Level: Postgraduate Coursework Level 7 subject**Incompatible Subjects:** LGYA 1704 - Strategic Communication**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm7012/>)**COMM 7013 Ideate, Develop: Makerspace 1 (10 Credit Points)**

Ideation is at the core of creative industries. This practice-led research unit will teach you how to ideate, develop and pitch a major project, which you can then produce in the Makerspace 2 unit. We will show you how to mobilise your own creative interests, how to identify and research a creative or market challenge, and teach you techniques for generating ideas and innovative solutions-based responses. You'll learn systemic methods and tools for creative ideation across multiple platforms and channels, including UX (user experience), UI (user interactivity), design thinking, IA (information architecture) and UCD (user centred design). We'll also teach you how to pitch your project so it captures the imagination and attention of clients and audiences.

Level: Postgraduate Coursework Level 7 subject**Incompatible Subjects:** COMM 7007 - Media Project Proposal**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm7013/>)**COMM 7014 Innovate: The Entrepreneurial Mindset (10 Credit Points)**

This unit focuses on current trends and issues in innovation and entrepreneurship in the creative industries with a strong focus on small to media enterprises (SME), ventures within existing business and within government. The unit addresses methodologies for innovation, such as design-thinking and futuring; the role and efficacy of public and private incubators; the forms, foundations, qualities and capacity of entrepreneurship and business development strategies; and the role of networking and industry partnerships, with a focus on the capacities of social media to effect change in markets and partnerships, and business development strategies. The unit covers existing 'new' business models and emerging trends, such as social entrepreneurship and co-working spaces. The unit builds on previous capstone units Ideate, Develop: Makerspace 1 and Produce, Generate: Makerspace 2 in introducing further methods for creative ideation with a focus on technology.

Level: Postgraduate Coursework Level 7 subject**Incompatible Subjects:** COMM 7005 - Innovation and Entrepreneurship PG**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm7014/>)**COMM 9001 Higher Degree Research Thesis - Communication and Media Studies (20 Credit Points)****Legacy Code:** 800003**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comm9001/>)

Complementary Therapies (CMPL)

CMPL 1001 Traditional Chinese Medicine 1 (10 Credit Points)**Legacy Code:** 400346

This unit provides a comprehensive introduction to traditional Chinese medicine (TCM). Students are introduced to basic TCM theory, and the physiological principles of the diagnostic system that forms the basis of TCM practice. The history and philosophy of Chinese medicine is introduced and discussed in the light of contemporary clinical practice.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl1001/>)**CMPL 1002 Traditional Chinese Medicine 2 (10 Credit Points)****Legacy Code:** 400348

This unit provides learning experiences that enable students to expand upon their understanding of TCM philosophy and principles, with particular reference to developing diagnostic skills in TCM. Students acquire basic skills in case history taking, interpretation of relevant signs and symptoms, arriving at a TCM diagnosis, and devising suitable treatment strategies.

Level: Undergraduate Level 1 subject**Pre-requisite(s):** CMPL 1001**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl1002/>)**CMPL 2002 Channels and Points 1 (10 Credit Points)****Legacy Code:** 400874

Acupuncture is one of the principal therapeutic interventions in Traditional Chinese Medicine (TCM). This unit introduces students to acupuncture theory and practice, and provides opportunity to develop practical skills. It covers the theory of channels and points, channel pathway, point location and indications of the conception and governor vessels, and the first 6 channels in the meridian cycle. This unit also expands upon the student's understanding of TCM theory and practice principles. This unit includes mandatory clinical placement

Level: Undergraduate Level 2 subject**Pre-requisite(s):** CMPL 1002**Co-requisite(s):** CMPL 2006**Equivalent Subjects:** LGYA 7238 - Acupuncture 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl2002/>)

CMPL 2003 Channels and Points 2 (10 Credit Points)**Legacy Code:** 400875

Acupuncture is one of the principal therapeutic interventions in Traditional Chinese Medicine (TCM). This unit completes the study of the system of channels and points, which forms the basis of clinical application of acupuncture. It covers the channel pathway, point location and indications of the last 6 channels of the meridian cycle and the extra points. It also reinforces the student's ability to identify and palpate surface anatomy relevant to identifying the acupuncture point locations covered in this unit and relevant safe administration of needling. This unit expands the student's understanding of TCM theory and practice principles. This unit includes mandatory clinical placement

Level: Undergraduate Level 2 subject**Pre-requisite(s):** CMPL 2006 AND

CMPL 2002

Equivalent Subjects: LGYA 7238 - Acupuncture 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl2003/>)**CMPL 2004 Chinese Materia Medica 1 (10 Credit Points)****Legacy Code:** 400876

Herbal medicine is one of the principal therapeutic interventions in Traditional Chinese Medicine. This unit introduces students to the therapeutic and reference organisation of Chinese medicinal herbs, and enables students to commence using the materia medica. It covers the commonly used herbs in each of the six categories of the Chinese materia medica, including the herbal properties, actions, indications, contraindications, combined usage as well as herbal dispensing. This unit also expands upon the student's understanding of TCM theory and practice principles. This unit includes mandatory clinical placement

Level: Undergraduate Level 2 subject**Pre-requisite(s):** CMPL 1002**Co-requisite(s):** CMPL 2006**Equivalent Subjects:** LGYA 7239 - Chinese Herbal Medicine 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl2004/>)**CMPL 2005 Chinese Materia Medica 2 (10 Credit Points)****Legacy Code:** 400877

This unit completes the study of Chinese medicinal herbs, which forms the basis for Chinese herbal medicine. It covers the commonly used herbs in each of the twelve categories of the Chinese materia medica, including the herbal properties, actions, indications, contraindications and combined usage. It also introduces the basic knowledge of herbal pharmacognosy. This unit also expands upon the student's understanding of Traditional Chinese Medicine theory and practice principles.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** CMPL 1002 AND

CMPL 2004

Equivalent Subjects: LGYA 7240 - Chinese Herbal Medicine 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl2005/>)**CMPL 2006 Traditional Chinese Medicine 3 (10 Credit Points)****Legacy Code:** 400352

This unit enables students to develop a sound understanding of causes of disease in TCM with a particular focus on TCM disease pattern differentiation. Students will be able to identify the clinical manifestations relating to specific patterns and develop the appropriate TCM treatment principles. This is complemented by the reinforcement of skills in case history taking and TCM diagnostics.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** CMPL 1002**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl2006/>)**CMPL 3001 Acupuncture Techniques (10 Credit Points)****Legacy Code:** 400873

This unit consolidates and extends students' knowledge of acupuncture theory and practice, and provides further opportunity to develop practical skills. Students are introduced to the theory of point combinations and the development of acupuncture prescriptions and treatment plans. Practical sessions include obtaining Qi (De Qi), promoting Qi techniques, tonifying and reducing needling techniques, moxibustion, cupping, Gua Sha, Tuina, intradermal/cutaneous needling, scalp acupuncture, auricular acupuncture, wrist/ankle acupuncture, electroacupuncture and laser acupuncture. This unit also expands upon the student's understanding of the theory and practice principles of traditional Chinese medicine.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** CMPL 2003 AND

CMPL 2006

Equivalent Subjects: CMPL 2001 - Acupuncture 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl3001/>)**CMPL 3002 Chinese Medicinal Formulas (10 Credit Points)****Legacy Code:** 400878

Herbal medicine is the principal therapeutic intervention in Traditional Chinese Medicine (TCM). This unit follows from Chinese Materia Medica 1 & 2, and begins the study of major Chinese herbal formulas, which form the basis for clinical prescribing in Chinese herbal medicine. The focus of this unit is to compare and contrast the main formulas in specified categories, and to analyse the specific actions of the herbs that make up the formula. Students will be required to formulate, assemble and prepare complex prescriptions. This unit expands upon the student's knowledge of the Chinese Materia Medica, as well as the understanding of TCM theory and practice principles.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** CMPL 2006 AND

CMPL 2005

Equivalent Subjects: LGYA 7240 - Chinese Herbal Medicine 3**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl3002/>)

CMPL 3003 Traditional Chinese Medicine Practice 1 (10 Credit Points)**Legacy Code:** 400354

This unit is focused on introductory clinical practice in a clinical setting. It enables the students to link theory with practice. It expands the students' knowledge base of Chinese medicine theory and diagnosis, and the application of acupuncture and Chinese herbal medicine treatment. Students assist with clinical practice, take consultations, and perform basic acupuncture related techniques.

Students will also learn basic skills in handling herbal preparation and dispensing. This unit includes mandatory clinical placement

Level: Undergraduate Level 3 subject**Pre-requisite(s):** CMPL 2006**Co-requisite(s):** CMPL 3001 AND

CMPL 3002

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl3003/>)

CMPL 3004 Traditional Chinese Medicine Practice 2 (10 Credit Points)**Legacy Code:** 400356

This unit focuses on the application of the skills and knowledge of TCM within a clinical setting. The unit provides the opportunity to expand students' knowledge base of the theory Chinese medicine through the work integrated experiential learning. Specifically, the unit covers TCM diagnosis, the application of Acupuncture techniques and the implementation of Chinese herbal medicine treatments. The unit also covers basic Chinese language including Pin Yin and Romanisation to enable students to apply TCM terminology as part of clinical practice. Under supervision, students have the opportunity to consult with clients/patients, perform basic acupuncture, and undertaken herbal prescription. Students will also undertake basic herbal processing and preparation of medicinal herbs.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** CMPL 3003**Restrictions:** Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl3004/>)

CMPL 4001 Block Clinical Practicum (10 Credit Points)**Legacy Code:** 401104

This unit provides the student with intensive, supervised clinical practice experience. Arrangements are usually made for students to complete this stage in China. Due to the travel restriction as a result of COVID-19 pandemic, this unit in 2020 is wholly offered in Australia. The unit represents the final clinical practicum stage with an opportunity in developing clinical skills. Students will be expected to demonstrate competence in handling patients in a clinical context, and manage their integrated care using Traditional Chinese Medicine.

Level: Undergraduate Level 4 subject**Incompatible Subjects:** CMPL 7002 - Block Clinical Practicum (PG) AND LGYA 7257 - Block Clinical Practicum**Restrictions:** Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl4001/>)

CMPL 4002 Chinese Internal Medicine 1 (10 Credit Points)**Legacy Code:** 401098

The study of internal medicine forms the basis of clinical practice in Traditional Chinese Medicine (TCM). This unit begins to bridge the gap between theory and practice. It enables the health professional to analyse, diagnose and treat common internal diseases with both acupuncture and herbal medicine and using a TCM approach. The focus of this unit is on the analysis of major presenting symptoms.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** CMPL 2006 AND

CMPL 3001 AND

CMPL 3002

Incompatible Subjects: 700918 - Chinese Internal Medicine 1 (PG) LGYA 7251 - Chinese Internal Medicine 1**Restrictions:** Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl4002/>)

CMPL 4003 Chinese Internal Medicine 2 (10 Credit Points)**Legacy Code:** 401102

This unit builds on Chinese Medicine 1 and extends the student's ability to analyse, diagnose and treat common and difficult diseases in internal medicine with both acupuncture and herbal medicine and using a TCM approach. Students will develop an understanding of the causes and pathophysiological mechanisms of a wide range of diseases.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** CMPL 2006 AND

CMPL 3001 AND

CMPL 3002

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl4003/>)

CMPL 4004 Classical Texts in Chinese Medicine (10 Credit Points)**Legacy Code:** 401100

This unit provides further learning experiences that enable the students to explore the original theories on physiology, pathology, diagnosis, differentiation and treatment of diseases through select periods of Chinese history. Many theoretical concepts, diagnostic systems and therapeutic methods of Traditional Chinese Medicine (TCM) are still in current usage, and will be covered through the study of important classical texts and academic schools of TCM thought. This unit expands upon the student's understanding of TCM theories and practice principles through studies of the classical literature.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** CMPL 2006 AND

CMPL 3002

Incompatible Subjects: CMPL 7006 - Classical Texts in Chinese Medicine (PG)**Restrictions:** Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl4004/>)

CMPL 4005 Specialities in Traditional Chinese Medicine 1 (10 Credit Points)**Legacy Code:** 401099

This unit provides learning experiences that enable the health professional to analyse, diagnose and treat common gynaecological diseases and musculoskeletal conditions using a Traditional Chinese Medicine (TCM) approach with acupuncture and Chinese herbal medicine. Students will develop a good understanding of the causes and pathophysiological mechanisms of common gynaecological diseases and musculoskeletal conditions.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** CMPL 2006 AND

CMPL 3001 AND

CMPL 3002

The specialties of paediatrics, dermatology, ear, nose, throat (ENT) and eye diseases, are important divisions of Traditional Chinese Medicine (TCM) activity. This unit enables students to develop an understanding of the aetiology and pathophysiology of common paediatric, dermatological, ENT and eye disorders, and to analyse, diagnose and treat these conditions using acupuncture and Chinese herbal medicine.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** CMPL 2006 AND

CMPL 3001 AND

CMPL 3002

Incompatible Subjects: CMPL 7022 - Specialities in Traditional Chinese Medicine 2 (PG) LGYA 7259 - Specialities in Traditional Chinese Medicine 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl4006/>)**CMPL 4007 Traditional Chinese Medicine Practice 3 (10 Credit Points)****Legacy Code:** 401101

This unit represents a continuation of the clinical practicum and development of clinical skills in relation to patient management and TCM health preservation and enhancement, including lifestyle, diet and physical exercise. Students will also be able to apply their knowledge of professional theory, practice, research and evaluation skills to the investigation of TCM problem. Students will be expected to demonstrate competence in handling patients in a clinical context, synthesise knowledge from their studies of specialities in Traditional Chinese Medicine and critically examine the practical aspects of acupuncture and Chinese herbal medicine research. This unit includes mandatory clinical placement

Level: Undergraduate Level 4 subject**Pre-requisite(s):** CMPL 3004**Incompatible Subjects:** CMPL 7023 - TCM Practice 3 (PG) AND LGYA 7249 - TCM Practice 3**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl4007/>)**CMPL 4008 Traditional Chinese Medicine Practice 4 (10 Credit Points)****Legacy Code:** 401105

This unit represents a continuation of the clinical practicum and development of clinical skills. Students will integrate theoretical knowledge, practical and research skills, learnt in previous units, into clinical practice, including in: case investigation; diagnosis; formulation of treatment strategies; and the delivery of treatments to patients.

Students will learn to act ethically in professional contexts. Students are expected to demonstrate professional competence in handling patients in a clinical context, critically evaluating complex cases, diagnosing, devising and managing the patients using TCM therapies.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** CMPL 4007**Incompatible Subjects:** CMPL 7024 - TCM Practice 4 (PG) AND LGYA 7255 - TCM Practice 4**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl4008/>)**CMPL 7001 Advanced Acupuncture (10 Credit Points)****Legacy Code:** 400578**Level:** Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl7001/>)**CMPL 7002 Block Clinical Practicum (PG) (10 Credit Points)****Legacy Code:** 400927

This unit provides the student with intensive, supervised clinical practice experience. Arrangements will be made for students to complete this stage in China. This will involve students paying their own travel fares, as well as, training and accommodation fees to the Chinese institution. This unit represents the final clinical practicum stage and development of clinical skills. Students will be expected to demonstrate competence in handling patients in a clinical context, and manage their integrated care using TCM.

Level: Postgraduate Coursework Level 7 subject**Incompatible Subjects:** LGYA 7257 - Block Clinical Practicum**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl7002/>)**CMPL 7003 Chinese Internal Medicine 1 (PG) (10 Credit Points)****Legacy Code:** 400918

The study of internal medicine forms the basis of clinical practice in traditional Chinese medicine. This unit begins to bridge the gap between theory and practice. It enables the health professional to analyse, diagnose and treat common internal diseases with both acupuncture and herbal medicine and using a TCM approach. The focus of this unit is on the analysis of major presenting symptoms.

This unit presents the origin, development and features of classical Chinese herbal medicine (Jing Fang), and reveals their pharmacological and clinical outcomes based on the latest clinical observation and research. This unit will appeal to practitioners seeking to extend and deepen their knowledge and clinical skills with Chinese herbs and to students embarking on research in this area. The classical texts contain deep insights on Chinese herbs and formulae for a range of conditions. Selective herbal formulae from the Treatise on Cold Pathogenic Diseases (Shanghan Lun) and the Synopsis of Golden Chamber (Jingui Yaolue) are explored in depth to demonstrate the clinical applications.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl7007/>)**CMPL 7008 Clinical Applications of Classical Acupuncture (10 Credit Points)****Legacy Code:** 401131

This unit presents the origin, development and features of classical acupuncture and reveals the clinical outcomes based on the latest clinical observation and research. This unit will appeal to practitioners seeking to extend and deepen their knowledge and clinical skills with traditional acupuncture and to practitioners embarking on research in this area. Ancient acupuncture theories and techniques will be taught with a focus on their application to contemporary practice based on latest research and on the different theoretical approaches in the design of acupuncture point prescriptions.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** CMPL 7001 - Advanced Acupuncture**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl7008/>)**CMPL 7009 Clinical Oncology and Chinese Medicine (10 Credit Points)****Legacy Code:** 401136

This unit is focused on the clinical application of Chinese herbal medicine (CHM) and acupuncture in the management of cancer. Today, cancer is one of the leading causes of death and disease burden. Survival rates for many types of cancer have improved in recent years and long-term survival challenges accepted practices in cancer care and management. This unit explores application of Chinese medicine to the management of cancer, through the ancient wisdom in the classic literature recourses and contemporary clinical practice and research. The unit addresses the commonly used strategies, approaches and roles of Chinese medicine at different stages of cancer as well as the use of Chinese medicine as a supplementary therapy for common types of cancer.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl7009/>)

CMPL 7010 Clinical Placement (20 Credit Points)**Legacy Code:** 401133

This unit provides four weeks of full-time (or part-time equivalent) clinical placement with a choice of clinical training in the defined specialty areas (women's health, musculoskeletal health, mental and neurological disorders, oncology, or chronic and complex diseases). The clinical placement is with experienced specialist practitioners provided in conjunction with the Beijing University of Chinese Medicine in China or by an approved alternative arrangement with the student and limited by available opportunities.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** CMPL 7025 OR

CMPL 7016 OR

CMPL 7009 OR

CMPL 7005

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl7010/>)**CMPL 7011 Dermatology in Chinese Medicine 1 (10 Credit Points)****Legacy Code:** 400572

This unit along with Dermatology in Chinese Medicine 2 will enable practitioners to develop an in-depth understanding of Traditional Chinese Medicine (TCM) diagnosis and management of a wide range of skin diseases using acupuncture and Chinese herbal medicine. This unit includes orthodox medical diagnosis and management of common skin disorders and the integration of this with TCM theory, diagnosis and management. Dermatology in Chinese Medicine 1 and 2 together provide a strong specialist clinical focus on the management of skin disorders with Chinese medicine.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl7011/>)**CMPL 7012 Evidence Based Practice in Chinese Medicine (10 Credit Points)****Legacy Code:** 401129

This unit will introduce and develop the concepts and principles of evidence-based practice as applied to Traditional Chinese Medicine (TCM) and explore specific aspects of research development. Furthermore, this unit will focus on the clinical applications of such research-based evidence and highlight integrative methods combining TCM and biomedical diagnostics and disease management. Students will gain an understanding of the complexities, practicality, and applied methodologies used in research to establish the validity and reliability of TCM theories, diagnostics and interventional techniques in addition to the appropriateness of various outcome measures for research and clinical practice. This unit will provide students with a practical skillset designed to facilitate location, evaluation, integration, and application of scientific research evidence in clinical practice whilst also preparing students for development of research proposals in subsequent units such as Research Protocol Design & Practice.

Level: Postgraduate Coursework Level 7 subject**Incompatible Subjects:** CMPL 7013 - Evidence Based Practice in Chinese Medicine 1 CMPL 7014 - Evidence Based Practice in Chinese Medicine 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl7012/>)**CMPL 7013 Evidence Based Practice in Chinese Medicine 1 (10 Credit Points)****Legacy Code:** 400567

This unit will provide the student with the opportunity to develop the skills necessary to search, understand and critically appraise scientific literature related to Chinese medicine. Basic research methods will be introduced sufficient to support the student through this unit. This unit will introduce and develop concepts and principles of evidence-based practice applied to Chinese medicine and explore specific research developments in Chinese medicine.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl7013/>)**CMPL 7014 Evidence Based Practice in Chinese Medicine 2 (10 Credit Points)****Legacy Code:** 400568

This unit will focus on the integration of Traditional Chinese Medicine (TCM) and Western medicine in the diagnosis and management of disease. A significant focus of this unit will be on the interpretation and integration of medical diagnostic tests with TCM diagnosis, and will include an examination of the research that attempts to validate TCM theory and diagnostic techniques. Students will learn how to integrate and prioritise clinical information and undertake the development of a research proposal.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl7014/>)**CMPL 7015 Mental and Neurological Disorders and Chinese Medicine (10 Credit Points)****Legacy Code:** 401135

This unit will enable practitioners to extend their understanding of Chinese Medicine management of a range of mental health conditions and neurological disorders. The clinical focus is on the Chinese Medicine diagnosis and management of these disorders and integration with the orthodox biomedical approaches to disorders that are common in the community. Chinese Medicine treatment will focus on acupuncture and Chinese herbal medicine treatments. Students will learn to apply Chinese Medicine's unique understanding and contribution to the rehabilitation of those who have suffered from disabling psychological/psychiatric and neurological diseases.

Level: Postgraduate Coursework Level 7 subject**Incompatible Subjects:** NATS 7036 - Mental Health in Chinese Medicine NATS 7038 - Neurological Disorders in Chinese Medicine**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl7015/>)

CMPL 7016 Musculoskeletal Health in Chinese Medicine (10 Credit Points)**Legacy Code:** 401134

This unit will enable practitioners to develop an in-depth understanding of the diagnosis and management of musculoskeletal conditions with acupuncture and Chinese herbal medicine. This unit presents a systematic approach to the assessment of musculoskeletal disorders using Traditional Chinese Medicine (TCM), the application of specific medical tests and includes a focus on common musculoskeletal disorders, sports injuries and rehabilitation. Musculoskeletal Health in Chinese Medicine provides a strong specialist clinical focus on the management of musculoskeletal health disorders with acupuncture and Chinese herbal medicine.

Level: Postgraduate Coursework Level 7 subject**Incompatible Subjects:** CMPL 7017 - Musculoskeletal Health in Chinese Medicine 1 CMPL 7018 - Musculoskeletal Health in Chinese Medicine 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl7016/>)**CMPL 7019 Pharmacology of Chinese Medicines (10 Credit Points)****Legacy Code:** 400569

This unit will introduce the student to the pharmacology and toxicology of Chinese herbal medicine. The unit will cover the pharmacological principles of Chinese herbal medicines and identify basic active constituents that contribute to the actions of Chinese herbal medicines. This unit will also introduce safety and toxicology of herbal medicines including mechanisms and measurement of toxicity, known potential adverse reactions of commonly used Chinese herbs, known potential interactions with Western pharmaceuticals and management of adverse events.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl7019/>)**CMPL 7020 Research Project and Thesis (30 Credit Points)****Legacy Code:** 401138

This unit requires students to complete a substantial piece of independent research in Chinese Medicine including research planning, study design, data collection, analysis and interpretation. Dissertation projects are developed in consultation with staff who possess similar research interests and relevant research experience. Students may wish to submit their work for examination in a form suitable for publication in the peer-reviewed literature (with supplementary material as appropriate).

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** CMPL 7012 AND

PUBH 7016 OR

HLTH 7008

Co-requisite(s): AGEN 7005**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl7020/>)**CMPL 7021 Specialities in Traditional Chinese Medicine 1 (PG) (10 Credit Points)****Legacy Code:** 400919

This unit provides learning experiences that enable the health professional to analyse, diagnose and treat common gynaecological diseases and musculoskeletal conditions using a TCM approach with acupuncture and Chinese herbal medicine. Students will develop a good understanding of the causes and pathophysiological mechanisms of common gynaecological diseases and musculoskeletal conditions.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** CMPL 7003**Incompatible Subjects:** LGYA 7248 - Specialities in Traditional Chinese Medicine**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl7021/>)**CMPL 7022 Specialities in Traditional Chinese Medicine 2 (PG) (10 Credit Points)****Legacy Code:** 400923

The specialties of pediatrics, dermatology, ear, nose, throat (ENT) and eye diseases, are important divisions of TCM activity. This unit enables students to develop an understanding of the aetiology and pathophysiology of common paediatric, dermatological, ENT and eye disorders, and to analyze, diagnose and treat these conditions using acupuncture and Chinese herbal medicine.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** CMPL 7003**Incompatible Subjects:** LGYA 7259 - Specialities in Traditional Chinese Medicine 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl7022/>)**CMPL 7023 Traditional Chinese Medicine Practice 3 (PG) (10 Credit Points)****Legacy Code:** 400920

This unit represents a continuation of the clinical practicum and development of clinical skills. Students will also be able to apply their knowledge of professional theory, practice, research and evaluation skills to the investigation of Traditional Chinese Medicine (TCM) problems. Students will be expected to demonstrate competence in handling patients in a clinical context, synthesise knowledge from their studies of specialities in TCM and critically examine the practical aspects of acupuncture and Chinese herbal medicine research. Students will also learn basic knowledge of health preservation and enhancement including lifestyle, diet and physical exercise.

Level: Postgraduate Coursework Level 7 subject**Incompatible Subjects:** LGYA 7249 - Traditional Chinese Medicine Practice (Research Project)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl7023/>)

CMPL 7024 Traditional Chinese Medicine Practice 4 (PG) (10 Credit Points)**Legacy Code:** 400924

This unit represents a continuation of the clinical practicum and development of clinical skills. Students will be able to integrate their theoretical knowledge, practice skills and research base to the investigation, diagnosis and supervised treatment of patients in a clinical context. Students will be able to synthesise knowledge and competency in the practice of clinical areas of focus taught in Chinese Medicine I and II, and Specialties in TCM I and II. Students will be expected to demonstrate professional competence in handling patients in a clinical context, diagnosing more complex cases and devising and managing the integrated care of patients using TCM.

Level: Postgraduate Coursework Level 7 subject**Incompatible Subjects:** LGYA 7255 - Traditional Chinese Medicine Practice 4**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl7024/>)**CMPL 7025 Women's Health in Chinese Medicine (10 Credit Points)****Legacy Code:** 401132

This unit will enable practitioners to extend their understanding of Chinese Medicine management of a range of women's health conditions. The clinical focus of this unit is on the integration of Chinese Medicine and conventional therapies in the treatment of disorders of the menstrual cycle, obstetric disorders, fertility, menopause and breast disease.

Level: Postgraduate Coursework Level 7 subject**Incompatible Subjects:** CMPL 7026 - Womens Health in Chinese Medicine 1 AND CMPL 7027 - Womens Health in Chinese Medicine 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl7025/>)**CMPL 7026 Women's Health in Chinese Medicine 1 (10 Credit Points)****Legacy Code:** 400570

This unit enables practitioners to extend their understanding of a range of gynaecological and obstetric disorders and to diagnose and treat these using acupuncture and patent herbal medicines. The clinical focus of this unit is on the integration of Traditional Chinese Medicine (TCM) in the treatment of disorders of the menstrual cycle, obstetric disorders, menopause and breast disease.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** CMPL 7026 - Women's Health in Chinese Medicine 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl7026/>)**CMPL 7027 Women's Health in Chinese Medicine 2 (10 Credit Points)****Legacy Code:** 400571

This unit enables practitioners to extend their understanding of a range of gynaecological and obstetric disorders and to diagnose and treat these primarily using Chinese herbal medicine. The clinical focus of this unit is on the integration of Traditional Chinese Medicine (TCM) in the treatment of complex disorders of the menstrual cycle, infertility, obstetric disorders, menopause, pelvic and breast disease.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** CMPL 7027 - Women's Health in Chinese Medicine 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl7027/>)**CMPL 9001 HDR Thesis - Centre for Complementary Medicine (20 Credit Points)****Legacy Code:** 800138**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl9001/>)**CMPL 9002 Higher Degree Research Thesis - Traditional Chinese Medicine (20 Credit Points)****Legacy Code:** 800105**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/cmpl9002/>)

Computer Science (COMP)

COMP 0001 Introductory Programming (WSTC Prep) (10 Credit Points)**Legacy Code:** 700204

The unit introduces students to computer programming as an essential tool for problem-solving and data analysis in engineering and science. The focus is on using an algorithmic approach to problem solving. Students will learn how to analyse and solve problems by designing an algorithm and implementing it in a high-level programming language. This unit includes extensive practical work and problem-solving activities. It prepares students for the first year unit, Engineering Computing, in the Bachelor programs in Engineering. Students will also be able to use their acquired programming skills to perform calculations, analyse data and create graphs for their projects and reports in other units.

Level: Undergraduate Level 0 Preparatory subject**Equivalent Subjects:** COMP 0002 - Introductory Programming (UWSC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp0001/>)**COMP 0002 Introductory Programming (WSTC) (10 Credit Points)****Legacy Code:** 900084**Level:** Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp0002/>)**COMP 0003 Programming Design (WSTC Prep) (5 Credit Points)****Legacy Code:** 700047

This unit introduces students to the principles required for the effective design and development of solutions to computer program related problems. This unit has been developed to enhance a student's practical ability as well as build a solid theoretical foundation for further study in programming.

Level: Undergraduate Level 0 Preparatory subject**Equivalent Subjects:** LGYB 0451 - Programming Design (UWSCDip)

COMP 0004 - Programming Design (UWSC)

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp0003/>)

COMP 0004 Programming Design (WSTC) (5 Credit Points)**Legacy Code:** 900009

Programming Design introduces students to the principles required for the effective design of solutions to computer program related problems. The course has been developed to enhance a student's practical ability as well as build a solid theoretical foundation for further study.

Level: Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp0004/>)**COMP 1001 3D Modelling Fundamentals (10 Credit Points)****Legacy Code:** 301164

This unit will introduce the fundamentals of 3D surface modelling. Students will learn the theory of 3D surface modelling and will gain practical skills in creating 3D assets using a popular software package from Autodesk. They will also learn how to design characters and how to integrate their assets with a purpose of producing complex 3D scenes and animated movies. This unit is aimed at students who have no prior knowledge of 3D modelling and are not familiar with associated software packages.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp1001/>)**COMP 1002 Advanced Computer Science Activities 1 (0 Credit Points)****Legacy Code:** 300586

This unit is only for Bachelor of Computer Science (Advanced) students in year one of their studies. Students will participate in industry and research based extension activities (non-assessable). These activities will be identified with the goal of exposing students early in their degree and integrating them into a culture of academic enquiry, problem solving, knowledge generation and scholarship and an awareness of the challenges and current issues confronting the computing/IT industry. The unit will be used to record student activities and a satisfactory/unsatisfactory grade will be applied at the end of each semester.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp1002/>)**COMP 1005 Programming Fundamentals (10 Credit Points)****Legacy Code:** 300580

As a first unit in computer programming, Programming Fundamentals covers the basics of developing software with an emphasis on procedural programming. Students will learn about basic data structures, the concept of algorithms, fundamental programming constructs, common programming language features and functions, program design and good programming style. A high level programming language is combined with a highly visual framework to teach problem solving using software.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** COMP 1004 - Fundamentals of Programming LGYA 5799 - Programming Principles 1 LGYA 4364 - Business Application Development 1 COMP 1006 - Programming Fundamentals (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp1005/>)**COMP 1006 Programming Fundamentals (WSTC) (10 Credit Points)****Legacy Code:** 700008

As a first unit in computer programming, Programming Fundamentals covers the basics of developing software with an emphasis on procedural programming. Students will learn about basic data structures, the concept of algorithms, fundamental programming constructs, common programming language features and functions, program design and good programming style. A high level programming language is combined with a highly visual framework to teach problem solving using software.

Level: Undergraduate Level 1 subject**Pre-requisite(s):** Students enrolled in 7067 Diploma in Information and Communications Technology Extended must pass LANG 0002 Academic Communication 2 (WSTC Prep) or LANG 0032 English for Tertiary Study 2 (WSTC Prep) or LANG 0039 Introduction to Academic Communication 2 (WSTC Prep) and must pass INFO 0008 Computer Studies (WSTC Prep) and must pass COMP 0003 Programming Design (WSTC Prep) and must pass MATH 0008 Mathematics 2 (WSTC Prep) before enrolling in this unit

Students enrolled in 6035 Diploma Bachelor of Information and Communications Technology 6036 Diploma in Information and Communications Technology Bachelor of Information Systems and 7005 Diploma in Information and Communications Technology must pass COMP 0003 Programming Design (WSTC Prep) before enrolling in this unit

Students enrolled in 6038 Dip in Information and Communications Technology BICT(HIM) 6039 Diploma in Information and Communications Technology BICT 6040 Diploma in Information and Communications Technology BIS 7067 Diploma in Information and Communications Technology Extended 7134 Diploma in Information and Communications Technology Extended - ICT 7138 Diploma in Information and Communications Technology Extended-ICT 7139 Diploma in Information and Communications Technology Extended 7140 Diploma in Information and Communications Technology Extended IS 7141 Diploma in Information and Communications Technology Extended-HIM 7163 Diploma in Information and Communications Technology (International) and 7164 Dip Information and Communications Technology (HIM) (International) must pass COMP 0003 Programming Design (WSTC Prep) and must pass MATH 0008 Mathematics 2 (WSTC Prep) before enrolling in this unit

Equivalent Subjects: COMP 1004 - Fundamentals of Programming LGYA 5799 - Programming Principles 1 LGYA 4364 - Business Application Development 1 COMP 1005 - Programming Fundamentals**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp1006/>)

COMP 1012 Programming Fundamentals (UG Cert) (10 Credit Points)

As a first unit in computer programming, Programming Fundamentals covers the basics of developing software with an emphasis on procedural programming. Students will learn about basic data structures, the concept of algorithms, fundamental programming constructs, common programming language features and functions, program design and good programming style. A high-level programming language is combined with a highly visual framework to teach problem solving using software.

Level: Undergraduate Level 1 subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comp2001/>)

COMP 2003 Computer Algebra (10 Credit Points)

Legacy Code: 301031

This unit will introduce the popular computational software Mathematica, through which students will explore and investigate real-world mathematical problems. The unit promotes an experimental side of mathematics and will employ symbolic computation to gain insight and intuition into problems, to discover mathematical patterns and relationships, and create impressive graphics to expose mathematical structures.

Level: Undergraduate Level 2 subject

Pre-requisite(s): MATH 1014

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comp2003/>)

COMP 2004 Computer Networking (10 Credit Points)

Legacy Code: 300565

Computer Networking is an introductory unit in computer systems networking. It covers basic networking technologies, Ethernet fundamentals, ISO OSI model, routing, switching and subnetting, the Internet architecture, networking protocols including TCP/IP, important OSI layer 2 and 3 networking device fundamentals, basic network management and security issues. This unit is also the first of three units, which will prepare students for industry based networking certification (CCNA).

Level: Undergraduate Level 2 subject

Equivalent Subjects: COMP 2007 - Computer Networking Fundamentals LGYA 5739 - Applied Data Communications and Networking

COMP 2006 - Computer Networking (WSTC)

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comp2004/>)

COMP 2005 Computer Networking (Advanced) (10 Credit Points)

Legacy Code: 300946

This unit introduces students to computer systems networking. It covers basic networking technologies, Ethernet fundamentals, ISO OSI model, routing, switching and subnetting, the Internet architecture, networking protocols including TCP/IP, important OSI layer 2 and 3 networking device fundamentals, basic network management and security issues. This unit is also the first of three units, which will prepare students for industry based networking certification (CCNA). Students in this advanced unit will be required to undertake individual assessment activities demonstrating a high level of technical and applied theoretical competency.

Level: Undergraduate Level 2 subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comp2006/>)

COMP 2008 Computer Organisation (10 Credit Points)**Legacy Code:** 300096

This unit is designed for computer science students, particularly those interested in systems programming and hardware development. The students will learn about the interface between the hardware and software of a computer system. This will involve study of some aspects of computer architecture and low level interfacing to gain an insight into central processing unit (CPU) organisation at the assembly language level. After completing this unit students will be able to write procedures in an assembly language, use their understanding of the relationship between the instruction set architecture and the implementation of high level languages to write efficient programs.

Level: Undergraduate Level 2 subject

Pre-requisite(s): ENGR 1045 Engineering Programming Fundamentals. The following pre-requisite unit applies to course 3771 only. The following pre-requisites apply to all courses except 3771

COMP 1005 Programming Fundamentals OR
ELEC 1006 Engineering Computing AND
MATH 1006 Discrete Mathematics OR
MATH 1016 Mathematics for Engineers 1

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comp2008/>)

COMP 2009 Data Structures and Algorithms (10 Credit Points)**Legacy Code:** 300103

This unit introduces students to fundamental data structures and algorithms used in computing. The material covered forms the basis for further studies in programming and software engineering in later units and for further training in programming skills. The unit focuses on the ideas of data abstraction and algorithm efficiency. The issues of computational complexity of algorithms are addressed throughout the semester. The topics covered include the fundamental abstract data types (lists, stacks, queues, trees, hash tables, graphs), recursion, complexity of algorithms, sorting and searching algorithms, binary search trees and graphs.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** COMP 2014 OR

COMP 2015 OR

COMP 2016 OR

ENGR 1045

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comp2009/>)

COMP 2011 Games Technology (10 Credit Points)**Legacy Code:** 300491

This unit provides an introduction to the game industry as well as introducing students to the techniques of game design and construction. Students will be exposed to the history of game development and the key aspects of different genres of computer games.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LGYA 5804 - Client Server Applications

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comp2011/>)

COMP 2013 LAN Workshop (10 Credit Points)**Legacy Code:** 300138

This unit provides students with the knowledge and skills necessary to install, test, tune, customise, repair and maintain networking hardware and software necessary to create a Local Area Network (LAN). Students also learn how to administer a LAN by setting up user accounts, access privileges, security procedures and back-up/recovery procedures.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LGYA 6157 Networking Workshop

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comp2013/>)

COMP 2014 Object Oriented Programming (10 Credit Points)**Legacy Code:** 300147

This unit presents the concepts and principles of programming languages with the emphasis on object oriented paradigm. It addresses the importance of the separation of behaviour and implementation as well as effective use of encapsulation, inheritance and polymorphism. The students will gain intensive training in programming skills with supervised laboratory sessions and task oriented assignments.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** COMP 1005 OR

ENGR 1045

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comp2014/>)

COMP 2015 Programming Techniques (10 Credit Points)**Legacy Code:** 300581

This unit is intended as a second unit of study in programming. It builds on a basic understanding of procedural programming as would be developed in a first unit. This unit continues the development of programming skills and methodologies required for professional programming and for further study in later computing units. Topics covered include multi-dimensional arrays, file I/O, searching and sorting, and an introduction to object-oriented programming involving classes and inheritance.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** COMP 1005**Equivalent Subjects:** LGYA 5800 - Programming Principles 2
COMP 2017 - Programming Techniques (WSTC)**Incompatible Subjects:** COMP 2016 - Programming Techniques (Advanced)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp2015/>)**COMP 2016 Programming Techniques (Advanced) (10 Credit Points)****Legacy Code:** 300903

This unit builds on a basic understanding of procedural programming developed in previous units. Students continue to develop their programming skills and methodologies required for professional programming and for further study in later computing units. Topics covered include multi-dimensional arrays, file I/O, searching and sorting, and an introduction to object-oriented programming involving classes and inheritance. Students in this advanced unit will also investigate and apply advanced concepts such as function overloading and recursion.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** COMP 1005**Incompatible Subjects:** COMP 2015 - Programming Techniques**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp2016/>)**COMP 2017 Programming Techniques (WSTC) (10 Credit Points)****Legacy Code:** 700257

This unit is intended as a second unit of study in programming. It builds on a basic understanding of procedural programming as would be developed in a first unit. This unit continues the development of programming skills and methodologies required for professional programming and for further study in later computing units. Topics covered include multi-dimensional arrays, file I/O, searching and sorting, and an introduction to object-oriented programming involving classes and inheritance.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** COMP 1006**Equivalent Subjects:** COMP 2015 - Programming Techniques LGYA 5800 - Programming Principles 2**Incompatible Subjects:** COMP 2016 - Programming Techniques (Advanced)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp2017/>)**COMP 2018 Simulation Fundamentals (10 Credit Points)****Legacy Code:** 301167

In the last couple of decades computer modelling and simulation has evolved into an important discipline used in nearly every aspect of life from computer games to banking. What was once a tool for training pilots is now a capability to better understand human behaviour, enterprise systems, disease proliferation, and much more. This is an introductory, problem-based unit, where students will learn by doing. Students will acquire ability to use different simulation methodologies and tools such as InsightMaker and AnyLogic to build new insights into the world around you and learn how to share these insights effectively with others.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp2018/>)**COMP 2019 Systems Programming 1 (10 Credit Points)****Legacy Code:** 300167

This unit provides an introduction to the knowledge and skills required for the design, writing and support of technical software and other such functions normally falling within the role of the systems programmer. It provides for detailed study of a systems programming environment and its application to systems programming tasks.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** COMP 2015 OR

COMP 2016 OR

COMP 2020 OR

COMP 2014 OR

ELEC 1006 AND

ELEC 1001

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp2019/>)**COMP 2020 Technologies for Web Applications (10 Credit Points)****Legacy Code:** 300582

Building on material covered in Programming Fundamentals this unit introduces students to some of the key technologies for developing interactive and dynamic web applications from both the client and server perspective. The unit covers web site design, web site development, web page accessibility and usability, HTML, CSS, client side and server side scripting, database interaction, web site promotion (Search Engine Optimisation) and web security.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** COMP 1005**Equivalent Subjects:** COMP 2012 - Interactive Web Site Development**Incompatible Subjects:** LGYA 5748 - Creating and Managing Web Sites**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp2020/>)

COMP 2021 Software Engineering Fundamentals (10 Credit Points)

This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This unit provides an introduction to software engineering principles including basic software lifecycle concepts, modern development methodologies, conceptual modelling and how these activities relate to programming. Students apply this knowledge together with essential team-based project management to design, build and deploy a simple web-based application.

Level: Undergraduate Level 2 subject

Pre-requisite(s): ENGR 1045

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comp2021/>)

COMP 2023 Mathematical Programming (10 Credit Points)

This unit will introduce the programming language Python, through which students will explore and investigate practical mathematical problems. Python is one of the most powerful versatile programming languages, and it is increasingly used by engineers and scientists as well as banks and financial institutions to tackle their computational problems. The unit promotes an experimental side of mathematics and will employ Python-based computational tools to gain insight and intuition into problems, to discover mathematical patterns and relationships, and to use visualisation techniques to expose mathematical structures.

Level: Undergraduate Level 2 subject

Equivalent Subjects: COMP 2003 Computer Algebra

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comp2023/>)

COMP 2024 Computer Networking (UG Cert) (10 Credit Points)

This is an introductory unit in computer systems networking. It covers basic networking technologies, Ethernet fundamentals, ISO OSI model, routing, switching and sub-netting, the internet architecture, networking protocols, including TCP/IP, important OSI layer 2 and 3 networking device fundamentals, basic network management and security issues. This unit is also the first of three units which will prepare students for industry-based networking certification (CCNA).

Level: Undergraduate Level 2 subject

Equivalent Subjects: COMP 2004 Computer Networking COMP 2007 Computer Networking Fundamentals LGYA 5739 Applied Data Communications and Networking COMP 2006 Computer Networking

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comp2024/>)

COMP 3001 Advanced Computer Science Activities 3 (0 Credit Points)

Legacy Code: 300588

This unit is only for Bachelor of Computer Science (Advanced) students in year three of their studies. Students will participate in industry and research based extension activities (non-assessable). These activities will be identified with the goal of exposing students early in their degree and integrating them into a culture of academic enquiry, problem solving, knowledge generation and scholarship and an awareness of the challenges and current issues confronting the computing/IT industry. The unit will be used to record student activities and a satisfactory/unsatisfactory grade will be applied at the end of each semester.

Level: Undergraduate Level 3 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comp3001/>)

COMP 3002 Applications of Big Data (10 Credit Points)

Legacy Code: 301110

Many techniques and tools have been developed over the past decade to cope with the ever-growing needs for the processing and analysis of big data. This unit will cover the key techniques that have been widely used in big data applications, such as relational and Not Only Structured Query Language (NoSQL) databases, Web Services, parallel and cloud computing, MapReduce, Hadoop and its eco-system. It aims to introduce the emerging technologies and applications in big data to students, and keep up with the latest trends in the industry.

Level: Undergraduate Level 3 subject

Pre-requisite(s): MATH 1002 OR COMP 1005

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comp3002/>)

COMP 3003 Cloud Computing Architecture (10 Credit Points)

Legacy Code: 301204

This unit, the second part of the Amazon Web Services (AWS) Academy Cloud Computing Architecture curriculum, provides deeper understanding about advanced cloud computing services and how to architect cloud applications that are scalable, reliable, and efficient in terms of cost and performance. Students will learn advanced cloud computing concepts including notification and messaging, serverless computing, API gateways, NoSQL databases, content delivery networks, stream processing, and long-term storage. The unit also covers advanced cloud security and infrastructure automation. All these aspects are explored in practice with AWS services. Upon completion of this unit, students will be prepared for the AWS Certified Solutions Architect - Associate exam.

Level: Undergraduate Level 3 subject

Pre-requisite(s): COMP 3012 AND COMP 1005

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comp3003/>)

COMP 3006 Computer Graphics (10 Credit Points)**Legacy Code:** 300093

Computer Graphics will examine elementary graphics concepts, algorithms and programming skills for producing graphical applications, in both two-dimension (2D) and three-dimension (3D) using Open GL. Techniques and algorithms will be programmed in Processing, which is a very easy-to-learn programming language yet powerful and comprehensive.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** COMP 2014 OR

COMP 2015 OR

COMP 2016 OR

COMP 2020

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp3006/>)**COMP 3007 Computer Networks and Internets (10 Credit Points)****Legacy Code:** 300095

This unit extends on the work undertaken in the prerequisite unit and provides students with an in-depth explanation on the role of the architecture, components, and operations of routers and switches in a small network. Students will configure and troubleshoot routers and switches and resolve common issues with common routing protocols, virtual LANs, and inter-VLAN routing in both IPv4 and IPv6 networks. This is the second of three units that prepares the student for industry-based networking certification (CCNA).

Level: Undergraduate Level 3 subject**Pre-requisite(s):** COMP 2004 OR

COMP 2005

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp3007/>)**COMP 3009 Distributed Systems and Programming (10 Credit Points)****Legacy Code:** 300115

This unit covers the concepts, design, and programming of distributed systems. It builds on basic network communication protocols (specifically IP) to cover client server programming using both the system level socket interface and remote procedure calls. It also examines large scale distributed system architectures particularly those based on distributed objects and considers the complexities inherent in distributed transactions. Key concepts covered include data and algorithmic distribution, idempotent protocols, stateless and stateful servers, and distributed system transparency. Illustrative case studies are included.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** Successful completion of COMP 2004 Computer Networking and either COMP 2014 Object Oriented Programming or COMP 2015 Programming Techniques**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp3009/>)**COMP 3011 Internet Programming (10 Credit Points)****Legacy Code:** 300130

This unit offers students basic concepts and latest technologies of internet programming and web-based application development. Utilising one of the popular internet programming languages, such as Java, it aims to develop the programming skills and methodologies required for both client-side and server-side programming as well as general purpose programming. The range of topics covered by the unit includes HTML, XML, Java applets, desktop application in Java, servlets, JavaServer Pages and JDBC.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** COMP 2014 OR

COMP 2015 OR

ELEC 1006 OR

COMP 2016

Equivalent Subjects: LGYA 5876 - Internet Computing**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp3011/>)**COMP 3012 Introduction to Cloud Computing (10 Credit Points)****Legacy Code:** 301203

This unit, the first half of Amazon Web Services (AWS) Academy Cloud Computing Architecture curriculum, provides deep understanding of fundamental cloud computing concepts and how it can be applied to build cost-effective; highly available and fault tolerant systems. Students will learn concepts including system virtualisation; virtual machines; cloud networks; basic cloud storage and cloud databases; security in clouds; and auto-scaling, load balancing, and monitoring. All these aspects are explored in practice with AWS services.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** COMP 2004 OR

COMP 2005

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp3012/>)**COMP 3013 Mobile Applications Development (10 Credit Points)****Legacy Code:** 300960

This unit teaches technologies and programming languages for developing applications on common mobile platforms, such as Android and iOS. Students will learn skills for developing programs on the above platforms, along with in-class sample applications that highlight platform-specific implementation details.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** For students enrolled in 3687 Bachelor of Information Systems 3688 Bachelor of Information Systems Advanced 3744 Bachelor of Information Systems Bachelor of Business 3745 Bachelor of Information Systems Advanced Bachelor of Business 6036 Diploma in Information and Communications Technology Bachelor of Information Systems or 6040 Diploma in Information and Communications Technology Bachelor of Information Systems - COMP 2020 Technologies for Web Applications

COMP 3014 Networked Systems Design (10 Credit Points)**Legacy Code:** 300575

This unit builds on and consolidates the skills and knowledge gained in Computer Networking and Computer Networks and Internets. Students successfully completing this unit will acquire the necessary design skills and knowledge required to build and configure enterprise scale networks. The unit provides students with an opportunity to develop problem-solving techniques and decision-making skills to resolve networking issues. Students completing this unit and its prerequisites should also now be prepared to attempt world recognized network industry certification (CCNA).

Level: Undergraduate Level 3 subject**Pre-requisite(s):** COMP 3007**Equivalent Subjects:** LGYA 5741 - Broadband Networking**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp3014/>)**COMP 3015 Operating Systems Programming (10 Credit Points)****Legacy Code:** 300698

This unit provides the knowledge of the internal structure and functionality of Operating Systems. An operating system defines an abstraction of hardware behavior and provides a range of services more suitable for ICT application development than what raw hardware could deliver, in terms of convenience, efficiency and security. It is important that ICT Professionals have some understanding of how these services are realized. For ICT Professionals whose role includes supporting the operating system this unit provides the introduction to the relevant theory and practice.

Incompatible Subjects: LGYA 6233 - Operating Systems Programming
INFS 3014 - Operating Systems**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp3016/>)**COMP 3018 Professional Experience (10 Credit Points)****Legacy Code:** 300579

Professional Experience is a final year 'capstone' project unit. This unit provides opportunities for students to gain hands-on experience in software systems requirements definition, analysis, design and implementation, in a real-world setting. Students work in groups, guided by an academic supervisor or an industry mentor, in achieving the goals set by the client that provides the project. Suitable projects are sourced from external organisations or within Western Sydney University by way of giving the students professional experience in independent learning and reflective practice.

Professional Experience (Advanced) is a final year 'capstone' work-placement unit. This advanced unit provides the opportunity for students to gain hands-on experience in software systems requirements definition, analysis, design, implementation and project management, in an external organisation under the supervision of industry experts. During the work placement students work in a real-life project applying the theories and technical skills learned in previous units in an industry setting. Students are allowed to propose a work-placement of their choice within an external organisation. School will assess the suggested work-placement for its suitability in meeting the set unit outcomes, prior to approval.

COMP 3020 Social Web Analytics (10 Credit Points)**Legacy Code:** 300958

The Social Web provides everyone with a voice; information from Facebook, Twitter and other social networks allows us to identify trends and relationships in society. Whilst this has interest on a personal level, the killer-apps will be in analysing social Web data for business, such as tracking the buzz around a new product, and understanding the relationships between customers and products. This unit will introduce its students to the Social Web data that is available, and blend data science and machine learning concepts to allow extraction and analysis of such data.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** Students enrolled in 1837 Bachelor of Cyber Security and Behaviour must have successfully completed the following two units

MATH 2006 Experimental Design and Analysis AND MATH 1002 Analytics Programming

Students who are NOT enrolled in 1837 Bachelor of Cyber Security and Behaviour 3769 Bachelor of Data Science or 3770 Bachelor of Applied Data Science must have successfully completed one the following three units

MATH 1028 Statistical Decision Making OR MATH 1003 Biometry OR MATH 1030 Statistics for Business

Co-requisite(s): For students enrolled in courses 3769 Bachelor of Data Science or 3770 Bachelor of Applied Data Science

MATH 1033 Thinking About Data

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp3020/>)**COMP 3021 Special Effects Programming (10 Credit Points)****Legacy Code:** 301173

This unit will focus on develop programming code to write shaders to create special effects, such as fog, shadows, fire, water, clouds, lightning, motion blur and reflections. These type of shaders are often seen in games and movies. Students will also learn about generic programming algorithms involved in building special effects.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp3021/>)**COMP 3022 Systems Administration Programming (10 Credit Points)****Legacy Code:** 300165

This unit covers programming techniques and tools used to administer standalone and networked computer systems. The unit focuses on the use of high level interpretive scripting languages to automate everyday administrative tasks, and to monitor and control running systems. Techniques to extend scripting language capabilities by dynamic linking to compiled code are examined, particularly in terms of access to operating system level functions. The unit also examines the use of administrative programs and tools to monitor and adjust system performance and capacity.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** COMP 2019**Incompatible Subjects:** LGYA 6160 - Script programming**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp3022/>)**COMP 3023 Systems and Network Management (10 Credit Points)****Legacy Code:** 300166

With the advent of the era of Internet of Things, the Internet has become a huge infrastructure in which various kinds of systems are running to deliver a plethora of network services. To ensure the efficient utilization of network resources (e.g., bandwidth) and the convenient access to network services, systems and networks must be managed in a proper way. Facing this demand, this unit covers the standards, protocols and skills pertinent to the management of systems and networks. Moreover, this unit introduces Software Defined Networking (SDN), a new paradigm for conducting network management with programmability, flexibility and scalability.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** COMP 3007 OR COMP 3025**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp3023/>)**COMP 3024 Video Games Development (10 Credit Points)****Legacy Code:** 300862

This unit provides students with an in-depth understanding of the development and structure of game engines. It provides the student with a unifying overview of the many modules that are incorporated in a game engine as well as a detailed examination of game-play and engine programming.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** COMP 1005**Equivalent Subjects:** LGYA 6086 - Games Theory and Design**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp3024/>)**COMP 3025 Wireless and Mobile Networks (10 Credit Points)****Legacy Code:** 300952

This unit helps the students gain in depth knowledge in the core concepts and principles in the areas of wireless and cellular networks. It provides them with the technical skills needed to do requirement analysis and evaluate a range of wireless networked systems to plan their institution or expansion. The unit covers the communication characteristics and architecture of wireless systems along with various types of wireless networks, including wireless LANs, personal area networks, sensor networks, mesh networks, and broadband wireless networks. Given the widespread use of mobile phones and devices, a substantial part of the unit is devoted to the study of cellular networks. The unit also covers mobility management and wireless security issues and solutions. Upon completion of this unit, the students will have the capabilities needed for long term and independent learning in the rapidly evolving area of wireless and mobile networking.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** COMP 2004 OR COMP 2005**Equivalent Subjects:** LGYA 5741 - Broadband Networking**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp3025/>)

COMP 3027 Robotic Programming (10 Credit Points)**Legacy Code:** 301205

Robot Operating System (ROS) is a software integration system that is now widely used for robotics software deployment. The philosophy behind ROS is to modularise software that can work for other robots through small changes in the code. This unit focuses on the main concepts of software development under ROS by looking at the file hierarchical systems (e.g. Packages, Stacks, Messages, Services and others), module communication types through Nodes, Topics, Services, Messages, Bags, Master and how they integrate to operate robot sensors and actuators. This unit also looks at actual AI software examples using C++/Python and Answer Set Programming (ASP).

Level: Undergraduate Level 3 subject**Pre-requisite(s):** COMP 2014 Object Oriented Programming and COMP 2019 Systems Programming 1

OR

COMP 2014 Object Oriented Programming and COMP 3015 Operating Systems Programming

OR

MECH 4003 Mobile Robotics

This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This unit focuses on building students' knowledge in software design and construction. Students learn programming skills in a number of different languages, including JavaScript, shell programming, as well as the processes involved in software development. Students discover tools for version control, performance improvement, configuration and debugging with opportunities to apply their skills to a range of practical tasks.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ENGR 1045**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp3028/>)**COMP 3029 Software Engineering Industry Project (10 Credit Points)****Legacy Code:** 301349

This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This unit enables students to experience real-life involvement in designing and implementing a quality software system that conforms to stakeholder requirements in the domain of data analytics. It builds on the skills developed in previous project units in specifying requirements, managing projects, communicating, working in teams to achieve a completed system, and reinforces skills in software design, coding, testing, reporting and the use of support tools. Students integrate these skills while learning about the domain and professional ways to liaise with the stakeholder to develop appropriate requirements, documentation and a final product.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ELEC 2017 AND

ELEC 2019

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp3029/>)**COMP 3032 Machine Learning (10 Credit Points)**

Machine Learning is one of the most important technologies in the fields of Artificial Intelligence and Data Science used to explain large datasets, inform decisions and highlight risks. Machine Learning is relevant for solving a range of problems in many industries dealing with significant amounts of information and the structure of that information. In this unit, students put Machine Learning theory into action through widely used algorithms and practical applications for designing, training, and evaluating common learning models and systems. Students use Python programming and, as a result, learn about its important machine learning libraries and packages, such as Scikit-Learn, Keras and TensorFlow for solving practical problems and tasks.

This unit introduces how computing and communication can be performed by harnessing quantum phenomena such as superposition and entanglement. From a computer science perspective, this unit directly starts with the mathematical models delivered by those quantum phenomena while skipping the details of Quantum Mechanics. Based on these mathematical models, this unit introduces the concept of qubits and quantum circuits, and then discusses the design of quantum algorithms and communication protocols, with an emphasis on their applications in Cyber Security. Besides being highly mathematical, this unit is also highly practical: quantum programming will be done throughout the unit with a user-friendly quantum simulator. Students completing this unit will develop skills in designing quantum algorithms and protocols which will be highly sought after in the current and emerging job markets.

COMP 6001 Neuromorphic Algorithms and Computation (10 Credit Points)

Designing and implementing processing pipelines for event-based sensory data is a crucial skill for neuromorphic engineers to test novel hardware platforms or to develop new algorithms and learning mechanisms. This project-based unit focuses on principles of neuromorphic algorithm design and hardware-friendly neural architecture design for neuromorphic information processors. This unit consists of two streams of research: applied event-based algorithms and bio-inspired spiking networks. Through solving increasingly challenging tasks using distributed, event-based competitive processing elements, students will learn the differences between conventional and neuromorphic algorithm design, critically assessing real-world problems in a structured manner.

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comp6001/>)

COMP 6002 Neuromorphic Sensing (10 Credit Points)

Neuromorphic sensors offer a new way to electronically sense and process data that have a unique structure based on principles found in biology. Understanding how they operate is integral to their effective use in practical situations, to the development of algorithms, process their data, and to the optimisation of their electronic designs. This unit focuses primarily on neuromorphic vision sensors, which are rapidly being adopted by multiple industries, including exciting applications in automotive and space. Students will develop an in-depth understanding of neuromorphic sensors and the skills to operate a neuromorphic sensor for acquiring data and solving real-world problems. This practical experience is in high demand from both research labs and the industry.

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comp6002/>)

COMP 7001 Advanced Routing (20 Credit Points)

Legacy Code: 301065

As a Cisco Academy, Western Sydney University can offer students the opportunity to study the Cisco Certified Network Professional course Implementing Cisco IP Routing (ROUTE). This online unit will provide the knowledge, understanding and skills to deploy and manage a range of internal and external routing protocols for a large scale internetwork using Cisco equipment. Students will be expected to undertake individual research to contextualise Cisco in the broader networking environment. The unit provides hands-on lab experience via Netlabs?. If students successfully complete this unit they can progress to CCNP ROUTE certification.

Level: Postgraduate Coursework Level 7 subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comp7001/>)

COMP 7002 Advanced Topics in Networking (10 Credit Points)

Legacy Code: 300252

This unit focuses on the advanced features of networked systems and the emerging network technologies and services. The unit provides students with an in-depth understanding of relevant protocols, the emerging standards, and standards organisations. The emphasis of the unit is on development of the student skills to enable them to do proficient research and development works and studies in the computer networking discipline.

Level: Postgraduate Coursework Level 7 subject

COMP 7003 Big Data (10 Credit Points)

Legacy Code: 301046

"Big data" is the label for the ever-increasing gigantic amount of data with which humanity has to cope. The availability of data and the development of cloud computing architectures to process and analyse these data have made data analytics a central tool in our endeavours. This unit will introduce students to the realm of "big data", covering the important principles and technologies of retrieving, processing and managing massive real-world data sets. It is designed to provide the basic techniques required by any discipline that needs to make sense out of the growing amount of data, and to equip students with the knowledge and key set of skills set to be competitive in the growing job market in the analytics field.

COMP 7004 Cloud Computing (10 Credit Points)

Legacy Code: 301042

Cloud computing has become a driving force for information technology over the past several years, and it is moving towards a future in which we won't rely on local computers, but on centralised facilities operated by third-party compute and storage utilities. Governments, research institutes, and industry leaders are rushing to adopt Cloud Computing to solve their ever-increasing computing and storage problems arising in the Internet Age. This unit offers "Academy Cloud Foundations" (ACF) curriculum as part of Amazon Web Services (AWS) Academy. Students will develop knowledge and skills in the areas of virtualization technologies, cloud architecture, AWS core services and their pricing, security, architecture, and support.

Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/comp7004/>)

COMP 7006 Data Science (10 Credit Points)

Legacy Code: 301044

The explosion of data in the internet age opens up new possibilities for agencies and business to better serve and market to its customers. To take full advantage of these opportunities requires the ability to consolidate, manage and extract information from very large diverse data sets. In science, data sets are growing rapidly, with projects routinely generating terabytes of data. In this unit we examine the software tools and analytic methods that underpin a successful Data Science Project and gain experience in big data analytics.

COMP 7007 Information Security Management (10 Credit Points)**Legacy Code:** 301162

Cyber Crime costs are increasing at an alarming speed. Security management skills are now essential for IT management. This unit provides the knowledge, skills, techniques and mechanisms on information security management for postgraduate students. It covers topics on management aspects of information security such as business and Cybercrime, security awareness, security risks, security fundamentals, risk assessment and security system design, planning and regulatory issues for information system security.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp7007/>)**COMP 7008 Internet of Things (10 Credit Points)****Legacy Code:** 301175

The Internet of Things (IoT) is drastically changing the way organisations operate and how individuals interact with the world. IoT is an infrastructure consisting of fairly constantly communicating objects, or things, that may be smart and process or act on data. The IoT facilitates detailed and meaningful interactions between humans, digital devices, and many other industrial and household equipment, appliances, and things. The IoT is also the enabler of smart environments, including smart homes, buildings, cities, transport, and healthcare, among many others. This unit discusses IoT technologies and applications in detail. It also introduces the students to trends, challenges, and key research topics in relevant areas.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp7008/>)**COMP 7009 Mobile Computing (10 Credit Points)****Legacy Code:** 301043

This unit teaches technologies and programming languages for developing applications on common mobile platforms, such as Android and iOS. Students will learn skills for developing programs on the above platforms, along with in-class sample applications that highlight platform - specific implementation details.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** Students enrolled in 2761 Master of Business Administration Information and Communication Technology specialisation must have successfully completed COMP 7015 Programming Proficiency and INFS 7007 Systems Analysis and Database Management Systems

Students enrolled in all other courses must have successfully completed INFS 7009 Web Technologies

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp7009/>)**COMP 7011 Multimedia Communication Systems (10 Credit Points)****Legacy Code:** 300256

This unit covers advanced concepts and technologies used in emerging multimedia communication systems. Theory, practice and standards for IT professionals endeavouring to build data compression systems for multimedia applications are emphasised.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp7011/>)**COMP 7012 Network Management (10 Credit Points)****Legacy Code:** 300255

The performance of any modern organization is heavily dependent on their networked systems and how these systems are managed. The increasing demand for ICT services and the huge growth of the Internet have resulted in large heterogeneous networks. This unit addresses the issues relevant to management of such networks and the services that run on them. It covers the principles and current practices pertinent to integrated management of networks, systems, and services. The unit helps the students to understand relevant protocols, standards, and standards organizations. It also introduces them to trends and key research areas in management of networked systems.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 9360 - Management of Networked Systems**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp7012/>)**COMP 7013 Network Technologies (10 Credit Points)****Legacy Code:** 300695

Computer networking is one of the fastest growing technologies of our time. The Internet interconnects billions of computers providing many new exciting opportunities and challenges. The Internet and the World Wide Web have provided the communication and infrastructure needed for global collaboration and information exchange. As a result of the rapid growth of networked systems and the diverse applications that run on them, success in many professions depends on a sound understanding of the technologies underlying these systems and applications. This unit explores these issues and provides the students with such an understanding. It covers the principles and current practices pertinent to computer networking and communications. It describes some of the important technologies and devices used in modern networks for information distribution and data sharing. The unit helps the students to understand important models, protocols and standards in networking and internetworking.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 5883 - Network Technology and Data Communications**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp7013/>)**COMP 7014 Optimising Networks (20 Credit Points)****Legacy Code:** 301067

As a Cisco Academy, Western Sydney University can offer this Cisco Certified Network Professional course, 'Troubleshooting and Maintaining Cisco IP Networks' (TSHOOT). Cisco Systems are worldwide leaders in networking technologies, for telecommunication, corporate and private networking. This online unit will provide the knowledge, understanding and skills to troubleshoot communication on large-scale data networks using Cisco equipment and extend your research skills. Students will be provided with hands-on lab experience via Netlabs?. Students who successfully complete this module can progress and complete the CCNP TSHOOT certification with Cisco.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** COMP 7001 AND COMP 7010**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp7014/>)

COMP 7015 Programming Proficiency (10 Credit Points)**Legacy Code:** 301038

This unit is aimed at the students whose undergraduate study is in a discipline other than computing or information technology. This unit first covers the programming fundamentals on data types, conditional selections and loop structures, and then further develops the problem solving skills through the use of user-defined functions, records, files, as well as the basic concept and techniques of object-oriented programming. A high level programming language is employed to implement all the problem solutions.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp7015/>)**COMP 7016 Visualisation (10 Credit Points)****Legacy Code:** 301112

This unit introduces the fundamentals and technologies of information visualisation. It covers the major concepts of information visualisation, human-computer perception and methods for visual data analysis. Students will learn the knowledge and skills required for identifying suitable visualisation techniques and tools appropriate for various data types and applications. The unit provides students with opportunities to explore recent research in the visualisation field.

Level: Postgraduate Coursework Level 7 subject**Incompatible Subjects:** MATH 2014 Visual Analytics**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp7016/>)**COMP 7017 Wireless Networking (10 Credit Points)****Legacy Code:** 300389

Wireless technologies are amongst the most exciting and rapidly growing areas in computing and information technology. They implement applications that profoundly impact our personal way of communication, as well as how business in a variety of industries and organisations are conducted. This unit goes into details of such issues. It discusses wireless networking technologies and their related applications. The main features of wireless and mobile communication systems and the networked services that are based on these systems are also presented. The unit provides students with an in-depth understanding of relevant protocols, the emerging standards and standard organisations. The students are also introduced to some of the relevant current key research issues of the field.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp7017/>)**COMP 7018 Advanced Cloud Computing (10 Credit Points)****Legacy Code:** 301363

This unit offers the Amazon Web Services (AWS) Academy "Academy Cloud Architecting" (ACA) curriculum and provides deeper understanding of advanced cloud computing services and how to architect cloud solutions. Students will learn advanced cloud computing concepts including notification and messaging, serverless computing, API gateways, NoSQL databases, and content delivery networks. The unit also explores strategies to enable high scalability, reliability, cost-efficiency, performance, and operational excellence in a cloud-based system. All these aspects are explored in practice with AWS services. Upon completion of this unit, students will be prepared for the AWS Certified Solutions Architect - Associate exam.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** COMP 7004**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp7018/>)**COMP 7019 Applied Machine Learning (10 Credit Points)****Legacy Code:** 301312

This unit introduces the foundation and concepts underpinning Machine Learning (ML) at a more abstract level, and provides more focus on its practical applications in areas such as: the classification and extraction of text data from various documents and web pages, image processing, Google's PageRank algorithm and relational data mining (RDM). These learning objectives are achieved through various ML software and a series of practicals and projects. The unit covers the concepts and notions of supervised, unsupervised and reinforcement learning, perceptron, neural networks, support vector machines (SVM), knowledge representation (KR) based RDM, and a comprehensive introduction to the Scikit-learn ML Python libraries.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp7019/>)**COMP 7020 Artificial Intelligence Ethics and Organisations (10 Credit Points)****Legacy Code:** 301314

Artificial Intelligence Ethics and Organisations provides students with a comprehensive grounding in the ethical issues of AI technologies. Students will learn about the relevant laws, regulations and policies with respect to AI ethics, and the existing framework and research trend in the field. With a series of case studies, students will learn how to apply general principles and guidelines in practice. They will also learn to identify potential risks and impacts, to ensure AI ethics are followed in different circumstances regarding data governance, automatic decisions, predictive analytics, autonomous system design and deployment, and structure changes of labour markets.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp7020/>)

COMP 7021 Knowledge Representation and Reasoning (10 Credit Points)**Legacy Code:** 301315

Knowledge representation and reasoning is one of the fundamental components of Artificial Intelligence. It studies ways to represent and reason about human knowledge effectively in formal computational models, and eventually to solve complex tasks using computer systems. This unit covers logic foundations of knowledge representation, Answer Set Programming approaches for declarative problem solving, intelligent agent modelling, and theory and practice of knowledge graphs.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp7021/>)**COMP 7022 Natural Language Understanding (10 Credit Points)****Legacy Code:** 301313

Natural Language Understanding involves machine reading comprehension and the technologies using it are becoming increasingly widespread. This unit provides a foundation in using the Natural Language Toolkit, which is a leading platform for building Python programs working with 'human language' data, as well as an introduction to Python for Natural Language Processing. Students will use algorithms and explore accessing text corpora and processing raw text; categorising words and classifying text; understanding information from text and analysing sentence structures; and understanding semantic meanings of sentences. Students also gain real-world hands-on experience with Natural Language Understanding through the practical tasks and assignments.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp7022/>)**COMP 9001 Higher Degree Research Thesis - Computing and Information Technology (20 Credit Points)****Legacy Code:** 800049**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp9001/>)**COMP 9002 Higher Degree Research Thesis - Computer Science (20 Credit Points)****Legacy Code:** 800221**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/comp9002/>)

Curriculum and Ed. Studies (CEDs)

CEDS 3001 Bridging the Gap: Re-engaging Indigenous Learners (10 Credit Points)**Legacy Code:** 101756

This unit is available to all undergraduate students who have open electives. Bridging the Gap: Re-engaging Indigenous Australian Learners will provide students with knowledge and skills to develop teaching strategies that will bridge the education gaps existing for many Indigenous Australian (Indigenous) learners. Students will gain knowledge of quality teaching frameworks to engage all learners and in particular Indigenous learners. The unit will also increase students' awareness of the complexities of the cultural inter-relationships between many Indigenous and non-Indigenous learners. The unit focuses on empowering students to effectively teach: Indigenous Australians; Indigenous studies in consultation with Indigenous communities; and assess as well as evaluate resources for use in teaching Indigenous studies.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** TEAC 1019 - Issues in Aboriginal Education**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/ceds3001/>)**CEDS 7001 Education Policy, Practice and Global Knowledge Co-construction (10 Credit Points)****Legacy Code:** 102160

From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. This Unit explores the relationship between education and knowledge through reference to questions about the links between education policy practices and global knowledge production. The conceptual framework which provides the focus for this Unit explores the dynamic, cyclical relations between the following: conditions of possibility for linking education policy practices and global knowledge production; contexts of negotiation/distance that affect this relationship; the modes of reception and rejection of the impact of linking of the two, and the mechanisms of connection that make this possible. These core concepts provide a focus for exploring questions about the relationship between 'education policy practices' and 'global knowledge production' in students' everyday work-life.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/ceds7001/>)

CEDS 7002 So, You Want to Be an Academic? (10 Credit Points)

The knowledge labour market is tightening as more academics compete for the limited number of permanent and temporary positions available globally. Early career researchers must quickly adapt to established systems, increased workloads and sometimes stressful and changing work environments. They may be concerned about job security. The purpose of this unit is to introduce students to the world of academia, to assist them in developing the knowledge and skills required to thrive as early career researchers, and to establish networks that they can leverage in order to gain employment and be successful in their careers. Through an innovative model built on online activities and workshops, students will develop an understanding of the nature of academic work in Australia and around the world in the 21st century. Each student will partner with a mentor to develop time, project and people management skills, as well as mapping out networks to pursue near to and upon completion of the student's Doctoral (HDR) candidature.

CEDS 7003 Research Methods in Education (10 Credit Points)

Research Methods in Education provides students with an introduction to educational research methods and data analysis. It enables students to develop their understanding of how research evidence can be used to improve educational practice and policy, and the challenges associated with the use of research evidence in education. The unit will develop students' knowledge and skills to design research instruments and analyse research data. This unit is designed to provide students with foundational research skills for their application to research and professional projects.

Earth Sciences (EART)

EART 1004 Soils (10 Credit Points)

Legacy Code: 300823

This unit provides students with a basic understanding of soil formation and erosion processes, soil physical, chemical and biological properties, and the diversity and classification of soils in the Australian landscape. These basic principles are explored in relation to the sustainable management of soils for horticultural and agricultural production and for environmental management, other land uses and in relation to forensic investigation and studies. The practical sessions are designed to reinforce the lecture material and include field description and analysis of soil profiles and properties, soil sampling principles and practice, laboratory measurement of soil physical and chemical properties essential/important for plant growth, soil biology and human and animal remains.

Level: Undergraduate Level 1 subject

Equivalent Subjects: LGYA 6191 - Noise Assessment PUBH 1003 - Environment and Health

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/eart1004/>)

EART 2001 Climate Change Science (10 Credit Points)

Legacy Code: 300837

A factual understanding of the energy balance of the globe, how this impacts on climate and how climate has varied in the past, is essential for any person working in the climate change area. This unit will introduce students to the concept of energy balance and climate, our understanding of how climate works, and how it has changed through time. Topics in basic atmospheric science will give students a critical understanding of current environmental concerns and debates about radiative forcing (the greenhouse effect), climate change, ozone depletion, photochemical pollution and acid precipitation.

Level: Undergraduate Level 2 subject

Pre-requisite(s): CHEM 1008 OR

CHEM 1003 AND

BIOS 1001

Equivalent Subjects: LGYA 6248 - Atmospheric Science

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/eart2001/>)

EART 3001 Biological Adaptation to Climate Change (10 Credit Points)**Legacy Code:** 300909

This unit investigates how organisms respond to variation in climate and what can be done to reduce their vulnerability to anthropogenic climate change. The unit makes use of a novel conceptual framework that defines 'vulnerability' as a function of the 'exposure' and 'sensitivity' of organisms to climate change. Therefore, we will begin by exploring how organisms are exposed to climate change, from regional climatic changes acting at the scale of populations, to local climatological effects acting at the scale of individuals. Next, we will examine what determines the sensitivity of organisms, focusing on the physiological, behavioural, and life-history traits that affect the ability of organisms to cope with and adapt to climate change. Then, we will show how exposure and sensitivity combine to determine the vulnerability of organisms, including in both managed and natural ecosystems. Finally, we will discuss the 'mitigation' and 'adaptation' strategies that can prevent the worst of the potential impacts from becoming realised and help protect our biodiversity in the face of anthropogenic climate change.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/eart3001/>)**EART 3005 Statistical Hydrology (10 Credit Points)****Legacy Code:** 300991

This unit covers the principles of statistical hydrology. It explores at-site flood frequency analysis, regional flood frequency analysis, trend analysis of hydrological data, linear regression analysis and multivariate statistical techniques to solve hydrological problems.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** EART 4001**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/eart3005/>)**EART 3006 Science of the Anthropocene (10 Credit Points)****Legacy Code:** 301212

The unit explores how the earth has been irreversibly altered through human activities. Topics include the composition of the ocean, land, and atmosphere, and the impacts humans have had on these systems. The unit looks at the detection and control of modern pollutants with a focus on field sampling and modelling of selected environmental systems. These topics will be brought to life in a two-day field trip to sites of significant anthropogenic impact.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** EART 3002 Environmental Geochemistry

EART 3003 Environmental Geochemistry

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/eart3006/>)**EART 3007 Land Degradation and Contamination (10 Credit Points)****Legacy Code:** 301273

This unit will examine current interdisciplinary topics on land degradation and contamination in both urban, peri-urban and rural environments. The effects of the various human induced land degradation and contamination processes and pollutants in terrestrial environments will be explored and how impacts can be ameliorated and managed. The focus is on both the science of environmental pollutants and on the remediation strategies currently available. Topics include; basic concepts of soils, study of the processes, common soil pollutants, persistent organic contaminants and pesticides, acidification of soils, quantitative risk assessment, land reclamation, and landfill sites

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/eart3007/>)**EART 3008 Soils and Substrates (10 Credit Points)**

This unit provides you with a basic understanding of soil formation and erosion processes, soil physical, chemical and biological properties, and the diversity and classification of soils in the Australian landscape. These basic principles, along with alternative substrates, are explored in relation to the sustainable management of soils and substrates for horticultural and agricultural production and for environmental management and other land uses. The practical sessions are designed to reinforce the lecture material and include field description and analysis of soil profiles and properties, soil sampling principles and practice, laboratory measurement of soil and substrate physical and chemical properties essential/important for plant growth, soil/substrate biology.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/eart3008/>)**EART 7001 Advanced Hydrogeology (10 Credit Points)****Legacy Code:** 301014

This unit covers occurrence of groundwater, groundwater movement, groundwater hydraulics, water wells, quality of groundwater, groundwater modelling and groundwater management. The objectives of this unit are to enable students to learn the associated concept of groundwater and apply the learnt concepts in solving groundwater problems in advanced engineering practice.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/eart7001/>)**EART 7002 Advanced Statistical Hydrology (10 Credit Points)****Legacy Code:** 301013

This unit covers at-site flood frequency analysis, regional flood frequency analysis, trend analysis of hydrological data, linear regression analysis and multivariate statistical techniques to solve advanced hydrological problems.

