1. Knowledge and application of the following concepts to inform professional nursing practice related to acute exacerbations of chronic conditions affecting the cardiovascular, renal, musculoskeletal and respiratory systems:

- Pathophysiology and clinical manifestations
- Pharmacology

2. Diagnosis

- Evidence-based management including prioritisation of nursing actions by accessing and analysing the best available evidence, that includes research findings, for safe, quality practice
- Alterations to the cardiovascular system, Introduction to alterations in the cardiovascular system
- Alterations to Renal System
- Alterations to the Haematological System

- Alterations to the Pulmonary system, oxygen use in adults in acute care (ACI), nursing management of acute respiratory failure
- Application of the National and Safety and Quality Health Service Standards
- Comprehensive Care Standard minimising patient harm (incorporates pressure injuries, delirium, nutrition & hydration, and minimising restraint)
- Preventing & Controlling Infection

Special Requirements

Essential equipment

Access to an internet enabled device is essential in order to be able to: access course materials; to participate in discussion groups; and to access additional resources provided by the lecturer during the session. See http://www.westernsydney.edu.au/currentstudents/current_students/services_and_facilities/uwonline_student_support (https://www.westernsydney.edu.au/currentstudents/current_students/services_and_facilities/uwonline_student_support/) for further information.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Presentation	10 minutes	30	N	Individual
Short Answer	750 words	30	N	Individual
Final Exam	60 minutes	40	Y	Individual

NURS 7067 Acute Life-Threatening Conditions

Credit Points 10

Legacy Code 401447

Coordinator Cannas Kwok ([https://directory.westernsydney.edu.au/search/name/Cannas Kwok/](https://directory.westernsydney.edu.au/search/name/Cannas%20Kwok/))

Description Acute Life-Threatening Conditions utilises an evidence-based approach to develop an understanding of the pathophysiology, pharmacological interventions, and nursing care for people across

the lifespan who experience an acute life-threatening condition. An important area of focus is detecting and recognising acute deterioration and escalating care.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) NURS 7066

Restrictions

Students must be enrolled in program 4785 - Master of Nursing Practice (Preregistration).

Assumed Knowledge

Well-developed knowledge of human biological sciences and body systems, sound understanding of the concepts in pharmacology and pathophysiology and the National Safety and Quality Health Service Standards and the relationship to nursing practice.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the causes, pathogenesis, clinical manifestations, and diagnostic procedures concerning acute life-threatening conditions across the lifespan.
2. Justify the selection and prioritisation of nursing strategies to provide safe, effective, evidence-based nursing care for a person experiencing an acute life-threatening condition.
3. Evaluate appropriate, safe, effective, and evidence-based treatment for a person experiencing an acute life-threatening condition.
4. Communicate and collaborate effectively when detecting and recognising across the lifespan acute deterioration and escalating care.

Subject Content

Knowledge and application of the following concepts to inform professional nursing practice related to acute life-threatening and/or traumatic complex health conditions utilising both critical thinking problem-solving skills and a lifespan approach.

1. Discuss the importance of the National Safety and Quality Health Service Standards
2. Management of the deteriorating patient
 - primary and secondary survey for Trauma injury management
3. Sudden unexpected death
 - Ethico-legal responsibilities
 - pathophysiology
 - diagnostic procedures
 - Nursing management
 - habilitation and rehabilitation principles

Indicative Case Histories

1. Cardiovascular health - Acute Myocardial Infarction, Cardiac Revascularisation, Cardiac Surgery
2. Injury prevention and control - Trauma, Shock (Neurological, Pelvis, Abdominal, Burns)
3. Multi-systems failure ? Organ donation
4. Anaphylaxis ? Airway Management

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	50 questions each	30	N	Individual
Case Study	2,000 words	50	N	Individual
Professional Task	30 minutes	20	N	Group

Teaching Periods

NURS 7068 Chronic Conditions and Disability

Credit Points 10

Legacy Code 401456

Coordinator Nathan Wilson ([https://directory.westernsydney.edu.au/search/name/Nathan Wilson/](https://directory.westernsydney.edu.au/search/name/Nathan%20Wilson/))

Description Chronic Conditions and Disability utilises an evidence-based approach to develop an understanding of pathophysiology, pharmacological interventions, and nursing care for people across the lifespan who experience chronic conditions and/or disability.

School Nursing & Midwifery

Discipline Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) NURS 7071 - Introduction to alterations in health

Restrictions

Students must be enrolled in program 4785 - Master of Nursing Practice (Preregistration).

Assumed Knowledge

Primary health care, foundational knowledge of human biological sciences including human body systems, basic concepts in pharmacology and pathophysiology and the National Health Priorities and the relationship to nursing practice.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret the causes, pathophysiology, clinical manifestations, and diagnostic procedures related to common chronic conditions
2. Deliberate ethical, legal and professional issues when caring for a person living with a chronic condition disability
3. Analyse the best evidence related to common chronic conditions or persons with a disability.
4. Recommend strategies that promote a shared decision-making process in collaboration with carers, families, and individuals living with a chronic condition
5. Develop evidence-based rationales for safe, person-centred care of people with chronic conditions or persons with a disability.

Subject Content

1. Knowledge and application of the following concepts to inform professional nursing practice related to chronic conditions and disability affecting the endocrine, neurological and respiratory body systems:
 - a. Cause: Risk factors
 - b. Clinical manifestations
 - c. Diagnosis
 - d. Pathophysiology
 - e. Treatment: Pharmacological and non-pharmacological
 - f. Nursing role and responsibilities: evidenced based practice by accessing and analysing the best available evidence, that includes research findings, for safe, quality practice
2. Concepts and principles of care related to chronicity and disability
 - a. Rehabilitation and habilitation
 - b. Person-centred care
 - c. Shared decision-making

Special Requirements

Essential equipment

Access to an internet enabled device is essential in order to be able to: access course materials; to participate in discussion groups; and to access additional resources provided by the lecturer during the session.

Foundations of Nursing Practice

Credit Points 10

Legacy Code 401457

Coordinator Cannas Kwok ([https://directory.westernsydney.edu.au/search/name/Cannas Kwok/](https://directory.westernsydney.edu.au/search/name/Cannas%20Kwok/))

Description This unit is conducted in an intensive study mode that is offered to students with a previous Bachelor degree, Master degree, or higher and completed within the last 10 years. The unit provides the essential foundational and core learning activities to support student transition into the Master of Nursing Practice (Graduate Entry). If a student is unsuccessful in attaining a satisfactory grade for this unit they may be requested to transfer into the undergraduate Bachelor of Nursing. All assessments in this unit are mandatory. Attendance is also mandatory in all tutorials and Clinical Practice Unit sessions in this unit.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4785 - Master of Nursing Practice (Graduate Entry).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify how primary health care principles relate to the social determinants of health and integrated knowledge of regional, national and global health priorities.
2. Perform an holistic health assessment of individuals across the lifespan utilising effective communication skills.
3. Apply ethical and legal frameworks when carrying out simulated patient centred care.
4. Apply the principles of safe medication administration in clinical scenarios within a simulated learning environment.
5. Collaborate with peers to determine factors that affect the health and wellbeing of individuals.
6. Understand the roles and functions of the nurse and their relationship to others in terms of competence, responsibilities, accountabilities and scope of practice.
7. Critically reflect on performance of self and others to identify future learning goals and strategies.
8. Contextualise the principles of Work Health and Safety (WH&S) applied in the clinical and simulated clinical environments.

Subject Content

Module 1 - Contexts of Nursing

1. Principles of Primary Health Care (PHC) - people, families and community groups to promote and maintain health and well-being and

family focused care integrating knowledge of regional, national and global health priorities including mental health.

2. Engagement with intraprofessional and interprofessional learning for collaborative practice Working in multi-disciplinary teams
3. National Safety and Quality Health Service Standards
4. Understanding the relationship between professional and personal life
5. Introduction to diversity, culture, inclusion and cultural safety for all people
6. Reading and understanding evidence based research literature
 - Communication and literacy skills for nursing
 - Communication with Aboriginal and Torres Strait Islander peoples
 - Communication with people from diverse communities
8. Predictable/Normative life transitions across the lifespan

Module 2 - Behavioural Science

1. Sense of self
2. Human development
 - Holistic overview of human development - physical, moral, social and cognitive
 - Diversity in human relationships - LGBTIQF
 - Attachment theory

Module 3 - Bioscience

1. Integumentary, cardiovascular, respiratory, digestive, musculoskeletal, nervous, endocrine, reproductive and urinary systems
2. Human Genomics
3. For each system, the concepts addressed are
 - Anatomy and Physiology
 - across the lifespan
 - homeostasis and health
 - activities of living
 - National Health Priorities
4. Injury prevention and control
5. The ageing process
6. Introduction to pathophysiology
 - Cause, pathogenesis, symptoms, course, prognosis, prevention of disease
 - Relevance for nursing
7. Introduction to pharmacology for nurses
8. Microbiology and infections - relevance for nursing
 - Common pathological organisms
 - Sources of infection and modes of transmission
 - Infection control in a health care setting
9. Immune Processes
 - Immune system breakdown and role of the nurse
 - Vaccination and immunisation
 - The inflammatory process
10. Wound healing

Module 4 - Law and Ethics

1. Legal Principles
 - The impact of law and legal principles on the role of the registered nurse
 - The law and nursing practice including medication administration; digital health and technology
 - monitoring and assessing patient progress
 - Professional communication and documentation
2. Ethical Principles
 - Defining ethics and ethical nursing practice
 - Ethical theories and principles
 - Bioethics including euthanasia, abortion, stem cell research
 - Ethical issues confronting nurses in Australia
 - Ethical decision making
 - Application of legal-ethical principles
 - Introduction to end-of-life care
3. Codes of Practice for Nurses
 - Defining Codes of Practice for nurses in Australia
 - The ICN code of Ethics for Nurses

- Code of Professional Conduct for Nurses in Australia
 - Registered Nurse Standards for Practice
 - Decision making framework
 - 4. Case studies: Applying theory to practice
 - The relationship between law and ethics in practice
 - Ethical principles in a variety of case studies
 - Legal principles in a variety of case studies
 - Nursing actions when legal and ethical principles have been breached
- Module 5 - Nursing Practice
1. Person centred care
 2. Application of WH&S - standard precautions, transmission-based precautions, manual handling and transfers
 3. Introduce safety and quality standards as they relate to health care
 4. Effective written and verbal communication
 - ISBAR and clinical handover
 5. Holistic health assessment: gathering personal data including social, cultural, physical, emotional, spiritual and environmental factors
 6. Perform blood pressure, temperature, pulse, respiration, oxygen saturation, height; weight; centile; urine analysis assessment and reporting
 7. Assess level of consciousness
 8. Skin assessment and maintaining skin integrity
 9. Assess oral health
 10. Promote comfort measures inclusive of bed making
 11. Hand hygiene
 12. Aseptic technique and simple wound management
 13. Safe medication administration -
 14. Introduction to nursing responsibilities and practices when providing care for dying people and their families in home, aged care or hospital settings
 15. Identifying the person at risk - Falls assessment, Pressure injury, Venous thromboembolism
 16. Routine Diagnostic Procedures - ECG, Peak flows, Blood Glucose Testing, Mini Mental Health Assessment, Drug and Alcohol Assessment
 17. Peer reflection and evaluation on simulated skill practice

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Portfolio	30 minutes	S/U	Y	Individual
Numerical Problems Solving	30 minutes each test	S/U	Y	Individual
Professional Task	20 minutes	S/U	Y	Individual
Practical Exam	60 minutes	S/U	Y	Individual
Participation	Each teaching activity	S/U	Y	Individual
End of Session Exam	50 questions	S/U	Y	Individual

Teaching Periods

NURS 7070 Health, Culture and Wellbeing of Aboriginal and Torres Strait Islander Peoples

Credit Points 10

Legacy Code 401445

Coordinator Cannas Kwok ([https://directory.westernsydney.edu.au/search/name/Cannas Kwok/](https://directory.westernsydney.edu.au/search/name/Cannas%20Kwok/))

Description This unit will specifically enable nursing students to investigate, discuss and develop an understanding of Aboriginal and Torres Strait Islander health, health statistics, historical and present-day issues associated with poor health outcomes in Indigenous Australians. The concepts of cultural safety, health, illness and wellbeing will be discussed and synthesised in relation to Aboriginal and Torres Strait Islander Peoples. Students will explore and reflect on the impact of the different attitudes, institutional policies and value systems relating to the health of Aboriginal and Torres Strait Islander Peoples in Australia.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate health related program in School of Nursing and Midwifery, School of Health Sciences or School of Science.

Assumed Knowledge

An understanding of Australian society, diversity of care to a variety of individuals across a broad range of health care settings.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the different forms of racism, the concept of white privilege, one's own positioning in terms of white privilege and the social determinants of health.
2. Identify the role of family and community that underpin the health of Aboriginal and Torres Strait Islander Peoples.
3. Reflect on how colonisation has impacted the contemporary health situation of Aboriginal and Torres Strait Islander Peoples.
4. Compare current demographic, health indicators and statistical trends for Aboriginal and Torres Strait Islander Peoples with non-Indigenous people in Australia.
5. Critique strategies to deliver culturally safe and appropriate health care to Aboriginal and Torres Strait Islander clients from a strengths-based approach.
6. Evaluate the role of nurses and/or midwives in achieving culturally safe health care for and with Aboriginal and Torres Strait Islander Peoples.

Subject Content

1. Examine the culture of nursing, along with the broader health system, in terms of their impact on Aboriginal and Torres Strait Islander health service experiences (Cultural safety)

2. Describe the historical development of Aboriginal and Torres Strait Islander community-controlled health services and health sector initiatives (History & Diversity)
3. Aboriginal map-context of culture-relationship to land, water, landmarks, language
4. Analyse the contemporary role of Aboriginal and Torres Strait Islander health professionals, organisations, and communities in delivering culturally safe health care to Aboriginal and Torres Strait Islander clients from a strengths-based approach (Context ? Theme 3 - Partnerships)
5. Meaning of health and illness
 - values, belief systems, attitudes, bias, cultural safety and practices in The care of Aboriginal and Torres Strait Islander communities
 - definitions of culture from The perspectives of Aboriginal and Torres Strait Islander people
 - health and status of Aboriginal and Torres Strait Islander people
6. Social determinants of health in Aboriginal and Torres Strait Islander communities
 - cultural isolation
 - Poverty
 - discrimination ? social and institutional
 - historical events and health care policies in relation to The impact It has had on Aboriginal and Torres Strait Islander peoples
7. Health care policies and service provision ?gBridging the Gap?h
 - racism
 - white privilege policy
8. Ethical care in Aboriginal and Torres Strait Islander populations across the lifespan
 - Models, theories and cultural care
 - NMBA Standards for registered Nurse practice
9. Relate the importance of culturally appropriate care and service provision for Aboriginal and Torres Strait Islander People (Clinical Practice, Service Delivery)
 - white privilege appropriate care

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	20 questions each	30	N	Individual
Reflection	1,500 words	40	N	Individual
Debate	20 minutes	30	N	Group

Teaching Periods

NURS 7071 Introduction to Alterations in Health

Credit Points 10

Legacy Code 401458

Coordinator Gift Mutsonziwa ([https://directory.westernsydney.edu.au/search/name/Gift Mutsonziwa/](https://directory.westernsydney.edu.au/search/name/Gift%20Mutsonziwa/))

Description The primary focus of this unit is the application of the National Safety and Quality Health Service Standards related to regional, national and global Health Priorities . This introduction to Alterations in Health utilises an evidence-based approach to develop an understanding of pathophysiology, pharmacological interventions, and justification of appropriate safe nursing care of people across the

lifespan who are experiencing acute, but usually resolvable alterations in their health.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) NURS 3040 - Foundations of Nursing Practice

Restrictions

Students must be enrolled in program 4785 - Master of Nursing Practice (Preregistration).

Assumed Knowledge

Primary health care, foundational knowledge of human biological sciences including human body systems, immunity, wound healing, infection control, basic concepts in pharmacology and pathophysiology and the relationship to nursing practice.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret physiological changes associated with alterations in health across contexts of nursing practice
2. Extrapolate best evidence to support decision making for safe person-centred care
3. Implement appropriate nursing assessment and person-centred care during the perioperative period
4. Prioritise nursing care for a person experiencing an alteration in health and the ability to justify decision making
5. Substantiate the safe and effective use of pharmacological and non-pharmacological interventions for a person experiencing an alteration in health
6. Critical reflect on the Australian National Priority Areas as they relate to person centred care

Subject Content

1. Pathophysiology and pharmacology related to:
 - a. gastrointestinal,
 - b. musculoskeletal
 - c. reproductive systems
 - d. injury prevention and control
2. National Safety and Health Priority areas:
 - a. Injury Prevention and Control
 - b. Arthritis and Musculoskeletal Conditions
 - c. Cancer Control
3. Principles of nursing care related to:
 - a. NMBA Registered Nurse standards for practice
 - b. Best Practice Guidelines
 - c. Hospital policies and procedures
 - d. Diversity, culture, inclusion, and cultural safety for all people
 - e. Accesses and analyses the best available evidence, that includes research findings, for safe, quality practice
4. Factors influencing nursing care in the pre and post-operative period:
 - a. Deterioration
 - b. Complications
 - c. Signs and symptoms
5. National Safety and Quality Health Service Standards related to perioperative nursing care
6. Pharmacology in the pre and postoperative period:
 - a. Analgesics

- b. Antibiotics
 - c. Anti-inflammatory agents
 - d. Specific condition related treatments
7. Non-pharmacological comfort measures

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	30 minutes x 2 (15% each)	30	N	Individual
Poster	600 words	30	N	Individual
Case Study	1,500 words	40	N	Individual

NURS 7072 Mental Health Nursing Practice

Credit Points 10

Legacy Code 401459

Coordinator Gihane Endrawes ([https://directory.westernsydney.edu.au/search/name/Gihane Endrawes/](https://directory.westernsydney.edu.au/search/name/Gihane%20Endrawes/))

Description Mental Health Nursing Practice develops knowledge and skills to support nursing practice when providing care for people with mental health issues in a range of health care settings. It explores contemporary models of care such as recovery-oriented practice, trauma-informed care, and social determinants approach. Students will develop awareness and plan evidence-based initiatives that promote mental health, prevent and intervene early in illness, facilitate recovery, and promote wellbeing. The unit includes 80 hours of clinical placement.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) NURS 3040 - Foundation of Nursing Practice

Restrictions

Students must be enrolled in program 4785 - Master of Nursing Practice (Preregistration).

Assumed Knowledge

Primary health care, professional communication, foundational concepts in human behavioural science and their application to nursing or midwifery practice, roles and responsibilities of registered nurse

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically reflect on the application of appropriate knowledge, skills, and attitudes in mental health nursing integrating knowledge of safety and quality standards
2. Deliberate ethical, legal and professional issues that may influence the therapeutic relationship with mental health consumers, carers, and significant others
3. Adapt a lifespan approach to develop person centred professional therapeutic relationships with mental health consumers, carers, and significant others using empathic and compassionate language
4. Advocate supporting the rights of mental health consumers to lead their treatment and recovery process, and the rights of carers and significant others with the consumer's consent, to collaborate in the treatment and recovery process
5. Investigate best evidence initiatives that promote mental health, prevent, and intervene early in illness, facilitate recovery, and promote wellbeing
6. Analyse how to facilitate the recovery of mental health consumers by focussing on strengths and wellbeing

Subject Content

1. An introduction to anxiety disorders, depression, suicide, schizophrenia, bipolar disorder, substance use based on Recovery Principles and Trauma Informed Care
2. An introduction to mental health assessment, including comprehensive assessment of mental health consumers, carers and families, risk and strength assessments, triage, and diagnostic categories
3. Psycho-social concerns would be reflected in person-centred / Recovery model and the importance of having a conversation about what is happening in their lives currently. The focus is on a wholistic approach.

4. An introduction to psychopharmacology
5. Effect of stigma and myths around mental illness
6. Lived experience of mental health consumers and carers, consumer, and carer partnership in recovery.
7. Positive images about people with mental illness, promoting positive messages
8. Explore ethical application of the MH Act, 2007 including least restrictive care
9. Building professional therapeutic relationship with mental health consumers, carers, and families using empathetic communication skills
10. Contemporary models of care such as recovery-oriented practice and trauma-informed care
11. Effect of cultural/ spiritual and social factors (including Domestic Violence) in mental illness on individuals, families, and communities, including CALD-use of interpreters
12. Mental health promotion and early intervention strategies
13. Discussion of strength approach to Recovery
14. Aboriginal and Torres Strait Islander social and emotional wellbeing
15. An introduction to mental health and vulnerable populations
16. An introduction to physical assessment in mental health
17. Accesses and analyses the best available evidence, that includes research findings, for safe, quality practice

Special Requirements

Legislative pre-requisites

Special Requirements Legislative Prerequisites

Student Compliance Information for all Health-Related Placements
To be eligible to enrol in this unit and complete any required health-related placements or experiences, students must meet Western Sydney University course requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your course. Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)
Mandatory NSW Health student placement policy requirements
To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your course, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)
Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements: the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements

If you need to meet different state, territory or country compliance requirements.

NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire course.

Current approved first aid certificate valid for your entire course - approved course providers can be found at the Government Training website

<http://training.gov.au>

Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW Students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Essential equipment

Students must wear the School of Nursing and Midwifery clinical uniform, including correct fully enclosed ALL black shoes [that meet WHS requirements - Shoes must be low heeled, fully enclosed, non-slip soles (Reeboks, joggers, sandshoes, sneakers, gym shoes, sandals, slippers, ballet shoes, etc. are NOT acceptable.)] to all CPU classes and the clinical placement. The uniform can be purchased from the retail store on campus.

Access to an internet enabled device is essential in order to be able to: access course materials; to participate in discussion groups; and to access additional resources provided by the lecturer during the session. See http://www.westernsydney.edu.au/currentstudents/current_students/services_and_facilities/uwsonline_student_support (https://www.westernsydney.edu.au/currentstudents/current_students/services_and_facilities/uwsonline_student_support/) for further information.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Professional Task	10 minutes	S/U	Y	Individual
Professional Placement Performance	80 hours	S/U	Y	Individual
Reflection	1000 words	S/U	Y	Individual
Participation	All teaching weeks - 100% Mandatory attendance for all timetabled classes	S/U	Y	Individual

NURS 7073 Nursing Practice 1

Credit Points 10

Legacy Code 401460

Coordinator Masoud Hassanpour Golakani ([https://directory.westernsydney.edu.au/search/name/Masoud Hassanpour Golakani/](https://directory.westernsydney.edu.au/search/name/Masoud%20Hassanpour%20Golakani/))

Description Nursing Practice 1 focuses on the development of the role and skills of the registered nurse when assessing and providing care for people across the lifespan who are experiencing acute, but usually resolvable conditions. A simulated professional task will assist with the development of essential clinical communications and simulated skills assessment and a professional experience placement will support clinical skill development. The unit includes 160 hours of Professional Experience Placement.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) NURS 3040 Foundations of Nursing Practice
NURS 7077 Pharmacology Knowledge for Nursing Practice
NURS 7071 Introduction to Alterations in Health

Restrictions

Students must be enrolled in program 4785 - Master of Nursing Practice (Preregistration).

Assumed Knowledge

Well development basic nursing skills and knowledge related to safe medication administration.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Justify the principles of safe medication administration in clinical scenarios and their application in simulated and clinical learning environments.
2. Exhibit competence in maintaining accurate, comprehensive, and timely documentation of assessments and nursing care plans
3. Communicate effectively within interprofessional teams in a clinical scenario.
4. Investigate evidence to support a range of assessment techniques to systematically collect relevant and accurate information to develop knowledge and integrate care
5. Competently perform safe medication administration, with a focus of non-parenteral and parenteral medications, and the application for people who are experiencing acute but usually resolvable conditions in a simulated and clinical learning environment.
6. Practise in accordance with legislation, regulations, policies, guidelines and other relevant standards or requirements in nursing.

Subject Content

1. Principles of nursing frameworks
2. The experience of pain and pain management during the perioperative period
3. Assessment, admission procedures and the Nursing History
4. Accesses and analyses the best available evidence, for safe, quality practice
5. Recognising and Responding to Variations in Health Status Bowel Cancer, Fractures, Crohn's disease
6. Ulcerative colitis, Breast cancer
7. Perioperative and post-operative care
8. Fluid Balance & Fluid replacement
9. Numeracy – medication calculations
10. Working in multi-disciplinary teams
11. Health informatics and health technology – electronic charting
12. Application of legal-ethical principles
13. Family focused care
14. Clinical Practicum

Special Requirements

Legislative pre-requisites

Special Requirements Legislative Prerequisites

To be eligible to enrol in this unit and complete any required health-related placements or experiences, students must meet Western Sydney University course requirements as well as any special, legislated, or policy-mandated requirements.

Western Course Requirements

Visit the Special Requirements webpage for details about your course.

Special Requirements

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your course, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements: the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements

If you need to meet different state, territory or country compliance requirements.

NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire course.

Current approved first aid certificate valid for your entire course - approved course providers can be found at the Government Training website

<http://training.gov.au>

Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW Students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Essential equipment

Essential equipment

Students must wear the School of Nursing and Midwifery clinical uniform, including correct fully enclosed ALL black shoes [that meet WHS requirements - Shoes must be low heeled, fully enclosed, non-slip soles (Reeboks, joggers, sandals, sneakers, gym shoes, sandals, slippers, ballet shoes, etc. are NOT acceptable)] to all CPU classes and the clinical placement. The uniform can be purchased from the retail store on campus.

Access to an internet enabled device is essential in order to be able to: access course materials; to participate in discussion groups; and to access additional resources provided by the lecturer during the session. See http://www.westernsydney.edu.au/currentstudents/current_students/services_and_facilities/uwsonline_student_support for further information.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Professional Task	30 minutes	S/U	Y	Individual
Professional Task	10 minutes	S/U	Y	Individual
Practical Exam	25 minutes	S/U	Y	Individual
Participation	All teaching weeks	S/U	Y	Individual
Professional Placement Performance	160 hours	S/U	Y	Individual

NURS 7074 Nursing Practice 2

Credit Points 10

Legacy Code 401461

Coordinator Masoud Hassanpour Golakani ([https://directory.westernsydney.edu.au/search/name/Masoud Hassanpour Golakani/](https://directory.westernsydney.edu.au/search/name/Masoud%20Hassanpour%20Golakani/))

Description Nursing Practice 2 focuses on the development of the role and skills of the registered nurse when providing care for people experiencing an acute exacerbation of a chronic condition. A simulated professional task will assist with the development of essential clinical communications and simulated skills assessment and professional experience placement will support clinical skill development. The unit includes 160 hours of Professional Experience Placement.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) NURS 7073

Co-requisite(s) NURS 7068 AND NURS 7066

Restrictions

Students must be enrolled in program 4785 - Master of Nursing Practice (Preregistration).

Assumed Knowledge

Primary health care, foundational knowledge of human biological sciences including human body systems, immunity, wound healing, infection control, basic concepts in pharmacology and pathophysiology and the relationship to nursing practice.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Incorporate the National Safety and Quality Health Services Standards to practice safe medication administration in complex clinical scenarios and their application in simulated and clinical learning environments.
2. Evaluate nursing care plans by monitoring progress towards the expected goals, health outcomes and interdisciplinary interventions.
3. Communicate and collaborate effectively with people, including members of the interdisciplinary health care team, to facilitate positive health outcomes.
4. Utilise an evidence-based approach to assessment, planning, implementation, and evaluation of nursing care in a simulated and clinical learning environment.
5. Competently perform safe medication administration, with a focus of non-parenteral and parenteral medications, for people experiencing an acute exacerbation of a chronic condition or illness in a simulated and clinical learning environment.
6. Practise in accordance with legislation, regulations, policies, guidelines and other relevant standards or requirements in nursing.

Subject Content

1. Preventing and Controlling Healthcare Associated Infections
2. Medication Safety
3. Patient Identification and Procedure Matching
4. Clinical Handover (include ISBAR communication tool)
5. Blood and Blood Products
6. Preventing and managing pressure injuries
7. Preventing falls and harm from falls
8. Assessment, admission procedures and the nursing history
9. Documentation - progress, incidents, escalation, patient safety checklist
10. Recognising and Responding to Variations in Health Status (A to G assessment)
11. Recognising abnormal pathology results
12. Nursing care and management
13. Working in multi-disciplinary teams
14. Clinical practicum
15. Accesses and analyses the best available evidence, that includes research findings, for safe, quality practice

NURS 7075 Nursing Practice 3

Credit Points 10

Legacy Code 401462

Coordinator Cannas Kwok ([https://directory.westernsydney.edu.au/search/name/Cannas Kwok/](https://directory.westernsydney.edu.au/search/name/Cannas%20Kwok/))

Description Nursing Practice 3 focuses on the development of the role and skills of the registered nurse when assessing and caring for people across the lifespan who are experiencing acute life-threatening illness and life limiting illness. A simulated professional task will assist with the development of essential clinical communications and simulated skills assessment and professional experience placement will support clinical skill development. The unit includes 160 hours of Professional Experience Placement.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) NURS 7074

Co-requisite(s) NURS 7067

Assumed Knowledge

Well developed knowledge of human biological sciences and body systems, sound understanding of the concepts in pharmacology and pathophysiology and the National Safety and Quality Health Service Standards and the relationship to nursing practice.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Justify safe medication administration in complex clinical scenarios in simulated and clinical learning environments.
2. Revise and evaluate nursing care plans based on the best available evidence and assessment data.
3. Document and effectively communicate the revised plan to achieve improved health outcomes.
4. Provide and justify comprehensive safe, quality nursing practice to achieve agreed goals and outcomes that are responsive to the care of people across the lifespan in simulated and clinical learning environments.
5. Competently perform safe medication administration, with a focus of non-parenteral and parenteral medications, for people who are experiencing acute life-threatening illness or end of life conditions, in simulated and clinical learning environments.
6. Practise in accordance with legislation, regulations, policies, guidelines and other relevant standards or requirements in nursing.

Subject Content

Major Content:

1. Regional, national and global Health Priorities. Case studies related to life threatening or life limiting complex care
2. Provision of safe, evidence-based nursing care
3. Effective communications in a intra and interdisciplinary approach to care
4. Review and apply the following National Safety and Quality Health Service Standards related to the planning and provision of nursing care
 - o Preventing and Controlling Healthcare Associated Infections
 - o Medication Safety

- o Patient Identification and Procedure Matching
- o Clinical Handover
- o Blood and blood products
- o Preventing and managing pressure injuries
- o Recognising and responding to clinical deterioration in acute healthcare
- o Preventing falls and harm from falls
- o Medication Safety
- 5. Grief associated with sudden unexpected death
- 6. Ethical and legal responsibilities
- 7. Working in multi-disciplinary teams
- 8. Clinical Practicum
- Core Practice Skills:
- 9. Hand hygiene
- 10. Prioritising Care
- o Recognising the deteriorating patient
- o Primary Survey
- o Trauma Care
- o Rapid Response Teams
- o Advanced Life Support

Special Requirements

Legislative pre-requisites

Special Requirements Legislative Prerequisites

To be eligible to enrol in a subject and attend a health-related placement in your program, students must meet Western Sydney University program requirements and Special Legislative Requirements to be assessed in their first year of study against the following:

1. National Criminal History Check: Students must have a current (expiring 3 years from date of issue) check valid for their entire program. A valid National Criminal history check must be an Australia wide check, include the student's full name matching their Student ID card and date of birth and not have any offences listed. If a student has a criminal history identified on their check, they must provide a Clinical Placement Authority Card (CPAC) or conditional letter from the NSW HealthShare Employment Screening and Review Unit https://www.health.nsw.gov.au/careers/student_clearance/Documents/appendix-10-student-application.pdf
- International students must additionally have a translated International Police Check or statutory declaration.
2. A NSW Working with Children Check (WWCC) clearance letter issued under the category of volunteer valid for their entire program.
3. A current approved first aid certificate valid for their entire program. Approved provider courses can be found at <http://training.gov.au> (<http://training.gov.au/>).
4. A completed vaccination/immunisation card with all serology results containing expiry dates and currency must be maintained by the student to ensure compliance for their entire course.
5. NSW Undertaking/Declaration form.
6. Completed any additional health forms required (such as NSW Health Code of Conduct, Health Student Undertaking/Declaration and Tuberculosis (TB) Assessment Tool).
7. Relevant Local Health District specific documentation as requested. Contact your School for further details. Resources are also available on the Placement Hub website https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Numerical Problem Solving	30 minutes	S/U	Y	Individual
Simulation	20 minutes	S/U	Y	Individual
Practical Exam	60 minutes	S/U	Y	Individual
Participation	100%	S/U	Y	Individual
Professional Placement Performance	160 hours	S/U	Y	Individual

Teaching Periods

NURS 7076 Palliative and End of Life Care

Credit Points 10

Legacy Code 401463

Coordinator Cannas Kwok ([https://directory.westernsydney.edu.au/search/name/Cannas Kwok/](https://directory.westernsydney.edu.au/search/name/Cannas%20Kwok/))

Description Palliative and End of Life Care focuses on the palliative approach as a model of care, exploring the benefits of this approach when supporting dying individuals with any life limiting illness. Students will acquire the capabilities to develop self-care strategies to manage their own grief, loss and stress associated with working in a palliative care context.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in program 4785 - Master of Nursing Practice (Preregistration).

Assumed Knowledge

Well-developed communication and person-centred care skills.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Justify palliative care principals and their application when assessing, planning, and managing the holistic physical, psychological, cultural, social, and spiritual needs of a person experiencing a life limiting condition across the lifespan.
2. Appraise comprehensive care provided across a variety of settings utilising the multidisciplinary team to provide a well-coordinated and integrated approach.
3. Adapt to a dynamic and constantly changing healthcare environment when facilitating collaborative and ethical decision making about the provision of palliative nursing care and advanced care planning.
4. Identify factors and consider the input required from others, including the person, significant others, members of the interdisciplinary care team and community services when providing palliative care across a variety of settings.

- Evaluate evidence and apply strategies across the lifespan to support a person and their significant others during palliation including loss and grief support services.
- Apply strategies to manage a rapidly changing healthcare environment when facilitating collaborative and ethical decision making in the provision of palliative nursing care and advanced care planning.
- Collaborate effectively when communicating and interacting with a person and their significant others in a palliative care context.

Subject Content

- Principles of a palliative approach-interdisciplinary team
- Pathophysiology of dying
- Communication in palliative and end of life care
- Adjustment and adaptation to loss
- Principles for person centred clinical assessment and intervention across the lifespan
- Pharmacological and non-pharmacological care
- Optimising function and injury prevention in palliative and end of life care
- Coping with dying and bereavement as a care giver
- Spirituality and culturally diverse practices, particularly Aboriginal and Torres Strait Islander people
- Advance Directives and Power of Attorney
- Discuss the 10 National Safety and Quality in Health Service Standards
- Indicative Case Histories
- care of The terminally ill child, Adult and aged persons

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	30 minutes	30	N	Individual
Case Study	2,000 words	40	N	Individual
Presentation	15 minutes	30	N	Individual

Teaching Periods

NURS 7077 Pharmacology Knowledge for Nursing Practice

Credit Points 10

Legacy Code 401464

Coordinator Leanne Hunt ([https://directory.westernsydney.edu.au/search/name/Leanne Hunt/](https://directory.westernsydney.edu.au/search/name/Leanne%20Hunt/))

Description Safe medication administration is a fundamental requirement in nursing. It is vital that registered nurses have a solid understanding of pharmacology in order to maximise patient safety in the quality use of medications. This unit will introduce the principles and core concepts of pharmacology where students will combine cognitive, technical and research skills to develop the essential knowledge of pharmacokinetics and pharmacodynamics. Students will be required to systematically develop an understanding of actions and reactions of commonly prescribed drugs using concepts of person-centred care across the lifespan. Principles of safe administration, prescribing, electronic medication management systems, patient

education and engagement in medication management are the focus of this unit.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) NURS 7023 - Evidence-based Health Care

Restrictions

Students must be enrolled in program 4785 - Master of Nursing Practice (Preregistration).

Learning Outcomes

On successful completion of this subject, students should be able to:

- Apply the principles and core concepts of pharmacokinetics and pharmacodynamics to develop nursing practice.
- Analyse the factors that impact on selecting, monitoring, and individualising treatment by applying clinical reasoning skills.
- Explain the mechanisms of actions and reactions of commonly prescribed drugs to individual people across the lifespan.
- Apply knowledge of state and territory legislation and health service policies for medication prescription, storage, use and administration.
- Critically analyse issues and considerations during medication administration in complex care situations.
- Reflect on the National Safety and Quality in Health Service Standards related to Medication Safety applied to the administration of medication with demonstrated high-level personal autonomy and accountability.

Subject Content

- Principles of pharmacology
 - Pharmacokinetics
 - Pharmacodynamics
 - Variability of drug action and reactions to people across lifespan
 - Individual differences
- Commonly prescribed drugs
 - Anti-infective (antimicrobials, antivirals, antiparasitics, antifungals, and vaccines); Anti-allergic agents (anti-histamines and immunosuppressants)
 - Analgesics (opioids, non-opioids and non-steroidal anti-inflammatory drugs)
 - Drugs for gastrointestinal disorders (anti-emetics, laxatives, anti-diarrhoeal agents, vitamin supplements)
 - Drugs for cardiovascular disorders (anti-hypertensives, anti-angina drugs, lipid-lowering agents, anticoagulants, antiplatelets, thrombolytics, drugs for heart failure and antidysrhythmic agents)
 - Drugs for respiratory disorders (drugs for rhinitis, asthma and chronic obstructive pulmonary disease)
 - Drugs modifying endocrine system (birth control pills, anti-diabetic agents, drugs for thyroid disorders)
 - Anxiolytics, hypnotics and anticonvulsants
- Nursing considerations for quality use and administration of medicines
 - Psycho-socio-cultural aspects of pharmacotherapeutics
 - Medication safety and reporting medication incidents including adverse drug reactions, medication errors and near misses.

- c. Interprofessional and intraprofessional communication related to safe medication management and practices
- d. Electronic medication management systems
- e. Medication adherence including legislative and organisational requirements for storage, use and administration
- f. Patient education and engagement in medication management
- g. accesses and analyses the best available evidence, that includes research findings, for safe, quality practice
- t. Antimicrobial Stewardship promoted by the World Health Organisation
- u. Search and review current medication related evidence for translation into practice
- v. Prescribing registered nurse initiated medications

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	30 minutes each (x2) (15% each)	30	N	Individual
Portfolio	1,500 words or equivalent	30	N	Individual
Viva Voce	20 minutes	40	Y	Individual

NURS 7078 Professional Nursing Practice

Credit Points 20

Legacy Code 401465

Coordinator Cannas Kwok ([https://directory.westernsydney.edu.au/search/name/Cannas Kwok/](https://directory.westernsydney.edu.au/search/name/Cannas%20Kwok/))

Description Professional Nursing Practice provides an opportunity to consolidate the development of the role and clinical skills of the registered nurse in preparation for transition to graduate practice. A simulated professional task will assist with the development of essential clinical communications and a professional experience placement to evaluate clinical skills development. The unit includes 240 hours of Professional Experience Placement. All assessments in this

unit are mandatory. Attendance is also mandatory in all workshops and Clinical Practice Unit sessions in this unit.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 20cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) NURS 7075

Co-requisite(s) NURS 7079

Restrictions

Successful completion of 120 credit points and students must be enrolled in program 4785 - Master of Nursing Practice (Preregistration).

Assumed Knowledge

Completed all other subjects in 4785 - Master of Nursing Practice (Graduate Entry).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse leadership when initiating and managing collaborative practice in nursing
2. Coordinate resources effectively with justification for planned actions
3. Explain the application of strategies to respond appropriately and professionally to situations that may create personal discomfort including giving and receiving feedback
4. Comply with legislation, regulations, policies, guidelines and other standards or requirements relevant to the context of practice when making decisions
5. Practise in accordance with relevant policies, guidelines, standards, regulations, and legislation

Subject Content

Transition to graduate practice

Working in multi-disciplinary teams and understanding intraprofessional and interprofessional relationships

Clinical practicum

Consolidate and review Core Practice Skills, including Hand Hygiene

Recognising and responding to variations in health status

? ECG

? BGL

? Vital signs

? Work of breathing

Risk assessment ? falls, pressure injury, venous thromboembolism (VT)

? Oxygenation

? Medication therapy

Prioritising care across the lifespan

? Recognising the deteriorating patient

? Primary survey

? National Safety and Quality Health Service Standards

Working in complex and dynamic acute healthcare contexts

? Rapid Response Teams

? Basic and Advanced Life Support

? Emergency drugs

Complex IV Therapy, Parental Nutrition and Central Venous Access Devices

? Multiple infusions

? Dressing of lines ? when, how, why

? Arterial lines

Scenarios: Using low medium and high-fidelity simulation-based case studies to facilitate improvement in

- ? Time management
- ? Clinical judgement
- ? Teamwork and responsibilities of care providers
- ? Managing others/ leadership and delegation
- ? Accountability
- ? Nurse as educator
- ? Family focused care
- ? Numeracy ? medication calculations
- ? Principles of Work Health and Safety in clinical practice

Special Requirements

Legislative pre-requisites

Special Requirements Legislative Prerequisites

To be eligible to enrol in a subject and attend a health-related placement in your program, students must meet Western Sydney University program requirements and Special Legislative Requirements to be assessed in their first year of study against the following.

1. National Criminal History Check: Students must have a current (expiring 3 years from date of issue) check valid for their entire program. A valid National Criminal history check must be an Australia wide check, include the student's full name matching their Student ID card and date of birth and not have any offences listed. If a student has a criminal history identified on their check, they must provide a Clinical Placement Authority Card (CPAC) or conditional letter from the NSW HealthShare Employment Screening and Review Unit https://www.health.nsw.gov.au/careers/student_clearance/Documents/appendix-10-student-application.pdf
- International students must additionally have a translated International Police Check or statutory declaration.
2. A NSW Working with Children Check (WWCC) clearance letter issued under the category of volunteer valid for their entire program.
3. A current approved first aid certificate valid for their entire program. Approved provider courses can be found at <http://training.gov.au> (<http://training.gov.au/>).
4. A completed vaccination/immunisation card with all serology results containing expiry dates and currency must be maintained by the student to ensure compliance for their entire course.
5. NSW Undertaking/Declaration form.
6. Completed any additional health forms required (such as NSW Health Code of Conduct, Health Student Undertaking/Declaration and Tuberculosis (TB) Assessment Tool).
7. Relevant Local Health District specific documentation as requested. Contact your School for further details. Resources are also available on the Placement Hub website https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Viva Voce	20 minutes	S/U	Y	Individual
Professional Placement Performance	240 hours	S/U	Y	Individual
Participation	100%	S/U	Y	Individual

Teaching Periods

NURS 7079 Transition to Professional Nursing

Credit Points 10

Legacy Code 401466

Coordinator Cannas Kwok ([https://directory.westernsydney.edu.au/search/name/Cannas Kwok/](https://directory.westernsydney.edu.au/search/name/Cannas%20Kwok/))

Description Transition to Professional Nursing explores the process of transition from student to registered health care professional. Students analyse their role as a registered nurse, reflecting on accountability, responsibility, therapeutic and professional relationships, as well as their capability for practice. This unit will build capacity in students to meet their professional responsibilities as capable practitioners in nursing and assist in demonstrating job readiness skills in preparation for new graduate employment opportunities.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) NURS 7075

Co-requisite(s) NURS 7078

Restrictions

Students must be enrolled in program 4785 - Master of Nursing Practice (Preregistration).

Assumed Knowledge

An understanding of the professional responsibilities associated with nursing practice.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate job readiness skills in preparation for graduate employment
2. Appraise the role of nursing, the practice and profession
3. Critically analyse professional accountability for decisions, actions, behaviours, and responsibilities inherent in the role of nursing
4. Reflect on and synthesise the professional responsibilities of the registered nurse adhering to digital health legislation, policy, ethics, and professional conduct
5. Define and evaluate the need for resilience in nursing
6. Actively apply a lifelong learning approach for continuing professional development of self and others

Subject Content

1. Transition to graduate practice ? theoretical perspectives
2. Novice to expert
 - 2.1 Transition to graduate practice: stages and experiences
 - 2.2 The role of the profession in influencing better health outcomes for people, and partnering with other health professionals to optimise decision making that supports person-centred care
3. Participation in collaborative practice and building professional relationships with health professionals within the scope of practice and personal and professional boundaries
 - 3.1 Regulatory Frameworks
 - 3.2 National Nursing and Midwifery Digital Health Capability Framework
4. Curriculum Framework
 - 4.1 National Safety and Quality Health Service Standards
 - 4.2 Aged Care Quality Standards
 - 4.3 Professional Development
 - 4.4 Formal requirements for registration
 - 4.5 Continuing professional development registration standards
 - 4.6 Professional and industrial bodies
 - 4.7 Nursing and Midwifery Board of Australia
 - 4.8 Australian Nursing and Midwifery Federation
 - 4.9 International Council of Nurses
 - 4.10 Australian College of Nursing
 - 4.11 NSW Nurses and Midwives Association
 - 4.12 Numerous Specialty Colleges
 - 4.13 Maintaining Currency
 - 4.14 Accessing health informatics and health technology
 - 4.15 Accessing, analysing and using the best available evidence

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Interview	15 minutes	30	N	Individual
Essay	2,000 words	40	N	Individual
Reflection	1,500 words	30	N	Individual

Teaching Periods

NURS 7080 Waluwin: Health across the lifespan for Mob

Credit Points 10

Legacy Code 401502

Coordinator Alison Barnes ([https://directory.westernsydney.edu.au/search/name/Alison Barnes/](https://directory.westernsydney.edu.au/search/name/Alison%20Barnes/))

Description Building on the broad concepts learnt in core unit 401454 - Indigenous Australian Health, Wellness and Culture or unit 401445 - Health, Culture and Wellbeing of Aboriginal and Torres Strait Islander Peoples, this unit introduces the student to perspectives of Aboriginal and Torres Strait Islander people's health looking across the lifespan. Critical aspects of nursing care across the lifespan are examined focusing on the patients emotional, social, physical, and significantly, spiritual wellbeing in addition to family and the communities' response to the key alterations in health. Classroom learning will be supported by a field trip which allows students to experience a culturally immersive experience on Country facilitated by Aboriginal Elders. The field

trip will also allow students to develop new skills for practice and develop a deeper appreciation for Aboriginal and Torres Strait Islander peoples and culture. This unit will interest anyone with an interest in contemporary Aboriginal and Torres Strait Islander culture and health care.

School Nursing & Midwifery

Discipline Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) NURS 7070 OR NURS 2039

Restrictions

Students must be enrolled in 4691 - Bachelor of Nursing or 4780 - Bachelor of Nursing ? WSU Online, or 4785 - Master of Nursing Practice (Preregistration).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply professional standards and the principles of evidence-based practice in planning for the holistic nursing care of Aboriginal and Torres Strait Island people, families, and communities.
2. Analyse underlying pathophysiology, clinical presentations, nursing assessments and interventions for alterations in health, across the life span.
3. Evaluate epidemiology and population health data in diagnostic thinking and develop strategies for community-wide approaches to prevention.
4. Critique historical and current policies and practices to determine how they impact the health and wellbeing of Aboriginal and Torres Strait Islander people today.

Subject Content

Maternal, prenatal, and newborn care for Aboriginal and Torres Strait Islander people
 How the early years provide a firm foundation for Aboriginal and Torres Strait Islander people
 The importance of Child and family health
 Adolescents and the importance of strong cultural ties
 Mental Health care ? age relevant concepts are embedded across the program
 An examination of Aboriginal and Torres Strait Islander parenting
 Women?fs Business
 Men?fs Business
 Growing older
 Aboriginal aged care
 The impact of grief and trauma on Aboriginal and Torres Strait Islander people, families, and communities
 Traditional health care in a contemporary setting
 Nurses as change agents

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Annotated Bibliography	1500 words	50	N	Individual
Presentation	20 minutes	20	N	Group

Legacy Code 102553

Coordinator David Cashman ([https://directory.westernsydney.edu.au/search/name/David Cashman/](https://directory.westernsydney.edu.au/search/name/David%20Cashman/))

Description In this unit, students will develop their performance skills through participating in three modularised workshops. The first two workshops will run in parallel with each other and will be rotated: module 1 will focus on improvisation; and module 2 will focus on (western or non-western) music from an oral tradition. Module 3 will then extend students' skills in reading and arranging music, utilising their preferred performing media (voice or instrument). In this third module, they will perform set technical tasks (such as scales and arpeggios) and, in groups, they will arrange and perform one set piece of music from a basic notated score, and they will choose, arrange and perform another piece. They will perform one piece chosen from modules 1, 2, or 3 in a public venue on campus. The unit will also introduce basic music business skills, such as how to advertise and mount a public performance.

School Humanities & Comm Arts

Discipline Music

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects PERF 1008 - Introduction to Music Performance

Assumed Knowledge

Students to undertake audition/interview. On entry into this subject students need to demonstrate that they can perform music at an equivalent level of the audition standard.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. perform music in large and small group combinations
2. create improvisations
3. perform music from an oral tradition
4. demonstrate proficiency in the performance of set technical tasks
5. implement strategies for arranging a set piece from a basic notated score
6. rehearse and perform in small groups a set piece from a basic score
7. devise a business plan for promoting and mounting a performance as part of a short reflective essay on the process of creating and performing a musical performance
8. perform the music created in one of the three modules in a public venue
9. Those attending Art of Sound will be able to: participate meaningfully in Art of Sound activities and projects, working with students across the Music program to develop collaborative, technical and performance skills. Involvement in Art of Sound will culminate in attending the Creativity Unlimited Music Festival.

Subject Content

The subject will include practical and theoretical tasks pertinent to music performance as follows:

1. Rehearsals leading to performances of music from an oral tradition (western or non-western)
2. Improvisation in large and small group combinations, using notated and non-notated formats, and utilising a variety of improvising styles, techniques and approaches
3. Rehearsals and performance in small groups of set technical tasks, such as scales and arpeggios
4. Arrangement of a prescribed simple notated piece from a pertinent repertoire in students' preferred performing media (voice or instrument) for group rehearsal and performance
5. Arrangement of a piece of music chosen by students to rehearse and perform in their preferred performing media (voice or instrument)
6. Essay on contemporary music performance.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Practical Exam	5 minutes	30	N	Individual
Practical	5-7 minutes	40	N	Individual
Practical Exam	5-7 minutes	10	N	Group
Essay	1000 words	20	N	Individual
Participation	Minimum 2 hours per fortnight	S/U	Y	Individual

PERF 1012 Music Performance 2

Credit Points 10

Legacy Code 102554

Coordinator David Cashman ([https://directory.westernsydney.edu.au/search/name/David Cashman/](https://directory.westernsydney.edu.au/search/name/David%20Cashman/))

Description Students will extend their performance skills acquired in Music Performance 1 through participating in three modularised workshops. The first two workshops will run in parallel with each other and will be rotated: module 1 will focus on free and notated improvisation; and module 2 will focus on choral performance. Module 3 will extend the skills of reading and arranging music in students' preferred performing media (voice or instrument). In this module, they

will perform set technical tasks (such as scales and arpeggios), adding to the skills acquired in Music Performance 1 and, continuing to work in small groups, they will arrange and perform one set piece of music from a basic notated score, and choose, arrange and perform another piece that is different from the music performed in Music Performance 1. They will perform one piece chosen from modules 1, 2, or 3 in a public venue on campus. The unit will also introduce music business skills, such as how to publicise and mount a performance, and how to upload a sample of work to YouTube.

School Humanities & Comm Arts

Discipline Music

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Pre-requisite(s) PERF 1008 OR PERF 1010

Equivalent Subjects PERF 1013 - Music Performance 2 Notated and Free Musics PERF 1007 - Free and Notated Music Performance

Assumed Knowledge

It is assumed that students can perform at a level (determined either by having successfully completed any pre-requisite subjects) or through an audition process where they demonstrate musical fluency on chosen instrument/voice/other media.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. perform music in large and small group combinations
2. create improvisations in free and notated traditions
3. perform music as a member of a choral group
4. demonstrate proficiency in the performance of set technical tasks
5. implement strategies for arranging a set piece from a notated score
6. rehearse and perform in small groups a set piece from a score
7. upload your performance to YouTube
8. write a reflective essay about your performance uploaded to YouTube
9. perform the music created in one of the three modules in a public venue
10. Those attending Art of Sound will be able to: participate meaningfully in Art of Sound activities and projects, working with students across the Music program to develop collaborative, technical and performance skills. Involvement in Art of Sound will culminate in attending the Creativity Unlimited Music Festival.

Subject Content

1. Improvisations in free and notated traditions, and their techniques and approaches
2. Reflect on the learning undertaken and develop ways to include this in the student's personal musical practice
3. Rehearsals and performance in small groups of set technical tasks, such as scales and arpeggios
4. Undertake a live performance
5. Arrange and rehearse music chosen by students in groups.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Practical	5 minutes	30	N	Individual
Practical	5-7 minutes	40	N	Individual
Practical	5-7 minutes	10	N	Individual
Reflective Journal	8 entries over the semester	20	N	Individual

PERF 1014 Music Production

Credit Points 10

Legacy Code 102558

Coordinator Andrew Milne ([https://directory.westernsydney.edu.au/search/name/Andrew Milne/](https://directory.westernsydney.edu.au/search/name/Andrew%20Milne/))

Description This unit presents an overview of the basic concepts and applications of electronic and digital music production technology in current music and media arts practice. Students will learn the fundamentals of musical acoustics, stereo recording and mixing techniques, and they will be introduced to MIDI systems and sequencing. Technical concepts are contextualised within a survey of current music production practice.

School Humanities & Comm Arts

Discipline Music

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects PERF 1005 - Digital Musics 1 Musical Contexts PERF 1009 - Introduction to Sound Technologies

Restrictions

Available places limited by technological infrastructure.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply basic acoustic terminology in real world, practical music scenarios.
2. Identify and define basic electroacoustic and computer technology.
3. Conduct and evaluate stereo audio recordings.
4. Operate computer-based MIDI and audio mixing systems.
5. Operate basic live music production and audio systems.

6. Those attending Art of Sound will be able to: Participate meaningfully in Art of Sound activities and projects, working with students across the Music program to develop collaborative, technical and performance skills.

Subject Content

1. Practical demonstrations and theory of the physical properties and perception of sound.
2. Theory and practice of using digital audio workstations to compose, record, and mix music.
3. Basic theory and practice of microphones and microphone technique.
4. Theory and practice of mixing for live performances.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

PERF 1015 Music Theory Fundamentals

Credit Points 10

Legacy Code 102564

Coordinator Clare Maclean ([https://directory.westernsydney.edu.au/search/name/Clare Maclean/](https://directory.westernsydney.edu.au/search/name/Clare%20Maclean/))

Description This unit introduces basic theoretical knowledge such as scales, intervals, chords and progressions. It provides musicianship training in aural, reading and keyboard skills and an introduction to Finale software. Students will learn to analyse harmony and to compose melodies and simple chordal accompaniments in song and theme and variation forms. Keyboard and aural classes will build on the theoretical content presented in lectures.

School Humanities & Comm Arts

Discipline Music

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects PERF 1003 - Composition Craft and Theory 1 PERF 1001 - Basic Composition Craft and Theory

Restrictions Students undertake audition/interview.

Assumed Knowledge

It is assumed that students have had experience with music either as performers, composers and song writers or through music technology. While an understanding of music theory is advisable, experience working aurally with these concepts is acceptable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Write a simple composition in song or variation form, using 4 or more chords and simple accompaniment textures.
2. Notate from aural dictation: intervals, chords, inversions, rhythms, simple melodies and harmonic progressions.
3. Notate and analyse chords, inversions, cadences, harmonic progressions, and non-harmonic notes.
4. Harmonise a melody using diatonic functional harmony.
5. Notate music with Finale or other notation software.
6. Read and play simple melodies and harmony at the keyboard.
7. Those attending Art of Sound will be able to: Participate meaningfully in Art of Sound activities and projects, working with students across the Music program to develop collaborative, technical and performance skills.

Subject Content

Theoretical knowledge of scales, intervals, chords and simple chord progressions using functional harmony.

Skills in aural recognition of short melodic, harmonic and rhythmic dictations.

Preliminary musicianship skills (keyboard, music reading and sight-singing) skills.

Composition skills using diatonic melodies and harmony, with simple accompaniment textures.

Skills in Finale or other notation software.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Short Answer	1. 20 minutes each 2. 15 minutes each	30	N	Individual

Practical	1. 16 bars of music each 2. 3 minutes each	40	N	Individual
Final Exam	2 hours	30	N	Individual

PERF 1016 Popular Music Histories

Credit Points 10

Legacy Code 102547

Coordinator John Encarnacao ([https://directory.westernsydney.edu.au/search/name/John Encarnacao/](https://directory.westernsydney.edu.au/search/name/John%20Encarnacao/))

Description Students will explore some of the most significant trajectories of popular music of the last 100 years. Each week will look a different facet of popular music history, stretching from the stars of the early years of the recorded music industry to the development of electronic dance music. The unit will touch upon folk, jazz, blues, rock, soul, funk, pop, disco, metal, punk, and hip hop to offer a necessarily incomplete tapestry of music scenes, chains of influence, and theories on the points of origin of styles and genres. Concepts that will be investigated include the relationship of recording and dissemination technologies with popular music creation; the notion of a "mainstream" and its margins; and the idea of a grand narrative of popular music history, including the problems of canonicity.

School Humanities & Comm Arts

Discipline Music

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects CART 1006 - Music History 2 PERF 1022 - Western Art Music 2

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Name significant artists, works and genres associated with popular music of the period 1925-the present
2. Aurally recognise popular music artists, works and genres of the period 1925-the present
3. Associate significant artists, works and genres associated with popular music of the period 1925-the present with specific time periods
4. Explain elements of the lineage of popular music history with respect to developments in technology
5. Participate in debates regarding the relationship to a succession of formats of analogue and digital distribution with the production and reception of popular music works

6. Define canon and notions of a **mainstream** and their influence on common perceptions of popular music history
7. Those attending Art of Sound will be able to: Participate m

Subject Content

Major musical genres of the last 100 years of popular music. How do we identify these with respect to musical elements and their historical context?

The development of music performance technology and its influence on popular music history

The development of music dissemination technology and its influence on popular music history

The synchronicity of developments in parallel fields of popular music (e.g. punk and hip hop in the 1970s)

The idea of canon and canonicity

The relationship between recording and performance

Assessment

PERF 1023 Western Art Music History

Credit Points 10

Legacy Code 102546

Coordinator Jacob Leonard ([https://directory.westernsydney.edu.au/search/name/Jacob Leonard/](https://directory.westernsydney.edu.au/search/name/Jacob%20Leonard/))

Description This unit explores a range of musical works, styles, genres and composers from the Middle Ages to the twenty-first century. It shows how music evolved through the centuries, suggesting that stylistic changes are linked to innovative musical thinking on the one hand and conformity to established practices on the other. The unit asks how and why different genres and styles in different periods in western art music history come to the foreground while others recede into the background. Within a socio-historical context, the unit investigates the practices that produce musical innovation and considers how the various historical epochs have shaped our understanding of music. The unit includes some rudimentary music analysis and key terminologies and music vocabularies.

School Humanities & Comm Arts

Discipline Music

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects CART 1005 - Music History 1 PERF 1021 - Western Art Music 1

Learning Outcomes

On successful completion of this subject, students should be able to:

1. name significant composers, works and musical genres associated with western art music
2. aurally recognise music composed in the historical epochs of the western art music
3. define key terms associated with western art music
4. analyse the structural elements of music composed in different epochs of the western art music tradition
5. evaluate the extent to which music composed in the different historical epochs conforms to or deviates from established practices
6. explain what the terms 'modernism' and 'postmodernism' mean and how they are applied to more recent western art music.
7. Those attending Art of Sound will be able to: participate meaningfully in Art of Sound activities and projects, working with students across the Music program to develop collaborative, technical and performance skills. Involvement in Art of Sound will culminate in attending the Creativity Unlimited Music Festival.

Subject Content

Styles and genres

Historical epochs from the Middle Ages to the present day

Significant composers

Technological and musical innovations

The ways in which musical styles and practices become established

Popular and folk music in different periods

The relationship of folk music to nationalism

Assessment

Equivalent Subjects PERF 1006 - Digital Musics 2 - Studio and Soundscape
PERF 1019 - Sound Synthesis and the Sound Environment
PERF 1018 - Sound Design

Assumed Knowledge

Ability to understand basic acoustics and technical terminology; ability to conduct effective stereo audio recording; ability to operate simple MIDI systems; ability to operate simple audio mixing consoles; ability to critically analyse electroacoustic sound and music works at a basic level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply basic musical acoustics terminology and sound synthesis concepts and methods.
2. Design sounds using synthesiser patch editing.
3. Incorporate basic DAW protocols and tools, including audio libraries, MIDI interface, in the final mixing and mastering process.
4. Explore and use sound as a narrative tool and artistic palette.
5. Record, edit and manipulate sound samples for use in sound design.
6. Those attending Art of Sound will be able to: Participate meaningfully in Art of Sound activities and projects, working with students across the Music program to develop collaborative, technical and performance skills.

Subject Content

Practical and theoretical examinations of digital audio workstations.

Practical and theoretical examinations of field recording techniques for sound design.

Practical and theoretical examinations of musical acoustics, sound synthesis and synthesiser patch editing for sound design.

Critical listening and examination of contemporary music and sound design practice.

Assessment

PERF 2001 Arranging Music

Credit Points 10

Legacy Code 102566

Coordinator David Cashman ([https://directory.westernsydney.edu.au/search/name/David Cashman/](https://directory.westernsydney.edu.au/search/name/David+Cashman/))

Description This unit introduces concepts and skills necessary to arrange music in popular-commercial and orchestral contexts. Lectures provide background on the use of instruments, harmony, timbre and texture, and tutorials provide practical exercises in preparation for the assignments.

School Humanities & Comm Arts

Discipline Music

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) PERF 2015 OR
PERF 2004

Equivalent Subjects LGYA 0425 - Arranging Popular Music PERF 2002 - Arranging Musics

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Arrange a given melody for piano/short score.
2. Construct an arrangement for large ensemble of a pre-existing piano score.
3. Arrange a song for a medium sized ensemble.
4. Analyse the musical roles of instruments in a musical score, and be familiar with the ranges of the instruments.
5. Score idiomatic parts for a range of instruments.
6. Apply stylistic elements of a chosen genre to their own arrangements.
7. Read and arrange simple melodies at the keyboard, and read chords from a lead sheet on keyboard or guitar.
8. Those attending Art of Sound will be able to: Participate in and contribute to Art of Sound activities and projects, collaborating with students across the Music program to develop and enhance production, technical and performance skills.

Subject Content

Skills in arranging for piano, and for medium and large ensembles
Theoretical knowledge of harmony, chord voicing and musical textures
Practical knowledge of instrument capabilities
Practical knowledge of computer notation and musical scoring conventions

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

PERF 2004 Composition and Creativity

Credit Points 10

Legacy Code 102548

Coordinator Bruce Crossman ([https://directory.westernsydney.edu.au/search/name/Bruce Crossman/](https://directory.westernsydney.edu.au/search/name/Bruce%20Crossman/))

Description This unit provides students with a firm grasp of creative principles and practical experience in the range of compositional techniques and skills required as a composer within a range of commonly employed artistic media and genres (classical, world, popular and avant-garde styles). These skills will provide the basis for professional compositional activity. Students will cover creative and technical issues with reference to a wide range of genres to stimulate across boundary thinking towards personal voice within lectures and tutorials. Practical workshops using compositional principles through student improvisation within creative groups will provide sonic demonstration of compositional ideas. The assessments will include both notated scores and recordings (improvisations; one notated score), in keeping with the Internet distribution age.

Discipline Music

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) PERF 1001 OR PERF 1015

Equivalent Subjects LGYA 1103 - Music Composition PERF 2015 - Music Composition Concepts and Creativity

Incompatible Subjects PERF 2009 - Digital Musics 3 Composition Crossovers

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Employ a range of composition techniques for the development of musical ideas and their formal organisation
2. Understand the use of instrumentation and instrumental and timbral colour by studying traditional and contemporary composition techniques
3. Engage with the musics of composers from the Western art music traditions, cross-cultural, and other music traditions
4. Apply this understanding to the development of original musical composition for various musical groups (instrumental and vocal)
5. Use reflective-process analytical writing skills.
6. Those attending Art of Sound will be able to: participate in and contribute to Art of Sound activities and projects, collaborating with students across the Music program to develop and enhance production, technical and performance skills. Involvement in Art of Sound will culminate in contributing to the Creativity Unlimited Music Festival.

Subject Content

1. A range of composition strategies and skills developed through a series of practical exercises, including scores and improvisation
2. Instrumentation, including the ranges of instruments, their capacities for extended techniques and an understanding of their timbres in solo and in combinations
3. Western and non-western, including cross-cultural, music practices and instrumentation
4. Solo or duo instrumental composition, including a precursor improvisation assignment
5. Small ensemble composition, including a digital recording
6. Procedures and conventions in the use of music score software and handwritten manuscripts
7. Analytical and reflective-process skills
8. The relationship of culture, place and identity to composing

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Professional Task	4-5 minutes (composition); 4-5 minute group improvisation	30	N	Individual
Professional Task	6-8 minutes	50	N	Group
Essay	1000 words	20	N	Individual
Professional Task	Minimum 2 hours per fortnight	S/U	Y	Individual

Legacy Code 101754

Coordinator Madison Shakespeare ([https://directory.westernsydney.edu.au/search/name/Madison Shakespeare/](https://directory.westernsydney.edu.au/search/name/Madison%20Shakespeare/))

Description This unit will provide students with an understanding of the historical framing and cultural re-framing of Indigenous Australians in the live arts. Students will be provided with a theoretical understanding of the politics of representation through examining and reflecting on the transitional shifts that Indigenous artists' have made from: cultural performance to theatre productions; 'traditional' storytelling to telling of stories through poetry and writing; ceremonial sounds to music and spoken word performance; documentary film to screen based drama to exploring new technologies and moving image performance. Students will be introduced to a variety of Indigenous artists and their creative works.

School Humanities & Comm Arts

Discipline Performing Arts

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points of study in the currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. outline the historical framing and cultural re/framing of Indigenous Australians in the live arts;
2. identify the different live art forms Indigenous people are exploring;
3. explain the various ways Indigenous artists in the live arts contribute significantly to Australian society;
4. describe the politics of representation as it relates to Indigenous artists in the live arts;
5. critically reflect on the politics of representation as it relates to Indigenous people engaging with new creative art forms.

Subject Content

Students will be provided with an: historical overview of the emergence of the Indigenous Australians in the live arts e.g. performance, film, dance, music, writing and poetry; overview of the different Indigenous live art forms; understanding of the politics of representation as it relates to Indigenous people; understanding of the politics of identity/?faboriginality?f/?findigeneity?f; introduction to the foundation live arts history e.g. Bangarra Dance Company, NAISDA, Black Theatre; and overview of the various Indigenous cultural events and festivals both nationally and internationally.

Assessment

PERF 2016 Music Group Performance

Credit Points 10

Legacy Code 102555

Coordinator David Cashman ([https://directory.westernsydney.edu.au/search/name/David Cashman/](https://directory.westernsydney.edu.au/search/name/David%20Cashman/))

Description This unit replaces 101521- Collaboration and Live Music Performance. Through a series of lectures and workshops, students will pursue two main threads of practical study imperative to any working musician. The first is collaboration, which will be practised in workshops (with repertoire determined by lecturers) and probed in a written task. The second area of study is the development of a suite of onstage skills and strategies including physical gesture, audience communication and facility with musical equipment.

School Humanities & Comm Arts

Discipline Music

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) PERF 1007 OR
PERF 1008 OR
PERF 1012 OR
PERF 1010

Equivalent Subjects LGYA 1098 - Music Performance 3 Australian Repertoire PERF 2003 - Collaboration and Live Music Performance

Assumed Knowledge

It is assumed that students can perform at Level 2 standard (determined either by having successfully completed some pre-requisite subjects or through an audition process) where they demonstrate musical fluency on chosen instrument/voice/other media.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. develop musical communication skills in the process of rehearsing repertoire as part of a small group;
 2. emerge with a greater understanding of group dynamics and collaboration;
 3. critically engage with the collaboration experience through a written task;
 4. develop the facility to constructively evaluate music performances;
 5. consider and develop a personal repertoire of onstage physical gesture;
 6. consider and rehearse the notion of persona and its relationship to communicating with audiences; and
 7. enhance existing skills concerning instrumentation and amplification.
8. Those attending Art of Sound will be able to: participate in and contribute to Art of Sound activities and projects, collaborating with students across the Music program to develop and enhance production, technical and performance skills. Involvement in Art of Sound will culminate in contributing to the Creativity Unlimited Music Festival.

Subject Content

In summary, this subject contains theoretical and practical tasks designed to extend the technical and musical proficiency of the student, including those listed below:

1. the development of repertoire and working relationships within a group over a limited time frame;
2. analysis of modes of collaboration;
3. application of assessment/evaluation criteria in the context of peer collaboration and reviews of guest performers;
4. analysis of onstage physical gesture in a variety of musical contexts;
5. strategies for communicating with audiences;
6. practical skills relating to musical equipment and amplification.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical	11 x 2 hour rehearsal workshops	30	N	Group
Practical	10-15 minutes	40	N	Group

PERF 2017 Music and Wellbeing

Credit Points 10

Legacy Code 102248

Coordinator Lene Jeffrey ([https://directory.westernsydney.edu.au/search/name/Lene Jeffrey/](https://directory.westernsydney.edu.au/search/name/Lene%20Jeffrey/))

Description This unit looks at the psychosocial importance of music to our wellbeing throughout our lives and during each day. Delivered in a lectorial format (lecture with practical activities throughout), the unit explores the relationship between music and the body, mind, emotions, mood, memory, communication and creativity from experimental studies through to practice-based evidence. This unit is not necessarily about performing music, although some music making will take place. Rather, it is focused on how music can improve our wellbeing throughout our lives. The ideas and approaches discussed are important across the humanities, the social sciences and the health sciences, as well as to musicians who are looking to use their music in the therapeutic context.

School Humanities & Comm Arts

Discipline Music

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the role of music in different societal activities with the focus on music in daily life.
2. Interpret evidence about concepts of musical behaviour and how music affects physiological, cognitive and emotional aspects of the individual.
3. Critique the ways in which music promotes communication and self-expression based on experiential and research knowledge.
4. Define the role of music in the development of wellbeing and enhancing of interpersonal relationships.

Subject Content

- introduction to The concept of music and wellbeing and The latest findings in neuroscience that Show US how to use music for our physiological and psychological advantage.
- music and The body - exploring The power of music to affect The body - heart and breathing rates, muscle tension, pain management and other physical disorders including ideas of using music for stimulation and sedation.
- music and The mind (including imagery and visualisation) - The power of music to affect emotions, evoke memories and induce peak experiences.
- Music and relationships - using music as a form of communication between people; reducing isolation with choirs and instrumental groups; and group formation around musical interests.
- music and creativity - enhancing personal creativity by listening to music, playing An instrument, singing, improvising and visualisation.
- Music and neuroscience - neuroplasticity; brain changes with music; mirror neuron system; multisensory integration; active changes in core areas of emotional processing; processing of musical syntax and musical meaning; and, social cognition.
- Review and closure - A closing lecture and workshop discussing The highlights of The unit and personal insights into music and wellbeing.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

PERF 2018 Music, Culture and Discourse

Credit Points 10

Legacy Code 102551

Coordinator Jacob Leonard ([https://directory.westernsydney.edu.au/search/name/Jacob Leonard/](https://directory.westernsydney.edu.au/search/name/Jacob%20Leonard/))

Description In 2022 this unit replaced by 102858 - Musicology as a Professional Practice. This unit builds a critical theoretical foundation for music while preparing students for more advanced musicological studies. It examines cultural theories, focusing on theories of authorship, identity, discourse, corporeality, aesthetics, and power, and their relationship to music. It explores the intersection of music with technology, considers how musical taste is formed, and looks at the ways in which institutional practices shape music and musicians. It considers the relationships to music of the overarching paradigms of humanism and post-humanism, liberalism and neo-liberalism, and modernism and postmodernism. Completing this unit will teach students how to critically evaluate music, to recognise how power functions in music's historical narratives, and to question the assumptions on which these narratives are based. It provides students with a broadly informed view of current issues in contemporary music practice.

PERF 2020 Popular Music Communities

Credit Points 10

Legacy Code 102281

Coordinator John Encarnacao ([https://directory.westernsydney.edu.au/search/name/John Encarnacao/](https://directory.westernsydney.edu.au/search/name/John%20Encarnacao/))

Description Music is a means through which people create, socialise, consume, disseminate information, engage in power relationships, and agitate for political and social change. People form communities from their shared musical tastes and interests, and hierarchies are formed around particular kinds of music. Music can symbolise and facilitate solidarity, and expresses identity in ways that transcend physical boundaries. This unit examines popular music communities in a variety of contexts, from the local to the global to the virtual. It explores the functions and uses of music that commonly inform human activity, while also considering how these functions and uses have been articulated through recent changes in technology.

School Humanities & Comm Arts

Discipline Music

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define key concepts and discussions involving the relationships between popular music and community, genre, technology, and power.
2. Analyse the impact of music communities on the music industry.
3. Evaluate the influence of music communities on political movements.
4. Assess the relationships between musical genres and formations of community.
5. Evaluate the impact of changing technology on the production, distribution and consumption of popular musics.
6. Interpret, communicate and present ideas and arguments in written and oral modes.

7. Those attending Art of Sound will be able to: participate in and contribute to Art of Sound activities and projects, collaborating with students across the Music program to develop and enhance production, technical and performance skills. Involvement in Art of Sound will culminate in contributing to the Creativity Unlimited Music Festival.

Subject Content

The subject will cover the following topics:

- popular music communities and genre
- popular music communities and place
- popular music communities and Technology
- popular music communities - power and dissent

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

PERF 2023 The Composer-Performer

Credit Points 10

Legacy Code 101539

Coordinator Bruce Crossman ([https://directory.westernsydney.edu.au/search/name/Bruce Crossman/](https://directory.westernsydney.edu.au/search/name/Bruce%20Crossman/))

Description Students are required to both perform and compose in this unit. While students may choose to perform their own work, this unit also offers the opportunity for students to experience the particular challenges and rewards offered by the close collaboration entailed in both sides of the composer/performer interface. Each student will choose a balance of performance and composition tasks appropriate to her/his specific musical path. The unit presents basic compositional techniques and canvasses issues regarding the composer/performer relationship through a series of lectures, tutorials and workshops. Students will also continue to develop their event administration skills.

School Humanities & Comm Arts

Discipline Music

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) PERF 1017

Equivalent Subjects LGYA 1099 - Music Performance 4 The Composer-Performer

Assumed Knowledge

Students are to have completed the pre-requisites or equivalent knowledge and ability will be determined by the Subject Coordinator.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. plan, develop and perform a project as a featured player
2. acquire the skills necessary to compose for given combinations of instruments
3. extend on musical communication skills acquired in earlier units
4. further develop skills in music notation acquired in earlier units
5. apply techniques to structure musical material
6. contextualise the composer/performer experience through a detailed project proposal
7. meet the challenge of giving the first performance of a new work
8. Those attending Art of Sound will be able to: participate in and contribute to Art of Sound activities and projects, collaborating with students across the Music program to develop and enhance production, technical and performance skills. Involvement in Art of Sound will culminate in contributing to the Creativity Unlimited Music Festival.

Subject Content

This subject will include theoretical and practical tasks designed to extend the technical and musical proficiency of the student as well as to canvass a number of important themes and issues relevant to the composer/performer relationship. The following topics will be included:

- twentieth and twenty-first century approaches to composition spanning contemporary art music, World musics and A wide range of popular musics
- performance practice Issues pertaining to these compositional approaches
- composing Issues relating to creating works for specific performers
- personal voice and societal music-associations in composition
- contemporary Critical theory and its application to music performance, composition and The dual role of composer-performer
- programming Issues specific to contemporary composition
- theoretical and practical Issues focused on The composer/performer interface in The performance event
- strategies to maximise communication between composers and performers

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Portfolio	Either two compositions and one performance; OR one composition and two performances composition = 3-5minutes; performance = 3-5 minutes	60	N	Individual
Professional task	Composition = 1.5-2.5 minutes;	15	N	Individual
Professional task	Performance = 3-5 minutes or x 2 3-5 minutes	15	N	Individual

PERF 2024 The Musical

Credit Points 10

Legacy Code 101795

Coordinator David McInnes ([https://directory.westernsydney.edu.au/search/name/David McInnes/](https://directory.westernsydney.edu.au/search/name/David%20McInnes/))

Description The Musical will involve the examination of the history and development of the stage musical in its social and cultural context. The unit will also explore the structure of the musical as a 'text' and performance genre, looking closely at narrative structure, the structure of songs and the construction of character types and interaction. 'The Musical' will also involve students in the critical analysis of the representation of gender and race in the stage musical.

School Humanities & Comm Arts

Discipline Performing Arts

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate knowledge and understanding of the history and form of the stage musical genre
2. apply analytical and critical (post-structuralist) skills to the stage musical, particularly through the analysis of race and gender
3. apply skills in the analysis of narrative structure (schematic/plot structure, narrative point of view etc), song (lyrical) structure (poetic features etc), character construction (as semiotic formation within fictional worlds) and some account/concern for musical structure (most centrally melody, phrase and passage structure) and style (hybridized forms from classical, operetta, music hall, black American etc) in order to more fully articulate the construction of multi-modal meaning in the musical genre.

Subject Content

- The history, development and structure of The stage musical
- The representation of gender and race in various musicals
- Close textual analysis of a series of musicals from early (Show Boat, Oklahoma) through to later 20th century musicals (My Fair Lady, West Side Story, Cabaret, and Jesus Christ Superstar) and contemporary adaptations/uses of the musical genre ('A Street

Teaching Periods

PERF 2025 The Politics of Australian Music

Credit Points 10

Legacy Code 102552

Coordinator Joseph Williams ([https://directory.westernsydney.edu.au/search/name/Joseph Williams/](https://directory.westernsydney.edu.au/search/name/Joseph%20Williams/))

Description In 2020 this unit replaced by 102762 - World Music. The unit explores the histories and politics that have shaped the development of Australian music from 1788 to the present day. It critically engages with the historical narrative that perpetuates the dominance of white, post-settler composers and musicians, asking what mechanisms have given rise to some music becoming silenced. How have post-settler musicians approached indigenous music as a challenge that is both aesthetic and ethical? In what ways does the diverse make-up of the Australian population since the mid-twentieth century erode the sharp distinction between the indigenous and the non-indigenous populations in music? Completing this unit will teach students how to critically evaluate Australian music history, to recognise the power of the dominant historical narrative, and to question the assumptions on which it is based. The unit is framed by Attali's theory of noise, which shows how the production, performance, and consumption of music are linked with power and order in society, and introduces Bourdieu's field theory.

Legacy Code 102762

Coordinator Nicholas Ng ([https://directory.westernsydney.edu.au/search/name/Nicholas Ng/](https://directory.westernsydney.edu.au/search/name/Nicholas%20Ng/))

Description This unit examines music from diverse cultures, such as African, Latin American, Middle Eastern, Asian, and the Australia-Oceania region, focusing on the performance, production, and transmission of contemporary fusion music. It explores the cultural-political ways in which the West represents world music as a commodity and considers how the music is inflected with notions of identity, modernity, globalisation, displacement and migration. It charts the ways in which, as a social practice, world music engages politics to promote change, giving voice to marginalised groups. Students will have the opportunity to perform selected rhythms from different cultures. Additionally, they will learn elements of music theory that pertain to the cultures studied in the unit.

Level Undergraduate Level 2 subject

Equivalent Subjects PERF 3002 - Contemporary Arts 3 Politics and Communities PERF 2014 - Modes and Codes of Music Production PERF 2025 - The Politics of Australian Music

Assumed Knowledge

A basic understanding of music notation.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate the diversity of genre and impact of the historical, socio-cultural, and global contexts of world music.

2. Communicate the ways in which world music operates as a political discourse, focusing on its impact on marginal groups.
3. Analyse the musical, lyrical, and performative dimensions of world music.
4. Execute performances of rhythmic patterns and melodies of world music.
5. Perform a range of world music compositions.
6. Demonstrate fluency in the basic notation and theory associated with world music.
7. Develop the capability to work with students across the Music program on collaborative, technical and performance skills.

Subject Content

Music from diverse cultures, such as African, Latin American, Middle Eastern, Asian and Australian-Oceanic.

The performance, production, and transmission of contemporary fusion music.

Representations of world music as a commodity.

Practical performances of rhythms from different cultures.

Introduction to music theory as it relates the cultures studied.

World music as a vehicle for the expression of identity, modernity, globalisation, displacement and migration.

The political and social dimensions of world music and relationship to marginalised societies.

PERF 2029 Music Project 1: Multimedia

Credit Points 10

Legacy Code 102855**Coordinator** Andrew Milne ([https://directory.westernsydney.edu.au/search/name/Andrew Milne/](https://directory.westernsydney.edu.au/search/name/Andrew%20Milne/))

Description In small groups, students will develop a creative music/sound and multimedia project. The multimedia aspects can include any thematically linked subset of video, art, text, lighting, digital technology and installations, sound spatialisation, or algorithmic sound/music generation. Students will learn how to integrate music and sound with multimedia; develop their skills in digital audio and video software and digital technology. Students will gain experience in collaborating on a creative project and contextualising and promoting their work within a broader cultural context. The teaching material comprises pre-recorded lectures and guided workshops, which can be undertaken on campus or online.

School Humanities & Comm Arts**Discipline** Music**Student Contribution Band** HECS Band 2 10cp**Level** Undergraduate Level 2 subject**Pre-requisite(s)** PERF 1025

Equivalent Subjects PERF 2027 - Electronic Music Production PERF 2010 - Digital Musics 4 Synthesis and Performance PERF 2021 - Sound Technologies and Machine Musicianship PERF 2008 - Digital Musicianship

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify strategies for integrating music and multimedia.
2. Apply knowledge of music and video software and technology in developing a multimedia project.
3. Design and develop a thematically coherent artistic project.
4. Participate in a collaborative creative process.
5. Relate their creative work to a broader cultural context.
6. Critically evaluate decisions and procedures used while developing artistic projects.

Subject Content

Overview of historical and contemporary multimedia works, artists, and cultural context.

Integrating music and sound with video, art, text, lighting, space, and interaction.

Recording, editing, arranging, mixing, remixing, automating, and mastering music and audio in a DAW.

Importing, editing, manipulating, and automating video in software environments.

Interfacing between software, hardware, and humans.

Developing algorithmic routines for generating and manipulating sound, music, and visuals.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Presentation	5 minutes	15	N	Group
Quiz	30 questions	15	N	Individual

Applied Project	3–7 minutes for a recorded piece; alternatively, a single installation	40	N	Group
-----------------	--	----	---	-------

PERF 2030 Musicology as a Professional Practice

Credit Points 10**Legacy Code** 102858

Coordinator Jacob Leonard ([https://directory.westernsydney.edu.au/search/name/Jacob Leonard/](https://directory.westernsydney.edu.au/search/name/Jacob%20Leonard/))

Description This unit offers the opportunity for students to apply musicological skills and knowledge to real-world contexts, such as writing program notes, music reviews, and blogs, researching and retrieving music repertoires for performance in various ensemble configurations, researching, analysing and critically writing about music from a range of genres, and adopting key analytical strategies for considering music in its cultural, intercultural and historical contexts. The teaching materials and content in this unit will be designed to closely align with and support the practical projects being chosen and designed by students in two project units (1 and 3) in the Bachelor of Music. The unit will provide students with a broadly informed view of current issues in music practice.

School Humanities & Comm Arts**Discipline** Music**Student Contribution Band** HECS Band 2 10cp**Level** Undergraduate Level 2 subject

Equivalent Subjects PERF 2006 - Contemporary Arts Music (Histories) PERF 2007 - Cultural Paradigms and Music PERF 2018 - Music Culture and Discourse

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the range of program notes used for various genres and styles of music.
2. Examine the cultural, intercultural, and historical contexts of music in a program-note, music blog or formal music review.
3. Evaluate the role of descriptive musical analysis and apply it to the written program-note.

4. Explain the function of music in multi-media and interdisciplinary contexts and their relationship to the program note, blog, and formal music review.
5. Assess and apply various modes of writing in the program-note, music blog and formal music review.
6. Those attending Art of Sound will be able to: Participate in and contribute to Art of Sound activities and projects, collaborating with students across the Music program to develop and enhance production, technical and performance skills.

Subject Content

Critical analysis of the range of program notes used for various genres and styles of music

The relationship of the cultural, intercultural, and historical contexts of music to the program note

The role of descriptive music analysis in the program note

The function of music in multi-media and interdisciplinary contexts

The relationship of music repertoires to program-note writing and reviewing

The role of musical blogs to the practice of music

Assessing and applying various modes of writing in the program note, the music blog and the formal music review

How to write about music

PERF 2031 The Music Industry

Credit Points 10

Legacy Code 102854

Coordinator David Cashman ([https://directory.westernsydney.edu.au/search/name/David Cashman/](https://directory.westernsydney.edu.au/search/name/David%20Cashman/))

Description In this unit students will be given an overview of the music industry, applying music industry theory to real-life situations, and working on real-world projects such as creating a unique image for an artist or band, and promoting and marketing a live gig. Responsibilities, and the pros and cons of going solo or working as a group will be explored together with income generation through record sales, live performance, song publishing, merchandise, and sponsorship. Other aspects, such as artist management, copyright, and contracts, will be covered along with the independent musician and new DIY models for the fast-paced, high-tech world of the future.

School Humanities & Comm Arts

Discipline Music

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects PERF 2009 - Digital Music 3 - Composition Crossovers PERF 2013 - Introduction to the Sound Studio PERF 2022 - Studio Production PERF 2026 - Advanced Production

Assumed Knowledge

Students enrolling in this subject are assumed to have a basic working knowledge of computer music and sound recording technologies and concepts, and safe working practices.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a knowledge of music industry theories and their application to practical scenarios.
2. Evaluate, contrast, and defend judgements about artist management, publishing, distribution, promotion and marketing, music copyright, and contractual agreements in different artist/music employment settings.
3. Create a unique image or brand for a band or solo artist.
4. Promote a live music event that includes a comprehensive marketing plan.
5. Critically evaluate the common income streams used in the music industry.
6. Apply professional judgment and initiative when dealing with the complexity, ambiguity, and diversity of DIY models in the fast-changing music business environment.
7. Situate the working, present-day musician in the broad historical context of the music industry.
8. Those attending Art of Sound will be able to: Participate meaningfully in Art of Sound activities and projects, working with students across the Music program to develop collaborative, technical and performance skills.

Subject Content

Overview of the music industry

Music, branding and the independent musician

Income streams

Live music

Music publishing, copyright

Artist management (independent or by agent)

Distribution, promotion, and marketing of the musical product

Contractual agreements (publishing, management, band and other music business related obligations)

PERF 2032 Music-making applications for education and therapy

Credit Points 10

Legacy Code 102910

Coordinator Allison Fuller ([https://directory.westernsydney.edu.au/search/name/Allison Fuller/](https://directory.westernsydney.edu.au/search/name/Allison%20Fuller/))

Description This unit assists you in developing your musical competency with a view to applications in education and therapy, since particular types of music skills and applied competencies are required for music teachers and music therapists as they work with students and clients. If you want to develop your musical skills to engage more actively in musical interaction with people, then this is the unit for you! This very practically oriented unit explores applied music literacy and aspects of using music as a tool within the social/educational context, engaging you in vocal, guitar, piano/keyboard and aural activities, as taught by experienced music therapy and education staff. This unit helps you expand your musical potential and career options, supporting you in developing skills to set you up for success in entering your chosen field of study, completing your studies and ultimately being career-ready for your future in the musical context.

