

# MECH 3009 THERMODYNAMICS AND HEAT TRANSFER (WSTC ASSOCD)

**Credit Points** 10

**Legacy Code** 700312

**Coordinator** Abbas Ranjbar ([https://directory.westernsydney.edu.au/search/name/Abbas Ranjbar/](https://directory.westernsydney.edu.au/search/name/Abbas%20Ranjbar/))

**Description** This unit introduces students to the fundamentals of thermodynamics which involves energy in the form of heat and heat transfer. Students explore the basic laws and properties of thermodynamics to discover how energy is converted and transferred. Students will apply their knowledge to evaluate power and refrigeration cycles, industrial devices, as well as to design a simple industrial device. Offerings of alternate units are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate unit.

**School** Eng, Design & Built Env

**Discipline** Mechanical Engineering

**Student Contribution Band** HECS Band 2 10cp

Check your HECS Band contribution amount via the Fees ([https://www.westernsydney.edu.au/currentstudents/current\\_students/fees/](https://www.westernsydney.edu.au/currentstudents/current_students/fees/)) page.

**Level** Undergraduate Level 3 subject

**Pre-requisite(s)** ENGR 1012 AND  
MATH 1017 AND  
LGYB 0486

**Equivalent Subjects** MECH 3008 - Thermodynamics and Heat Transfer

**Restrictions** Students must be enrolled at Western Sydney, The College in 7022 Associate Degree in Engineering.

## Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe thermodynamic systems and the associated heat transfer processes.
2. Illustrate the concepts of thermodynamic parameters and processes.
3. Explain thermodynamic relations.
4. Apply thermodynamic principles to evaluating power and refrigeration cycles.
5. Explain the nature of heat transfer processes.
6. Apply heat transfer principles to design and evaluation of simple industrial device.

## Subject Content

1. Properties of thermodynamic systems
2. Laws of thermodynamics
3. Concepts of energy, work, heat and entropy
4. Thermodynamic relations
5. Reversible and irreversible processes
6. Power and refrigeration cycles

7. Heat conduction
8. Natural and forced convection
9. Radiation heat transfer
10. Heat exchangers

## Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	15 minutes (per Quiz)	15	N	Individual
Intra-session exam	1 hour	15	N	Individual
Practical	1000 words (each)	20	N	Individual
Final Exam	2 hours	50	N	Individual

Teaching Periods