Economics and Econometrics (ECON)

ECON 0001 Economics (WSTC Prep) (10 Credit Points)**Legacy Code:** 700217

This unit is designed to familiarise students with some of the basic concepts and relationships of the discipline. It was developed to prepare students for undergraduate study in the academic discipline area of commerce/business and educate students as to the crucial role economic decisions have in society and how economic problems and issues dominate media and politics. By understanding Economics, students are empowered to participate effectively and knowledgeably in economic debate.

Level: Undergraduate Level 0 Preparatory subject**Equivalent Subjects:** ECON 0002 - Economics (UWSC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ0001/>)**ECON 0002 Economics (WSTC) (10 Credit Points)****Legacy Code:** 900030

This unit is designed to familiarise students with some of the basic concepts and relationships of the discipline. It was developed to prepare students for undergraduate study in the academic discipline area of commerce/business and educate students as to the crucial role economic decisions have in society and how economic problems and issues dominate media and politics. By understanding Economics, students are empowered to participate effectively and knowledgeably in economic debate.

This unit is an introduction to microeconomics. It provides students with an understanding of basic concepts such as value, rational consumer behaviour, the behaviour of firms in various market structures, the efficiency and failings of markets, the distribution of wealth and income, and the role of government regulation and intervention. It illuminates these concepts by considering and debating their application to contemporary economic and social issues such as: the influence of marketing on consumer choices, the concentration of market power in Australian industries, rising income and wealth inequality, minimum wage laws, and governmental responses to environmental problems and climate change.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** MKTG 1005 - Consumers Firms and Markets**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ1002/>)**ECON 1003 Financial Institutions and Markets (10 Credit Points)****Legacy Code:** 200048

The investment, financing and risk management decisions made by individuals, firms and governments are implemented by creating and trading financial instruments in financial markets, often with the involvement of a variety of institutions. Using the Australian financial system as an illustration, Financial Institutions and Markets introduces students to the theory and functions of financial institutions and markets. Students develop an understanding of the role and functions of bank and non-bank financial institutions and of markets in equities, debt, foreign exchange and derivatives.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** ECON 1004 - Financial Institutions and Markets (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ1003/>)**ECON 1004 Financial Institutions and Markets (WSTC) (10 Credit Points)****Legacy Code:** 700250

The investment, financing and risk management decisions made by individuals, firms and governments are implemented by creating and trading financial instruments in financial markets, often with the involvement of a variety of institutions. Using the Australian financial system as an illustration, Financial Institutions and Markets introduces students to the theory and functions of financial institutions and markets. Students develop an understanding of the role and functions of bank and non-bank financial institutions and of markets in equities, debt, foreign exchange and derivatives.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** ECON 1003 - Financial Institutions and Markets**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ1004/>)

ECON 1005 Globalisation and Australia (10 Credit Points)**Legacy Code:** 200540

This unit provides an overview of the processes promoting globalisation and their impact upon Australian economic development. The unit stresses the interaction between the globalisation tendency and counteracting forces such as nationalism, and the contradictory economic, environmental, political, racial and class interests that have mediated and shaped the local impact of globalisation on the development of the Australian economy. The unit concludes by examining the socio-economic and environmental outcomes that ongoing globalisation is likely to produce in the 21st century for the world and Australia including the possibilities and prospects for indigenous economic development.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** ECON 1001 - Australia and the Global Economy LGYB 8918 - Australian Economic History LGYA 9817 - Australia and the Global Economy**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ1005/>)**ECON 1006 Introduction to Economic Methods (10 Credit Points)****Legacy Code:** 200052

Introduction to Economic Methods covers basic concepts in mathematics and statistics to help student understanding of subjects such as accounting, management, marketing, finance, and economics. Students taking this unit are expected to improve their numeracy and analytical skills. In particular, students will learn how to collect, analyse and interpret data using simple descriptive and inferential statistical methods including simple regression analysis. In addition, by working through applied exercises, students are expected to improve their problem solving skills and acquire a basic understanding of calculus relevant to fields such as finance.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** LGYA 9799 - Introduction to Economic Methods MATH 1030 - Statistics for Business MATH 1028 - Statistical Decision Making MATH 1029 - Statistical Decision Making (UWSC) MATH 1012 - Management Analytics MATH 1031 - Statistics for Business (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ1006/>)**ECON 1011 Principles of Economics (10 Credit Points)****Legacy Code:** 200525

This unit is an introduction to economic concepts and contemporary economic issues. It introduces students to basic concepts such as markets and their operation, the behaviour of firms, the efficiency and potential failings of markets, the role of government, key macroeconomic problems such as recessions, inflation and unemployment, as well as contemporary fiscal and monetary policies. It illuminates concepts via application to contemporary economic issues and debates over different theoretical perspectives. This unit also exposes students to recent developments and policy controversies in economics.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** ECON 1007 - Introductory Economics ECON 1009 - Microeconomics ECON 1010 - Principles of Economics ECON 1012 - Principles of Economics (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ1011/>)**ECON 1013 The Australian Macroeconomy (10 Credit Points)****Legacy Code:** 200549

This unit is an introduction to macroeconomic concepts, analysis and issues in the Australian context. Basic concepts introduced and applied include: national income accounting, economic structure, price indexes and inflation, the balance of payments, and labour market aggregates. These concepts are applied in describing and explaining the recent evolution of the Australian economy in terms of growth, structural change, price stability, and employment. This leads to a discussion of major policy issues such as the role of governments in managing economic fluctuations, and the implications of Australia's foreign liabilities. The course ends with a brief introduction to modelling income determination.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** ECON 1008 - Macroeconomics**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ1013/>)**ECON 1014 Consumers, Firms and Markets (10 Credit Points)**

This unit is an introduction to microeconomics. It provides students with an understanding of basic concepts such as value, rational consumer behaviour, the behaviour of firms in various market structures, the efficiency and failings of markets, the distribution of wealth and income, and the role of government regulation and intervention. It illuminates these concepts by considering and debating their application to contemporary economic and social issues such as: the influence of marketing on consumer choices, the concentration of market power in Australian industries, rising income and wealth inequality, minimum wage laws, and governmental responses to environmental problems and climate change.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** ECON 1002 - Consumers Firms and Markets (WSTC) MKTG 1005 - Consumers Firms and Markets**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ1014/>)**ECON 2002 Corporate Financial Management (10 Credit Points)****Legacy Code:** 200488

This unit introduces the fundamental concepts of finance theory and the tools of financial decision making in the context of the Australian institutional environment. These concepts relate primarily to the time value of money, risk and return, capital budgeting and capital structure. The unit's purpose is to develop an understanding of the basic practices of financial management from the perspective of a firm (both large and small). Students examine the investment, financing and dividend decisions of corporations.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** ECON 1006 OR MATH 1030**Equivalent Subjects:** ECON 2003 - Financial Management FINC 2001 - Corporate Financial Decision Making**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ2002/>)

ECON 2004 Globalisation and Trade (10 Credit Points)**Legacy Code:** 200541

Globalisation and Trade focuses on the role of trade in the process of globalisation. It covers the history and analytical methods of international trade theories and their applications in private industry and the public sector. The theories are applied to contemporary issues in their institutional settings, in particular to: growth and development; trading blocs; and trade strategies in the developed, underdeveloped and formerly planned economies. The unit provides students with a critical understanding of the major economic, environmental, social and ethical issues stemming from the process of globalisation and trade in the twenty first century.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** ECON 1011**Equivalent Subjects:** ECON 2006 - International Trade Theory and Policy**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ2004/>)**ECON 2005 History of Economic Thought (10 Credit Points)****Legacy Code:** 200064

This unit introduces the ideas of the most influential economic writers since Aristotle. Their theoretic contributions are discussed in the context of the political and philosophical debates and the economic issues of their times. The unit focuses on the theories of value and distribution; business cycles; and money and economic growth. It examines the criteria for progress in economic thought and considers the role of ideology and values. Students read selections from the writings of Smith, Ricardo, Mill, Marx, Marshall, Keynes and institutional writers.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** ECON 1009 AND

ECON 1008 OR

ECON 1011 AND

ECON 1013

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ2005/>)**ECON 2007 Macroeconomic Theory (10 Credit Points)****Legacy Code:** 200547

Macroeconomic Theory aims to provide alternative theoretical explanations of the working of the macroeconomy. The unit will be based on the analytical narratives of macroeconomic developments taught in Australian Macroeconomy. Starting from the basic IS-LM model, it derives the aggregate demand (AD) curve and examines the components of commodity and money markets. It also analyses the labour market and derives the aggregate supply (AS) curve of an economy. Using the AD-AS model, it examines the interdependent nature of macroeconomic problems (e.g. inflation, unemployment), and the effectiveness of fiscal and monetary policies within a closed economy context. The basic model is then extended to analyse open economy issues (e.g., exchange rates and balance of payments, external shocks and international interdependence). Whenever appropriate, alternative approaches to macroeconomics are evaluated.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** ECON 1013**Equivalent Subjects:** LGYA 4311 - Macroeconomic Analysis**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ2007/>)**ECON 3001 Applied Econometrics (10 Credit Points)****Legacy Code:** 200054

This unit builds on the econometric methods of Economic Modelling. The focus is on the linear model in econometrics in its application to economic and financial time series. The emphasis is on learning by doing in small group workshops.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** MATH 2002 OR

ECON 3004

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ3001/>)**ECON 3002 Corporations, Economic Power and Policy (10 Credit Points)****Legacy Code:** 200923

Australia's industrial, financial and retail sectors are dominated by powerful corporations which engage in a wide variety of competitive and cooperative behaviours. This unit examines how modern corporations position themselves in terms of investment in large-scale production, technological innovation, the manipulation of information, marketing, and cooperative strategies to gain market share and enhance their profitability. It also explores the effects of the interactions of corporate behaviour and public policy, including the governmental function of constructing and regulating explicit market rules of exchange.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** ECON 3018 - Microeconomic Theory and Applications**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ3002/>)**ECON 3003 Derivatives (10 Credit Points)****Legacy Code:** 200079

This unit provides an introduction to the major classes of derivatives: forwards, futures, swaps and options. It examines how these instruments can be used by companies for the purposes of hedging, speculation and arbitrage. Each of these categories of derivatives is examined in some detail. Considerable attention is also given to various models used to price derivative products. The historical background to contemporary risk management is also considered.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ECON 1006 AND

ECON 2002

Equivalent Subjects: LGYA 9824 - Risk Management LGYB 9004 - Options Futures and Derivative Products**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ3003/>)

ECON 3005 Economic Theories, Controversies and Policies (10 Credit Points)**Legacy Code:** 200816

In 2016, this unit replaced by 200925 - Growth, Cycles and Crises. Economic Theories, Controversies and Policies presents alternative approaches to economic theories, controversies and policies. Topics may include recent developments or theoretical controversies in development economics, international trade, monetary economics, labour economics, environmental economics, managerial and industry economics, political economy, the economics of inequality, behavioural economics or feminist economics. Controversial contemporary policy debates, both in Australia and globally, will be examined. This unit will be team taught to expose students to a range of perspectives.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ECON 1011**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ3005/>)**ECON 3006 Economic and Financial Modelling (10 Credit Points)****Legacy Code:** 200916

Economic and Financial Modelling examines regression analysis and its use in business especially in economics, finance and accounting. Topics will include the properties of estimators, hypothesis testing, specification error, multicollinearity, dummy variables, heteroskedasticity, serial correlation. It also introduces other modelling techniques in finance and economics. Empirical assignments undertaken by the student form an integral part of the unit. The emphasis is on learning by doing in small group workshops.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** MATH 1030 OR

ECON 1006

Equivalent Subjects: ECON 3004 - Economic Modelling**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ3006/>)**ECON 3007 Economics and Finance Engagement Project (10 Credit Points)****Legacy Code:** 200537

This unit will provide students with exposure to problems with which economists and finance professionals are confronted in their daily work. They will learn about and examine the multi-dimensional nature of the issues addressed by economists and finance professionals in real-life. Students will need to consider the nature of the problems, propose solutions, as well as address how realistic the solutions they are proposing are. They will learn how to systematically reflect on their contribution to the industry or community setting with which they engage.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ3007/>)**ECON 3008 Financial Institutions Lending (10 Credit Points)****Legacy Code:** 200062

The major focus of this unit is the assessment and management of credit risk exposures and resulting implications on loan decisions and loan pricing decisions. The unit provides students with knowledge of traditional and modern credit risk measurement and management techniques, regulatory capital adequacy guidelines and economic capital decisions. Special topics covered include modern lending products and pertinent issues in lending. The unit covers current developments and debates in the field.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ3008/>)**ECON 3009 Financial Institutions Management (10 Credit Points)****Legacy Code:** 200061

This unit provides an introduction to the theory and analytical techniques relevant to the management of Australian financial institutions. The unit presents a thorough examination of the major financial risks faced by Australian banks, and methods of measuring and managing these risks.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ3009/>)**ECON 3010 Globalisation and Asia (10 Credit Points)****Legacy Code:** 200533

This unit aims to examine the role of the diverse economies of East Asia, Southeast Asia, and South Asia in the Global economy, and the complex economic, historical, political, social and cultural factors which have influenced and continue to shape the transformation of these economies. The unit will evaluate alternative development paradigms in light of the experience of these economies. The discussion will be cast within the wider debate about the role of foreign trade and investment flows. The unit will take the political economy approach to understanding both the transformation of these economies and their role in the Global Economy.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYA 4320 - Asian Economies**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ3010/>)**ECON 3011 Government and the Economy (10 Credit Points)****Legacy Code:** 200532

This unit focuses on the nature of state activity in the economy. The unit introduces students to different analytical approaches to the economic role of the state and considers their practical implications for economic policy analysis.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYA 4318 - Public Finance**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ3011/>)

ECON 3012 Growth, Cycles and Crises (10 Credit Points)**Legacy Code:** 200925

Growth, Cycles and Crises gives students an up-to-date understanding of macroeconomic developments, empirical puzzles, theoretical controversies and policy dilemmas of the day. It begins with an overview of different schools of thought and their historical roots. There follows an investigation of recent global crises, their underlying causes, and the policy responses in the major economic powers. We also consider the stresses on Australia resulting from global economic fluctuations and shifts, causing disruptive exchange rate swings and fiscal difficulties. Finally with major developments around the world and the controversies arising from them, such as debt crises and austerity debate, the problem of unbalanced growth in rapidly developing economies, and stagnation and policy zigzags apparent in some advanced economies.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** ECON 3005 - Economic Theories Controversies and Policies**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ3012/>)**ECON 3013 Industry Economics and Markets (10 Credit Points)****Legacy Code:** 200531

The first part of this unit develops an understanding of the relationships between industry structure, the conduct of firms, and market performance. Alternative theories of the firm and strategic market behaviour are considered. The unit then examines the characteristics and operation of particular markets, including public goods and utilities, human resources, and natural and environmental resources. The analysis developed in the unit is used to provide insights into applied policy areas such as competition policy, regulation of public enterprises, microeconomic reform and industry policy.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ECON 1009 OR

ECON 1007 OR

ECON 1011

Equivalent Subjects: LGYA 4313 - Industry Economics and Policy**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ3013/>)**ECON 3014 International Finance (10 Credit Points)****Legacy Code:** 200055

The study of international finance from the vantage point of a multinational enterprise provides students with a global insight into international trade for both manufactured and financial products. The unit recognises the increasing importance of global integration of money and capital markets - a trend that is creating expanded opportunities for both investors and organisations that need to raise capital. The recognition and management of risks associated with international operations are explored including cost of capital and financial structure, international financial markets crisis, international financial management, international monetary system, international diversification, foreign exchange risk management including the use of futures and options, foreign investment analysis, determination of exchange rates, balance of payments analysis, international debt crisis and country risk analysis.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ECON 2002**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ3014/>)**ECON 3016 Macroeconomic Issues (10 Credit Points)****Legacy Code:** 200546

In 2016, this unit replaced by 200926 - Macroeconomic Measures and Models. Macroeconomic Issues provides tools to assess competing explanations, predictions and policy recommendations regarding the macroeconomy. Building on the introductory concepts, measures and simple theories, this unit develops a comprehensive model for identifying and quantifying the sources and mechanisms of macroeconomic change. A systematic modelling approach reveals whether differences are rooted in assumptions or empirical claims. We focus on Australia, but consider controversies relating to the USA, Asia and Europe, given their impact on global conditions and the lessons they offer for Australia. Topics include productivity and growth, the determinants of unemployment and inflation, the role of exchange rates in adjustment, and monetary and fiscal policy design.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ECON 1013 OR

ECON 2007 OR

LGYA 4311

Equivalent Subjects: LGYA 4317 - Macroeconomic Theory and Practice**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ3016/>)**ECON 3017 Macroeconomic Measures and Models (10 Credit Points)****Legacy Code:** 200926

The unit equips students with formal tools to analyse macroeconomic problems. Students learn to use macroeconomic terms and measures competently in discussion, and interpret data from the income, product, external and government accounts, and labour force surveys. Through hands-on experience constructing and applying price indices, deflators and productivity measures, they acquire practical skills and a sound conceptual understanding of economic variables and the accounting framework. Students come to appreciate the power of macroeconomic models, learning how to capture myriad mechanisms and feedbacks in a single framework, for example to define and quantify multipliers and crowding-out effects. Finally, students gain an understanding of fundamental external constraints, such as international parity and balance of payments equilibrium conditions.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** ECON 3016 - Macroeconomic Issues**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ3017/>)

ECON 3018 Microeconomic Theory and Applications (10 Credit Points)**Legacy Code:** 200530

In 2016, this unit replaced by 200923 - Corporations, Economic Power and Policy. The aim of Microeconomic Theory and Applications is to extend students' knowledge of microeconomic theory developed in Principles of Economics. After a more formal presentation, the rather idealistic assumptions used in the context of the perfectly competitive markets will be relaxed in order to model typical situations encountered in the business world. The theory of choice will be extended to situations where individuals face uncertainty regarding the outcome of their own actions. In terms of market structure, we will investigate the consequences in terms of price, quantity and consumer's surplus, of monopoly, oligopoly or duopoly markets. As some of these market structures imply that the individuals' decisions might strongly affect or be affected by a limited number of other decision makers, an introduction to Game Theory will be presented. Finally, our concerns for investigating more realistic economic situations will lead us to make a brief incursion into markets characterised by asymmetric information, the presence of public goods or the existence of externalities.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ECON 1011 OR ECON 1006**Equivalent Subjects:** LGYA 4313 - Industry Economics and Policy**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ3018/>)**ECON 3019 Political Economy (10 Credit Points)****Legacy Code:** 200065

This unit examines various political economy approaches to the analysis of economics, mainly associated with Marxian, post-Keynesian, evolutionary schools of thought as well as development economics and the perspectives of international political economy. These may be regarded as the main alternatives to neo-classical economic theory. As they do not represent a unified body of thought, the unit will survey the main contributions of each, focusing on both the positive aspects of theory and the negative aspects relating to the critique of neo-classical theory.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ECON 1009 AND

ECON 1008 OR

ECON 1007

This unit provides students with an understanding of the economics of retirement and retirement income provision, with particular emphasis on the Australian superannuation industry. On completion of this unit, students should have a comprehensive understanding of superannuation in Australia, as well as an appreciation of the economic issues associated with alternative models of retirement income provision.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ3021/>)**ECON 3022 Urban and Regional Economics (10 Credit Points)****Legacy Code:** 200075

Students wishing to enrol in this unit are advised to contact the Unit Coordinator. This unit deals with: models of short-run fluctuations of regional aggregates and the economic relations between regions; models of long-run change in regional aggregates and the long-run economic relations between regions; equilibrium models of intra-urban location; optimal models of intra-urban allocation; and optimal allocation of capital to urban land.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ3022/>)**ECON 4001 Advanced Analysis and Interpretation (10 Credit Points)**

Building on the introduction to the analysis of qualitative data presented in the core unit Research Design 1: Theories of Enquiry this unit, Advanced Analysis and Interpretation, will provide candidates with the techniques necessary to use, analyse and interpret qualitative data in business research. Presented as a series of seminar-workshops, candidates consider the theories that underpin the employed analytical methods, and then move to employ introduced qualitative software tools to analyse and interpret research data.

Level: Undergraduate Level 4 subject**Co-requisite(s):** HUMN 4009**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/econ4001/>)**ECON 7001 Economics (10 Credit Points)****Legacy Code:** 200425

This unit presents a broad overview of economics and the way economic activity, institutions and regulations shape social and business outcomes, knowledge that is critical for any student in a business-related discipline. Students will reflect critically on the key economic processes, theories and ideas. We study the way economics defines growth and wellbeing and the economic theories of income determination and business cycles that shape macroeconomic policy. Students will form perspectives on globalisation, trade, colonisation and development and the causes of, and solutions to, inequalities between Indigenous and non-Indigenous Australians. In the microeconomic component of the unit, we study the way economics understands and models individuals and the consumer, production and firms, markets and market structures, the role of government intervention and regulation, environmental outcomes and policy to control processes of economic power.

Electrical and Electronic Eng. (ELEC)

ELEC 1001 Digital Systems 1 (10 Credit Points)**Legacy Code:** 300018

This unit provides students with a solid background in digital logic design which is foundational to the fields of electrical and computer engineering. Digital logic design involves building electronic components and hardware, such as circuit boards and microchip processors. Students are first introduced to the fundamentals of digital logic, basic logic devices and Boolean algebra. This is followed by analysis and design of combinational and sequential logic circuits.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** ELEC 1002 - Digital Systems 1 (WSTC AssocD)**Restrictions:** Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/elec1001/>)

ELEC 1003 Electrical Fundamentals (10 Credit Points)**Legacy Code:** 300021

This unit introduces essential electrical engineering concepts that provide students with the basic requirements for analysing, designing, building, and testing simple engineering systems. Students use techniques for analysing different types of circuits based on their knowledge of electrical theory and the characteristics of power, electrical energy, signals, and electrical circuit components. Students have practical activities including conducting experiments in learning how electrical systems work. Students are introduced to Electrical Machines and Renewable Energy systems for a fundamental understanding.

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/elec1003/>)

ELEC 1004 Electrical Fundamentals (WSTC AssocD) (10 Credit Points)**Legacy Code:** 700104

The objective of this unit is to introduce to the student a number of concepts within electrical engineering. These include basic definitions of charge, current, potential difference, power; electric circuits and basic laws such as Ohm's and Kirchoff's Laws; Thevenin, Norton's and the maximum power theorems; electromagnetism and the associated fundamental laws; capacitor and resistor circuits and time constants; an introduction to Electronics; communication waves; Logic gates and number systems; and an introduction to Electrical Machines and Renewable Energy systems. Basic principles are explained and applied to a range of typical electrical circuits and devices. These foundations provide students with the basic requirements for a career in engineering where the concepts can be developed or applied to more complex engineering systems.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** ELEC 1003 - Electrical Fundamentals ELEC 1005 - Electrical Fundamentals (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subject

The unit also aims to instil sound principles of program design that can be utilized in many units throughout the students' course. The basic elements and structures of a high level language are taught. Students are exposed to numerous engineering problems and are encouraged to implement solutions using an algorithmic approach.

Level: Undergraduate Level 1 subject**Pre-requisite(s):** Students enrolled in 70667162 Diploma in Engineering Extended or 7082 Bachelor of Engineering Extended (WSTC First Year Program) must pass COMP 0001 Introductory Programming (WSTC Prep) before enrolling in this unit**Equivalent Subjects:** ELEC 1006 - Engineering Computing ELEC 1007 - Engineering Computing (WSTC Assoc Deg)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec1008/>)**ELEC 1009 Electrical and Telecommunications Engineering (10 Credit Points)****Legacy Code:** 301336

This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This unit is an introductory unit in Electrical Engineering, which provides an introduction to electrical circuits and fundamental electrical elements as well as the technical skills to analyse such circuits. It is suitable for students pursuing further studies in Electrical Engineering such as Power and Energy, Telecommunications, Control, Instrumentation, as well as other related engineering disciplines including Computer Science and Engineering. In the practical section, this course provides hands-on experience in building and testing circuits. This unit is presented in such a way that students who have taken it are capable of building and analysing some practical, useful devices afterwards.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec1009/>)**ELEC 1011 Engineering Computing (10 Credit Points)**

Engineering Computing is an introduction to using computation to solve real problems. The unit also aims to instil sound principles of program design that can be utilized in many units throughout the students' course. The basic elements and structures of a high level language are taught. Students are exposed to numerous engineering problems and are encouraged to implement solutions using an algorithmic approach.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** ELEC 1006 Engineering Computing ELEC 1007 Engineering Computing (WSTC AssocD) ELEC 1008 Engineering Computing (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec1011/>)

ELEC 2001 Circuit Theory (10 Credit Points)**Legacy Code:** 300005

This unit aims to equip the student with the tools needed for the design and analysis of electrical and electronic circuits. It also introduces various techniques of circuit analysis, mutual coupling, frequency response and two-port networks.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** ELEC 1003 AND

MATH 1019 OR

MATH 1035

Equivalent Subjects: ELEC 2002 - Circuit Theory (WSTC AssocD)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec2001/>)**ELEC 2002 Circuit Theory (WSTC AssocD) (10 Credit Points)****Legacy Code:** 700243

This unit aims to equip the student with the tools needed for the design and analysis of electrical and electronic circuits. It also introduces various techniques of circuit analysis, convolution, mutual coupling, frequency response and two-ports loops. Offerings of alternate units are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate unit.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** ELEC 1004**Equivalent Subjects:** ELEC 2001 - Circuit Theory**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec2002/>)**ELEC 2004 Electronics (10 Credit Points)****Legacy Code:** 300025

This unit further develops skills in the analysis, design, practical implementation and testing of the main analogue electronic circuits. Topics covered are: semiconductor diodes and their applications, Bipolar Junction Transistors (BJT), Field Effect Transistors (FET), analysis of BJT and FET, design of discrete operational amplifiers, and operational amplifier characteristics and circuit configurations.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** ELEC 1003 OR

ELEC 1009

Electromagnetic Compatibility

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec2006/>)**ELEC 2007 Engineering Visualization (10 Credit Points)****Legacy Code:** 300029

This unit aims to provide a comprehensive introduction to fundamental concepts and algorithms in engineering visualization. Topics covered include visualization hardware, scan conversion of geometric primitives, 2D and 3D transformations, 3D viewing and projection, hidden surface removal, solid modelling, illumination models and image manipulation.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** Students must have passed ELEC 1006 Engineering Computing and either ELEC 2009 Microprocessor Systems or ELEC 2008 Microcontrollers and PLCs**Equivalent Subjects:** LGYB 0688 - Computer Graphics**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec2007/>)**ELEC 2008 Microcontrollers and PLCs (10 Credit Points)****Legacy Code:** 300044

Through completion of an applied project students will develop an understanding of the hardware, architecture and the assembly language of microcontrollers in addition to the control of a mechanical system with a programmable logic controller (PLC). The unit looks at the applications of timers, interrupts and serial ports. Furthermore, the general approach in designing a microcontroller in mechanical systems will be studied. Students will use an Omron PLC to control a factory represented by four pneumatic cylinders. After covering the Ladder Logic programming language, they will move on to cover sequential programming and numerical manipulation using PLCs.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** ELEC 2004 OR

ELEC 1003 OR

ELEC 1009

ELEC 2009 Microprocessor Systems (10 Credit Points)**Legacy Code:** 300076

This unit introduces students to the internal structure of microprocessors used in computing systems and their fundamental operations. Topics include assembly language programming, interrupt processing, CPU functions, memory organization, and peripheral programming. The microprocessor and embedded processors are discussed. Students write assembly language programs, debug and create executable files to control microprocessor systems.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** ELEC 1001**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec2009/>)**ELEC 2010 Power and Machines (10 Credit Points)****Legacy Code:** 300052

This unit develops an understanding of the basic concepts of power and machines, including modern power systems and transformers, in addition to the fundamentals of electromechanical energy conversion. Students will also study magnetic circuits, modern permanent magnet materials and their characteristics, and balanced and unbalanced three-phase power systems.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** ELEC 2001 OR

ELEC 2013

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec2010/>)**ELEC 2011 Signals and Systems (10 Credit Points)****Legacy Code:** 300057

This unit aims to develop students' understanding of continuous-time and discrete-time concepts and methods. It covers various signals and their analysis, as encountered in the fields of electrical, computer and telecommunication engineering.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** MATH 1019 AND

ELEC 1003

Equivalent Subjects: ELEC 2012 - Signals and Systems (WSTC AssocD)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec2011/>)**ELEC 2012 Signals and Systems (WSTC AssocD) (10 Credit Points)****Legacy Code:** 700241

This unit aims to develop students understanding of continuous-time and discrete-time concepts and methods. It covers various signals and their analysis, as encountered in the fields of electrical, computer and telecommunication engineering. Offerings of alternate units are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate unit.

This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This unit covers the fundamentals of circuit, system and signal analysis on which most other courses in the electrical engineering curriculum are built. The unit provides a foundation in frequency domain analysis and in transform methods, as well as significantly extending alternate current analysis, transient analysis and other fundamental circuit analysis tools. Although there is a practical program in the laboratory, the theory aspects of this course are the primary focus.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** ELEC 1009**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec2013/>)**ELEC 2014 Mathematics for Electrical Engineers 1 (10 Credit Points)****Legacy Code:** 301338

This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. The unit combines two maths components, Vector Calculus and Complex Analysis, both of which incorporate calculus and linear algebra and have many applications to physics, engineering and mathematics, particularly electrical engineering. Vector Calculus involves calculus in two and three dimensions, theory of curves, vector functions and partial derivatives, two- and three-dimensional integration, line integrals and curl and divergence. Complex Analysis extends calculus from real numbers to complex numbers, and develops the theory of analytic functions, complex integration and Cauchy's theorem, series expansions, the residue theorem and applications to real improper integrals and trigonometric integrals.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** MATH 1035**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec2014/>)**ELEC 2015 Mathematics for Electrical Engineers 2 (10 Credit Points)****Legacy Code:** 301339

This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This unit builds on two maths components begun in first year engineering, that is linear algebra and statistics. For linear algebra, the aim is to learn and apply the theoretical elements about linear combinations of vectors and matrices amongst other topics to problem sets. For statistics, the aim is to learn the various ways in which random variation arises in engineering contexts and apply methods and models for understanding data and making decisions. In both components, students will expand their skills in analytic thinking.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** MATH 1035**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec2015/>)

ELEC 2016 Mathematics for Software Engineers (10 Credit Points)**Legacy Code:** 301344

This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This unit builds on two maths components begun in first year engineering, which are Finite Maths and Statistics. For Finite Maths, the aim is for students to learn about the ideas in Number Theory, the theory of finite fields, cryptography and Algebraic Coding Theory as techniques for organising information and analysing it. For Statistics, the aim is to learn the various ways in which random variation arises in engineering contexts and apply methods and models for understanding data and making decisions. In both components, students will expand their skills in analytic thinking and making sense of data.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec2016/>)**ELEC 2017 Requirements and Design Workshop (10 Credit Points)****Legacy Code:** 301346

This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This unit has a series of software engineering workshops designed to teach students to work in teams and apply their knowledge to solve real-life problems. These workshops offer students opportunities to concentrate on software requirements analysis and design issues including artefacts produced as well techniques and tools to support this process (brainstorming, problem statements, requirements elicitation, producing design documents and prototyping). In addition, it provides students with some teamwork skills, requirements engineering and design techniques that an engineer would use in the early stages of the development process. The students are also getting experience on different aspects of designing a Web application with a major focus on the front-end.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec2017/>)**ELEC 2018 Systems Modelling and Design (10 Credit Points)****Legacy Code:** 301345

This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This unit reinforces the understanding of discrete mathematics and the role it plays in computing science and engineering. Students learn how to systematically derive implementations from formal specifications using simple mathematics. Students also learn to develop an understanding of the rules for deriving implementations from specifications. Why do they work? What do we have to prove and how? This is crucial for later industrial software engineering practice.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** MATH 1006 AND ENGR 1045**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec2018/>)**ELEC 2019 Workshop on Reasoning about Programs (10 Credit Points)****Legacy Code:** 301347

This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. The goal of this unit is to develop skills in writing precise specifications of software programs and to translate these specifications into correct implementations. Further methods for reasoning about programs are introduced, including methods for reasoning about termination, program refinement and data refinement. Students learn to apply these ideas to structure their thinking about programs as well as to build a web application within a project context.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** ELEC 2018**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec2019/>)**ELEC 3001 Communication Systems (10 Credit Points)****Legacy Code:** 300007

This unit will provide a basic introduction to communication systems and techniques. Specific topics covered include energy and power spectral density, amplitude modulation, frequency modulation, pulse modulation, an overview of digital modulation techniques, noise in communication systems and an overview of current telecommunication systems; spread spectrum systems, optical communication systems, radio broadcasting and mobile communication systems.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ELEC 2011**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec3001/>)**ELEC 3002 Data Communications (10 Credit Points)****Legacy Code:** 300997

This unit is concerned with the principles and topics of fundamental importance to digital data communication, computer communication networks and telecommunications. The lower layers of the protocol structure (physical layer, data link layer and some aspects of the network layer) and the physical medium (hardware and transmission lines) are emphasized. An engineering approach will be taken to provide an insight to transmission and transmission media, communication techniques and transmission efficiency.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ELEC 2011**Incompatible Subjects:** ELEC 4001 - Data Networks**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec3002/>)

ELEC 3003 Digital Signal Processing (10 Credit Points)**Legacy Code:** 300069

Students will develop an understanding of the fundamental concepts and principles in digital signal processing by applying the theory learned in their classes to practical exercises. The subject matter includes discrete-time signals and systems, the z-transform, sampling of continuous-time signals, transform analysis of linear time-invariant systems, filter design techniques, structures for discrete-time systems, the discrete Fourier transform and computation of the discrete Fourier transform.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ELEC 2011 OR ELEC 2013**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec3003/>)**ELEC 3004 Digital Systems 2 (10 Credit Points)****Legacy Code:** 300019

This unit covers modern logic design techniques and the process of creating logic circuits and systems from design specifications to implementation. Topics include logic design techniques for combinational and sequential logic circuits; hardware description language (HDL); logic circuit implementation using an HDL; state-of-the-art logic circuit design tools; and programmable logic devices.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ELEC 1001**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec3004/>)**ELEC 3005 Electrical Drives (10 Credit Points)****Legacy Code:** 300070

Through practical laboratory exercises students will analyse and evaluate electrical machines and drives. They will examine various types of electrical motors and drive systems, their applications and control. They will also study various types of speed control, starting and braking systems and dynamics.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ELEC 3006**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec3005/>)**ELEC 3006 Electrical Machines 1 (10 Credit Points)****Legacy Code:** 300071

This unit introduces the fundamental principles of electrical machines, the principles of electromechanical energy conversion and the operation and analysis of Direct Current (DC) generators and motors, induction motors and synchronous machines. Students apply principles and theory to practical exercises to develop their understanding. The unit also introduces various special purpose electrical machines, such as permanent magnet machines, step motors and reluctance machines for an understanding on different types of machines.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ELEC 2010**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec3006/>)**ELEC 3008 Instrumentation and Measurement (10 Credit Points)****Legacy Code:** 300075

Through practical exercises students will engage with engineering measurement and instrumentation systems. Students determine the most appropriate measurement method and instrument, such as multimeters, digital oscilloscopes and interfacing modules, for particular applications. They will gain experience with the measurement of physical quantities and the instrumentation required to accurately present information to a controller. Additionally, transducers used to measure common physical quantities are presented in detail, while instrumentation includes a detailed analysis of zero-span circuits, Wheatstone bridges, instrumentation amplifiers, isolation amplifiers, voltage-to-current and voltage-to-frequency modules used for faithful signal transmission, digital-to-analogue and analogue-to-digital circuits to deepen student learning.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ELEC 2001 OR ENGR 2001**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec3008/>)**ELEC 3009 Power Systems (10 Credit Points)****Legacy Code:** 300771

This unit provides students with a global picture of electrical energy systems. Through practical exercises students will examine and analyse the basic processes of generation, transmission and distribution, power system analysis and planning as well as power systems operation under steady-state and transient conditions. Various aspects of power system operation including harmonics, fundamentals of protection, environmental issues and renewable energy systems are also covered in this unit.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ELEC 2010**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec3009/>)**ELEC 3010 Renewable Energy Systems Design (10 Credit Points)****Level:** Undergraduate Level 3 subject**Pre-requisite(s):** ELEC 1003 AND ENGR 1011**Equivalent Subjects:** ELEC 4006 Sustainable Energy Systems**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec3010/>)**ELEC 4002 Power Electronics (10 Credit Points)****Legacy Code:** 300772

The unit covers various types of power electronics systems, their applications and use in Electrical Drive Systems. It also covers application considerations and modern developments in electronic systems. This course provides the fundamentals of Power Electronics and Industrial Electronics.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** ELEC 2010 AND ELEC 2004**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec4002/>)

ELEC 4003 Power Quality (10 Credit Points)**Legacy Code:** 300995

This unit is to introduce students to power quality phenomena such as voltage sag/swell, distortions, unbalance, and flicker that occur in power systems. The unit also introduces terms and definitions associated with power quality, following which each phenomenon, that is, voltage sag/swell, transient overvoltage, and harmonics. In addition, flicker is presented and discussed in detail for students to understand the sources and impact of these occurrences on power system as well as typical mitigation techniques. Finally, students are introduced to power quality benchmarking, monitoring and assessment.

Level: Undergraduate Level 4 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec4003/>)**ELEC 4004 Radio and Satellite Communication (10 Credit Points)****Legacy Code:** 300489

This unit is offered in alternate years. This unit will develop an understanding of the theory and practice of radio and satellite communication techniques and measurements and provide an introduction to space communication systems. It will complement the general communication engineering units, addressing advanced topics important and specific to radio and satellite communications.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** ELEC 3001 OR ELEC 4001**Equivalent Subjects:** LGYA 3699 - Satellite Communication**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec4004/>)**ELEC 4005 Smart Grids and Distributed Generation (10 Credit Points)****Legacy Code:** 300996

This unit is designed to model, analyse and control of newly developing areas of distributed generation and smart grids. The unit will cover modelling, control, simulation and protection of such systems. The unit will cover the impacts of renewable sources and power electronics on the operation of smart grids and micro-grids. The unit will also cover environmental and economic impacts of such systems.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** ELEC 3009**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec4005/>)**ELEC 4006 Sustainable Energy Systems (10 Credit Points)****Legacy Code:** 300998

This unit prepares engineering students to work in the area of renewable energy systems and to be knowledgeable and be in a position to appraise environmental, social, legal, economic and political issues concerned with renewable energy systems.

Level: Undergraduate Level 4 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec4006/>)**ELEC 4007 Wireless Communications (10 Credit Points)****Legacy Code:** 300065

The unit covers the analysis, design and operation of modern wireless communication systems. The primary focus is on the physical layer and hardware, emphasizing the fundamentals of coding and modulation, spread spectrum and multiple access techniques. Current wireless architectures and mobile communication systems are also covered.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** ELEC 3001 OR ELEC 3002**Equivalent Subjects:** LGYA 5692 - Digital Communication Engineering**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec4007/>)**ELEC 6001 Applied Project in Neuromorphic Engineering (40 Credit Points)**

This 40 credit point semester-long unit provides a capstone experience to students enrolled in the Master of Applied Neuromorphic Engineering. Students work on an industry-oriented project with practical application and outcome. Having the intention to go into industry, this unit provides opportunities for students to explore a relevant problem that can be completed in one semester. Students will gain valuable experience and industry insights.

Pre-requisite(s): INFO 7001 ANDELEC 6003 AND
COMP 6001 AND
COMP 6002**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec6001/>)**ELEC 6002 Master Dissertation in Neuromorphic Engineering (40 Credit Points)**

This unit is offered exclusively on campus for students to benefit from mentorships and regular interactions with leading researchers in the field. Students will have the opportunity to contribute towards impactful research projects, aiming at academic growth and progress. To achieve this goal, the Dissertation unit is designed for students to plan and execute a research-based project in the area of Neuromorphic Engineering. The main task in the year-long 80 credit point dissertation unit is an academic research paper that meets publishing standards and is peer-reviewed by external reviewers (getting the article published on a journal is not a completion requirement to the unit). The students shall be part of regular International Center for Neuromorphic Systems (ICNS) interactions, and benefit from supervisors in a discursive setting as the candidate makes progress.

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec6002/>)

ELEC 6003 Neuromorphic Accelerators (10 Credit Points)

Problem-oriented thinking and distributed system design are essential for neuromorphic engineers. This unit is designed to provide students with sufficient understanding to neuromorphic processor. Students will be able to implement spiking neural networks by programming neuromorphic processors. The lab work and programming assignments focus on different key aspects of programming neuromorphic processor: Neural modelling, Python programming, debugging code and hardware/software co-simulation. The workshops focus on the concrete implementation of neural networks.

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/elec6003/>)

ELEC 6004 Neuromorphic Electronics Design (10 Credit Points)

Efficient, parallel, low-power computation is a hallmark of brain computation and the goal of neuromorphic engineering. The focus of this unit is to design, implement and test accurate, electronic, very large scale integrated (VLSI) circuit model of neural systems and the associated signal processing. Students will have opportunities to design and build a neural system on hardware and gain resultant insights into applying neuromorphic engineering to real-world problems.

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/elec6004/>)

ELEC 7001 Advanced Control Systems (10 Credit Points)

Legacy Code: 300603

This unit covers continuous and discrete control systems. It reviews and builds on the fundamental concepts of the theory of feedback in continuous and discrete time to examine the analysis and design of advanced continuous and discrete time linear control systems. Transfer function and state variable methods are employed. Instruction makes use of extensive experimental tasks. There is also considerable use of Matlab simulations.

Level: Postgraduate Coursework Level 7 subject

Incompatible Subjects: LGYA 5850 - Digital Control LGYA 5813 - Advanced Control Systems

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/elec7001/>)

ELEC 7002 Advanced Data Networks (10 Credit Points)

Legacy Code: 300173

This unit covers all major network technologies: asynchronous transfer mode (ATM), Internet, and telephony. Essential networking topics such as protocol layering, multiple access, switching, scheduling, routing, congestion control, error and flow control, and network security are covered in detail. An engineering approach is taken to provide insight into network design.

Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/elec7002/>)

ELEC 7003 Advanced Electrical Machines and Drives (10 Credit Points)

Legacy Code: 300601

The subject covers various types of electrical motors and drive systems, their applications and control. The unit aims to introduce an advanced study of electrical machines and drives. It also covers application considerations and modern developments in high performance drive systems. This course covers various types of the speed control, the starting, the braking and the dynamics of different electrical machines and drives.

Level: Postgraduate Coursework Level 7 subject

Incompatible Subjects: LGYA 5847 - Variable Speed Electric Drives LGYA 5844 - Special Electrical Machines

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/elec7003/>)

ELEC 7004 Advanced Power Quality (10 Credit Points)

Legacy Code: 301025

This unit is to introduce students to power quality phenomena such as voltage sag/swell, distortions, unbalance, and flicker that occur in power systems. The unit also introduces terms and definitions associated with power quality, following which each phenomenon, that is, voltage sag/swell, transient overvoltage, and harmonics. In addition, flicker is presented and discussed in detail for students to understand the sources and impact of these occurrences on power system as well as typical mitigation techniques. Finally, students are introduced to power quality benchmarking, monitoring, assessment. In addition Advanced knowledge on network frequency responses is presented.

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/elec7004/>)

ELEC 7005 Advanced Signal Processing (10 Credit Points)

Legacy Code: 300596

This unit covers the principles and techniques in signal processing. The subject matter includes advanced topics in discrete-time signals and systems, the z-transform and its applications in signal processing, advanced topics in the sampling of continuous-time signals, FIR and IIR filter design, filter structures, and the discrete Fourier transform and its computation. Students develop skills of analysing and designing digital signal processing systems.

Level: Postgraduate Coursework Level 7 subject

Equivalent Subjects: LGYA 5840 - Signal Processing 1

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/elec7005/>)

ELEC 7006 Advanced Smart Grids and Distributed Generation (10 Credit Points)

Legacy Code: 301026

This unit is designed to model, analyse and control of newly developing areas of distributed generation and smart grids. The unit will cover modelling, control, simulation and protection of such systems. The unit will also cover the impacts of renewable sources and power electronics on the operation of smart grids and micro-grids. The unit will also cover environmental and economic impacts of such systems.

Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/elec7006/>)

ELEC 7008 Instrumentation and Measurement (PG) (10 Credit Points)**Legacy Code:** 300515

This unit covers topics associated with the measurement and presentation of physical parameters. A wide range of transducers are presented in detail, while instrumentation includes a detailed analysis of a multitude of analogue and digital circuits used to amplify, transmit, and display electrical signals. The application of these modules in modern measurement equipment is presented in details.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec7008/>)**ELEC 7009 Personal Communication Systems (10 Credit Points)****Legacy Code:** 300196

This unit covers the design fundamentals of cellular systems, including frequency reuse, channel assignments, radio wave propagation in mobile environments, modulation techniques, coding techniques, spread spectrum and multiple access. It includes topics from emerging wireless technologies, and third-generation mobile communication systems and standards.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec7009/>)**ELEC 7010 Power System Planning and Economics (10 Credit Points)****Legacy Code:** 300197

This unit covers planning techniques for energy and electrical power systems. It also covers the economics of various options and reliability of electrical power systems.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec7010/>)**ELEC 9001 Higher Degree Research Thesis - Engineering (Computer) (20 Credit Points)****Legacy Code:** 800053**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec9001/>)**ELEC 9002 Higher Degree Research Thesis - Engineering (Electrical) (20 Credit Points)****Legacy Code:** 800051**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec9002/>)**ELEC 9003 Higher Degree Research Thesis - Engineering (Mechatronic) (20 Credit Points)****Legacy Code:** 800057**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec9003/>)**ELEC 9004 Higher Degree Research Thesis - Engineering (Telecommunications) (20 Credit Points)****Legacy Code:** 800055**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/elec9004/>)

Environmental Studies (ENVL)

ENVL 1001 Understanding Landscape (10 Credit Points)**Legacy Code:** 300812

This unit explores the historical and cultural perceptions and perspectives of the term 'landscape' and the sustainability and management of landscapes. Students become familiar with the terminology and concepts surrounding the natural landscape experientially through a series of field trips and develop an awareness and appreciation of both of the conceptual and actual landscape issues. Skills in mapping and spatial awareness skills and technologies will be developed through field trips and workshop sessions including GIS. Such skills will assist in developing a capacity to comprehensively describe and analyse the landscape.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** LGYA 6199 - Understanding Landscape LGYB 9526 - Understanding Landscape**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/envl1001/>)**ENVL 1002 Environmental Issues and Solutions (10 Credit Points)****Legacy Code:** 301271

This unit explores a variety of environmental issues with a focus on emerging environmental issues. The relationships between human health and environmental health are explored through a number of case studies. Concepts explored include 21st Century contaminants, noise, energy and water. Through a combination of case studies and practical field experience, students will develop the skills and knowledge appropriate to develop solutions to a variety of environmental issues. Students enrolled in the Undergraduate Certificate in Environmental Sustainability will not complete the practical field experience component of this unit, as they will be studying online.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** PUBH 1002 Environment and Health**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/envl1002/>)**ENVL 1003 Environmental Issues and Solutions (WSTC) (10 Credit Points)****Legacy Code:** 700296

This unit explores a variety of environmental issues with a focus on emerging environmental issues. The relationships between human health and environmental health are explored through a number of case studies. Concepts explored include 21st Century contaminants, noise, energy and water. Through a combination of case studies and practical field experience, students will develop the skills and knowledge appropriate to develop solutions to a variety of environmental issues.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** PUBH 1002 Environment and Health

ENVL 1002 Environmental Issues and Solutions

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/envl1003/>)

ENVL 1004 Introduction to Environmental Science (10 Credit Points)

Students learn how biology, chemistry and the physical sciences interact to regulate environmental processes in natural and built environments. They will evaluate concepts of sustainability and resilience and apply these perspectives to understand how human actions can alter the natural world. Students will use interdisciplinary approaches, including field studies, to investigate environmental processes and evaluate specific environmental challenges. Local and global environmental issues, sustainability, resilience and stewardship will be explored across diverse social and ecological contexts.

Level: Undergraduate Level 1 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/envl1004/>)

ENVL 1005 Environmental Issues and Solutions (UG Cert) (10 Credit Points)

This unit explores a variety of environmental issues with a focus on emerging environmental issues. The relationships between human health and environmental health are explored through a number of case studies. Concepts explored include 21st Century contaminants, noise, energy and water. Through a combination of case studies and practical field experience, students will develop the skills and knowledge appropriate to develop solutions to a variety of environmental issues.

Level: Undergraduate Level 1 subject

Equivalent Subjects: PUBH 1002 Environment and Health ENVL 1003 Environmental issues and Solutions ENVL 1002 Environmental issues and Solutions

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/envl1005/>)

ENVL 2001 Analysis of Spatial Data (10 Credit Points)

Legacy Code: 101646

The making and the use of maps. This unit involves the critical examination of the way geographical data is produced, analysed, mapped and used to inform both private and public decisions. Natural environment, health, accessibility and residential amenity are examples of phenomena that have an important geographical dimension. Policy responses to these phenomena need to be specific with regard to locations and places. Geographic information systems software and census will be used to produce maps based on the analysis and interpretation of data relating to the student's field of interest.

Level: Undergraduate Level 2 subject

Equivalent Subjects: LGYA 7235 - Analysis of Spatial Data

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/envl2001/>)

ENVL 2002 Environmental Regulation and Policy (10 Credit Points)

Legacy Code: 300841

This unit aims to provide students with a broad understanding of the current environmental regulations available to environment protection and planning authorities at the State and Local Government level to protect and manage the natural and built environments.

This unit will also consider environmental policy introduced by the State and Commonwealth governments to manage land use activities so as to encourage sustainable development practices.

It is a suitable unit for students entering government or industry in environmental management, health and planning roles. There is a particular focus on the use of legislation and preparation of policy to address environmental and health risks to the community.

Level: Undergraduate Level 2 subject

Equivalent Subjects: ENVL 3001 - Environmental Regulations and Policy ENVL 3002 - Environmental Regulations

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/envl2002/>)

ENVL 2003 Landuse and the Environment (10 Credit Points)

Legacy Code: 300875

This unit will assist students develop a sound framework for the analysis of land use and its interactions with the environment. The skills gained will assist in the evaluation of land use at various levels from household to international level. Particular emphasis will be placed on students gaining a sound conceptual framework from which to examine sustainability at the environmental, economic, social, and production levels. Emphasis will be placed on the use of ecological footprinting as a tool.

Level: Undergraduate Level 2 subject

Equivalent Subjects: LGYA 6188 - Landuse and the Environment

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/envl2003/>)

ENVL 2005 Internet of Things for the Environment (10 Credit Points)

Legacy Code: 301275

Internet of things (IoT) is about connecting platforms to internet for monitoring, managing and controlling them. Simply put, IoT can make 'dumb' things 'smart' by connecting them to the Internet and sensors. This results in improved efficiency of data collection, accuracy and decision making. The applications of IoT is rapidly expanding in environmental science and management, and the topics in this unit will cover aspects of IoT for water, air and noise pollution monitoring, extreme weather warning, river water flow monitoring, water quality management, irrigation management, flora and fauna monitoring, broadacre agriculture, protected cropping, biodiversity, ecosystems health, wildlife and more.

Level: Undergraduate Level 2 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/envl2005/>)

ENVL 2006 Environmental Planning and Climate Change (10 Credit Points)

This unit is an introduction to environmental planning in local and state government and in particular the role of planning in protecting the natural environment, enhancing population health and/or encouraging sustainable development practices. Students focus on goal-setting for environmental protection and then explore how planning policy can assist with achieving these goals. Current metropolitan planning and strategy is examined using the Metropolitan Strategy for Sydney as the primary case study. The unit scopes environmental planning policies introduced by state, local and Commonwealth governments to adapt to climate induced impacts on the environment and on community health and well being.

Level: Undergraduate Level 2 subject

Equivalent Subjects: PUBH 3009 - Environmental Planning PUBH 2008 - Environmental Planning Climate Change

Incompatible Subjects: NATS 2020 - Healthy Built Environments

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/envl2006/>)

ENVL 2007 Environmental Monitoring and Assessment (10 Credit Points)

In this unit, you will develop the practical skills and underlying scientific knowledge required to address environmental questions across natural and built environments. Through practicals, workshops, and an independent research project you will learn how to design a monitoring and assessment program to characterise different environment situations, interpret data and propose management solutions to contemporary environmental challenges. The unit will introduce a range of topics, including the application of geographic information systems (GIS), remote sensing methodologies, environmental sensors, the internet of things and citizen science approaches to understand and improve environmental situations, and provides opportunities to research a chosen, real-world topic to assess an aspect of environmental sustainability.

Level: Undergraduate Level 2 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/envl2007/>)

ENVL 3003 Environmental Risk Management (10 Credit Points)

Legacy Code: 300858

This unit examines the world of environmental risk management and will introduce students to environmental management systems including Environmental Impact Assessment and Environmental Auditing. The unit considers and examines the application of the precautionary principle in real world situations. Students will also be introduced to methods of quantitative risk assessment as applied to environmental and agricultural risks such as urban, peri-urban and rural growth; industrial and agricultural land use; contaminated land, and climate change.

Level: Undergraduate Level 3 subject

Equivalent Subjects: ENVL 3004 - Environment Risk Management LGYA 6128 - Agriculture Risk

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/envl3003/>)

ENVL 3005 Planning the City: Development, Community and Systems (10 Credit Points)

Legacy Code: 101593

This unit aims to provide students with a fundamental understanding of the role of government, focusing on the role and nature of planning across all levels of government from a variety of theoretical frameworks. It presents a critical examination of the urban development and planning processes, with particular attention given to the environmental and political issues associated with planning at the local government level. It looks at the changes and challenges confronting local government in view of the demands made on them by the changing social and economic conditions and societal values such as those relating to requirements for public participation, transparency and accountability. The unit also examines the role of private sector in planning and assessment processes.

Level: Undergraduate Level 3 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/envl3005/>)

ENVL 3006 Transport, Access and Equity (10 Credit Points)

Legacy Code: 101645

This unit examines the equity and efficiency issues in the provision of transport in cities and regions from a critical social science perspective. Issues of transport disadvantage and policy and planning responses to improve access to urban services are examined. The social and environmental impact of transport systems are considered in the context of urban management.

Level: Undergraduate Level 3 subject

Equivalent Subjects: LGYA 7234 - Transport Access and Equity

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/envl3006/>)

ENVL 3007 Urban Environment (10 Credit Points)

Legacy Code: 300860

This unit explores the relationships between community, the natural environment and government within an urban context through considering how housing and urban development can influence population health. Concepts explored include "healthy housing", "active living" "safety by design" and "energy efficiency". Through a combination of case studies and practical field experience, students will develop the skills and knowledge appropriate to assessing the "healthiness" and sustainability of urban environments. The unit examines methods of construction and building regulation aimed at the preservation of health and amenity.

Level: Undergraduate Level 3 subject

Equivalent Subjects: LGYA 6254 - Urban Environment

Incompatible Subjects: LGYB 9943 - Environmental Health Law ARCH 3007 - Urban Development Systems NATS 2020 - Healthy Built Environments

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/envl3007/>)

ENVL 3009 Air Quality and Climate Change (10 Credit Points)

Deteriorating air quality and climate change are two major challenges facing humanity and threatening environmental sustainability and human health. As such, air quality and climate change are of International, National, State and local community concern. This unit critically analyses the many issues that relate to air pollution, including its nature, extent, impacts and monitoring. Students will examine an air pollution issue of their choice.

Level: Undergraduate Level 3 subject

Equivalent Subjects: PUBH 3001 - Air Quality and Climate Change LGYA 6192 - Air Quality Management

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/envl3009/>)

ENVL 3010 Environmental Planning, Policy & Regulation (10 Credit Points)

This unit is an introduction to environmental planning and environmental regulations in local and state governments. It covers the role of planning and enforcement of regulations in protecting the natural environment, enhancing public health and/or encouraging sustainable development practices. Students become familiar with the key legislation for environmental protection and then explore how planning and regulations can assist with achieving optimal environmental outcomes. Current planning and regulations are examined using urban development and planning in Sydney as the primary case study. The unit includes key environmental planning policies and important legislation used by state, local and Commonwealth governments to protect the natural and built environment and to protect public health.

Level: Undergraduate Level 3 subject

Equivalent Subjects: PUBH 2007 Environmental Planning and Climate Change

ENVL 2002 Environmental Regulations and Policy

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/envl3010/>)

ENVL 7002 Planning and Environmental Regulation (10 Credit Points)

Legacy Code: 101634

This unit provides students with an understanding of the planning process from both a state and local government perspective. The unit will cover concepts related to the planning process, focusing on development control and regulation issues, planning instruments and development applications. It will also address the areas of planning and environment law, with specific reference to the legal framework that regulates planning and development in NSW.

Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/envl7002/>)

ENVL 7003 Urban Research Report (10 Credit Points)

Legacy Code: 101637

This capstone unit requires students to write a 5,000 word comprehensive research report on a local or international urban planning issue. Students will select a research topic of individual interest, and work to assemble a range of evidence to address the research question. This facilitates an opportunity for students to apply their skills and knowledge acquired in the Master's program, through a high level of work and quality engagement in an authentic and professional context.

Level: Postgraduate Coursework Level 7 subject

Equivalent Subjects: LGYA 1299 - Urban Management Placement Thesis

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/envl7003/>)

Geomatic Engineering (GEOM)

GEOM 2002 Quantity Surveying 2 (10 Credit Points)**Legacy Code:** 200487

This subject is designed to provide students with an advanced understanding of the various roles of a quantity surveyor. Students will develop an ability to apply the skills necessary to deliver both pre-contract and post-contract quantity surveying services.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** GEOM 2001 OR

BLDG 2002

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/geom2002/>)**GEOM 3001 Advanced Building Measurement (10 Credit Points)****Legacy Code:** 301233

This unit is designed to help students develop greater understanding of measurement for complex building works such as commercial and industrial construction. Students will be introduced to measurement used in specialised trades, such as building services and structural steel.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/geom3001/>)

Graphic and Design (DESN)

DESN 0001 Design Practice (WSTC Prep) (10 Credit Points)**Legacy Code:** 700223

Design Practice introduces students to the fundamental principles of graphic design practice. This unit investigates how the design process is applied to real-world industry design briefs to create a visual design. Students develop an understanding of the processes and practices used to support collaboration between clients, designers and specialists when designing and producing visual communications.

Students are guided through the process of interpreting a design brief, creating and pitching a design response, presenting work for critique, incorporating critique into a design solution and producing highly refined design outcomes to a professional standard. Students work on a number of design briefs using industry standard work practices, including time management strategies, multi-tasking, strict delivery deadlines, brief comprehension and job documentation as well as client/designer coordination and negotiation.

Level: Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn0001/>)**DESN 0002 The Design Process (WSTC Prep) (10 Credit Points)****Legacy Code:** 700197

The Design Process introduces the elements and principles of design as well as design processes and methods required to explore and creatively apply the design process. The Design Process focuses on the skills and concepts that contribute to interpreting and responding to design briefs, as well as researching, developing and presenting innovative design solutions. The core of any design process is the design brief. The Design Process acknowledges the importance of this and how it informs relationships between the client, designer and specialists engaged to develop the design process. The unit addresses the purpose, sequence, major stages and application of the design process to synthesise solutions relevant to the design industry.

Level: Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn0002/>)**DESN 0003 Critical Thought in Design (WSTC Prep) (10 Credit Points)**

Critical Thought in Design provides students with an understanding of the process designers use to structure their thinking and communicate ideas with clients, target audiences, other designers and specialists.

The ability to think critically, creatively and independently is essential for success as a designer in generating and communicating innovative design solutions that meet the needs of the client and target audience. The aim of this unit is to provide students with the skills and techniques necessary to become an independent thinker able to research, analyse, argue and communicate effectively with clients.

The unit examines a wide range of critical thinking and design, problem-solving methods including problem definition techniques, idea generation, brainstorming, as well as evaluation and analysis skills.

Level: Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn0003/>)

DESN 1003 Design Histories and Futures (10 Credit Points)**Legacy Code:** 102262

This unit introduces students to historical accounts and theories of design from the dominant perspective of Modernism in the first half of the 20th century, through post-war consumerism and the ensuing movements of the 20th century, such as Postmodernism, Punk and New Wave; design reactions to corporate culture, design for change and activism; and the digital design enablers of the 21st century. Students learn a contextual history of 20th century design practice by studying the doctrines around which the modernist movement cohered, and the conditions under which these doctrines are challenged by later movements. The unit explores various roles of the visual designer through history-avant-garde, futurist, revolutionary, utopian design; client-service design; social activism, producer and digital enabler. These roles are expressed across a range of design outcomes such as photography, typography, illustration, print media, graphics, digital design, film and animation. Part of this exploration will examine the impacts of design histories on our past, present and future conditions, as well as changing the future for design. Students will complete visual and writing tasks that aim to build their understanding of design histories and futures, and scholarship in academic research and writing.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** DESN 1001 - 20th Century Design Histories
DESN 1004 - Design Histories and Futures (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn1003/>)**DESN 1004 Design Histories and Futures (WSTC) (10 Credit Points)****Legacy Code:** 700195

This unit introduces students to historical accounts and theories of design from two dominant perspectives, modernism and postmodernism. Students learn a contextual history of 20th century design practice by studying the doctrines around which the modernist movement cohered and the conditions under which these doctrines are questioned by postmodernism. The unit will explore various roles of the visual designer through history such as the avant gardist, futurist, revolutionary, utopian, client-service designer, social activist, producer and digital enabler, as these roles were expressed across a range of design outcomes such as photography, typography, illustration, print media, graphics, digital design, film and animation over a century and beyond. Part of this exploration will examine the impacts of design histories on our past, present and future conditions, as well as the investments in changing the future for design. Students will complete visual and writing tasks that aim to build their understanding of design histories and futures, and scholarship in academic research and writing.

Level: Undergraduate Level 1 subject**Co-requisite(s):** Students enrolled in the combined DiplomaBachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year Two units**Equivalent Subjects:** DESN 1003 - Design Histories and Futures
DESN 1001 - 20th Century Design Histories**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn1004/>)**DESN 1007 Graphic Design: Process and Practice (20 Credit Points)****Legacy Code:** 102264

This unit enables students to further develop their understanding of the design process within the context of project briefs that introduce areas of graphic design practice that include branding and identity and information design. Students' understanding of a design brief, the client, and a clearly defined audience will deepen. Students will be introduced to some design specific research skills, such as mood board and persona development, which will help them begin to build a toolkit of methods which they will use throughout their degree. Students will develop their design process and a greater awareness of the role of research in the generation of ideas. Students will be introduced to further lateral thinking techniques and encouraged to develop creative responses to the project briefs within appropriate constraints for both client and audience needs. Further key software will be introduced and supported by online resources, and students will continue to develop their visual design skills in the fundamental areas of type, image and composition.

Level: Undergraduate Level 1 subject**Pre-requisite(s):** DESN 1009**Equivalent Subjects:** DESN 1008 - Graphic Design Process and Practice (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn1007/>)**DESN 1008 Graphic Design: Process and Practice (WSTC) (20 Credit Points)****Legacy Code:** 700194

This unit enables students to further develop their understanding of the design process within the context of project briefs that introduce areas of graphic design practice that include branding and identity and information design. Students' understanding of a design brief, the client and a clearly defined audience will deepen. Students will be introduced to some design specific research skills, such as mood board and persona development, which will help them begin to build a toolkit of methods which they will use throughout their degree. Level: Undergraduate Level 1 subject**Pre-requisite(s):** DESN 1010**Co-requisite(s):** Course 6011 - Diploma in DesignBachelor of Design (Visual Communication)

Course 6013 - Diploma in DesignBachelor of Graphic Design (Pathway to Teaching Secondary)

Students enrolled in the combined DiplomaBachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year 2 units

Equivalent Subjects: DESN 1007 - Graphic Design Process and Practice**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn1008/>)

DESN 1009 Graphic Design: Understanding the Principles (20 Credit Points)**Legacy Code:** 102261

This unit introduces students to the fundamental principles of visual language and graphic design practice. Through a series of workshops, exercises and project briefs, students will learn how elements such as colour, composition, text, typography and image can be used to communicate meaning in a variety of contexts. Through the project briefs students will begin to develop their awareness of graphic design as a problem solving activity and apply their understanding of the design process in relation to research skills, idea generation, reflective practice, and both written and verbal communication skills. Students will learn the importance of prototyping, developing and refining their ideas through practice, and aspects of the digital print production process will also be introduced. Students will be introduced to design software packages and to support the ongoing development of their digital media skills they will be provided with access to resources for independent online learning.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** DESN 1010 - Graphic Design Understanding the Principles (WSTC)**Incompatible Subjects:** DESN 1016 Introduction to Typography DESN 1006 Digital Design Production**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn1009/>)**DESN 1010 Graphic Design: Understanding the Principles (WSTC) (20 Credit Points)****Legacy Code:** 700193

This unit introduces students to the fundamental principles of visual language and graphic design practice. Through a series of workshops, exercises and project briefs, students will learn how elements such as colour, composition, text, typography and image can be used to communicate meaning in a variety of contexts. Through the project briefs, students will begin to develop awareness of graphic design as a problem solving activity and apply their understanding of the design process in relation to research skills, idea generation, reflective practice and both written and verbal communication skills. Students will learn the importance of prototyping, developing and refining their ideas through practice and aspects of the digital print production process will also be introduced. Level: Undergraduate Level 1 subject**Co-requisite(s):** Students enrolled in the combined DiplomaBachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year 2 units**Equivalent Subjects:** DESN 1009 - Graphic Design Understanding the Principles**Incompatible Subjects:** DESN 1016 - Introduction to Typography DESN 1006 - Digital Design Production**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn1010/>)**DESN 1011 Image Design (10 Credit Points)****Legacy Code:** 102263

Image Design introduces students to the use of signification and metaphor in the visual communication of verbal and written concepts. The process of creating and evaluating images is explored through the principles of visual organisation, and the experience of image making through photographic and illustrative methods, techniques and mediums.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** DESN 1013 - Image Design Illustration DESN 1015 - Introduction to Photomedia DESN 1012 - Image Design (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn1011/>)**DESN 1012 Image Design (WSTC) (10 Credit Points)****Legacy Code:** 700196

This unit introduces students to the use of signification and metaphor in the visual communication of verbal and written concepts. The process of creating and evaluating images is explored through the principles of visual organisation and the experience of image making through photographic and illustrative methods, techniques and mediums.

Level: Undergraduate Level 1 subject**Co-requisite(s):** Students enrolled in the combined DiplomaBachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year Two units**Equivalent Subjects:** DESN 1011 - Image Design DESN 1013 - Image Design Illustration DESN 1015 - Introduction to Photomedia**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn1012/>)**DESN 1018 Visual Storytelling (10 Credit Points)****Legacy Code:** 101921

Visual storytelling is increasingly being used in a variety of contexts including websites, magazines, advertising, business and public affairs, exhibitions and events and television, often working across a number of platforms at the same time as requiring responsive design approaches for a diversity of viewing experiences. With access to increasing amounts and types of data, professional communicators need to be able to extract meaning to connect with a variety of different audiences in creative, dynamic, and emotional ways. This Unit introduces students to story archetypes, structure and flow. It encourages metaphorical and analogical storytelling using appropriation making reference to genre and research. This practical unit explores a range of traditional hands-on techniques and digital software commonly used across the communications sector. Students are encouraged to explore and develop their own mark and image making skills aimed at specific target audiences and communication contexts.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** LGYA 2353 - Design Principles 2D3D DESN 1005 - Design Thinking DESN 1019 - Visual Storytelling (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn1018/>)

DESN 1019 Visual Storytelling (WSTC) (10 Credit Points)**Legacy Code:** 700183

Visual storytelling is increasingly being used in a variety of contexts including websites, magazines, advertising, business and public affairs, exhibitions and events and television, often working across a number of platforms at the same time as requiring responsive design approaches for a diversity of viewing experiences. With access to increasing amounts and types of data communicators need to be able to extract meaning to connect with a variety of different audiences in creative, dynamic and emotional ways. This unit introduces students to story archetypes, structure and flow. This practical unit explores a range of traditional hands-on techniques and digital software commonly used across the communications sector. Students are encouraged to explore and develop their own mark and image making skills aimed at specific target audiences and communication contexts.

Level: Undergraduate Level 1 subject**Co-requisite(s):** Students enrolled in the combined Diploma/Bachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year Two units**Equivalent Subjects:** DESN 1018 - Visual Storytelling LGYB 0479 - Design Thinking (UWSC) DESN 1005 - Design Thinking**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn1019/>)**DESN 1021 Web and Time-based Design (10 Credit Points)****Legacy Code:** 101922

Students will develop fundamental computer software skills and design understandings appropriate to using major web and time based design technologies such as HTML and CSS. They will develop a working understanding of production literacies for online design and time-based design. Students will engage in practical studies of web authoring. Emphasis will be placed on understanding the roles, functions and features of key screen based technologies, design production context for online delivery, current industry best practices, and a working understanding of the responsibilities inherent in the digital design and production process.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** DESN 1020 - Web and Time-based Design DESN 1022 - Web and Time-based Design (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn1021/>)**DESN 1022 Web and Time-based Design (WSTC) (10 Credit Points)****Legacy Code:** 700187

Students will develop fundamental computer software skills and design understandings appropriate to using major web and time based design technologies such as HTML and CSS. They will develop a working understanding of production literacies for online design and time-based design. Students will engage in practical studies of web authoring. Emphasis will be placed on understanding the roles, functions and features of key screen based technologies, design production context for online delivery, current industry best practices, and a working understanding of the responsibilities inherent in the digital design and production process.

Level: Undergraduate Level 1 subject**Co-requisite(s):** Students enrolled in the combined Diploma/Bachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year Two units**Equivalent Subjects:** DESN 1021 - Web and Time-based Design**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn1022/>)**DESN 2001 Australian Design (10 Credit Points)****Legacy Code:** 101923

This unit continues the focus on academic and visual literacies for visual communication designers initiated in level one units. Students will investigate the Australian visual communication design profession, largely through the documentation of selected output and established methods across industry sectors producing graphic, photographic, illustrative, typographic, broadcast, interactive and online design. Lectures and selected case studies will outline professional scenarios and support the student in learning about the design industry's organisation and methods. Assessment tasks are designed to develop research and writing skills through the evaluation of professional resources and publications.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn2001/>)**DESN 2002 Creativity, Innovation and Design Thinking (10 Credit Points)****Legacy Code:** 102211

The aim of this cross-disciplinary unit is to encourage students to explore their creative potential and broaden their perspectives of innovation through the lens of design thinking. Design thinking offers a range of strategic and practical approaches to both creativity and innovation including an understanding of stages of thinking and reflection; an evaluation of the dynamics of team work; the workings of conversation and dialogue to generate new thinking about complex problems. Students will learn about design thinking methodologies, and apply these towards addressing broader social issues in innovative and creative ways.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn2002/>)**DESN 2005 Graphic Design: Interactive Digital Media (20 Credit Points)****Legacy Code:** 102265

Digital technology shapes the way we interact with our world. Design of these interactions is a crucial role for today's designers. This unit will develop students' critical interaction and visual design skills in the digital realm, including interface and experience design. Digital design specific research skills, methods and processes are covered. These include user research, persona development, storyboard development, lo-fi and hi-fi prototyping, wireframes and proof of concept methods. Students will engage with problem-based project briefs, and develop solutions that are appropriate for both client and audience needs across a range of devices. Outcomes include app, web and screen designs.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** DESN 1021**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn2005/>)

DESN 2006 Graphic Design: The Professional Context (20 Credit Points)**Legacy Code:** 102270

In this unit, students begin to situate their graphic design practice within a contemporary professional context. Designers today need to collaborate with colleagues or other professionals, and the majority of graphic design briefs require solutions that converge across a variety of media platforms and two, three or four dimensions. Students will undertake projects that extend their design thinking in these areas. Part of the unit requires students to work as part of a team, to develop content and a solution that engages the audience through a range of different media. Throughout this unit, students continue to extend their visual language, and associated material and digital skills.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** DESN 1007**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn2006/>)**DESN 2007 Illustrating Narrative (10 Credit Points)****Legacy Code:** 101017

This unit explores the conceptual, stylistic and format design of illustration for, and as, narrative. Through the design of an individual illustrated book project, students are encouraged to consider the design of different narrative forms, illustrative techniques and styles in relation to content, target audience, client, context, and genre.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** DESN 1013 OR

DESN 1011

Equivalent Subjects: LGYA 0045 - Illustrative Narrative 3 and LGYA 0052 - Illustrative Narrative 4**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn2007/>)**DESN 2011 Motion Design (10 Credit Points)****Legacy Code:** 102273

This unit introduces students to the fundamentals of motion design practice. Students will discover how elements of static graphic design can be incorporated with sequence, time, space and sound to enhance the exchange of information and meaning in a variety of project contexts and kinetic media outcomes. Additionally, students will discover the purpose and function of motion design and be able to identify professional pathways associated with these skills and knowledge. Students will be exposed to a range of motion design preproduction and production methods, from fundamentals and guidelines to experimental and expressive approaches. Students will learn the importance of planning, mapping and evaluating linear narrative, in combination with the introduction of key software supported by online video courses, for successful motion design outcomes.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** DESN 1021 OR

COMM 2042 OR

COMM 2051 OR

COMM 2051 AND

COMP 2020

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn2011/>)**DESN 2013 Photomedia: Photographic Practice (10 Credit Points)****Legacy Code:** 102268

This unit introduces and examines the multifaceted nature of photographic practice. Students will be introduced to current methods of photographic image production and design for the purpose of Visual Communication. It explores the relationship between photographic technique, genre and the reception of photographic imagery. Students will be introduced to photographic studio practice as the means of controlling image reception, through the intrinsic principles of the photographic medium, including the control of light, exposure in a studio situation and digital post production.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** DESN 1015 OR

DESN 1011

Equivalent Subjects: DESN 2012 - Photomedia LGYA 0818 - Designing the Image LGYA 0835 - Photo Documentary LGYA 2354 - Introduction to Photomedia**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn2013/>)**DESN 2014 Researching the Visual (10 Credit Points)****Legacy Code:** 102266

This unit will introduce students to various ways of seeing and reading images in the visual environment. Students will learn how to conduct visual research using a tool kit of methods including semiotic analysis, content and thematic analysis, and basic observational research across the digital and material environments of visual communications design, and to apply their findings in the development of visual concepts. Students will continue to engage as reflective practitioners and learn to position themselves as visual researchers within a particular cultural and personal context.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** DESN 1003 OR

DESN 1011 OR

DESN 1021

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn2014/>)**DESN 3001 Contextual Design Studies (10 Credit Points)****Legacy Code:** 102275

Contextual design studies is the study of what happens around design practice - before, during and after - to explain its meaning and effect. Successful communication design has always depended on the connection between form, content, audience and context, and the designer's abilities to analyse, understand and clarify the contexts of communication have become more important to creative practice. In this unit students will learn to apply the theoretical frameworks of semiotic, thematic and rhetorical analysis used by the interdisciplinary field of Design Studies to interpret design's potential as cultural expression and communication. Students will analyse visual signs and conventions as both targeted and tacit responses to a range of contexts revealing design's interests in marketplaces, society and identity. Students will analyse various graphic examples, and design literature, as they investigate the significance and agency of design interactions, media artefacts and systems.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** DESN 2014**Equivalent Subjects:** DESN 2003 - Design Issues**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn3001/>)

DESN 3002 Data Visualisation (10 Credit Points)**Legacy Code:** 102269

We live in an era of data. The designer's role is increasingly one of structuring and transforming data into accessible and meaningful information. In this unit students will be introduced to basic techniques for the visual representation of data. This unit covers both how to design successful charts, maps, and diagrams, as well as how to use these graphics to compose cohesive storytelling pieces. Students will also discuss both practical and theoretical issues when visualising data, and how Graphic Design and Interactive Design principles apply to the visualisation of information. Students will learn how to design basic infographics and mock ups for interactive visualisations, and they will develop skills to start producing compelling and elegant infographics and data visualisation.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** DESN 1021 OR

DESN 1007

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn3002/>)**DESN 3003 Design Research Project (10 Credit Points)****Legacy Code:** 102277

This unit offers students the opportunity to develop a self-negotiated design project through exploring a variety of research methods, reflective practice, and concept prototyping. Students will develop a project that focuses on a particular area of interest in order to consolidate their portfolio, and for students enrolled in B Design (Vis Comm), lay the foundation for their fourth year major design project.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** DESN 2014 OR

DESN 3013

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn3003/>)**DESN 3005 Design Thinking (10 Credit Points)****Legacy Code:** 101924

Navigating and addressing the complexity of 21st Century problems and issues requires critical and creative thinking. This unit explores common attributes of design thinking to assist students in developing creative and intelligent responses to the complex scenarios of the contemporary world.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn3005/>)**DESN 3006 Graphic Design: Developing a Personal Portfolio (10 Credit Points)****Legacy Code:** 102276

This unit focuses on the development of your industry orientated practice and personal portfolio development. Throughout the previous core units and unit pairings you will have developed particular skills and interests that are beginning to define your design practice and your portfolio. The briefs set in this unit offer you the opportunity to specialise further and to develop your portfolio and will, where possible, include live briefs and competitions. You will continue to refine and develop your visual language, material and digital skills, and continue to develop as an independent learner. The unit will culminate in an industry event, where students will have the opportunity to get their portfolios critiqued by design industry representatives.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** DESN 2006 OR

DESN 3001 OR

MKTG 2003 OR

MKTG 2003

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn3006/>)**DESN 3007 Illustrating Popular Culture (10 Credit Points)****Legacy Code:** 102271

This unit explores the powerful qualities of illustration when used as a visual communication strategy in the design of popular culture: within an advertising campaign and as social commentary through editorial illustration. The potential of a range of illustrative styles, mediums and techniques, will be explored through experimentation with a variety of visual strategies that utilize lateral thinking, linked to the design of professional concepts, developmental processes and media considerations.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** DESN 1011**Equivalent Subjects:** DESN 2008 - Illustration Advertising and Editorial**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn3007/>)**DESN 3008 Interactive Design: Apps (10 Credit Points)****Legacy Code:** 102267

This unit focuses on design methodology for the development and delivery of interactive media applications (apps). Particular concepts addressed include conceptual integration and convergence of various media forms, screen design, navigational hierarchy and structures, and designing engaging interactive interfaces. General principles of interface, information architecture and interaction design will be introduced, alongside principles of digital media production.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** ENGR 1021 OR

DESN 1021

Equivalent Subjects: DESN 2010 - Interactive Design 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn3008/>)

DESN 3011 Public Memory and Commemoration (10 Credit Points)**Legacy Code:** 101253

Throughout history various forms of material culture (such as art, architecture, sculpture, objects and photographs) have been used to memorialize individuals as well as to commemorate events, both personal and national. As such, an examination of commemorative works offer valuable insights into the production of public memory and history. This unit explores the particular contexts of such memorials; their meaning, design and, politics. The diverse expressions of commemoration in Australia and the consequent production of public memory provides the arena for such considerations.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYA 0528 - Dangerous Visions LGYA 1028 - Dangerous Visions**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn3011/>)**DESN 3012 Publications (20 Credit Points)****Legacy Code:** 101013

This unit examines the role of publication design as a promotional tool. Students explore a range of print and online promotional forms and are involved in the design and production of publications for specific target audiences, including approaches to layouts, image and text relationships, typography and graphic forms. Within a studio environment, students gain an understanding of publication production and visual narrative methodologies through the exploration of media areas appropriate to the project requirements.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** DESN 1006 OR

DESN 1020

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn3012/>)**DESN 3013 Social Design: Research and Practice (10 Credit Points)****Legacy Code:** 102274

This unit introduces students to the idea that graphic designers can be agents of change. Set project briefs will focus on social and political issues exploring the potential inherent in graphic design practice to make a real difference to society. The unit will encourage students to go beyond the definition of a problem solver, encouraging them to act as a problem seeker, who can use their design thinking skills to develop ideas that respond proactively to society's problems rather than reacting to a client's set brief. The unit will introduce further design-led, social and participatory research methods, that continue to build on the design process, and further expand the methods that underpin aspects of research and practice during the remainder of the degree. Students will refine and develop their visual language skills, in combination with material and digital skills, facilitating their development as an independent learner.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** DESN 2006 OR

DESN 2014

Equivalent Subjects: DESN 3004 Design Research Training**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn3013/>)**DESN 4003 Design Project (20 Credit Points)****Legacy Code:** 101090

Design Project will provide students with the opportunity to work in a 'real world' context. Students will learn how to construct a meaningful promotional campaign for a socially responsible purpose. The campaign will be based on an identified social or environmental issue, utilizing responsible design practices. Through research and planning, in relation to a set of relevant constraints: such as cultural, social, environmental, site and audience, students will develop a design and communication strategy for the campaign that utilises the appropriate media, message and approach, to address the identified target audience, based on research findings.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** DESN 1006 OR

DESN 1020

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn4003/>)**DESN 4005 Major Design Project (10 Credit Points)****Legacy Code:** 102279

In this year-long unit students will develop a self-directed project from proposal to production, in consultation with an academic supervisor. The first semester involves engaging in background research to facilitate creative development. Students will build a field survey of their topic area identifying precedents and contexts, leading to experimentation and exploration of a range of potential options and addressing any arising issues, to develop a sound proof of concept. In the second semester students will develop the work to a finished outcome, through an iterative process of prototyping, reflection and analysis. It is expected that there will be a consistent and documented developmental process undertaken across the year, resulting in the final work, which will be a professional level outcome, realised in a specific discipline field within Visual Communication. Students are expected to be self-motivated, and work as an independent professional practitioners, throughout the major design project work.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** DESN 3004 OR

DESN 3003

Equivalent Subjects: DESN 4001 - Communication Design Major Project**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn4005/>)**DESN 4006 Professional Design Experience: The Individual Practitioner (20 Credit Points)****Legacy Code:** 102280

Students will continue to work in the Rabbit Hole studio, but in this unit they are positioned as a junior designer who is working individually in response to a range of briefs with their tutor as Creative Director. Students will develop their capacity to manage projects independently from briefing, research, development, costing, and pitching. Through this capstone unit, students will also develop a self-promotion strategy, and increase their understanding of a range of professional practice issues as they relate to the individual practitioner, further preparing them for the industry.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** DESN 4007**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn4006/>)

DESN 4007 Professional Design Experience: The Studio (20 Credit Points)**Legacy Code:** 102278

The Rabbit Hole design studio simulates a professional environment where students heighten their design thinking and practice through work-integrated learning. In this unit, the student is positioned as a junior designer who is part of a team working in response to live briefs with real learning partners and tangible outcomes, under the guidance of tutors who act as creative directors. Students will develop their higher level professional design skills through working individually and collaboratively to manage projects from briefing, research, development, pitching, artworking, production and delivery. Through this unit, students will also advance their understanding of what the industry expects of junior designers, providing a bridge between study and work life.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** DESN 3006**Equivalent Subjects:** DESN 4008 - Professional Design Studio**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn4007/>)**DESN 9001 Higher Degree Research Thesis - Graphic and Design Studies (20 Credit Points)****Legacy Code:** 800001**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/desn9001/>)

Horticulture and Viticulture (HORT)

HORT 1001 Crop Production (10 Credit Points)**Legacy Code:** 300815

This unit aims to provide students with an understanding of the scientific basis of sustainable crop and food production and security. These include broad-acre cropping, fruits/orchards and vegetables. In this unit students will gain an understanding of the physiological controls on crop yield in the variable Australian environment in which crops are grown. Students will become familiar with the science and practice of sustainable crop production and develop crop management skills through the production of nursery crops, vegetables and fruits. Students will also gain an understanding of processing these crops after harvest, to develop an appreciation of factors impacting upon produce quality and safety.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** HORT 1003 - Horticultural Production 2 BIOS 2023 - Fruit Production LGYA 5943 - Floriculture HORT 1002 - Crop Production**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/hort1001/>)**HORT 1004 Horticultural Production Systems (10 Credit Points)****Legacy Code:** 301096

Food represents the single largest part of your environmental footprint.