School Humanities & Comm Arts

Discipline Music

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Assumed Knowledge

Beginning competency on piano, guitar or voice and basic music literacy skills.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and explain the key music literacy skills (within the areas of reading, writing and playing) as relevant to music education and music therapy contexts.
2. Apply learned music literacy skills utilising the guitar, piano/ keyboard and voice as associated with music education and music therapy delivery.
3. Create a personalised music literacy skills development plan with a view to potential career path towards the music education or music therapy fields.
4. Appraise current evidence-based applications to one area of music education or music therapy practice.

Subject Content

Introduction to music-making in education and therapy, with real-world examples of relevant music practices applied to these contexts and the importance of competent music skills.

Reviewing own current skills development, reflective critiquing own musical development. Establishing a practice regime and feedback mechanisms.

Foundations of music-making including aural skills, music reading and music literacy.

Music-making with voice.

Music-making with piano/keyboard.

Music-making with guitar.

Review and closure ? summary and review of the unit, personal insights into developing music-making as applied to education and therapy contexts.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

PERF 3009 Music Careers Research

Credit Points 10

Legacy Code 102429

Coordinator Joseph Williams ([https://directory.westernsydney.edu.au/search/name/Joseph Williams/](https://directory.westernsydney.edu.au/search/name/Joseph%20Williams/))

Description What music careers were sustainable in the past? How has the music industry changed over the last 3 decades? What would sustainable music careers look like in the future? Students will work on research projects that focus on music careers and the music industry. They will gain a good understanding of the careers available in music, including the qualifications and skills needed for jobs in music. They will also evaluate the research focused on music careers, including assessing the currency of websites that provide lists of music careers. Students will evaluate the degree to which the Bachelor of Music learning outcomes sufficiently prepare graduates for their chosen careers. Students will be introduced to a range of relevant methodologies. They will be expected to propose a topic, report on the progress of their research, retrieve and critically evaluate an appropriate literature for their project, and discuss the methods intended or used for their data collection and analysis.

School Humanities & Comm Arts

Discipline Music

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects PERF 3017 - Music in Theory and Practice

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design a research project focused on a music career
2. Write a proposal for a research project focused on a music career
3. Retrieve and provide a literature review for a research project focused on a music career
4. Assess the degree to which the Bachelor of Music Learning Outcomes prepare students for a music career
5. Evaluate the qualifications and skills needed for a music career
6. Explain the methods used by themselves and other researchers for investigating a music career
7. Interpret the findings of a research project focused on a music career
8. Write a final paper reporting on the research undertaken
9. Those attending Art of Sound will be able to: Develop, implement and promote Art of Sound activities and projects, guiding and collaborating with students across the Music program to further progress leadership, advanced production and performance skills. Involvement in Art of Sound will culminate in contribution to the program and coordination of the Creativity Unlimited Music Festival.

Subject Content

- Researching music careers
- critically Evaluating research about music careers
- Qualitative and quantitative research methods
- Ethnographic methods
- Surveys
- interviews
- research and ethics
- writing about music careers

- organisation research documentation

PERF 3013 Music and Analysis

Credit Points 10

Legacy Code 101152

Coordinator John Encarnacao ([https://directory.westernsydney.edu.au/search/name/John Encarnacao/](https://directory.westernsydney.edu.au/search/name/John%20Encarnacao/))

Description Analysis enables students to acquire a deep and rich understanding of music. This unit will focus on the formal designs, rhythmic, melodic and harmonic structures of notated music, and the structures, contexts and processes of non-notated music. It will include notated and recorded music from the popular song traditions, as well as studio recordings, electronic music and improvisation. It will consider the strengths, weaknesses and cultural biases of various modes of analysis, including the use of musical notation. Students will learn to apply these methods in lectures and tutorials.

School Humanities & Comm Arts

Discipline Music

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) PERF 2001 OR PERF 2004

Equivalent Subjects LGYA 0424 - Analytical Models in Music

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Employ the tools acquired in musicianship and music theory to the analysis of music.
2. Undertake analyses of notated and recorded song forms.
3. Utilise approaches used in the analysis of improvised and electronic musics.
4. Explain the theoretical models used to analyse notated and recorded music.
5. Critically evaluate the perspectives that analytical models bring to bear on the music analysed.
6. Describe the importance of the cultural context in the analytical process.
7. Those attending Art of Sound will be able to: Develop, implement and promote Art of Sound activities and projects, guiding and collaborating with students across the Music program to further progress leadership, advanced production and performance skills.

Subject Content

Students will work on topics to include style and genre analysis musicianship and music theory as applied to the analysis of music the analysis of notated and recorded song forms approaches to the analysis of improvised and electronic musics models use to analyse recorded music models used to analyse notated music the perspective that analysis brings to bear on music the connection between models of analysis and their cultural contexts

PERF 3014 Music and Critical Thought

Credit Points 10

Legacy Code 102573

Coordinator Michelle Stead ([https://directory.westernsydney.edu.au/search/name/Michelle Stead/](https://directory.westernsydney.edu.au/search/name/Michelle%20Stead/))

Description Music and Critical Thought considers definitions of music and how music is constituted. It asks how we encounter and experience music, and what makes a piece of music aesthetically pleasing and who decides. It asks whether the meanings attributed to music are as much intrinsic as they are cultural. The unit considers emotions and feelings in music, and why we would listen to music if it makes us feel sad. When music is used as an instrument of torture is it still music? How do we view the composer in the musical work? Where does creativity reside in a musical work? Is there a difference between musical thinking and thinking about music? Is music representational or immanent or both? Is music political? The unit provides an historical overview of the important debates and considers the poststructuralist critique of these debates. Students will design a question chosen from the topics covered in the unit, and retrieve and critically evaluate the appropriate literature for their project.

School Humanities & Comm Arts

Discipline Music

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects PERF 3015 - Music and Meaning PERF 3016 - Music and Philosophy

Learning Outcomes

On successful completion of this subject, students should be able to:

1. define key critical terms and concepts in music
2. explain the critical debates in music
3. apply critical thinking to music and to music analysis
4. evaluate the poststructuralist intervention into critical thinking in music
5. design a research project
6. write a proposal for a research project
7. retrieve and provide a literature review for a research project
8. unfold a sustained, critical argument as an essay for a research project
9. Those attending Art of Sound will be able to: Develop, implement and promote Art of Sound activities and projects, guiding and collaborating with students across the Music program to further progress leadership, advanced production and performance skills. Involvement in Art of Sound will culminate in contribution to the program and coordination of the Creativity Unlimited Music Festival.

PERF 3021 Repertoire and Identity in Performance

Credit Points 10

Legacy Code 102557

Coordinator John Encarnacao ([https://directory.westernsydney.edu.au/search/name/John Encarnacao/](https://directory.westernsydney.edu.au/search/name/John%20Encarnacao/))

Description In 2022 this unit replaced by 102859 - Performing as a Professional Musician. Repertoire and Identity in Performance is the third year unit that completes the Music Performance major and sub-major. It gives students the opportunity to conceptualise, perform and feature in a 20-minute project in a concert setting. It is expected that the preceding five semesters of music performance study will be drawn upon to give a cohesive performance that resonates with each student's particular musical identity. A written task, supported by a series of lectures, will encourage students to consider constructions of identity in their own performances and those of others. Through a series of workshops, students will receive feedback on their work in progress from their lecturer and colleagues, completing a circle of practice and critical engagement.

PERF 3022 Screen Media Composition

Credit Points 10

Legacy Code 102563

Coordinator Bruce Crossman ([https://directory.westernsydney.edu.au/search/name/Bruce Crossman/](https://directory.westernsydney.edu.au/search/name/Bruce%20Crossman/))

Description This unit is the final stage in the Composition and Music Production sub-major sequences. The unit is also available to Media Arts Production and Creative Industries students. The unit aims to prepare students creatively and technically to undertake self-directed sound composition projects for screen media. The areas to be examined include: sound studio techniques, mix processing for sound recording and screen media, an introduction to surround audio techniques, sound composition (score-based and/or sound-scape) for screen, film spotting for sound, audio-visual interactions, and professional communication/pitching of sound composition proposals. Each student produces a complete sound-composition for screen package including sound composition, sound recording, screen media product (including film), and promotional documentation and samples.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Ability to understand, operate and productively explore the creative potentials of professional sound studios
2. Ability to integrate digital video in audio projects
3. Develop an ability to create and structure composition and sound-scape components of screen media utilizing notation, orchestration, studio techniques and improvisation
4. Develop an understanding of sound interaction with visual media to forward screen narrative or drama
5. Develop an ability to practically create and record sounds (score and studio based) for screen media
6. Developed research and presentation skills - information gathering, problem solving, analysis and organization of material, argument ability, documentation skills, presentation of sound composition samples
7. Developed ability to generate, define and carry out a program of creative sound composition for screen media
8. Those attending Art of Sound will be able to: Develop, implement and promote Art of Sound activities and projects, guiding and collaborating with students across the Music program to further progress leadership, advanced production and performance skills. Involvement in Art of Sound will culminate in contribution to the program and coordination of the Creativity Unlimited Music Festival.

Subject Content

1. Extended examinations of contemporary studio recording techniques
2. Practical and theoretical introduction to 5.1 surround sound
3. Practical and theoretical examinations of audio and visual master preparation
4. Extended ability to create, structure and design composition and sound-scapes for interaction with screen media, including scores and/or graphic scores
5. Examinations of practical techniques in screen sound composition (composing, improvising, orchestrating, sound-designing, recording) for performers within industry-style timelines
6. Critical listening and viewing skills for analysing sound composition and its interaction with visual media
7. Research and presentation skills for directorial brief (including: information gathering, creative ideas for sound composition, sound-image interaction, problem solving, analysis and organization of material into articulate and constructive argument, documentation, creative work samples)
8. Complete sound-composition and visual production skills

PERF 3023 Songwriting and Composer Collaborations

Credit Points 10

Legacy Code 102549

Coordinator Bruce Crossman ([https://directory.westernsydney.edu.au/search/name/Bruce Crossman/](https://directory.westernsydney.edu.au/search/name/Bruce%20Crossman/))

Description This unit extends on the creative principles and practical experience in the range of compositional techniques and skills in the preceding unit Composition and Creativity. It will have two focuses: songwriting in both popular and art-music traditions to allow for the exploration of lyrics/texts; and composer collaborations with large scores for film, photography and dance. Students will work in a wide variety of commonly-employed artistic media and genres at a higher level than in the preceding unit. They will acquire the ability to write for larger instrumental combinations in cross-artform collaborations and songwriting skills. Practical workshops using compositional principles through student improvisation within creative groups will provide sonic demonstration of compositional ideas in relation to songwriting and other media. The assessments will include both notated scores (with visual media options) and recordings (improvisation; one notated score), in keeping with the Internet distribution age.

Equivalent Subjects LGYA 1104 - Music Composition Advanced PERF 3010 - Music Composition Text and Visual Interactions

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop an understanding of the compositional techniques and styles utilised by late 20th and early 21st century composers from the western art music traditions, popular music, cross-cultural and other musical traditions, including improvisation practices as compositional design
2. Apply this understanding to their own compositional practices
3. Acquire skills in text-setting and vocal writing, including songwriting (popular and art music styles)
4. Become adept at exploring and employing the full range of possibilities of instrumentation including extended techniques, orchestral textures and sound sources that are not based on traditional or standard instrumentation
5. Acquire skills in writing and collaborating for visual media (for example, dance, photography, and screen)
6. Examine and gain practical facility in dealing with the technical and aesthetic issues surrounding composition for a variety of sound media
7. Be able to produce reflective writing about the creative compositional process.
8. Those attending Art of Sound will be able to: Develop, implement and promote Art of Sound activities and projects, guiding and collaborating with students across the Music program to further progress leadership, advanced production and performance skills. Involvement in Art of Sound will culminate in contribution to the program and coordination of the Creativity Unlimited Music Festival.

Subject Content

1. A range of composition strategies and skills developed through practical work, including scored work, digital recordings, cross-disciplinary collaborations and improvisation
2. Compositional techniques and styles in the Western tradition
3. Compositional techniques and styles in popular music
4. Compositional techniques and styles in cross-cultural and other musical traditions
5. Compositions that explore the interaction of text and visual media with music, including a digital recording with emphasis on collaborations with other cross-disciplinary artists
6. Text setting and vocal writing, including a precursor recorded improvisation and emphasis on songwriting (popular and art music styles)
7. Instrumentation/Orchestration, including orchestral writing
8. Reflective practice paradigms

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Professional Task	5 minutes (composition); 5 minutes (group improvisation)	30	N	Individual
Professional Task	5-9 minutes	50	N	Individual
Essay	1000 words	20	N	Individual
Professional Task	Min 2 hrs per fortnight	S/U	Y	Individual

Level Undergraduate Level 3 subject

Pre-requisite(s) PERF 1025

Equivalent Subjects PERF 3025 - Sound and Performance Expanded Practice PERF 3007 - Expanded Music Performance PERF 3027 - Interactive Electronic Media and Performance

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify strategies for integrating live musical performance with technology (software and hardware), multimedia, and interaction.
2. Apply knowledge of music, video, and interactive software and technology to develop a creative performance.
3. Design and develop a thematically coherent and creative live performance.
4. Participate in a collaborative creative process.
5. Relate their creative work to a broader cultural context.
6. Critically evaluate decisions and procedures used for the development of multifaceted creative projects.

Subject Content

Overview of historical and contemporary expanded and multimedia performances, artists, and cultural context.

Integrating live musical performance with software, hardware (controllers and synths), video and other multimedia, stagecraft, lighting, spatialisation, algorithms, theory, and improvisation.

Using a digital audio workstation within live performance: plugins, recording and triggering loops, routing of MIDI and audio, automation.

Interfacing between software, hardware, and humans.

Developing algorithmic routines for generating and manipulating sound, music, and visuals.

Assessment

Equivalent Subjects PERF 3019 - Professional Music Project PERF 3012 - Music Project PERF 3026 - Applied Professional Music Contexts

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Present a professional online profile with an intercultural diversity mandate or purpose.
2. Plan and execute an intercultural creative project in a workplace and/or community context.
3. Apply knowledge of the practical aspects of the music industry and its diverse nature, especially across identity, diversity and pluralism, to creative projects.
4. Identify and respond to a global intercultural perspective in industry/community project development.
5. Apply knowledge of personal or group branding in a professional context in way that promotes social diversity.
6. Those attending Art of Sound will be able to: Develop, implement and promote Art of Sound activities and projects, guiding and collaborating with students across the Music program to further progress leadership, advanced production and performance skills.

Subject Content

Professional skills and knowledge applied to intercultural communities or industry placements or projects.

Technical and theoretical skills and knowledge applied to individual and collaborative work within managed project outcomes.

Professional communication strategies, including the development of a website with social media/LinkedIn profile connections.

Music business and personal branding knowledge applied to collaborative intercultural events.

Social engagement towards UN cultural diversity aims, especially identity, diversity and pluralism.

PERF 3030 Performing as a Professional Musician

Credit Points 10

Legacy Code 102859

Coordinator John Encarnacao ([https://directory.westernsydney.edu.au/search/name/John Encarnacao/](https://directory.westernsydney.edu.au/search/name/John%20Encarnacao/))

Description Performance as a Professional Musician builds upon preceding units in the Performance sub-major to equip students for performance opportunities in real-world environments. Subject matter canvassed includes arrangement and interpretation, real-world writing about performance, stagecraft and event production. With the guidance of the unit coordinator/tutors, vetted through a professional project proposal process, students will prepare and mount a 30-minute performance project as featured performer. The type of repertoire, instrumentation and personnel will be up to the student and will reflect acquired strengths and aspirations. Through a workshop process, students will be encouraged to refine their performance and to further develop their capacity to give colleagues measured and constructive feedback. Short written tasks reflect real-world expectations of the professional musician in the form of project proposal, program note and festival pitch.

School Humanities & Comm Arts

Discipline Music

Level Undergraduate Level 3 subject

Pre-requisite(s) PERF 3007 OR
PERF 3028 OR
PERF 3025 OR

PERF 2023

Equivalent Subjects LGYA 1102 - Music Performance 6 Repertoire and Identity PERF 3011 - Music Performance Repertoire and Identity PERF 3021 - Repertoire and Identity in Performance

Assumed Knowledge

It is assumed that students can perform at level 3 standard (determined either by having successfully completed some pre-requisite subjects or through an audition process) where they demonstrate musical fluency on chosen instrument/voice/other media.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Conceive, structure and realise a substantial music performance (30 minutes duration) as featured player.
2. Maximise impact of performance through attention to arrangement and/or interpretation.
3. Refine notions of the context of performance practice through real-world written tasks.
4. Refine capacity to incorporate feedback into one's performance practice, and to give constructive feedback on the performances of others.
5. Partake in the mounting of a concert from both onstage and backstage perspectives.
6. Those attending Art of Sound will be able to: Develop, implement and promote Art of Sound activities and projects, guiding and collaborating with students across the Music program to further progress leadership, advanced production and performance skills.

Subject Content

Pitching and realising a major performance project.

Refining a performance project through assimilation of feedback; giving performance feedback to peers.

Writing about one's own performance practice in a professional manner with a variety of outcomes: proposal, program note, pitch. Arrangement and interpretation strategies across a broad range of musics.

Stagecraft and technical issues surrounding music performance, including concert administration.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical	30 minutes	30	N	Individual
Presentation	30 minutes + weekly feedback to peers.	30	N	Individual
Portfolio	1000 words (Proposal) 400 words (Program Note) As required (Festival pitch)	40	N	Individual

Art of Sound	Minimum 2 hours per fortnight	S/U	Y	Individual

PERF 7003 Music Therapy Method

Credit Points 10

Legacy Code 100910

Coordinator Allison Fuller ([https://directory.westernsydney.edu.au/search/name/Allison Fuller/](https://directory.westernsydney.edu.au/search/name/Allison%20Fuller/))

Description Music Therapy Method provides a background to the historical development and theoretical underpinnings of music therapy, with focus on a broad range of music therapy approaches and orientations including Culture-Centred Music Therapy and Nordoff-Robbins Music Therapy. Human development through the lifespan is studied, along with an overview of disability and disorders. The fundamental principles of self-care and supervision for music therapy practitioners and students are introduced within this unit and continued in later units of the Master of Creative Music Therapy course.

School Humanities & Comm Arts

Discipline Music

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1650 Master of Creative Music Therapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Create professional presentations, use critical thinking skills, and engage in active learning methods within the music therapy context.
2. Describe the historical development of music therapy as a profession and demonstrate an understanding of the role of the Australian Music Therapy Association (AMTA).
3. Describe and explain the main tenets of at least 3 music therapy approaches/orientations.
4. Evaluate relevant therapeutic and educational theories in relation to the cognitive, physical, social, emotional and spiritual domains of the person in relation to music therapy practice.
5. Identify key issues relating to people with a disability in Australia and how this affects the delivery of music therapy.
6. Articulate the fundamental principles of self-care and supervision for music therapy practitioners and students.

Subject Content

Music Therapy Overview: Historical perspective, Areas of practice, Australian Music Therapy Association (AMTA) history and purpose.
Human Development Overview: Lifespan development perspectives, including theories of learning and moral reasoning.
Disability and Disorders Overview: Diagnostic and statistical manual V (DSMV), National disability insurance scheme (NDIS), Introduction to therapeutic interventions across the lifespan.
Music Therapy Approaches and Orientations: Overview of music therapy approaches and orientations, underpinnings & methods including Developmental Music Therapy, Nordoff-Robbins Music Therapy, Vocal Approaches, Culture-Centred Music Therapy, Neurologic Music Therapy, and Family-Centred Music Therapy.
Professional issues: Self-Care and supervision for music therapy students and practitioners across their career.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Short Answer	Minimum of 300 words on 10 out of 12 weeks (3000 words in total)	30	N	Individual
Presentation	5 min oral-visual presentation + 5 mins questions and changeover	30	N	Individual
Essay	3,000 words	40	N	Individual
Participation	Attendance at a minimum of 11 lectorials across the semester	S/U	Y	Individual

PERF 7007 Music Therapy Theory and Practice 1

Credit Points 10

Legacy Code 100912

Coordinator Allison Fuller ([https://directory.westernsydney.edu.au/search/name/Allison Fuller/](https://directory.westernsydney.edu.au/search/name/Allison%20Fuller/))

Description This unit focuses on the delivery of music therapy to infants, children and adolescents with various approaches and settings being explored across the semester. There is an emphasis on the eclectic music therapy approach and how current psychotherapy approaches, practice approaches and music therapy approaches can be successfully combined to meet the therapeutic needs of the music therapy participant/s. An introduction to music therapy research, with particular attention to writing a literature review, is included. The Australian Music Therapy Association (AMTA) standards of practice are overviewed and explored through active group work. In addition, musical analysis, teamwork approaches, creative arts therapy models and group work in music therapy are also explored.

School Humanities & Comm Arts

Discipline Music

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) PERF 7003

Restrictions

Students must be enrolled in 1650 Master of Creative Music Therapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Create professional online presentations, use critical thinking skills, and engage in active learning methods within the music therapy learning context.
2. Identify current therapy orientations and apply practice approaches and music therapy approaches through the development of an eclectic music therapy approach.
3. Identify key considerations and methods in the delivery of music therapy to infants, children and adolescents across a range of settings.
4. Conduct a focused literature review on one major music therapy approach/orientation, with an application to either infants, children or adolescents.
5. Identify and describe the Australian Music Therapy Association (AMTA) standards of practice and explain the purpose of the AMTA code of ethics.
6. Describe and explain the areas of creative arts therapy, team work models and group work models in relation to music therapy with infants, children and adolescents.

Subject Content

Music Therapy Approaches and Orientations: The eclectic music therapy approach and the integration of current therapeutic orientations and practice approaches.

Music Therapy Population/Settings: Focus on music therapy with infants, children and adolescents across a range of settings including education, health and community.

Music Therapy Literature Review: Introduction to music therapy research methods with a focus on writing a music therapy literature review.

AMTA Standards of Practice: Music therapy referral, assessment, planning, implementation, evaluation, documentation and termination with a focus on infants, children and adolescents.

Musical Analysis: Principles, elements, techniques and the application of musical analysis to music therapy practice.

Music & The Brain: Introduction to music psychology and overview of how music affects the brain.

Music Therapy Approaches and Orientations: Receptive methods of music therapy, with focus on guided imagery and music.

Assessment

PERF 7009 Music Therapy Skills & Practice A

Credit Points 20

Legacy Code 102800

Coordinator Allison Fuller ([https://directory.westernsydney.edu.au/search/name/Allison Fuller/](https://directory.westernsydney.edu.au/search/name/Allison%20Fuller/))

Description This unit focuses on the development of therapeutic music skills to support the delivery of music therapy to individual and group participants ranging in age from infants to the elderly. Students learn, practice and demonstrate a diverse range of skill sets that can be applied within their SiMPrac field work or Practicum Placement as appropriate. This unit utilises active learning methods within a lectorial format and addresses focus areas including: methods; goals; technology; culture and improvisation.

School Humanities & Comm Arts

Discipline Music

Student Contribution Band HECS Band 2 20cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects PERF 7005 - Music Therapy Skills 1

Restrictions

Students must be enrolled in 1650 - Master of Creative Music Therapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Employ critical thinking strategies in applying music therapy practical skills to in-class active learning scenarios and real-world placement settings with a focus on: skills, repertoire, and improvisation frameworks for guitar, piano, voice, and more
2. Explain the application of the Australian Music Therapy Association (AMTA) Standards of Practice and apply them to in-class active learning scenarios and real-world placement settings for individual and group music therapy participants
3. Describe and reflect on experiences and learnings from SiMPrac (1st Year) or RMT Placement (2nd Year)
4. Produce original songs/musical pieces that can be applied to music therapy for individual and group participants within in-class active learning scenarios and real-world placement settings
5. Apply knowledge of: the Orff Music Therapy approach, Electronic music technologies (EMTs); Culture-centred practice; and Augmentative and Alternative Communication (AAC) within in-class active learning scenarios and real-world placement settings
6. Demonstrate a student novice (1st Year) or student advanced beginner (2nd Year) level of music therapy skills within one of the following methods: Improvisational; Re-creative; Compositional; and Receptive

Subject Content

1st Year Students: Simulated Music Therapy Practicum (SiMPrac): 160 hours of online modules & activities; weekly small group supervision with an RMT; repertoire portfolio development; and field work.

2nd Year Students: Music Therapy Placement with a Registered Music Therapist: 160 hours of placement in a clinical, educational, community or other setting as considered appropriate.

Therapeutic Music Skills: Skills, repertoire and improvisation frameworks for guitar, piano, voice, plus more!

Songwriting/Composition Focus: Composing original songs/music for individuals and/or groups within music therapy practice.

Methods Focus: Applications music therapy approaches across the lifespan including creative arts therapy.

Goals Focus: Music therapy for addressing the development of either communication, physical, social/emotional or cognitive goals.

Technology Focus: The use of various forms of technology within music therapy practice.

Culture Focus: Addressing cultural needs within music therapy practice with a focus on one culture

Improvisation Focus: Free, guided and structured improvisation frameworks, for individual and group applications.

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Professional Placement Performance	160 hours	40	Y	Individual
Applied Project	Between 35 to 70 bars fully scored, and 500 words	30	N	Individual
Practical		30	N	Individual
Participation	Attendance at a minimum of 11 lectorials across the semester	S/U	Y	Individual

Coordinator Allison Fuller ([https://directory.westernsydney.edu.au/search/name/Allison Fuller/](https://directory.westernsydney.edu.au/search/name/Allison%20Fuller/))

Description This unit focuses on the development of therapeutic music skills to support the delivery of music therapy to participants ranging in age from infants to the elderly. Students practice and demonstrate a diverse range of skill sets that can then be applied within their practicum placement as a major component of this unit. Considerations when planning and delivering individual and group programs are explored, along with technology, composition and cultural issues within music therapy. This unit utilises active learning techniques within a lectorial format.

School Humanities & Comm Arts

Discipline Music**Student Contribution Band** HECS Band 2 20cp**Level** Postgraduate Coursework Level 7 subject**Equivalent Subjects** PERF 7001 - Creative Music Therapy Practicum 1**Restrictions**

Students must be enrolled in 1650 - Master of Creative Music Therapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Employ critical thinking strategies in applying music therapy practical skills to in-class active learning scenarios and real-world placement settings with a focus on: skills, repertoire, and improvisation frameworks for guitar, piano, voice and more.
2. Explain the application of the Australian Music Therapy Association (AMTA) Standards of Practice and apply them to in-class active learning scenarios and real-world placement settings for individual and group music therapy participants.
3. Describe and reflect on experiences and learnings from RMT Placement (1st Year) or Independent Placement (2nd Year).
4. Produce written case study reports based on individual and/or group participants within in-class active learning scenarios and real-world placement settings.
5. Apply knowledge of: the Guided Imagery in Music (GIM) approach; Electronic music technologies (EMTs); Culture-centred practice; and Therapeutic repertoire portfolios within in-class active learning scenarios and real-world placement settings.
6. Demonstrate a student novice (1st Year) or student advanced beginner (2nd Year) level of music therapy skills within one of the following methods: Improvisational; Re-creative; Compositional; or Receptive.

Subject Content

Music Therapy Placement: 160 hours of placement in a clinical, educational, community or other setting considered appropriate.

Therapeutic Music Skills: Skills, repertoire and improvisation frameworks for guitar, piano, voice and additional instruments.

Methods and Applications: For addressing the development of communication, physical, social or emotional goals with individual or group music therapy participants.

Approaches and Orientations: Techniques for use within specific music therapy approaches and orientations.

Music Technology: Tools, apps & software to build musicianship skills for use within music therapy delivery.

Culture-Centred Music Therapy: Repertoire and considerations appropriate for a specific cultural group/s.

Case-study report writing: based on the needs of individual and/or group music therapy participants.

PHIL 1001 Ethics and Philosophy

Credit Points 10

Legacy Code 101915

Coordinator John Hadley ([https://directory.westernsydney.edu.au/search/name/John Hadley/](https://directory.westernsydney.edu.au/search/name/John%20Hadley/))

Description This unit introduces students to ethical enquiry - the ways in which we explain what is right and wrong behaviour, perceive good and evil, and try to deal with the different values people hold. Philosophy has long traditions of debating ethical matters, and offers perspectives for trying to answer our ethical questions: this unit introduces the most important and established of those fundamental perspectives, and explains how they arose in their social and historical contexts. The philosophical material will be also be explored through practical examples and questions from contemporary life, in order to enable students to consider ethics today and the sorts of issues they might face.

School Humanities & Comm Arts

Discipline Philosophy

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify basic concepts of good, justice, proper moral duty according to the major Western ethical perspectives studied
2. Analyse opposing ethical commitments using suitable philosophical concepts.
3. Explain the basic goals of major ethical perspectives and their application to human social life.
4. Demonstrate sound reasoning on ethical problems.
5. Compose sound written argument on ethical issues

Subject Content

- . Introduction to the ancient roots of ethical enquiry in belief systems such as religion and moral codes, the emergence of schools of ethics in ancient Greece, and key perspectives, such as hedonism, stoicism, Epicureanism, Eudaimonism
- . Controversies and opposing definitions of what ethics means for human societies - with an introduction to meta-ethical perspectives
- . The development of key concepts of the good, the just, proper moral duty and their opposites or contraries in different ethical perspectives
- . The fundamental concepts in virtues-based, deontological, consequentialist, subjectivist, naturalist, egoistic ethical views
- . Basic techniques of ethical argumentation, problems and limitations of this sort of philosophical reasoning
- . Traditional renderings and contemporary examples of major ethical problems and questions

Assessment

PHIL 1002 Hadith: The Prophetic Tradition

Credit Points 10

Legacy Code 102296

Coordinator Vassilios Adrahtas ([https://directory.westernsydney.edu.au/search/name/Vassilios Adrahtas/](https://directory.westernsydney.edu.au/search/name/Vassilios%20Adrahtas/))

Description The Islamic canon is comprised of two chief sources: Qur'an and Hadith. Muslim life is governed by the manner in which these are understood and applied to the everyday. Whilst the Qur'an is the foundational corpus of the religion, it does not provide specifics on many facets of social and political activity. For this, Muslims rely on sunnah: "habitual practice", which is the body of traditional social and legal custom and practice of the Islamic community. The specialised documentation of Hadith (sayings or actions attributed to the Prophet) made this body of text a reliable and favoured method of knowing the sunnah of the Prophet Muhammad. In this unit students will explore the origin and development of hadith, its sources, and function in Muslim life.

School Humanities & Comm Arts

Discipline Religious Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the role of Hadith in Islamic tradition
2. Identify key issues and concepts in relevant academic literature
3. Analyse and think critically about related scholarly debates
4. Survey the origin and development of Hadith
5. Examine the different canonical collections of Hadith.
6. Comprehend the application of Hadith to Everyday Muslim life.

Subject Content

- Contextualising Hadith in Islamic history and sociology
- Hadith and Sunnah
- Hadith and Qur'an
- The canonical collections of Hadith
- The role and function of Hadith
- The development of The Prophetic tradition
- literary criticism and analysis
- Hadith in contemporary society

Assessment

PHIL 1003 Hadith: The Prophetic Tradition (WSTC)

Credit Points 10

Legacy Code 700161

Coordinator Kathy Gooch ([https://directory.westernsydney.edu.au/search/name/Kathy Gooch/](https://directory.westernsydney.edu.au/search/name/Kathy%20Gooch/))

Description Islam is a way of life which is governed by the Qur'an, the Muslim principal source of guidance. However, while the Qur'an is the foundation of authority in Islam, it provides few legal injunctions. Hadith (the saying, deeds and actions of Prophet Muhammad) forms the basis for the details of Islamic law and for many tenets of Islamic creed. This unit introduces students to the second most fundamental source of Islam, Hadith. It aims to familiarise students with the origins of the Hadith, its overall structure, content and importantly, its function in Muslim living and to assist them in understanding contemporary issues and debates surrounding Islam.

School Humanities & Comm Arts

Discipline Religious Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects PHIL 1002 - Hadith The Prophetic Tradition

Restrictions Students must be enrolled at Western Sydney University, The College. Students enrolled in Extended Diplomas must pass 40 credit points from the preparatory subjects listed in the program structure prior to enrolling in this University level subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. After successful completion of this Unit, students will be able to:
2. Demonstrate comprehension of the Prophetic Tradition ? Hadith.
3. Identify key issues and concepts in the literature.
4. Analyse scholarly debates surrounding the Hadith.
5. Examine the origins and development of Hadith.
6. Discuss the terms Isnad and Matn and their place in understanding of the Hadith.
7. Assess the similarities and differences between the six canonical collections of Hadith.
8. Explore the relevance and importance of Hadith in Muslim everyday living.

Subject Content

1. What is Hadith? The Meaning.
2. Defining Sunnah.
3. The use of the word Hadith and its relation to Sunnah.
4. The genesis and development of Hadith.
5. The historical value of Hadith.
6. Collection, classification, categorisation, standardisation and compilation of Hadith.
7. The six canonical collections of Hadith.
8. The relationship between Qur'an and Hadith.
9. Hadith as a source of morals, ethics, doctrine and law.
10. The function of Hadith in Islamic law and theology.
11. The orientalist and the criticism of Hadith.
12. Hadith and Muslim everyday living.
13. Hadith and modernity.

PHIL 1004 Introduction to Logical Thinking

Credit Points 10

Legacy Code 101189

Coordinator Craig Mcgarty ([https://directory.westernsydney.edu.au/search/name/Craig Mcgarty/](https://directory.westernsydney.edu.au/search/name/Craig%20Mcgarty/))

Description This unit introduces psychology students to the basic aspects of reasoning and argument, with particular emphasis on psychological and scientific thinking. It aims to help students develop the skills needed to understand and evaluate psychological research and the processes of scientific reasoning, and to present their own ideas and arguments effectively. Topics covered include: barriers to critical thinking; nonrational forms of persuasion; the structure of arguments; the concepts of knowledge, belief, truth, validity, soundness, values; linguistics sources of confusion; evaluating arguments; formal and informal fallacies in reasoning; deduction and induction in science; arguments related to enduring debates and worldviews in psychology.

School Psychology

Discipline Behavioural Science

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects PHIL 1005 - Introduction to Logical Thinking

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the relationship between logical thinking and other forms of thinking (APAC Graduate Attribute 1);
2. Explain distinctions between facts, truth, assertions, beliefs, value judgments, etc. and the interdependence of theory and practice in psychology (APAC GA 3);
3. Identify the basic structural components of arguments (premises, conclusions, hidden premises) (APAC GA 3);

- Describe the role of the basic forms of argument (deductive, inductive), and in scientific and psychological theory and research, hypothesis testing, explanation, etc. (APAC GA 3 and 4).
- Criticize arguments in terms of: (i) the concepts of truth, validity, soundness, cogency; (ii) the concept of evidence; and (iii) common errors (formal and informal fallacies) (APAC GA 3);
- Evaluate arguments which arise in the context of debates on the major enduring conceptual issues in psychology, and on the relationship between psychology, philosophy and science (APAC GA 3)

Subject Content

- Logical thinking and psychology
- Ground rules for logical thinking
- Logical thinking and language
- Analysing arguments
- Evaluating arguments
- Conceptual issues in psychology; psychology, philosophy, logic and science
- Evaluating psychological research

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

PHIL 1006 Introduction to Philosophy

Credit Points 10

Legacy Code 101918

Coordinator Mark G. E. Kelly ([https://directory.westernsydney.edu.au/search/name/Mark G. E. Kelly/](https://directory.westernsydney.edu.au/search/name/Mark%20G.%20E.%20Kelly/))

Description This unit is an introduction to Western philosophical inquiry: it looks at fundamental questions we have about the way we think of the world around us, and the way we act. It presupposes no prior knowledge of philosophy. We will examine philosophical issues by looking at classic statements from the philosophical tradition. The unit will also help students to develop their skills in writing clear arguments. After completion of the unit students will have a critical understanding of some of the fundamental ideas that shape our thinking and our world.

School Humanities & Comm Arts

Discipline Philosophy

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

- Discern the different major types of philosophical inquiry
- Identify major philosophical questions and problems establishing the Western tradition, and the most important philosophers responsible
- Exercise sound philosophical reasoning to an undergraduate standard
- Analyse opposing philosophical positions to an undergraduate standard
- Compose sound philosophical arguments to an undergraduate standard

Subject Content

- Introduction to the different types of philosophical inquiry
- Introduction to some of the major problems and questions guiding philosophers and establishing the Western Philosophical tradition in ancient and early modern times
- Basic components of philosophical reasoning
- Basic definitions of key philosophical terms, problems of divergent understandings and interpretive differences
- The nature of philosophical argument and dialogue between philosophers of differing philosophical views

Coordinator Chris Fleming ([https://directory.westernsydney.edu.au/search/name/Chris Fleming/](https://directory.westernsydney.edu.au/search/name/Chris%20Fleming/))

Description What does it mean to live a "good life"? One conception of philosophy that goes back to the teachings of the ancient Greeks and Romans is that it is the discipline pre-eminently concerned with teaching people how to live a good life. This unit will investigate the idea of "the good life" through an examination of select texts in ancient and modern philosophy. It will address questions that both ancient and modern philosophers have grappled with: on the right relation between reason and emotion, on the role of pleasure in human life, on the development of character, on the "care of the self," and on pursuing a meaningful life.

School Humanities & Comm Arts

Discipline Philosophy

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Engage with a small selection of foundational philosophical texts to perform a rudimentary analysis of their argumentation.
2. Demonstrate a basic understanding of the major figures, movements, and themes of Ancient Greek and Roman ethics as these relate to "the good life."
3. Recognise and utilise methods of conceptual analysis as this pertains to ethical thought, including the identification of arguments and the assessment of the evidence put forward to support theses.
4. Demonstrate their capacity to form an extended written argument on a topic of philosophical import.

Subject Content

- . Basic concepts of Ancient Greek and Roman ethics
- . Aspects of medieval and modern moral philosophy, especially as these pertain to the notion of eudaimonia ("the good life") and the relation between reason and the passions.
- . The notion of "care of the self"
- . The theory of the virtues as this appears in both western (eg. Aristotelian) and non-western (eg. Confucian) philosophy

Credit Points 10

Legacy Code 101867

Coordinator John Hadley ([https://directory.westernsydney.edu.au/search/name/John Hadley/](https://directory.westernsydney.edu.au/search/name/John%20Hadley/))

Description This unit introduces students to time-honoured ethical questions and controversies. The issues to be examined point to questions that students are likely to face at some stage during their lives: Is death always a bad thing? Is abortion immoral? Are we obligated to give to charity? Should we be vegetarian? Should you have sex outside of a committed relationship? Is ethics founded upon religion, reason or community standards? As well as examining specific issues, students will be introduced to the leading secular and theistic ethical theories.

School Humanities & Comm Arts

Discipline Philosophy

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate their understanding of the major positions and issues in the field of practical ethics
2. Critically evaluate ethical theories and arguments
3. Develop their own arguments and positions on ethical issues with clarity and rigour

Subject Content

. The foundations of right and wrong: Is ethics based on religion, reason or cultural standards? Are ethical judgments true or false?

. Survey of rival ethical theories: consequentialism, deontology, virtue theory, post-analytic ethics.

. The harm of death and the ethics of killing: abortion, euthanasia, animals, killing in self-defense and war

. Giving to charity and duties of assistance

. Non-anthropocentrism: animal rights; the moral significance of ecosystems, species, trees and other non-sentient forms of life

. Interpersonal ethics: abstinence and sex before marriage; marriage; gay marriage; having children, surrogacy

. Freedom of Speech: The contemporary relevance of Millian free speech theory; recent free speech controversies - pornography, Islamic extremism, pro-anorexia and contemporary art; the internet and free speech ideals

PHIL 2014 Thinkers That Changed the World

Credit Points 10

Legacy Code 102571

Coordinator Dennis Schmidt ([https://directory.westernsydney.edu.au/search/name/Dennis Schmidt/](https://directory.westernsydney.edu.au/search/name/Dennis%20Schmidt/))

Description This unit involves detailed study of a thinker whose work has had a significant influence on how we understand the world. The unit will focus on the thinker's important primary texts, and any other writings that aid an understanding of their contribution to philosophical tradition, ethics, politics, and culture in general. Students will study how the philosopher's ideas have been original, and influenced others to see the world and themselves in new ways. A different philosopher will be the focus of study each year. Thinkers that may be studied in depth include Plato, Aristotle, Hume, Locke, Spinoza, Kant, Kierkegaard, Hegel, Marx, Nietzsche, Arendt, Foucault, Derrida and Girard.

School Humanities & Comm Arts

Discipline Philosophy

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects PHIL 2006 - Key Philosophers PHIL 2005 - Case Studies in Philosophy Thinker

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the major philosophical arguments in the texts studied.
2. Discuss the philosophical reasoning employed
3. Outline the importance of the philosopher and texts to philosophical tradition
4. Evaluate the major achievements and any significant problems generated from the philosopher's contributions
5. Identify relevant cultural and social contexts of the philosopher and texts
6. Compose sound philosophical argument to undergraduate standard

Subject Content

Concentrated engagement with a Western Philosophical thinker

Close reading of philosophical texts by a single philosopher

Study of relevance of the philosopher to philosophical tradition, culture, society

Critical study of achievements and/or problems of their philosophical position

Situating the philosopher in relevant cultural and social contexts

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

PHIL 2015 Thinking Cinema

Credit Points 10

Legacy Code 101989

Coordinator Alex Ling ([https://directory.westernsydney.edu.au/search/name/Alex Ling/](https://directory.westernsydney.edu.au/search/name/Alex%20Ling/))

Description Through close examinations of key philosophical and theoretical writings on film, this unit considers the many ways in which cinema has been 'thought' throughout its short history. Incorporating ontological, phenomenological, psychoanalytic, poststructuralist, cognitivist and other approaches, the unit explores the ways in which key philosophical and theoretical concepts have been taken up and addressed by film, in addition to considering the ways in which cinema can be seen to 'think' for itself.

PHIL 2016 Truth and Knowledge

Credit Points 10

Legacy Code 101983

Coordinator Paul Alberts-Dezeeuw ([https://directory.westernsydney.edu.au/search/name/Paul Alberts-Dezeeuw/](https://directory.westernsydney.edu.au/search/name/Paul%20Alberts-Dezeeuw/))

Description Attaining knowledge and defining truth are fundamental concerns for all university studies. Philosophy has a long history of explaining what constitutes truth, and how we know what counts as legitimate knowledge. This unit introduces students to the most important conceptions of truth and knowledge, and explains the fundamental methods of reasoning and testing knowledge claims established through the Western philosophical tradition. It should be useful to both students specialising in philosophy, and those interested in discovering more about how knowledge is justified and standards of truth established.

School Humanities & Comm Arts

Discipline Philosophy

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify basic approaches to epistemology in the Western tradition as covered in unit
2. Explain differences between basic types of reasoning

3. Identify major conceptions of truth from the Western philosophical tradition
4. Analyse claims to knowledge in terms of general principles of validity
5. Describe the major sceptical doubts and problems in epistemology
6. Compose sound philosophical argument

Subject Content

- . Major epistemological statements of the Western philosophical tradition: can include the texts of Plato, Aristotle, St Aquinas, Bacon, Descartes, Spinoza, Vico, Hume, Locke, Kant, Hegel, Nietzsche, Freud, James, Wittgenstein, Heidegger, Quine, Sellars, Popper, Kuhn, Davidson, Searle, Foucault, Derrida, Rorty or other significant relevant figures.
- . Introduction to selected definitions and debates about the nature of truth from ancients to modernity.
- . Introduction to major methods of reasoning, definitions of crucial concepts, and their emergence in particular philosophical perspectives.
- . Controversies and crucial changes in reasoning, including the rise of empiricism, rationalism and Western scientific protocols in the 17th and 18th centuries.
- . Critical and sceptical approaches to truth and knowledge standards, especially from the 19th century to the current day.
- . Common practical uses of these views on truth and knowledge.

PHIL 3008 Classics of Modern Philosophy

Credit Points 10

Legacy Code 102420

Coordinator Diego Bubbio (<https://directory.westernsydney.edu.au/search/name/Diego+Bubbio/>)

Description Classics of Modern Philosophy introduces students to a selected number of 'great' (highly influential) philosophical texts from the seventeenth up to the twentieth century. Addressing fundamental issues such as human freedom, the nature of truth and knowledge, technological progress, problems of modern life, this unit guides students through key statements with supporting explanation of the philosophers, their projects and careers, and relevant social contexts.

School Humanities & Comm Arts

Discipline Philosophy

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 0902 - Classics of Modern Philosophy

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. identify key philosophical frameworks from the modern era
2. summarise key concepts in the modern philosophical tradition
3. describe enduring philosophical issues from the modern tradition
4. apply skills in argument, reasoning and critical analysis to written work
5. apply skills in reading, understanding and interpretation to primary philosophical texts and commentaries.

Subject Content

The subject will analyse key texts from a variety of philosophical traditions. These might include:

- Continental rationalism (Descartes, Spinoza, Leibniz; problems of methods, the criterion of truth and certainty)
- British Empiricism - Locke, Berkeley, Hume; approaches to knowledge and scepticism
- Kantian and post-Kantian idealism - Kant, Fichte, Schelling, Hegel: gnosological concerns, The relation between self and World
- Nietzsche and influence: Truth and knowledge, nihilism, will to power, The critique of religion and morality, Aesthetic experience, The critique of subjectivity
- Existentialism and Phenomenology - Husserl, Heidegger, Sartre, Camus, Merleau-Ponty, Jaspers, Marcel: Issues on existence, freedom, Individualism, values of life, suicide, political commitment, love, alienation, mind/body distinction
- The Frankfurt school - Adorno, Horkheimer, Marcuse and Issues on rationality, Technology, political domination, Fascism, Critical theory, The Project of enlightenment and Modernity
- Later Heidegger on technology and progress; language and meaning
- Frege, Wittgenstein, AJ Ayer on philosophy and language
- Benjamin on violence and politics, history, Modernity

- DeBeauvoir, Kristeva, Irigaray, on Continental philosophy of sex and gender
- The structuralist innovations - Barthes, Jacobsen, Lacan, Levi-Strauss
- Rosenzweig, Buber, Levinas on ethics and The other

PHIL 3009 Ethical Traditions in Islam

Credit Points 10

Legacy Code 101466

Coordinator Jan Ali (<https://directory.westernsydney.edu.au/search/name/Jan+Ali/>)

Description This unit introduces students to the rich heritage of ethical traditions in Islamic thought. Students will study and critically evaluate the key features and contributions of Muslim theologians, philosophers and Sufis, who attempted to deal with revelation and rationalistic discourse in exploring the meaning of ethical life for Muslims and discussing whether philosophy and religious wisdoms were equals and allies in the pursuit of happiness. The origin and development of these traditions will be introduced with an emphasis on the relevance and application of some ethical issues, such as free will, predestination, human responsibility, and bioethics, to contemporary Muslim societies.

School Humanities & Comm Arts

Discipline Philosophy

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) HUMN 1047 OR LANG 2017

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the key features, methods and contributions of Muslim theologians, philosophers and Sufis in dealing with ethics
2. Discuss the development of ethical traditions in Islam
3. Critically examine the relevance and application of ethical ideas and issues such as free will, predestination, human responsibility, and bioethics to contemporary Muslim societies.

Subject Content

This subject introduces students to the rich heritage of ethical traditions in Islamic thought. Students will have the opportunity to study and critically evaluate the key features and contributions of Muslim theologians, philosophers and Sufis. The students will learn the relevance and application of some ethical issues, such as free will, predestination, human responsibility, and bioethics to contemporary Muslim societies.

Prescribed Texts

- A Subject Reader (comprised of relevant extracts from leading and contemporary scholarship/primary sources on the topic)

PHIL 3010 Philosophies of Love and Death

Credit Points 10

Legacy Code 100275

Coordinator Charles Barbour ([https://directory.westernsydney.edu.au/search/name/Charles Barbour/](https://directory.westernsydney.edu.au/search/name/Charles%20Barbour/))

Description The Western experience of the fundamental questions of love and death will be examined. What is love? Is love between friends more important than romantic love? Is death always a bad thing? Is 'coming to terms with death' important for a meaningful life? Ancient Greek, Christian and medieval attitudes will be contrasted with romantic and contemporary views.

School Humanities & Comm Arts

Discipline Philosophy

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe Western philosophies of love and death
2. Read and critically analyse primary texts which deal with these questions
3. Apply these readings to current events

Subject Content

1. Ancient Greek ideas about love, friendship and death. The distinction between eros, agape, and philia. Plato's Symposium, and Epicurus's view that death is not a bad thing.
2. Medieval and Christian ideas about love.
3. Romantic love and suicide: Goethe. Wollstonecraft's Enlightenment critique. Love as a component of wellbeing and necessary for a meaningful life.
4. Contemporary views about the nature of love: love as a feeling, distinctive attitude, or union?
5. Theories about the harm of death.
6. Theories about friendship and caring and the moral importance of each relationship.

PHIL 3012 Philosophy and Environment

Credit Points 10

Legacy Code 102417

Coordinator John Hadley ([https://directory.westernsydney.edu.au/search/name/John Hadley/](https://directory.westernsydney.edu.au/search/name/John%20Hadley/))

Description Philosophy and Environment focuses on how we understand and value our interactions with the natural environment, how humans have changed the world and themselves through those interactions and the questions and problems created through that dynamic. Contemporary issues such as climate change, resource depletion, land degradation, conflict over resources, and treatment of animals have become prominent ethical, political and philosophical concerns. This unit looks at these sort of environmental problems through philosophical methods that reveal the traditions of thought, attitude and action underlying them. Students will be introduced to the major approaches and questions most relevant to explaining contemporary environmental problems.

School Humanities & Comm Arts

Discipline Philosophy

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects PHIL 2007 - Philosophy and Environment

Restrictions Successful completion of 60 credit points in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify major philosophical views on Nature
2. Evaluate philosophical reasoning on environmental issues
3. Apply basic philosophical analysis to environmental issues
4. Analyse philosophical perspectives on animals
5. Evaluate environmental ethical and political value commitments.

Subject Content

1. Philosophical traditions of understanding nonhuman nature, the environment, the human place within and/or distinction from these - focus on Western traditions
2. Analysis of central terms, explanations from philosophy.
3. How philosophy of environment relates to other philosophies.
4. Central problems and questions: valuing nature, ethical positions, political programs; anthropocentrism vs alternatives

- Understanding human cognitive, emotional, affective relations with animals, plants, the earth, oceans, and the atmosphere as philosophical topics.
- Interpreting major texts from philosophy, literature, and the Humanities that have provided important or influential statements on philosophy and environment.
- Interpreting major philosophers of environment

PHIL 3015 Philosophy of History

Credit Points 10

Legacy Code 102493

Coordinator Jennifer Mensch ([https://directory.westernsydney.edu.au/search/name/Jennifer Mensch/](https://directory.westernsydney.edu.au/search/name/Jennifer%20Mensch/))

Description What is History? This question has been an object of inquiry as much for philosophers as for historians themselves. Large historical forces were at work in the Enlightenment—both in the sciences and in politics—and philosophers like Rousseau and Kant sought to understand these movements philosophically. For Rousseau, the lens was genealogical as he worked to produce a "natural history" of politics and society; for Kant, the historical lens was teleological as he narrated instead a philosophical history full of notions of progress and improvement. In the 19th century, philosophers like Hegel and Marx were concerned to think about history as a dialectical movement, while Nietzsche applied Darwin's new theory of evolution to his understanding of history and morals alike. The great shockwaves wrought by the two World Wars of the 20th century brought new philosophical writers to the problem of history, though now with an eye back toward the seemingly failed vision of inevitable progress so successfully peddled by the Enlightenment. This philosophical tradition and its changing approaches to history will be the focus of this unit.

School Humanities & Comm Arts

Discipline Philosophy

Student Contribution Band HECS Band 4 10cp

PHIL 3016 Philosophy of Religion

Credit Points 10

Legacy Code 101965

Coordinator Daniele Fulvi ([https://directory.westernsydney.edu.au/search/name/Daniele Fulvi/](https://directory.westernsydney.edu.au/search/name/Daniele%20Fulvi/))

Description This unit examines central issues in the philosophy of religion. Students will look at a variety of ideas emanating from a philosophical consideration of religious belief and practice. Issues include arguments for and against the existence of God, conceptions of religious experience and faith, the relationship between science and religion, and religion and ethics.

School Humanities & Comm Arts

Discipline Philosophy

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Read representative philosophical texts and perform analysis of their argumentation
- Demonstrate an understanding of themes and arguments central to philosophy of religion

- Use methods of conceptual analysis as these pertain to philosophy of religion
- Produce an extended written argument on a topic of philosophical import

Subject Content

- Religious diversity
- Conceptions of God (in monotheism) or ultimate reality (in non-theistic religion)
- Arguments for and against the existence of God: ontological, cosmological, and teleological arguments
- Religious experience
- Faith, reason, and evidence
- Religion and ethics
- Science and Religion
- Miracles, prayer, and revelation
- Continental philosophy of religion
- The self, soul, and post-mortem existence
- Religion and the environment
- Religion and gender
- Religious experience
- The Problem of evil
- Postcolonial and feminist approaches to philosophy of religion

Coordinator Penelope Rossiter ([https://directory.westernsydney.edu.au/search/name/Penelope Rossiter/](https://directory.westernsydney.edu.au/search/name/Penelope%20Rossiter/))

Description This unit introduces students to key theorists, concepts, and debates in socio-cultural studies of embodiment. The first module introduces the field of study and explores influential perspectives on bodies as biocultural and social. The unit explores topics such as the social brain, culture and the senses, the modern 'civilised' body, sexed and racialised bodies, ableism and bodily diversity. It will demonstrate how even colonialism, multiculturalism and socio-economic inequalities are lived on the skin, in the body and through the senses. The second module explores current debates and body politics and the content is determined in collaboration with enrolled students. The topics can be as diverse as digital self-tracking; 'fat wars'; race and cosmetic surgery; bodies as commodities, and; sexual difference and sport.

School Humanities & Comm Arts

Discipline Philosophy And Religious Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYC 1291 - Gender Culture and the Body LGYA 0293 - The Body in Culture

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain key concepts in the study of the body in culture.
2. Respond in an informed and critical way to contemporary debates about body politics.
3. Research, explain, and facilitate discussion of a current debate or social problem concerning the body.
4. Collaborate with others on a group project.

Subject Content

Biology and culture: dualism and critiques of dualism

Brains: biocultural, social and plastic

The lived body: surfaces and depths

Skin and the bounded body: power, representation and experience

The modern body and its others: the civilised, uncivilised, disciplined, grotesque and carnivalesque

Culture and multisensory embodiment

Diverse bodies, ableism and the social model of disability

Contemporary debates and body politics

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Portfolio: Concepts Portfolio	1250 words (5 x 250 words)	25	N	Individual
Applied Project: Group Research Project with individually assessable components. Project includes research, presentation, discussion facilitation (20%), and (individual) written report (30%)	Group part: Presentation - 15 minutes, Discussion facilitation - 30 minutes, Wrap-up - 5 minutes / Individual part: Report - 1500 words	50	N	Both (Individual & Group)
Reflection: Written responses to the research questions devised and explored in the Applied Projects	1200 (3 X 400) words	25	N	Individual

PHIL 3018 Philosophy of Race and Racism

Credit Points 10

Legacy Code 102789

Coordinator Jennifer Mensch ([https://directory.westernsydney.edu.au/search/name/Jennifer Mensch/](https://directory.westernsydney.edu.au/search/name/Jennifer%20Mensch/))

Description This unit focuses on philosophical approaches to race and racism. Academic discourse about race sits at the intersection of overlapping research programs taking place in a number of fields including cultural anthropology, the history of science, sociology, political theory, communication studies, and critical philosophy of race. This unit will draw on discussions from a number of these fields. Students will interrogate the ways in which subjects are racialized, both by culture and by the state. They will analyse major texts concerned with race and racism, and examine and critique the role of ignorance within racist discourse.

School Humanities & Comm Arts

Discipline Philosophy

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Assumed Knowledge

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the methodology of critical philosophers of race to interrogate and deconstruct the processes by which subjects are racialized by culture and the state.
2. Analyse major texts in the traditions of political phenomenology, intersectional feminist philosophy, and African American existentialism.
3. Use standpoint epistemology to diagnose and reframe the epistemologies of ignorance at work in racist discourse.

Subject Content

African American existential philosophy
Political Phenomenology
Philosophy of Race and the State
Intersectional Feminist Philosophy
Standpoint Epistemology
Epistemologies of Ignorance
Aboriginal sovereignty

PHIL 7001 Advanced Research Project in Philosophy

Credit Points 10

Legacy Code 102617

Coordinator Dimitris Vardoulakis ([https://directory.westernsydney.edu.au/search/name/Dimitris Vardoulakis/](https://directory.westernsydney.edu.au/search/name/Dimitris%20Vardoulakis/))

Description Advance Research Project in Philosophy enables students with significant knowledge in philosophy and some experience in research techniques and methodologies in philosophy to plan and draft a philosophical project. By identifying a significant question suitable for graduate-level research, students will each develop an individual written project that articulates a coherent philosophical perspective. The aim of the unit is to develop students' capacity to employ philosophical vocabularies and specific discourses in an advanced and sophisticated way.

School Humanities & Comm Arts

Discipline Philosophy

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) PHIL 7012

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate advanced and integrated knowledge of distinct varieties of Continental philosophy in their contexts from a wide range of periods and places
2. Explain differences between different philosophical schools and authors
3. Employ appropriate philosophical methodologies and argumentation
4. Demonstrate cognitive, creative and technical skills to generate and evaluate complex concepts as part of extended philosophical arguments
5. Write a detailed work at a high level in a range of critical and philosophical idioms

Subject Content

Identifying a suitable problem for research
Employing philosophical strategies and methods
Compiling bibliographies for research
Reading techniques to work through a bibliography
Developing techniques of advanced philosophical arguments
Structuring long philosophical arguments
Writing strategies for complex argumentation

Assessment

PHIL 7003 History of Ideas

Credit Points 10

Legacy Code 102583

Coordinator Brett Bowden ([https://directory.westernsydney.edu.au/search/name/Brett Bowden/](https://directory.westernsydney.edu.au/search/name/Brett%20Bowden/))

Description Ideas matter. It has been said that "ideas are what men and women live by, and will occasionally die for." If you want to explore and understand the relationship between ideas and actions across a range periods, places and perspectives, then this is the unit for you. The history of ideas is concerned with exploring and understanding the lived experience, the reality of ideas. We consider how the history of ideas can help us to interpret key thinkers and their ideas and how these ideas have shaped societies past and present.

School Humanities & Comm Arts

Discipline Philosophy

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Distinguish between primary documentary historical evidence and secondary theoretical works that explain or interpret;
2. Draw upon primary and secondary sources to understand ideas in historical social and political contexts;
3. Explain why and how ideas matter in the practice of social and political life historically and contemporaneously.

Subject Content

Content will draw from, or elaborate upon, a selection of the following topics:

- Historiography
- conceptual history (Begriffsgeschichte)
- Intellectual history
- Ideology
- The enlightenment
- philosophy of history
- political philosophy
- Dangerous ideas

Assessment

PHIL 7006 Philosophy and Literature

Credit Points 10

Legacy Code 102616

Coordinator Dimitris Vardoulakis ([https://directory.westernsydney.edu.au/search/name/Dimitris Vardoulakis/](https://directory.westernsydney.edu.au/search/name/Dimitris%20Vardoulakis/))

Description The relationship between philosophy and literature is as old as philosophy itself. In fact, philosophy begins and defines itself in Ancient Greece by setting itself apart from literature - specifically, epic and tragic writings - and claiming for itself a more original role in the effort to understand what is true, what matters, and how one should be with others. From Ancient Greece, through Hellenism and the Roman world, and into the Medieval and Modern periods there was an enduring concern in philosophical traditions with literature, literary themes, and questions of style. However, at the end of the Modern period the concern with literature became so pronounced that philosophers began to write literary texts and to experiment with new styles of expression. Beginning with Kierkegaard and Nietzsche, and moving up to Sartre and Camus, this question of the relation of philosophy and literature has become a central concern of many contemporary philosophical traditions. This unit will be devoted to exploring both the history of this relation between philosophy and literature, as well as looking more carefully at various moments in that history.

School Humanities & Comm Arts

Discipline Philosophy

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the major issues and approaches to literature in the history of philosophy
2. Analyse primary texts carefully both in terms of conceptual argumentation and literary form

- Learn hermeneutic skills of interpretation
- Develop skills to identify the relation and differences between philosophy and literature

Subject Content

Unit content will address the following themes in the history of the relation between philosophy and literature:

Theories of literature
The idea of philosophy
Truth and language
Text and Interpretation

Assessment

Teaching Periods

PHIL 7007 Philosophy of History and Politics

Credit Points 10

Legacy Code 102582

Coordinator Jennifer Mensch ([https://directory.westernsydney.edu.au/search/name/Jennifer Mensch/](https://directory.westernsydney.edu.au/search/name/Jennifer%20Mensch/))

Description What is History? What justifies the State? These questions have been an object of inquiry as much for philosophers as for historians and political theorists. Large socio-political forces were at work during the Enlightenment and philosophers like Rousseau and Kant sought to understand these movements philosophically. For Rousseau, the lens was genealogical as he worked to produce a "natural history" of politics and society; for Kant, the historical lens was teleological as he narrated instead a philosophical history full of notions of progress and improvement. In the 19th century, philosophers like Hegel and Marx were concerned to think about history and politics as a dialectical movement, while Nietzsche applied Darwin's new theory of evolution to his understanding of history and morals alike. The great shockwaves wrought by the two World Wars of the 20th century brought new philosophical writers to the problems of history and politics, though now with an eye back toward the seemingly failed vision of inevitable progress so successfully peddled by the Enlightenment. This philosophical tradition and its changing approaches to history and politics will be the focus of this unit.

School Humanities & Comm Arts

Discipline Philosophy

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

PHIL 7008 Philosophy of Nature

Credit Points 10

Legacy Code 102619

Coordinator Dennis Schmidt ([https://directory.westernsydney.edu.au/search/name/Dennis Schmidt/](https://directory.westernsydney.edu.au/search/name/Dennis%20Schmidt/))

Description This unit examines questions and problems concerning the concept of nature or 'naturalness'. What does it mean to call something 'natural' and how are natural things to be distinguished from artificial things or things that are human made? How does technology influence our understanding of nature? What are the ethical implications arising from human relations with the natural world? As well learning time-honoured answers to such questions, students will appreciate the practical relevance of philosophical theorising about nature.

School Humanities & Comm Arts

Discipline Philosophy

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate advanced and integrated knowledge of concepts and principles concerning nature, broadly construed.
2. Explain theories and methods in metaphysics and the study of being.
3. Be able to outline arguments and the main theses in key philosophical texts.
4. Critically evaluate complex information, perspectives, theories and sources.
5. Demonstrate knowledge of the research principles and methods appropriate to the philosophy of nature to address contemporary philosophical problems and debates.

Subject Content

One or more thinkers and philosophical movements in the philosophy of nature still exerting influence on contemporary philosophy. Early modern philosophy, Kant, Hegel, Nietzsche, Phenomenology, Existentialism, Heidegger, Twentieth Century philosophy of nature. Specific thinkers or movements, with reference to contemporary philosophical debates.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

PHIL 7009 Philosophy, History and Interpretation

Credit Points 10

Legacy Code 102620

Coordinator Jennifer Mensch ([https://directory.westernsydney.edu.au/search/name/Jennifer Mensch/](https://directory.westernsydney.edu.au/search/name/Jennifer%20Mensch/))

Description The focus of this unit will be a topic, or range of topics, particularly relevant in philosophy, which will be analysed both in their historical context and through subsequent interpretations by other philosophers or philosophical traditions. The unit will combine the hermeneutic interpretation of texts together with conceptual and argumentative analysis. Close attention will be paid to the language and systematic content of the philosophical issues examined. Moreover, students will be guided in factoring in the historical situation both for the philosopher(s) examined and for us as interpreters.

School Humanities & Comm Arts

Discipline Philosophy

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate advanced and integrated knowledge of distinct varieties of Continental philosophy in their respective historical context.
2. Demonstrate depth of reading and understanding of philosophical topics and their interpretation.
3. Synthesize changing theories, methods, and concepts in philosophy through the interpretative activities of other thinkers through time.
4. Write at a high level in a range of critical and philosophical idioms.

Subject Content

Unit content will include key issues, sets of text, and thinkers that are relevant to the MA in Continental Philosophy. In particular, this subject will be devoted to deepening the students' knowledge of the relation between philosophy, its historical context, and the interpretative/hermeneutic activity.

More specifically, subject content will draw on the following topics:

Philosophy and its historical context

The interpretative nature of philosophy

The transformation of philosophical claims over history

The nature and development of the notion of interpretation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

PHIL 7013 Special Topics in Philosophy

Credit Points 20

Legacy Code 102379

Coordinator Jennifer Mensch ([https://directory.westernsydney.edu.au/search/name/Jennifer Mensch/](https://directory.westernsydney.edu.au/search/name/Jennifer%20Mensch/))

Description The Special Topics in Philosophy unit engages with current debates and developments in philosophy. These contemporary debates will be contextualized within the historical and conceptual framework of the continental tradition of philosophical inquiry. Engagement with contemporary topics in philosophy and the most recent developments in the field will enable students to find what is innovative and original in their own thought and field of research.

School Humanities & Comm Arts

Discipline Philosophy

Student Contribution Band HECS Band 4 20cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate advanced and integrated knowledge of distinct varieties of Continental philosophy in their contexts from a range of periods and places
2. Demonstrate depth of reading and understanding of continental philosophy topics.
3. Synthesize changing theories, methods, and concepts in Continental philosophy
4. Write at a high level in a range of critical and philosophical idioms.

Subject Content

- subject content will include key themes, sets of texts, and figures that are relevant to The M.A. in Continental philosophy
- this subject will be devoted to deepening the students' knowledge of the history of philosophy, their understanding of the complexity of philosophical problems, and the contemporary - especially Continental - forms in which those problems are addressed

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Portfolio - Journal	2000 words (5 x 400)	35	N	Individual
Essay	5500 words	65	N	Individual

Teaching Periods

PHIL 7014 The Image of Thought: Art, Film and Philosophy

Credit Points 10

Legacy Code 102584

Coordinator Alex Ling ([https://directory.westernsydney.edu.au/search/name/Alex Ling/](https://directory.westernsydney.edu.au/search/name/Alex%20Ling/))

Description Working on the assumption that art is capable of exploring philosophical issues in its own right, the unit considers how various arts from poetry to contemporary film help shape our understanding of things like metaphysics, epistemology, ethics and morality.

School Humanities & Comm Arts

Discipline Philosophy

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a critical understanding of the relationship between art and philosophy;
2. Analyse and evaluate a broad range of artistic and philosophical texts;
3. Communicate the relevance of modern art and culture to a range of philosophical concepts and practices (and vice versa);
4. Develop and apply theoretical approaches and research practices to investigate philosophical problems.

Subject Content

The subject focuses on the ways in which art ? and in particular film and the visual arts ? impacts on philosophy. Examples of subject content include:

The Image of Thought: Art Before Philosophy
Lost in Translation: Letter or Image?
Aesthetics versus Inaesthetics
Being: One or Multiple?
Poetics and Epistemology
The Metaphysics of Film
Visualising Ethics and Morality
The Thought of Images: Art as Philosophy

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Seminar presentation	5-10 min presentation and 500 word paper	15	N	Individual
Minor essay	1,000 words	25	N	Individual
Major (research) essay	3,000 words	60	N	Individual

Prescribed Texts

- The Prescribed Text is a Subject Reader which will be constructed prior to semester commencing. The subject is built around individual papers/chapters, hence the use of the Subject Reader and absence of further essential texts.

Teaching Periods

PHIL 7015 Theoretical Philosophy

Credit Points 20

Legacy Code 102615

Coordinator Dennis Schmidt ([https://directory.westernsydney.edu.au/search/name/Dennis Schmidt/](https://directory.westernsydney.edu.au/search/name/Dennis%20Schmidt/))

Description Theoretical Philosophy focuses on theories of knowledge, theories of being, and systems of thought. While it is traditionally described under the heading of epistemology and metaphysics, theoretical philosophy should be more broadly understood as devoted to philosophical investigations into the underlying systems, theories, and presuppositions upon which any account of the world, experience, or even truth has been built. This unit will be devoted to an explication of either thematically related theoretical investigations, such as, for example, '17th-century theories of matter', or 'the nature of language,' or it will focus instead on one central philosophical figure, e.g., 'Plato's metaphysics of the soul,' 'Kant's system of transcendental idealism,' etc.

School Humanities & Comm Arts

Discipline Philosophy

Student Contribution Band HECS Band 4 20cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify major philosophical approaches to theoretical philosophy.
2. Analyse primary texts devoted to theoretical philosophy.
3. Apply basic philosophical analyses to specific questions regarding the nature of reality.

Subject Content

Theories of truth
Theories of being
Theories of human nature
Theories of the soul and the existence of God
Theories of material being
Theories of language

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Portfolio - 4 short responses to questions	2000 words in total (500 words each)	35	N	Individual
Essay - 1 research essay	4,000 words	65	N	Individual

Teaching Periods

PHIL 7016 Topics in the History of Philosophy

Credit Points 20

Legacy Code 102383

Coordinator Dennis Schmidt ([https://directory.westernsydney.edu.au/search/name/Dennis Schmidt/](https://directory.westernsydney.edu.au/search/name/Dennis%20Schmidt/))

Description This unit surveys selected philosophers or philosophical movements in the history of philosophy, and of the relevance of such philosophical perspectives for contemporary debates. The unit will include a selection of material that will give students a deeper understanding of the history of philosophy from Ancient Greece to the present day.

School Humanities & Comm Arts

Discipline Philosophy

Student Contribution Band HECS Band 4 20cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate advanced and integrated knowledge of distinct varieties of Continental philosophy in their contexts from a range of periods and places
2. Explain changing theories, methods, and concept in Continental philosophy
3. Understand complex philosophical texts
4. Critically evaluate complex information, perspectives, theories and sources
5. Demonstrate knowledge of the research principles and methods appropriate to the use of the history of philosophy to address contemporary philosophical problems and debates.

Subject Content

- one or more thinkers and Philosophical movements in The history of philosophy still exerting influence on contemporary philosophy.
- early modern philosophy, Kant, German Romanticism, Hegel, Nietzsche, Phenomenology, Existentialism, Heidegger and Hermeneutics.
- specific thinkers or movements, with reference to other contemporary Philosophical debates.

Teaching Periods

PHIL 7017 What is Islam?

Credit Points 10

Legacy Code 102585

Coordinator Milad Milani ([https://directory.westernsydney.edu.au/search/name/Milad Milani/](https://directory.westernsydney.edu.au/search/name/Milad%20Milani/))

Description The 'Muslim question' has been a topic of interest to Western scholarship for over four hundred years. The unit addresses this question in two ways: firstly, by exploring internal historical conceptualisations of the faith-identity of Islam, and examining how these have shaped modern understandings of Islam from within the faith; secondly, by introducing students to multidisciplinary approaches to the study of Islam and inviting them to consider the construction and deconstruction of Islamic Studies as a field of study at various stages of history. The unit provides students with the opportunity to gain increased awareness of both debates within the field and those that scrutinise the field, that is, becoming comfortable with interrogating

the cluster of theoretical and methodological strategies for scholarly inquiry into the study of Islam.

School Humanities & Comm Arts

Discipline Religious Studies

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify major historical, anthropological, and sociological approaches to the study of Islam.
2. Analyse key texts from scholarship on the study of Islam.
3. Apply reflexive methodologies and theories to reading Islam in modernity.
4. Recognise key influences and changes within Islamic history and in the history of field.

Subject Content

Situating Islam in academic discourse
Historical Islam, imagined Islam, and unknown Islam
Categories and typologies of 'being Islamic'
'Normative Islam' and the 'Authenticity debate'
Understanding Islam: the insider-outsider tension

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Coordinator Ben Kelley ([https://directory.westernsydney.edu.au/search/name/Ben Kelley/](https://directory.westernsydney.edu.au/search/name/Ben%20Kelley/))

Description This unit replaces 700026 - Physics (UWSCFS) from Term 1 2014. This unit provides a brief introduction to the essentials of Physics. This unit is focused on skills and knowledge that students need in their first year of study. Students cover introductory topics in Mechanics, Energy and Power, Electricity and waves.

School Western Sydney The College

Discipline Physics**Student Contribution Band** HECS Band 2 10cp**Level** Undergraduate Level 0 Preparatory subject**Equivalent Subjects** PHYS 0002 - Foundation Physics 1 (UWSC)**Incompatible Subjects** PHYS 0006 - Physics (UWSCFS) PHYS 0005 - Physics (UWSC)**Restrictions** Students must be enrolled at Western Sydney University, The College.**Assumed Knowledge**

Year 10 Mathematics and Science or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use graphical and computer methods to analyse data
2. Identify the characteristics of uniform motion and calculate variables of motion in one dimension
3. Identify the characteristics of uniformly accelerated motion and predict variables of motion based on past or current conditions in one dimension
4. Use Newtonian dynamics to quantitatively analyse objects in equilibrium and acceleration
5. Use the concepts of work and conservation of energy to explain the behaviour of different systems
6. Demonstrate an ability to describe and apply quantitative relationship between charge, current, resistance and electrical power in the combined circuits
7. Quantitatively analyse reflection and refraction of waves
8. Perform experiments to demonstrate and measure physics principles and concepts

Subject Content

1. Mechanics Dynamics and Statics ? SI units and their relationship, addition and subtraction of force vectors, motion in a straight line, graphing motion, Newton's Law of Motion, momentum and impulse, conservation of momentum
2. Mechanics ? Energy and Power ? Work and energy, conservation of energy, power and efficiency
3. Electricity ? Ohm's Law, electric current and circuits, electrical power, using electricity safety
4. Waves ? Description of wave motion, mechanical waves, sound waves

Coordinator Nicholas Tohill ([https://directory.westernsydney.edu.au/search/name/Nicholas Tohill/](https://directory.westernsydney.edu.au/search/name/Nicholas%20Tohill/))

Description Physics is the study of the fundamental nature of matter, energy, space-time, and motion. It uses conceptual, mathematical and experimental tools to achieve this understanding. In this unit, we survey mechanics, electromagnetism, optics and thermal physics, and briefly consider relativity, quantum physics and nuclear physics. Conceptual, mathematical and experimental understanding of physics will be developed, and the use of the tools of physics (e.g. estimation, uncertainty, dimensional analysis) will be introduced. This unit provides non-specialists (e.g. students in other majors and aspiring secondary teachers) with a good basic overview of the subject, and prepares specialist students for further study.

Students enrolled in the Extended Diploma programs (7086 - Diploma in Science Extended, 7087 - Bachelor of Science Extended (WSTC First Year Program) must have passed 40 credit points in order to enrol in this subject. Students enrolled in the combined Diploma/Bachelor programs listed below must pass all

College Preparatory subjects listed in the program structure before progressing to the Year Two subjects.

Assumed Knowledge

HSC Mathematics or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the description of a physical problem, for the topics listed in the contents, and apply a frame of reference or other appropriate mathematical framework to the problem.
2. Explain the physical principles by writing down appropriate equations or other mathematical models such as a geometrical construct to produce a mathematical model of the physical problem.
3. Identify known and unknown variables in a mathematical model of a physical problem and manipulate the model to predict unknown.
4. Interpret results of calculations in terms of real physical world events.
5. Record, present and analyse experimental data.
6. Estimate the errors in a measurement and propagate the effects of these errors through simple calculations.

Subject Content

1. Introduction to Physics: units and measurement.
2. Mechanics: Kinematics in one and two dimensions, velocity, acceleration, vectors; Dynamics, force, mass and Newton's laws; Work, energy, power and the conservation of energy; Linear momentum and the conservation of momentum.
3. Elec

Level Undergraduate Level 1 subject

Equivalent Subjects LGYA 6150 - Physics 2

Assumed Knowledge

HSC 2 Unit Physics or one semester of university level Physics or equivalent plus HSC 2 Unit Mathematics Band 4 (Not General Mathematics) or one semester of university level Mathematics or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the description of a physical problem, for the topics listed in the contents, and apply a frame of reference or other appropriate mathematical framework to the problem
2. Explain the physical principles by writing down appropriate equations or other mathematical models such as a geometrical construct to produce a mathematical model of the physical problem
3. Identify known and unknown variables in a mathematical model of a physical problem and manipulate the model to predict unknown variables
4. Interpret results of calculations in terms of real physical world events
5. Record, present and analyse experimental data
6. Estimate the errors in a measurement and propagate the effects of these errors through simple calculations

Subject Content

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	4x 15 minute quizzes	20	N	Individual
Intra-session exam	80 minutes	10	N	Individual
Final exam	2 hours and 20 minutes	40	N	Individual
Laboratory notebook	3hr lab classes in alternate weeks	30	N	Individual

PHYS 2004 The Cosmos in Perspective: Information and Life

Credit Points 10

Legacy Code 300966

Coordinator Ain De Horta ([https://directory.westernsydney.edu.au/search/name/Ain De Horta/](https://directory.westernsydney.edu.au/search/name/Ain%20De%20Horta/))

Description From the Big Bang to the end of the Universe, from our own Solar System to the farthest superclusters of galaxies, our knowledge of the Universe is growing at an amazing rate. This unit will explore the cosmos at scales from planets to the edge of the visible universe. We develop an appreciation of the processes of science, and an understanding of how astrophysicists know what they know. We will consider cultural perspectives on the cosmos, including that of indigenous Australians. We will consider our place in the cosmos: the requirements for life to exist, and the possibility of other life in the Universe.

School Science

Discipline Astronomy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe and compare scientific and cultural views of the history and nature of the Universe, including indigenous Australian views;
2. Describe the necessary conditions for life and how species evolve and grow to complexity and uses of information theory to understand cosmic evolution;
3. Describe how life depends on energy from the stars;
4. Recognise the significance of solar system dynamics in providing the thermal requirements for life;
5. Discuss modern theories of star and planet formation and evolution, and recognise the types of stars in galaxies;
6. Theorise on the possibilities of other life forms;
7. Discuss the development of consciousness;

8. Postulate on how the universe will evolve, and what this means for the future of life in the universe.

Subject Content

1. Creation and the Universe - scientific and cultural perspectives, including indigenous Australian perspectives,
2. The perspectives of Information and Life. The characteristics of life, how life first appeared on the earth and whether these conditions can be expected to occur on other planets with specific emphasis on computational simulations,
3. Biological evolution, mass extinctions and the limits of life (extremophiles) - computational predictions. The growth of complexity and structure in the universe, and uses of information theory to understand cosmic evolution,
4. The formation of stars and planets and the habitable zones around stars,
5. Different kinds of stars and the light they emit,
6. Whether consciousness arises from elementary interactions between atoms and molecules,
7. Whether computers and robots can be said to be conscious,
8. The final state of the Universe and the implications for any life present,
9. Astrology vs astronomy and The future of life on Earth,
10. Life in space - space travel, Fermi paradox, Schuman effect, Overview effect, SETI, terraforming and UFO.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	10 minutes (per Quiz)	10	N	Individual
Presentation	6 minutes	20	N	Individual
Report	1,300 to 1,500 words	25	N	Individual
Intra-session Exam	60 minutes	45	Y	Individual

PHYS 2005 Classical Physics and Advanced Technologies

Credit Points 10

Legacy Code 301393

Coordinator Timothy Stait-Gardner ([https://directory.westernsydney.edu.au/search/name/Timothy Stait-Gardner/](https://directory.westernsydney.edu.au/search/name/Timothy%20Stait-Gardner/))

Description This unit explains in depth aspects of classical mechanics related to forced and damped oscillations. Physical waves are introduced and formalized by describing applications of the wave equation to mechanical systems and electromagnetic radiation. Interference and diffraction are detailed using electromagnetic fields (physical optics). Main technological applications of mechanical oscillations and electromagnetic waves are also explained, such as the atomic force microscope, laser, optical tweezers and the zeta-sizer.

School Science

Discipline Physics

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) PHYS 1006

Equivalent Subjects LGYA 6024 - Applied Instrumentation in Nanotechnology

Assumed Knowledge

Introductory mechanics: Newton's laws, work, conservation of energy and momentum. Introductory Electrostatics: Electric forces and Coulomb's law; DC electricity, voltage, current, resistance, Ohm's law, electric power, circuit laws. Introduction to Magnetic fields: production by magnets & currents, magnetic forces on currents & charges; Induced EMF, Faraday's law and electrical generators; AC current & voltage, peak & rms values, capacitance and inductance.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain physical principles underlying oscillatory phenomena and major instrument operation.
2. Conduct basic experiments implementing the scientific method.
3. Apply the theoretical principles governing the phenomena under study in a laboratory set-up and the error propagation rules.
4. Analyse the results of study and investigations in written form.
5. Apply safety principles during laboratory experiments.
6. Problem solve and apply critical skills towards scientific hypotheses.
7. phenomena and major instrument operation.

Subject Content

1. The harmonic oscillator
2. The Atomic Force Microscope (AFM)
3. Electric and magnetic fields
4. Optical tweezers
5. Electron beam lithography
6. Electromagnetic oscillations: waves
7. The wave equation
8. Light interference
9. Light interference applied to nano-scale patterns

Credit Points 10

Legacy Code 300916

Coordinator Nicholas Tohill ([https://directory.westernsydney.edu.au/search/name/Nicholas Tohill/](https://directory.westernsydney.edu.au/search/name/Nicholas%20Tohill/))

Description Modern astronomy is strongly driven by large datasets, which require advanced computing procedures to analyse. Students will learn about the science of stars, planets and galaxies; the use of computers in science; and how to formulate and solve challenging problems in modern science using high-level computer skills. These skills are highly transferable to other occupations.

School Science

Discipline Astronomy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Relate modern theories of solar system history to extrasolar planetary systems
2. Analyse stellar datasets to detect and characterise exoplanets
3. Analyse stellar datasets to find evidence of stellar evolution
4. Analyse optical- and radio-astronomical data to create and interpret maps of the Milky Way Galaxy
5. Classify external galaxies and explain the significance of their classification
6. Analyse the structure of the cosmic microwave background and explain its significance

Subject Content

1. Planetary astronomy
2. Stellar Astronomy
3. Exoplanetary Astronomy
4. Galactic Astronomy
5. Extragalactic Astronomy
6. Cosmology
7. Tools and Techniques - Imaging and Mapping
8. Tools and Techniques - Spectroscopy and Datacubes
9. Tools and Techniques - Data acquisition and Data structures
10. Tools and Techniques - Data reduction and fitting

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practicals	Approx. 400 words each	50	N	Individual

PHYS 3006 Classical Physics

Credit Points 10

Legacy Code 301262

Coordinator Timothy Stait-Gardner ([https://directory.westernsydney.edu.au/search/name/Timothy Stait-Gardner/](https://directory.westernsydney.edu.au/search/name/Timothy%20Stait-Gardner/))

Description This unit covers the key components of classical physics to the advanced level expected of a physics major. Newtonian mechanics will focus on realistic problems, in three dimensions and in the presence of friction and drag. Electromagnetism introduces Maxwell's equations, and applies them in the presence of matter. Thermodynamics is presented rigorously, focusing on the most general forms of the first and second laws. We will also introduce the basic elements of statistical physics. Fluids and waves will introduce the basic equations of fluids, and in particular the full (PDE) wave equation and its solution.

School Science

Discipline Physics And Astronomy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) PHYS 1006

Incompatible Subjects CHEM 2003 Classical Physics and Applied Technologies

Assumed Knowledge

Introductory mechanics: Newton's laws, work, conservation of energy and momentum. Introductory Electrostatics: Electric forces and Coulomb's law. Introduction to Magnetic fields: production by magnets & currents, magnetic forces on currents & charges; Induced EMF and Faraday's law. Basic thermodynamic principles of heat, energy and temperature. Mathematics: integral and differential calculus, vectors.

Assessment

PHYS 3007 Quantum Physics

Credit Points 10

Legacy Code 301392

Coordinator Antonio Lauto ([https://directory.westernsydney.edu.au/search/name/Antonio Lauto/](https://directory.westernsydney.edu.au/search/name/Antonio%20Lauto/))

Description The unit builds on quantum concepts that have been introduced in earlier units such Physics 1,2, Nanotechnology and Chemistry. It aims at developing the student's understanding of quantum principles as they apply to hard and soft matter systems, including atoms, molecules and extended arrays such as metal and semiconductors as well as biological tissue

School Science

Discipline Physics

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) PHYS 1002 AND PHYS 1006

Equivalent Subjects LGYA 6033 - Quantum Properties of Chemical Systems

Assumed Knowledge

Mathematics 1A, Mathematics 1B, Physics 1 and Physics 2.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the experimental evidence for a quantum theory
2. Explain the non commutativity of the product of physical magnitudes
3. Provide solutions to quantitative problems in Quantum Mechanics
4. Explain the macroscopic applications of Quantum Mechanics
5. Explain the apparition of a new physical magnitude, the spin, in Relativistic Quantum Mechanics
6. Apply Quantum Mechanics to other disciplines

Subject Content

1. Experimental evidence for quantisation
2. Wave particle duality and uncertainty
3. Introduction to basic quantum mechanical equations, the wave function
4. Solution of the time independent Schrodinger equation
5. Particle in a box, the tunnel effect
6. The harmonic oscillator, The Rotator
7. Angular momentum
8. The hydrogen atom and atomic wave function
9. Introduction to molecular-orbital theory

10. Introduction to quantum computing methods: chemical applications of semi empirical, ab initio and density function methods for molecular modelling

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Laboratory work and lab reports	300-600 words	30	N	Individual
Problems and Questions	300-600 words	30	N	Individual
Final Examination (written)	2 hours	40	N	Individual

PHYS 3008 Biomedical Physics

Credit Points 10

Legacy Code 301459

Coordinator Antonio Lauto ([https://directory.westernsydney.edu.au/search/name/Antonio Lauto/](https://directory.westernsydney.edu.au/search/name/Antonio%20Lauto/))

Description Students completing this unit will be able to apply the principles and practice of physics to advanced biomedical applications, to critically analyse data regarding, and solve problems involving the physics of living systems, and to work with a range of advanced instrumentation. This unit will provide advanced training in biomedical physics and prepare students for career pathways in medical and biomedical physics. The unit content includes concepts of diffusion and Brownian motion; applications of thermodynamics to biological systems and the origin of life; biomolecular self-assembly; nuclear magnetic resonance and magnetic resonance imaging; atomic force microscopy; molecular dynamics simulations; biophotonics; and nuclear and radiation physics in biomedical sciences.

School Science

Discipline Physics

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MATH 1014 AND PHYS 1002

Restrictions Students must have passed 100cps of subjects.

Assumed Knowledge

Knowledge of Mathematics equivalent to Mathematics 1B is recommended, but not required.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate and communicate how physics can be used to understand and manipulate biological systems, and the role and impact of biomedical physics in society.
2. Solve complex problems in the physical sciences by applying critical thinking, analytical and problem-solving skills.
3. Propose innovative solutions to problems and challenges in biomedical systems by integrating knowledge of physics, mathematics, chemistry, biology and other areas of science.
4. Conduct investigations in biomedical physics in a collaborative environment.

Subject Content

1. Diffusion and Thermodynamics of Biological Systems
Brownian motion, dissipation and driving forces, measurement techniques, osmotic pressure, biomolecular self-assembly, the origin and physics of life
2. Bioelectromagnetism
Hodgkin and Huxley nerve conduction model
3. Medical Imaging (MRI)
Sources of contrast, image formation, diffusion-weighted imaging
4. Mechanobiology
Atomic force microscopy, biological rheology
5. Biophotonics
Optics/coherent radiation, photodynamic therapy, fluorescence imaging
6. Nuclear Physics and Ionising Radiation in Biomedicine
PET MRI, MRI linac, radiation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Numerical Problem Solving	2 hours	30	N	Individual
Presentation	15 minutes	20	N	Group
Applied Project	1500 words	20	N	Individual
Viva Voce	20 minutes	30	N	Individual

PHYS 7001 A Cosmic Perspective

Credit Points 10

Legacy Code 301247

Coordinator Ain De Horta (<https://directory.westernsydney.edu.au/search/name/Ain De Horta/>)

Description The unit explores and challenges scientific as well as cultural perspectives on the cosmos, from its composition, expansion and the development and endings of the stars and planets, to life, its limits, evolution and mass extinctions on Earth. The unit also considers the development of consciousness, astrology vs astronomy, expanding horizons, space travel and space exploration.

