Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

The Global Sustainability minor provides a unique, signature learning experience for students involving local and global partners committed to sustainable development. The minor explores the interrelationship between humans and the natural and built environment from multiple paradigms. Students will investigate the grand challenge of achieving a sustainable society and in the process become future thinkers and innovators. Global Sustainability involves the choice of three sustainability subjects from five different schools and a social action internship which can be based regionally or internationally. The minor is recognised by and cobranded with the United Nations University's Regional Centres of Expertise on Education for Sustainable Development.