This means our modern, urban-oriented society must begin to reconnect with the sources of our food to create more sustainable future. This unit explores the scientific basis of sustainable crop production by examining fruit, vegetable and grain enterprises. Management of produce from harvest to consumption will also be explored to examine factors that impact upon food quality and safety. Students will compare and contrast growing conditions of the highly variable Australian environment to consider the global context for horticultural industry development. By delving into the world of crop management, students will identify the impacts (opportunities and constraints) of plant physiology on the sustainability of food. Students will also consider how novel food products can prompt consumers to appreciate the environmental, economic and social benefits that can arise from sustainable horticultural production.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** HORT 1003 - Horticultural Production 2 LGYA 5944 - Fruit Production HORT 1002 - Crop Production HORT 1001 - Crop Production**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/hort1004/>)**HORT 1006 Protected Cropping Biosecurity and Pollination (10 Credit Points)****Legacy Code:** 301214

The protected cropping industry in Australia is a rapidly expanding sector. There is an identified need for trained professionals who have an understanding of the management of plant pests and diseases. Students studying this course will learn industry best practice related to biosecurity, pest and disease management and emergency response procedures. In addition to pest and disease management the challenges of pollination in the context of Australian protected cropping will be explored. Western Sydney University is home to the state of the art National Vegetable and Protected Cropping Centre (NVPCC), this facility will be utilized in the on campus components of this course.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/hort1006/>)**HORT 1007 Protected Cropping Plant Nutrition (10 Credit Points)****Legacy Code:** 301277

Plant nutrition is essential to plant health and defence, productivity and crop quality; this is especially so in the soilless environment employed by the protected cropping industry. This unit will focus on crop nutrient requirements, nutrient deficiencies and their symptoms, practical nutrient monitoring using hand-held technologies and the PRIVA system and correction techniques. This unit also explores soilless substrates and their influence on nutrient loads, nutrient-rich waste water recovery, reuse and environmentally sustainable disposal options. Western Sydney University is home to the state of the art National Vegetable and Protected Cropping Centre (NVPCC), this facility will be utilized in the on campus components of this course.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/hort1007/>)

HORT 2001 Greenhouse Technology for Food Sustainability (10 Credit Points)**Legacy Code:** 301097

Greenhouses are enclosed structures that optimise temperature, light, water and carbon dioxide to maximise plant production. Also called 'greenhouse horticulture', these advanced systems integrate technologies across disciplines (e.g. horticultural, environmental and material sciences; mechanical engineering and design; robotics and computing programming) to create futuristic indoor environments that increase the quantity and quality of plant-derived foods. Controlled environments can significantly reduce reliance on inputs (fertiliser, pesticide, energy and water) and reduce environmental impacts (including 'food miles'). This unit explores a range of greenhouse technologies in Australia and overseas-from simple low-cost options, through to cutting-edge technology in energy and water-efficient production. Students will observe current status and future trends in the industry to examine how advanced technologies can improve sustainability measures along with the reliability of horticultural output. Students will consider how innovative horticultural enterprises can provide consumers with greater capacity to adopt more sustainable diets.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/hort2001/>)**HORT 2003 Plant Production (10 Credit Points)**

This unit will provide you with an understanding of the scientific basis of sustainable plant production in natural and built environments. These include cropping of plants for food production in extensive and intensive systems. In this unit you will gain an understanding of the physiological controls on plant yield in the Australian environment. You will become familiar with the science and practice of sustainable plant production and develop crop management skills through the production of nursery crops, vegetables and fruits.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/hort2003/>)**HORT 3001 Postharvest (10 Credit Points)****Legacy Code:** 300869

This unit explores the factors affecting the retention of quality of fresh fruit, vegetables and cut flowers from grower to consumer. Topics include: the role of fresh produce for the health and happiness of people; the growth and maturation and physiology of fresh produce; the importance of managing temperature and relative humidity of the storage environment; the responses of fresh produce to changes in temperature and water loss; the role of ethylene in fruit ripening and senescence; the practical issues of assessing harvest maturity; packaging; distribution and the control of postharvest diseases and pest and the concepts of market access.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** HORT 2002 - Postharvest**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/hort3001/>)**HORT 3002 Protected Cropping Technology (10 Credit Points)**

This unit will develop your understanding of the role technology plays in underpinning plant production, in built environments, as well as the impact on processing and consumption of established and emerging opportunities. This unit explores the factors affecting growth, maturation and physiology of plant products in the protected cropping environment. Industry issues of controlling pests and disease, assessing harvest maturity, post-harvest management are underpinned by systems modelling and sustainable practices.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/hort3002/>)**HORT 7001 Advanced Greenhouse Technology (10 Credit Points)****Legacy Code:** 301358

This unit explores a range of advanced greenhouse technologies in Australia and overseas-from simple low-cost options, through to cutting-edge technology in energy and water-efficient production. Students will observe current status and future trends in the industry to examine how advanced technologies can improve sustainability measures along with the reliability of horticultural output. This unit focuses on engineering aspects of greenhouse horticulture systems as well as crop growth and development. The basics of crop growth and development and the physical principles of greenhouse systems at different levels will be taught. The main in depth topics of the unit are: the selection of suitable greenhouse technology, physics of greenhouse climate, greenhouse systems (passive greenhouse, climate controlled, closed or semi-closed greenhouse), cropping systems, cover materials and smart glass technologies, energy saving technologies, water and nutrient recycling, and robotics for de-leafing and picking.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/hort7001/>)**HORT 7002 Greenhouse Control Systems (10 Credit Points)****Legacy Code:** 301359

This unit develops an understanding of the leading controlling systems for protected cropping in low, medium and high-tech greenhouses. The main topics are: the integration of hardware and software in a range of different protected cropping systems, management of the aerial environment (e.g. manageable parameters and greenhouse climate engineering, radiation management, energy sources and distribution systems, ventilation, air conditioning and cooling systems, screens, carbon dioxide-sources and distribution), and management of the hydroponic environment (factors, tools, control of water and nutrient balance, water quality, salinity effects). The unit emphasises computing skills, calculation, and analysis that are applicable to a range of different greenhouse control systems.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/hort7002/>)

HORT 7003 Greenhouse Crop Production (10 Credit Points)**Legacy Code:** 301360

This unit focuses on key concepts relating to the functioning of a range of greenhouse horticultural crops in their environment, biological mechanisms, crop growth and development, integrated pest management, crop production, quality and postharvest technology. Students will learn concepts and knowledge relevant to plant physiology, environmental sciences, horticultural production, food technology, and postharvest physiology. Students will be able to measure and interpret plant physiological, biochemical, genetic, and produce quality traits in greenhouse experiments in the context of the functional diversity in crops. The students will also integrate knowledge using plant growth modelling techniques, interpret model output, and address questions on functional diversity in crops by combining model output and experimental data.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/hort7003/>)**HORT 7004 Industry Project (10 Credit Points)****Legacy Code:** 301361

In this unit, students will complete an industry based project under the guidance of an industry partner and a member of the University's academic staff. Using a project based methodology, students will be required to solve a real world problem on behalf of a protected cropping industry partner. Students will develop skills in scoping, planning, implementing, reporting on the industry project; reflecting on what has been learned in the context of their personal and professional development and how this can be used in their future career.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/hort7004/>)**HORT 7005 Industry Project (Extended) (10 Credit Points)****Legacy Code:** 301362

In this unit, students will undertake a more in depth investigation of the project undertaken in 301361 Industry Project. Students will extend their use of project based methodologies to solve the problem identified in the pre-requisite unit 301361 Industry Project for a protected cropping industry partner. Students will extend their skills in planning, implementing, collecting and analysing data, reporting on the industry project and reflecting on what has been learned in the context of their personal and professional development and how this can be used in future career.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** HORT 7004**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/hort7005/>)**HORT 7006 Plant-Climate Interactions in Controlled Environments (10 Credit Points)****Legacy Code:** 301357

This unit aims to provide knowledge of relationships between plant growth, controlled environment and crop physiological aspects relevant to protected crop production. The unit will provide students with relevant knowledge to explain and develop concepts that are key to understanding various areas of environmental plant physiology. The unit will also stimulate students to conceptualise interactions between the physical environment and plant functioning. The unit will compare the important parameters and concepts (e.g. plant growth, plant and fruit development, light interception, light use efficiency, biomass partitioning, and water use efficiency) in horticultural crop growth in the controlled systems.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/hort7006/>)**HORT 9001 Higher Degree Research Thesis - Horticulture (20 Credit Points)****Legacy Code:** 800071**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/hort9001/>)**HORT 9002 Higher Degree Research Thesis - Viticulture (20 Credit Points)****Legacy Code:** 800073**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/hort9002/>)

Human Welfare and Services (WELF)

WELF 1002 Context of Human Services (10 Credit Points)**Legacy Code:** 101596

This unit introduces students to the role of human services within the Australian political context. Students will develop a critical analysis of the contribution of the market, state and community encouraging reflection on underpinning values. It will also identify the change strategies which can be developed and used in each of these domains to bring about socially just outcomes.

Level: Undergraduate Level 1 subject**Incompatible Subjects:** WELF 1005 - Introduction to Welfare POLI 1005 - Social Policy**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf1002/>)

WELF 1003 Human Services Intervention Strategies (10 Credit Points)**Legacy Code:** 400193

This is an introductory unit which examines underlying theories of social welfare work, community work, youth work and international social development. Students will explore the ideological underpinnings of theories and discourses in the human services, particularly with regard to the impact of poverty, inequity and the experience of vulnerable populations. The contribution of other disciplines to knowledge and practice in these fields of practice will also be examined. This unit will focus on developing beginning assessment and intervention skills in working with individuals, groups, and communities. Students will also develop an understanding of ethical issues related to social work practice and working in human service organisations as a member of a team.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf1003/>)**WELF 1004 Human Services Intervention Strategies (WSTC) (10 Credit Points)****Legacy Code:** 700142

This is an introductory unit which examines underlying theories of social welfare work, community work, youth work and international social development. Students will explore the ideological underpinnings of theories and discourses in the human services, particularly with regard to the impact of poverty, inequity and the experience of vulnerable populations. The contribution of other disciplines to knowledge and practice in these fields of practice will also be examined. This unit will focus on developing beginning skills in working with individuals (casework), working with groups, community work and working in human service organisations as a member of a team.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** WELF 1003 - Human Services Intervention Strategies**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf1004/>)**WELF 1006 Introduction to Working with Individuals, Families and Communities (Block Mode) (10 Credit Points)****Legacy Code:** 101771

This unit introduces students to a range of knowledge and skills for working with Indigenous individuals, families and communities as welfare and community workers. The unit begins with exploring students' expectations of, and understandings about, welfare and social and community development. Students are supported to develop introductory skills in the areas of engagement, interviewing and group work practice. The unit places importance on self-reflection and building resources for sustainability as a community worker.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** LGYA 1675 - Introduction to working with Individuals Families and Communities (Day Mode) LGYA 7643 - Skills Development in the Human Services (AREPMETRO)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf1006/>)**WELF 1007 Mental Health Workforce Training (10 Credit Points)****Legacy Code:** 102530

This unit is a Level 1 Open Elective for eligible students who have completed the Certificate IV in Mental Health (CHC43315) with Wesley Mission. This Certificate prepares mental health workers for the provision of self-directed, recovery oriented support for people affected by mental illness and psychiatric disability. The initial training is carried out on campus at Western Sydney University under the guidance of Wesley Mission (Sydney). The unit involves reflecting on the links between mental health workforce training and the academic discipline of psychology. The focus of this unit is on the knowledge required for mental health workers.

Level: Undergraduate Level 1 subject**Co-requisite(s):** BEHV 1018 OR

BEHV 1016

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf1007/>)**WELF 1009 Welfare Field Education 1 (Block Mode) (10 Credit Points)****Legacy Code:** 101765

This unit enables students to participate in a structured and supervised field placement (140 hours). Welfare Field Education 1 (Block Mode) provides students with the opportunity to apply their knowledge and experience in linking theory with practice, and extend their skills for community work with the support of practitioners working in the human services sector. Placements are offered in a variety of agency types spanning all areas of community work practice: work with individuals, groups and families, community development; research and policy.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** LGYA 7647 - Welfare Field Education 1 (AREPMETRO) WELF 2016 - Welfare Field Education 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf1009/>)**WELF 1010 Human Services Intervention Strategies (UG Cert) (10 Credit Points)**

This is an introductory unit which examines underlying theories of social welfare work, community work, youth work and international social development. Students will explore the ideological underpinnings of theories and discourses in the human services, particularly with regard to the impact of poverty, inequity and the experience of vulnerable populations. The contribution of other disciplines to knowledge and practice in these fields of practice will also be examined. This unit will focus on developing beginning assessment and intervention skills in working with individuals, groups, and communities. Students will also develop an understanding of ethical issues related to social work. Students will also develop an understanding of working in human service organisations as a member of a team.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** WELF 1003 - Human Services Intervention Strategies**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf1010/>)

WELF 1011 Introduction to Social Work in Australia (10 Credit Points)

This unit introduces students to social work, its common values, different perspectives, and current debates. Diverse constructions of social work embedded in different knowledge systems and models will be explored. Social work perspectives in a multicultural cosmopolitan Australia will be analysed including, amongst others, Indigenous social work, White western social work, Pacific social work, Afrocentric social work, memorial social work, Brazilian social work, etc. An overview of the changing Australian socio-political environment, policy and practice context will be explored and the role of social work in the different fields of practice analysed, to locate strategies for generating positive and creative social change.

Level: Undergraduate Level 1 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/welf1011/>)

WELF 1012 Understanding Disability: Historical and Contemporary Frameworks (10 Credit Points)

Disability Studies is a multi-disciplinary field that investigates, critiques, and enhances society's understandings of disability. The unit will introduce students to contemporary frameworks for recognising how people with disabilities have experienced disadvantage and exclusion because of personal and societal responses to impairment.

The unit will explore how disability activists and scholars have re-conceptualised disability from a more empowering social-political and human rights perspective as an element of human diversity. The unit is grounded in case study pedagogy to ensure the integration of applied practice with rich conceptual and rigorous frameworks.

Level: Undergraduate Level 1 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/welf1012/>)

WELF 2001 Community Management and Organisations (10 Credit Points)

Legacy Code: 101644

This unit focuses on community management in Australia and the social and economic factors that influence and frame community management practices. At the macro level, it examines the effects of neo-liberal (economic rationalist) reforms in the public and community sectors; and the rise of developments such as managerialism and 'third way' approaches, on community management practices. The unit also explores developments in management practices in response to social developments such as multiculturalism, recognition of diversity, equal employment opportunity and recognition of contextual and local issues. It further looks at community management work practices, including volunteerism, steering committees, management committees, and collectives.

Level: Undergraduate Level 2 subject

Equivalent Subjects: LGYA 1371 - Community Management and Organisations LGYA 9706 - Community Management and Organisations

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/welf2001/>)

WELF 2002 Community Work & Development (10 Credit Points)

Legacy Code: 101632

This unit introduces theories and skills in community work and community development. There will be an exploration of the range of ways the term "community" is used and an analysis of the assumptions, values, goals and visions behind community work will be discussed. The unit will explore the breadth and scope of community work at a local, state and global level. The unit will provide an opportunity to develop an understanding of the environmental, political, economic and cultural issues relevant to community work practice.

Level: Undergraduate Level 2 subject

Equivalent Subjects: WELF 1001 - Community Work and Community Development

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/welf2002/>)

WELF 2003 Community Work and Community Development (Block Mode) (10 Credit Points)

Legacy Code: 101774

This unit introduces theories and skills in community work and community development. It begins with an analysis of the terms community and community development and their competing meanings and discourses. This is followed by an examination of the breadth and scope of community work at a local, state and global level. The unit will provide an opportunity for students to develop an understanding of the environmental, political, economic and cultural issues relevant to community work and community development practice. The unit will explore examples of Aboriginal and Torres Strait Islander communities, to illustrate the unit content.

Level: Undergraduate Level 2 subject

Equivalent Subjects: WELF 2002 - Community Work and Community Development LGYA 7651 - Community Work and Community Development AREPMetro

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/welf2003/>)

WELF 2006 Fields of Practice 1 (10 Credit Points)

Legacy Code: 102172

Fields of Practice 1 introduces Social Work students to a range of skills and contexts of social work practice. The unit draws from the expertise of the Social Work team at Western Sydney University, engages with consumer educators and practitioners, and provides students with opportunities to practice their skills in our state of the art Skills Lab at Parramatta and Liverpool. The critical approach to the unit takes account of the diversity in social work in terms of the range of people, groups and communities with whom students will work.

Level: Undergraduate Level 2 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/welf2006/>)

WELF 2007 Group Work in Social Work (10 Credit Points)**Legacy Code:** 400509

This unit will provide students with the opportunity to develop knowledge of group work theory, group dynamics and facilitation skills in group work practice in the human services. In addition, students will be learning about working in teams in human service agencies, and effectively collaborate with their colleagues in group settings. Students will integrate theory with practice in an experiential group setting in the classroom. Students will also be examining issues related to culturally responsive group work practice with marginalised people, and addressing group work issues of diversity in gender and culture.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** WELF 1003**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf2007/>)**WELF 2008 Human Rights, Human Services and the Law (10 Credit Points)****Legacy Code:** 400195

This unit aims to provide knowledge of human rights issues and laws which are particularly relevant to social workers, youth workers and community welfare workers. It provides an opportunity for students to reflect upon their powers, responsibilities and obligations in their professional roles and acquire skills to promote justice for disadvantaged individuals and groups through advocacy and law reform.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf2008/>)**WELF 2009 Human Rights, Human Services and the Law (WSTC) (10 Credit Points)****Legacy Code:** 700141

This unit aims to provide knowledge of human rights issues and laws which are particularly relevant to social workers, youth workers and community welfare workers. It provides an opportunity for students to reflect upon their powers, responsibilities and obligations in professional roles and acquire skills to promote justice for disadvantaged individuals and groups through advocacy and law reform.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** WELF 2008 - Human Rights Human Services and the Law**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf2009/>)**WELF 2010 Lifespan Development and the Human Services (10 Credit Points)****Legacy Code:** 400505

This unit takes a 'lifespan perspective' to studying human development, covering related concepts, theories, methods and debates, and develops an understanding of bio-psycho-social dimensions across the lifespan, underpinned by a sensitivity to cultural and social differences in development. There is an emphasis on relating lifespan issues to current human services.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** BEHV 1021**Equivalent Subjects:** LGYB 6026 - Lifespan Development in the Human Services**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf2010/>)**WELF 2011 Management and Community Organisations (Block Mode) (10 Credit Points)****Legacy Code:** 101775

This unit focuses on community management in Australian Aboriginal and Torres Strait Islander communities and the social and economic factors that influence and frame community management practices. At the macro level, it examines the effects of neo-liberal (economic rationalist) reforms in the public and community sectors; and the impact of developments such as managerialism and 'third way' approaches on community management practices. The unit has a specific focus on management practices and issues facing organisations operating in Indigenous communities. It explores the tensions and pressures faced by Indigenous organisations and strategies for developing sustainable management practices.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** WELF 2003**Equivalent Subjects:** WELF 2001 - Community Management and Organisations LGYA 7654 - Managing in Community Services (AREPMetro)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf2011/>)**WELF 2017 Working with Individuals and Families (10 Credit Points)****Legacy Code:** 400508

This unit introduces students to the theories and practice related to social work with individuals and families in diverse practice contexts. It builds on knowledge gained through the prerequisite units. Students examine systems theory in relation to family work, and the contributions of feminist therapies and psychological themes. Relevant clinical and social issues such as cross-cultural casework, the impact of the stolen generation on indigenous people's access to social services, and working effectively with grief and loss are examined. This unit assists in preparing students for their first or second fieldwork placement.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** WELF 1003**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf2017/>)

WELF 2018 Working with Individuals and Families (Block Mode) (10 Credit Points)**Legacy Code:** 101776

This unit builds on Introduction to Working with Families and Communities and focuses on direct practice skills with individuals and families in welfare and community settings. Students examine contemporary theories of direct practice and build upon their ability to use theory to reflect upon and develop practice skills. There is an emphasis on safe, inclusive and responsive practice with Aboriginal and Torres Strait Islander peoples with a focus on trauma informed practice.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** WELF 1006**Equivalent Subjects:** WELF 2017 - Working with Individuals and families
LGYA 7656 - Working with individuals and families**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf2018/>)**WELF 3001 Child Abuse as a Social Issue (10 Credit Points)****Legacy Code:** 101381

This unit enables students to examine the way in which child abuse has become a public issue. It considers the assumptions, values and interests which underlie definitions of abuse as well as intervention and prevention strategies promoted to protect children from abuse. In order to do this, students will examine constructions of childhood, the positioning of children and attitudes towards children and families. They will explore the various responses to child abuse in contemporary systems, policies and practices that work to address child abuse. Students will develop the skills required to ensure that children are active participants in decisions made for their protection.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYB 5808 - Child Abuse as a Social Issue**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf3001/>)**WELF 3002 Child Abuse as a Social Issue (Block Mode) (10 Credit Points)****Legacy Code:** 101768

This unit examines the way in which child abuse has become a public issue. It considers the assumptions, values and interests which underlie definitions of abuse as well as intervention and prevention strategies promoted to protect children from abuse. The unit examines cultural constructions of childhood, the positioning of children within society, relations of power between children and adults within communities and families, gender relations, and social discourses about children and families. The unit emphasises the importance of children being active participants in decisions made for their protection; and intervention and prevention strategies for Aboriginal and Torres Strait Islander communities.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYB 5808 - Child Abuse as a Social Issue

WELF 3001 - Child Abuse as a Social Issue

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf3002/>)**WELF 3003 Community Engaged Learning (10 Credit Points)****Legacy Code:** 102526

Community Engaged Learning provides students with an opportunity for direct community engagement in an ethical way through experience in various settings including government agencies, not for profit organisations, community organisations, industry partners, and other professional bodies. The unit offered in block mode, facilitates first-hand learning through active participation with the community, to develop leadership skills within a team with enhanced capacity to understand social and organisational responsibilities. Students will be encouraged to utilise their knowledge, skills and experience gained over their degree within real-life situations. They are required to complete mandatory orientation activities and briefing and debriefing workshops at the start, middle and end of the semester. They will complete 60 hours of community/industry engagement and 15 hours of interaction at academic workshops. Academic support will be available online via vUWS through the duration of the community engagement. Debriefing sessions will provide ample scaffolding for the development of skill, knowledge, professionalism and potential leadership. Students should obtain their Police Clearance prior to the start of the semester to commence their placement in a timely manner. Late enrolments may affect this.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf3003/>)**WELF 3005 Families and Sustainable Communities (Block Mode) (10 Credit Points)****Legacy Code:** 101778

This unit examines the concept of the family within different social and cultural contexts, with a particular focus on the place and significance of family and family relations in Aboriginal and Torres Strait Islander communities. The unit explores the impacts of colonisation and displacement in contributing to family breakdown in Indigenous communities. It also identifies the challenges and issues in building family resources for sustainable communities. Models of good practice for intervention and resource building are examined through case studies.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** WELF 1006 AND

WELF 1009 AND

HUMN 1014

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf3005/>)**WELF 3006 Family Violence: Policy and Practice (10 Credit Points)****Legacy Code:** 101597

This unit examines the nature, incidence and extent of family violence. The focus is on the effects on women and children, who are the victims of this violence. Current sociological explanations are examined, including a critical examination of the myths and stereotypes that help to reinforce the hidden nature of this problem. Some solutions and possible ways of alleviating the suffering caused by this violence are canvassed.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYA 1388 - Family Violence**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf3006/>)

WELF 3007 Leadership, Alliances, Sustainability (Block Mode) (10 Credit Points)**Legacy Code:** 101779

This unit offers students the opportunity to explore the central role of leadership and alliances in building sustainable Aboriginal and Torres Strait Islander communities. The unit focuses on theories and models of leadership appropriate for Aboriginal and Torres Strait Islander communities: initiating, building and maintaining alliances with individuals and groups and methods to build sustainable communities. In addition, students will examine case studies of Indigenous leadership and communities that have been successful in community building such as socio-economic development, education and community cohesion.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf3007/>)**WELF 3008 Learning through Indigenous Australian Community Service (Day Mode) (10 Credit Points)****Legacy Code:** 101758

Learning through Indigenous Australian Community Service will provide students with an exciting opportunity to apply their disciplinary knowledge and skills in an Indigenous Australian cultural context.

Students will negotiate and conduct an interview with an Indigenous or Non-Indigenous Service Provider working in an Indigenous context. Students will gain cross cultural awareness and insights as well as knowledge about Indigenous community affairs including cultural protocols, decision-making and leadership. This experience will provide students with a level of cultural understanding and competency that can lead to improved communication skills and effective partnering with Indigenous people, organisations and communities.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf3008/>)**WELF 3009 Managing Offenders in the Community (10 Credit Points)****Legacy Code:** 102065

Managing Offenders in the Community is a unit that draws links between the theory and practice of working with offenders in a variety of roles and settings. It provides a legal and policy framework for this work and covers the main theoretical perspectives and research insights into what is effective practice in this work. The unit takes a practical, applied approach linking the material directly to work with offenders and will be of particular interest to current or future practitioners in community justice, corrections, social work and policing.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf3009/>)**WELF 3011 Professional Practice in Aged Care and Disability (10 Credit Points)****Legacy Code:** 400968

This unit provides the student with an understanding of current trends underlying policies and services in the aged care and disability industry, which will help them to understand the dynamics of the changing aged care and disability service sector. Students will examine the strategic environments of aged care and disability to develop global and national perspectives, identify drivers of change and development, and the major players in aged care and disability policies. Students will develop an understanding of the aged care and disability competencies and determinants of well-being for aged and disabled persons, which can be used in their future roles in the health industry. Through reflections on practice in aged care and disability, students will develop an individual approach to aged care and disability service issues which they can use in the future as health care professionals.

This unit integrates health as focus for social work as a profession and as a specific domain of practice. This advanced unit has three main areas of focus. The first area is developing knowledge and skills to critically analyse concepts related to health in global and local social work practice, including decolonising and Indigenous ways of knowing. The second is exploring health for specific populations and communities, the context of health service provision in Australia, and social work in health services. The third is professional skills for social work practice, including social work assessment and health promotion.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** WELF 2017**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf3013/>)**WELF 3014 Social Work and Social Policy (10 Credit Points)****Legacy Code:** 400511

This unit examines the context and challenges for social policy in Australia and the relationship between social policy and social work practice. Topics covered include: fundamental debates in welfare policy; comparative and historical contexts in how welfare policy is developed; the impacts of remedial welfare policy and policy solutions to disadvantage; and strategies to influence policy development related to social work practice.

In this unit, students build on their knowledge and experience to identify and service the needs of Aboriginal and Torres Strait Islander communities. Students will utilise their research and cultural competency skills to create a community profile and project brief within an Aboriginal and Torres Strait Islander community. This will enable students to effectively integrate theory, practice and culture to understand Aboriginal and Torres Strait Islander community needs. Students will also examine the role of an Aboriginal and Torres Strait Islander Professional in Community Development settings.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYA 1759 - Understanding Indigenous Australian Community Service LGYA 1678 - Learning through Indigenous Australian Community Service (Block Mode) WELF 3008 - Learning through Indigenous Australian Community Service (Day Mode)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf3017/>)**WELF 3019 Welfare Field Education 2 (Block Mode) (10 Credit Points)****Legacy Code:** 101769

This unit enables students to participate in a structured and supervised field placement (260 hours). Welfare Field Education 2 (Block Mode) provides students with the opportunity to extend their knowledge and experience in linking theory with practice and develop their skills for community work in the human services sector. Placements are offered in a variety of agency types spanning all areas of community work practice: work with individuals, groups and families, community development, research and policy.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYA 7657 - Welfare Field Education 2 (AREPMETRO) WELF 3018- Welfare Field Education 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf3019/>)**WELF 3020 Field Education 1 (20 Credit Points)****Legacy Code:** 102782

This unit enables students to participate in a structured and supervised field placement experience, providing the opportunity for students to combine their knowledge of theory and application of their skills into practice in the human services sector. Placements will be offered in direct or indirect service work with a wide range of client groups and communities in the government and nongovernment sectors. A variety of social work and community welfare-related agencies in and around Sydney will be utilised. Students will attend skills based workshops and complete 408 hours of placement in accordance with accreditation requirements of the Australian Association of Social Workers (AASW) guidelines, and the Australian Community Workers Association (ACWA).

Level: Undergraduate Level 3 subject**Pre-requisite(s):** WELF 2017**Incompatible Subjects:** WELF 2005 - Field Education 1 WELF 3004 - Community Welfare Field Education**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf3020/>)**WELF 3021 Disability Rights, Policy and Governance (10 Credit Points)**

Since the ratification of the United Nations Convention on the Rights of Persons with Disabilities, laws, policy and service supports concerning persons with disability have transformed. This has resulted in significant reforms in Australia and globally. Disability rights have now become central to addressing long standing inequalities and discrimination experienced by persons with disability. Disability rights now also govern social services, supports and programs. This unit examines these developments with the global ratification of disability rights and critically evaluates the ensuing policies and practices that frame the context within which professional practice and expertise occurs. Drawing upon in-depth case studies, students will critically examine and engage in key issues surrounding the translation and realisation of disability rights in governance of social service systems, policy and practices.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf3021/>)**WELF 3022 Disability and Sexuality (10 Credit Points)**

This unit introduces students to the mutual fields of sexuality studies and disability studies by employing the critical lenses of queer, disability, and feminist theory to interrogate the privileging and ownership by mainstream culture of sex. By illuminating how people with physical, emotional, and cognitive disabilities experience romance, love, emotional intimacy and physical connection, students will explore how insufficient sexuality supports create diminished agency, excessive vulnerability, lack of access and "otherness" for disabled people. Students will ground their critical thinking by examining how they have constructed sexuality and disability norms based on their values, beliefs and views of these two intersecting and often taboo topics. Students will be encouraged to appreciate the importance of sexuality in the lives of people with disabilities and view the expression of our sexuality, sexuality agency, and access to sexual health as a basic human right.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf3022/>)

WELF 3023 Indigenous Disability and Inclusion (10 Credit Points)

Intersecting two socially and economically marginalised groups, Australia's Indigenous peoples living with disability require services and supports that are both culturally safe and disability aware. Through this unit, future practitioners of the disability and Indigenous services workforce will be exposed to an Indigenous philosophy of disability that is characterised by a culture of inclusion, as a contrast to westernised medical models of disability. The unit will examine the unique exposures to social and economic marginalisation and discrimination encountered by people who are Indigenous and live with disability, and how these factors intersect as barriers to their access to service systems, supports and lives with dignity.

WELF 4001 Contemporary Social Work Practice (10 Credit Points)

Legacy Code: 400518

This unit provides a forum in which students can examine contemporary issues that impact on social work practice. The use of technology in social work practice and its implications for clients and practitioners; the exploration of culturally and spiritually sensitive and creative approaches to social work practice; and human rights based practice. Students are encouraged to take a critical best practice approach, identifying the best aspects of social work practice and seeking to replicate it. There is a particular emphasis on applying this approach to child wellbeing and protection, mental health and work with Aboriginal Australians and Torres Strait Islander groups.

WELF 4002 Counselling and Consultation (10 Credit Points)

Legacy Code: 101247

This unit introduces students to the basic skills underlying professional helping, providing a foundation for further training in counselling or psychological therapy. Students explore the professional helping relationship, the counselling process, common counselling and therapeutic frameworks, and learn key counselling micro-skills. There is a strong focus on applied skill development through in-class skills practice and assessment. Professional ethics and responsiveness to client characteristics including age, gender and cultural background are also emphasised. The unit provides structured opportunities to reflect on personal and professional development and readiness for further training in professional helping.

WELF 4006 Ideologies of Practice in Social Work (10 Credit Points)

Legacy Code: 400517

Social work practice is not a neutral activity arising from an objective viewpoint but is inextricably bound to varying ideologies and propositions that are concerned with human conduct. This subject examines the various ideologies that inform psycho-social and political analysis. Ideologies such as liberalism, critical feminism, critical masculinity, critical class theory, critical race theory, and adultism, and their explanations for psycho-social problems and proposals for change are examined in relation to methods of social work practice. Students will be encouraged to explore how all theory and practice methods incorporate ideological assumptions and how, therefore, the construction of creative solutions demands practice that is reflective and self-critical.

WELF 4007 Practice skills for social work (10 Credit Points)**Legacy Code:** 102351

This unit aims to develop students' knowledge and skill base to work with people in varied environments and during difficult life transitions. The focus will be on acquiring knowledge of practice theory and models and then making use of this knowledge in simulated practice including interviewing and through written critical reflection. The unit emphasises use of self, emotion work and skills in negotiating preferred goals and outcomes with clients.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** WELF 3020 OR WELF 2005**Equivalent Subjects:** WELF 4003 - Critical Social Work Practice Direct**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf4007/>)**WELF 4008 Professional Decision Making in Social Work (10 Credit Points)****Legacy Code:** 102352

This unit uses a problem-based learning approach to develop students' critical and practical reasoning abilities in professional decision making. Students will compare several models of decision making used at the interface of organisational and individual/family work contexts, and evaluate the usefulness of evidence based inquiry as a decision aid. Through case studies, students will discern the unique characteristics of a situation requiring professional judgement, explore their own habits or preferences in decision making, and develop reasoning skills that produce sound and ethical responses to the situation at hand.

This unit is designed to support the process of completion of a Social Work honours degree and the production of an honours thesis. It is only available to students who have been accepted into the honours programme for the Bachelor of Social Work. This unit is the culmination of studies for students who have completed their undergraduate degree and provides substantial training in research. Under staff supervision, students choose the particular topic for their research, design their own programme of research, perform the research and analyse the results. The culmination of this process is the production of a thesis in which students describe the rationale for their topic, their research programme, ethical issues, results, and their conclusions.

This unit is designed to prepare students to work in a diverse society as counsellors and advocates. Students will study the emergence of research in the counselling professions and explore connections and tensions between personal, professional and research ethics. Students will have the opportunity to examine their own cultural identity development, their own relationship with power and privilege and how these may impact their counselling practice. The unit will critically examine the evolution of the multicultural movement in the counselling profession and will consider issues and concerns of several non-dominant populations, including intersectionality in working with diverse ethnicities, genders, sexualities, religions, age and ability status.

WELF 7003 Contextualised Practice (10 Credit Points)**Legacy Code:** 102394

Social work practice is informed by, and negotiated through, policy, legislative and ethical frameworks. This unit focuses on how these frameworks influence and shape social work practice in Australia and provides an opportunity for students to critically reflect upon their power, responsibilities and obligations. In this unit, students will acquire the knowledge and skills to advocate for marginalised and disadvantaged individuals and groups through activism and advocacy and, work for social justice change through reform of legislation and policy.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf7003/>)**WELF 7006 Counselling and Psychotherapy Practice (10 Credit Points)****Legacy Code:** 102364

This unit builds on the experiential learning from Foundations of Psychotherapy and Counselling 1 by offering further practice in interpersonal counselling skills in dyadic and group contexts. Students will consolidate and expand the range of skills appropriate to the unfolding counselling relationship through continued skills practice.

Students will develop capacity to analyse their own responses in depth and respond reflexively in their work with clients, within an increased understanding of the therapeutic relationship and of what makes counselling effective. Students will continue to participate in small group experiential training, thereby increasing their awareness of interpersonal and group processes.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** WELF 7004 OR WELF 7009**Equivalent Subjects:** WELF 7005 - Counselling 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf7006/>)**WELF 7007 Critical Social Work Practice (10 Credit Points)****Legacy Code:** 102395

This unit focuses on the application of critical theories, models and methods of social work practice through the exploration of diverse fields of practice including: child wellbeing and protection; mental health; working with older people; disability; housing and homelessness; LGBTQI social work; and rural and remote practice. The emphasis will be on the contribution of various critical perspectives (Feminist, Post-colonial, Postmodern, Marxist, Green, Critical Race, etc) to social work theory and to the development of alternative forms of practice.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** WELF 7023 AND WELF 7024**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf7007/>)**WELF 7008 Ethics and Diversity in Research and Therapy (10 Credit Points)****Legacy Code:** 102357

In 2022 this unit replaced by 102909 - Ethics and Diversity in Counselling. This unit introduces students to key considerations for practicing therapy and research in a diverse and neo-colonial context. Students will study the emergence of research in the arts therapy profession and explore connections and tensions between personal, professional and research ethics. Through close reading of professional documents, case studies and research papers, students will examine how the 'subjects' of therapy and research are conceptualised and constructed. From a perspective that links knowledge and power, students will look at what the published research says about what works and how in therapy; ask whom therapy and research work for; and examine the work these therapy and research practices do.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** HUMN 7036 - Research in the Social Sciences**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf7008/>)**WELF 7009 Foundations of Psychotherapy and Counselling 1 (20 Credit Points)****Legacy Code:** 102353

Foundations of Psychotherapy and Counselling 1 is a foundational unit for postgraduate counselling and therapeutic studies. It forms the first part of a 40 credit point sequence undertaken during the first year. Foundations of Psychotherapy and Counselling 1 presents the foundational skills necessary for the successful inception of a productive therapeutic relationship. The sequenced, progressive presentation of these skills via experiential learning is framed by the simultaneous presentation of key theoretical concepts relevant to the skills in question. Students will be required to analyse the features of their own personalities, and to reflect on feedback that they receive from others in the role of psychotherapist/counsellor, in order to develop the self-awareness and sensitivity necessary for this professional role.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** WELF 7004 - Counselling 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf7009/>)

WELF 7010 Foundations of Psychotherapy and Counselling 2 (10 Credit Points)**Legacy Code:** 102355

Foundations of Psychotherapy and Counselling 2 presents and critically evaluates the major theoretical paradigms of counselling and psychotherapy. These include; psychoanalytic / psychodynamictherapies; humanistic psychotherapies; behavioural and cognitive behavioural therapies; systemic therapies; constructivist/postmodern therapies; and expressive therapies. Students will consider the assumptions about human development and behaviour that are central to each of these ways of working, as well as their underlying 'theory of change'. Students will also be introduced to common ways that clients present with psychological difficulties, and will explore various clinical responses to such client issues. These issues will be explored considering intrapsychic, relational and life stressor factors. Students will consider how presenting issues relate to the norms and extremes of various personality types, and what consideration should be given to life-stages in understanding client problems.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** WELF 7009**Equivalent Subjects:** WELF 7005 - Counselling 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf7010/>)**WELF 7011 Further Clinical Studies (Art Therapy) (20 Credit Points)****Legacy Code:** 101785

This unit aims to develop clinical practice skills to the level required for professional registration. The unit involves 375 hours of clinical placement working under the guidance of a clinical supervisor. It will involve group supervision of casework and in-depth discussion of issues arising from placements.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** WELF 7001**Equivalent Subjects:** LGYA 1491 - Further Clinical Studies**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf7011/>)**WELF 7012 Further Clinical Studies in Psychotherapy and Counselling (20 Credit Points)****Legacy Code:** 102366

This unit aims to develop clinical practice skills. It will involve preparation for the field placements and group supervision of casework and issues arising from the placements. The unit involves a clinical placement working under the guidance of a clinical supervisor from the professional background of the students under supervision. Students will undertake 200 placement hours.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** WELF 7002**Equivalent Subjects:** LGYA 1628 - Further Clinical Studies (Counselling)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf7012/>)**WELF 7013 Integrated Practice 1: Self and Story (10 Credit Points)****Legacy Code:** 102370

This unit explores the concept of 'self' and how stories might shape self-identity or a sense of 'what it means to be me'. The enduring characteristics of stories will be examined alongside their different workings across cultures, traditions, technologies, genres and time. The unit will cover historical and contemporary notions of the unconscious as they inform an understanding of self and story. It will examine how an understanding of the brain, particularly of memory, and the workings of the right and left hemispheres, fit into this exploration. Working with selves and stories, as instruments for change in therapeutic work, will be considered across lifespan and a range of psychotherapies.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** WELF 7009**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf7013/>)**WELF 7014 Integrated Practices 2: Affliction and Recovery (10 Credit Points)****Legacy Code:** 102371

This unit critically examines the nature of mental illness and mental wellbeing. Historical and contemporary approaches to mental health and recovery will be reviewed. Diverse explanations for the origins of profound symptoms will also be explored. Mental health assessment tools commonly encountered by counsellors and psychotherapists are presented and their practical applications examined. Through case studies and autobiographical accounts, the voices of those with lived experience of major mental health issues will inform student learning in this unit. This unit invites students to critically evaluate mental health services from a range of perspectives and consider the role of counselling and psychotherapy alongside multiple pathways to recovery. Students will critically evaluate this knowledge and apply it in their development of skills in various psychotherapeutic methods to assist recovery and mental wellness.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** WELF 7009 AND

WELF 7013

Co-requisite(s): WELF 7010**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf7014/>)

WELF 7016 Integrated Practices 4: Self and Relationships (20 Credit Points)**Legacy Code:** 102627

In this capstone unit, students integrate their learning about interpersonal awareness and the value of the therapeutic relationship, which are central to the Master of Psychotherapy and Counselling. A focus on multiple relational influences enhances students' ability to work therapeutically with individuals, couples and families. Clients bring themselves and their current and past relationships into the therapy room with them, as does their counsellor. Students will have the opportunity to investigate their personal values and beliefs about relationships and how these influence their work with clients. Family life-cycle and developmental models are discussed, critiqued and applied to promote understanding of common and diverse client issues and presenting concerns. Ultimately students will explore the concept of interdependence and how relationship is central to human wellbeing.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** BEHV 7018**Co-requisite(s):** WELF 7012**Incompatible Subjects:** HUMN 7010 - Critical and Creative Enquiry
WELF 7015 - Integrated Practices 4 Self and Relationships**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf7016/>)**WELF 7017 Integrated Project (10 Credit Points)****Legacy Code:** 102398

Students will integrate theory and practice in social work through the development of a work-based project related to their organisational context or area of specialisation. The project will be negotiated with an academic advisor and be underpinned by concepts of community engagement/service learning. This project will be concurrent with the field placement and will allow students to plan, undertake and report on a specific aspect of practice in the context of work.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** WELF 7022**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf7017/>)**WELF 7018 Leadership in Organisations (10 Credit Points)****Legacy Code:** 102392

This unit focuses on leadership in human service organisations and the social and economic factors that influence and frame practice. Students in the unit will briefly review the contemporary political economic circumstances underpinning human services and the ongoing changes to policy and practice. The unit will examine the idea of what leadership is and present major leadership theories relevant to the human services. The content will address contexts of leadership including setting organisational culture, situational leadership in relation to practice and people, management and governance and leading through change. The unit will also examine trust, ethics and fairness in leadership and leadership in difficult circumstances. The emphasis of the unit will be to equip students with the means to describe, question and reshape leadership practice.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf7018/>)**WELF 7019 Power and Marginalisation (10 Credit Points)****Legacy Code:** 102393

This unit complements theoretical frameworks introduced in Difference and Diversity to explore issues of power and marginalisation through the experiences of Aboriginal and Torres Strait Islander peoples, mental health consumers, children and young people, and people with disability. Practice and policy responses that challenge or reinforce power and marginalisation are explored.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf7019/>)**WELF 7020 Practising Research and Researching Practice (10 Credit Points)****Legacy Code:** 102358

This unit equips Therapy Studies students with the conceptual frameworks and skills needed to conduct basic research in the areas of counselling and psychotherapy. The question 'How do we know what we know?' becomes the connecting thread throughout an introduction to quantitative, qualitative and mixed method approaches to practitioner research. Building on considerations from the prerequisite unit 102357 Ethics and Diversity in Research and Therapy, students will develop their understanding of research as a scholarly, professional, social and intersubjective practice. They will learn to generate answerable research questions and a coherent research proposal within appropriate intellectual and methodological frameworks.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** WELF 7008**Equivalent Subjects:** HUMN 7001 - Advanced Social Research Methods**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf7020/>)**WELF 7021 Social Work (Qualifying) Field Education 1 (20 Credit Points)****Legacy Code:** 102391

This unit enables students to participate in a structured and supervised field placement (408 hours). Social Work (Qualifying) Field Education 1 provides students with the opportunity to apply their knowledge and experience in linking theory with the realities of practice, and extend their skills for social work practice with the support of practitioners working in the human services sector. Placements are offered in a variety of agency types spanning all areas of social work practice: direct service work with individuals, groups and families, community development; research and policy.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** WELF 7023**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf7021/>)

WELF 7022 Social Work (Qualifying) Field Education 2 (30 Credit Points)**Legacy Code:** 102397

Social Work (Qualifying) Field Education 2 incorporates the final social work placement (600 hours) and will consolidate the experiences gained from both field placements. It will further assist students to clearly articulate their frame of reference within a critically reflective practice framework, before entering employment. Placements are offered in a variety of agency types spanning all areas of social work practice: direct service work with individuals, groups and families, community development; research and policy.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** WELF 7023 AND

WELF 7021

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf7022/>)**WELF 7023 Social Work Practice Methods 1 (10 Credit Points)****Legacy Code:** 102390

Social Work Practice Methods1 introduces students to a range of skills, knowledge and professional values for work with individuals and families in diverse practice settings. Students are supported to develop core verbal and written communication skills including engagement, assessment, designing and implementing interventions, evaluation, report writing and record keeping practices. There is an emphasis on safe, inclusive and responsive practice with Aboriginal and Torres Strait Islander peoples and people from culturally diverse backgrounds.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf7023/>)**WELF 7024 Social Work Practice Methods 2 (10 Credit Points)****Legacy Code:** 102396

Social Work Practice Methods 2 introduces theories and skills for work with groups and communities in diverse practice settings. This unit will provide students with the opportunity to develop core group work, community work and community development skills. Students will engage in simulated practice activities in Western's Social Work Skills Lab.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf7024/>)**WELF 7029 Indigenous Australia: History, Knowledge and Professional Practice (10 Credit Points)****Legacy Code:** 102744

Working with Indigenous communities is an important field of practice for social and human service workers in statutory as well as community contexts. This unit introduces students to Aboriginal and Torres Strait Islander histories, including pre-contact, colonisation and contemporary developments. Specific attention will be paid to engaging communities - including practice principles, strategies and skills. This subject will emphasise the importance of culturally responsive practices requiring students to have an understanding of their own values and cultures. Critical self-reflection and positioning are vital skills for cultural responsiveness, and will be developed in this unit.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf7029/>)**WELF 7030 Research for Social Work Practice (10 Credit Points)****Legacy Code:** 102745

This unit introduces students to the different approaches to knowledge generation for social work practice and policy. The unit highlights how social workers can design and implement ethical research activities including the theories and methods that support different research approaches. The unit explores and analyses contemporary research design issues and the dominant qualitative, quantitative and mixed method approaches in knowledge generation. This is in the context of incorporating Indigenous knowledges and methodologies, and those specifically relevant to gender and cultural diversity. The unit highlights practice-based uses of research including program evaluation, meta-analysis, systematic reviews and community needs assessment.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf7030/>)**WELF 7031 Theories and Knowledges for Social Work (10 Credit Points)****Legacy Code:** 102743

This unit explores different strands of social theory and their relevance for contemporary social work practice, both in the context of Western Sydney, and also globally. The heritage of the European Enlightenment will be critically examined as providing the basic paradigm for the construction of 'social theory' and also of social work knowledge and practice. The contribution of the humanities, as providing space for creativity and inspiration as well as insight, will also be considered. The limitations as well as the positives of Western epistemologies will be explored, and alternatives such as Southern Theory, Indigenous knowledges, critical theory, and 'new paradigm' thinking will be evaluated.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf7031/>)**WELF 7032 Counselling Skills for the Allied Professions (10 Credit Points)**

This unit introduces postgraduate students from allied professions to the major theoretical frameworks and foundational practices of counselling. An in-depth exploration of the embodied and situated experience of the trainee practitioner will be central to learning how to attend to and support others. Students will engage in an ongoing critical consideration of how discourses and practices of selfhood, social justice, power, colonisation, intersectionality, diversity and place shape the subjects of therapy and influence the therapeutic relationship. These intersubjective and scholarly enquiries will inform a scaffolded, intensive practice of microskills.

Level: Postgraduate Coursework Level 7 subject**Incompatible Subjects:** WELF 7009 - Foundations of Psychotherapy and Counselling 1 WELF 7004 - Counselling 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf7032/>)**WELF 9001 Higher Degree Research Thesis - Care for the Disabled (20 Credit Points)****Legacy Code:** 800093**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/welf9001/>)

Information Systems (INFS)

INFS 1002 Information Systems in Context (10 Credit Points)**Legacy Code:** 300573

This unit aims to give students the ability to recognise and explain business information systems with regard to type, function, purpose, and the frameworks within which these systems are used. Topics in this unit include computing fundamentals; computer hardware and software; computers and society; use of business application packages - spreadsheets, word processing, database, graphics; organisational information systems; information systems development and acquisition; data and knowledge management; electronic commerce, internets, extranets; networking; enterprise-wide information systems; the internet and information systems security; privacy, ethics and computer crime.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** INFS 1003 Information Systems in Context (WSTC)**Incompatible Subjects:** INFS 1004 Introduction to Information Systems**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs1002/>)**INFS 1003 Information Systems in Context (WSTC) (10 Credit Points)****Legacy Code:** 700000

This unit aims to give students the ability to recognise and explain business information systems with regard to type, function, and purpose, and the frameworks within which these systems are used. Topics in this unit include computing fundamentals; computer hardware and software; computers and society; use of business application packages - spreadsheets, word processing, database, graphics; organisational information systems; information systems development and acquisition; data and knowledge management; electronic commerce, internets, extranets; networking; enterprise-wide information systems; the internet and information systems security; privacy, ethics and computer crime.

Level: Undergraduate Level 1 subject**Pre-requisite(s):** Students enrolled in 7138 Diploma in Information and Communications Technology Extended - ICT 7139 Diploma in Information and Communications Technology Extended or 7140 Diploma in Information and Communications Technology Extended Information Systems must pass LANG 0012 Academic and Professional Communication (WSTC Prep) and INFO 0001 Academic Skills for ICT (WSTC Prep)**Equivalent Subjects:** INFS 1002 - Information Systems in Context**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs1003/>)**INFS 1006 Systems Analysis and Design (10 Credit Points)****Legacy Code:** 300585

This unit introduces the concepts of System Analysis and Design. The study of methodologies and techniques for problem recognition, requirement analysis, process modelling and/or data modelling are essential elements of this unit. The Systems Development Life Cycle model is employed as the prime approach to teach the unit, providing students with the basic skills required for analysis and design of logical solutions to information systems problems. The use of Computer Aided System Engineering tools will be discussed in practical sessions.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** LGYA 5776 Introduction to Analysis and Design INFS 1007 Systems Analysis and Design (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs1006/>)

INFS 1007 Systems Analysis and Design (WSTC) (10 Credit Points)**Legacy Code:** 700013

This unit introduces the concepts of System Analysis and Design. The study of methodologies and techniques for problem recognition, requirement analysis, process modelling and/or data modelling are essential elements of this unit. The Systems Development Life Cycle model is employed as the prime approach to teach the unit, providing students with the basic skills required for analysis and design of logical solutions to information systems problems. INFS 2001 Database Design and Development (10 Credit Points)**Legacy Code:** 300104

The main purpose of this unit is to provide students with an opportunity to gain a basic knowledge of database design and development including data modelling methods, techniques for database design using a set of business rules that are derived from a case study and finally implementation of the database using a commercial relational database management system. Through group work and tutorial practicals, students examine a number of important database concepts such as database administration, concurrency, backup and recovery and security whilst developing their professional communication and team work skills.

Level: Undergraduate Level 2 subject

Equivalent Subjects: INFS 2003 - Database Design and Development (WSTC)

Incompatible Subjects: LGYA 4371 - Database Management System for Business Information Systems

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/infs2001/>)

INFS 2002 Database Design and Development (Advanced) (10 Credit Points)**Legacy Code:** 300941

This unit covers the principles, methodologies and technologies for the database design and development, exploring in particular the data modelling methods and the use of the language SQL for the database applications. The unit also examines a number of important database concepts such as database administration, concurrency, backup and recovery, and security. Students in this advanced unit are furthermore required to investigate new technological and theory advances in the database industry and apply them to the solution of concrete database problems.

Level: Undergraduate Level 2 subject

Incompatible Subjects: LGYA 4371 - Database Management System for Business Information Systems
INFS 2001 - Database Design and Development

INFS 2006 Object Oriented Analysis (10 Credit Points)**Legacy Code:** 300144

The core strength of this unit is to analyse and model business objectives and critical requirements of software systems to be developed using object-oriented (OO) approaches. The system analysis is taken to greater depths within the context of Object Orientation. The Unified Modelling Language version 2.0 (notably use cases, user case diagrams, activity diagrams, class diagrams and sequence diagrams) is used as the modelling standard for creating OO models in the problem space. The unit also covers the rational unified process methodology and applications of design patterns for software development through practical case studies.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** INFS 1006**Equivalent Subjects:** MATH 2013 Object Oriented Analysis (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs2006/>)**INFS 2007 Object Oriented Analysis (Advanced) (10 Credit Points)****Legacy Code:** 300888

The core strength of this unit, as the advanced version of 300144 Object Oriented Analysis, is to analyse and model business objectives and critical requirements of software systems to be developed using object-oriented (OO) approaches. The system analysis is taken to greater depths within the context of Object Orientation. The Unified Modelling Language version 2.0 (notably use cases, user case diagrams, activity diagrams, class diagrams and sequence diagrams) is used as the modelling standard for creating OO models in the problem, solution and background modeling spaces. The unit also covers the rational unified process methodology and applications of design patterns for software development through real world case studies.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** INFS 1006**Incompatible Subjects:** INFS 2006 - Object Oriented Analysis**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs2007/>)**INFS 2009 Database Design and Development (UG Cert) (10 Credit Points)**

The main purpose of this unit is to provide students with an opportunity to gain a basic knowledge of database design and development including data modeling methods, techniques for database design using a set of business rules that are derived from a case study and finally implementation of the database using a commercial relational database management system. The unit also examines a number of important database concepts such as database administration, concurrency, backup and recovery and security.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** INFS 2001 Database Design and Development
INFS 2003 Database Design and Development**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs2009/>)**INFS 2010 Work-Integrated Learning in Digital Construction (10 Credit Points)**

The digitalisation of construction industries has grown considerably in the past decade and this unit responds in practical ways by engaging students in project-based learning related to Digital Construction within an industry framework. Students will select a project with an agreed industry partner, which involves simple digital applications in day-to-day construction such as software applications, information systems, digital solutions, apps and fintechs. This unit contributes towards the skills required for a work-ready graduate and allows the student to plan, undertake and report on a specific aspect of practice in the context of work.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs2010/>)**INFS 3001 Activity Based Funding/Casemix and Data Quality (10 Credit Points)****Legacy Code:** 300954

This unit will introduce students to Activity Based Funding and Casemix within the Australian healthcare system. It is designed to cover a variety of casemix classification systems for acute, non-admitted, sub-acute and mental health patients. Attention will be given to Diagnosis Related Groups (DRGs) with specific reference to the Australian Refined Diagnosis Related Groups (AR-DRGs) and the relationship to Activity Based Funding and purchasing models. Measuring performance with activity data and clinical costing methods will be explored. Emphasis will be placed on the impact of data quality as a critical component in achieving excellence in clinical costing, casemix and patient safety.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** PUBH 2004**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs3001/>)**INFS 3002 Advanced Clinical Classification (10 Credit Points)****Legacy Code:** 300953

In this unit, the student will be introduced to disease notification and registration procedures. Mortality or cause of death coding will also be examined. Concepts of organising health information in a logical way to interface with an electronic information system will be investigated. The design and role of various health classification systems including the World Health Organizations Family of International Classifications (WHO FIC), specifically ICD 11 and casemix classification systems (e.g. AR DRGs, AN SNAP) will also be discussed. The practical component of this unit will focus on the student further developing their classification skills in the more complex areas of clinical coding including endocrine disorders, specifically diabetes mellitus, circulatory diseases and interventions, genitourinary disorders, specifically chronic kidney disease, obstetrics, paediatrics and congenital anomalies and trauma and procedural complications. The ACS will be applied in detail when classifying from complex discharge summaries and full clinical episodes of care. The student will also be exposed to electronic clinical coding tools that can be used in the classification process.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** PUBH 2004**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs3002/>)

INFS 3003 Artificial Intelligence (10 Credit Points)**Legacy Code:** 301174

This unit provides basic studies in the major areas of artificial intelligence: search, knowledge representation, logic programming, machine learning and knowledge based systems, agent planning and learning. The first part of this unit will focus on the foundation of artificial intelligence: search algorithms and their implementations, game playing, logics and knowledge representation, and inference in reasoning systems. The second part will cover the principles of knowledge based systems (intelligent systems), planning, and machine learning.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** MATH 1006 AND COMP 2009**Equivalent Subjects:** LGYA 5740 Artificial Intelligence LGYA 5781 Knowledge Based Systems INFS 3013 Intelligent Systems**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs3003/>)**INFS 3005 Developing Web Applications with XML (10 Credit Points)****Legacy Code:** 300111

This third year unit provides a comprehensive coverage of XML, related emerging technologies and their use in web applications. Students will be given opportunities to develop web based information systems which rely upon these technologies. This unit is heavily oriented to practical based work.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs3005/>)**INFS 3006 Emerging Trends in Information Systems (10 Credit Points)****Legacy Code:** 300584

This unit provides a means for students to self-reflect on their future career and their possible involvement in the field of Information Systems and explore the changing nature of information systems in organisations via one of the following: engagements with local businesses, specifically crafted study tours or focused internships. In this unit students will study the role that emerging technologies play in selection, design and development of information systems. Students will be able to research and assess new technologies while networking and engaging with real life businesses, as well as develop and introduce effective strategies for achieving change and improvement that can be delivered by successfully implementing emerging technologies.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** INFS 1002 AND COMP 2020**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs3006/>)**INFS 3007 Emerging Trends in Information Systems (Advanced) (10 Credit Points)****Legacy Code:** 300942

This unit provides a means for students to self-reflect on their future career and their possible involvement in the field of Information Systems. In this advanced unit students will be required to undertake an individual but closely supervised research project. Students will explore the changing nature of information systems in organisations via one of the following: engagements with local businesses, specifically crafted study tours or focused internships. In this unit students will study the role that emerging technologies play in selection, design and development of information systems. Students will be able to research and assess new technologies while networking and engaging with real life businesses, as well as develop and introduce effective strategies for achieving change and improvement that can be delivered by successfully implementing emerging technologies. In addition, students in this unit will be required to present their findings in a form of an academic paper with a possibility of publishing.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** INFS 1002 AND COMP 2020**Incompatible Subjects:** INFS 3006 - Emerging Trends in Information Systems**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs3007/>)**INFS 3008 Formal Software Engineering (10 Credit Points)****Legacy Code:** 300404

This unit is concerned with the design, development and maintenance of computer software systems. The unit focuses on current formal specification and system verification technologies and methodologies. Foundations of model checking such as LTL and CTL, as well as a particular practical model checker SPIN will be thoroughly studied in this unit. The SPIN model checker with programming language PROMELA will be used for all software development and verification practices throughout this unit.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** MATH 1006 AND COMP 2009**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs3008/>)**INFS 3010 Healthcare Data Environments (10 Credit Points)****Legacy Code:** 300955

This unit extends the student's knowledge of Health Informatics by introducing concepts relating to electronic communications within the health industry. It exposes students to a variety of environments used to create, store, transfer and deliver healthcare data. Areas include minimum data sets, data linkage, messaging concepts/ standards, terminologies, healthcare evaluation, electronic health records and related standards, security, privacy and trust, medico legal, epidemiology and population health together with TeleHealth/ TeleMedicine approaches, methodologies, tools and techniques.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** INFS 2004**Equivalent Subjects:** INFS 3019 - e-Health**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs3010/>)

INFS 3011 Healthcare Software and Systems (10 Credit Points)**Legacy Code:** 300956

In this unit students will learn the concepts underpinning the services computing paradigm of "bridging the gap between Business Services and IT Services". Services Computing technology includes Web services and service-oriented architecture (SOA), business consulting methodology and utilities, business process modelling, transformation and integration. Students will learn, through the development of practical examples, how to utilise these technologies within a healthcare context

Level: Undergraduate Level 3 subject**Pre-requisite(s):** INFS 2004**Equivalent Subjects:** INFO 3009 Services Computing in Healthcare**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs3011/>)**INFS 3012 Information Systems Deployment and Management (10 Credit Points)****Legacy Code:** 300572

This unit provides a detailed overview of system implementation and deployment stages taking into consideration the steps that are necessary to place a newly developed system into production. In this unit students learn the skills required for accurate requirements gathering, timely and effective system development, and successful implementation that would result in effective system performance. For this to be achieved successfully this unit also addresses the importance of project management skills. The unit also highlights the issues of transition processes after the development phase, the activities required in systems support and maintenance in the system's operational stage.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** COMP 1005 AND

INFS 1006 OR

COMP 1005 AND

DESN 1021

Equivalent Subjects: LGYA 5900 Enterprise Information Management**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs3012/>)**INFS 3017 Web Systems Development (10 Credit Points)****Legacy Code:** 300583

In this unit students further develop their theoretical and practical skills in designing and developing web based information systems using systems analysis, programming, database, human computer interaction and web technologies skills that they have learnt in previous units. Current web development technologies and/or frameworks will be utilised to build a complex web information system in a collaborative web development team. Techniques of porting web systems to mobile platforms will also be explored.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** COMP 2020**Equivalent Subjects:** LGYA 5737 Advanced Web Site Development**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs3017/>)**INFS 3018 Web Systems Development (Advanced) (10 Credit Points)****Legacy Code:** 300902

This unit teaches state-of-the-art web frameworks for developing complex web systems. This unit utilises the skills of basic web programming, database design, and systems analysis that students have learnt in previous units. Major topics in this unit include Cascading Style Sheet (CSS) framework, Razor pages, Model-View-Controller (MVC) programming, object to relational database mapping, and authentication and authorization. Moreover, this unit trains students' collaborative skills by asking students to build a complex website in a small team. As an advanced unit, deeper topics such as custom data validation and error handling will be discussed.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** COMP 2020**Incompatible Subjects:** INFS 3017 Web Systems Development**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs3018/>)**INFS 7001 Advanced Healthcare Data Environments (10 Credit Points)****Legacy Code:** 301028

This unit extends the students knowledge of Health Informatics by introducing concepts relating to electronic communications within the health industry. It exposes students to a variety of environments used to create, store, transfer and deliver healthcare data. Areas include minimum data sets, data linkage, messaging concepts/standards, terminologies, healthcare evaluation, electronic health records and related standards, security, privacy and trust, medico legal, epidemiology and population health together with TeleHealth/TeleMedicine approaches, methodologies, tools and techniques. Advanced skills and knowledge on researching into recent developments in specific sub-topics will be acquired through assessment components in the unit.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs7001/>)**INFS 7002 Advanced Healthcare Software and Systems (10 Credit Points)****Legacy Code:** 301029

In this unit students will learn the concepts underpinning the services computing paradigm of "bridging the gap between Business Services and IT Services". Services Computing technology includes Web services and service-oriented architecture (SOA), business consulting methodology and utilities, business process modelling, transformation and integration. Students will learn, through the development of practical examples, how to utilise these technologies within a healthcare context. Advanced knowledge and knowledge of recent developments in specific sub-topics will also be acquired through practical components in the unit.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs7002/>)

INFS 7003 Advanced Topics in ICT (10 Credit Points)**Legacy Code:** 300694

The information and communications technologies are advancing at an ever-increasing rate. The whole world is now interconnected. The World Wide Web community is actively engaged in developing the next generation of the Web. Social networking on the Internet is facilitated by the latest developments such as Facebook, YouTube and MySpace. Artificial Intelligence is increasingly intertwined with the decisions we make every day. Large scale storage technologies are leading to Cloud Computing where data and applications may reside anywhere in the world. Research in how to access meaningful data from the vast amounts on the Web has led to initiatives such as Semantic Web and Linked Data. Mashups mix data from disparate sources to enable users to work more efficiently. Wireless and mobile computing are changing the market place. All of these trends are still in their early stages. To make sense of all these developments, the top echelons of the World Wide Web Consortium are actively engaged in creating a new discipline called Web Science. Advanced Topics in ICT will enable the students to appreciate the scale of new developments and create prototypes of applications in their desired ambit. This unit consists of three Topics selected each semester. Assessment will be by a series of discussion paper assignments here students will show they have met the unit learning outcomes.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** ENGR 7017**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs7003/>)**INFS 7004 Content Management Systems and Web Analytics (10 Credit Points)****Legacy Code:** 300697

Content management systems (CMS) is a collective name for a wide range of web applications used by organisations/institutions/enterprises and social communities in establishing a continuing web presence. They may connect to backend systems and can provide complete web application services. This unit builds on both the conceptual and practical skills/knowledge to develop and utilise CMS's; in their management; in technical, legal, ethical and security issues; and in utilising web analytics to obtain business intelligence of their operation and impact.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 5891 Web Site Management and Security**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs7004/>)**INFS 7005 Smart Construction (10 Credit Points)****Legacy Code:** 301189

This unit introduces the evolving smart technologies applicable to construction and facilitates critical thinking in how these technologies can be gainfully applied in the construction industry. It builds up understanding of the subject content from baseline principles of management information systems moving towards evolving new technologies such as digital engineering, Building Information Modelling, Blockchain, Artificial Intelligence among others. The modern construction enterprises are critically analysed to determine the application of suitable technologies for their advancement.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs7005/>)**INFS 7006 Software Testing and Automation (10 Credit Points)****Legacy Code:** 300770

Software Testing and Automation will cover topics in two sections - Fundamentals of Software Testing and Test Automation. Section 1 will enable students to get a good understanding of different types of testing, the entire life cycle of Testing; how to design and prepare Test Cases, Test Data, execute these Test Cases and manage the defects. Students will also learn the importance of exclusive Test Environment for Testing and how to create a Traceability Matrix relating Requirements to Test Cases. Since approaches to testing software have also evolved with rigorous systematic approaches and advanced tools to automate some of the testing tasks. Section 2 will expose students to Test Automation using an automation tool, Object mapping and repository creation, Exception handling, logging and reporting, and Creation and Execution of Automation scripts.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs7006/>)**INFS 7007 Systems Analysis and Database Management Systems (10 Credit Points)****Legacy Code:** 300977

The main purpose of this unit is to provide students with an opportunity to gain knowledge and experience of developing a business information system in a systematic way. This unit examines the general methodology of systems development life cycle, including different phases and various modeling techniques. The unit specialises in the development of a full systems analysis and design documentation by using system development methodologies, including data analysis and modeling methods. It extensively covers database design techniques where students will use a set of business rules obtained from requirements and use case analysis, and database implementation using a commercial database management system. At the same time, student learning, intercommunication and collaborative working skills are enhanced by student participation in tutorial presentations and group assignments.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs7007/>)**INFS 7008 Systems and Network Security (10 Credit Points)****Legacy Code:** 300696

This unit is concerned with the protection of information in computing systems and when transferred over networks. It addresses techniques for securing networking applications and their security arrangements. Students gain an understanding of the fundamentals of the provision of security in networks and systems, as well as an appreciation of some of the problems that arise in devising practical security solutions.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 5882 - Distributed Systems and Network Security**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs7008/>)

INFS 7009 Web Technologies (10 Credit Points)**Legacy Code:** 300693

This unit covers the technologies required for the construction and maintenance of web pages and web sites. It focuses on the web page and site design, markup languages, client-side technologies such as Cascading Style Sheets and Javascript, as well as server-side technologies such as web servers, database connectivity, and server side scripting. It also includes the use of multi-media, security, access rights, and the exploration of some of the latest technological wonders populated on the Internet. This unit is heavily orientated towards practical experience based on amplifying the theoretical concepts.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs7009/>)**INFS 9001 Higher Degree Research Thesis - Information Systems (20 Credit Points)****Legacy Code:** 800222**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/infs9001/>)

Justice and Law Enforcement (JUST)

JUST 0001 Academic Skills for Criminal and Community Justice (WSTC Prep) (10 Credit Points)**Legacy Code:** 700219

This unit introduces students to the essential academic skills required for success in tertiary studies. It employs an explicit pedagogy approach to teach students how to become independent, active, and reflective learners. The unit also includes essential research and writing skills specific to the social sciences and criminal justice.

Level: Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just0001/>)**JUST 0002 Introduction to Australian Law Enforcement (WSTC Prep) (10 Credit Points)****Legacy Code:** 700236

This unit provides a broad overview of law enforcement in Australia. It aims to equip students with an understanding of power, law and authority in relation to law enforcement agencies in Australia, as well as an overview of the operations and procedures of those agencies. The unit also provides students with an understanding of what it means to become a law enforcement professional in Australia.

Level: Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just0002/>)**JUST 0003 Introduction to the Australian Legal System (WSTC Prep) (10 Credit Points)****Legacy Code:** 700216

This unit is designed to develop an understanding of the Australian legal system for students whose courses involve law units relevant to their area of study, such as Business, Construction, Policing and Criminology. Students will investigate the role of the Australian legal system in contemporary society, and explore its relevance to their chosen career path through project-based assessments. The unit will also help students develop the language and communication skills necessary for further tertiary study.

Level: Undergraduate Level 0 Preparatory subject**Equivalent Subjects:** JUST 0005 - Introduction to the Australian Legal System Fast Track (UWSC) JUST 0004 - Introduction to the Australian Legal System (UWSC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just0003/>)**JUST 0004 Introduction to the Australian Legal System (WSTC) (10 Credit Points)****Legacy Code:** 900083

This unit is designed to develop an understanding of the Australian legal system for students whose courses involve law units relevant to their area of study, such as Business, Construction, Policing and Criminology. Students will investigate the role of the Australian legal system in contemporary society, and explore its relevance to their chosen career path through project-based assessments. The unit will also help students develop the language and communication skills necessary for further tertiary study.