School Science

Discipline Astronomy

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Knowledge of Mathematics equivalent to 2-unit HSC, and experience with the use of computer software such as Excel or Word would be beneficial. Previous experience of statistics or computer programming will be an advantage but is not essential.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse scientific, historical and cultural views of the sky and the Universe, including those of Aboriginal and Torres Strait Islander peoples.
2. Evaluate the previous generations of life (and species) evolution in relation to Solar system and Galaxy dynamics.
3. Critique modern theories of galaxy, star and planet formation & evolution.
4. Construct and evaluate present hypothesis on the evolution of the Universe and its implications for the future of life and consciousness.

Subject Content

1. How did it all start - scientific and cultural perspectives, including indigenous Australian perspectives;
2. The characteristics of life, how life first appeared on the earth and whether these conditions can be expected to occur on other planets;
3. Biological evolution, mass extinctions and the limits of life (extremophiles);
4. The formation of stars and planets and the habitable zones around stars;
5. Different kinds of stars and the light they emit;
6. The rise of consciousness;
7. How will it all end? - The final state of the Universe and the implications for any life;
8. Astrology vs astronomy;
9. Life in space - space travel and searching for life elsewhere in the universe.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	1 hour	20	N	Individual
Written report	1,300 to 1,500 words	50	N	Individual
Quiz	1 hour	30	N	Individual

Legacy Code 301248

Coordinator Nicholas Tohill ([https://directory.westernsydney.edu.au/search/name/Nicholas Tohill/](https://directory.westernsydney.edu.au/search/name/Nicholas%20Tohill/))

Description The Space Instrumentation, Technology and Communication unit is focussed on the application of space technology in industrial settings. Its main objective is to provide a sound knowledge of the underlying principles which form a thorough basis for careers in space technology, satellite communications and related fields. This unit gives the student grounding in the technologies used in space science. By considering the underlying scientific principles and case studies of the instrumentation used in space, students will not only understand the current state of the art in space science, but also the foundations of the field in order to be able to stay current in this fast-moving field. Content includes but is not limited to: Imaging, Detectors, Principles of Communication, and Principles of Space Technology.

School Science

Discipline Astronomy

Assumed Knowledge

Knowledge of Mathematics equivalent to 2-unit HSC, and experience with the use of computer software such as Excel or Word would be beneficial. Previous experience of statistics or computer programming will be an advantage but is not essential.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Appraise spacecraft, satellite communications, the space environment, space operations and space project management in a line of the future space exploration.
- Evaluate the present optical and microwave transmission technologies, and of communication systems modelling.
- Apply integrated knowledge of a range of subjects relating to spacecraft technology and satellite communications.
- Critique the effectiveness of various types of space instrumentation and space communications including our future endeavours in this area.

Subject Content

This subject gives the student grounding in the technologies used in space science. By considering the underlying scientific principles and case studies of the instrumentation used in space, students will not only understand the current state of the art in space science, but also the foundations of the field in order to be able to stay current in this fast-moving field. Content includes but is not limited to: Imaging, Detectors, Principles of Communication, and Principles of Space Technology.

-Technologies used in space science.

oImaging

oDetectors

oSatellites

oTransport ? including Rockets and Shuttles

-Principles of Communication

-Principles of Space Technology

-Case studies of the instrumentation used in space

-Evolution of the use of technology in space- past and potential

-Adaptability- tools for further learning

Assessment

PHYS 7003 Space Science, Planetary Science and Meteorology

Credit Points 10

Legacy Code 301249

Coordinator Luke Barnes ([https://directory.westernsydney.edu.au/search/name/Luke Barnes/](https://directory.westernsydney.edu.au/search/name/Luke%20Barnes/))

Description This unit examines the six key priorities of the Australian Space Agency: communication, space debris monitoring, navigation and positioning, Earth observation, space technology research and development, and remote asset management. Students will examine the Sun and Solar System, planetary science, meteorology, and the physics of rockets and satellites. Students will explore the interconnections between the Earth land, ocean, atmosphere, and life of

our planet in the era of modern satellite technologies. These include the critical review of our understanding about the cycles of water, carbon, rock, and other materials that continuously shape, influence, and sustain Earth and its inhabitants. Students will also be able to design new models of the cyclical interactions between the Earth system and the Sun, Moon and will discover the fundamental processes which define our Universe and our planet.

School Science

Discipline Astronomy

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Knowledge of Mathematics equivalent to 2-unit HSC, and experience with the use of computer software such as Excel or Word would be beneficial. Previous experience of statistics or computer programming will be an advantage but is not essential.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Scientifically evaluate the overall structure of our cosmic habitat (Earth & its environment).
2. Assess and recommend appropriate solutions to basic problems in modern space physics regarding gravity and radiations including a direct implication of the Sun's future evolution.
3. Appraise the forces that shape the interior, surface and atmospheres of rocky and gaseous (extra) solar planets.
4. Apply integrated knowledge of a range of scientific inventories of the Solar System and the Earth's weather systems in physical terms
5. Assess the basics of modern space rocket design including the next generation of micro satellites.
6. Critique the challenges of launching and maintaining satellites in space.
7. Evaluate large scale climate changes on Earth and other types of planets.

Subject Content

This subject will be organised around providing the necessary scientific background for the six priorities of the Australian Space Agency: communication, space debris monitoring, navigation and positioning, Earth observation, space technology research and development, and remote asset management.

-Introduction to Space Science

oMeasuring the night sky: telescopes, magnitudes and the celestial sphere

oOur cosmic habitat: planets, stars, galaxies and expanding space

oThe physics of space 1: gravity and orbits

oThe physics of space 2: radiation and plasmas

-The Sun

oStructure, nuclear reactions and energy transport

oSolar atmosphere and the solar wind

-The Solar System

oThe planets and their moons

oAsteroids, the heliosphere and the outer solar system

-Planetary Science

oInteriors: pressure, magnetism and heat in rocky and gaseous planets

oSurfaces: plate tectonics, oceans and impacts

oAtmospheres 1: structure and composition

oAtmospheres 2: Sources and transport of energy

-Meteorology

oFluids: temperature, pressure, density

oMoisture and cloud formation

oWeather systems: wind, precipitation and storms

-Getting into space: the physics of rockets

oSpacecraft Design and Fabrication

oLife Support for Human Spaceflight

oTrajectories and the atmosphere

oBasic rocket design: thrust and propellants

-Staying in space: the physics of satellites

oTrajectories and Orbits

oBasic satellite design 1: altitude control, stabilisation, thermal control and shielding

oBasic satellite design 2: detectors, antennae and communicating with Earth

Coordinator Vivienne Chuter ([https://directory.westernsydney.edu.au/search/name/Vivienne Chuter/](https://directory.westernsydney.edu.au/search/name/Vivienne%20Chuter/))

Description This unit will introduce students to the principles of professional development and appropriate requirements to function as a registered podiatrist. As podiatrists may work as a primary provider, as part of a multidisciplinary team, in the public or private health care setting, they require extensive knowledge of many aspects of the management of a practice or business. During seminars, students will be introduced to a number of principles specific to professional, ethical and legal issues associated with working as a podiatrist, and practice and workplace administrative policies and procedures.

School Health Sciences

Discipline Podiatry

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 4018

Co-requisite(s) REHA 4016 AND REHA 4019

Incompatible Subjects REHA 7023 - Podiatric Professional Practice Studies

Restrictions Students must be enrolled in 4708 Bachelor of Podiatric Medicine. The subject is Podiatry specific

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Integrate knowledge of ethical, legal and socio-demographic issues associated with the practice of podiatry.
2. Explain principles of business, employment, taxation, and health and safety relating to health care practice.
3. Explain medicolegal requirements and responsibilities for podiatry practice including the requirements of government departments.
4. Demonstrate skills in interpersonal and inter-professional communication within the context of employment and practice as a podiatrist including job applications and resumes.
5. Build a relationship with government departments, professional associations and companies related to the practice of podiatry.
6. Review in-depth knowledge of a specific area of clinical practice focusing on evidence based practice.

Subject Content

1. Types of Podiatry Practice
 - Private practice - Business plans; Employment/Contracting; Taxation; Practice management
 - public health practice
 - podiatric research
 - podiatric surgery
 - Working overseas
 - podiatry suppliers
2. Medicolegal Requirements and Responsibilities and Professional Associations

- professional Registration
 - Government departments - Department of Veteran Affairs; NSW Podiatry Council
 - health and safety - infection control
 - Insurance - Professional indemnity; Workcover; Property
 - Australian podiatry Association / Australian podiatry Council
3. Ethical and Socio-demographic Issues related to Podiatry Practice
 - Complaints handling
 - socio-Demographic and socio-economic considerations for healthcare
 - multi-disciplinary healthcare
 - evidence based practice
 - interpersonal and inter-professional communication
 4. Job Applications
 - cover letters
 - Answering selection criteria
 - writing resumes
 - self-promotion

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Proposal	1,500 words	50	N	Individual
Two Simulated Job Applications - Written	7 pages – Cover letter (1 page), Selection criteria (up to 3 pages), Resume (up to 3 pages)	50	N	Individual
Attendance at Seminars	30 hours at seminars	S/U	Y	Individual

Legacy Code 100848

Coordinator Drew Cottle ([https://directory.westernsydney.edu.au/search/name/Drew Cottle/](https://directory.westernsydney.edu.au/search/name/Drew%20Cottle/))

Description In 2013 this unit replaced by 101973 - Australian Politics. This unit provides an introduction to Australian Politics. It outlines the central features of the federal political system with attention to both historical background and current debates. In addition to study of the institutional frameworks (the Constitution, parliament, political parties and so on), the unit examines the dynamics of inclusion and exclusion that have shaped Australian politics. It explores what it has meant in the past, what it means in the future, for Australians to live together as members of a political community.

Legacy Code 101956

Coordinator Margaret Hanlon ([https://directory.westernsydney.edu.au/search/name/Margaret Hanlon/](https://directory.westernsydney.edu.au/search/name/Margaret%20Hanlon/))

Description This is a foundation unit for the major in International Relations and Asian Studies. As such, this unit will introduce students to key topics and debates in the field of International Relations (IR). The unit will familiarise students with leading IR theories and their explanation of political events, phenomena, and processes which cross the territorial boundaries of the state. Students will be exposed to the interplay between power, interest, ideas, identity, and resistance, in explaining continuity and change in international relations. The unit is designed to provide students with the analytical tools and intellectual frameworks needed to understand the behaviour of different international actors in contemporary global affairs.

School Humanities & Comm Arts

Discipline Political Science

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects POLI 1003 - Introduction to International Relations (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the main actors in world politics
2. Describe the major evolutions in the history of international politics
3. Demonstrate knowledge of the intimate linkages between 'domestic' and 'international' politics
4. Show an understanding of the main IR theories and the assumptions implicit in each of these different ways of looking at the world
5. Identify multiple perspectives on International Relations
6. Interpret current policy debates and international trends
7. Evaluate solutions to dominant policy-making problems in world politics.

Subject Content

- . History of International Relations (IR) theory
- . Main theoretical approaches to the study of IR
- . Non-Western perspectives on the study of IR
- . Non-anthropocentric/post-human approaches to the study of IR
- . Key concepts in the study of IR
- . Leading actors in world politics
- . Ethics of global affairs
- . Conflict and cooperation in international affairs
- . The role and consequences of international organisations
- . International regimes, international law, and global governance in world politics

- . Shift from 'inter-national' to 'inter-regional' relations
- . The link between 'domestic' and 'international' politics

Assessment

Coordinator Diane Colman ([https://directory.westernsydney.edu.au/search/name/Diane Colman/](https://directory.westernsydney.edu.au/search/name/Diane%20Colman/))

Description In this unit students will become familiar with Australian diplomacy and appreciate the range of pressing historical, political and cultural issues that affect Australia's place in the Asia Pacific region. It explores the factors that have shaped Australia's relationships with key countries in the region and considers the vital impact of political actors and their ideological stances. In developing a depth of knowledge on the importance of Australia's regional policies, this unit provides students with the opportunity to be involved in a simulation task dealing with a 'hot topic' for Australia's relations within the Asia Pacific region.

School Humanities & Comm Arts

Discipline Political Science

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. describe the continuity and change in Australian foreign policy towards the Asia Pacific region
2. identify both domestic and international factors that have shaped Australia's relations with Asian countries
3. critique the ideological approaches to Asian relations of the major Australian political parties
4. provide critical commentary on Australia's key relationships with Asia
5. conduct research on a hot topic for Australia's relations with Asia
6. articulate a clear and logical position on issues that affect Australia's relations with countries in the Asia Pacific region.

Subject Content

Australia and Asia in the post-war environment
 The making of foreign policy
 Australia-Asia relations during the Cold War
 Partisan approaches to Australian foreign policy
 The new Asia Pacific politics of engagement
 Australia-Asia relations post 9/11
 Australia's key bilateral relations in the region
 Australia as a middle power in the region
 Australia's place in the Asian Century

POLI 3001 Activism, Engagement and Social Change

Credit Points 10

Legacy Code 101981

Coordinator David Tait ([https://directory.westernsydney.edu.au/search/name/David Tait/](https://directory.westernsydney.edu.au/search/name/David%20Tait/))

Description This unit is designed for students interested in the politics, processes and ethics of social change. It covers the topics of Internet activism, NGO politics and ethics, identity politics, legal lobbying, revolutions and regime changes, and the role of art in consciousness raising. We will explore the efficacy of different social change strategies, the ethics of various modes of activism, the role that national and transnational politics plays in campaigning, the importance of identity for engagement with social change processes, and the ideologies informing theories of change.

School Humanities & Comm Arts

Discipline Political Science

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explore policy and political problems and their solutions.
2. Analyse the operations of power inside and outside of formal institutions.
3. Critique policies.
4. Develop useable strategies for change that recognise current practical and political constraints.
5. Demonstrate basic advocacy and activist skills including competence in planning strategies for policy lobbying in the context of the stakeholders/players and potential barriers.
6. Explain the broader theoretical debates on questions of power, ideologies, the role of the state and civil society and other factors which influence the capacity to make or change policies.

Subject Content

- social change, engagement and activism: An introduction (definitions, Semantics, key concepts)
- Citizenship: history and context
- theoretical Developments in social change and Advocacy (Models, organisational context, processes, effects, rhetoric, culture and Critical thinking)
- Understanding policy and Advocacy (sources, Ethical Issues, political environment, Campaigns, news content analysis)
- government and Governance
- media relations: strategies and tactics
- research and evaluation: methods and techniques
- Building A campaign to achieve change
- case studies: from The suffragettes to Mabo
- Issues and Crisis management

POLI 3005 Democracy in Asia

Credit Points 10

Legacy Code 100903

Coordinator Badrul Khan ([https://directory.westernsydney.edu.au/search/name/Badrul Khan/](https://directory.westernsydney.edu.au/search/name/Badrul%20Khan/))

Description This unit is concerned with the theory and practice of democracy in modern and contemporary history of Asia. It explores a range of issues relating to liberalism, human rights, political reform and democratization. It seeks to explain the differences in the ways in which democracy has been conceived, understood and practiced in different cultures and societies. It also examines the East-West debate on "Asian values" and the suitability of Western-style democracy to Asia. Finally, it discusses the prospects for democracy in Asia.

1. explain the theoretical concepts of global governance and the Bretton Woods system
2. identify the different actors in global governance and analyse their contribution to the international system
3. evaluate the strengths and weaknesses of the subjected Nations, the UN Security Council, the ICJ and ICC
4. critique the effectiveness of intergovernmental organisations
5. assess the role of multinational corporations in global governance
6. compare the effectiveness of a number of non-governmental organisations.

Subject Content

- what do we mean by Global Governance and who are The actors involved?
- what are international organisations?
- The Bretton Woods system
- A history of The development of Global Governance
- Intergovernmental Organisations
- The United nations
- The United nations security Council, The international court of justice and The international criminal court
- Multinational Corporations
- non-government Organisations

POLI 3007 International Relations of Southeast Asia

Credit Points 10

Legacy Code 102190

Coordinator Margaret Hanlon ([https://directory.westernsydney.edu.au/search/name/Margaret Hanlon/](https://directory.westernsydney.edu.au/search/name/Margaret%20Hanlon/))

Description This unit focuses on the key international relations issues and challenges facing the Southeast Asian region in the 21st century. Commencing with the historical issues that have shaped the nations of Southeast Asia it will then consider the issues, such as the war on terrorism; the economic demands of globalism; maritime security; and social and political demands centred around issues such as democracy,

human rights, the environment, and transnational crime. Finally, it will consider the shifting power structure within the Asian region and whether this will result in Southeast Asia gaining genuine autonomy and the impact this has on regionalism.

School Humanities & Comm Arts

Discipline Political Science

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. explain the legacy of colonisation in the Southeast Asian region
2. analyse the impact of the Cold War on the states of Southeast Asia
3. identify and critique the issues of tension and conflict within Southeast Asia and the attempts to have these resolved
4. evaluate the effectiveness of regional and international economic cooperation
5. compare and contrast human rights development in Southeast Asia with that of the broader international community
6. describe the environmental issues confronting the states in Southeast Asia and explain the impact of these issues on Southeast Asian development and stability
7. assess the effects of regionalism in Southeast Asia.

Subject Content

- Colonisation and decolonisation
- The Cold War
- Regional integration and its challenges
- Territorial Issues and disputes
- ethnic and religious Conflicts
- Terrorism and transnational Crime
- Regional and international economic Cooperation
- human rights
- environmental Issues
- relationships with external powers (China, Japan, The US, Australia, etc.)
- Separatist movements

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

POLI 3008 International Special Study

Credit Points 10

Legacy Code 102193

Coordinator David Walton ([https://directory.westernsydney.edu.au/search/name/David Walton/](https://directory.westernsydney.edu.au/search/name/David%20Walton/))

Description This unit provides students with opportunities outside the usual classroom experience. It is designed particularly for students who (1) enrol in short-course study tours, and/or (2) who take a placement within an international workplace. Several UWS partner institutions (e.g., the University of Seoul) run annual short-course study programs. With regard to placements (internships), students must seek a placement that connects directly with their areas of study.

School Humanities & Comm Arts

Discipline Political Science

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. comprehend culture, as it applies to a national and/or workplace setting;
2. apply existing knowledge to real-world situations;
3. integrate existing knowledge with new, on-the-spot discoveries;
4. demonstrate the impact of the subject on their intellectual development.

Subject Content

- Planned short course/internship in An international setting they intend to undertake.

- integration of knowledge gained in An international context with discipline knowledge.

- intercultural Understanding and skill development.

Planned short course/internship in an international setting they intend to undertake.

Integration of knowledge gained in an international context with discipline knowledge.

Intercultural understanding and skill development.

Assessment

POLI 3009 Looking at Global Politics Through Film

Credit Points 10

Legacy Code 101733

Coordinator Diane Colman ([https://directory.westernsydney.edu.au/search/name/Diane Colman/](https://directory.westernsydney.edu.au/search/name/Diane%20Colman/))

Description Popular representations of world politics shape our collective understanding of political history and international relations. This unit examines the ways in which film can communicate political messages to its audience, as well as the far more difficult issue of the effects that those messages might have on viewers. Although the discipline of International Relations (IR) has overwhelmingly ignored popular culture, it is the argument of this unit that popular culture actually provides us with a wealth of significant representations of world politics.

School Humanities & Comm Arts

Discipline Political Science

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the approaches, methods and conceptual tools available for assessing the impact of popular culture on international politics.
2. Demonstrate an understanding of the intertextuality of film representations of world politics.
3. Critique the main theories of global politics and evaluate the application of those theories to cinematic representations of world affairs.
4. Apply theoretical and empirical material to articulate concise and persuasive arguments.
5. Recognise the significance of film representations for the popular understanding of international affairs.

Subject Content

Introduction to the content and contexts of global politics on film
 Popular culture and the representation of global politics
 Popular culture and understanding IR theoretical claims about global politics
 Framing the world - representing global politics on film
 Representations of global politics through time and space
 Reimagining the global political past through the lens of today
 Contesting, challenging and convincing - advocating global political change through film
 Rethinking theoretical claims about global politics through film
 Reframing the policies and actions of various actors in global politics
 Projecting the global political future

POLI 3010 Politics of Post-War Japan

Credit Points 10

Legacy Code 100278

Coordinator Steven Drakeley ([https://directory.westernsydney.edu.au/search/name/Steven Drakeley/](https://directory.westernsydney.edu.au/search/name/Steven%20Drakeley/))

Description The unit studies the post-war Japanese political experience: a vanquished country transformed into an economic super power with a 'peace' constitution and now in relative decline. In particular the unit will examine the impact of the dominance of the Liberal Democratic Party on domestic politics and the intersection between domestic political developments and security and foreign policy matters.

School Humanities & Comm Arts

Discipline Political Science

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the major developments in post-war Japanese politics
2. Demonstrate knowledge of the linkages between 'domestic' and 'international' politics in Japan

3. Show an understanding of the main political parties and the assumptions implicit in each party
4. Identify multiple perspectives on Japanese politics
5. Interpret current policy debates and international trends relevant to Japan.

Subject Content

- Japan at The end of World War Two
 - The occupation period and impact
 - The 1955 system
 - The party system and political stability: 1955-1993
 - Corruption and scandals
 - political activism at The national and sub-national level
 - The role of The opposition
 - The party system in transition: 1993 and electoral reform
 - 1993-2015: Conservative party dominance and voter disengagement from the political process
 - Issues in foreign/security relations: role of The United States
 - Issues in foreign/security relations: Rising China
 - Issues in foreign/security relations: Revision of Article Nine?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

POLI 3012 The Politics of Civilisation

Credit Points 10

Legacy Code 102005

Coordinator Brett Bowden ([https://directory.westernsydney.edu.au/search/name/Brett Bowden/](https://directory.westernsydney.edu.au/search/name/Brett%20Bowden/))

Description What is civilisation? What are civilisations? What does it mean to be civilised? What does it mean to be uncivilised, barbaric or savage? These are some of the key questions explored in this unit. We will investigate the normative demands of civilisation, from 16th Century European colonial 'civilising missions' to the 21st Century global war on terror. We will explore the history of relations between civilisations in light of the 'clash of civilisations' thesis, including relations between the Western and Islamic worlds. We will discover the power of ideas and the influence they can have on real world policy-making.

School Humanities & Comm Arts

Discipline Political Science

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the power of ideas
2. Draw causal links between the past and the present
3. Identify the importance of culture and values in inter-civilisations relations
4. Outline macro-historical political process

Subject Content

- The ideal of Civilisation
- Civilisation and Progress
- Universal Civilisation
- Standards of Civilisation
- The Burden of Civilisation
- Civilising Missions
- new Barbarism
- new Imperialism
- Civilisation and War
- Civilisational relations

Legacy Code 101375

Coordinator David Walton ([https://directory.westernsydney.edu.au/search/name/David Walton/](https://directory.westernsydney.edu.au/search/name/David%20Walton/))

Description This unit examines problems and issues in international politics. In particular the unit critically assesses the major theoretical paradigms associated with attempts to explain international behaviour of key individuals, nations and the international system. Major issues and key problems in world affairs since the end of World War Two (such as justice and equality, human rights and terrorism) are examined.

School Humanities & Comm Arts

Discipline Political Science

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Incompatible Subjects LGYB 0053 - War and Peace

Restrictions Successful completion of 60 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Knowledge of contending theories on the causes of war and international conflict.

2. An understanding of the nuances in international relations discourse.
3. The capacity to explain the foundations of international politics in the post war period and its relevance to contemporary issues.
4. Sensitivity to cross-cultural and cross-national issues.

Subject Content

A critical evaluation of international relations theory.

The dynamics of the international environment and its implications for foreign policy.

The Cold War - an evaluation of post war international relations at the global and regional level.

Post cold war developments.

Arms race and weapons proliferation.

Terrorism.

Poverty and inequality.

Gender.

POLI 7001 Development and Security

Credit Points 10

Legacy Code 101896

Coordinator Zulfan Tadjoeeddin ([https://directory.westernsydney.edu.au/search/name/Zulfan Tadjoeeddin/](https://directory.westernsydney.edu.au/search/name/Zulfan%20Tadjoeeddin/))

Description Successful development requires the provision of security. As a corollary, lack of development can breed insecurity and violence. The overall nexus between development and security is not only about a country's domestic affairs; it concerns the global community. Amid the increasing pace of globalisation, global inequalities both within and between countries have increased, which have been complicated by competitions between groups, actors and countries. These may pose development and security challenges at national and global scales. This unit will concentrate on three key aspects. First, it will interrogate the complex relationship between development and security from interdisciplinary perspectives. Second, this unit will examine the development roots of insecurity focusing on social and economic structures and key issues in development and security from local and global perspectives as well as from micro and macro outlooks. Third, relevant case studies will be embedded throughout the unit contents to enhance students' analytical skills and practical orientation on the field of development and security.

School Social Sciences

Discipline Political Science

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate knowledge of the prevalence, characteristics, consequences and possible causes of civil wars and conflicts in developing countries

2. Demonstrate detailed knowledge of, and a rigorous and coherent analytical approach to, the multiple forms of violence and conflict in developed and developing countries
3. Critically analyse ideas about conflict, development and security as well as possible inter-linkages among them
4. Demonstrate critical and thorough understanding of the core issues of development and security and their inter-linkages
5. Critically examine relevant cases and policies on development and security using appropriate theoretical frameworks

Subject Content

Violence, conflict and development
 Development as security
 Greed, grievance and social contract
 Culture, ethnicity and religion
 Poverty, inequality, marginalisation and exclusion
 Natural resources, conflict and development
 Peace keeping operation, the UN and DDR
 Global governance for world order
 Selected cases on the interlinkages between development and security

POLI 7002 Translation from Theory and Research to Policy

Credit Points 10

Legacy Code 102180

Coordinator [Rosemary Leonard \(https://directory.westernsydney.edu.au/search/name/Rosemary Leonard/\)](https://directory.westernsydney.edu.au/search/name/Rosemary%20Leonard/)

Description The focus of study in this unit is on policy-making and implementation and the place of theory and research in policy formation. In the first part of the unit students explore the nature of public policy - addressing constructs of policy and policy-making and approaches to analysing public policy. The political and social practices of policy-making and implementation in Australia are contextualised and examined at the local, national and global levels. The second part of the unit takes examples of policy-making in the field of social sciences and examines the role of theory and research

in the problematisation of issues and identification of solutions. The identification of competing interests, relations of power and key players in understanding, analysing and responding to policy and its outcomes will be undertaken.

School Social Sciences

Discipline Policy Studies

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate critical understanding of the links between theory/ research/policy
2. Distinguish between different levels of policy-making:- global, national, local; - state, corporate, community.
3. Appraise the competing interests and power relations in policy-making processes
4. Operationalise strategies for developing, analysing and responding to policy outcomes

Subject Content

Links between theory/research/policy
 Local and global political/social frameworks that shape policy making in the Australian context
 Competing interests, relations of power and key players in understanding and analysing policy and its outcomes
 Levels of policy-formation and implementation: government, community, corporations and organisations
 Examples of translation from theory/research to policy
 Strategies for analysing and responding to policy and its outcomes
 Skills and knowledge for developing policy

Assessment

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the history and cultural significance of different foods around the world

- Discuss current food and nutrition issues including diet and health, new trends in foods, food quality, safe food handling and food borne disease
- Describe the characteristics of food commodities: fruits and vegetables, cereal, dairy and flesh foods, including nutritional value, chemical composition, and functional properties
- Describe basic food processing practices associated with fruit, cereal, dairy and flesh commodities
- Conduct basic food experiments in the food science laboratory and kitchen safely and competently
- Methodically and accurately record data when conducting experiments; and use this data to interpret findings
- Demonstrate communication skills, including report writing and oral presentations

Subject Content

- Introduction to the study of food science and nutrition; review of current issues related to food including world food supply
- History and cultural significance of food
 - historical changes to The food Supply - from The Past to today
 - food traditions in different cultures
- Safe food handling and food borne disease; Food quality assessment
- Composition of foods
- Food Commodities
 - Fruits and vegetables
 - Cereal products
 - Dairy products
 - Flesh products
- Diet and health
- Meat, fruit, cereal and dairy processes

PROC 1006 Materials Engineering Fundamentals

Credit Points 10

Legacy Code 301414

Coordinator Qinghua Zeng ([https://directory.westernsydney.edu.au/search/name/Qinghua Zeng/](https://directory.westernsydney.edu.au/search/name/Qinghua%20Zeng/))

Description This unit will introduce students to the foundations of chemistry, exploring the molecular nature of matter and change which is essential foundational knowledge for a career in materials engineering. From atomic structure and the understanding of the periodic properties of elements, students learn about the chemical bonds and intermolecular forces that are responsible for determining the structure and properties of materials. Students put theory into practice by conducting and reporting on laboratory experiments to test the principles of chemical equilibrium, chemical reactions involving acids/bases, electron transfer as well as thermodynamics and kinetics of chemical processes.

School Eng, Design & Built Env

Discipline Materials Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

- Explain the structures of chemical substances, including atomic structures, bonding, intermolecular forces, and their relation to the properties of the material.
- Identify the concept of chemical equilibrium used to evaluate phenomena related to chemical reactions including acids and bases.
- Outline the principles of thermodynamics in predicting the spontaneity of chemical reactions.
- Explain the rates and mechanisms of chemical reactions in collision theory at the molecular level.
- Apply concepts of oxidation and reduction to analyse electrochemical cells and corrosion.
- Communicate concepts, experiments and results in a clear and ethical manner.
- Work safely and collaboratively in groups on laboratory experiments and projects, contributing to reports.

Subject Content

- Atomic structure
- Periodic properties of the elements
- Bonding
- States and properties of matter
- Stoichiometry
- Chemical equilibrium
- Acids and bases
- Electrochemistry
- Thermodynamics
- Kinetics

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Self-Assessment	30 minutes (each week)	20	N	Individual
Practical	500-1000 words	10 (G) 20 (I)	N	Both (Individual & Group)
Quiz	45 minutes (per Quiz)	30	N	Individual
Report	2000-3000 words (Individual) and 15 minutes (Group)	10 (G) 10 (I)	N	Both (Individual & Group)

Prescribed Texts

PROC 1007 Introduction to Food Science (WSTC)

Credit Points 10

Legacy Code 700334

Coordinator Phillip Newman ([https://directory.westernsydney.edu.au/search/name/Phillip Newman/](https://directory.westernsydney.edu.au/search/name/Phillip%20Newman/))

Description Food provides sustenance to life, nutrition for good health, enjoyment and cultural identity. Students will study the history and cultural significance of food and its traditions in Australia and around the world. This unit introduces the basic principles for understanding

the science behind food; its composition, chemical, physical and functional characteristics. Fruits and vegetables, cereal, meat and dairy products will be covered, how they are processed and impacts on food quality and nutrition. Current issues will be discussed, such as world food supply, food-borne disease, diet and health, and new trends in food. Students will need to attend the Hawkesbury Campus for Lectures and Practicals.

School Science

Discipline Food Processing Technology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects PROC 1002 Food Science 1 PROC 1001 Food Science 1 LGYB 8736 Food Science Technology Practicum 11 PROC 1003 Food Science 1

Restrictions Students must be enrolled at The College. Students enrolled in Extended Diploma programs must have passed 40 credit points of preparatory subjects in order to enrol in this subject.

Assumed Knowledge

An understanding and competence with basic chemical principles including SI units, chemical symbols, formulas and equations, nomenclature, stoichiometry, the mole concept, bonding, molecular shape and polarity, states and properties of matter, thermodynamics, equilibria, acids and bases, pH and electrochemistry.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the history and cultural significance of different foods around the world.
2. Discuss current food and nutrition issues including diet and health, new trends in foods, food quality, safe food handling and food borne disease.
3. Describe the characteristics of food commodities: fruits and vegetables, cereal, dairy and flesh foods, including nutritional value, chemical composition, and functional properties.
4. Describe basic food processing practises associated with fruit, cereal, dairy and flesh commodities.
5. Conduct basic food experiments in the food science laboratory and kitchen safely and competently.
6. Methodically and accurately record data when conducting experiments; and use this data to interpret findings.
7. Demonstrate communication skills, including report writing and oral presentations.

Subject Content

1. Introduction to the study of food science and nutrition; review of current issues related to food including world food supply.
2. History and cultural significance of food
 - a. Historical changes to the food supply ? from the past to today
 - b. Food traditions in different cultures, guest lectures from different cultures.
3. Safe food handling and food borne disease; Food quality assessment
4. Composition of food
5. Food Commodities
 - a. Fruits and vegetables
 - b. Cereal products
 - c. Dairy products
 - d. Flesh products
6. Diet and health

7. Meat, fruit, cereal and dairy processes

Assessment

Credit Points 10

Legacy Code 300842

Coordinator Rosalie Durham ([https://directory.westernsydney.edu.au/search/name/Rosalie Durham/](https://directory.westernsydney.edu.au/search/name/Rosalie%20Durham/))

Description This unit introduces students to the principles of food preservation, including heat treatments, chilling, freezing, dehydration, pickles and fermentation. Factors affecting food quality are explored with respect to microbial, chemical and physical changes in food and their effects on food safety, nutritional value and sensory characteristics. The basic principles of good manufacturing practises, sanitation and Hazard Analysis Critical Control Point (HACCP) for control of food safety will be studied in relation to the design of safe food manufacturing processes. The application of the food preservation principles to the processing of food products is covered through hands-on practicals in the pilot plant.

Assumed Knowledge

Knowledge of first year chemistry and biology; understanding of food composition.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the factors affecting food quality with respect to microbial, chemical and physical changes and their effects on food safety, nutritional value and sensory quality
2. Explain the principles of sustainable food processing and preservation
3. Identify the development stages critical to developing innovative foods.

4. Articulate the critical control points and prerequisite programs needed to ensure the safety (HACCP plan) for a food process.

Subject Content

1. Developments in innovative food processing technologies
2. Principles of food preservation including heat treatments, chilling, freezing, dehydration, acid preserves, fermentation, and packaging.
3. Factors affecting food quality and safety, with respect to microbial, chemical, nutritional and physical changes in food during processing.
4. Application of good manufacturing practises (GMPs) and Hazard Analysis Critical Control Point (HACCP) as the basis for design of safe food manufacturing processes.
5. Food safety regulations.

PROC 2003 Materials Selection and Design

Credit Points 10

Legacy Code 301415

Coordinator Leigh Sheppard ([https://directory.westernsydney.edu.au/search/name/Leigh Sheppard/](https://directory.westernsydney.edu.au/search/name/Leigh%20Sheppard/))

Description Materials are a critical point of consideration when designing a solution to a technical problem. However, materials can also be quite complex by themselves and can possess a range of properties which may only partially suit an intended solution. In this unit, students use real world scenarios to learn to make decisions concerning material selection under different circumstances, based upon technical requirements, and balanced against sustainability and cost.

School Eng, Design & Built Env

Discipline Materials Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the environmental issues associated with the potential use of a material in a design solution
2. Identify materials properties that are relevant to a specific technical problem
3. Apply a systematic approach towards the selection of materials for a given scenario
4. Provide material selection recommendations with appropriate justification
5. Apply collaborative skills in a team setting to address a technical problem
6. Professionally communicate methodology, analysis, and outcomes of a materials selection process in a range of different verbal and written formats.

Subject Content

1. Introduction to software for materials selection
2. Overview of materials extraction, refinement and end of life
3. Addressing common engineering design scenarios
4. Materials selection for sustainability
5. Materials selection for advanced manufacturing

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

PROC 3003 Food Product Development

Credit Points 10

Legacy Code 300915

Coordinator Christine Hutchison (https://directory.westernsydney.edu.au/search/name/Christine_Hutchison/)

Description This unit is a final year capstone unit where students work in a team environment to apply the knowledge previously gained through their studies in nutrition and food science to develop a novel food product. The entire process of product development will be covered, including: idea generation; collating market, technical and consumer information; consumer surveying to establish the need/desire for a new product; product innovation development; quality testing and packaging. Students will develop specialised knowledge of the total product development system, including the ability to design, develop formulations and evaluation of sensory properties. Final product assessment includes nutritional composition, microbiological analysis, sensory evaluation and labelling compliant with regulations. The project is run in the simulated industry environment; team work among the members plays a key part of the unit.

NATS 3014

Equivalent Subjects PROC 3004 - Food Product Development Practicum
LGYB 8764 - Food Product Development Practicum

Restrictions Successful completion of 160 credit points

Assumed Knowledge

Students enrolled in this subject must have previous knowledge of food science principles, food processing, human nutrition, food analysis, sensory evaluation and food quality control systems, plus experience in food formulation and ingredient manipulation coupled with an understanding of nutritional requirements.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop specialised knowledge of the total product development system.
2. Develop skills in problem solving, in terms of product formulation and group dynamics, by working effectively, responsibly and safely in a team to coordinate the tasks required.
3. Design, conduct and analyse consumer surveys.
4. Formulate food products, addressing the product design brief and consumer marketing requirements; whilst demonstrating high level food preparation skills and scientific knowledge of the properties of food to create desirable food products.
5. Safely and competently analyse the product (physical, chemical, microbiological and sensory), also ensuring that it complies with food safety and labelling regulations.
6. Report and communicate the results of the development process using a range of modes and formats, including large formatted report and PowerPoint presentation.
7. Investigate and apply statutory regulations in relation to new product development.

Subject Content

- Product development process
- Project aims, objectives and constraints
- idea Generation and Screening
- Consumer survey design and analysis
- Hazard analysis Critical control Point (HACCP) methodology
- Sensory evaluation
- Microbial analysis
- Chemical analysis
- Nutritional Trends in The food industry
- Raw materials sourcing
- Packaging
- legal and labelling
- recommendations

Restrictions Students must have passed 100 credit points of subjects

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe current and emerging food processing and packaging technologies, and the applications of these technologies in the manufacture of food.
2. Apply knowledge of the physico-chemical processes involved in food manufacture to solve food quality problems.
3. Conduct food process operations and associated laboratory assays safely and competently, individually or as a member of a group, summarise results and report on findings
4. Articulate an awareness of the environmental impact of food processing and packaging and ways to improve the sustainability of food manufacture

- Critically evaluate literature in a chosen area of interest and design a research proposal, including objective, justification, research plan and methodology

Subject Content

- Emerging food processing technologies and new processes, including extrusion, thermal and cold processes and drying and how these can be applied in the development of new foods.
- Choice of materials for food packaging, including coatings and active packaging technologies; packaging operations, including filling, closing, printing and labelling.
- Consumer and environmental issues related to packaging, including recycling of packaging materials and tamper evident packaging.
- Methods for monitoring and control of food quality, including shelf-life testing and prediction and impact of packaging on shelf life.
- Research skills and intellectual property management in food science and technology.

Coordinator Leo Zhang ([https://directory.westernsydney.edu.au/search/name/Leo Zhang/](https://directory.westernsydney.edu.au/search/name/Leo%20Zhang/))

Description This unit focuses on the materials aspects of advanced material processing with an emphasis on microstructures. This extends students' knowledge in advanced materials, their properties, processing technologies, potential applications and simulations. Students will gain skills and experience with commercial software packages to solve sophisticated problems associated with materials engineering as well

as develop experimentation techniques for the validation of these problems.

School Eng, Design & Built Env

Discipline Materials Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

- Apply the principles of commonly used advanced materials processing technologies to a given technical situation.
- Apply powder metallurgy processing principles to consolidate a desired material component.
- Evaluate the phenomena of heat transfer and phase/microstructure change in typical laser-based manufacturing.
- Identify the processing fundamentals for common engineering materials.
- Evaluate how microstructure and processing influence the performance of various advanced materials
- Use simulation to model a material process.
- Demonstrate teamwork, leadership and project management skills to manage a set task in a professional, respectful and ethical manner.
- Communicate findings in written and oral formats demonstrating academic integrity and clarity

Subject Content

- Introduction and overview of advanced materials processing technologies
- Fundamentals of heat and mass transfer, and phase transformations
- Manufacturing processes with phase change
- Processing and applications of metals, ceramics, polymers, composites and biomimetics
- Characterisation of metals, ceramics, polymers, composites and biomimetics
- Numerical simulation and optimisation of materials processing
- Guest lecture & industry site visit
- Future applications of advanced materials

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Coordinator Leigh Sheppard ([https://directory.westernsydney.edu.au/search/name/Leigh Sheppard/](https://directory.westernsydney.edu.au/search/name/Leigh%20Sheppard/))

Description Advancements in materials have underpinned technological development since the earliest days of human civilisation. As the challenges of the 21st Century emerge, the development of advanced materials will undoubtedly prove crucial for achieving sustainable solutions. This unit is a research-led learning experience for students whereby advanced materials researchers from WSU and beyond will deliver a series of real-world case studies on their research. Students will be challenged to assess these different material contexts and respond to hypothetical problems by performing critical reviews, in-depth analyses and presenting expert recommendations.

School Eng, Design & Built Env

Discipline Materials Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically assess peer reviewed scientific literature synthesising highly technical material from multiple sources
2. Identify the advantages and limitations of advanced materials when applied to specified applications
3. Determine appropriate research designs, methodologies, and analysis that will address a research question/hypothesis effectively.
4. Communicate research and present recommendations in an appropriate written and oral scientific format
5. Work collaboratively to address technical problems

Subject Content

1. History of advanced materials and impacts on society
2. The process of undertaking advanced materials research
3. Techniques for processing and characterising advanced materials
4. Advanced materials in local and global industries
5. Case Studies on specific advanced materials research topics
6. Challenges and opportunities in advanced materials
7. Guest Lecturer: Talk with industry professionals

Assessment

PROC 4002 Engineering Materials from Waste

Credit Points 10

Legacy Code 301417

Coordinator Zhong Tao ([https://directory.westernsydney.edu.au/search/name/Zhong Tao/](https://directory.westernsydney.edu.au/search/name/Zhong%20Tao/))

Description Students will learn about the high potential of waste materials produced by continually growing rapid urbanisation and rising populations, which can be widely reused in engineering projects such as buildings, roads. The focus of this unit is the use of solid waste such as glass, tailings and demolished waste in engineering materials such as concrete, road base and asphalt. In addition, students will explore several recycling and recovery processes and investigate the performance of waste incorporated into engineering materials. Students report on real world state-of-the-art developments while integrating concepts of the circular economy, Australian standards and regulations to ensure the compliance of the developed materials. Work Integrated Learning (WIL) is a component of this unit.

School Eng, Design & Built Env

Discipline Materials Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the purpose of using waste materials in engineering projects.
2. Select appropriate type and proportion of waste materials for a specific application.
3. Determine the properties of waste materials incorporated into concrete, road base and asphalt.
4. Identify proper methods for recycling and recovery processes of waste materials by incorporating into the concept of circular economy.
5. Apply appropriate Australian standards and regulations in developing new sustainable engineering materials.
6. Collaborate with diverse others in teams to conduct experiments or lab work safely and ethically.
7. Enhance graduate skills capability on scholarly research

Subject Content

1. Characteristics of various waste materials such as glass, tailings, demolished waste, fly ash, plastics and metals, etc.
2. Use of waste materials, particularly glass, tailings and demolished waste, in concrete, road base and asphalt.

3. Properties and performance of waste materials incorporated concrete, road base and asphalt.
4. Recycling and recovery processes of waste materials.
5. Incorporation of the circular economy concept in the reuse of waste materials.
6. Application of Australian standards and regulations for compliance checking.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz (x2)	1 hour (per Quiz)	30 (15% per quiz)	N	Individual
Laboratory report (x 2)	1000 words (each)	30 (15% per report)	N	Group
Research report	3500-5000 words	40	Y	Individual

Coordinator Ryan Sidoti ([https://directory.westernsydney.edu.au/search/name/Ryan Sidoti/](https://directory.westernsydney.edu.au/search/name/Ryan%20Sidoti/))

Description Empowering Individual Health focuses on the health care system in Australia. It aims to give students an understanding of the different elements that constitute the health care system in Australia and abroad. The unit will look at how the structure and funding of the health care system, as well as the political environment in which it operates, impacts life expectancy in a country, as well as how the elements of the health care system impact national and individual health enabling behaviours.

School Western Sydney The College

Discipline Health Promotion

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 0 Preparatory subject

Restrictions Students must be enrolled in 7142 Diploma in Health Science Extended or 7143 Diploma in Health Science Extended (HPE).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the roles and responsibilities of the Commonwealth versus the State Government in the Australian Health Care System
2. Understand the structure, organisation and financing of the Australian health care system
3. Identify skills and practices that empower the individual to engage with the Australian health and disability service sector
4. Understand the contribution of research to the development of health policy
5. Identify key differences between an international health care system and the Australian health care system
6. Demonstrate an understanding of global health, classifying diseases and world health issues

Subject Content

1. The government health care responsibilities- commonwealth and state
 2. Area health services and local health districts
 3. Economic characteristics of health
 4. Political characteristics of health
 5. Research and policy development
 6. World health issues and universal health care
 7. Global health and classifying disease
 8. Resource allocation and health status
 9. Health economics, life expectancy and quality of life
1. The government health care responsibilities- commonwealth and state

PUBH 1005 Foundations of Wellbeing

Credit Points 10

Legacy Code 400962

Coordinator Jill Hnatiuk ([https://directory.westernsydney.edu.au/search/name/Jill Hnatiuk/](https://directory.westernsydney.edu.au/search/name/Jill%20Hnatiuk/))

Description This unit provides an introduction to wellbeing through a reflective and strengths-based approach that seeks to enhance personal, social and community wellbeing. Students will be able to understand, analyse and synthesize personal and structural factors that influence wellbeing. When considering how these factors and how issues of social justice and equity have differential impacts on both individuals and communities, students will be able to develop relevant strategies for taking personal and social action to enhance wellbeing.

School Health Sciences

Discipline Health Promotion

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects HUMN 1020 - Foundations of Wellbeing

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply a range of concepts that define the various dimensions of wellbeing, strengths-based approach, and quality of life.
2. Explain how social justice and equity principles are integral to wellbeing.
3. Apply skills in building resilience, active listening and assertiveness.
4. Analyse research and resources in the field of quality of life, and strengths-based approach to wellbeing.
5. Critically evaluate personal and socio-cultural factors that influence wellbeing.
6. Develop meaningful plans to enhance their personal and social wellbeing.

Subject Content

1. Dimensions of wellbeing

2. Writing narratives and reflections for wellbeing
3. Relaxation and mindfulness practices
4. Personal and interpersonal skills
5. Empowerment, equity and justice in the context of personal and social wellbeing
6. Strengths-based approach in wellbeing
7. Quality of life research
8. Teaching wellbeing in Health and Physical Education

Coordinator Nerida Klupp ([https://directory.westernsydney.edu.au/search/name/Nerida Klupp/](https://directory.westernsydney.edu.au/search/name/Nerida%20Klupp/))

Description This unit will provide you with foundational concepts and factors relating to population health in our society. The social and environmental determinants of health will be introduced and their roles toward disease, health and wellbeing will be explored. The Australian health care system will be compared with alternative models to examine strengths and challenges in advancing population health.

School Health Sciences

Discipline Public Health

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects PUBH 1007 - Population Health and Society (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify social and environmental factors that determine health and illness across the lifespan
2. Outline the relationship between social, environmental and biological determinants and inequitable health outcomes
3. Compare the advantages and disadvantages of Australian and other health systems
4. Identify and reflect on personal health risk factors
5. Communicate effectively about population health issues in both a written and oral format

Subject Content

1. Global, national and regional patterns in the distribution of health, wellbeing, and illness
2. Models of health and health systems
3. Structure and organisation of the Australian health system
4. Social determinants of health (e.g., socioeconomic status, gender, location and culture)
5. Environmental determinants of health (e.g., built environment and climate change)
6. Biological and behavioural determinants of health
7. Trends in communicable and non-communicable diseases
8. Causes and solutions for local and global health inequity
9. Emerging trends and issues in the provision of health care and notion of wellbeing
6. Biological determinants of health (e.g., sex, age and genetics)

7. Role of social factors and inequity for communicable diseases and non-communicable disease
8. Causes of health inequities locally and globally

PUBH 1008 Professional Pathways in Health Science

Credit Points 10

Legacy Code 400783

Coordinator Nicole Peel ([https://directory.westernsydney.edu.au/search/name/Nicole Peel/](https://directory.westernsydney.edu.au/search/name/Nicole%20Peel/))

Description The unit introduces students to the health science workforce. It discusses professional issues, history and philosophy in health sciences as they relate to health promotion, health service management, therapeutic recreation and public health. In addition, this unit explores the career pathways for health science students, discusses the Australian health system, and examines the impacts of potential changes in the health system to a career in health science. This unit helps students define what area within health science they would like to examine and study in more detail.

PUBH 1010 Health Promotion Theory and Approaches

Credit Points 10

Legacy Code 401392

Coordinator Justin Guagliano ([https://directory.westernsydney.edu.au/search/name/Justin Guagliano/](https://directory.westernsydney.edu.au/search/name/Justin%20Guagliano/))

Description Health promotion is a process that seeks to enable individuals, communities and populations to increase control over their health. It does so by addressing the determinants of health and equity issues, in addition to providing individuals and communities with the skills and knowledge to make healthy lifestyle choices and to improve health outcomes. Theoretical underpinnings of the various approaches to health promotion are explored in this unit. In addition, factors that enhance and limit health promotion are analysed in conjunction with bigger picture approaches of working with policy. The evidence-based practice for health promotion is outlined together with the need to move beyond education. Approaches to health promotion at the individual, community and population level are explored, including particular considerations for working with Indigenous people.

School Health Sciences

Discipline Health Promotion

Student Contribution Band HECS Band 2 10cp

Incompatible Subjects PUBH 2001 - Approaches to Health Promotion

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the principles of the Ottawa and Bangkok Charters and the Jakarta Declaration to different health promotion scenarios;
2. Identify and apply different theoretical frameworks to influence beliefs and health behaviours;
3. Identify the determinants of health;
4. Critically assess barriers to and factors enhancing health promotion action;
5. Apply health promotion competencies to assess an individual's health needs and resources;
6. Plan and evaluate health promotion strategies at an individual level for a relevant health issue.

Subject Content

1. Health Promotion Theory and Models
2. Health Promotion Charters and Declarations
3. Health Promotion Professional Competencies and Skills
4. Evidence-based Practice in Health Promotion, with focus on individual, community and population approaches
5. Evaluating health promotion strategies
6. Environment and sustainability approaches in health promotion in line with sustainable development goals
7. National Strategies for Promoting Health in Australia
8. Promoting Health in Indigenous Communities

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a **Student Undertaking Form** and undertake to apply for a **National Police Check**, which is required to be submitted before placement, and a **Working with Children Check Student Declaration**. Use the link to the **Special Requirements webpage** below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance ([https://](https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance)

PUBH 1011 Promoting Health Collaboratively in Communities

Credit Points 10

Legacy Code 401415

Coordinator Justin Guagliano ([https://directory.westernsydney.edu.au/search/name/Justin Guagliano/](https://directory.westernsydney.edu.au/search/name/Justin%20Guagliano/))

Description Health Promotion is everyone's business. All health professionals should seek opportunities to promote health equity and social justice, to support healthy lifestyle choices and to connect communities with appropriate health and social services. To do this effectively, health professionals must work collaboratively with communities. This unit focuses on theories and principles that support community-centred transformative action in health promotion, and how to apply them in various local, national and global contexts. Students will be introduced to concepts and practice related to community engagement, participation, development and empowerment; community capacity and resilience-building. There will also be a focus on community identity, social justice and ethical considerations associated with working with communities. Particular focus is made on approaches to working with Aboriginal and Torres Strait islander peoples, marginalised and vulnerable communities.

School Health Sciences

Discipline Health Promotion

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

- Describe key concepts, perspectives, theories and principles of working with communities
- Describe ways to involve the community in health promotion.
- Critically reflect on how key concepts and perspectives are connected to individual experiences of community, and to a range of professions that work with communities
- Explain the importance of community engagement, participation, development, empowerment, capacity and resilience building, identity and social justice to society and the individual

- Describe ethical considerations and effective skills for working with communities, particularly Aboriginal and Torres Strait Islander, marginalised and vulnerable communities
- Explain the importance of health promotion for Aboriginal and Torres Strait Islander people and communities and how this contributes to reducing health inequities

Subject Content

- Theory and principles in working with communities
- National and international community-based strategies for promoting health
- Interdisciplinary approaches in community health practice
- Community development, empowerment and capacity building
- Strategies to building resilience and promoting identity
- Social justice and inclusion
- Ethical consideration in working with communities
- Working with vulnerable and marginalised communities
- Promoting Health in Aboriginal and Torres Strait Islander peoples? Communities

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Report	800 words	30	N	Individual
Report	1,000 words	40	N	Individual
Quiz	3 x quizzes (45 minutes each)	30	N	Individual

PUBH 1012 Public Health

Credit Points 10

Legacy Code 401398

Coordinator Catharine Fleming (https://directory.westernsydney.edu.au/search/name/Catharine_Fleming/)

Description The unit introduces fundamental concepts of public health. Public health is examined from individual, community, historical, contemporary, cultural, gender, ethnic, economic, political, environmental, population, emergency and epidemiological perspectives. The unit shows how innovation and development in public health thinking and practice have improved the health of populations in Australia and globally. Continuing and recently emerging challenges to local, Indigenous, national and international public health are explored, along with public health challenges facing future generations.

School Health Sciences

Discipline Public Health

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Incompatible Subjects PUBH 2016 - Public Health

Learning Outcomes

On successful completion of this subject, students should be able to:

- Define physical and mental health in the public health context from historical and contemporary perspectives
- Explain how developments in public health concepts, policy, practice have influenced public health from early to modern times
- Describe the current burden of disease from communicable, non-communicable, infectious, chronic and acute categories of disease
- Identify risk and protective factors, including physiological, social, behavioural and environmental determinants of health, morbidity and mortality, and preventative health strategies
- Investigate major threats to public health, continuing, emerging and re-emerging in local, national and international contexts
- Analyse a public health emergency and describe appropriate responses
- Examine government, organisational and individual strategies and countermeasures for maintaining and improving public health

Subject Content

- definitions of physical and mental health applicable to public health
- The history of public health from Pre-modern to modern times and The new public health
- indigenous health
- Models of disease, including communicable, non-communicable, infectious, chronic and Acute
- Defining characteristics and Exemplars of public health emergencies, and appropriate responses
- causes and Determinants of disease and ill-health among specified populations and community groups
- An introduction to The role of epidemiology in determining The Burden of disease and public health needs among specified populations and community groups
- environment and public health ? locally, nationally and internationally
- society, culture and health ? locally, nationally and internationally
- gender and health ? locally, nationally and internationally

- politics, economics, globalisation, population and health ? locally, nationally and internationally
- elements of population-based disease prevention and control strategies
- Models of individual behaviour and health; behaviour change through public health campaigns
- The role of governments, non-government, national and international agencies, corporate entities and individual action in public health policy, practice, Advocacy and outcomes.

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.

- Current approved first aid certificate valid for your entire program
- approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

PUBH 1013 Health Promotion Theory and Approaches (UG Cert)

Credit Points 10

Legacy Code 500059

Coordinator Maria Dent ([https://directory.westernsydney.edu.au/search/name/Maria Dent/](https://directory.westernsydney.edu.au/search/name/Maria_Dent/))

Description Health promotion is a process that seeks to enable individuals, communities and populations to increase control over their health. It does so by addressing the determinants of health and equity issues, in addition to providing individuals and communities with the skills and knowledge to make healthy lifestyle choices and to improve health outcomes. Theoretical underpinnings of the various approaches to health promotion are explored in this unit. In addition, factors that enhance and limit health promotion are analysed in conjunction with bigger picture approaches of working with policy. The evidence-based practice for health promotion is outlined together with the need to move beyond education. Approaches to health promotion at the individual, community and population level are explored, including particular considerations for working with Indigenous people.

Coordinator Nicole Mcintosh ([https://directory.westernsydney.edu.au/search/name/Nicole Mcintosh/](https://directory.westernsydney.edu.au/search/name/Nicole%20Mcintosh/))

Description Throughout history humans have sought to control their well-being whether it be in response to disease-producing microbes or situations inherent in modern day life. This unit examines an eclectic range of treatments and technologies. Some have been triggered by ancient and enduring infectious foes such as smallpox and the plague or emerging menaces including Ebola and SARS. Others are nested within contemporary living and may be constructed as communicable in the social sense. Selected issues will be explored including agents utilised in the alteration of sensory perception including hallucinogens as well as reaction to and manipulation of body image.

School Nursing & Midwifery

Discipline Epidemiology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Assumed Knowledge

Basic understanding of structure and function of systems within the human body.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. illustrate how ancient ideas of disease contributed to the spread of infectious agents,
2. outline the implications of the germ theory of disease,
3. explain how technologic and immunologic advances affected available therapeutic options,
4. describe how changes to treatment modalities influenced the control of infectious disorders,
5. discuss the aetiology, transmission and therapeutics of emerging communicable diseases,
6. relate the concept of communicability to selected drug taking behaviours within a social context,
7. explain the dynamics and potential consequences of selected compounds used to alter sensory perceptions,
8. articulate the physiological implications of nominated drugs used inappropriately to redefine body image,
9. predict the potential effects of poly-drug combinations.

Subject Content

1. Introductory framework of microbes and human disease
2. Overview of significant discoveries in the 'golden age of microbiology'
3. Historically significant infectious diseases, e.g. smallpox, plague, typhoid, typhus, leprosy
4. Control through vaccination and therapeutics, e.g. TB, polio, measles
5. Enduring and emerging entities, e.g. malaria, hepatitis, meningitis, CJD, Ebola, 'golden staph', HIV, SARS
6. Modern day disorders of drug use and abuse - issues related to social communicability
7. Agents used in the alteration of sensory perception, e.g. psychedelics, phencyclidine, lysergic acid diethylamide
8. Therapeutics utilised in the manipulation of body image, e.g. steroidal compounds, amphetamines

PUBH 2004 Clinical Classification and Coding

Credit Points 10

Legacy Code 300951

Coordinator Anupama Ginige ([https://directory.westernsydney.edu.au/search/name/Anupama Ginige/](https://directory.westernsydney.edu.au/search/name/Anupama%20Ginige/))

Description This unit is designed to enable the student to classify diseases and interventions using the current version of the International Statistical Classification of Diseases and Related Health Problems, Tenth Revision, Australian Modification, the Australian Classification of Health Interventions and the Australian Coding Standards (ICD-10-AM/ACHI/ACS). The unit will also include the historical development of clinical classification systems as well as the purpose and value of classifying diseases and interventions within the health system. The student will become familiar with the structure and content of ICD-10-AM ACHI/ACS and be introduced to the rules and conventions associated within ICD-10-AM/ACHI. The primary ACS for ICD-10-AM/ACHI will be studied and applied when coding from line diagnoses/interventions, case studies, simple discharge summaries and clinical record reports. They will gain skills in data abstraction for clinical coding, specifically, the selection of principal and additional diagnoses and interventions.

School Computer, Data & Math Sciences

Discipline Public Health

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) HLTH 2007

Learning Outcomes

On successful completion of this subject, students should be able to:

1. summarise the history and development of ICD-10-AM/ACHI/ACS;
2. explain the difference between a statistical classification and a nomenclature;
3. understand and correctly apply the principles and techniques of clinical classification to code diagnoses and interventions using ICD-10-AM/ACHI/ACS;

4. identify and interpret diagnostic and therapeutic test results and accurately classify findings based on qualification from within the clinical record;
5. analyse diagnostic and procedural statements, case studies and simple discharge summaries/clinical record reports to determine which clinical statements to abstract and classify;
6. source further information to clarify complex clinical coding issues;
7. explain the use of clinical classification systems in health care, describing their purpose and value;
8. integrate the knowledge acquired in other units of study in this course with the knowledge learnt in this unit.

Subject Content

1. The history and purpose of clinical classification;
2. Application of classification systems in a healthcare setting and the relationship to the ehr;
3. Classification vs nomenclature;
4. Coding symptoms, diagnoses and interventions;
5. Coding factors influencing health status and contact with health services;
6. Coding external causes of morbidity;
7. Code sequencing and data abstracting techniques;
8. Coding infectious diseases;
9. Coding neoplasms/morphology;
10. Coding blood and immunological disorders;
11. Coding mental and behavioural disorders;
12. Coding diseases of the nervous system;
13. Coding diseases of the eye and ear;
14. Coding respiratory diseases;
15. Coding digestive diseases;
16. Coding genitourinary disorders;
17. Coding diseases of the skin and subcutaneous tissue;
18. Coding musculoskeletal and connective tissue diseases.

Assessment

PUBH 2005 Culture, Diversity and Health

Credit Points 10

Legacy Code 400866

Coordinator Alex Workman ([https://directory.westernsydney.edu.au/search/name/Alex Workman/](https://directory.westernsydney.edu.au/search/name/Alex%20Workman/))

Description This unit introduces skills for understanding and engaging effectively with the culturally and socially diverse world in which we live and work. Indigenous Australia is a major theme and students will gain an appreciation of the achievements and needs of Indigenous Australians. The unit examines cultural safety more broadly and puts these issues in the context of health professionals working in multi-cultural settings and handling culturally different health philosophies and practices. Cultural diversity is increasingly recognised as a major issue in the delivery of health care and a major determinant of Indigenous health.

School Health Sciences

Discipline Public Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects PUBH 2006 - Culture Diversity and Health (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply knowledge regarding equity, culture and diversity to their studies and professional behaviour as future health science practitioners
2. Examine the experiences of health, wellness, health services and health outcomes from an Indigenous perspective
3. Identify the role of social determinants of health across diverse populations

4. Describe the health needs of a range of marginalised Australians including; Indigenous Australians, Australians of a culturally or linguistically diverse background, sexually diverse Australians, ageing Australians and Australians living with disability
5. Examine approaches to cultural competency in health science practice

Subject Content

1. Introduction to the unit:
 - What are culture, diversity and identity?
 - Explore the cultural/social/ethnic diversity of the class
 - How do health care professionals approach diversity?
 - Introduce cultures of health and health care
2. The Australian context Indigenous Australia:
 - Overview of the history of Aboriginal and Torres Strait Islander Australia and the concept of Indigenous identities
3. The cultures of health and health care:
 - Review of dominant health culture in Australia
 - Understanding Western and Eastern health models
4. The Australian context Australians of Culturally and Linguistically Diverse Backgrounds (CALD):
 - Overview of the history of migration to Australia and the contemporary context of Australian multiculturalism
 - Health needs of CALD Australians
5. Segregation as a fundamental cause of ethnic disparities in health:
 - Discrimination and health: causes, consequences and potential solutions
 - Religious difference in Australia
6. Human rights and health literacy:
 - What are human rights?
 - Human Rights in Australia
 - What rights are covered to promote equity?
 - How can human rights improve health literacy?
7. Intro Cultural Competency:
 - Introduction to cultural competence
 - Cultural competency as a toolkit for cultural safety
8. Cultural Safety:
 - What is cultural safety
 - Why is it important?
9. Cultural Competency in Practice:

Assessment

PUBH 2010 Epidemiology

Credit Points 10

Legacy Code 300872

Coordinator Shirin Mumu ([https://directory.westernsydney.edu.au/search/name/Shirin Mumu/](https://directory.westernsydney.edu.au/search/name/Shirin%20Mumu/))

Description Epidemiology is an analytical science concerned with the distribution and determinants of health-related states in populations, aimed at the management of health problems. Epidemiology is not limited to controlling epidemics but assesses and manages physical, mental and social well-being in living, working and recreational environments. The unit introduces identification and understanding of risk factors for health and disease, and assists the student to develop an investigation protocol for assessing a specific health state within their own field of interest. This addresses career needs for a range of health studies while introducing the epidemiological analytical approach to risk assessment and research.

School Science

Discipline Epidemiology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects PUBH 2009 - Epidemiology

Learning Outcomes

On successful completion of this subject, students should be able to:

1. describe the basic function and role of epidemiology at a local and international level
2. integrate the epidemiological method into their own disciplinary area, such as environmental health, medical science, animal science, nutrition and food, occupational health and safety, forensic science
3. conduct rapid epidemiological assessments of health states using regression analysis, association analysis and epidemiological risk assessment to identify the nature and relative importance of local risk factors for health and disease
4. carry out the sourcing, collection, classification and cleaning of data to eliminate different types of bias and inaccuracy
5. design a survey with relevant standardised measuring instruments such as questionnaires with epidemiological contr

Subject Content

1. Basic epidemiological concepts
2. The development of modern epidemiology
3. International and large area epidemiology/health surveillance
4. Rapid epidemiological assessment: regression analysis, association analysis, and risk analysis
5. Methods of collecting quality data for small area studies: data sourcing and supplementation through methods such as surveys and technical studies
6. Study design and sampling
7. Graphical representation of contributory and risk factors associated with selected health states
8. The structure and use of an epidemiological investigation protocol

Assessment

PUBH 2012 Health Care Systems

Credit Points 10

Legacy Code 400965

Coordinator Alfred Colvin (https://directory.westernsydney.edu.au/search/name/Alfred_Colvin/)

Description The tools of economic appraisal and decision making permeate all aspect of modern life. Reliance on economic analysis is highly evident in contemporary health care systems. The funding and provision of health care/services is continually changing and subject to ever increasing demand for limited and finite resources. The unit explores, examines and reviews the impact these limitations have on selected health care systems. Students are encouraged to research and examine their own and other health care systems and investigate the differences in access, equity, and efficiency. Practical, contemporary and applied case studies/examples are continuously utilised and students are encouraged to channel the knowledge gained into key areas of interest at the macro and micro level.

School Health Sciences

Discipline Health Promotion

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects BUSM 2019 - Health Care Systems

Learning Outcomes

On successful completion of this subject, students should be able to:

1. explain the tools of economic appraisal and decision making and how they are used comparatively within health care systems; [graduate attributes- information literacy, has in depth knowledge in one or more chosen fields of study]
2. identify the impact the tools of economic appraisal have at the macro and micro level within selected and chosen health care systems; [graduate attributes-information literacy, understands the local and international relevance of their chosen field of study]
3. apply the knowledge gained in the subject to practical and contemporary case studies/examples;[graduate attributes-information literacy, understands the values and principles of scholarly inquiry; integrates theoretical and practical knowledge to analyse and solve complex and novel problems]
4. identify and discuss the key challenges faced by a health care system when allocated limited and finite resources to health care/services; [graduate attributes ? engages effectively in advancing knowledge both independently and collaboratively; understands and values ethical conduct, intellectual integrity, and professionalism in work and civic life; engages responsibly in work and civic life with respect for diversity and social justice principles]
5. relate the knowledge gained in the subject to key areas of interest that enable and enhance health care/services [graduate attributes-

can initiate and contribute positively to sustainable change in a diverse and evolving world]

Subject Content

1. Economics and health economics:
 - distinctive characteristics
 - historical and contemporary impact on health care systems
 - health care as A commodity/health care as A right
2. Macro tools of economic appraisal and decision making:
 - allocation of scarce resources, opportunity cost and priority setting
 - application within selected and chosen health care systems
3. Micro tools of economic appraisal and decision making:
 - cost benefit analysis, cost effectiveness analysis, cost utility analysis and quality adjusted life years
 - application Utilising specific examples relevant to The key program areas
4. One or two contemporary case studies of the use of health economics in decision making and the impact on health status and health outcomes. Areas of discussion could include:
 - public/private provision of health
 - private health Insurance
 - provision and funding of allied health services
 - provision of pharmaceuticals/Screening
5. No models or blueprints:
 - challenges
 - solutions

Teaching Periods

PUBH 2015 Mental Health in the Community (Block Mode)

Credit Points 10

Legacy Code 101773

Coordinator Rashid Flewellen Jr (https://directory.westernsydney.edu.au/search/name/Rashid_Flewellen_Jr/)

Description Mental health service delivery in the community is now the main form of care for people across the lifespan living with mental and emotional disorders. The development of a wider range of pharmacological, psychological and psychosocial treatments has enabled many people to live productively in the community. This unit explores the changes in policy and practice in the development of integrated mental health care and the impact of these changes on the lives of people living with mental illness and their communities. Early intervention, resilience and community capacity building are concepts explored in this unit in terms of mental health and wellbeing. The unit explores these issues with a focus on Aboriginal and Torres Strait Islander communities and mental health.

School Social Sciences

Discipline Community Health

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects LGYA 7541 - Community Mental Health Services
BEHV 2008 - Mental Health in the Community

Restrictions Students must be enrolled in 1689 Bachelor of Community and Social Development and must have successfully completed 60 credit points at Level 1.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the theories and discourses underlying contemporary mental health care and treatment
2. Demonstrate an understanding of and explain major mental health disorders
3. Argue the importance of early intervention and evidence based treatment and management of mental health disorders
4. Critically describe the significant policy changes and implications for mental health service delivery in recent years
5. Recognise the presentation of mental illness and emotional disorders in clients in community settings
6. Demonstrate understanding of the issues and challenges for Aboriginal and Torres Strait Islander communities of mental health services and treatment

Subject Content

Mental health: contemporary theories, policy and practice issues

Mental health literacy

Legal aspects of mental health practice

Developmental perspectives of mental health

Mental health and the criminal justice system

Psychopharmacological and other interventions in mental illness

Significant mental health illnesses

Coordinator John Bidewell ([https://directory.westernsydney.edu.au/search/name/John Bidewell/](https://directory.westernsydney.edu.au/search/name/John%20Bidewell/))

Description This is a flexible learning unit that deals with foundational concepts and issues relating to public health. The philosophical and historical development and the roles of public health in Australia are examined, as are the theories, policies, politics and principles that govern and inform practice. Emphasis is placed on understanding health issues and concerns in Greater Western Sydney Region as well as on national and international contexts of population health. The unit draws on current and emerging practical situations to highlight the dynamic yet continuing legacy of public health.

School Health Sciences

Discipline Public Health

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the theories, politics, policies and principles which govern and inform public health practice;
2. Evaluate the various approaches inherent in different public health movements;
3. Identify and analyse issues and concerns that influence the health of the Australian community and Greater Western Sydney in particular;
4. Discern and evaluate the appropriateness of public health responses to a current health need and/or problem;
5. Compare and contrast concepts of health as an investment and health as a social justice issue;
6. Investigate and describe multi-sectoral work in public health action.

Subject Content

- meaning and Importance of public health as area for scientific inquiry, health policy and practice.

- History of public health as a concept; changing approaches to public health policy and practice.

- Philosophical, political, economic, Ethical Issues concerning public health.

- Individualistic and social approaches to public health practice.

- principles and skills of public health practice.

- Different models of public health practice (e.g., primary, secondary and tertiary prevention).

- current Global, national and local public health Issues and concerns.

- Case studies of specific groups and communities (e.g., men's health, carers' health and Indigenous Australians' health).

Assessment

PUBH 3003 Contemporary Issues in Public Health

Credit Points 10

Legacy Code 401194

Coordinator Catharine Fleming ([https://directory.westernsydney.edu.au/search/name/Catharine Fleming/](https://directory.westernsydney.edu.au/search/name/Catharine+Fleming/))

Description This unit focuses on contemporary issues in public health. These priority concerns include chronic and age-related disease, communicable disease, mental health, sexual and reproductive health, child and maternal health, indigenous health, migrant health and environmental health. You will bring together your knowledge in public health, epidemiology, sociology and economics to identify and evaluate social and environmental factors that affect these health issues. By evaluating effectiveness of current public policy you will make recommendations for policy and program development to improve outcomes for contemporary health issues. These topics will be explored in national and international contexts.

School Health Sciences

Discipline Public Health

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) PUBH 2016 AND PUBH 2010

Assumed Knowledge

Fundamentals of public health, social determinates of health and the Australian health care system; and the fundamentals of epidemiology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and evaluate the relative contributions of economic, social and environmental factors affecting health in the contemporary world.
2. Compare and contrast contemporary health issues in national and international contexts.
3. Examine how epidemiology and big data shapes policy decisions and contributes to evidence-based public health practice in the contemporary era.
4. Analyse the different roles/approaches to public health intervention to address contemporary health issues.
5. Critically appraise the effectiveness and role of public health policy in the contemporary era using evidence-based practice.
6. Hypothesise public health intervention (policy or program) to improve outcomes for a contemporary health issues.

Subject Content

1. Epidemiology
2. Chronic disease and ageing
3. Communicable disease
4. Mental health
5. Sexual and reproductive health
6. Maternal and child health
7. Indigenous health
8. Migrant health
9. Environment and health

10. The changing face of public health and future practice considerations

Assessment

PUBH 3005 Disaster and Emergency Management

Credit Points 10

Legacy Code 300880

Coordinator Maggie Davidson ([https://directory.westernsydney.edu.au/search/name/Maggie Davidson/](https://directory.westernsydney.edu.au/search/name/Maggie+Davidson/))

Description This unit explores the management of planning and preparation for and community responses to disasters and emergencies. Through case studies and presentations from current and cutting-edge professional practitioners in the field, students develop a 'hands on' understanding of risk assessment and prevention strategies for community safety during times of critical incidents. This includes emergency management strategies for community recovery and public

education and preparation for potentially critical incidents. Workshop activities facilitate collaborative student learning through the use of developing scenarios including infectious disease pandemics, natural disasters and manmade emergencies such as terrorism.

School Science

Discipline Environmental Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 6064 - Environment Health and Emergency Management PUBH 3004 - Disaster and Emergency Management

Restrictions Successful completion of 60 credit points at Level 1 and 40 credit points at Level 2. Students are required to have access to a personal computer.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the inter-sectoral and trans-disciplinary arrangements for the assessment of and response to Environmental Health risks associated with the breakdown of urban infrastructure including power supplies, access to safe food and water and sewage treatment
2. Work collaboratively and across professions to ensure the currency of inter-agency emergency management systems for community protection/recovery
3. Apply appropriate risk assessment strategies in planning for community safety during critical incidents
4. Plan for effective communication and appropriate public education for emergency prevention and community recover
5. Plan for and implement inter-agency and trans-professional collaboration in risk prevention for community safety during critical incidents
6. Critique and update existing Disaster and Emergency Management plans for responding to disasters, emergencies and critical incidents at a local level

Subject Content

1. Definitions and categories of emergencies, disasters and critical incidents
2. Investigation and inquiry into the role of different agencies in preparing for, responding to and recovering from emergencies and disasters
3. The use of case studies to explore the strengths and weaknesses of emergency management strategies
4. Urban Infrastructure for communities ? environmental health risk assessment (safe water, sewerage services, power & food supply)
5. Planning prevention strategies for community safety
6. Critical incident types & environmental health risk assessment (pre-incident planning systems, environmental health protection strategies)
7. Emergency management systems for community protection/ recovery
8. Public education for community emergency prevention planning
9. Role of professional practitioners in critical incident management planning (such as pollution, fire, flood and earthquake)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Short Answer	1500 +/- 10%	20	N	Individual
Presentation	10 minutes + questions	20	N	Group
Report	2500 +/- 10%	50	N	Individual
Quiz	3 questions - 5 quizzes worth 2% each	10	N	Individual

PUBH 3007 Disease Prevention and Control

Credit Points 10

Legacy Code 300867

Coordinator Maggie Davidson ([https://directory.westernsydney.edu.au/search/name/Maggie Davidson/](https://directory.westernsydney.edu.au/search/name/Maggie%20Davidson/))

Description Globally we are witnessing an epidemiological transition with the emergence and re-emergence of diseases through social, political and environmental changes including rapid urbanisation, social media influence, international migration/travel, political instability and climate change. This unit of study will provide students with an introduction into the epidemiology of public health diseases of significance in Australia and internationally through exploration of current strategies for the detection, monitoring and control of existing and emerging diseases. The principles of risk management will also be discussed and applied in relation to disease prevention, containment or eradication including vector-borne, vaccine preventable, zoonotic, food and waterborne disease.

School Science

Discipline Environmental Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects PUBH 3006 - Disease Prevention and Control

Assumed Knowledge

A background knowledge of microbiology, and epidemiology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the underlying principles of disease prevention and control (physical, chemical, biological and social)
2. Discuss the role of social, environmental and political factors in the transmission, propagation, prevention and control of disease

3. Research and apply data on specific disease prevention and control issues from relevant scholarly, government and industry sources.
4. Interpret principles of risk assessment and risk management in relation to select environmental health risks and hazards
5. Evaluate the epidemiology and significance of selected communicable diseases both locally and globally
6. Investigate and prepare risk management response for selected communicable disease/public health hazards in relation to relevant public health legislation.

Subject Content

- Epidemiological principles of disease prevention, surveillance, investigation and control
- The nature, transmission and control of communicable diseases of public health importance
- Risk management and Risk communication in prevention and control of infectious diseases
- interpretation of Epidemiological data on disease surveillance and outbreaks
- social, political and environmental Factors in disease prevention and control. Australian disease surveillance and control programs

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Participation	Weekly	20	N	Group
Report	1500 +/- 10%	20	N	Individual
Report	2,000 words	50	N	Individual
Short Report	500 words +/- 10%	10	N	Individual

Prescribed Texts

- There is no specific textbook that the students are expected to purchase. All readings will be orientated towards articles published within international peer-reviewed journals to which Western Sydney University subscribes.
- However, students are expected to read this introductory text, which is free to download:
- Shaw, M., Dorling, D., & Mitchell, R. (2001). Health, Place and Society. Harlow, Essex: Pearson Education Limited. http://www.sasi.group.shef.ac.uk/publications/healthplacesociety/health_place_and_society.pdf
- Students are also required to familiarise themselves with this document (also free to download):
- CSDH (2008). Closing the gap in a generation: health equity through action on the social determinants of health. Final Report of the Commission on Social Determinants of Health. Geneva, World Health Organization http://whqlibdoc.who.int/publications/2008/9789241563703_eng.pdf

PUBH 3008 Drugs in Sport

Credit Points 10

Legacy Code 400963

Coordinator Karen Lambert ([https://directory.westernsydney.edu.au/search/name/Karen Lambert/](https://directory.westernsydney.edu.au/search/name/Karen%20Lambert/))

Description This unit examines the dominant issues and discourse around the use of drugs in sport. The focus will be on exploring the socio-cultural, political and personal reasons why drugs are used in sport from the perspective of athletes, coaches, administrators and educators. Students will need to continually reflect upon their own practices and beliefs around drug use and sport. The unit offers challenging and relevant theoretical and practical experiences to students from a variety of professional backgrounds.

School Health Sciences

Discipline Health Promotion

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects CEDS 3002 - Drugs in Sport

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse significant historical, ethical and cultural influences on drug use in sport.
2. Clarify personal values and beliefs concerning drug use in society and sport.
3. Explain the roles, structures and policies and procedures of national and international administrative bodies with regards to banned substances and methods and testing practices.
4. Examine the role of education, educators and the community in addressing drug issues in sport.
5. Critically apply knowledge, skills and attitudes regarding drugs in sport to their professional practice.
6. Suggest and justify suitable alternatives and solutions to current drugs in sport issues.

Subject Content

- drug use in Australian society
- sport in Australian society
- history of drugs in sport
- drug policy in Australia and Harm minimisation

- national and international Organisations Roles and responsibilities
- Ergogenic AIDS and their effects on performance
- doping policies and drug testing
- The social, cultural and political perspective of drug use in sport
- education

Teaching Periods

PUBH 3010 Health Planning Project

Credit Points 10

Legacy Code 400275

Coordinator Katherine Kent ([https://directory.westernsydney.edu.au/search/name/Katherine Kent/](https://directory.westernsydney.edu.au/search/name/Katherine%20Kent/))

Description This unit extends the theoretical concepts introduced in the unit, Health Politics, Policy and Planning with an emphasis on practical application and obtaining skills in health project management. It concentrates on the development of project management skills required for comprehensive assessment, planning and implementation of health programs or projects. The unit is designed so that students work collaboratively as a multidisciplinary team to develop and manage a workplace health planning project, on a current health issue identified by the health industry. Students thus develop knowledge of skills in project management, stakeholder negotiation, intergroup dynamics, committee structure and functioning, project consultation and planning and management with a deliverable outcome (report).

School Health Sciences

Discipline Public Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LGYA 7182

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Applying leadership, people management and interpersonal skills in a multidisciplinary planning committee
2. Work collaboratively as part of a multidisciplinary planning committee
3. Demonstrate project management approaches, tools and models
4. Converse in a professional manner with external stakeholders
5. Use the process of identifying the project life cycle and applying these to the project development.
6. Assess the range of resources, their availability and gaps in services (i.e. apply the gap analysis model of planning).
7. Prioritise recommendations for action.
8. Choose appropriate alternative responses/options to address prioritised issues.
9. Prepare the planning report including goals and objectives, program strategies and recommendations.

Subject Content

- ability to work in A multidisciplinary planning Committee: Roles of convener and minute taker and Committee members.
- developing professional leadership skills
- managing key stakeholders
- Project management theory and skills
- delivery of A planning report outlining Project goals, objectives and strategies for A specific health project.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

PUBH 3011 Health Politics, Policy and Planning

Credit Points 10

Legacy Code 401195

Coordinator Anna Spencer ([https://directory.westernsydney.edu.au/search/name/Anna Spencer/](https://directory.westernsydney.edu.au/search/name/Anna%20Spencer/))

Description Health professionals work in a complex health and healthcare sector governed by policy on population health and healthcare. This unit considers the role of policy in health and healthcare. It examines policy making as both a rational and linear process responding to population health needs in just and fair ways, and the reality of policy making which occurs within a complex socio-political and economic environment, shaped by powerful groups. The aim of this unit is therefore to consider how health professionals can

develop effective policy and the role advocacy can play in the health policy arena to engender greater health equity.

School Health Sciences

Discipline Health Promotion

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects PUBH 2013 - Health Politics Policy and Planning
LGYA 7182 - Health Politics Policy and Planning

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse health policies and the policy making process
2. Identify the role of politics in the policy making process and demonstrate how it influences health outcomes for populations
3. Identify and demonstrate how context e.g. socio-political, historical, ideological and economic factors shape Australian health policy
4. Assess the role of quantitative and qualitative research in relation to health policy making
5. Evaluate the role of major interest groups (advocacy and lobbyists) in the policy making process
6. Identify the health policy needs of vulnerable populations
7. Develop an understanding of and skills in health advocacy work
8. Utilise interprofessional health competencies in communication, negotiation, cooperation and teamwork

Subject Content

1. Defining policy
2. Goals, purpose and scope of health policy.
3. Historical and political aspects of Australian health policy and health care system.
4. Funding arrangements and levels of responsibility.
5. Ideological approaches to health including health care provision.
6. Structural interest groups, pressure groups and political processes.
7. Public policy types e.g. distributive, regulatory, self-regulatory or redistributive.
8. Healthy public policy.
9. Policy co-ordination and intersectoral collaboration.
10. Theories of power, choice/decision-making and the concept of rationing.
11. The politics of policy making
12. Policy making process and what is good health policy.
13. The agency of groups and individuals to challenge power and bring about policy change
14. Lobbying and its impact on the public health agenda and policy formulation
16. Interest groups and advocacy
17. Community participation/active citizenship and empowerment in health
18. Research in policy making

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Essay: Critical Analysis of a Health Policy	1,000 words	30	N	Individual
Proposal and Presentation: Advocating for a Vulnerable Population	Proposal 1,000 words and 20 minute presentation	30	N	Group
Final Quiz	Take home quiz	40	N	Individual

PUBH 3012 Health Promotion Practice 1

Credit Points 10

Legacy Code 400784

Coordinator Justin Guagliano ([https://directory.westernsydney.edu.au/search/name/Justin Guagliano/](https://directory.westernsydney.edu.au/search/name/Justin%20Guagliano/))

Description This unit builds on the knowledge gained in Approaches to Health Promotion. It provides the opportunity to apply health promotion theory to practical projects in the field related to current population health priorities, through 120 hours service learning experience. It is concerned with developing knowledge and skills related to needs analysis, prioritising, and awareness of core values and principles associated with health promotion practice.

School Health Sciences

Discipline Health Promotion

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) PUBH 2001 or
PUBH 1010

Restrictions Students must be enrolled in 4656 B Health Science/6000 Dip Health Science/B Health Science (Health Promotion)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Integrate communication, professionalism and ethical skills towards effective health promotion practice
2. Identify elements of best practice in health promotion and their application to contemporary health promotion practice
3. Critically evaluate a range of appropriate sources and techniques for gathering information on community health needs
4. Analyse data to effectively determine community health needs
5. Identify relevant partners and networks for health promotion

6. Apply health promotion competencies, core values and principles to plan feasible and innovative strategies targeting community health needs
7. Present to peers on a health promotion initiative
8. Demonstrate appropriate health promotion competencies during practical placement experience in a health promotion organisation

4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

Legacy Code 400785

Coordinator Justin Guagliano ([https://directory.westernsydney.edu.au/search/name/Justin Guagliano/](https://directory.westernsydney.edu.au/search/name/Justin%20Guagliano/))

Description This unit builds on the knowledge gained in Health Promotion Practice 1 through ongoing study of the processes required in project design and management in health promotion. The 120 hour placement provides students with the opportunity to apply health promotion theory to practical projects on current population health priorities. Students develop knowledge and skills related to implementation and evaluation of health promotion projects, highlighting the importance of the core values and principles necessary for effective and ethical health promotion practice.

School Health Sciences

Discipline Health Promotion

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) PUBH 2001 AND PUBH 3012

Equivalent Subjects LGYA 7184 - Community Development and Health

Restrictions Students must be enrolled in 4656 Bachelor of Health Science or 6000 Diploma in Health Science/Bachelor of Health Science (Health Promotion)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the elements of best practice in health promotion and how these elements can be applied to contemporary health promotion practice.
2. Identify key considerations in the project management of health promotion interventions (documentation, record keeping and partnerships).
3. Discuss a range of techniques for measuring health promotion projects (process, outputs, outcomes and impact).

4. Develop skills in conducting evaluation of community organisational capacity and social capital.
5. Identify relevant and appropriate partners and networks for involvement in evaluation of community based health promotion projects.
6. Critically analyse health promotion initiatives to ensure issues of sustainability and dissemination are addressed.
7. Explain the core values of health promotion practice and how these impact on health promotion project delivery in a community based setting.
8. Critically analyse and evaluate a health promotion project in an organisational (placement) setting.
9. Apply practical skills in collating information, grant writing and presentation of information to peers.

Subject Content

1. Methods of ensuring adequate management of the implementation of health promotion projects (documentation, record keeping, partnerships).
2. The nature of measurement in evaluation (qualitative and quantitative means of gathering information).
3. Strategies and techniques for measuring central aspects of health promotion projects (process, outputs, outcomes, impact).
4. Multi-level evaluation - measuring community and organizational capacity, social capital.
5. Sustainability issues and use of media and other forms of disseminating information.
6. Involving partners and others in evaluation of health promotion.
7. Core values and principles as applied in health promotion activities.
8. Have practical placement experience in an organisation involved in conducting evaluations of health promotion projects.
9. Developing skills at collating, analysing and presenting information to peers.
10. Grant writing.

PUBH 3014 Injury Prevention

Credit Points 10

Legacy Code 400286

Coordinator Krista Cockrell (https://directory.westernsydney.edu.au/search/name/Krista_Cockrell/)

Description Injury Prevention is a National Health Priority. Injury is the preferred term rather than 'accident' with its connotations of inevitability and lack of apparent cause, to promote development of inter-disciplinary prevention initiatives. An evidence based scientific approach to injury research and prevention is well established for road and occupational safety, supported by well resourced implementation structures. Other settings/sectors include sport, recreation, falls, firearms, farm, product and water safety, which are also seeing the benefits of injury prevention principles, but are less well developed. Injury prevention principles include thorough analysis of current data and the literature to identify what works to reduce injury rates, also use of intervention strategies termed the 4Es, (education, enforcement, engineering and environment).

School Health Sciences

Discipline Public Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) PUBH 2001

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define the nature and extent of significant injury issues.
2. Explore national and state injury prevention policies and strategies.
3. Critically analyse current responses to injury problems.

4. Apply preventive strategies, hazard management and counter measures.
5. Undertake injury prevention evaluation.
6. Advocate for injury prevention.

