

CMPL 7003 CHINESE INTERNAL MEDICINE 1 (PG)

Credit Points 10

Legacy Code 400918

Coordinator Henry Liang ([https://directory.westernsydney.edu.au/search/name/Henry Liang/](https://directory.westernsydney.edu.au/search/name/Henry%20Liang/))

Description The study of internal medicine forms the basis of clinical practice in traditional Chinese medicine. This subject begins to bridge the gap between theory and practice. It enables the health professional to analyse, diagnose and treat common internal diseases with both acupuncture and herbal medicine and using a TCM approach. The focus of this subject is on the analysis of major presenting symptoms.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 7246 - Chinese Internal Medicine

Assumed Knowledge

Traditional Chinese Medicine 3, Acupuncture Techniques, Chinese Medicinal Formulas.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply an understanding of causes and pathophysiological mechanisms of common internal diseases, by demonstrating an understanding of the significance of clinical manifestations.
2. Apply relevant skills of inspection, auscultation and olfaction, interrogation, and palpation in order to arrive at accurate diagnoses of specific internal diseases.
3. Analyse symptoms and signs, and apply pattern differentiation to arrive at a TCM differential diagnosis.
4. Design treatment principles, and write prescriptions (acupuncture and herbs) for common diseases of internal medicine. This is inclusive of required dietary or lifestyle changes.
5. Analyse and critically examine practice protocols in TCM compared to orthodox management.

Subject Content

1. Diseases and syndromes of the Lung system (TCM)