Level: Undergraduate Level 0 Preparatory subject**Equivalent Subjects:** JUST 0003 - Introduction to the Australian Legal System (WSTC Prep)

JUST 0005 - Introduction to the Australian Legal System Fast Track (UWSC)

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just0004/>)**JUST 1003 Policing Practices (10 Credit Points)****Legacy Code:** 102314

This unit concentrates on the implications for police practice of the legislative framework, and police responsibilities including procedures, practices and methods. The content will focus on police decision-making and discretion, and the meaning and practice of police powers. The approach necessary for working with diverse communities is described and analysed, as are associated communication practices. Concepts examined include the appropriate use of force, the appropriate use of personal information and the characteristics of ethical policing practice. Although the key focus of learning relates to the New South Wales Police Force; examples are also drawn from Australian state and federal policing as well as international policing contexts.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** JUST 1004 - Policing Practices (UWSC) JUST 2004 - Contemporary Policing JUST 2003 - Contemporary Policing**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just1003/>)

JUST 1004 Policing Practices (WSTC) (10 Credit Points)**Legacy Code:** 700237

This unit concentrates on the implications for police practice of the legislative framework, police responsibilities including procedures, practices and methods. The content will focus on police decision-making and discretion, and the meaning and practice of police powers. The approach necessary for working with diverse communities is described and analysed, as are associated communication practices. Concepts such as the appropriate use of force, the appropriate use of personal information and the characteristics of ethical policing practice. By comparison, examples are drawn from Australian state and federal policing, and international contexts.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** JUST 1003 - Policing Practices JUST 2003 - Contemporary Policing JUST 2004 - Contemporary Policing (UWSC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just1004/>)**JUST 2007 Human Rights, Human Services and the Law (Block Mode) (10 Credit Points)****Legacy Code:** 101772

This unit aims to provide knowledge of human rights issues and laws which are particularly relevant to social workers and community welfare workers. It provides an opportunity for students to reflect upon the powers, responsibilities and obligations in their professional roles and acquire skills to promote justice for disadvantaged individuals and groups through advocacy and law reform.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LGYA 7655 - Human Rights Human Services and the Law (AREPMetro) WELF 2008 - Human Rights Human Services and the Law**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just2007/>)**JUST 2008 Land Law (10 Credit Points)****Legacy Code:** 200599

Land Law seeks to give students an understanding and appreciation of the main legal concepts concerning property and interests in land, and of some of the technical rules used in land law, in a way which will be relevant to students development as property professionals. Students who successfully complete this unit will be familiar with and understand the main concepts of land law, be able to relate these concepts one to the other and to the practice of the property profession, and be familiar with the legal terminology relating to these concepts.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LGYB 9941 - Land Law**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just2008/>)**JUST 2009 Law Economics and Business Ethics (10 Credit Points)****Legacy Code:** 200296

This unit considers ethical analysis of institutions and practices of contemporary market capitalism as a foundation for possible future legal reforms. Topics covered include; market efficiency and externalities, corporations and regulation, principles of distributive justice, the ethics of globalization, class and crime.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** LAWS 1006 OR

LAWS 1003 AND

LAWS 1008 OR

LAWS 1009

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just2009/>)**JUST 2011 Law of Commercial Obligations (10 Credit Points)****Legacy Code:** 200554

This unit introduces students to the Australian laws governing transactions involving the transfer, registration and use of property. Focusing on commercial applications students will consider laws governing real, intellectual and personal property including topics such as registration requirements under the Torrens title system and the Personal Property Securities Act (PPSA) as well as enforceability and alienation of proprietary interests, leases and deeds, and subsidiary interests such as covenants and easements.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** LAWS 1001**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just2011/>)**JUST 2013 Mediation (10 Credit Points)****Legacy Code:** 200294

This unit will examine the theory and practice of mediation, specifically in the context of the Australian legal system. It builds upon the more general introduction given in the unit Alternative Dispute Resolution (which is a prerequisite for this course). This unit will assume that students have read the textbook for Alternative Dispute Resolution. This unit is experientially based, and students will be expected to participate in discussions, exercises and role-plays. The theory and practice of mediation will be critically considered, as will the social and legal contexts within which mediation is practised. The unit is presented with a multi-disciplinary, analytical and practical approach. Given the very broad range of areas within which mediation can be applied, students will be able to focus on an area or areas of particular personal or professional interest to them (for example, mediation of commercial disputes, mediation under anti-discrimination or family law). This unit is intended to be an introduction to the practice of mediation.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** LAWS 2001**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just2013/>)

JUST 2020 Criminal Law for Policing (10 Credit Points)**Legacy Code:** 102690

Knowledge of the criminal law is useful to state and federal police forces, government and private organisations, military police, private investigators, anti-corruption agencies, and in industries such as banking and insurance. All have a vested interest in preventing, detecting and investigating breaches of the criminal law through a policy framework. This unit introduces students to the common criminal offences encountered by police officers, with a focus on those investigating breaches of the criminal law rather than those prosecuting or defending. Common elements of Australian (particularly NSW legislation) and international jurisdictions and Commonwealth legislation are covered.

Level: Undergraduate Level 2 subject**Incompatible Subjects:** CULT 2006 - Evidence Investigations and Police Intelligence**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just2020/>)**JUST 3001 Advanced Standing for ADPP (Charles Sturt University) 380 (0 Credit Points)****Legacy Code:** 102540**Level:** Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just3001/>)**JUST 3002 Assessment and Treatment of Offenders (10 Credit Points)****Legacy Code:** 102068

This unit will take an authoritative overview and analysis of issues of assessment, and treatment of offenders, in particular those considered to be high-risk offenders. It will take particular account of policy and legislative issues and developments at an international level and address wider issues of risk and the high-risk offender in the context of the risk society. The unit will also question the relationship between the assessment, treatment and management of such offenders, and consider who is appropriate to involve in this process. The unit will take a multi-disciplinary approach to the assessment, treatment and management of violent and sexual offenders in particular, and extend its coverage to include the issue of stalking. Issues around diversity will be considered throughout.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just3002/>)**JUST 3003 Building Law (10 Credit Points)****Legacy Code:** 200292

This unit is designed to provide students with a good understanding of the law and dispute resolution mechanisms that regulate the conduct of the building industry and building practices e.g. Occupational health and safety, contract law, workers compensation, awareness of industrial relations and dispute resolution.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYB 9948 - Building Law 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just3003/>)**JUST 3006 Governance in Policing (10 Credit Points)****Legacy Code:** 102169

In this unit students examine the nature and function of governance and accountability processes within policing and the broader private security industry. There is a focus on the commitment by governments to practices at an individual and organisational level that are based on accountability, contestability and continuous improvement. Issues such as human rights, ethics in policing, conflicts of interest, misconduct, and corruption and criminality within policing and related industries, are explored; and relevant explanatory theories are examined. Different models and levels of governance and accountability in Australia are also explored, as are the roles of professional standards units within police forces, external accountability agencies such as police integrity commissions, the ombudsman, and crime and misconduct agencies. These are compared with other approaches worldwide. Throughout the unit extensive use will be made of case studies and problem based learning where students will be invited to propose solutions to real world problems.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** CULT 3017 AND

CULT 2006 OR

CULT 2016

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just3006/>)**JUST 3008 Independent Study (Law) (10 Credit Points)****Legacy Code:** 200704

This unit will result in the writing of a research paper of 5,000 words on an approved topic in law. It is anticipated that the unit will be used in appropriate situations such as where the Law School has a Visiting Professor who is prepared to supervise independent study in an area related to their expertise. The intent is that the areas researched will focus principally on those areas identified by the Schools in its Research Strategy. These include (i) international and trans-national governance, (ii) elder law, (iii) law and medicine, (iv) revenue law and (v) professional services law.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just3008/>)**JUST 3009 Information Systems Ethics and Law (10 Credit Points)****Legacy Code:** CP308A

This unit aims to provide students with an appreciation of the ethical and legal issues surrounding the use of information systems, particularly the internet. It examines the regulatory framework to facilitate an understanding of the legal boundaries within which e-commerce may operate. Matters including the abuse of computers, the privacy of computerised data and electronic communications are critically analysed to reveal a variety of issues which are legally significant.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just3009/>)

JUST 3011 Issues in the Criminal Justice System (10 Credit Points)**Legacy Code:** 200701

This unit introduces candidates to the criminal justice system through an examination of justifications for punishment and the policy and practice of various criminal justice agencies. Attention is paid to the significance of race, class and gender, and how these variables impact upon justice within the criminal justice system. Where possible, visits to criminal justice agencies and a prison are organised, and practitioners are invited to seminars to enable candidates to gain a more practical understanding of the criminal justice system.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2004**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just3011/>)**JUST 3012 Policing Leaders Internship (10 Credit Points)****Legacy Code:** 101969

The Policing Leaders Internship offers work experience to students enrolled in the Bachelor of Policing (Leadership) and Bachelor of Policing degrees within the School of Social Sciences. Internships can take place in a range of policing organisations such as the NSW Police Force, Police Association of NSW, and other member organisations of the Police Federation of Australia. Internship placements will require students to utilise a range of social science skills obtained throughout the Bachelor of Policing (Leadership) and Bachelor of Policing degree programs. This practical work schedule is supported by a reading program that examines different approaches to the study of policing organisations (their structures, functions and policies) and links these issues to the internship experience. The internship provides work at a host organisation for fourteen full days, totalling 105 hours. Typically, this internship component will be realised as one day per week for fourteen weeks, however an alternative spread of work may be agreed between the organisation, the student, and the unit coordinator. The unit is only offered in the Spring session of Level 3, and is worth 10 units of credit, which will be recorded as an elective on your degree transcript. There is only one lecture for this unit.

Level: Undergraduate Level 3 subject**Co-requisite(s):** JUST 3006 AND CULT 3001**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just3012/>)**JUST 3014 Creating Criminal Justice Solutions (10 Credit Points)****Legacy Code:** 102713

In this unit, students will consider some of the contemporary issues faced by the criminal justice system and the possible solutions to these real world problems. Using knowledge and skills drawn from their experience and study in their degree, students will be required to explore a critical policing or criminal justice issue and develop potential solutions. The unit aims to develop skills in problem analysis and managing the practical constraints faced by social scientists working in applied criminal justice and policing settings. Students will identify a critical issue (such as policing domestic violence, police engagement with CALD youth, criminal justice responses to cybercrimes), which they will explore individually and in groups throughout the semester. Students will become familiar with and learn to apply the policy/practice development cycle to identify critical issues, survey existing research and practices, develop alternative strategies for resolving the identified problem, and evaluating the expected outcomes.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** JUST 3004 - Contemporary Issues in Criminal Justice and Policing**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just3014/>)**JUST 4001 Clinical Legal Placement (10 Credit Points)****Legacy Code:** 200699

Clinical Legal Placement is an experiential learning program in which students work for 12 days a semester at the Western Sydney University Justice Clinic (WSUJC). Students work under the supervision of the Clinic Principal Lawyer and Clinical Director to gain practical lawyering experience while critically reflecting on the role of law and of lawyers in advancing social justice. This unit provides students with an invaluable opportunity to use and reflect on their study of law in an interactive, legal service environment working on advice, casework, policy or project work. The specific placement activities/ opportunities will align with clinic projects each semester and therefore cannot be advised in advance. Places are limited and enrolment is based on proximity to graduation.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** LAWS 3059 AND LAWS 2004 AND LAWS 2013 AND LAWS 2003**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just4001/>)**JUST 7001 Contemporary Policing Practice (10 Credit Points)****Legacy Code:** 101891

The unit will focus on issues that impact on contemporary policing, and the future of policing. The unit will contextualise policing practice by introducing students to the historical, legal, political and social context of this practice. The unit will then consider contemporary issues for policing such as social inclusion and community engagement, working with cognitive disability, transnational crime and newly defined crimes due to technological advancements. The implications of these developments for policing organisations in the future will be considered.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just7001/>)

JUST 7002 Executive Leadership in Policing (10 Credit Points)**Legacy Code:** 101892

The unit will introduce students to the principles, dimensions and qualities of contemporary executive leadership, as well as taking an analytical approach to such practice. The unit considers the challenges and dynamics of strategic police leadership within a range of political contexts. It explores the reality and diversity of operational policing and related functions from the leadership perspective and explores the limitations of leadership. It discusses the value and importance of the exercise of proper influence at the political, public and organizational levels.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just7002/>)**JUST 7003 Governance and Accountability in Policing Practice (10 Credit Points)****Legacy Code:** 101893

This unit will focus on understanding contemporary corporate governance and accountability within the practice of policing. Core to the content of the unit is the study of the commitment by governments to practices at an individual and organisational level that are based on accountability, contestability and lead to continuous improvement. The role of leadership in shaping and driving the commitment to continuous improvement in service delivery will be considered as well as issues concerning performance measurement, transparent governance, and accountable processes. Best practice policies and systems will be used within the teaching of this unit and examined through a case study teaching approach.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just7003/>)**JUST 7004 Vulnerability and Public Safety (10 Credit Points)****Legacy Code:** 102418

This unit explores the concept of vulnerability and its implications for policing and public safety. Vulnerability will be defined and described and the challenges vulnerable populations present for policing and public safety will be discussed.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** JUST 7001 AND

JUST 7002 AND

JUST 7005 AND

POLI 7002

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just7004/>)**JUST 7005 Working with Offending Behaviour: Integrating Theory to Practice (10 Credit Points)****Legacy Code:** 101894

The unit begins with an analysis of offending behaviour and criminality through the lens of different theoretical perspectives. The unit will then examine the way in which offenders are assessed for risk and the role criminal justice agencies play in examining risk. The unit will build on this knowledge by considering the range of interventions and treatment programs available to offenders in addressing their behaviour. The unit will conclude by examining the range of criminal justice agencies that play a role in working with offenders, with a particular focus on how this work is done within the community.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just7005/>)**JUST 7006 Clinical Legal Placement (Juris Doctor) (10 Credit Points)****Legacy Code:** 201064

Clinical Legal Placement allows students to attend the Parramatta Community Justice Clinic (PCJC) or a community legal centre for ten (10) days. This unit provides students with an invaluable opportunity to use and reflect on their study of law in an interactive, legal service environment and real-life experience. Under the supervision of a legal practitioner students will work on advice, casework, policy or project work, as required by the PCJC or relevant centre. Students will examine the practical application of the law and the interaction of law, facts, policy and ethical issues. Students will be exposed to a system of self-analysis and self-criticism. Students are required to attend every day, record and reflect on their own experiences, and submit several short papers of various kinds. (Places are limited and enrolment is based on merit with progression status also considered).

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** LAWS 7072 AND

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/just7006/>)**JUST 7007 Issues in the Criminal Justice System (Juris Doctor) (10 Credit Points)****Legacy Code:** 201068

This unit introduces candidates to the criminal justice system through a critical review of justifications for punishment and the policy and practice of various criminal justice agencies. Attention is paid to the significance of race, class and gender, and how these variables impact upon justice within the criminal justice system. Students will engage with contemporary issues and ongoing debates in criminal justice. Where possible, visits to criminal justice agencies and a prison are organised, and practitioners are invited to seminars to enable candidates to gain a more practical understanding of the criminal justice system.

Language and Literature (LANG)

LANG 0001 Academic Communication 1 (WSTC Prep) (10 Credit Points)

Legacy Code: 700198

This unit is designed to introduce students to academic culture as a culture of critical debate and equip students with the academic literacy skills necessary to perform successfully in this culture. In particular, the unit aims to help students access the conventions of academic English by focussing on attitudes to knowledge, and the ways in which ideas are structured and presented in academic texts and speech.

The unit assists students to comprehend academic texts, identify key ideas and concepts, and identify and use the rhetorical moves used in academic texts. It also aims to help students compare and contrast ideas across texts, improve grammatical skills that relate to academic writing, summarise and synthesise information, and understand why, when and how to reference information.

Level: Undergraduate Level 0 Preparatory subject

Equivalent Subjects: LANG 0030 - English for Tertiary Study 1 (UWSCFS) LANG 0036 - Introduction to Academic Communication 1 (UWSCFS) LANG 0006 - Academic English 1 (UWSC) LANG 0031 - English for Tertiary Study 1 (UWSC) LANG 0037 - Introduction to Academic Communication 1 (UWSC)

LANG 0010 Academic Skills for Arts (WSTC) (10 Credit Points)**Legacy Code:** 900097

This unit introduces students to the essential academic skills required for success in tertiary studies. It employs an explicit pedagogy approach to teach students how to become independent, active, and reflective learners. The unit also includes essential research and writing skills specific to the arts.

Level: Undergraduate Level 0 Preparatory subject**Equivalent Subjects:** LANG 0009 - Academic Skills for Arts (UWSCFS)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang0010/>)**LANG 0011 Academic Skills for Arts (WSTC) Online (10 Credit Points)****Legacy Code:** 900117**Level:** Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang0011/>)**LANG 0012 Academic and Professional Communication (WSTC Prep) (10 Credit Points)****Legacy Code:** 700276

The ability to communicate clearly and persuasively to diverse audiences is a key professional prerequisite. This unit provides students with a preliminary understanding of a range of communication theories and practices necessary for academic work and effective professional communication including presenting in a professional setting. Both professional and societal cultural norms are explored as a contextual basis of the unit. The unit assists in the acquisition of professional skills through authentic and meaningful learning experiences and assessment. The unit assists students to comprehend academic and professional texts, identify key ideas and evidence, and identify and apply certain rhetorical moves which are common in academic communication. It also aims to help students to improve grammatical skills that relate to academic writing, summarise and synthesise information, and understand why, when and how to cite information. In addition, the unit encourages students to develop strategies to maximize their learning and to reflect on their own learning styles.

LANG 1011 Indonesian 101 (10 Credit Points)**Legacy Code:** 102316

This is an introductory unit to the Indonesian language and culture, for students who commence a specialisation in Indonesian at a beginner level. The unit equips students with basic language skills, provides a basic knowledge about the ethnic, cultural and linguistic diversity of Indonesia. Students with a background of study in the language need to obtain advice on their appropriate level of language study and where required undertake brief spoken and written entry assessments. During the first two weeks of class, the lecturer will monitor the performance of students and advise students who need to transfer to a higher class. Students should consult the Languages Academic Course Advisor or Unit Coordinator if they are unsure of their entry level.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang1011/>)**LANG 1012 Indonesian 102 (10 Credit Points)****Legacy Code:** 102326

This is the second and last introductory unit in the Indonesian Language Specialisation. The unit further develops the basic language and communication skills students acquired in Indonesian 101 through the use of activities designed to practice and reinforce Indonesian language and grammar skills. This unit will also introduce a greater focus on the socio-cultural and linguistic diversity found in Indonesia through online powerpoint lectures and accompanying notes. The unit focuses on four language skills (listening, speaking, reading and writing). Students with a background of study in the language need to obtain advice on their appropriate level of language study. During the first two weeks of class, the lecturer will monitor the performance of students and advise students who need to transfer to a higher class. Students should consult the Languages Academic Course Advisor or Unit Coordinator if they are unsure of their entry level.

Level: Undergraduate Level 1 subject**Pre-requisite(s):** LANG 1011**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang1012/>)**LANG 1013 Introduction to Interpreting (10 Credit Points)****Legacy Code:** 100194

This is a core unit for students in the Bachelor of Arts (Interpreting and Translation) course and an elective foundation unit for language key field of study in the BA. It introduces students to the theory and practice of Interpreting. Lectures are held in English for students of all the languages available. The tutorials are language specific in Arabic, Japanese, Mandarin or Spanish. This unit requires native or near-native proficiency in English and one of the languages offered in the unit.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** LGYB 2089 - Interpreting 1 LGYB 2090 - Interpreting 2 LGYB 2851 - Introduction to Interpreting**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang1013/>)**LANG 1014 Introduction to Linguistics (10 Credit Points)****Legacy Code:** 101945

Language is an integral component of human experience. This unit is designed to raise students' awareness of the nature, structures and functions of language and language use. Students will gain the conceptual tools to do basic analysis of language at the levels of phonology, morphology, syntax, semantics and pragmatics. By providing a basic understanding and appreciation of language from different perspectives, the unit establishes points of contact between language, the humanities, and beyond.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** LANG 2032 - Linguistics**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang1014/>)**LANG 1015 Introduction to Literary Studies (10 Credit Points)****Legacy Code:** 101907

This unit involves the close reading of literary texts to explore concepts about meaning-making including the use of language, narrative form, and issues of genre. The unit asks questions about the role and function of literature. For example: is literature's purpose to entertain readers, to provide them with emotional release, to represent the world, or to allow people to make meaning from their experience? The primary texts span three genres - fiction, poetry and drama. Students will learn about the different ways in which these literary forms are constructed and the contrasting ways in which they represent reality.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** COMM 1014 - English Text and Writing LANG 1016 - Introduction to Literary Studies (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang1015/>)**LANG 1016 Introduction to Literary Studies (WSTC) (10 Credit Points)****Legacy Code:** 700288

This is a post beginner level unit in Japanese built on the knowledge and skills developed in Japanese 101 and aims to further develop listening, speaking, reading and writing skills in elementary Japanese. Students who believe they have sufficient background in Japanese to do 102 without having done 101 should apply by e-form for a Rule Waiver, explaining their situation, and have their language level evaluated. Students with a background of study in the language need to obtain advice on their appropriate level of language study. During the first two weeks of class, the lecturer will monitor the performance of students and advise students who need to transfer to a higher class. Students should consult the Languages Academic Course Advisor or Unit Coordinator if they are unsure of their entry level.

Level: Undergraduate Level 1 subject**Pre-requisite(s):** LANG 1020**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang1021/>)**LANG 1028 The Sound of Language (10 Credit Points)****Legacy Code:** 102042

The richness of information conveyed through spoken language owes its form to the combination and recombination of a small number of sounds. In this unit, students will learn the sounds of the world's languages (phonetics) and the ways in which they are combined to build words (phonology). Examples will be drawn from English, Australian Aboriginal languages, and a diverse range of languages spoken around the world. The unit includes an overview of Australian English phonetics and phonology.

Level: Undergraduate Level 1 subject**Incompatible Subjects:** LANG 2045 - The Sound of Language**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang1028/>)**LANG 1029 Foundations of Academic English (10 Credit Points)****Legacy Code:** 102735

Academic English is a particular kind of English that is used in academic writing and other professional contexts. This unit aims to improve students' written communication skills in academic English. The unit content includes English grammar as well as analytical reading and writing in academic English. Students will also learn to identify and to make cogent and sophisticated arguments using various written formats. Student work will be assessed in terms of theoretical and applied knowledge as well as in terms of writing skills.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** HUMN 1002 - Analytical Reading and Writing HUMN 1003 - Analytical Reading and Writing (WSTC) LANG 1031 - Foundations of Academic English (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang1029/>)**LANG 1030 Thinking Critically About Texts and Society (10 Credit Points)****Legacy Code:** 102737

In this unit students explore the application of texts - including works of literature, philosophy and sociology/cultural studies - to our understanding of contemporary debates and challenges in order to develop critical thinking skills. Developing skills in textual analysis, this unit addresses topical issues and social problems so as to consider enduring questions such as 'What is the human?', 'What is the good life?', 'What is meaning and how do we make it?', and 'What is inequality and what should we do about it?'

In this unit students explore the application of texts - including works of literature, philosophy and sociology/cultural studies - to our understanding of contemporary debates and challenges in order to develop critical thinking skills. Developing skills in textual analysis, this unit addresses topical issues and social problems so as to consider enduring questions such as 'What is the human?', 'What is the good life?', 'What is meaning and how do we make it?', and 'What is inequality and what should we do about it?'

Level: Undergraduate Level 1 subject**Equivalent Subjects:** LANG 1026 - Texts and Traditions LANG 1027 - Texts and Traditions (WSTC) LANG 1030 - Thinking Critically About Texts and Society**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang1032/>)**LANG 2001 Advanced Standing for Linguistics 210 (0 Credit Points)****Legacy Code:** 102592**Level:** Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2001/>)**LANG 2002 Advanced Standing for Literature 210 (0 Credit Points)****Legacy Code:** 102449**Level:** Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2002/>)**LANG 2003 Advanced Standing for Literature 220 (0 Credit Points)****Legacy Code:** 102452**Level:** Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2003/>)**LANG 2004 Arabic 201 (10 Credit Points)****Legacy Code:** 102019

This is an intermediate level unit in Arabic intended for two groups of students: (a) students of English speaking backgrounds or other language backgrounds who have achieved a degree of competence in the language at least at the HSC Level; and (b) Arabic language background students whose education has been in English as the medium of instruction in all subjects other than Arabic and who, therefore, have some gaps in their knowledge of Arabic, particularly in situations requiring a more formal language register. The unit is designed to consolidate and advance the acquisition of Modern Standard Arabic for post beginner learners of the language. While consolidating language skills, students will also develop further knowledge of the Arab culture. A range of DELL (Digitally Enhanced Language Learning) activities are utilised as part of the blended learning mode of delivery for this unit. NOTE: Students enrolling in this unit as part of a major or sub major in Arabic must enrol in Arabic 202 at the same time. Students with a background of study in the language may need to take higher level units. During the first two weeks of class, the lecturer will monitor the performance of students and advise students who need to transfer to a higher class. Students should consult the Languages Academic Course Advisor or Unit Coordinator if they are unsure of their appropriate level.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LANG 2052 - Language and Communication Skills 2A Arabic**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2004/>)**LANG 2006 Arabic 202 (10 Credit Points)****Legacy Code:** 102020

This unit further develops students' language skills acquired in Arabic 201 to equip students with more sophisticated language skills and knowledge. It aims to extend learners' skills within a range of topics and to cover basic structural aspects of the language, at a post-beginner level. A range of DELL (Digitally Enhanced Language Learning) activities are utilised as part of the blended learning mode of delivery for this unit. NOTE: Students enrolling in this unit as part of a major or sub major in Arabic must enrol in Arabic 201 at the same time. Students with a background of study in the language may need to take higher level units. During the first two weeks of class, the lecturer will monitor the performance of students and advise students who need to transfer to a higher class. Students should consult the Languages Academic Course Advisor or Unit Coordinator if they are unsure of their appropriate level.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LANG 2052 - Language and Communication Skills 2A Arabic**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2006/>)

LANG 2007 Arabic 203 (10 Credit Points)**Legacy Code:** 102021

This is one of the components of the Arabic major and sub-major. It assumes an intermediate level of competence in the language. It aims to extend (intermediate) learners' skills with a particular focus on listening, speaking and oral interaction in Arabic, in a range of situations, by exposing students to realistic interactions, including the Arabic-Australian community. The unit also aims to extend the learners' lexicon and structures, particularly those used in talking about current personal experiences as well as events, and popular Arab personalities. A range of DELL (Digitally Enhanced Language Learning) activities are utilised as part of the blended learning mode of delivery for this unit. NOTE: Students enrolling in this unit as part of a major or sub major in Arabic must enrol in Arabic 204 at the same time. Students with a background of study in the language may need to take higher level units. During the first two weeks of class, the lecturer will monitor the performance of students and advise students who need to transfer to a higher class. Students should consult the Languages Academic Course Advisor or Unit Coordinator if they are unsure of their appropriate level.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LANG 2053 - Language and Communication Skills 2B Arabic**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2007/>)**LANG 2008 Arabic 204 (10 Credit Points)****Legacy Code:** 102022

This is an intermediate unit in the Arabic major or sub-major. It provides an extension and consolidation of reading comprehension, and writing skills, as well as lexical enrichment in Modern Standard Arabic, particularly its range of written registers and their linguistic characteristics. The content for reading and writing activities will be selected from newspapers, magazines, short stories and other printed media. NOTE: Students enrolling in this unit as part of a major or sub-major in Arabic must enrol in Arabic 203 at the same time. Students with a background of study in the language may need to take higher level units. During the first two weeks of class, the lecturer will monitor the performance of students and advise students who need to transfer to a higher class. Students should consult the Languages Academic Course Advisor or Unit Coordinator if they are unsure of their appropriate level.

This is a post-beginner unit for intermediate level study of modern Chinese (Mandarin) language and its culture, suitable for Post HSC entry or an equivalent level. This unit is designed for students who take it as part of the Chinese major/sub-major or as an elective unit. It will further develop the Pinyin system and the four core skills (listening, speaking, reading and writing), with a particular focus on core vocabulary and fundamental structures, using approximately 500 simplified Chinese characters. Aspects of culture and language acquisition strategies are explored through research projects. Differentiated learning and assessment tasks and multimedia activities are utilised to cater to non-background and quasi-background learners. The unit is not suitable for background speakers (i.e., who have completed formal secondary education where Mandarin Chinese is used as an official language and also the language of instruction at the School). Note: Students enrolling in this unit as part of a major or sub major in Chinese are encouraged to enrol in Chinese 202 at the same time.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LANG 2049 - Language and Communication Skills 2A Chinese**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2009/>)**LANG 2010 Chinese 202 (10 Credit Points)****Legacy Code:** 102025

This is a post-beginner unit for intermediate level study of modern Chinese (Mandarin) language and its culture suitable for Post Beginners or an equivalent level. Students can take it as part of a major/sub-major or as an elective unit. It aims to develop listening and speaking skills in a real communicative setting. Students will learn Pinyin, vocabulary, expressions and grammatical structures in a wide range of daily situations. In addition, students will have the chance to learn and research on some interesting aspects of Chinese culture. Differentiated learning and assessment tasks and multimedia activities are utilised to cater to non-background and quasi-background learners. The unit is not suitable for background speakers (i.e., who have completed formal secondary education where Mandarin Chinese is used as an official language and also the language of instruction at the School). Note: Students enrolling in this unit as part of a major or sub major in Chinese are encouraged enrol in Chinese 201 at the same time.

LANG 2011 Chinese 203 (10 Credit Points)**Legacy Code:** 102026

This is an intermediate level unit of modern Chinese (Mandarin) language and its culture suitable for students who undertake it as part of the Chinese major or sub-major or as an elective subject. It further develops students' language skills acquired in Chinese 201 and 202 to a level of proficiency to satisfy their general social needs. While students' aural/oral skills are further developed, emphasis is placed on reading and writing. A working knowledge of approximately 800 simplified Chinese characters is developed. Aspects of Chinese culture and society are explored through research work. Differentiated learning and assessment tasks and multimedia activities are utilised to cater to non-background and quasi-background learners. The unit is not suitable for background speakers (i.e., who have completed formal secondary education where Mandarin Chinese is used as an official language and also the language of instruction at the School). Note: Students enrolling in this unit as part of a major or sub major in Chinese are encouraged enrol in Chinese 204 at the same time.

LANG 3021 - Chinese 302

LANG 3022 - Chinese 303 Twentieth-Century Chinese Literature

LANG 3023 - Chinese 304 Chinese Classical Literature

LANG 3024 - Chinese 305 Chinese Cinema

LANG 3026 - Chinese 307 The Cultural Context of China

LANG 3025 - Chinese 306 Traditional Chinese Thought

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2011/>)**LANG 2012 Chinese 204 (10 Credit Points)****Legacy Code:** 102027

This is an intermediate level unit of modern Chinese (Mandarin) language and its culture suitable for students who undertake it as part of the Chinese major or sub-major or as an elective subject. It provides an extension of reading comprehension and writing skills over a range of written registers. The content is selected from contemporary materials (e.g. songs and rhymes, fables and idioms, magazines, short stories and websites). This unit also fosters cultural and social understanding by presenting aspects of contemporary cultures and societies through language use and research work. Differentiated learning and assessment tasks and multimedia activities are utilised to cater to non-background and quasi-background learners. The unit is not suitable for background speakers (i.e., who have completed formal secondary education where Mandarin Chinese is used as an official language and also the language of instruction at the School). Note: Students enrolling in this unit as part of a major or sub major in Chinese are encouraged enrol in Chinese 203 at the same time.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LANG 2030 - Language and Communication Skills 2B Chinese**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2012/>)**LANG 2013 Comedy and Tragedy (10 Credit Points)****Legacy Code:** 100900

This unit will examine the theory, writing and performance of Western Tragedy and comedy. The generic terms "tragedy" and "comedy" will provide signposts for both historical and theoretically modern approaches to a range of plays. Texts selected from the period since 1950 may represent comedy and/or tragedy in popular culture, and may have been written for media other than the stage, such as television and film.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LGYB 4589 - Comedy and Tragedy**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2013/>)**LANG 2014 Community Translation (UG) (10 Credit Points)****Legacy Code:** 100191

Community Translation facilitates written communication between public services and community members with low literacy in the official or mainstream language(s) of a given country or region. The unit covers the translation of general awareness material (e.g. healthcare, civic responsibilities, social services, etc.) as well as the translation of official documents. Students develop skills in producing target texts in styles appropriate to specific communities and groups, and to the content and function of the source text. They also develop skills in researching and using appropriate specialist terminology, editing and revising, and producing camera-ready documents. On the basis of these skills, the unit further develops students' ability to reflect upon translation in terms of strategies and appropriateness in relation to the target audience as well as make critical written and oral assessment of relevant translations. Subject to demand, the unit will be available for Arabic, Japanese, Mandarin and Spanish.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2014/>)**LANG 2015 Cultural History of Books and Reading (10 Credit Points)****Legacy Code:** 101967

This unit examines the development of the book as a material and cultural object, and the evolution of cultures of reading from codex and clay tablet to digital book and e-Reader. Exploring the historical and technical change taking the book from singular object (painstakingly copied by hand and read by a learned elite) to 'book' as notional object (deliverable 'content', in a range of formats, to readers on demand), this unit focuses on moments of contestation and crisis in reading, writing and print culture: copyright and the role of authorship, censorship, the plundering of libraries, and that most radical proscription, book-burning.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2015/>)**LANG 2019 Immersion Language Heritage Background 201 (0 Credit Points)****Legacy Code:** 102609**Level:** Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2019/>)

This is a Level 2 unit in the Indonesian Specialisation. It introduces students to formal and informal registers of Indonesian and exposes them to relatively complex aspects of Indonesian grammar such as affixes. Students will study the use of spoken language mainly through participation in dialogues and discussion. More formal registers will be studied through reading and writing. Communicative settings will include fields such as health, education, and tourism.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2021/>)**LANG 2022 Indonesian 202 (10 Credit Points)****Legacy Code:** 102327

This is a Level 2 unit in the Indonesian Specialisation. It builds on language skills developed in Indonesian 201 to extend students' use of formal and informal registers of Indonesian and further develop their knowledge of Indonesian communities, cultures and religions. The unit covers the four language skills (reading, listening, speaking and writing) with a special focus on listening and speaking.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** LANG 1012**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2022/>)**LANG 2023 Interpreting Skills (10 Credit Points)****Legacy Code:** 100193

This is a core component of the Bachelor of Arts (Interpreting and Translation) and a pool unit in some postgraduate courses. The unit is aimed at developing essential skills in interpreting and deals with the specialised technical skills necessary for the different modes of interpreting: dialogue, consecutive, simultaneous, and sight translation. Given the large amount of independent practice needed to develop competence in interpreting, it pays special attention to the teaching of techniques for autonomous learning. Lectures are held in English for students of all the languages available. The tutorials are language specific in Arabic, Japanese, Mandarin or Spanish.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2023/>)**LANG 2024 Japanese 201 (10 Credit Points)****Legacy Code:** 102028

This unit is designed as a post-beginner level language and culture unit intended for students who have studied this language to at least HSC level or equivalent. This unit focuses on the development of the grammatical structures and vocabulary in such areas as using polite and plain style of the language, verb conjugation for expressing conjecture, adverbial clauses indicating specific times and places, conditional, etc. The knowledge of kanji is increased to 260 characters. The unit is not suitable for background speakers (i.e., who have completed formal secondary education where Japanese is used as an official language and also the language of instruction at the School). Note: Students enrolling in this unit as part of a major or sub major in Japanese are encouraged to enrol in Japanese 202 at the same time.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LANG 2028 - Language Communication Skills 2A Japanese**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2024/>)**LANG 2025 Japanese 202 Speaking and Listening (10 Credit Points)****Legacy Code:** 102029

This unit is normally undertaken concurrently with, or after, Japanese 201. It is designed to develop and expand speaking and listening skills based on the grammatical knowledge developed in Japanese 201. The range of communicative transactions is increased so that more sophisticated exchanges are possible, for instance when using polite and plain (i.e. casual) styles of speech, describing one's conjecture, stating an opinion, asking for explanation, etc. Cultural and social understanding of Japanese society is also fostered. The unit is not suitable for background speakers (i.e., who have completed formal secondary education where Japanese is used as an official language and also the language of instruction at the School). Note: Students enrolling in this unit as part of a major or sub major in Japanese are encouraged enrol in Japanese 201 at the same time.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LANG 2028 - Language Communication Skills 2A Japanese**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2025/>)**LANG 2026 Japanese 203 (10 Credit Points)****Legacy Code:** 102030

This unit further develops students' language skills acquired in Japanese 201 to equip students with more sophisticated language skills and knowledge. Among the topics covered in Japanese 203 are: stating a plan or intention, making a suggestion in the plain form, offering advice, indicating the degree of certainty, describing a change in state, indicating causes of reasons, using of the passive and the imperative, etc. By the end of this unit, students will be able to read and write approximately 380 kanji characters. The unit is not suitable for background speakers (i.e., who have completed formal secondary education where Japanese is used as an official language and also the language of instruction at the School). Note: Students enrolling in this unit as part of a major or sub major in Japanese are encouraged to enrol in Japanese 204 at the same time.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LANG 2031 - Language Communication Skills 2B Japanese**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2026/>)

LANG 2033 Literature and Decolonisation (10 Credit Points)**Legacy Code:** 102572

Do you know why nearly a hundred new nations were founded between 1945 and 1970? Have you ever wondered who Mahatma Gandhi or Ho Chi Minh were? Why would you challenge authority 'non-violently'? How do you write creatively in a language that has been imposed through colonial conquest? These are all questions connected to decolonisation: the explosive process by which the great modern European empires were dissolved and scores of new nations were formed - from Indonesia to Algeria, India to Nigeria, Jamaica to Vietnam. With this process came a surge of creative energy, as formerly colonised peoples set out to produce new ways of writing and thinking. We will read classic anti-colonial politicians like Gandhi and Frantz Fanon and writers from different decolonising regions including India, Africa, South-East Asia, the Caribbean, the Middle East and Australia.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LANG 3064 - Literatures of Decolonisation**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2033/>)**LANG 2034 Meaning in Language (10 Credit Points)****Legacy Code:** 102489

This unit introduces students to how meaning is constructed in language. It gives an overview of context-free meaning (semantics) and context-dependent meaning (pragmatics). Students will learn how we can encode and access meaning in communication and how this can be studied scientifically. This unit builds on and expands knowledge and methods developed in other linguistics units, especially Structure of Language and Pragmatics. It further connects to more advanced units, in particular Historical Linguistics, Second Language Acquisition, Bilingualism, Sociolinguistics and Discourse Analysis.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** LANG 1014**Equivalent Subjects:** LANG 2038 - Pragmatics**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2034/>)**LANG 2035 Methods of Reading (10 Credit Points)****Legacy Code:** 101909

This unit aims to build the skills of reading, interpretation and theoretical and contextual analysis that are critical to the study of literary texts, skills that define scholarship in the discipline of English. Focusing on a sustained and careful study of a small number of literary texts the unit provides an in-depth exploration of technical approaches to close reading, cultural and historical contexts for the production and reception of the texts, and different theoretical approaches to their interpretation. The selected primary texts (one novel, one play and a selection of poems) will span two or three literary/historical periods.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2035/>)**LANG 2036 Modern Australian Poetry and Poetics (10 Credit Points)****Legacy Code:** 101978

This unit examines Australian poetries of the 20th and 21st centuries in context of parallel events in international poetry. It looks at histories and definitions of poetic 'innovation' and asks how Australian poetry has dealt with different waves of modernism. It studies dialogues between local and international avant-gardes, and surveys new poetic genres emerging in online environments. The unit aims to enrich students' critical understanding of poetry and poetics, and where relevant, to enhance their own creative writing practice. Topics addressed include poetic tradition and counter-tradition; form and experiment; colonialism, exile and belonging; literary communities; critical histories; digital and e-poetries.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LGYB 0215 - Poetry and Poetics LGYA 0927 - Poetry and Poetics**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2036/>)**LANG 2037 Pragmatics (10 Credit Points)****Legacy Code:** 102490

This is an optional unit of the Linguistics Major which introduces students to pragmatics, the study of language use in context. It combines theoretical elements with practical applications through examples, exercises and authentic data analysis, which enable students to understand the significance of this field of linguistics to language professions, such as interpreting and translation and language teaching.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** LANG 1014**Equivalent Subjects:** LGYA 1435 - English Semantics and Pragmatics**Incompatible Subjects:** LANG 2038 - Pragmatics**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2037/>)**LANG 2039 Sexual/Textual Politics in Victorian Women's Writing (10 Credit Points)****Legacy Code:** 101964

This unit will set Victorian women's writing in its historical, intellectual, publishing and cultural contexts, with particular emphasis on the multiple genres of writing within which women engaged in the nineteenth century. Using a broad range of short fiction, this unit will investigate topics such as gender and sexuality, colonialism and empire, and race and identity. It will also explore texts from across Australia, Britain, North America and Ireland and ask students to consider how these texts are still relevant to contemporary society and intellectual thinking.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2039/>)

LANG 2040 Spanish 201 (10 Credit Points)**Legacy Code:** 102032

This is post-beginner unit suitable for Post Beginners HSC entry or equivalent, within the Spanish programme, designed for students who take it as a major, sub-major or elective. Within the Spanish major or sub major set, it is normally taken concurrently with Spanish 202. The unit will further develop all language skills, listening, speaking, reading and writing with particular focus on a core vocabulary and fundamental structures. Cultural and social understanding is also fostered through research projects on specific cultural or social aspects that are of interest to students. A range of DELL (Digitally Enhanced Language Learning) activities are utilised for this unit. NOTE: Students enrolling in this unit as part of a major or sub major in Spanish must enrol in Spanish 202 at the same time.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LANG 2029 - Language and Communication Skills 2A Spanish**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2040/>)**LANG 2041 Structure of Language (10 Credit Points)****Legacy Code:** 101948

This unit aims to equip students with knowledge about the structural aspects of language. Students will learn to describe, analyse and reflect on the structure and meaning of linguistic elements from word to sentence level. Using examples from different languages, including Australian Indigenous languages and other languages spoken in Australia, this unit will provide students with an understanding of how structure and meaning are connected, how they link up with other areas of linguistics, and how research in this field is relevant to the linguistic ecology of Australia.

Level: Undergraduate Level 2 subject**Co-requisite(s):** LANG 1014 AND LANG 1028**Equivalent Subjects:** LANG 2046 - The Structure of English**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2041/>)**LANG 2044 The Gothic (10 Credit Points)****Legacy Code:** 102507

This unit examines the emergence and development of Gothic literature in English. It studies the rise of Gothic fiction in the late-eighteenth century, and the evolution of Gothic genres in the nineteenth and twentieth centuries. Students will examine key works of Gothic poetry and narrative fiction - such as vampire narratives - in order to consider the social, political and intellectual contexts for Gothic literature. The unit considers how Gothic forms negotiate cultural anxieties, such as those involving race, gender, sexuality, religion, scientific development and class. Set texts from the twentieth century onwards may include works from television, theatre and film.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2044/>)**LANG 2047 Translation Technologies (10 Credit Points)****Legacy Code:** 101302

This unit aims to equip students with the theoretical and practical knowledge needed to effectively apply information and communication technologies to translation and other language related tasks. It focuses on translation memory and terminology management systems, and on the workflow involved in the handling of multilingual content.

Emphasis is also put on uses of the Internet as a resource tool, and to the principles of controlled language for text to be processed by machine translation (MT). Tutorials will be conducted in a computer lab where students will familiarize themselves with leading computer-assisted translation (CAT) software applications.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LGYA 0191 - Translation Skills**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2047/>)**LANG 2048 Working Grammar (10 Credit Points)****Legacy Code:** 102414

How does grammar work? And how do languages function in different social contexts? This unit introduces students to a functional analysis of the English language, and relates the structure of English to its use in cultural and social contexts. It offers students of literature and training teachers an introduction to theories and forms of analysis that support much English language education in Australia. The functional model of language is used in a range of fields - including teaching in schools and universities, teaching ESL/EFL, and broader language research. Students will apply the functional analysis of English to a range of spoken and written texts from diverse literary, social and cultural contexts. This will help to provide grammatical skills and work-readiness, especially for students training to be professional teachers.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2048/>)**LANG 2050 Medieval and Early Modern Literature (10 Credit Points)****Legacy Code:** 102626

While films and books related to the fantastic and supernatural (like Game of Thrones, Lord of the Rings and Harry Potter) are extremely popular, it is sometimes forgotten that these works draw heavily on historical literary forms and works that engaged directly with the cultures from which they emerged. This unit will look at examples of literature from the Medieval and Early Modern periods (between 1000 and 1800) and the social and cultural worlds they both represented and supported. It will ask how these works still inform how we understand and represent things today.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2050/>)

LANG 2051 Writing and Reading Sci-Fi and Fantasy (10 Credit Points)**Legacy Code:** 102772

This unit covers the basic creative writing techniques for 'worldbuilding' in the genres of science fiction and fantasy. Through guided reading and writing you'll explore what happens when ordinary human predicaments are deepened and complicated when represented as happening in a world not our own: one with different physical laws, belief systems, technologies and cultural practices. In a workshop environment, you will build outward from a 'story-bud' about an alternative or alien world to explore the logic of that world and its implications for the creation of believable characters, setting, action and - overall - the development of a successful story.

Level: Undergraduate Level 2 subject**Incompatible Subjects:** LANG 3090 - Writing and Reading Sci Fi and Fantasy**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2051/>)**LANG 2054 Japanese 204: Speaking and Listening (10 Credit Points)**

This unit is undertaken concurrently with, or after, Japanese 203. It is designed to further develop and expand speaking and listening skills on the basis of grammatical structure introduced in Japanese 203 and increase the range of communicative transactions developed in Japanese 202 so that more sophisticated exchanges are possible when stating a plan or intention, making a suggestion, offering advice, indicating the degree of certainty, describing a change in state, indicating causes, using the passive and the imperative, etc. This unit will also present further aspects of contemporary Japanese culture and society. The unit is not suitable for background speakers (i.e., who have completed formal secondary education where Japanese is used as an official language and also the language of instruction at the School).
NOTE: Students enrolling in this unit as part of a major or sub major in Japanese are encouraged to enrol in Japanese 203 at the same time.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** LANG 2031 - Language Communication Skills 2B Japanese LANG 2027 - Japanese 204**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2054/>)**LANG 2055 English Text (10 Credit Points)**

The English Language is always used in context. The contexts in which we use English require us to use the language in specific ways. This unit introduces students to the analysis of English texts in context. Students will learn how to analyse text structure and purpose, and they will learn how to analyse the systems of the English language as they are used to facilitate context specific and context appropriate communication. Working between models of social contexts and the language level systems of English, students will develop a greater level of skill in using English for exposition, explanation, reporting, recounting and narrating.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang2055/>)**LANG 3001 19th Century American Literature (10 Credit Points)****Legacy Code:** 101796

This unit focuses on literature from the American Renaissance through to the end of the Civil War. Issues to be examined will include some of the following: the construction of a national literature, the ideology of American Exceptionalism, the tension between the religious and the secular, and the clash between freedom and slavery. Texts may include fiction, poetry and drama.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3001/>)**LANG 3002 20th Century American Literature (10 Credit Points)****Legacy Code:** 102099

This unit explores twentieth century American literature. Issues to be examined include some of the following: the construction of a national literature, struggles for justice and human rights, the intersection of race, gender and sexuality, the ideology of American Exceptionalism, the rise and fall of 'The American Dream', place and time in American literature. A range of text types will be taught.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYA 0895 - American Literature LGYA 0671 - Classic American Literature LGYA 0672 - Modern American Literature LGYA 0527 - American Literature**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3002/>)**LANG 3003 Accreditation Studies (UG) (10 Credit Points)****Legacy Code:** 101943

This is a compulsory unit in the Bachelor of Arts (Interpreting and Translation) and the Bachelor of Arts (Interpreting and Translation) Dean's Scholars. It aims to provide practice and constructive feedback to students preparing for the accreditation examination. A pass in the unit in at least one of the following options: Interpreting, Translation into English, or Translation from English, with a minimum mark of 70%, will make students eligible for NAATI accreditation on completion of the rest of the requirements of the course.

This is the first of a series of two units that aim to provide a thorough review of comprehension, speaking, reading and writing skills, as well as grammar and vocabulary of Modern Standard Arabic, its range of registers and its linguistic characteristics. This unit is intended for students who have knowledge and skills in Arabic equivalent to two years of tertiary education in the language and who wish to consolidate, develop and improve these skills. A range of DELL (Digitally Enhanced Language Learning) Activities are utilised as part of the Blended Learning mode of delivery for this unit.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3009/>)**LANG 3011 Arabic 302 - Arabic Advanced Language and Grammar (10 Credit Points)****Legacy Code:** 100048

This is the second of a series of two units that aim to provide a thorough and more advanced review of comprehension, speaking, reading and writing skills, as well as grammar and vocabulary of modern Standard Arabic, its range of registers and its linguistic characteristics. This unit is intended for students who have knowledge and skills in Arabic equivalent to Arabic 301 and who wish to consolidate, develop and improve these skills. This unit is mandatory for students who wish to pursue a specialisation in Arabic.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3011/>)**LANG 3012 Arabic 303: Advanced Writing Skills (10 Credit Points)****Legacy Code:** 100049

This unit is aimed at those who have successfully finished 100044 - Arabic 202, or have an advanced speaking and writing proficiency in Modern Standard Arabic. It is one of the obligatory units for students intending to graduate with Arabic as a major or sub-major. It seeks to develop the writing skills to prepare students to make professional use of the language, and it is particularly recommended for those who wish to involve themselves in areas such as language teaching and translation. Students will be introduced to a full range of text types and language purposes. They will be guided to analyse, interpret and evaluate passages provided, and will be encouraged to extend their ability by experimenting with a variety of writing styles.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3012/>)**LANG 3013 Arabic 304: Arabic Advanced Speaking (10 Credit Points)****Legacy Code:** 100050

This is an advanced Arabic unit for students undertaking a major in Arabic or the Bachelor of Arts (Interpreting & Translation) (Arabic stream). As a companion unit of Arabic 303 (Advanced Writing Skills), it aims at preparing students to make a professional use of the language, in this case by placing particular emphasis on oral skills, and it is also specially recommended for those wishing to pursue careers in areas such as language teaching, interpreting and translation. Students will be introduced to a full range of oral text types and language purposes. They will be guided to analyse, interpret and evaluate examples of oral discourse, and be encouraged to develop effective public speaking skills.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3013/>)**LANG 3014 Arabic 306: Arabic Novel and Short Story (10 Credit Points)****Legacy Code:** 100052

This is an optional unit in the Arabic major program, which aims to introduce students to the study of the Arabic novel and short story, and which examines the historical, political, social and cultural context that this literature reflects. This will be done by studying selected novels and short stories. Students will be able to do a research component on a novel of their choice. This unit will also examine children's literature, including traditional children stories and contemporary Arabic literature, as well as translated western traditional stories.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3014/>)

LANG 3015 Arabic 308: Language Past and Present (10 Credit Points)**Legacy Code:** 100054

This unit aims to give students an understanding of the phonological, morpho-syntactic, semantic and pragmatic changes that have occurred to the Arabic language both spoken and written in the last century. Particular attention will be paid to the different dialects spoken in some of the Arab countries and their relation to Modern Standard Arabic. A special study will be made of the Australian Arabic used by migrant communities.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3015/>)**LANG 3016 Bilingualism and Biculturalism (10 Credit Points)****Legacy Code:** 101449

Bilingualism and biculturalism are important aspects of life in Australia: many Australian residents are, were, or could be, bilingual and/or bicultural. This unit aims to give students an understanding and appreciation of the most important facets and manifestations of bilingualism and biculturalism, in the linguistic, cognitive, personal, societal and educational spheres, particularly with regard to the Australian context. It also aims to show students how this unit relates to broader studies in education, humanities, linguistics, and social sciences.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYB 2371 - Bilingualism and Biculturalism**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3016/>)**LANG 3018 Children's Literature: Image and Text (10 Credit Points)****Legacy Code:** 101626

This unit focuses on the interrelationships between image and text in children's literature. The unit examines both picture books and other image-based children's texts, including electronic texts and graphic novels. The unit will examine children's texts as cultural artefacts, theories of visual literacy and how image and text combine to create meaning. Students will have the opportunity to create their own picture book for their final project.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3018/>)**LANG 3019 Children's and Young Adult Fiction (10 Credit Points)****Legacy Code:** 102205

This unit explores a wide range of fictional texts created for children, teenagers and young adults from folktales, fairytales and myths to contemporary examples. It focuses on the relationship between young people, the texts created for them and the cultures in which these texts are produced and read. The unit will examine a variety of genres and themes, for example, the experience of childhood as constructed by adult authors of children's texts; post-colonial children's literature; the emergence and development of distinctly Australian children's texts; the development of young adult literature; the impact of new technologies on children's literature; and role of art in children's literature.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LANG 3017 - Children's Literature**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3019/>)**LANG 3020 Chinese 301 (10 Credit Points)****Legacy Code:** 101951

This is an advanced Level 3 unit within the Chinese major program, designed for students who have acquired an intermediate level of proficiency, and who wish to consolidate and improve their language proficiency and understanding of Chinese culture. It further develops students' proficiency in both spoken and written Chinese, and enhances their comprehension of Chinese language, culture and society. Students are encouraged to express their own opinions in a wide range of social and cultural contexts. Interactive lecture/tutorials, online activities and authentic materials are used to facilitate a positive learning experience.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LANG 3058 - Languages and Grammatical Concepts 3A Chinese**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3020/>)**LANG 3021 Chinese 302 (10 Credit Points)****Legacy Code:** 100063

This unit further develops the language skills and cultural understanding students already have or have acquired through Chinese 101-301, with an emphasis on oral expression, reading, writing and research skills. It enhances students' ability to interact in both spoken and written Chinese in various situations and ability to research and express their views on Chinese social and cultural issues. Authentic materials are used as much as possible in order to deepen students' understanding of the Chinese language, culture and society, and improve their ability to interact in various settings.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3021/>)**LANG 3022 Chinese 303: Twentieth-Century Chinese Literature (10 Credit Points)****Legacy Code:** 100064

This unit introduces students to modern and contemporary Chinese literature in the Chinese language. It includes a brief overview of Twentieth-century Chinese literature, and exposes students to a variety of literary genres. Students are expected to work individually and in groups in order to analyse, evaluate and critique these works, whose social and cultural context is integral to understanding them. This process will not only increase students' understanding and appreciation of Twentieth-century Chinese literature, but it will also develop their critical thinking skills.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3022/>)

LANG 3023 Chinese 304: Chinese Classical Literature (10 Credit Points)**Legacy Code:** 100065

This unit introduces students to Chinese classical literature in the Chinese language. It includes a brief overview of Chinese classical literature and exposes students to the prose, poetry, drama and fiction genres of Chinese classical works from the Han dynasty to the Qing dynasty. Through selected readings, students will gain some knowledge of the stylistic and linguistic features of classical prose and develop skills in reading classical Chinese. Students will also develop an understanding of the Chinese literary tradition and an appreciation of the continuing relevance of classical Chinese in contemporary China.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3023/>)**LANG 3024 Chinese 305: Chinese Cinema (10 Credit Points)****Legacy Code:** 100066

This unit offers a brief review of Chinese film and introduces some of the best Chinese-language productions of the last two decades from mainland China and Taiwan. Students will be required to work individually and in groups to critique the social and moral issues raised in these films. They will also consider the historical context from which these films emerged. This process will develop a deeper understanding of Chinese society and the lives of Chinese people of different eras. It will also enhance students' appreciation of Chinese cultural identity and moral values.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3024/>)**LANG 3025 Chinese 306: Traditional Chinese Thought (10 Credit Points)****Legacy Code:** 100510

This unit is a thematic unit in the BA Key Program Languages and the BA Interpreting and Translation. It is part of the Chinese major or sub-major and can also be taken as an elective. It introduces students to Chinese thought and way of life - the Confucian-Daoist tradition. Students will explore how China's ancient wisdom shapes its long resilient civilization and how it helps the nation maintain its cultural identity while it exerts an international influence on today's world. Students will read selected works of prominent Chinese thinkers in the original or English versions. This unit will be conducted in Chinese and English.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3025/>)**LANG 3026 Chinese 307: The Cultural Context of China (10 Credit Points)****Legacy Code:** 100067

This unit provides a brief overview of Chinese culture and examines the cultural interchanges of which it has been a part throughout history. Students will analyse the effects of these cultural contacts, both positive and negative. They will also evaluate and critique relevant cultural issues, from a comparative perspective. This process will increase students' understanding of the cultural identity of China, and it will also enable them to appreciate the importance of outside cultural influences, thereby reinforcing an open and mature attitude towards multiculturalism. The unit will be conducted in Chinese.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3026/>)**LANG 3027 Creative Non-Fiction (10 Credit Points)****Legacy Code:** 100856

This unit provides students with an advanced understanding of the issues, processes and practical questions involved in the writing of creative non-fiction. It is intended that students will gain both enhanced theoretical knowledge of writing practices and, through workshop participation and practical exercises, develop both their own writing skills and the ability to critique the writing of others on the basis of sound understanding of the characteristics of the genre.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYB 6564 - Texts and Techniques**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3027/>)**LANG 3028 Crime Fiction (10 Credit Points)****Legacy Code:** 102315

This unit will introduce students to a variety of texts drawn from the history of crime fiction; including the classic detective story, the Golden Age mystery, US 'Hard Boiled' fiction, the police procedural, and the literary crime novel. Students will develop their knowledge of theories of genre, specifically its formation and evolution, and its implications for the process of making meaning. They will learn about the changing place of crime fiction within the English literary canon, exploring the genre's relationship to questions of artistic value, the distinction between high and low culture, and the differences between literary and popular fiction.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3028/>)

LANG 3029 Culture, Discourse and Meaning (10 Credit Points)**Legacy Code:** 102185

In Culture, Discourse and Meaning students explore our culture by looking closely at how we make and share meaning. You look at how power operates by supporting and promoting some ideas and ways of life but not others. In Culture, Discourse and Meaning you also consider how students might change our culture. In your work in the unit, you will develop analytical, interpretive, and critical skills for culture analysis. Through project-based work, students will develop the capacity to analyse and critique the production and operations of power and consider changes in cultural practice.

Level: Undergraduate Level 3 subject**Incompatible Subjects:** COMM 2045 - Critical Discourse Analysis**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3029/>)**LANG 3030 Discourse Analysis (10 Credit Points)****Legacy Code:** 101946

This unit explores language at the discourse level, introducing different linguistic approaches used in the analysis of discourse. It provides a general overview of major theoretical frameworks and current issues in discourse analysis. It examines authentic spoken and written examples, and demonstrates how discourse analysis is relevant to other disciplines such as media and communication, education, cultural and gender studies, and so on.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LANG 1014**Equivalent Subjects:** LANG 3085 - Text and Discourse in English**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3030/>)**LANG 3031 Discovering language: Everything you've ever wanted to know but never asked (10 Credit Points)****Legacy Code:** 102625

Why can any child learn any language? How come there are so many languages on this planet? What is the most difficult language? What happens to us if we speak more than one language? There are plenty more questions about language that we all have and this unit is all about asking and finding out about language in an engaging way. Students will learn how to ask questions about language and what research can tell us in answering them. The unit will equip students with the tools to investigate many aspects of language as a defining feature of humans.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LANG 1014**Equivalent Subjects:** LANG 3070 - Research Methods in Linguistics**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3031/>)**LANG 3033 Film and Drama (10 Credit Points)****Legacy Code:** 100866

This unit offers a survey of one or more of the following: drama, drama on film and film drama. It will examine key concepts in cinema theory, dramatic form and film production. Comparison may be made between theatre texts and film adaptations related to the work of specific dramatists; or drama texts may be considered in themselves (often with the screening of filmed versions of these dramas). Alternatively, film itself will be considered as a distinct dramatic form whose contours will be traced in relation to the work of important directors. Viewing films will form an integral part of this unit and students will be expected to attend screenings of films as well as a lecture and tutorial.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3033/>)**LANG 3034 Historical Linguistics (10 Credit Points)****Legacy Code:** 102043

This unit provides an introduction into the study of language change. It discusses fundamental questions such as how and why languages change, how we can investigate and theoretically capture language change, as well as how language change is connected to sociocultural change with special focus on the linguistic habitat of Australia.

LANG 3043 Indonesian 305: Past and Present of Indonesian (10 Credit Points)**Legacy Code:** 102331

This is an advanced (Level 3) unit in the Indonesian Specialisation, which should ideally be undertaken after Indonesian 301 and Indonesian 302. The unit provides an overview of the history of the Indonesian language and its relation to the languages of neighbouring countries. Students will learn how Indonesian has developed as a standard language and how its spelling, lexicon and syntactical structures have changed over history.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3043/>)**LANG 3044 Indonesian 306: Indonesian Literature (10 Credit Points)****Legacy Code:** 102332

This is an advanced (Level 3) unit in the Indonesian Specialisation, which should ideally be undertaken after Indonesian 301 and Indonesian 302. The unit introduces students to Indonesian literature through a historical review and reading and analysis of samples of literary works. Students will analyse and discuss the stylistic features of the works studied as well as the social and cultural aspects reflected in them.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3044/>)**LANG 3045 Intercultural Communication (10 Credit Points)****Legacy Code:** 101950

This unit aims to develop the communicative competence of students in intercultural contexts and raise their awareness of issues in the use of languages. It helps the students understand hidden socio-cultural dimensions and equips them with the knowledge and skills necessary for intercultural communication. It also prepares them to critically analyse linguistic and cultural differences around them, appreciate linguistic and cultural diversity, and integrate the unit contents into their future careers. The impact of intercultural communication is highlighted in a range of real-life sectors, such as second language teaching and learning, translation and interpreting services, international business, tourism, community services, and organisational communication. Lectures will be delivered in English and depending on demand, language-specific tutorials will be delivered in Arabic, Chinese, Indonesian and Japanese as well as English.

This unit is a capstone unit for the relevant Interpreting and Translation award, and is aimed at assisting students in their transition from interpreting and translation trainees to successful professional interpreters and translators. It provides students with the opportunity to participate in practical aspects of the Interpreting and/or Translation professions and related fields, as well as to undertake supervised practice in the workplace. Students will complete the practical work relevant to their field of specialisation, i.e., Interpreting, Translation or both. Together with 102550 Preparation for NAATI Certification UG it helps students prepare for the NAATI Certification test to be undertaken when they finish this course.

The focus of this online unit is the language of literature and the craft of writing. The unit explores the rhetorical or figurative dimension of language across literary and non-literary texts. Students analyse a range of short texts - mostly passages from novels and poems - with an eye to the formal basis of their effects. Through recorded lecture pods and online exercises, students are introduced to the basic tools of stylistic analysis, including narrative analysis, metaphorical analysis and critical discourse analysis.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3050/>)**LANG 3051 Japanese 301 (10 Credit Points)****Legacy Code:** 101952

This is a Level 3 unit within the Japanese major program, intended for students who have successfully completed Japanese 202 or have acquired equivalent knowledge. It enhances students' comprehension of and ability to use new grammatical structures, expressions, interaction strategies and Kanji characters. In addition to improving the four primary language skills and ability needed for working in Japan or with Japanese people, this unit aims to advance students' knowledge of the modern Japan through the recommended texts and class discussions. Note: This unit is not suitable for native speakers.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYA 1583 - Languages and Grammatical Concepts 3A Japanese**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3051/>)

LANG 3052 Japanese 302 (10 Credit Points)**Legacy Code:** 100092

After covering basic Japanese grammar in previous units, this unit is designed to further improve and extend students' competence in Japanese. It enhances students' knowledge and comprehension of Japanese, and develops their ability to apply this knowledge and comprehension to written and spoken Japanese. In addition to the language skills, this unit covers further aspects of Japanese culture through the recommended texts and class discussions. Note: This unit is not suitable for native speakers.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3052/>)**LANG 3053 Japanese 303: Contemporary Culture and Society (10 Credit Points)****Legacy Code:** 100093

This unit aims to provide students with a valuable insight into modern Japanese culture and society via learning the language at an advanced level. In this unit, students will further enhance their four skills in the language with a focus on listening and speaking.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3053/>)**LANG 3054 Japanese 304: Discourse in Japanese (10 Credit Points)****Legacy Code:** 101970

This unit is designed to enable post-intermediate students of Japanese to learn and practice spoken Japanese at an advanced level. Students will explore Japanese discourse styles and discourse strategies in a range of situations, registers and levels of formality. In addition to the essential readings, materials drawn from educational videos, feature films, television dramas, news programs and language corpus will be used for class discussions and as data for analysis.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYA 0082 - Japanese 304 Discourse in Japanese**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3054/>)**LANG 3055 Japanese 305: Advanced Reading and Writing (10 Credit Points)****Legacy Code:** 101971

Students in this unit will further develop their competency in Japanese with a focus on reading and writing at an advanced level. The unit content is organised around communicative and cultural themes on Japanese society. To expose students to authentic language use, reading materials of different genres are selected from Japanese newspapers, magazines, Japanese language corpus and the internet. Acquisition of Kanji is accelerated through reading and writing tasks.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3055/>)**LANG 3056 Japanese 306: Japanese Popular Culture (10 Credit Points)****Legacy Code:** 102219

This unit aims to reinforce the Japanese language in all four skills: speaking, listening, reading and writing, via the medium of Japanese popular culture, e.g. manga, anime, Japanese drama and/or J-pop, by exploring and analysing culturally and linguistically specific issues of the language, e.g. address terms and taking turns. Students will explore natural Japanese text and speech in both casual and formal styles at an advanced level, as well as increase their knowledge and understanding of Japanese popular culture.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3056/>)**LANG 3057 Languages and Grammatical Concepts 3A: Arabic (20 Credit Points)****Legacy Code:** 101709

This is an advanced Level 3 language and linguistics unit for students of modern Arabic. Lectures for the grammatical concepts component are held in English for students of all languages while other activities are language-specific. The aim of the unit is twofold. On the one hand it aims, to develop a practical and theoretical understanding of the ways in which major concepts used in everyday speech and writing are mapped and organized in the lexicon and the grammar of human languages, and how these forms develop in learners and users. On the other hand, it aims to develop advanced comprehension and production skills in Arabic language, including higher stages optional structures, through critical examination of contemporary and historical text and discourse samples from a variety of registers. An understanding of contemporary Arab culture and society is also fostered through comparative research projects on specific cultural, social and/or linguistic, aspects that are of interest to students. A range of CALL (Computer Assisted Language Learning) activities are utilised for this unit.

Level: Undergraduate Level 3 subject**Incompatible Subjects:** LANG 3010 - Arabic 301 LGYA 1259 - Languages 303 Grammatical Concepts Across Languages**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3057/>)

LANG 3058 Languages and Grammatical Concepts 3A: Chinese (20 Credit Points)**Legacy Code:** 101710

In 2013 this unit replaced by 101951 - Chinese 301. This is an advanced Level 3 language and linguistics unit for students of modern Chinese. Lectures for the grammatical concepts component are held in English for students of all languages while other activities are language-specific. The aim of the unit is twofold. On the one hand it aims, to develop a practical and theoretical understanding of the ways in which major concepts used in everyday speech and writing are mapped and organized in the lexicon and the grammar of human languages, and how these forms develop in learners and users. On the other hand, it aims to develop advanced comprehension and production skills in Chinese language, including higher stages optional structures, through critical examination of contemporary and historical text and discourse samples from a variety of registers. An understanding of traditional and contemporary Chinese culture and society is also fostered through comparative research projects on specific cultural, social and/or linguistic, aspects that are of interest to students. A range of CALL (Computer Assisted Language Learning) activities are utilised for this unit.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LANG 3020 - Chinese 301**Incompatible Subjects:** LGYA 0055 - Chinese 301 LGYA 1259 - Languages 303 Grammatical Concepts Across Languages**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3058/>)**LANG 3059 Law, Literature and Culture (10 Credit Points)****Legacy Code:** 102416

This unit explores the common origin of law and literature in rhetoric, narrative, interpretation, and culture. Students will study literary representations of justice, violence and morality and explore an interpretive understanding of the law. Core unit texts will usually be drawn from 19th century world literature to the present, though Film and Television texts may also be selected for analysis.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3059/>)**LANG 3060 Legal Interpreting (UG) (10 Credit Points)****Legacy Code:** 100196

Legal interpreting is a highly complex process that requires specialised training in interpreting techniques, litigation tactics, legal language and the legal system. This unit is a compulsory unit for students in the BA (Interpreting and Translation) course. It can also be offered to practising interpreters who wish to improve and perfect their knowledge and skills in legal interpreting. It aims to provide students with the theoretical background and the opportunity to develop the interpreting skills necessary to operate at the NAATI professional level as a court interpreter. Lectures are held in English for students of all languages. The tutorials are language specific in Arabic, Japanese, Mandarin and Spanish.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LANG 1017**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3060/>)**LANG 3061 Literary Animals (10 Credit Points)****Legacy Code:** 101724

This unit explores a selection of literary works that invite us to examine the tenuous border separating the "human" from the "non-human." Readings will allow students to learn how literary texts employ various formal techniques (allegory, anthropomorphism, etc.) that call into question the conventional opposition between human and animal. Particular attention will be given to the intersection of animality, race, gender, and sexuality. Readings may include one or more national literatures, such as American or Australian literature.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3061/>)**LANG 3062 Literature and Philosophy (10 Credit Points)****Legacy Code:** 100875

This unit will examine ways in which literature and philosophy interact. It will consider the ways in which literature and philosophy offer important and different ways of thinking. And it will consider the differences between literature and philosophy. Literature will be understood to involve thinking through sensations, while philosophy will be understood to involve thinking through concepts. The unit will examine examples of interaction between literary texts and philosophical texts, considering how literary effects can inhabit philosophical texts and philosophical ideas can permeate literary texts. The unit will consider frequently occurring themes within both literature and philosophy, such as ethics (ways of living and acting).

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3062/>)**LANG 3065 Medical Interpreting (UG) (10 Credit Points)****Legacy Code:** 100197

This unit aims to develop students' skills in interpreting at the professional level (formerly NAATI Level 3) through the modes of dialogue interpreting, consecutive interpreting, simultaneous interpreting, and sight translation in the domain of health services. Lectures are held in English for students of all languages. The tutorials are language specific in Arabic, Japanese, Mandarin and Spanish.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3065/>)

LANG 3066 Postcolonial Literatures: Partition, Dependence and Exile (10 Credit Points)**Legacy Code:** 102434

This unit introduces the postcolonial literatures that emerged in the wake of decolonisation in the second half of the twentieth century. We will read literary works from across the postcolonial world, including from the Middle East, South and South-East Asia, Africa, the Caribbean and Australia, and look at the way in which writers contended simultaneously with the legacy of the colonial system and major historical crises that emerged in the wake of its collapse. We will trace the emergence of the postcolonial reality as writers registered the impact of partition, separatism, persistent dependency, and the large-scale movements of people to the first world, whether as migrants or refugees. Alongside the literature, we will read major works of postcolonial theory: one of the most influential intellectual movements in recent history.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3066/>)**LANG 3067 Preparation for NAATI Certification (UG) (10 Credit Points)****Legacy Code:** 102550

This is a compulsory unit in the Bachelor of Arts (Interpreting and Translation) and the Bachelor of Arts (Interpreting and Translation) Dean's Scholars courses. It aims to provide practice and constructive feedback to students preparing to sit the external NAATI certification examinations.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LANG 1013 AND

LANG 1017

Co-requisite(s): LANG 3049**Equivalent Subjects:** LANG 3003 - Accreditation Studies (UG)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3067/>)**LANG 3068 Race in Literature (10 Credit Points)****Legacy Code:** 101650

This unit explores a selection of modern literary works that focus on the question of "race." Readings will allow students to learn how notions of race have shifted over time, giving particular attention to how mixed-race people challenge dyadic conceptions of racial difference. Readings may include one or more national literatures, such as American or Australian literature.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3068/>)**LANG 3069 Reading Ireland in the 1990s: Fiction, Poetry, Drama (10 Credit Points)****Legacy Code:** 102078

'Reading Ireland in the 1990s' is a level 3 unit within the English and Creative Writing Majors/Sub-Majors. This unit examines a range of Irish writing across several different genres - fiction, poetry and drama published during the 1990s. It will provide an opportunity for students to read and study in detail a variety of texts that assert new directions in Irish literary culture. Students will be asked to consider the ways in which these texts ask questions of national and personal self-definition in the face of Ireland's new political developments both north and south of the border, as well as attempt to analyse and understand contemporary Irish consciousness.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3069/>)**LANG 3071 Second Language Acquisition (10 Credit Points)****Legacy Code:** 101451

This unit is designed for students who are interested in understanding how a second language is learned. It examines learning in both natural or classroom contexts as well as language development in child and adult learners. Students are introduced to current theories of Second Language Acquisition, as well as current research and its applications to the classroom or the translation process. Students will conduct a small research project to become familiar with the process of learning a second language and some basic research notions and techniques.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYB 1999 - Second Language Acquisition**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3071/>)**LANG 3072 Short Fiction in the Americas (10 Credit Points)****Legacy Code:** 101791

This unit surveys short fiction written in the Americas in English, French, Spanish and Portuguese during the twentieth century. It examines the history of short fictional genres, theories of their functioning, and the ways in which they register and transmit the various national and regional cultures of the Americas. The unit allows students majoring in Spanish to undertake language-specific assessment tasks (reading original texts in Spanish and writing their essay in Spanish) while other students read the texts and complete their assessment tasks in English.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3072/>)

LANG 3073 Sociolinguistics (10 Credit Points)**Legacy Code:** 101450

This unit is designed to develop students' interest in language and society and give them an understanding and appreciation of variation in language (accents, dialects) and language change, language planning, as well as the interdependent relationship between language learning, communicative competence and cultural practices, both in the Australian context and also in a more global context. It also aims to show students how this unit fits in with other language and linguistics-related disciplines, e.g. Linguistics, Bilingualism and Biculturalism, Second Language Acquisition.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LANG 1023 - Sociolinguistics**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3073/>)**LANG 3074 Spanish 301 (10 Credit Points)****Legacy Code:** 101953

This unit is a Level 3 component of the Spanish major. It is intended for students who have already acquired a high intermediate level of proficiency and who wish to consolidate and improve this proficiency. It enhances students' knowledge and comprehension of Spanish grammar, and develops their ability to apply such grammatical knowledge in their spoken and written language.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYA 1585 - Language and Grammatical Concepts 3A Spanish**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3074/>)**LANG 3075 Spanish 302 (10 Credit Points)****Legacy Code:** 101954

This unit is a level 3 component of the Spanish major which extends the skills acquired in Spanish 301. It develops in students an advanced mastery of Spanish grammar, and develops their ability to apply this grammatical knowledge in oral and written communication. In addition to the language skills, this unit covers further aspects of Spanish culture through the recommended texts and class discussions.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** LGYA 1585 - Languages and Grammatical Concepts 3A Spanish**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3075/>)**LANG 3076 Spanish 303: Advanced Writing Skills (10 Credit Points)****Legacy Code:** 100153

This unit aims to develop the writing skills to prepare them to make professional use of the language. It is particularly recommended for those who wish to involve themselves in areas such as language teaching and translation. Students will be introduced to a full range of text types and language purposes. They will be guided to analyse, interpret and evaluate passages provided, and will be encouraged to extend their ability by experimenting with a variety of writing styles.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3076/>)**LANG 3077 Spanish 304: Advanced Speaking Skills (10 Credit Points)****Legacy Code:** 100154

As a companion unit to Spanish 303: Advanced Writing Skills, this unit aims to prepare students to make professional use of the language, in this case by placing particular emphasis on oral skills. It is also specially recommended for those wishing to pursue careers in areas such as language teaching and translation. Students will be introduced to a full range of oral text types and language purposes. They will be guided to analyse, interpret and evaluate examples of oral discourse, and encouraged to develop effective public speaking skills.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3077/>)**LANG 3078 Spanish 305: Contemporary Literature (10 Credit Points)****Legacy Code:** 100155

This is a compulsory unit for students of the BA (Interpreting and Translation) (Spanish), and one of the optional units for students with advanced language skills in Spanish enrolled in the BA. It aims to introduce students to the study of contemporary Hispanic literary works so that they may acquire an appreciation of contemporary Latin American and Spanish literature and an understanding of the historical, political and social contexts in which that literature developed.

Emphasis will be placed on the writer's role as an interpreter and critic of society.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3078/>)**LANG 3079 Spanish 306: Contemporary History (10 Credit Points)****Legacy Code:** 100156

This unit aims to introduce students to the history of Spain and Latin America in the Twentieth century to enable them to understand the historical background to present-day events, and to identify the major contemporary policy issues in these regions of the world.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3079/>)**LANG 3080 Spanish 307: Classical Literature (10 Credit Points)****Legacy Code:** 100157

This unit provides an introduction to the social and cultural history of Spain of the Sixteenth and Seventeenth centuries, and to the principal literary monuments of this period. The unit is based on the study of selected representative texts and appropriate background readings.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3080/>)

LANG 3081 Spanish 308: Spanish Sociolinguistics (10 Credit Points)**Legacy Code:** 100158

This unit aims to give students an understanding of the phonological, morpho-syntactic, semantic and pragmatic changes in the Spanish language as spoken and written at the start of its second millennium. Particular attention will be paid to the dialectal geography of the Hispanic world, and to the problems faced by the language today, with particular reference to its 'Spanglish' version in emigre communities in the United States and Australia, and to information technology.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3081/>)**LANG 3082 Special Study in Languages and Linguistics (10 Credit Points)****Legacy Code:** 100201

This Level 3 Languages and Linguistics unit is, primarily, a self-study unit designed to cater for a special area of interest in languages and linguistics not otherwise covered in the units on offer in the languages program or in the BA (Interpreting and Translation) and/or where the student may otherwise find it difficult to complete his or her program of study. Once the topic chosen by the student is approved by the Unit Coordinator a supervisor is nominated and an individually-tailored learning contract, including appropriate language-specific and/or linguistics readings and tasks, is drawn up in collaboration with the supervisor and is submitted to the Unit Coordinator for approval. This approval process should happen, ideally, at least one week prior to the beginning of the teaching semester.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3082/>)**LANG 3083 Specialised Translation (UG) (10 Credit Points)****Legacy Code:** 100198

This unit explores the functional, discursive, rhetorical, syntactic, semantic and lexical features of texts in the following specialised fields: tourism, news media, legal texts, technical & scientific materials. Knowledge of the functions and textual features of specialised texts will provide a basis for translating these specialised texts from and into English. Students will analyse the texts in both languages, and discuss ways in which the texts are to be translated. The unit will be available, depending on sufficient demand, for Arabic, Japanese, Mandarin and Spanish.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3083/>)**LANG 3084 Text Analysis for Translation (UG) (10 Credit Points)****Legacy Code:** 102523

The unit provides support for students in the BA (Interpreting and Translation) program to develop their analysis skills of the texts they will confront in their translation work. It is a bilingual unit, that is texts in both English and the respective Language Other Than English will be analysed to reveal the structures of meaning and linguistic and contextual features of the texts. It encourages close readings of source texts, understanding where extra-textual knowledge is relevant, and identifying essential meaning components underlying surface linguistic features.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3084/>)**LANG 3086 The Novel (10 Credit Points)****Legacy Code:** 100893

This unit explores the status and success of the novel as the dominant modern literary form. It examines aspects of the history and development of the novel from the seventeenth century up to the present, along with a range of novelistic texts from one or a number of literary traditions: from classic British and/or American texts to contemporary postcolonial fiction; from the search for the mythical "great Australian novel" to famous and not-so-famous works in languages other than English.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3086/>)**LANG 3087 Women's Writing (10 Credit Points)****Legacy Code:** 102374

This unit focuses on the study of women's writing from a broad social and cultural context. While the women writers will change from offering to offering, the content will remain centred on feminist theory and discourses of race, ethnicity, class and gender. The unit will draw on a variety of genres including drama, fiction, poetry, essay and short story. Students will explore women's concerns about motherhood, marriage, violence and domesticity; cultural identity, vocation and the body as (sexual) object. They will also explore women's experiences of madness and victimisation; segregation and alienation; power/lessness and the public sphere.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3087/>)**LANG 3089 World Literature in Translation (10 Credit Points)****Legacy Code:** 101669

This unit examines representative works of world literature written in languages other than English in order to address a range of literary and cultural issues, including the role of translation in crosscultural communication.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3089/>)

LANG 3091 Writing and Society (10 Credit Points)**Legacy Code:** 101670

This unit explores the social dimensions of literature, both generally, by considering the role played by tradition, authorship, genre and style in the literary exploration of values, and in specific terms, through a close examination of works which have had an important social impact in their time, including those in translation, from a range of contemporary literatures. The lecturers are members of the Writing and Society Research Group, many of whom are practising authors.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3091/>)**LANG 3093 Advanced Standing for LOTE 320 (0 Credit Points)****Legacy Code:** 102715**Level:** Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang3093/>)**LANG 3094 The Value of Literature (10 Credit Points)****Legacy Code:** 102765

This unit explores the value of literature by examining its competing uses in a range of historical contexts down to and including our own. Literature's potent combination of pleasure and instruction embraces conflicting personal, ethical, political, social, and ideological uses even as it resists them. The unit brings a comparative focus to bear on texts from diverse historical and cultural settings as a way of reflecting on and rediscovering the value of literature in the digital age. Students will also explore the function of criticism to educate the individual sensibility and shape the cultures of public life. Primary texts include poems, narrative fiction, essays, and may include drama, film, and other audiovisual material.