Subject Content

- history and philosophy of safety and injury prevention.
- multi-disciplinary perspectives on injury research and prevention.
- analysis of The Distribution of injury: The Epidemiological profile.
- Models of injury prevention.
- economics and safety in injury prevention.
- Engineering principles in injury research and prevention.
- environmental and human Factors in injury prevention.
- The role of community involvement and intersectoral action.
- injury prevention and social inequality.
- evaluation of injury prevention programs.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Critical Review: Epidemiological Profile of an injury issue	1,000 words	25	N	Individual
Critical Review: Injury Prevention or Harm Minimisation Strategy	1,000 words	35	N	Individual
Strategy Proposal (30%) and Presentation (10%)	1000 words proposal and 10 minute presentation	40	N	Individual

Coordinator Maggie Davidson ([https://directory.westernsydney.edu.au/search/name/Maggie Davidson/](https://directory.westernsydney.edu.au/search/name/Maggie%20Davidson/))

Description This unit provides students with an essential working knowledge of occupational health and safety (OHS), work health and safety (WHS) legislation and risk management required which is a requirement for graduate employment across a broad range of workplaces and industries. The unit provides a foundation in the

principles and practice of hazard identification and risk management, including an introduction to specific workplace hazards such as; moving and fixed plant, electrical, biomechanical (ergonomic), gravitational (slips, trips and falls), manual handling. Students will also explore the chemical, biological and physical hazards that may be encountered in a variety of graduate employment industries, as well as the management of health and safety hazards in relation to current WHS legislation, Codes of Practices and Australian and International Standards.

School Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects PUBH 3016 - Occupational Health and Safety

Restrictions Successful completion of 60 credit points at Level 1 and 20 credit points at Level 2.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Research information on specific occupational health, safety and welfare issues from relevant scholarly, government and industry sources.
2. Explain the underlying principles and issues of occupational health, safety and welfare.
3. Identify and discuss the management of specific occupational health & safety problems within specified industries and workplaces.
4. Engage with the substantive portions of the NSW Work Health & Safety Act, 2011 and the NSW Work Health & Safety Regulation, 2011.
5. Apply federal work health & safety and state legislation and recommend workplace procedures and practices to ensure compliance with this legislation.
6. Outline the principles involved in the identification and control of workplace hazards and risks and apply these to a specified industry.
7. Undertake a workplace safety inspection.
8. Develop an occupational health and safety policy, programme and report for a specified workplace.
9. Discuss the underlying principles of occupational health and safety.
10. Research information on specific health and safety issues from relevant scholarly, government and industry sources.
11. Apply the framework of Australian work health and safety legislation in select industries/workplaces.
12. Interpret the principles of hazard identification and risk management within specific industries and workplaces; and
13. Investigate and prepare a risk management plan for a selected health and safety hazards

Subject Content

1. Principles of health, safety and welfare
2. Researching contemporary industrial occupational health and safety issues
3. The management of specific occupational health & safety problems within specified industry sectors
4. Workplace risk assessment, hazard identification and hazard management measures
5. The application of hazard management to resolve identified workplace hazards

6. Federal Work Health & Safety legislation and workplace procedures and practices to ensure compliance with this legislation
7. Principles of prevention and management of workplace hazards
8. Industry-specific occupational health and safety policies and programs
1. Introduction to practice of occupational health and safety both locally and internationally.
2. Framework of work health and safety legislation.
3. Identifying hazards and managing risk (identification, assessment, control and review).
4. Collection and management of health and safety data.
5. Health and safety culture.
6. Topical issues in work health and safety.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

PUBH 3018 Professional Transition Project

Credit Points 10

Legacy Code 400786

Coordinator Nicole Peel ([https://directory.westernsydney.edu.au/search/name/Nicole Peel/](https://directory.westernsydney.edu.au/search/name/Nicole%20Peel/))

Description This unit is designed to assist students to make the transition from undergraduate student life to professional life. Professional Transition Project provides students with a unique opportunity to integrate knowledge gained throughout their course from an operational, practical and theoretical perspective into an engaging project. Students will engage in comprehensive projects which bring together real world opportunities and health science theory.

School Health Sciences

Discipline Public Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Restrictions Students must be enrolled in the Bachelor of Health Science or Bachelor of Health Science (Paramedicine) or 6000 Diploma in Health Science/Bachelor of Health Science. Students in the Bachelor of Health Science or Diploma in Health Science/Bachelor of Health Science must have completed 120 credit points. Students in the Bachelor of Health Science (Paramedicine) must have completed 200 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Integrate action and theory through a project
2. Develop suggestions and recommendations in response to contemporary industry based problems
3. Critically reflect on the development of professional capabilities gained throughout the course
4. Apply a team based approach to real world problem solving within a health science context
5. Demonstrate reflective oral and written skills

Subject Content

Theory and practical experience of:

1. Teamwork in a simulated health environment
2. strategic goal setting and follow through
3. identifying and problem solving industry problems
4. Critical reflection in action

Assessment

PUBH 3019 Public Health Practice

Credit Points 10

Legacy Code 401193

Coordinator Catharine Fleming ([https://directory.westernsydney.edu.au/search/name/Catharine Fleming/](https://directory.westernsydney.edu.au/search/name/Catharine_Fleming/))

Description This unit is an online equivalent of a workplace learning (placement) unit. You will engage in workplace activities with a public health organisation by using prepared resources, online discussion and videoconferencing. In this unit you will evaluate, develop and recommend public health policy or program change. The unit will involve the use of skills required to work in the public health arena; conducting needs analysis, collecting quantitative and qualitative data, facilitating stakeholder engagement, project development, management and evaluation, report writing and competent oral presentation skills, in an organisational setting.

School Health Sciences

Discipline Public Health

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) PUBH 2016

Restrictions Students must be enrolled in 4656 - Bachelor of Health Science (Public Health) or 6000 Diploma in Health Science/Bachelor of Health Science

Assumed Knowledge

Fundamentals of public health, determinants of health, Australian health system.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate current public health policy or program in an organisational setting
2. Determine policy or program effectiveness using a mixed methods approaches
3. Identify barriers to effective program implementation
4. Develop future recommendations for the public health project or policy
5. Communicate recommendations in oral and written form
6. Integrate evidence from a range of sources to support decision-making
7. Collaborate with organisational groups and individuals with professional behaviour

Subject Content

Evidence-based practice in public health
Needs analysis skills and methodologies
Policy and program development
Stakeholder engagement
Multidisciplinary collaboration
Evaluation of barriers to policy/ program success
Oral presentation skills

Special Requirements

Legislative pre-requisites

NOTE: Due to Covid Restrictions, the First Aid Requirement is currently not needed.

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.

- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

PUBH 3020 Work Health and Safety

Credit Points 10

Legacy Code 200861

Coordinator Terri Mylett (https://directory.westernsydney.edu.au/search/name/Terri_Mylett/)

Description Work Health and Safety introduces participants to work health and safety concepts, terminology, legal frameworks and research

sources. It includes practical activities around hazard identification and risk assessment. The many academic disciplines that contribute to work health and safety policy and practice will be critiqued: from epidemiology to engineering to ergonomics to employment relations. Ideologies that shape how workers, managers and organisations approach work health and safety will be examined, particularly via the notion of safety culture. This unit is designed for participants from all academic programs. Successful completion means being able to engage critically and practically in work health and safety challenges in multiple contexts, with competing stakeholder interests in mind.

School Business

Discipline Occupational Health and Safety

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 9851 - Occupational Health and Safety PUBH 3015 - Occupational Health and Safety BUSM 3049 - Occupational Health and Safety

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain how key work health and safety concepts may be applied to workplaces, organisations and society.
2. Explain the role and interests of employers, workers, representatives, inspectorates, and professional/technical experts in identifying, assessing and managing risk.
3. Investigate information pertaining to identifying, assessing and managing risk in ways that are legally compliant.
4. Describe significant aspects of contemporary work health and safety regulation via legislation and Codes of Practice.
5. Provide reasoned arguments in the area of contemporary work health and safety management in terms of risk assessment and hazard control that take account of stakeholder interests.

Subject Content

1. The importance of work health and safety and stakeholder interests.
2. Causes of adverse events and losses.
3. Hazard identification, risk assessment and work health and safety management systems.
4. Ideologies, blame, and systems approaches.
5. Multidisciplinary contributions to work health and safety.
6. Psychosocial hazards and health.
7. Worker participation and industrial relations.
8. The legal framework.
9. Key features of the Work Health and Safety Act 2011 (NSW).
10. Safety culture.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

PUBH 3021 Air Pollution & Control

Credit Points 10

Legacy Code 301276

Coordinator Maggie Davidson ([https://directory.westernsydney.edu.au/search/name/Maggie Davidson/](https://directory.westernsydney.edu.au/search/name/Maggie%20Davidson/))

Description Air Pollution and Control introduces students with an interest in working in the fields of environmental science, environmental consulting, environmental management and environmental health to the basic principles and practices of air quality assessment and management. Air pollution does not recognise socio-political boundaries, and air pollutants transfer intercontinentally through pathways both close to the Earth's surface and upper atmosphere. Air Quality management represents a major challenge facing humanity because it poses a threat to human health, agriculture and environmental sustainability, as it can penetrate even remote and once pristine environments. As such, air pollution management and control is of International, National, State and Local government and community concern. This unit critically analyses the natural and anthropogenic sources of air pollution, their nature, health and environmental impacts, monitoring, regulation and control.

School Science

Discipline Environmental Health

BIOS 2022 AND
BIOS 1012

Incompatible Subjects PUBH 3002 Air Quality and Climate Change

Restrictions Students must have achieved 80 credit points to enrol in this subject which is intended for 3rd year students.

Assumed Knowledge

Basic chemistry, biology and microbiology.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Appraise and categorise human and natural sources of air pollution
- Identify, define and compare tools for regulatory assessment and research of air pollution (ambient, public health and occupational exposures).
- Interpret the impact of meteorology on air pollution in a local area.
- Discuss the health effects associated with criteria of National Environmental Pollution measures (NEPMs) defined as air pollutants and air toxics.
- Evaluate the major sources of air pollution
- Compare and contrast basic air modelling techniques.
- Design baseline indoor air quality assessment
- Prepare a critical literature review of an ambient, public health or occupational air quality issue.

Subject Content

- Sources of Air Pollution (natural and anthropogenic)
- Health Impacts of Air Pollutants
- Interaction between meteorology and air pollution
- Air quality assessment tools
- Introduction to air pollution modelling
- Air Quality regulation and policy
- Interpretation and application criteria, occupational and public health air quality exposure limits
- Indoor Air Quality
- Odour Assessment
- Emerging issues

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

PUBH 3022 Advances and Challenges in Health Promotion

Credit Points 10

Legacy Code 401380

Coordinator Freya Macmillan ([https://directory.westernsydney.edu.au/search/name/Freya Macmillan/](https://directory.westernsydney.edu.au/search/name/Freya%20Macmillan/))

Description This unit presents current advances and challenges in health promotion. Advances in technology are critiqued with regards to their positive and negative contribution to health promotion. This unit also reviews social marketing strategies and how these can be used in health promotion campaigns. Complexities in working with vulnerable communities in different settings are explored including schools, workplaces, communities (including Indigenous, culturally and linguistically diverse, refugee and homeless groups), healthcare settings, rural/remote areas and prisons. New patterns in health and their challenges are covered. Ethical and political considerations in health promotion are also included.

School Health Sciences

Discipline Health Promotion

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) PUBH 3026 AND PUBH 1010

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Communicate effectively and act ethically and professionally in health promotion practice;
2. Justify the elements of best practice in health promotion and recommend how these elements can be applied to health promotion practice;
3. Apply skills in grant writing to an area of health promotion advancement;
4. Create a social marketing campaign to target a current challenge in health promotion;
5. Critically analyse the ethical values and principles underpinning health promotion;
6. Critically appraise issues of power and politics in health promotion policy and practice;

Subject Content

1. Health Promotion Competencies
2. Marketing HP programs
3. Sustainability issues and use of media and other forms of disseminating information

4. New patterns of health in Australia and globally and their challenges
5. Advances and challenges in settings-based approaches in HP
6. Grant writing
7. Ethical dilemmas in current HP Analyse
8. Issues of politics and power in health and health promotion

Assessment

PUBH 3023 Evidence in Professional Reasoning

Credit Points 10

Legacy Code 401384

Coordinator Nerida Klupp ([https://directory.westernsydney.edu.au/search/name/Nerida Klupp/](https://directory.westernsydney.edu.au/search/name/Nerida%20Klupp/))

Description In this unit, you will incorporate the evidence knowledge and skills developed in previous units into professional practice. The evidence-based practice process manages expanding and uncertain knowledge by formulating answerable questions, effectively searching literature, critically appraising evidence and applying and evaluating its significance in clinical practice and healthcare decision-making. Professional reasoning requires consideration of best available evidence, client or patient perspectives, professional expertise and practice context. You will learn professional reasoning for shared decision-making and safe and effective communication for patient scenarios relevant to your program.

School Health Sciences

Discipline Public Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) Students need to have done HLTH 2021 Research Methods PLUS ONE clinical unit from their specific program This will be one of four possible units

HLTH 1012 Evidence in Health

HLTH 2024 Research in Health

REHA 2007 Podiatry Pre-Clinical Students enrolled in Course Code 4661 (Continuing) or 4708 (Current) must have completed this unit

REHA 2004 Occupational Therapy Practice 2 Students enrolled in Course Code 4663 (Continuing) or 4711 (Current) must have completed this unit

REHA 3003 Clinical Education General Students enrolled in Course Code 4662 (Continuing) or 4706 (Current) must have completed this unit

Equivalent Subjects HLTH 3005 Evidence-based Practice

Incompatible Subjects PUBH 4001 Evidence in Professional Reasoning (Honours)

HLTH 4002 Evidence-based Practice (Advanced)

Restrictions Students must be enrolled in one of the programs 4660,4661, 4662, 4663, 4706, 4708, 4710, 4711, 4763 or 4656

Assumed Knowledge

Foundation-level knowledge and skills in research and evidence research methods and clinical knowledge gained in at least one clinical subject of the student's program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Conduct sensitive and specific PICO search strategy to find best available evidence
2. Justify selection of best available evidence by suitability, strength and relevance
3. Evaluate clinical significance of best available evidence
4. Determine whether the degree of evidence justifies the clinical intervention.
5. Incorporate evidence into professional reasoning and decision making processes
6. Negotiate evidence-informed shared decision-making

Subject Content

1.Exploring reasons for Evidence-based practice (EBP)

a.Management of professional disagreement, situation effects and bias

b.Management of information overload

c.Management of information uncertainty

2.Appraising evidence in practice

For studies of interventions, diagnostic tests, aetiology, prognosis, and experiences

a.Relevance

b.Strength of evidence

c.Statistical and clinical significance

d.Generalisability, applicability and usefulness

e.Grading a body of evidence

f.PICO Framework

3.Professional reasoning

a.Relative reasoning between evidence, expertise, patient perspectives and practice context

b.Limitations of EBP paradigm

c.Communicating evidence to clients

d.Evidence-informed shared decision-making

e.Evaluation of professional reasoning

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Teaching Periods

PUBH 3024 Harm Minimisation and Prevention

Credit Points 10

Legacy Code 401387

Coordinator Krista Cockrell ([https://directory.westernsydney.edu.au/search/name/Krista Cockrell/](https://directory.westernsydney.edu.au/search/name/Krista%20Cockrell/))

Description Injury and harm have been recognised as contributing factors to the Global and Australian Burden of Disease and Injury and have been identified as a National Health Priority in Australia. To effectively measure the impact of injury and harm, and develop prevention strategies, insight and understanding of the causes, risk factors, Disability Adjusted Life Years (DALYs) and Quality Adjusted Life Years (QALYs) must be taken into consideration. Evidence-based approaches to injury prevention and harm minimisation must be applied and effectively communicated to stakeholders of differing capacities and viewpoints. This unit utilises injury prevention and harm minimisation theory, case-based and project-based learning to challenge future public health leaders to develop effective injury prevention and harm minimisation strategies and also to communicate their message effectively, navigating the complexities of differing worldviews and stakeholder responsibilities.

School Health Sciences

Discipline Public Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects PUBH 3014 - Injury Prevention

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the nature and extent of significant injury and harm-related issues;
2. Examine national and state injury prevention and harm-reduction policies and strategies;
3. Critically analyse current responses to injury and harm-related issues;
4. Apply preventive strategies, hazard management and counter measures;
5. Demonstrate evidence-based approaches to injury prevention and harm minimisation.

Subject Content

History and philosophy of safety and injury prevention and harm minimisation

Evidence based models/strategies of injury prevention and harm minimisation

Analysis of the epidemiological profile of public health issues which benefit from harm reduction and prevention

- injury
- drug use
- Gambling
- Domestic violence
- youth alcohol use

The role of community involvement and intersectional action

The social context of prevention and harm minimisation

The importance of multi-disciplinary perspectives and involvement for harm minimisation and injury prevention addressing conflicting viewpoints, political and cultural

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Epidemiological profile of an injury or harm-related issues	1500 words	25	N	Individual
Critical review of a current injury prevention or harm minimisation strategy or program	1,000 words	35	N	Individual
Proposal (20%) and Presentation (20%)	1,000 words and 10 minutes	40	N	Individual

PUBH 3025 Health Policy and Advocacy

Credit Points 10

Legacy Code 401390

Coordinator Catharine Fleming (https://directory.westernsydney.edu.au/search/name/Catharine_Fleming/)

Description Health professionals work in a complex sector governed by policy on population health and healthcare. This unit considers the role of policy in international and national healthcare. It examines policy making as both a rational and linear process responding to population health needs in just and fair ways, and the reality of policy making which occurs within a complex socio-political and economic environment shaped by powerful groups. Therefore, the aim of this unit is to consider how health professionals can develop effective evidence-based policy and the role advocacy can play in the health policy arena to engender greater health equity.

School Health Sciences

Discipline Health Promotion

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) PUBH 1012 OR PUBH 1010

Equivalent Subjects PUBH 2013 - Health Politics Policy and Planning LGYA 7182 - Health Politics Policy and Planning PUBH 3011 - Health Politics Policy and Planning

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse international and national health policies and the policy making process;

2. Identify the role of politics in the policy making process and demonstrate how it influences health outcomes for populations;
3. Identify and demonstrate how context e.g. socio-political, historical, ideological and economic factors shape Australian health policy;
4. Determine how quantitative and qualitative research can inform and create evidence-based health policy;
5. Evaluate the role of major interest groups (advocacy and lobbyists) in the policy making process;
6. Identify the health policy needs of vulnerable populations;
7. Develop an understanding of and skills in health advocacy work;
8. Demonstrate inter professional health competencies in communication, negotiation, cooperation and teamwork.

Subject Content

- Defining goals, purpose and scope of health policy
- historical and political aspects of international and Australian health policy and health care system
- ideological approaches to health including health care provision
- structural interest groups, pressure groups and political processes
- public policy types e.g. Distributive, Regulatory, self-Regulatory or redistributive
- policy co-ordination and intersectoral collaboration
- theories of power, choice/decision-making and The concept of rationing
- The politics of policy making
- The role of Advocacy in creating change to public policy
- evidence based policy making process and what is good health policy
- examine how research shapes policy decisions
- The agency of groups and individuals to Challenge power and bring about policy change
- lobbying and its impact on The public health agenda and policy formulation
- interest groups and Advocacy
- community participation/active Citizenship and empowerment in health

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Multiple Choice	1 hour	15	N	Individual
Critical Review	1,000 words	30	N	Individual
Submission and Presentation	800 words and 15 minute presentation	30	N	Group
Report	500 words	25	N	Individual

PUBH 3026 Health Promotion Planning and Implementation

Credit Points 10

Legacy Code 401391

Coordinator Freya Macmillan ([https://directory.westernsydney.edu.au/search/name/Freya Macmillan/](https://directory.westernsydney.edu.au/search/name/Freya+Macmillan/))

Description This unit builds on the knowledge gained in Health Promotion: Theory and Approaches. It is concerned with developing knowledge and skills related to undertaking needs analysis at community and population levels. It focuses on planning and implementing interventions aligned with core values and principles necessary for ethical health promotion. The need for evaluation throughout this process is emphasised.

School Health Sciences

Discipline Health Promotion

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) PUBH 1010

Incompatible Subjects PUBH 3012 - Health Promotion Practice 1
PUBH 3013 - Health Promotion Practice 2

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse data from a range of appropriate sources to effectively determine community health needs;
2. Apply a range of quantitative, qualitative and mixed-method techniques to gather information on community health needs and to evaluate health promotion projects;
3. Plan appropriate evaluation of health promotion interventions;
4. Plan, implement and manage feasible, innovative, evidence-based strategies targeting community health needs.

Subject Content

1. Theoretical basis of needs analysis and approaches in health promotion
2. Knowledge of sources of information and practice of techniques for gathering information (sourcing data, community mapping, focus groups, interviews, community meetings)

3. Approaches to collating, analysing and presenting information based on health needs
4. Approaches to planning health promotion projects, including developing logic models and considering core values in health promotion (participation, capacity building, social justice, diversity)
5. Methods of ensuring adequate management of the implementation of health promotion projects (documentation, record keeping, utilising networks and partnerships)
6. Qualitative, quantitative and mixed-method techniques for measuring central aspects of health promotion projects (process, outputs, outcomes, impact) and multi-level evaluation (measuring community and organizational capacity, social capital)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Poster	1,000 words and 5 minutes presentation	35	N	Individual
Report	1,500 words	35	N	Individual
Quiz	2 x 20 MCQs	30	N	Individual

PUBH 3027 Public Health in a Changing World

Credit Points 10

Legacy Code 401397

Coordinator Catharine Fleming ([https://directory.westernsydney.edu.au/search/name/Catharine Fleming/](https://directory.westernsydney.edu.au/search/name/Catharine%20Fleming/))

Description This unit engages students to explore public health in relation to dynamic social, political, economic, environmental and cultural contexts. Students will critique research, policy, practice and evaluation processes to identify their impact on health practices and health outcomes over time. Using their knowledge in public health, epidemiology, sociology and economics students will be required to identify and articulate gaps in current health care and learn to develop a plan towards addressing them. The unit will engage students in reflecting on the future of health care across national and international contexts. Priority health issues that will be discussed in this unit may include chronic and age-related disease, communicable disease, mental health, sexual and reproductive health, child and maternal health, Indigenous health, migrant and refugee health, and environmental health.

School Health Sciences

Discipline Public Health

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) PUBH 1012 AND PUBH 2010

Equivalent Subjects PUBH 3003 - Contemporary Issues in Public Health

Assumed Knowledge

Fundamentals of public health, social determinants of health and the Australian health care system, and the fundamentals of epidemiology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and evaluate the influence of dynamic factors affecting health, wellbeing and disease in a changing world;
2. Compare and contrast contemporary health issues in national and international contexts;
3. Examine how research shapes responses to health, wellbeing and disease over time;
4. Analyse the different professional roles and approaches to public health practice to address contemporary health issues;
5. Critically appraise the role of public health in addressing gaps in health practice and health outcomes over time;
6. Develop a public health program that builds on the present to address the health and wellbeing needs of people in the future.

Subject Content

1. Changing patterns of health, wellbeing and disease
2. Chronic disease and ageing
3. Communicable disease
4. Mental health
5. Sexual and reproductive health
6. Maternal and child health
7. Indigenous health

8. Migrant and refugee health
9. Environmental health
10. Evidence-based responses to changing patterns of health, wellbeing and disease

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Participation	10 weekly tutorial activities. Starts in week 3.	10	N	Individual
Literature Review	1,500 words	30	N	Individual
Applied Project	1,500 words	30	N	Individual
Presentation	15 minutes	30	N	Individual

PUBH 3028 Transforming Health

Credit Points 10

Legacy Code 401405

Coordinator Amit Arora (https://directory.westernsydney.edu.au/search/name/Amit_Arora/)

Description This unit focuses on utilising previously acquired health science knowledge and skills to identify, co-design and create innovative ways to address a current health issue identified by the health industry. Students will consider interventions, projects, research proposals and recommendations on service delivery options. The unit requires students to work collaboratively with multiple stakeholders to plan, manage, deliver and review a simulated project. Students thus develop and apply knowledge and skills in leading and managing health projects, stakeholder negotiation, committee structure and functioning, project consultation, planning and management with a deliverable outcome such as a report or research proposal.

School Health Sciences

Discipline Public Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects PUBH 3010 Health Planning Project

Restrictions Students must be enrolled in 4656 Bachelor of Health Science or 6000 Diploma in Health Science/Bachelor of Health Science and have completed 160 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply and critique different design and co-design frameworks to manage health issues
2. Demonstrate leadership, people management and interpersonal skills
3. Demonstrate health project management approaches, tools, models or research methodologies for a chosen health issue
4. Engage collaboratively, in a professional manner, with internal and external stakeholders
5. Apply and critique implementation science or change management theory
6. Evaluate a range of resources, their availability and gaps in services
7. Prioritise recommendations for action
8. Plan budgets, time, and risk management related to health projects
9. Prepare a planning report or proposal in an appropriate professional or scientific format

Subject Content

1. Applying co-design methods and innovative advances in health to critical real life population health issues
2. Design Thinking as a creative solution-oriented approach to problems
3. Consideration of outcomes that may transform and address health issues - program tools, assessments, policy and strategy, and frameworks
4. Professional leadership and management in a collaborative design thinking context
5. Effective partnerships with key health industry stakeholders and management of key stakeholder expectations
6. Health project management theory, process and skills
7. Budget, time, and risk management of health projects
8. Effective collaboration; roles of convenor, minute taker and committee members.
9. Implementation science and change management
10. Applied research methods (via pods)
11. Scientific writing
12. Ethical conduct

Assessment

PUBH 4001 Evidence in Professional Reasoning (Honours)

Credit Points 10

Legacy Code 401379

Coordinator Rosalind Bye (https://directory.westernsydney.edu.au/search/name/Rosalind_Bye/)

Description In this unit, students will incorporate the evidence knowledge and skills developed from previous units into professional practice. The evidence-based practice process manages expanding and uncertain knowledge by formulating answerable questions, effectively searching literature, critically appraising evidence and applying and evaluating its significance in clinical practice and healthcare decision-making. Professional reasoning requires consideration of best available evidence, client or patient perspectives, professional expertise and practice context. Students will learn professional reasoning for shared decision-making, and safe and effective communication for patient scenarios relevant to your program. Students will study the theory and application of research methods to honours research in their chosen field, and practise the skills to analyse evidence in the health sciences.

School Health Sciences

Discipline Public Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) HLTH 2024

Equivalent Subjects HLTH 4002 - Evidence-based Practice (Advanced)

Incompatible Subjects HLTH 3005 - Evidence-Based Practice
PUBH 3023 - Evidence in Professional Reasoning

Restrictions Students must be enrolled in 4709 Bachelor of Podiatric Medicine (Honours), 4712 Bachelor of Occupational Therapy (Honours), 4733 Bachelor of Physiotherapy (Honours) or 4764 Bachelor of Speech Pathology (Honours).

Assumed Knowledge

Foundation level knowledge and skill in research and evidence, research methods and clinical knowledge obtained in at least one clinical subject of the student's program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Conduct sensitive and specific PICO search strategy to find best available evidence;
2. Justify selection of best available evidence by suitability, strength and relevance;
3. Evaluate clinical significance of best available evidence;
4. Determine whether the degree of evidence justifies the clinical intervention;
5. Incorporate evidence into professional reasoning and decision-making processes;
6. Negotiate evidence-informed shared decision-making;
7. Formulate an appropriate design and research protocol for investigation (in conjunction with the honours supervisor);
8. Analyse the organisational and ethical issues of research in health practice settings, and practically apply this to the honours research topic;
9. Justify the selection of specific data analysis techniques for use in the research question.

Subject Content

Exploring reasons for Evidence-based Practice (EBP)

- management of professional disagreement, situation effects and bias
- management of information overload
- management of information uncertainty

Appraising evidence in practice

For studies of interventions, diagnostic tests, aetiology, prognosis, and experiences

- relevance
- strength of evidence
- statistical and clinical significance
- Generalisability, Applicability and Usefulness
- Grading body of evidence
- PICO framework

Professional reasoning

- relative reasoning between evidence, expertise, patient perspectives and practice context
- limitations of EBP paradigm
- communicating evidence to clients
- evidence-informed shared decision-making
- evaluation of professional reasoning

Honours research development knowledge and skills

- transition Issues: Becoming A clinical health science Honours researcher and Understanding The Honours research training process
- Working with your supervisor and developing good research practice skills
- Scholarly writing and using library resources
- research design of Honours Projects
- ethics of research in The health sciences
- developing A written Honours research proposal
- data analysis techniques and managing data in Honours Projects

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

Coordinator Anupama Ginige ([https://directory.westernsydney.edu.au/search/name/Anupama Ginige/](https://directory.westernsydney.edu.au/search/name/Anupama%20Ginige/))

Description This unit is designed to enable the student to classify diseases and interventions using the current version of the International Statistical Classification of Diseases and Related Health Problems, Tenth Revision, Australian Modification, the Australian Classification of Health Interventions and the Australian Coding Standards (ICD-10-AM/ACHI/ACS). The unit will also include the historical development of clinical classification systems as well as the purpose and value of classifying diseases and interventions within the health system. The students will become familiar with the structure and content of ICD-10-AM ACHI/ACS and be introduced to the rules and conventions associated within ICD-10-AM/ACHI. Further, students will carry out research based analytical tasks gaining an in-depth knowledge in relation to health classification systems and terminology

systems such as SNOMED-CT (Systematized Nomenclature of Medicine - Clinical Terms).

School Computer, Data & Math Sciences

Discipline Public Health

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Student must have a general knowledge in relation to healthcare systems.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. summarise the history and development of ICD-10-AM/ACHI/ACS
2. analytically represent the difference between a statistical classification and a nomenclature through independent research
3. correctly apply the principles and techniques of clinical classification to code diagnoses and interventions using ICD-10-AM/ACHI/ACS
4. identify and interpret diagnostic and therapeutic test results and accurately classify findings based on qualification from within the clinical record
5. analyse diagnostic and procedural statements, case studies and simple discharge summaries/clinical record reports to determine which clinical statements to abstract and classify
6. source further information to clarify complex clinical coding issues
7. explain the use of clinical classification systems in health care, describing their purpose and value

Subject Content

1. The history and purpose of clinical classification
2. Application of classification systems in a healthcare setting and the relationship to the Electronic Health Record
3. Understanding the difference between Classification vs nomenclature (terminology) systems
4. Coding symptoms; diagnoses and interventions; factors influencing health status and contact with health services; external causes of morbidity; and sequencing and data abstracting techniques
5. Coding infectious diseases; neoplasms/morphology; blood and immunological disorders; mental and behavioural disorders; diseases of the nervous system; diseases of the eye and ear; respiratory diseases; digestive diseases; genitourinary disorders; and diseases of the skin and subcutaneous tissue

PUBH 7002 Analytic Approaches in Epidemiology

Credit Points 10

Legacy Code 401175

Coordinator Andrew Page ([https://directory.westernsydney.edu.au/search/name/Andrew Page/](https://directory.westernsydney.edu.au/search/name/Andrew%20Page/))

Description This unit extends the basic principles of epidemiology introduced in 401076 'Introduction to Epidemiology' and equips students with practical analytical skills to design and conduct epidemiological studies. The unit considers the principle models of causation and analytical approaches to epidemiological study design and analysis. Students will use causal diagrams and evidence from the literature to develop analytic strategies for specific study designs, develop practical skills in calculating and interpreting measures of association and effect modification, and be introduced to principles and strategies for quantitative bias analysis.

School Medicine

Discipline Epidemiology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) PUBH 7016 OR PUBH 7015

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Introductory skills in epidemiology, including measures of disease frequency and association, epidemiologic study designs, and principles of bias and confounding.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the principle models of causation in epidemiology
2. Apply causal criteria in appraising epidemiological evidence
3. Calculate and interpret epidemiological measures of association and effect measure modification
4. Compare and contrast conceptual approaches to the conduct and design of epidemiological studies
5. Develop appropriate analytic strategies to assess the strength of an association between a given exposure and outcome
6. Conduct quantitative bias analysis of an observed association, including assessment of unmeasured confounding, selection bias, and measurement bias

Subject Content

1. Models of causation in epidemiology
2. Epidemiological measures and concepts of interaction
3. Directed Acyclic Graphs (DAGs) to guide study design and statistical analysis
4. The design, conduct and analysis of studies in epidemiology
5. Analytic approaches to confounding, selection bias, and measurement bias

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Assessment of causation: structured essay	4000 words	20	N	Individual
Scenario based short answer questions involving calculations and interpretation	1000 words	30	N	Individual
Scenario based short answer questions involving calculations, analysis and application of findings	2000 words	50	N	Individual

PUBH 7003 Approaches to Epidemiology

Credit Points 10

Legacy Code 400856

Coordinator Christine Taylor ([https://directory.westernsydney.edu.au/search/name/Christine Taylor/](https://directory.westernsydney.edu.au/search/name/Christine%20Taylor/))

Description This unit presents the principles, strategies and activities associated with social epidemiology and the contribution that this epidemiology makes to the understanding of health and illness of individuals, families and communities. Consideration of social epidemiology in supplementing classical approaches is included, as is consideration of primary health care epidemiology in relation to health service delivery and planning. Students will explore the consequences of primary health care decision making that will enable evidence-based health care practice and relate it to their practice.

School Nursing & Midwifery

Discipline Epidemiology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYB 9174 - Approaches to Epidemiology

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. critically examine the concepts that underpin classical epidemiology
2. critically analyse the concepts and use of social epidemiology
3. compare and contrast classical and social epidemiology and their applications particularly in primary health care practice
4. evaluate the methods of measurement in all forms of epidemiology
5. analyse and evaluate the appropriateness of various epidemiological models in a variety of health care settings and related health care practice
6. apply communication and other technologies effectively in personal and professional learning in a collaborative learning environment

Subject Content

introduction and foundation to epidemiology
social epidemiology
assumptions underlying primary health care epidemiology
concepts of primary health care epidemiology
methods of measurement (descriptive and analytic)
epidemiology in planning and service delivery

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Essay	1500 words	40	N	Individual
Analytical Paper	2500 words	60	N	Individual
Asynchronous discussion board participation 3 threads: Activity A - Introductory discussion; Activity B - Inquiry Based discussion; Activity C - Explorative based discussion	Max. 250 words each	S/U	Y	Individual

PUBH 7004 Communicable Diseases

Credit Points 10

Legacy Code 400840

Coordinator Slade Jensen ([https://directory.westernsydney.edu.au/search/name/Slade Jensen/](https://directory.westernsydney.edu.au/search/name/Slade%20Jensen/))

Description This unit will encompass clinical aspects, epidemiology, prevention and control of important communicable diseases, both in Australia, and globally. Specific topics covered include causative agents, routes of transmission, host responses, risk factors, environmental influences, vector- and food-borne diseases, vaccine-preventable diseases, legislative requirements, surveillance, outbreak investigations, bioterrorism, strategies for prevention and control and emerging challenges.

School Medicine

Discipline Public Health

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the major communicable causes of disease burden, in Australia and internationally, their routes of transmission, risk factors and clinical features.
2. Discuss how causative agents, host and environmental factors interact to produce illness in individuals, and shape patterns of communicable disease in populations.
3. Describe epidemiological methods used to investigate outbreaks of communicable diseases.
4. Describe principles of surveillance, prevention, and control for communicable diseases.

Subject Content

1. Major communicable causes of disease burden
2. Causative agents, routes of transmission, host responses, clinical features
3. Role of individual risk factors and environmental influences
4. Vector- and food-borne diseases
5. Vaccine-preventable diseases
6. Surveillance
7. Outbreak investigations
8. Bioterrorism
9. Communicable disease prevention and control
10. Emerging challenges

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz (4 in total)		40	N	Individual
Critical Review: review of the literature on an emerging or re-emerging communicable disease threat	3,000 words	60	N	Individual

PUBH 7005 Controversies in Epidemiology

Credit Points 10

Legacy Code 401178

Coordinator Andrew Page ([https://directory.westernsydney.edu.au/search/name/Andrew Page/](https://directory.westernsydney.edu.au/search/name/Andrew%20Page/))

Description This unit offers students an opportunity to synthesise theories and methodologies from epidemiology. It highlights current controversies and practices in epidemiology. Students attend weekly presentations on topics related to content area interests, and other relevant seminars. Students will convene with faculty to reflect on and critique components of research presentations relevant to the students' interest and to the contemporaneous topics being covered in the core epidemiology curriculum. Course assignments involve critical appraisal of conceptual and methodological issues presented in the seminars, and related issues relevant to student's own research.

School Medicine

Discipline Epidemiology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) PUBH 7016 OR
PUBH 7015

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and describe current areas of debate and controversy within the field of epidemiology.
2. Apply concepts, theories and methods from epidemiology to population and public health priority areas.
3. Prepare written critiques of recent research in an area of epidemiology.
4. Summarise theoretical, policy, and practice implications associated with current debates in epidemiology.
5. Evaluate the relevance of the epidemiological approach to other population and public health disciplines.

Subject Content

1. Contemporary topics in epidemiology
2. Research designs in epidemiology
3. Analytic strategies in epidemiology
4. Styles for presentation of epidemiologic findings
5. Critical appraisal and critical thinking
6. Formulation of research questions

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

PUBH 7006 Data Management and Programming for Epidemiology

Credit Points 10

Legacy Code 401179

Coordinator Sandro Martins Sperandei ([https://directory.westernsydney.edu.au/search/name/Sandro Martins Sperandei/](https://directory.westernsydney.edu.au/search/name/Sandro%20Martins%20Sperandei/))

Description Modern epidemiology deals with ever increasing volumes of data and complexity of analysis. This course is aimed at equipping students with effective practices for managing data and programme code and ensuring the security of their data. Students will be taught the fundamentals of managing code and data in a revision control system as well as good programming practices and techniques which can form a basis for a robust, repeatable and test-driven research methodology. Programming instruction and exercises will use the SAS and R languages, and SQL databases.

School Medicine

Discipline Epidemiology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) HLTH 7008

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

High school mathematics (arithmetic, formulas and algebra, reading graphs). Basic computer competency and basic programming skills.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain key concepts and rationale for revision control systems
2. Use basic Git commands with local and remote repositories as part of personal and collaborative workflows
3. Explain key concepts of data types, variables, working memory and storage

4. Write simple programmes which use loops and conditional statements and simple functions and/or macros which use parameters passed to them
5. Explain key concepts of relational databases
6. Write simple SQL queries to select and subset data, join two tables, and use indexes to improve efficiency
7. Read data into R from text, CSV and spreadsheet files, from an SQL database, and from online data sources
8. Describe strategies and techniques for data checking and cleaning, and demonstrate ability to use some of these techniques in simple data manipulation tasks
9. Describe strategies and techniques for detecting logic and other programming errors, and demonstrate ability to use these techniques in the context of a small data preparation and analysis project
10. Explain key concepts of information security, describe strategies for ensuring that data is stored and transmitted securely, demonstrate ability to use basic encryption technologies safely

Subject Content

1. Introduction to basic computing concepts and methods
2. Revision control and source code management 1: personal workflows
3. Revision control and source code management 2: collaborative workflows
4. Essential programming review 1: data types, storage, loops, conditionals
5. Essential programming review 2: subroutines (and macros) and functions
6. Essential database review: tables, rows and columns, SELECT, WHERE, indexes, basic JOIN
7. Reading data in: from files, spreadsheets, databases, the web
8. Data cleaning and preparation: tools and strategies
9. Robust techniques to protect against (and detect) programming logic errors when manipulating data
10. Introduction to information security: principles and good practices for keeping data safe and preserving confidentiality

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

PUBH 7007 Disaster and Emergency Management (PG)

Credit Points 10

Legacy Code 301050

Coordinator Grahame Douglas ([https://directory.westernsydney.edu.au/search/name/Grahame Douglas/](https://directory.westernsydney.edu.au/search/name/Grahame%20Douglas/))

Description This unit consists of project based studies that explore how human societies prepare for and respond to disasters and emergencies. The unit uses case studies to investigate the historical practice of preparation, prevention, response and recovery strategies for community safety during times of critical incidents. The unit will facilitate improved understanding by developing scenarios of impending issues such as natural disasters and man made emergencies. Focus will be on Australian national and State coordination arrangements for disaster planning including the comprehensive approach to emergency management. Students will need to attend a 5 day workshop and undertake a group presentation and report as well as an exercise in Incident Control System principles at a workshop.

School Eng, Design & Built Env

Discipline Environmental Health

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Relate the role of the Australian and State governments and non-government institutions in the management of various disasters, emergencies and critical incidents;
2. Summarise the legislative arrangements for the management of emergency events;
3. Review the role of different agencies in managing emergency events;
4. Analyse the implementation of preparedness, prevention, response and recovery strategies for community safety during critical incidents;
5. Explain incident control systems and their importance in an emergency event;
6. Identify the role of professional practitioners in critical incident management planning;
7. Review the application of coordinated and cooperative arrangements for bushfire management in jurisdiction.

Subject Content

1. Categorizing emergencies, disasters and critical incidents;
2. The role of various institutions in preventing, preparing for, responding to and recovering from emergencies and disasters;
3. Case studies of various historic events around emergency management;
4. The comprehensive approach to emergency and disaster management;
5. Australian national, State, regional and local emergency planning approaches;
6. Incident Control System (ICS) structures and managing incidents;
7. Public education for enhancing community resilience;
8. Role of professional practitioners in critical incident management (bushfire and other incidents).

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

PUBH 7008 Environmental Epidemiology

Credit Points 10

Legacy Code 401177

Coordinator Haider Mannan ([https://directory.westernsydney.edu.au/search/name/Haider Mannan/](https://directory.westernsydney.edu.au/search/name/Haider%20Mannan/))

Description Environmental Epidemiology is the study of the environmental causes of ill-health and disease with a view to prevention. It is a discipline that has changed significantly over time, more recently becoming concerned with complex systemic change

such as global warming. Environmental Epidemiology encompasses a broad range of activities, from exposure assessment to adaptation planning, implementation and evaluation. The course aims to equip students with the knowledge and skills to understand and critically appraise evidence from the relevant literature, to design a study suitable for exposure and vulnerability assessment, and to develop appropriate health policy.

School Medicine

Discipline Epidemiology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) PUBH 7016

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the domain of environmental epidemiology
2. Critically discuss issues in exposure assessment
3. Explain important methodological and contextual challenges in environmental epidemiology
4. Explain the strengths and weaknesses of the main types of study designs used in environmental epidemiology
5. Debate contemporary issues in environmental epidemiology
6. Compare and contrast the merits and roles of mitigation and adaptation in contemporary environmental challenges
7. Undertake an exposure or vulnerability assessment for a defined population or community
8. Design an epidemiological study to address an environmental exposure topic

Subject Content

1. Exploring the history and scope of environmental epidemiology: from local to global
2. Methods of exposure and vulnerability assessment
3. Study designs for environmental epidemiology
4. Incidents and disasters: Case studies of where biological, chemical and physical agents have been found to be detrimental to health. Case studies will include success stories, for example where epidemiology has been used as evidence for regulatory control
5. Environmental epidemiology in developing countries: contemporary issues associated with poverty and development
6. Global environmental change. The focus of environmental epidemiology has shifted towards more systemic problems. These will be explored under the themes of
 - primary effects
 - secondary effects
 - tertiary effects
7. Using evidence from environmental epidemiology studies to inform policy to protect health

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

PUBH 7009 Epidemiology and Quantitative Methods

Credit Points 10

Legacy Code 400417

Coordinator Dafna Merom (https://directory.westernsydney.edu.au/search/name/Dafna_Merom/)

Description In this unit, students will study the fundamental concepts and principles of epidemiology and biostatistics and will be given the opportunities through exercise and tutorials to apply these concepts and principles to published public health literature. The unit is designed to give students the skills to interpret and critically evaluate public health literature and to equip the students with the skills for public health research. A range of research studies is examined, including studies of occurrence and risk factors for disease, and studies evaluating intervention treatments or programs. Both the epidemiological and statistical evidence for the findings are critically assessed.

School Health Sciences

Discipline Epidemiology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYB 7971 - Epidemiology and Quantitative Methods

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the fundamental principles and terminology common to all areas of epidemiology to public health literature and practice

2. Explain the strengths and limitations of different epidemiological study designs in addressing specific research questions and become familiar with the hierarchy of evidence to understand causality
3. Calculate and interpret different measures of disease occurrence, measures of risk, source of bias and study validity
4. Interpret and critically evaluate epidemiological and public health literature
5. Apply the logic of hypothesis testing, type-1 and type-2 error, statistical significance, statistical power and effect size
6. Select and apply appropriate methods for the statistical analysis of categorical, ordinal and continuous data for within- and between-subjects study designs
7. Present findings from basic analyses in tables and figures
8. Interpret SPSS output and use SPSS software to conduct basic analysis of epidemiologic data

Subject Content

1. Observational study design: Cohort studies, Case control studies, Cross sectional studies, ecological studies and surveillance
2. Experimental studies: randomised controlled trials (RCT), cluster randomised controlled trials, quasi-experimental designs
3. Measures of disease frequency (incidence and prevalence) and measures of association
4. Bias, confounding and effect modification
5. Interpretation and evaluation of public health literature ?causality, strength of evidence
6. Descriptive statistics and data presentation
7. Continuous and categorical study variables
8. Hypothesis testing, statistical significance, power and effect size
9. Tests of statistical significance for continuous and categorical variables and within-and between-subjects study designs (X², t tests and ANOVA)
10. Correlation and simple linear regression
11. Use of SPSS and interpretation of its output

PUBH 7010 Epidemiology of Non-Communicable Diseases

Credit Points 10

Legacy Code 401174

Coordinator Kate McBride ([https://directory.westernsydney.edu.au/search/name/Kate McBride/](https://directory.westernsydney.edu.au/search/name/Kate%20McBride/))

Description This unit will document the fundamental concepts in epidemiology and control of non-communicable diseases (NCDs), common research methods used in NCD epidemiology, and unique applications of these methods in key NCD areas, including reproductive epidemiology, behavioural epidemiology, epidemiology of ageing and epidemiology of specific NCDs (including cardiovascular disease, diabetes, cancer, chronic respiratory diseases, musculoskeletal problems and mental health problems). The principal goals of this unit are to provide a broad overview of the field, and to develop the knowledge and skills needed to (i) critically evaluate published research

in NCD epidemiology and (ii) design an epidemiological study to address an NCD topic.

School Medicine

Discipline Epidemiology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) PUBH 7016 OR PUBH 7015

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the burden of non-communicable diseases (NCDs) and how this varies among population subgroups and countries
2. Explain the conceptual basis for a life-course approach to NCDs
3. Identify social, environmental, behavioural and biological risk factors for NCDs
4. Discuss approaches to the prevention and control of NCDs
5. Identify unique issues in the epidemiology of specific NCDs
6. Review and critically evaluate epidemiological studies of NCDs
7. Formulate research questions in the epidemiology and control of NCDs and identify suitable methods for investigating these
8. Design an epidemiological study to address an NCD topic

Subject Content

1. Introduction to epidemiology of non-communicable diseases (NCDs)
2. Life-course approach to NCDs
3. Approaches to prevention and control of NCDs
4. Behavioural epidemiology
5. Epidemiology of neurological disease
6. Epidemiology of cardiovascular disease and diabetes
7. Epidemiology of mental disorders
8. Epidemiology of cancer
9. Epidemiology of chronic respiratory and musculoskeletal diseases
10. Epidemiology of ageing

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

PUBH 7011 Health Advancement and Health Promotion

Credit Points 10

Legacy Code 400418

Coordinator Freya Macmillan ([https://directory.westernsydney.edu.au/search/name/Freya Macmillan/](https://directory.westernsydney.edu.au/search/name/Freya%20Macmillan/))

Description By investigating and addressing the multilevel determinants of health outcomes and inequalities, health promotion initiatives aim to improve the health and wellbeing of individuals and societies. In this unit, we will nurture an understanding of concepts and models of health promotion, evaluate the relative successes of recent and classic initiatives within Australia and overseas, and critically engage with debates concerned with the most appropriate strategies for tackling health inequalities in the context of major societal challenges (e.g. population ageing, urbanisation and climate change). Core competencies are nurtured (e.g. Plan and evaluate an intervention) to prepare students for practicing and further study in the field of health promotion.

School Health Sciences

Discipline Health Promotion

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and apply different principles and theoretical positions to interpret beliefs and health behaviours
2. Critically analyse the barriers and factors enhancing health promotion action
3. Develop ways of working effectively with individuals, groups, communities and populations
4. Determine priorities for health promotion action from available evidence
5. Design health promoting strategies that are culturally relevant, financially sound and sustainable

Subject Content

1. Health promotion, health education, illness prevention, primary health care, the ?gnew?h public health and health outcomes
2. Principles and competing ideologies in health promotion
3. National health priorities and local examples
4. Health promotion competencies: needs analysis, planning interventions, levels of evaluation and ways to secure funding
5. Approaches to health promotion for individuals, groups, communities and populations
6. Health promotion techniques and ?bigger picture?f approaches: settings, policy, legislative, environmental and engineering methods
7. The underlying philosophy, models and theories of health promotion
8. Principles of best practice: evidence-based health promotion
9. Sustainability, public policy and advocacy in health advancement and promotion
10. Partnerships, engagement and collaboration in health advancement and promotion

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

PUBH 7012 Health Economics and Comparative Health Systems

Credit Points 10

Legacy Code 400967

Coordinator Kingsley Agho ([https://directory.westernsydney.edu.au/search/name/Kingsley Agho/](https://directory.westernsydney.edu.au/search/name/Kingsley%20Agho/))

Description The unit explores contemporary examples of the role of economics in the organisation, funding and provision of health services. Case examples include, Australia, America, China, Hong Kong, Scandinavia, United Kingdom and India. Students use the principles of economics to assess funding of health with a focus on the interface between economics, ethics and equity in decision making. They also consider the tendency for health systems to be organised around economic principles in areas such as, contracting out, health insurance and pharmaceuticals. Students are encouraged to reflect on the challenges and future directions of their own health system in the context of the unit components.

PUBH 7013 Health Promotion: A Primary Health Care Approach

Credit Points 10

Legacy Code 400836

Coordinator Olayide Ogunsiji ([https://directory.westernsydney.edu.au/search/name/Olayide Ogunsiji/](https://directory.westernsydney.edu.au/search/name/Olayide%20Ogunsiji/))

Description An individual's personal characteristics and their family, social and community environments have complex interrelationship with their health and health behaviours. The challenge for health professionals is to understand this complexity and encourage the practice of health promotion within a primary health care framework so enabling people to achieve a sense of power and control over their lives. The unit explores the health of individuals and communities in the context of health promotion. Evidence-based health promotion strategies are examined using social health and ecological perspectives.

School Nursing & Midwifery

Discipline Health Promotion

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 7318 - Context of Health Promotion

Restrictions

Students must be enrolled in 4569 Master of Primary Health Care, 4694 Master of Primary Health Care, 4570 Graduate Diploma in Primary Health Care, 4695 Graduate Diploma in Primary Health Care, 4696 Graduate Certificate in Primary Health Care, 4722 Master of Nursing or 4723 Graduate Certificate in Nursing.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discriminate between the broad range of socio-political factors that influence the health of individuals and the community;
2. Critically analyse the implications of government policies on health promotion strategies;
3. Demonstrate the application of health promotion theories and models with individuals and communities;
4. Demonstrate an understanding of the relationship between a needs analysis and the planning and evaluation of health promotion strategies in primary health care;
5. Identify, develop and critique health education and health promotion strategies appropriate to primary health care practice;
6. Use social health and ecological perspectives to examine evidence-based health promotion strategies that can be implemented in health care practices;
7. Analyse current trends towards the implementation of health promotion at international, national and local levels;
8. Demonstrate ability to incorporate evidence-based approaches in health promotion strategies for collaboration across sectors and disciplines.

Subject Content

- The historical perspectives of health promotion in a primary health care framework;
- The relevance and application of health promotion in health care today;
- The social and ecological perspectives for conceptualising health;
- A primary health care approach for the development of health promotion;
- The implementation and evaluation of health promotion strategies at individual, family and community levels;
- Issues of power and control in health care and services;
- Health promotion and health education frameworks and strategies;

- evidence-based health promotion at local, national and international levels.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Essay	2,000 words	40	N	Individual
Health Promotion Proposal	3,000 words	60	N	Individual

PUBH 7014 Health and Socio-political Issues in Aged Care

Credit Points 10

Legacy Code 400837

Coordinator Tiffany Northall ([https://directory.westernsydney.edu.au/search/name/Tiffany Northall/](https://directory.westernsydney.edu.au/search/name/Tiffany%20Northall/))

Description This unit examines health and socio political issues in aged care within a social capital framework. Social constructs and contexts of ageing are explored and issues of social and economic disadvantage are examined. Equity and access to health care services and the experiences of older people within these services are also highlighted. The role of health professionals and managers in actively engaging in health and social policy debate for ethically just care and services for older people is addressed.

School Nursing & Midwifery

Discipline Community Health

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 7153 - Contemporary Issues in Aged Care

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. critique representations of older people in policy, laws and legislation, and health/social service delivery;
2. evaluate the rationales for resource allocation, service provision and coordination of services for older people using a social capital approach;
3. critique models of health service delivery for older people, including models of wellness, user-pays, case management, and active ageing (WHO);
4. demonstrate an understanding of contemporary aged care issues from political, philosophical, legal and ethical positions;

5. critically discuss strategies for reform in the delivery of aged care services that take into account all stakeholders.

Subject Content

Living Longer - The demographics of ageing populations

A social capital approach to care and services

Healthy ageing

Active ageing and health promotion

Health issues for older people

Ageing and disability

A social inclusion approach for ageing

Representations of ageing - misconception and misperceptions

Discrimination against older workers

Retirement and lifestyle changes

The changing role of family and family members - expectations and limitations

Legal and ethical rights, responsibilities and legislation

Quality of life

Political, economic and consumer pressures shaping policy directions and funding

Knowledge translation - education and professional practice

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

PUBH 7015 Introduction to Clinical Epidemiology

Credit Points 10

Legacy Code 401173

Coordinator Andrew Page ([https://directory.westernsydney.edu.au/search/name/Andrew Page/](https://directory.westernsydney.edu.au/search/name/Andrew%20Page/))

Description This unit aims to impart the principles of population based (epidemiologic) evidence to the understanding of variations in the outcome of illness and the reasons thereof (Clinical Epidemiology) thereby providing the framework for finding the best answers to "real world" questions about clinical practice and health care. Individuals

taking this course (who usually have a health care background) acquire the basic skills required to understand the fundamental questions about the effectiveness of clinical therapies, usefulness of screening and diagnostic tools, prognosis and disease causation and gain the skills required of effective Evidence-Based Medicine practitioners.

School Medicine

Discipline Epidemiology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects PUBH 7016 - Introduction to Epidemiology

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

A background in health care is desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Generate a critical question leading up from a health scenario
2. Locate, navigate and extract relevant data from important sources of health information
3. Examine critically, synthesise and evaluate the basic principles underlying validity of the results of health care outcome studies
4. Evaluate quantitatively the usefulness of diagnostic and screening tests in health care practice
5. Examine critically, synthesise and evaluate point estimates (effect sizes) used in clinical epidemiology
6. Examine critically, and evaluate principles underlying precision of the effect sizes reported in health care research
7. Understand and apply the principles underlying the translation of research results to health care practice
8. Integrate and apply results (generalise) to specific health care problems

Subject Content

1. Introduction and critical questioning: Knowledge gaps during the course of practice and asking foreground questions to fill these gaps, and focused questions that lead to effective search and appraisal strategies. This would involve development of critical questioning, identifying the specific patient population (P), the type of intervention in question (I), a comparison/control condition (C), and the outcomes for the patient population (O), or PICO. The different study designs used to answer critical questions – descriptive, observational and experimental designs and their strengths and weaknesses.
2. Acquiring the information: The use of citation and synthesised (evidence based) library databases.
3. Are the results valid? - Sources of error in evidence such as random error, systematic error (bias) and confounding. Minimizing sources of error that decrease validity in clinical trial design eg allocation concealment, randomisation, blinding, matching, and 'loss to follow up'. Effect modification and causality.
4. Quantitative aspects of diagnosis/screening: Sensitivity, specificity, PPV, NPV and likelihood ratios. Introduction to ROC methods.
5. Effect size: Point estimates (measures of association, effect sizes) used in clinical epidemiology such as ratios, proportions, rates, OR, RR.
6. How precise were the study estimates?: Use of descriptive (data types, measures of central tendency and dispersion, normal

distribution) and inferential statistics (hypothesis testing) in clinical research studies including P-values and confidence intervals.

7. Are the valid results important: Principles underlying the translation of research results to health care practice. Clinical as opposed to statistical significance and absolute risk indices such as RD, ARR, NNT.
8. Critical appraisal: Critical appraisal of epidemiological evidence, including assessment of study validity, synthesis of results, and consideration of applicability to a given clinical context
9. Systematic reviews, and meta-analysis: Overview and critical appraisal of systematic reviews. Interpreting findings from meta-analyses
10. Judging applicability: Generalizing results to specific health care problems, the threats to generalizability of research findings and the use of adequate sampling models in this respect. The inter-relationships between patient preferences, the clinical state, research evidence and clinical expertise.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

PUBH 7016 Introduction to Epidemiology

Credit Points 10

Legacy Code 401076

Coordinator Dafna Merom ([https://directory.westernsydney.edu.au/search/name/Dafna Merom/](https://directory.westernsydney.edu.au/search/name/Dafna%20Merom/))

Description Epidemiology is the study of the distribution and determinants of disease and other health-related conditions in populations, and the application of this study to the control of health problems. Epidemiology encompasses a broad range of activities fundamental to the health sciences. The course is aimed to equip students with the ability to understand and critically appraise evidence from the health sciences used in the formulation of clinical interventions, assessments of population disease burden, and development of health policy. Students will be taught the fundamental concepts and principles of epidemiology and will be given the opportunities through exercises and tutorials to apply these concepts and principles to case studies from current epidemiological research and practice.

School Health Sciences

Discipline Epidemiology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects PUBH 7015

Restrictions

Students must be enrolled in a postgraduate program

Assumed Knowledge

High school mathematics (arithmetic, formulas and algebra, reading graphs).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Calculate and interpret measures of morbidity and mortality, and measures of association (including relative and attributable risk).
2. Discuss the strengths and weaknesses of the main types of epidemiological study design
3. Assess confounding or effect measure modification in epidemiological data
4. Assess the likely impact of bias and confounding on measures of association
5. Relate concepts of confounding, effect measure modification, and mediation within a putative causal pathway for a given health outcome
6. Critically appraise an observed association between an exposure and outcome using a hierarchy of evidence

7. Discuss the epidemiologic rationale underlying population and individual disease prevention strategies
8. Discuss the inter-relationships between host, agent, and environment in infectious disease epidemiology
9. Summarise the requirements of population-based screening and public health surveillance
10. Summarise current debates and challenges in epidemiology

Subject Content

1. Measures of disease frequency
2. Measures of association
3. Study designs used in epidemiological research
4. Error in epidemiological studies: bias and confounding
5. Distinguishing causation from association
6. Disease prevention
7. Population screening
8. Epidemics, outbreaks and clusters
9. Public health surveillance
10. Current debates and challenges in epidemiology

PUBH 7017 Leadership and the Development of Organisational Capacity

Credit Points 10

Legacy Code 400778

Coordinator Robyn Moroney ([https://directory.westernsydney.edu.au/search/name/Robyn Moroney/](https://directory.westernsydney.edu.au/search/name/Robyn%20Moroney/))

Description This unit examines the concept, form and structure of health care organisations. Organisational theory is explored and used to analyse a range of structures used in nursing and contemporary health care. Factors which influence organisational design, function and effectiveness are explored and discussed including: organisational behaviour, strategy, culture, power and politics, technology, sustainability and effectiveness. A major focus in the unit is planning for strategic organisational development to meet the challenges of rapid change and the need for performance improvements in patient care delivery. Concepts related to the strategic development of workforce capacity in the health care arena are considered through the application of a range of theories including the learning organisation. Leadership will be examined within the context of the unit with a particular emphasis on change management.

School Nursing & Midwifery

Discipline Public Health

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Understanding of the principles of leadership and management theories and the attributes of effective leadership in a changing health care environment.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of how organisational theory underpins organisational strategy and the design and structure of health care organisations.
2. Identify the factors driving changes in organisational strategy and design within the contemporary health care setting.
3. Analyse the impact of organisational culture and professional subcultures, power, politics and technology on readiness for change in health care organisations.
4. Discuss models and strategies used in effective change leadership and their application to the health care environment.
5. Examine models of workforce development used in organisational capacity building in the health care sector.
6. Explore the relationship between effective change leadership and improving organisational capacity and performance.
7. Outline leadership strategies required to mobilise and engage stakeholders in continuous organisational development and performance improvement in health care.

Subject Content

Module 1 - Introduction to organisational theory, design and structure, and its application to the health care environment

- organisational theory and structure - organisational Structures, function, formal systems of power and authority, how they are affected by The Internal and external environment in The health care sector
- Factors influencing organisational design and function in health care including organisational behaviour, strategy, culture, power and politics, Technology, sustainability and effectiveness
- organisational culture and subcultures in health care

Module 2 - Organisational capacity building, workforce development and change management in the health care environment

- leadership, adaptive organisational cultures and change
- theories and frameworks for organisational capacity Building
- Models and strategies for Workforce development
- managing Conflict, power and politics in health care Organisations

Module 3 - Improving organisational performance

- theories and concepts underpinning organisational performance improvement in health care
- Measuring organisational performance and effectiveness
- leading organisational capacity Building and improving organisational performance in The health care arena

Case study

- Building organisational capacity for Crisis management (SARS, influenza pandemic, natural disasters, Terrorism and multiple casualties)

Prescribed Texts

- There is no essential textbook.

Teaching Periods

PUBH 7018 Leadership for Quality and Safety in Health Care

Credit Points 10

Legacy Code 400777

Coordinator Rona Pillay ([https://directory.westernsydney.edu.au/search/name/Rona Pillay/](https://directory.westernsydney.edu.au/search/name/Rona%20Pillay/))

Description Contemporary clinical leaders, practitioners and health service managers are held accountable for improving quality and safety in health care. Developing a safety culture that incorporates teamwork is an effective way to ensure safe, quality care outcomes for patients. In this subject, students will analyse the main concepts of quality, health care safety, governance frameworks and strategies to improve system performance. Students will apply and critique approaches to quality of care and patient safety, by in-cooperating human factors. In addition, students will analyse risk management and effects of organisational factors that influence quality and safety. Students will explore the leadership required to develop systematic, coherent quality improvement frameworks and quality initiatives that they can directly apply in their own practice to sustain patient and organisational safety.

School Nursing & Midwifery

Discipline Public Health

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects HLTH 7016 - Quality and Safety in Health Care

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Investigate the impact of human factors in healthcare contexts and organisational factors on staff performance to enhance a safety culture
2. Critically analyse the system approach for managing quality and patient safety
3. Critically evaluate the impact of error on safety and risk management culture on healthcare
4. Articulate strategies to improve quality and safety by adopting and applying quality tools and techniques to measure and improve quality and safety
5. Critically evaluate legal and regulatory requirements associated with safety and quality from a leadership perspective
6. Formulate an implementation plan by drawing on human factor framework, with an aim to develop a strategic approach sustain healthcare safety and quality

Subject Content

Module 1

- quality and patient safety - concepts, principles and dimensions
- human error theories
- learning from errors to prevent Harm
- Consumer perspectives

Module 2

- Risk management

- quality management systems
- quality collaboratives
- clinical and corporate Governance
- quality assessment and Accreditation
- safety and Risk management culture

Module 3

- Remedial processes: clinical, service, and Workforce redesign
- quality tools: root cause analysis, fishbone techniques, Analysing error
- information management systems - collecting Reporting and managing data

Module 4

- application of leadership, communication, interpersonal skills and accountability in open Disclosure, cultural Sensitivity, Working in partnership with patient?fs, family and carers, Incident investigation
- legal and Regulatory requirements

PUBH 7019 Occupational Health Management

Credit Points 10

Legacy Code 300391

Coordinator David Lim ([https://directory.westernsydney.edu.au/search/name/David Lim/](https://directory.westernsydney.edu.au/search/name/David%20Lim/))

Description This unit focuses on the practice of occupational health within national and international frameworks. It explores issues such as the physical, social and mental impact of the occupational environment on health and includes the human body's response to occupational health hazard exposure through toxicological and epidemiological principles. Strategies for the management of occupational health are examined, together with methods of monitoring and evaluating occupational health programs.

School Health Sciences

Discipline Occupational Health and Safety

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYB 8273 - Occupational Health Management

Restrictions

Students must be enrolled in 3602 Master of Environmental Management, 3605 Master of Occupational Safety, Health and Environmental Management, 3606 Graduate Diploma in Occupational Safety, Health and Environmental Management, 3607 Graduate Certificate in Occupational Safety, Health and Environmental Management, 3647 Master of Science, 3648 Graduate Diploma in Science (exit only), 3649 Graduate Certificate in Science, 4651 Master of Health Science, 4652 Graduate Diploma in Health Science or 4653 Graduate Certificate in Health Science, 4681 Master of Health (Research Studies)/PhD, 4698 Master of Health Science, 4700 Graduate Diploma in Health Science, 4701 Graduate Certificate in Health Science, 4702 Master of Public Health, 4704 Graduate Diploma in Public Health

Assumed Knowledge

Recognition that WH&S procedures are legislatively required in the workplace and the ability to recognise the need to protect workers from

harm in the workplace. Knowledge of the basics of WH&S Legislation as it applies in their country of origin.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically discuss the potential impact of current work health and safety issues or emerging issues on worker health and wellbeing
2. Demonstrate an understanding of the health and science knowledge and practice underpinning occupational health management
3. Determine the needs of a given workplace to provide an environment that is not detrimental to the health of people entering that environment
4. Determine the strategies required to implement improvement in occupational health of an organisation, including health promotion, health surveillance and rehabilitation
5. Monitor and evaluate the effectiveness of occupational health programs in the workplace
6. Demonstrate appropriate postgraduate skills in researching and academic writing

Subject Content

Teaching Periods

PUBH 7020 Policy, Power and Politics in Health Care Provision

Credit Points 10

Legacy Code 400238

Coordinator Sheree Smith ([https://directory.westernsydney.edu.au/search/name/Sheree Smith/](https://directory.westernsydney.edu.au/search/name/Sheree%20Smith/))

Description Health and aged care leaders often engage in the development and implementation of national policy. The success of these policies is often viewed through the health outcomes in terms of access and equity of quality care. Therefore, it is critical to understand the political and social constructions that underpin the development of health and/or aged care policy. Students will explore and critically

analyse issues related to the development, implementation and outcomes of health and aged care policies specifically in relation to the impact on culturally diverse and disadvantaged groups in society today

School Nursing & Midwifery

Discipline Public Health

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) Students enrolled in program 4673 Master of Mental Health Nursing (Nurse Practitioner) must have passed the following three subjects before they can enrol in this subjects - NURS 7018 Contemporary Professional Practice in Mental Health Nursing and NURS 7023 Evidence-based Nursing and NURS 7028 Leadership in Clinical Practice

Equivalent Subjects LGYB 9177 - Policy Power and Politics in Health Care Provision

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique social ideologies and theories which shape public expenditure on health and aged-care services
2. Utilise insight to reveal the relationships between politics and power in the construction of health and aged-care policies
3. Critically examine the power and influence of interest groups associated with health and aged-care policy formulation.
4. Critique the impact of the significant historical, structural, and environmental factors which affect health and aged-care policies' development and translation.
5. Evaluate ethical and legal considerations involved in enacting health and aged-care policies
6. Critically appraise the impact of health and aged-care policies on culturally diverse and disadvantaged populations

Subject Content

Module 1: Introduction to the Foundations of Health Policy

- What is Policy
- The Policy Cycle
- Social Theory and Social Policy
- Ethics and distributive justice in health resourcing
- Legislation
- The New Public Health

Module 2: Policy Analysis in the Context of Social Complexity

- Definitions of Power and policy development
- Approaches to policy analysis
- Critique of macro and micro health policies
- Methods of analysis and evaluation

Module 3: The global economy and the future of health care

- Ageing
- Obesity and wellbeing
- End-of-life and living at home
- Technology
- Global economic variations and health care

Module 4: Politics and Public Opinion in Setting the Health Care Agenda

- Federalism and health
- Role of 'unofficial actors' in the development of policy

- Quality and Safety in health care (adverse events, crisis management)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Short answer questions	2,000 words (4x500 words each)	50	N	Individual
Critical analysis	2,000 words	50	N	Individual

PUBH 7021 Primary Health Care and its Applications

Credit Points 10

Legacy Code 400412

Coordinator Fiona McDermid ([https://directory.westernsydney.edu.au/search/name/Fiona McDermid/](https://directory.westernsydney.edu.au/search/name/Fiona%20McDermid/))

Description This subject explores the impact and relevance of Primary Health Care in its context as a World Health Organization (WHO) strategy for achieving "Health for All". It examines the ways in which Primary Health Care, along with other significant WHO initiatives, provides a framework for the organisation of just and humane health care systems and provides an opportunity for detailed discussion of the complex factors that impact on the health status of populations. The integration of associated theoretical concepts will enable an understanding of the complex dimensions of health and well-being to evolve and then to inform health care practices and the planning of programs that can lead to sustainable health within a primary health care framework.

School Nursing & Midwifery

Discipline Health Promotion

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program. The subject is also available as a non-award subject in online mode.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the principles, strategies and activities of primary health care linked to the World Health Organization's quest for 'Health for All' within local and global contexts.
2. Critically evaluate the congruence between primary health care principles and practices as they relate to local and national health care policies.
3. Critically explore the relationship between people's health outcomes and the global, cultural, social, and socio-economic determinants of health and wellbeing.
4. Conduct a community needs assessment in the context of primary health care.
5. Devise an implementation plan for facilitating health related changes in organisations and communities within a primary health care framework.

Subject Content

Definitions and meanings of health;
 Social determinants of health and wellbeing;
 Health policy orientation: welfare and privatised, concepts and values;
 Primary Health Care principles and practices;
 Health Promotion: issues and strategies for the promotion of health in a globalised context;
 Approaches to health promotion including the use of media;

Community needs assessment; capacity building and healthy settings;
 Projects for health.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Short Answer	Short answer (300 words) 10% and Quiz (10 Qs) 10%	20	N	Individual
Quiz	60 minutes/60 questions	30	N	Individual
Professional Task	2,000 words	50	N	Individual

PUBH 7022 Public Health, Policy and Society

Credit Points 10

Legacy Code 400416

Coordinator David Lim ([https://directory.westernsydney.edu.au/search/name/David Lim/](https://directory.westernsydney.edu.au/search/name/David%20Lim/))

Description This unit examines the nature of public health and develops a systemic understanding of various public health policy frameworks and issues. The unit provides the context and history for understanding public health approaches, explores the cultural and social dimensions of health and illness and the economic and political environment in which health policies and strategies are developed and implemented. The unit advocates a view of health that includes an implicit recognition of the physical, social and economic environment, affirms the importance of social justice and equity in health care, and emphasises the importance of inter-sectoral collaboration.

School Health Sciences

Discipline Public Health

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYB 7972 - Health Management Policy and Society
LGYB 8025 - Health Management Policy and Society

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically examine the range and variation of values, definitions and perspectives underlying health, illness and health care services, and analyse their influence on the character of health services and on policy approaches and impact.
2. Critically examine the range of social variables relating to health and illness distribution patterns and the theoretical explanations for these patterns.
3. Analyse recent developments in public health and related movements, including the new public health.
4. Explore the politics, ideologies and ethics which underpin and impact on public health strategies and policies and their influence within the Australian health care system.
5. Identify structural interests in health care and critically analyse their role in and influence on health policy.
6. Analyse selected health policy issues and evaluate current policy approaches within a public health framework.
7. Examine current health resource distributio

Subject Content

- variations in societal values and perspectives related to health and health care
- Determinants of population health - social Variables related to health and illness Distribution patterns
- theoretical Explanations for health inequalities and The implications of The Acceptance of various Explanations
- historical and cultural influences on health and illness Models
- societal responses to health ?need?f ? The organisation of health care systems and its relationship to societal ?values?f
- The meaning and scope of ?health?f policy
- public health and health policy frameworks for analysis ? The Importance of multiple ?perspectives?f in health policy analysis and development
- policy processes and analysis, including theories of choice and decision-making, stages

PUBH 7023 Safe and Sustainable Construction

Credit Points 10

Legacy Code 301190

Coordinator Ali Al-Ashwal ([https://directory.westernsydney.edu.au/search/name/Ali Al-Ashwal/](https://directory.westernsydney.edu.au/search/name/Ali%20Al-Ashwal/))

Description This unit introduces two important aspects of construction projects: workplace safety and sustainability. Safety and sustainability are crucial issues in the upper echelons of the construction industry. This unit is intended to explore the theoretical frameworks and best practices to support health and safety in construction projects. It introduces various assessment tools and techniques that can be used to measure and improve sustainability in construction projects.

School Eng, Design & Built Env

Discipline Building Construction Economics

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Students are expected to have basic knowledge in building and construction.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse legal economic and ethical issues related to Workplace Health and Safety (WHS) in the construction industry;
2. Develop strategies to improve health and safety performance of construction projects;
3. Understand concepts and principles of sustainable development;
4. Analyse appropriate sustainability assessment tools and carbon management approaches for construction projects;
5. Conduct economic assessments such as whole-life cost (WLC), Cost-Benefit Analysis (CBA) and others for construction projects.

Subject Content

Theories and best practices in Workplace Health & Safety in the construction industry.
 Legal, economic and ethical issues related to Workplace Health and Safety.
 The concept of sustainability and the sustainable development agenda.
 Sustainability assessment method and techniques.
 Managing carbon emissions in construction.
 Whole life costing.
 Cost benefit analysis and other techniques in assessing development projects.

Assessment

PUBH 7024 Safety and Risk Management

Credit Points 10

Legacy Code 300677

Coordinator John Loxton ([https://directory.westernsydney.edu.au/search/name/John Loxton/](https://directory.westernsydney.edu.au/search/name/John%20Loxton/))

Description This unit provides a critical insight into the theory and practice of managing safety and health at the workplace with a dual focus on risk management and safety management. Students have the opportunity to develop a safety systems approach concentrating on hazard identification, risk assessment and devising control measures incorporating safety management principles. Safety culture and its influence on Occupational Health and Safety (OHS) practice is also detailed. In addition, the unit addresses the legal underpinning of OHS requirements at the workplace. Labour market change and the role of government, unions and employer organisations are also examined. Global perspectives on OHS from various jurisdictions ranging from the USA, Hong Kong and China are also scrutinised.

School Science

Discipline Occupational Health and Safety

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 5996 - Safety Management LGYA 6000 - Risk Assessment

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Recognition that Occupational Health and Safety procedures are legislatively required at the workplace and the ability to recognise the need to protect workers from harm at the workplace.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appraise the values, assumptions and models that underpin the development of risk assessment principles and of safety management processes
2. Identify and implement the principles of applied safety management premised on risk assessment and management
3. Critically analyse the systems approach to safety management responsibilities
4. Define and implement an integrated approach to safety systems
5. Discern the significance of safety culture to safety management
6. Advise on the integration of occupational health and safety programs into routine management systems
7. Produce and perform a risk assessment that identifies and apply the expected control measures

PUBH 7025 Statistical Methods in Epidemiology

Credit Points 10

Legacy Code 401176

Coordinator Haider Mannan ([https://directory.westernsydney.edu.au/search/name/Haider Mannan/](https://directory.westernsydney.edu.au/search/name/Haider%20Mannan/))

Description Statistical ideas are integral to the conceptual basis of epidemiology and provide the tools needed to interpret epidemiological information and conduct epidemiological studies. Most professions in the health sciences need to be able to read and interpret statistics relating to individual and population health status and health risks, and to identify appropriate statistical methods to evaluate interventions, health policies and programs. Many public health practitioners are actively involved in surveillance, quantitative research and/or evaluation. This unit aims to support students to reach a level of proficiency in the selection of appropriate statistical methods to address specific research questions with a given dataset, conduct the selected analysis, interpret the results appropriately and draw valid and insightful conclusions about the research question.

School Medicine

Discipline Epidemiology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) HLTH 7008

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

High school mathematics (arithmetic, formulas and algebra, reading graphs).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe epidemiological data in tabular and graphical format including the calculation and interpretation of measures of disease occurrence
2. Assess a disease-exposure association using appropriate hypothesis tests and calculate confidence intervals for measures of association between exposures and disease
3. Determine whether effect measure modification/or confounding is present in an epidemiological study
4. Explain how the study design determines the method of analysis
5. Select appropriate statistical analyses to address a given research question and carry out the analyses in statistical software
6. Interpret the model output, assess the model fit and test model assumptions
7. Critically appraise published studies by assessing study design and methods of data analysis, as well as interpret study methods, results and conclusions

Subject Content

1. Use of measurement scales and implications for selection of statistical methods
2. Descriptive techniques to summarise public health data
3. Formulate a scientific question about the relationship of a response variable and predictor variable(s)
4. Use statistical software package (e.g. SAS, Stata, R)
5. Methods for analysing case-control studies (linear and logistic regression)
6. Methods for analysing cohort/longitudinal studies (Poisson regression, negative binomial regression)
7. Methods for time-to-event studies (Kaplan-Meier estimator, logrank test, Cox proportional hazards regression)

8. Inferences about model coefficients, tests of hypotheses and determination of whether interaction and/or confounding is present in epidemiological study

9. Evaluate model fits and test model assumptions

10. Interpret regression coefficients and draw appropriate conclusions from epidemiological data

7. Methods for time-to-event studies (Kaplan-Meier estimator, logrank test, Cox proportional hazards regression)

8. Inferences about model coefficients, tests of hypotheses and determination of whether interaction and/or confounding is present in epidemiological study

10. Interpret regression coefficients and draw appropriate conclusions from epidemiological data

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Essay: Descriptive analysis and interpretation of an epidemiological data set	1,000 words (incl. Summary Figures & Tables)	25	N	Individual
Statistical modelling and interpretation of an epidemiologic data set	1,500 words (incl. Summary Figures & Tables)	35	N	Individual
Research and statistical analysis report	3,000 words (incl. Summary Figures & Tables)	40	N	Individual

PUBH 7026 Supporting Aged Communities

Credit Points 10

Legacy Code 400241

Coordinator Tiffany Northall ([https://directory.westernsydney.edu.au/search/name/Tiffany Northall/](https://directory.westernsydney.edu.au/search/name/Tiffany%20Northall/))

Description As people age, they are more likely to require assistance to complete the activities of daily living. Understanding the way aged care is provided can encourage health professionals to consider ways that aged care can empower older people, their families and carers. Health care managers and providers are responsible for the way care is provided which includes supporting older people to contribute to society.

School Nursing & Midwifery

Discipline Community Health

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Assumed knowledge of aged care and older people living in communities. A general understanding of aged care including potential challenges and enablers.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique support systems that are provided to older people in their home or in residential aged care.
2. Critically analyse service provision for older people in rural and remote areas.
3. Succinctly evaluate and effectively communicate systems to various stakeholders to ensure older people receive necessary support.
4. Utilise health care models that support, older people, their families, and carers.
5. Conceptualise ways that aged care could be provided to empower older people and communities to contribute to society.

Subject Content

1. Models and Philosophies of Aged Care:

- United Nations Principles for Older Persons
- Philosophies of Care Support for Older People
- International Models of Care and Support
- Continuum of Care Approaches

2. Frameworks for Analysing Aged Care Support Systems:

- Primary Health Care as Process
- Theoretical Analysis of Dynamic Health Care Systems

3. Social Change and Community Support:

- Social Adjustment and the Ageing Process
- Population Health and Local Community Needs
- Aged Care Assessment Teams and the Assessment Process
- Informal Carers – Needs Analysis and Support Systems

- Community Involvement and Emancipation Processes

4. Creating and Sustaining Process of Exchange:

- Social Agency and Change
- Inter-disciplinary Action Processes
- Networking Across the Continuum of Care
- Strategies for Reform

Assessment

PUBH 7027 Supporting Individuals and Communities in Crisis

Credit Points 10

Legacy Code 400838

Coordinator Lisa Wong ([https://directory.westernsydney.edu.au/search/name/Lisa Wong/](https://directory.westernsydney.edu.au/search/name/Lisa%20Wong/))

Description The planning, development and implementation of primary health care initiatives rest largely on the capacity of health care workers to develop and engage in partnerships with a diverse range of consumers, health care workers and organisations. In this unit students will critically examine the complexities inherent in developing and sustaining effective and active partnerships with individuals and groups in primary health care contexts. The interpersonal, cultural and socio-political issues that shape communication and the development of partnerships will be examined. Current approaches used to plan for and respond to crises, emergencies and disasters at an individual, organisational and community level will also be explored.

School Nursing & Midwifery

Discipline Public Health

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify models of communication that guide the development of professional interpersonal relationships and partnerships with consumers and organisations in primary health care contexts.
2. Critically examine personal, cultural and organisational factors that influence the nature of interpersonal, interprofessional and organisational relationships in primary health care settings.
3. Identify and analyse specific theories regarding the structure, function and process of therapeutic communication and crisis intervention.
4. Identify the principles that underpin frameworks of disaster/emergency preparedness and response within primary health care contexts.
5. Examine the efficacy of selected frameworks of disaster/emergency preparedness and response in health care contexts.
6. Examine community, multidisciplinary and intersectoral relationships considered essential for effective disaster prevention, mitigation, preparedness and response.

Subject Content

Module 1: Introduction to communication theory and models of partnership

1. Linear theory of communication
2. Circular transactional theoretical model of communication
3. Partnerships in primary health care contexts
 - with community groups and health care Organisations
 - with Consumers and families
 - communication within multidisciplinary teams
 - Intersectoral relationships
4. Culture and communication
 - self as A cultural being
 - Issues of language, gender, ethnicity/race, Age, socioeconomic situation, religion/spirituality

Module 2: Essential elements of therapeutic communication

1. Therapeutic communication models
2. Facilitative conditions of therapeutic communication
3. Characteristics of self concept/ self awareness
4. Crisis theory and primary health care practice
5. Group dynamics and development

Module 3: Essential elements of emergency/disaster mitigation, preparedness and response within primary health care contexts

1. WHO policy on emergency preparedness and risk reduction
 - 'All Hazard/Whole Health' approach
2. International, national and local issues related to disaster mitigation, preparedness and response
 - government and Legislation
 - Vulnerability to emergencies and crises

Module 4: Health sector, intersectoral co-ordination and community involvement

1. Health care sector responsibilities in promoting resilience and effective responses in emergency and disaster situations
 - social, economic and human consequences of disasters/emergencies

- Risk reduction, Risk management and emergency preparedness
- 2. Frameworks for disaster prevention, mitigation, preparedness and response to natural disasters and complex emergencies
- Intersectoral relationships
- strengthening The response capacity of communities at Risk
- promotion of recovery

Assessment

Teaching Periods

PUBH 7028 Surveillance and Disaster Planning

Credit Points 10

Legacy Code 400847

Coordinator Krista Cockrell ([https://directory.westernsydney.edu.au/search/name/Krista Cockrell/](https://directory.westernsydney.edu.au/search/name/Krista%20Cockrell/))

Description As the world responds to climate change and increased globalisation, the human population is becoming increasingly vulnerable to natural and human disasters. This unit equips students with skills in disaster preparedness and public health surveillance. It addresses the psychosocial and mental health aspects of disaster management, the systems of disaster response and how these aspects are relevant across the all-hazard approach to Prevention, Preparation, Response and Recovery (PPRR). Using current evidence and understanding of this field, students will gain knowledge, skills and experience in leadership and management across the PPRR spectrum and the public health, clinical and other coordination in terms of impact and outcome. Australian requirements and systems in relation to surveillance and disaster planning will be analysed as will international and Australian roles in the region.

School Health Sciences

Discipline Public Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse environmental, social, cultural, and animal welfare factors in public health disaster planning.
2. Appraise responses to disasters to provide evidence-based recommendations for surveillance and response improvements.
3. Interpret data to establish the epidemiology of disaster and identify public health needs of communities for disaster planning.
4. Formulate responses to potential or occurring public health emergencies to minimise the impacts to affected communities and build community resilience.

Subject Content

1. Basic concepts and classification of disasters, including terminology
2. Psychosocial aspects of disasters focusing particularly on vulnerable groups
3. Risk and protective factors in disasters and their relevance for prevention and intervention at population and individual level
4. Disaster management frameworks and response systems
5. The mental health effects of disasters
6. Management principles and strategies to support affected individuals and groups during disasters
7. Psychosocial management strategies in disasters
8. Public health and refugee health in disasters
9. The key public health concepts, issues and management in a disaster context
10. Epidemiology and surveillance in disasters

PUBH 7029 Digital Health Management

Credit Points 10

Legacy Code 401366

Coordinator Luckman Hlambelo ([https://directory.westernsydney.edu.au/search/name/Luckman Hlambelo/](https://directory.westernsydney.edu.au/search/name/Luckman%20Hlambelo/))

Description Digital health technologies and services are significant contributors to the transformation of healthcare delivery. Uncertainty, abandonment and lack of organisational willingness to adopt, and failure to manage the realisation of business benefits from health information technology investments lead digital technology projects to fail. This unit provides an overview of capability required to enable health organisations to measure and optimise the value of digital health initiatives. Students will be introduced to various concepts and frameworks used to measure and quantify the benefits of digital health in Australia and elsewhere. Students will have opportunities to participate in industry case studies and analysis.

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) For students enrolled in 4778 Graduate Diploma in Digital Health and 4698 Master of Health Science 2-year and 15-year pathways
PUBH 7031 Health Systems and Policy
Note Students in the 1 year pathway will need to complete a rule waiver form to enrol in this unit

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique and explain the theoretical underpinnings and processes in benefits management and realisation in digital health
2. Apply a structured, effective and consistent approach when directing and managing digital health programs and projects.
3. Evaluate performance to support benefits identification, management and realisation processes and reporting on the value derived from digital health investment.
4. Apply rigorous assurance including quality, gated, investment, technical, security, financial and architecture reviews on digital health programs and projects

- Critically analyse the role of program management, change and organisational culture in digital health benefits management and realisation

Subject Content

- Fundamentals and Foundations of Benefits management and realisation
- Australia's National Digital Health Strategy
- The digital divide in adoption and use of a Personal Health Record
- Digital health project and program fundamentals
- Identifying and assessing benefit dependencies and changes
- Valuing, assessing and optimising the whole investment
- Benefit tracking and reporting
- Maximizing cost efficiency
- Governance, program assurance and gateways
- The Change/Benefit Realisation Management (BRM) process
- Embedding Benefit Realisation Management (BRM) of digital health within an organisation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Proposal of a Benefits Management and Realisation of a Digital Solution	1,000 words	25	N	Individual
Critical Analysis Report	1,500 words	35	N	Individual
Benefits Management and Realisation of a Digital Health Report	2,000 words	40	N	Individual

PUBH 7030 Health Systems Planning and Evaluation

Credit Points 10

Legacy Code 401364

Coordinator Luke Arnold ([https://directory.westernsydney.edu.au/search/name/Luke Arnold/](https://directory.westernsydney.edu.au/search/name/Luke%20Arnold/))

Description This unit addresses health services planning and evaluation, as well as health economics. This unit aims to provide students with the necessary knowledge and skills to understand and apply the major concepts involved in health services planning and evaluation. Workforce planning and service capability frameworks are addressed as well as planning capital infrastructure for health services. How to evaluate and implement a health services plan is also described. The second module introduces the student to several economic concepts relevant to healthcare management and demonstrates how they are applied to actual situations in the healthcare industry.

School Health Sciences

Discipline Health Promotion

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) For students enrolled in 4700 Graduate Diploma in Health Science and 4777 Health Services Management and in 4698 Master of Health Science 2-year and 15-year pathways
Note Students in the 1 year pathway will need to complete a rule waiver form to enrol in this unit
PUBH 7031 Health System and Policy

Equivalent Subjects PUBH 7012 Health Economics and Comparative Health Systems

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Competent use of Microsoft Excel, and high school mathematics (arithmetic, formulas and algebra, reading graphs).

