## Assumed Knowledge

In order to optimise learning outcomes and skill development students are encouraged to have successfully completed or have the assumed equivalent knowledge of the following subjects: 200488 - Corporate Financial Management, 200048 - Financial Institutions and Markets.

## Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critical thinking skills to provide potential solutions for theoretical and/or real-life problems in the banking industry, drawing from a wide range of techniques used in the banking area and also other disciplines such as management,
2. Appreciation of the inter-disciplinary nature of banking and its relations to areas such as HR Management, Organisational Management and Psychology,
3. Information literacy through self-reliant research on current issues, including the identification and evaluation of relevant information and conducting research on an academic standard,
4. Improved numerical skills through understanding and applying various measurement techniques used in banking and through interpreting derived results.
5. Appreciation of the interrelatedness of the various areas and functions in a banking institution,
6. Appreciation of the importance of work ethics, cultural considerations and integrity in banking institutions.