LANG 7020

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7004/>)**LANG 7005 Bilingualism and Education (10 Credit Points)****Legacy Code:** 102525

Bilingualism and Biculturalism are important aspects of life in Australia. Throughout much of the world, bi-multilingualism is the norm for both children and adults. This unit aims to give students an understanding and appreciation of the most important facets and manifestations of bi-multilingualism and bi-multiculturalism, in the linguistic, cognitive, personal, societal and educational spheres. It also aims to show students how this unit relates to broader studies in education, humanities, linguistics, and social sciences. This unit equips students with current research theories and methods in working effectively in early childhood and primary education, language teaching and other workplaces in bi-multilingual and bi-multicultural contexts.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7005/>)**LANG 7006 Business Interpreting (10 Credit Points)****Legacy Code:** 101868

The unit builds student skills in different settings of business interpreting, from formal business meetings to on-site work in production units to business social activities. Interpreting skills are honed through practice utilising live, media and internet input. The unit also examines the complexity of the interpreter's role and the interrelationship between business ethics and interpreting ethics when interpreters function as members of a business team.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** LANG 7020**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7006/>)

LANG 7007 Community and Social Services Translation (PG) (10 Credit Points)**Legacy Code:** 101845

This unit aims to develop skills in Community Translation (also known as Public Service Translation), which focuses on facilitating written communication between public services and community members who do not have a good command of mainstream language(s). The aim of the unit is for students to develop skills in producing target texts in styles appropriate to specific groups and communities, and to the content and function of the source text. The unit also aims to develop skills in researching and using appropriate specialist terminology, editing and revising, and producing camera-ready documents. On the basis of these skills, the unit is to further develop students' ability to reflect upon translation in terms of strategies and appropriateness in relation to the target audience as well as make critical written and oral assessment of relevant translations. The unit will be available, depending on sufficient demand, for Arabic, Japanese, Mandarin, Spanish, Korean, Persian and Vietnamese.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYB 3387 - Community Translation LGYA 0966 - Community Translation PG**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7007/>)**LANG 7008 Conference Interpreting (10 Credit Points)****Legacy Code:** 102167

Conference Interpreting is a highly complex activity which requires a high level of bilingualism, expertise in a variety of interpreting skills and knowledge of specialised discourse and contextual issues that relate to international fora. This unit aims to introduce students to the theory and practice of Conference Interpreting. The theoretical concepts that underpin Interpreting will be taught and become the basis for all practical work.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYB 3386 - Conference Interpreting LGYA 0965 - Conference Interpreting LGYA 1423 - Conference Interpreting 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7008/>)**LANG 7009 Contexts of TESOL (10 Credit Points)****Legacy Code:** 102335

This unit introduces students to the field of TESOL and to some of the historical, socio-cultural and academic contexts which influence it - adult education, linguistics, intercultural and migration factors, bilingualism studies and new technologies. It provides students with some insight into the key issues in these fields which impact on the teaching and learning of English as a second/foreign language.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** TEAC 7021 - Contexts of TESOL**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7009/>)**LANG 7010 Critical Literature Review (20 Credit Points)****Legacy Code:** 200744

The aim of this unit is to develop skills in applying rigorous analysis and critical assessment to research-based literature in general, through an examination of literature in a particular field. This unit is intended to provide candidates with the basic skills needed to do critical analysis of literature while also enabling them to gain more familiarity with theories, issues, and problems in a particular research area. Literature will be analysed through a balanced and constructive critique of its strengths and weaknesses, providing suggestions for how the work might have been improved.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 8710 - Critical Literature Review**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7010/>)**LANG 7011 Formal and Functional Grammar (10 Credit Points)****Legacy Code:** 102621

This unit invites students to study the grammar of English from two related perspectives, formal grammar and functional grammar. The unit provides students with skills in the use of grammar in application to the analysis of a diverse range of texts. Students will develop an understanding of the structures and the functions of English across contexts. This skilled application will enhance their capacities as teachers of English, understanding how English varies in its use and allowing them to support their own students' skilled use of English across contexts.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LANG 7012 - Functional Grammar LANG 7013 - Functional Grammar**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7011/>)**LANG 7014 Gender and Genre (10 Credit Points)****Legacy Code:** 102602

This unit considers the intersection of gender and genre in various narrative forms. Through a variety of texts that may include polemic, conduct literature, plays, novels, poetry and film, students will examine the construction of masculinity and femininity within various genres, and consider the ways in which genres themselves may be gendered. Beginning in the seventeenth century, the unit also considers the strategies that women writers, in particular, have used to participate in literary production by adopting and adapting particular generic conventions. A consideration of the ways in which gender and genre may be connected also allows students to consider questions of literary production and circulation, literary value and reputation.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7014/>)

LANG 7015 Intercultural Communication (PG) (10 Credit Points)**Legacy Code:** 102338

This unit aims to develop the students' communicative competence in intercultural contexts, raise their awareness of issues in language use and socio-cultural dimensions, and equip them with the knowledge and skills necessary for intercultural communication. It also prepares students to critically analyse linguistic and cultural differences around them, appreciate linguistic and cultural diversity, and integrate the unit contents into their future careers (e.g. further studies or employment). It highlights the impact of intercultural communication in a range of real-life sectors, such as second language teaching and learning, translation and interpreting services, international business, tourism, community services, and organisational communication.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7015/>)**LANG 7016 Interpreting Skills (PG) (10 Credit Points)****Legacy Code:** 102015

This is a pool unit in some postgraduate interpreting and translation courses. The unit is aimed at developing essential skills in interpreting and deals with the specialised technical skills necessary for the different modes of interpreting: dialogue, consecutive, simultaneous, and sight translation. Given the large amount of independent practice needed to develop competence in interpreting, it pays special attention to the teaching of techniques for autonomous learning. Lectures are held in English for students of all the languages available. The tutorials are language specific in Arabic, Japanese, Mandarin or Spanish.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7016/>)**LANG 7017 Interpreting and Translation Professional Practicum (PG) (10 Credit Points)****Legacy Code:** A7456

This unit is a capstone unit for the relevant Interpreting and Translation award, and is aimed at assisting students in their transition from interpreting and translation trainees to successful professional interpreters and translators. It provides students with the opportunity to participate in practical aspects of the Interpreting and/or Translation professions and related fields, as well as to undertake supervised practice in the workplace. Students will complete the practical work relevant to their field of specialisation, i.e., Interpreting, Translation or both. Together with 102562 Preparation for NAATI Certification (PG) it helps students prepare for the NAATI Certification test to be undertaken when they finish their course.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** LANG 7030**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7017/>)**LANG 7020 Introduction to Interpreting PG (10 Credit Points)****Legacy Code:** 101695

This is the core unit for students in postgraduate coursework programs in Interpreting and Translation. It introduces students to translation theory and practice of Interpreting. Lectures are held in English for students of all languages. The tutorials are language specific in Arabic, Japanese, Chinese (Mandarin), Spanish, Korean and Vietnamese.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYB 2089 - Interpreting 1 LGYB 2090 -

Interpreting 2 LGYB 2851 - Introduction to Interpreting

Incompatible Subjects: LANG 7019 - Interpreting and Translation Theory**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7020/>)**LANG 7021 Introduction to Translation PG (10 Credit Points)****Legacy Code:** 101696

This is a core unit for students in postgraduate coursework programs in Interpreting and Translation. It introduces students to the theory and practice of Translation. Lectures are held in English for students of all languages. The tutorials are language specific in Arabic, Japanese, Mandarin, Spanish, Korean and Vietnamese.

Level: Postgraduate Coursework Level 7 subject**Incompatible Subjects:** LANG 7018 - Interpreting and Translation Skills**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7021/>)**LANG 7022 Investigating Second Language Acquisition (10 Credit Points)****Legacy Code:** 100919

This unit is intended for Linguistics Honours students as well as TESOL and Interpreting and Translation Postgraduate students aiming to provide a focused theoretical and research framework in the area of second language acquisition (SLA) from a psycholinguistic viewpoint. This unit widens the theoretical and methodological basis of students intending to undertake further studies and/or research in the Linguistics and SLA area and also serves the TESOL and languages teachers interested in applying SLA-based knowledge to language learning, pedagogy and classroom research.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYB 3375 - Investigating Second Language Acquisition**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7022/>)**LANG 7023 Language and Linguistics Research Methods (10 Credit Points)****Legacy Code:** 101854

This unit aims to help postgraduate students acquire the knowledge and skills to design and carry out a research project in the field of Languages and Linguistics (i.e. Contrastive Linguistics, Sociolinguistics, Language-in-Education Planning, First and Second Language Acquisition, Interpreting and Translation, Discourse Analysis and Descriptive Linguistics). It includes theoretical and practical work in specific areas of research in Languages and Linguistics.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LANG 7024 - Language and Linguistics Research Methods**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7023/>)

LANG 7025 Languages and Linguistics Special Project (10 Credit Points)**Legacy Code:** 101297

This unit provides the opportunity for students in postgraduate Interpreting and Translation and Research Studies programs to undertake an independent research project. The topics for the projects are related to their needs and interests in areas such as languages, linguistics, translation and interpreting studies or teaching related issues.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 0749 - TESOL Dissertation LGYA 0754 - TESOL Internship LGYB 3439 - Languages and Linguistics Dissertation**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7025/>)**LANG 7026 Legal Interpreting (10 Credit Points)****Legacy Code:** 100916

Legal interpreting is a highly complex process that requires specialised training in interpreting techniques, litigation tactics, legal language and the legal system. This unit is a compulsory unit for students in key postgraduate courses in Interpreting and Translation course. It can also be offered to practising interpreters who wish to improve and perfect their knowledge and skills in legal interpreting. It aims to provide students with the theoretical background and the opportunity to develop the interpreting skills necessary to operate at the NAATI professional level as a court interpreter. Lectures are held in English for students of all languages. The tutorials are language specific in Arabic, Japanese, Mandarin, Spanish, Korean and Vietnamese.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYB 3384 - Legal Interpreting**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7026/>)**LANG 7027 Literary Theory (10 Credit Points)****Legacy Code:** 102581

This unit examines a range of theoretical approaches to literature, the majority of which have proliferated since the beginning of the 20th century. These may include: structuralism, poststructuralism, feminism, postcolonialism, psychoanalysis and posthumanism. In presenting this 'contemporary' mode of engaging with literary texts, 'Literary Theory' asks how we might theorise our approach to reading, and how individual texts allow us to theorise the literary in general.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7027/>)**LANG 7028 Literary Translation (10 Credit Points)****Legacy Code:** 100925

This unit aims to develop in students an appreciation of different literary genres in English and in their other language (LOTE) with an emphasis on stylistic and cultural issues to provide a basis for literary translation. The unit will cover literary translation theory and introduce relevant strategies to be applied in practice. The class will be non-language specific, but students will be expected to work from and into their language other than English.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYB 3388 - Literary Translation**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7028/>)**LANG 7029 Medical Interpreting (PG) (10 Credit Points)****Legacy Code:** 100922

This unit aims to develop students' skills and knowledge in interpreting at the Professional level (formerly NAATI Level 3) through the modes of dialogue interpreting, consecutive interpreting, simultaneous interpreting and sight translation in the domain of health services.

Lectures are held in English for students of all languages. The tutorials are language specific in Arabic, Japanese, Mandarin, Spanish, Korean and Vietnamese.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYB 3385 - Medical Interpreting**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7029/>)**LANG 7030 Preparation for NAATI Certification (PG) (10 Credit Points)****Legacy Code:** 102562

This is a compulsory unit in the Master of Interpreting and Translation, Master of Translation and TESOL, Graduate Diploma in Translation and Graduate Diploma in Interpreting courses. It aims to provide practice and constructive feedback to students preparing to sit the external NAATI certification examinations.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** LANG 7017**Equivalent Subjects:** LANG 7001 - Accreditation Studies**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7030/>)**LANG 7031 Second Language Assessment and Testing (10 Credit Points)****Legacy Code:** 101824

This unit introduces students to fields of language assessment and testing in TESOL. It provides students with some insight into the key language components for assessment, assessment design and development. It also equips students with updated knowledge about different assessment approaches which impact on the teaching and learning of English as a second or other language in local and global contexts.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** TEAC 7140**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7031/>)**LANG 7032 Specialised Translation (PG) (10 Credit Points)****Legacy Code:** 100917

This unit explores the functional, discursive, rhetorical, syntactic, semantic and lexical features of texts in the following specialised fields: tourism, news media, legal texts, technical & scientific materials. Knowledge of the functions and textual features of specialised texts will provide a basis for translating these specialised texts from and into English. Students will analyse the texts in both languages, and discuss ways in which the texts are to be translated. The unit will be available, depending on sufficient demand, for Arabic, Japanese, Mandarin and Spanish.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYB 3389 - Specialised Translation**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7032/>)

LANG 7033 TESOL Internship (20 Credit Points)**Legacy Code:** 101698

This is a professional practice unit which consists of an internship in an English language teaching organisation for students of TESOL. It involves participation in the various aspects of the work of the teaching organisation, including a supervised English language teaching practice component for local students. Assessment items facilitate students' self-reflection on their teaching practice and critical evaluation of teaching methods and needs assessment in practice.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** TEAC 7140**Incompatible Subjects:** LGYA 0754 - TESOL Internship**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7033/>)**LANG 7034 TESOL Project (40 Credit Points)****Legacy Code:** 102337

This unit is the final component in the Master of Arts in TESOL course. Equipped with knowledge and research skills developed in previous course components, students undertake independent and guided research activities and propose pedagogical solutions to specific TESOL classroom situations. Students will demonstrate the practical application of this research by undertaking a TESOL project which culminates in a 12,000-15,000 word research report or teaching proposal. Students have the opportunity to research specific TESOL interests in depth. These include, but are not limited to, generic Applied Linguistics, Task-Based Language Teaching, English as a Foreign Language (EFL), Second Language Acquisition, Second or Other Language Maintenance, English for Academic Purposes (EAP), or discrete elements of Pedagogy.

The unit provides support for students in the postgraduate Interpreting and Translation programs to develop their analysis skills of the texts they will confront in their translation work. It is a bilingual unit, that is texts in both English and the respective Language Other Than English (i.e. Spanish, Chinese, Arabic, Japanese, Vietnamese, Korean) will be analysed to reveal the structures of meaning and linguistic and contextual features of the texts. It encourages close readings of source texts, understanding where extra-textual knowledge is relevant, and identifying essential meaning components underlying surface linguistic features.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7035/>)**LANG 7036 Translation Technologies (PG) (10 Credit Points)****Legacy Code:** 101750

This unit aims to equip students with the theoretical and practical knowledge needed to effectively apply information and communication technologies to translation and other language related tasks. It focuses on translation memory and terminology management systems, and on the workflow involved in the handling of multilingual content.

Emphasis is also put on uses of the Internet as a resource tool, and to the principles of controlled language for text to be processed by machine translation (MT). Tutorials will be conducted in a computer lab where students will familiarize themselves with leading computer-assisted translation (CAT) software applications.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang7036/>)**LANG 9001 Higher Degree Research Thesis - Languages and Linguistics (20 Credit Points)****Legacy Code:** 800025**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/lang9001/>)

Law (LAWS)

LAWS 1001 Enterprise Law (10 Credit Points)**Legacy Code:** 200909

This is an introductory law unit designed to introduce the fundamentals of law in a commercial context. The unit introduces students to the basic principles of law and the legal system as well as examining some of the major areas of law that impact on commercial dealings. This unit examines the legal system, the way law is made and the main areas of law relevant to starting and running a business including contracts, negligence and consumer protection.

Level: Undergraduate Level 1 subject

Equivalent Subjects: LGYA 9864 - Introduction to Legal Principles
LAWS 1004 - Introduction to Business Law LAWS 1005 - Introduction to Business Law (UWSC) LGYB 0472 - Introduction to Business Law (Creative Industries) LAWS 1002 - Enterprise Law (UWSC)

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/laws1001/>)

LAWS 1002 Enterprise Law (WSTC) (10 Credit Points)**Legacy Code:** 700254

This is an introductory law unit designed to introduce the fundamentals of law in a commercial context. The unit introduces students to the basic principles of law and the legal system as well as examining some of the major areas of law that impact on commercial dealings. This unit examines the structure of the legal system, the way law is made, and the main areas of law relevant to starting and running a business including contracts, torts and consumer protection.

Level: Undergraduate Level 1 subject**Pre-requisite(s):** JUST 0003

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/laws1003/>)

LAWS 1007 Introduction to Law (WSTC) (10 Credit Points)**Legacy Code:** 700157

This unit introduces students to the Australian legal system. It considers the historical and legal factors which influenced its development and the key institutions and processes which have resulted. It considers the impact of Australian law and legal system on Indigenous Australians and their laws. The unit introduces students to legal method: legal reasoning and statutory interpretation. Students will also develop academic literacies, including study management, writing and referencing in a legal context.

Level: Undergraduate Level 1 subject

Equivalent Subjects: LAWS 1006 - Introduction to Law

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/laws1007/>)

LAWS 1009 Legal Analysis and Critique (10 Credit Points)**Legacy Code:** 200978

The unit exposes students to the contexts that affect how law is made, some of the institutional limitations on law and justice and the impact of globalisation on law. It introduces theories about the nature and function of law in historical, political, social, economic, cultural, ethical and international contexts. The connection between race, gender, culture and law is examined within the context of the Australian legal tradition, legal history, and the impact of the Australian legal system on Australian First Peoples. The unit introduces students to the processes of critical evaluation of arguments, legal communication and logical and critical problem solving involving statutory interpretation and precedent.

Level: Undergraduate Level 1 subject

LAWS 2001 Alternative Dispute Resolution (10 Credit Points)**Legacy Code:** 200811

Alternative Dispute Resolution (ADR) processes are no longer 'alternative' but a major part of the contemporary justice system. Modern legal practice requires lawyers to negotiate settlements on behalf of clients and advise clients how to resolve disputes without litigation. Non-adversarial processes offer many benefits to parties, professionals and the community. This unit will introduce you to the theory and practice of alternative dispute resolution processes and provide you with the opportunity to develop key ADR practice.

Level: Undergraduate Level 2 subject

Co-requisite(s): LAWS 1003 OR

LAWS 1006 OR

LAWS 1006

Incompatible Subjects: JUST 2001 - Alternative Dispute Resolution
JUST 2019 Conflict Resolution

This unit introduces students to the basic principles of criminal law and criminal responsibility and the criminal justice process as located in its broader social and political context, including the impact of the criminal justice system on Indigenous Australians. Students will engage in collaborative class learning with a particular focus on legal problem solving and participate in a mock bail application.

Level: Undergraduate Level 2 subject**Co-requisite(s):** LAWS 1006 OR

LAWS 1003

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws2004/>)**LAWS 2005 Financial Services Law (10 Credit Points)****Legacy Code:** 200271

Financial services is one of the fastest growing sectors of the Australian economy. This is an essential unit to understand legal, compliance and regulatory issues relating to the financial services sector in Australia. Students will be introduced to the licensing requirements for entering the financial services sector and the obligations for marketing and offering financial products and financial services to retail and wholesale clients. Students are then introduced to the main techniques of financial services regulation: disclosure, licensing, prohibitions or insider trading and market manipulation, self-regulation and powers of investigation and enforcement.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** LAWS 3045 OR

LAWS 2010

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws2005/>)**LAWS 2007 First Peoples and the Australian Legal System (10 Credit Points)****Legacy Code:** 200944

First Peoples and the Australian Legal System provides students with a grounding in the central legal issues associated with the historical and contemporary interaction of First Peoples with the Australian legal system.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** LAWS 1006 OR

LAWS 1003 AND

LAWS 1008 OR

LAWS 1009

Equivalent Subjects: LAWS 2009 - Indigenous Australians and the Law**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws2007/>)**LAWS 2008 Government and Public Law (10 Credit Points)****Legacy Code:** 200984

Government and Public Law introduces students to the field of public law and the operation of government in Australia. The unit has four key focus areas: Public Law in Australia, How Government Works, Government Accountability and Integrity, and Individuals and Government. The unit is intended to provide an overview of government and public law in Australia. The unit provides a foundation for the later study of Administrative Law and Constitutional Law.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** LAWS 1003 OR

LAWS 1006

Incompatible Subjects: LAWS 3010 - Commercial Transactions Law**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws2008/>)

LAWS 2010 Law of Business Organisations (10 Credit Points)**Legacy Code:** 200183

This unit deals with legal issues concerning the creation and control of companies and compares this structure with other forms of business organisations, such as joint venture, partnership, trusts and sole traders. This unit will provide students with an appreciation of partnership, and companies and a practical operation of a scheme of corporate regulation in the Australian federal system.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** LAWS 1004 OR LAWS 1001

Restrictions: Please see the Subject Details page for any restrictions for this subject
Subject Details (<https://hbook.westernsydney.edu.au/subject-details/laws2010/>)

LAWS 2011 Property Law (10 Credit Points)**Legacy Code:** 200012

This unit deals with concepts of property and the nature of property rights including the boundaries between property and other rights and the boundaries between different forms of property. The unit content includes the doctrine of tenure and estates, native title, and legal and equitable interests in land. Specific topics to be covered include personal property and securities, mortgages, leases, easements and profits a prendre, co-ownership, the Torrens system of statutory registration of interests in land, and the principles for resolving conflicting proprietary interests (priorities).

Level: Undergraduate Level 2 subject**Pre-requisite(s):** LAWS 1006 OR LAWS 1003 AND LAWS 2003

Restrictions: Please see the Subject Details page for any restrictions for this subject
Subject Details (<https://hbook.westernsydney.edu.au/subject-details/laws2011/>)

LAWS 2012 Regulatory Risk and Compliance (10 Credit Points)**Legacy Code:** 200928

This unit aims to provide business students with the foundations for identifying, establishing and developing an organisation's regulatory risk and compliance framework. To achieve this, the unit will analyse current theory, international best practices, as well as key commercial law obligations, which Australian businesses are expected to comply with.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** LAWS 1004 OR LAWS 1001

Restrictions: Please see the Subject Details page for any restrictions for this subject
Subject Details (<https://hbook.westernsydney.edu.au/subject-details/laws2012/>)

LAWS 2013 Torts Law (10 Credit Points)**Legacy Code:** 200008

The unit introduces students to the legal principles and policy of a variety of torts, defences and remedies. The unit also introduces students to the generic legal skills of case reading and, analysis and note taking, statutory interpretation and legal problem solving, as well as placing the law in the wider political and social context.

Level: Undergraduate Level 2 subject**Co-requisite(s):** LAWS 1006 OR LAWS 1003

Restrictions: Please see the Subject Details page for any restrictions for this subject
Subject Details (<https://hbook.westernsydney.edu.au/subject-details/laws2013/>)

LAWS 2014 Bioethics (10 Credit Points)**Legacy Code:** 201044

This unit covers the ethical and legal issues associated with medical practice and research, including issues raised by new developments in biotechnology. Topics covered include the following: the nature of moral thinking, issues of life and death, experimentation and research involving human subjects, genetic technology, new reproductive technologies, consent and confidentiality.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** LAWS 2013 AND LAWS 1006 OR

LAWS 1003 AND

LAWS 1008 OR

LAWS 1009

Equivalent Subjects: JUST 2002 - Bioethics

Restrictions: Please see the Subject Details page for any restrictions for this subject
Subject Details (<https://hbook.westernsydney.edu.au/subject-details/laws2014/>)

LAWS 3001 Advanced Family Law (10 Credit Points)**Legacy Code:** 200629

This unit provides a practical framework around complex family law matters and builds upon the skills obtained in 200633 Family Law. This unit provides the students with the opportunity to obtain practical skills in taking instructions from clients, drafting orders, making urgent applications, children's matters including complex family dynamics, child dispute services, Family Reports, Magellan matters, drafting documents, Relocation Cases, Hague Convention Cases and Contravention Proceedings, Property Matters including assets and values, financial disclosure, conciliation conferences, contributions, expert evidence, spousal maintenance and enforcement proceedings, as well child support and running undefended hearings.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 3023**Equivalent Subjects:** LGYB 8510 - Advanced Family Law

Restrictions: Please see the Subject Details page for any restrictions for this subject
Subject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3001/>)

LAWS 3002 Advanced Torts and Civil Wrongs (10 Credit Points)**Legacy Code:** 200650

Advanced Torts and Civil Wrongs examines in detail the basic principles and current issues in selected areas of torts law and civil liability.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2013**Equivalent Subjects:** LGYB 8513 - Advanced Torts and Civil Wrongs

Restrictions: Please see the Subject Details page for any restrictions for this subject
Subject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3002/>)

LAWS 3003 Advocacy (10 Credit Points)**Legacy Code:** 200646

This unit imparts basic courtroom trial skills giving practice in applying substantive law, practice, procedure and evidence in a simulated courtroom. It also explores both professional and ethical issues involved in the courtroom. There is a limit on enrolment in this unit because of the teaching method adopted.

Level: Undergraduate Level 3 subject**Co-requisite(s):** LAWS 4004**Equivalent Subjects:** LGYB 0403 - Advocacy

Restrictions: Please see the Subject Details page for any restrictions for this subject
Subject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3003/>)

LAWS 3004 Anti-Discrimination Law (10 Credit Points)**Legacy Code:** 200654

This unit provides students with a practical understanding of Australian anti-discrimination and equality law, including relevant state and federal legislation, and significant cases. It encourages the development of critical perspectives on the operation and effectiveness of existing regulatory responses to discrimination. Starting with a conceptual and historical overview, this unit considers the key grounds/attributes, types of conduct, and activities (areas of public life) that are protected under current Australian anti-discrimination law. Relevant defences, exceptions and exemptions are also considered, along with procedural requirements for bringing a discrimination complaint, remedies and costs.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2008**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3004/>)**LAWS 3005 Australian Competition Law (10 Credit Points)****Legacy Code:** 200905

This unit examines the main competition law provisions of the Competition and Consumer Act 2010 (Cth). Specifically, it examines the key concepts and economic principles that form the basis of competition law, the relevant case law, the available statutory remedies, and enforcement powers of the Australian Competition and Consumer Commission. This unit will provide students with an in-depth understanding of the theoretical basis of competition law as well as a practical understanding of how the competition provisions (including restrictive trade practices and cartel provisions) are applied.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2003**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3005/>)**LAWS 3006 Australian Consumer Law (10 Credit Points)****Legacy Code:** 200858

This unit examines the main statutory provisions of the Australian Consumer Law. Specifically, it examines key concepts and principles of Australian Consumer Law, relevant case law, and statutory remedies that are available. The unit will provide students with not only an understanding of the theoretical basis of Australian Consumer Law, but also a practical understanding of how the provisions are applied.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2003**Equivalent Subjects:** LGYA 4906 Consumer Law and Policy**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3006/>)**LAWS 3007 Banking and Securities Law (10 Credit Points)****Legacy Code:** 200697

This unit examines the banker customer relationship, the taking and enforcement of security for credit, and the regulation of banks and non bank financial institutions nationally and internationally. Examined are 1. secured financing, 2. the regulation of bank solvency: central banks and the Bank for International Settlements, 3. Infrastructure of financial markets, 4. International financial instruments.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 3045**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3007/>)**LAWS 3008 Civil Procedure and Arbitration (10 Credit Points)****Legacy Code:** 200813

This unit provides a comprehensive analysis of the practical and theoretical issues encountered in Australian civil procedure. This Unit examines the major roles and practices governing court supervised processes which are involved in superior court litigation as well as key aspects of arbitration.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 1006 OR

LAWS 1003 AND

LAWS 1008 OR

LAWS 1009

Equivalent Subjects: LAWS 4005 - Dispute Resolution and Civil Procedure**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3008/>)**LAWS 3011 Comparative Law: Legal Systems of the World (10 Credit Points)****Legacy Code:** 200529

The unit introduces students to the different legal systems of the world: the common law and civil law traditions, indigenous legal systems, religion-based legal systems and legal systems in Asia. It aims to provide an understanding of how they have developed in particular legal and cultural contexts. It also examines and evaluates the impact of the introduction of western legal systems in non-western countries.

We will study the systems of both at the general level and in relation to specific laws, such as family law, torts and contracts, dispute resolution and procedure. The unit is also concerned with the nature and function of comparative law as a discipline. Students will be encouraged to undertake individual research and to evaluate legal information derived from a variety of different sources and perspectives.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2013 AND

LAWS 2002 AND

LAWS 2004 AND

LAWS 2003

Equivalent Subjects: LGYB 8536 - European Union Law**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3011/>)**LAWS 3013 Conflict of Laws (10 Credit Points)****Legacy Code:** 200656

Conflict of Laws (also known as Private International Law) is about resolving legal questions involving more than one jurisdiction. Conflict of Laws issues may arise between the Australian States and Territories or between nations. The globalisation of economic activity, and ease and affordability of travel and telecommunications have contributed to the recent dramatic increase of trans-national dimensions in personal and commercial litigation. This unit provides an introduction to the sources of conflict of laws, the international jurisdiction of domestic courts, the recognition and enforcement of foreign judgements and decrees, and the problem of choice of law as it arises in various situations.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2013 AND

LAWS 2003 AND

LAWS 2011

Equivalent Subjects: LGYB 8516 - Conflict of Laws**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3013/>)

LAWS 3014 Corporate Governance (10 Credit Points)**Legacy Code:** 200657

Through an interdisciplinary approach, this unit explores the place and role of the modern for profit business corporation in advanced and emerging capitalist economies. It examines the public and private role of public and private companies (and their equivalent in non-common law jurisdictions), their external and internal orientation, and issues relating to their accountability, responsibility, and transparency.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 3045 OR

LAWS 2010

Equivalent Subjects: LAWS 3026 - Governance**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3014/>)**LAWS 3015 Cyber Law and Justice (10 Credit Points)****Legacy Code:** 201018

The world is being transformed by digital technologies. The same technologies that make life more comfortable for some can unleash violence and destruction for others. Cyber war and cyber terrorism offer new risks for the international community. Bullying, identity theft and bank fraud, on a more local level, are given a new life in the cyber world. Cyber technologies also provide enhanced opportunities for detecting and apprehending criminals, resolving disputes and modernising justice processes. New social spaces are opened up (social media networks, the 'dark web'), and new identities made possible (online grooming profile, avatars). How does the law keep up with the emergence of new crimes and technology-enhanced versions of old ones, and how do the cultural worlds of hackers, crackers and trackers work? The subject examines how justice processes and spaces, as well as criminal networks and strategies, are being reimagined to take advantage of the new technologies.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2008**Incompatible Subjects:** HUMN 3030 - Cyber Justice (UG)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3015/>)**LAWS 3016 Elder Law (10 Credit Points)****Legacy Code:** 200632

This unit examines law relevant to an aging community. The legal issues are examined in a broad social, cultural and ethical context. Issues of legal capacity relevant not only to the law of contracts but also to medical treatment and end of life decisions are considered. Similarly the law relating to areas of special importance to the elder community such as age discrimination, pensions, retirement villages, wills and estate planning are also discussed.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2013 AND

LAWS 2003

Equivalent Subjects: LGYB 0409 - Elder Law**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3016/>)**LAWS 3017 Employment Law and Policy (10 Credit Points)****Legacy Code:** 200929

This unit focuses on the law that regulates individual aspects of employment relationships, including the contract of employment. It aims to place an examination of the development, nature and scope of relevant legal principles in the context of the key features of the contemporary Australian labour market.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3017/>)**LAWS 3018 Equity & Trusts (10 Credit Points)****Legacy Code:** 200757

This unit examines the principles of the law of equity and trusts in Australia. The primary emphasis is on the nature and development of the law of equity and students are also introduced to fundamental principles in the law of trusts. Topics include the nature and application of principles and maxims of Equity, the trust, the types of trusts and introduction to express trusts.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 1006 OR

LAWS 1003

Co-requisite(s): LAWS 2011**Equivalent Subjects:** LAWS 3019 - Equity Trusts and Remedies 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3018/>)**LAWS 3021 Estate and Succession Planning (10 Credit Points)****Legacy Code:** 200624

The unit aims to provide a detailed study of laws which impact on estate and succession planning, with a focus on identifying practical and strategic planning opportunities and outcomes. The unit forms part of the elective stream of a sub-major in financial planning. Some issues considered in this unit also have an impact in respect to investments, insurance and risk management, retirement, superannuation and taxation consequences.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 1004**Equivalent Subjects:** LGYB 9952 - Estate and Succession Planning**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3021/>)

LAWS 3022 Family Dispute Resolution (10 Credit Points)**Legacy Code:** 200772

This unit develops mediation skills for and understandings of family dispute resolution. It builds on 200633 Family Law to deepen student knowledge of and capacity to assist separated parents to resolve disputes about their children and property. Particular attention is given to processes concerning children and processes to assist families who present with highly complex family dynamics, including the presence of family violence. The University has entered an Articulation Agreement with a registered training organisation which enables graduands of this unit to apply to have their competency in relation to the six core FDR units of the Vocational Graduate Diploma in Family Dispute Resolution assessed in the clinical placement component of that program, and so seek accreditation as a Family Dispute Resolution Practitioner if they wish.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 3023**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3022/>)**LAWS 3023 Family Law (10 Credit Points)****Legacy Code:** 200633

This unit aims to graduate students who will become reflective, ethical and effective family lawyers and/or family dispute resolution practitioners. This unit adopts a range of perspectives to critically evaluate developments in theory, laws, policies and practices concerned with the legal regulation of intimate relationships, particularly after separation. Family law balances the competing rights, obligations and interests of partners, children and others following separation, often in the context of complex family dynamics. In addition to having a sound grasp of family law, family lawyers must also appreciate the social, political, psychological and economic contexts that influence separating families.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 1006 OR

LAWS 1003

Equivalent Subjects: LGYB 8494 - Family Law**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3023/>)**LAWS 3024 Foundations of Chinese Law (10 Credit Points)****Legacy Code:** 200759

An LLB alternate unit, Foundations of Chinese Law is taught intensively at a selected Chinese university. The unit introduces students to the basic structure of the Chinese legal system, its laws and the legal culture. Through seminars and field trips to Chinese courts and law firms, the unit aims to develop your understanding of how the Chinese legal system has developed in its political and cultural contexts. It covers the Chinese legal systems at the general level and in relation to specific law, such as contracts, foreign investment law, dispute resolution and procedure.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2003**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3024/>)**LAWS 3025 Foundations of Indian Law (10 Credit Points)****Legacy Code:** 200983

An LLB alternate unit, Foundations of Indian Law is taught intensively at a selected Indian university. The unit introduces students to the basic structure of the Indian legal system, its laws and the legal culture. Through seminars and field trips to Indian courts and law firms, the unit aims to develop your understanding of how the Indian legal system has developed in its political and cultural contexts. It covers the Indian legal systems at the general level and in relation to specific law, such as contracts, foreign investment law, dispute resolution and procedure.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 1006 OR

LAWS 1003 AND

LAWS 2003

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3025/>)**LAWS 3026 Governance (10 Credit Points)****Legacy Code:** 200927

This unit aims to provide students with an understanding of the key principles and foundations of corporate governance. By applying an interdisciplinary approach, this unit explores how companies across key jurisdictions (US, UK, Japan, China and Australia) are directed and steered. On completion of this unit, students are expected to have acquired an understanding of various theories and models of corporate governance, as well as international best practices.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 1004 OR

LAWS 1001

Incompatible Subjects: LAWS 3014 - Corporate Governance**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3026/>)**LAWS 3027 Human Rights Law (10 Credit Points)****Legacy Code:** 200635

This Unit examines the theory and practice of international human rights law through the framework of specific, current human rights issues. The Unit examines the moral and political justification for human rights; the foundations and historical development of key human rights instruments and institutions; the domestic, regional and global organisations that contribute to the promotion and protection of human rights; and challenges to realising human rights in different economic, cultural and religious contexts. Through a focus on contemporary issues and debates (which might include for example, the scope of the right to privacy; the effectiveness of measures to prevent genocide; the vulnerability of women and children in conflict situations) the Unit encourages a critical examination of the interconnectedness of rights and the way international human rights law is deployed to expand (or constrain) possibilities for social change and justice. The unit integrates the experience of the teachers as active human rights practitioners and academics in a range of institutions such as with National Human Rights Institutions, Human Rights NGOs, and United Nations bodies to interrogate the range of ways in which human rights can be used to advance the equality and dignity of humanity.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 1003 OR

LAWS 1006

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3027/>)

LAWS 3028 Human Rights and the Asia Pacific (10 Credit Points)**Legacy Code:** 200908

This unit examines the place of regional human rights systems in the global architecture of human rights. Concepts of universalism, relativism and the 'Asian values' debate are examined. The record of human rights treaty ratification and compliance in Asia and the Pacific is examined within the context of the international treaty system as well as the ASEAN regional human rights regime. The development and implementation of international and domestic human rights protections in criminal law, constitutional law and institutional construction are examined across the region. The role of civil society, non-governmental organisations and networks, and middle powers in impacting the politics, law and institutions of human rights protections across the Asia-Pacific region is examined.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 1006 OR

LAWS 1003

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3028/>)**LAWS 3029 Immigration and Refugee Law (10 Credit Points)****Legacy Code:** 200298

This unit provides an introduction to immigration and refugee law principles in Australia. Students will be introduced to the basic statutory machinery and policy principles that guide legal practitioners in resolution of immigration and refugee law problems in Australia. The unit will also provide an introduction to the historical, political and theoretical framework which underpins this area of the law, and explore some of the more prominent Australian cases associated with immigration and refugee law.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 4001**Equivalent Subjects:** JUST 3007 Immigration and Refugee Law**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3029/>)**LAWS 3030 Information and Data Governance Law and Regulation (10 Credit Points)****Legacy Code:** 200955

This unit examines the operation of information technology for online data collection, information privacy and data governance laws and regulation. The unit focuses on the right to privacy, the protection of individuals with regard to the processing of personal data and the free movement of such data and the legal framework for information protection. The framework for information privacy and data governance is established by both international and domestic law and regulation. The unit introduces the basic legal framework for information privacy protection and governance under the European Union's Commission, the OECD Guidelines for the Protection of Privacy and Trans-Border Flows of Personal data and under the Australian Privacy protection framework. The unit compares the information governance policy and framework in the European Union and the United States with that in Australia.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2003**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3030/>)**LAWS 3031 Insolvency Law and Policy (10 Credit Points)****Legacy Code:** 200659

The laws regulating insolvency administration have developed over time into an integral component of the legal system, domestic and international. By purposive analysis of the Australian and cross-border legislative provisions, this unit introduces the law and public policies by which regulators administer insolvent corporate entities and persons, and examines potential outcomes, including restructuring proposals.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 3045**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3031/>)**LAWS 3032 Intellectual Property (10 Credit Points)****Legacy Code:** 200637

This unit provides an introduction and overview of the legal principles of intellectual property law, and traces the development of this law in Australia. It is designed as an introductory survey subject for undergraduate law students. Students will be considering the nature of intellectual property, the legal framework which contains it, the ways in which it can be protected and the reasons why it might seem important to our society to uphold intellectual property rights. The modules will cover the four major intellectual property regimes of trademarks, copyright, designs, and patents as well as issues relating to traditional knowledge of Aboriginal and Torres Strait Islander Peoples.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2003**Incompatible Subjects:** LAWS 3060 - Protecting Ideas LAWS 7033 - Securing Ideas**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3032/>)**LAWS 3033 International Business Transactions Law (10 Credit Points)****Legacy Code:** 200638

This unit is designed to be taught offshore as well as in Australia. It examines the legal regimes governing international business; international sales transactions; licensing, and investment arrangements; build, operate and transfer schemes; what lawyers do when negotiating and drafting international trade; what needs to be taken into account when dealing with developed, developing, and non-market economies; and the interplay of law, politics and culture in these contexts.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 3045**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3033/>)

LAWS 3034 International Criminal Law (10 Credit Points)**Legacy Code:** 200220

This unit analyses the current state of international criminal law and its place in the modern international legal system in light of important recent developments. It discusses why States should reform their national criminal laws to accord with international developments. It focuses on both the substantive and procedural law. It examines relevant international legal concepts, general principles of international criminal law, and how international criminal tribunals function. It considers particular international crimes, participation in such crimes, defences, and important recent cases such as Pinochet and Slobodan Milosevic.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2004**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3034/>)**LAWS 3035 International Moot Court (10 Credit Points)****Legacy Code:** 200663

This unit aims to train those students selected to represent the School of Law, Western Sydney University, in international law Mooting Competitions in litigation and advocacy before international courts. Depending on the circumstances at the time, the possible competitions will be one or more of the following: Jessup International Law Court Competition; Jean Pictet International Humanitarian Law Competition; Manfred Lachs Space Law Moot Competition; Stetson International Environmental Law Competition. Other alternate competitions may be chosen in the future. For several of the competitions, the majority of the work will be conducted over the summer months and students will be required to undertake that they will devote sufficient time during that period to properly undertake all required tasks. Students will be provided with a grounding in issues including jurisdiction, admissibility, interim measures, principles of state responsibility and remedies. The course will focus on the International Court of Justice. The course will also have a practical component aimed at enhancing the advocacy skills of participants and applying the theory to the practical aspects of the conduct of international advocacy. Students will be involved in the preparation and presentation of a hypothetical case before the ICJ and will be given the opportunity to develop their advocacy skills, including the preparation of written submissions and delivery of oral submissions, in a non-competitive context.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3035/>)**LAWS 3036 International Trade Law (10 Credit Points)****Legacy Code:** 200639

This unit examines the legal regime governing the international exchange of goods, services and capital. The focus of the unit will be the WTO and the GATT, GATS, and TRIPS agreements with attention given to the interaction of trade and investment issues, and the interplay of law, politics and diplomacy in regulating these issues. Topics include: the international legal framework for international trade and investment, structural and transactional aspects of international trade and investment, dispute settlement, bilateral and multilateral trade agreements, the impact of national and foreign trade policies on world trading activities, the role and interest of Australia as a trading nation, and trade as a political issue.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 3045**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3036/>)**LAWS 3038 International Transactions Law (10 Credit Points)****Legacy Code:** 200930

This unit will examine the law, principles and practice governing international business transactions, including such issues as foreign investment law, the UN Convention on Contracts for the International Sale of Goods (CISG), the means of cross-border payments in international business and international banking and finance, and international anti-corruption regulations. The unit will also examine the enforcement of international business agreements, including alternative dispute resolution in an international context.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 1004 OR

LAWS 1001

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3038/>)**LAWS 3039 Islam, International Law and Human Rights (10 Credit Points)****Legacy Code:** 200956

This unit explores the intersection between Islamic law, international law and human rights. The unit begins with providing a theoretical framework introducing international law and human rights from a secular and Islamic perspective, providing an overview of how classical and contemporary Muslim scholars engage with the human rights discourse. The second part of the unit will discuss human rights from the perspective of nation states, examining the legal framework (in the context of Islamic and secular law) of key nation states, as well as that of some international organisations (including the Organisation of Islamic Cooperation and the Arab League). Students will examine whether there is an ideal governance framework to protect human rights and discuss core international human rights treaties including Islamic Human Rights instruments (i.e. the Universal Islamic Declaration of Human Rights, the Cairo Declaration on Human Rights in Islam and the Arab Charter on Human Rights). Students will discuss specific human rights issues including Islam and gender, Islam and freedom of expression, Islam and freedom of religion and Islamic criminal law. When examining these topics, students will be encouraged to engage with various interpretations of Islamic law, as well as critically examine the human rights framework.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2008**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3039/>)

LAWS 3040 Islamic Law in a Changing World (10 Credit Points)**Legacy Code:** 101465

This unit introduces students to Islamic legal theory, its sources and principles, and its application by different schools and scholars to derive religious verdicts. Students will study efforts to 'streamline' Islamic law through a number of Sunni and Shiite schools, various conceptions of shari'ah, and modern attempts at law reform through dynamic scholarship and ijihad (independent judgment). Upon completion, students should be able to explain developments in Islamic legal thought within their socio-historical contexts, and identify key debates among Muslim scholars. Using current case studies, students will also study Islamic law issues affecting Muslims today, especially Muslim minorities.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** HUMN 1047 OR LANG 2017**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3040/>)**LAWS 3042 Jurisprudence (10 Credit Points)****Legacy Code:** 200649

This unit engages students in the critical analysis of modern law through reflection on the major traditions and contemporary practices of legal theory. The Unit encourages students to examine and question key legal concepts that inform the law, such as power, morality and truth. Students will interpret, analyse, justify and critique issues and ideas using tools of critical reflection drawn from texts in legal philosophy, ancient to modern. In this way, they will develop tools that allow them to understand and uncover the foundational ideas and assumptions on which we base our view of the law and its consequences, leaving students well-placed to embark upon systematic inquiries in legal reform and further studies in legal theory.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 1006 OR LAWS 1003 AND LAWS 1008 OR LAWS 1009**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3042/>)**LAWS 3043 Land Transactions Law (10 Credit Points)****Legacy Code:** 200021

This unit gives students an in-depth treatment of various aspects of the law relating to the transfer of land and interests in land. Transactions dealing with land are examined from both a commercial and residential perspective. These matters form an integral part of the practice of law and are approached from a practical perspective. Topics include the standard agreement for sale of land, the law and practice relating to different title systems, mortgages, leases, easements and covenants.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2011**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3043/>)**LAWS 3044 Law and Public Policy (Development and Implementation) (10 Credit Points)****Legacy Code:** 200802

This unit examines the link between law, public policy and social reform to explain and understand when legislative programs effectively or ineffectively achieve change. The unit adopts a range of social, political and legal perspectives to examine the policy process and its interaction with law. The unit focuses on recent policy initiatives to assess the role and relevance of law in public policy development.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 1006 OR LAWS 1003 AND LAWS 1008 OR LAWS 1009**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3044/>)**LAWS 3045 Law of Associations (10 Credit Points)****Legacy Code:** 200018

This unit deals with issues that arise in relation to the selection of appropriate structures for the conduct of non-profit and commercial dealings. Students examine the legal and practical requirements involved in creating, operating and winding up associations, partnerships and corporations. Emphasis is on the creation and operation of corporations, and the duties and liabilities of directors and officers, as well as the rights and obligations of shareholders.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 3018**Incompatible Subjects:** LAWS 2010 - Law of Business Organisations**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3045/>)**LAWS 3046 Law of Employment (10 Credit Points)****Legacy Code:** 200297

This unit focuses on the law that regulates individual aspects of employment relationships including the contract of employment. It aims to place an examination of the development, nature and scope of relevant legal principles in the context of the key features of the contemporary Australian labour market.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2003**Equivalent Subjects:** LGYB 0299 - Law of Employment**Incompatible Subjects:** LAWS 3017 - Employment Law and Policy**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3046/>)

LAWS 3047 Law of International Organisations (10 Credit Points)**Legacy Code:** 200803

This unit examines the structure and functions of the world's major transnational organisations. The unit extends students' understanding provided by Public International Law by examining the reality of international action and cooperation. Given that the European Union is the most highly evolved transnational organisation in the world today, the course will be centred around this organisation, while comparing it with other major international organisations such as the UN, the WTO and regional transnational organisations such as the African Union and the Organisation of American States. The Brexit process currently taking place in the EU will be analysed as a disruption to the trend of transnationalism.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2008**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3047/>)**LAWS 3048 Law of the Sea (10 Credit Points)****Legacy Code:** 200804

This unit will introduce students to the rules regulating the principle uses of the world's oceans. It will highlight historical development of the law of the sea, the sources of the contemporary law of the sea and the adoption of the 1982 Convention on the Law of the Sea (UNCLOS). Legal regime of various maritime zones including territorial sea and contiguous zone, continental shelf, the exclusive economic zone and the high seas will be studied. Various sources of marine pollution, fisheries, marine scientific research, maritime spatial planning, deep sea bed mining and dispute settlement will also be explored in this unit.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2008**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3048/>)**LAWS 3049 Media Law (10 Credit Points)****Legacy Code:** 200661

This unit examines various aspects of the laws that regulate the media. The central content of the Unit consists of defamation, contempt, privacy and surveillance and a selection of other laws impacting upon this industry. Throughout the unit we will also explore two key themes. The first is whether, as a question of policy, current legal restrictions to media freedom appropriately balance the protection of free speech with various other interests, including protection of reputation, personal privacy and the effective administration of justice. The second theme asks whether media laws that were developed to regulate traditional mass-media organisations apply to individuals who publish their own content online, particularly via social media, and, if so, whether this application is appropriately balanced. Analysis of the application of existing media law principles to a range of new technologies will be featured throughout the unit.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2013 AND LAWS 2008**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3049/>)**LAWS 3050 Medical Law (10 Credit Points)****Legacy Code:** 200856

This unit aims to provide knowledge and understanding of Australian medical law, including some cutting edge legal and policy issues that arise in this field. Medical law is an exceptionally vibrant and challenging field, underpinned by the rapid pace of scientific and social developments that generate new issues for medicine and for the law. Many of the more challenging issues for the law are at the core of policy - birth and reproduction, choice and responsibility, life and death.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2013 AND

LAWS 2011 AND

LAWS 2008 AND

LAWS 2004 AND

LAWS 2003

Equivalent Subjects: LAWS 3051 - Medical Malpractice Law**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3050/>)**LAWS 3052 Mental Health Law (10 Credit Points)****Legacy Code:** 200982

This unit is designed to give students an introduction to the interface between the disciplines of psychiatry and law. It examines how the empirical research and theories of psychiatry intersect with the application of legal principles and practices. As a result of successfully completing this unit, students should be able to translate personal and social issues concerning the study of mental illness and mental health into the practice of mental health law and critically evaluate different perspectives and contemporary debates about mental illness and mental health.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2013 AND

LAWS 2004

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3052/>)

LAWS 3053 Moot Court (10 Credit Points)**Legacy Code:** 200773

This unit aims to train students in mooting conducted before an appellate court or tribunal. Students will be provided with a grounding in issues including jurisdiction, admissibility, and remedies. The unit will focus on one or more areas of domestic substantive law and will include a research component. The unit will also have a practical component aimed at enhancing the advocacy skills of participants and applying the theory to the practical aspects of the conduct of appellate advocacy. Students will be involved in the preparation and presentation of a hypothetical case before an appellate court or tribunal and will be given the opportunity to develop their advocacy skills, including the preparation of written submissions and delivery of oral submissions, in a non-competitive context. Undertaking this unit would be useful for students seeking to participate in one or more law mooting competitions, representing Western Sydney University such as the Sir Harry Gibbs Constitutional Law Moot, Sir John Peden Contracts Moot, Shine Lawyers Torts Moot, AAT Moot, and the Law Council of Australia Family Law Moot.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2013 AND

LAWS 2002 AND

LAWS 2003 AND

LAWS 2011

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3053/>)**LAWS 3055 Planning and Environment Law (10 Credit Points)****Legacy Code:** 200647

This unit seeks to achieve a balance among theory, policy and practical issues in its approach, and it incorporates a strong interdisciplinary component in the introductory phase. It examines the planning laws in the state of New South Wales. Topics covered include an analysis of the functions of the relevant ministers, State government departments, and local councils; the role of public agencies; the effect of environmental planning instruments; and the impact of the planning system.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 1006 OR

LAWS 1003

Equivalent Subjects: LGYB 0303 - Planning and Environment Law**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3055/>)**LAWS 3056 Practising in the Public Interest (10 Credit Points)****Legacy Code:** 200943

This unit is delivered by the Public Interest Advocacy Centre, an independent, non-profit legal and policy centre. The unit introduces students to systems advocacy and public interest law and exposes them to organisations that are directly involved in public interest and pro bono litigation and activities.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2013 AND

LAWS 2002 AND

LAWS 2003 AND

LAWS 2011

This unit examines the nature of the legal profession and its role in society. It deals with the professional, legal and ethical responsibilities legal practitioners owe to the law, the courts, their clients and to fellow practitioners, as well as the state and society at large. Students will be able to explain and evaluate the law and practice of legal practitioners, by reference to key topics, such as: professionalism; legal ethics; the history, structure and regulation of the legal profession; and the interpersonal, psychological and cultural factors affecting lawyering. In addition students will be able to demonstrate the process of ethical decision making by selecting and using ethical decision making tools in a legal context.

Level: Undergraduate Level 3 subject**Co-requisite(s):** LAWS 1006 OR

LAWS 1003

Equivalent Subjects: LGYB 0304 - Professional Conduct and Legal Ethics LGYB 8478 - The Legal Context**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3059/>)**LAWS 3060 Protecting Ideas (10 Credit Points)****Legacy Code:** 200931

This unit provides an introduction and overview of the legal principles of intellectual property law, and traces the development of this law in Australia. It is designed as an introductory survey subject. The modules consider the different forms of intellectual property including copyright (including moral rights and performers protection), designs, patents, plant breeders rights, trade mark law, passing-off and related actions, domain name law, confidentiality, and circuit layouts.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 1001 OR

LAWS 1004

Incompatible Subjects: LAWS 3032 - Intellectual Property**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3060/>)**LAWS 3061 Public Health Law (10 Credit Points)****Legacy Code:** 200702

This unit considers various legal issues related to population health. This area of law is relatively new and continually developing and expanding. This unit is primarily concerned with how law has and should respond to various health dilemmas at the population level. These include State protection of the community from death (for example requiring road users to wear a seatbelt or helmet) and disease including both communicable disease (for example immunisation, quarantine and managing disease outbreaks) and non-communicable disease (for example smoking, alcohol, obesity, diabetes and cardiovascular disease). This unit also considers frameworks for evaluating whether public health laws are justifiable regulation, taking into account the balance between public good and the autonomy of individuals.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 1006 OR

LAWS 1003 OR

LAWS 1006

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3061/>)

LAWS 3063 Public International Law (10 Credit Points)**Legacy Code:** 200653

This unit lays the foundation for an understanding of the international system of law, how it works and its relationship with domestic Australian law. It will challenge students to critically analyse the system and suggest ways in which the rules and principles can and should develop in the future in order to accommodate the changing needs and values of the international community of nations. It also represents the foundation for students to move on to the study of other International Law units offered by the School of Law.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2008**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3063/>)**LAWS 3064 Remedies (10 Credit Points)****Legacy Code:** 200756

This unit examines the principles of the major common law, equitable, restitutionary and statutory remedies available in Australia to wronged parties in a variety of circumstances. Emphasis is on the analysis of practical and theoretical advantages and disadvantages of various remedies. Topics include the effectiveness of common law, equitable and statutory remedies and the law of restitution and the scope of each of these remedies.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 3018**Equivalent Subjects:** LAWS 3020 - Equity Trusts and Remedies 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3064/>)**LAWS 3065 Retirement Planning (10 Credit Points)****Legacy Code:** 200569

This unit aims to provide a study of the laws which impact on advice and decisions relating to retirement planning, with a focus on identifying practical and strategic planning opportunities and outcomes. It forms part of the elective stream of financial planning. Some issues considered in this unit also have an impact in respect to investments, insurance and risk management, superannuation and taxation consequences.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 1004**Equivalent Subjects:** LGYB 9953 - Retirement Planning**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3065/>)**LAWS 3066 Revenue Law Industry Placement (10 Credit Points)****Legacy Code:** 201007

This work integrated learning unit builds upon the knowledge base of 200019 Revenue Law to provide industry experience for later year Law students. Students who have successfully completed 200019 Revenue Law with a Credit or above result will be eligible to apply for this industry experience. The placement will consist of a full time four week placement at the Australian Tax Office or other suitable workplace approved by the School of Law. Students will work in various practice areas with an emphasis on technical legal issues and will be supervised by senior staff members. The unit will provide students with practical and real-life work experience and will provide students with an appreciation of the professional responsibilities essential for 21st century legal practitioners.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 4008**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3066/>)**LAWS 3067 Self-Managed Superannuation and Trusts (10 Credit Points)****Legacy Code:** 200900

This unit provides students with the requisite skills to provide comprehensive financial advice, particularly within the context of an individual being able to choose a superannuation fund or create a self-managed superannuation fund (SMSF). The unit will provide students with an understanding of the implications of self-managed superannuation funds and the use of the trust structure, which are essential components for professionals in this area.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** FINC 3014 OR

LAWS 3018

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3067/>)**LAWS 3068 Space Law - Commercial Aspects (10 Credit Points)****Legacy Code:** 200652

This unit examines the underlying legal principles that regulate the use, exploration and exploitation of space, and how International Law can and should be applied to the many different State and private commercial uses of outer space. It examines the existing international legal regime - the five United Nations Space Treaties and key Declarations of Principles related to space activities - as well as a number of domestic regulatory systems, including the Australian legal regime. The unit also concentrates on the (many) uses and proposed uses of space for which the legal framework may not be particularly well suited.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2008**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3068/>)

LAWS 3069 State Taxes and GST (10 Credit Points)**Legacy Code:** 200266

This unit examines the Commonwealth statutory regime to the Goods and Services Tax and the NSW statutory regimes relating to Payroll Tax, Land Tax and Stamp Duty. It provides the framework to critically assess proposals for reform of these taxes.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 1004**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3069/>)**LAWS 3070 Taxation Law (10 Credit Points)****Legacy Code:** 200187

This unit covers the constitutional basis of taxation, the process of determining income tax liability, the concept of income tax and allowable deductions, taxation of fringe benefits, taxation of certain entities (partnerships, companies and trusts), tax accounting, trading stock provisions, tax administration and practice, taxation planning and avoidance, and the Goods and Services Tax.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2010**Equivalent Subjects:** LGYA 9867 - Taxation Law and Practice LGYB 3529 - Taxation (V1) LGYB 8505 - Taxation Law**Incompatible Subjects:** LAWS 4008 - Revenue Law**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3070/>)**LAWS 3071 Wills and Succession (10 Credit Points)****Legacy Code:** 200641

Wills and Succession is that body of law that deals with the devolution of property upon death. The unit encompasses inter alia the law relating to intestacy, the making of a valid will, the administration of the estate and what is known as testator's family maintenance. This unit is of particular importance to those students who intend to practice either as a solicitor or barrister as Wills and Succession forms a significant part of private practice.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2011**Equivalent Subjects:** LGYB 8530 - Wills and Succession**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3071/>)**LAWS 3072 Work Health and Safety Law (10 Credit Points)****Legacy Code:** 200799

This unit examines the different means in which the law protects workplace safety in Australia. The primary focus will be on the work health and safety regulatory framework and its underlying policy. The arbitrary nature of standard setting in the early systems of safety regulation is compared with later legislative models. The workings of these legislative strategies are illustrated by a series of selected issues relating to contemporary health risks in workplaces. Students will also examine issues surrounding enforcement and compliance and corporate governance in the safety context. Other topics include workers compensation and employment law.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 2013**Equivalent Subjects:** LGYB 0395 - Occupational Health and Safety Law LAWS 3054 Occupational Health and Safety Law**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3072/>)**LAWS 3073 Elder Law Industry Placement (10 Credit Points)****Legacy Code:** 201020

This elective work integrated learning unit builds on the knowledge base of 200632 Elder Law to provide work experience for later year Law students. Students who have successfully completed 200632 Elder Law will be eligible to apply for this industry experience. The placement will consist of a full time ten day placement at selected industry workplaces with supervision by experienced legal practitioners.

The unit will provide students with real-life work experiences in the legal issues associated with the practice of elder law and with an appreciation of the professional responsibilities essential for a 21st Century legal practitioner.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 3016**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3073/>)**LAWS 3074 Judicial Internship (10 Credit Points)****Legacy Code:** 201028

This unit provides an internship opportunity for later year law students. Students will spend twelve days throughout the semester at selected courts and tribunals under the supervision of magistrates, judges or tribunal members. The unit will provide students with an opportunity to observe the courts and tribunals first hand, to be mentored by a judicial officer, to engage in practical assistance to the relevant court or tribunal, and to appreciate the professional responsibilities essential for a 21st Century legal practitioner and judicial officer. Entry is competitive and will include a written application and interview. The unit includes a class schedule with the requirement of regular reflection in order to learn deeply from the experience and teach students how to engage in ongoing lifelong learning.

LAWS 2004 AND

LAWS 1008 OR

LAWS 1009

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3074/>)**LAWS 3075 Law's Self-Understanding (10 Credit Points)****Legacy Code:** 201027

This unit of study explores the central organising ideas for our present understanding of law. What do these ideas amount to? What, according to these ideas, is significant about us from the legal standpoint? Can the proponents of these ideas deal with their critics? What are the similarities and differences between the legal subject and other ways of thinking about ourselves, such as from a moral or political standpoint? How should we understand the connections between these three separate realms? What is the character of the legal sphere in comparison with these other spheres? What is the character of legal, moral and political reasoning?

Level: Undergraduate Level 3 subject**Pre-requisite(s):** LAWS 1008 OR

LAWS 1009 AND

LAWS 2008

Incompatible Subjects: LAWS 3042 - Jurisprudence**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3075/>)

LAWS 3076 Technology, Innovation and the Law (10 Credit Points)**Legacy Code:** 201039

This unit enables students to proactively adapt to the transforming nature of the legal profession. Students will engage with the technology and innovation expectations of contemporary business, legal practice and community engagements - including the concepts and areas of Big data and Artificial Intelligence and machine learning, Blockchain, legal task automation, e-contracts and smart contracting, technology assisted review, e-Courts, FinTech and RegTech, law tech start-ups, chatbots, and the capacity to develop legal, ethical and regulatory digital literacies. The curriculum will offer insights from a number of innovative and technology focused legal industry experts.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3076/>)**LAWS 3077 Legal Internship (10 Credit Points)**

This unit provides an internship opportunity for later year law students in host organisations (including NGOs and public interest organisations, community legal centres, government departments, corporations, barristers' chambers or private law firms). Internships provide students with invaluable access to opportunities to understand the law in context, to apply their formal learning about legal principles, to develop essential professional skills and to gain exposure to different career pathways. Students who successfully complete orientation requirements will spend twelve days throughout the semester at a host organisation. This will usually be done on a one-day (7 hours) per week basis. An intern's duties will generally consist of a combination of substantive tasks relating to law, policy and practice. Depending on the host organisation, these may include a combination of research, preparing background materials, briefing papers or research reports, liaising with other organisations, assisting in the provision of legal assistance and advice, observing interviews with clients, conferences with Counsel or in court proceedings, undertaking project and advocacy work, preparing/ giving presentations and assisting with administrative and editing work. The School will seek expressions of interest for the number of placements available with the School's partner host organisations each semester. Students are also able to arrange their own internships at organisations that are not currently host organisations, subject to the approval of the Clinical Director and the agreement of the host organisation to complete the attendance and assessment requirements of the unit.

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3077/>)**LAWS 3078 Legal, Economic and Social Transformation in Taiwan (10 Credit Points)**

This unit introduces students to the foundational structures of Taiwan's legal system, its economy, and its socio-legal culture and practices. Students will participate in an exchange experience and will be intensively taught at selected Taiwanese university partners. Through engagement with Taiwanese academics, legal professionals (both in Australia at pre-departure programs and in Taiwan through engagements with leading Taiwanese law firms, courts and economic organisations), students will develop commercially relevant knowledge and contemporary practical legal skills to develop as global citizens. Students will examine diverse content areas including Taiwan's Constitutional Court, leading human rights cases, intellectual property protections, the Taiwanese electoral system, and Taiwan's innovative approaches to corporate social responsibility, big data analytics, and new technologies. Where travel to Taiwan is not possible, the unit will be offered online with the program of study to be offered 3-hours a week over a semester and supported online by university and industry partners in Taiwan. Where travel is possible, this online program will be supplemented by a week-long excursion to Taiwan. Interested students should contact the Unit Coordinator to confirm expected costs to the student (e.g. airfare, accommodation, meals, et cetera) and travel dates and requirements.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws3078/>)**LAWS 4001 Administrative Law (10 Credit Points)****Legacy Code:** 200013

This unit examines the legal principles regulating the exercise of power by the executive arm of government in its various manifestations; ministers, government departments and officials, regulatory bodies, tribunals, inferior courts and local councils. This is examined in the context of Australian constitutional arrangements and it is taught in the context of constitutional themes and principles that underpin the law in this area. The exercise of power examined includes decision making, the exercise of discretion, delegated legislation and the decision making procedure of the major administrative tribunals. The focus is on the principles of judicial review developed by the courts, standing and remedies. There is also an examination of major non-judicial avenues of review by the major tribunals such as the Commonwealth Administrative Appeals Tribunal, and the Ombudsman. The unit will also examine Freedom of Information legislation.

LAWS 4002 Advanced Constitutional Law (10 Credit Points)**Legacy Code:** 200755

This unit builds upon the compulsory unit Constitutional Law, and provides a deeper and broader understanding of Australian constitutional law. It examines the constitutional aspects of Australian parliamentary democracy and citizenship, the constitutional powers of the Commonwealth Executive Government, constitutional issues relating to the raising and spending of government revenues and the complexities of the relationship between the Commonwealth and State as independent polities. The unit also examines the limited way in which the Australian Constitution operates to protect particular rights, liberties and freedoms.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** LAWS 2002**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws4002/>)**LAWS 4003 Advanced Taxation Law (10 Credit Points)****Legacy Code:** 200186

Advanced Taxation law broadens and deepens the student's knowledge of taxation and revenue law by building upon existing knowledge of, and adding new topics to, those covered in 200187 Taxation Law and 200019 Revenue Law. Such topics include consideration of the tax policy framework, superannuation and also further aspects of income, deductions, entity tax, tax administration, aspects of international tax and Goods and Services Tax.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** LAWS 4008 OR

The unit is designed to provide an understanding of the law, the theoretical underpinnings and the underlying policy issues, in the areas of evidence and criminal procedure.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** LAWS 2004**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws4004/>)**LAWS 4006 International Climate Law (10 Credit Points)****Legacy Code:** 200800

This course is about international climate law examining both the current international legal frameworks and discussion of future scenarios. It will explore the legal, political and scientific challenges in addressing and responding to climate change. It will illustrate how international climate law interacts with national law including private sector involvement but its principal focus is not on domestic law regimes. Various market and non-market mechanisms will be examined including emission trading systems, carbon taxes, new technologies and renewable energy targets.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** LAWS 2008**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws4006/>)**LAWS 4007 International Environmental Law (10 Credit Points)****Legacy Code:** 200801

This course provides a general introduction to international environmental law and policy. We will begin by exploring the economic, political, and legal concepts relevant to international environmental treaty regimes. We will then apply these concepts to concrete regimes designed to deal with specific international environmental problems, such as ozone depletion, transboundary air pollution, freshwater resources, marine pollution, world heritage, human rights, biodiversity and habitat loss. The course focuses principally on the dynamic of treaties, negotiations, and state and non-state actors in the international arena. Comparative approaches to national implementation, on selected issues, will also be covered.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** LAWS 2008**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws4007/>)**LAWS 4008 Revenue Law (10 Credit Points)****Legacy Code:** 200019

Revenue Law introduces you to the underlying principles of the Australian taxation system, with a particular focus on Commonwealth taxes. The unit of study is essential for all students intending to embark on a career in tax, law, business, commerce or the public sector. The unit covers the system of taxation; provides a critical analysis of the fundamental concepts of income and capital; and examines the key topics of taxation of remuneration, allowable deductions; taxation of entities, tax avoidance and aspects of tax administration.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** LAWS 2008**Incompatible Subjects:** LAWS 3070 - Taxation Law**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws4008/>)**LAWS 4009 Transactional Law (10 Credit Points)****Legacy Code:** 200758

This subject is designed to equip students for professional practice by providing them with an understanding of what it means (and takes) to be and think like a transactional lawyer in practice and how to 'add value to the deal' and think like a deal lawyer. Students will also be introduced to a range of structured financing transactions including lending arrangements, securitisation (RMBS, CMBS and CDOs), straight vanilla bonds, convertible bonds, covered bonds, asset based financing, managed investment schemes and swaps and derivatives (ISDA). Students will then be introduced to the legal building blocks of those transactions, including the law relating to representations and warranties, covenants, guarantees, subordination, set-off, commingling, trusts, security interests and insolvency. Students will work in teams to analyse and dissect a range of structured financing transactions. Real-life examples from international and domestic practice are discussed.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** LAWS 3045**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws4009/>)

LAWS 4010 Designing Law Apps for Access to Justice (10 Credit Points)**Legacy Code:** 201040

This unit will teach students how to design and build an application using expert system software. This unit will provide students with a clinical legal experience by providing access to a community based client to ascertain their needs and undertake collaborative work to provide a solution that requires applied legal research, teamwork, innovative and creative design thinking, and the capacity to manage a project. This unit will teach students how to identify, design and build appropriate legal information systems for use in generating legal documents from precedents and assisting users to navigate solutions to legal problems. Students will be exposed to a variety of automated legal tasks and various legal and practical issues associated with their use, including issues of professional regulation. This will include guest lectures from those working on legal expert systems and related technologies. After learning the necessary skills, students will work in small groups to design and build a legal information system. This unit does not require students to have any pre-existing skills or experience in expert systems or computer programming. Instead, the unit itself includes instruction on how to use an expert system software.

Level: Undergraduate Level 4 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws4010/>)**LAWS 4011 Law Honours Dissertation (10 Credit Points)**

This year long unit can only be commenced in Autumn semester and lasts the equivalent of two consecutive semesters (excluding Summer Semester). Only existing students will be re-enrolled in Spring semester to complete this unit. The unit comprises the research and writing of a research dissertation of between 10,000 and 12,000 words on an approved topic in law. The unit provides an opportunity for law students to further develop and refine their legal research and writing skills and to explore and analyse a legal topic chosen in consultation with the School of Law Honours Coordinator, in order to produce a high quality piece of academic work. It includes training in research methodology, and support activities including presenting at an honours research seminar and requires the student to undertake a literature review and submission of a research proposal, upon acceptance of which the dissertation is written under supervision.

Level: Undergraduate Level 4 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws4011/>)**LAWS 7001 Advanced Clinical Legal Placement (40 Credit Points)****Legacy Code:** 201006

This 40 credit point unit consists of twenty days of clinical work within a legal practice environment. Students are mentored by experienced legal practitioners to develop and apply knowledge and skills in legal practice. Students are responsible for organising their placements with legal services or practices working in areas of interest to the student and the proposed placement must be approved by the School of Law. Students are required to perform professional tasks in the legal service or practice setting and to undertake self-directed study including completing a self-directed research report on a work-related project and workplace reflections. These together with a Professional Performance Report from their workplace supervisor/mentor, will comprise assessment for the unit on a satisfactory/unsatisfactory basis. Students are supported in this through the provision of supporting materials. Advanced Clinical Legal Placement may be undertaken in any study period and may, by agreement, be organised in ways which suit the workplace supervisor/mentor and the student and as agreed with the Unit Coordinator. This may include, for example, undertaking the 20 day clinical work placement as a four week block or distributed over the session parallel to their program of study.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7001/>)**LAWS 7003 Australia's Visa System 1 (10 Credit Points)****Legacy Code:** 200966

This unit provides students with a structured examination of issues common to all Australian visas, including public health criteria, implications for family members of visa applicants and visa conditions. The unit further provides a close analysis of issues common to some Australian visas, such as matters of sponsorship, assurances of support, family violence provisions, provisional visas, English language requirements, skills assessment and exclusion periods and other public interest requirements.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** LAWS 7007**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7003/>)**LAWS 7004 Australia's Visa System 2 (10 Credit Points)****Legacy Code:** 200967

This unit explores a number of substantive Australian visas, including those relating to work, doing business in Australia, study and visiting Australia (medical treatment, tourism, business, visitors). This unit focuses on providing students with a practical approach to addressing the eligibility criteria for relevant visa streams, lodgement of visa applications and processing considerations. Students will learn to evaluate pathways and options open to clients, determine strategies and formulate submissions.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** LAWS 7007 AND

LAWS 7003

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7004/>)

LAWS 7005 Australia's Visa System 3, Cancellation and Review (10 Credit Points)**Legacy Code:** 201005

This unit addresses the balance of visas in the Australian immigration system, including those related to bringing family to Australia, former resident and resident return visas, humanitarian program (onshore and offshore), bridging visas and other miscellaneous visas (Act-based visas and resolution of status visas). This unit also addresses the regime for review of immigration decisions, including informal review, merits review and judicial review. This unit provides an overview of ministerial intervention and cancellation powers under Australian immigration law. This unit also provides a brief overview of Australian citizenship laws.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** LAWS 7007 AND LAWS 7003**Co-requisite(s):** LAWS 7004**Incompatible Subjects:** LAWS 7034 - Visa Compliance Cancellation and Review 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7005/>)**LAWS 7006 Australian Legal System and Common Law (10 Credit Points)****Legacy Code:** 200981

The Australian Legal System and Common Law introduces students, from non-common law jurisdictions, to the Australian legal system and the common law tradition. The unit aims to develop the understanding of how the Australian legal system has developed in its historical and cultural contexts, and its impact on Australia's First Peoples. It also covers the Australian laws in specific areas, such as contracts, torts, trusts and dispute resolution. This unit includes field trips to various Australian courts and legal institutions. Students are encouraged to undertake individual research to evaluate and compare legal institutions and laws in Australia and their home jurisdictions.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7006/>)**LAWS 7007 Australian Migration Law (10 Credit Points)****Legacy Code:** 200965

This unit provides students with an introduction to Australia's immigration system. It provides students with a broad overview of sources of Australian migration law, explores the role of government policy in migration law, and outlines the key components of Australia's migration program. The unit gives students a strong grounding in key terminology used in Australian migration law, and introduces Australian visas. The unit explores the regulatory regime for losing a visa and addresses immigration offences.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7007/>)**LAWS 7008 Bioethics in Perspective (10 Credit Points)****Legacy Code:** 200957

This unit explores a range of ethical and legal issues in public health, biomedical research, biotechnology and medical practice.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 4912 - Bioethics**Incompatible Subjects:** JUST 2002 - Bioethics**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7008/>)**LAWS 7009 Commercial Law (10 Credit Points)****Legacy Code:** 200432

In this unit, students learn about the concepts of law, its impact on businesses, and how to apply the law to solve practical legal problems that arise in business. The unit is designed to help you identify where potential legal issues or problems can arise in business. It deals with concepts of Australian law and commercial legal obligations that are of importance both to professional practice and to studies in later units. The unit topics are: Australian Legal Institutions and Sources of Law, Case Law and Doctrine of Precedent, Legislation and Statutory Interpretation, The Australian Federation and Concepts of Constitutional Law, Principles of Tortious Liability, the formation, vitiation, performance and discharge of contracts, forms of business structure, consumer transactions, consumer protection and agency.