Learning Outcomes

On successful completion of this subject, students should be able to:

- Relate key economic and health service planning principles to the current health system climate
- Determine best practice for planning and implementing change in the health service industry
- Construct innovative solutions to health systems planning to address projected challenges in the health service industry.
- Engage effectively as a member of a health service management team to design and implement a health service initiative

Subject Content

1. Decision-making in health services management
2. Comparing health systems
3. Principles of economic evaluation
4. Measuring and valuing effects
5. Workforce planning and service capability
6. Planning capital infrastructure for health services
7. Rural health planning
8. Planning for populations
9. Service planning models of care
10. Healthcare forecasting, whole of nation and beyond-hospital-walls planning
11. Stakeholder consultation and engagement within the health services planning environment
12. Demand and supply of services

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Professional Task: Health Needs Assessment	1,000 words	25	N	Group
Professional Task: Approach to team-based health system planning	1,500 words	30	N	Group
Professional Task: Health Service Implementation Plan	2,000 words	45	N	Individual

PUBH 7031 Health Systems and Policy

Credit Points 10

Legacy Code 401363

Coordinator Paul Preobrajensky ([https://directory.westernsydney.edu.au/search/name/Paul Preobrajensky/](https://directory.westernsydney.edu.au/search/name/Paul%20Preobrajensky/))

Description A detailed understanding of the structure and functioning of the health system is essential to effectively work, manage and lead in health services. This unit explores concepts that form the basis for the way health systems are designed and operate. This unit will equip students with the skills to critique challenges and opportunities that can influence how health services are delivered and resourced such as health workforce shortages, digital health innovations, public-private partnerships, and changing demographics. This unit will also examine the crucial role of governance and health policy in determining funding priorities and shaping health systems with a particular focus on the Australian health system, but within an international context. These issues are critiqued with health reform and the drivers for change nationally and internationally.

School Health Sciences

Discipline Public Health

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects PUBH 7022 Public Health Policy and Society

Restrictions

Students must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Summarise the structure and organisation of health systems, with a particular focus on the Australian health system
2. Critique the Australian health system
3. Critique the role of government policy in shaping health systems and priorities for health funding
4. Examine the challenges and opportunities facing health systems, particularly those in Australia
5. Appraise strategies to address the challenges to the health system

Subject Content

1. An introduction to health system structure
2. Overview of the Australian health system and international comparisons
3. Governance, policy and healthcare with a focus on Australia
4. Financing health systems
5. Human resources for health
6. Health information systems

PUBH 7032 Patient-centred digital healthcare

Credit Points 10

Legacy Code 401367

Coordinator Luckman Hlambelo ([https://directory.westernsydney.edu.au/search/name/Luckman Hlambelo/](https://directory.westernsydney.edu.au/search/name/Luckman%20Hlambelo/))

Description Patient-Centred Digital Healthcare introduces students to consumer engagement and consumer informatics approaches and many other examples of innovations using data analytics and digital health strategies in clinical, community-based, and home-based settings. Students will learn about the role of Patient-facing Technologies to empower patients and improve safety and the importance of standardisation of the electronic management of healthcare information and the automation of clinical processes in delivering patient-centred care. Central to fulfilling this role is ensuring that care is delivered in a safe and effective manner. Students are encouraged to identify, articulate, reflect upon, and value digital health technologies in their local health services.

School Health Sciences

Discipline Public Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) For students enrolled in 4778 Graduate Diploma in Digital Health and 4698 Master of Health Science 2-year and 15-year pathways
PUBH 7031 Health Systems and Policy
Note Students in the 1 year pathway will need to complete a rule waiver form to enrol in this unit

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Appraise the range of patient-facing technologies available in Australia and how these technologies fit within the wider National Digital Health Strategy for Australia
- Evaluate technical, policy, design, and implementation issues associated with consumer-facing technologies
- Critically analyse the evidence-base for consumer engagement and consumer informatics approaches
- Create innovations using data analytics and digital health strategies in clinical, community-based, and home-based settings
- Illustrate ways in which health systems are using informatics approaches to make a difference both in personal as well as population and community health
- Examine policy and regulatory issues on value-based purchasing, community health, ethics, open science and data analytics, and how Australia and other countries developed their national digital health strategies.

Subject Content

1.Consumer and Patient Engagement in health and healthcare

2. Using digital health to support patient-centred care
3. The role of social media in the democratisation of healthcare
4. Understanding Usability and Human-Centred Design Principles
5. Accessibility for Health IT
6. Behaviour Change Design
7. Consumer-Centred and Consumer-Generated Information
8. Telemedicine and eHealth
9. Patient Portals and Feedback Loops
10. Policy and regulatory issues in digital healthcare

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Discussion Forum	5 x 350 words	25	N	Individual

PUBH 7033 The Social Determinants of Health

Credit Points 10

Legacy Code 401372

Coordinator Kritika Rana ([https://directory.westernsydney.edu.au/search/name/Kritika Rana/](https://directory.westernsydney.edu.au/search/name/Kritika%20Rana/))

Description The social determinants of health recognise that the health and wellbeing of individuals and communities are influenced by a range of social factors such as wealth, education, gender, and ethnicity. Such factors determine access to and use of resources influencing health outcomes and resulting in disparities in health or health inequalities.

In this unit, students will use theories and frameworks for the social determinants of health to assess the role of key social factors in affecting the health and illness of individuals and communities. Students will be introduced to the challenges of measuring and addressing the social determinants of health, and critically examine examples of programmatic and policy interventions aimed at reducing health inequalities and addressing the social determinants of health.

School Health Sciences

Discipline Public Health

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects HLTH 7001 A Global Perspective on the Social Determinants of Health

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically appraise the social factors that determine health and illness across the lifespan.
2. Critically explain the impact of social structure and processes on health inequalities within Australia and internationally.
3. Evaluate the evidence supporting the social determinants thesis and causal pathways offered to describe the link between social factors and inequitable health outcomes.
4. Assess the capacity of the Australian and other national health systems to respond to the challenge of reducing health inequities.
5. Use evidence to investigate, analyse and synthesise the societal determinants of health and disease for effective decision-making

Subject Content

1. Health inequalities and the history of social determinants of health in relation to other key theories and approaches in population health
2. International Commission on the Social Determinants of Health and introduction to major social determinants of health
3. Health and wealth: the role of poverty, employment and education
4. Neighbourhood and the built environment
5. Social capital and community context
6. Discrimination and health
7. Life course approach
8. Indigenous health
9. Methodological challenges involved in measuring social phenomena and making causal inferences about the relationship between social factors and health
10. Policies and interventions that could address the social determinants of health

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

PUBH 7034 Workplace Safety and Risk Management

Credit Points 10

Legacy Code 401373

Coordinator Krista Cockrell ([https://directory.westernsydney.edu.au/search/name/Krista Cockrell/](https://directory.westernsydney.edu.au/search/name/Krista%20Cockrell/))

Description This unit provides a critical insight into the theory and practice of managing health and safety in the workplace. Students have the opportunity to develop a safety systems approach, concentrating on hazard identification, risk assessment and devising control measures incorporating safety management principles to address current and emerging workplace health and safety issues. Students will learn the importance of developing a safety culture in the workplace

as a core principle of safe work system management. In addition, the unit addresses the legal underpinning of health and safety requirements at the workplace. Labour market change and the role of government, unions and employer organisations are also examined. Global perspectives on workplace health and safety from various jurisdictions are also scrutinised.

School Health Sciences

Discipline Occupational Health and Safety

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) PUBH 7031

Equivalent Subjects PUBH 7024 Safety and Risk Management

Restrictions

Students must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the impacts of existing and emerging occupational health and safety issues.
2. Assess hazards and risk to determine appropriate actions and develop risk management strategies.
3. Translate the WHS framework, guidance materials and evidence into practice
4. Design strategies to improve workplace health and safety
5. Examine the role of culture and leadership in workplace safety and risk management.
6. Collaborate with stakeholders to plan and implement work health and safety processes.

Subject Content

1. Workplace safety systems from a global and Australian perspective
2. Identifying Hazards and assessing risk
3. Emerging occupational health issues
4. Conducting a risk assessment and risk mitigation
5. Applying legislation and guidance material to risk management processes
6. Consultation
7. Evaluation in WHS
8. Safety culture and safety leadership
9. Managing Emergencies in the Workplace
10. Worker's compensation and return to work processes

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

RADI 7001 Advanced Principles and Practice of Cardiac Sonography

Credit Points 10

Legacy Code 401247

Coordinator Paul Stoodley ([https://directory.westernsydney.edu.au/search/name/Paul Stoodley/](https://directory.westernsydney.edu.au/search/name/Paul%20Stoodley/))

Description This unit is an essential part of the final year of the Masters in Cardiac Sonography. It will build on the student's knowledge and skills gained in prior units, as they select and study a contemporary cardiac ultrasound technology. Students are required to research and write a literature review about their chosen technology, and to evaluate their own use of the technology in clinical practice. In addition, students will have the opportunity to teach first year cardiac sonographers, and write a reflection on their teaching experience.

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) RADI 7009 AND RADI 7005

Restrictions

Students must be enrolled in the Master of Cardiac Sonography.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate relevant research and compose a literature review utilizing advanced research and academic writing skills
2. Appraise the clinical application of a contemporary cardiac ultrasound technology
3. Reflect on the aspects of adept cardiac sonography practice through teaching student sonographers

Subject Content

Module 1. Contemporary Cardiac Ultrasound Technology

- subject introduction: An Overview of potential research Topics and subject structure

- Journals forum: meetings weeks 2, 3 and 4 to discuss and review relevant grey literature, review articles and original research

- Imaging tutorial: practical lessons on i) the clinical application, and ii) the research utility of the chosen contemporary ultrasound technology (week 7)

- Writing tutorials: meetings weeks 7, 9 and 10 on the essential aspects of writing and editing a literature review

Module 2. Teaching Experience

- Teaching preparation: a tutorial on preparing a teaching plan (aims, outcomes, timetable) and the structure of the teaching sessions (week 4)

- Teaching sessions: two teaching sessions to first year cardiac sonography students (in weeks 5 and 13)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Report	2000 words (excluding references)	50	Y	Individual
Report	1000 words (excluding images and legends)	30	N	Individual
Reflection	650 words total	20	N	Individual
Proposal	300 words	S/U	Y	Individual

RADI 7002 Practice of Cardiac Sonography 1

Credit Points 10

Legacy Code 401189

Coordinator Paul Stoodley ([https://directory.westernsydney.edu.au/search/name/Paul Stoodley/](https://directory.westernsydney.edu.au/search/name/Paul%20Stoodley/))

Description This unit introduces students to the practice of cardiac sonography. Students learn how to acquire and optimise images and to make basic measurements. They will learn how to draw conclusions from the images and measurements, and to write a basic report. The skills learnt in this unit, which includes work integrated learning, provides students with the foundational skills in cardiac sonography.

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) RADI 7006

Assumed Knowledge

Applicants for this program must have successfully completed an undergraduate degree in natural and physical sciences or health.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain key operational aspects of cardiac ultrasound machines
2. Position and manipulate cardiac ultrasound transducers correctly
3. Acquire appropriately oriented echocardiographic images and demonstrate how to undertake specific measurements from four standard imaging ewindowsf

- Interpret and draw conclusion from acquired images and their measurements
- Communicate key findings in a written echocardiogram report

Subject Content

- Image acquisition and measurement
- Ultrasound machine operation
- Communication and professional practice

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Case Study	8 pages of Q&A	25	N	Individual
Quiz	90 minutes	25	N	Individual
Practical Exam	2 hours	50	Y	Individual
Log/ Workbook	175 cases and one 250 word reflection	0	Y	Individual

Prescribed Texts

RADI 7003 Practice of Cardiac Sonography 2

Credit Points 10

Legacy Code 401190

Coordinator Paul Stoodley ([https://directory.westernsydney.edu.au/search/name/Paul Stoodley/](https://directory.westernsydney.edu.au/search/name/Paul%20Stoodley/))

Description This unit will build on the knowledge and skills developed in Practice of Cardiac Sonography 1. Students will learn to perform a more extensive echocardiographic examination as they study measuring left ventricular systolic and diastolic function, and are introduced to assessing valvular function. Image interpretation, report writing, and essential aspects of professional practice will also be included in this unit.

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) RADI 7002

Co-requisite(s) RADI 7007

Learning Outcomes

On successful completion of this subject, students should be able to:

- Apply imaging protocols in the practice of cardiac sonography
- Accurately measure anatomical dimensions and physiological parameters
- Use the ultrasound data to assess cardiac structure and function
- Draw conclusions based on the images and measurements, and write a report
- Demonstrate essential features of safe practice and patient care

Subject Content

- Image acquisition and measurement
- Communication
- Professional practice and development

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Case Study	2 cases	25	N	Individual
Practical Examination	1.5 hours	50	Y	Individual
Written Exam	75 minutes	25	N	Individual
Log/ Workbook	300 cases and one 250 word reflection	0	Y	Individual

RADI 7004 Practice of Cardiac Sonography 3

Credit Points 10

Legacy Code 401191

Coordinator Paul Stoodley ([https://directory.westernsydney.edu.au/search/name/Paul Stoodley/](https://directory.westernsydney.edu.au/search/name/Paul%20Stoodley/))

Description This unit aims to further develop students' understanding of the essential aspects of working in a clinical environment and to consolidate their imaging skills. Students will learn to how to image

a variety of lesions and diseases, including common adult congenital heart defects, systemic diseases that affect the heart, pericardial and pulmonary diseases and cardiac masses. Considerable time will be spent in the clinical environment refining imaging techniques, and students will prepare an evaluation of their imaging skills. .

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) RADI 7003

Co-requisite(s) RADI 7008

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Acquire images and execute relevant measurements of specific systemic and common congenital heart lesions
2. Interpret and draw conclusions from acquired images and measurements
3. Communicate findings in a written report
4. Reflect on echocardiography practice and plan for professional development

Subject Content

1. Image acquisition and measurement
 - imaging patients with congenital heart disease
 - imaging diseases in and outside The heart
 - imaging The right side of The heart
2. Communication
 - writing reports for patients with congenital heart disease and Reporting uncommon findings
3. Professional practice and development
 - reflecting on The Complexity and ethics of echocardiography practice
 - Preparing An action plan for professional development

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Case Study	8 pages of Q&A	25	N	Individual
Reflection	16 images with descriptive text.	25	N	Individual
Practical Exam	Full scan with indication and report	50	Y	Individual
Log/ Workbook	Details of 780 cases (cumulative total) with images (from 5 cases)	S/U	Y	Individual

Credit Points 10

Legacy Code 401192

Coordinator Paul Stoodley ([https://directory.westernsydney.edu.au/search/name/Paul Stoodley/](https://directory.westernsydney.edu.au/search/name/Paul%20Stoodley/))

Description This unit aims to assure that students have gained adequate knowledge and skills to be able to practice competently, confidently and ethically as cardiac sonographers. Care for and communication with patients and colleagues, continual professional development (CPD) and exposure to advanced and leading edge imaging technologies will be given particular emphasis during this unit. Once more, considerable time will be spent in the clinical environment performing imaging skills and activities independently (as per special requirements).

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) RADI 7004

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and measure left ventricular regional wall motion abnormalities
2. Execute a comprehensive echocardiogram examination that includes images acquired from all four acoustic windows
3. Convey echocardiographic findings in a verbal report
4. Formulate a plan for further professional development

Subject Content

1. Image acquisition and measurement
 - Measuring left ventricular Regional wall Motion
 - Intermediate valvular function measurements
 - introduction to stress echocardiography
2. Communication
 - complex echocardiogram interpretation
 - analytical written and verbal Reporting
3. Professional practice and development
 - keeping A professional logbook
 - reflecting on The Complexity and inter-professional dimensions of echocardiography practice
 - Articulating and executing An action plan for professional development

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

RADI 7006 Principles of Cardiac Sonography 1

Credit Points 10

Legacy Code 401185

Coordinator Paul Stoodley ([https://directory.westernsydney.edu.au/search/name/Paul Stoodley/](https://directory.westernsydney.edu.au/search/name/Paul%20Stoodley/))

Description This unit introduces students to two key areas of knowledge for cardiac sonographers: 1) cardiac anatomy and physiology, and 2) ultrasound physics. Students will learn about the normal and abnormal anatomy and physiology of the human heart. They will also learn about the essential physical principles that underpin ultrasound imaging. This unit provides an essential basis for future study in the Graduate Diploma in Cardiac Sonography.

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Applicants for this program must have successfully completed an undergraduate degree in natural and physical sciences or health.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and explain normal cardiac anatomical structures and physiological processes
2. Explain the central principles of transmission and interaction of ultrasound with human tissue

Subject Content

1. Cardiac anatomy and physiology
 - features of The cardiovascular system and its development
 - cardiac Anatomy
 - Cardiopulmonary circulation
 - Essential cardiac electrophysiology
2. Ultrasound physics
 - introduction to Ultrasound instrumentation
 - Pulsed Ultrasound
 - Doppler principles
 - Haemodynamic measurements

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Applied Project	20 Images with descriptive text	20	N	Individual
Quiz	30 minutes	20	N	Individual
Quiz	30 minutes	20	N	Individual
Short Answer	90 minutes	40	N	Individual

RADI 7007 Principles of Cardiac Sonography 2

Credit Points 10

Legacy Code 401186

Coordinator Paul Stoodley ([https://directory.westernsydney.edu.au/search/name/Paul Stoodley/](https://directory.westernsydney.edu.au/search/name/Paul%20Stoodley/))

Description This unit will build on the knowledge acquired in Principles of Cardiac Sonography 1, via a blend of theoretical and practical activities. The students' understanding of cardiac anatomy and physiology will be extended, and they will begin studying cardiovascular diseases. Aspects of ultrasound physics studied in this unit include identifying imaging artifacts, recognizing equipment limitations, and bio-effects and safety.

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) RADI 7006

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and explain abnormal anatomical features and physiological processes that underpin a range of acquired cardiovascular diseases
2. Explain the key principles of cardiac pacemakers and common cardio-active agents
3. Review essential operational aspects of established and emerging ultrasound technologies
4. Identify, assess and address limitations in the acquisition of cardiac ultrasound images
5. Examine and apply principles of safe practice in the performance of different types of cardiac sonography

Subject Content

1. Cardiovascular pathophysiology
 - Myocardial infarction and dilated cardiomyopathies
 - Hypertrophic and restrictive cardiomyopathies
 - principles of heart valve disease
 - cardiac pacing and Basic cardiovascular Pharmacology
2. Ultrasound physics
 - Ultrasound instrumentation and equipment performance
 - new Ultrasound technologies and Contrast agents
 - Ultrasound artefacts
 - Ultrasound bio-effects and safety

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz 1	25 minutes	20	N	Individual
Quiz 2	60 minutes	30	N	Individual
Final Exam	2 hours	50	N	Individual

RADI 7008 Principles of Cardiac Sonography 3

Credit Points 10

Legacy Code 401187

Coordinator Paul Stoodley ([https://directory.westernsydney.edu.au/search/name/Paul Stoodley/](https://directory.westernsydney.edu.au/search/name/Paul%20Stoodley/))

Description This unit will extend the knowledge students have gained from Principles of Cardiac Sonography 2. Students will utilise their knowledge of normal and abnormal cardiac anatomy and physiology to study congenital and acquired heart lesions. They will examine systemic, pulmonary and pericardial diseases and cardiac masses, analyse data from basic echocardiogram measurements, and learn case study research skills by undertaking a case report. The university library's vast resources will provide an important aid to learning in this unit.

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) RADI 7007

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and explain anatomical features and pathophysiological processes of common congenital and acquired heart lesions
2. Discuss the essential features of systemic, pulmonary and infiltrative diseases that affect cardiac anatomy and function
3. Explain the essential features of pericardial disease and of neoplastic diseases of the heart
4. Develop a worksheet of echocardiographic measurements and perform basic statistical analyses of data
5. Research and compose a case report on an observed congenital heart lesion

Subject Content

1. Cardiovascular pathophysiology
 - Essentials of congenital heart disease
 - systemic, pulmonary and infiltrative diseases
 - Pericardial disease and cardiac masses
2. Case study research skills
 - literature Review
 - data collection
 - statistical analysis of collected data
 - case report writing

Assessment

RADI 7009 Principles of Cardiac Sonography 4

Credit Points 10

Legacy Code 401188

Coordinator Paul Stoodley ([https://directory.westernsydney.edu.au/search/name/Paul Stoodley/](https://directory.westernsydney.edu.au/search/name/Paul%20Stoodley/))

Description This unit aims to assure that students have gained adequate knowledge and skills to be able to practice competently and confidently as cardiac sonographers. Students will learn about more complex heart dis-ease and how to detect them by echocardiography and other imaging modalities. They will further devel-op their research skills and start contributing to the sonographic practice through conducting a case pro-ject and presenting the report to the professional audience. The university library's vast teaching and re-search resources will provide an important means for facilitating learning in this unit.

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) RADI 7008

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the pathophysiology of ischemic heart disease and it's detection by echocardiography
2. Identify the causes and sonographic appearance of infective endocarditis and aortic diseases
3. Verify the indications and sonographic appearance of prosthetic heart valves
4. Create a research report on an advanced echocardiographic technique
5. Compare and contrast echocardiography and another cardiac imaging technique

Subject Content

1. Cardiovascular pathophysiology
 - Ischaemic heart disease and echocardiography
 - Ischaemic heart disease and other imaging modalities
 - Prosthetic valves, cardiac interventions and surgery
2. Case study research skills
 - literature Review
 - data collection
 - statistical analysis of collected data
 - case report writing

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

RADI 7010 Research Project in Cardiac Sonography

Credit Points 20

Legacy Code 401248

Coordinator Paul Stoodley ([https://directory.westernsydney.edu.au/search/name/Paul Stoodley/](https://directory.westernsydney.edu.au/search/name/Paul%20Stoodley/))

Description In 2021 this unit replaced by 401467 - Medical Research Project (PG). The primary aims of this unit are to: i. Design, and ii. Execute and complete, a research project based on the cardiac ultrasound technology chosen by the student in Advanced Principles and Practice of Cardiac Sonography. Successful completion of the unit results in the composition of a report, and in an oral presentation, which will include details of the aims, methods, results and conclusions of the project.

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 20cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) HLTH 7008 AND RADI 7001

Restrictions

Students must be enrolled in the Master of Cardiac Sonography.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design a research project utilizing a contemporary cardiac ultrasound technology
2. Employ initiative and responsibility in the execution of a research project
3. Compose a research report utilizing high quality academic writing skills
4. Apply well-developed communication skills in the delivery of an oral presentation
5. Rationalize the key findings of the research project

Subject Content

Module 1. Research Project Design and Performance

- Project design
- data collection and measurement
- data analysis

Module 2. Research Project Report and Presentation

- Essential report writing
- composing A research report
- Preparing A research presentation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Project Report	4000 (excluding references)	65	Y	Individual

RADI 7011 Practice of Vascular Sonography 1

Credit Points 10

Legacy Code 401293

Coordinator Donna Oomens ([https://directory.westernsydney.edu.au/search/name/Donna Oomens/](https://directory.westernsydney.edu.au/search/name/Donna%20Oomens/))

Description This unit introduces students to the practice of vascular sonography. Students will learn how to acquire and optimise ultrasound images and to make basic measurements. In addition, they will learn to draw conclusions about cardiovascular anatomy and function based on the images and measurements, as well as learning how to write a basic report. The skills learnt in this unit, which includes work-integrated learning, provides foundational skills in vascular sonography.

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) RADI 7015

Restrictions

Students must be enrolled in 4765 Graduate Diploma in Vascular Sonography

Assumed Knowledge

Basic human anatomy & physiology and mathematics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Determine the key operational aspects of ultrasound machines (CLO 2)
2. Position and manipulate ultrasound transducers to produce diagnostic quality images (CLO 4)
3. Generate accurate measurements of vascular structures for reporting health professionals (CLO 4)
4. Formulate conclusions from acquired images to inform health professionals (CLO 5)
5. Communicate key ultrasound findings in a written report (CLO 5)

Subject Content

Vascular measurements I
 Ultrasound machine operation
 Essentials of non-imaging physiology measurements
 Image acquisition and measurement I
 Ultrasound image acquisition
 Sonographer Communication I
 Descriptive report writing

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

RADI 7012 Practice of Vascular Sonography 2

Credit Points 10

Legacy Code 401295

Coordinator Donna Oomens ([https://directory.westernsydney.edu.au/search/name/Donna Oomens/](https://directory.westernsydney.edu.au/search/name/Donna%20Oomens/))

Description In this unit, students will build on the knowledge and imaging skills they developed in Practice of Vascular Sonography 1. Additionally, they will learn to perform non-imaging physiological measurements, and be introduced to treatment protocols for vascular patients to complement their understanding of pathology. Image interpretation, report writing and essential aspects of professional practice are also included in this unit.

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) RADI 7011

Co-requisite(s) RADI 7016

Restrictions

Students must be enrolled in 4765 Graduate Diploma in Vascular Sonography

Assumed Knowledge

Basic human anatomy, physiology and mathematics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Implement imaging protocols in the practice of vascular sonography (CLO 3)
2. Measure anatomical dimensions and physiological parameters to allow for correct diagnosis (CLO 4)
3. Utilise ultrasound to assess vascular structures and function (CLO 4)
4. Categorise images and measurements to produce a worksheet for health professionals (CLO 5)
5. Execute essential features of safe practice and patient care in vascular sonography practice (CLO 6)

- 6. Evaluate common vascular interventions to determine effects in patient care (CLO 1)

Subject Content

Image Acquisition & Measurement II
 1. B-mode & Spectral measurements
 Essentials of practice and development I
 2. Infection control practices
 3. Ethics
 Sonographer Communication II
 4. Advanced interpretive and descriptive writing
 Vascular interventions

Special Requirements

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements

- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Legacy Code 401299

Coordinator Donna Oomens ([https://directory.westernsydney.edu.au/search/name/Donna Oomens/](https://directory.westernsydney.edu.au/search/name/Donna%20Oomens/))

Description This unit aims to assure that students have gained adequate knowledge and skills to be able to practice competently, confidently and ethically as vascular sonographers. Care for and communication with patients and colleagues, continued professional development (CPD) and exposure to advance and leading edge imaging technologies will be given particular emphasis during this unit. Once more, considerable time will be spent in the clinical environment performing imaging skills and activities independently (as per special requirements)

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) RADI 7013

Co-requisite(s) RADI 7018

Restrictions

Students must be enrolled in 4765 Graduate Diploma in Vascular Sonography.

Assumed Knowledge

Basic human anatomy & physiology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Produce diagnostic quality assessments of abdominal pathology, venous insufficiency, haemodialysis access and transplant surgery (CLO 4)
2. Analyse the conclusions from diagnostic quality assessments of abdominal pathology, venous insufficiency, haemodialysis access and transplant (CLO 1)
3. Create a worksheet and/or written report based on published criteria in relation to vascular sonography (CLO 5)
4. Reflect on personal sonography practice to plan for further professional development (CLO7)

Subject Content

Imaging Acquisition & Measurement IV

1. Abdominal imaging
2. Venous insufficiency imaging
3. Haemodialysis access imaging
4. Transplant imaging

Professional Practice and Development III

Special Requirements

Legislative pre-requisites

For students who complete their clinical training in a NSW public hospital, the necessary legislative requirements will be part of their employment conditions. Where Clinical training be in a private setting, the special requirements differ from public institutions; students will need to comply with requirements identified by their organisation. Training for some students outside of NSW will be as per the state based requirements.

All Students

To be eligible to enrol in a subject and attend a health-related placement in your program, students must meet Western Sydney University course requirements **and** Special Legislative Requirements to be assessed in their first year of study against the following:

1. National Criminal History Check: Students must have a current (expiring 3 years from date of issue) check valid for their entire program. A valid National Criminal history check must be an Australia wide check, include the student's full name matching their Student ID card and date of birth and not have any offences listed. If a student has a criminal history identified on their check, they must provide a Clinical Placement Authority Card (CPAC) or conditional letter from the NSW HealthShare Employment Screening and Review Unit. https://www.health.nsw.gov.au/careers/student_clearance/Documents/appendix-10-student-application.pdf International students must additionally have a translated International Police Check or statutory declaration.
2. A NSW Working with Children Check (WWCC) clearance letter issued under the category of volunteer valid for their entire program.
3. A current approved first aid certificate valid for their entire program. Approved provider courses can be found at <http://training.gov.au>.

4. A completed vaccination/immunisation card with all serology results containing expiry dates and currency must be maintained by the student to ensure compliance for their entire program.
5. NSW Undertaking/Declaration form.
6. Completed any additional health forms required (such as NSW Health Code of Conduct, Health Student Undertaking/Declaration and Tuberculosis (TB) Assessment Tool).
7. Relevant Local Health District specific documentation as requested. Contact your School for further details. Resources are also available on the Placement Hub (https://www.westernsydney.edu.au/placements_hub/placements_hub/student_compliance/) website.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Professional task: Vascular Ultrasound Task	1 study & report	20	N	Individual
Practical Examination	90 mins	60	Y	Individual
Worksheet / Diagnostic Report	450 words	20	N	Individual
Logbook & Reflection: Record of Practice	600 studies	S/U	Y	Individual

Teaching Periods

RADI 7015 Principles of Vascular Sonography 1

Credit Points 10

Legacy Code 401292

Coordinator Donna Oomens ([https://directory.westernsydney.edu.au/search/name/Donna Oomens/](https://directory.westernsydney.edu.au/search/name/Donna%20Oomens/))

Description In this unit, students will study two essential areas of knowledge for vascular sonographers: I. cardiovascular anatomy and physiology and II. ultrasound physics. The normal anatomy and physiology of the cardiovascular system, and the key physics principles utilized in ultrasound imaging will comprise the majority of the unit content. This unit provides an essential basis for future study in the Graduate Diploma in Vascular Sonography.

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) RADI 7011 - Practice of Vascular Sonography 1

Restrictions

Students must be enrolled in 4765 Graduate Diploma in Vascular Sonography

Assumed Knowledge

Basic human anatomy, physiology and mathematics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the normal features of cardiovascular anatomy and its development (CLO 1)
2. Analyse the central principles related to the transmission and interaction of ultrasound with human tissue and how ultrasound images are displayed. (CLO 2)
3. Apply self-directed learning strategies to enhance professional learning in vascular sonography (CLO 5)

Subject Content

- cardiovascular Anatomy and physiology I

1. Features of the cardiovascular system and its development
2. Arterial and venous anatomy of the head, neck and upper limbs
3. Arterial and venous anatomy of the abdomen and lower limbs

- Ultrasound physics I

1. Introduction to ultrasound instrumentation
2. Pulsed Ultrasound
3. Doppler principles
4. Haemodynamics

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

RADI 7016 Principles of Vascular Sonography 2

Credit Points 10

Legacy Code 401294

Coordinator Donna Oomens ([https://directory.westernsydney.edu.au/search/name/Donna Oomens/](https://directory.westernsydney.edu.au/search/name/Donna%20Oomens/))

Description This unit builds on the knowledge acquired in Principles of Vascular Sonography 1, via a blend of theoretical and practical activities. Students' knowledge of general pathology principles will be extended, and they will also cover the principles of coagulation and atherosclerotic disease. Aspects of ultrasound physics studies in this unit include identifying imaging artefacts, recognizing equipment limitations and bio-effects and safety. Basic vascular pharmacology is also covered.

School Medicine

Discipline Radiography

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) RADI 7015

Co-requisite(s) RADI 7011 - Practice of Vascular Sonography

Restrictions

Students must be enrolled in 4765 Graduate Diploma in Vascular Sonography

Assumed Knowledge

Basic human anatomy, physiology and mathematics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Distinguish the abnormal anatomical features and pathological processes that contribute to specific vascular diseases (CLO 1)
2. Justify essential operational aspects of established and emerging ultrasound technologies to inform professional practice in vascular sonography (CLO 2)
3. Evaluate limitations in the acquisition of vascular images within the professional workplace to allow best practice in vascular sonography (CLO 3)
4. Apply safe practice principles in the performance of vascular sonography (CLO 6)
5. Analyse the roles and interactions of common cardiovascular medicines. (CLO 1)

Subject Content

- vascular pathophysiology I

1.???? Principles of pathology

2.???? Coagulation and clotting pathologies

3.???? Principles of atherosclerotic disease

4.???? Essential cardiovascular pharmacology

- Ultrasound physics II

1.???? Ultrasound instrumentation and equipment performance

2.???? Ultrasound artefacts

3.???? Bio-effects and safety

Assessment

REHA 1001 Introduction to Occupational Therapy

Credit Points 10

Legacy Code 400160

Coordinator Nikki Tulliani ([https://directory.westernsydney.edu.au/search/name/Nikki Tulliani/](https://directory.westernsydney.edu.au/search/name/Nikki%20Tulliani/))

Description This unit introduces students to the profession of occupational therapy, conceptual foundations underpinning the profession, and areas of clinical practice. Students will learn about the important and unique contribution made by occupational therapists in peoples lives to promote health and well-being. The important role of occupation in daily life will be discussed. In particular, this unit presents an overview of how occupational therapy reduces activity limitations people may have, and in doing so enhances the social participation for people of all ages and abilities. The problem solving process used by occupational therapists to assist clients will be introduced.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in 4663 Bachelor of Health Science/Master of Occupational Therapy or 4711 Bachelor of Occupational Therapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Define occupational therapy in respect to its purpose, role and national and international contribution to health care
- Examine the history of occupational therapy professional development in Australia and overseas
- Explore occupational therapy philosophy and theoretical concepts in relation to their application to clients with occupational challenges
- Explore the impact of occupation on health and well-being across the lifespan
- Explore the concepts of roles, activities and skills to understand the occupational nature of human beings
- Identify international and national policies relevant to occupational therapy practice
- Describe major occupational therapy practice areas in Australia and overseas
- Apply the occupational therapy problem solving process to various client groups
- Explain how occupational therapy promotes social participation for clients

Subject Content

- Definitions of occupational therapy
- History and philosophy of occupational therapy
- Role of occupation in promoting health and well-being
- International and national policies and legislation relevant to occupational therapy eg. World Health Organisation policies, Australian health and welfare policies, anti-discrimination legislation
- Occupational therapy practice areas
- Occupational therapy problem solving process
- Occupational therapy conceptual models
- Occupational therapy approaches to improve social participation for specific client groups
- Career options for occupational therapists

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Short Answer	20 minutes	10	N	Individual
Presentation	10-15 minutes	20	N	Individual
Short Answer	2,000-2,500 words (4 x 500-625 word short answer questions)	30	N	Individual
Multiple Choice	2 hours	40	N	Individual

REHA 1002 Introduction to Physiotherapy Practice

Credit Points 10

Legacy Code 400906

Coordinator Daniel Thomson (https://directory.westernsydney.edu.au/search/name/Daniel_Thomson/)

Description This unit introduces students to the concept of physiotherapy as a profession, including regulatory, ethical and legal frameworks underpinning practice within the context of the changing health environment. In addition, students will be introduced to fundamental aspects of physiotherapy practice, including gathering, analysing and problem-solving information through a process of clinical reasoning. Students will also develop practical skills in relation to assessment of movement, patient manual handling and transfers, and patient education regarding gait and use of assistive devices.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Restrictions Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the regulatory requirements for physiotherapy in Australia
2. Describe physiotherapy with respect to its purpose, role and contribution to health care using the International Classification of Functioning framework
3. Develop sound clinical reasoning commensurate with level of training
4. Apply basic communication skills to effectively communicate with clients, peers and academic staff in physiotherapy contexts
5. Perform introductory physiotherapy skills, including movement analysis, manual handling and patient gait training, in a safe and effective manner
6. Develop critical reflection skills in physiotherapy contexts

Subject Content

1. The scope and practice of physiotherapy, including regulatory, ethical and legal frameworks
2. The International Classification of Functioning and physiotherapy
3. Clinical reasoning
4. Effective communication in physiotherapy
5. Critical reflection in physiotherapy
6. Analysis and assessment of human movement
7. Analysis and assessment of gait
8. Clinical case scenarios relevant to physiotherapy practice

REHA 1003 Introduction to Podiatry

Credit Points 10

Legacy Code 400905

Coordinator Steven Walmsley ([https://directory.westernsydney.edu.au/search/name/Steven Walmsley/](https://directory.westernsydney.edu.au/search/name/Steven%20Walmsley/))

Description The broad aim of this unit is to introduce the work of podiatrists in health care and explain the important role of podiatric services in the community. Students will develop basic skills in dealing with professional, legislative and health issues. The focus will primarily be on areas designed to prepare students for incorporating the clinical standards for infection control and general clinical assessment skills in preparation for competent and safe practice in clinical units.

School Health Sciences

Discipline Podiatry

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Restrictions Podiatry specific - students will be participating in podiatry related knowledge and skills that apply to podiatric practice subjects and designed to be an integrated part of the suite of subjects where one subject builds upon the competencies that complement subjects in Year 2, 3 and 4.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the roles of podiatry in the health care setting.
2. Define and describe the aetiology of common skin and nail disorders in the clinical setting.
3. Discuss the relevance of clinical skills in assessment of foot problems and historical background of treatment including footwear.
4. Explain and demonstrate the relevant skills in assessing dermatological, vascular, and neurological status in the normal population.
5. Identify the importance of lower extremity biomechanics and gait analysis in a health care environment.
6. Discuss and apply the framework of infection control standards in the health care environment.
7. Describe the management of patient data.
8. Identify the legal and professional standards associated with documentation in clinical settings

Subject Content

1. History of podiatry
 - from The inception to The present day
2. Role of podiatry in healthcare
 - sole practitioner and multidisciplinary teams
3. Introduction to podiatric conditions and assessment
 - broad Overview of The structure and function of The skin
 - introduction to common dermatological conditions of podiatric significance, including Tinea, hyperkeratosis, hyper/hypohydrosis, corns, callus, warts and nail conditions
 - introduction to Basic vascular, neurological, Biomechanical assessment techniques and gait analysis
 - introduction to patient history taking principles, focusing on communication skills, obtaining relevant information (objective and subjective), maintaining patient Confidentiality
4. National policy and legislation
 - Overview of Registration
 - professional Legislation
 - documentation and legal requirements
 - infection control theory and policy - Overview of Sterilisation, disinfection and antiseptic techniques
5. Footwear
 - historical and social Overview
 - components of A shoe
 - types of shoes
 - effects of shoes on function
 - Basic assessment of footwear

Assessment

REHA 1004 Occupational Therapy Practice 1

Credit Points 10

Legacy Code 400907

Coordinator Bronwyn Gill ([https://directory.westernsydney.edu.au/search/name/Bronwyn Gill/](https://directory.westernsydney.edu.au/search/name/Bronwyn%20Gill/))

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Pre-requisite(s) REHA 2006 People Environments and Occupations COMM 1007 Communication in Health

Restrictions Students must be enrolled in 4663 Bachelor of Health Science/Master of Occupational Therapy or 4711 Bachelor of Occupational Therapy. This subject is profession-specific, preparing students to practice as an occupational therapist and not relevant as an elective for non-occupational therapy students.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the principles of safe work practices to occupational therapy work contexts
2. Educate others on a task appropriate to professional practice
3. Describe the role of the occupational therapist in language suitable for a client
4. Conduct an interview and record findings in a format appropriate for entry into health records
5. Demonstrate professional behaviours and self management in a practice setting
6. Reflect on their practice experience using a structured format

Subject Content

1. Professional attitudes and behaviour
2. Professional roles and relationships
3. Professional communication skills
4. Legislative requirements related to practice
5. Professional ethics

6. Preparation for practice context
7. Safe work practices
8. Equipment used by occupational therapist

REHA 1005 Introduction to Speech Pathology Practice

Credit Points 10

Legacy Code 401300

Coordinator Ed Johnson ([https://directory.westernsydney.edu.au/search/name/Ed Johnson/](https://directory.westernsydney.edu.au/search/name/Ed%20Johnson/))

Description This unit introduces students to the profession of speech pathology, including the regulatory, ethical and legal frameworks which underpin speech pathology practice within the context of the changing health environment. Students will explore and reflect on their developing professional identity with reference to the Professional Standards for Speech Pathologists in Australia, including the domains of professional conduct, reflection and lifelong learning, and speech pathology practice. In addition, students will have opportunities to develop core skills in communication and professional interaction, including gathering, analysing and reflecting on information through a process of clinical reasoning. Students will also develop introductory level skills in core speech pathology processes such as safe and effective observation, documentation and therapeutic communication through practical activities with academic staff and other students.

School Health Sciences

Discipline Speech Pathology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Restrictions Students must be enrolled in the 4763 Bachelor of Speech Pathology or 4764 Bachelor of Speech Pathology (Honours).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the professional standards, regulatory requirements, and ethical guidelines for speech pathology in Australia.
2. Discuss the role of the speech pathologist, in different service delivery contexts in Australia, in optimising communication, swallowing and mealtime experiences for individuals, families and communities.
3. Discuss the factors that contribute to the development of professional identity as a speech pathologist and health professional.
4. Critically reflect on the professional values and competencies that underpin speech pathology practice.
5. Critically observe and record communication interactions.
6. Apply communication skills to effectively communicate with peers and academic staff
7. Demonstrate introductory speech pathology skills in a safe and effective manner within a peer learning environment

Subject Content

1. The speech pathology profession and regulatory frameworks, including Professional Standards, Code of Ethics and National Code of Conduct
2. Speech Pathologists and their role and contribution to optimising communication and mealtime experiences for individuals, families and communities
3. Foundations of clinical reasoning
4. The current and emerging scope of practice in Speech Pathology
5. Respect and responsibility when collaborating with Aboriginal and Torres Strait Islander peoples
6. Communication, swallowing and mealtime management across the lifespan.
7. Holistic frameworks for working with individuals, families and communities.
8. Professional conduct, reflection and lifelong learning, speech pathology practice standards and elements of practice
9. Introduction to clinical observation, recording, and analysis.
10. Introduction to speech pathology practice requirements.

REHA 1006 Communication and Mealtime Foundations

Credit Points 10

Legacy Code 401416

Coordinator Ed Johnson ([https://directory.westernsydney.edu.au/search/name/Ed Johnson/](https://directory.westernsydney.edu.au/search/name/Ed%20Johnson/))

Description This unit provides an orientation to the foundational concepts that underpin Speech Pathologists' practice in the areas of communication and mealtimes across the lifespan. The unit will introduce students to core practice areas and explore the role of the Speech Pathologist in working with individuals, families and communities across different clinical contexts. Students will have the opportunity to compare and contrast typical and disordered presentation of speech, language, voice, fluency, multimodal communication and swallowing in both children and adults. Throughout the unit, theoretical approaches to working effectively in partnership with individuals, families and models will be illustrated.

School Health Sciences

Discipline Speech Pathology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Pre-requisite(s) REHA 1005

Restrictions Students must be enrolled in the 4763 Bachelor of Speech Pathology

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Outline the typical trajectory of communication (speech, language, voice, fluency and multimodal communication) and swallowing development across the lifespan
2. Explain the features of common communication (speech, language, voice, fluency and multimodal communication) and swallowing disorders experienced by children and adults across the lifespan
3. Discuss the role of the Speech Pathologist in evidence-based assessment and treatment of communication and swallowing disorder across the lifespan
4. Translate evidence-based messages about communication and swallowing disorder into an accessible, multimodal format for a lay audience

5. Apply theoretical models of working with individuals, families, and communities in Speech Pathology contexts
6. Reflect on professional and ethical practices that positively influence communication and swallowing outcomes for individuals, families and communities
7. Propose strategies to optimise collaborative partnerships with Aboriginal and Torres Strait Islander peoples and communities in the context of Speech Pathology assessment and management

Subject Content

1. Neurological, cognitive, perceptual, and motor bases of communication and mealtimes
2. Social and environmental bases of communication and mealtimes
3. Typical development of communication (encompassing speech, language, voice, fluency, multimodal communication) and swallowing across the lifespan
4. Common disorders of communication (encompassing speech, language, voice, fluency, multimodal communication) and swallowing across the lifespan
5. Professional and ethical assessment and treatment of communication and swallowing disorders across the lifespan
6. Evidence-based Practice in transdisciplinary care
7. Theoretical models of working with individuals, families and communities
8. Frameworks of observation, clinical reasoning and reflection
9. Working in partnership with Aboriginal and Torres Strait Islander peoples
10. Accessible communication environments and strategies

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

REHA 1007 Foundations of Recreational Therapy

Credit Points 10

Legacy Code 401386

Coordinator Stewart Alford ([https://directory.westernsydney.edu.au/search/name/Stewart Alford/](https://directory.westernsydney.edu.au/search/name/Stewart%20Alford/))

Description This unit introduces students to the profession of recreational therapy, its models and modalities of practice as well as potential areas of work and intervention. It explores the conceptual foundations underpinning the profession, the different approaches to recreation therapy practice and areas of clinical intervention. Students will learn about the important and unique contribution made by recreation therapists in people's lives to promote human development and individual and collective well-being.

School Health Sciences

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define recreational therapy in respect to its purpose, role and contribution to human development and individual and collective wellbeing;
2. Examine the history of recreational therapy professional development in Australia and overseas;
3. Recognise recreational therapy practice settings, models and modalities in relation to their application to clients;
4. Identify international and national policies and guidelines relevant to therapeutic recreation practice;
5. Describe major recreational therapy practice areas in Australia and overseas;
6. Engage in self-analysis to identify personal strengths and weaknesses and their alignment with the recreational therapy profession;
7. Summarise the key aspects of the role of a recreational therapist and their relationship with one's own values.

Subject Content

1. History of recreational therapy
2. Recreation therapy practice settings
3. Recreation therapy models and modalities
4. Recreation therapy standards of practice
5. International and national policies guidelines relevant to recreational therapy
6. Ethical practice in recreational therapy
7. Evaluating personal strengths and weaknesses

REHA 1008 Introduction to Leisure and Recreation Theory

Credit Points 10

Legacy Code 401395

Coordinator Arianne Reis ([https://directory.westernsydney.edu.au/search/name/Arianne Reis/](https://directory.westernsydney.edu.au/search/name/Arianne%20Reis/))

Description Introduction to Leisure and Recreation Theory introduces students to key concepts in leisure and recreation, particularly as they relate to health and well-being. Students will learn about models and theories that assist them in understanding leisure behaviours and recreation practices from different perspectives. The various disciplinary approaches to leisure studies and practice are reviewed, and the multifaceted nature of leisure is explored. In particular, students are encouraged to identify, articulate, reflect upon, and value leisure in their own lives and the lives of others.

School Health Sciences

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Incompatible Subjects REHA 2002 - Introduction to Leisure and Recreation Theory

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain key leisure and recreation theories and how they relate to social inclusion/exclusion and human rights in contemporary society;
2. Recognise the historical developments of leisure and recreation in Australia and elsewhere;
3. Describe the socio-cultural factors that influence leisure and recreation behaviour and experiences in contemporary society;
4. Identify the range of leisure services available in Australia and how these services fit within the wider political and social context;
5. Summarise the importance of leisure and recreation for individual and population health and wellbeing

Subject Content

1. History of leisure
2. Disciplinary perspectives in leisure and recreation studies
3. Leisure Service Delivery Systems
4. Leisure and wellbeing
5. Leisure, social justice and human rights
6. Globalisation of Leisure

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

REHA 2001 Core Competencies in Physiotherapy Practice

Credit Points 10

Legacy Code 400982

Coordinator Clarice Tang ([https://directory.westernsydney.edu.au/search/name/Clarice Tang/](https://directory.westernsydney.edu.au/search/name/Clarice%20Tang/))

Description Students build on their knowledge and skills explored in their first 1.5 years of physiotherapy study. It focuses on the core competencies of physiotherapy professional practice, which will be developed through a variety experiential and community engagement learning activities. Professional competencies addressed in this unit include communication, documentation, and reflection, professional and ethical behaviour. In addition, students will develop skills in client assessment, and interpretation of findings to formulate hypothesized problem lists and goals for patients.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Co-requisite(s) NATS 2008

Restrictions Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy, 4706 Bachelor of Physiotherapy, 4707 Bachelor of Physiotherapy (Honours) or 4733 Bachelor of Physiotherapy (Honours). Students must have successfully completed 120 credit points of core subjects.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply elementary clinical assessment skills across different areas of physiotherapy practice including core musculoskeletal, neurological and cardiorespiratory physiotherapy in different healthcare contexts.
2. Perform a case sensitive analyse and interpretation of clinical assessment findings to formulate a client-centred problem list considering impairments, and activity and participation limitations.
3. Identify relevant and detailed information from a range of clinical scenarios using client-centred clinical reasoning, with appreciation of professional conduct, ethics, and safety.
4. Communicate effectively for the purpose of gaining informed consent and engaging a person in a therapeutic alliance for person-centred clinical assessment.
5. Apply safe work practices, professional behaviours and self-management strategies for a clinical context.

6. Critically self-reflect and evaluate the performance of the therapist and client in a clinical context.

Subject Content

1. Safe work practices, understanding risk management
2. Client examination, including a patient interview and physical examination underpinned by development of clinical reasoning and decision making
3. Professional communication skills with clients, carers and colleagues
4. Professional and ethical behaviour
5. Preparation for practice in the context of physiotherapy

Special Requirements

Legislative pre-requisites

PLEASE NOTE: Due to Covid restrictions the First Aid requirement is currently suspended. July 2021.

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

REHA 2003 Musculoskeletal Disorders and Imaging

Credit Points 10

Legacy Code 401180

Coordinator Steven Walmsley ([https://directory.westernsydney.edu.au/search/name/Steven Walmsley/](https://directory.westernsydney.edu.au/search/name/Steven%20Walmsley/))

Description This unit will introduce students to clinical and theoretical foundations of musculoskeletal disorders that can impact on the function of the lower extremity and reduce patient quality of life. Musculoskeletal disorders including rheumatic diseases, inflammatory arthropathies, connective tissue disorders, bone disease and tumours will be covered. Advanced assessment evaluation will be taught with a focus on diagnostic imaging techniques including ultrasound, X-rays, magnetic resonance imaging, computer tomography and bone scans. This will assist in the clinical diagnosis of disease processes that present in podiatric settings

School Health Sciences

Discipline Podiatry

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) REHA 1003 AND REHA 2005 AND NATS 1022

Co-requisite(s) REHA 2007

Equivalent Subjects REHA 3032 - Podiatric Techniques 1B

Restrictions The subject is Podiatry specific and restricted only to students enrolled in programs 4708 Bachelor of Podiatric Medicine and 4709 Bachelor of Podiatric Medicine (Honours). The subject will be building on previous clinical skills. It is essential that students have been able to demonstrate baseline competencies in theoretical content, patient management, infection control and safe work practices (i.e. completed the preceding prerequisite subjects). Students must meet all inherent requirements for the podiatry program.

Assumed Knowledge

Completion of all core subjects to this semester/year of study.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse and interpret the aetiology, pathophysiology and clinical manifestations of rheumatic diseases, bone disease, and neoplasms of the foot, ankle and lower extremity.
2. Identify and demonstrate examination techniques (history taking, clinical examination and further investigations) needed to construct a differential diagnoses, obtain appropriate diagnostic criteria and implement a treatment program for a range of musculoskeletal disorders affecting the foot, ankle and lower extremity.
3. Distinguish and compare between the diverse range of treatment strategies (pharmacological, physical, mechanical, surgical, alternative etc.) available to treat rheumatic diseases and other musculoskeletal disorders of the foot, ankle and lower extremity.
4. Differentiate and describe the history, development and functionality of current diagnostic imaging modalities, including radiography, ultrasound, MRI, CT or bone scans, available to interpret different musculoskeletal tissue densities and anatomical structures of the foot, ankle and lower extremity.
5. Distinguish and demonstrate between the most appropriate imaging modalities and views needed for the visualisation of particular foot, ankle and lower extremity anatomical structures and common musculoskeletal disorders and develop referral skills for each of these modalities
6. Integrate diagnostic imaging test results with clinical examinations.
7. Identify and appraise the indications and contraindications of a range of diagnostic modalities used in the foot, ankle and lower extremity including radiography, ultrasound, MRI, CT and bone scans.
8. Analyse and compare the legal, ethical and medical ramifications of utilising different diagnostic imaging modalities to investigate common musculoskeletal disorders of the lower extremity.

Subject Content

1. Rheumatic Diseases/Inflammatory Arthropathies
 - Osteoarthritis (OA)
 - Rheumatoid Arthritis (RA)
 - Spondyloarthropathies (SpA) (i.e. Psoriatic Arthritis, Reactive Arthritis, Ankylosing Spondylitis etc.)
 - Connective tissue / auto-immune arthropathies (systemic Lupus Erythematosus, Scleroderma, Sjogrens syndrome etc.)
 - Crystal Arthropathies (Gout, chondrocalcinosis/Pseudogout, apatite deposition etc.)
 - Juvenile Idiopathic Arthritis (Jia)
 - other (Septic Arthritis, Neuropathic arthropathies etc.)
 - For each of these rheumatic conditions, students will be taught appropriate:
 - Theories related to the aetiology and pathophysiology
 - Definitions of each condition from a podiatric perspective including clinical manifestations (lower limb joint, tendon, entheses, bursal & extra articular (i.e. skin, nails, nodules/ganglions) involvement and systemic changes to body tissues and systems) and their investigation processes of clinical examination (i.e. tender, swollen, painful joint/tendon counts) and laboratory tests
 - Management of patients with pharmacological, physical, surgical, alternative therapies, psychosocial support etc.
2. Bone disease
 - theories related to The aetiology and pathophysiology of osteoporosis, Pagets disease, osteomyelitis, osteochondroses (i.e. severs disease, Osgood Schlatters disease, Freiberg's infarction, Kohlers disease etc.) etc
 - Traumatic syndromes (fractures and soft tissue injury)

3. Other disor

Special Requirements

Legislative pre-requisites

Note: Due to Covid Restrictions, the First Aid Requirement is currently not needed.

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and have a National Police Check, which is required to be submitted before placement. Students must also have submitted a Working with Children Check Student Declaration. Students must hold a valid and current First Aid Certificate from a Registered Training Organisation.

Refer to the Special Requirements website for more information.

REHA 2004 Occupational Therapy Practice 2

Credit Points 10

Legacy Code 400909

Coordinator Kristy Coxon ([https://directory.westernsydney.edu.au/search/name/Kristy Coxon/](https://directory.westernsydney.edu.au/search/name/Kristy%20Coxon/))

Description This unit provides opportunities for students to understand the wide-ranging practice areas of relevance to occupational therapy. Students will complete a 90-hour project placement across the semester in partnership with diverse health and community-based service providers. Through a variety of experiential, self-directed, and flexible learning opportunities provided through class practicums and practice placement activities, students will develop critical occupational therapy skills and competence in communication, professional behaviours, ethical practice, critical reflection, quality improvement and project management.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) REHA 1004

Equivalent Subjects LGYA 7061 - Occupational Therapy Clinical Practice 2

Restrictions Students must be enrolled in 4711 Bachelor of Occupational Therapy or 4712 Bachelor of Occupational Therapy (honours). This is a specialty subject offered as a compulsory core subject of the occupational therapy program. It is profession specific, preparing students to practice as an occupational therapist and not relevant as an elective for non-occupational therapy students.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate professional communication skills with clients, staff and relevant others
2. Apply ethical principles to professional practice
3. Demonstrate professional behaviours
4. Practice self-directed learning strategies relevant to the project placement
5. Critically reflect on professional experiences during their project placement
6. Demonstrate effective project management skills, including time and risk management skills
7. Develop a project proposal using best available evidence
8. Develop a final project report using best available evidence
9. Demonstrate professional communication skills with clients, staff, supervisors and relevant others
10. Demonstrate professional behaviours and ethical practice
11. Demonstrate effective self-directed learning strategies relevant to the practice project
12. Critically reflect on professional experiences during the project placement
13. Demonstrate effective quality improvement and project management skills
14. Apply time and risk management skills in the context of the placement project
15. Develop project documentation in appropriate formats using best available evidence

Subject Content

1. Professional communication skills with clients, staff and relevant others
2. Professional attitudes and behaviour
3. Professional roles and relationships
4. Professional ethics
5. Project management principles
6. Risk management skills
7. Reflection on placement experiences
 1. Diverse and role-emerging practice areas
 2. Professional communication with clients, staff, supervisors and relevant others to enable completion and dissemination of practice project deliverables
 3. Professional behaviour and ethical practice
 4. Quality improvement and project management relevant to practice
 5. Self-direction, time and risk management
 6. Reflection on placement experiences

Assumed Knowledge

Completion of all core subjects to this semester/ year of study is assumed knowledge

Anatomy is particularly important for the successful completion of this subject. An understanding of the structure and function of the lower extremity is needed as the focus of this subject is on pathologies of the foot and lower extremity and subsequent assessment, diagnosis and management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss lower extremity biomechanics in relation to joint structure and function, structural and functional abnormalities, and muscle interaction in static and dynamic environments.
2. Apply relevant skills required for assessment of bones, joints, and soft tissues.
3. Develop and apply an understanding of the gait cycle including joint movement, muscle involvement, and structural linkage.
4. Determine how to assess the gait cycle through visual analysis and instrumented analysis.
5. Exhibit theoretical and practical knowledge of the aetiology, pathology, and clinical presentation of common pathologies of the foot and lower extremity.
6. Review and demonstrate the evidence-based approach for implementing management strategies for common foot and lower extremity pathologies.
7. Discuss and implement the theories of measuring health outcomes.

Subject Content

1. Biomechanics of the lower extremity
 - Anatomy of The Lower extremity
 - planes and axis of Motion
 - gait analysis ? static and dynamic joint position and muscle activation
 - introduction to other gait analysis modalities such as pedar, Force plate data collection and software Analyses
 - comparison of walking and running patterns
2. Assessment of structural and functional abnormalities
 - clinical evaluation of bones, joints and soft Tissues
 - introduction to Basic Examination of The hip, knee, leg, ankle and foot
 - intrinsic foot abnormalities ? includes forefoot and rearfoot positions and their effects on function and consequent foot changes
 - extrinsic foot abnormalities ? includes Lower limb changes, leg length differences and their effects on function and consequent foot changes
 - Review of health outcomes to asses and Monitor The impact and Progress of Musculoskeletal pathology
3. Management for osseous, synovial and soft tissue pathologies
 - physiological theories of pain and pain management strategies
 - Nerve entrapments
 - Osseous and synovial pathologies such as fractures, digital deformities, Coalitions
 - soft tissue pathologies such as plantar fasciitis, muscle pathology, tendon pathology
 - principles for mechanical treatment ? Indications, contraindications, practical use of orthoses, footwear and electrophysical therapies
 - introduction to footwear mechanics and modifications

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical Exam	Up to 30 minutes	25	N	Individual
Case Study	2000 words	25	N	Individual
Final Exam	2 hours	50	N	Individual

REHA 2006 People, Environment and Occupations

Credit Points 10

Legacy Code 400908

Coordinator Nikki Tulliani ([https://directory.westernsydney.edu.au/search/name/Nikki Tulliani/](https://directory.westernsydney.edu.au/search/name/Nikki%20Tulliani/))

Description Analysing an individual's participation in meaningful occupations is an essential clinical reasoning process to be mastered by occupational therapists. Therapists must be able to analyse three factors to do so: the person's abilities; the demands of the occupation; and the impact of the environmental context on participation. This unit will facilitate the development of these skills so that students can maximise the person-environment-occupation fit to optimise participation for people with a variety of health challenges or disabilities.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) REHA 1001

Co-requisite(s) HLTH 1001 OR HLTH 1012

Equivalent Subjects LGYA 7691 - Functional Analysis

Restrictions Students must be enrolled in program 4711 Bachelor of Occupational Therapy or 4712 Bachelor of Occupational Therapy (Honours) or 4663 - Bachelor of Health Science/Master of Occupational Therapy. This is a specialty subject offered as a compulsory core subject of the occupational therapy program. It is profession specific, preparing students to practice as an occupational therapist and not relevant as an elective for non-occupational therapy students.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse an individual's physical, cognitive and psychological abilities for participation in daily occupations.
2. Analyse an individual's chosen occupations in terms of the physical, cognitive and psychological requirements of performance.
3. Analyse the sequential steps required to complete everyday occupations.
4. Grade occupations and their sequential steps in terms of their complexity.
5. Analyse the impact of the environmental context on occupations performed in everyday life.
6. Examine how the analysis of people, their occupations and environments builds a foundation for intervention planning in occupational therapy practice.

Subject Content

1. Application of Person-Environment-Occupation models in occupational therapy practice
2. Methods and approaches to analysis and assessment in occupational therapy
3. Analysis of person factors:
 - Analysis of physical aspects of participation eg. biomechanical (muscle strength and range of motion); sensory-motor (co-ordination, motor planning, and balance)
 - Analysis of cognitive aspects of participation (memory, planning/sequencing, perception)
 - Analysis of psychological aspects of participation eg intrapersonal (self-esteem, confidence, fearfulness, hopelessness, self-awareness); interpersonal (relationships with others)
4. Analysis of the demands of the occupation:
 - Analysing occupations into required Steps
 - physical, cognitive, and psychological requirements to Perform The occupation
5. Analysis of the environmental context:
 - how The environmental context impacts participation in occupations
 - social context of participation eg. perceptions of others, social support, social pressures
 - cultural context of participation eg. values, beliefs, customs
 - physical context of participation eg. lighting, access, surfaces
6. Maximising best fit between the person, the occupation and their environment:
 - Understanding how analysis provides A foundation for intervention planning in occupational therapy
 - Grading Steps and demands of occupations to maximise participation in everyday life
 - A brief introduction to common occupational therapy interventions to enable participation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Professional Task	15- 20 minutes + 1000 words	30	N	Individual
Intra-session Exam	1 hour	20	N	Individual
Case Study	1000 words	15	N	Group
Case Study	1000 words	35	N	Individual

REHA 2007 Podiatry Pre-Clinical

Credit Points 10

Legacy Code 400933

Coordinator Zainab Al-Modhefer ([https://directory.westernsydney.edu.au/search/name/Zainab Al-Modhefer/](https://directory.westernsydney.edu.au/search/name/Zainab%20Al-Modhefer/))

Description This unit will prepare students for working with patients in the UniClinic and external placement through consolidation and application of podiatric theory and assessment skills first introduced in Year 1. This unit will emphasize UniClinic handbook procedures, and equip students with basic management, communication and correspondence skills. The unit will also apply student knowledge of functional anatomy, dermatological, vascular, neurological and biomechanical assessment techniques and management into the context of common podiatric conditions.

School Health Sciences

Discipline Podiatry

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) REHA 1003 AND
HLTH 1010 AND
COMM 1007 AND
HLTH 2003 AND
REHA 2005

Co-requisite(s) REHA 2003

Incompatible Subjects LGYA 7036 - Podiatry Pre-clinical Studies

Restrictions

The subject is Podiatry specific and restricted only to students enrolled in 4708 Bachelor of Podiatric Medicine and 4709 Bachelor of Podiatric Medicine (Honours). Students in this subject undertake 4 days of scheduled clinical activity. It is therefore essential students have the required clinical and academic knowledge scaffolded throughout content in program codes 4708 and 4709. Students must meet all inherent requirements for the podiatry program.

Assumed Knowledge

Introduction to Podiatry, Anatomy, Communication skills and Biomechanics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse and apply the principles of professionalism, infection control and work health and safety (WH&S) in a theoretical clinical setting

2. Demonstrate and distinguish skills in instrumentation handling for use in the management of basic dermatological conditions in the UniClinic
3. Clinically apply appropriate vascular, neurological and dermatological assessment skills for use in the context of common pathological conditions
4. Consolidate and apply lower limb anatomy knowledge and appropriate biomechanical assessment skills for use in a biomechanical consultation
5. Apply analytical skills encompassing communication and correspondence with patients, supervisors and medical/allied health professionals
6. Develop and apply skills in manual fabrication of chair-side padding and strapping devices for short-term management of basic podiatric conditions.
7. Develop and apply skills in manual fabrication of non-cast orthoses for longer-term management of basic podiatric conditions

1. First-hand experience of the broad scope of podiatry and fitting of commercially available footwear by engaging in the 5 days of clinical activity within the UniClinic environment and retail footwear outlets.

Special Requirements

Legislative pre-requisites

NOTE: Due to Covid Restrictions, the First Aid Requirement is currently not needed.

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website

Subject Content

Communication Skills

1. Introduction to patient history taking and case presentation skills for use in the UniClinic
2. Development of communication skills for use in the UniClinic and external placement (i.e. professional communication with patients/clients, supervisors, other health professionals/staff and peers in the clinical environment) using role play scenarios/presentation skills

UniClinic Documentation

1. Overview of legal and professional requirements
2. Introduction to UniClinic assessment forms
3. Introduction to UniClinic protocols for documenting consultation notes into patient records (i.e. application of SOAPE format into the context of a UniClinic consultation)
4. Introduction to letter writing protocols for referrals and correspondence with medical and allied health professionals

Instrumentation and Debridement Technique

1. Introduction to basic routine instrument pack and handling instruments
2. Introduction to basic nail and scalpel techniques (i.e. debridement for managing callous) including demonstrations of pre and post swabbing of the foot (i.e systematic swabbing using chlorhexidine solution).
3. Introduction to aseptic non-touch technique in the application of basic sterile dressings for managing minor bleeding points
4. Introduction to UniClinic sterilisation procedures using the Infection Control handbook

Padding & Strapping Fabrication Skills

1. Introduction to principles of chair-side devices as a mechanical therapy
2. Development of padding and strapping fabrication skills for use in managing basic podiatric conditions

Non-cast Orthoses Fabrication skills

1. Introduction to principles of non-cast orthoses as a mechanical therapy
2. Orientation into the orthoses laboratory, including risk assessment and WH&S procedures
3. Development of basic workshop skills to fabricate non-cast orthoses

Clinical Activity

- <http://training.gov.au> (<http://training.gov.au>)
- Other non-health related requirements.

REHA 2009 Workplace Learning 1 (Therapeutic Recreation)

Credit Points 10

Legacy Code 400246

Coordinator Nicole Peel ([https://directory.westernsydney.edu.au/search/name/Nicole Peel/](https://directory.westernsydney.edu.au/search/name/Nicole%20Peel/))

Description This unit provides students with the opportunity to apply theoretical and practical knowledge and skills gained in the course to develop their practice and professional behaviours in a therapeutic recreation workplace setting. The unit develops skills for students

in working with individuals in a therapeutic recreation program that include assessment, planning, programming and evaluation.

School Health Sciences

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) PUBH 1008

Restrictions Students must be enrolled in the Bachelor of Health Science - Therapeutic Recreation program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the standards of communication, professionalism and ethics required for effective therapeutic recreation practice.
2. Communicate the principles, techniques and effectiveness of Recreation Therapy to colleagues, consumers, and the public.
3. Formulate an individual Recreation Therapy program including assessment, planning, implementation and evaluation.
4. Apply professional and ethical standards of practice during Recreation Therapy practice.
5. Utilise skills in task analysis, behavioural observation and functional performance testing.

Subject Content

1. Reflective learning
2. Client-centred practice
3. Overview of Program Planning (Assessment, Planning, Implementation and Evaluation)
4. Therapeutic Recreation Leadership Skills and Strategies for Growth
5. Documentation
6. Planning Theories

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Multiple Choice	3x Quizzes 60 minutes each	25	N	Individual
Applied Project	1,000 words	35	N	Individual
Applied Project	1,500 words	40	N	Individual
Participation	80 hours field placement	S/US	Y	Individual

REHA 2016 Hearing, Speech and Swallowing Science

Credit Points 10

Legacy Code 301381

Coordinator Manisha Dayal ([https://directory.westernsydney.edu.au/search/name/Manisha Dayal/](https://directory.westernsydney.edu.au/search/name/Manisha%20Dayal/))

Description Speech Pathologists require a sound knowledge of the relevant structures and functions of the central and peripheral nervous system to be able to understand hearing, language and swallowing processes, and how disease or dysfunction affects them. This unit covers the anatomical and vascular structures of the head and neck, their development and functions, medical imaging and neural plasticity. Topics include the somatosensory systems, motor systems, and the role of the brainstem, cranial nerves, and executive systems in controlling hearing, speech, language and swallowing processes. Common congenital, degenerative and acquired neurological disorders are described. This unit will develop knowledge relevant to other units related to speech pathology.

School Science

Discipline Speech Pathology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) NATS 1009

Co-requisite(s) NATS 1010

Incompatible Subjects NATS 3006 Anatomy of the Head Neck
NATS 3037 Neuroanatomy

Restrictions Students must be enrolled in 4763 Bachelor of Speech Pathology or 4764 Bachelor of Speech Pathology (Honours).

Assumed Knowledge

Basic knowledge of anatomical and physiological concepts as introduced in relevant first year anatomy & physiology subjects.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and apply anatomical terminology when describing the anatomy and neuroanatomy of the head and neck regions.
2. Describe the blood supply to the head, neck and CNS regions.

3. Describe and explain the functional anatomy of the musculoskeletal elements of the skull; face; cervical and thoracic regions of the vertebral column; ear; nasal cavity; oral cavity; pharynx and larynx.
4. Review the normal structures and functions of the nervous system and relate them to medical imaging, development and developmental processes.
5. Describe and explain the normal functional roles of the brainstem, cranial nerves, and executive systems in controlling speech, hearing, language and swallowing processes, and how these change in congenital, degenerative or acquired neurological conditions.
6. Create, deliver, and peer evaluate oral presentations based on case scenarios

Subject Content

1. Functional gross anatomy of the head, neck and skull using cadaveric specimens and models with special emphasis on the ear, face, oral cavity, larynx, pharynx, and respiratory system
2. Embryological development of head, neck, brain and brainstem regions
3. Functional neuroanatomy of the brain, brainstem, cranial nerves, their spatial relationships with emphasis on regions associated with hearing, speech production and swallowing using cadaveric specimens, models, diagrams/images
4. Introduction to medical imaging techniques e.g. CT & MRI
5. Common congenital, degenerative and/or acquired neurological disorders that result in associated disorders of hearing, speech, and/or swallowing

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Presentation	10 minutes	15	N	Group
Case Study	3 x 500 words	15	N	Individual
Intra-session Exam 1	45 minutes	15	N	Individual
Intra-session Exam 2	45 minutes	15	N	Individual
Final Exam	2 hours	40	N	Individual

REHA 2017 Communication Changes Across the Lifespan

Credit Points 10

Legacy Code 401423

Coordinator Belinda Kenny ([https://directory.westernsydney.edu.au/search/name/Belinda Kenny/](https://directory.westernsydney.edu.au/search/name/Belinda%20Kenny/))

Description This unit discusses communication disorder in children and adults arising from physical, sensory, cognitive, linguistic, psychosocial, functional and environmental changes that occur across the lifespan. The unit focuses on assessment of communication skills, interpretation and reporting of findings, diagnosis, and planning of treatment and management priorities within holistic, person-centred frameworks. Students will have the opportunity to explore disordered presentation of speech, language, voice, and fluency and build on emerging clinical reasoning, critical reflection skills, and strategies for working effectively in partnership with individuals, families and communities.

School Health Sciences

Discipline Speech Pathology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) REHA 1006

Restrictions Students must be enrolled in the 4763 Bachelor of Speech Pathology or 4764 Bachelor of Speech Pathology (Honours).

Assumed Knowledge

To successfully undertake this subject students are expected to have a sound understanding of the scope of practice and professional activities of a Speech Pathologist.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe communication changes that can occur across the lifespan including possible aetiologies, presentation, prognosis and impact on activity and participation
2. Examine disorders of speech, language, voice and fluency in children and adults using appropriate assessment and diagnostic approaches
3. Synthesise, appraise and integrate best available evidence on the principles of early intervention in speech pathology
4. Execute beginning level competency in communication assessment, analysis and interpretation (encompassing speech, language, voice and/or fluency) across the lifespan
5. Critically reflect on emerging clinical skills and their influence on the development of effective therapeutic relationships

Subject Content

1. Assessment and diagnosis of speech sound disorders in children
 - Articulatory disorders
 - Phonological disorders
 - childhood Apraxia of speech
2. Assessment and diagnosis of acquired motor speech disorders in adults
 - Dysarthria
 - acquired Apraxia of speech
3. Analysis of typical and disordered speech across the lifespan

4. Assessment and diagnosis of language and literacy disorders in children
 - Developmental language Disorder
 - language disorders secondary to other conditions
 - social communication Disorder
 - Dyslexia
5. Assessment and diagnosis of acquired language and cognitive communication disorders in adults
 - Aphasia
 - cognitive communication disorders
6. Analysis of typical and disordered language across the lifespan
7. Assessment and diagnosis of voice disorders in children and adults
 - Functional voice disorders
 - organic voice disorders
 - introduction to cancer of The head and Neck
 - Laryngectomy
8. Analysis of typical and disordered voice across the lifespan
9. Assessment and diagnosis of stuttering in children and adults
 - preschool stuttering
 - school Age stuttering
 - adolescent and Adult stuttering
10. Analysis and rating of stuttering severity
11. International Classification of Functioning Disability and Health
12. Person and family- centred practice and models of care
13. Principles of Early Intervention

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Case Study	1,500 words	30	N	Individual
Discourse Analysis	2,000 words	40	N	Individual
Simulation	60 minutes	30	N	Individual
Participation	Participation in 1-hour Screening Assessment	S/U	Y	Individual
Reflection	Reflection - 500 words	S/U	Y	Individual

REHA 2018 Elements of Language: Analysis and Application

Credit Points 10

Legacy Code 401434

Coordinator Ellie Sugden ([https://directory.westernsydney.edu.au/search/name/Ellie Sugden/](https://directory.westernsydney.edu.au/search/name/Ellie%20Sugden/))

Description This unit will introduce core linguistic concepts including the sound structure of language (phonetics), how sounds convey meaning (phonology), the formal structure of words (morphology) and sentences (syntax), and the ways in which each of these differ across languages. Emphasis will be placed on the cultural and linguistic diversity of the Western Sydney region, and this will serve as a lens through which the linguistic concepts covered throughout the course will be taught. Students will learn how to transcribe typical and disordered speech using the International Phonetic Alphabet and will be familiarised with how to analyse language at the phoneme, word, and sentence levels. Knowledge will be applied to the exploration of real-world clinical cases. The knowledge acquired within this unit will lay the foundations for understanding, diagnosing and treating speech and language disorders.

School Health Sciences

Discipline Speech Pathology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Restrictions Students must be enrolled in the 4763 Bachelor of Speech Pathology or 4764 Bachelor of Speech Pathology (Honours).

Assumed Knowledge

It is assumed that students will have an introductory understanding of the core range of practice areas in Speech Pathology (speech, language, voice, fluency, multimodal communication, and swallowing) and awareness of typical patterns of speech and language development across the lifespan.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the concepts of phonetics, phonology, syntax, morphology, semantics and pragmatics and explore their relevance to the field of linguistics and profession of Speech Pathology
2. Accurately transcribe typical and disordered speech phonemically and phonetically, using the International Phonetic Alphabet (IPA)
3. Grammatically analyse typical and disordered language at word, phrase, sentence and clause level
4. Utilize linguistics to problem-solve clinical and research-based case scenarios exploring linguistic development, difference and disorder

Subject Content

1. Dynamics of language: difference and change in how people speak; key concepts in the language sciences and their relevance to Speech Pathology
2. Patterns and levels of speech and language (phonetics, phonology, morphology, syntax, semantics, pragmatics)
3. Use of International Phonetic Alphabet to describe and analyse speech production
4. Use of key concepts in morphology, syntax, semantics and pragmatics to analyse language production

5. Understanding language: speech perception, receptive vocabulary, semantic and syntactic processing

6. Introduction to current research topics in language sciences, with implications for Speech Pathology

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	15 mins / 15 Questions	15	N	Individual
Case Study	2,000 word (Structured Template)	40	N	Individual
Final Exam	2 hours	45	N	Individual
Log/Workbook	12 x transcription modules (20 questions each)	S/U	Y	Individual

REHA 2019 Optimising Communication for Adults

Credit Points 10

Legacy Code 401421

Coordinator Belinda Kenny ([https://directory.westernsydney.edu.au/search/name/Belinda Kenny/](https://directory.westernsydney.edu.au/search/name/Belinda%20Kenny/))

Description This unit discusses theoretical and evidence-based intervention approaches that underpin speech pathology practice for adults with communication disorders. The unit explores speech pathology management of speech, language, voice and fluency and multimodal communication through studying communication needs with adult cases. Students will have opportunities to plan evidence-based intervention goals and create management plans for individuals, families and communities in a range of clinical contexts. Students will continue to develop core speech pathology practice skills through demonstration, practice and simulation.

School Health Sciences

Discipline Speech Pathology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) REHA 2017

Restrictions

Students must be enrolled in program 4763 Bachelor of Speech Pathology or 4764 Bachelor of Speech Pathology (Honours).

Assumed Knowledge

Students are expected to have a sound understanding of speech pathology domains and scope of practice. Students undertaking this subject should also have foundational knowledge and skills in the assessment and diagnosis of communication disorders in adults.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Distinguish core features of speech pathology intervention approaches that optimise communication for adults with disorders of speech, language, voice and/or fluency.
2. Practice the role of the speech pathologist in facilitating communication accessible environments in different care settings for adults
3. Utilise best available evidence to develop and justify collaborative management plans for adults with communication disorder (encompassing speech, language, voice and/or fluency)
4. Plan and implement evidence-based speech pathology interventions for adults with communication disorder (encompassing speech, language, voice and/or fluency) at beginning level competency
5. Apply evidence-based approaches to working effectively with communication partners
6. Demonstrate cultural proficiency by facilitating safe and respectful communication environments with Aboriginal and Torres Strait Islander peoples

Subject Content

1. Applying theoretical frameworks when working with adults with communication disorders
2. Managing communication disorders across the continuum of care with adults, families and communities
3. Evidence-based intervention approaches for speech, language, voice, fluency and multimodal communication with adults
4. Working with adults from Aboriginal and Torres Strait Islander backgrounds
5. Planning intervention for adults with speech, language, voice, fluency disorders
6. Responsive management for adults with clinical, psychosocial and environmental presentations of increasing complexity
7. Ethical issues in service delivery for adults with communication disorders
8. Evaluating the outcomes of communication interventions with adults
9. Innovations in optimising communication with adults

Special Requirements

Legislative pre-requisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practicals	20 minutes each	30	N	Individual
Case study	2,000 words	30	N	Individual
Final Exam	2 hours	40	N	Individual
Observation/ Reflection	8 hours observation and 500 word reflection	S/U	Y	Individual

REHA 2020 Optimising Communication for Children

Credit Points 10

Legacy Code 401422

Coordinator Ellie Sugden ([https://directory.westernsydney.edu.au/search/name/Ellie Sugden/](https://directory.westernsydney.edu.au/search/name/Ellie%20Sugden/))

Description This unit discusses theoretical and evidence-based intervention approaches that underpin speech pathology practice for children with communication disorders. The unit explores speech pathology management of speech, language, voice and fluency with diverse paediatric cases. Students will have the opportunity to plan intervention goals and develop management plans for individuals, families and communities in a range of contexts. Students will continue to develop core speech pathology practical skills through demonstration, practice and simulation.

School Health Sciences

Discipline Speech Pathology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) REHA 2017

Restrictions

Students must be enrolled in the 4763 Bachelor of Speech Pathology or 4764 Bachelor of Speech Pathology (Honours).

Assumed Knowledge

To successfully undertake this subject students are expected to have a sound understanding of the scope of practice and professional activities of a Speech Pathologist. Students should also have foundational knowledge and skills in the assessment and diagnosis of communication disorders in children.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Distinguish the core features of speech pathology intervention approaches that optimise communication for children with disorders of speech, language, voice and/ or fluency.
- Justify the role of the speech pathologist in prevention, education and advocacy about communication disorders (encompassing speech, language, voice and/or fluency) in children.
- Employ best available evidence to develop and justify collaborative management plans for children with communication disorder (encompassing speech, language, voice and/or fluency).
- Plan and implement evidence-based speech pathology interventions that optimise communication for children with disorders of speech, language, voice and/or fluency at beginner level competency.
- Critically reflect on emerging clinical skills and their influence on the achievement of effective therapeutic outcomes for children.
- Demonstrate cultural proficiency by facilitating safe and respectful communication environments with Aboriginal and Torres Strait Islander peoples.

Subject Content

- Management and measurement of speech sound disorders in children
 - Articulatory disorders
 - Phonological disorders
 - childhood Apraxia of speech
- Management and measurement of language and literacy disorders in children
 - Developmental language Disorder
 - language disorders secondary to other conditions
 - social communication Disorder
 - Dyslexia
- Management and measurement of voice disorders in children
 - Functional voice disorders
 - organic voice disorders
- Management and measurement of stuttering in children
 - preschool stuttering
 - school Age stuttering
- Person and family-centred practice and models of care
- Designing collaborative management plans
- Working collaboratively in partnership with Aboriginal and Torres Strait Islander peoples
- Ethical issues in service delivery for children with communication disorders, and their families
- Innovations in optimising communication with children

REHA 3001 Cardiorespiratory Physiotherapy

Credit Points 10

Legacy Code 400984

Coordinator Rocco Cavaleri ([https://directory.westernsydney.edu.au/search/name/Rocco Cavaleri/](https://directory.westernsydney.edu.au/search/name/Rocco%20Cavaleri/))

Description This unit builds on the knowledge and skills developed in the first 2.5 years of physiotherapy study. This unit focuses on client assessment and evidence based management in acute cardiorespiratory physiotherapy contexts. Students will extend and advance the knowledge, competencies and skills in cardiorespiratory physiotherapy clinical reasoning including assessment, interpretation and prioritisation of findings, synthesis of complex information along with the implementation and evaluation of appropriate treatment strategies. This framework will also be applied to the management of patients in Intensive Care, where students will develop specialist knowledge and skills in cardiorespiratory assessment and treatment of acutely ill unstable patients with cardiorespiratory failure and complex comorbidities. This will require strong communication skills, ethical and professional behaviour and an appreciation of interprofessional care required in acute clinical scenarios including intensive care units.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 3003 AND REHA 3009

Restrictions Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4706 Bachelor of Physiotherapy or 4707, Bachelor of Physiotherapy (Honours) or 4733 Bachelor of Physiotherapy (Honours).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop a depth of knowledge and understanding of the interaction of complex cardiorespiratory diseases and medical management (including invasive respiratory, cardiovascular and medical support)

- Identify patient disability as a result of cardiorespiratory disease and advance medical management
- Conduct an advanced assessment of history taking and physical examination
- Synthesise complex assessment information, using clinical reasoning and patient-centred approaches: a) to develop and justify an individualised prioritised problem list and treatment plan; b) to implement and critically evaluate the management plan; c) monitor, modify and progress treatment(s) as indicated for acutely ill, unstable clients with complex presentations and or cardiorespiratory failure with and without multi-system comorbidities
- Demonstrate safe work practices
- Demonstrate effective verbal and written communication skills to effectively communicate with clients, peers and academic staff in physiotherapy contexts

Subject Content

Within an acute complex cardiorespiratory physiotherapy context:

- Select and interpret findings from history taking and advanced cardiac, cardiovascular and respiratory investigations
- Interpret and synthesise the findings of objective assessments including acute invasive haemodynamic, neurological and respiratory assessment and monitoring (including CVP, PAP, PAOP, ICP, arterial blood gases, respiratory mechanics and work of breathing measures) and other metabolic parameters
- Demonstrate advanced clinical reasoning skills of interpretation, synthesis and analysis of findings, prioritisation of patients problems and development of treatment plan for acutely ill unstable patients with cardiorespiratory disorders or failure and complex comorbidities
- Formulate and justify appropriate evidence-based management techniques to reverse or prevent impairments of decreased O₂, CO₂, and secretion movement and cardiovascular endurance in these patients (including those with respiratory failure requiring assisted ventilation)
- Select and justify the monitoring, evaluation and progression of management techniques as appropriate
- Integration of physiotherapy knowledge with the theory of professionalism, ethics, safe work practices and interprofessional communication (clinical reasoning) to plan management strategies for patients with acute complex presentation.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical Viva Voce (Oral Examination)	30 mins	35	N	Individual

Coordinator Caroline Mills ([https://directory.westernsydney.edu.au/search/name/Caroline Mills/](https://directory.westernsydney.edu.au/search/name/Caroline%20Mills/))

Description Students learn about occupational therapy practice with children and youth in different practice settings. This unit examines child development and explores the occupations of children and youth. The impact of family, social, cultural and political contexts on this period of life is analysed. Occupational therapy models, frames of reference, assessments and interventions are applied to practice scenarios. Family-centred practice is a key focus of this unit.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 2006 AND REHA 2004

Restrictions

Students must be enrolled in program 4663 Bachelor of Health Science/Master of Occupational Therapy or 4711 Bachelor of Occupational Therapy or 4712 Bachelor of Occupational Therapy (Honours).

Learning Outcomes

On successful completion of this subject, students should be able to:

- Analyse important occupations in childhood and adolescence which are of concern in occupational therapy practice
- Analyse typical and atypical child and adolescent development
- Apply family centred practice principles used by occupational therapists to practice scenarios
- Evaluate assessments and their application to occupational therapy practice with children and youth
- Examine a range of occupational therapy interventions for children and youth
- Critique and apply evidence to practice for children and youth with a variety of occupational needs
- Critically analyse the impact of family, social, cultural and political contexts on the lives of children and youth

Subject Content

- Family-centred practice in occupational therapy
- Child and adolescent development

3. Occupations of childhood and adolescence, e.g. play, self care, school, leisure
4. Environmental contexts (e.g. relevant policies, family and cultural contexts, school, childcare, transitional environments)
5. Common diagnoses and developmental issues in childhood and adolescence (e.g. learning and intellectual disability, developmental delay, neurological (cerebral palsy & brain injury), physical (Duchene Muscular dystrophy, developmental coordination disorder), psychological and social (ADHD, Autism)
6. Paediatric occupational therapy assessments and outcome measures
7. Paediatric occupational therapy interventions (e.g. play interventions, seating and positioning, assistive technology, handwriting)

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, a Working with Children Check Student Declaration and First Aid Certificate. Use the link to the Special Requirements webpage below for more information.

Special Requirements (http://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Case Study	1,000 words	30	N	Individual
Report	1,200 words	40	N	Individual
Viva Voce	15 minutes	30	N	Individual

REHA 3003 Clinical Education (General)

Credit Points 10

Legacy Code 401197

Coordinator Clarice Tang ([https://directory.westernsydney.edu.au/search/name/Clarice Tang/](https://directory.westernsydney.edu.au/search/name/Clarice%20Tang/))

Description This clinical unit builds on the knowledge and skills developed in first 2 years of physiotherapy study. It focuses on generic aspects of physiotherapy professional practice, which will have been developed through a variety experiential and community engagement learning activities. Professional competencies addressed in this unit include communication, documentation, and reflection, professional and ethical behaviour. In addition, students will develop skills in client assessment, interpretation of findings and education. A professional practice placement is incorporated into this unit. This unit requires physiotherapy students to demonstrate assessment, intervention skills and problem solving skills in a general environment. The focus will be on generic skills such as communication, problem solving, manual handling, gait and basic assessment skills. The placement may include ambulatory care, acute care, rehabilitation or paediatrics.

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history

- Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
- Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

REHA 3004 Clinical Education A (Acute Care)

Credit Points 10

Legacy Code 400985

Coordinator Rocco Cavaleri ([https://directory.westernsydney.edu.au/search/name/Rocco Cavaleri/](https://directory.westernsydney.edu.au/search/name/Rocco%20Cavaleri/))

Description This clinical education placement will provide the context for students to apply the theoretical and research knowledge and skills learnt in 400984 Cardiopulmonary Physiotherapy. Students will be required to assess and treat clients in the acute care and intensive care settings. Assessments and treatments will focus on improving or preventing client impairments. These may include decreased mobility and function altered by acute illness or injury, which may be combined with a chronic disease or a disability. These assessment and treatments will tend to have a cardiorespiratory physiotherapy focus, but clients may also present with neurological and musculoskeletal conditions which require intervention. Students will, therefore, be expected to integrate knowledge and skills learnt across all physiotherapy-specific units in their provision of client-centred care as well as draw on more general knowledge and skills from earlier stages of the course.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 3018 AND REHA 3001 AND REHA 3016

Co-requisite(s) REHA 4015

Restrictions Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4706 Bachelor of Physiotherapy or 4707, Bachelor of Physiotherapy (Honours) or 4733 Bachelor of Physiotherapy (Honours)

Learning Outcomes

On successful completion of this subject, students should be able to:

- Conduct a comprehensive and advanced subjective and objective assessment
- Analyse case data and develop a prioritised problem list and treatment plan considering impairments, and activity and participation limitation
- Implement appropriate, evidence-based and effective management strategies
- Monitor, evaluate and progress management strategies as indicated
- Communicate effectively for the purpose of gaining informed consent and engaging a person in a therapeutic alliance for person-centred clinical assessment and treatment
- Apply and demonstrate safe work practices, professional and ethical behaviours and self-management strategies in a clinical context.

