Description This unit will take an authoritative overview and analysis of issues of assessment, and treatment of offenders, in particular those considered to be high-risk offenders. It will take particular account of policy and legislative issues and developments at an international level and address wider issues of risk and the high-risk offender in the context of the risk society. The unit will also question the relationship between the assessment, treatment and management of such offenders, and consider who is appropriate to involve in this process. The unit will take a multi-disciplinary approach to the assessment, treatment and management of violent and sexual offenders in particular, and extend its coverage to include the issue of stalking. Issues around diversity will be considered throughout.