Level: Postgraduate Coursework Level 7 subject**Incompatible Subjects:** LAWS 3009 - Commercial Law**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7009/>)**LAWS 7010 Company Law (10 Credit Points)****Legacy Code:** 200433

This unit mainly deals with legal issues concerning various aspects of companies: incorporation, regulation, membership and capital, company management, corporate officers, meetings, relations of the company with outsiders, accounts, reports and other disclosures, arrangements and reconstruction, receivers and winding up, and share acquisition and takeovers. It also considers public policy issues underlying the law in the above areas. Other forms of business organisation, such as partnership, trusts and sole traders, are also dealt with.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** LAWS 7009**Equivalent Subjects:** LGYA 8939 - Company Law (PG)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7010/>)

LAWS 7011 Contemporary Issues in Taxation (10 Credit Points)**Legacy Code:** 200872

This unit is designed to increase student knowledge of the Australian taxation law, including capital gains provisions in the income tax legislation. Students will learn how to apply the professional guidelines for tax agents and offer practical advice to clients about their responsibilities and obligations under the law. For example, advice scenarios and potential outcomes with respect to tax evasion and/or avoidance behaviour by clients, incapacity planning contexts, wealth transfer and small business concessions. Student actions and advice will be supported, tested and challenged through a range of case studies, hypothetical client contexts and simulated online examples.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** LAWS 7031**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7011/>)**LAWS 7013 Global Governance and Sustainability (10 Credit Points)****Legacy Code:** 200903

This unit examines how the globalisation of financial markets, relaxation of investment restrictions and liberalisation of the goods and services markets have impacted on the traditional role played by the State and by international organisations on the one hand, and in the increase in power and influence of multinational corporations (State owned or otherwise), private foundations and private interest groups on the other. Examined in this context is the retreat of the State in its role as a regulator of activity and an increase in reliance on private enterprise to provide services as well as the infrastructure needs to the community, in some countries defence and ancillary needs, as well as the adoption of extra judicial dispute settlement processes in resolving disputes between its nationals and non-nationals. These developments have seen the emergence of a wide array of non-governmental actors as providers, arbiters, and countervailing forces providing voice. All of these developments raise issues of accountability, responsibility, transparency, as well as legitimacy.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** LAWS 7027**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7013/>)**LAWS 7014 Human Rights in Practice and Theory (10 Credit Points)****Legacy Code:** 200953

This unit examines the place of regional human rights systems in the global architecture of human rights. Concepts of universalism, relativism and the 'Asian values' debate are examined. The record of human rights treaty ratification and compliance in Asia and the Pacific is examined within the context of the international treaty system as well as the ASEAN regional human rights regime. The development and implementation of international and domestic human rights protections in criminal law, constitutional law and institutional construction are examined across the region.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7014/>)**LAWS 7015 Information and Data Governance Law and Policy (10 Credit Points)****Legacy Code:** 200958

This unit focuses on the right to privacy and examines the legal framework for information privacy protection and data governance that are established by both international and domestic law and regulation. This unit introduces students to the theoretical approaches to information privacy and data governance law and policy. In particular, the unit focuses on the European Union Directives and Regulation; the OECD Guidelines for the Protection of Privacy and Trans Border Flows of Personal data and the impact of international laws and regulation on information privacy and data governance regulation and policy in Australia. The unit explores some of the challenges in providing effective information privacy protection and data governance in cyberspace as existing laws adapt to new and advanced information technological developments and their use.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7015/>)**LAWS 7016 International Banking and Finance Law (10 Credit Points)****Legacy Code:** 200948

This unit is set in the background of the aftermath of the Global Financial Crisis of 2008. It examines the role of financial institutions, financial instruments, financial regulators, and national and international regulatory efforts in a borderless world. Topics covered include: international banking and capital markets, infrastructure of financial markets including the payment and clearance system, derivative instruments (SWAPS, futures, and Options), Asset securitisation, Mutual and Hedge Funds, secured credit, syndicated loans and project financing, and the role of Central Banks and the Bank for International Settlements and the capital adequacy requirements.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7016/>)**LAWS 7017 International Climate Change Law (10 Credit Points)****Legacy Code:** 200949

This unit examines the current international legal frameworks and discussion of future climate change scenarios. It will explore the legal, political and scientific challenges in addressing and responding to climate change. It will illustrate how international climate change law interacts with national law, including private sector involvement, but its principal focus is not on domestic law regimes. Market and non-market mechanisms such as emission trading systems, carbon taxes, new technologies and renewable energy targets will be examined.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** LAWS 7027**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7017/>)

LAWS 7018 International Corporate Governance (10 Credit Points)**Legacy Code:** 200902

The unit studies the evolution and transformation of the concept of corporate governance over the last five decades. Its focus is on the role of the large modern corporation in its economic and social setting, and it will in this context examine the challenges of ensuring the economic efficiency of the corporation while being responsive to the needs of the social environment it operates in. Examined will be issues of accountability, responsibility, and transparency of the corporation and its managers, to its investors, employees, consumers and society generally, the role of corporate social responsibility, enlightened shareholder value, and the notion of Accountable Capitalism. Also examined will be the role and responsibility of institutional investors, block holders, and other arbitrageurs of corporate control. While the primary focus of the study will be on the Australian, UK, and US models, comparisons will also be made with the German, Japanese, and Chinese systems of corporate governance.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** LAWS 7027**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7018/>)**LAWS 7019 International Criminal Law and Justice (10 Credit Points)****Legacy Code:** 200962

This unit analyses the state of international criminal law and its place in the modern international legal system in light of important recent developments. It discusses why a State's national criminal laws should accord with international developments. It focuses on substantive and procedural law and examines relevant international legal concepts, general principles of international criminal law, and how international criminal tribunals function. It considers particular international crimes, participation in such crimes, defences, and important recent cases such as those of Augusto Pinochet and Slobodan Milosevic.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7019/>)**LAWS 7020 International Environmental Law and Policy (10 Credit Points)****Legacy Code:** 200907

This unit provides an overview of international environmental law and policy. It investigates legal and policy measures for managing and protecting the environment in a sustainable manner. The unit will begin by exploring the economic, political, and legal concepts relevant to international environmental legal regimes. It will then apply these concepts to concrete regimes designed to deal with specific international environmental problems, such as climate change, ozone depletion, air pollution, hazardous waste, freshwater resources, marine pollution, world heritage, human rights, biodiversity and habitat loss. The unit focuses principally on the dynamic of treaties, negotiations, and state and non-state actors in the international arena. Special attention will be given to 21st Century environmental problems. Appropriateness of the present environmental legal regimes and challenges for the future will also be mooted in the unit.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7020/>)**LAWS 7021 International Governance Dissertation (10 Credit Points)****Legacy Code:** 200904

This unit comprises the preparation of a research dissertation, of between 6,000 to 8,000 words, on a novel and/or in-depth study related to International Governance. The unit provides an opportunity for Master of Laws students to further develop and refine their legal research and writing skills and to explore and analyse a legal topic of international governance. It also requires the student to undertake a literature review, submission of a research proposal, upon acceptance of which the dissertation is written under supervision. The dissertation should be of sufficient quality for acceptance for publication in the online Journal of International Governance, hosted by WSU School of Law.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** LAWS 7027**Co-requisite(s):** LAWS 7018 AND LAWS 7013**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7021/>)**LAWS 7022 International Human Rights Law (10 Credit Points)****Legacy Code:** 200961

This unit examines the foundations of the concept of human rights under international law, how international law became concerned with the rights of individuals and the development of international measures for the protection of human rights. It examines the extent of compromise of international human rights where sovereignty, cultural relativism and political resistance preclude comprehensive incorporation of some fundamental human rights principles in domestic law. Instruments such as The Charter of the United Nations, The Universal Declaration of Human Rights, The International Covenant on Civil and Political Rights and International Covenant on Economic, Social and Cultural Rights are also examined.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7022/>)**LAWS 7025 International Law of Ocean Governance (10 Credit Points)****Legacy Code:** 200951

This unit examines the rules regulating the principle uses of the world's oceans. It explores the historical development and sources of contemporary law of the sea and the adoption of the 1982 Convention on the Law of the Sea (UNCLOS). Legal regimes of various maritime zones including territorial sea and contiguous zone, continental shelf, the exclusive economic zone and the high seas will be studied. Various sources of marine pollution, fisheries, marine scientific research, maritime spatial planning, maritime safety and security, mining of deep sea beds and dispute settlement will also be explored in this unit.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7025/>)

LAWS 7026 International Space Law - Commercial Aspects (10 Credit Points)**Legacy Code:** 200963

This unit examines the underlying legal principles that regulate the use, exploration and exploitation of space, and how International Law can and should be applied to the many different State and private commercial uses of outer space. It examines the existing international legal regime - the five United Nations Space Treaties and key Declarations of Principles related to space activities - as well as a number of domestic regulatory systems, including the Australian legal regime. The unit also concentrates on the (many) uses and proposed uses of space for which the legal framework may not be particularly well suited.

Level: Postgraduate Coursework Level 7 subject**Incompatible Subjects:** LAWS 3068 - Space Law Commercial Aspects**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7026/>)**LAWS 7027 Legal Philosophy and Methodology (10 Credit Points)****Legacy Code:** 200901

This unit introduces the idea that law is value laden and has a symbiotic relationship with the philosophical, social, political, and economic fabric of society. This unit equips postgraduate students with a solid understanding of theoretical and methodological approaches to studying law and encompasses essential aspects of the legal research process including accessing relevant sources, defining a research question, selecting appropriate research methodologies, and presenting a research project.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7027/>)**LAWS 7029 Migration Practice 2 (10 Credit Points)****Legacy Code:** 201004

This unit focuses on the practical processes involved in migration practice as a registered migration agent in Australia. The unit covers topics such as the interview consulting process with clients, the regime for lodging valid visa application (including the methods of lodgement and preparation procedures) and Freedom of Information requests and practical aspects of communicating with the Department. This unit also provides students with the opportunity to undertake a capstone practical training placement with a registered migration agent business. NOTE: All students must attend a mandatory onsite intensive one day workshop to address practical aspects of the Occupational Competency Standards of the department of Immigration and Border Protection. Students must also undertake a five day Capstone Practical training Placement to gain professional experience in the migration agent industry.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** LAWS 7007 AND

LAWS 7003 AND

LAWS 7004

Co-requisite(s): LAWS 7005 AND

LAWS 7028 OR

This unit explores the nature, role and characteristics of international law; the concepts of statehood; sovereignty and jurisdiction; the relationships between domestic and international law; the role of law and treaties; and the role of international organisations such as the United Nations and International Court of Justice. The unit also examines contemporaneous and contentious issues of international law.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7030/>)**LAWS 7031 Principles of Taxation (10 Credit Points)****Legacy Code:** 200869

This unit provides an overview of the Australian taxation system as it affects the financial planning environment. Many financial planning decisions have a tax impact. Further, some financial products and much financial advice derive at least some of their value from their taxation consequences. Key topics covered include aspects of tax administration, tax planning concepts, the constitutional basis of taxation, assessable income concepts, international tax issues, the taxation of capital, allowable deductions and offsets, and taxation of such entities as partnerships, trusts, companies and shareholders. The course will also address other taxes that impact the financial advice environment including the FBT and the GST.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LAWS 7032 - Revenue Law LGYB 3546 - Taxation Planning and Implications**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7031/>)**LAWS 7032 Revenue Law (PG) (10 Credit Points)****Legacy Code:** 200397

This unit concerns the study of the Australian taxation system. It will cover taxation of income from personal exertion, business and property, as well as the taxation of fringe benefits provided in the context of employment and the goods and services tax (popularly known as the GST). Lectures and tutorials cover the constitutional basis of taxation, income tax assessment and the concepts of income tax, allowable deductions, other federal and state taxes, taxation of business associations (partnerships, companies, trusts and primary producers), taxation accounting, administration and practice, taxation planning and avoidance.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** LAWS 7009**Equivalent Subjects:** LGYA 8940 - Revenue Law (PG) LAWS 7031 - Principles of Taxation**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7032/>)

LAWS 7033 Security of Ideas (10 Credit Points)**Legacy Code:** 200980

This unit provides an introduction and overview of the legal principles of intellectual property law, and traces the development of this law in Australia. The modules consider the different forms of intellectual property including copyright (including moral rights and performers protection), designs, patents, plant breeders rights, trade mark law, passing-off and related actions, domain name law, confidentiality, circuit layouts, the historical development of intellectual property, and the international intellectual property framework (including World Intellectual Property Organization (WIPO) and World Trade Organization (WTO)).

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** Students enrolled in 27842810 Master of Laws (International Governance) must have successfully completed the prerequisite unit LAWS 7027 Legal Philosophy and Methodology**Co-requisite(s):** Students enrolled in 3748 Master of Information Governance must be enrolled in or have successfully completed the corequisite unit LAWS 7009 Commercial Law**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7033/>)**LAWS 7035 International Criminology Project (20 Credit Points)****Legacy Code:** 102689

Students enrolled in this unit will complete an original research project with a focus on a topic area of key interest from their studies in International Criminology, and in such fields as human rights, transnational crime, violence, terrorism, international criminal justice and global law enforcement. Topics will be negotiated and agreed between individual students and the unit coordinating staff, and will allow students to plan, undertake and report on a specific aspect of practice in the context of the field.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7035/>)**LAWS 7036 Migration Practice and Theory 1 (10 Credit Points)****Legacy Code:** 201031

This unit focuses on practical aspects of migration practice as a registered migration agent in Australia. The unit covers the practical role of migration agents in professional practice, the fundamental function of the Office of the Migration Agents Registration Authority (OMARA), the registration process involving migration agents, and provides a close analysis of the Code of Conduct. The unit provides a close examination of various aspects of running a migration agent business, including fees, client accounts, record keeping and the appointment and termination of services. The unit also provides an overview of the complaints and disciplinary regime involving registered migration agents.

LAWS 7039 International Criminal Justice (10 Credit Points)**Legacy Code:** 102688

This unit gives a detailed overview of the origins, development and contemporary debates about principles and institutions of international criminal law and justice, including the global circulation of ideas about human rights, war crimes, genocide and other "crimes against humanity" and the activity of the International Criminal Court (ICC). It will draw out the strengths of these developments, as well as their limits in addressing the needs of victims and the attainment of social justice. Furthermore, the unit will focus on Australia's often contradictory position in these changes and its own response to issues of global human rights and justice.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7039/>)**LAWS 7040 Financial Advice (Regulatory and Legal Obligations) (10 Credit Points)****Legacy Code:** 201041

This unit examines the regulation of provision of financial advice within the Australian financial services sector - including the regulatory and legal obligations relating to financial advice that arise under Chapter 7 ("Financial Services and Markets") of the Corporations Act 2001 (Cth) and the reporting and notification requirements under the Anti-Money Laundering and Counter-Terrorism Financing Act 2006 (Cth) (AML/CTF Act) and the Anti-Money Laundering and Counter-Terrorism Financing Rules (AML/CTF Rules). The main object of Chapter 7 is to promote: confident and informed decision making by consumers of financial products and services while facilitating efficiency, flexibility and innovation in the provision of those products and services; fairness, honesty and professionalism by those who provide financial services; fair, orderly and transparent markets for financial products; and the reduction of systemic risk and the provision of fair and effective services by clearing and settlement facilities. Businesses that are required to comply with the AML/CTF Act are also required to comply with the Privacy Act 1988 (Cth) when handling personal information collected for the purposes of compliance with their AML/CTF Act obligations. The unit examines the role of the Australian Transaction Reports and Analysis Centre (AUSTRAC) which is the Australian Government agency responsible for ensuring compliance with the AML/CTF Act. The unit critically evaluates the reasons for regulation in the context of contemporary and evolving events which affect the financial services sector including the overarching Australian Privacy Principles (APPs) set out by the Privacy Act 1988 (Cth). The unit also examines the Tax Agent Services Act 2009 (Cth) (TASA) requirements for tax (financial) advisors and the role of the Tax Practitioners Board (TPB) in enforcing the requirements under TASA. The unit examines the professional and ethical obligations in providing financial advice and the consequences of failing to comply with these obligations with a particular focus upon the critical importance of professional ethical conduct, the consequences understanding the need to put the clients interest first, the importance of identifying and resolving conflict of interest, and the need to identify and avoid instances of professional misconduct and unsatisfactory conduct. This unit is available as a standalone bridging unit which is accredited by the Financial Adviser Standards and Ethics Authority (FASEA) having met the FASEA curriculum and standards requirements.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7040/>)**LAWS 7041 Administrative Law (Juris Doctor) (10 Credit Points)****Legacy Code:** 201056

This unit examines the legal principles regulating the exercise of power by the executive arm of government in its various manifestations; ministers, government departments and officials, regulatory bodies, tribunals, inferior courts and local councils. This is examined in the context of Australian constitutional arrangements and it is taught in the context of constitutional themes and principles that underpin the law in this area. The exercise of power examined includes decision making, the exercise of discretion, delegated legislation and the decision making procedure of the major administrative tribunals. The focus is on the principles of judicial review developed by the courts, standing and remedies. There is also an examination of major non-judicial avenues of review by the major tribunals such as the Commonwealth Administrative Appeals Tribunal, and the Ombudsman. The unit will also examine Freedom of Information legislation.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** LAWS 7057**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7041/>)**LAWS 7042 Advanced Legal Negotiation (Juris Doctor) (10 Credit Points)****Legacy Code:** 201062

This unit examines how conflict arises and engages students to apply the main theories related to conflict and its resolution within diverse practical environments. Students will analyse and synthesis negotiation theories, skill-sets and studies, and will evaluate their respective usefulness as future legal professionals. Students will develop a value-laden negotiation toolbox and will grow in confidence in negotiations within a broad array of environments essential to the legal profession. Students will examine written scholarship, engage in negotiation simulations involving role- scenarios, case hypotheticals, experimental games, and will become intricately involved in other negotiation-related scenarios. Classes will include presentation of conceptual and strategic theories, simulations and role-playing scenarios applying these theories, and de-briefing of the theoretical and practical components of legal negotiation.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** LAWS 7044**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7042/>)**LAWS 7043 Advocacy (Juris Doctor) (10 Credit Points)****Legacy Code:** 201063

This unit imparts basic courtroom trial skills giving practice in applying substantive law, practice, procedure and evidence in a simulated courtroom. It also explores both professional and ethical issues involved in the courtroom. Students will engage with advocacy techniques and problem solving and reflect on advocacy problems such as those in leading cases and trial transcripts. Enrolment in this unit is limited owing to the practical nature of the unit.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** LAWS 7049**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7043/>)

LAWS 7044 Alternative Dispute Resolution (Juris Doctor) (10 Credit Points)**Legacy Code:** 201052

Alternative Dispute Resolution (ADR) processes are no longer 'alternative' but a major part of the contemporary justice system. Modern legal practice requires lawyers to negotiate settlements on behalf of clients and advise clients how to resolve disputes without litigation. Non-adversarial processes offer many benefits to parties, professionals and the community. This unit introduces students to the theory and practices of alternative dispute resolution processes and provide students with the opportunity to develop key ADR practice. Students will employ cultural awareness and appropriate communication strategies required for professional practice in dispute resolution, particularly in relation to Aboriginal and Torres Strait Islander peoples.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** LAWS 7056**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7044/>)**LAWS 7045 Civil Procedure and Arbitration (Juris Doctor) (10 Credit Points)****Legacy Code:** 201061

This unit provides a comprehensive analysis of the practical and theoretical issues encountered in Australian civil procedure. It examines the major roles and practices governing court supervised processes which are involved in superior court litigation as well as key aspects of arbitration. This unit will include a selection from the following or similar topics: characteristics of an adversarial system, case management procedure, the rules of pleadings, jurisdiction and joinder, service, discovery and Interrogatories, means of gathering evidence at pre-trial including subpoenas and notice to produce, judgment and appeals, enforcement and costs, and arbitration.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** LAWS 7056 AND LAWS 7061**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7045/>)**LAWS 7046 Constitutional Law (Juris Doctor) (10 Credit Points)****Legacy Code:** 201058

Constitutional Law introduces the legal rules and doctrines governing State and Commonwealth Constitutional systems in Australia. Topics covered include: State and Commonwealth Constitutions; legislative powers of the Commonwealth and State governments; Executive; the separation of powers doctrine; the legal relations between State and Commonwealth laws; Constitutional freedoms and restrictions on Commonwealth legislative powers.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** LAWS 7057**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7046/>)**LAWS 7047 Contracts (Juris Doctor) (10 Credit Points)****Legacy Code:** 201048

This unit deals with legal principles related to the development and application of contract law with an awareness of broader political, social, economic, cultural and ethical considerations. Contracts covers the formation of contracts, the requirement of writing, privity of contract, contractual terms and their interpretation, breach of contract, discharge of contractual obligations and elements vitiating its formation such as misrepresentation, misleading and deceptive conduct, mistake, undue influence, unconscionability, duress and discharge. Statutory developments are also considered such as the Contracts Review Act 1980 (NSW) and the Australian Consumer Law, as are the historic and theoretical aspects of the development of the law of contract. Students will collaborate in problem/case-based learning, engage with online learning materials, and participate in a Moot and viva voce to develop knowledge and skills in authentic ways.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** LAWS 7056**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7047/>)**LAWS 7048 Criminal Law (Juris Doctor) (10 Credit Points)****Legacy Code:** 201047

This unit examines the principles and aims of criminal law and criminal procedure. Students will engage with the definition, elements and application of crimes in the context of fatal and non-fatal offences against the person, the major sexual offences, property offences, and relevant defences. Students will analyse the elements of offences and apply the principles of statutory interpretation of offence provisions. Concepts of criminal responsibility and strict liability, the roles of principal agencies in the criminal justice system, and the central elements of the criminal process and sentencing are examined. Students will be introduced to the institutional arrangements of criminal procedure and their respective legislative and policy rationales. Students will engage with contemporary and historical considerations of criminal law, criminal responsibility and the impact of the criminal justice process in a broad social, political and economic context with a particular focus on issues including domestic violence and the impact of the criminal justice system on Aboriginal and Torres Strait Islander peoples. Students will be engaged with a range of practice-oriented exercises including Bail Applications.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** LAWS 7056**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7048/>)

LAWS 7049 Criminal Procedure and Evidence (Juris Doctor) (10 Credit Points)**Legacy Code:** 201059

The unit is designed to provide an understanding of the law, the theoretical underpinnings and the underlying policy issues, in the areas of evidence and criminal procedure. This unit deals with principles and stages of civil and criminal procedure in order to comply with the formal requirements for admission to legal practice, themes and theories of procedural law, identification and interpretation of the key legislative provisions and key stakeholders, and techniques of statutory interpretation including comprehension of the interpretation of statute through case law and academic commentary. It is expected that the students will be able to solve hypothetical problem questions through the application of procedural legislation and precedent.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** LAWS 7048**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7049/>)**LAWS 7050 Designing Law Apps for Access to Justice (Juris Doctor) (10 Credit Points)****Legacy Code:** 201065

This unit will teach students how to design and build an application using expert system software. This unit will provide students with a clinical legal experience by providing access to a community based client to ascertain their needs and undertake collaborative work to provide a solution that requires applied legal research, teamwork, innovative and creative design thinking, and the capacity to manage a project. This unit will teach students how to identify, design and build appropriate legal information systems for use in generating legal documents from precedents and assisting users to navigate solutions to legal problems. Students will be exposed to a variety of automated legal tasks and various legal and practical issues associated with their use, including issues of professional regulation. This will include guest lectures from those working on legal expert systems and related technologies. After learning the necessary skills, students will work in small groups to design and build a legal information system. This unit does not require students to have any pre-existing skills or experience in expert systems or computer programming. Instead, the unit itself includes instruction on how to use an expert system software.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7050/>)**LAWS 7051 Elder Law (Juris Doctor) (10 Credit Points)****Legacy Code:** 201066

Whilst Elder Law has been an acknowledged speciality for many years in countries such as Canada and the United States of America, it is only in the last two decades that it has gained recognition in Australia. This unit examines law, theories and issues relevant to an ageing community. The legal issues are examined in a broad social, cultural and ethical context. Issues of legal capacity relevant not only to the law of contracts but also to medical treatment and end of life decisions are considered. Similarly, the law relating to areas of special importance to the elder community such as age discrimination, pensions, retirement villages, wills and estate planning are also discussed.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7051/>)**LAWS 7052 Elder Law Industry Placement (Juris Doctor) (10 Credit Points)****Legacy Code:** 201067

This unit builds on the knowledge base of Elder Law (Juris Doctor) to provide work experience for Juris Doctor Law students. Our industry partners provide the opportunities for students to apply their knowledge and skill to work in various practice areas, with an emphasis on Elder Law related issues. This unit is designed to allow students to gain valuable experience in ethical and professional responsibility, in a workplace, while undertaking academic assessment. Students will also improve their legal and research skills which will assist them in the transition from university to the workplace. The placement will consist of a full time ten- day placement at selected industry workplaces with supervision by experienced legal practitioners. The unit will provide students with real-life work experiences in the legal issues associated with the practice of elder law and with an appreciation of the professional responsibilities essential for a 21st Century legal practitioner.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** LAWS 7051**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7052/>)**LAWS 7053 Equity & Trusts (Juris Doctor) (10 Credit Points)****Legacy Code:** 201054

This unit examines the principles of the law of equity and trusts in Australia. The primary emphasis is on the nature and development of the law of equity and students are also introduced to fundamental principles in the law of trusts. Topics include the nature and application of principles and maxims of Equity, the trust, the types of trusts and introduction to express trusts. The unit emphasises contemporary applications of the rules, principles and remedies of equity. It also explores issues that are presently unresolved and the subject of contention. The unit will also enable students to use a range of legal research tools to select high quality and relevant primary and secondary legal information to support the construction of solutions to hypothetical problems and theoretical legal issues that indicate a deep comprehension of equity and trusts.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** LAWS 7056**Co-requisite(s):** LAWS 7067**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7053/>)**LAWS 7054 Foundations of Chinese Law (Juris Doctor) (10 Credit Points)****Legacy Code:** 201077

Foundations of Chinese Law is taught intensively at a selected Chinese university. The unit introduces students to the basic structure of the Chinese legal system, its laws and the legal culture. Through seminars and field trips to Chinese courts and law firms, the unit aims to develop your understanding of how the Chinese legal system has developed in its political and cultural contexts. It covers the Chinese legal systems at the general level and in relation to specific law, such as contracts, foreign investment law, dispute resolution and procedure. Students will compare and reflect on key themes in Chinese and Australian law and practice.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** LAWS 7047**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7054/>)

LAWS 7055 Foundations of Indian Law (Juris Doctor) (10 Credit Points)**Legacy Code:** 201078

Foundations of Indian Law is taught intensively at a selected Indian university. The unit introduces students to the basic structure of the Indian legal system, its laws and the legal culture. Through seminars and field trips to Indian courts and law firms, the unit aims to develop your understanding of how the Indian legal system has developed in its political and cultural contexts. It covers the Indian legal systems at the general level and in relation to specific law, such as contracts, foreign investment law, dispute resolution and procedure. Students will compare and reflect on key themes in Indian and Australian law and practice.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** LAWS 7047**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7055/>)**LAWS 7056 Fundamentals of Australian Law (Juris Doctor) (10 Credit Points)****Legacy Code:** 201046

This unit provides students with the fundamental legal skills required to succeed in the study and practice of law. Students will be introduced to the Australian legal system, legal study skills, how law is made, how cases and statute interact, the Australian court hierarchies, legal research, legal referencing, case analysis skills, statutory interpretation skills, an introduction to legal ethics and justice, and an introduction to the impact of the Australian legal system on Australian First Peoples.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** LAWS 7058**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7056/>)**LAWS 7057 Government and Public Law (Juris Doctor) (10 Credit Points)****Legacy Code:** 201053

Government and Public Law is designed to provide an overview of government and public law in Australia and a foundation for the later study of Administrative Law and Constitutional Law. It introduces students to the principles and structures that underpin constitutional and administrative law in Australia. The unit. The unit has four key focus areas: Public Law in Australia, How Government Works, Government Accountability and Integrity, and Individuals and Government. Students will collaborate in problem/case-based learning and engage with online learning materials to develop knowledge and skills in legal research and communication enabling them to address critical contemporary public law challenges.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** LAWS 7056**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7057/>)**LAWS 7058 Introduction to Law (Juris Doctor) (10 Credit Points)****Legacy Code:** 201045

This intensive unit provides students with an introduction to the discipline of law and inducts students to the Australian Legal System, the School of Law, the legal profession, and the wider legal community. The unit surveys the fundamentals of the Australian legal systems and introduces students to a range of key legal concepts and debates. Students will be introduced to legal problem-solving methodology, the classifications of law, and skills needed to succeed in the study law. Students are introduced to the intellectual skills of fact-finding, critical analysis, logic, reasoning, evaluation and communication. Students will attend excursions to courts, tribunals, law firms and community legal centres. Students will reflect upon their emerging professional profiles to foster and develop career aspirations.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7058/>)**LAWS 7059 Judicial Internship (Juris Doctor) (10 Credit Points)****Legacy Code:** 201069

This unit provides an internship opportunity for later year law students. Students will spend twelve days throughout the semester at selected courts and tribunals under the supervision of magistrates, judges or tribunal members. The unit will provide students with an opportunity to observe the courts and tribunals first hand, to be mentored by a judicial officer, to engage in practical assistance to the relevant court or tribunal, and to appreciate the professional responsibilities essential for a 21st Century legal practitioner and judicial officer. The unit will assist students in advancing their legal and research skills and deepen their experience of the social, practical and ethical complexities encountered by the legal profession. The unit will also assist students in their transition from university to the profession. Entry is competitive and will include a written application and interview.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** LAWS 7066 AND

LAWS 7048 AND

LAWS 7072 AND

LAWS 7061 AND

LAWS 7047

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7059/>)**LAWS 7060 Law of Associations (Juris Doctor) (10 Credit Points)****Legacy Code:** 201057

This unit deals with issues that arise in relation to the selection of appropriate structures for the conduct of non-profit and commercial dealings. Students examine the legal and practical requirements involved in creating, operating and winding up associations, partnerships and corporations. Emphasis is on the creation and operation of corporations, and the duties and liabilities of directors and officers, as well as the rights and obligations of shareholders. It is expected that students will be able to propose solutions to legal problem questions and issues relating to commercial associations with a focus on corporate law displaying a clear and coherent argument that evidences legal research, legal reasoning and professional judgement in responding to issues relating to commercial associations with a focus on corporate law.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** LAWS 7053**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7060/>)

LAWS 7061 Legal Analysis and Critique (Juris Doctor) (10 Credit Points)**Legacy Code:** 201050

This unit introduces students to the processes of critical evaluation of arguments, legal communication and logical and critical problem solving involving statutory interpretation and precedent. Students will have the opportunity to explore how law is made, some of the institutional limitations on law and justice, and the impact of globalisation on law. It introduces theories about the nature and function of law in historical, political, social, economic, cultural, ethical and international contexts. The connection between race, gender, culture and law is examined within the context of the Australian legal tradition, legal history, and the impact of the Australian legal system on Aboriginal and Torres Strait Islander Peoples. Students will use logical and critical skills to develop solutions to problems involving statutory interpretation and the application of precedent; and articulate legal thought effectively and persuasively in written formats for lay and expert audiences.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** LAWS 7056**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7061/>)**LAWS 7062 Legal Research Dissertation (10 Credit Points)****Legacy Code:** 201074

This unit provides students with a capstone research experience in relation to a supervised legal dissertation. Students develop and refine legal research and writing skills by analysing a legal topic chosen in consultation with an academic supervisor. This unit includes training in research methodology and requires the student to undertake a literature review, to develop a research proposal, to present on the proposal and finished work, and to submit a dissertation. This year long unit can only be commenced in Autumn semester and lasts the equivalent of two consecutive semesters. The research project areas will principally focus upon those areas identified by the School of Law in its Research Strategy.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** LAWS 7027**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7062/>)**LAWS 7063 Legal Research Project 1 (10 Credit Points)****Legacy Code:** 201075

This unit provides students with a capstone research experience in relation to a supervised and structured research project. Students will develop and refine their legal research and writing skills by exploring and analysing a legal topic chosen in consultation with a member of the academic staff in pursuing a particular research interest. Working closely with a supervisor, students will compose a research paper of 5,000 words on an approved topic in law and will provide a 20-minute class presentation based upon the completed project. The research project areas will principally focus upon those areas identified by the School of Law in its Research Strategy.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** LAWS 7027**Equivalent Subjects:** LAWS 7023 - International Independent Study Law 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7063/>)**LAWS 7064 Legal Research Project 2 (10 Credit Points)****Legacy Code:** 201076

This unit provides students with a capstone research experience in relation to a supervised and structured research project. Students will be required to reflect on their earlier research projects and to apply learning from these to enhance this unit's research outcomes. Students will develop and refine their legal research and writing skills by exploring and analysing a legal topic chosen in consultation with a member of the academic staff in pursuing a particular research interest. Working closely with a supervisor, students will compose a research paper of 5,000 words on an approved topic in law and will provide a 20-minute class presentation based upon the completed project. The research project areas will principally focus upon those areas identified by the School of Law in its Research Strategy.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** LAWS 7063**Equivalent Subjects:** LAWS 7024 - International Independent Study Law 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7064/>)**LAWS 7065 Moot Court (Juris Doctor) (10 Credit Points)****Legacy Code:** 201070

Students will participate in mooting conducted before an appellate court or tribunal. Students will be provided with a grounding in issues including jurisdiction, admissibility, and remedies. The unit will focus on one or more areas of domestic substantive law and will include a research component. Students will prepare and present a hypothetical case before an appellate court or tribunal and will be given the opportunity to develop their advocacy skills, including the preparation of written submissions and delivery of oral submissions. Undertaking this unit would be useful for students seeking to participate in one or more law mooting competitions representing Western Sydney University.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** LAWS 7072 AND

LAWS 7046 AND

LAWS 7047 AND

LAWS 7067

LAWS 7066 Professional Responsibility and Legal Ethics (Juris Doctor) (10 Credit Points)**Legacy Code:** 201049

This unit provides students with the opportunity to critically reflect on the legal, statutory and ethical principles and standards that underpin the professional obligations of legal practitioners. Students will also analyse ethical issues that commonly occur in professional legal practice in contemporary multicultural Australia, particularly with Aboriginal and Torres Strait Islander peoples. It deals with the professional, legal and ethical responsibilities legal practitioners owe to the law, the courts, their clients and to fellow practitioners, as well as the state and society at large. Students will be able to explain and evaluate the law and practice of legal practitioners, by reference to key topics, such as: professionalism; legal ethics; the history, structure and regulation of the legal profession; and the interpersonal, psychological and cultural factors affecting lawyering. In addition students will be able to demonstrate the process of ethical decision making by selecting and using ethical decision making tools in a legal context and develop their own ethical framework by exploring the relationship between personal and professional attitudes and values; and by reflecting on their own performance.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** LAWS 7056**Restrictions:** Please see the Subject Details page for any restrictions for this subject
Subject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7066/>)**LAWS 7067 Property Law (Juris Doctor) (10 Credit Points)****Legacy Code:** 201055

Students will learn about the concept of property and the nature of property rights including the boundaries between property and other rights and the boundaries between different forms of property. The unit content includes the doctrine of tenure and estates, native title, and legal and equitable interests in land. Specific topics to be covered include personal property and securities, mortgages, leases, easements and profits a prendre, co-ownership, the Torrens system of statutory registration of interests in land, and the principles for resolving conflicting proprietary interests.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** LAWS 7056 AND

LAWS 7047

Restrictions: Please see the Subject Details page for any restrictions for this subject
Subject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7067/>)**LAWS 7068 Remedies (Juris Doctor) (10 Credit Points)****Legacy Code:** 201060

This unit examines the nature, goals and structure of private law remedies, and is organised around the remedial goals of compensation, perfection, vindication, disgorgement, restitution, and punishment. Both judicial and non-judicial remedies in Australian private law are examined including the principles of the major common law, equitable, restitutionary, and statutory remedies available to wronged parties in a variety of circumstances. Emphasis is on the analysis of practical and theoretical advantages and disadvantages of various remedies. The unit explores how and why different remedial goals are accorded differing priority and are given effect in different ways across different areas of private law thereby deepening the student's understanding of remedies and the nature of each of these substantive fields of private law. The content of this unit elucidates the principles relating to the assessment of all forms of damages under common law and statute as well as the judicial approaches to the grant of injunctions and other non-monetary relief.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** LAWS 7053**Restrictions:** Please see the Subject Details page for any restrictions for this subject
Subject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7068/>)**LAWS 7069 Revenue Law (Juris Doctor) (10 Credit Points)****Legacy Code:** 201071

This unit examines the legal basis for the Australian taxation system and its application. It will cover taxation of income from personal exertion, business and property, as well as the taxation of fringe benefits provided in the context of employment and the goods and services tax (popularly known as the GST). Lectures and tutorials cover the constitutional basis of taxation, income tax assessment and the concepts of income tax, allowable deductions, other federal and state taxes, taxation of business associations (partnerships, companies, trusts and primary producers), taxation accounting, administration and practice, taxation planning and avoidance.

LAWS 7070 Revenue Law Industry Placement (Juris Doctor) (10 Credit Points)**Legacy Code:** 201072

This work integrated learning unit builds upon the knowledge base of 201071 Revenue Law (Juris Doctor) to provide industry experience for later year 2826 Juris Doctor students. Students who have successfully completed 201071 Revenue Law (Juris Doctor) with a Credit or above result will be eligible to apply for this industry experience. This unit is designed to allow students to gain valuable experience in ethical and professional responsibility in a workplace, while undertaking academic assessment. Students will also improve their legal and research skills which will assist them in the transition from university to the workplace. The placement will consist of a full time four-week placement at the Australian Tax Office or other suitable workplace approved by the School of Law. Students will work in various practice areas with an emphasis on technical legal issues and will be supervised by senior staff members.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** LAWS 7069**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7070/>)**LAWS 7071 Technology, Innovation and the Law (Juris Doctor) (10 Credit Points)****Legacy Code:** 201073

This unit enables students to proactively adapt to the transforming nature of the legal profession. Students will engage with the technology and innovation expectations of contemporary business, legal practice and community engagements - including the concepts and areas of Big Data, Artificial Intelligence, machine learning, Blockchain, legal task automation, e-contracts and smart contracting, technology assisted review, e-Courts, FinTech and RegTech, law tech start-ups, and chatbots. Students will be able to develop legal, ethical and regulatory digital literacies and personal professional strategies to maintain and use these literacies innovatively. The curriculum will offer insights from a number of innovative and technology focused legal industry experts.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** Students must have successfully completed 80 credit points of 2826 Juris Doctor core units to enrol in this unit**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7071/>)**LAWS 7072 Torts Law (Juris Doctor) (10 Credit Points)****Legacy Code:** 201051

Torts Law will provide students with the opportunity to critically analyse the key principles of Australian torts law and its impact within the broader legal context. The topics covered include legal principles and policy of a variety of torts, defences and remedies. The unit also introduces students to legal skills, statutory interpretation and legal problem solving, as well as placing the law in the wider political and social context. Students will be able to search for, analyse, and evaluate cases, statutes, and theoretical writings relevant to torts law, within the common law and statute from multiple law jurisdictions, to resolve legal problems.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** LAWS 7056**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws7072/>)**LAWS 9001 Higher Degree Research Thesis - Law (20 Credit Points)****Legacy Code:** 800039**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/laws9001/>)

Manufacturing Eng. (MANU)

MANU 2001 Design and Manufacturing (10 Credit Points)**Legacy Code:** 301340

This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This unit introduces basic aspects of design and manufacturing, process selection, manufacturing processes, material selection based on material properties and the use of computers in the design process. A project selected allows students to work individually and in a team environment to achieve the final objective which is a workable product. As part of the project, students are asked to develop a product from a page of functional requirements by developing a concept sketch, material selection, detail engineering drawings, process plan and finally making the product in a workshop. At the end of the semester, the products are tested.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/manu2001/>)**MANU 3003 Creative Digital: Robots and Avatars (10 Credit Points)****Legacy Code:** 301307

This is a project-based learning unit that assists students to creatively synthesise skills learned in previous units. Students are introduced to current problem solving in professional practice that negotiates between physical and digital components to form smart artefacts. That relation is represented with the development of an interactive robot and its digital mirror counterpart as its avatar. The unit also assists in the preparation of a professional portfolio show piece for job applications in the industry. Learning by experimentation, the unit links traditional skillsets including software and 3D printing with new forms of design, from engineering narratives to digital creativity within augmented and virtual environments.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** MANU 3001 - Graphics 5 Creative Computing**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/manu3003/>)

Mathematics (MATH)

MATH 0002 Foundations of Mathematics (WSTC) (10 Credit Points)**Legacy Code:** 900055

Foundations of Mathematics is designed to develop knowledge, understanding and skills in Mathematics to a level, which is appropriate for day-to-day life and also as a basis for further study at university entrance level. The course aims to build on existing skills, develop skills in new areas and encourage students' confidence in their own ability.

Level: Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0002/>)

MATH 0003 Introductory Business Mathematics (WSTC) (10 Credit Points)**Legacy Code:** 900114

This unit consists of two modules. The first module has been designed to provide a revision of basic mathematical concepts and methods that apply to business situations. They include basic mathematical operations, percentages, equations, index numbers, logarithms, direct and inverse variation, and graphs. The second module has been designed to provide students with the necessary skills for making practical financial decisions. The concepts taught include simple interest, compound interest, annuities and their applications as they apply in a business environment.

Level: Undergraduate Level 0 Preparatory subject**Equivalent Subjects:** MATH 0007 - Mathematics 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0003/>)**MATH 0004 Mathematics (WSTC Prep) (10 Credit Points)****Legacy Code:** 700044

The Mathematics unit is designed and written to prepare students for further mathematical study at first year university level. It provides a comprehensive introduction to the study of calculus and its applications in the real world. The unit develops those skills peculiar to the mathematical requirements of further study in the areas of Business, Computing, Information Technology, Science and Engineering.

Level: Undergraduate Level 0 Preparatory subject**Equivalent Subjects:** MATH 0005 - Mathematics (UWSC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0004/>)**MATH 0005 Mathematics (WSTC) (10 Credit Points)****Legacy Code:** 900032

The Mathematics unit is designed and written to prepare students for further mathematical study at first year university level. It provides a comprehensive introduction to the study of calculus and its applications in the real world. The unit develops those skills peculiar to the mathematical requirements of further study in the areas of Business, Computing, Information Technology, Science and Engineering.

Level: Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0005/>)**MATH 0006 Mathematics 1 (WSTC Prep) (10 Credit Points)****Legacy Code:** 700284

This unit has been designed to enhance students' numeracy skills and their understanding of basic mathematical concepts taught in high school mathematics. The topics include arithmetic and algebra, elementary functions, and basic geometry and trigonometry. The unit will prepare students and help them follow more advanced topics in Mathematics 2, Mathematics for Engineers Preliminary and Mathematics for Engineers 1, as well as various other Engineering and ICT units.

Level: Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0006/>)**MATH 0007 Mathematics 1 (WSTC) (10 Credit Points)****Legacy Code:** 900085**Level:** Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0007/>)**MATH 0008 Mathematics 2 (WSTC Prep) (10 Credit Points)****Legacy Code:** 700146

This unit has been specifically designed for students who need to refresh or upgrade their understanding of basic mathematical concepts taught in high school mathematics. The topics include basic arithmetic and algebra, elementary functions, geometry, trigonometry and coordinate geometry.

Level: Undergraduate Level 0 Preparatory subject**Pre-requisite(s):** Students enrolled in 7162 Diploma in Engineering Extended 7138 Diploma in Information and Communication Technology Extended - ICT 7139 Diploma in Information and Communication Technology Extended 7140 Diploma in Information and Communication Technology Extended Information Systems and 7141 Diploma in Information and Communication Technology (Health Information Management) Extended must pass MATH 0006 Mathematics 1 prior to enrolling in this unit**Equivalent Subjects:** MATH 0009 - Mathematics 2 (UWSC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0008/>)**MATH 0009 Mathematics 2 (WSTC) (10 Credit Points)****Legacy Code:** 900086

This unit has been specifically designed for students who need to refresh or upgrade their understanding of basic mathematical concepts taught in high school mathematics. The topics include basic arithmetic and algebra, elementary functions, geometry, trigonometry and coordinate geometry.

Level: Undergraduate Level 0 Preparatory subject**Equivalent Subjects:** MATH 0008 - Mathematics 2 (WSTC Prep)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0009/>)**MATH 0010 Mathematics 3 (WSTC Prep) (10 Credit Points)****Legacy Code:** 700203

This unit is designed to prepare students for further mathematical study at first year university level. It provides a comprehensive introduction to the study of calculus and its applications in the real world. The concepts studied also include arithmetic and geometric series, trigonometry, inverse trigonometric functions, vectors and matrices.

Level: Undergraduate Level 0 Preparatory subject**Pre-requisite(s):** MATH 0008**Equivalent Subjects:** MATH 0011 - Mathematics 3 (UWSC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0010/>)**MATH 0011 Mathematics 3 (WSTC) (10 Credit Points)****Legacy Code:** 900087**Level:** Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0011/>)

MATH 0012 Mathematics B (WSTC Prep) (10 Credit Points)**Legacy Code:** 700069

This unit is replaced by 700146 - Foundation Mathematics 2 (UWSCFS) from Term 1 2014. This unit has been specifically designed for students who need to refresh or upgrade their understanding of basic mathematical concepts taught in high school mathematics. The topics include basic arithmetic and algebra, geometry, trigonometry, coordinate geometry, quadratic functions, indices, logarithms and an introduction to differential calculus.

Level: Undergraduate Level 0 Preparatory subject**Equivalent Subjects:** MATH 0013 - Mathematics B**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0012/>)**MATH 0013 Mathematics B (WSTC) (10 Credit Points)****Legacy Code:** 900033

The Mathematics B course is designed and written to prepare students for further mathematical study at first year university level in courses that do not demand an in-depth study of Calculus. The course particularly develops those skills peculiar to the mathematical requirements of further study in the area of Business, Finance and Economics. It is usually studied in conjunction with 'Commercial Mathematics'.

Level: Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0013/>)**MATH 0014 Mathematics C (WSTC Prep) (10 Credit Points)****Legacy Code:** 700025

The Mathematics C unit is designed and written to prepare students for mathematical study at first year university level, specifically in the area of Engineering. It provides a comprehensive introduction to the study of calculus and its applications in the real world.

Level: Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0014/>)**MATH 0015 Mathematics Extension (WSTC) (10 Credit Points)****Legacy Code:** 900034

The course Mathematics Extension is designed and written to prepare students for further mathematical study at first year university level, particularly in the areas of Science and Engineering. Mathematical concepts developed in the 'Mathematics' course are expanded upon and harder mathematical concepts are introduced. The course develops those skills peculiar to the mathematical requirements of further study in the areas of Computing, Information Technology, Science and Engineering. Undergraduate study in the Physics and Engineering areas of university require the student to have been exposed to the mathematics presented at Extension level.

Level: Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0015/>)**MATH 0017 Mathematics for Health Science (WSTC) (10 Credit Points)****Legacy Code:** 900088

This unit is designed to prepare students for further study at university level in the areas of Health Science and, in particular, Nursing. Undergraduate study in Health Science places a particular emphasis on mathematical skills in the workplace and this unit provides a basis for developing those skills. The unit places equal emphasis on both theoretical and practical application of mathematical techniques as would apply in practice in the Health environment.

Level: Undergraduate Level 0 Preparatory subject**Equivalent Subjects:** LGYB 1384 - Mathematics for Nursing (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0017/>)**MATH 0018 Maths Start Algebra 1 (10 Credit Points)****Legacy Code:** 900646**Level:** Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0018/>)**MATH 0019 Maths Start Algebra 2 (10 Credit Points)****Legacy Code:** 900647**Level:** Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0019/>)**MATH 0020 Maths Start Calculus (10 Credit Points)****Legacy Code:** 900648**Level:** Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0020/>)**MATH 0021 Maths Start Preparation for Calculus (10 Credit Points)****Legacy Code:** 900652**Level:** Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0021/>)**MATH 0022 Maths Start Statistics (10 Credit Points)****Legacy Code:** 900650**Level:** Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0022/>)**MATH 0023 Maths Start Trigonometry (10 Credit Points)****Legacy Code:** 900651**Level:** Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0023/>)

MATH 0024 Maths Start for Engineering (10 Credit Points)**Legacy Code:** 900649**Level:** Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0024/>)**MATH 0025 Nursing Numeracy (5 Credit Points)****Legacy Code:** 900206**Level:** Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0025/>)**MATH 0026 Practical Mathematics (WSTC) (10 Credit Points)****Legacy Code:** 900115

This unit has been designed to develop the students' mathematical literacy and mathematical thinking necessary for further education, work and everyday life. The unit aims to build on existing skills, develop skills in new areas and encourage students' confidence in their own ability by applying mathematical concepts to a series of real life problems.

Level: Undergraduate Level 0 Preparatory subject**Equivalent Subjects:** MATH 0002 - Foundations of Mathematics (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0026/>)**MATH 0027 Scientific Methods for Construction Management (WSTC Prep) (10 Credit Points)****Legacy Code:** 700264

This unit is designed to assist students to become competent in the fields of mathematics and basic physical science. It reinforces the mathematical skills in the areas of basic arithmetic, algebra, geometry and trigonometry. The unit introduces the study of forces, work and energy and selected applications of these concepts. Emphasis is placed on developing the key competencies of scientific methods to provide the necessary introduction for Building Design and Construction Technology.

Level: Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0027/>)**MATH 0028 Statistics for Academic Purposes (WSTC Prep) (5 Credit Points)****Legacy Code:** 700045

Understanding, creating and working with statistics are fundamental skill requirements in many areas and career pathways within the arts, business, science and the humanities disciplines. This unit will provide students with a comprehensive overview of statistics in order to prepare them for success in first year university units of study where they will further develop their skills. Through both individual and group tasks students will use statistics to organize and display data as well as draw valid inferences, based on data, by using appropriate statistical tools.

Level: Undergraduate Level 0 Preparatory subject**Equivalent Subjects:** MATH 0029 - Statistics for Academic Purposes (UWSC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0028/>)**MATH 0029 Statistics for Academic Purposes (WSTC) (5 Credit Points)****Legacy Code:** 900011

Understanding, creating and working with statistics are fundamental skill requirements in many areas and career pathways within the arts, business, science and the humanities disciplines. This unit will provide students with a comprehensive overview of statistics in order to prepare them for success in first year university units of study where they will further develop their skills. Through both individual and group tasks students will use statistics to organize and display data as well as draw valid inferences, based on data, by using appropriate statistical tools.

Level: Undergraduate Level 0 Preparatory subject**Equivalent Subjects:** MATH 0028 Statistics for Academic Purposes (WSTC Prep)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0029/>)**MATH 0030 Introduction to Building Calculations (WSTC Prep) (10 Credit Points)**

This unit is designed to assist students to become competent in the field of basic and introductory senior mathematics. It introduces and reinforces mathematical skills in the areas of basic arithmetic, algebra and geometry. Emphasis is placed on developing key competencies in building calculations.

Level: Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math0030/>)**MATH 1001 Analysis of Change (10 Credit Points)****Legacy Code:** 300830

This Level 1 unit introduces students to the mathematical modelling techniques that are used to formulate and solve problems in the physical and biological sciences. To use these techniques successfully, students must develop the ability to formulate a problem mathematically and then be able to use the appropriate knowledge to test conclusions by analytical and numerical means. These skills will be emphasized as each technique is introduced. Apart from some introductory work on logarithms and exponentials (essential concepts in the sciences), the main techniques developed involve aspects of differential calculus, culminating in the use of differential equations to model real phenomena in the sciences.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** MATH 1011 - Fundamentals of Mathematics LGYB 0484 - Analysis of Change (WSTC)**Incompatible Subjects:** MATH 1014 - Mathematics 1A**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1001/>)**MATH 1002 Analytics Programming (10 Credit Points)****Legacy Code:** 301107

This unit covers the use of computers and computer programming for Data Science. After briefly considering spreadsheet systems, the unit will consider programming in the statistical system "R" in depth. Finally, other special purpose languages will be touched briefly (eg. SQL).

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1002/>)

MATH 1003 Biometry (10 Credit Points)**Legacy Code:** 200263

Biometry introduces students to various statistical techniques necessary in scientific endeavours. Presentation of the content will emphasize the correct principles and procedures for collecting and analysing scientific data, using a hands-on approach. Topics include effective methods of gathering data, statistical principles of designing experiments, error analysis, describing different sets of data, probability distributions, statistical inference, non-parametric methods, simple linear regression and analysis of categorical data.

Level: Undergraduate Level 1 subject

Equivalent Subjects: MATH 1032 - Statistics for Science MATH 1028 - Statistical Decision Making MATH 1030 - Statistics for Business ECON 1006 - Introduction to Economic Methods MATH 1004 - Biometry (WSTC) MATH 1029 - Statistical Decision Making (WSTC) 30123 - Management Analytics

Incompatible Subjects: MATH 1025 - Quantitative Techniques**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1003/>)**MATH 1004 Biometry (WSTC) (10 Credit Points)****Legacy Code:** 700033

This unit introduces students to various statistical techniques necessary in scientific endeavours. Presentation of the content will emphasize the correct principles and procedures for collecting and analysing scientific data, using a 'hands-on' approach. Topics include effective methods of gathering data, statistical principles of designing experiments, error analysis, describing different sets of data, probability distributions, statistical inference, non-parametric methods, and simple linear regression and correlation.

Level: Undergraduate Level 1 subject

Equivalent Subjects: MATH 1030 Statistics for Business ECON 1006 Introduction to Economic Methods MATH 1032 Statistics for Science MATH 1003 Biometry MATH 1028 Statistical Decision Making MATH 1031 Statistics for Business (WSTC) MATH 1029 Statistical Decision Making (WSTC)

Incompatible Subjects: MATH 1025 Quantitative Techniques**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1004/>)**MATH 1006 Discrete Mathematics (10 Credit Points)****Legacy Code:** 200025

Discrete Mathematics introduces set theory, symbolic logic, graph theory and some counting techniques. The unit develops mathematical thinking and builds problem solving skills. It provides a solid foundation for further study in mathematics or computing.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** LGYB 0448 - Discrete Mathematics (UWSC)**Incompatible Subjects:** MATH 2004 - Discrete Structures and Complexity**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1006/>)**MATH 1010 Fundamentals for Engineering Studies (WSTC AssocD) (10 Credit Points)****Legacy Code:** 700112

This unit serves as an introduction to the key mathematics and physics concepts required to study engineering at a tertiary level. This unit has two major components, physics and mathematics. The physics component includes physical quantities, scalars and vectors, kinematics and dynamics. The mathematics component includes basic arithmetic and algebra, trigonometry, coordinate geometry, relations and functions and introduction to differentiation.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1010/>)**MATH 1012 Management Analytics (10 Credit Points)****Legacy Code:** 301123

Management Analytics provides students with introductory knowledge and skills in identifying, analysing and interpreting data relevant to Business, Human Resources and Management. In order to develop evidence-based decision-making skills, students will learn how to work with data. Students will organise and summarise data, present data visually and design surveys for new data collection and use. Students will develop skills in understanding decision-making models and forecasting as a means of improving business processes and HR, management and business metrics.

Level: Undergraduate Level 1 subject

Equivalent Subjects: MATH 1030 Statistics for Business ECON 1006 Introduction to Economic Methods MATH 1028 Statistical Decision Making MATH 1003 Biometry MATH 1032 Statistics for Science MATH 1031 Statistics for Business (WSTC) MATH 1029 Statistical Decision Making (WSTC)

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1012/>)**MATH 1014 Mathematics 1A (10 Credit Points)****Legacy Code:** 300672

This Level 1 unit provides a solid foundation in the theory and applications of differential calculus, as well as some introductory work on complex numbers. It is the first of two units developing aspects of calculus.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** LGYA 4423 Concepts of Mathematics**Incompatible Subjects:** LGYA 4295 Mathematics for Business MATH 1016 Mathematics for Engineers 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1014/>)**MATH 1015 Mathematics 1B (10 Credit Points)****Legacy Code:** 300673

This Level 1 unit provides a solid foundation in the theory and applications of integral calculus, as well as some introductory work on linear algebra and infinite sequences and series. It is the second of two units developing aspects of calculus.

Level: Undergraduate Level 1 subject**Pre-requisite(s):** MATH 1014**Equivalent Subjects:** LGYA 4423 - Concepts of Mathematics**Incompatible Subjects:** LGYA 4295 - Mathematics for Business MATH 1016 - Mathematics for Engineers 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1015/>)

MATH 1016 Mathematics for Engineers 1 (10 Credit Points)**Legacy Code:** 200237

This unit is the first of two mathematics units to be completed by all students enrolled in an engineering degree during their first year of study. The content covers a number of topics that underpin the later-stage engineering mathematics units. The subject matter includes: differential and integral calculus of a single variable, complex numbers, aspects of matrix algebra, vectors, and some elementary statistics and probability theory. The aim of this unit is to introduce a number of key mathematical concepts needed in the study of Engineering, and to provide a solid foundation for the follow-on unit Mathematics for Engineers 2.

Level: Undergraduate Level 1 subject**Pre-requisite(s):** Students enrolled in 3740 Bachelor of Engineering (Honours) or 3689 Bachelor of Engineering must have passed MATH 1021 Mathematics for Engineers Preliminary otherwise permission is required**Equivalent Subjects:** MATH 1007 Engineering Mathematics 1 LGYA 4425 Mathematical Methods A LGYA 4426 Mathematical Methods B MATH 1018 Mathematics for Engineers 1 (WSTC) MATH 1017 Mathematics for Engineers 1 (WSTC Assoc Deg)**Incompatible Subjects:** LGYA 4295 Mathematics for Business LGYA 4423 Concepts of Mathematics MATH 1014 Mathematics 1A MATH 1015 Mathematics 1B**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1016/>)**MATH 1017 Mathematics for Engineers 1 (WSTC AssocD) (10 Credit Points)****Legacy Code:** 700101

The content of this unit covers a number of topics in mathematics essential to the study of engineering. The subject matter includes: matrix algebra, complex numbers, vectors, functions and inverse functions, differential and integral calculus of a single variable and some elementary statistics and probability theory.

Level: Undergraduate Level 1 subject**Pre-requisite(s):** MATH 1022**Equivalent Subjects:** MATH 1016 - Mathematics for Engineers 1 MATH 1018 - Mathematics for Engineers 1 (WSTC)**Incompatible Subjects:** MATH 1014 - Mathematics 1A MATH 1015 - Mathematics 1B MATH 1011 - Fundamentals of Mathematics MATH 1021 - Mathematics for Engineers Preliminary**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1017/>)**MATH 1018 Mathematics for Engineers 1 (WSTC) (10 Credit Points)****Legacy Code:** 700019

The content of this unit covers a number of topics that underpin the later-stage engineering mathematics units. The subject matter includes: differential and integral calculus of a single variable, complex numbers, aspects of matrix algebra, vectors and some elementary statistics and probability theory.

Level: Undergraduate Level 1 subject**Pre-requisite(s):** MATH 1023**Equivalent Subjects:** MATH 1016 - Mathematics For Engineers 1 MATH 1017 - Mathematics for Engineers 1 (WSTC Assoc Deg)**Incompatible Subjects:** MATH 1014 - Mathematics 1A MATH 1015 - Mathematics 1B MATH 1011 - Fundamentals of Mathematics**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1018/>)**MATH 1019 Mathematics for Engineers 2 (10 Credit Points)****Legacy Code:** 200238

This unit is the second of two mathematics units to be completed by students enrolled in an Engineering degree during their first year of study. The content covers a number of topics that build on the calculus knowledge from Mathematics for Engineers 1. The subject matter includes: ordinary differential equations, Laplace transforms and multi-variable calculus.

Level: Undergraduate Level 1 subject**Pre-requisite(s):** MATH 1016**Equivalent Subjects:** LGYB 0454 Mathematics for Engineers 2 (WSTC) MATH 1020 Mathematics for Engineers 2 (WSTC Assoc Deg)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1019/>)**MATH 1020 Mathematics for Engineers 2 (WSTC AssocD) (10 Credit Points)****Legacy Code:** 700102

The content of this unit covers a number of topics that build on the student's calculus knowledge from Mathematics for Engineers 1. The subject matter includes: ordinary differential equations, Laplace transforms and multi-variable calculus. Offerings of alternate units are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate unit.

Level: Undergraduate Level 1 subject**Pre-requisite(s):** MATH 1017**Equivalent Subjects:** MATH 1019 - Mathematics for Engineers 2 LGYB 0454 - Mathematics for Engineers 2 (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1020/>)**MATH 1021 Mathematics for Engineers Preliminary (10 Credit Points)****Legacy Code:** 300743

This unit is specifically designed for students enrolling in the Bachelor of Engineering (Honours) and Bachelor of Engineering Science degree courses, who do not have a mathematical background in differential and integral calculus. The content of the unit consists of topics in arithmetic and algebra, trigonometry and trigonometric functions, logarithmic and exponential functions, differential and integral calculus.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** MATH 1023 - Mathematics for Engineers Preliminary (WSTC) MATH 1022 - Mathematics for Engineers Preliminary (WSTC Assoc Deg)**Incompatible Subjects:** LGYA 4425 - Mathematical Methods A MATH 1011 - Fundamentals of Mathematics MATH 1016 - Mathematics for Engineers 1 MATH 1018 - Mathematics for Engineers 1 (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1021/>)

MATH 1022 Mathematics for Engineers Preliminary (WSTC AssocD) (10 Credit Points)**Legacy Code:** 700103

This unit covers the fundamental mathematical concepts and techniques necessary for the study of Engineering. Topics include Arithmetic and Algebra, Trigonometry, Functions, and Introductory Differential and Integral calculus.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** MATH 1021 - Mathematics for Engineers Preliminary MATH 1023 - Mathematics for Engineers Preliminary (WSTC)**Incompatible Subjects:** MATH 1011 - Fundamentals of Mathematics**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1022/>)**MATH 1023 Mathematics for Engineers Preliminary (WSTC) (10 Credit Points)****Legacy Code:** 700100

This unit covers the fundamental mathematical concepts and techniques necessary for the study of Engineering. Topics include Arithmetic and Algebra, Trigonometry, Functions, and Introductory Differential and Integral calculus.

Level: Undergraduate Level 1 subject

Pre-requisite(s): Students enrolled in 6033 Diploma in Engineering Bachelor of Engineering Studies 7034 Diploma in Engineering or 7162 Diploma in Engineering Extended must pass MATH 0008 Mathematics 2 (WSTC Prep) before enrolling in this unit Students enrolled in 7066 Diploma in Engineering Extended must pass MATH 0010 Mathematics 3 (WSTC Prep) before enrolling in this unit

Equivalent Subjects: MATH 1021 - Mathematics for Engineers Preliminary MATH 1022 - Mathematics for Engineers Preliminary (WSTC Assoc Deg)**Incompatible Subjects:** MATH 1011 - Fundamentals of Mathematics**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1023/>)**MATH 1026 Quantitative Thinking (10 Credit Points)****Legacy Code:** 300831

This level 1 unit develops the quantitative skills that underpin many fields of study in the sciences. The content covered includes basic algebra, functions, graphs, equations, linear and quadratic, introductory probability and descriptive statistics. These mathematical/statistical concepts will be revised and developed using scientific concepts such as molarity and dilution, optical density, population growth, and predator-prey models. In all aspects of this unit, students will be developing and using critical thinking skills to solve mathematical/statistical problems set in a scientific context.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** MATH 1011 - Fundamentals of Mathematics MATH 1027 Quantitative Thinking (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1026/>)**MATH 1027 Quantitative Thinking (WSTC) (10 Credit Points)****Legacy Code:** 700123

This Level 1 unit develops the quantitative skills that underpin many fields of study in the sciences. The content covered includes basic algebra, functions, graphs, equations - linear and quadratic, introductory probability and descriptive statistics. These mathematical/statistical concepts will be revised and developed using scientific concepts such as molarity and dilution, optical density, population growth, and predator-prey models. In all aspects of this unit, students will be developing and using critical thinking skills to solve mathematical/statistical problems set in a scientific context.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** MATH 1011 - Fundamentals of Mathematics MATH 1026 - Quantitative Thinking**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1027/>)**MATH 1028 Statistical Decision Making (10 Credit Points)****Legacy Code:** 300700

Statistical Decision Making introduces students to various statistical techniques supporting the study of computing and science.

Presentation of the content will emphasize the correct principles and procedures for collecting and analysing scientific data, using information and communication technologies. Topics include describing different sets of data, probability distributions, statistical inference, and simple linear regression and correlation.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** MATH 1032 Statistics for Science MATH 1003 Biometry MATH 1030 Statistics for Business ECON 1006 Introduction to Economic Methods MATH 1012 Management Analytics MATH 1031 Statistics for Business (WSTC) MATH 1004 Biometry (WSTC) MATH 1029 Statistical Decision Making (WSTC)**Incompatible Subjects:** MATH 1025 Quantitative Techniques**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1028/>)**MATH 1029 Statistical Decision Making (WSTC) (10 Credit Points)****Legacy Code:** 700041

Statistical Decision Making introduces students to various statistical techniques supporting the study of computing and science.

Presentation of the content will emphasise the correct principles and procedures for collecting and analysing scientific data, using information and communication technologies. Topics include describing different sets of data, probability distributions, statistical inference and simple linear regression and correlation.

Level: Undergraduate Level 1 subject

Pre-requisite(s): Students enrolled in 7005 Diploma in Information and Communications Technology 7067 Diploma in Information and Communications Technology Extended 7104 Diploma in Information and Communications Technology (Health Information Management) 7106 Diploma in Information and Communications Technology (Health Information Management) Extended must pass MATH 0028 Statistics for Academic Purposes (WSTC Prep) before enrolling in this unit

Equivalent Subjects: MATH 1032 - Statistics for Science MATH 1003 - Biometry MATH 1030 - Statistics for Business ECON 1006 - Introduction to Economic Methods MATH 1028 - Statistical Decision Making MATH 1031 - Statistics for Business (WSTC) MATH 1004 - Biometry (WSTC)**Incompatible Subjects:** MATH 1025 - Quantitative Techniques**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1029/>)

MATH 1030 Statistics for Business (10 Credit Points)**Legacy Code:** 200032

Statistics for Business introduces the basic concepts and techniques of statistics that are particularly relevant to problem solving in business. It also provides a sound base for more advanced study in statistics and forecasting in subsequent sessions. Topics include: presentation of data; descriptive statistics; the role of uncertainty in business decision making; hypothesis testing; and basic forecasting.

Level: Undergraduate Level 1 subject

Equivalent Subjects: MATH 1032 Statistics for Science MATH 1028 Statistical Decision Making MATH 1003 Biometry ECON 1006 Introduction to Economic Methods MATH 1012 Management Analytics MATH 1031 Statistics for Business (WSTC) MATH 1004 Biometry (WSTC) MATH 1029 Statistical Decision Making (WSTC)

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1030/>)**MATH 1031 Statistics for Business (WSTC) (10 Credit Points)****Legacy Code:** 700007

Statistics for Business introduces the basic concepts and techniques of statistics that are particularly relevant to problem solving in business. It also provides a sound base for more advanced study in statistics and forecasting in subsequent sessions. Topics include: presentation of data; descriptive statistics; the role of uncertainty in business decision making; hypothesis testing; and basic forecasting.

Level: Undergraduate Level 1 subject**Pre-requisite(s):** For students enrolled in courses 71024 and 7177 BUSM 0029 Decision Making for Business

For students enrolled in courses 7005 7098 71021 71022 and 71023 MATH 0028 Statistics for Academic Purposes (WSTC Prep)

Equivalent Subjects: MATH 1030 - Statistics for Business MATH 1032 - Statistics for Science ECON 1006 - Introduction to Economic Methods**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1031/>)**MATH 1033 Thinking About Data (10 Credit Points)****Legacy Code:** 301108

This Unit covers basic concepts of data centric thinking. The main areas discussed are; Populations and Samples; Sampling concepts; Types of Data; Descriptive Methods; Estimation and Inference; Modelling. The Unit takes a computational and nonparametric approach, before briefly discussing theoretical concepts and distribution theory.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1033/>)**MATH 1034 Mathematics for Engineers 1 (Advanced) (10 Credit Points)****Legacy Code:** 301333

This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This unit provides foundational knowledge in key mathematical concepts which are essential for other mathematics units in engineering degrees. The subject matter includes: differential and integral calculus of a single variable, complex numbers, aspects of matrix algebra, vectors, and some elementary statistics and probability theory. In applying maths concepts to problems, students develop analytical thinking and problem solving skills, as well as communication skills to present clear and logical arguments. Students are encouraged to be independent and reflective learners in completing tutorial problems and online assessments.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1034/>)**MATH 1035 Mathematics for Engineers 2 (Advanced) (10 Credit Points)****Legacy Code:** 301337

This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This unit covers a number of topics that build on calculus knowledge from Mathematics for Engineers 1 (Advanced). Calculus is essential for engineering as it involves studying how things change over small intervals of time and allows for modelling such changes. Topics include ordinary differential equations, Laplace transforms and multi-variable calculus. In applying mathematical concepts to problems, students develop analytical thinking and problem solving skills, as well as communication skills to present clear and logical arguments. Students are encouraged to be independent and reflective learners in completing tutorial problems and online assessments.

Level: Undergraduate Level 1 subject**Pre-requisite(s):** MATH 1034**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1035/>)**MATH 1036 Mathematics for Engineers Preliminary (10 Credit Points)**

This unit covers the fundamental mathematical concepts and techniques necessary for the study of Engineering. Topics include Arithmetic and Algebra, Trigonometry, Functions, and Introductory Differential and Integral calculus.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** MATH 1021 Mathematics for Engineers Preliminary MATH 1023 Mathematics for Engineers Preliminary (WSTC) MATH 1022 Mathematics for Engineers Preliminary (WSTC AssocD)**Incompatible Subjects:** LGYA 4425 Mathematical Methods A MATH 1011 Fundamentals of Mathematics MATH 1016 Mathematics for Engineers 1 MATH 1018 Mathematics for Engineers 1 (WSTC)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math1036/>)

MATH 2001 Advanced Calculus (10 Credit Points)**Legacy Code:** 200028

This unit is designed for students undertaking studies in mathematics, statistics, operations research and mathematical finance. It provides further mathematical training in the areas of multivariable and vector calculus, which is essential to the understanding of many areas of both pure and applied mathematics.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** MATH 1015**Equivalent Subjects:** LGYA 3785 - Advanced Calculus LGYA 3865 - Mathematics 4 LGYB 9666 - Mathematics 21**Incompatible Subjects:** MATH 1019 - Mathematics for Engineers 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math2001/>)**MATH 2003 Differential Equations (10 Credit Points)****Legacy Code:** 200030

Differential equations arise naturally both in abstract mathematics and in the study of many phenomena. This unit provides the theory of ordinary differential equations and an introduction to partial differential equations together with methods of solution. Examples are drawn from a wide range of biological, chemical, physical and economic applications.

Level: Undergraduate Level 2 subject**Incompatible Subjects:** MATH 1019 - Mathematics for Engineers 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math2003/>)**MATH 2004 Discrete Structures and Complexity (10 Credit Points)****Legacy Code:** 300699

The fact that computers work at all in the way they do is due to the formal mathematical structure that is used in their design. The same holds for establishing important matters such as the reliability of our computer networks. This unit presents, in their computing context, a range of mathematical concepts that are essential for understanding a number of topics concerning computers: the ways they work, they ways they interact, and the ways we interact with them.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** MATH 1028**Incompatible Subjects:** MATH 1006 - Discrete Mathematics**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math2004/>)**MATH 2006 Experimental Design and Analysis (10 Credit Points)****Legacy Code:** 100013

This unit is driven by the scientific method with a focus on experimental design and related data analysis. Research design and methodology and ethical issues, statistical concepts and techniques, computer analysis of data, and communicating research findings are all features of this unit, which build on the content in its prerequisite.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** BEHV 1016**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math2006/>)**MATH 2009 Introduction to Data Science (10 Credit Points)****Legacy Code:** 301033

Analysis of data is essential for scientific investigation, modelling processes and predicting future events. Data Science is the investigation of the tools required that allow us to perform this modelling and prediction. The increase in accessible data over the past few decades has promoted the use of Data Science, making it a desired skill in many professions. In this unit we further investigate the methods of regression, clustering and classification that form the basis of a data scientist's toolbox.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** For students NOT enrolled in 3769 Bachelor of Data Science or 3770 Bachelor of Applied Data Science - MATH 1028 Statistical Decision Making or MATH 1003 Biometry or MATH 1030 Statistics for Business**Co-requisite(s):** For students enrolled in 3769 Bachelor of Data Science or 3770 Bachelor of Applied Data Science - MATH 1033 Thinking About Data**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math2009/>)**MATH 2010 Linear Algebra (10 Credit Points)****Legacy Code:** 200027

The objective of this unit is to present the main fundamentals of linear algebra and includes such topics as solving systems of linear equations, matrix algebra, determinants, eigenvalues and eigenvectors, Euclidean vector spaces, general vector spaces, inner product spaces and linear transformations.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math2010/>)**MATH 2011 Making Sense of Data (10 Credit Points)****Legacy Code:** 301032

The unit builds on the basic statistical concepts introduced in first year, and also prepares students for broader application of statistics for those majoring in science or business. Topics include hypothesis testing; analysis of categorical data; analysis of variance; non-parametric methods; re-sampling (cross validation/bootstrapping); Introduction to visual data analysis; simple Multivariate statistics and sampling and design.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** MATH 1028 OR

MATH 1003 OR

MATH 1030

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math2011/>)

MATH 2012 Mathematics for Engineers 3 (10 Credit Points)**Legacy Code:** 200242

Students enrolled in Bachelor of Engineering who are yet to successfully complete 200242 Mathematics for Engineers 3, are to seek advice from Dr Jamal Rizk to enable them to complete the course. This unit is a core unit in the Computer, Electrical, or Telecommunications key programmes of the Bachelor of Engineering course. It builds on the first two mathematics units in that course and provides mathematical tools and techniques needed for the above key programmes. The unit covers topics from advanced calculus including vector calculus, complex analysis, Fourier series, heat and wave equations, Fourier integrals and transforms; discrete mathematics including logic and set theory; random variables and random processes including mean, correlation and covariance functions, ergodicity, ensemble averages, and Gaussian processes.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** MATH 1008 OR MATH 1019**Equivalent Subjects:** MATH 2005 - Engineering Mathematics 3**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math2012/>)**MATH 2013 Object Oriented Analysis (WSTC) (10 Credit Points)****Legacy Code:** 700039

The core strength of this unit is to analyse and model business objectives and critical requirements of software systems to be developed using object-oriented (OO) approaches. The system analysis is taken to greater depths within the context of object orientation. The Unified Modelling Language version 2.0 (notably use cases, activity diagrams, class diagrams and sequence diagrams) is used as a modelling standard for creating OO models in the problem space. The unit also covers the rational unified process methodology and applications of design patterns for software development through practical case studies.

Level: Undergraduate Level 2 subject

Pre-requisite(s): Students enrolled in 7004 Diploma in Information and Communications Technology Fast Track 7005 Diploma in Information and Communications Technology 7067 Diploma in Information and Communications Technology Extended 7134 Diploma in Information and Communications Technology Extended ICT 7138 Diploma in Information and Communications Technology Extended - ICT 7139 Diploma in Information and Communications Technology Extended 7140 Diploma in Information and Communications Technology Extended - Information Systems 7163 Diploma in Information and Communications Technology 6035 Diploma Bachelor of Information and Communications Technology 6036 Diploma in Information and Communications Technology Bachelor of Information Systems 6039 Diploma Bachelor of Information and Communications Technology and 6040 Diploma in Information and Communications Technology Bachelor of Information Systems must pass INFS 1007 Systems Analysis and Design before enrolling in this unit

Equivalent Subjects: INFS 2006 Object Oriented Analysis**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math2013/>)**MATH 2014 Visual Analytics (10 Credit Points)****Legacy Code:** 301109

This unit introduces the fundamentals and technologies of visual analytics to understand big data. It covers major concepts of information visualisation, human computer perception and methods for visual data analysis. Students will learn knowledge and skills for identifying suitable visual analytics techniques, methods and tools for handling various data sets and applications. The unit provides students with opportunities to explore novel research in visual analytics and visualisation.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math2014/>)**MATH 3001 Abstract Algebra (10 Credit Points)****Legacy Code:** 200193

This unit develops algebraic thought to a high level. The abstract concepts involved in the main topics (group theory and number theory) have many applications in science and technology, and the unit includes an application to cryptography.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** MATH 1006**Equivalent Subjects:** LGYA 3893 - Advanced Algebra LGYA 3789 - Algebra 3**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math3001/>)**MATH 3003 Analysis (10 Credit Points)****Legacy Code:** 200023

Analysis provides the theoretical basis of real and complex numbers, including differentiation and integration. Topics include: field axioms and completeness, sequences, series, convergence, compactness, continuity, differentiability, integrability, and related theorems in both the real and complex number systems.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** MATH 2001**Equivalent Subjects:** LGYA 3794 - Advanced Mathematical Topics**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math3003/>)**MATH 3004 Discovery Project (10 Credit Points)****Legacy Code:** 301111

In this unit students will gain experience in applying data science skills and using knowledge gained during their bachelor's course of their primary discipline. Students will carry out a real life project transforming data to knowledge under the supervision of an academic mentor. Students will develop a knowledge discovery project proposal and carry out a literature review highlighting the current status of the problem. Assisted by a mentor they will apply the data science skills learned through-out the degree and produce a final discovery project report and/or interactive project tool and give an oral presentation.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math3004/>)

MATH 3005 Environmental Informatics (10 Credit Points)**Legacy Code:** 301035

Today, the environment is becoming more and more in the public eye. Methods of environmental monitoring and data analysis are an important source of information for science, business and government regulation. This unit aims to give students a good introduction to environmental informatics and the analysis of spatio-temporal data.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** MATH 1028 OR

MATH 1003 OR

MATH 1030

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math3005/>)**MATH 3006 Mathematical Modelling (10 Credit Points)****Legacy Code:** 200022

Mathematical Modelling is about solving real world problems. The real world is a complicated place which we often need or want to understand better. One way to do this is to set up a mathematical model which we hope can provide insights, predictions and a greater understanding of a complex system. Selected real-world problems are approximated by mathematical models that are amenable to being written in terms of linear and non-linear equations or differential equations. Once equations are solved emphasis is placed on interpreting solutions, modifying models as required and using models for prediction.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** MATH 2003**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math3006/>)**MATH 3007 Predictive Modelling (10 Credit Points)****Legacy Code:** 301034

In this information age, business and science depend on accurate predictions to make informed decisions. Machine learning is the process of allowing a computer to learn from data, which at its heart is used in making these important decisions. This unit provides students with the knowledge and practice required to implement and effectively use these predictive models such as Neural Networks and Support Vector Machines. Students will use the Python programming language throughout this unit.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** For students not enrolled in 3734 Bachelor of Data Science 3769 Bachelor of Data Science or 3770 Bachelor of Applied Data Science - MATH 1028 Statistical Decision Making or MATH 1003 Biometry or MATH 1030 Statistics for Business**Co-requisite(s):** Students in Bachelor of Data Science or Bachelor of Applied Data Science must be enrolled in MATH 1033 Thinking About Data**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math3007/>)**MATH 3008 Quantitative Project (10 Credit Points)****Legacy Code:** 200045

In this unit, students can deepen or apply knowledge gained during their course and practise verbal and written presentation skills. Students will carry out a project under the supervision of an academic staff member. Assisted by their supervisor, students will define the problem to be studied and then acquire, develop and apply the appropriate theory or methodology. They will prepare a final report presenting theoretical results or methodology, an analysis and a discussion followed by an appropriate conclusion, as well as a literature review or a list of references as appropriate. Students will also give a talk on their project.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** Students must have successfully completed 30 credit points of Level 2 mathematics/statistics units from MATH 2010 Linear Algebra

MATH 2001 Advanced Calculus

MATH 2003 Differential Equations

COMP 2003 Computer Algebra

MATH 2011 Making Sense of Data

MATH 2009 Introduction to Data Science

Students must also have completed 30 credit points of Level 3 mathematics/statistics units from MATH 3006 Mathematical Modelling

MATH 3003 Analysis

MATH 3001 Abstract Algebra

COMP 3020 Social Web Analytics

MATH 3007 Predictive Modelling MATH 3005 Environmental

Informatics

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math3008/>)**MATH 3011 Probabilistic Models and Inference (10 Credit Points)****Legacy Code:** 301250

The unit provides students with an understanding of probabilistic models and inference. It covers model-based approaches for complex systems - from constructing these models to applying information to models. The models, which can be created manually and obtained by learning from data, will also be useful to make decisions under uncertainty. A variety of models and techniques will be discussed; examples include Monte Carlo Methods, Decision Theory, Bayesian networks, Markov networks, and the use of information theory.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** MATH 1002 AND

MATH 1033 OR

MATH 1028

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math3011/>)

MATH 3012 Combinatorics (10 Credit Points)

This unit builds upon the knowledge acquired in the prerequisite unit Discrete Mathematics and helps students to develop understanding and mathematical maturity. The unit covers more sophisticated counting techniques, additional concepts in graph theory, and it introduces coding theory. Many applications of these concepts are included, and some combinatorial algorithms are studied. The applications and techniques presented in the unit are used to model systems such as transport networks and social networks, and they have relevance for communication, computing, probability, statistics, and science, and for many everyday problems such as scheduling.