Subject Content

Within acute care physiotherapy contexts:

- Conduct specialist and advanced subjective and objective examination
- Interpret and analyse findings, develop a client problem list and a treatment plan considering impairments, activity and participation limitations
- Implement appropriate evidenced-based management strategies
- Monitoring, modifying, evaluating and progressing treatments as appropriate
- Communicate effectively for the purpose of gaining informed consent and engaging a person in a therapeutic alliance for person-centred clinical assessment and treatment

6. Apply and demonstrate safe work practices, professional and ethical behaviours and self-management strategies in a clinical context
Acute care physiotherapy contexts refer to inpatient hospital ward settings including intensive care units and medical, surgical, acute cardiorespiratory, neurological, and orthopaedic wards.

REHA 3005 Clinical Exercise Physiology 1

Credit Points 10

Legacy Code 400887

Coordinator Bobby Cheema ([https://directory.westernsydney.edu.au/search/name/Bobby Cheema/](https://directory.westernsydney.edu.au/search/name/Bobby%20Cheema/))

Description In 2017, this unit is replaced by 401145 - Exercise for Health and Disease Prevention. Clinical Exercise Physiology 1 is primarily concerned with teaching students how to design and implement exercise assessments and exercise prescriptions for clinical populations (high-risk). Emphasis is placed on cardiovascular, metabolic, pulmonary and immunological diseases. Unit content relates to how exercise can be applied to prevent, manage and/or treat chronic diseases, informed by an understanding of the pathophysiology and its impact on health status. Students will be involved in designing exercise programs using an evidence-based approach, which will enable a client to achieve optimum results whilst maintaining a high regard

for safety, adherence and motivation. Students will be involved in practical sessions aimed at developing the skills necessary for exercise screening, testing and prescription in clinical populations.

School Health Sciences

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) HLTH 2006 AND BIOS 2037

Equivalent Subjects REHA 3008 - Exercise Prescription For Special Populations

Restrictions Students must be enrolled in 4658 Bachelor of Health Science (Sport and Exercise Science).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply pre-exercise screening and testing methods for high-risk populations;
2. Understand the physiological principles of exercise testing and prescription as applied to clinical populations;
3. Understand the aetiology and pathophysiology of specific chronic diseases and their impact on health status and quality of life;
4. Design exercise prescriptions to prevent, manage and/or treat chronic diseases;
5. Understand logistical issues that are likely to be encountered when implementing exercise programs in specific clinical populations;
6. Understand electrocardiography (ECG) theory;
7. Demonstrate practical skills including: (a) placement of ECG electrodes for a 12-lead ECG recording, (b) measurement of blood pressure during exercise, and (c) development and interpretation of exercise stress test protocols, including knowledge of contraindications and termination criteria.

Subject Content

1. Coronary artery disease, stroke, hypertension, dyslipidaemia, diabetes, obesity, chronic obstructive pulmonary diseases, asthma, chronic renal failure, cancer, arthritis, osteoporosis, HIV, neurological diseases, cognitive diseases
2. Incidence and prevalence of diseases, relationship to age, gender and ethnicity; aetiology, pathophysiology and risk factors
3. Effects of disease progression and exercise prescriptions on physiological, psychological and functional health status and quality of life
4. Evidence-base for exercise training for the prevention, management and treatment of chronic diseases
5. National and international guidelines for pre-exercise screening and stress testing
6. Use of metabolic equations for the determination of exercise intensity and caloric expenditure
7. Application and interpretation of 12-lead electrocardiograph (ECG)
8. Pharmacological and other management strategies ? implications for exercise
9. Safety and first aid considerations
10. Methods and strategies for behaviour change
11. Design of safe and effective exercise prescriptions based on the latest scientific research on exercise prescription for special populations
12. Overview of the employment options in clinical exercise physiology
13. The role of exercise in disease prevention

Teaching Periods

REHA 3006 Ergonomics and Work Occupations

Credit Points 10

Legacy Code 401121

Coordinator Beth Mayland ([https://directory.westernsydney.edu.au/search/name/Beth Mayland/](https://directory.westernsydney.edu.au/search/name/Beth%20Mayland/))

Description The productivity role is a key aspect of adult life for most people. Occupational therapists play a major role in assisting clients who have had their productivity role affected in some way. This unit explores the importance of productivity for adults, in particular those engaged in paid employment. The focus of this unit is the rehabilitation of the injured worker within the context of the work health and safety legislation and the WorkCover case management system. In addition, this unit will explore vocational counselling and rehabilitation for clients with psychosocial, cognitive and physical disabilities.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 2006 AND BIOS 1015

Incompatible Subjects REHA 7006 - Ergonomics and Work Occupations

Restrictions Students must be enrolled in 4711 Bachelor of Occupational Therapy or 4712 Bachelor of Occupational Therapy (Honours).

Assumed Knowledge

Human anatomy, functional anatomy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the importance of the productivity role for adults ? paid and unpaid and examine the factors impacting on engagement in work for people with cognitive, psychosocial or work related injuries
2. Apply the principles of ergonomics to workplace assessment to client case scenarios
3. Describe the role of the occupational therapist in occupational health and rehabilitation in the context of work health and safety legislation and the WorkCover NSW system
4. Identify the issues related to vocational rehabilitation and return to work from the consumer perspective
5. Apply published evidence related to case management and occupational rehabilitation to solve occupational therapy problems
6. Discuss the impact of common occupational diseases and injuries
7. Apply the case management process to an injured worker or a client requiring vocational rehabilitation

Subject Content

1. Developmental theory on adult work role
2. Ergonomic principles for workplace assessment
3. Common occupational injuries and diseases
4. Work health and safety legislation

5. Principles of case management based on the WorkCover NSW system
6. Functional assessment for different client groups
7. Design of graded return to work programs and vocational rehabilitation programs

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

REHA 3007 Exercise Prescription II

Credit Points 10

Legacy Code 401144

Coordinator Carolina Sandler ([https://directory.westernsydney.edu.au/search/name/Carolina Sandler/](https://directory.westernsydney.edu.au/search/name/Carolina%20Sandler/))

Description This unit focuses on the role of exercise in the functional rehabilitation of musculoskeletal injuries including work and sporting injuries. It covers injury and re-injury prevention strategies; mechanisms of injury; patho-physiology of injury and repair process; design and evaluation of rehabilitation exercise programs; how the exercise program functions in concert with other methods of injury treatment and management; important pharmacological, communication, psychosocial and cultural considerations; the role of the exercise physiologist in the rehabilitation team; the effects of nervous system disorders and injury on skeletal muscle control, injury and rehabilitation are also considered.

School Health Sciences

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) HLTH 2005

Equivalent Subjects REHA 3011 - Exercise in Musculoskeletal Injury Rehabilitation REHA 3012 - Exercise in Musculo-Skeletal Rehabilitation

Restrictions

Students must be enrolled in 4658 - Bachelor of Health Science (Exercise and Sport Science).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the scope of practice of an accredited clinical exercise physiologist with respect to musculoskeletal injury rehabilitation.
2. State and utilise methods of reducing injury potential in a variety of sports and exercise programs.
3. Understand the causative mechanisms and pathophysiology of musculoskeletal injury and healing as related to each body region.
4. Develop an awareness of the fundamental approaches and complications associated with treatment of common musculoskeletal injuries, including pharmacological management.
5. Apply principles of functional assessment and exercise rehabilitation in the design and implementation of rehabilitation exercise programs for individuals with musculoskeletal injuries and chronic pain conditions.
6. Modify an exercise program within the context of the biopsychosocial model of rehabilitation.
7. Quantify self report scales for assessment of disability, pain, depression, anxiety, and kinesiphobia.
8. Utilise communication skills regarding exercise prescription technique for effective interpersonal relationships with clients, and other professionals involved in musculoskeletal injury rehabilitation.

Subject Content

In the parts of this subject which cover injuries the following injuries will be covered

1. Acute and chronic responses to injury, repair and remodelling.
 - haemostatic and Inflammatory responses
 - muscle, bone, ligament and tendon
 - affects of injury and Functional rehabilitation on The Biomechanical properties of muscle, bone, ligament and tendon
 - changes in kinaesthetic Sensitivity that accompany soft tissue injuries
2. Acute care for musculoskeletal injuries
3. Pharmacology of key medication for musculoskeletal injury and common coexisting conditions
4. Principles of functional assessment
 - medical clearances
 - common tests of Functional ability used in Screening for Musculoskeletal injury, their uses, strengths and limitations
5. Principles and stages of functional rehabilitation
6. Rehabilitation Techniques
 - Hydrotherapy
 - Therabands
 - Fitball
 - resistance
 - Endurance training
 - flexibility
 - Core stability
 - Progression and evaluation
7. Design and implementation of functional rehabilitation exercise programs for individuals with common musculoskeletal injuries
 - head and Neck
 - Upper limb
 - Lower limb
 - Torso and back
8. Functional exercise rehabilitation?fs relationship to other treatments
9. Risks of injury associated with equipment and exercises used in functional rehabilitation of musculoskeletal injuries
 - The biomechanics
 - Minimising Risk
10. Equipment and environment

11. The exercises and technique
12. Individual client factors
13. Sociocultural and heal

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must hold a valid and current First Aid Certificate from a Registered Training Organisation. Refer to the Special Requirements website for more information

Special requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Assessment

REHA 3009 Exercise Rehabilitation

Credit Points 10

Legacy Code 400997

Coordinator Rocco Cavaleri ([https://directory.westernsydney.edu.au/search/name/Rocco Cavaleri/](https://directory.westernsydney.edu.au/search/name/Rocco%20Cavaleri/))

Description Exercise Rehabilitation focuses on the assessment and management of patients using exercise training. All patient groups are covered but there is an emphasis on cardiorespiratory disorders. Professional competencies addressed in this unit include an understanding of the normal physiological responses to exercise, the implications of pathology and exercise. The unit also includes further development and practice of skills in the patient physical examination, and clinical reasoning such that hypothesized problem lists and goals for patients are developed. The prescription of exercise-based interventions with other physiotherapy modalities is also covered. This unit also facilitates the attainment of professional competencies including effective communication skills, ethical reasoning, professional behaviour, and an appreciation of interprofessional care.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) BIOS 2029 AND REHA 2001

Co-requisite(s) REHA 3017 AND REHA 3015 AND AND REHA 3003

Restrictions Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4706 Bachelor of Physiotherapy, 4707 Bachelor of Physiotherapy (Honours) or 4733 Bachelor of Physiotherapy (Honours). Students in this program are required to participate fully in practical classes. This involves disrobing to shorts and singlet or swim-suit equivalent in mixed gender classes. Students will practice hands-on physiotherapy examination and treatment techniques on both genders, and will personally experience these techniques which will be performed on them by other students and relevant academic staff.

Assumed Knowledge

Knowledge of Human anatomy, human physiology, pathophysiology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret common cardiorespiratory disorders and related disabilities in the Australian population
2. Describe normal physiological responses and limitations to exercise in a healthy population across the lifespan
3. Differentiate between the benefits, risks, and limitations of exercise in populations with pathology
4. Apply complex clinical assessment skills including chest x-ray interpretation, lung function testing, auscultation, electrocardiographs interpretation and exercise tolerance of patients with cardiorespiratory disorders
5. Apply principles of safe exercise testing in patients with pathology
6. Perform advanced case sensitive analyses and interpretation of clinical assessment findings to formulate a patient-centred treatment plan
7. Prescribe safe and effective exercise training in patients with pathology
8. Evaluate and progress exercises appropriately in healthy populations and those with pathology
9. Apply professionalism, effective communication and educative skills with exercise therapy

Subject Content

1. Develop a depth of knowledge of common cardiorespiratory diseases in the Australian population
2. Identify patient disability in the context of a disease of the cardiorespiratory system
3. Normal physiological responses to exercise
4. Altered physiological responses to exercise in cardiovascular and respiratory pathology
5. Advance history taking and physical examination including chest x-ray interpretation, lung function testing, auscultation, electrocardiographs interpretation, and exercise tolerance
6. Further develop the clinical reasoning skills of interpretation of findings, prioritisation of patient problems, and development of treatment plan
7. Safe and effective guidelines for exercise testing in healthy populations and those with pathology

8. Safely and effectively prescribe exercise to improve the health outcomes and rehabilitate patients in patients with cardiorespiratory and other specific medical conditions

9. Maximising patient adherence and participation in exercise and rehabilitation programs

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

REHA 3010 Exercise for Health and Disease Prevention

Credit Points 10

Legacy Code 401145

Coordinator Bobby Cheema ([https://directory.westernsydney.edu.au/search/name/Bobby Cheema/](https://directory.westernsydney.edu.au/search/name/Bobby%20Cheema/))

Description This subject emphasises exercise, physical activity and lifestyle factors in the aetiology, prevention and management of chronic diseases and disability. Students will develop an understanding of the Australian healthcare system and agencies involved in the promotion of physical activity for disease prevention. Students will utilise evidence-based guidelines and problem-based learning to design, implement and evaluate safe and effective exercise and physical activity programs for higher-risk populations. Evidence-based recommendations for sleep, stress reduction, general nutrition and play (social and environmental engagement) will be emphasised and incorporated in these programs to provide a more holistic, wellness-based approach to lifestyle (behaviour) modification. Students will develop practical skills necessary for screening and testing higher-risk populations including electrocardiography (ECG) and stress testing.

School Health Sciences

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) BIOS 2012 AND HLTH 2005

Equivalent Subjects REHA 3008 - Exercise Prescription For Special Populations REHA 3005 - Clinical Exercise Physiology 1

Restrictions

Students must be enrolled in 4658 - Bachelor of Health Science (Sport and Exercise Science).

Assumed Knowledge

Basic understanding of physiological responses to acute and chronic exercise and an understanding of exercise prescription principles.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the role of exercise, physical activity and supportive lifestyle practices in the aetiology, prevention and management of major, lifestyle-related chronic diseases and disability;
2. Describe the Australian healthcare system and policies, initiatives and agencies for physical activity promotion and disease/disability prevention
3. Utilise evidence-based guidelines and problem-based learning approaches to design, implement and evaluate safe and effective exercise and physical activity programs for higher-risk populations, including cardiovascular risk factors and disease, metabolic diseases, cancers, neurological diseases and mental health disorders
4. Integrate exercise and physical activity recommendations within a broader, holistic approach to lifestyle (behaviour) modification, including such aspects as sleep, stress reduction, general nutrition and play (social and environmental engagement)
5. Implement exercise pre-screening in higher-risk populations;
6. Explain basic electrocardiography (ECG) theory and interpret the results
7. Explain the purpose and implementation of cardiac stress testing
8. Demonstrate: (a) placement of electrodes for a 12-lead ECG recording, (b) measurement of blood pressure during exercise.

Subject Content

1. Global and Australian perspectives on health and chronic disease
2. The role of exercise, physical activity and lifestyle factors in the aetiology, prevention and management of chronic diseases and disability
3. The Australian healthcare system and policies, initiatives and agencies for physical activity promotion and disease/disability prevention
4. Exercise and physical activity programs for higher-risk populations, including cardiovascular risk and disease, metabolic diseases, cancers, neurological diseases and mental health disorders
5. Incorporating holistic approaches to health and well-being, including sleep, stress reduction, general nutrition and play (social and environmental engagement)
6. Exercise pre-screening in higher-risk populations
7. Electrocardiography (ECG) theory, interpretation and practice
8. Blood pressure assessment during exercise
9. Introduction to cardiac stress testing

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Final Exam	2 hours	50	N	Individual
Online Quizzes x2	Up to 30 minutes	30	N	Individual
Oral Presentation of an Exercise Program	10 minutes	20	N	Individual

REHA 3012 Exercise in Musculo-Skeletal Rehabilitation

Credit Points 10

Legacy Code 400902

Coordinator Paul Marshall ([https://directory.westernsydney.edu.au/search/name/Paul Marshall/](https://directory.westernsydney.edu.au/search/name/Paul%20Marshall/))

Description In 2017, this unit is replaced by 401144 - Exercise Prescription II. This unit focuses on the role of exercise in the functional rehabilitation of musculoskeletal injuries including work and sporting injuries. It covers injury and re-injury prevention strategies; mechanisms of injury; patho-physiology of injury and repair process; design and evaluation of rehabilitation exercise programs; how the exercise program functions in concert with other methods of injury treatment and management; important pharmacological, communication, psychosocial and cultural considerations; the role of the exercise physiologist in the rehabilitation team; the effects of nervous system disorders and injury on skeletal muscle control, injury and rehabilitation are also considered.

School Health Sciences

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) HLTH 2006

Equivalent Subjects REHA 3011 - Exercise in Musculoskeletal Injury Rehabilitation

Restrictions Students must be enrolled in 4658 - Bachelor of Health Science (Sport and Exercise Science).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the scope of practice of an accredited clinical exercise physiologist with respect to musculoskeletal injury rehabilitation.
2. State and utilise methods of reducing injury potential in a variety of sports and exercise programs.
3. Understand the causative mechanisms and pathophysiology of musculoskeletal injury and healing as related to each body region.
4. Develop an awareness of the fundamental approaches and complications associated with treatment of common musculoskeletal injuries, including pharmacological management.
5. Apply principles of functional assessment and exercise rehabilitation in the design and implementation of rehabilitation exercise programs for individuals with musculoskeletal injuries and chronic pain conditions.
6. Modify an exercise program within the context of the biopsychosocial model of rehabilitation.
7. Quantify self report scales for assessment of disability, pain, depression, anxiety, and kinesiophobia.
8. Utilise communication skills regarding exercise prescription technique for effective interpersonal relationships with clients, and other professionals involved in musculoskeletal injury rehabilitation.

Subject Content

In the parts of this subject which cover injuries the following injuries will be covered

1. Acute and chronic responses to injury, repair and remodelling
 - haemostatic and Inflammatory responses
 - muscle, bone, ligament and tendon
 - affects of injury and Functional rehabilitation on The Biomechanical properties of muscle, bone, ligament and tendon
 - changes in kinaesthetic Sensitivity that accompany soft tissue injuries
2. Acute care for musculoskeletal injuries
3. Pharmacology of key medication for musculoskeletal injury and common coexisting conditions
4. Principles of functional assessment
 - medical clearances
 - common tests of Functional ability used in Screening for Musculoskeletal injury, their uses, strengths and limitations
5. Principles and stages of functional rehabilitation
6. Rehabilitation Techniques
 - Hydrotherapy
 - Therabands
 - Fitball
 - resistance
 - Endurance training
 - flexibility
 - Core stability
 - Progression and evaluation
7. Design and implementation of functional rehabilitation exercise programs for individuals with common musculoskeletal injuries
 - head and Neck
 - Upper limb
 - Lower limb
 - Torso and back
8. Functional exercise rehabilitation?fs relationship to other treatments.
9. Risks of injury associated with equipment and exercises used in functional rehabilitation of musculoskeletal injuries
 - The biomechanics
 - Minimising risk; Equipment and environment, The exercises and technique, Individual client factors

10. Sociocultural and heal

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have:

- 1) submitted a Student Undertaking Form and have applied for a National Police Certificate;
- 2) submitted Working with Children Check Student Declaration;
- 3) possess a current WorkCover Authority approved First Aid Certificate.

Teaching Periods

REHA 3013 Leisure Education Programming and Mental Health

Credit Points 10

Legacy Code 400789

Coordinator Nicole Peel ([https://directory.westernsydney.edu.au/search/name/Nicole Peel/](https://directory.westernsydney.edu.au/search/name/Nicole%20Peel/))

Description In this unit students will develop knowledge and skills required to facilitate and critically evaluate leisure education interventions to bring about changes in the leisure behaviour of individuals, particularly those at risk of developing or with a diagnosed mental illness. Students will analyse evidence to plan, implement and evaluate leisure education programs.

School Health Sciences

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and evaluate models of leisure education and related concepts.
2. Analyse issues related to promoting health and well-being through leisure literacy and participation.
3. Create, implement and evaluate an evidence-informed leisure education program for clients with a mental illness.
4. Analyse, apply and evaluate educational techniques used in leisure education to promote wellbeing

Subject Content

- Leisure education concepts
- Leisure education in national and international contexts
- Leisure education theory applied, in particular, to individuals with A mental illness
- designing, planning and delivering Leisure education programs for individuals with A mental illness
- Leisure ability model (not changed)
- lived experiences of Consumers and families with A mental illness (not changed)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Participation	1 hour tutorials, 10 weeks (Weeks 3-13)	15	N	Individual
Multiple Choice	10 questions per quiz	15	N	Individual
Applied Project	1,000 words	20	N	Individual
Applied Project	Total 1,500 words + presentation	50	Y	Both (Individual & Group)

REHA 3014 Musculoskeletal Physiotherapy

Credit Points 10

Legacy Code 400999

Coordinator Daniel Thomson ([https://directory.westernsydney.edu.au/search/name/Daniel Thomson/](https://directory.westernsydney.edu.au/search/name/Daniel%20Thomson/))

Description This unit focuses on client assessment and treatment using manual physiotherapy techniques. An emphasis is placed on diagnostic reasoning and evaluation, understanding the implications of pathology in a physiotherapy context, prioritising problems and integrating manual therapy with other physiotherapy treatments. This requires strong communication skills, ethical and professional behaviour and an appreciation of interprofessional care.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 3004

Restrictions Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4667 Master of Physiotherapy, and 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy programs. Students in programs 4662 Bachelor of Health Science/Master of Physiotherapy and 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy are to complete prerequisite subject 400982 - Core Competencies in Physiotherapy Practice. Students in program 4667 Master of Physiotherapy are required to complete prerequisite subject 400987 Neurological Physiotherapy Practice. Students in this program are required to participate fully in practical classes. This involves disrobing to shorts and singlet or swim-suit equivalent in mixed gender classes. Students will practice hands-on physiotherapy examination and treatment techniques on both genders, and will personally experience these techniques which will be performed on them by other students and relevant academic staff.

Assumed Knowledge

Human anatomy, human physiology, and pathophysiology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Perform a safe and effective subjective and physical examination for a client with a musculoskeletal pathology, dysfunction or disorder.
2. Develop a problem list and list of differential diagnoses for a client with a musculoskeletal pathology, dysfunction or disorder.
3. Develop short and long-term goals for a client with a musculoskeletal pathology, dysfunction or disorder.
4. Demonstrate and explain the clinical reasoning in the use of appropriate physical examination procedures and manual therapy techniques for the client with a musculoskeletal pathology, dysfunction or disorder.
5. Monitor and evaluate the effects of manual therapy on a client with a disability, dysfunction or disorder.
6. Apply professionalism, ethical behaviour and effective communication skills.
7. Integrate manual therapy with exercise and other physiotherapy modalities in the management of a client with a musculoskeletal pathology, dysfunction or disorder.

Subject Content

1. The focus of this subject is on the physiotherapy assessment and treatment of clients with musculoskeletal disorders.
2. Diagnostic reasoning and manual therapy is a major focus, as is prioritising client problems, and integration of other modalities.
3. Students will learn how to assess and treat clients with spinal and peripheral joint dysfunction, bone and soft tissue injuries and neuromuscular disorders.
4. Manual techniques that will be taught will include passive physiological and accessory mobilisations, soft tissue palpation and testing, special diagnostic tests, neurological testing, muscle length and strength measures.

Teaching Periods

REHA 3015 Musculoskeletal Physiotherapy A

Credit Points 10

Legacy Code 401199

Coordinator Amitabh Gupta ([https://directory.westernsydney.edu.au/search/name/Amitabh Gupta/](https://directory.westernsydney.edu.au/search/name/Amitabh%20Gupta/))

Description This unit builds on the knowledge and skills developed in the first two years of physiotherapy study. It focuses on client assessment and evidence-based management in musculoskeletal physiotherapy contexts. This will require strong communication skills, ethical and professional behaviour and an appreciation of interprofessional care. Professional competencies addressed in this unit include developing skills in musculoskeletal physiotherapy assessment, interpretation and prioritisation of findings along with the implementation and evaluation of appropriate treatment strategies.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 2001 AND NATS 2008 AND HLTH 1010 AND BEHV 1014

Co-requisite(s) REHA 3009 AND REHA 3017 AND REHA 3003

Equivalent Subjects REHA 3026 - Orthopaedic Physiotherapy

Restrictions Students must be enrolled in 4706 Bachelor of Physiotherapy and 4733 Bachelor of Physiotherapy (Hons).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Display effective communication skills, ethics and professionalism
2. Conduct a subjective and objective assessment
3. Develop a prioritised problem list and treatment plan
4. Implement appropriate and effective management strategies, including electrophysical agents
5. Monitor, evaluate and progress treatments as indicated
6. Demonstrate safe work practices

Subject Content

Within a musculoskeletal physiotherapy context the content will include development of:

- subjective and objective components of An assessment
- skills such as observation, palpation, joint range of Motion, muscle length, muscle strength, Balance, Coordination, Functional, neurological Examination and Radiological imaging
- The interpretation of findings, Prioritisation of client problems and development of A Problem list and treatment plan

- implementation of appropriate management techniques including education, Exercise, gait rehabilitation, manual therapy and electrophysical agents
- Monitoring, evaluation and Progression of treatments as appropriate including discharge
- Interprofessional communication, ethics and professionalism
- Safe work practices

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Practical Exam	20 minutes	40	Y	Individual

Legacy Code 401200

Coordinator Daniel Thomson ([https://directory.westernsydney.edu.au/search/name/Daniel Thomson/](https://directory.westernsydney.edu.au/search/name/Daniel%20Thomson/))

Description This unit focuses on client assessment and treatment using manual physiotherapy techniques. An emphasis is placed on diagnostic reasoning and evaluation, understanding the implications of pathology in a physiotherapy context, prioritising problems and integrating manual therapy with other physiotherapy treatments. This requires strong communication skills, ethical and professional behaviour and an appreciation of interprofessional care.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 3003

Equivalent Subjects REHA 3014 - Musculoskeletal Physiotherapy

Restrictions Students must be enrolled in 4706 - Bachelor of Physiotherapy and 4733 - Bachelor of Physiotherapy (Hons). Students

in this program are required to participate fully in practical classes. This involves disrobing to shorts and singlet or swim-suit equivalent in mixed gender classes. Students will practice hands-on physiotherapy examination and treatment techniques on both genders, and will personally experience these techniques which will be performed on them by other students and relevant academic staff.

Assumed Knowledge

Human anatomy, human physiology and pathophysiology equivalent to that covered in 400868 - Human Anatomy and Physiology 1, 400869 - Human Anatomy and Physiology 2 and 400138 - Pathophysiology 1.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Perform a safe and effective subjective and physical examination for a client with a musculoskeletal pathology, dysfunction or disorder.
2. Develop a problem list and list of differential diagnoses for a client with a musculoskeletal pathology, dysfunction or disorder.
3. Develop short and long-term goals for a client with a musculoskeletal pathology, dysfunction or disorder.
4. Demonstrate and explain the clinical reasoning in the use of appropriate physical examination procedures, exercise and manual therapy techniques for the client with a musculoskeletal pathology, dysfunction or disorder.
5. Monitor and evaluate the effects of manual therapy on a client with a disability, dysfunction or disorder.
6. Apply professionalism, ethical behaviour and effective communication skills.
7. Integrate manual therapy with exercise and other physiotherapy modalities whilst working alongside other health professionals in the management of a client with a musculoskeletal pathology, dysfunction or disorder.

Subject Content

1. The focus of this subject is on the role of physiotherapy assessment and treatment in an inter-professional setting for clients with musculoskeletal disorders.
2. Diagnostic reasoning and manual therapy is a major focus, as is prioritising client problems, and integration of other modalities including exercise.
3. Students will learn how to assess and treat clients with spinal and peripheral joint dysfunction, bone and soft tissue injuries and neuromuscular disorders.
4. Manual techniques that will be taught will include passive physiological and accessory mobilisations, soft tissue palpation and testing, special diagnostic tests, neurological testing, muscle length and strength measures.
5. Students will learn how to prescribe and evaluate the use of safe and effective exercise in clients with musculoskeletal disorders.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

PUBH 2005

Co-requisite(s) REHA 3009 AND
REHA 3015 AND
REHA 3003

Restrictions Students must be enrolled in 4706 Bachelor of Physiotherapy or 4733 Bachelor of Physiotherapy (Honours).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Display effective communication skills, ethics and professionalism
2. Conduct a subjective and objective assessment
3. Develop a prioritised problem list and treatment plan
4. Plan appropriate and effective management strategies
5. Monitor, evaluate and progress treatments as indicated
6. Demonstrate safe work practices

Subject Content

Within an acute, neurological physiotherapy context, students should be able to perform:

1. Subjective assessment, investigations, notes, bed charts
2. Objective assessment including observation, basic cognition, range of movement, strength, length, sensation, reflexes, tone, coordination, proprioception, function, and mobility
3. Interpretation of findings, prioritisation of client problems and development of treatment plan
4. Design and implementation of appropriate management techniques including education, exercise, task-related training, and gait rehabilitation
5. Monitoring, evaluation, and progression of treatments as appropriate
6. Interprofessional communication, ethics, and professionalism
7. Safe work practices and discharge planning

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

REHA 3018 Neurological Rehabilitation

Credit Points 10

Legacy Code 400998

Coordinator Clarice Tang ([https://directory.westernsydney.edu.au/search/name/Clarice Tang/](https://directory.westernsydney.edu.au/search/name/Clarice%20Tang/))

Description This unit focuses on client assessment and evidence-based physiotherapy management in neurological rehabilitation. This will require strong communication skills, ethical and professional behaviour and an appreciation of interprofessional care. Professional competencies addressed in this unit include clinical reasoning in neurological physiotherapy assessment and treatment, implementation

and evaluation of evidence-based interventions and management of complex conditions.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 3017 AND REHA 3003

Restrictions Students must be enrolled in 4706 Bachelor of Physiotherapy or 4733 Bachelor of Physiotherapy (Honours). Students in this program are required to participate fully in practical classes. This involves disrobing to shorts and singlet or swim-suit equivalent in mixed gender classes. Students will practice hands-on physiotherapy examination and treatment techniques on both genders, and will personally experience these techniques which will be performed on them by other students and relevant academic staff.

Assumed Knowledge

Human anatomy, human physiology, neuroanatomy, and pathophysiology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply prior knowledge of anatomy, physiology, neuroscience and pathology
2. Demonstrate and apply effective communication skills, ethics and professionalism
3. Select and interpret neurologic assessment techniques, including observational movement analysis, objective measures of impairments, activity limitations and participation restrictions
4. Apply clinical reasoning using a theoretical framework
5. Demonstrate and justify appropriate evidence-based physiotherapeutic interventions to address impairments and activity limitations in individuals with neurological conditions
6. Describe the roles of the multidisciplinary team members to the rehabilitation of individuals with neurological conditions

Subject Content

Within an adult neurological rehabilitation context:

- theoretical framework for assessment and clinical reasoning
- subjective assessment, investigations, notes, bed charts and handover notes
- objective assessment including observational movement analysis, objective measures of impairments, Activity limitations and participation restrictions
- evidence-based treatment approaches and management strategies
- Evaluating treatment outcomes
- Working effectively within A multidisciplinary team
- patient education and Advocacy
- discharge planning

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

REHA 3019 Occupation and Ageing

Credit Points 10

Legacy Code 400176

Coordinator Ali Gebhardt ([https://directory.westernsydney.edu.au/search/name/Ali Gebhardt/](https://directory.westernsydney.edu.au/search/name/Ali%20Gebhardt/))

Description In this unit, students will examine the ageing process using the biopsychosocial model, and reflect on their own attitudes towards ageing, including how social stereotypes of older people must be challenged to promote a positive view of this stage of life. Students will gain knowledge about how occupational performance may be impacted due to ageing, including common conditions assessed and treated by occupational therapists. Students will use research evidence to prepare occupational therapy intervention plans that promote quality of life and maximum social participation for clients' and their families.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 2006

Restrictions This is a specialty subject offered as a compulsory core subject of the occupational therapy program. It is profession specific, preparing students to practice as an occupational therapist and not relevant as an elective for non-occupational therapy students. Students must be enrolled in programs 4663 Bachelor of Health Science/ Masters of Occupational Therapy and 4664 Master of Occupational

Therapy or 4711 Bachelor of Occupational Therapy or 4712 Bachelor of Occupational Therapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically examine the process of ageing using the biopsychosocial model.
2. Reflect on and discuss social and personal values and beliefs that shape images of ageing in western society.
3. Examine the occupational performance areas impacted by the ageing process and discuss the changes older people and their families face in this stage of life.
4. Design an occupational therapy client intervention for older people and their families that promotes social participation using best available evidence.
5. Critically examine the community services and supports available for older people and their families to enhance well-being and quality of life.
6. Examine theories on death and dying and the philosophies of hospice and palliative care and apply these to an occupational therapy approach with clients who have reached the end of life.

Subject Content

- Biopsychosocial changes associated with ageing
- challenging social stereotypes of ageing and developing A positive Image of older people in our society
- occupational performance areas impacted by The ageing process: personal (physical, cognitive, and psychological component skills), social (changes to relationships, sexuality, work Roles, retirement, financial) and community (housing, support services, driving etc)
- occupational therapy intervention for Age related occupational performance problems
- effective Working relationships with older clients and their families
- relevant national/international policies on ageing
- community services and supports for older people
- Integrating The above content areas to provide occupational therapy services that promote social participation of older people and their families

Assessment

REHA 3020 Occupation and Mental Health

Credit Points 10

Legacy Code 400169

Coordinator Kristy Coxon ([https://directory.westernsydney.edu.au/search/name/Kristy Coxon/](https://directory.westernsydney.edu.au/search/name/Kristy%20Coxon/))

Description This unit provides an understanding of the impact of major mental illnesses and disorders on occupational participation. These illnesses/disorders are examined from varying perspectives including consumer, recovery, population health and biomedical. Mental health legislation, policies, strategies and standards are examined in relation to clinical practice in this field. Occupational therapy theory, assessments, interventions and outcomes are incorporated together with cross-disciplinary approaches and current evidence to provide a foundation for practice in mental health settings.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) NATS 3037 AND
BEHV 1014 AND
REHA 2006

Restrictions Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4711 Bachelor of Occupational Therapy or 4712 Bachelor of Occupational Therapy (Honours).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply recovery principles in occupational therapy practice and therapeutic relationships within mental health settings.
2. Analyse the DSM and its use as a classification system to understand identification and management of a range of common psychiatric diagnoses, drawing on literature from alternate perspectives.
3. Analyse the key principles and elements of the Mental Health Act and their application in mental health practice.
4. Explain and document the key elements of mental health and suicide risk assessment processes.
5. Apply the occupational therapy process, models of practice and clinical reasoning using an integrated evidence-based practice approach in a variety of mental health settings.
6. Analyse various aspects of the National Mental Health Strategy, Policy and Standards and their relationship to occupational therapy practice in mental health.

Subject Content

1. Mental health perspectives and approaches (history, recovery and consumer participation, strengths perspective, trauma-informed practice and the DSM)
2. Understanding diagnosis, assessment, management and consumer experience of major mental illnesses/disorders.
3. Therapeutic relationships and recovery from mental illness/disorder.
4. Mental Health Act.
5. Mental Health Assessment and Suicide Risk Assessment.

6. Occupational therapy intervention and evidence-based practice in acute-care settings.
7. Occupational therapy intervention and evidence-based practice in community-care settings.
8. National policy and strategic context.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	4 x 20 minutes	30	N	Individual

REHA 3021 Occupation and Neurology

Credit Points 10

Legacy Code 400171

Coordinator Karen Liu ([https://directory.westernsydney.edu.au/search/name/Karen Liu/](https://directory.westernsydney.edu.au/search/name/Karen%20Liu/))

Description This unit prepares occupational therapy students to work in a variety of settings with individuals who have a neurological condition. The impact of common neurological conditions on the person, their environment and their occupations will be examined. Students will be exposed to a variety of assessments, interventions and evaluation tools suitable for this client population.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) Students enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4711 Bachelor of Occupational Therapy 4 must have completed units NATS 3037 - Neuroanatomy and REHA 2006 - People Environment and Occupations

Restrictions Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4711 Bachelor of Occupational Therapy or 4712 Bachelor of Occupational Therapy (Honours).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Reflect on, and describe the impact of stroke and traumatic brain injury on a client and their carer.
2. Administer and interpret selected assessments and outcome measures which are appropriate for use in neurological rehabilitation.
3. Analyse the performance of clients with stroke and traumatic brain injury, and suggest possible reasons for observable performance difficulties.
4. Describe, demonstrate, and prioritise occupational therapy interventions, based on analysis of client performance and recent research evidence.
5. Develop specific, measurable, client-centred goals.
6. Identify the strengths, weaknesses, and **clinical bottom line** of key research studies in neurological rehabilitation.
7. Describe community support services which may help people with neurological conditions, and their carers.

Subject Content

- common neurological conditions
- The lived experience of A variety of neurological conditions
- evidence based assessment, intervention and evaluation of neurological conditions
- Critical appraisal of interventions used by occupational therapists in neurological rehabilitation
- community engagement: interventions to address Productivity, social integration and independent Living skills
- impact of neurological conditions on The Roles, occupations and participation of individuals and carers

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Presentation	20 mins of in-class presentation including demonstration and peer-led discussion	30	N	Group
Quiz	Up to 40 mins	20	N	Individual
Case Study	2500 words	50	N	Individual

REHA 3022 Occupation and the Environment

Credit Points 10

Legacy Code 400165

Coordinator Beth Mayland ([https://directory.westernsydney.edu.au/search/name/Beth Mayland/](https://directory.westernsydney.edu.au/search/name/Beth%20Mayland/))

Description In this unit students will understand how the environment not only provides a context for the activities people choose to engage in, but also how well they can complete them. Students will learn how the social, cultural, physical and institutional environments that they live in can influence health and well-being, provide structures for social inclusion or exclusion, and enable or limit people to participate in everyday activities. Using an occupational lens, students will gain skills in analysing environmental barriers to occupational performance and modifying environments to increase participation.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 2006

Restrictions Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4664 Master of Occupational Therapy or 4711 Bachelor of Occupational Therapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply an occupational therapy model of practice to evaluate environmental influences on occupational performance.
2. Conduct an analysis of the physical, social, cultural and institutional dimensions of the environment and make recommendations to increase community access and participation.
3. Analyse occupational performance issues in the home and make recommendations regarding environmental modifications, consistent with the building and electrical standards, for a range of client case studies.
4. Design home modification diagrams to industry standard using relevant computer assisted drawing programs.
5. Prepare an occupational therapy home modification report, including scale diagrams, for a client.

Subject Content

1. Assessment of social, cultural, physical and institutional aspects of the environment which influence occupational performance.
2. Occupational performance considerations for people living with a disability which influence environmental access and design.
3. Universal design principles.
4. Anthropometrics.
5. Legislative and funding considerations influencing environmental design and modifications.
6. Environmental modifications for the home environment.
7. Technical drawings of physical environments.
8. Documentation of environmental modifications based on occupational performance.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Applied Project - Community Access Report and Consumer Resource	500 word report and resource (eg 5 minute video, 3 page website, or A5 pamphlet or equivalent)	30	N	Group
Report: Part A - Environmental Modifications Report	1,000 words	30	N	Individual
Report: Part B - Environmental diagrams (as Recommended) Scope of Works and Modification Diagrams	800 words plus 8-12 diagrams (as required)	40	N	Individual

Prescribed Texts

- Ainsworth, E., & De Jonge, D. (2011). An occupational therapist's guide to home modification practice. Thorofare, NJ: SLACK.

REHA 3023 Occupational Therapy Clinical Practice 3b

Credit Points 10

Legacy Code 400175

Coordinator Lee Zakrzewski ([https://directory.westernsydney.edu.au/search/name/Lee Zakrzewski/](https://directory.westernsydney.edu.au/search/name/Lee%20Zakrzewski/))

Description This unit will allow students to consolidate academic knowledge and clinical skills. There will be opportunities to actively participate in assessment, analysis, goal setting, treatment/programme planning and occupational therapy intervention under the supervision of an occupational therapist. The placement will allow students to work for 5 consecutive weeks with occupational therapists in one of the many settings where therapists currently practice.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LGYA 7062

Incompatible Subjects LGYB 7771 - Clinical Placement 3

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate professional communication skills in the practice setting
2. Practice self-directed learning strategies through the use of a learning contract
3. Reflect on their practice experience using a structured format
4. Demonstrate professional behaviours and self management in a practice setting
5. Prepare documents in a professional format related to practice
6. Conduct and interpret assessments relevant to the practice area
7. Conduct occupational therapy intervention specific to the practice area

Subject Content

- professional behaviour
- communication skills
- Individually negotiated learning Contract
- documentation skills for practice

Special Requirements

Legislative pre-requisites

To undertake this subject, students must comply with the following special requirements:

- Completion of a Prohibited Employment Declaration;
- Criminal Record Check Clearance;
- Provide evidence of compliance with the occupational screening and immunisation policy of NSW Health;
- Students must possess a current First Aid Certificate approved by the Workcover Authority.

Teaching Periods

REHA 3024 Occupational Therapy Practice 3

Credit Points 10

Legacy Code 400910

Coordinator Bronwyn Gill ([https://directory.westernsydney.edu.au/search/name/Bronwyn Gill/](https://directory.westernsydney.edu.au/search/name/Bronwyn%20Gill/))

Description This unit will enable students to consolidate academic knowledge and practice skills. On campus practicums will focus on occupational therapy skill development to equip students with the skills to provide occupational therapy interventions during off-site professional practice placements. There will be opportunities to actively participate in assessment, analysis, goal setting, intervention and evaluation under the supervision of an occupational therapist. Students will experience full time work with occupational therapists in practice settings. Students will complete practice hours in accordance

with World Federation of Occupational Therapy accreditation guidelines.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 2004

Co-requisite(s) REHA 3020 AND
REHA 3021 AND
REHA 3002

Equivalent Subjects LGYA 7071 - Occupational Therapy Clinical Practice 3A

Restrictions Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4711 Bachelor of Occupational Therapy or 4712 Bachelor of Occupational Therapy (Honours) as this is a specialty subject involving a placement and thus students only from occupational therapy programs are permitted.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Perform professional communication skills in the practice setting
2. Practise self-directed learning strategies through the use of a learning contract
3. Reflect on their practice experience using a structured format
4. Perform professional behaviours and self management in a practice setting with the guidance of an occupational therapy fieldwork supervisor
5. Prepare documents in a professional format related to practice under the guidance of an occupational therapy fieldwork supervisor
6. Conduct and interpret assessments relevant to the practice area under the guidance of an occupational therapy fieldwork supervisor
7. Conduct occupational therapy intervention specific to the practice area in conjunction with an occupational therapy fieldwork supervisor
8. Utilise occupational therapy skills and techniques in practice settings

Subject Content

1. Professional practice placements
2. Professional behaviours and self management skills
3. Communication Skills
4. Documentation
5. Assessment / Information Gathering
6. Intervention
7. Evaluation
8. Group Skills
9. Specialist and generalist practice skills (eg splinting, groupwork)

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police

Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Professional Placement Performance	National OT fieldwork evaluation tool used to assess performance completed by placement supervisor & satisfactory completion of a minimum of 225 hours	40	Y	Individual
Portfolio	3,000 words	60	Y	Individual

REHA 3025 Occupational Therapy Process

Credit Points 10

Legacy Code 400912

Coordinator Rosalind Bye ([https://directory.westernsydney.edu.au/search/name/Rosalind Bye/](https://directory.westernsydney.edu.au/search/name/Rosalind%20Bye/))

Description This unit provides students with the knowledge and skills to apply the occupational therapy problem-solving process in an evidence-based way, across a diverse range of practice situations. Students will gain knowledge in the application of each stage of the occupational therapy process, learn skills in the selection and implementation of assessments and outcome measures, and undertake intervention planning to suit clients with different occupational needs and health trajectories. Different occupational therapy approaches will be reviewed and students will gain skills in tailoring intervention approaches to suit client need and practice context.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Restrictions Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4664 Master of Occupational Therapy. Pre-requisite for 4663 is 400160 - Introduction to Occupational Therapy. Co-requisite for 4664 is 400911 - Occupational Therapy Theory and Practice

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe in detail the occupational therapy problem-solving process of referral, assessment, goal setting, planning, intervention and evaluation of outcomes as it applies to practice situations
2. Determine the conceptual approach to suit specific practice areas and clients with different health trajectories
3. Investigate and select appropriate assessment and outcome measures for specific client groups
4. Implement and interpret commonly used assessments, interventions and outcome measures used by occupational therapists in a variety of practice contexts
5. Formulate SMART goals and develop therapeutic interventions for individuals or groups
6. Apply knowledge and skills of evidence-based practice to each step of this process

Subject Content

1. The occupational therapy problem-solving process: referral, assessment, goal setting, planning, intervention, and evaluation of outcomes
2. Knowledge and skills of evidence-based practice relevant to each step of this process
3. Skills to analyse, select, implement and interpret appropriate assessments and outcome measures
4. Formulation of SMART goals to guide interventions
5. Models of service provision to guide practice: e.g. individual client-centred therapy, family-centred therapy, group work, case management, consultancy
6. Application of the occupational therapy problem-solving process to suit clients with different health trajectories, e.g. a developmental process for children and young people, a rehabilitative process post injury/stroke, a compensatory process for older people or those with declining health, a palliative process for people who are dying.

Teaching Periods

REHA 3027 Pharmacology for Podiatrists

Credit Points 10

Legacy Code 401182

Coordinator Steven Walmsley ([https://directory.westernsydney.edu.au/search/name/Steven Walmsley/](https://directory.westernsydney.edu.au/search/name/Steven%20Walmsley/))

Description This unit will cover the pharmacological foundations and principles of drugs with a particular emphasis on those that may be prescribed by podiatrists upon appropriate qualification, including indications, contraindications, drug-drug interactions and adverse drug reactions. Student knowledge of national legislation relating to the effective and safe use of drugs will be developed, alongside an understanding of the process for obtaining prescribing rights and the attendant responsibilities. Upon successful completion of this unit and registration as a podiatrist, students will be eligible to seek further training to gain endorsement to prescribe.

School Health Sciences

Discipline Podiatry

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) NATS 2008

Co-requisite(s) REHA 3028

Restrictions The subject is Podiatry specific and restricted only to students enrolled in programs 4708 Bachelor of Podiatric Medicine and 4709 Bachelor of Podiatric Medicine (Honours). The subject involves pharmacology in the context of podiatric clinical practice. Students will be building on previous clinical skills and knowledge in the podiatry program.

Assumed Knowledge

Completion of all core subjects to this semester year of study.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate knowledge and understanding of national legislation related to the effective and safe use of medicines and the pathways by which podiatrists can gain prescribing rights and the attendant responsibilities.
2. Discuss and review the restricted S2/3/4 drug formularies assessable to endorsed podiatry prescribers
3. Review the physiology and pathophysiology of the immune system including inflammation, the pain response and the infectious process and relate these to the mechanisms of drug action
4. Identify the pharmaceutical agents that are available for the treatment of allergic reactions or infected nail / skin conditions, including proprietary and generic identifications and constituent ingredients
5. Demonstrate an appreciation of indications, contraindications and possible side effects of the following groups of drugs: anti-infective agents, anti-emetics, analgesics, anti-inflammatory agents, antihistamines, general and local anaesthetics
6. Recognise the possible complications and sequelae of drug therapy including adverse drug reactions
7. Nominate and implement appropriate laboratory testing and monitoring techniques for optimisation of drug use
8. Demonstrate a working knowledge of drugs commonly prescribed: anti-anginal, anti-hypertensives, diuretics, anti-peptic ulcerants, antidiabetic agents and anti-gout agents

Subject Content

1. General Pharmacology
 - Pharmacokinetics and pharmacodynamics
 - prescribing drugs and drug prescription protocols
 - Minimising drug Abuse
 - management and processes related to adverse drug reactions
 - Polypharmacy
2. Anti-infective agents
 - general principles and mode of action
 - specific drug actions

Indications, actions and contra-indications of commonly prescribed antibiotics, anti-mycotic agents and anti-viral agents
3. Analgesics, anaesthetics and anti-emetics
 - general principles and mode of action of general and local anaesthetics
 - Indications, actions and contra-Indications of commonly administered anaesthetic agents
4. Complications
 - general adverse reactions
 - pain management -physiological theories of pain and Subsequent management strategies
5. National Legislation
 - quality use of medicines
 - national medicines policy
 - therapeutic guidelines

- national prescribing pathways for health professionals
- 6. Prescription of drugs in Podiatry
- theories of prescription rights
- pathways to Endorsement for Scheduled medicines
- S2, S3, S4 and S8 drugs

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	30 minutes	20	N	Individual
Case Study	1100 words	20	N	Individual
Final Exam	2 hours	60	Y	Individual

REHA 3028 Podiatric Practice 1

Credit Points 10

Legacy Code 400929

Coordinator Zainab Al-Modhefer ([https://directory.westernsydney.edu.au/search/name/Zainab Al-Modhefer/](https://directory.westernsydney.edu.au/search/name/Zainab%20Al-Modhefer/))

Description This unit is the first of four podiatry clinical practice units. Building on previous core and podiatry specific theory units this unit introduces students to basic and general clinical skills, including history taking, patient communication, assessment, diagnosis, management and documentation in the clinical environment of common foot disorders under supervision. The student will also be introduced to basic skills in mechanical therapy as part of the clinical therapies component of the unit. Clinical activities will include UniClinic sessions, Clinical Therapies, Tutorials, and External Clinical Placement.

School Health Sciences

Discipline Podiatry

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 2007 AND REHA 2003

Restrictions

The Podiatric Practice subjects have been designed to be an integrated suite of subjects where one subject builds on the clinical competencies of the others. Students participate in patient assessment, diagnosis and management. It is essential that students have been able to demonstrate baseline competencies in theoretical content, patient management, infection control and safe work practices (i.e completed the preceding prerequisite subjects including Podiatry PreClinical). The

subject is Podiatry specific and restricted only to students enrolled in 4708 Bachelor of Podiatric Medicine and 4709 Bachelor of Podiatric Medicine (Honours). Students must meet all inherent requirements for the podiatry program.

Assumed Knowledge

Completion of all core subjects to this semester/ year of study.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate and apply principles of professional behaviour in the clinical environment.
2. Demonstrate and apply competencies in infection control procedures for use in a patient consultation.
3. Develop and apply clinical skills in taking, presenting and documenting a patient history using UniClinic assessment forms and SOAPE format in the clinical environment.
4. Develop and clinically apply competencies in undertaking cursory vascular, neurological, dermatological and biomechanical assessment techniques for use in the patient consultation in the clinical environment.
5. Develop and demonstrate skills in clinical reasoning, using consolidation of podiatric theory, for use in goal orientated management plans in the patient consultation.
6. Develop and demonstrate basic clinical competencies in nail cutting, scalpel technique, application of dressings using aseptic technique and undertaking sterilisation procedures.
7. Develop competencies in documenting patient consultations and corresponding with other health professionals using SOAPE format, UniClinic assessment forms, patient's records and referral letters in the clinical environment.
8. Demonstrate ability to self-evaluate and appreciate limits of own competence, including willingness to consult with peers and staff.
9. Develop and clinically apply skills in manual fabrication of basic mechanical therapy techniques including taping techniques, chair-side devices and non-cast orthoses.
10. Demonstrate and distinguish work health and safety (WH&S) competencies in the clinical environment and whilst using machinery in the orthotic therapy laboratories.

Subject Content

This is the first of four clinical practice units, the student will participate in basic and general patient assessment, diagnosis, and management of common foot disorders.

The activities will be divided into four areas:

- Patient Clinic (UniClinic)
- Clinical Therapies
- Clinical Tutorials
- External Clinical Placement

1. Patient Clinics (UniClinic)
 - All students must be deemed competent in their safety OSCE prior to commencing patient clinics, where students will be heavily supervised by registered practitioners.
2. Clinical Tutorials

Content includes:

 - a). General Information
 - Compliance with Immunisation, First aid and advanced resuscitation CPR certificates, Criminal record and working with children checks, Bulk compliance checks, Inherent Requirements for UniClinic.
 - b). Professional Behaviour
 - Student Clinical Handbook Procedures
 - Dress code
 - Professional behaviour

- c). Infection control
 - Infection Control Handbook Procedures
 - Sterilisation room
 - Clinical protocols
 - Sterilisation procedures
 - Preparing a work area
 - Applying a dressing using aseptic technique
 - d). Documentation
 - Legalities
 - Responsibilities
 - UniClinic assessment forms and patient record keeping
 - SOAPE format
 - Goal Orientated Management Planning
 - Clinical Checklists
 - Referrals and responses
 - e). Clinical Protocols
 - Principles and procedures of clinic
 - Consultation thought processes
 - History gathering concepts and skills
 - f). Assessments and Diagnosis
 - Cursory neurological
 - Cursory vascular
 - Cursory dermatological
 - Cursory functional and biomechanical
 - g). Developing basic clinical skills
 - Handling sharps
 - Needle-stick injuries
 - Scalpel work
 - Nail treatments
 - Padding and strapping
 - Silicon devices
 - Braces and supportive devices
 - Footwear assessment
 - taping techniques
 - non-cast orthoses
 - h). Occupational/Work Health and Safety Practical Issues
 - Patient safety
 - Practitioner safety
 - Managing a changing environment
 - Risk assessments
 - i). External placement
 - External placement orientation
 - Developing learning objectives for placement
 - Professional and ethical issues associated with placement
 - Assessment and feedback on placement
3. Clinical Therapies
- Content includes:
- Principles of mechanical therapy
 - Safety factors within the workshop area and using machinery safely
 - Non-cast devices and the introduction to off the shelf devices
 - Historical aspects on orthoses
 - Review of foot posture, foot function and neutral foot position
 - Neutral casting and pouring of casts
 - Negative and positive casts
 - Fabrication custom-made functional orthoses and simple devices
4. External Clinical Placement
- Placements will take place in private practice and public sectors.

The podiatric practice subjects have been designed to be an integrated suite of subjects where one subject builds on the clinical competencies of the others.

Assumed Knowledge

Completion of all core subjects to this semester/ year of study.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate skills in safe work practices including infection control and work health and safety in a clinical setting.
2. Implement documentation skills, in accordance with the problem-oriented medical record (POMR) system, in a clinical setting.
3. Demonstrate appropriate professional communication skills in a clinical setting including referrals, letter writing, goal orientated management plans and patient education.
4. Apply theoretical knowledge of vascular, neurological and musculoskeletal systems to common foot pathologies in a clinical setting.
5. Develop and demonstrate specialist diagnostic skills to identify pathology in the foot and lower extremity including vascular, neurological, biomechanical and gait assessment.
6. Develop and apply management skills necessary for the treatment of patients with common foot and lower extremity pathology.
7. Demonstrate skills in the manufacture of custom made functional orthotic devices including neutral casting, positive cast manufacture, grinding and safety competencies.

Subject Content

This is the second of four clinical practice subjects, the student will participate in patient assessment, diagnosis, and management. The activities will be divided into four areas:

- (a) UniClinic

- (b) Clinical Therapies
- (c) Clinical Tutorial
- (d) External Clinical Placement

(a) UniClinic
 In these clinics, the student will further develop patient assessment, diagnosis, management, and clinical reasoning skills. The patients who attend these clinics will be new and ongoing patients who have basic foot problems, problems associated with an existing medical condition, and mechanical/functional problems. Appropriate assessments and management strategies will be carried out including manufacture of orthoses. The students will be supervised by registered practitioners.

(b) Clinical Therapies
 This subject will continue to develop clinical therapies skills, focusing on the manufacture, clinical decision making and issues associated with cast, functional devices for patients. Students will engage in management and safety of a orthoses workshop.

- Content will include:
- Review of foot posture and foot function
 - Review of neutral casting and preparation of the positive cast
 - Discussion of positive casts
 - Cast evaluation
 - Manufacture of clinical devices – intrinsic and extrinsic posting, shell grinding
 - Introduction to issuing and fitting orthotic devices
 - Prefab and off the shelf devices
 - Ethical and professional considerations with orthoses
 - Assessment of footwear – footwear type, footwear assessment, shoe fitting

(c) Clinical Tutorial
 Most clinical information will be presented during these sessions. Basic clinical skills and case presentation skills will be further practiced within the group.

- Content includes:
- Principles of new and review consultation
 - Rationale for assessment selection
 - Goal oriented management plans
 - Health outcome concepts
 - Education concepts and skills for general foot pathologies
 - Footwear education concepts and skills
 - Referral and response letter writing

(d) External Clinical Placement
 There will be a placement for 5 days of clinical activities in an external clinical site. The focus of this placement will be on developing assessment, diagnostic, management, and patient interaction skills in a real world clinical setting.

Special Requirements

Legislative pre-requisites

NOTE: Due to Covid Restrictions, the First Aid Requirement is currently not needed.

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western

Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Practical	N/A	30	N	Individual
Presentation	10 minutes	20	N	Individual

Practical Exam	40 minutes	50	Y	Individual
Professional Task	On-going assessment on all activities during semester	S/U	Y	Individual
Professional Placement Performance	5 days of supervised external clinical placement	S/U	Y	Individual

REHA 3030 Podiatric Surgery

Credit Points 10

Legacy Code 401183

Coordinator Steven Walmsley ([https://directory.westernsydney.edu.au/search/name/Steven Walmsley/](https://directory.westernsydney.edu.au/search/name/Steven%20Walmsley/))

Description This unit will introduce students to local anaesthesia, the theory of surgical procedures and the practice of skin and nail surgical techniques. As such, this unit allows students to assess patients' suitability for administration of local anaesthesia; understand procedures involved in obtaining voluntary consent, appreciate, and reasonably predict and describe the possible adverse effects of administering local anaesthesia. Surgery will focus the medico-legal requirements, principles of theatre protocol, peri-operative and post-surgical management of the patient and nail and skin surgery, in preparation for student undertaking surgery during Podiatric Practice 3 and 4.

School Health Sciences

Discipline Podiatry

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) NATS 1010 AND NATS 1022 AND REHA 3028 AND NATS 2008

Incompatible Subjects REHA 3033 - Podiatric Techniques 2A

Restrictions Students must be enrolled in 4708 Bachelor of Podiatric Medicine and 4709 Bachelor of Podiatric Medicine (Honours). For registration, students must be competent in performing partial nail avulsions as an accreditation requirement for state registration to practice as a podiatrist. It is essential that students have been able to demonstrate baseline competencies in theoretical content, patient

management, infection control and safe work practices (i.e completed the preceding podiatric practice subject and prerequisite subjects).

Assumed Knowledge

Completion of all core subjects to this semester/ year of study.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Assess patients for suitability for administration of local anaesthetics, including medical, psychological or any other contraindications and describe the possible adverse effects of administration of local anaesthetics.
2. Demonstrate a thorough understanding of the medico-legal requirements relevant to performing invasive procedures and understand and undertake the procedures to obtain voluntary consent.
3. Discuss knowledge of pharmacology to explain the mode of action of local anaesthetics.
4. Demonstrate the acquisition of the practical skills required for the safe and efficient administration of local anaesthetic agents by injection to those structures distal to the knee.
5. Demonstrate upgraded and continuous development in the theoretical and practical knowledge of resuscitation techniques.
6. Recognise the legal requirements relating to the control, supply and application of local anaesthetic drugs within the state of New South Wales, and Australia.
7. Demonstrate a theoretical understanding and practical competence in the principles of theatre protocol.
8. Recognise and select through a range of investigative procedures those patients with conditions requiring surgical intervention and/or referral.
9. Actively participate and demonstrate competence in those surgical procedures relating to the nail and skin integuments and appreciate through observation and limited participation, the indications for, and procedures involved in, a range of other surgical procedures of the foot and ankle.
10. Appreciate the consequences of a range of orthopaedic surgical procedures of the lower limb and plan, implement and evaluate post surgical management, with particular reference to pharmacological therapy, orthotic therapy and physical therapies.

Subject Content

1. Regional Anaesthesia
 - theories related to The aetiology and pathophysiology
 - Review of The Pharmacology of local anaesthetic agents, including The history, Classification, Chemical structure, and commercial preparations
 - Review The Anatomy of The Nerve fibre and The conduction of The Nerve impulse
 - Review The anatomical considerations of Nerve and blood Supply to The Lower limb
 - Review and explore in greater depth The mechanism of action of local anaesthetics
 - absorption and Disposition of local anaesthetic agents
- Examine the procedures necessary for the preparation of the patient, including the clinical indications, contraindications and special precautions for the use of local anaesthetics
Calculation of safe maximum dosages
Toxic and side effects of local anaesthetic agents, including overdose, allergic reactions and psychogenic reactions
Recognition and treatment of adverse reactions

Medico-legal considerations and implications, including documentation, consent and laws relating to the distribution, supply and use of restricted substances

Theory and practice of techniques and sites of administration; dorsal and plantar infiltration, digital block, field block (Mayo) and ankle block

2. Procedures for surgery

- Medico-legal requirements (informed consent, duty of care and documentation)
- Biological safety (Review of definitions and terms, Rules governing sterility and Operating room Protocol)
- Pre-operative review (systems review, vascular assessment and diagnosis)
- Phenolisation technique for partial and total nail avulsion and The properties of phenol
- Complications of Phenolisation procedures
- Incisional techniques for partial and total nail avulsion
- Indications for Incisional techniques
- Blunt dissection /curettage for verrucae
- skin biopsy techniques
- use of LASER in foot surgery

3. Introduction to orthopaedics

- Orthopaedic terminology and equipment
- Wound and bone healing

4. Other surgery

- soft tissue (skin plasty, neuroma surgery, tendon lengthening)
- digital surgery (neuroma Sequential release)
- Bunion surgery (aims, mechanisms and mechanical effects of hallux valgus surgery; x-ray evaluation of bunions and procedures - Austin, Keller, closing base, Akin, Reverdin, Green-Waterman)
- hallux rigidus (application of primary surgical principles, silastic implants and fusion of The first metatarsophalangeal joint)
- Other metatarsal surgery (plantar condylectomy, pan-metatarsal head resection and fifth metatarsal surgery)
- Midfoot procedures (Lisfranc articulation surgery, posterior tibial dysfunction, tarsal coalition and talipes equino varus)
- Common rearfoot procedures (heel surgery, triple arthrodesis, ankle reconstruction)

5. Related topics

- Fracture management
- Jones compression dressings
- Below knee casting
- post-operative Complications, e.g. pain and infection
- chronic Regional pain syndrome

Special Requirements

Legislative pre-requisites

NOTE: Due to Covid Restrictions, the First Aid Requirement is currently not needed.

Students must hold a valid and current First Aid Certificate from a Registered Training Organisation. Refer to the Special Requirements website for more information

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Case study	1,000 words	30	N	Individual
Practical Examination	90 minutes	50	N	Individual
Final Exam	60 minutes	20	N	Individual
Injections	10 injections	Pass/Fail	Y	Individual
Attendance and Participation in Tutorial and Practical Sessions	Equivalent 13 weeks x 1 hr tutorial and 2 hr practical	Pass/Fail	Y	Individual

REHA 3035 Therapeutic Recreation Professional Project

Credit Points 10

Legacy Code 400254

Coordinator Nicole Peel ([https://directory.westernsydney.edu.au/search/name/Nicole Peel/](https://directory.westernsydney.edu.au/search/name/Nicole%20Peel/))

Description This subject will no longer be offered. Student are advised to enrol into the equivalent subject called REHA3041 Facilitation in Recreational Therapy in Spring 2022. The aim of this unit is for students to explore the facilitation of therapeutic recreation interventions. Students will have opportunities to apply practical professional skills, including working through the treatment process and building rapport with individuals and groups. This unit is a hands on unit where students engage in mock activity interventions.

School Health Sciences

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) HLTH 1001 AND REHA 3036

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply theories and principles to develop therapeutic/helping relationships.
2. Utilise the recreation therapy framework in individual and group treatment.
3. Apply evidenced based practice in recreational therapy contexts.
4. Apply skills in developing evidence based treatment plans based on clients strengths and resources

- Design and adapt recreation therapy activities and treatments to meet individual needs.
- Facilitate therapeutic recreation treatments.

Subject Content

- Communication techniques in Therapeutic Recreation
- Instructional techniques in Therapeutic Recreation
- Evidenced based practice in Therapeutic Recreation
- Intervention techniques in Therapeutic Recreation
- Helping and counselling theories in Therapeutic Recreation
- Facilitation skills in Therapeutic Recreation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Presentation	15 minutes	15	N	Group
Applied Project	1,000 words	25	N	Individual
Practical	30 minutes	30	N	Both (Individual & Group)
Literature Review	1,500 words	30	N	Individual

REHA 3036 Workplace Learning 2 (Community Placement)

Credit Points 10

Legacy Code 400252

Coordinator Nicole Peel ([https://directory.westernsydney.edu.au/search/name/Nicole Peel/](https://directory.westernsydney.edu.au/search/name/Nicole%20Peel/))

Description This unit provides students with the opportunity to experience the practice of therapeutic recreation in the workplace through a supervised placement experience with industry. Students will complete practice hours in accordance with the National Diversional and Recreation Therapy Australia requirements. Students will develop skills in client assessment, problem identification, program planning, implementation and evaluation in a range of therapeutic service settings. Students will develop learning contracts and explore the advocacy and support needs of the clients.

School Health Sciences

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 2009

Restrictions This is a specialty subject offered as a compulsory core subject of Bachelor of Health Science- Therapeutic Recreation program. It is profession specific, preparing students to practice as a recreation therapist and not relevant or appropriate as an elective for non-therapeutic recreation students.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Apply and adapt skills in individual and group leadership-helping techniques
- Create, analyse, apply and evaluate skills in facilitating a variety of evidence-based treatment interventions or modalities, such as games, exercise, and community reintegration, to meet client outcomes.
- Modify treatment interventions as appropriate to adapt to changing conditions in the client treatment environment.
- Analyse and document clients' response to interventions.
- Evaluate recreational therapy programs for effectiveness and efficiency
- Employ professional behaviour strategies with staff clients and others
- Communicate professionally with staff, clients and others

Subject Content

Client assessment
Comprehensive programming
Standardised assessments
Client documentation
Risk assessment
Activity analysis

REHA 3041 Facilitation in Recreational Therapy

Credit Points 10

Legacy Code 401385

Coordinator Nicole Peel ([https://directory.westernsydney.edu.au/search/name/Nicole Peel/](https://directory.westernsydney.edu.au/search/name/Nicole%20Peel/))

Description This unit explores the facilitation of recreational therapy interventions, including processing and building rapport and trust with individuals and groups. Various recreational therapy modalities, and their application and benefits to achieving health outcomes will be explored and critiqued. This unit is designed to be hands-on and students will be tasked with facilitating a mock intervention for their peers.

School Health Sciences

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 1007

Co-requisite(s) REHA 2014

Equivalent Subjects REHA 3035 - Therapeutic Recreation Professional Project

Assumed Knowledge

Knowledge of recreational therapy assessment, planning and evaluation processes.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply and critique theories and principles of recreation therapy to develop therapeutic interventions;
2. Utilise recreation therapy frameworks in individual and group interventions;
3. Design and adapt recreational therapy activities and treatments to meet diverse needs;

4. Facilitate ethically sound and evidence-based recreational therapy interventions;
5. Demonstrates effective communication skills;
6. Assess the quality and effectiveness of recreational therapy facilitation practices.

Subject Content

1. Principles of learning
2. Evidenced-based practice in Recreational Therapy
3. Communication and instructional techniques in Recreational Therapy
4. Helping and counselling theories in Recreational Therapy
5. Facilitation skills with different populations in Recreational Therapy
6. Emotional and physical expression and control
7. Educational and adaptation strategies

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Presentation	15 minutes	15	N	Group
Applied project	1000 words	35	N	Individual
Practical (15 % for group component and 20% for individual component)	30 minutes	35	N	Both (Individual & Group)
Participation Report	800 words	15	N	Individual

REHA 3042 Health Practice Management

Credit Points 10

Legacy Code 401401

Coordinator Nicole Peel ([https://directory.westernsydney.edu.au/search/name/Nicole Peel/](https://directory.westernsydney.edu.au/search/name/Nicole%20Peel/))

Description This unit examines the essential management skills that are required of an effective manager in clinical and non-clinical settings, including healthcare facilities, community-based or private leisure, therapy and recreation services, and the health service setting. Consumer management, quality service management, practitioner performance, legal liability and risk management are all examined.

School Health Sciences

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Restrictions Student must have completed 160cp to enrol in this unit

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically examine standards and practice guidelines being used as a basis for performance measurement and evidence in a therapy or health service
2. Synthesise practices of managing resources including personnel, facilities, supplies, and equipment
3. Critically examine principles and practices of promotions, public relations and marketing as they relate to therapy, leisure and health
4. Apply effective management techniques in practising safety, emergency and risk management procedures
5. Employ effective strategic management as a basis for guiding current and future service delivery
6. Communicate with a range of stakeholders, including the ability to resolve conflicts and lead shared decision-making proposes
7. Appraise the current political and policy contexts within which the service is immersed and use this knowledge to advocate for the profession and its therapeutic benefits

Subject Content

- 1.Theories of leading and managing teams
- 2.Marketing of health and therapy service
- 3.Volunteer and student management
- 4.Financial management
- 5.Managing service quality
- 6.Decision making and problem solving
- 7.Service accountability
- 8.Grant writing
- 9.Politics, policy and advocacy

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance ([https://](https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance)

www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Presentation : 15 minute Advocacy Project	15 minute presentation and 500-word handout	30	N	Individual
Professional Task : Grant Application	1,500 words	30	N	Individual
Applied Project : Project Report	1,500 words	40	N	Individual

Teaching Periods

REHA 3043 Recreational Therapy Internship

Credit Points 10

Legacy Code 401400

Coordinator Nicole Peel ([https://directory.westernsydney.edu.au/search/name/Nicole Peel/](https://directory.westernsydney.edu.au/search/name/Nicole%20Peel/))

Description This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). This subject focuses on meeting all National Council for Therapeutic Recreation Certification (NCTRC) requirements for a successful internship experience, leading to potential Certified Therapeutic Recreation Specialist (CTRS) designation. Under the supervision of a qualified Recreation Therapist, the internship will be completed totaling 560 full-time hours. The internship may be in any area of recreation therapy practice that serves students' needs and accreditation requirements.

School Health Sciences

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 1007 AND REHA 1008

Restrictions To enrol in this unit, students must: ? be enrolled in 4656 Bachelor of Health Science and the Recreation Therapy Major ? have completed 160cp

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply ethical conduct standards to recreation therapy practice
2. Consider the policy structures within which recreation therapy practice is situated as well as the political challenges facing the profession

3. Employ professional behaviours and attitudes in practice settings, including communicating effectively with clients, team members, relevant community groups and industry partners.
4. Utilise a range of assessments to set long- and short-term goals
5. Implement and evaluate recreational therapy interventions in the practice setting.
6. Prepare documents in a professional format
7. Practice self-directed learning strategies and reflect on practice experience to continually improve practice
8. Implement career planning strategies, including the development of professional networks and knowledge and skills for entering the workforce

Subject Content

1. Professional practice placement
2. Professional behaviours and self-management skills
3. Communication skills
4. Documentation skills for practice
5. Assessment of individual and group needs
6. Implementation and evaluation of programs for individuals and groups
7. Career planning, professional networks and preparation for entering the workforce

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement. Students must also hold a valid and current First Aid Certificate from a Registered Training Organisation and have submitted a Working with Children Check Student Declaration. Refer to the Special Requirements website for more information.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

ON CAMPUS STUDENTS

To be eligible to enrol in a placement subject and attend a health-related placement in this program, students must meet Western Sydney University program requirements **and** Special Legislative Requirements to be assessed in their first year of study against the following:

1. National Criminal History Check: Students must have a current (expiring 3 years from date of issue) check valid for their entire program. A valid National Criminal history check must be an Australia wide check, include the student's full name matching their Student ID card and date of birth and not have any offences listed. If a student has a criminal history identified on their check, they must provide a Clinical Placement Authority Card (CPAC) or conditional letter from the NSW HealthShare Employment Screening and Review Unit. (https://www.health.nsw.gov.au/careers/student_clearance/Documents/appendix-10-student-application.pdf). (https://www.health.nsw.gov.au/careers/student_clearance/Documents/appendix-10-student-application.pdf)
- International students must additionally have a translated International Police Check or statutory declaration.
2. A NSW Working with Children Check (WWCC) clearance letter issued under the category of volunteer valid for their entire program.
3. A current approved first aid certificate valid for their entire program. Approved provider courses can be found at <http://training.gov.au>. (<http://training.gov.au/>)
4. A completed vaccination/immunisation card with all serology results containing expiry dates and currency must be maintained by the student to ensure compliance for their entire program.
5. NSW Undertaking/Declaration form.

6. Completed any additional health forms required (such as NSW Health Code of Conduct, Health Student Undertaking/Declaration and Tuberculosis (TB) Assessment Tool).

7. Relevant Local Health District specific documentation as requested. Contact your School for further details. Resources are also available on the Placement Hub (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/) website.

ONLINE STUDENTS

To be eligible to enrol in a placement subject and attend a health-related placement in your program, students must meet Western Sydney University program requirements **and** Special Legislative Requirements in your state, to be assessed in their first year of study, against the following:

1. National Criminal History Check: Students must have a current check valid for their entire program. A valid National Criminal history check must be an Australia wide check, include the student's full name matching their Student ID card and date of birth and not have any offences listed. If a student has a criminal history identified on their check, they must provide a clearance or authority document or conditional letter from their relevant authorised state organisation. International students must additionally have a translated International Police Check or statutory declaration.
2. A Working with Children Check (WWCC) clearance letter or state equivalent, valid for their entire program.
3. A current approved first aid certificate valid for their entire program. Approved provider courses can be found at <http://training.gov.au>. (<http://training.gov.au/>)
4. A completed vaccination/immunisation card with all serology results attached - currency must be maintained by the student to ensure compliance for their entire program.
5. Undertaking/Declaration form (or state equivalent documents).
6. Additional forms as required per state related to, but not limited to, Tuberculosis Assessment tool, Hepatitis B statutory declaration form, Signed Code of Conduct, Student Deed Poll and all other state equivalent documents as required. Contact your school for further details. Resources are also available on the Placement Hub (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)web page.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Participation: Placement discussion report	3,000 words	30	N	Individual
Portfolio: Practice placement portfolio	2,500 words	50	Y	Individual
Professional Placement Performance Report: Clinical Placement Supervision Report and Log of 560 hrs	500 words and log of hours	20	Y	Individual

REHA 3044 Shaping the Future of Recreational Therapy

Credit Points 10

Legacy Code 401404

Coordinator Nicole Peel ([https://directory.westernsydney.edu.au/search/name/Nicole Peel/](https://directory.westernsydney.edu.au/search/name/Nicole%20Peel/))

Description Recreation therapists are frequently tasked with solving very complex problems in their practice. This unit uses project-based learning to provide students with the opportunity to work collaboratively to solve an industry-driven problem, using systematic and evidence-based techniques to do so. Students will be challenged to think broadly to take into account the interrelationships among a full range of causal factors underlying the problem at hand, and will be required to use more collaborative and innovative approaches to solve industry challenges.

School Health Sciences

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 2014 AND REHA 2015

Restrictions This is a capstone subject of study for the Recreational Therapy Testamur major. Therefore, students must have completed 160 credit points of the program prior to enrolling in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply problem-solving skills to an actual health challenge
2. Appraise literature and information sources that are related to an identified problem
3. Employ appropriate methods and evaluation processes to create a solution-based proposal
4. Articulate complex recreation therapy approaches and solutions to different audiences
5. Demonstrate innovative thinking in creating a solution to a recreation therapy challenge

Subject Content

1. Understanding complex problems
2. Tackling practice problems by working collaboratively as part of a team
3. Design thinking
4. The stages of a solution-based proposal

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Proposal	600 words	30	N	Individual

REHA 3045 Communication Access in Communities

Credit Points 10

Legacy Code 401425

Coordinator [Belinda Kenny \(https://directory.westernsydney.edu.au/search/name/Belinda_Kenny/\)](https://directory.westernsydney.edu.au/search/name/Belinda_Kenny/)

Description This unit will introduce the concept of 'Communication access for All' and focus on strategies to create communication accessible environments that promote inclusion of individuals with communication support needs across the lifespan. The scope of the unit will encompass the features of communication accessible environments, multimodal communication methods, assistive technology, and Augmentative and Alternative Communication (AAC). Students in Speech Pathology will develop competency in the assessment, management, measurement, and support of complex communication in individuals across the lifespan, and will explore how capacity building models and strategies can enhance the activities and participation of individuals, families and communities.

School Health Sciences

Discipline Speech Pathology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 2019 AND REHA 2020

Restrictions Students must be enrolled in 4763 Bachelor of Speech Pathology or 4764 Bachelor of Speech Pathology (Honours).

Assumed Knowledge

In order to successfully undertake this subject students are expected to understand multimodal communication methods and individual, family focused and community-based models of providing services.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Justify the concept of Communication Access by integrating the perspectives and experiences of individuals, families and communities.
2. Design a strategy to promote communication accessible environments within a local context, using a Community Capacity Building framework.
3. Plan and justify areas of Speech Pathology assessment for an individual with complex communication needs
4. Analyse, interpret, and integrate assessment information to diagnose the nature of an individual's complex communications needs and develop functional communication goals
5. Formulate and evaluate speech pathology management plans which include evidence-based

Subject Content

- communication access
- communication Accessible environments
- Accessible written information ? plain English, Easy English, patient Friendly
- Models of community capacity Building and Advocacy
- assessment and Diagnosis of complex communication needs / communication support needs
- strategie

REHA 3046 Optimising Mealtimes Across the Lifespan

Credit Points 10

Legacy Code 401424

Coordinator Belinda Kenny ([https://directory.westernsydney.edu.au/search/name/Belinda Kenny/](https://directory.westernsydney.edu.au/search/name/Belinda%20Kenny/))

Description This unit discusses theoretical and evidence-based approaches to assessment and management of a diverse range of swallowing disorders in infants, children and adults. Students will have opportunities to interpret and synthesise assessment findings and create management plans to optimise mealtime experiences by exploring cases that address the needs of individuals with swallowing disorders, their families and communities. Students will plan and implement core speech pathology assessment and therapy skills, related to swallowing and mealtime management through observation and practice. Evidence-based, interdisciplinary and holistic approaches to swallowing and mealtime management will be integrated during this unit.

School Health Sciences

Discipline Speech Pathology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 1006 AND REHA 2016

Restrictions Students must be enrolled in the 4763 Bachelor of Speech Pathology or 4764 Bachelor of Speech Pathology (Honours)

Assumed Knowledge

Students are expected to have acquired introductory knowledge and skills in speech pathology practice before undertaking this subject. Students will be expected to have knowledge of the anatomical, neurological, physiological, cognitive, and perceptual bases of swallowing and mealtimes and understand typical and atypical development and changes in swallowing function across the lifespan.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Integrate knowledge of core anatomical, physiological and neurological factors that impact swallowing development and functioning, with clinical information, to formulate appropriate assessment approaches for infants, children and adults.
2. Synthesise and analyse case information, clinical and instrumental assessment data, to inform swallowing diagnosis and prognosis for individuals presenting with a swallowing disorder
3. Implement principles of Evidence-based Practice (EBP) and knowledge of the International Dysphagia Diet Standardisation Initiative (IDDSI) Framework to develop well-reasoned mealtime management plans with individuals, families and carers
4. Conduct an independent Oral-Motor Assessment,(OMA) within a structured clinical setting, at developing level competency.
5. Employ interdisciplinary communication and model swallowing and management strategies within a structured clinical setting, at developing level of competence
6. Critically reflect on the ethical and legal responsibilities of speech pathologists working with individuals who have swallowing disorders

Subject Content

1. Anatomy, physiology and neurology of swallowing in infants, children and adults
4. Clinical decision making to inform diagnosis, prognosis and management for intervention for infants, children and adults with diverse swallowing disorders

5. Planning evidence-based intervention for children and adults with swallowing disorders including oral hygiene, dentition, saliva management, sensory issues, compensatory and rehabilitation strategies, and non-oral nutrition and hydration
6. Interprofessional team approaches to enhance swallowing and mealtime experiences for children and adults
7. Responsive mealtime management of children and adults with complex clinical, psychosocial and environmental issues
2. Clinical (e.g., protocols, screening) and instrumental (e.g. Video Fluoroscopic Swallowing Study, Fiberoptic Endoscopic Evaluation of Swallow) approaches to swallowing assessment
3. Applying theoretical frameworks (e.g., International Classification of Functioning, Disability & Health) and evidence-based approaches to identify and manage issues involving each phase of swallowing to facilitate safe, enjoyable mealtimes

Special Requirements

Legislative pre-requisites

First Aid Certificate.

Assessment

Pre-requisite(s) REHA 2019

Co-requisite(s) REHA 3049

Restrictions Students must be enrolled in the 4763 Bachelor of Speech Pathology or 4764 Bachelor of Speech Pathology (Honours)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the clinical utility and effectiveness of individual, targeted and universal assessment and intervention strategies in Speech Pathology Practice
2. Plan and implement an assessment of communication and swallowing for an adult client at developing level competency
3. Integrate, analyse and interpret assessment information to diagnose the nature and severity of a communication and/or swallowing/mealtime disorder
4. Formulate and rationalise intervention plans to address disorders of communication and/or swallowing /mealtimes in adult clients using best available evidence, sound clinical reasoning and cultural responsiveness
5. Implement and evaluate outcomes of speech pathology intervention for disorders of communication and/or swallowing / mealtime with adult clients at developing level competency
6. Create professional, clinical resources to plan and provide quality Speech Pathology services to adult clients, their families and communities

Subject Content

Working with adults in diverse professional contexts, including private practice, hospitals, not for profit organisations, rural settings

1. Exploring person centred and family centred practice with complex cases

Evidence based models of service delivery applied to caseload management with adults.

2. Problem-based based clinical reasoning in response to complex speech pathology practice settings including rural and remote settings, aged care facilities, workplaces, group homes and palliative care
3. Collaborating with communication partners, interdisciplinary professionals, therapy aides and volunteers to optimise individual?fs communication and mealtime experiences.
4. Facilitating transitions between health care services and the community; access and resource issues
5. Working with adults and families for whom English is an additional language or

REHA 3048 Speech Pathologists Working with Children, Families and Communities

Credit Points 10

Legacy Code 401427

Coordinator Ellie Sugden ([https://directory.westernsydney.edu.au/search/name/Ellie Sugden/](https://directory.westernsydney.edu.au/search/name/Ellie%20Sugden/))

Description This unit utilises a problem-based learning approach to explore assessment, management and measurement of change in complex cases of communication and mealtime disorder in children. Authentic case scenarios of paediatric clients will encourage students to integrate theoretical knowledge, clinical reasoning, and practical speech pathology skills to plan and evaluate approaches to working with children, their families and the communities in which they live. Individual, targeted and universal intervention strategies will be addressed within the context of collaborative, family centred philosophy.

School Health Sciences

Discipline Speech Pathology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 2020

Co-requisite(s) REHA 3049

Restrictions Students must be enrolled in the 4763 Bachelor of Speech Pathology or 4764 Bachelor of Speech Pathology (Honours)

Assumed Knowledge

Students undertaking this subject need a sound understanding of assessment and management of paediatric communication disorders.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the clinical utility and effectiveness of individual, targeted and universal assessment and intervention strategies in Speech Pathology Practice
2. Design an assessment of communication and swallowing for a paediatric client
3. Implement an assessment of communication and swallowing for a paediatric client, at developing level competency
4. Integrate, analyse and interpret assessment information to diagnose the nature and severity of a communication and/or swallowing/mealt ime disorder
5. Formulate intervention plans to address disorders of communication and/or swallowing /mealt ime disorder in paediatric clients using best available evidence
6. Implement and evaluate speech pathology intervention to address disorders of communication and/or swallowing /mealt ime in paediatric clients, at developing level competency
7. Create professional, clinical resources to support delivery of Speech Pathology services to paediatric clients, their families and communities.

Subject Content

1. Family centred practice
2. Individual, targeted and universal assessment and intervention strategies in paediatric Speech Pathology practice
3. Community capacity building and advocacy
4. Assessment and diagnosis of communication and swallowing/ mealt ime disorder in children
5. Planning and implementation of evidence based intervention for communication and swallowing/mealt ime disorder in children
6. Evaluation of evidence based intervention for communication and swallowing/mealt ime disorders in children
7. Prevention, advocacy and education about evidence based approaches to optimise communication and swallowing/mealt imes for children
8. Discussions about dosage; Form, Frequency, Intensity, Duration
9. Working with children for whom English is an Additional Language or Dialect (EAL/D)
10. Working with interpreters, translators and communication advocates and supports
11. Understanding childhood onset disability (e.g. Cerebral palsy, Developmental Disability; Autism Spectrum Disorder; Intellectual Disability; Specific Learning Disorder; Genetic and Chromosomal Disorders)
12. Neuroprotection, Neuroplasticity, Motor Learning
13. Craniofacial anomalies
14. Management of paediatric feeding in community contexts
15. Speech Pathology service delivery in schools; local, state and national perspectives and contexts

16. Speech Pathology service delivery in the context of the National Disability Insurance Scheme (NDIS)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Report	1500 words	25	N	Individual
Portfolio	Minimum of 5 PBL Cases (completed in class) + 3 individualised clinical resources	S/U	Y	Individual
Professional Task	2000 words	35	N	Individual
Simulation	1 hour	40	Y	Individual

REHA 3049 Speech Pathology Practice 1

Credit Points 10

Legacy Code 401426

Coordinator Ed Johnson ([https://directory.westernsydney.edu.au/search/name/Ed Johnson/](https://directory.westernsydney.edu.au/search/name/Ed%20Johnson/))

Description This clinical placement unit will operationalise the knowledge and skills developed in the first three years of speech pathology study, to provide appropriate and holistic care for clients of speech pathology across the lifespan, their families and communities. Students will undertake 21 days of supervised clinical practice in a range of authentic speech pathology contexts including, but not limited to, hospitals, community health settings, schools / preschools / day-care, disability and/or not for profit organisations, private practice or on-campus settings. Professional competencies addressed in this unit include communication, documentation, reflection and professional and ethical behaviour. In addition, students will develop skills in client assessment, interpretation of findings, planning and implementation of speech pathology services, education, advocacy and advice. Students will be working at a near/approaching intermediate level of competency.

School Health Sciences

Discipline Speech Pathology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) REHA 2019 AND REHA 2020

Co-requisite(s) REHA 3046

Restrictions Students must be enrolled in 4763 Bachelor of Speech Pathology or 4764 Bachelor of Speech Pathology (Honours).

Assumed Knowledge

Students will need to have sound understanding of development and disorder of communication and swallowing across the lifespan. Students will be expected to independently conduct common speech pathology assessments such as oromusculature and cranial nerve assessment, case history interview, speech and language screening (developmental and acquired) as well as transcribe and analyse speech and language using accepted conventions.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Plan, implement, evaluate and modify speech pathology assessment and management services for clients across the lifespan to a competency level that is **Approaching Intermediate** as evidenced by the COMPASS? Competency Assessment Tool
2. Employ communication, professionalism, reasoning and lifelong learning at an **Intermediate Level** as evidenced by the COMPASS? Competency Assessment Tool
3. Apply safe and ethical speech pathology practice across all contexts
4. Critically discuss the assessment, management, progress and prognosis of a selected client in line with ethical and medico-legal expectations of the profession
5. Critically reflect on emerging professional role and competence in the assessment, management, progress and prognosis of a selected client using evidence-based approaches to clinical reasoning and reflection

Subject Content

1. During clinical placements:

- students will have experiences Working with clients in one or more speech pathology range of practice areas, including speech, language, voice, fluency, multimodal communication and swallowing

- developing Competency in planning, implementation, and interpretation of speech pathology assessment, planning, implementation, and Monitoring of speech pathology services, and/or participation in prevention, education, and Advocacy activities

2. During workshops:

- Students will engage in interactive learning experiences that integrate academic and clinical competencies in the following topics
- assessment and methods of communication and swallowing analysis
- goal setting and evidence based service delivery
- documentation and report writing
- Models of consultation and community capacity Building
- outcome measurement and evaluation
- quality improvement and quality assurance
- supervision, lifelong learning and reflection
- professionalism, self-care, and professional portfolio development.

