**Description** This subject aims to examine the role of the diverse economies of East Asia, Southeast Asia, and South Asia in the Global economy, and the complex economic, historical, political, social and cultural factors which have influenced and continue to shape the transformation of these economies. The subject will evaluate alternative development paradigms in light of the experience of these economies. The discussion will be cast within the wider debate about the role of foreign trade and investment flows. The subject will take the political economy approach to understanding both the transformation of these economies and their role in the Global Economy.