Level: Undergraduate Level 3 subject

Pre-requisite(s): MATH 1006 AND MATH 1015

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/math3012/>)

MATH 3013 Fields and Equations (10 Credit Points)

This unit develops abstract algebraic thought to a higher level. The abstract concepts introduced in the unit, ring theory, field theory and algebraic equations, have many applications in science and technology. The theory of algebraic equations is the study of solutions of polynomial equations. Although the problem originates in explicit manipulations of polynomials, the modern (and far more powerful) treatment is in terms of field extensions. The unit is an introduction to ring theory and field theory; it includes applications to cryptography (RSA) and geometry (proving that it is impossible to trisect an arbitrary angle using only a straightedge and compass).

Level: Undergraduate Level 3 subject

Pre-requisite(s): MATH 3015

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/math3013/>)

MATH 3014 Financial Mathematics (10 Credit Points)

This unit is an introduction to stochastic calculus and relevant simulation techniques applied to modern finance and the mathematical modelling of financial markets. The core topics developed in the unit are the Ito stochastic integral, Ito's formula, and basic stochastic differential equations, as well as computer simulation techniques with emphasis on Monte Carlo simulations. Some mathematical background is assumed, but the unit will cover any necessary material that is not contained in prerequisites units.

Level: Undergraduate Level 3 subject

Pre-requisite(s): MATH 1014 AND MATH 1015 AND MATH 2010 AND MATH 2003

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/math3014/>)

MATH 3015 Groups and Symmetry (10 Credit Points)

This unit develops abstract algebraic thinking to a higher level. The abstract concepts introduced in the unit, the theory of groups and abstract symmetry, have many applications in science and technology. Symmetry plays a role in many different contexts: in crystals, in visual arts, in music and in architecture, to name a few. Analysing and exploiting the symmetries of a particular problem often is the first step towards finding a practical solution to the problem. Group theory is the study of symmetry. This unit develops the language of groups and techniques to understand the structure of groups.

Level: Undergraduate Level 3 subject

Pre-requisite(s): MATH 1006

Equivalent Subjects: MATH 3001 Abstract Algebra

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/math3015/>)

MATH 3016 Mathematics Project (10 Credit Points)

In this unit, students can deepen or apply knowledge gained during their course and practise verbal and written presentation skills. Students will carry out a project under the supervision of an academic staff member. Assisted by their supervisor, students will define the problem to be studied and then acquire, develop and apply the appropriate theory or methodology. They will prepare a final report presenting theoretical results or methodology, an analysis and a discussion followed by an appropriate conclusion, as well as a literature review or a list of references as appropriate. Students will also give a talk on their project.

Level: Undergraduate Level 3 subject

Pre-requisite(s): MATH 3007 Predictive Modelling

MATH 3005 Environmental Informatics

MATH 3015 Groups and Symmetry

MATH 3013 Fields and Equations

MATH 3012 Combinatorics

MATH 3014 Financial Mathematics

Students not enrolled in 3778 must have successfully completed 30 credit points of Level 2 mathematics/statistics units from the following list

MATH 2010 Linear Algebra

MATH 2001 Advanced Calculus

MATH 2003 Differential Equations

MATH 2011 Making Sense of Data

MATH 2009 Introduction to Data Science

COMP 2023 Mathematical Programming

Students not enrolled in 3778 must also have successfully completed 30 credit points of Level 3 mathematics/statistics units from the following list

MATH 3006 Mathematical Modelling

MATH 3003 Analysis

MATH 3001 Abstract Algebra

COMP 3020 Social Web Analytics

Equivalent Subjects: MATH 3008 Quantitative Project

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/math3016/>)

MATH 4001 Mathematics Honours Thesis (20 Credit Points)

The aim of this unit is to further develop the student's research and problem solving skills. The student is required to implement the research plan, complete a substantive piece of research in the field of Mathematics/Statistics, and to communicate the results of that work to an interested and technically literate audience. All projects will therefore contain at least two broad areas of assessment: the substantive work itself, and the oral and written communication of the work to others. All assessment components submitted in both of these areas are expected to be of a high professional standard. Students will present their research in the thesis. The thesis topic and structure will vary according to the area of interest of the student and the expertise of the supervisor. Throughout this unit regular planned consultations between the student and supervisor will occur. Students are expected to work to a schedule devised in consultation with their supervisor. The schedule will include set dates for the presentation of draft chapters for review by the supervisor.

Level: Undergraduate Level 4 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/math4001/>)

MATH 7001 Advanced Mathematical Investigations (20 Credit Points)

Legacy Code: 301176

Advanced Mathematical Investigations is an integral part of the Master of Research for students planning a future in mathematical and/or statistical research. Students will carry out extensive investigations under the supervision of an academic staff member that will allow the development of skills, knowledge and a way of thinking that will assist in the learning of mathematics and/or statistics needed for research in their chosen field of mathematics. They will also develop their written and oral communication skills, culminating in a paper which will be written as though it is to be submitted to a mathematics/statistics journal for publication (including following the journal's requirements for presentation) and an oral presentation of the style expected at a mathematics/statistics conference.

Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/math7001/>)

MATH 7002 Advanced Statistical Methods (10 Credit Points)

Legacy Code: 301115

There has been a significant trend away from simple statistical models for complex and Big Data. Advanced Statistical Methods is a technical unit that looks at computer intensive statistical techniques for modelling complex data. Students will learn about methods including Density Estimation, the Expectation-Maximisation (EM) algorithm, Bayesian, Markovian and Hidden Markov Models, enabling them to apply sophisticated statistical tools in a Data Science setting.

Level: Postgraduate Coursework Level 7 subject

Pre-requisite(s): MATH 7012 AND MATH 7016

Co-requisite(s): COMP 7006

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/math7002/>)

MATH 7003 Applied Business Statistics (10 Credit Points)

Legacy Code: 300962

This unit introduces the basic statistical concepts and techniques for descriptive and inferential data analysis. It will aid and improve business decision-making, especially when faced with uncertain outcomes.

Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/math7003/>)

MATH 7005 Approximation Theory (20 Credit Points)

Legacy Code: 301060

Approximation theory is concerned with approximating functions of a given class using functions from another, usually more elementary, class. The efficient solution of such problems is of great importance for computing, and this online unit will provide a general introduction to the mathematical theory behind many approximation methods in common use.

Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/math7005/>)

MATH 7008 Mathematical Investigations (10 Credit Points)

Legacy Code: 301106

Mathematical Investigations will prepare Master of Research for students planning a future in mathematical/statistical research. Students will carry out investigations under the supervision of an academic staff member that will allow development of skills, knowledge and a way of thinking that will assist in the learning of mathematics/statistics that will prepare them for research in their chosen field of mathematics. They will also develop their written and oral communication skills, culminating in a poster presentation of significant findings as if being submitted at a mathematics/statistics conference, following that conference's directions for submission.

Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/math7008/>)

MATH 7009 Mathematical Proof and Reasoning (10 Credit Points)

Legacy Code: 301177

Proving and getting a new proposition by careful reasoning from given propositions, is the essence of mathematics. Proof is what makes mathematics special and eternal. This unit looks at the different methods of proof and reasoning that can be employed to verify that statements are true or not. Students will consider propositions and theorems from various areas of mathematics and look at classic, interesting and sometimes novel ways these can be proved. Successful students taking this unit will not only be able to follow and determine if a proof is correct, but become proficient at mathematical reasoning.

Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/math7009/>)

MATH 7011 Predictive Analytics (10 Credit Points)**Legacy Code:** 301117

The information age has allowed business and science to take advantage of the vast amount of available data for predicting outcomes and estimating trends, to make informed decisions. Machine learning is the process of allowing a computer to learn from data, which at its heart is used in making these important decisions. This unit provides students with the knowledge and practice required to implement and effectively use these predictive models such as Neural Networks and Support Vector Machines, and provides opportunity for students to investigate state-of-the-art. Students will use the Python programming language throughout this unit.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** MATH 7016**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math7011/>)**MATH 7012 Programming for Data Science (10 Credit Points)****Legacy Code:** 301113

The use of computers and computer programming for Data Science is fundamental to the discipline. This introductory unit will briefly cover the use of spreadsheet systems and then will consider programming in the statistical system "R" in detail. Other special purpose languages will also be touched on briefly including SQL (Structured Query Language).

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math7012/>)**MATH 7014 Social Media Intelligence (10 Credit Points)****Legacy Code:** 301116

Social Media Intelligence presents the theory and practice of extracting and analysing information from social media networks. The aims are to identify properties of social networks, and to make predictions about future events. Topics included will cover areas such as Graph theory, Game theory and Network dynamics and we will identify how these can be used to model and extract information from Facebook and Twitter.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math7014/>)**MATH 7015 Statistics for Accountants (PG) (10 Credit Points)****Legacy Code:** 200424

Statistics for Accountants introduces the basic concepts and techniques for statistical inference and decision making in a business context.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math7015/>)**MATH 7016 The Nature of Data (10 Credit Points)****Legacy Code:** 301114

This Unit covers concepts of data centric thinking. The main areas discussed are; Populations and Samples; Sampling concepts; Types of Data; Descriptive Methods; Estimation and Inference; and Modelling. The Unit takes a computational and nonparametric approach, before discussing theoretical concepts and Normal distribution theory as large sample approximations.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math7016/>)**MATH 7017 Probabilistic Graphical Models (10 Credit Points)****Legacy Code:** 301365

Modelling data provides us with a method for inference, but there are many occurrences when interest lies in the reasoning behind the decision making. In this unit, students learn to model processes and the reasoning behind the processes using probabilistic graphical models. The unit investigates the construction and application of model-based approaches for complex systems. Students will manually create models based on prior knowledge and investigate methods of learning model structures from data, which can be used to make decisions under uncertainty. Topics covered include Monte Carlo Methods, Decision Theory, Bayesian networks, Markov networks, and the use of information theory.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** MATH 7016**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math7017/>)**MATH 7018 Scientific Informatics (10 Credit Points)**

This unit discusses the most important scientific revolutions in informatics throughout history and the role of Scientific Informatics in modern scientific research. It examines the influence of computing and informatics on the major paradigm shifts in the social, behavioural, biological, health and physical sciences and assesses the societal impact of future discoveries. The unit aims to provide training for Research and Coursework Masters in the computational techniques that are integral to much of modern scientific research as well as cultural and philosophical perspectives on the Science, Technology, Engineering and Mathematics (STEM). Students complete practical assessment items that are relevant to their field of research, which are designed to develop transferrable skills and familiarity with computing tools.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** MATH 7013 - Scientific Informatics**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math7018/>)**MATH 7019 Mathematics of Signal Processing (10 Credit Points)**

This unit teaches students to abstract and develop algorithms, in Python, for analysing and processing deterministic and stochastic data/signals. Students are taught strategies in developing solutions that are optimal and efficient to implement. They learn how to analyse signals under the Fourier transform and under different bases, allowing for an appreciation of how lossy compression works, and how to formulate and solve some convex optimisation algorithms.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/math7019/>)

Mechanical and Industrial Eng. (MECH)

MECH 2001 Kinematics and Kinetics of Machines (10 Credit Points)**Legacy Code:** 300035

Kinematics is the study of the motion of objects, and Kinetics is the study of the causes of the motion. The focus for this unit is on rigid body kinematics which involves the study of a solid body with little or no deformation in planar motion, such as those in machines. The motion of key machine components and the forces they generate gives rise to design problems. Students gain an understanding of the relevance of kinematics and kinetics in the analysis and design of mechanical systems and of methods to ensure machines operate efficiently and safely.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** MATH 1016 AND ENGR 1018**Equivalent Subjects:** MECH 2002 Kinematics and Kinetics of Machines (WSTC AssocD)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/mech2001/>)**MECH 2002 Kinematics and Kinetics of Machines (WSTC AssocD) (10 Credit Points)****Legacy Code:** 700244

In this unit rigid body kinematics is analysed from the freedom-and-constraints point of view and graphical approaches to velocity and acceleration analyses are covered. The unit looks at how one or more particles move in one, two or three dimensions and how forces cause these movements. It also looks at how forces and couples cause the movement of a single rigid body in two and three dimensions. The movement of multi-body mechanisms and gear trains and the geometry of gear teeth and cams are studied. Offerings of alternate units are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate unit.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** MATH 1017 AND ENGR 1019**Equivalent Subjects:** MECH 2001 - Kinematics and Kinetics of Machines**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/mech2002/>)**MECH 2003 Mechanics of Materials (10 Credit Points)****Legacy Code:** 300040

Mechanics of Materials is the study of the stresses and deformation of a body made of any elastic solid material, and how these are related to the body's shape and the load applied to it. This unit looks at how and why structural components including bars and beams deform and break. It concentrates on how these are affected by the geometry of the body and loading. Types of loadings considered include normal loads, torsional loads and bending loads. The main objective of the unit is to introduce students to the aspects of stress, strain and internal force development in the components and the methods to determine the deformation and deflections of the components. Energy methods and impact loadings are also considered.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** ENGR 1018**Equivalent Subjects:** LGYA 5707 Mechanics and Materials MECH 2004 Mechanics of Materials (WSTC Assoc Deg)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/mech2003/>)**MECH 2004 Mechanics of Materials (WSTC AssocD) (10 Credit Points)****Legacy Code:** 700116

This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This unit introduces mathematical tools and analytical reasoning useful for a wide range of professions, as well as highlighting mathematical foundations that have contributed to advances in engineering. The course content focuses more on useful concepts at the core of applied mathematics rather than theoretical mathematics. Students learn a range of concepts and methods from applied mathematics and how these apply to various fields of engineering.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** MATH 1035**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/mech2005/>)

MECH 3001 Advanced Dynamics (10 Credit Points)**Legacy Code:** 300763

This unit covers the analysis and control of dynamical behaviour of mechanical systems. It discusses the fundamental principles in controlling mechanical dynamic systems. In particular, the unit will cover contents in: multi-degree of freedom vibration analysis and modelling; open and closed loop systems; transfer function and state variable methods in mechanical system modelling; concepts of stability; design and analyse control systems using root-locus, bode diagram and state-space methods for mechanical systems.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** MECH 3004 OR MECH 2001**Incompatible Subjects:** ENGR 3006 - Control Systems**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/mech3001/>)**MECH 3002 Advanced Mechanics of Materials (10 Credit Points)****Legacy Code:** 300761

This unit builds on the Mechanics of Materials to provide students with knowledge about impacts of deformation, stresses, strains and strength on materials and components essential in understanding how to improve mechanical design. Students' analytic and problem solving skills are developed through analysis of impacts including non-elastic deformation, orientation of the reference axes, and how materials fail. Using knowledge about materials, students evaluate impacts on materials, the mechanisms to control properties of materials, and use mathematical calculations and techniques to determine stresses and strains on simple components. Overall, students develop the capacity to select appropriate materials and improve mechanical design.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** MECH 2003**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/mech3002/>)**MECH 3004 Dynamics of Mechanical Systems (10 Credit Points)****Legacy Code:** 300480

This unit looks at how non-rigid components deform and oscillate. It looks at undamped and damped systems undergoing free vibration, steady state forced vibration and transient forced vibration. The principles of virtual work are used to investigate the equilibrium and dynamics of mechanisms.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** MECH 2001 AND MECH 2003**Equivalent Subjects:** LGYA 5694 - Dynamics and Mechanical Systems**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/mech3004/>)**MECH 3005 Mechanical Design (10 Credit Points)****Legacy Code:** 300764

This unit introduces students to the design of machine components. The unit covers the design of components to ensure their functionality, strength and durability. Components designed include drive components, gears, shafts, belt drives, and bearings and structural components, welds and treaded fasteners.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** MECH 2003 AND MECH 2001**Equivalent Subjects:** MECH 3003 - Design of Servo-Systems**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/mech3005/>)**MECH 3006 Mechatronic Design (10 Credit Points)****Legacy Code:** 300487

Through practical lab exercises and a design project, students will integrate basic skills of mechanics, mechanical systems, and automation in the practice of engineering design (Design for X and system engineering) as applied to mechatronic devices and systems. Students will perform detailed design analysis on important machine elements such as bearings, brakes, clutches, shaft, motor and to integrate those elements to form an automatic mechatronic system is the intended outcome of undertaking this unit. The project-based tasks incorporated into this program build team work experience as well as each student's individual capabilities.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** MECH 2003**Equivalent Subjects:** LGYA 5708 - Mechatronic Design 1 LGYA 5709 - Mechatronic Design 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/mech3006/>)**MECH 3007 Thermal and Fluid Engineering (10 Credit Points)****Legacy Code:** 300759

The unit provides an understanding of thermo-fluid principles and their engineering applications related to thermal processes and energy conversion used in power plants, heat pumps, wind turbines, and airplanes. Students analytical skills are developed through the evaluation of laminar, turbulent and compressible fluid flows, as well as combustion processes and products. Students are introduced to special thermal and fluid engineering topics, including alternative energy options for Indigenous Australians. In addition to examining the theoretical principles, students evaluate thermodynamic systems and apply basic computational techniques to solve thermodynamics and fluid flow problems in practical laboratory sessions.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** CIVL 2003 AND MECH 3008**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/mech3007/>)

MECH 3008 Thermodynamics and Heat Transfer (10 Credit Points)**Legacy Code:** 300760

This unit introduces students to the fundamentals of thermodynamics which involves energy in the form of heat and heat transfer. Students explore the basic laws and properties of thermodynamics to discover how energy is converted and transferred. Students will apply their knowledge to evaluate power and refrigeration cycles, industrial devices, as well as to design a simple industrial device.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** MATH 1019 AND

ENGR 1011 OR

ENGR 1028

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/mech3008/>)**MECH 3009 Thermodynamics and Heat Transfer (WSTC AssocD) (10 Credit Points)**

This unit introduces students to the fundamentals of thermodynamics which involves energy in the form of heat and heat transfer. Students explore the basic laws and properties of thermodynamics to discover how energy is converted and transferred. Students will apply their knowledge to evaluate power and refrigeration cycles, industrial devices, as well as to design a simple industrial device. This unit describes the basics and fundamentals of computer aided engineering focusing on the advanced topics of finite element methods, which is a powerful numerical tool for analysing a wide range of engineering problems. Through applied projects students will apply the finite element method (FEM)-based computer aided engineering (CAE) and its applications in the fields of solid mechanics, fluid mechanics, thermodynamics and heat transfer and product design and development as well. The development of students' academic skills in research and communication are also achieved through the completion of FEM-based CAE projects.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** ENGR 3020**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/mech4002/>)**MECH 4003 Mobile Robotics (10 Credit Points)****Legacy Code:** 300043

To develop an understanding of the basic concepts involved in Mobile Robotics. The areas of mobile robot mechanics, localisation, map building and path planning of mobile robots will be introduced. Various sensors and their applications in mobile robotics are also to be introduced.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** ENGR 1018**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/mech4003/>)**MECH 4004 Robotics (10 Credit Points)****Legacy Code:** 300056

The aim of this unit is to develop an understanding of the basic concepts involved in Robotics. The kinematics, dynamics, control and sensing aspects in robotics will be introduced. In addition, the concepts of artificial intelligence (AI) and their applications in robotics will also be introduced. There will be considerable use of MATLAB in the unit.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** MECH 3004**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/mech4004/>)**MECH 4005 Advanced Engineering Thesis 1: Preliminary Investigations (10 Credit Points)**

Advanced Engineering Thesis 1 - Preliminary Investigations unit consists of a research project designed and implemented under the direction of an academic supervisor and research mentor. This unit is the culmination of studies for students who have completed their first three years of an undergraduate degree and provides substantial training in Preliminary Investigations. Under staff supervision, students are allocated a particular topic for their research, design their own programme of research, and perform the research. The emphasis of this unit is on the application of research knowledge gained in other units to the practical conduct of the individual research project. This unit provides final year Advanced engineering students with the opportunity to undertake research on a specialist topic within their Key Program of undergraduate study.

Level: Undergraduate Level 4 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/mech4005/>)

MECH 4006 Advanced Engineering Thesis 2: Detailed Investigations (10 Credit Points)

Advanced Engineering Thesis 2 - Detailed Investigations unit consists of a research project designed and implemented under the direction of an academic supervisor and research mentor. This unit is the culmination of studies for students who have completed their first three years of an undergraduate degree and provides substantial training in detailed Investigations. Under staff supervision, students are allocated a particular topic for their research, design their own programme of research, and perform the research. The emphasis of this unit is on the application of research knowledge gained in other units and in Engineering Thesis 1 - Preliminary Investigations to the practical conduct of the individual research project. This unit provides final year Advanced engineering students with the opportunity to undertake research on a specialist topic within their Key Program of undergraduate study.

Level: Undergraduate Level 4 subject

Pre-requisite(s): MECH 4005

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/mech4006/>)

MECH 7001 Advanced Computational Fluid Dynamics (10 Credit Points)

Legacy Code: 301023

This unit introduces students to commonly used numerical methods used in computational fluid dynamics (CFD). The unit covers the theory and the application of CFD for solving engineering problems. The numerical methods for solving the in viscid flow and the viscous flow problems will be introduced. The students learn the application of the engineering software in the engineering problems.

Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/mech7001/>)

MECH 7002 Advanced Computer Aided Engineering (10 Credit Points)

Legacy Code: 301022

This unit focuses on advanced topics in computer aided engineering and their applications in mechanical engineering in analysing a wide range of engineering problems. The objective of this unit is to advance students' knowledge and skill level on the finite element method (FEM)-based computer aided engineering (CAE) and its advanced applications in the fields of solid mechanics, fluid mechanics, thermodynamics and heat transfer and product design and development as well. Academic skills on research and communication are ensured to be achieved through conducting FEM-based CAE projects.

Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/mech7002/>)

MECH 7003 Advanced Dynamic Systems (10 Credit Points)

Legacy Code: 301019

This unit covers three-dimensional kinematics and kinetics of a rigid body. The principles of virtual work are used to investigate the equilibrium and dynamics of mechanisms. Some key aspects of mechanical vibrations are introduced, including vibration response, vibration isolation and vibration measurement.

Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/mech7003/>)

MECH 7004 Advanced Mobile Robotics (10 Credit Points)

Legacy Code: 301020

This unit is designed to develop an understanding of the concepts involved in Mobile Robotics. The areas of mobile robot mechanics, localisation, map building and path planning will be introduced. Various sensors and their applications in mobile robotics are also to be introduced.

Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/mech7004/>)

MECH 7005 Advanced Robotics (10 Credit Points)

Legacy Code: 300599

This unit is designed to introduce the engineering concepts involved in Robotics. The kinematics, dynamics, control and sensing aspects in robotics will be introduced. In addition, the concepts of artificial intelligence and their applications in robotics will also be discussed and assessed.

Level: Postgraduate Coursework Level 7 subject

Incompatible Subjects: LGYA 5817 - Advanced Robotics LGYA 5833 - Mobile Robotic Systems

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/mech7005/>)

MECH 7006 Advanced Thermal and Fluid Engineering (10 Credit Points)

Legacy Code: 301021

This unit covers fundamental principles in the thermal and fluid engineering. While the main focus will remain on incompressible fluids, effects of compressible fluids will also be discussed. The contents of this unit include fluid mechanics, thermodynamics and heat transfer. Students will learn the engineering applications of thermal and fluid principles.

Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/mech7006/>)

MECH 7007 Mechanical System Design (10 Credit Points)

Legacy Code: 301018

This unit advances students understanding on product design and development of machine components and assemblies using systems engineering approaches. The unit covers a review on the design of main components of machinery to ensure their functionality, strength and durability, which includes drive components - gears, shafts, belt drives, and bearings, and structural components - welds and treaded fasteners. The machine assembly design is delivered based on systems engineering. Academic skills on research and communication are ensured to be achieved through conducting systems engineering approached-based mechanical system design projects.

Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/mech7007/>)

MECH 7008 Mechatronic System Design (10 Credit Points)**Legacy Code:** 300600

This unit will advance the skills of mechanics, mechanical systems and automation in the practice of engineering design as applied to mechatronic devices and systems. The ability to perform detailed design analysis of machine elements as well as control systems as applicable to manufacturing and process machinery is the intended outcome of undertaking this unit and project-based tasks will form part of the learning process and team work experience.

Level: Postgraduate Coursework Level 7 subject**Incompatible Subjects:** LGYA 6106 - Servo Systems Design (PG) LGYA 5832 - Mechatronic System Design**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/mech7008/>)**MECH 9001 Higher Degree Research Thesis - Engineering (Industrial Design) (20 Credit Points)****Legacy Code:** 800063**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/mech9001/>)**MECH 9002 Higher Degree Research Thesis - Engineering (Mechanical) (20 Credit Points)****Legacy Code:** 800185**Level:** PhD and Research Masters Level 9 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/mech9002/>)

This unit integrates the foundational sciences with clinical skills.

Students learn the structure and function of the human body, particularly, whole body organisation, basic anatomy, nutrition and metabolism, function and pathology of the gastrointestinal system (including liver), cardiovascular system and respiratory system. In addition, students will gain an understanding of health psychology, patient experience, the medical system, identifying risk, errors in medical practice, managing error and basic procedures such as hand washing. A particular focus will be the communities that make up Greater Western Sydney. Students will also participate in clinical tutorials and will gain skills in history taking and communication in Session 1H and skills in history and examination of the gastrointestinal tract, cardiovascular system and respiratory systems during Session 2H. The unit outline is available from the link on the left-hand menu.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi1002/>)**MEDI 1004 Clinical Sciences 1 (40 Credit Points)****Legacy Code:** 401276

Foundational learning for medicine is provided in this yearlong unit that integrates the biomedical sciences through the use of authentic clinical scenarios. Small group problem based learning and bedside teaching with patients, scaffolded by lectures, tutorials and practicals cover each of the body systems in turn, so that students are well prepared for clinical learning. Students will also learn about the human context of health and disease, medical professionalism, the quality and safety of healthcare, evidence based practice, research and clinical skills through community visits, hospital based sessions and workshops. The Professional Portfolio component within this unit will provide students in the Doctor of Medicine (MD) course with the means to monitor and support their acquisition of professional competencies in medicine. Supported by teaching sessions, learning resources and Professional Advisors, students will collate and review evidence of their learning, such as clinical assessments and case studies, preparatory work and outcomes from research and scholarly projects. By identifying and addressing their learning and professional development needs, students will create their own personalised learning journey as the basis for life-long learning in medicine. The Professional Portfolio will also prepare students for the portfolios used extensively in post graduate specialty training in medicine. The unit outline is available from the link on the left-hand menu.

Level: Undergraduate Level 1 subject**Incompatible Subjects:** MEDI 1002 Foundations of Medicine 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi1004/>)

MEDI 2001 Clinical Sciences 2 (35 Credit Points)**Legacy Code:** 401256

Foundational learning for medicine is provided in this yearlong unit that integrates the biomedical sciences through the use of authentic clinical scenarios. Small group problem based learning, bedside teaching with patients and procedural skills teaching scaffolded by lectures, tutorials and practicals cover each of the body systems in turn, so that students are well prepared for clinical learning. Students will also learn about the human context of health and disease, medical professionalism, the quality and safety of healthcare, evidence based practice, research and clinical skills through community visits, hospital based sessions and workshops.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi2001/>)**MEDI 2002 Foundations of Medicine 2 (40 Credit Points)****Legacy Code:** 400862

This year long unit integrates the biomedical sciences with clinical skills. Students continue to build their knowledge of the structure and function of the human body, particularly: renal, musculoskeletal, neuroscience, reproduction and development, endocrinology, infectious disease, immunology and cancer. In addition, students will gain an understanding of the human context of health and disease, global health, medical professionalism, the quality and safety of healthcare, evidence based practice and research skills. On clinical days, students will participate in bedside tutorials to further develop their skills in history and examination of body systems and will also learn how to carry out basic clinical procedures. The unit outline is available from the link on the left-hand menu.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** MEDI 1002**Incompatible Subjects:** MEDI 2003 - Clinical Sciences 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi2002/>)**MEDI 2003 Clinical Sciences 2 (40 Credit Points)****Legacy Code:** 401277

This Unit is a consolidation of two formerly approved Units (Clinical Sciences 2 and Professional portfolio 2) into one Unit. The Unit content is derived from content of two existing Units that are being retired because of the new Unit being introduced. The reason for the amalgamation of the two units is that the role of the Professional Portfolio is to assist students to identify and monitor their learning through reflections about their academic and professional performance in the Clinical Sciences unit. Therefore, it is logical to have them both sit within the same unit. Also, the Professional Portfolio and the Clinical Sciences are required to be co-delivered and co-assessed. This would be difficult if they were to be in two separate units and would require new progression rules. Since the two components (Clinical Sciences and Professional Portfolio) were previously co-requisites and co-assessed, if we retain the same 2-unit model, students who fail one unit and pass the other will be required to remediate a unit that they have already passed. This will be unacceptable by students and would be considered a breach of university policy. There are also potential ethical/legal issues in making students incur the cost of repeating a unit they have already passed. In addition, there is potential for students to accrue extra credit points which could prove problematic. Successful student workload requires rewarding with credit points. The total added credit points of passed and remediated units of a repeating student will be greater than credit points achieved by students who do not require remediation.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** MEDI 1004**Incompatible Subjects:** MEDI 2002 Foundations of Medicine 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi2003/>)**MEDI 3001 Applied Clinical Sciences 1 (35 Credit Points)****Legacy Code:** 401258

Applied Clinical Science 1 is the first clinical year of the MD program. You will apply and extend the knowledge and skills gained in previous units by being immersed in clinical and community placements, further developing your professional competencies. Placements include Surgery, Medicine, Critical Care and Medicine in Context (MiC) rotations at Campbelltown, Blacktown, Mt Druitt, Bankstown, Fairfield and Liverpool hospitals and community organisations throughout Greater Western Sydney. Surgery and Medicine placements include two sub-speciality teams each, and in Critical Care students spend time in Emergency, Intensive Care and Anaesthetics Departments. The MiC placement focuses on community-based aspects of the health care system, including Community Services and General Practice. Learning in clinical and community placements is supported by campus based and online activities, including seminars, workshops and modules on essential skills such as communicating in challenging scenarios and conducting research.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi3001/>)

MEDI 3002 Clinical Assessment Methods (10 Credit Points)**Legacy Code:** 400879

This unit is designed to introduce students to basic principles and essential skills of physical examination and diagnostic/laboratory investigation procedures, required for successful approach to diagnosis of health impairment states. Primary contact health practitioners are expected to have sound understanding of disease presentation, techniques of patient interviewing and examination for collection of relevant clinical information as well as the ability to select appropriate laboratory tests and interpret their findings. This unit will also help students to develop fundamental clinical reasoning skills required in the medical decision making process.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** BIOS 2029 AND

NATS 1009 AND

NATS 1010

Equivalent Subjects: LGYA 7174 - Clinical Diagnosis**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi3002/>)**MEDI 3003 Integrated Clinical Rotations 1 (40 Credit Points)****Legacy Code:** 400810

Integrated Clinical Rotations 1 is the first major clinical year of the MBBS program. It consists of 10 weeks each in Surgery, Medicine and Medicine in Context (MiC), and 5 weeks in Critical Care. Surgery, Medicine and Critical Care attachments will be at Campbelltown, Blacktown, Mt Druitt, Bankstown, Fairfield and Liverpool hospitals. In Surgery and Medicine students spend 5 weeks in each of two sub-specialties. In Critical Care students spend time in Emergency and Anaesthetics Departments. The 10-week MiC attachment is conducted in two 5-week blocks and involves community-based aspects of the health care system including community organisations and general practice. Students also have 3 Conference Weeks; tutorials in clinical communication skills; and undertake an assignment in Evidence-Based Medicine and 3 online Scientific Streams learning modules. The unit outline is available from the link on the left-hand menu.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** MEDI 2002**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi3003/>)**MEDI 3004 Medical Research Project (30 Credit Points)****Legacy Code:** 400813

This unit is the principal component in the Bachelor of Medical Research. It aims to give students, enrolled in the Western Sydney University MBBS, the opportunity to develop their critical thinking and gain a more detailed experience in medical research than is provided in the medical course. It consists of a research project in any area of medical research for which the School can provide suitable supervision. Students will study the relevant literature, develop and conduct the program of research with the assistance of their supervisor, take part in research seminars in their research group, and present the results as a dissertation. The main learning outcomes are a subset of the 15 Learning Tasks/Outcomes for the medical course as a whole, but will be achieved at a considerably higher level than is expected in the main MBBS program. The task numbers relate to the complete set in the MBBS learning outcomes.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** MEDI 1002 AND

MEDI 2002

Co-requisite(s): Must pass two of the following- HLTH 3006 Methods of Scientific Researching HLTH 2021 - Research Methods (Quantitative and Qualitative) HLTH 1001 -Foundations of Research and Evidence-Based Practice**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi3004/>)**MEDI 3005 Professional Portfolio 2 (5 Credit Points)****Legacy Code:** 401257

This unit is the second of five Professional Portfolio units which will provide students in the Doctor of Medicine (MD) course with the means to monitor and support their acquisition of professional competencies in medicine. Supported by workshops, resources and your Academic Supervisor, you will collate and review evidence of your learning, such as clinical assessments and case studies, preparatory work and outcomes from research and scholarly projects. By identifying and addressing your learning and professional development needs, you will create your own personalised learning journey as the basis for life-long learning in medicine. The Professional Portfolio will also prepare you for the portfolios used extensively in post graduate specialty training in medicine.

Co-requisite(s): MEDI 2001**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi3005/>)

MEDI 3006 Applied Clinical Sciences 1 (40 Credit Points)**Legacy Code:** 401278

Applied Clinical Sciences 1 is the first major clinical year of the Doctor of Medicine. Students will apply and extend the knowledge and skills gained in previous units during clinical and community placement rotations. Attachment modules Surgery 1 and General Medicine 1 each cover two placement rotations. The Critical Care 1 placement includes experience in the Emergency, Intensive Care, and Anaesthetics departments. The Medicine in Context 1 placement focuses on community-based aspects of the health care system, including community services and general practice. The Doctor of Medicine MD Scholarly Project attachment rotation will be conducted in a site suited to the student's medical research, service, or education project. Placement sites include the Campbelltown, Blacktown/Mt Druitt, Bankstown, Fairfield and Liverpool hospitals, and a variety of community organisations throughout the Greater Western Sydney region. Theoretical Modules support student experiential learning and research skills development in the clinical and community placements. These are 'Evidence-based Medicine and Research Skills 1', 'Professional and Personal Development 1', 'Scientific Streams 1'. Students continue preparation of their Professional Practice Portfolio. Students undertake a minimum of 1050 clinical practice hours, a 175-hour project rotation, and 3 conference weeks in this unit. Travel and accommodation - Students are required to arrange and pay for their own travel, accommodation, and living expenses for the duration of the placement rotations.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** MEDI 2003**Incompatible Subjects:** MEDI 3003 - Integrated Clinical Rotations 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi3006/>)**MEDI 3007 Professional Health Placement (10 Credit Points)****Legacy Code:** 401406

This unit involves a 120hr work-integrated placement conducted at a health setting. Online public health students will have the option of completing an online project placement with a health organisation. Online health promotion and recreational therapy students will have placements arranged for them within a reasonable distance from their place of residence.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi3007/>)**MEDI 3008 Mortuary Practice (10 Credit Points)**

This unit introduces the student to processes and techniques used in a forensic mortuary context. Students will undertake activities that prepare them for clinical placement with an operational forensic mortuary setting, which includes a brief placement within a NSW Forensic and Analytical Science Service (FASS) facility or NSW Organ and Tissue Donation Service. Student must have demonstrated full compliance with NSW Health placement requirements in the first year of their candidature before enrolling in this unit and 301128 Advanced Mortuary Practice. This unit, together with completion of 301128 Advanced Mortuary Practice is essential for graduates of this course seeking employment as a forensic mortuary technician with FASS.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** NATS 2015 AND

NATS 2005 AND

NATS 1001 AND

NATS 1008

Co-requisite(s): NATS 2004**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi3008/>)**MEDI 3009 Foundational Diagnostic Imaging (10 Credit Points)**

This unit will introduce students to a range of diagnostic imaging modalities providing an overview of both the technical and practical aspects. Three imaging modalities will be covered, MRI, cardiac sonography and vascular sonography. Within the MRI module, you will learn how to view MRI images and compare them with CT/ultrasound as well as understand the clinical values of each modality and the risks associated. In the cardiac module you will learn the principles of cardiac ultrasound image acquisition, methods used to evaluate cardiac anatomy and function, and the essentials of complimentary tests such as electrocardiograms and stress tests. In the vascular module, undertaking non-imaging assessments will be covered, alongside imaging principles. The practical skills are aimed at providing students with a working knowledge of imaging modalities and enhancing students' prospects of successful application for a training position. The majority of this course is delivered online. However, students must attend a compulsory one-day face-to-face practical skills workshop at Blacktown clinical school.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi3009/>)

MEDI 4001 Integrated Clinical Rotations 2 (40 Credit Points)**Legacy Code:** 400811

Integrated Clinical Rotations 2 is the second major clinical year of the MB BS program. It consists of 9 weeks in each of Paediatrics, Obstetrics & Gynaecology and Mental Health and four weeks in each of Oncology/Palliative Care and Community Research. There will also be 2 weeks of "Year 4 Campus Learning". These will be one week each and held at either Campbelltown Campus or Blacktown Clinical School. During the year, students will be based at a number of appropriate hospitals throughout Sydney, Bathurst and Lismore. Students will also undertake 3 online learning modules (Scientific Streams). Students will complete a reflective portfolio. Slight variations in the delivery of ICR2 occur in the Rural clinical schools. Learning outcomes & assessment requirements do not differ. The unit outline is available from the link on the left-hand menu.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** MEDI 3003**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi4001/>)**MEDI 4002 Integrated Clinical Rotations 3 (40 Credit Points)****Legacy Code:** 400977

The Unit Outline for this unit can be found by clicking on the "Current MBBS, MD Unit Outlines" link in the left-hand menu. Integrated Clinical Rotation 3 is the first session of the third major clinical year of the MB BS program. It consists of five weeks in each Medicine, Surgery, General Practice or Indigenous Health or ICU, ED & Anaesthetics. There will also be two Conference weeks where all students will be based at either Campbelltown Campus, Macarthur Clinical School or Blacktown Clinical School. Students will be based at a number of appropriate hospitals throughout Sydney. Students will also undertake two online learning modules (Scientific Streams). Students will also undertake a reflective portfolio. The unit outline is available from the link on the left-hand menu.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** MEDI 4001**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi4002/>)**MEDI 4003 Integrated Clinical Rotations 4 (40 Credit Points)****Legacy Code:** 400978

Integrated Clinical Rotations 4 is the final Unit in the MBBS course and consists of clinical rotations in Medicine, Surgery and two of General Practice, Indigenous Health and ICU/Emergency/Anaesthetics. Students also undertake two Scientific Streams and two Conference weeks.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** MEDI 4002 OR

LGYA 7789

MEDI 3005

Co-requisite(s): MEDI 3001**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi4005/>)**MEDI 4006 Honours Project (Medicine) (0 Credit Points)**

Students who meet prerequisite requirements are offered an opportunity in this Unit to undertake enhanced research and scholarship activities while enrolled in the Bachelor of Medicine / Bachelor of Surgery (MBBS) 4641.5. A key objective is to assist students towards the independent application of knowledge and skills in the principles and methods of medical research on a specialist topic of their choice. With supervision, students will further develop their ability to critically evaluate theories and evidence in disciplines relevant to medicine, and to disseminate their work to a range of audiences. Prior to enrolment in the Unit, students must have satisfactorily completed a Research Portfolio and given a 10 minute oral PowerPoint presentation summarising the research program and outcomes. The presentation is to be at a venue approved by the research supervisor and the supervisor must consider the presentation to be of a satisfactory standard.

Level: Undergraduate Level 4 subject**Pre-requisite(s):** MEDI 4002**Co-requisite(s):** MEDI 4003**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi4006/>)

MEDI 7002 Allergic Sciences 1 (20 Credit Points)**Legacy Code:** 401249

This unit will consist of four online modules dealing with the immunological and clinical aspects of allergic diseases. These modules will cover basic immunology and fundamental theoretical and clinical concepts underlying Eczema and Contact Dermatitis, Urticaria and Angioedema, and Drug Hypersensitivity Reactions, Insect Allergy and Anaphylaxis. The purpose of Allergic Sciences 1 is to provide students with sound knowledge of essential immunological principles and common allergic conditions. Students will use self directed learning to link basic science with clinical understanding, and must attend a written exam at a university approved venue for one of the assessments.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 7790 Allergic Sciences 1 AND LGYA 7791 Allergic Sciences 2 MEDI 7001 Allergic Sciences**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7002/>)**MEDI 7003 Allergic Sciences 2 (20 Credit Points)****Legacy Code:** 401250

This unit will consist of four online modules dealing with the immunological and clinical aspects of allergic diseases. These modules will cover fundamental theoretical and clinical concepts underlying Food Allergy, Allergic Airways Diseases, and Rhinoconjunctivitis, Sinusitis and Immunotherapy. The purpose of Allergic Sciences 2 is to complement Allergic Sciences 1 and provide students with comprehensive knowledge for managing patients with allergic conditions in clinical practice. Students will use self directed learning to link basic science with clinical understanding, and must attend a written exam at a university approved venue for one of the assessments.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** MEDI 7002**Equivalent Subjects:** LGYA 7790 - Allergic Sciences 1 and LGYA 7791 - Allergic Sciences 2 MEDI 7001 - Allergic Sciences**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7003/>)**MEDI 7004 Applications of Magnetic Resonance from Cancer to Neuroanatomy (10 Credit Points)****Legacy Code:** 401203

Magnetic resonance (MR) provides a suite of versatile information rich and non-invasive techniques of which magnetic resonance imaging (MRI), Magnetic Resonance Spectroscopy (MRS) and Nuclear Magnetic Resonance (NMR) spectroscopy are the best known. These techniques have enormous applications across the sciences (e.g., inorganic and organic chemistry) but increasingly to medicine (e.g., to cancer diagnosis and treatment). Western Sydney University has state-of-the-art MR infrastructure and an international reputation in MR development. This unit will explore the diverse applications and teach experimental practice and fundamental physical principles that underpin all the MR-based techniques. It is intended for medical science, medical and science students who use/intend to use NMR/MRI technology or merely want a deeper understanding of its rapidly expanding capabilities (e.g., functional MRI) and applications.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7004/>)**MEDI 7006 Applied Clinical Sciences 2 (40 Credit Points)****Legacy Code:** 401260

Applied Clinical Science 2 is the second clinical year of the MD program. You will apply and extend the clinical knowledge and skills gained in the previous year by being immersed in specialty clinical and community placements, further developing your professional competencies. Placements include Paediatrics, Obstetrics & Gynaecology, Mental Health and Oncology/Palliative Care rotations in hospitals and community based services and organisations in Greater Western Sydney, Bathurst and Lismore. Learning and assessment requirements do not differ across sites. This experiential learning is supported by campus, clinical school and online activities, including seminars, workshops and modules on essential skills such as conducting research and key topics in specialty medicine.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7006/>)**MEDI 7007 Applied Clinical Sciences 3 (40 Credit Points)****Legacy Code:** 401262

Applied Clinical Science 3 commences the third clinical year of the MD program. You will further extend the knowledge and skills gained in previous units by being immersed in clinical and community placements, and advance your professional competencies in this final year, towards graduation. Placements include Medicine, Surgery, General Practice, Aboriginal Health and Critical Care rotations in a wide range of hospitals and community based services and organisations in Greater Western Sydney, Bathurst and Lismore. Learning and assessment requirements do not differ across sites. This experiential learning is supported by campus, clinical school and online activities, including seminars, workshops and modules to prepare you for clinical practice as a graduate doctor.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7007/>)**MEDI 7008 Chronic Disease Management in Rural Practice (10 Credit Points)****Legacy Code:** 401272

This unit will examine the pathophysiology, epidemiology, clinical presentation and treatment of chronic diseases in rural and remote settings in the Australian context. Students will develop systems to effectively manage chronic disease within their clinical environment and consider key aspects of the professional practice required of doctors caring for patients with chronic diseases. This unit will also introduce the concepts of collaboration with a multidisciplinary team.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7008/>)

MEDI 7009 Clinical Allergy (10 Credit Points)**Legacy Code:** 401064

This yearlong unit will consist of 50 hours of supervised consultation of patients with allergic diseases within the setting of a specialist Immunology/Allergy clinic. The purpose of Clinical Allergy is to apply previously acquired knowledge of allergic diseases to patient care in real time. Students will be supervised by experienced Clinical Immunologists/Allergists and develop skills in allergy diagnosis and management of children and adults. Clinical experiences will include history taking, physical examination, skin prick testing and spirometry interpretation, and management of various allergic conditions. Students will need to participate in online case conference discussions also, and attend two course workshops, the Australasian Society of Clinical Immunology and Allergy (ASCIA) Annual Scientific Meeting and the Macarthur Series in Immunology.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** MEDI 7002 AND

MEDI 7003

Equivalent Subjects: LGYA 7792 - Clinical Allergy 1 LGYA 7793 - Clinical Allergy 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7009/>)**MEDI 7011 Clinical Minimally Invasive Gynaecological Surgery 2 (15 Credit Points)****Legacy Code:** 401057

Students undertaking this unit will have a detailed knowledge of open abdominal surgery at commencement. This unit will extend their knowledge in the practical aspects of laparoscopic surgery. This unit will be completed in Year 2 of the program.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** MEDI 7010**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7011/>)**MEDI 7012 Critical Care: Skills and Practice (10 Credit Points)****Legacy Code:** 401271

This unit that will enhance the student's critical and practical clinical skills for rural generalist practice. The student will become familiar with common critical care presentations and develop a structured approach to the common practical skills of practice. They will also develop effective decision making skills that incorporate a team management approach. The development of these skills will be supported by a mandatory two day face to face practical simulation workshop.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7012/>)**MEDI 7013 Cytopathology and Small Biopsy Pathology 1 (10 Credit Points)****Legacy Code:** 401228

In 2022 this unit replaced by unit 401473 - Cytopathology and Small Biopsy Pathology 1. This unit uses a blended learning approach to introduce diagnostic entities in surgical pathology entities of neuropathology, cardiorespiratory pathology, genito-urinary pathology, salivary gland and endocrine pathology, skin and soft tissue pathology. The unit provides training in basic research skills, communication skills, and critical thinking. The self-directed online learning module is composed of digitalized images, practical notes, recorded lectures and quizzes on the diagnostic approach to important pathological entities of the respiratory and cardiovascular systems.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7013/>)**MEDI 7014 Cytopathology and Small Biopsy Pathology 2 (10 Credit Points)****Legacy Code:** 401232

In 2022 this unit replaced by unit 401477 - Cytopathology, Small Biopsy and Breast Pathology. This unit introduces diagnostic entities in surgical pathology entities gastrointestinal and liver, breast, head and neck, paediatric, gynaecological and haemato-pathology. The unit provides training in basic research skills, communication skills, and critical thinking. The self-directed online learning module is composed of digitalized images, practical notes, recorded lectures and quizzes on the diagnostic approach to important pathological entities of the breast pathology.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7014/>)**MEDI 7015 Diversity in Generalist Practice (10 Credit Points)****Legacy Code:** 401273

This unit will explore the diversity of populations and examine the complexities of health and health care delivery in rural and remote settings in Australia. Students will develop a structured approach to managing the undifferentiated clinical presentations in a rural practice setting and will also analyse cultural, social, community, population and health factors influencing the practice of rural and remote medicine. Critical reasoning skills will be developed and students will be encouraged to self-reflect on their current clinical situation.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7015/>)

MEDI 7016 Endometriosis (10 Credit Points)**Legacy Code:** 401058

This is an alternate unit in Year 2 of the Master of Surgery (Advanced Gynaecological Surgery) course. Endometriosis commonly presents with pelvic pain and infertility, with gynaecological surgery being a significant treatment option. Surgery in women with endometriosis can be challenging, with gynaecological surgeons requiring advanced training and a multi-disciplinary approach to obtain the best patient outcomes. This unit will provide the students with the opportunity to explore management aspects of endometriosis tailoring treatment options depending on the patient's symptoms and goals. By enrolling in this unit, the student will be expected to produce a detailed discussion on various aspects of endometriosis, focusing on minimally invasive techniques. This includes exploring the pre-operative rationale to perform surgery, intra-operative nuances of surgical techniques used and post-operative care of importance to ensure the best outcomes for the patient.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7016/>)**MEDI 7017 Gynaecological Surgery Ergonomics (10 Credit Points)****Legacy Code:** 401059

This is an alternate unit in the Graduate Diploma in Advanced Gynaecological Surgery and Year 1 of the Master of Surgery (Advanced Gynaecological Surgery) course. This unit provides students with the knowledge on surgical ergonomics in both open and minimally invasive gynaecological surgery. This unit will extend their knowledge in theoretical and practical aspects, focusing on strategies to maximise ergonomics and its effects on situational awareness, communication and leadership during gynaecological surgery. Students will explore factors associated with gynaecological surgery ergonomics, such as surgeon and surgical assistant positions, theatre setup, incision sites, port placement and surgical techniques to maximise surgical ergonomics in order to reduce surgeon fatigue, injury and improve patient safety and outcomes. It is expected the student will be able to perform operations safely, with economy of movement to optimise surgeon comfort and ultimately improve patient outcomes.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7017/>)**MEDI 7020 Medicine in Practice (40 Credit Points)****Legacy Code:** 401264

Medicine in Practice is the final clinical unit of the MD program during which you will confirm and consolidate your knowledge, skills and professional competencies in readiness for graduate practice. Immersion in clinical and community placements continues, and you will act, under supervision, as a junior doctor member of the healthcare team where it is considered safe to do so. Placements include Medicine, Surgery, General Practice, Aboriginal Health and Critical Care rotations in a wide range of healthcare settings, from tertiary hospitals to community based services and practices in Greater Western Sydney. Learning and assessment requirements do not differ across sites. This experiential learning is supported by campus, clinical school and online activities, including seminars, workshops and modules to ensure readiness for graduate practice.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7020/>)**MEDI 7021 Mental Health Aspects of Allergic Diseases (10 Credit Points)****Legacy Code:** 401252

Allergic diseases are chronic conditions which can influence psychosocial wellbeing. Early recognition of effects on mental health is essential to ensure optimal support and enhance quality of life. This unit provides students with knowledge and skills to address mental health concerns in patients with allergic diseases. Modules will cover the psychological effects of living with chronic disease, anxiety and depression, somatic symptom disorders and eating disorders. Students will use online lectures, case discussion and evidence-based materials to explore key elements and strategies for effective mental health assessment and management in clinical allergy practice.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** MEDI 7002 AND

MEDI 7003 OR

MEDI 7001

Co-requisite(s): MEDI 7009**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7021/>)**MEDI 7022 Nutritional Aspects of Allergic Diseases (10 Credit Points)****Legacy Code:** 401251

Dietary and nutritional aspects of allergic diseases often need consideration in patient management. This unit provides students with a detailed understanding of nutritional fundamentals and requirements especially for children and adults with food allergy. Online learning materials and case discussion facilitated by an experienced dietitian will promote essential knowledge and practical skills. Modules will provide the latest evidence on nutritional basics, weight management, diagnosis and management of food allergies and intolerances, food labelling, and early infant feeding recommendations. This content will complement the clinical experiences in the Master of Medicine (Allergic Diseases) and enhance clinical allergy practice.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** MEDI 7002 AND

MEDI 7003 OR

MEDI 7001

Co-requisite(s): MEDI 7009**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7022/>)

MEDI 7023 Pelvic Anatomy (10 Credit Points)**Legacy Code:** 401061

This is an alternate unit in the Graduate Diploma in Advanced Gynaecological Surgery and Year 1 of the Master of Surgery (Advanced Gynaecological Surgery) course. The student is expected to attain an advanced understanding and knowledge of the Anatomy of the Female Pelvis. The eventual aim is to become a competent surgeon in this field. Detailed Pelvic Anatomy is a vital component required to attain the skills necessary for the performance of Advanced Gynaecological Surgery. Knowledge of the normal versus the abnormal anatomy is required for the correct identification of pelvic structures. When abnormal features are present caused by pathological changes, the student is expected to know how to recognise the distortion caused, thus paving the way to try and normalise the anatomy as best as possible. The student should choose a topic relevant to the operations observed and learned. An analysis of the anatomy important to the topic should be presented in a detailed fashion. Evidence for any conclusions drawn or reflections made should be provided from a review of the literature. An important aspect of detailed knowledge of Pelvic Anatomy is crucial in the avoidance or detection and management of complications at surgery.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7023/>)**MEDI 7025 Port Entry (10 Credit Points)****Legacy Code:** 400995

This is an alternate unit in the Graduate Diploma in Advanced Gynaecological Surgery and Year 1 of the Master of Surgery (Advanced Gynaecological Surgery) course. Students undertaking this unit are expected to have a working knowledge on port entry techniques at commencement. This unit will extend their knowledge in theoretical and practical aspects, focusing on the port entry techniques and strategies of port placement and management of port site complications. Students will explore the multitude of port types which are commercially available in minimally invasive gynaecological surgery, the current technologies and tailoring their use in patients to provide optimal surgical outcomes. By enrolling in this unit, the student will be expected to produce a detailed discussion on various aspects of minimally invasive port entry, exploring the pre-operative and intra-operative nuances of surgical planning and techniques. This will extend the student's knowledge so they can safely and effectively establish port entry in minimally invasive gynaecological surgery.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7025/>)**MEDI 7026 Power Modalities (10 Credit Points)****Legacy Code:** 400996

This is an alternate unit in the Graduate Diploma in Advanced Gynaecological Surgery and Year 1 of the Master of Surgery (Advanced Gynaecological Surgery) course. A thorough understanding of the range of power modalities available when performing gynaecological surgery is a key fundamental concept to gynaecologists performing such surgery. Students undertaking this unit are expected to have a working knowledge on power modalities at commencement. This unit will extend their knowledge in theoretical and practical aspects. Students will explore the physics behind various power modalities, its physiological effect on human tissue and potential complications related to each power modality. Students will review and compare the current range of commercially available power modalities, assisting them to be competent with its use in a clinical setting and tailoring their use dependent on the type of surgery and pathology. By enrolling in this unit, the student will be expected to produce a detailed discussion on various aspects of power modalities, exploring the nuances of surgical planning and techniques. This will extend the student's knowledge so they can safely and effectively use various power modalities in gynaecological surgery.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7026/>)**MEDI 7027 Professional Portfolio 4 (20 Credit Points)****Legacy Code:** 401261

This unit is the penultimate unit of five Professional Portfolio units which will provide students in the Doctor of Medicine (MD) course with the means to monitor and support their acquisition of professional competencies in medicine. Supported by workshops, resources and your Academic Supervisor, you will collate and review evidence of your learning, such as clinical assessments and case studies, preparatory work and outcomes from research and scholarly projects. By identifying and addressing your learning and professional development needs, you will create your own personalised learning journey as the basis for life-long learning in medicine. The Professional Portfolio will also prepare you for the portfolios used extensively in post graduate specialty training in medicine.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** MEDI 3001 AND

MEDI 4005

Co-requisite(s): MEDI 7006**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7027/>)

MEDI 7028 Professional Portfolio 5 (20 Credit Points)**Legacy Code:** 401263

This unit is the final unit of five Professional Portfolio units which will provide students in the Doctor of Medicine (MD) course with the means to monitor and support their acquisition of professional competencies in medicine. Supported by workshops, resources and your Academic Supervisor, you will collate and review evidence of your learning, such as clinical assessments and case studies, preparatory work and outcomes from research and scholarly projects. By identifying and addressing your learning and professional development needs, you will create your own personalised learning journey as the basis for life-long learning in medicine. The Professional Portfolio will also prepare you for the portfolios used extensively in post graduate specialty training in medicine.

MEDI 7020

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7028/>)**MEDI 7029 Reflective Clinical Allergy Practice (20 Credit Points)****Legacy Code:** 401253

This is an online bridging unit for students with a Graduate Certificate in Allergic Diseases qualification or other recognised allergy training who wish to pursue further study in allergic diseases. Students with acceptable prior learning to enrol in this unit will enter Year 2 of the Master of Medicine (Allergic Diseases) with the option to exit at the Diploma level. The unit enables students to revise the latest theoretical and clinical concepts in allergic diseases and reflect on their own clinical allergy practice. Reflection will be promoted through case presentation and reports and literature review.

MEDI 7002 AND

MEDI 7003

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7029/>)**MEDI 7030 Research Project in Rural Generalist Medicine (20 Credit Points)****Legacy Code:** 401275

This unit is an essential part of the final year of the Masters of Medicine (Rural Generalism). It will build on the students' knowledge and skills gained in prior units and the aim of this unit is to design and conduct a research project from an area relevant to their practice of rural generalism. Successful completion of the unit results in the composition of a report, and in an oral presentation, which will include details of the aims, methods, results and conclusions of the project.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7030/>)**MEDI 7031 Rural and Remote Medicine: The Generalist Approach (10 Credit Points)****Legacy Code:** 401270

This unit introduces the student to the concepts of rural generalist practice and provides them with an understanding of the complexities and inequalities of providing health care in rural and remote Australian settings. Students will be expected to appraise the current literature around generalist practice and evaluate the models of care and health systems that support a generalist approach. The students will also determine the skills required to effectively deliver the required scope of practice

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7031/>)**MEDI 7032 Surgical Pathology 1 (10 Credit Points)****Legacy Code:** 401227

In 2022 this unit replaced by unit 401472 - General Surgical and Central Nervous System Pathology. This unit uses a blended learning approach to introduce diagnostic entities in surgical pathology entities of neuropathology, cardiorespiratory pathology, genito-urinary pathology, salivary gland and endocrine pathology, skin and soft tissue pathology. The unit provides training in basic research skills, communication skills, and critical thinking. The self-directed online learning module is composed of digitalized images, practical notes, recorded lectures and quizzes on the diagnostic approach to important pathological entities of the central nervous system and spinal cord.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7032/>)**MEDI 7033 Surgical Pathology 2 (10 Credit Points)****Legacy Code:** 401229

In 2022 this unit replaced by unit 401474 - Surgical Pathology of the Genito-urinary Tract, Salivary Gland and Endocrine System. This unit will re-inforce the diagnostic entities in genito-urinary tract, salivary gland and endocrine system pathology that were introduced in Surgical Pathology I. Two self-directed online learning modules with digitalized images and practical notes on the diagnostic approach to important pathological entities of the above sub-specialties will be provided. The basic concepts in surgical, cyto- and small biopsy pathology, including the appropriate ancillary techniques in the diagnosis, prognostication and treatment prediction will be assessed. This unit is designed to further develop the basic research and communication skills, and critical thinking acquired in Surgical Pathology I, and to reinforce the resources and technical requirements needed to reach the correct pathological diagnosis.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7033/>)

MEDI 7034 Surgical Pathology 3 (10 Credit Points)**Legacy Code:** 401230

In 2022 this unit replaced by unit 401475 - Surgical Pathology of Skin, Bone and Soft Tissue. This unit will re-inforce the diagnostic entity in skin and soft tissue pathology that were introduced in Surgical Pathology I. The first self-directed online learning module is composed of digitalized images and practical notes on the diagnostic approach to important pathological entities of these sub-specialties. The second online module will revise prior learning of the sub-specialties neuropathology, cardiorespiratory pathology, genito-urinary pathology, salivary gland and endocrine pathology. A literature review and discussion of contemporary and emerging developments in the relevant pathological entity will be conducted. This unit is designed to not only re-inforce/revise the above topics, but to harness effective communication and analytical research skills and to understand the importance of professional development.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7034/>)**MEDI 7035 Surgical Pathology 4 (10 Credit Points)****Legacy Code:** 401231

In 2022 this unit replaced by unit 401476 - General Surgical Pathology and Gastrointestinal Pathology. This unit introduces diagnostic entities in surgical pathology entities gastrointestinal and liver, breast, head and neck, paediatric, gynaecological and haemato-pathology. The unit provides training in basic research skills, communication skills, and critical thinking. The self-directed online learning module is composed of digitalized images, practical notes, recorded lectures and quizzes on the diagnostic approach to important pathological entities of the gastrointestinal tract and liver.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7035/>)**MEDI 7036 Surgical Pathology 5 (10 Credit Points)****Legacy Code:** 401233

In 2022 this unit replaced by unit 401478 - Surgical Pathology of the Head and Neck, Haematopathology and Paediatric Pathology. This unit will re-inforce the diagnostic entities in haematopathology, head and neck, and paediatric pathology that were introduced in Surgical Pathology IV. Two self-directed online learning modules with digitalized images and practical notes on the diagnostic approach to important pathological entities of the above sub-specialties will be provided. Upon completion of the unit students will have advanced knowledge in surgical, cyto- and small biopsy pathology, including appropriate ancillary techniques and recent research developments. This unit will promote behaviours that create a safe, caring, ethical and professional practice required by pathologists.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7036/>)**MEDI 7037 Surgical Pathology 6 (10 Credit Points)****Legacy Code:** 401234

In 2022 this unit replaced by unit 401479 - Surgical Pathology of the Female Genital Tract. This unit will revise the diagnostic entities in gynaecological pathology that were introduced in Surgical Pathology IV. The first self-directed online learning module is composed of digitalized images and practical notes on the diagnostic approach to important pathological entities of gynaecological pathology. A second online module will revise the sub-specialties covered in Surgical Pathology I through V. Students will be required to complete a literature review of contemporary and emerging developments in a relevant pathological entity. This unit is designed to revise all areas of surgical pathology within the Master of Pathology as well as promote engagement with professional development activities relevant to a career as a pathologist.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7037/>)**MEDI 7038 Telehealth and Rural Communities (10 Credit Points)****Legacy Code:** 401274

This unit will examine the main clinical, technical and contextual aspects of telehealth relevant to the practice in rural and remote communities. Students will appraise the literature and evidence-based resources regarding e-health to promote best practice in rural generalism and formulate an implementation plan for the introduction or expansion of telehealth services in their practice. They will also develop skills that will enable them to conduct a safe, effective and culturally appropriate telehealth consultation

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7038/>)**MEDI 7039 Clinical Practice in Diabetes 1 (10 Credit Points)****Legacy Code:** 401284

This unit introduces students to the aetiology, pathophysiology and clinical picture of the various types of diabetes and the short and long term physical impact on individuals. This is the basis for all clinical units in this course. Students will comprehensively examine the overall management of the different types of diabetes that are fundamental for advance and specialised diabetes clinical practice.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7039/>)

MEDI 7040 Clinical Practice in Diabetes 2 (10 Credit Points)**Legacy Code:** 401286

This unit will focus on the disease process leading to chronic complications of diabetes. Students will examine the screening process, interventions and the management of established microvascular and macrovascular disease associated with diabetes. Students investigate the elderly and vulnerable populations for the synthesis of individualisation of diabetes care and management. Health practitioner clinical skills directly impact on the short and long term health status of people with diabetes. In this online unit, there is a mandatory five day face-to-face clinical workshop component and a mandatory 40 hours of clinical practicum that will be undertaken by all students in this unit.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** MEDI 7039 AND MEDI 7041**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7040/>)**MEDI 7041 Diabetes Self-Management Support 1: Individuals (10 Credit Points)****Legacy Code:** 401285

Supporting individuals to self-manage their diabetes is the central element of advanced diabetes practice. Underpinned by the empowerment approach, students undertaking this unit will learn the necessary knowledge and skills in educating people with diabetes how to best manage their condition and support behaviours and emotional wellbeing that achieves person centred goals. Drawing on educational, psychological, social and behavioural theories students will learn practical skills in communication, psychological assessment, goal setting and problem-solving that will promote self-care for people with prediabetes and diabetes. This unit is only offered in Spring Session.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subject
Subject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7041/>)**MEDI 7042 Diabetes Self-Management Support II: Systems and Organisations (10 Credit Points)****Legacy Code:** 401287

The increasing number of people with diabetes in Australia and globally is a major public health issue. This unit will explore the increasing burden of diabetes, why some groups of people are more at risk of developing diabetes than others, how society and the way health services are organised and delivered influence the risk of developing diabetes, access to quality health care and individual health outcomes. This subject will examine social determinants related to diabetes, the impact of diabetes on Indigenous Australians, diabetes public policy, workforce capability and the integrated nature of service delivery in reducing prevalence and improving health outcomes for people with diabetes and prediabetes.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7042/>)**MEDI 7043 Diabetes in Paediatrics, Transition and Pregnancy (10 Credit Points)****Legacy Code:** 401290

The physical and psychosocial developmental stage and age of the person with diabetes directly impacts on diabetes self-management, diabetes care and quality of life. This specialised unit will explore diabetes in the context of physical, psychological and social development with a focus on children, young adults and pregnant women. Ongoing family, therapeutic and social relationships are central to optimising diabetes management. Family, friends, peers, healthcare providers/organisations role will be examined in the ongoing holistic care and self-management of diabetes and prevention of diabetes complications. Students will evaluate the physiological impact of diabetes, treatment and emerging technology in the management of diabetes such as insulin pump therapy and continuous blood glucose monitoring systems. Accessing and interpreting data for the overall management of diabetes will be undertaken in this unit.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** MEDI 7039 AND

MEDI 7041 AND

MEDI 7040 AND

MEDI 7042

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7043/>)**MEDI 7044 Diabetes in Primary Care (10 Credit Points)****Legacy Code:** 401288

Most of the health care provided to people with diabetes is provided by general practice clinicians and multidisciplinary health care professionals in primary care. This unit will explore the core issues that arise in primary care relating to foundational aspects of care. The unit will comprise of Learning Pods/modules that enable students to choose and learn about areas of practice that are most relevant to their health discipline, context of care and gap in knowledge. There will be a compulsory Learning Pod/modules on primary prevention, secondary and tertiary prevention in primary care and the role of inter-professional integrated practice. Students will also be able to choose from the following diabetes related Learning Pods such as medication therapy, exercise therapy, nutrition therapy and podiatry, insulin pumps and continuous glucose monitoring sensors, cardiovascular and renal health, aged care in diabetes in primary care.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7044/>)

MEDI 7045 Diabetes in the Hospital (10 Credit Points)**Legacy Code:** 401289

People with diabetes are more likely to be admitted to hospital, experience more complications, have longer length of stay and have higher mortality rates compare to people without diabetes. This unit will provide students with the skills and knowledge to optimise metabolic health in the complex care of in-patients with diabetes. The unit will examine the prevalence and economic costs of people with diabetes in hospitals and review current pathological hypotheses on why poor glycaemic control is associated with poorer inpatient health outcomes. Best practice management in inpatient diabetes care, treatment targets and medication intensification for patient in critical, noncritical, peri-operative, end of life will be analysed Clinical governance in providing safe quality diabetes care and organisation response will be included in this unit. An online inter-professional case based approach to learning will be the mode of delivery.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7045/>)**MEDI 7046 Advanced Gynaecological Surgery 1 (10 Credit Points)****Legacy Code:** 401317

This is a year long core unit in the Graduate Diploma in Advanced Gynaecological Surgery and Year 1 of the Master of Surgery (Advanced Gynaecological Surgery). This unit aims to allow students to discuss and reflect on a broad range of topics pertaining to Advanced Gynaecological Surgery with an emphasis on minimally invasive techniques. The pre-operative, intra-operative and post-operative management of patients and their conditions are considered with a review of the literature to substantiate and support any conclusions made which may help shape future clinical practice.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7046/>)**MEDI 7047 Advanced Gynaecological Surgery 2 (10 Credit Points)****Legacy Code:** 401318

This is a yearlong core unit in Year 2 of the Master of Surgery (Advanced Gynaecological Surgery) course. The student is expected to attain a comprehensive understanding and knowledge of the procedures performed in the management of Gynaecological Disorders where surgery is indicated. The ultimate aim is to become a competent surgeon in this field. This unit aims to build upon the knowledge gained from Advanced Gynaecological Surgery 1 to allow students to further discuss and reflect on a broad range of topics pertaining to Advanced Gynaecological Surgery with an emphasis on minimally invasive techniques. The theoretical aspects of teaching surgery is an important aspect in the development of competent surgeons. A review of teaching techniques, including simulation is an area to be evaluated, appraised and developed. The pre-operative, intra-operative and post-operative management of patients and their conditions are considered with a critical review of the literature to substantiate and support any conclusions made which may help shape future clinical practice.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** MEDI 7046**Co-requisite(s):** MEDI 7050**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7047/>)**MEDI 7048 Advanced Imaging Research Project (20 Credit Points)****Legacy Code:** 401330

In 2021 this unit replaced by 401467 - Medical Research Project (PG). This unit is an essential part of the final year of the Masters of Advanced Imaging (MRI). It will consolidate and build on the students' knowledge and skills gained in prior units. Students will design and conduct a research project from an area of inquiry relevant to Advanced Imaging - MRI. Successful completion of the unit results in the composition of a report, and in an oral presentation which will include details of the aims, methods, results and conclusions of the project.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7048/>)**MEDI 7049 Advanced MR Theory (10 Credit Points)****Legacy Code:** 401324

This unit provides students with a detailed understanding of "MR Accessories, Image Quality and Contrast Media" employed in Magnetic Resonance Imaging (MRI) technology and the relationship between magnet and coil, the utilisation of the different channels for image formation and pixilation, as well as exploring the role contrast media plays in enhancing body organs. Students will have an in-depth understanding of interactive effects of scanning parameters on the image quality and how to prevent the formation of artefacts and reduce Specific Absorption Rate to improve image quality, reduce artefact and reduce heat generation, and to prevent harm of burns to the patient.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** MEDI 7057**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7049/>)**MEDI 7050 Advanced Practice in Gynaecological Surgery (5 Credit Points)****Legacy Code:** 401314

This is a yearlong core unit in Year 2 of the Master of Surgery (Advanced Gynaecological Surgery) course. Students undertaking this unit are expected to apply advanced knowledge and skills in clinical settings in a safe and effective manner. There is a strong emphasis in reflecting and reviewing surgical cases based on clinical experience the student has gained at surgery. A review of the relevant medical literature and what changes are envisaged when performing this procedure into the future. This unit provides students with the opportunity to produce a detailed discussion on various aspects relating to pre-operative, intra-operative and post-operative gynaecological surgery and provide an evidence based approach. Ultimately, the aim is to improve the student's surgical skills and patient outcomes.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** MEDI 7046**Co-requisite(s):** MEDI 7047**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7050/>)

MEDI 7051 Evidence Based Imaging and Clinical Pathways (10 Credit Points)**Legacy Code:** 401321

Evidence based imaging is a foundation tool that ensures patients are referred to pertinent modalities for tests of high sensitivity and specificity while fostering a cognisance to the harm of investigations such as the low sensitivity of certain modalities to certain investigations, radiation effects and the societal costs of the health budget. This core unit will enable health professionals with an understanding of the best evidence based diagnostic algorithm "pathway" for the different clinical presentations. In conjunction with the radiobiology unit, this will also equip clinicians with the knowledge to better evaluate the risk versus benefit for any examination requested.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** MEDI 7059**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7051/>)**MEDI 7052 MR Angiography and Cardiac (10 Credit Points)****Legacy Code:** 401329

The MR Angiography (MRA) and MR Cardiac (MRC) Imaging unit is a core unit in the course of Advanced Imaging (MRI). The unit provides students with in-depth knowledge of the relevant protocols to create MRI sequences for the anatomical regions of MRC and MRA in different clinical examinations. It is expected that students will develop the ability to recognise normal anatomy, identify common pathologies and be able to provide diagnostic solutions and/or develop new MRI algorithms for clinical problems. They will have the ability to either produce, request or recommend the proper sequence and the best method of operating the MRI equipment for the anatomical region in question. Students will have 2 weeks of clinical training in an MRI clinical site.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** MEDI 7056**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7052/>)**MEDI 7053 MR Body and Pelvis Imaging (10 Credit Points)****Legacy Code:** 401327

MR Body and Pelvis Imaging is a core unit in the course of Advanced Imaging (MRI). The unit provides students with in-depth knowledge of the relevant protocols to create Magnetic Resonance Imaging (MRI) sequences for the anatomical regions in the Thoracic, Abdominal and Pelvic Region for different clinical examinations. It is expected that students will develop the ability to recognise normal anatomy, identify common pathologies and be able to provide diagnostic solutions and/or develop new MRI algorithms for clinical problems. They will have the ability to either produce, request or recommend the proper sequence and the best method of operating the MRI equipment for the anatomical region in question. Students will have 2 weeks of clinical training in an MRI clinical site.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** MEDI 7054**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7053/>)**MEDI 7054 MR Musculoskeletal Imaging (MSK) (10 Credit Points)****Legacy Code:** 401326

MR Musculoskeletal "MSK" Imaging is a core unit in the course of Advanced Imaging (MRI). The unit provides students with in-depth knowledge of the relevant protocols to create Magnetic Resonance Imaging (MRI) sequences for MSK anatomical regions such as the knee, ankle and hip as well as the spine for different clinical examinations. It is expected that students will develop the ability to recognise normal anatomy, identify common pathologies and be able to provide diagnostic solutions and/or develop new MRI algorithms for clinical problems. They will have the ability to either produce, request or recommend the proper sequence and the best method of operating the MRI equipment for the anatomical region in question. The unit is offered to Medical Practitioners "MO", Medical Radiation Practitioners "MRP" and a large cohort of Allied Health "AH" professionals with a varied pathway for the two weeks clinical component relevant to their discipline. Students will have 2 weeks of clinical training in an MRI clinical site.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7054/>)**MEDI 7055 MR Neurology - Head, Neck and Spinal Imaging (10 Credit Points)****Legacy Code:** 401325

MR Neurology "Head, Neck and Spinal" Imaging is a core unit in the course of Advanced Imaging (MRI). The unit provides students with in-depth knowledge of the relevant protocols to create Magnetic Resonance Imaging (MRI) sequences for the anatomical regions in the Head, Neck and Spinal Region for different clinical examinations. It is expected that students will develop the ability to recognise normal anatomy, identify common pathologies to provide diagnostic solutions and/or develop new MRI algorithms for clinical problems. Students will have 2 weeks of clinical training in an MRI clinical site.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** MEDI 7051**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7055/>)

MEDI 7056 MR Screening (10 Credit Points)**Legacy Code:** 401328

MR Screening is a core unit in the course of Advanced Imaging. Magnetic Resonance (MR) Screening tests are essential to categorise patients' conditions for faster and reliable patient management. In a real clinical environment, less than 10 per cent of MR Screening patients will need to go for a full Magnetic Resonance Imaging (MRI) examination. This unit will provide students with a detailed understanding of the rationale and principles of setting up MR Screening protocols. It will demonstrate the determinant criteria for the setup of the screening protocols in collaboration with the referring clinical team. Students will learn to create research programs to validate the effectiveness of the screening protocols. It is expected that students will develop the ability to recognise normal anatomy, identify common pathologies and be able to provide diagnostic solutions and/or develop new MRI algorithms for clinical problems. They will have the ability to either produce, request or recommend the proper sequence and the best method of operating the MRI equipment for the anatomical region in question. Students will have 2 weeks of clinical training in an MRI clinical site under the supervision of a WSU MRI clinician.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7056/>)**MEDI 7057 MRI Physics (10 Credit Points)****Legacy Code:** 401323

This unit provides the students with a detailed understanding of the design of the different Magnetic Resonance Imaging (MRI) Scanners. Differences in Electromagnets and Superconducting magnets; production of the magnetic field; radiofrequency (RF) energy; the physics behind pulse sequence absorption of RF Energy and MR Property of Protons are explored. This unit briefly explains their application and how they interrelate with essential accessories such as coils to form an image. The unit also explores the various forms of image contrast that can be obtained using MRI, along with various basic and intermediate MRI pulse sequences and image reconstruction techniques. Students will learn the factors that may cause artefact formation, image quality concerns, and an understanding of the noise producing factors. It also focuses on the safety requirements, and the serious consequences if proper safety procedures are not implemented and followed.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** MEDI 7058 AND

MEDI 7059

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7057/>)**MEDI 7058 Multi-sectional and 3D Human Anatomy (10 Credit Points)****Legacy Code:** 401320

This unit includes detailed 3D high resolution multi-sectional anatomy of the human body. Learning human anatomy in a 3D high resolution platform will enable students to conceptualise biological organs in 3D. Students will develop the ability to differentiate between normal and abnormal anatomy as well as understanding the demographics of pathological lesions in their daily clinical works. Delivered online, students will have opportunities to interact with medical imaging specialists as well as other subspecialists, such as surgeons, neurologists, and Emergency Specialists.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7058/>)**MEDI 7059 Radiobiology (10 Credit Points)****Legacy Code:** 401322

This unit provides a specialised study of the Characteristics and Properties of Radiation Chemistry, Structure of Matter, Chemical Behaviour, Ionisation and Excitation, as well as in-depth study of the effects of exposure to ionising radiation on biological systems from the cellular level to systemic effects. The topics of the unit will be focused on the biological response to irradiation which will be considered from the perspective of susceptibility versus resistance for the purposes of radiation protection in medical, occupational and environmental exposures to radioactivity. There will be specialist lectures by radiobiology and/or radiotherapy experts during the unit.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** MEDI 7058**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7059/>)**MEDI 7060 Adnexal Surgery (10 Credit Points)****Legacy Code:** 401319

This is an alternate unit in Year 2 of the Master of Surgery (Advanced Gynaecological Surgery) course. The performance of Adnexal Surgery and the ability to avoid complications is paramount in order to produce a safe environment for the patient. The ability to diagnose and successfully manage complications, should they occur, is a necessary part of every surgeon's makeup. The preoperative assessment of adnexal masses is to be considered, with data provided to help avoid the inadvertent operation on malignant lesions by the generalist. This unit will allow the student to explore various aspects of adnexal surgery and review evidence in the literature to support any conclusions made by the student.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** MEDI 7046**Equivalent Subjects:** MEDI 7018 Laparoscopic Adnexal Surgery**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7060/>)

MEDI 7061 Hysterectomy (10 Credit Points)**Legacy Code:** 401315

This is an alternate unit in Year 2 of the Master of Surgery (Advanced Gynaecological Surgery) course. Students undertaking this unit will be expected to explore aspects of hysterectomy through various approaches in different clinical and pathological settings. This unit will enhance their ability to develop a foundation for improving their skills and achieving competency at hysterectomy, particularly utilising minimally invasive techniques. This unit will allow students to explore the rationale behind decisions to perform a hysterectomy, the nuances of surgical techniques used in a safe manner. It will allow an appreciation of the pre-operative and post-operative issues to ensure optimal patient outcomes.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** MEDI 7046**Equivalent Subjects:** MEDI 7019 Laparoscopic Hysterectomy**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7061/>)**MEDI 7062 Pelvic Floor Surgery (10 Credit Points)****Legacy Code:** 401316

This is an alternate unit in Year 2 of the Master of Surgery (Advanced Gynaecological Surgery) course. This unit provides the student with in depth knowledge of procedures to treat pelvic floor disorders. The performance of Pelvic Floor Surgery and the ability to avoid complications is paramount in order to produce a safe environment for the patient. This unit will allow the student to explore and critically appraise various aspects of Pelvic Floor Surgery and utilise the evidence in the literature to support any conclusions made.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** MEDI 7046**Equivalent Subjects:** MEDI 7024 Pelvic Floor Function and Dysfunction**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7062/>)**MEDI 7063 Applied Clinical Sciences 2 (40 Credit Points)****Legacy Code:** 401279

Applied Clinical Sciences 2 covers the second clinical year of the Doctor of Medicine. Students apply and extend on clinical knowledge and skills learned in previous units. Students engage in clinical and community placements to develop professional competencies. Placements may be held in hospitals and community-based service organisations in the Greater Western Sydney area, or as rural placements in Bathurst or Lismore. Students enrolled in this unit must complete each of the unit's theoretical modules and each compulsory attachment module which corresponds with the student's allocated placement site rotations. Students will also continue to work through the MD Scholarly Project. Note: The professional practice students undertake in this unit is a minimum of 1225 hours (subject to location-based placement availability) Travel and accommodation - Students are required to arrange and pay for their own travel, accommodation and living expenses for the duration of the placement.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** MEDI 3006**Incompatible Subjects:** MEDI 4001 - Integrated Clinical Sciences 2

MEDI 7006 - Applied Clinical Sciences 2

MEDI 7027 - Professional Portfolio 4

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7063/>)**MEDI 7064 Applied Clinical Sciences 3 (40 Credit Points)****Legacy Code:** 401280

During Applied Clinical Sciences 3 students will complete clinical attachments from the pool of clinical rotations (General Medicine 2 or 3, Surgery 2 or 3, General Practice, Aboriginal Health, Critical Care, Paediatrics, Obstetrics and Gynaecology, Mental Health and Oncology) which they did not undertake during enrolment in unit 401279 'Applied Clinical Science 2'. Placements may be held across a range of hospitals and community-based services and organisations in Greater Western Sydney, Bathurst or Lismore. The learning and assessment requirements of each rotation are consistent across training sites. This learning is underpinned by the theoretical modules 'Professional and Personal Development 3', 'Professional Portfolio 3' and 'Scientific Streams 3'. Students will also prepare for barrier exams and continue their MD Scholarly Project. Experiential learning is supported by campus, clinical school and online activities designed to prepare students for clinical practice as a graduate doctor. Note: The professional practice students undertake in this unit is a minimum of 525 hours (subject to location-based placement availability) Note: Travel and accommodation - Students are required to arrange and pay for their own travel, accommodation and living expenses whilst on clinical placement.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** MEDI 7063**Incompatible Subjects:** MEDI 4002 - Integrated Clinical Rotations 3

MEDI 4001 - Integrated Clinical Rotations 2

MEDI 4004 - Integrated Clinical Rotations General

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7064/>)**MEDI 7065 Medicine in Practice (40 Credit Points)****Legacy Code:** 401281

This capstone experience unit will engage students in professional practice placement rotations drawn from the integrated fields of General Medicine, Surgery, Critical Care, Aboriginal and Torres Strait Islander People's Health and General Practice. Depending on rotations already taken, and the meeting of minimum clinical training hours requirements of the course, students may have the opportunity for an elective rotation. Students will complete their study in scientific streams, professional and personal development and finalise their Professional Practice Portfolio and MD Scholarly Project. The professional practice students undertaken in Medicine in Practice is approximately 700 hours. (subject to location based placement availability). Travel and accommodation - Students are required to arrange and pay for their own travel, accommodation and living expenses whilst on clinical placement.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** MEDI 7064**Incompatible Subjects:** MEDI 4002 - Integrated Clinical Rotations 3

MEDI 4003 - Integrated Clinical Rotations 4

MEDI 4004 - Integrated Clinical Rotations General

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7065/>)

MEDI 7066 Medical Research Project (PG) (20 Credit Points)

This capstone unit requires students to design and conduct a research-based project in an area of interest or discipline specialty in consultation with the Unit Coordinator and relevant Program Coordinator.

