

# NURS 3036 PSYCHOSOCIAL ISSUES IN THE PERINATAL PERIOD

**Credit Points** 10

**Legacy Code** 401225

**Coordinator** Virginia Schmied ([https://directory.westernsydney.edu.au/search/name/Virginia\\_Schmied/](https://directory.westernsydney.edu.au/search/name/Virginia_Schmied/))

**Description** In this subject students will gain knowledge of the psychosocial risk and protective factors that influence outcomes for women and their babies. Students will explore issues related to perinatal mental health. This will include antenatal and postnatal depression and anxiety, substance misuse, domestic violence and the midwife's role in supporting women and their families in perinatal grief and loss situations. Through interactive discussions and role play students will strengthen their skills in psychosocial assessment and working in partnership with women and families to explore concerns, facilitate behaviour change in individual and group-based learning contexts and identify effective early intervention strategies and referral pathways.

**School** Nursing & Midwifery

**Discipline** Midwifery

**Student Contribution Band** HECS Band 1 10cp

Check your HECS Band contribution amount via the Fees ([https://www.westernsydney.edu.au/currentstudents/current\\_students/fees/](https://www.westernsydney.edu.au/currentstudents/current_students/fees/)) page.

**Level** Undergraduate Level 3 subject

**Pre-requisite(s)** NURS 2004

**Co-requisite(s)** NURS 3006 AND  
NURS 3030 AND  
NURS 3005

**Equivalent Subjects** NURS 3027 Midwifery Practice – Teaching and Learning

**Restrictions**

Students must be enrolled in 4684 Bachelor of Midwifery

## Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply a socioecological health care model to determine risk and protective factors that influence outcomes for a woman, her children and family
2. Explain the impact of perinatal depression and anxiety on the woman, her infant and family and the potential consequences for the mother-infant relationship
3. Evaluate the impact of domestic/family violence and parental substance misuse on the health and wellbeing of women, infants and families
4. Discuss the role of the midwife in managing grief and loss situations for the woman, and her family
5. Discuss the assessment, planning and implementation of specific midwifery care for women and their neonates with complex psychosocial needs

6. Evaluate appropriate early intervention and referral pathways for women experiencing complex psychosocial issues including individual and group based learning and support
7. Critically analyse and discuss adult learning principles and communication skills required by midwives to work in partnership with women, promote health improvement and facilitate behaviour change in complex situations

## Subject Content

1. Socio-ecological model
2. Psychological and social risk factors that influence outcomes for the woman, newborn and family
3. Family support and other protective factors that influence outcomes for the woman, newborn and family
4. Perinatal mental health (depression and anxiety)
  - signs and Symptoms of Perinatal mood disorders
  - using The EPDS
  - treatment & management
  - strategies to support families
5. Grief and loss
  - supporting women and their families
6. Birth interventions and birth trauma
7. stillbirth /neonatal death, SIDS
8. maternal grief / family grief
9. Domestic violence and substance misuse
  - Defining DV and its associated Factors
  - substance misuse (alcohol and other drugs)
  - early intervention strategies and programs
  - impact on parenting and childhood outcomes
  - child protection
10. Psychosocial risk assessment and depression screening
11. Cultural issues including experiences of Aboriginal and Torres Strait Islander families and women and families from migrant and refugee backgrounds
12. Midwives role in supporting women with complex psychosocial needs
  - Models of care and referral pathways
  - Working in partnership with women and families in the perinatal period including: a) Skills needed to explore to gain a clear understanding of a woman's concerns or situation; recognising skills and qualities needed in a midwife to work in partnership;
13. Self Care
  - clinical supervision and reflective practice

## Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Log/ Workbook	N/A	10	N	Individual
Case Study	2,000 words	50	N	Individual
Short Answer	1,000 words	40	N	Individual
