

ENVL 1007 ENVIRONMENTAL HEALTH ISSUES AND SOLUTIONS (WSTC)

Credit Points 10

Coordinator Anne Bertoldo (<https://directory.westernsydney.edu.au/search/name/Anne Bertoldo/>)

Description This subject explores the interdependent nature of human health and that of the environment, both natural and urban. Concepts explored include 21st Century contaminants, noise, energy and water. Through a combination of case studies and practical field experience, students will develop the skills and knowledge appropriate to develop solutions to a variety of environmental health issues.

School Science

Discipline Environmental Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Check your HECS Band contribution amount via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 1 subject

Equivalent Subjects PUBH 1002 Environment and Health
ENVL 1002 Environmental Issues and Solutions

Restrictions

Students must be enrolled at The College.

Students enrolled in Extended Diploma course 7122 Diploma in Science Extended – Science, must have passed 40 CPs of preparatory subjects in order to enrol in this subject.

Learning Outcomes

Identify and describe a variety of environmental issues

1. Describe a number of emerging environmental issues due to urban development
2. Identify and explain the essential characteristics of environmental noise.
3. Monitor, assess and make appropriate recommendations to address environmental noise issues.
4. Identify and explain the legal and administrative components of noise.
5. Identify relevant environmental legislation and policy.
6. Demonstrate competency in academic writing.
7. Research and communicate a case study of an environmental issue
8. Demonstrate critical thinking by identifying solutions to a chosen environmental issue

Subject Content

1. Introduction into a number of environmental issues
2. Urban development and environment
3. Energy use
4. Water pollution
5. Water security

6. Urban environments and human health
7. 21st Century contaminants
8. Environmental determinants of human health and wellbeing
9. Environmental noise
10. Assessment, regulation and control of environmental noise
11. Concepts of health, traditional and new public health approaches to population health
12. Environmental health policy, practice and stakeholder responsibilities
13. Real world case studies

Special Requirements

Essential equipment

Electronic Device to access vUWS.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/Group Task
Case Study	1000 words	20	N	Individual
Quiz	1 hour	10	N	Individual
Report	2000 words	30	N	Individual
Discourse Analysis	1500 words	40	N	Individual

Prescribed Texts

In place of a set text for this unit, students will be directed to a broad range of regularly updated online texts, peer-reviewed articles, government reports and policy documents.