Level: Postgraduate Coursework Level 7 subject

Pre-requisite(s): HLTH 7008

Equivalent Subjects: RADI 7010 - Research Project in Cardiac Sonography
MEDI 7048 - Advanced Imaging Research Project
NURS 7042 - Research Project in Health Care

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7066/>)

MEDI 7067 Cytopathology, Small Biopsy and Breast Pathology (10 Credit Points)

This unit introduces diagnostic entities in surgical pathology entities gastrointestinal and liver, breast, head and neck, paediatric, gynaecological and haemato-pathology. The unit provides training in basic research skills, communication skills, and critical thinking. The self-directed online learning module is composed of digitalized images, practical notes, recorded lectures and quizzes on the diagnostic approach to important pathological entities of the breast pathology.

Level: Postgraduate Coursework Level 7 subject

Equivalent Subjects: MEDI 7014 - Cytopathology and Small Biopsy Pathology 2

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7067/>)

MEDI 7068 Cytopathology, Small Biopsy and Cardiorespiratory Pathology (10 Credit Points)

This unit uses a blended learning approach to introduce diagnostic entities in surgical pathology entities of neuropathology, cardiorespiratory pathology, genito-urinary pathology, salivary gland and endocrine pathology, skin and soft tissue pathology. The unit provides training in basic research skills, communication skills, and critical thinking. The self-directed online learning module is composed of digitalized images, practical notes, recorded lectures and quizzes on the diagnostic approach to important pathological entities of the respiratory and cardiovascular systems.

Level: Postgraduate Coursework Level 7 subject

Equivalent Subjects: MEDI 7013 - Cytopathology and Small Biopsy Pathology 1

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7068/>)

MEDI 7069 General Surgical Pathology and Gastrointestinal Pathology (10 Credit Points)

This unit introduces diagnostic entities in surgical pathology entities gastrointestinal and liver, breast, head and neck, paediatric, gynaecological and haemato-pathology. The unit provides training in basic research skills, communication skills, and critical thinking. The self-directed online learning module is composed of digitalized images, practical notes, recorded lectures and quizzes on the diagnostic approach to important pathological entities of the gastrointestinal tract and liver.

Level: Postgraduate Coursework Level 7 subject

Equivalent Subjects: MEDI 7035 - Surgical Pathology 4

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7069/>)

MEDI 7070 General Surgical and Central Nervous System Pathology (10 Credit Points)

This unit uses a blended learning approach to introduce diagnostic entities in surgical pathology entities of neuropathology, cardiorespiratory pathology, genito-urinary pathology, salivary gland and endocrine pathology, skin and soft tissue pathology. The unit provides training in basic research skills, communication skills, and critical thinking. The self-directed online learning module is composed of digitalized images, practical notes, recorded lectures and quizzes on the diagnostic approach to important pathological entities of the central nervous system and spinal cord.

Level: Postgraduate Coursework Level 7 subject

Equivalent Subjects: MEDI 7032 - Surgical Pathology 1

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7070/>)

MEDI 7071 Surgical Pathology of Skin, Bone and Soft Tissue (10 Credit Points)

This unit will re-inforce the diagnostic entity in skin and soft tissue pathology that were introduced in Surgical Pathology I. The first self-directed online learning module is composed of digitalized images and practical notes on the diagnostic approach to important pathological entities of these sub-specialties. The second online module will revise prior learning of the sub-specialties neuropathology, cardiorespiratory pathology, genito-urinary pathology, salivary gland and endocrine pathology. A literature review and discussion of contemporary and emerging developments in the relevant pathological entity will be conducted. This unit is designed to not only re-inforce/revise the above topics, but to harness effective communication and analytical research skills and to understand the importance of professional development.

Level: Postgraduate Coursework Level 7 subject

Equivalent Subjects: MEDI 7034 - Surgical Pathology 3

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7071/>)

MEDI 7072 Surgical Pathology of the Female Genital Tract (10 Credit Points)

This unit will revise the diagnostic entities in gynaecological pathology that were introduced in Surgical Pathology IV. The first self-directed online learning module is composed of digitalized images and practical notes on the diagnostic approach to important pathological entities of gynaecological pathology. A second online module will revise the sub-specialties covered in Surgical Pathology I through V. Students will be required to complete a literature review of contemporary and emerging developments in a relevant pathological entity. This unit is designed to revise all areas of surgical pathology within the Master of Pathology as well as promote engagement with professional development activities relevant to a career as a pathologist.

Level: Postgraduate Coursework Level 7 subject

Equivalent Subjects: MEDI 7037 - Surgical Pathology 6

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7072/>)

MEDI 7073 Surgical Pathology of the Genito-urinary Uract, Salivary Gland and Endocrine System (10 Credit Points)

This unit will re-inforce the diagnostic entities in genito-urinary tract, salivary gland and endocrine system pathology that were introduced in Surgical Pathology I. Two self-directed online learning modules with digitalized images and practical notes on the diagnostic approach to important pathological entities of the above sub-specialties will be provided. The basic concepts in surgical, cyto- and small biopsy pathology, including the appropriate ancillary techniques in the diagnosis, prognostication and treatment prediction will be assessed. This unit is designed to further develop the basic research and communication skills, and critical thinking acquired in Surgical Pathology I, and to reinforce the resources and technical requirements needed to reach the correct pathological diagnosis.

Level: Postgraduate Coursework Level 7 subject

Equivalent Subjects: MEDI 7033 - Surgical Pathology 2

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/medi7073/>)

MEDI 7074 Surgical Pathology of the Head and Neck, Haematopathology and Paediatric Pathology (10 Credit Points)

This unit will re-inforce the diagnostic entities in haematopathology, head and neck, and paediatric pathology that were introduced in Surgical Pathology IV. Two self-directed online learning modules with digitalized images and practical notes on the diagnostic approach to important pathological entities of the above sub-specialties will be provided. Upon completion of the unit students will have advanced knowledge in surgical, cyto- and small biopsy pathology, including appropriate ancillary techniques and recent research developments.

This unit will promote behaviours that create a safe, caring, ethical and professional practice required by pathologists.

Level: Postgraduate Coursework Level 7 subject

Equivalent Subjects: MEDI 7036 - Cytopathology and Small Biopsy Pathology 5

Nursing (NURS)

NURS 0001 Nursing and Midwifery Exchange Unit 1 (10 Credit Points)**Legacy Code:** 900616**Level:** Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs0001/>)**NURS 0002 Nursing and Midwifery Exchange Unit 2 (10 Credit Points)****Legacy Code:** 900617**Level:** Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs0002/>)**NURS 0003 Nursing and Midwifery Exchange Unit 3 (10 Credit Points)****Legacy Code:** 900618**Level:** Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs0003/>)**NURS 0004 Nursing and Midwifery Exchange Unit 4 (10 Credit Points)****Legacy Code:** 900619**Level:** Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs0004/>)**NURS 0005 Nursing and Midwifery Exchange Unit 5 (10 Credit Points)****Legacy Code:** 900620**Level:** Undergraduate Level 0 Preparatory subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs0005/>)**NURS 1001 Approaches to Professional Nursing Practice (10 Credit Points)****Legacy Code:** 401007

Approaches to Professional Nursing Practice explores the nature and professional context of nursing. The roles and functions of the nurse and their relationship to others are considered in terms of expected competence, responsibilities, accountabilities, and scope of practice. Students will gain an understanding of information enabled care, which is central to modern practice.

Level: Undergraduate Level 1 subject**Incompatible Subjects:** NURS 1002 - Becoming a Nurse NURS 1008 - Knowing Nursing**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs1001/>)**NURS 1004 Bioscience for Midwifery (10 Credit Points)****Legacy Code:** 401031

This unit extends knowledge gained in Bioscience I and introduces midwifery students to concepts associated with early human development, labour, birth and postpartum changes. Physiological changes in the newborn at birth are identified together with growth and development to six weeks of age. The unit includes an introduction to principles of pharmacology and pharmacological agents that may be used as a supportive resource during pregnancy and birth. In addition to this, the unit also explores the impact of microorganisms on maternal and newborn health and the body's natural defenses in maintaining health.

Level: Undergraduate Level 1 subject**Pre-requisite(s):** BIOS 1010**Co-requisite(s):** NURS 1010 AND NURS 1013**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs1004/>)**NURS 1005 Foundations for Nursing Practice (10 Credit Points)****Legacy Code:** 401029

This unit is conducted in an intensive study mode that is offered to students with a previous degree in biological or behavioural science or who are registered nurses with registration from overseas. The unit provides foundational and core learning activities to support student transition into second year units of the Bachelor of Nursing (Graduate Entry).

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs1005/>)**NURS 1006 Human Relationships and Life Transitions (10 Credit Points)****Legacy Code:** 401005

This unit enables students to develop an understanding of human relationships and life transitions, and introduces concepts that inform nursing and midwifery practice. The unit explores frameworks that support an understanding of the psychological, social, cognitive and moral components of human development throughout the lifespan, the development of self, and normative (expected) and non-normative (deviation from the expected) life transitions in the context of people realising their health potential.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs1006/>)

NURS 1009 Midwifery Knowledge 1 (10 Credit Points)**Legacy Code:** 401030

This unit introduces students to the meaning of birth in society and the historical and social contexts of midwifery, from its early beginnings, to its current professional standing. The philosophy of midwifery and the role of the midwife within a continuity of care framework will be explored with a particular focus on the provision of care in the antenatal period. This will include approaches for working in partnership with women and their families. Students will investigate, identify and access scientific information and research in order to develop academic literacy at a beginning level. They will identify the principles of communication and explore educational resources for childbirth.

Level: Undergraduate Level 1 subject**Co-requisite(s):** BIOS 1010 AND

NURS 1012

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs1009/>)**NURS 1010 Midwifery Knowledge 2 (10 Credit Points)****Legacy Code:** 401032

This unit introduces students to midwifery knowledge for childbirth within a woman centred partnership model. It provides the theoretical foundations to equip students in understanding the role of the midwife during late pregnancy, labour and birth and the initial care of the newborn. The educational, psychological and social needs of women are explored and integrated with learning from the Bioscience for Midwifery unit. The unit briefly introduces students to midwifery care related to the immediate postnatal and newborn period including lactation and breastfeeding.

Level: Undergraduate Level 1 subject**Pre-requisite(s):** NURS 1009 AND

NURS 1012

Co-requisite(s): NURS 1004 AND

NURS 1013

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs1010/>)**NURS 1012 Midwifery Professional Practice 1 (10 Credit Points)****Legacy Code:** 401219

In this unit students will learn the necessary midwifery skills for the provision of woman-centred antenatal care. In a simulated practice environment students will gain practical skills to provide midwifery care to the woman and her supportive others during pregnancy. This unit will also focus on preparing students for clinical placement. The importance of work health and safety and effective communication and documentation will be reinforced. This unit will include recruitment of women for the continuity of care experience.

Level: Undergraduate Level 1 subject**Co-requisite(s):** NURS 1009**Equivalent Subjects:** NURS 1007 Introduction to Midwifery Practice Experience**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs1012/>)**NURS 1013 Midwifery Professional Practice 2 (10 Credit Points)****Legacy Code:** 401220

In this unit students will develop skills for the provision of midwifery care across the birthing continuum. The primary focus of this unit will be the acquisition of skills for supporting women during normal pregnancy and birth. Students will apply knowledge gained from Midwifery Knowledge 1 and 2 in simulated practice environments and will gain a comprehensive understanding of the practical aspects of midwifery care for women experiencing normal labour and birth. Students will gain practical experience in designated clinical areas and will follow women through pregnancy, birth and the postnatal period in a continuity of care experience.

Level: Undergraduate Level 1 subject**Pre-requisite(s):** NURS 1012 AND

NURS 1009

Co-requisite(s): NURS 1010**Equivalent Subjects:** NURS 1011 Midwifery Practice Experience 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs1013/>)**NURS 1017 Primary Health Care in Action (10 Credit Points)****Legacy Code:** 401001

This unit introduces nursing and midwifery students to Primary Health Care (PHC) as a social model of health and a World Health Organization (WHO) strategy for achieving just and humane health care. The unit explores the impact and relevance of PHC as a framework for organising an Australian health care system that decreases health inequities and optimises the health of all people. Students will examine the dimensions of PHC that assist in establishing collaborative partnerships in which people are supported to take responsibility for their health, including members of culturally diverse groups.

Level: Undergraduate Level 1 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs1017/>)**NURS 1019 Professional Communication in Nursing (10 Credit Points)****Legacy Code:** 401205

This unit will be replaced from Autumn 2022 by 401448 Becoming a Professional Nurse. This unit develops the written and interpersonal skills of students in preparation for professional practice. Students are introduced to the concepts of language, literacy and learning styles that are required for both academic and professional life. Cultural sensitivity, safety and competence that facilitate appropriate intercultural communication are explored within the context of contemporary healthcare.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** NURS 1018 Professional Communicatoin**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs1019/>)

NURS 1020 Professional Practice Experience 1 (10 Credit Points)**Legacy Code:** 401000

Professional Practice Experience 1 focuses on the development of the role and clinical skills of the registered nurse when promoting, maintaining, and supporting a person's health and wellbeing across the lifespan. Students will be able to develop the foundational clinical skills in a simulated clinical environment to enable the further development of more complex skills in a health care setting.

Level: Undergraduate Level 1 subject**Co-requisite(s):** NURS 1019 AND BIOS 1010**Equivalent Subjects:** NURS 1016 - Nursing Health and Wellbeing**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs1020/>)**NURS 1021 Professional Practice Experience 2 (10 Credit Points)****Legacy Code:** 401004

Professional Practice Experience 2 focuses on the development of the role and clinical skills of the registered nurse when promoting, maintaining, and supporting person centred care. A simulated professional task will assist with the development of essential clinical communications and a professional experience placement to evaluate clinical skills development. The unit includes 80 hours of Professional Experience Placement.

Level: Undergraduate Level 1 subject**Pre-requisite(s):** NURS 1020**Co-requisite(s):** BIOS 1011**Equivalent Subjects:** NURS 1014 - Nursing and Health Breakdown**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs1021/>)**NURS 1022 Becoming a Professional Nurse (10 Credit Points)**

Becoming a Professional Nurse or Midwife facilitates a students understanding of becoming a health care professional. Students are introduced to cultural sensitivity, safety, and competence to facilitate appropriate intercultural communication within the context of contemporary healthcare. The role of the registered nurse or midwife is explored, with students gaining an understanding of accountability, responsibility, therapeutic and professional relationships, and their capability for practice.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** NURS 1018 - Professional Communication
NURS 1019 - Professional Communication in Nursing**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs1022/>)**NURS 1023 Bioscience 1 (10 Credit Points)**

Bioscience 1 introduces the core concepts and terminology related to the structure, function and homeostasis of the human body. Students begin to describe the relationships between the Australian National Health Priority areas and performances of activities of living and healthy lifestyle practices. All assessments in this unit are mandatory.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** BIOS 1010 - Bioscience 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs1023/>)**NURS 1024 Bioscience 2 (10 Credit Points)**

Bioscience 2 introduces the concepts associated with alterations in health across the lifespan. It will introduce pathophysiology, pharmacology, immunology, and microbiology related to health breakdown due to injury or disease. This unit specifically examines impact of microorganisms on the health of people and the body's natural defences when dealing with infections and injuries and its significance to person centred care. All assessments in this unit are mandatory.

Level: Undergraduate Level 1 subject**Co-requisite(s):** NURS 1023**Equivalent Subjects:** BIOS 1011 - Bioscience 2**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs1024/>)**NURS 1025 Person-centred Care Across the Lifespan (10 Credit Points)**

This unit introduces the concept of person-centred care as an approach that is respectful of, and responsive to, the preferences, needs and values of individual people throughout the lifespan. Students develop an understanding of human relationships and life transitions, including concepts that inform nursing and midwifery practice. The unit explores frameworks that support an understanding of the psychological, social, cognitive and moral components of human development including mental health and care of the older person.

Level: Undergraduate Level 1 subject**Equivalent Subjects:** NURS 1006 - Human Relationships and Life Transitions**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs1025/>)**NURS 2001 Aboriginal and Torres Strait Islander Health (10 Credit Points)****Legacy Code:** 401206

In Autumn 2022 this unit will be replaced by unit 401454 - Indigenous Australian Health, Wellness and Culture. This unit will specifically enable nursing and midwifery students to investigate, discuss and develop an understanding of Aboriginal and Torres Strait Islander health, health statistics, historical and present day issues associated with poor health outcomes in Aboriginal and Torres Strait Islander people. In addition, the general concepts of cultural safety and health and illness, will be explored in terms of Aboriginal and Torres Strait Islander populations. Further, the unit promotes the development of critical knowledge essential for students to understand their own values, beliefs, biases, and perceptions to become culturally sensitive and appropriately adaptable when meeting the health needs of Aboriginal and Torres Strait Islander People. A case study approach will provide the framework for students to explore and reflect on the impact of the different attitudes, institutional policies and value systems relating to the health of Aboriginal and Torres Strait Islander people in Australia.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** NURS 2017 Health in a Culturally Diverse Community**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs2001/>)

NURS 2004 Complex Care 1 (10 Credit Points)**Legacy Code:** 401036

This unit introduces students to complexities in health that emerge during pregnancy, labour, birth and the postnatal period which require additional care when the health of the mother and/or neonate may be compromised. This module also focuses on the midwifery care of the sick neonate.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** NURS 2022 AND NURS 2025**Co-requisite(s):** NURS 2026

Restrictions: Please see the Subject Details page for any restrictions for this subject
Subject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs2004/>)

NURS 2008 Graduate Entry Practice Experience (10 Credit Points)**Legacy Code:** 401218

This unit provides the student with an opportunity to consolidate their clinical skills development in an Australian health care facility, and contributes to the minimum professional practice experience placement requirement.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** NURS 1005**Co-requisite(s):** NURS 2028**Equivalent Subjects:** NURS 2030 Professional Practice Experience A

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs2008/>)

NURS 2010 Health Variations 1 - Perioperative (10 Credit Points)**Legacy Code:** 401207

In Autumn 2022 this unit will be replaced by unit 401455 - Health Variations 1 - Introduction to Alterations in Health. This unit provides the theoretical background knowledge for Professional Practice 3. It introduces the student to the fundamental principles of perioperative nursing care in supporting clients undergoing surgical interventions incorporating the related pathophysiology and pharmacology. In particular, nursing care of surgical interventions relating to the gastrointestinal, musculoskeletal and reproductive systems, and injury prevention and controls will be the focus of case history reviews. The National Health Priority Areas of Injury Prevention and Control, Arthritis and Musculoskeletal conditions and Cancer Control will be addressed.

Level: Undergraduate Level 2 subject**Co-requisite(s):** Co-requisites for 4691 and 4693 BIOS 1010 Bioscience 1 and BIOS 1011 Bioscience 2**Equivalent Subjects:** NURS 2009 Health Variations 1

Restrictions: Please see the Subject Details page for any restrictions for this subject
Subject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs2010/>)

NURS 2013 Health Variations 2 - Chronic Illness and Disability (10 Credit Points)**Legacy Code:** 401209

This unit will be replaced from Spring 2022 by 401444 Health Variations 2 - Chronic Conditions and Disability. This unit explores the concepts of chronicity, disability, habilitation and rehabilitation in relation to chronic conditions, functional and intellectual disabilities and their implications for nursing practice. The relevance of the International Classification of Functioning, Disability and Health (ICF) to primary health care is the core philosophy of the unit. National Health Priority case studies drawn from across the lifespan will provide a focus for exploring pathophysiology, pharmacological interventions and nursing care related to chronic conditions of the endocrine, neurological and respiratory body systems. In addition, the nursing role in supporting those with physical and intellectual disability will be examined.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** NURS 2011 Health Variations 2

Restrictions: Please see the Subject Details page for any restrictions for this subject
Subject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs2013/>)

NURS 2014 Health Variations 2 Advanced - Chronic Illness and Disability (10 Credit Points)**Legacy Code:** 401215

This unit encourages critical analysis to explore the concepts of chronicity, disability, habilitation and rehabilitation in relation to chronic conditions, functional and intellectual disabilities and their implications for nursing practice. National Health Priority Case Studies drawn from across the lifespan will provide a focus for exploring pathophysiology, pharmacological interventions and nursing care related to chronic conditions of the endocrine, neurological and respiratory body systems. In addition, a problem-solving nursing approach will be developed for supporting those with physical and intellectual disability.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** NURS 2012 Health Variations 2 (Advanced)

Restrictions: Please see the Subject Details page for any restrictions for this subject
Subject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs2014/>)

NURS 2016 Health Variations 3 - Acute Exacerbations of Chronic Conditions (10 Credit Points)**Legacy Code:** 401210

Health Variations 3 - Acute Exacerbations of Chronic Conditions utilises an evidence base to develop an understanding of pathophysiology, pharmacological interventions, and nursing care for people who experience acute exacerbations of chronic conditions.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** NURS 2015 Health Variations 3

Restrictions: Please see the Subject Details page for any restrictions for this subject
Subject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs2016/>)

NURS 2018 Legal and Ethical Issues in Midwifery (10 Credit Points)**Legacy Code:** 401037

This unit explores responsibilities related to the nature and professional context of midwifery. It focuses on developing students understanding of legal and ethical issues and the midwives obligation to work within ethical and legal frameworks for safe practice. The legal and ethical roles and functions of the midwife and their relationship to others are considered in terms of expected standard, responsibilities, accountabilities and scope of practice within the regulatory framework. It will provide an opportunity for students to explore and discuss ethical issues related to midwifery, reproductive and maternal health.

Level: Undergraduate Level 2 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs2018/>)**NURS 2022 Midwifery Knowledge 3 (10 Credit Points)****Legacy Code:** 401034

This unit provides students with the midwifery knowledge related to the postnatal period. It will focus on maternal postnatal and newborn care including infant feeding, bonding and attachment. Breastfeeding is a core maternity indicator and is a focus for improving public health. Midwifery skills and knowledge to assist women in the preparation, initiation and establishment of breastfeeding will be examined as well as the historical and social contexts of infant feeding and challenges that this and other problems may pose for women. The midwives role in supporting women who are breastfeeding is addressed including the need to offer consistent evidence-based information.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** NURS 1010**Co-requisite(s):** NURS 2025**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs2022/>)**NURS 2025 Midwifery Professional Practice 3 (10 Credit Points)****Legacy Code:** 401221

In this unit students will learn the necessary midwifery skills for the provision of woman centred post birth care. In a simulated practice environment students will gain practical skills to provide midwifery care to both the woman and her baby up until six weeks postpartum. The importance of effective communication and documentation will also be reinforced. This unit will also include blocks of practical experience in designated clinical areas and the provision of continuity of care.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** NURS 1013 AND

NURS 1004

Co-requisite(s): NURS 2022**Equivalent Subjects:** NURS 2023 Midwifery Practice Experience 3**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs2025/>)**NURS 2026 Midwifery Professional Practice 4 (10 Credit Points)****Legacy Code:** 401222

In this unit students will develop the necessary skills to provide midwifery care to women and neonates with complex health needs. In lab based simulation environments students will gain confidence in providing midwifery care following the detection of deviations from normal. Students will gain practical experience in designated clinical areas and will follow women through pregnancy, birth and the postnatal period in a continuity of care experience.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** NURS 2025 AND

NURS 2022

Co-requisite(s): NURS 2004**Equivalent Subjects:** NURS 2024 Midwifery Practice Experience 3**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs2026/>)**NURS 2028 Professional Practice Experience 3 (10 Credit Points)****Legacy Code:** 401008

Professional Practice Experience 3 focuses on the development of the role and clinical skills of the registered nurse when assessing and caring for people across the lifespan who are experiencing acute but usually resolvable conditions. A simulated professional task will assist with the development of essential clinical communications and a professional experience placement to evaluate clinical skills development. The unit includes 160 hours of Professional Experience Placement.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** NURS 1021**Co-requisite(s):** NURS 2037**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs2028/>)**NURS 2029 Professional Practice Experience 4 (10 Credit Points)****Legacy Code:** 401012

Professional Practice Experience 4 focuses on the development of the role and clinical skills of the registered nurse when caring for people experiencing an acute exacerbation of a chronic condition. A simulated professional task will assist with the development of essential clinical communications and a professional experience placement to evaluate clinical skills development. The unit includes 160 hours of Professional Experience Placement.

Level: Undergraduate Level 2 subject**Pre-requisite(s):** NURS 2028**Co-requisite(s):** NURS 2038 AND

NURS 2016

Restrictions: Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs2029/>)

NURS 2031 Promoting Mental Health and Wellbeing 1 (10 Credit Points)**Legacy Code:** 401013

This unit introduces students to the care of individuals with mental health concerns and/or illness. The national mental health policies provide a framework to focus on a range of determinants and consequences of mental health and illness in Australia. The principles of stress vulnerability and recovery will be introduced. The unit will offer an introduction for students to caring for individuals with depression, anxiety and substance use, and their families/significant others. The concepts of therapeutic use of self and reflection when engaging with people with mental health needs will be introduced. Students will develop their knowledge of mental health assessment, risk assessment and risk management across the lifespan. Self-care strategies in everyday collaborative nursing and midwifery practice will be considered.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** NURS 2021 - Mental Health Nursing 1**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs2031/>)**NURS 2034 Research for Nursing (Advanced) (10 Credit Points)****Legacy Code:** 401214

This unit introduces students to the major research paradigms, research principles, concepts that inform critical analysis of literature, the basis of evidence based practice and oral presentation skills.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** NURS 2032 Research Principles for Nursing (Advanced)**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs2034/>)**NURS 2035 Research for Nursing and Midwifery (10 Credit Points)****Legacy Code:** 401208

This unit will be replaced from Autumn 2022 by 401449 Evidence-based Practice for Nursing and Midwifery. In this unit nursing and midwifery students will develop a foundational understanding of research concepts that inform analysis of literature and evidence based practice. These skills will broaden the students understanding of the importance of research that underpins nursing and midwifery practice.

Level: Undergraduate Level 2 subject**Co-requisite(s):** Co-requisite for 4691 NURS 1019 Professional Communication in Nursing**Equivalent Subjects:** NURS 2005 Evidence-Based Nursing NURS 2033 Research Principles for Nursing and Midwifery**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs2035/>)**NURS 2036 Evidence-Based Practice for Nursing and Midwifery (10 Credit Points)**

Evidence-Based Practice for Nursing and Midwifery is designed to develop students' knowledge in accessing and making judgements to translate the best available evidence, which includes the most current, valid, and available research findings into practice. General concepts associated with evidence-based health care are explored including conducting literature searches from a wide range of sources, reviewing and appraising research and other evidence, using and translating research into practice.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** NURS 2005 - Evidence-Based Nursing NURS 2033 - Research Principles for Nursing and Midwifery NURS 2035 - Research for Nursing and Midwifery**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs2036/>)**NURS 2037 Health Variations 1 - Introduction to Alterations in Health (10 Credit Points)**

Health Variations 1 utilises an evidence base to develop an understanding of pathophysiology, pharmacological interventions, and nursing care of people across the lifespan who are experiencing acute but usually resolvable alterations in health. A particular focus of this unit are the Australian National Health Priority Areas.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** NURS 2010 - Health Variations 1 - Perioperative**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs2037/>)**NURS 2038 Health Variations 2 - Chronic Conditions and Disability (10 Credit Points)**

Health Variations 2 - Chronic Conditions and Disability utilises an evidence base to develop an understanding of pathophysiology, pharmacological interventions, and nursing care for people across the lifespan who experience chronic conditions and disability.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** NURS 2013 - Health Variations 2 Chronic Illness and Disability**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs2038/>)**NURS 2039 Indigenous Australian Health, Wellness and Culture (10 Credit Points)**

Indigenous Australian Health, Wellness and Culture unit will specifically enable nursing and midwifery students to investigate, discuss and develop an understanding of Aboriginal and Torres Strait Islander health, health statistics, historical and present-day issues associated with poor health outcomes in Aboriginal and Torres Strait Islander people. The concepts of cultural safety, health and illness will be discussed in terms of Aboriginal and Torres Strait Islander people. Students will explore and reflect on the impact of the different attitudes, institutional policies and value systems relating to the health of Aboriginal and Torres Strait Islander people in Australia.

Level: Undergraduate Level 2 subject**Equivalent Subjects:** NURS 2001 - Aboriginal and Torres Strait Islander Health**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs2039/>)

NURS 2040 Pharmacology in Nursing (10 Credit Points)

It is imperative that registered nurses and registered midwives have a solid understanding of pharmacology. This unit introduces principles and core concepts of pharmacology with a distinct emphasis on safe medication administration in nursing and midwifery. Students will acquire knowledge of pharmacokinetics and pharmacodynamics and systematically develop an understanding of actions and reactions of commonly prescribed drugs to individual people across the lifespan. Electronic medication management systems, patient education and engagement in medication management are addressed in this unit.

Level: Undergraduate Level 2 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs2040/>)

NURS 2041 Promoting Mental Health and Wellbeing (10 Credit Points)

Promoting Mental Health and Wellbeing develops mental health nursing knowledge and skill needs of the nursing workforce across a range of service delivery settings. It explores contemporary models of care such as recovery-oriented practice, trauma-informed care, and social determinants approach. Students will plan evidence-based initiatives that promote mental health, prevent and intervene early in illness, facilitate recovery, and promote wellbeing.

Level: Undergraduate Level 2 subject

Equivalent Subjects: NURS 2031 - Promoting Mental Health and Wellbeing 1

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs2041/>)

NURS 3001 Being a Professional Nurse (Advanced) (10 Credit Points)

Legacy Code: 401027

This unit explores the process of transition from student to professional practitioner. Students undertaking the BN Advanced course will gain a critical understanding of the congruence between the provision of health care and professional regulatory frameworks. The role of the graduate nurse will be explored through a detailed examination of case studies that apply relevant nursing theory to professional practice. This unit will build capacity in students to meet their professional responsibilities as new graduate practitioners in nursing. Students will also have the opportunity to discuss career planning and set priorities for ongoing professional development.

Level: Undergraduate Level 3 subject

Co-requisite(s): NURS 3033

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs3001/>)

NURS 3002 Being a Professional Nurse or Midwife (10 Credit Points)

Legacy Code: 401021

Being a Professional Nurse or Midwife explores the process of transition from student to a registered health care professional. Students analyse their role as a registered nurse or registered midwife, reflecting on accountability, responsibility, therapeutic and professional relationships, and their capability for practice. This unit will build capacity in students to meet their professional responsibilities as capable practitioners in nursing or midwifery and will have an opportunity to demonstrate job readiness skills in preparation for new graduate employment opportunities.

Level: Undergraduate Level 3 subject

Co-requisite(s): NURS 3039

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs3002/>)

NURS 3003 Clinical Leadership and Professional Relationships (10 Credit Points)

Legacy Code: 401213

The unit explores fundamental concepts and issues related to leadership in nursing and midwifery. The unit focuses on exploration of contemporary innovative approaches to leadership that may contribute to nursing and midwifery standards, person and woman centred practice, critical reflection and critical thinking in dynamic healthcare contexts.

Level: Undergraduate Level 3 subject

Equivalent Subjects: NURS 3019 Leadership in Graduate Practice NURS 3021 Leadership in Nursing and Midwifery

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs3003/>)

NURS 3004 Clinical Leadership in Nursing (Advanced) (10 Credit Points)

Legacy Code: 401217

This unit explores fundamental and advanced concepts and issues related to leadership in nursing to enable the advanced student to reflect on future leadership aspirations. The unit focuses on exploration of contemporary, emerging and innovative approaches to leadership that contribute to nursing standards, person-centred practice, evidence-based leadership, critical reflection and critical thinking in dynamic healthcare contexts.

Level: Undergraduate Level 3 subject

Equivalent Subjects: NURS 3020 Leadership in Nursing (Advanced)

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs3004/>)

NURS 3005 Collaborative Care (10 Credit Points)**Legacy Code:** 401040

The Australian College of Midwives and the National Health and Medical Research Council (NHMRC) provide guidelines to assist midwives to recognise when to refer or consult with other midwives or health care practitioners, as well as collaborative care arrangements. This unit provides students with the knowledge to collaborate with all health professionals. This includes assessing procedures for managing obstetric emergencies; transferring women or newborns; assessing referral pathways; and caring for bereaved families.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** NURS 2004 AND NURS 2026**Co-requisite(s):** NURS 3006 AND NURS 3030 AND NURS 3036**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs3005/>)**NURS 3006 Complex Care 2 (10 Credit Points)****Legacy Code:** 401039

This unit continues to explore the complex issues surrounding childbirth with a particular emphasis on those women who have pre-existing conditions. Dilemmas and challenges that surround infertility, medical conditions and previous surgical conditions as well as environmental issues that may impact on pregnancy and or birth, are examined. In addition, the unit includes the implications and management for the care of the associated neonate.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** NURS 2004 AND NURS 2026**Co-requisite(s):** NURS 3030 AND NURS 3005 AND NURS 3036**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs3006/>)**NURS 3007 Contemporary Issues in Child and Adolescent Health (10 Credit Points)****Legacy Code:** 401196

This unit begins with a brief examination of socio-cultural theories of childhood and adolescence as a background for the critical analysis of current debates about the health and wellbeing of children and adolescents. Case studies will be used to explore contestable topics in child and youth health from an interdisciplinary perspective. The unit will address issues of child protection and parental responsibility in the mainstream community, Aboriginal and Torres Strait Islanders, and refugee health care settings. Knowledge gained in this unit will assist beginning practitioners in a variety of disciplines to take informed positions on topics relevant to child and adolescent health.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs3007/>)**NURS 3014 Health Variations 4 (Advanced) - Acute Life Threatening Conditions (10 Credit Points)****Legacy Code:** 401216

This unit develops a student's knowledge, critical thinking and problem-solving skills related to the pathophysiology, pharmacology and nursing care for people who experience an acute life-threatening and/or traumatic condition that may involve multiple systems failure. National Health Priority case histories used in the unit will focus on cardiovascular disease, and injury prevention and control. The unit will also consider habilitation and rehabilitation of people who have experienced acute life-threatening or traumatic complex health issues. Workshops will be used to provide the student with the necessary advanced assessment, clinical problem-solving skills and simulation experiences to recognise the deteriorating patient with potential life-threatening conditions and intervene with reporting, monitoring and initiation of treatment skills.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs3014/>)**NURS 3015 Health Variations 4 - Acute Life Threatening Conditions (10 Credit Points)****Legacy Code:** 401211

Health Variations 4 - Acute Life-Threatening Conditions utilises an evidence base to develop an understanding of the pathophysiology, pharmacological interventions, and nursing care for people across the lifespan who experience acute life-threatening conditions. An important area of focus is detecting and recognising acute deterioration and escalating care.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** NURS 2016**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs3015/>)**NURS 3017 Health Variations 5 - Palliative and End of Life Care (10 Credit Points)****Legacy Code:** 401212

Health Variations 5 - Palliative and End of Life Care focuses on the palliative approach as a model of care, exploring the benefits of this approach when supporting dying individuals with any life limiting illness. Students will also acquire the capabilities to develop self-care strategies to manage their own grief, loss and stress associated with working in a palliative setting.

Level: Undergraduate Level 3 subject**Equivalent Subjects:** NURS 3016 Health Variations 5**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs3017/>)

NURS 3022 Maintaining Clinical Currency (10 Credit Points)**Legacy Code:** 400768

This unit provides students with the opportunity to review: the pathophysiological aspects of health breakdown in individuals; the knowledge of pharmacological processes within nursing practice; and, to demonstrate competency in skills essential to the nursing management of individuals with various types of health breakdown. In addition students will complete a four-week negotiated clinical practicum prior to graduate employment.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** NURS 3033**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs3022/>)**NURS 3023 Maternal and Infant Health Care (10 Credit Points)****Legacy Code:** 401237

Maternal and Infant Health care introduces students from Nursing, Health Sciences and other disciplines to the key physiological, social and emotional issues around pregnancy, labour and birth and early parenthood. It also examines the Australian maternity care system and model of care. Content covered in the unit will include; foetal development, normal physiological labour and birth, health promoting behaviours and development of parenting confidence. Importance will also be placed on the role of social support, infant feeding practices and communication and newborn care. Models of care and the impact of the media on shaping parenting ideas and practices will be covered.

Level: Undergraduate Level 3 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs3023/>)**NURS 3025 Midwifery Practice - Global Maternal Health (10 Credit Points)****Legacy Code:** 401226

This unit will provide students with an opportunity to explore the full scope of midwifery practice from a global perspective. Students will gain an understanding of the role midwifery plays within the broader context of women's health both in Australia and globally. It will provide an opportunity for students to experience an alternative midwifery model. Students will undertake a three week practice placement. The practice placement can be located locally, nationally or internationally. The purpose of this placement is for students to consider the role of midwifery and its impact on improving women's health in a range of settings. It will support the development of skills in assessing the need and rationale for the provision of midwifery services in different environments and settings.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** NURS 3030 AND NURS 2004**Equivalent Subjects:** NURS 3026 Midwifery Practice - Models of Care**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs3025/>)**NURS 3030 Midwifery Professional Practice 5 (10 Credit Points)****Legacy Code:** 401223

In this unit students will further develop midwifery skills for the management of complications and emergency situations. In simulated practice environments students will gain the skills necessary to work collaboratively with interdisciplinary colleagues. Students will gain practical experience in designated clinical areas and will follow women through pregnancy, birth and the postnatal period in a continuity of care experience.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** NURS 2026**Co-requisite(s):** NURS 3006 AND NURS 3005 AND NURS 3036**Equivalent Subjects:** NURS 3028 Midwifery Practice Experience 5**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs3030/>)**NURS 3031 Midwifery Professional Practice 6 (10 Credit Points)****Legacy Code:** 401224

This unit provides the opportunity for students to consolidate their knowledge and skills in preparation for their role as a midwife. Students will be assessed across the seven standards of the Midwife standards for practice. Students will gain practical experience in designated clinical areas and will follow women through pregnancy, birth and the postnatal period in a continuity of care experience.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** NURS 3030 AND

NURS 3006 AND

NURS 3005 AND

NURS 3036

Co-requisite(s): NURS 3025**Equivalent Subjects:** NURS 3029 Midwifery Practice Experience 5**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs3031/>)**NURS 3032 Professional Practice Experience 5 (10 Credit Points)****Legacy Code:** 401016

Professional Practice Experience 5 focuses on the development of the role and clinical skills of the registered nurse when assessing and caring for people across the lifespan who are experiencing acute life-threatening illness and life limiting illness. A simulated professional task will assist with the development of essential clinical communications and a professional experience placement to evaluate clinical skills development. The unit includes 160 hours of Professional Experience Placement.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** NURS 2029**Co-requisite(s):** NURS 3015**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs3032/>)

NURS 3033 Professional Practice Experience 6 (10 Credit Points)**Legacy Code:** 401020

This unit will be replaced from Spring 2022 by 401452 Professional Experience Placement. This unit provides a unique opportunity to consolidate and extend the students skill base in preparation for graduate practice. Students will gain an understanding of the congruence between the provision of health care and professional regulatory frameworks in dynamic healthcare contexts. The role of the graduate nurse will be explored through critical reflection and critical thinking of case studies that reflect person-centered practice. The unit includes 240 hours of clinical placement.

Level: Undergraduate Level 3 subject

Pre-requisite(s): Pre-requisites for 4691 and 4693 NURS 1020 Professional Practice Experience 1 NURS 1021 Professional Practice Experience 2 NURS 2028 Professional Practice Experience 3 and NURS 2029 Professional Practice Experience 4 Pre-requisites for 4692 NURS 2028 Professional Practice Experience 3 NURS 2029 Professional Practice Experience 4 NURS 1005 Foundations for Nursing Practice and NURS 2008 Graduate Entry Practice Experience

Co-requisite(s): NURS 3032

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs3033/>)

NURS 3034 Promoting Mental Health and Wellbeing 2 (10 Credit Points)**Legacy Code:** 401017

This unit builds on the foundations of mental health and wellbeing established in earlier units. The relationship between stress and vulnerability will be explored within the context of the psychotic disorders schizophrenia and bipolar affective disorder. Students will gain an understanding of how the principles of recovery, introduced in an earlier unit, are applied to caring for people with schizophrenia and bipolar affective disorder. Altered mood, perception, and thinking will be explored and evidence-based assessment tools and biological and psychosocial interventions introduced for facilitating recovery towards mental health and wellbeing.

Level: Undergraduate Level 3 subject**Co-requisite(s):** NURS 2031**Equivalent Subjects:** NURS 3024 Mental Health Nursing

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs3034/>)

NURS 3035 Promoting Mental Health and Wellbeing 2 (Advanced) (10 Credit Points)**Legacy Code:** 401025

This unit will expand further the concepts of mental health and wellbeing established in Promoting Mental Health and Wellbeing 1. The relationship between stress and vulnerability will be critically analysed within the context of the psychotic disorders such as schizophrenia and bipolar affective disorder. Altered mood, perception, and thinking will be explored and evidence-based assessment tools and biological and psychosocial interventions introduced for facilitating recovery towards mental health and wellbeing.

Level: Undergraduate Level 3 subject**Co-requisite(s):** NURS 2031

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs3035/>)

NURS 3036 Psychosocial Issues in the Perinatal Period (10 Credit Points)**Legacy Code:** 401225

In this unit students will gain knowledge of the psychosocial risk and protective factors that influence outcomes for women and their babies. Students will explore issues related to perinatal mental health. This will include antenatal and postnatal depression and anxiety, substance misuse, domestic violence and the midwife's role in supporting women and their families in perinatal grief and loss situations. Through interactive discussions and role play students will strengthen their skills in psychosocial assessment and working in partnership with women and families to explore concerns, facilitate behaviour change in individual and group-based learning contexts and identify effective early intervention strategies and referral pathways.

Level: Undergraduate Level 3 subject**Pre-requisite(s):** NURS 2004

Co-requisite(s): NURS 3006 AND
NURS 3030 AND
NURS 3005

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs3036/>)

NURS 3037 Risk Mitigation and Ethics for Australian Health Professionals (10 Credit Points)**Legacy Code:** 401240

This unit will provide a comprehensive understanding of the ethical standards required by health care professionals when providing patient care with a focus on risk minimisation for patients. Recently litigated cases will be used as case studies to explore ethical dilemmas that health professionals can expect to arise over the course of their professional careers. Knowledge gained will greatly assist health professionals to deliver safe and ethical health care to their patients. Only health professionals regulated in Australia whose professional bodies have designated codes of conduct, codes of professional practice and / or codes of ethics will be utilised in this unit.

Level: Undergraduate Level 3 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs3037/>)

NURS 3039 Professional Experience Placement (20 Credit Points)

Professional Experience Placement is a capstone unit which provides students an opportunity to consolidate the development of the role and clinical skills of the registered nurse in preparation for transition to graduate practice. A simulated professional task will assist with the development of essential clinical communications and a professional experience placement to evaluate clinical skills development. The unit includes 240 hours of Professional Experience Placement.

NURS 4001 Methods and Methodologies in Midwifery Research (10 Credit Points)

This unit will broaden and deepen students understanding of research methodologies and methods and develop research skills in order to apply these to a specific Bachelor of Midwifery (Honours) research project.

Level: Undergraduate Level 4 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs4001/>)

NURS 4002 Midwifery Honours Thesis (Part-Time) (60 Credit Points)

Research is a necessary undertaking toward the continued development of midwifery science and practice. The aim of this unit is to both broaden and deepen Bachelor of Midwifery (Honours) students' understanding of research methods and the application of knowledge and skills to conceptualise, design and conduct a research project. The unit provides an opportunity for students, under the guidance of their supervisors to plan and implement a research project related to midwifery which results in the production of a written thesis of between 15,000 to 20,000 words in length, which demonstrates proficiency in the execution of the study and ability to effectively communicate results and conclusions.

Level: Undergraduate Level 4 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs4002/>)

NURS 4003 Midwifery Honours Thesis A (Full-time) (20 Credit Points)

Research is a necessary undertaking toward the continued development of midwifery science and practice. Midwifery Thesis is comprised of Midwifery Thesis A (20 credit points) which is a continuing unit to Midwifery Thesis B (40 Credit points) in which the completed Midwifery Thesis is due to be submitted for examination. In the Midwifery Thesis A unit, in consultation with their academic supervisors, the student will select a topic, conduct a literature review, design and implement a research study, and report the findings and their implications. The unit provides an opportunity for students, under the guidance of their supervisors to propose, plan and implement a research project related to midwifery, and work towards planning, developing and producing a written thesis due to be completed in the Midwifery Thesis B unit.

Level: Undergraduate Level 4 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs4003/>)

NURS 4004 Midwifery Honours Thesis B (Full-time) (40 Credit Points)

Research is a necessary undertaking toward the continued development of midwifery science and practice. The aim of this unit is to both broaden and deepen Bachelor of Midwifery (Honours) students' understanding of research methods and the application of knowledge and skills to conceptualise, design and conduct a research project. The unit provides an opportunity for students, under the guidance of their supervisors to plan and implement a research project related to midwifery which results in the production of a written thesis of between 15,000 to 20,000 words in length, which demonstrates proficiency in the execution of the study and ability to effectively communicate results and conclusions.

Level: Undergraduate Level 4 subject

Pre-requisite(s): NURS 4003

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs4004/>)

NURS 4005 Midwifery Research (10 Credit Points)

Research is a necessary undertaking toward the continued development of midwifery science and practice. The aim of this unit is to both broaden and deepen Bachelor of Midwifery (Honours) students' understanding of various research methods and to extend their ability to discuss, appraise and critique the work of others. An awareness of available methodologies will prepare students to participate in their own research.

Level: Undergraduate Level 4 subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs4010/>)

NURS 7001 Advanced Clinical Practice in Mental Health Nursing (10 Credit Points)

Legacy Code: 401202

Students are required to demonstrate the capacity to work autonomously in a mental health setting and be able to utilise supervision to support achievement of unit learning outcomes. Students undertake at least 300 hours supervised advanced clinical practice in assessment, treatment planning and provision of care for clients in a mental health setting. Clinical practice supervision and support is provided by a Primary Supervisor/Mentor/Assessor and a multidisciplinary clinical support network who will review the student's work in respect of working at an advanced level of clinical practice towards the attainment of a Nurse Practitioner qualification. A clinical assessment peer review panel will be convened at the end of the session to assess the student's knowledge, clinical decision-making, understanding of therapeutic interventions including pharmacological and non-pharmacological agents, as well as their capacity to meet all requirements of the Nurse Practitioner Standards for Practice.

Level: Postgraduate Coursework Level 7 subject

Co-requisite(s): NURS 7006 AND

NURS 7005 AND

NURS 7041

Equivalent Subjects: NURS 7046 Advanced Mental Health Nursing Clinical Practice 1 NURS 7047 Advanced Mental Health Nursing Clinical Practice 2

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7001/>)

NURS 7002 Advanced practice: Infant and Child feeding and Nutrition (10 Credit Points)

Legacy Code: 400834

This unit provides students with advanced theoretical knowledge around infant and young child feeding. The course is predominantly theoretical although students will also be expected to gain practical skills including developing the capacity to undertake comprehensive breastfeeding assessments and assessment of nutritional status in children 0 to 5 years of age. Topics covered include management of complex breastfeeding problems and skills to support women who have unexpected birth outcomes with breastfeeding; the impact of acute and chronic infant and childhood illness on nutritional status and feeding; evidence based strategies and approaches to facilitate good nutritional practices including breastfeeding among disadvantaged and vulnerable populations and working effectively in multidisciplinary teams and with peer or volunteer support groups to promote and support healthy infant and young child feeding practices. There is 120 hours of theoretical content of which approximately 90 hours is directly related to breastfeeding and human lactation. The role of the lactation consultant and legal and ethical issue are addressed for those who wish to work towards this qualification in the future.

Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7002/>)

NURS 7003 Applied Clinical Practice using Simulation (10 Credit Points)

Legacy Code: 401204

Components of skilled nursing practice in acute and critical care settings include clinical reasoning, accountability and patient advocacy. In this unit students will identify a complex case study from their current practice world as the basis for their assessment. This unit utilises clinical simulation and a case study approach to enable students to develop their clinical expertise in their individual workplace. Students will be required to participate in clinical simulation workshops which will be utilised to develop and enhance clinical nursing skills in acute or critical care settings.

Level: Postgraduate Coursework Level 7 subject

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7003/>)

NURS 7004 Applied Research in Health Care (10 Credit Points)

Legacy Code: 401167

Research is a necessary undertaking toward the continued development of nursing, midwifery and health science and practice. This unit prepares students for undertaking or participating in research in the clinical setting. It also seeks to prepare students to consider higher degree research opportunities. Students will explore the various theoretical underpinnings of research as well as develop a clear understanding of various research designs, data collection methods, sampling techniques and data analysis.

Level: Postgraduate Coursework Level 7 subject

Equivalent Subjects: LGYA 7109 - Applied Nursing Research

Restrictions: Please see the Subject Details page for any restrictions for this subject

Subject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7004/>)

NURS 7005 Assessment for Advanced Practice Mental Health Nurses (10 Credit Points)**Legacy Code:** 400228

This unit examines assessment and treatment planning practices for advanced practice nurses. Components of the unit include advanced assessment skills, diagnostic decision making, judicious ordering, reading and interpretation of pathology and radiology tests, triaging and prioritisation, pharmacology, intervention and referral skills. These skills will be addressed in a range of assessment and decision-making situations, to include assessment across the lifespan and recognizing deviation from the norm. Nurses working at an advanced practice level are expected to be able to autonomously undertake comprehensive mental health assessments, and to apply clinical judgement to decision making and treatment planning.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7005/>)**NURS 7006 Biological Considerations in Mental Health and Mental Illness for Advanced Practice (10 Credit Points)****Legacy Code:** 400957

This unit examines neuroanatomy and neurophysiology as they apply to altered thought, mood, perception and behaviour associated with mental illness and knowledge of physical health problems commonly associated with psychiatric treatment and/or mental illness, their identification, management and treatment.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** NURS 7028 Leadership in Clinical Practice**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7006/>)**NURS 7007 Bioscience for Midwifery Practice (10 Credit Points)****Legacy Code:** 401088

This unit provides students with an understanding of the biological and physiological aspects of human reproduction including the menstrual cycle, fertilisation and embryology, pregnancy, labour, birth and the early postnatal weeks. Emphasis will be placed on normal maternal anatomy and physiology of pregnancy, labour and birth and the postnatal period. It will include fetal growth and development, adaptation of the newborn and growth and development to six weeks of age.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7007/>)**NURS 7009 Child and Family Health Practice: Supporting Growth and Development (10 Credit Points)****Legacy Code:** 400972

This unit provides the student with knowledge of the theories of child development and the foundational knowledge and skills to be applied in the screening, surveillance and promotion of health and well-being of young children and families. This includes current immunisation schedules and use of evidence-based developmental screening tools. Content will focus on the normal physical, social and emotional growth and development of young children (0-5 years). The importance of the early years in brain development including infant-parent attachment will be linked to an exploration of child behaviour, sleep and settling, play and safety issues. The child and family health nurses' role in supporting families experiencing infant sleep and settling difficulties and behaviour problems will be addressed. The knowledge gained in this unit will be consolidated through virtual clinical placement.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 7112 - Childhood in Child and Family Health Nursing LGYA 7748 - Child and Family Health Nursing Supporting Child Growth and Development**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7009/>)**NURS 7010 Child and Family Health: Professional Practice and Frameworks (10 Credit Points)****Legacy Code:** 400971

Child and family health is a diverse speciality area with child and family health professionals required to work autonomously across a variety of clinical settings. This unit will focus on the scope and standards of practice of Child and family health practise exploring; historical beginnings and current models of care, appropriate legal & ethical issues and government policies and initiatives that influence practice. Informed by the principles of Primary Health Care, the student will gain skills in supporting families and children within the context of a strengths based partnership model. Health promotion, public health, health surveillance and cultural competence are introduced in this unit. The various strategies for the appropriate support of child and family health professionals will be addressed. In this unit emphasis is also placed on critical thinking and the development of scholarly writing.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** NURS 7063 - Child Family Health Nursing Professional Practice and Frameworks**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7010/>)

NURS 7011 Childbirth in the Australian Context (20 Credit Points)**Legacy Code:** 401089

This unit provides students with the knowledge to work, using a primary health care approach, with women and their families during childbirth including the transition to parenthood. Emphasis will be placed on the biological, psychosocial and cultural aspects of the pregnancy, birth and the postnatal period and understanding of the role of the midwife in maintaining a woman and family focus within a continuity of care model. The neonatal period will also be examined. Childbirth in our culturally diverse maternity health system will be explored, investigated, analysed and discussed with a specific focus on Aboriginal and Torres Strait Islander peoples. This will include the history of Aboriginal and Torres Strait Islander peoples and how events in history have impacted on their health and birthing practices. Experiences of women from other countries and cultures will be examined.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7011/>)**NURS 7012 Clinical Practice: Infant and Child Nutrition and Feeding (10 Credit Points)****Legacy Code:** 400830

This unit focuses on infant feeding including breast feeding as a significant social and cultural process not just an issue of physiology and nutrition. The theoretical component of this unit will focus on the age-appropriate nutrition of infants and young children linked to developmental stages and the role the child and family health professional in supporting families manage associated issues. All areas of early nutrition will be covered including breastfeeding, use of breast-milk substitutes, introduction of solids and toddler nutrition. The knowledge gained in this unit will be consolidated through virtual clinical placement.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7012/>)**NURS 7013 Clinical Supervision in Health Care (10 Credit Points)****Legacy Code:** 401139

This unit aims to provide students with foundational knowledge related to clinical supervision. Clinical supervision is a supportive formal process which enables health care professionals to develop and improve practice, thus potentially improving outcomes for services and service users. Students will explore various models and theories which underpin clinical supervision, and the principles of effective supervision, including legal, ethical and professional considerations. Students will be encouraged to develop skills in self-awareness and reflective practice and to apply these skills to enhance professional growth and outcomes for service users.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7013/>)**NURS 7014 Clinical Teaching and Professional Development (10 Credit Points)****Legacy Code:** 400973

In 2021, this unit is replaced by equivalent unit 401437 - Clinical Teaching and Workplace Learning for Competent Practice. This unit prepares educators and clinicians for their role in clinical education by examining educational theory and its relevance and application to teaching and learning in the clinical workplace. Students will identify and operationalise key priorities for learning and teaching in their organisation and address these by providing appropriate and relevant teaching and learning experiences that build the capacity of colleagues (this can also be extended to include patient and family education). The unit also explores the principles and challenges that are associated with the assessment of competence and the strategies that can be utilised to further develop the knowledge and skills of the clinical educator in the professional practice environment.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7014/>)**NURS 7015 Clinical Teaching for Learning (10 Credit Points)****Legacy Code:** 400974

This unit prepares educators, clinical facilitators and clinicians for their role in clinical teaching and learning. Students will identify learner needs and create and initiate evidence based teaching interventions and assessment strategies. Theoretically informed, experiential strategies will enable students to develop their expertise as clinical teachers and assessors in the workplace.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7015/>)**NURS 7016 Collaborative Inquiry for Primary Health Care Action (10 Credit Points)****Legacy Code:** 400839

This unit provides the opportunity for students to apply the principles of primary health care in a proposal to address an issue of primary health care concern in their workplace or community. The student will gain comprehensive knowledge of the process of action research, participatory action research and cooperative inquiry. Each student will have the opportunity to write a proposal using a collaborative inquiry approach that involves planning a genuine partnership to examine and make changes to improve an identified issue in the student's specific area of work / practice.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7016/>)

NURS 7017 Complex Care (10 Credit Points)**Legacy Code:** 401091

This unit provides students with knowledge of complex conditions that may arise during pregnancy, labour, birth and the postnatal period for the woman or her newborn/s. Emphasis will be placed on the biological and physiological aspects of these conditions. In addition, issues surrounding infertility and reproductive technologies available to women will be explored. The unit also integrates physiological, psychosocial and cultural aspects relating to a woman experiencing a complex pregnancy, labour, birth or post birth period. The role of the midwife in maintaining partnerships with women even when childbearing experiences are complex will be discussed and critically analysed. In addition this unit includes critical analysis of ethical aspects affecting midwifery and maternity care.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** NURS 7011 AND NURS 7034**Co-requisite(s):** NURS 7035**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7017/>)**NURS 7018 Contemporary Professional Practice in Mental Health Nursing (10 Credit Points)****Legacy Code:** 400220

Professional practice in Mental Health Nursing is continually evolving to meet changing social, political and legal requirements related to mental health issues. These requirements include changes in social and political understandings of mental illness and the rights and responsibilities of consumers, carers and providers. There has also been increased emphasis on health promotion, prevention and education in population specific contexts (eg, aged care, child and family, adolescent mental health, alcohol and other drugs services). Mental Health Nurses thus face challenges to develop practice that is congruent with the context of these changing requirements. This unit aims to provide a basis of inquiry into contemporary practice(s) from which the nurse can build an ongoing understanding and appreciation of changing influences.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7018/>)**NURS 7019 Cultural and Social Diversity in Health Care (10 Credit Points)****Legacy Code:** 401082

This unit encourages students to investigate and discuss the concepts of health and illness in the context of cultural and social diversity. The unit promotes the attainment of critical knowledge and core principles necessary for students to become holistic, culturally and socially sensitive and appropriately adaptable when meeting the health needs of Aboriginal and Torres Strait Islander people, other marginalised and vulnerable groups including refugees and those from LGBTI community, and people from other diverse cultural and social backgrounds. A case study approach provides a framework for students to explore the impact of different attitude and value systems relating to the health of peoples in Australia.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7019/>)**NURS 7020 Essentials in Vascular Access (10 Credit Points)****Legacy Code:** 401241

Vascular access devices (VADs) are utilised in health care settings across the world. Nurses, junior medical officers and paramedics are typically at the forefront of having to gain peripheral venous access. Many important aspects of vascular access are taught in isolation which are typically brief and provide surface learning rather than good theoretical understanding that underpin sound clinical skill and safe practice required for inserting and managing VADs. This unit focuses on developing knowledge, competency and skills to safely insert peripheral VADs and manage most acute and chronic devices through access to online material, facilitated simulated workshops and practical application in the workplace with a nominated clinical mentor approved by the school.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7020/>)**NURS 7021 Essentials of Best Practice in Midwifery (10 Credit Points)****Legacy Code:** 401092

This unit provides students with the opportunity to critically evaluate and apply evidence-based approaches to midwifery practice. The unit addresses the value of evidence-based midwifery practice, overviews the contribution of different research approaches to midwifery knowledge development and assists students to develop skills to locate and critique sources of evidence including systematic reviews, meta-analysis, meta-synthesis, integrative reviews, and clinical guidelines. Students are encouraged to become critical consumers of evidence relevant to midwifery practice and to appreciate the process of research design, practice development and practice change.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7021/>)**NURS 7022 Ethics in Health Research (10 Credit Points)****Legacy Code:** 400975

This unit equips students to explore ethical issues impacting on the conduct of research in the health setting. Students will critically explore ethical issues and their implications in health research, understand the process of gaining Human Research Ethics Approval for research, gain practical experience of developing an ethically sound research plan and application for human ethics approval.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7022/>)

NURS 7023 Evidence Based Health Care (10 Credit Points)**Legacy Code:** 401168

This unit is designed to develop students' knowledge of the principles and processes necessary for evidence-based clinical practice. General concepts associated with evidence-based health care are explored. In addition, students are assisted to formulate focused clinical questions and conduct a comprehensive literature search for research evidence that may assist in answering such questions. Issues and techniques involved in the rigorous appraisal of research reports are addressed. The importance of clinical significance when making clinical judgements about the implementation of research findings are also explored. All assessments in this unit are mandatory.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** NURS 7024 Evidence Based Nursing**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7023/>)**NURS 7025 Health Promotion and the Nurse (10 Credit Points)****Legacy Code:** 400210

The challenge for nursing in terms of health promotion is to acknowledge the complex interrelatedness between a person's social and economic situation, their sense of power and control over their life and their physical, emotional and spiritual well-being, i.e. To understand that health is determined by the totality of a person's life circumstances and their inherent traits. This unit uses a social health perspective to examine evidence-based health promotion strategies that can be implemented in the context of nursing practice.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7025/>)**NURS 7026 Healthy Families and Communities (10 Credit Points)****Legacy Code:** 400831

This unit explores the diversity and complexity of families and communities by examining differing cultural and social values, beliefs and practices relating to family structure, functioning and parenting practices. Students will be encouraged to reflect on their own cultural values and beliefs and how these influence practice when working with children and families. The unit will provide an introduction to community needs, assessment and principles of community development. Focusing on contemporary issues, content includes transition to parenthood, father inclusive practice, parenting children with disabilities, the changing role of grandparents and carers in Australian society and how neighbourhood and communities influence outcomes for children. This unit will provide students with foundational knowledge in identifying and supporting families with vulnerabilities and fostering resilience. Child protection issues will be addressed.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7026/>)**NURS 7027 Infant Mental Health (10 Credit Points)****Legacy Code:** 400835

This unit will provide an overview of the issues that impact on infant mental health. Theoretical frameworks influencing the study of infant-parent relationships will be discussed. Nursing management strategies relating to infant mental health disorders and the promotion of positive parent-child relationships will be examined.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 7114 - Introduction to Infant Mental Health - Child and Family Health Nursing**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7027/>)**NURS 7028 Leadership in Clinical Practice (10 Credit Points)****Legacy Code:** 400235

We are all confronted with the challenge of leadership, regardless of nursing or other healthcare speciality, role, or status. Encompassed within leadership is knowledge of self, relevant theories, skills, and political awareness which are developed through higher education. By developing leadership skills and knowledge we can influence better outcomes for our patients/clients and create more positive working environments. In the unit, Leadership in Clinical Practice, nursing and other healthcare leadership arising from expert clinical practice is explored as a general notion rather than as one arising from any particular clinical speciality. Content includes theories, concepts and styles of leadership, the development of leadership potential, motivation, coaching, and mentorship, concepts of power, authority and empowerment and discussion of contemporary leadership issues. Assignments provide students with the opportunity to apply new knowledge about leadership to their practice, whether they be in management, education, or clinical roles.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7028/>)**NURS 7029 Mental Health Assessment and Application (10 Credit Points)****Legacy Code:** 400217

Assessment is an essential component of the nurse/client interaction in mental health/psychiatric nursing. Effective nursing depends on comprehensive, accurate, systematic and continuous data collection. This assists the nurse and client to accurately identify and document critical client issues and formulate management strategies. This unit prepares the student in the area of mental health assessment, in identifying the factors that affect individual/family mental health and applying this knowledge to decisions about appropriate interventions.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7029/>)

NURS 7030 Mental Health Nursing Practice 1 (10 Credit Points)**Legacy Code:** 400218

This unit will assist the student to develop a comprehensive understanding of the nurse-client relationship in mental health nursing, presenting this relationship in its multiple contexts, (e.g., the interpersonal, cultural and socio-political), in order to appreciate factors influencing this relationship and the way it might be 'lived out' in practice. The unit assists students to understand: (1) the nurse-client relationship and its development; (2) the nature of the relationship between the client and nurse; (3) how skilled nurses use this relationship to assist their clients; and (4) how the type of relationship the nurse develops with the client frequently determines the quality of work they do together.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7030/>)**NURS 7031 Mental Health Nursing Practice 2 (10 Credit Points)****Legacy Code:** 400219

This unit is designed to challenge the student to consider evidence-based practice in mental health nursing. Nurses are required to be accountable for their clinical practice and to be able to argue the evidence for specific nursing interventions. Students undertake critical analysis of evidence-based practice in mental health nursing as a concept, a means of accountability, as a means of defining nursing knowledge. Students will apply evidence-based practice concepts to specific psychiatric disorders and problems.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7031/>)**NURS 7032 Mental Health for Communities (10 Credit Points)****Legacy Code:** 400773

Evolving diversity and changes within societies mean that what are understood as adaptive and maladaptive lifestyles, behaviours and attitudes towards mental illness and traditional healing approaches will vary greatly. This unit presents an outline of the themes and topics central to discussions of mental health and illness within a community. It examines the influences of stereotype and stigma, environment, culture, adaptive ability and support systems for psychological well-being while considering approaches which focus on and promote resilience, attachment, a sense of belonging and empowerment. Contemporary mental health and illness issues relating to selected vulnerable groups will be explored.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7032/>)**NURS 7034 Midwifery Practice 1 (10 Credit Points)****Legacy Code:** 401090

In this unit students will develop skills for the provision of midwifery care across the childbirth continuum through working with women in a continuity of care model and also practice experience in designated maternity practice areas. Using a woman-centred, primary health care model, students will commence recruitment and follow 10 women throughout their pregnancy, labour, birth and for up to six weeks post birth; and under supervision will provide midwifery care to these women. The unit commences with a one week intensive workshop, to expose the students to an elementary level of understanding and application of midwifery care in the antenatal clinic, antenatal ward, birth unit, postnatal ward and special care nursery in preparation for their employment. Concepts introduced during this intensive week will be covered with more complexity during future subsequent weekly workshops.

Level: Postgraduate Coursework Level 7 subject**Co-requisite(s):** NURS 7011**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7034/>)**NURS 7035 Midwifery Practice 2 (10 Credit Points)****Legacy Code:** 401093

During this unit students will continue to gain practical experience in designated clinical areas and follow their 10 women throughout pregnancy, labour, birth and the postnatal period in a continuity of care model. They will strengthen their skills in undertaking psychosocial assessment, effectively engaging women in services, facilitating groups and working in collaboration with other professionals to support women. In addition, they will work with women with complex health issues. This unit provides students with the knowledge to collaborate with all health professionals and includes assessing procedures for managing obstetric emergencies; transferring women or newborns with complex health issues; and assessing referral pathways.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** NURS 7011 AND NURS 7034**Co-requisite(s):** NURS 7017**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7035/>)**NURS 7036 Midwifery Practice 3 (20 Credit Points)****Legacy Code:** 401094

In this unit students will consolidate their knowledge and midwifery skills in preparation for their role as a midwife. They will continue to practice in designated clinical areas and follow through their 10 continuity of care experiences. Students will have completed a professional portfolio and reflected on how they can identify and plan for personal professional development and leadership as midwives, including the professional development needs of others. Students will be assessed across the seven midwife standards for practice.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** NURS 7035**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7036/>)

NURS 7037 Midwifery as a Profession (10 Credit Points)**Legacy Code:** 401087

This unit introduces students to the profession of midwifery. It explores: the meaning of birth; the historical and social contexts of birth; and the role of the midwife through the continuum, from early beginnings to its current legal and professional standing. Within a legal and ethical framework, the Australian College of Midwives (ACM) philosophy and role of the midwife will be explored. Students will also be required to discuss and critically analyse current models of midwifery care.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7037/>)**NURS 7038 Partnership in Practice (10 Credit Points)****Legacy Code:** 400832

Health services across Australia have demonstrated commitment to the roll-out of Family Partnership Training to all health professionals who support families with young children. This unit will provide an overview of the Family Partnership Model. Participants will examine the theoretical framework underlying the model which emphasises the need for highly skilled professional communication to develop supportive and effective relationships with families. Students will participate in 5 interactive webinars to embed the fundamental concepts and skills associated with the model. Facilitating groups for parents is a key skill of the child and family health professional. In this unit participants will also study how adults learn, and the key skills in understanding and promoting the group process. Working in partnership extends to other professional and agencies, enabling students to develop skills in professional collaboration.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7038/>)**NURS 7040 Perspectives on Nursing (10 Credit Points)****Legacy Code:** 400774

This unit addresses the origins and development of nursing knowledge. A major focus is the development and progress of the discipline of nursing. It includes an in-depth exploration of the history and philosophy of nursing science, including epistemology and strategies for theory generation in nursing. The impact of borrowed perspectives on research, theory and practice in the discipline of nursing is also explored. The unit also addresses the development of theoretical perspectives in nursing, including areas of controversy in the discipline. Numerous perspectives on the relationship between nursing theory, research and practice are considered. A major emphasis in the unit is development of knowledge and understanding of the link between nursing theory, research, practice and related issues.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** LGYA 7149 - Nursing Knowledge Concepts Models and Theories**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7040/>)**NURS 7041 Psychopharmacology for Advanced Practice Mental Health Nurses (10 Credit Points)****Legacy Code:** 400858

This unit examines pharmacological principles including functional neuroanatomy review, pharmacokinetic principles, pharmacodynamic principles, and neuropharmacology. Students examine a number of psychotropic drugs: antipsychotic, mood stabilisers, complementary medicines, drugs of abuse/misuse, antidepressant, anxiolytic and hypnotic drugs in relation to targeted symptoms, titration, side-effects, and monitoring of clients from across the lifespan. Decision-making in psychopharmacology is explored. The importance of appropriate collaborative processes between the nurse practitioner, clients across the lifespan and their families in medication management is addressed.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7041/>)**NURS 7042 Research Project in Health Care (10 Credit Points)****Legacy Code:** 401084

This unit will assist in the further development and maintenance of research culture in health care, and thus enhance the implementation of evidence-based practice. This unit is designed to assist students in applying their research knowledge and skills and provides them with the opportunity to undertake an independent research project and write a dissertation. It is recommended that students interested in undertaking this unit first complete Applied Research in Health Care (401167) and Ethics in Health Research (400975) where the dissertation topic will be identified and students will be allocated a supervisor.

Level: Postgraduate Coursework Level 7 subject**Pre-requisite(s):** Students in the Master of Child Family Health (Karitane) Master of Nursing or Master of Mental Health Nursing must complete NURS 7004 Applied Research in Health Care AND NURS 7022 Ethics in Health Research before enrolling in this unit
Students in the Master of Primary Health Care must pass NURS 7022 Ethics in Health Research before enrolling in this unit**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7042/>)**NURS 7043 Scholarship for Practice Change in Health Care (10 Credit Points)****Legacy Code:** 401085

The transformation of practice in healthcare is facilitated when information about creative and innovative practice change and development is documented, disseminated and critiqued through professional channels such as peer reviewed journals, conference papers, discussion papers or project reports. In this unit students will be provided with an opportunity to produce a scholarly piece of work that will disseminate information about transforming practice and improving patient care. The unit aims to enhance scholarly communication skills, provide a vehicle for demonstrating leadership by informing the health professions of innovative solutions for practice change.

Level: Postgraduate Coursework Level 7 subject**Equivalent Subjects:** NURS 7044 - Transforming Nursing Practice**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7043/>)

NURS 7045 Writing for Publication (10 Credit Points)**Legacy Code:** 401086

This unit is about writing for publication in the scholarly health and welfare literature. Students will investigate: the range of publications available and the media through which they are delivered; the process of publishing, the key people involved and their roles; the means by which quality is assured in the publishing process and the ways publications are rated for quality and impact; and the influence of social networking media on publishing. Specifically, the influence of online publishing will be investigated. Students will also gain experience of writing for publication under the guidance of an experienced editor and colleagues from the publishing industry. The unit is also available as an elective to all Postgraduate students in the University.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7045/>)**NURS 7048 Aboriginal and Torres Strait Islander Maternal and Newborn Health (10 Credit Points)****Legacy Code:** 401349

This unit will specifically enable students to investigate, discuss and develop an understanding of Aboriginal and Torres Strait Islander peoples' sense of identity, culture, and health. Health statistics, as well as historical and contemporary practice issues will be identified. In addition, the unit will explore strategies that have been implemented to address inequities in health outcomes for Aboriginal and Torres Strait Islander families. Further, the unit promotes the development of critical knowledge essential for students to understand their own values, beliefs, biases, and perceptions to become culturally sensitive and appropriately adaptable when meeting the health needs of Aboriginal and Torres Strait Islander women and families.

Level: Postgraduate Coursework Level 7 subject**Restrictions:** Please see the Subject Details page for any restrictions for this subjectSubject Details (<https://hbook.westernsydney.edu.au/subject-details/nurs7048/>)**NURS 7049 Care of People with Tuberculosis (TB) (10 Credit Points)****Legacy Code:** 401376
