

# LAWS 4007 INTERNATIONAL ENVIRONMENTAL LAW

**Credit Points** 10

**Legacy Code** 200801

**Coordinator** Beatriz Garcia De Oliveira ([https://directory.westernsydney.edu.au/search/name/Beatriz Garcia De Oliveira/](https://directory.westernsydney.edu.au/search/name/Beatriz%20Garcia%20De%20Oliveira/))

**Description** This course provides a general introduction to international environmental law and policy. We will begin by exploring the economic, political, and legal concepts relevant to international environmental treaty regimes. We will then apply these concepts to concrete regimes designed to deal with specific international environmental problems, such as ozone depletion, transboundary air pollution, freshwater resources, marine pollution, world heritage, human rights, biodiversity and habitat loss. The course focuses principally on the dynamic of treaties, negotiations, and state and non-state actors in the international arena. Comparative approaches to national implementation, on selected issues, will also be covered.

**School** Law

**Discipline** International Law

**Student Contribution Band** HECS Band 4 10cp

Check your HECS Band contribution amount via the Fees ([https://www.westernsydney.edu.au/currentstudents/current\\_students/fees/](https://www.westernsydney.edu.au/currentstudents/current_students/fees/)) page.

**Level** Undergraduate Level 4 subject

**Pre-requisite(s)** LAWS 2008

## Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a grasp of the fundamental concepts and principles of International Environmental Law.
2. Critically evaluate the principal institutions and operation of the international legal system and demonstrate an understanding of the key actors, sources of law and dispute resolution processes.
3. Apply concepts and principles of International Environmental Law to contemporary environmental issues and to problem solving.
4. Undertake independent research and analysis to produce a written essay that demonstrates an understanding of application of International Environmental Law in a defined context that is clear, analytical, appropriately structured and referenced.

## Subject Content

1. Development of International Environmental Law
2. Treaty Regimes
3. Oceans and Seas
4. Freshwater Resources
5. Biodiversity and Wildlife Conservation
6. Human Rights and Environment
7. World Heritage
