

INFS 3012 INFORMATION SYSTEMS DEPLOYMENT AND MANAGEMENT

Credit Points 10

Legacy Code 300572

Coordinator Ana Hol ([https://directory.westernsydney.edu.au/search/name/Ana Hol/](https://directory.westernsydney.edu.au/search/name/Ana%20Hol/))

Description This unit provides a detailed overview of system implementation and deployment stages taking into consideration the steps that are necessary to place a newly developed system into production. In this unit students learn the skills required for accurate requirements gathering, timely and effective system development, and successful implementation that would result in effective system performance. For this to be achieved successfully this unit also addresses the importance of project management skills. The unit also highlights the issues of transition processes after the development phase, the activities required in systems support and maintenance in the system's operational stage.

Discipline Systems Analysis and Design

Student Contribution Band HECS Band 2 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 3 subject

Pre-requisite(s) COMP 1005 AND INFS 1006 OR COMP 1005 AND DESN 1021

Equivalent Subjects LGYA 5900 Enterprise Information Management

Assumed Knowledge

A general understanding of various Information Systems in the eBusiness environment - familiarity with information system development processes.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain how system deployment fits within the system development life cycle.
2. Develop a plan for system deployment reflecting the organisational culture and business processes.
3. Evaluate deployment strategies in terms of selecting a suitable one the specific business problem.
4. Apply project management skills and ensure deployment and transitioning schedules are followed.
5. Describe what needs to be considered, so that system users and customers receive appropriate training.
6. Assess possible risks and develop backup plans and strategies.
7. Analyse the change management requirements for implementing and managing a successful system.

8. Critically analyse proposed Information Systems solutions and identify possible improvements.

Subject Content

- system Deployment A Critical aspect of system development life cycle
- Assessing The organisation where system is to be deployed: audience, customers, users, departments
- system implementation: direct, parallel, Phased
- planning for system Deployment: timeline, Schedule, planning
- Assessing The system: testing, Assessing user / company requirements, assuring system performs as required
- Project management skills, Deployment management and transitioning
- user training and documentation
- risks assessment and backup plans and strategies
- change management requirements for implementing and managing successful system

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Self-Assessment	3 minutes (video)	15	N	Individual
Presentation	25 minutes	25	N	Group
Critical Review	150 words (per post)	20	N	Individual
Final Exam	2 hours	40	N	Individual

Teaching Periods

Sydney City Campus - Term 1 Sydney City

Day
