

# COMP 2004 COMPUTER NETWORKING

**Credit Points** 10

**Legacy Code** 300565

**Coordinator** Nabil Giweli ([https://directory.westernsydney.edu.au/search/name/Nabil Giweli/](https://directory.westernsydney.edu.au/search/name/Nabil%20Giweli/))

**Description** Computer Networking is an introductory subject in computer systems networking. It covers basic networking technologies, Ethernet fundamentals, ISO OSI model, routing, switching and subnetting, the Internet architecture, networking protocols including TCP/IP, important OSI layer 2 and 3 networking device fundamentals, basic network management and security issues. This subject is also the first of three units, which will prepare students for industry based networking certification (CCNA).

**School** Computer, Data & Math Sciences

**Discipline** Networks and Communications

**Student Contribution Band** HECS Band 2 10cp

Check your HECS Band contribution amount via the Fees ([https://www.westernsydney.edu.au/currentstudents/current\\_students/fees/](https://www.westernsydney.edu.au/currentstudents/current_students/fees/)) page.

**Level** Undergraduate Level 2 subject

**Equivalent Subjects** COMP 2007 - Computer Networking Fundamentals  
LGYA 5739 - Applied Data Communications and Networking  
COMP 2006 - Computer Networking (WSTC)

**Assumed Knowledge**

Fundamentals of computer architecture, binary and hexadecimal numbering systems, and programming principles. They should also have a working knowledge of the World Wide Web.

## Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the fundamental concepts and protocols for computer networking and internetworking.
2. Investigate and analyse the Internet architecture.
3. Analyse the significance of the OSI and TCP/IP models, protocol stacks and their operation in computer networks.
4. Evaluate modern technologies in computer networking.
5. Investigate the functions of important OSI layer 2 and OSI layer 3 networking devices.
6. Assess the management practices and security requirements of computer networks.
7. Construct, test and troubleshoot a small LAN.
8. Subnet a small business network given design criteria.

## Subject Content

- concepts of computer networking and internetworking.
- internet architecture.
- An introduction to The operation of The major protocols used in computer networking.
- The OSI model, TCP/IP Protocol stack and IP addressing.
- Understanding of The TCP/IP Protocol stack and its operation in data networks.
- modern data communication and networking technologies.

- management and security requirements of computer networks.
- identification and Review of networking media.
- introduction to Ethernet technologies and switching.
- Routing fundamentals and subnetting.
- construct and Evaluate Network performance in LANs.

## Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/Group Task
Practical	2 hours per week	20	N	Group
Practical Exam	45 minutes practical test	20	N	Group
Quiz	1 hour	10	N	Individual
Final Exam	1 hour2 hours	50	N	Individual