Special Requirements

Legislative pre-requisites

To be eligible to enrol in this subject and attend a health-related placement in your program, students must meet Western Sydney University course requirements **and** Special Legislative Requirements in your state, to be assessed in their first year of study, against the following:

1. National Criminal History Check: Students must have a current check valid for their entire program. A valid National Criminal history check must be an Australia-wide check, include the student's full name matching their Student ID card and date of birth and not have any offences listed. If a student has a criminal history identified on their check, they must provide a clearance or authority document or conditional letter from their relevant authorised state organisation. International students must additionally have a translated International Police Check or statutory declaration.
 2. A Working with Children Check (WWCC) clearance letter or state equivalent, valid for their entire program.
 3. A current approved first aid certificate valid for their entire program. Approved provider courses can be found at <http://training.gov.au>.
 4. A completed vaccination/immunisation card with all serology results attached - currency must be maintained by the student to ensure compliance for their entire program.
 5. Undertaking/Declaration form (or state equivalent documents).
 6. Additional forms as required per state related to, but not limited to: Tuberculosis Assessment tool; Hepatitis B statutory declaration form' Signed Code of Conduct; Student Deed Poll and all other state equivalent documents as required. Contact your school for further details. Resources are also available on the Placement Hub web page. https://www.westernsydney.edu.au/placements_hub (https://www.westernsydney.edu.au/placements_hub/)
 7. Relevant Local Health District specific documentation as requested. Contact your School for further details. Resources are also available on the Placement Hub website: https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)
- Some external sites may have additional requirements. Students will be advised of any such specified requirements which must be complied with before commencing clinical placements.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

REHA 3051 Leisure Education Programming and Mental Health (UG Cert)

Credit Points 10

Legacy Code 500062

Coordinator Maria Dent ([https://directory.westernsydney.edu.au/search/name/Maria Dent/](https://directory.westernsydney.edu.au/search/name/Maria%20Dent/))

Description In this unit students will develop knowledge and skills required to facilitate and critically evaluate leisure education interventions to bring about changes in the leisure behaviour of individuals, particularly those at risk of developing or with a diagnosed mental illness. Students will analyse evidence to plan, implement and evaluate leisure education programs.

School Health Sciences

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects REHA 3013 Leisure Education and Mental Health

Restrictions Students must be enrolled in 7176 Disability Care Support

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and evaluate models of leisure education and related concepts.
2. Analyse issues related to promoting health and well-being through leisure literacy and participation.
3. Create, implement and evaluate an evidence-informed leisure education program for clients with a mental illness.
4. Analyse, apply and evaluate educational techniques used in leisure education to promote wellbeing

Subject Content

1. Leisure education concepts
2. Leisure education in national and international contexts
3. Leisure education theory applied, in particular, to individuals with a mental illness
4. Designing, planning and delivering leisure education programs for individuals with a mental illness
5. Leisure ability model (not changed)
6. Lived experiences of consumers and families with a mental illness (not changed)

Assessment

REHA 4001 Clinical Education B (Rehabilitation)

Credit Points 10

Legacy Code 401110

Coordinator Daniel Thomson ([https://directory.westernsydney.edu.au/search/name/Daniel Thomson/](https://directory.westernsydney.edu.au/search/name/Daniel%20Thomson/))

Description This clinical education placement will operationalise the theoretical and research knowledge and skills learnt in the first three years of the course. Students will be required to assess and treat clients in rehabilitation settings. Treatments will be focused on improving client mobility and function that is altered by illness, injury,

chronic disease or a disability. This will assist in preparation for client discharge home or to an appropriate residential facility, as well as enhance functioning at home or in the community. Assessment and treatments will tend to have a neurological physiotherapy focus, but clients may also present with cardiorespiratory and musculoskeletal conditions which require intervention. Students will, therefore, be expected to integrate knowledge and skills learnt across all physiotherapy-specific units in their provision of client-centred care as well as draw on their more general knowledge from earlier stages of the course.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 3018 AND
REHA 3016 AND
REHA 3001 AND
LGYA 7023

Co-requisite(s) REHA 4015

Incompatible Subjects REHA 7001 - Clinical Education B (Rehabilitation)

Restrictions Students must be enrolled in 4706 Bachelor of Physiotherapy or 4707 Bachelor of Physiotherapy (Honours) or 4733 Bachelor of Physiotherapy (Honours)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Display effective communication skills, ethics and professionalism
2. Plan, justify and conduct an appropriate subjective and objective assessment
3. Synthesise assessment information to develop and negotiate a client-specific problem list and treatment plan in consultation with the client and/or family
4. Justify and implement evidence-based and effective management strategies
5. Justify treatment decisions based on theory, research, and the interpretation of outcome measurement
6. Monitor, evaluate, and progress treatments as indicated
7. Demonstrate safe and ethical work practices, respecting the culture and diversity of the client and other health professionals

Subject Content

Theory, research and practice, within a rehabilitative physiotherapy context, to:

1. Conduct a subjective and objective examination
2. Interpret findings and prioritise client problems
3. Develop and negotiate a treatment plan with the client
4. Implement appropriate management techniques
5. Monitor, evaluate and progress treatment as appropriate
6. Demonstrate effective communication skills and professionalism, while respecting culture and diversity
7. Collaborate with other health professionals
8. Ensure safe work practice
9. Undertake discharge planning

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance ([https://](https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance))

REHA 4002 Clinical Education C (Ambulatory Care)

Credit Points 10

Legacy Code 401111

Coordinator Amitabh Gupta ([https://directory.westernsydney.edu.au/search/name/Amitabh Gupta/](https://directory.westernsydney.edu.au/search/name/Amitabh%20Gupta/))

Description This clinical education placement will operationalise the theoretical and research knowledge and skills learnt in the first three years of the course. Students will be required to assess and treat clients who present in hospital outpatient departments, community settings and private practices. This involves the assessment of the client's impairments, function and disability within their home and community environment. Interventions may include manual and exercise therapy; use of electrophysical agents, taping and bracing; and education regarding both prevention and management of conditions. Assessment and treatment will tend to have a musculoskeletal physiotherapy focus, however, clients may also present with neurological and cardiorespiratory conditions that require intervention. Students will therefore integrate knowledge and skills learnt across all physiotherapy-specific units in their provision of client-centred care as well as draw on their more general knowledge from earlier stages of the course.

REHA 4003 Clinical Education D (Paediatrics)

Credit Points 10

Legacy Code 401112

Coordinator Genevieve Dwyer ([https://directory.westernsydney.edu.au/search/name/Genevieve Dwyer/](https://directory.westernsydney.edu.au/search/name/Genevieve%20Dwyer/))

Description This clinical education placement will operationalise the knowledge (theory and research) and skills learnt in Paediatric Physiotherapy. Students will also integrate and apply the knowledge and skills learnt in musculoskeletal, cardiorespiratory and neurological physiotherapy, as well as other health science units to provide appropriate and holistic family-centred care to paediatric clients. Students will be required to assess and treat paediatric clients in acute hospital, rehabilitation or community settings. This approach to management involves the consideration of a child's age, development, and diagnosis during assessment and treatment. Advanced communication skills are required to educate parents and children on the prevention and management of paediatric conditions.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 3001 AND REHA 3018 AND REHA 3016 AND LGYA 7023

Co-requisite(s) REHA 4014 AND REHA 4015

Incompatible Subjects REHA 7003 - Clinical Education D (Paediatrics)

Restrictions Students must be enrolled in 4706 Bachelor of Physiotherapy, 4707 Bachelor of Physiotherapy (Honours) or 4733 Bachelor of Physiotherapy (Honours).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Display effective communications skills, ethics and professionalism
2. Plan, justify and conduct an appropriate subjective and objective assessment
3. Synthesise assessment information to develop and negotiate a client-specific problem list and treatment plan in consultation with the client and their family
4. Justify and implement evidence-based and effective management strategies
5. Justify treatment decisions based on theory and research and the interpretation of outcome measurements
6. Monitor, evaluate and progress treatments as indicated
7. Demonstrate safe and ethical work practices, respecting the culture and diversity of the client, their family, and other health professionals
8. Critically reflect on the theory, research and practice of paediatric physiotherapy

Subject Content

Theory, research and practice, within a paediatric physiotherapy practice context, to:

1. Conduct a patient history/subjective examination, and physical assessment/objective examination
 2. Interpret findings and prioritise client problems
 3. Develop/negotiate a treatment plan
 4. Implement appropriate management techniques
 5. Monitor, evaluate and progress treatment as appropriate
 6. Demonstrate effective communication and professionalism, while respecting the client's culture and diversity
 7. Collaborate with other health professionals
 8. Ensure safe and ethical work practice
 9. Undertake discharge planning
- Clinical facilities that focus upon the provision of health care to babies/infants, toddlers, children and adolescents under the age of 18 years are considered to be paediatric physiotherapy contexts.

Special Requirements

Legislative pre-requisites

To be eligible to enrol in a unit and attend a health-related placement in your course, students must meet Western Sydney University course requirements AND Special Legislative Requirements to be assessed in their first year of study against the following:

1. National Criminal History Check: Students must have a current (expiring 3 years from date of issue) check valid for their entire course. A valid National Criminal history check must be an Australia wide check, include the student's full name matching their Student ID card and date of birth and not have any offences listed. If a student has a criminal history identified on their check, they must provide a Clinical Placement Authority Card (CPAC) or conditional letter from the NSW HealthShare Employment Screening and Review Unit (https://www.health.nsw.gov.au/careers/student_clearance/Documents/appendix-10-student-application.pdf). (https://www.health.nsw.gov.au/careers/student_clearance/Documents/appendix-10-student-application.pdf) International students must additionally have a translated International Police Check or statutory declaration.

2. A NSW Working with Children Check (WWCC) clearance letter issued under the category of volunteer valid for their entire course.
3. A current approved first aid certificate valid for their entire course, approved provider courses can be found at: <http://training.gov.au>. (<http://training.gov.au>)
4. A completed vaccination/immunisation card with all serology results containing expiry dates and currency must be maintained by the student to ensure compliance for their entire course.
5. NSW Undertaking/Declaration form
6. Completed any additional health forms required (such as NSW Health Code of Conduct, Health Student Undertaking/Declaration and Tuberculosis (TB) Assessment Tool)
7. Relevant Local Health District specific documentation as requested. Contact your School for further details. Resources are also available on the Placement Hub website: https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

REHA 4004 Clinical Education E (Advanced Care)

Credit Points 10

Legacy Code 401113

Coordinator Rocco Cavaleri ([https://directory.westernsydney.edu.au/search/name/Rocco Cavaleri/](https://directory.westernsydney.edu.au/search/name/Rocco%20Cavaleri/))

Description This clinical unit involves the integration of musculoskeletal, neurological and cardiorespiratory physiotherapy

assessment and treatment skills in an advanced physiotherapy care environment. Advanced problem-solving skills will be required to manage complicated client presentations in various clinical environments. Advanced care environments may include speciality areas such as burns, spinal, emergency, intensive care and aged care units within a hospital, or private practice and community-based services where the physiotherapist is the primary care practitioner. Student preferences and prior clinical placement experience will be considered in the clinical placement allocation process. This will help to ensure all students are given the opportunity to explore the breadth of practice of physiotherapy in different environments.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 3009 OR REHA 3004

Co-requisite(s) REHA 4015 AND REHA 4001 OR REHA 4002

Incompatible Subjects REHA 7004 - Clinical Education E (Advanced Care)

Restrictions Students must be enrolled in 4706 Bachelor of Physiotherapy or 4707 Bachelor of Physiotherapy (Honours).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Display effective communications skills, ethics and professionalism
2. Plan, justify and conduct an appropriate subjective and objective assessment
3. Synthesise assessment information to develop and negotiate a client-specific problem list and treatment plan in consultation with the client
4. Justify and implement evidence-based and effective management strategies
5. Justify treatment decisions based on theory, research and the interpretation of outcome measurements
6. Monitor, evaluate and progress treatments as indicated
7. Demonstrate safe and ethical work practices, respecting the culture and diversity of the client and other health professionals

Subject Content

Theory, research and practice, within an advanced care physiotherapy context, to:

- conduct A subjective and objective Examination
- interpret findings and prioritise client problems
- develop/negotiate A treatment plan
- implement appropriate management techniques
- Monitor, Evaluate and Progress treatment as appropriate
- demonstrate effective communication and professionalism, While Respecting culture and diversity
- collaborate with other health professionals
- Ensures Safe work practice
- undertake discharge planning

Advanced care environments may include speciality areas such as burns, spinal, emergency, intensive care and aged care units within a hospital, or private practice and community-based services where the physiotherapist is the primary care practitioner. Inappropriate clinical

placements would be where a student is not required to apply critical thinking and problem-solving in the assessment and treatment of clients with complicated presentations.

Special Requirements

Legislative pre-requisites

To be eligible to enrol in a subject and attend a health-related placement in your program, students must meet Western Sydney University program requirements and Special Legislative Requirements to be assessed in their first year of study against the following.

1. National Criminal History Check: Students must have a current (expiring 3 years from date of issue) check valid for their entire program. A valid National Criminal history check must be an Australia wide check, include the student's full name matching their Student ID card and date of birth and not have any offences listed. If a student has a criminal history identified on their check, they must provide a Clinical Placement Authority Card (CPAC) or conditional letter from the NSW HealthShare Employment Screening and Review Unit https://www.health.nsw.gov.au/careers/student_clearance/Documents/appendix-10-student-application.pdf
International students must additionally have a translated International Police Check or statutory declaration.
2. A NSW Working with Children Check (WWCC) clearance letter issued under the category of volunteer valid for their entire program.
3. A current approved first aid certificate valid for their entire program. Approved provider courses can be found at <http://training.gov.au> (<http://training.gov.au/>).
4. A completed vaccination/immunisation card with all serology results containing expiry dates and currency must be maintained by the student to ensure compliance for their entire course.
5. NSW Undertaking/Declaration form.
6. Completed any additional health forms required (such as NSW Health Code of Conduct, Health Student Undertaking/Declaration and Tuberculosis (TB) Assessment Tool).
7. Relevant Local Health District specific documentation as requested.

Contact your School for further details. Resources are also available on the Placement Hub (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/) website

Teaching Periods

REHA 4005 Clinical and Professional Practice (Honours)

Credit Points 20

Legacy Code 401120

Coordinator Kym Hennessy ([https://directory.westernsydney.edu.au/search/name/Kym Hennessy/](https://directory.westernsydney.edu.au/search/name/Kym%20Hennessy/))

Description This unit will introduce practical principles of professional, ethical and legal issues associated with working as a podiatrist, focusing on the workplace, administrative policies and procedures as required for registration with the state Registration Board. Students then undertake a clinical block in a public sector placement designed to further consolidate podiatric assessment, communication and management skills. The student will be involved in treating pathologies in general health and the high risk patient encompassing all aspects of podiatry

School Health Sciences

Discipline Podiatry

Student Contribution Band HECS Band 2 20cp

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 3028 AND REHA 3029 AND REHA 4017 AND REHA 4007 AND REHA 3030 AND REHA 4018

Co-requisite(s) REHA 4021

Incompatible Subjects REHA 7020 - Podiatric Clinical Block for Honours REHA 7023 - Podiatric Professional Practice Studies

Restrictions Students must be enrolled in 4709 Bachelor of Podiatric Medicine (Honours).

Assumed Knowledge

Completion of all core subjects to this semester/year of study is assumed knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand, apply and document principles of business and administrative management, fair trading, contracts of employment, tax legislation, medical records, health and safety, and medicolegal insurance, specifically as it relates to the practice of podiatry.
2. Be cognisant of the rights and responsibilities under law and ethical issues associated with the practice of podiatry.
3. Develop knowledge and skills in specific reporting requirements for the funding of specialist groups, particularly the Department of Veterans Affairs, and relationships with professional associations and bodies to the benefit of the individual and the professional community.
4. Employ professional communication skills and behaviours in clinical settings.
5. Competently implement acquired skills in the practice of podiatry in a variety of clinical settings in an independent manner.
6. Manage caseloads by demonstrating safe skills, efficiencies and competencies necessary in the management of patients with foot pathologies over a short/long term basis.
7. Apply and appraise skills, knowledge and contextual information in the assessment, diagnosis and management within diverse cohorts and the multi-disciplinary team.

8. Conduct effective administrative duties (medical records, referral reports and patient instructions) and management tasks (daily running of the department).
9. Reflect and appraise their clinical and professional experience.

Subject Content

1) Clinical Block Placement Component

In the Clinical Block placement the focus will be on consolidation of appropriate assessment, diagnostic and management skills of the scope of podiatric practice including complex cases, including the high risk foot. The activities will be divided into two areas:

(a) Preparation, presentations and feedback

This will be presented in workshop format to provide:

i) The relevant information to students about their responsibilities and the requirements on external clinical placements covering:

- Pre-clinical documentation requirements
- infection control
- professional behaviour
- communication skills
- needs for different groups and treatment programs
- negotiated learning objectives

ii) Presentations and Feedback at the end of the placement

- case Study presentations
- feedback

(b) External Clinical Placement

The student will participate in 280 hours of external block placement.

The placement will be directed at consolidating assessment, diagnosis and management skills in high risk and general patients. The aim of these placements is to increase efficiency and competency in podiatry care in a real-life clinical setting with a diverse cohorts of patients. Of particular importance will be student involvement in a multi-disciplinary approach to patient care.

2) Professional Practice Studies Component

Professional Practice component includes the following topics

(a) Types of Podiatry Practice

- Private practice; Business plans, Employment/Contracting, Taxation, Practice management
- public health practice
- podiatric research
- podiatric surgery
- Working overseas
- podiatry suppliers

(b) Medicolegal Requirements and Responsibilities and Professional Associations

- professional Registration
- Government departments; Department of Veteran Affairs, NSW

Podiatry Council

- health and safety - infection control
- Insurance; Professional indemnity, Workcover, Property
- Australian podiatry Association / Australian podiatry Council
- ? Ethical and Socio-demographic Issues related to Podiatry Practice
- Complaints handling
- socio-Demographic and socio-economic considerations for healthcare
- multi-disciplinary healthcare
- evidence based practice
- interpersonal and inter-professional communication

(d) Job Applications

- cover letters
- Answering selection criteria
- writing resumes
- self-promotion

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance ([https://](https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance))

www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Professional Placement Performance	280 hours of supervised external clinical placement + 5 days attendance at professional seminars	S/U	Y	Individual
Portfolio	2,000 words	20	N	Individual
Essay	Total 7 pages	20	N	Individual

REHA 4006 Complex Cases and Professional Issues

Credit Points 10

Legacy Code 401108

Coordinator Daniel Thomson ([https://directory.westernsydney.edu.au/search/name/Daniel Thomson/](https://directory.westernsydney.edu.au/search/name/Daniel%20Thomson/))

Description In this unit, students will further develop their clinical reasoning with respect to clients with complex presentations in areas such as aged care, women's health, return to work, private practice and culturally and linguistically diverse individuals. Complex information will be synthesized such as the theory, research and skills across the spectrum of physiotherapy care, and theories related to professionalism, ethics, safety and communication. This unit also contains the discussion of a range of recent professional developments in physiotherapy, which are relevant to entry level practitioners.

These include registration as a physiotherapist, continuing education, workload control strategies, duty of care responsibilities and quality improvement processes (including critical reflection), employment strategies and career pathways.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 4015 AND REHA 4014

Co-requisite(s) REHA 4001 OR REHA 4002 OR REHA 4003 OR REHA 3004 AND REHA 4008

Incompatible Subjects REHA 7005 - Complex Cases and Professional Issues

Restrictions Students must be enrolled in program 4706 Bachelor of Physiotherapy

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Synthesise complex assessment information, using clinical reasoning and client-centred approaches to design and critically reflect on a management plan for clients with complex presentations
2. Plan, justify, implement, and evaluate a safe and effective treatment of the impairments and activity limitations in clients with and without multi-system co-morbidities in areas such as women's health, aged care, return to work, private practice and culturally and linguistically diverse populations.
3. Critically reflect on a clinical scenario with respect to professionalism, ethics, safety and communication
4. Synthesise the contributions of physiotherapy study, personal interests and opportunities in physiotherapy to develop a personal, targeted employment strategy
5. Demonstrate effective verbal and written communication skills

Subject Content

1. Integration of physiotherapy knowledge developed from previous university-based and clinically-based physiotherapy with the theory of professionalism, ethics, safety and communication (clinical reasoning) to plan management strategies for clients with complex presentations
2. Integration of Physiotherapy assessment and management skills into areas such as Women's health, aged-care, return to work, private-practice and culturally and linguistically diverse populations.
3. Recent professional developments in physiotherapy, such as registration as a physiotherapist continuing education, workload control strategies, quality improvement processes, and career pathways
4. Employment strategies, considering desires and personal attributes as well as attainment of the Western Sydney University Graduate Attributes and the Physiotherapy Practice Thresholds in Australia and Aotearoa New Zealand (2015).
5. Develop interview skills and CV writing in preparation to maximise employment opportunity.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Job interview: Interview and Reflection	25 minutes	40	N	Individual
Report: CV and Selection Criteria submission	2 pages and 1,000 words	10	N	Individual
Telehealth video	20 minutes	50	N	Individual

REHA 4007 Dermatology and Gerontology

Credit Points 10

Legacy Code 401116

Coordinator Steven Walmsley ([https://directory.westernsydney.edu.au/search/name/Steven Walmsley/](https://directory.westernsydney.edu.au/search/name/Steven%20Walmsley/))

Description This unit builds on previous clinical and theoretical units to develop in-depth knowledge in dermatology and gerontology. Foundations of dermatology including the function and structure of the skin, assessment, differential diagnosis, aetiological factors and the management of disorders of the skin, with particular emphasis on common foot conditions and co-morbidities will be investigated. Population's trends, aging norms, pathology, co-morbidities and attitudes to aging will be explored. Particular focus will be placed on pathophysiology, mechanics, diagnosis and treatment options to maintain normal daily activities.

School Health Sciences

Discipline Podiatry

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) NATS 2008 AND REHA 3027 AND REHA 2003

Incompatible Subjects REHA 7024 - Podiatric Techniques 3A and REHA 7025 - Podiatric Techniques 3B

Restrictions Students must be enrolled in 4708 - Bachelor of Podiatric Medicine or 4709 - Bachelor of Podiatric Medicine (Honours).

Assumed Knowledge

All core subjects are assumed knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate comprehensive knowledge and understanding of the aetiology, pathology, clinical presentation and development of dermatological disorders of particular relevance to podiatric practice.
2. Discuss clinical presentation of dermatological conditions relevant to their possible pathological bases.
3. Differentially diagnose dermatological disorders and discuss the range of treatment options available with an emphasis on those disorders of particular relevance to podiatric practice.
4. Review the pharmaceutical agents that are available for the treatment of skin conditions, including proprietary and generic identifications and constituent ingredients.
5. Evaluate those dermatological conditions which fall outside the scope of podiatry and make referrals to other health care practitioners as necessary.
6. Discuss common medical conditions and co-morbidities in the aged population and their relevance to podiatry and interdisciplinary care.
7. Distinguish between normal age related changes and pathological conditions (physical and psychological) that may occur in the aged population.
8. Review pharmacokinetic and pharmacodynamic variations in different populations, and evaluate the impact on prescription drugs with particular reference to polypharmacy and other related circumstances.
9. Demonstrate podiatric techniques in the management of common podiatric conditions in the aged.

Subject Content

A). Dermatology

1. Dermatitis
 - allergic contact
 - Photoallergic
 - primary contact
 - causes and management
2. Eczema
 - Discoid
 - Venous stasis
 - Atopic
3. Disorders of keratinisation
 - Pemphigus
 - Pemphigoid
 - Epidermolysis bullosa; simplex and complex
 - Papulosquamous disorders
 - Psoriasis
 - Pustular, Psoriasis
 - Keratoderma
 - Lichen planus
 - Pityriasis rubra pilaris
 - Palmoplantar keratodermas
 - Diffuse Palmoplantar Keratoderma
 - Punctate Keratoderma
 - Progressive Keratoderma
 - Striate Keratoderma
 - Mal de meleda
 - Papillon-LeFevre syndrome
 - Ichthyosis
4. Neoplasia
 - benign and / or Malignant
 - differentiation, signs and Symptoms
5. Infections (skin and nail)

- mycotic
- Onychomycosis
- Paronychia
- chronic hyperkeratosis Tinea pedis
- Acute vesicular Tinea pedis
- Intertriginous Tinea pedis
- treatment and management
- 6. Bacterial
- Aerobic and Anaerobic
- Diagnosis and differentiation
- local management methods
- systemic drug therapy
- Mycobacterium
- 7. Viral
- human papova virus
- verrucae
- Molluscum contagiosum
- Epidermodysplasia verruciformis
- topical Vs systemic treatment
- 8. Miscellaneous skin conditions
- Erythroderma
- Urticaria
- Insect bites
- Herpes
- Scabies
- common infectious diseases of childhood
- manifestations of systemic disorders
- B). Gerontology
- 1. Introduction to gerontology
- definitions, populations Trends, impact on health care resources, funding and policies and relevance for podiatrists
- attitudes to ageing - exploring our own attitudes, preconceptions, identifying and exploring community, societal and ethnological Trends in attitude development and display
- 2. Theories of ageing, current trends in theoretical development
- molecular, system level and Cellular theories
- 3. Review an in-depth study of the physiological and pathophysiological understandings of the biology of ageing, including:
- Musculoskeletal system, The skin and its integuments, gastrointestinal, Endocrine, Respiratory, cardiovascular and Nervous system
- 4. Ageing and human locomotion
- Age related changes
- changes related to common systemic pathologies
- Biomechanical consequences and treatment strategies
- 5. Common medical problems, including:
- cerebral syndromes, Parkinson's disease and Parkinsonian syndromes, bone disease and degeneration, arthropathies, Traumatic events, including fractures, Nutritional disorders and deficits

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

REHA 4008 Integrating Research into Physiotherapy Practice

Credit Points 10

Legacy Code 401109

Coordinator Roy Cheung ([https://directory.westernsydney.edu.au/search/name/Roy Cheung/](https://directory.westernsydney.edu.au/search/name/Roy%20Cheung/))

Description In this unit, students will further develop their evidence based practice skills and knowledge by applying it in practice settings. This will involve applying the academic knowledge and skills from three prior evidence based practice and research units by synthesising it with their clinical experience and skills. Students will be allocated a topic area from which they will identify a clinical "problem" or health-related issue. Students will then plan and design a robust research project to answer this question. Students will be expected to reflect on the barriers and facilitators of evidence-based practice, and develop strategies and interventions to be used to facilitate the implementation of evidence in practice by clients and health care practitioners.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) HLTH 3005 OR
HLTH 4002 AND
REHA 3004 OR
REHA 4001 OR
REHA 4002 OR
REHA 4003

Incompatible Subjects REHA 7007 - Integrated Research into Physiotherapy Practice

Restrictions Students must be enrolled in 4706 Bachelor of Physiotherapy or 4707 Bachelor of Physiotherapy (Honours)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify an evidence-practice gap in clinical practice.
2. Generate a structured clinical question about an intervention for a clinical scenario.
3. Plan and design a robust research study for a specific population group ranging from movement control to lifestyle issues, remediation to health promotion.
4. Critically reflect on outcomes of prior research and justify research methodology.
5. Design strategies and interventions to facilitate the implementation of evidence by clients and practitioners.

6. Effectively communicate verbally and in a variety of written formats as required in various contexts e.g. clinical and academic.

Subject Content

Advanced, applied physiotherapy research practice including:

1. Planning an evidence-based research topic investigation
2. Theoretical and practical strategies to execute an evidence-based research investigation in a range of practice areas
3. Theoretical and research-identified facilitators and barriers to evidence based practice in clinical practice
4. Critical reflection on the execution of the evidence-based research investigation and identification of future learning needs
5. Advanced skills in reading and interpreting physiotherapy research evidence
6. Physiotherapy evidence for specific population groups, e.g. arthritis, back pain, occupational injury
7. Verbal and written skills

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

REHA 4009 Occupational Justice

Credit Points 10

Legacy Code 401123

Coordinator Caroline Mills ([https://directory.westernsydney.edu.au/search/name/Caroline Mills/](https://directory.westernsydney.edu.au/search/name/Caroline%20Mills/))

Description This unit critically examines practice in the community with a focus on social inclusion and occupational justice. Life perspectives of people experiencing occupational injustice are explored. Current and historical ideologies which underpin global and national legislation and policies on human rights are examined. The promotion of occupational participation through occupational therapy practice is outlined. This unit challenges popular myths and stereotypes of people with

disabilities. Issues such as de-institutionalisation, duty of care, dignity of risk, choice-making, rights and negligence are critiqued against legal, ethical and personal perspectives. This unit assists students develop critical thinking and reflection skills for practice.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 3020

Co-requisite(s) REHA 3022

Equivalent Subjects LGYA 7065 - Occupation and Social Participation

Incompatible Subjects REHA 7010 - Occupational Justice

Restrictions Students must be enrolled in 4711 - Bachelor of Occupational Therapy or 4712 Bachelor of Occupational Therapy (Honours). This is a specialty subject offered as a compulsory core subject of the occupational therapy program. It is profession specific, preparing students to practice as an occupational therapist and not relevant as an elective for non-occupational therapy students.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the occupational injustices experienced by individuals and/ or groups and hypothesise the potential impact on community membership and participation.
2. Describe past and present conceptual frameworks and ideologies which influence an individual's social and community inclusion
3. Reflect on personal and societal attitudes and beliefs about people who experience occupational injustice (eg disability, homelessness, refugees, Indigenous Australians)
4. Identify community inclusion opportunities and evaluate their potential to facilitate occupational engagement
5. Compare and contrast occupational therapy approaches used to facilitate occupational justice
6. Develop an occupational therapy strategy to enable occupational justice for a marginalised group within their local community or global context

Subject Content

- concepts and principles of occupational justice, community membership and participation
- Global and national Legislation and policies on human rights
- conceptual frameworks and ideologies which underpin service planning
- strategies to manage challenging behaviours to facilitate successful community inclusion
- concept of institutionalisation and its impact on occupational freedom
- approaches used to guide occupational therapy practice in The community
- community inclusion opportunities available in The community
- Issues relating to provision of service; duty of care versus dignity of risk, choice-making, advocacy and abuse and neglect

Special Requirements Legislative Prerequisites

Prior to enrolling in this unit, students must have submitted a Student Undertaking Form. Use the link to the Special Requirements webpage below for more information.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)
If students are visiting a NSW Health facility they will need to comply with the occupational screening and immunisation policy of NSW Health.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Report	2000 words	50	N	Individual
Presentation	15 minute	30	N	Group
Reflection	1000 words total (4x 250 words)	20	N	Individual

Student Contribution Band HECS Band 2 20cp

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 3024 AND REHA 4013

Incompatible Subjects REHA 7013 - Occupational Therapy Practice 4 Workshop

Restrictions Students must be enrolled in 4711 Bachelor of Occupational Therapy. This is a specialty subject offered as a

compulsory core subject of the occupational therapy program. It is profession specific, preparing students to practice as an occupational therapist and not relevant as an elective for non-occupational therapy students.

Assumed Knowledge

Completion of all core subjects is assumed knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Manage case loads in preparation for independent practice.
2. Demonstrate professional behaviours and attitudes in practice settings.
3. Communicate effectively with clients, team members, relevant community groups and industry partners.
4. Utilise a range of assessments to set long and short term goals.
5. Implement and evaluate occupational therapy interventions in the practice setting.
6. Prepare documents in a professional format related to practice.
7. Practice self-directed learning strategies through the use of a learning contract.
8. Reflect on their practice experience using a structured format.

Subject Content

1. Professional practice placement
2. Professional behaviours and self management skills
3. Communication skills
4. Individually negotiated learning contract
5. Documentation skills for practice
6. Assessment of individual and group needs
7. Implementation and evaluation of programs for individuals and groups

REHA 4012 Occupational Therapy Project

Credit Points 10

Legacy Code 401122

Coordinator Rosalind Bye ([https://directory.westernsydney.edu.au/search/name/Rosalind Bye/](https://directory.westernsydney.edu.au/search/name/Rosalind%20Bye/))

Description The aim of this unit is for students to critically apply their knowledge of professional theory, practice, research and evaluation

skills to the investigation of an occupational therapy professional issue of interest or concern. Students will apply unobtrusive research methods to investigate their chosen topic. Students develop an extensive knowledge of their chosen topic and critically analyse the implications of their findings in terms of theory, policy and contemporary health care practice. Students will synthesise their findings into a scholarly research project report and present their findings at a professional-level capstone student conference.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) HLTH 3005

Incompatible Subjects REHA 7014 - Occupational Therapy Project

Restrictions Students must be enrolled in program 4711 Bachelor of Occupational Therapy. This is a specialty subject offered as a compulsory core subject of the occupational therapy program. It is profession specific, preparing students to practice as an occupational therapist and not relevant as an elective for non-occupational therapy students.

Assumed Knowledge

Knowledge of issues and concerns relevant to the occupational therapy profession and occupational therapy clients and consumers. This knowledge will ideally have been gained in part by undertaking several fieldwork experiences in preceding years of the program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Formulate a problem to investigate that is relevant to occupational therapy theory, practice or reasoning.
2. Search for and critique a wide range of literature relating to a specific investigative problem.
3. Critically examine a range of unobtrusive research methods which may be suitable for investigating the problem and prepare a plan of the project.
4. Analyse ethical issues associated with the conduct of unobtrusive research.
5. Apply unobtrusive research methods of data collection and analysis appropriate to the project.
6. Synthesise information into an investigative project report that reflects a critical examination of the topic, with recommendations related to future occupational therapy practice, theory, national and international policy.
7. Present a professional standard conference abstract and presentation.
8. Work collaboratively and in a self-directed manner with other students to complete the above objectives.

Subject Content

1. Contemporary and topical issues relating to occupational therapy practice, theory and professional reasoning.
2. Unobtrusive research methods eg. critical literature review, thematic analysis of public documents, theoretical analysis of case study populations.
3. Ethics of research using unobtrusive methods.
4. Project management skills.

5. Professional Communication skills ? professional and scholarly writing, professional conference presentation skills, abstract writing.
6. Capstone student conference ? preparation and involvement.

REHA 4013 Occupational Therapy Specialties

Credit Points 10

Legacy Code 401124

Coordinator Rosalind Bye ([https://directory.westernsydney.edu.au/search/name/Rosalind Bye/](https://directory.westernsydney.edu.au/search/name/Rosalind%20Bye/))

Description This unit provides occupational therapy students with the opportunity to select from, and undertake advanced study in, a range of occupational therapy clinical specialty areas. Several streams will run concurrently in this unit representing key clinical areas of specialisation in occupational therapy. Students will be able to focus their study, by selecting a combination of clinical specialty streams. Streams will cover relevant clinical content, examining the unique occupational therapy contribution in each specialty area.

Restrictions Students must be enrolled in program 4711 Bachelor of Occupational Therapy. This is a specialty subject offered as a compulsory core subject of the occupational therapy program. It is profession specific, preparing students to practice as an occupational therapist and not relevant as an elective for non-occupational therapy students.

Assumed Knowledge

It is assumed that students entering this subject will have completed all previous occupational therapy subjects from the third year of the Bachelor of Health Science/Masters of Occupational Therapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Review and evaluate the unique occupational therapy contribution in clinical specialty areas of interest.
2. Reflect on how occupational therapy practice in specialised areas relates to the theoretical basis of occupational therapy.
3. Identify clinical questions and apply knowledge and skills of evidence-based practice to the investigation of clinical specialty topics.
4. Perform professional competencies relevant to the chosen clinical specialisation areas.

Subject Content

1. The unique occupational therapy contribution in areas of clinical specialisation
2. The use of learning contracts to determine learning needs in areas of clinical specialisation
3. Clinical questions relevant to the development of expertise in chosen clinical specialty areas as negotiated with academic staff
4. Knowledge and skills of evidence-based practice in the investigation of clinical specialty topics
5. Professional competencies relevant to the chosen clinical specialisation areas as negotiated with academic staff

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have:

- 1) submitted a Student Undertaking Form and have applied for a National Police Certificate;
- 2) submitted Working with Children Check Student Declaration;
- 3) possess a current WorkCover Authority approved First Aid Certificate.

REHA 4014 Paediatric Physiotherapy

Credit Points 10

Legacy Code 401106

Coordinator Genevieve Dwyer ([https://directory.westernsydney.edu.au/search/name/Genevieve Dwyer/](https://directory.westernsydney.edu.au/search/name/Genevieve%20Dwyer/))

Description This unit aims to prepare the student as a competent entry-level practitioner in paediatric physiotherapy. It focuses on understanding the changes which occur from infancy to maturity and the impact of congenital or acquired conditions, or lifestyle diseases causing dysfunction. Clinical and ethical reasoning and family-centred practice are both stressed. The approach will also emphasise the role of physiotherapy within inter-professional teams to prepare for different work settings (acute care, rehabilitation and/or community). The unit integrates prior learning from previous years (especially units related to neurology, musculoskeletal, cardiopulmonary physiotherapy and exercise rehabilitation).

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 3003 AND REHA 3001 AND HLTH 3005 OR HLTH 4002

Co-requisite(s) REHA 4015

Incompatible Subjects REHA 7017 - Paediatric Physiotherapy

Restrictions Students must be enrolled in 4706 Bachelor of Physiotherapy, 4733 Bachelor of Physiotherapy (Honours) or 4707 Bachelor of Physiotherapy (Honours).

Assumed Knowledge

A good understanding of approach to assessment and management of impairments arising from disorders of the musculoskeletal system, neurological system and cardiopulmonary system is desirable. In addition approach to physical activity and/or exercise prescription is also desirable. This knowledge should have been acquired in previous physiotherapy-specific subjects run in the Physiotherapy program. Knowledge of EBP is also relevant and desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of typical growth and development from birth to adolescence; and discuss the occurrence of variations in typical development and possible reasons for these.
2. Describe the potential impact of atypical growth and development on the skeletal, respiratory and/or neurological system of a child with congenital or acquired condition.
3. Identify the potential psychosocial impact of a child's illness, disease and/or disability on the child, their family and the community.

4. Research and determine relevant methods used to assess and/or monitor the health, development and/or recuperation of infants, children and adolescents as appropriate to their needs.
5. Solve relevant comp

Subject Content

Theory, research and practice, within a paediatric physiotherapy context, for:

- typical growth and development from birth to Adolescence
- The impact of atypical growth and development on A child with A congenital or acquired condition
- The potential psychosocial impact of illness, disease and/or disability on A child, their family and community
- Working across a variety of workplace settings (acute care, rehabilitation and community-based) and within a family-centred practice philosophy and ICF framework
- identifying relevant methods used to assess and/or Monitor infants, children and Adolescence, as appropriate to their needs
- planning case management of complex paediatric clinical problems using sound clinical reasoning and illustrating A professional and Ethical approach to practice

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement and have submitted a Working with Children Check Student Declaration and hold a valid and current First Aid Certificate from a Registered Training Organisation.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

REHA 4015 Physiotherapy for Chronic Illness and Disease

Credit Points 10

Legacy Code 401107

Coordinator Genevieve Dwyer ([https://directory.westernsydney.edu.au/search/name/Genevieve Dwyer/](https://directory.westernsydney.edu.au/search/name/Genevieve%20Dwyer/))

Description This unit focuses on the role of physiotherapy in chronic disease management. A case-based learning approach will be undertaken to provide students with the theory, research and practice which underpins the assessment and treatment of people with chronic disease. The role of lifestyle factors in the development of chronic disease will be explored, along with health promotion and preventative strategies. The importance of client-centred care, which respects culture and diversity, and the multidisciplinary team approach will also be investigated in the context of frequently occurring chronic conditions.

Incompatible Subjects REHA 7018 - Physiotherapy for Chronic Illness and Disease

Restrictions Students must be enrolled in 4706 Bachelor of Physiotherapy or 4733 Bachelor of Physiotherapy (Honours) or 4707 Bachelor of Physiotherapy (Honours)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Synthesise evidence to explain how lifestyle and/or psychosocial factors can influence the development and continuation of chronic illness or disease.
2. Justify the role of physiotherapy in the prevention and/or management of chronic illness or disease.
3. Critically reflect on the contributions of a multidisciplinary/interdisciplinary team in the management of individuals with chronic illness or disease.
4. Solve relevant complex clinical problems accessing appropriate resources and using a process of sound clinical reasoning.
5. Research and determine a client-centred approach in the design of a physiotherapy management plan for the management of chronic illness or disease.

Subject Content

1. Prevalence of chronic illness and disease in Australia and internationally and relevance to physiotherapy
2. Role of physical activity in promoting healthy lifestyles and quality of life across the lifespan for those living with chronic disease, illness or disability
3. Living with chronic illness or disease from the perspective of the patient
4. Goal setting and optimising compliance to effect positive behavioural change and/or maximise quality of life
5. Opportunities for physiotherapists to assist in the prevention and management of chronic disease

6. Role of community physiotherapy within a multidisciplinary/interdisciplinary team approach to management of chronic disease
7. Palliative care: supporting patients in the last phase of life
8. Students will cover some key chronic disease areas via seminar topics. The theme of the seminar topics is promoting healthy lifestyles to optimise quality of life throughout the lifespan

REHA 4016 Podiatric Clinical Block

Credit Points 20

Legacy Code 401117

Coordinator Kym Hennessy ([https://directory.westernsydney.edu.au/search/name/Kym Hennessy/](https://directory.westernsydney.edu.au/search/name/Kym%20Hennessy/))

Description This unit is the major clinical placement unit in the 4th year of the program. Students will participate in clinical activities in public and private sector placements. The unit builds on previous clinical and academic knowledge to further develop students' clinical reasoning skills encouraging appropriate selection of assessment techniques to diagnose, treat and provide optimal health outcomes. Students under supervision will manage foot and lower limb pathologies across the scope of practice including treating diverse patient cohorts and complex cases (including the high risk foot) transitioning towards a competent graduate entry podiatrist.

School Health Sciences

Discipline Podiatry

Student Contribution Band HECS Band 2 20cp

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 4018 AND REHA 3030

Equivalent Subjects REHA 7019 - Podiatric Clinical Block

Restrictions Must be enrolled in 4708 Bachelor of Podiatric Medicine Podiatry specific - students will be participating in patient assessment and management. It is essential that they have been able to demonstrate competencies in patient assessment, documentation, treatment programs and communication within allied health / community settings. The podiatric practice subjects in combination with the clinical block placement have been designed to be an integrated suite of subjects where one subject builds on the clinical competencies of the others.

Assumed Knowledge

Advanced clinical and theoretical podiatric knowledge is necessary to ensure that students in this subject can undertake appropriate assessment techniques to diagnose, treat and provide short and long term health outcomes. Students are expected to have sufficient knowledge and scope to evaluate and manage complex clinical cases in the areas of surgery, paediatrics, high risk foot and musculoskeletal disorders. Completion of all core subjects prior to undertaking subject 401117 Podiatric Clinical Block will equip students with this assumed knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Employ professional communication skills and behaviours in clinical settings.
2. Implement acquired skills in the practice of podiatry in a variety of clinical settings in an independent manner.
3. Manage caseloads by demonstrating safe skills, efficiencies and competencies necessary in the management of patients with foot pathologies over a short/long term basis.
4. Apply and appraise skills, knowledge and contextual information in the assessment, diagnosis and management within diverse cohorts and the multi-disciplinary team.
5. Conduct effective administrative duties (medical records, referral reports and patient instructions) and management tasks (daily running of the department).
6. Reflect and appraise their clinical and professional experience.

Subject Content

In the Clinical Block placement, the focus will be on the consolidation of appropriate assessment, diagnostic and management skills consistent with those expected of newly graduated podiatrists. The activities will be divided into two areas: (A) Preparation and feedback - presented in either lecture or tutorial format to provide: 1. The relevant information to students about their responsibilities and the requirements of external placements (covering professional behaviour review, communication skills, needs of different groups and treatment programs, negotiated learning contract). 2. Feedback from placements at the end of the placement. (B) External Clinical Placement.

(A) This will be presented in either lecture or tutorial format to provide: - negotiated learning Contract

Students will successfully participate in 4 weeks of external placement. The placement will be directed at consolidating assessment, diagnostic and management skills in a diverse range of clinical settings and patient groups. The aim of these placements is to increase efficiency and competency in podiatry care in real-life clinical settings. Of particular importance will be the student's appreciation of the podiatrists role in a multi-disciplinary approach to patient care. (Note: For the course 4708 B Podiatric Medicine, there is one block placement of 210 hours or as required to meet accreditation standards or 1000 clinical hours. Placements may be arranged at varying outreach clinics as required to meet the total number of clinical hours as per accreditation standards.)

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Placement Clinical Requirements	20 days supervised placement and 4 hours preparatory lectures	S/U	Y	Individual
Reflection	3 x 500 words (1500 words total)	40	N	Individual
Viva Voce	15 minutes	60	Y	Individual
Negotiated Learning Contract: To demonstrate competency on placement	Not specified	S/U	Y	Individual

REHA 4017 Podiatric Paediatrics and Sports Medicine

Credit Points 10

Legacy Code 401115

Coordinator Steven Walmsley ([https://directory.westernsydney.edu.au/search/name/Steven Walmsley/](https://directory.westernsydney.edu.au/search/name/Steven%20Walmsley/))

Description This unit will introduce students to clinical and theoretical foundations of biomechanical alignment, trauma, psychological and behavioural factors leading to pain and restricted function of the foot and lower extremity affecting daily living activities. Particular focus will be placed on the mechanics, diagnosis and treatment options of problems experienced in paediatrics and sports in normal daily activities or the sporting arena. This integration will enhance the previously taught assessment and diagnostic techniques in the development of appropriate management and treatment programs of the lower extremity in different populations.

School Health Sciences

Discipline Podiatry

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 3028 AND
REHA 3029 AND
REHA 2005

Co-requisite(s) REHA 4018

Incompatible Subjects REHA 7024 - Podiatric Techniques 3A REHA 7025 - Podiatric Techniques 3B

Restrictions Students must be enrolled in 4708 - Bachelor of Podiatric Medicine and 470 - Bachelor of Podiatric Medicine (Honours).

Assumed Knowledge

Completion of all core subjects to this semester/ year of study.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss and analyse current theories and processes of normal growth from birth to adulthood.
2. Use appropriate knowledge of diseases, musculoskeletal injury with skills to accurately examine (physical, historical and psychosocial) the child and the sports patient.
3. Quantify paediatric and sports assessments using pathology/injury screening tools
4. Explore legal, ethical and resourcing issues in the practice of podiatric medicine in the areas of policy development, appropriate assessment techniques and treatment programs provided to the child (management of condition, child protection and care); sporting patients (professional or social environments).
5. Integrate theoretical and practical knowledge of biomechanics and its role in sporting activities and exercise science and understand approaches to determine the aetiology, pathology, clinical presentation in the diagnoses of common injury to the lower extremity.
6. Distinguish between normal age related changes and pathological conditions (physical and psychological) that may occur in paediatric and sports cohorts.
7. Recognise and review age related gait changes and differentiate these from gait changes associated with systemic or orthopaedic disturbances.
8. Examine the role of the podiatrist in a multidisciplinary health care team which includes the paediatric and sports patient (hospital and community settings).
9. Apply the theory of measuring health outcomes, pain and pain management in a clinical setting and identify, assess and implement a treatment plan for soft tissue, osseous and synovial conditions.
10. Demonstrate and evaluate the role of physical therapies, particularly musculoskeletal retraining, neural and orthoses intervention in the ongoing patient management and rehabilitation process.

Subject Content

The content of this subject covers paediatrics and sports medicine.

- 1) Paediatrics
 - a. Overview of paediatrics
 - The Roles, glossary and teamwork involved in managing paediatric populations
 - b. The patient, environment and examination

- underpinning assumptions, The first encounter (parental dynamics and rapport) and The Examination process
- c. Child protection
 - Children (care and protection) Act 1998/Amendments
 - Preventing child Abuse and neglect
 - Risk Factors, signs and duty of care
- d. Legal and Ethical considerations in assessment and treatment
- e. Normal muscular, neuro and skeletal development
 - Embryology, foetal development, Developmental changes and Lower limb function and postural changes with Age
- f. Factors affecting growth and development
 - Genetic, neurological, hormonal, racial, environmental and disease
- g. Treatment and management
 - conditions and principles applying to treatment (Palliative, accommodative and curative treatments)
- h. Postural disorders
 - osteochondroses, pes calcaneo-valgus, vertical talus, talipes equinovarus, metatarsus adductus, coxa vara ? valga, genu varum ? valgum, tibial varum, transverse Plane deformities and Developmental flatfoot
- i. Paediatric Screening
- 2) Sports Medicine
 - a. Physical activity across the life span
 - physiological and mental health Benefits
 - physical Activity guidelines
 - barriers and Facilitators for physical Activity participation and The podiatrists role
 - b. Overview of sport and related injury
 - biomechanics, structure and function of The Lower extremity
 - common reported injuries and sequelae of Activities
 - physiology, pathophysiology and Psychology of pain in Activity
 - c. History taking and examination
 - Activity type, frequency, level of fitness, surface, footwear and other equipment
 - injury and treatment history (previous and present)
 - assessment and investigative techniques
 - injury and Activity Screening
 - Prevalence of injury across Sports
 - Red alerts (differential Diagnosis)
 - d. Legal and Ethical considerations in assessment and treatment of sports person
 - e. Specific injuries
 - aetiology, pathology, clinical presentation and treatment of A range of pathologies (ie stress fractures, soft tissue injury, subluxations and related conditions such as fractures, sinus tarsi, compartment, cuboid, and iliotibial syndrome)
 - f. Treatment strategies and management plans, including
 - orthoses, splinting, strapping and Motion restriction devices and techniques
 - footwear prescription and modification
 - prevention and Musculoskeletal rehabilitation programs
 - designing rehabilitation programs
 - Interventions (i.e stretching, activity and training modification, strength and proprioception, mucuskelal techniques- deep tissue massage, neural testing and tension, muscle rehabilitation (stretching and strengthening), mobilisation, myofascial the

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement. Students must also hold a valid and current First Aid Certificate from a Registered Training Organisation. Refer to the Special Requirements website for more information.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

REHA 4018 Podiatric Practice 3

Credit Points 10

Legacy Code 401114

Coordinator Kym Hennessy ([https://directory.westernsydney.edu.au/search/name/Kym Hennessy/](https://directory.westernsydney.edu.au/search/name/Kym%20Hennessy/))

Description This unit is the third of four clinical practice units. Building on previous clinical units and academic knowledge the unit develops student assessment skills encouraging the student to make the appropriate selection of assessment techniques to diagnose, treat and provide short and long term health outcomes. Students will continue to participate in clinical activities under supervision to manage foot pathologies with increased scope to evaluate and manage more complex cases (i.e. surgery, paediatrics, high risk foot). Clinical activities include UniClinic sessions, Clinical Therapies, Tutorials, and External Clinical Placement.

School Health Sciences

Discipline Podiatry

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 3029 AND REHA 3030

Incompatible Subjects REHA 7021 - Podiatric Practice 3

Restrictions

Students must be enrolled in 4708 Bachelor of Podiatric Medicine and 4709 Bachelor of Podiatric Medicine (Honours).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate skills in safe work practices including infection control and work health and safety in a clinical setting.
2. Apply professional communication skills in a clinical setting.
3. Appraise and review assessment, diagnostic and management skills necessary for the development and application of treatment of patients with general foot and lower extremity pathologies.
4. Consolidate specialist diagnostic skills for the assessment of patients from special populations including radiographic interpretation, vascular assessment, neurological assessment, and biomechanical assessment.
5. Develop and apply assessment, diagnosis and management knowledge and skills in the context of complex clinical cases including paediatric, sports and geriatric patients.
6. Develop and demonstrate safe and competent skills in undertaking nail surgery procedures.
7. Develop and refine skills in the manufacture of custom made functional orthotic devices including neutral casting, positive cast manufacture, grinding and safety competencies.
8. Develop and apply soft tissue techniques in the context of management of musculoskeletal pathologies.

Subject Content

This is the third of four clinical practice subjects, the student will participate in patient assessment, diagnosis, and management. Completing this unit, builds on students clinical and academic skills in preparation for becoming a graduate podiatrist.

The activities will be divided into three areas:

- (a) UniClinic (including surgery)
- (b) Clinical therapies and clinical tutorials
- (c) External Clinical Placement

(a) UniClinic (including surgery)

In these clinics, the student will consolidate and further develop patient assessment, diagnosis and management, and clinical reasoning skills. The patients who attend these clinics will be new and ongoing patients who have basic foot problems, problems associated with an existing medical condition, mechanical/functional problems or require minor surgical intervention. Appropriate assessments and management strategies will be carried out including manufacture of orthoses, soft tissue techniques, and minor surgical procedures. The students will be supervised by registered practitioners. Tutorials will support the management and educational needs (including case presentations) to facilitate learning during sessions.

(b) Clinical Therapies and clinical tutorials

This unit will continue to develop clinical skills and academic knowledge in a range of therapies. This unit will build on previous orthoses and surgery unit content taught in the 3rd year of the program. Additional content ("soft tissue techniques") will also be introduced to refine student clinical application and reasoning skills to manage musculoskeletal pathologies. Clinical tutorials will support the management and educational needs (including case presentations) to facilitate learning during UniClinic sessions.

Content will include:

Manufacture of clinical devices, problem solving and ethics
 Prefab and off the shelf devices
 Soft tissue therapies including trigger point, dry needling and active release techniques
 Revision of surgical procedures and protocols
 Orthotic scripts
 Translation of patient pathology and condition to orthotic script prescription
 Translation of biomechanical assessment results to orthotic script prescription

(c) External Clinical Placement

A placement for 20 days of clinical activities in an external clinical site will be undertaken. The focus of this placement will be on developing assessment, diagnostic, management, and patient interaction skills in a real world clinical setting.

REHA 4019 Podiatric Practice 4

Credit Points 10

Legacy Code 401118

Coordinator Rebecca Gordon ([https://directory.westernsydney.edu.au/search/name/Rebecca Gordon/](https://directory.westernsydney.edu.au/search/name/Rebecca%20Gordon/))

Description This unit is the final of four clinical podiatric practice units. The unit builds on student clinical reasoning encouraging the student to make the appropriate selection of assessment techniques

to diagnose and manage a spectrum of foot and lower limb pathology. Students under supervision will consolidate skills managing diverse patient cohorts and complex cases (including surgery, paediatrics, sports injury and the high risk foot) transitioning towards a competent graduate entry podiatrist. Clinical activities include UniClinic sessions, Clinical Therapies, Clinical tutorials, and Specialist Clinical Activity.

School Health Sciences

Discipline Podiatry

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 4018 AND REHA 4021 AND REHA 3030

Incompatible Subjects REHA 7022 - Podiatric Practice 4

Restrictions The subject is Podiatry specific and restricted to students enrolled in 4708 - Bachelor of Podiatric Medicine and 4709 - Bachelor of Podiatric Medicine (Honours).

Assumed Knowledge

All core subjects to this semester of study are assumed knowledge to facilitate competent clinical practice.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply their clinical skills and review the practice of podiatry and demonstrate their ability to adapt to a range of clinical environments.
2. Employ professional communication skills in a clinical setting.
3. Develop and exercise skills, efficiencies and competencies necessary in the management of patients with general and complex foot pathologies in clinical settings.
4. Review and consolidate specialist deductive clinical reasoning skills and consequential management of diverse patient groups necessitating interpretive diagnostic skills in the following areas ? imaging, surgery, neurology, vascular and musculoskeletal assessments and interpretation.
5. Plan, demonstrate and apply safe and competent skills in undertaking nail surgery procedures.
6. Assimilate and critique skills, knowledge and contextual information in the assessment, diagnosis and management of diverse patient groups including paediatric, sports and geriatric patients.
7. Independently demonstrate skills and proficiency in patient management using general principles in rehabilitation and the rehabilitation model of care.

Subject Content

This is the final clinical subject in the program and will focus on the consolidation of appropriate assessment, diagnostic and management skills of general and complex podiatric cases. The emphasis will continue to be on surgery, high risk patients, and patients with multiple co-morbidities. The subject will also focus on the management of more complex biomechanical problems including paediatric, and sports injuries. Knowledge and application of holistic rehabilitation programs will be expanded.

The activities will be divided into three areas:

- A). UniClinics including complex biomechanical, surgical and high risk foot consultations

In these clinics, the student will continue development of patient management skills and efficiency attending to ongoing patients of the clinic who have basic foot problems or problems associated with an existing medical condition. Clinics will continue to consolidate all relevant theories taught to assist in the assessment, diagnose and management of patients who attend the clinic with medical, mechanical, functional and surgical problems. As such, it is expected to enhance the student's clinical decision making in the selection of appropriate assessment techniques, additional investigations, rehabilitation, footwear assessment and orthotic and adjunct therapies in general and diverse populations. Complex cases will be a priority to consolidate problem solving, assessment and clinical decision making skills in difficult cases.

B). Clinical Therapies and Clinical Tutorials

This subject will continue to build on previous clinical and academic knowledge. Teaching sessions will improve and consolidate specialist diagnostic, screening, prescription and rehabilitation skills. Clinical tutorials will support the management and educational needs (including case presentations) to facilitate learning during UniClinic sessions.

Content will include;

- management of complex podiatric cases
- footwear prescription and modifications, including Orthopaedic and occupation specific footwear
- orthoses Fabrication, modifications, clinical dec

REHA 4021 The High Risk Foot

Credit Points 10

Legacy Code 401184

Coordinator Zainab Al-Modhefer ([https://directory.westernsydney.edu.au/search/name/Zainab Al-Modhefer/](https://directory.westernsydney.edu.au/search/name/Zainab%20Al-Modhefer/))

Description The unit builds on fundamentals of pathophysiology and podiatry specific units to understand and manage the impact of systemic disease on foot health. The unit specifically investigates pathology associated with the 'high risk foot' including lower extremity manifestations associated with vascular, endocrine, neurological pathology and immunosuppression. This unit aims to develop comprehensive, coherent and connected knowledge to assist making informed decisions and contribute to sustainable change and improvements in health care for people with systemic disease, with particularly emphasis on diabetes and wound management.

Discipline Podiatry

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 2003 AND REHA 2007 AND NATS 2038

Co-requisite(s) REHA 3028

Incompatible Subjects REHA 7026 - Podiatric Techniques 3C

Restrictions Students must be enrolled in 4708 Bachelor of Podiatric Medicine and 4709 Bachelor of Podiatric Medicine (Honours). This subject builds on previous podiatry specific clinical and theory subjects

Assumed Knowledge

All core subjects are assumed knowledge - 400868 Human Anatomy and Physiology 1, 400869 Human Anatomy and Physiology 2, 300574

Neuroanatomy400981 Clinical Pharmacology, 400138 Pathophysiology 1.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique the anatomical, physiological and pathophysiological differences of the arterial, venous, lymphatic and microvascular systems and discern between the diseases of these systems and their consequences in the lower extremity.
2. Execute a thorough examination of the lower extremity vasculature, diagnose vascular status, recognise limitations of these examinations during interpretation of results and instigate an appropriate management plan.
3. Appraise the structure and function of specific functional units of the nervous system, demonstrate knowledge of a range of neurological and neuromotor disorders and explore treatment options available with an emphasis on the role of the podiatrist in the interdisciplinary health care team.
4. Describe the physiological mechanisms of wound healing, in the presence or absence of normal physiological response and thorough examination and investigations and ascertain the underlying causes of the wound, and generate and implement appropriate strategies to return the tissues to their most functional levels by addressing both the wound and the underlying causes.
5. Discuss the physiological basis of the clinical manifestations of diabetes mellitus as it affects multiple organ and functional systems by performing appropriate examinations (vascular, neurological, musculoskeletal, dermatological and psychosocial).
6. Diagnose, evaluate and treat the foot conditions presented by the person with diabetes mellitus, in particular dermal ulcers and explain the role of physical therapies, particularly footwear and orthotic therapy in the ongoing patient management, and health education and promotion strategies.
7. Define a range of conditions associated with impaired carbohydrate metabolism, including gestational diabetes, and impaired glucose tolerance; and be familiar with the syndrome Diabetes Insipidus for purposes of client education and communication with the allied health team.
8. Appraise the common causes of immunosuppression affecting the at-risk foot and generate a comprehensive knowledge and understanding of those infectious diseases which are of particular importance in the practice of podiatry.
9. Evaluate possible routes of transmission of infectious diseases with particular emphasis on cross infection and discuss and implement universal precautions in clinical practice settings.
10. Determine the impact of infectious disease on the physical, emotional and psychological wellbeing of the individual.

Subject Content

1. Vascular Pathologies and Wound Healing
 - a). Arterial pathology
 - Review of normal arterial structure and function
 - Aetiological and Risk Factors in The development of macrovascular disease
 - pathophysiology of Inflammatory and sclerotic changes of macrovascular disease
 - clinical manifestations and health outcomes of macrovascular pathology in The leg
 - assessment concepts and skills in The identification of macrovascular disease
 - limitations in The assessment and interpretation of instrumental macrovascular assessment
 - treatment of macrovascular disease, Conservative, pharmaceutical, and surgical

- podiatric case management of The patient with macrovascular disease
- pathophysiology of microvascular disease and dysfunction
- b). Venous pathology
 - Review of normal structure, function and haemodynamics of The Venous system
 - Venous hypertensive syndromes through stasis and obstruction in The Venous system
 - consequences of deep Venous hypertension (oedematous syndromes, ulceration, dermatitis and superficial varicosities)
 - management of obstructive conditions and deep Venous hypertension (Conservative, pharmaceutical and surgical)
 - management of The consequences of deep Venous hypertension, with particular references to ulcerative States

2. Neurology

- Review of The Anatomy of The neurological structure, motor and Sensory tracts and neurotransmitters
- Overview of The assessment of clinical and medical conditions in relation to The Upper and Lower motor neurone disorders and presentations
- Overview of neurological conditions affecting The Lower limb including
 - adulthood (hereditary, Freidrichss ataxia, Huntingtons)
 - Trauma (CVA /TIA, head injury, tumours)
 - management of neurological conditions in patients with diabetes
 - Infective (Meningitis)
 - Poliomyelitis (Acute and Old), Syphilis (Tabes Dorsalis)
 - Degenerative (Parkinsonism, multiple Sclerosis, motor neurone disease, Alzheimers)
 - Neuromuscular (Myasthenia Gravis, Muscular dystrophies, Epilepsy grand mal, petit mal, focal / Jacksonian epilepsy, Nutritional, Sub-acute combined degeneration of the cord)

3. Wound healing

- Review The physiology of Wound healing in normal and pathologic States
- Inflammation and The Wound microenvironment
- Diagnosis of wounds according to multifactorial aetiologies
- identifying, and controlling Factors which are detrimental to Wound healing (optimising The Wound healing environment)
- Wound debriding agents, cleansing agents and dressings - The range including Factors in The choice and application of Wound care products
- case management of Wound pathology

4. Diabetes

- Defining diabetes mellitus - Aetiological Factors and The signs and Symptoms in The development of diabetes
- The physiology of carbohydrate metabolism, with particular emphasis on The role of insulin and The Classification of conditions associated with impaired glucose metabolism and The role of advanced glycaemic end products (Age) in The Complications of diabetes mellitus
- Diagnosing The condition, Examination of The vascular and Nervous systems with An emphasis on The peripheral Nervous system and diagnostic skills including investigative procedures and clinical urinalysis
- Complications of diabetes
 - a). Morbidity and mortality in diabetes mellitus
 - macrovascular pathology and microvascular dysfunction in diabetes, neurological pathology, including Neuropathic arthropathy, pathological changes to The Inflammatory response, ulceration, infection and gangrene in The diabetic patient
 - b). Treatment
 - controlling blood sugars in diabetes, insulin, oral hypoglycaemia agents, diet, lifestyle and Exercise
 - diabetic emergencies - identification and treatment of hypo and hyperglycaemia

- Podiatric treatment of the patient with diabetes - modifications and precautions during routine primary care management of ulcerations, infections and gangrene, orthotic therapy and footwear modification
- principles of health education and promotion - The role of The podiatrist, and strategies for functioning within A multidisciplinary health care team
- c). Other diabetic st

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.

- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Viva Voce	15 minutes	50	N	Individual
Intra-session Exam	60 mins	20	N	Individual
Case Study	Poster style presentation using designated template	30	N	Individual

Legacy Code 401429

Coordinator Belinda Kenny ([https://directory.westernsydney.edu.au/search/name/Belinda Kenny/](https://directory.westernsydney.edu.au/search/name/Belinda%20Kenny/))

Description The unit focuses on complex cases and contexts arising in speech pathology and innovative approaches to service delivery and workforce responsiveness. Students will have the opportunity to design and develop solutions to novel and authentic clinical and service scenarios, integrating professional knowledge, skills and experiences. This unit will encourage students to consolidate clinical reasoning and reflection skills to a sophisticated level and engage creativity and innovation to solve contemporaneous problems in Speech Pathology practice.

School Health Sciences

Discipline Speech Pathology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 3050

Co-requisite(s) REHA 4028

Restrictions Students must be enrolled in 4763 Bachelor of Speech Pathology or 4764 Bachelor of Speech Pathology (Honours)

Assumed Knowledge

Students are expected to have a sound knowledge of communication and swallowing development and changes across the lifespan and evidence-based approaches to the assessment and management of communication and mealtimes with individuals, families and communities before undertaking this subject. Students are expected to have developed intermediate level clinical skills (CBOS 2011;17), including sound approaches to clinical reasoning and reflection.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Integrate multiple sources of information to plan, develop and evaluate holistic, evidence-based responses to complex case scenarios and speech pathology service issues
2. Develop and present an innovative service response to an authentic and contemporary challenge or opportunity within the Speech Pathology profession
3. Critically appraise the purpose, design and useability of an assistive technology product/service/system by considering multiple

stakeholder perspectives including those of clients, families, clinicians, designers and managers.

4. Communicate and work collaboratively with others to achieve desired outcomes
5. Facilitate culturally safe and responsive settings for learning and practice through integration of knowledge, skills, attitudes and values.

Subject Content

A number of topics will be explored and may include, but not be limited to:

- Medicolegal contexts / Contributions
- Palliative care
- justice health
- mental health
- complex chronic disability with medical sequelae
- Technology / Product design and development
- inter professional Collaborations e.g. education, audiology
- majority World wor
- service access ? rural/Remote Issues, cultural lens
- cultural Issues
- EBP /PBE /research
- Craniofacial
- hearing
- Oncology
- Progressive conditions
- Trauma informed care
- NDIS

Assumed Knowledge

Students are expected to have a sound knowledge of communication and swallowing development and changes across the lifespan, and evidence based approaches to the assessment and management of communication and mealtimes with individuals, families and communities before undertaking this subject. Students are expected to have developed intermediate level clinical skills (CBOS 2011;17), including sound approaches to clinical reasoning and reflection before attempting Clinical Practice 3.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Assess, analyse, plan, implement and manage speech pathology services for individuals, families and communities during speech pathology professional practice at an **approaching/near entry level** of competency as evidenced by the COMPASS? Competency Assessment Tool.
2. Work safely and ethically in all professional contexts at an **entry level** of professional competency as evidenced by the COMPASS? Competency Asses

Subject Content

1. During clinical placements

- students will have experiences Working with clients in one or more speech pathology range of practice areas, including speech, language, voice, fluency, multimodal communication and swallowing
- developing Competency in planning, implementation, and interpretation of speech pathology assessment, planning, implementation, and Monitoring of speech pathology services, and/or participation in prevention, education, and Advocacy Activities

2. During workshops students will engage in interactive learning experiences that integrate academic and clinical competencies in the following topics

- assessment and management in complex clinical contexts
- goal setting, evidence based practice and complex service delivery Issues
- documentation and report writing for diverse professional purposes
- Models of consultation and responsive community capacity Building
- outcome measurement, innovation and evaluation of services
- quality improvement, management and assurance
- supervision and lifelong learning
- professionalism, self-care, and Ethical practice

- professional portfolio development
- work readiness

Special Requirements

Legislative pre-requisites

To be eligible to enrol in this subject and attend a health-related placement in your program, students must meet Western Sydney University course requirements **and** Special Legislative Requirements in your state, to be assessed in their first year of study, against the following:

1. National Criminal History Check: Students must have a current check valid for their entire program. A valid National Criminal history check must be an Australia-wide check, include the student's full name matching their Student ID card and date of birth and not have any offences listed. If a student has a criminal history identified on their check, they must provide a clearance or authority document or conditional letter from their relevant authorised state organisation. International students must additionally have a translated International Police Check or statutory declaration.
 2. A Working with Children Check (WWCC) clearance letter or state equivalent, valid for their entire program.
 3. A current approved first aid certificate valid for their entire program. Approved provider courses can be found at <http://training.gov.au> (<http://training.gov.au/>).
 4. A completed vaccination/immunisation card with all serology results attached - currency must be maintained by the student to ensure compliance for their entire program.
 5. Undertaking/Declaration form (or state equivalent documents).
 6. Additional forms as required per state related to, but not limited to: Tuberculosis Assessment tool; Hepatitis B statutory declaration form' Signed Code of Conduct; Student Deed Poll and all other state equivalent documents as required. Contact your school for further details. Resources are also available on the Placement Hub web page. https://www.westernsydney.edu.au/placements_hub (https://www.westernsydney.edu.au/placements_hub/)
 7. Relevant Local Health District specific documentation as requested. Contact your School for further details. Resources are also available on the Placement Hub website: https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)
- Some external sites may have additional requirements. Students will be advised of any such specified requirements which must be complied with before commencing clinical placements.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

Legacy Code 401431

Coordinator Belinda Kenny ([https://directory.westernsydney.edu.au/search/name/Belinda Kenny/](https://directory.westernsydney.edu.au/search/name/Belinda%20Kenny/))

Description This unit will address contemporary professional issues relevant to entry-level and future speech pathology practice. Students will integrate knowledge and skills from the year 3 and 4 academic and clinical units to generate evidence-based and ethically sound approaches to managing complex and contemporary professional issues. Students will critically reflect on their roles and responsibilities as future professional practitioners, leaders and advocates for the speech pathology profession. Students will engage in career planning and develop strategies to facilitate their transition to professional practice and fulfilling the roles and responsibilities expected of new graduate speech pathologists.

School Health Sciences

Discipline Speech Pathology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 4028

Co-requisite(s) REHA 4029

Restrictions Students must be enrolled in 4763 Bachelor of Speech Pathology or 4764 Bachelor of Speech Pathology (Honours)

Assumed Knowledge

Students will be expected to have comprehensive knowledge and understanding of assessment and management of communication and mealtimes across the lifespan. Students will require the knowledge,

clinical reasoning and reflection skills to respond to complex case and service delivery issues in speech pathology practice. Students will draw upon their diverse speech pathology practice experiences to complete learning activities and assessments for this subject. This subject focuses on preparation for recruitment and professional entry and it is assumed that students will have achieved professional competencies approaching entry-level before undertaking the subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Critically reflect on roles, responsibilities and skills required for leadership and advocacy in the speech pathology profession.
- Engage with the Speech Pathology Australia (SPA) 2030 aspirational goals for the profession through critical application to the future management of individuals, families and communities.
- Articulate an integrated professional identity by applying theoretical knowledge, professional experience, reasoning and reflection skills during speech pathology recruitment processes.
- Appraise self-care needs and create practical strategies for professional resilience in future workplace settings.
- Model professional, ethical and safe practice in all speech pathology contexts.

Subject Content

- Becoming a member of the speech pathology profession
- Speech Pathology Australia (SPA) 2030 aspirational goals
- Ethical leadership and advocacy
- Recruitment processes and strategies
- Working as a new graduate speech pathologist in diverse professional contexts
- Management and business skills for speech pathologists
- Self-care strategies
- Seeking and maintaining professional networks
- Clinical education and supervisory practices
- Future directions and career pathways in the speech pathology profession

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Poster/ Presentation	3 minute presentation	30	N	Individual
Professional Task: Employment Application/ CV	2 x A4 pages	20	N	Individual
Professional Task: Employment Application Interview	10 minutes	30	N	Individual
Reflection	1500 words	20	N	Individual

Coordinator Kristy Coxon ([https://directory.westernsydney.edu.au/search/name/Kristy Coxon/](https://directory.westernsydney.edu.au/search/name/Kristy%20Coxon/))

Description This unit commences the significant research component of the student's honours degree. Students will work on their specific research project in conjunction with their supervisor, engaging in the early stages of the research process related to critical review of the literature, designing their project, considering ethical dimensions of their study, and collecting data. The emphasis of this unit is on the application of research knowledge gained in other units to the practical conduct of the individual honours project.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 20cp

Level Undergraduate Level 4 subject

Pre-requisite(s) HLTH 4002

Restrictions Students must be enrolled in an embedded honours program in a health science program. This subject is specifically tailored to accommodate the program and progression requirements of such students and is not relevant as a general elective.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically review the literature specific to their study to develop the rationale for their research project.
2. Develop specific research questions, objectives or hypotheses for their honours study.
3. Compare and contrast possible research methods relevant to the conduct of their study.
4. Review ethical dimensions of their study and address the necessary ethical approval requirements relevant to the conduct of their research.
5. Critically select and provide a rationale for the choice of research methods for their study.
6. Design, trial and implement initial stages of data collection and analysis specific to the research project.

Subject Content

1. Skills in literature searching and reviewing.
2. Critical review of the literature specific to their study to identify how the research project meets a gap in the research.
3. Development of a critical research rationale to demonstrate a gap in research knowledge.
4. Construction of research questions, objectives or hypotheses unique to the specific study.
5. Review of research methods suitable for the project.
6. Ethical dimensions of the specific honours study.
7. Practical sessions to address the ethical approval requirements relevant to the conduct of their research.
8. Practical mastery of the research methods through trial/piloting/training.
9. Implementation of the initial stages of data collection.
10. Preliminary analysis specific to the research project.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Literature Review	4000 words	50	N	Individual
Learning Contract	2500 words	30	N	Individual
Presentation	20 mins	20	N	Individual

Legacy Code 400946

Coordinator Rosalind Bye ([https://directory.westernsydney.edu.au/search/name/Rosalind Bye/](https://directory.westernsydney.edu.au/search/name/Rosalind%20Bye/))

Description In this unit students will complete the significant research component of their honours study. They will build upon the skills and knowledge of research, evidence-based practice and scholarly enquiry gained in units completed earlier in the program. The emphasis of this unit is the completion of a supervised honours research project. Each student will work individually with their supervisor to complete the stages of data collection and data analysis and will write their results into a format suitable for submission for examination. Students will also present their final at a student conference that is at professional conference level.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 20cp

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 4031

Restrictions Students must be enrolled in a health science program and studying honours as part of an embedded program of study. This subject will be specifically tailored to accommodate the program and progression requirements of such students and is not relevant as a general elective.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Implement data collection plans formulated in the previous unit, Honours Research 1 (Health Sciences)
2. Undertake data analysis suitable for their chosen research topic
3. Formulate and implement data management strategies and data analysis to reach research conclusions
4. Critically discuss and present the project's aims, methodology, results, and conclusions in a scholarly manner
5. Critically analyse the impact of research findings in relation to theory, practice, education and public policy
6. Present findings at a professionally run student conference to an audience of peers, staff and professionals

Subject Content

Major content will be determined by the particular research topic being investigated.

Generic content will include:

- research design and practical implementation of research methods in health practice
- Ethical conduct of The research process
- data collection, management and analysis relevant to Project
- Critical Review and analysis of literature in relation to research findings
- implications of results for theory, practice, education, policy and future research
- Scholarly writing of The final Honours results in A format suitable for Examination
- professional conference presentation skills

Assessment

REHA 4034 Occupational Therapy Clinical Practice 4

Credit Points 20

Legacy Code 400179

Coordinator Lee Zakrzewski ([https://directory.westernsydney.edu.au/search/name/Lee Zakrzewski/](https://directory.westernsydney.edu.au/search/name/Lee%20Zakrzewski/))

Description In 2013 this unit replaced by 400914 - Occupational Therapy Practice 4. This unit will allow students to consolidate academic knowledge and clinical skills in preparation for becoming a competent beginning practitioner. Students will be expected to actively participate in assessment, analysis, goal setting, treatment/programme planning and occupational therapy intervention under the supervision of an occupational therapist.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 20cp

Level Undergraduate Level 4 subject

Pre-requisite(s) LGYA 7072 AND REHA 3023

Equivalent Subjects LGYB 7906 - Clinical Placement 4

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Manage case loads in preparation for independent practice.
2. Demonstrate professional behaviours and attitudes in practice settings.
3. Communicate effectively with clients, team members, relevant community groups and industry partners.
4. Utilise a range of assessments to set long and short term goals.
5. Implement and evaluate occupational therapy interventions in the practice setting.
6. Prepare documents in a professional format related to practice.
7. Practice self-directed learning strategies through the use of a learning contract.
8. Reflect on their practice experience using a structured format.

Subject Content

- professional behaviour
- communication skills
- Individually negotiated learning Contract
- documentation skills for practice
- assessment of individual and group needs
- implementation and evaluation of programs for individuals and groups

Special Requirements

Legislative pre-requisites

To undertake this subject, students must comply with the following special requirements:

- Completion of a Prohibited Employment Declaration;
- Criminal Record Check Clearance;
- Provide evidence of compliance with the occupational screening and immunisation policy of NSW Health;
- Students must possess a current First Aid Certificate approved by the Workcover Authority.

Teaching Periods

REHA 4035 Occupational Therapy Practice 4 (Honours)

Credit Points 20

Legacy Code 401161

Coordinator Bronwyn Gill ([https://directory.westernsydney.edu.au/search/name/Bronwyn Gill/](https://directory.westernsydney.edu.au/search/name/Bronwyn%20Gill/))

Description This unit will allow students to consolidate academic knowledge and practice skills in preparation for becoming a competent beginning practitioner. Students will be expected to actively participate in assessment, analysis, goal setting, intervention and evaluation under the supervision of an occupational therapist. Students will complete practice hours in accordance with World Federation of Occupational Therapy accreditation guidelines. Career development workshops will be conducted to prepare students for entry into the profession of occupational therapy. In addition, honours students will examine their role as beginning practitioner researchers during their placement and the role of research in underpinning clinical decisions.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 20cp

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 3024 AND REHA 4031

Incompatible Subjects REHA 7012 - Occupational Therapy Practice 4 (Honours)

Restrictions Students must be enrolled in 4712 Bachelor of Occupational Therapy (Honours). This subject is only relevant to occupational therapy honours students as part of their embedded program of study. This subject will be specifically tailored to accommodate the program and progression requirements of these students, in particular the need to attend fieldwork placements, and therefore would not be relevant as a general elective.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Manage case loads in preparation for independent practice.
2. Display professional behaviours and attitudes in practice settings.
3. Communicate effectively with clients, team members, relevant community groups and industry partners.
4. Utilise a range of assessments to set long and short term goals.

5. Implement and evaluate occupational therapy interventions in the practice setting.
6. Prepare documents in a professional format related to practice.
7. Practice self-directed learning strategies through the use of a learning contract.
8. Reflect on their practice experience using a structured format.
9. Analyse the role of practitioner researchers in the clinical setting.

Subject Content

1. Professional practice placement.
2. Professional behaviours and self management skills.
3. Communication skills.
4. Individually negotiated learning contract.
5. Documentation skills for practice.
6. Assessment of individual and group needs.
7. Implementation and evaluation of programs for individuals and groups.
8. Career planning and the transition to work.
9. The role of honours research training in preparing students to become practitioner researchers.

Special Requirements

Legislative pre-requisites

NOTE: Due to Covid Restrictions, the First Aid Requirement is currently not needed.

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements

- Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

REHA 7005 Complex Cases and Professional Issues

Credit Points 10

Legacy Code 401049

Coordinator Daniel Thomson ([https://directory.westernsydney.edu.au/search/name/Daniel Thomson/](https://directory.westernsydney.edu.au/search/name/Daniel%20Thomson/))

Description From 2018 students should take 401108 Complex Cases and Professional Issues. In this unit, students will further develop their clinical reasoning with respect to clients with complex presentations. A framework will be presented, which synthesises complex information such as the theory, research and skills in musculoskeletal, cardiorespiratory and neurological physiotherapy across the lifespan, and theories related to professionalism, ethics, safety and communication. This framework will be applied to the area of Intensive Care, where students will develop further knowledge and skills in specific cardiorespiratory techniques such as manual hyperinflation and suctioning. This unit also contains the discussion of a range of recent professional developments in physiotherapy, which are relevant to entry level practitioners. These include registration as a physiotherapist, continuing education, workload control strategies, duty of care responsibilities and quality improvement processes (including critical reflection), employment strategies and career pathways.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) REHA 3001 AND
REHA 3014 AND
REHA 7018 AND
REHA 3004

Co-requisite(s) REHA 7001 OR
REHA 7002 OR
REHA 7003 OR
REHA 7004

Restrictions

Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4667 Master of Physiotherapy or 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Synthesise complex assessment information, using clinical reasoning and client-centred approaches to design and critically reflect on a management plan for clients with complex presentations
- Plan, justify, implement, and evaluate a safe and effective treatment of the impairments and activity limitations in clients with respiratory failure with and without multi-system co-morbidities
- Critically reflect on a clinical scenario with respect to professionalism, ethics, safety and communication
- Synthesise the contributions of physiotherapy study, personal interests and opportunities in physiotherapy to develop a personal, targeted employment strategy
- Demonstrate effective verbal and written communication skills

Subject Content

1. Integration of physiotherapy knowledge developed from previous university-based and clinically-based physiotherapy with the theory of professionalism, ethics, safety and communication (clinical reasoning) to plan management strategies for clients with complex presentations

2. Evidence-based management of clients with respiratory failure requiring assisted ventilation
3. Recent professional developments in physiotherapy, such as registration as a physiotherapist continuing education, workload control strategies, quality improvement processes, and career pathways
4. Employment strategies, considering desires and personal attributes as well as attainment of the UWS Physiotherapy Graduate Attributes and the Standards for Physiotherapy (2006)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Group Assignment	1,500 words	25	N	Group
Individual Assignment	2,500 words	45	N	Individual
Skills Test	10 skills	Pass/Fail	Y	Individual
Written Exam – ICU theory and complex case study	2 hours	30	Y	Individual

Teaching Periods

REHA 7007 Integrating Research into Physiotherapy Practice

Credit Points 10

Legacy Code 401050

Coordinator Clarice Tang ([https://directory.westernsydney.edu.au/search/name/Clarice Tang/](https://directory.westernsydney.edu.au/search/name/Clarice%20Tang/))

Description From 2018 students should take 401109 Integrating Research into Physiotherapy Practice. In this unit, students will further develop their evidence based practice skills and knowledge by applying it in practice settings. This will involve applying the academic knowledge and skills from three prior evidence based practice and research units by synthesising it with their clinical experience and skills. Students will be allocated a topic area from which they will identify a clinical "problem" or health-related issue. Students will then plan and design a robust research project to answer this question. Students will be expected to reflect on the barriers and facilitators of evidence-based practice, and develop strategies and interventions to be used to facilitate the implementation of evidence in practice by clients and health care practitioners. This unit also involves students developing leadership and educator skills by facilitating and participating in a journal club.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) HLTH 3005 OR
HLTH 4002 AND
REHA 7001 OR

REHA 7002 OR
REHA 7003 OR
REHA 7004

Restrictions

Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4667 Master of Physiotherapy or 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify an evidence-practice gap in clinical practice.
2. Generate a structured clinical question about an intervention for a clinical scenario.
3. Plan and design a robust research study for a specific population group ranging from movement control to lifestyle issues, remediation to health promotion.
4. Critically reflect on outcomes of prior research and justify research methodology.
5. Design strategies and interventions to facilitate the implementation of evidence by clients and practitioners.
6. Effectively communicate verbally and in a variety of written formats as required in various contexts e.g. clinical and academic.

Subject Content

Advanced, applied physiotherapy research practice including:

- planning An evidence-based research Topic investigation
- theoretical and practical strategies to execute An evidence-based research investigation in A range of practice areas
- theoretical and research-identified Facilitators and barriers to evidence based practice in clinical practice
- Critical reflection on The execution of The evidence-based research investigation and identification of future learning needs
- advanced skills in reading and interpreting physiotherapy research evidence
- physiotherapy evidence for specific population groups, e.g. Arthritis, back pain, occupational injury
- leadership skills to effectively facilitate and participate in A group Activities, such as A journal club
- verbal and written skills

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Presentation in Journal Club Format	20 minutes	20	N	Individual
Written Essay	2,500 words	50	N	Individual
Professional Task	1 page or no longer than 5 minutes	30	N	Individual

REHA 7009 Neurological Physiotherapy Practice

Credit Points 10

Legacy Code 400987

Coordinator Fran Moran ([https://directory.westernsydney.edu.au/search/name/Fran Moran/](https://directory.westernsydney.edu.au/search/name/Fran%20Moran/))

Description This unit introduces the scope of physiotherapy practice in Australia and around the world as well as ethical and professional behaviours and communication skills required by physiotherapists. Students will develop skills in conducting simple subjective and objective examinations of posture, range of movement, muscle strength and length and providing gait rehabilitation. These knowledge and skills will be applied to the physiotherapy management of clients with acute neurological disorders. physiotherapy contexts. Neurological competencies addressed in this unit include introductory skills in neurological physiotherapy assessment, interpretation and prioritisation of findings along with the selection and implementation and evaluation of appropriate treatment strategies.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) REHA 3026 AND
REHA 3001 AND
REHA 3004

Restrictions

Students must be enrolled in the 4667 Master of Physiotherapy. Students in this program are required to participate fully in practical classes. This involves disrobing to shorts and singlet or swim-suit equivalent in mixed gender classes. Students will practice hands-on physiotherapy examination and treatment techniques on both genders, and will personally experience these techniques which will be performed on them by other students and relevant academic staff.

