

MEDI 5003 ADOLESCENT, MENTAL HEALTH AND HEALTH INEQUITY

Credit Points 10

Coordinator John Morley ([https://directory.westernsydney.edu.au/search/name/John Morley/](https://directory.westernsydney.edu.au/search/name/John%20Morley/))

Description This subject provides students with an informed, structured approach to common acute and chronic adolescent issues, including approaches to mental health (HEADSS), substance use, and sexual health assessments. This subject outlines evidence-based strategies in non-pharmacological and pharmacological management of common mental health conditions in adolescents and young adults. This subject includes insights from clinical experts on improving health outcomes for refugee populations and current global paediatric health initiatives aimed at improving child health outcomes. Experienced academics, clinical experts and adolescent health practitioners will provide students with resources to effectively communicate with adolescents and their families, understanding informed consent and confidentiality.