Assumed Knowledge

Neuroanatomy and research methods. Knowledge of clinical pharmacology would be an advantage.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Display effective communication skills, ethics and professionalism
2. Conduct a simple subjective and objective assessment
3. Record findings in an appropriate format for entry into health records
4. Analyse assessment findings and develop an appropriate treatment plan
5. Plan appropriate and effective management strategies including transfers and gait rehabilitation
6. Monitor, evaluate and progress treatments as indicated
7. Demonstrate safe work practices

Subject Content

1. Within a generic context:
 - introduction to The physiotherapy profession and areas of practice. Ethical principles, professional Standards and registration. Importance and practice of Critical reflection and communication skills. posture and movement assessment, application of Basic massage techniques.
 - simple subjective assessment and objective assessment of range of movement, length, strength. Screening for pathology and safety with mobilisation. outcome measures for function and gait. observation of different gait patterns, principles of rehabilitation and use of gait aides. practice facilitating Transfers and gait education.
2. Within an acute, neurological physiotherapy context:
 - subjective assessment, investigations, notes, bed charts
 - objective assessment including observation, Basic cognition, range of movement, strength, length, sensation, reflexes, tone, Coordination, proprioception, function and mobility
 - interpretation of findings, Prioritisation of client problems and development of treatment plan
 - design and implementation of appropriate management techniques including education, Exercise, task-related training and gait rehabilitation
 - Monitoring, evaluation and Progression of treatments as appropriate
 - Interprofessional communication and professionalism
 - Safe work practices and discharge planning

Teaching Periods

REHA 7010 Occupational Justice

Credit Points 10

Legacy Code 400916

Coordinator Katie Hammill ([https://directory.westernsydney.edu.au/search/name/Katie Hammill/](https://directory.westernsydney.edu.au/search/name/Katie%20Hammill/))

Description This unit critically examines practice in the community with a focus on social inclusion and occupational justice. Life perspectives of people experiencing occupational injustice are explored. Current and historical ideologies which underpin global and national legislation and policies on human rights are examined. The promotion of occupational participation through occupational therapy practice is outlined. This unit challenges popular myths and stereotypes of people with disabilities. Issues such as de-institutionalisation, duty of care, dignity of risk, choice-making, rights and negligence are critiqued against legal, ethical and personal perspectives. This unit assists students to develop critical thinking and reflection skills for practice.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) REHA 3022 AND
REHA 3020

Equivalent Subjects LGYA 7065 - Occupation Social Participation

Restrictions

Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4664 Master of Occupational Therapy or 4712 Bachelor of Occupational Therapy (Honours).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the occupational injustices experienced by individuals and/ or groups and hypothesise the potential impact on community membership and participation.
2. Appraise past and present conceptual frameworks and ideologies which influence an individual's social and community inclusion
3. Reflect on personal and societal attitudes and beliefs about people who experience occupational injustice (eg disability, homelessness, refugees, Indigenous Australians)
4. Identify community inclusion opportunities and evaluate their potential to facilitate occupational engagement
5. Critique occupational therapy approaches used to facilitate occupational justice.
6. Develop an occupational therapy strategy to enable occupational justice for a marginalised group within their local community or global context

Subject Content

1. Concepts and principles of occupational justice, community membership and participation
2. Global and national legislation and policies on human rights
3. Conceptual frameworks and ideologies which underpin service planning
4. Strategies to manage challenging behaviours to facilitate successful community inclusion
5. Concept of institutionalisation and its impact on occupational freedom
6. Approaches used to guide occupational therapy practice in the community
7. Community inclusion opportunities available in the community
8. Issues relating to provision of service; duty of care versus dignity of risk, choice-making, advocacy and abuse and neglect

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subjects, students must have submitted a Student Undertaking Form. Use the link to the Special Requirements webpage below for more information.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

If students are visiting a NSW Health facility they will need to comply with the occupational screening and immunisation policy of NSW Health.

Teaching Periods

REHA 7011 Occupational Therapy Practice 4

Credit Points 20

Legacy Code 400914

Coordinator Bronwyn Gill ([https://directory.westernsydney.edu.au/search/name/Bronwyn Gill/](https://directory.westernsydney.edu.au/search/name/Bronwyn%20Gill/))

Description This unit will allow students to consolidate academic knowledge and practice skills in preparation for becoming a competent beginning practitioner. Students will be expected to actively participate in assessment, analysis, goal setting, intervention and evaluation under the supervision of an occupational therapist. Students will complete practice hours in accordance with World Federation of Occupational

Therapy accreditation guidelines while undertaking the second of two final year clinical placements. Students will also gain knowledge and skills in relation to career planning, professional networking and workforce entry.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 20cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) REHA 7013

Equivalent Subjects REHA 4034 - Occupational Therapy Clinical Practice 4

Restrictions

Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4664 Master of Occupational Therapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Manage case loads in preparation for independent practice.
2. Demonstrate professional behaviours and attitudes in practice settings, including communicating effectively with clients, team members, relevant community groups and industry partners.
3. Utilise a range of assessments to set long and short term goals.
4. Implement and evaluate occupational therapy interventions in the practice setting.
5. Prepare documents in a professional format related to practice.
6. Practice self-directed learning strategies through the use of a learning contract.
7. Reflect on their practice experience using a structured format.
8. Implement career planning strategies, including the development of professional networks and knowledge and skills for entering the workforce.

Subject Content

1. Professional practice placement
2. Professional behaviours and Self Management Skills
3. Communication skills
4. Individually negotiated learning contract
5. Documentation skills for practice
6. Assessment of individual and group needs
7. Implementation and evaluation of programs for individuals and groups
8. Career planning, professional networks and preparation for entering the workforce.

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Performance Evaluation	National OT fieldwork evaluation tool used to assess performance	40	Y	Individual
Practice Placement Portfolio	3000 words	60	Y	Individual

REHA 7014 Occupational Therapy Project

Credit Points 10

Legacy Code 400913

Coordinator Rosalind Bye ([https://directory.westernsydney.edu.au/search/name/Rosalind Bye/](https://directory.westernsydney.edu.au/search/name/Rosalind%20Bye/))

Description The aim of this unit is for students to critically apply their knowledge of professional theory, practice, research and evaluation skills to the investigation of an occupational therapy professional issue of interest or concern. Students will apply unobtrusive research methods to investigate their chosen topic. Students develop an extensive knowledge of their chosen topic and critically analyse the implications of their findings in terms of theory, policy and contemporary health care practice. Students will synthesise their findings into a scholarly research project report and present their findings at a professional-level capstone student conference.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) REHA 3025 AND HLTH 3005

Restrictions

Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4664 Master of Occupational Therapy. This is a specialty subject offered as a compulsory core subject of the occupational therapy program. It is profession specific, preparing students to practice as an occupational therapist and not relevant as an elective for non-occupational therapy students.

Assumed Knowledge

Knowledge of issues and concerns relevant to the occupational therapy profession and occupational therapy clients and consumers. This knowledge will ideally have been gained in part by undertaking several fieldwork experiences in preceding years of the program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Formulate a research problem relevant to occupational therapy theory, practice or reasoning.
2. Systematically search for and critique a wide range of literature relating to a specific research problem.
3. Critically examine a range of unobtrusive research methods which may be suitable for investigating the problem and prepare a plan of the project.
4. Critically analyse ethical issues associated with the conduct of unobtrusive research.
5. Execute unobtrusive research methods of data collection and analysis appropriate to the project.

6. Synthesise complex information into an investigative project report that reflects a critical examination of the topic, with recommendations related to future occupational therapy practice, theory, national and international policy.
7. Present a professional standard conference abstract and presentation.
8. Work collaboratively and in a self-directed manner with other students to complete the above objectives.

Subject Content

1. Contemporary and topical issues relating to occupational therapy practice, theory and professional reasoning.
2. Unobtrusive research methods eg. critical literature review, thematic analysis of public documents, theoretical analysis of case study populations.
3. Ethics of research using unobtrusive methods.
4. Project management skills.
5. Professional Communication skills ? professional and scholarly writing, professional conference presentation skills, abstract writing.
6. Capstone student conference ? preparation and involvement.

Legacy Code 400917

Coordinator Katie Hammill ([https://directory.westernsydney.edu.au/search/name/Katie Hammill/](https://directory.westernsydney.edu.au/search/name/Katie%20Hammill/))

Description This unit provides occupational therapy students with the opportunity to select from, and undertake advanced study in, a range of occupational therapy clinical specialty areas. Several streams will run concurrently in this unit representing key clinical areas of specialisation in occupational therapy. Students will be able to focus their study, by selecting a combination of clinical specialty streams. Streams will cover relevant clinical content, examining the unique occupational therapy contribution in each specialty area.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) REHA 3025

Restrictions

Students must be enrolled in 4663 Bachelor of Health Science/Masters of Occupational Therapy or 4664 Master of Occupational Therapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the purpose of clinical specialisation within occupational therapy
2. Review and evaluate the unique occupational therapy contribution in clinical specialty areas of interest
3. Investigate clinical questions and apply knowledge and skills of evidence-based practice to the investigation of clinical specialty topics

4. Perform professional competencies relevant to the chosen clinical specialisation areas

Subject Content

1. The unique occupational therapy contribution in areas of clinical specialisation
2. The use of learning contracts to determine learning needs in areas of clinical specialisation
3. Clinical questions relevant to the development of expertise in chosen clinical specialty areas as negotiated with academic staff
4. Knowledge and skills of evidence-based practice in the investigation of clinical specialty topics
5. Professional competencies relevant to the chosen clinical specialisation areas as negotiated with academic staff

Teaching Periods

REHA 7016 Occupational Therapy Theory and Practice

Credit Points 10

Legacy Code 400911

Coordinator Karen Arblaster ([https://directory.westernsydney.edu.au/search/name/Karen Arblaster/](https://directory.westernsydney.edu.au/search/name/Karen%20Arblaster/))

Description This unit introduces master's entry students to the theory and practice of occupational therapy. Students will explore the unique contribution of occupational therapists in the health care setting, apply theoretical and philosophical principles underpinning the profession to client groups, and learn analytical skills to examine the relationship between a person, their environment and their participation in daily occupations. The occupational therapy problem solving process will be briefly introduced. In addition, students will study clinical and professional competencies related to practice as a health professional. Finally, the above knowledge and skills will be applied during supervised fieldwork experience.

School Health Sciences

Discipline Occupational Therapy

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4664 Master of Occupational Therapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define occupational therapy and describe the history and development of the profession
2. Summarise the occupational therapy role in the Australian health care context across major practice areas
3. Evaluate the impact of health, disability and illness on occupational participation using the International Classifications of Function
4. Apply occupational therapy philosophical concepts and theoretical practice models to client case studies
5. Describe the occupational therapy problem-solving process of referral, assessment, goal setting, treatment planning, intervention, evaluation of outcomes and the role of evidence-based practice in this process

6. Conduct occupational analysis of client case scenarios using the Person-Environment-Occupation approach
7. Reflect on the role of a health professional, the nature of the helping relationship, and the role of teamwork in the health care context
8. Apply ethical practice principles to health care scenarios
9. Perform key professional competencies related to occupational health and safety, manual handling and health professional communication (interpersonal, written, and professional presentation) both in class and during fieldwork experiences
10. Apply the above knowledge and skills during fieldwork experiences

Subject Content

1. Definitions of occupational therapy
2. History and development of the profession in Australia and internationally
3. Australian health care context and the role of occupational therapy
4. Major practice areas for occupational therapists
5. International classifications of function and health, conceptual models of disability, and personal narratives related to living with conditions that impact on occupational participation e.g. illness/disability/ageing
6. Occupational therapy philosophical concepts and theoretical practice models
7. Occupational therapy problem-solving process: referral, assessment, goal setting, treatment planning, intervention and evaluation of outcomes
8. The role of evidence-based practice in the problem solving process
9. Occupational analysis of client case scenarios using the Person-Environment-Occupation approach
10. The role of a health professional, rights and responsibilities
11. The nature of the helping relationship and duty of care to clients
12. Teamwork in the health care context and the role of other health professionals
13. Ethical principles relevant to health care professionals
14. Professional practice competencies: occupational health and safety, manual handling and written and verbal health professional communication (interpersonal communication, professional literacy, plagiarism, referencing, presentation skills)
15. Fieldwork experiences to consolidate the above knowledge and skills

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have:

- 1) submitted a Student Undertaking Form and have applied for a National Police Certificate;
- 2) submitted Working with Children Check Student Declaration;
- 3) provide evidence of compliance with the occupational screening and immunisation policy of NSW Health; and
- 4) possess a current First Aid Certificate approved by the WorkCover Authority.

Teaching Periods

REHA 7017 Paediatric Physiotherapy

Credit Points 10

Legacy Code 401047

Coordinator Genevieve Dwyer ([https://directory.westernsydney.edu.au/search/name/Genevieve Dwyer/](https://directory.westernsydney.edu.au/search/name/Genevieve%20Dwyer/))

Description From 2018 students should take 401106 - Paediatric Physiotherapy. This unit aims to prepare the student as a competent entry-level practitioner in paediatric physiotherapy. It focuses on understanding the changes which occur from infancy to maturity and the impact of congenital or acquired conditions, or lifestyle diseases causing dysfunction. Clinical and ethical reasoning and family-centred practice are both stressed. The approach will also emphasise the role of physiotherapy within inter-professional teams to prepare for different work settings (acute care, rehabilitation and/or community). The unit integrates prior learning from previous years (especially units related to neurology musculoskeletal and cardiopulmonary physiotherapy and exercise rehabilitation).

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) REHA 3009 AND REHA 3018

Restrictions

Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4667 Master of Physiotherapy or 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Outline typical growth and development from birth to adolescence; and discuss the occurrence of variations in typical development and possible reasons for these.
2. Describe the potential impact of atypical growth and development on the skeletal, respiratory and/or neurological system of a child with congenital or acquired condition.
3. Identify the potential psychosocial impact of illness, disease and/or disability on a child, their family and the community contexts.
4. Research and determine relevant methods used to assess and/or monitor infants, children and adolescents as appropriate to their needs.
5. Solve relevant complex paediatric clinical problems accessing appropriate resources and using a process of clinical reasoning.
6. Select physiotherapy interventions based on the best evidence available and identify how the intervention(s)/management would be implemented and evaluated, ensuring safe work practices.
7. Justify a plan of management for a paediatric problem that demonstrates professional and ethical behaviour, and also recognises the potential role of other health practitioners, as indicated.

Subject Content

Theory, research and practice, within a paediatric physiotherapy context, for:

1. Typical growth and development from birth to adolescence
2. The impact of atypical growth and development on a child with a congenital or acquired condition
3. The potential psychosocial impact of illness, disease and/or disability on a child, their family and community

4. Working across a variety of workplace settings (acute care, rehabilitation and community-based) and within a family-centred practice philosophy and ICF framework

5. Identifying relevant methods used to assess and/or monitor infants, children and adolescence, as appropriate to their needs

6. Planning case management of complex paediatric clinical problems using sound clinical reasoning and illustrating physiotherapy practice

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Developmental assessment and self-reflection report	000 words	20	N	Individual
Case Compilation	3000 words	30	N	Individual
Written examination	2 hours	50	N	Individual

Teaching Periods

REHA 7018 Physiotherapy for Chronic Illness and Disease

Credit Points 10

Legacy Code 401048

Coordinator Genevieve Dwyer ([https://directory.westernsydney.edu.au/search/name/Genevieve Dwyer/](https://directory.westernsydney.edu.au/search/name/Genevieve%20Dwyer/))

Description From 2018 students should take 401107 - Physiotherapy for Chronic Illness and Disease. This unit focuses on the role of physiotherapy in chronic disease management. A case-based learning approach will be undertaken to provide students with the theory, research and practice which underpins the assessment and treatment of people with chronic disease. The role of lifestyle factors in the development of chronic disease will be explored, along with health promotion and preventative strategies. The importance of client-centred care, which respects culture and diversity, and the multidisciplinary team approach will also be investigated in the context of frequently occurring chronic conditions.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) REHA 3009

Co-requisite(s) REHA 7001 OR REHA 7002 OR REHA 7003 OR REHA 7004

Restrictions

Students must be enrolled in 4662 Bachelor of Health Science/Master of Physiotherapy, 4667 Master of Physiotherapy or 4668 Bachelor of Health Science (Honours)/Master of Physiotherapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Synthesise evidence to explain how lifestyle and/or psychosocial factors can influence the development and continuation of chronic illness or disease.
2. Justify the role of physiotherapy in the prevention and/or management of chronic illness or disease.
3. Critically reflect on the contributions of a multidisciplinary/interdisciplinary team in the management of individuals with chronic illness or disease.
4. Solve relevant complex clinical problems accessing appropriate resources and using a process of sound clinical reasoning.
5. Research and determine a client-centred approach in the design of a physiotherapy management plan for the management of chronic illness or disease.

Subject Content

1. Prevalence of chronic illness and disease in Australia and internationally and relevance to physiotherapy
2. Role of physical activity in promoting healthy lifestyles and quality of life across the lifespan for those living with chronic disease, illness or disability
3. Living with chronic illness or disease from the perspective of the patient
4. Goal setting and optimising compliance to effect positive behavioural change and/or maximise quality of life
5. Opportunities for physiotherapists to assist in the prevention and management of chronic disease
6. Role of community physiotherapy within a multidisciplinary/interdisciplinary team approach to management of chronic disease
7. Palliative care: supporting patients in the last phase of life
8. Students will cover some key chronic disease areas via seminar topics. The theme of the seminar topics is promoting healthy lifestyles to optimise quality of life throughout the lifespan.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Group seminar	25 mins	30	N	Individual

Structured critical analysis and reflection of clinical reasoning related to patient seen during clinical site visit or to case scenario presented in class.	1500 words	30	N	Individual
Chronic disease clinical unit case study reflection workbook	1800 words	40	N	Individual

REHA 7027 Research into Practice: bridging the clinician-researcher divide in applied and creative therapies

Credit Points 10

Legacy Code 102728

Coordinator Alison Short ([https://directory.westernsydney.edu.au/search/name/Alison Short/](https://directory.westernsydney.edu.au/search/name/Alison%20Short/))

Description Evidence Based Research (EBR) can inform excellence in clinical practice in order to best meet the needs of our clients and patients. How we choose and use this research is critical, as is the way that we understand ourselves to be a researcher, beyond our practitioner identity. If you are seeking to translate benchtop research (basic laboratory approaches) into applied research practice, and if you are transitioning towards a new identity as a clinician-researcher, this is the unit for you. Our applied research focus considers broad applications relevant to the creative arts therapies, verbal therapies, allied and other health professions, by looking at research processes which ultimately improve practice in the 'real world'.

School Humanities & Comm Arts

Discipline Rehabilitation Therapies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Distinguish between clinical and research practices and their ethical implications
2. Demonstrate skills in using benchtop research (basic laboratory approaches) to inform applied research contexts
3. Reflect critically and constructively on own development as a clinician-researcher

Subject Content

Content will be drawn from, or elaborate upon, a selection of the following topics:

- How do we know what we know? ? epistemology
- How do we know what works? ? evidence based research and evidence based practice (EBR and EBP)
- The nature of evidence for practice
- Benchtop and basic laboratory approaches
- Approaches to real-world practice-based research
- Harnessing existing research into practice contexts
- Role of the clinician, role of the researcher
- Understand the development of the clinician-researcher
- Translation and impact of applied research into the clinical setting
- The scope and limitations of EBR ? its place in the hierarchy of evidence, and the politics of what counts as knowledge

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Log/ Workbook: Journal reflection, specific questions	2,000 words	30	N	Individual

Online Presentation	10 minutes, plus feedback to other students	25	N	Individual
---------------------	---	----	---	------------

Research Essay	3,500 words	45	N	Individual
----------------	-------------	----	---	------------

Prescribed Texts

- Materials will be provided via vUWS

SPRT 1001 Fundamentals of Exercise Science

Credit Points 10

Legacy Code 400880

Coordinator Ric Lovell ([https://directory.westernsydney.edu.au/search/name/Ric Lovell/](https://directory.westernsydney.edu.au/search/name/Ric%20Lovell/))

School Health Sciences

Discipline Sport and Recreation, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects SPRT 1007 - Professional Practice of Sport Exercise Science SPRT 1002 - Fundamentals of Exercise Science (WSTC)

Restrictions

Students must be enrolled in 4658 Bachelor of Health Science (Sport and Exercise Science) or 4659 Bachelor of Health Science (Personal Development, Health and Physical Education) or 4741 Bachelor of Sport Development or 4742 Bachelor of Health Science (Health and Physical Education)-Pathway to Teaching (Secondary) or 4747 Bachelor of Health Science (Health and Physical Education) or 3769 Bachelor of Data Science or 4656 Bachelor of Health Science, 6000 Diploma in Health Science/Bachelor of Health Science or 6001 Diploma in Health Science/Bachelor of Health Science (Health and Physical Education).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the scientific background of the sport and exercise sciences and outline career opportunities within this discipline
2. Define and describe each of the main disciplines of the sport and exercise sciences: biomechanics; exercise physiology; motor learning & skill acquisition; and sports & health psychology.

3. Recall and illustrate knowledge of introductory principles within the main disciplines of the sport and exercise sciences.
4. Evaluate measurement techniques and procedures typically undertaken in the sport & exercise sciences.
5. Employ equipment and software applications to either: collect, process and/or present data common to the sport and exercise sciences.
6. Recall knowledge of and execute all practical skills and activities safely in compliance with discipline specific OH&S procedures and systems, and UWS standard operating procedures and laboratory rules.
7. Demonstrate communication, numeracy and social interaction skills, together with information and technology literacy.

Subject Content

1. Overview of the Sport and Exercise Sciences
2. Measurement in Sport and Exercise Science
3. Introduction to Biomechanics
4. Introduction to Exercise Physiology
5. Introduction to Physical Activity
6. Introduction to Motor Learning and Skill Acquisition
7. Introduction to Sport and Exercise Psychology

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	Up to 30 mins	20	N	Individual
Presentation	15-20 mins	30	N	Individual
Presentation	5 mins	10	N	Individual
End-of-session Exam	2 hours	40	Y	Individual

Coordinator Carissa Hanes ([https://directory.westernsydney.edu.au/search/name/Carissa Hanes/](https://directory.westernsydney.edu.au/search/name/Carissa%20Hanes/))

Description This unit is designed to provide fundamental basic science and sport and exercise science content, with the intent to prepare the students for the more advanced scientific applications to the study and research of the sport and exercise sciences. Students will be exposed to computer software applications to aid data processing used in the sport and exercise sciences, with special applications to fields such as biomechanics, exercise physiology, motor learning, skill acquisition and sport psychology.

School Health Sciences

Discipline Sport and Recreation, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects SPRT 1001 - Fundamentals of Exercise Science

Restrictions Students must be enrolled at Western Sydney University, The College. Students enrolled in Extended Diplomas must pass 40 credit points from the preparatory subjects listed in the program structure prior to enrolling in this University level subject. Students enrolled in the combined Diploma/Bachelor programs listed below must pass all College Preparatory subjects listed in the program structure before progressing to the Year 2 subjects.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the scientific background of the sport and exercise sciences and outline career opportunities within this discipline.
2. Define and describe each of the main disciplines of the sport and exercise sciences: biomechanics; exercise physiology; motor learning & skill acquisition; and sports & health psychology.

4. Evaluate measurement techniques and procedures typically undertaken in the sport and exercise sciences.
5. Employ equipment and software applications to either: collect, process and/or present data common to the sport and exercise sciences.
6. Recall knowledge of and execute all practical skills and activities safely in compliance with discipline specific WH&S procedures and systems, and WSU standard operating procedures and laboratory rules.
7. Demonstrate communication, numeracy and social interaction skills, together with information and technology literacy.

Subject Content

Overview of the Sport and Exercise Sciences
 Measurement in Sport and Exercise Science
 Introduction to Biomechanics
 Introduction to Exercise Physiology
 Introduction to Physical Activity
 Introduction to Motor Learning and Skill Acquisition
 Introduction to Sport and Exercise Psychology

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Log/workbook – three logbooks submitted at regular intervals	Week 3, Week 20, Week 11		N	Individual
Professional task – 750-1000 words	750-1000 words	20	N	Individual
Presentation (group) – 15 minutes	15 minutes	30	N	Individual
End-of-session exam	2 hrs and 20 mins	30	N	Individual

SPRT 1005 Outdoor Recreation

Credit Points 10

Legacy Code 400808

Coordinator Nicki Taylor ([https://directory.westernsydney.edu.au/search/name/Nicki Taylor/](https://directory.westernsydney.edu.au/search/name/Nicki%20Taylor/))

Description Students will learn about the variety of outdoor recreation and educational pursuits available to individuals, in school or community settings. Through active participation and guided instruction, students will also learn how to supervise specific forms of outdoor recreation and education in activities such as hiking, canoeing and camping. Learning content will reinforce the rationale for the development, administration and delivery of school-based and community outdoor recreation and education programs within Australia.

School Health Sciences

Discipline Sport and Recreation, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects SPRT 2005 - Outdoor Recreation 1 SPRT 1006 - Outdoor Recreation (WSTC) TEAC 1014 - Experience based Outdoor Education

Restrictions Students must be enrolled in 4549 Bachelor of Health Science (Personal Development, Health and Physical Education), 4659 Bachelor of Health Science (Personal Development, Health and Physical Education), 4742 Bachelor of Health Science (Health and

Physical Education)-Pathway to Teaching (Secondary), 4747 Bachelor of Health Science (HPE), 4741 Bachelor of Sport Development or 6001 Diploma in Health Science/Bachelor of Health Science (Health and Physical Education).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and apply the theoretical and philosophical underpinnings of Outdoor Recreation/Education.
2. Explain the relationship between people and the environment and the role that nature plays in human development, sustainability, and promoting lifelong physical activity.
3. Implement skills to function effectively, autonomously, and safely in wilderness and other outdoor environments.
4. Assess a variety of learning experiences and reflect upon their importance for developing movement competence and enhancing interpersonal skills in outdoor settings.
5. Differentiate between various leadership styles and justify the place of outdoor education for diverse populations.

Subject Content

The theory of recreation and leisure, as well as active participation in numerous outdoor recreation pursuits will provide:

- Concepts and policy direction in Outdoor Education/Recreation;
- Environmental impacts, conflict resolution and risk analysis in outdoor education/recreation;
- National accreditation scheme in outdoor education/recreation;
- Implication of theories and practice of the conduct of outdoor educational activities in contemporary Australia;
- Risk assessment and legal responsibilities in outdoor recreational pursuits;
- Policies and procedures of Outdoor Education/Recreation Industry groups;
- Policies and procedures of the NPWS of NSW in relation to National Parks facilities, Aboriginal Cultures and Environmental impacts;
- Field work requirements: All students will be required to attend and complete field work activities that span a range of outdoor recreation pursuits, as described next;
- participation in common land-based Outdoor recreation pursuits such as camping, canoeing and hiking.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Feature Article	1,000 words	40	N	Individual
Outdoor Recreation Portfolio	1,500 words	60	N	Individual
Practical Field Trip	Bushwalk - 5 hours	S/U	Y	Individual

SPRT 1006 Outdoor Recreation (WSTC)

Credit Points 10

Legacy Code 700063

Coordinator Margaret Smith ([https://directory.westernsydney.edu.au/search/name/Margaret Smith/](https://directory.westernsydney.edu.au/search/name/Margaret%20Smith/))

Description Students will learn about the variety of outdoor recreational pursuits available to individuals, whether in a school-based or community setting. Through active participation and guided instruction, students will also learn how to supervise specific forms of outdoor recreation. Lecture content will reinforce learning and skill development through the study of the development, administration and delivery of school-based and community public recreation programs, as well as studying the role of recreation within Australia.

School Health Sciences

Discipline Sport and Recreation, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects SPRT 1005 - Outdoor Recreation

Restrictions Students must be enrolled at Western Sydney, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand the concepts that pertain to the discrete areas of Outdoor Recreation in Australia;
2. Explain and discuss policy and procedure documents relating to the Outdoor Recreation in NSW Schools and industry;
3. Demonstrate ability as an effective team member;
4. Demonstrate practical skills and knowledge in the areas of minimal impact, risk analysis and conflict resolution;
5. Demonstrate familiarity and competence in Outdoor Recreation Industry's accreditation processes;
6. Develop an advocacy position for the role of outdoor recreation pursuits within the context of minimal environmental impact, particularly as these pursuits apply to wilderness and special areas;
7. Demonstrate an understanding of the importance of risk analysis in outdoor recreation, including legal responsibilities and the facilitation of a group;
8. Describe aboriginal cultures, legends and the special bond and sense of place these have in caring for the land;
9. Have an understanding of the impact European settlement has had on the environment.
10. Demonstrate practical skills and knowledge of the advantages and disadvantages of a range of equipment required to successfully undertake specific outdoor recreation activities;

11. Use computer based technologies to locate, access, evaluate, manipulate, create, store and retrieve information
12. Complete all field work requirements, that span a range of outdoor recreation pursuits, in own time and at own expense.
13. Demonstrate competence in common land-based outdoor recreation pursuits such as camping, rock climbing and abseiling, hiking, mountain biking, orienteering, golf and tennis.

Subject Content

The theory of recreation and leisure, as well as active participation in numerous outdoor recreation pursuits will provide;

1. Concepts and policy direction in Outdoor Recreation;
2. Environmental impact, conflict resolution and risk analysis in outdoor recreation;
3. National accreditation scheme in outdoor recreation;
4. Implication of theories and practice of the conduct of outdoor recreational activities in contemporary Australia;
5. Risk assessment and legal responsibilities in outdoor recreational pursuits;
6. Policies and procedures of Outdoor Recreation Industry groups;
7. Policies and procedures of the NPWS of NSW in relation to National Parks facilities, Aboriginal Cultures and Environmental impacts;
8. Field work requirements: All students will be required to attend and complete field work activities that span a range of outdoor recreation pursuits, as described next.
9. Participation in common land-based outdoor recreation pursuits such as camping, rock climbing and abseiling, hiking, mountain biking, orienteering, golf and tennis.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
4 outdoor recreation skill assessments		40	N	Individual
1500 word report detailing the development and delivery of a chosen outdoor recreation pursuit in school and community settings		20	N	Individual
Final Examination – 2 hours		40	N	Individual

Teaching Periods

SPRT 1008 Sport for Social Development

Credit Points 10

Legacy Code 401243

Coordinator Katherine Raw ([https://directory.westernsydney.edu.au/search/name/Katherine Raw/](https://directory.westernsydney.edu.au/search/name/Katherine%20Raw/))

Description This unit provides an introduction to the concept of Sport for Development. Students will explore the role sports and physical recreation can play in achieving positive social outcomes in communities, both locally and internationally. Students will learn about the multidisciplinary nature of Sport for Development and how the disciplines of health and sports science, sports management and community development come together in the planning, implementation and evaluation of sports and physical recreation projects.

School Health Sciences

Discipline Sport And Recreation

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Assumed Knowledge

A basic understanding of the sports industry, and an appreciation of the diverse communities that exist locally and internationally.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the multidisciplinary nature of Sport for Development.
2. Examine and discuss the roles sport and physical recreation play in contemporary society.
3. Evaluate the impact of sporting programs as an agent for change to generate positive social outcomes in communities.
4. Compare and contrast the different organisations operating in the Sport for Development field, both locally and internationally.
5. Critically evaluate real-world Sport for Development programs, both locally and internationally.

Subject Content

1. The role of sport in contemporary society
2. Sport as a catalyst for change; the social, health and educational outcomes sought through sport for development
3. The importance of an evidence based approach; planning, implementation and evaluation of sport for development programs
4. Understanding sport for development stakeholders and industry structure
5. Sport for development in an Australian context, including understanding the diverse role sport plays in community wellbeing, and the role of sport in terms of health and social engagement for the Australian community, including indigenous and immigrant communities
6. International sport for development, referring to developing countries and the mechanism by which sport can be used to support community development and improved quality of life

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Presentation	20 minutes	20	N	Group
Case Study	1,500 words	40	N	Individual
Final Exam	2 hours	40	N	Individual

Prescribed Texts

SPRT 2002 Exercise Testing and Measurement

Credit Points 10

Legacy Code 401150

Coordinator Dean Norris ([https://directory.westernsydney.edu.au/search/name/Dean Norris/](https://directory.westernsydney.edu.au/search/name/Dean%20Norris/))

School Health Sciences

Discipline Sport and Recreation Activities

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Co-requisite(s) SPRT 1001

Restrictions Students must be enrolled in 4658 - Bachelor of Health Science (Sport and Exercise Science).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify or apply the correct test based on demographics, risk assessment, and health guidelines
2. Apply measurement accuracy concepts to exercise testing and measurement
3. Evaluate the feasibility of different tests according to environmental conditions and client characteristics
4. Demonstrate basic data processing and analytical techniques
5. Visualise data with consideration for measurement accuracy
6. Appropriately interpret results with respect to established normative data and measurement considerations
7. Communicate test results and their implications to hypothetical client scenarios

Subject Content

- Concepts of validity, reliability and testing procedures
- Introduction to performance analysis and monitoring
- Pre-testing criteria considerations and influence on test outcomes

- Test administration, professional conduct, ethical behaviour and procedures during testing
- Practical considerations and application of scientific rationale to inform test selection
- Visualisation, analysis and reporting of data
- Evaluation and interpretation of data
- Introduction to a range of physical and physiological assessments with the ESSA scope of practice

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement. Students must also have submitted a Working with Children Check Student Declaration. Students must hold a valid and current First Aid Certificate from a Registered Training Organisation. Refer to the Special Requirements website for more information.

Special requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Final Exam	2 hours	50	Y	Individual
Case Study	1-page structured, analytical account of load monitoring exercise and notational analysis exercise; and a 2 minute explanation (given to tutor as you would to a coach or client) of each account.	20	N	Individual

Literature Review	1,500 words inclusive of: a) an overview of the load monitoring literature; and b) a detailed literature review on the load monitoring too of your choice.	30	N	Individual

SPRT 2007 PDHPE: Games for Diverse Groups

Credit Points 10

Legacy Code 400798

Coordinator Andrew Bennie ([https://directory.westernsydney.edu.au/search/name/Andrew Bennie/](https://directory.westernsydney.edu.au/search/name/Andrew%20Bennie/))

Description This unit focuses on teaching and coaching young children in a range of Indigenous, striking/fielding, and target sports. The aim is to build on students' knowledge and application of various teaching / coaching styles with a focus on the game sense approach. In particular, the unit addresses issues of diversity and inclusion in school, sport, and recreation activities. As part of the unit, students will implement a teaching program in a local primary school and complete introductory coaching certificates in a variety of sports.

School Health Sciences

Discipline Sport and Recreation Activities

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Restrictions

Students must be enrolled in 4659 - Bachelor of Health Science (Health and Physical Education), 4741 - Bachelor of Sport Development, 4742 - Bachelor of Health Science (Health and Physical Education) Pathway to Teaching, 4747 - Bachelor of Health Science (Health and Physical Education) or 6001 Diploma in Health Science/Bachelor of Health Science (Health and Physical Education)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate competency in inclusive teaching practices
2. Apply skill learning phases for diverse groups and demonstrate how these can be enhanced through traditional teaching practices and a games sense approach
3. Design, implement and evaluate teaching programs in a local school for a range of traditional Indigenous, striking and target games
4. Analyse the sociocultural factors that influence teaching, learning and participation in PE

Subject Content

1. Theory that underpins the principles of traditional teaching practices and the game sense approach
2. Inclusive teaching for students with a range of abilities and from diverse backgrounds
3. Planning PE/sport sessions for primary school contexts
4. Sociocultural factors that influence teaching, learning and participation in physical education and sport
5. Indigenous education and participation in sport

Special Requirements

Legislative pre-requisites

Special requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/) relate to enrolment into some Subjects, usually those with placements or external activities (e.g., visiting schools). Both Games for Diverse Groups AND Coaching Sport and Rec have the following three special requirements.

Working With Children Check - Apply for your WWCC here (<https://www.service.nsw.gov.au/transaction/apply-working-children-check/>).

Upload your WWCC here. (https://wsu.service-now.com/student?id=wsu_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed&sysparm_categ)

Child Protection Course - Students must complete the TWO components of the NSW Department of Education's Child Protection Awareness Training (CPAT) on the NSW Department of Education's MyPL website <https://mypl.education.nsw.gov.au/> (<https://mypl.education.nsw.gov.au/auth/login/?returnUrl=%2F>) The CPAT: Annual Update will need to be renewed and submitted on an annual basis. Further info can be found on vUWS. Upload your certificate here. (https://wsu.service-now.com/student?id=wsu_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed&sysparm_categ)

Covid-19 Vaccination - Upload your vaccination certificate through Western Now. (https://wsu.service-now.com/student?id=sc_cat_item&sys_id=b761759d1b5bd050c13a0edddc4bcbe3)

Prior to enrolling in this unit, students must have submitted a Working with Children Check Student Declaration and have completed a Child Protection Course and met Covid-19 Vaccination Requirements. Students will be required to meet the following Public Health Order to be able to attend placements in Schools.

The Public Health (COVID-19 Vaccination of Education and Care Workers): Order dated 23 September states that:

- all education and care workers must not carry out relevant work on or after 8 November 2021 unless the worker has – Had 2 doses of a COVID-19 vaccine, or
- Been issued with a medical contraindication certificate (there is a specific certificate issued by a medical practitioner – a normal Doctor's Certificate will not be accepted)

Use the link to the Special Requirements webpage below for more information.

https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Applied Project: Lesson Planning for School Teaching Sessions [Individual (30%) Group (10%)]		40	N	Individual

SPRT 2009 Professional Development and Work Experience

Credit Points 10

Legacy Code 400903

Coordinator Chloe Taylor (<https://directory.westernsydney.edu.au/search/name/Chloe+Taylor/>)

Description Experience in the field of study is an essential ingredient in marketing an individual for employment and often for professional memberships. Professional Practice provides students with an opportunity to observe and assist Sport & Exercise Science practitioners in action and to learn in a practical hands on setting. Students will have the opportunity to see how knowledge and skills acquired in lectures and tutorials/laboratories can be applied and also relate theoretical concepts and skills to situations in exercise-related settings. This unit is the first of two units which require a work placement which is usually off campus.

School Health Sciences

Discipline Human Movement

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) SPRT 1001

Co-requisite(s) HLTH 2006

Equivalent Subjects SPRT 2010 - Professional Practice in Sport Exercise Science 2

Restrictions Students must be enrolled in 4658 Bachelor of Health Science (Sport and Exercise Science).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Provide evidence of personal and professional development through observation, experimentation and practice, under the supervision of an experienced practitioner.
2. Deliver exercise related services effectively and safely in compliance with OH&S, standard operating procedures, and the Exercise and Sport Science Australia (ESSA) code of professional conduct and ethical practice.
3. Maintain confidential client records of health status, fitness tests, exercise programming, and valid informed consent.
4. Communicate effectively in written, oral and nonverbal forms.
5. Understand and critically evaluate the structure and function of a sport or exercise related industry.
6. Establish additional personal contacts in the exercise industry.

Subject Content

- Establish contacts within A sport/Exercise - related industry
- preparation of A learning Contract through Negotiation with An agency supervisor
- 60 hours placement within the industry of sport and exercise science at an approved agency under the guidance of an approved supervisor

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement. Students must also hold a valid and current First Aid Certificate from a Registered Training Organisation. Refer to the Special Requirements website for more information.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Log/ Workbook: ESSA logbook to document hours of professional practice	60 hours	S/U	Y	Individual

Contract and Evaluation booklet	14 pages	S/U	Y	Individual
Agency Profile and evaluation	3-4 pages	S/U	Y	Individual
Letter of thanks to supervisor	1 page	S/U	Y	Individual

Prescribed Texts

- There are no textbooks assigned to this subject because the theoretical content is delivered in the co-requisite subject, Exercise Prescription for General Populations (400326).

Teaching Periods

SPRT 2011 Sustainability, Tourism and Place

Credit Points 10

Legacy Code 102386

Coordinator Julie Wen ([https://directory.westernsydney.edu.au/search/name/Julie Wen/](https://directory.westernsydney.edu.au/search/name/Julie%20Wen/))

Description Sustainability, Tourism and Place provides students with a fundamental understanding of the current debates in tourism management and sustainable places. The complex relationship and interaction among diverse stakeholders involved in places and tourism are explored. The unit encourages a systems approach, and focuses on traveller origin places, tourist experience and community development. The unit aims to assist students in the analysis of the role of tourism in sustainable places by applying a wide range of case studies.

School Social Sciences

Discipline Society and Culture, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects SPRT 2006 - Outdoor Recreation and Leisure

Assumed Knowledge

Successful completion of 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appraise the scope and complex interactions in places with tourism development;
2. Assess relationships between tourism and places in terms of the social, economic, and environmental vitality;
3. Apply theories to critique destination marketing and the sustainability of places;
4. Evaluate the contribution of tourism to healthy and sustainable places.

Subject Content

1. Key concepts and theory in sustainability, tourism and places
2. Structure, roles and systems in places of tourism
3. Relationship of tourism to place: social, cultural, economic, and environmental impacts and sustainability

4. Contemporary issues in tourism practice and sustainability: recreation and leisure, healthy places, construction of places, the role of nature in tourism, virtual tourism, urban, rural, marine and other emerging types of tourism
5. Destination marketing and sustainable places.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

SPRT 2012 Community Sport Development

Credit Points 10

Legacy Code 401283

Coordinator Katherine Raw ([https://directory.westernsydney.edu.au/search/name/Katherine Raw/](https://directory.westernsydney.edu.au/search/name/Katherine%20Raw/))

Description The unit develops students' knowledge and understanding of the concept of community sports development and its role in addressing key issues of social inclusion, diversity, and health promotion. Students explore local and national Australian policies and initiatives, with a focus on monitoring and evaluating and exploring evidence around the social impact of sport. The module facilitates students' knowledge and understanding of community needs within the context of sport and active recreation. Further, students will propose innovative sport development initiatives and programs where students will design and implement a localised sport development initiative in partnership with a local sport organisation.

School Health Sciences

Discipline Sport And Recreation

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) SPRT 1008

Assumed Knowledge

A basic understanding of the sports industry, and an appreciation of the diverse communities that exist locally and internationally.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine local and national Australian community sports development policies and initiatives
2. Apply a critical awareness of community sports development practice and the role of community sports development in addressing a wider social agenda
3. Employ sociological ideas and key concepts to explain relationships between social, economic and cultural factors, and sporting opportunities
4. Develop a community grant proposal for a community sports development project, and deliver a community sports development project in partnership with a local sport organisation/ government organisation.
5. Critically explore the concept of monitoring and evaluation in community sport development, and evaluate their own community sport development project.

Subject Content

- The social impact of sport in contemporary society with A focus on localised communities
- Monitoring and evaluation of community sport and sport development initiatives.
- The importance of an evidence based approach; planning, implementation and evaluation of sport for development programs.
- how to design and implement A community sport development Project, in line with current funding streams in local government and national sport objectives.
- exploring The social impact of sport and localised sport development Initiatives, within The context of current national objectives around diversity, social inclusion, safeguarding and integrity in sport.

Assessment

SPRT 3001 Applied Exercise Science for Personal Trainers and Coaches

Credit Points 10

Legacy Code 401056

Coordinator Sarah Kennedy ([https://directory.westernsydney.edu.au/search/name/Sarah Kennedy/](https://directory.westernsydney.edu.au/search/name/Sarah%20Kennedy/))

Description Students will learn the functional anatomy, exercise physiology, physical fitness, motor development and exercise training content required to function as competent personal trainers and/or sports coaches. Students will also administer and undertake laboratory exercises designed to test and administer fitness programs for healthy individuals

School Health Sciences

Discipline Sport and Recreation Activities

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) BIOS 1022 AND SPRT 1001

Equivalent Subjects LGYA 7759 - Personal Training and Coaching

Restrictions Students must be enrolled in 4659 Bachelor of Health Science (PDHPE), 4742 - Bachelor of Health Science (HPE) - Pathway to Teaching (Secondary), 4747 - Bachelor of Health Science (HPE) or 6001 Diploma in Health Science/Bachelor of Health Science (Health and Physical Education).

Assumed Knowledge

An understanding of human biology and fundamental principles in exercise science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe cardiorespiratory, neuromuscular, anaerobic and aerobic energy systems and analyse their application to fitness and performance
2. Conduct exercise consultations, select suitable exercise tests and administer them to assess various components of physical fitness and performance
3. Develop exercise programs for healthy individuals to achieve desired performance and/or fitness gains
4. Use and justify an evidence-based approach to personal training and coaching practices
5. Compare and contrast key physiological differences between trained and untrained individuals
6. Analyse the use of ergogenic aids in sport and exercise

Subject Content

1. Neural control of muscle contraction
2. Muscle physiology and contraction
3. Aerobic and anaerobic energy systems
4. Cardiorespiratory physiology
5. Pre-exercise screening and consultation
6. Exercise testing for healthy clients
7. Exercise prescription (cardiorespiratory, resistance training, flexibility)
8. Personal experience of exercise testing and training

9. Physiological differences between trained and untrained individuals
10. Ergogenic aids in sport and exercise

Assessment

SPRT 3002 Aquatic Sports

Credit Points 10

Legacy Code 400895

Coordinator Emma George ([https://directory.westernsydney.edu.au/search/name/Emma George/](https://directory.westernsydney.edu.au/search/name/Emma%20George/))

Description From 2016, this unit is replaced by 400866 - Motor Control and Skill. Students will actively engage in a variety of aquatic activities including rowing, canoeing, kayaking, diving, water polo and swimming. Through participation in practical tutorials, students will develop their ability to teach and coach each of the aforementioned aquatic activities in a school or community recreation setting. Students will also train in swimming to improve stroke mechanics and fitness. This will form part of the Bronze Medallion Lifesaving certification, which involves developing competencies in resuscitation, four strokes of swimming, personal survival and rescue skills.

School Health Sciences

Discipline Sport and Recreation Activities

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Students must be enrolled in 4659 Bachelor of Health Science (PDHPE).

Learning Outcomes

On successful completion of this subject, students should be able to:

- Articulate, compare and contrast the skills, tactics and techniques involved in swimming, diving, canoeing, kayaking, water polo and rowing performance.
- Demonstrate swimming and lifesaving skills to pass the Bronze Medallion Lifesaving certification.
- Identify and apply teaching techniques and safety principles to a range of aquatic activities.
- Develop a program for the implementation of aquatic sports in a school and/or community recreation setting.

Subject Content

1. Students will explore fundamental concepts in exercise science as they apply to performance in, and the teaching/coaching of the following aquatic sports:

- Rowing
 - canoeing/kayaking
 - Diving
 - water Polo
 - Swimming (4 strokes, as part of Bronze Medallion)
2. Through participation in these aquatic sports, students will develop an in-depth understanding of the key teaching/coaching techniques that underpin these aquatic activities in order to plan high-quality learning experiences.

Special Requirements

Legislative pre-requisites

Students must comply with the following special requirements: possess a current WorkCover Authority approved First Aid Certificate.

Teaching Periods

SPRT 3003 Coaching Sport and Recreation Activities

Credit Points 10

Legacy Code 401169

Coordinator Andrew Bennie ([https://directory.westernsydney.edu.au/search/name/Andrew Bennie/](https://directory.westernsydney.edu.au/search/name/Andrew%20Bennie/))

Description Coaching Sport and Recreation Activities offers students with a learning experience based on the principles of physical education and sports coaching in variety of sports and recreational activities. This unit builds upon physical activity instruction and teaching games for understanding (game sense) introduced in earlier units. You will have the opportunity to plan, implement, and reflect on your own teaching practice during tutorials and within community sport contexts. You will learn to see things from multiple perspectives based on content delivered by university staff, peers, and external sport organisations. The unit incorporates experience in meaningful situations that will help prepare you for work in a dynamic field of education. This unit includes approximately 35 hours of work integrated learning.

School Health Sciences

Discipline Sport and Recreation Activities

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) SPRT 2007

Equivalent Subjects SPRT 3007 - Ethical Issues in Sport and Athletics
SPRT 3010 - Recreational Sports LGYA 0701 - Human Movement 6

Restrictions

Students must be enrolled in 4659 Bachelor of Health Science (PDHPE), 4742 Bachelor of Health Science (Health and Physical Education)- Pathway to Teaching (Secondary), 4747 Bachelor of Health Science (Health and Physical Education) or 6001 Diploma in Health Science/ Bachelor of Health Science (Health and Physical Education)

Assumed Knowledge

Completion of two introductory coaching certificates.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine various principles of effective coaching, teaching and leadership within sport and recreation settings.
2. Assess the experiences and needs of individuals, groups and communities within a range of different physical activity, sport and recreation contexts.
3. Design and implement practical activities to suit the experiences and needs of individuals, groups and communities within a range of physical activity, sport and recreation contexts.
4. Evaluate the successes and challenges of teaching activities using self-reflection and feedback to identify improvements and action plans for future learning opportunities.
5. Demonstrate teaching and coaching proficiency in various theoretical and practical contexts.

Subject Content

1. planning, implementing and evaluating teaching sessions in university, school, and community contexts
2. employing reflective practice as a learning process to inform effective design and delivery of sport and recreation activities
3. principles for gaining a sport coaching accreditation

Special Requirements

Legislative pre-requisites

Special requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/) relate to enrolment into some Subjects, usually those with placements or external activities (e.g., visiting schools). Both Games for Diverse Groups AND Coaching Sport and Rec have the following three special requirements.

Working With Children Check - Apply for your WWCC here (<https://www.service.nsw.gov.au/transaction/apply-working-children-check/>). Upload your WWCC here. (https://wsu.service-now.com/student/?id=wsu_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed&sysparm_category=f6444114d1be29c504f58e4340596193e)

Child Protection Course - Students must complete the TWO components of the NSW Department of Education's Child Protection Awareness Training (CPAT) on the NSW Department of Education's MyPL website <https://mypl.education.nsw.gov.au/> (<https://mypl.education.nsw.gov.au/auth/login/?returnUrl=%2F>) The CPAT: Annual Update will need to be renewed and submitted on an annual basis. Further info can be found on vUWS. Upload

your certificate here. (https://wsu.service-now.com/student/?id=wsu_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed&sysparm_category=f6444114d1be29c504f58e4340596193e)

Covid-19 Vaccination - Upload your vaccination certificate through Western Now. (https://wsu.service-now.com/student/?id=sc_cat_item&sys_id=b761759d1b5bd050c13a0edddc4bcbe3)

Prior to enrolling in this subject, students must have submitted a Working with Children Check and have completed a Child Protection Workshop and met Covid-19 Vaccination Requirements.

Students will be required to meet the following Public Health Order to be able to attend placements in Schools.

The Public Health (COVID-19 Vaccination of Education and Care Workers): Order dated 23 September states that:

- all education and care workers must not carry out relevant work on or after 8 November 2021 unless the worker has – Had 2 doses of a COVID-19 vaccine, or
- Been issued with a medical contraindication certificate (there is a specific certificate issued by a medical practitioner – a normal Doctor's Certificate will not be accepted)

Use the link to the Special Requirements webpage below for more information.

Special requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Applied Project	3 x 50 minute lesson plans	30	N	Both (Individual & Group)
Reflection	1x1500 words / 10 - 15 minute video (interchangeable)	40	N	Individual
Reflection	Up to 300 words and / or quiz submission	30	N	Individual
Professional Placement Performance	Approximately 35 hours	0	Y	Individual

SPRT 3005 Contemporary Youth Health Issues

Credit Points 10

Legacy Code 400894

Coordinator Nicki Taylor ([https://directory.westernsydney.edu.au/search/name/Nicki Taylor/](https://directory.westernsydney.edu.au/search/name/Nicki%20Taylor/))

Description The unit explores contemporary health issues related to young people. Students will examine a range of topics from a multidisciplinary approach, which include the social, cultural, political and biological factors that influence and construct young people's lives and health. Students will explore pathogenic and salutogenic approaches to understanding and promoting young people's health. When considering and analysing the influences and contexts, students will be able to gather resources and develop diverse meaningful strategies that will assist young people to promote health practices.

School Health Sciences

Discipline Sport and Recreation, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Incompatible Subjects HUMN 3072 - Sexuality SPRT 3006 - Introduction to Drug Use in Society

Restrictions

Students must be enrolled in 4659 Bachelor of Health Science (PDHPE), 4549 Bachelor of Health Science (PDHPE), 4741 Bachelor of Sport Development, 4742 Bachelor of Health Science (Health and Physical Education)-Pathway to Teaching (Secondary), 4747 Bachelor of Health Science (Health and Physical Education), 6001 Diploma in Health Science/Bachelor of Health Science (Health and Physical Education)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the health conditions of young people in terms of current trends and targeted populations in Australia.
2. Develop an understanding of the ways social and cultural contexts impact on the lives of young people.
3. Analyse a range of influences that impact young people's lives and health.
4. Critically explore matters such as inclusiveness, differences, social class, gender, sexuality and ethnicity in relation to young people's health practices.
5. Identify skills and resources that enable young people to promote health.
6. Develop a research report that explores young people's health.

Subject Content

1. Population characteristics and trends in young people's health
2. Social and cultural influences in young people's health
3. Young people's health and their bodies
4. Young people's health, sport and physical activity from diverse groups
5. Young people's gender, sexuality and sexual health
6. Young people's health and technology
7. Young people's substance, tobacco and alcohol use
8. Young people's risk taking behaviours and health

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	10 minutes	25	N	Individual
Presentation	15 minutes	30	N	Group

SPRT 3008 Exercise Physiology Across the Lifespan

Credit Points 10

Legacy Code 401149

Coordinator Chloe Taylor ([https://directory.westernsydney.edu.au/search/name/Chloe Taylor/](https://directory.westernsydney.edu.au/search/name/Chloe%20Taylor/))

Description This unit is focused on physiological changes across the human lifespan and their effects on exercise tolerance. There is a particular focus on structural, physiological and motor development changes across the lifespan with emphasis on the control of neuromuscular, cardiovascular, respiratory and thermoregulatory function. Exercise and physiological adaptation to exercise training at different ages will be covered, alongside contraindicated exercises and common injuries/conditions that are present during certain stages of growth and development.

School Health Sciences

Discipline Human Movement

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) BIOS 2012

Restrictions Students must be enrolled in 4658 Bachelor of Health Science (Sport and Exercise Science).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Distinguish the stages of growth and development across the lifespan, from conception through to death (including pregnancy in women).
2. Justify why certain exercises are contraindicated for particular stages of growth and development across the lifespan, and why certain injuries and conditions are commonly present during certain stages of growth and development. Describe the structural,

physiological and motor development changes across the lifespan and the effect of exercise on such changes.

3. Articulate the structural, physiological and motor development changes across the lifespan and the effect of exercise on such changes.
4. Analyse and evaluate the literature and guidelines on growth and development as they relate to exercise.
5. Use an integrated understanding of physiology to explain how gender and ageing influence movement and functional capability.
6. Accurately contrast and interpret physiological data collected from individuals who differ in age, size and gender.
7. Accurately distinguish between normal and abnormal levels of exercise tolerance for children, adults and the elderly.
8. Integrate knowledge of and skills in growth and development with other areas of exercise science.

Subject Content

1. Problems of normality, scale, and gender.
2. Theories of growth and development
3. Structural, physiological and motor development changes throughout the lifespan
4. Common injuries and contraindicated exercises for various stages of growth and development
5. Genetics, training and adaptability of exercise tolerance and physiology at different ages
6. Integrated problems.

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and have a National Police Check, which is required to be submitted before placement. Students must also have submitted a Working with Children Check Student Declaration. Students must hold a valid and current First Aid Certificate from a Registered Training Organisation. Refer to the Special Requirements website for more information.

Restrictions Students must be enrolled in the Bachelor of Sport Development (4741)

Assumed Knowledge

An developed level of knowledge in Sport Development.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Integrate academic theory into real world applications in a professional setting.
2. Apply acquired academic knowledge and skills to the development of strategies to achieve set goals.
3. Collect and critically analyse data to evaluate sport and recreational activities.
4. Critically reflect and formulate recommendations related to the development of sport and recreation.
5. Communicate effectively in oral and written formats, and utilise technologies to enhance communications.

Subject Content

1. Work Placement: Students will continue the industry placements, which commenced with the Sport Development Internship.
2. During their placements students will apply their acquired knowledge and skills into real-world application in an engaged research project in sport development at their host organizations.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

SPRT 3017 Work Experience in Sport and Exercise Science

Credit Points 10

Legacy Code 400904

Coordinator Chloe Taylor ([https://directory.westernsydney.edu.au/search/name/Chloe Taylor/](https://directory.westernsydney.edu.au/search/name/Chloe%20Taylor/))

Description Experience in the field of study is an essential ingredient in marketing an individual for employment and often for professional memberships. Work Experience in Sport and Exercise Science provides students with an opportunity to observe and assist Sport & Exercise Science practitioners in action and to learn in a practical setting. Students will have the opportunity to see how knowledge and skills acquired in lectures and tutorials/laboratories can be applied and also relate theoretical concepts and skills to situations in exercise-related settings. This unit is the second of two units that require a work placement which is usually off campus.

School Health Sciences

Discipline Human Movement

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) Students in course versions 46581 46582 and 46583 must successfully complete three pre-requisite units - BIOS 2037 Sport and Exercise Physiology REHA 3012 Exercise in Musculo-Skeletal Rehabilitation and SPRT 2009 Professional Development and Work Experience Students in course version 46584 must successfully complete two prerequisite units - BIOS 2012 Exercise Physiology and HLTH 2005 Exercise Prescription 1

Equivalent Subjects SPRT 3015 - Sport and Exercise Science in Practice

Restrictions Students must be enrolled in 4658 Bachelor of Health Science (Sport and Exercise Science).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Provide evidence of personal and professional development through observation, experimentation and practice, under the supervision of an experienced practitioner.
2. Deliver exercise related services effectively and safely in compliance with OH&S, standard operating procedures, and the

Exercise and Sport Science Australia (ESSA) code of professional conduct and ethical practice.

- Maintain confidential client records of health status, fitness tests, exercise programming, and valid informed consent.
- Communicate effectively in written, oral and nonverbal forms.
- Understand and critically evaluate the structure and function of a sport or exercise related industry.
- Establish additional personal contacts in the exercise industry.

Subject Content

- Establish contacts within a sport/exercise - related industry
- Preparation of a learning contract through negotiation with an agency supervisor
- Course 4658 (versions 1, 2 and 3): 80 hours placement within the industry of sport and exercise science at an approved agency under the guidance of an approved supervisor
- Course 4658 (version 4): 140 hours placement within the industry of sport and exercise science at an approved agency under the guidance of an approved supervisor

Coordinator Joanne Orlando ([https://directory.westernsydney.edu.au/search/name/Joanne Orlando/](https://directory.westernsydney.edu.au/search/name/Joanne%20Orlando/))

Description This subject will develop students' understanding of young children's digital engagement and how to build on their technology experiences to develop quality learning in early childhood settings. Vital to this process is an understanding of how young children use technology and the implications of their digital engagement for their play, learning and development. Students will critically explore various aspects of children's digital engagement including the various ways young children use technology, the factors that contribute to their use, and the learning that occurs through their device play. Strategies for building on children's digital worlds in the curriculum will also be critically reviewed. In this subject students will explore technology-based learning experiences for children in early childhood contexts.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in 1879 Bachelor of Education (Birth – 5 Years).

Learning Outcomes

1. Engage with media and research literature regarding children's digital worlds.
2. Explain children's uses of technology from a child's perspective, and from an adults' perspective.
3. Identify the factors that influence how a child uses technology at home, in social spaces and in educational settings.
4. Identify key aspects of children's technology use that supports learning.
5. Describe strategies for developing curriculum using technology to support learning in early childhood.

Subject Content

1. How young children use technology
2. Debates surrounding young children's technology use
3. Using literature to identify and analyse the factors that influence young children's uses of technology
4. Safe uses of technology for young children
5. Technology use that supports learning in early childhood
6. The role of the educator in facilitating children's use of technology for learning
7. Critical teaching and learning strategies to support children's learning using technology

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	20 questions	20	N	Individual
Critical Review	650 words	40	N	Individual
Report	1,500 words	40	N	Individual

Coordinator Katina Zammit ([https://directory.westernsydney.edu.au/search/name/Katina Zammit/](https://directory.westernsydney.edu.au/search/name/Katina%20Zammit/))

Description This unit introduces key concepts in literature for children and young adults, examining theory and research related to literature; the diversity of literature and multi-literate environments; and the impact of social and cultural influences on literature. Through reading a wide range of literature, including literary classics, popular texts, graphic novels, picture books, in paper-based and electronic forms, students will identify the interrelationships between image and writing and ideological assumptions conveyed through these texts. It will focus on Australian literature, Aboriginal and Torres Strait Islander literature, Asian literature and bilingual texts.

Legacy Code 102664

Coordinator Denise Fraser ([https://directory.westernsydney.edu.au/search/name/Denise Fraser/](https://directory.westernsydney.edu.au/search/name/Denise%20Fraser/))

Description This subject will engage students in developing a critical appreciation for the role of the arts in their own right, in society and in the early years. They will develop appreciation for the relevance of the arts in children's play and identity formation, and as meaning making and communication tools. Opportunities for creative thinking and creative expression will be explored first hand through introductory experiences and theory in the areas of drama, music, visual arts, dance and media arts. Students will consider how integration of art pedagogies can support rich and meaningful learning experiences, complex problem solving and meaning making in the early years.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in 1879 Bachelor of Education (Birth – 5 Years).

Learning Outcomes

1. Identify the physical, social, creative and intellectual capabilities of birth to 5 year olds as they relate to the role the creative arts play in learning and development.
2. Develop practical skills and knowledge through introductory experience and theory in drama, music, visual arts, dance and media arts.
3. Discuss the role of the creative arts as meaning making tools in individual, family, social and cultural contexts.
4. Develop an appreciation for the relevance of the arts in children's play and identity formation.
5. Explore pedagogies and resources that encourage divergent thinking, creative expression and meaning making and that assist children to communicate their ideas.
6. Identify a personal philosophy about the role of the arts in society.

Subject Content

1. Theories and structural elements of the main art forms
2. Exploration of practices in the creative art areas including drama, music, visual arts, dance and media arts
3. Resources and materials that are used in art making and creative expression
4. The arts as a vehicle for self-expression, problem solving and critical reflection
5. Meaning making, and the way in which the arts contribute to identity formation in children and support creative communication in socially and culturally diverse contexts
6. The physical, social, creative and intellectual capabilities of birth to 5 year olds as they relate to learning and development in the creative arts
7. Reflection on personal arts related experiences and understandings of theory to develop a personal philosophy about the role of the arts in society

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Summary	1,000 words	30	N	Individual
Annotated Bibliography	150 words x 6	30	N	Individual
Portfolio	Artefacts (reflecting 5 hrs engagement in three art forms) and written summaries (300 words each for each of three art forms)	40	N	Individual

Teaching Periods

TEAC 1008 Curriculum and Aboriginal Perspectives

Credit Points 10

Legacy Code 102115

Coordinator Dianne Burrell (<https://directory.westernsydney.edu.au/search/name/Dianne+Burrell/>)

Description The unit is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This unit is designed to introduce students to the characteristics of classrooms and curriculum implementation. Students will explore the structure of New South Wales/National curricula in all key learning areas, examine the perspectives which influence curriculum and the way in which curriculum is interpreted using Aboriginal and Torres Strait Islander perspectives. The unit provides an understanding of the importance of the art forms and Aboriginal ways of knowing as powerful teaching and learning strategies across the primary curriculum and as creative arts in their own right.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects EDUC 2001 - Creative Arts 1 - AREP

Restrictions

Students must be enrolled in 1598 - Bachelor of Education (Primary) - AREP mode or 1717 - Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the concept of Aboriginal and Torres Strait Islander ways of knowing
2. Describe the characteristics and elements of classrooms, teaching, learning and curriculum.
3. Identify and plan for Aboriginal perspectives in Primary curricula.
4. Create a short creative resource, presentation or performance, using Aboriginal and Torres Strait Islander perspectives, in at least one curriculum area.
5. Utilise performance and communication mediums in planning teaching and learning.
6. Explain the importance of the inclusion of Aboriginal perspectives across the curriculum for primary students of learning and development.

Subject Content

1. Introduction to regulations, statues and policies related to teacher's responsibilities and working with children
2. Overview of Primary (K-6) Curricula identifying where Aboriginal content may explicitly exist or could be developed to include Aboriginal ways of knowing.
3. Planning, implementing and evaluating effective learning experiences for students in different curricula context

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Professional Task	1,200 words	50	N	Individual

TEAC 1010 Early Primary Mathematics

Credit Points 10

Legacy Code 102119

Coordinator John Ley ([https://directory.westernsydney.edu.au/search/name/John Ley/](https://directory.westernsydney.edu.au/search/name/John+Ley/))

Description The unit is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This unit is designed to extend the development of mathematical concepts, skills and understandings for children from Kindergarten to Year 3 based on the NSW Syllabus for the Australian curriculum Mathematics K-6. An awareness of relevant research and curriculum documents, combined with the practical knowledge of teaching, learning and assessment strategies, will assist teachers to design and implement a series of experiences that will enhance the conceptual knowledge of their students.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects EDUC 1002 - Early Primary Maths (AREP)

Restrictions Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the central concepts, modes of enquiry and structure of Mathematics.
2. Apply the five interrelated processes of questioning, applying strategies, communicating, reasoning and reflecting up to Stage 2.
3. Describe the three content strands of Number and Algebra, Measurement and Geometry, Statistics and Probability, as well as working mathematically up to Stage 2.
4. Apply concepts of assessment and children's learning within the Primary Mathematics curriculum.
5. Utilise a variety of teaching, behavioural and organisational management strategies to cater for the range of diverse learners in Mathematics K-6.
6. Utilise an array of resources designed to meet the needs of diverse K-6 students.
7. Identify Aboriginal and Torres Strait Islander perspectives embedded in the Australian Mathematics curriculum.
8. Design a sequence of two lessons using developing knowledge of the Australian Mathematics curriculum for Primary- aged children.

Subject Content

1. Nature and role of mathematics in describing and modelling patterns and relationships that can be generalised, and as a means of interpreting the world
2. Familiarity with the NSW syllabus for the Australian curriculum: Mathematics K-6 programming and assessment, such as Count Me In Too
3. Role of concrete materials
4. Working Mathematically through Communicating, Problem Solving, Reasoning, Understanding and Fluency
5. Importance of Language for communicating (Newman's Analysis)
6. Counting strategies in preschool and Kindergarten
7. Place value through grouping in the Hindu-Arabic numeration system
8. Number and Algebra - the four operations, fractions and decimals, patterns
9. Play, games, investigation, problem solving, stories in Mathematics
10. Early measurement and using units (formal and informal) for length, area, volume and capacity, mass and time, and comparing, ordering and estimating size
11. Early geometry - 2 and 3 D shapes, manipulating shapes, part/whole relationships, tessellations, transformations, location
12. Statistics: working with data, including planning, gathering, organising, applying data to solve problems and communicating results through the selection of appropriate representations.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 1011 Educational Psychology

Credit Points 10

Legacy Code 102636

Coordinator Erin Mackenzie ([https://directory.westernsydney.edu.au/search/name/Erin Mackenzie/](https://directory.westernsydney.edu.au/search/name/Erin%20Mackenzie/))

Description This unit is designed to facilitate students to develop the dispositions and critical skills to create learning communities that are academically challenging, developmentally appropriate and culturally responsive. The unit highlights how the inherent qualities of a child and their environmental systems interact to influence how they grow, develop and learn. It develops students' knowledge of the ways in which children's development is embedded in context to inform their instructional strategies. It examines a body of classic and current theories, research and practice relating to the cognitive, physiological, and social/emotional needs of children and the relevance of these for classroom practice. Particular emphasis is given to developing responsive teaching practices which promote social and emotional wellbeing of children and are underpinned by high-quality relationships which extend to include the valuing of families and the wider community.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in the Bachelor of Education (Primary).

Learning Outcomes

- Apply an understanding of issues relating to children's physical, cognitive, emotional, moral and social development.
- Analyse the major factors that influence students' motivation and engagement.

- Assess instructional strategies designed to support students' learning and development.
- Explain how children's development is influenced by ecological systems.
- Develop an action plan underpinned by relevant theory and research to address the wellbeing and development needs of a child experiencing difficulties at school.
- Present effectively, using oral and written forms.

Subject Content

- Development in context: Bronfenbrenner's bioecological systems theory
- Children's development in context:
 - cognitive development and information processing theories
 - physical development
 - social, emotional, and moral development
- Learning in context: Theories of learning and their implications for teaching:
 - Behaviourism
 - cognitive Explanations of learning
 - Humanism
- Building a positive learning environment:
 - motivation and engagement
 - wellbeing and resilience
 - Cybersafety

TEAC 1012 English as an International Language

Credit Points 10

Legacy Code 102438

Coordinator David McInnes ([https://directory.westernsydney.edu.au/search/name/David McInnes/](https://directory.westernsydney.edu.au/search/name/David%20McInnes/))

Description English is the first Global Language and the most important international Lingua Franca today. The teaching of English as a second or foreign language is a huge industry internationally, and a driver of export dollars in the Australian economy. The teaching of English as an International Language (EIL) is a new area of study and it is indispensable for any student seeking to gain a competitive edge in an international career. This unit is a key introductory unit in the International English Major. It is designed to equip graduates with marketable skills across multiple areas, including International Relations, Marketing and Business, Interpreting and Translation, and TESOL.

School Humanities & Comm Arts

Discipline English as a Second Language Teaching

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss, in linguistic, cultural and historical terms, the essentials of an international language.
2. Identify and explain how Englishes differ across the globe.
3. Analyse the ways in which people use English to express notions of identity, culture and pragmatic meaning.
4. Identify the different aspects of miscommunication across Englishes.

Subject Content

The origins, history and spread of the English language
Linguistic concepts as applied to an International Lingua Franca
Semantic and Pragmatic differences and commonalities
Cultural norms and adaptation
Implications of World Englishes: ownership and standardisation
Teaching and learning International English

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 1013 Everyday Childhoods

Credit Points 10

Legacy Code 102665

Coordinator Kerry Staples ([https://directory.westernsydney.edu.au/search/name/Kerry Staples/](https://directory.westernsydney.edu.au/search/name/Kerry%20Staples/))

Description In this subject students will engage in an exploration of what it means to be a child in a postmodern world and how different theoretical approaches influence ways of understanding children's lives. Alongside questions of how gender, sexuality, ethnicity, 'race', language, class, ability and religion are constituted through a child's identity, students will explore the notion of a child's subjectivity. A child's subjectivity is the conscious and unconscious thoughts and emotions of the child, their sense of self, their body and their way of understanding their relationship to the world. Building on this knowledge, students will also explore the four key child-environment identities of the physical child, the social child, the learning child and the natural child and by analysing a variety of scholarly and non-scholarly texts around the child's body and behaviour will reflect on a child's individuality and emerging identity.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in 1879 Bachelor of Education (Birth – 5 Years).

Learning Outcomes

1. Investigate diverse texts, images and constructions of what it means to be a child in contemporary society.
2. Describe the social meaning of childhood including the historical, social and political factors and how they have influenced changing views of children and childhood.
3. Describe how different theoretical perspectives have positioned children and childhood as a social construction.
4. Identify the ways in which gender, sexuality, ethnicity, 'race', language, class, ability and religion are constituted through a child's identity and the significance of this on everyday lived experiences.
5. Critically reflect on social and cultural constructions of diversity and difference in relation to children's identities and subjectivities.
6. Examine the ways in which children negotiate and construct their identities in contexts of diversity and difference.
7. Describe how children's rights and responsibilities are enacted by children and adults.
8. Describe how child-environment identity is connected to place, space, location and time.

Subject Content

1. Who is, and what does it mean to be a child in a postmodern world?
2. Critically analysing scholarly and non-scholarly texts, images and constructions 'about' the child
3. Introduction to contemporary national and international theories and philosophies related to the child
4. Significance of gender, sexuality, ethnicity, 'race', language, class, ability and religion and how they are constituted through a child's identity and everyday lived experiences
5. Questions of subjectivity and a child's sense of herself, her body and her relationship to the world
6. Children's negotiation of identity and difference in a globalised world
7. Rights and responsibilities of the child
8. Child-environment identity and connections to place, space, location and time through encounters with tangible social-cultural artefacts such as toys, homes, landscapes, animals, digital technology
9. Reflecting on constructions of diversity and difference in education and community settings

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

TEAC 1014 Experience-based Outdoor Education

Credit Points 10

Legacy Code 102206

Coordinator Tonia Gray ([https://directory.westernsydney.edu.au/search/name/Tonia Gray/](https://directory.westernsydney.edu.au/search/name/Tonia%20Gray/))

Description In this unit students connect with the natural world through outdoor adventure activities. Students learn about themselves, others, and the environment through a series of experiential activities. The unit focuses on self-reliance, resiliency, interdependence, managing personal risks, and the value of life-long outdoor recreation for enjoyment, health and well-being. This unit will involve two full-day practical field trips in the outdoors as well as lectures and tutorials. The practical field trips are physically demanding whilst also extending students mentally and socially. Given the nature of the bushwalking field trips, participants require a moderate level of personal fitness.

School Education

Discipline Teacher Education

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects SPRT 1005 - Outdoor Recreation

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Reflect on the impact of outdoor education theory including ecological literacy, nature deficit disorder, positive psychology, risk management and adventure programing;
2. Evaluate the process of experiential learning and its connection to personal growth;
3. Communicate experiential and theoretical connections between humans and their environment;
4. Assess individual and group well-being in outdoor activities;
5. Demonstrate personal and interpersonal capabilities in communication, resilience, self-confidence, teamwork, goal setting, personal autonomy and initiative.
6. Develop a deeper understanding of Indigenous links to the land and their culture

Subject Content

1. Theoretical models of experience-based learning in the outdoors and variations in emphasis developed by key writers in the field;
2. Relationships between experience-based learning in the outdoors and holistic well-being;
3. Participation, reflection and engagement in outdoor adventure education;
4. Sustainability, stewardship and nature deficit disorder;
5. Intra- and interpersonal skill development.
6. Understanding of Indigenous concepts related to connectivity to land

Coordinator Julie Lennon ([https://directory.westernsydney.edu.au/search/name/Julie Lennon/](https://directory.westernsydney.edu.au/search/name/Julie%20Lennon/))

Description The unit is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Aboriginal and Torres Strait Islander people's identities are depicted in a wide range of texts pertaining to expressions of and about Aboriginality. These various representations form the way Indigenous identities are constructed, projected and reflected in society often through the media. Students will examine how we then set in motion a better understanding of this phenomenon using carefully selected texts, the diverse nature of them and compare the outcomes; particularly the way they affect relationships between Indigenous and non-Indigenous Australians. The unit explores genres, voice, authority, identity, the complexities surrounding these debates and discourses, and how teachers are the advocates for negotiating power, space and voice for communities into the future. The examination of the portrayal of Aboriginal and Torres Strait Islander people in texts in a school context will be deconstructed so students understand the process of producing current and future identities.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects EDUC 1003 - Indigenous Cultural texts in Education

Restrictions Students must be enrolled in 1717 - Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education. Students enrolled in the Indigenous Studies major can enrol in this subject in Summer if available. Contact the subject coordinator for enrolment details.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the significance of story and narratives in Aboriginal and Torres Strait Islander cultures
2. Identify and describe representations of Aboriginal and Torres Strait Islander Australians in a range of texts produced by both Indigenous and non-Indigenous people composed for different audiences.
3. Identify and explain the ways different cultures, cultural stories and icons, including Australian images and significant Australians, including Aboriginal Australians, are depicted in texts
4. Outline debates around the politics of representation using theoretical frameworks;
5. Explain the role texts play in the construction, expressions and representations of cultural identity for Aboriginal and Torres Strait Islander peoples.
6. Analyse the role of the texts in relation to continuity and change in cultural assumptions.

Subject Content

1. The essence of Aboriginal and Torres Strait Islander story and narratives
2. Texts and their readings; examine how to undertake a textual deconstruction.
3. How do we understand cultural meaning; who constructs it? Examine theory: level of significations; function of the metaphor; genre and intertextuality; narrative form and the 'realism' effect; grand narratives and ideology; narrator function and audience positioning.
4. Identity and representations the politics of representation - Aboriginal people as 'Other'; decolonization; 'colonial gaze'; neo-colonialist texts; postcolonial texts; postcolonial critical practice.
5. Analysis of a variety of primary and secondary sources which depict Aboriginal peoples and identity (children's literature; films, television dramas, music videos; advertisements; musical/theatrical productions, photographic works, and other visual art

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Critique of two films	1,000 words	25	N	Individual

Analysis of media collage	At home assessment to be undertaken within a two day window	25	N	Individual
Portfolio	1,200 words	50	N	Individual

Coordinator Kerry Staples ([https://directory.westernsydney.edu.au/search/name/Kerry Staples/](https://directory.westernsydney.edu.au/search/name/Kerry%20Staples/))

Description A child's development and learning is influenced by the people around them and the world they live in. To support children's learning and development, teachers require knowledge and understanding of the complex interactions between nature and nurture. This subject will provide pre-service teachers with an opportunity to investigate children's physical, socio-emotional, cognitive, language, moral, creative, spiritual and academic domains of development. Concepts covered include the holistic child, contemporary theories of development, early brain development research and the pedagogy of relationships. Students will use these concepts to plan for developmentally and culturally appropriate learning environments in early childhood settings. Exploring the complexity of children's development from conception to five years of age will enhance understandings of how best to analyse and support their development.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in the Bachelor of Education (Birth – 5 Years).

Learning Outcomes

1. Analyse contemporary theories of child development and apply these understandings to practice.

2. Explain children's development from conception to five years of age across physical, socio-emotional, cognitive, language, sensory, moral, creative, spiritual and academic domains.
3. Discuss the relative impact on children's development of nature (biological and genetic factors) and nurture (environmental factors).
4. Analyse children's development and learning within socio-cultural contexts and determine the implications for planning for children's learning.
5. Analyse the importance of building positive, professional relationships with young children and families and determine the implications for promoting responsive quality care and education.
6. Use a variety of observational techniques to document, analyse and interpret children's development using relevant theory and research.
7. Critique developmentally and culturally appropriate practices and principles and their implications for care and education that is responsive to the needs of diverse children and their families.

Subject Content

Module 1: The ecology of childhood and child development

The child in the context of family, society, and community
Diversity in family structures and values and socialisation practices.

Module 2: Children's growth and development: theoretical perspectives

Theories of child development
Children's development from pre-natal to the early school years across physical, socio-emotional, cognitive, language, sensory, moral, creative, spiritual and academic domains.

Module 3: Brain development research and its implications for practice

Research on early brain development
The impact of biological and genetic factors
Creating environments which respond to critical and sensitive periods of development

Module 4: Relationships as foundational for children's developments

Positive interactions and communication with children and families
Continuity of care and education
The pedagogy of relationships

Module 5: Application of knowledge of child development into practice

Observe, assess, and guide children's development and learning utilising theories of child development
Critique and apply the principles of developmentally and culturally appropriate practices in designing quality care and learning in early childhood

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have satisfactorily completed online Child Protection Awareness Training, have a current Working with Children Check, and completed the online course ASCIA Anaphylaxis: Australasian childcare.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Legacy Code 102118

Coordinator Julie Lennon ([https://directory.westernsydney.edu.au/search/name/Julie Lennon/](https://directory.westernsydney.edu.au/search/name/Julie%20Lennon/))

Description The unit is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. The unit examines ways of enhancing children's language learning through speaking, listening, reading and writing as they begin to create and understand the oral, written and visual texts of their environment. Current literacy and language theories are examined. The diverse needs of learners are considered and appropriate teaching strategies to develop literacy skills are explored. Students will appreciate children's literature and the way it can be used to promote literacy and language learning in a variety of early learning contexts K-2. The unit prepares individuals for more advanced units involving language and literacy, and primary English teaching specialisation.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects EDUC 2004 - Language and Literacy 1 - AREP

Restrictions

Students must be enrolled in 1717 - Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the nature of language acquisition and language development.
2. Describe the strategies that may be used in the teaching of reading K-6.
3. Engage in and utilise practical strategies to support children's literacy learning in a variety of contexts K-2.
4. Assess the impact of social, cultural, technological and political contexts and their effect on literacy learners in classroom contexts.
5. Utilise children's literature to promote literacy and language learning in a variety of learning contexts.
6. Analyse key theories about language learning and apply these to the construction of literacy lesson plans and programs

Subject Content

1. Language acquisition
2. Nature and role of English as a language of communication for participation in society, through reading, writing, listening, speaking, viewing and representing experiences, values and ideas.
3. Mapping oral language onto written language
4. What is literacy? What is reading? How do we learn to read?

5. Broad and critical knowledge and understanding of English as a discipline, including recent theories of reading and the reading process
6. Teaching decoding - phonemic awareness and phonics
7. Strategies for teaching reading: shared reading, guided reading
8. Assessment of reading, running records
9. What makes good children's literature? Practise analysing children's books of varying text types: both fiction and non-fiction, including literature that provides insights into Aboriginal and Torres Strait Islander peoples, multicultural perspectives and children's experiences.
10. Linking reading to writing in the early years
11. Multi-literacies and Critical Literacy
- 12.

Assessment

Legacy Code 102116

Coordinator Shirley Gilbert ([https://directory.westernsydney.edu.au/search/name/Shirley Gilbert/](https://directory.westernsydney.edu.au/search/name/Shirley%20Gilbert/))

Description The unit is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Beginning a teacher education course requires students to orient themselves to learning and teaching in a variety of ways. This unit introduces a range of issues that are critical to effective teaching and learning. These issues centre on learning environments; the roles of teachers in schools and as life-long learners; and the responsibilities

of teachers to observe and understand the children in their care, plan for individual children on the basis of diagnostic evaluations, employ teaching approaches which cater for the needs of individuals as well as the group, and employ assessment processes that empower rather than simply compare children.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Co-requisite(s) TEAC 1029

Equivalent Subjects EDUC 1005 - Introduction to Learning and Teaching

Restrictions Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe a range of environments and activities which facilitate learning through recognition of the diverse nature of learners.
2. Explain the roles and responsibilities of teachers in primary schools.
3. Develop, implement, justify and document teaching experiences relating to the NSW Syllabus documents and the needs of individual children in their care.
4. Explain the impact of technologies on teaching and learning.
5. Utilise technologies for their personal productivity and developing professional practice.
6. Apply the principles and practices of classroom pedagogy based on an understanding of how children learn and are motivated.
7. Evaluate their role in the teaching profession and the need to continually improve their professional knowledge and practice.

Subject Content

1. Positive environments for learning and supporting learners - school, home and community
2. Developing a personal understanding of teaching as a profession. Personal philosophy of teaching and learning
3. Teacher as a life-long learner - including reflection in teaching and learning, portfolios, schools as learning communities
4. Introduction to curriculum and the structure of syllabus documents;
5. Planning, implementing and assessing in the teaching and learning cycle
6. Development and use of resources
7. Teaching and learning strategies including roles and uses of information and communication technologies
8. Managing classrooms and learners in classrooms

Special Requirements

Legislative pre-requisites

Students must have: Working with Children Check and Completion of Child Protection Training.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects COMM 1029 - University Study Skills

Restrictions Students must be enrolled in 1717 - Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify areas of their own written and oral communication that require development to ensure communication skills are appropriate to support a teacher professional identity in new times. This will include intercultural concepts of teacher education. (Standard 2.5.1).
2. Develop an action plan for enhancing identified areas of their own literacy development. (Standard 1.4.1,2.5.1).
3. Practise and refine the oral and written skills as required in the profession. (Standard 2.5.1).
4. Identify different types of reading, and develop critical thinking skills that are applicable to specific academic situations. (Standard 1.4.1,2.5.1).
5. Apply a working knowledge of the grammatical and structural conventions used in the profession. (Standard 2.5.1).
6. Write a well-structured academic essay. (Standard 2.5.1).
7. Use referencing and citation conventions accurately and appropriately in academic writing. (Standard 2.5.1).

Subject Content

1. Intercultural concepts of teacher education;
2. Reading and writing for academic purposes;
3. Interpreting genres and writing styles;
4. Accessing and using e-learning sites;
5. Assessment and development of skills and knowledge equivalent to Higher School Certificate Band 5 English;
6. Development of identified areas of literacy need;
7. Familiarisation and engagement with teacher research and professional literature (such as AITSL standards, ACARA, and NESAs).

Assessment

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate and apply skills and understandings of number theory and numeration systems.
2. Demonstrate and apply skills and understanding of multiple representations and ways of calculating fractions and decimals.
3. Understand and apply calculations of factors and multiples
4. Use patterns and relationships in number and their application to real life problems.
5. Recount the historical evolution of measurement systems.
6. Explain the basic feature of the metric system and the relationships between the Hindu-Arabic numeration system and the metric system.
7. Explain the mathematical patterns and relationships that can be found in space and geometry.
8. Apply basic geometrical concepts and principles.
9. Explain geometrical patterns and relationships in the environment.
10. Apply knowledge of the metric system to investigations of real-life problems.

Subject Content

1. Patterns and relationships in geometry:
 - environmental instances and applications
 - Basic concepts, principles and relationships
2. Patterns and relationships in number:
 - number patterns in space
 - factors, multiples, prime numbers,
 - fractions and decimals
 - number patterns
 - number theory
3. Mathematical systems

Restrictions Students must be enrolled in 1717 - Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the proficiency strands of the Australian Curriculum including communicating, understanding, fluency, problem solving and reasoning. (Standard 2.3.1).
2. Identify the content strands of the Australian Curriculum including Number and Algebra, Measurement and Geometry and Statistics and Probability. (Standard 2.3.1).
3. Identify patterns and relationships in mathematics in the real-world contexts. (Standard 2.1.1).
4. Solve mathematical problems related to factors, multiples, primes and composites. (Standard 2.1.1).
5. Solve mathematical problems related to volume and measurement. (Standard 2.1.1).
6. Solve mathematical problems related to decimals, fractions and percentages. (Standard 2.1.1).
7. Solve mathematical problems related to chance and data. (Standard 2.1.1).
8. Solve mathematical problems related to geometry (2 and 3D shapes). (Standard 2.1.1).

Subject Content

1. Mathematics for teaching, introduction to the mathematics syllabus continuum K-12 and strands: Number and Algebra, Measurement and Geometry, Statistics and Probability as well as Working Mathematically and its five components: Communicating, Problem Solving, Reasoning, Understanding and Fluency.

2. Language of number.

3. Nature and role of mathematics in describing and modelling patterns and relationships that can be generalised, and as a means of interpreting the world.

4. Number: 4 Operations - Addition, Subtraction, Multiplication and Division and the Order of Operations, Fractions, Decimals and Percentages and their Equivalence, Financial Mathematics, Ratios and Rates, Logarithms, Factors, Multiples, Primes and Composites.

5. Patterns and Algebra: Algebraic Techniques, Indices, Equations, Linear and Non-Linear Relationships, Functions and Other Graphs, Polynomials.

6. Measurement: Length, Area, Volume and Capacity, Mass, Time.

7. Geometry: 3D Space, 2D Space

8. Statistics and Probability: Chance, Data collection and Representation, Single Variable and Bivariate Data Analysis.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Professional Task	1,400 words	25	N	Individual
Professional Task	500 words	25	N	Individual
Professional Task	1/2 to 1 hour per week	S/U	N	Individual
Final Exam	2 hours	50	N	Individual

TEAC 1029 Professional Experience 1: Introduction to Classrooms

Credit Points 10

Legacy Code 102117

Coordinator Jacqueline Humphries ([https://directory.westernsydney.edu.au/search/name/Jacqueline Humphries/](https://directory.westernsydney.edu.au/search/name/Jacqueline%20Humphries/))

Description The unit is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This unit is designed to introduce students to the characteristics of classrooms and curriculum implementation. Students will explore the structure of teaching, learning and curriculum in all key learning areas, with a particular focus on literacy and numeracy. They will examine the perspectives which influence the

curriculum and the way in which curriculum is interpreted in the classroom environment. The unit will assist students in commencing the development of their professional portfolio with a ten day's practicum, focusing on professional experience and the work of teachers in primary classrooms.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects EDUC 1009 - Professional Experience 1 Introduction to Classrooms

Restrictions

Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the characteristics and elements of classrooms, teaching, learning and curriculum when designing and implementing lessons according to professional teaching standards. (Standards: 1.1.1, 1.4.1)
2. Apply outcomes-based planning in all subject areas. (Standards: 2.1.1, 2.2.1,2.3.1)
3. Implement a range of teaching strategies, spaces and resources (including Information and Communication Technologies) that support inclusive student participation and engage students in their learning. (Standards: 2.1.1, 2.2.1,2.3.1, 2.6.1)
4. Evaluate their placement identifying areas of personal professional knowledge and practice that needs improvement. (Standards: 6.1.1,6.2.1, 6.3.1 and 6.4.1)
5. Use a range of verbal and non-verbal communication and teaching strategies to support student engagement. (Standards: 3.5.1, 4.2.1, 4.3.1)
6. Provide timely and appropriate feedback to students about their learning. (Standards: 5.2.1, 5.5.1)
7. Plan and teach lessons using knowledge of student learning, content and effective teaching strategies (Standards: 1.1.1, 2.1.1, 2.3.1, 2.6.1, 3.2.1)

Subject Content

1. Aboriginal issues in the classroom - addressing the learning styles of different learners
2. Orientation to primary schools - teachers' professional roles and responsibilities in the classroom and the school community
3. Ethics, expectations and protocols in regards to working within schools
4. How professional portfolios can be used to show professional growth and development in teaching - linking with the Australian Professional Standards for Teachers
5. Assessment and evaluation of teaching and learning practices.
6. Lesson plans revisited. Teachers as reflective practitioners

Special Requirements

Legislative pre-requisites

1. Students are required to complete the **two** components of the Working with Children Check (WWCC) process leading to (a) the issuance of a clearance number under the category of volunteer and

(b) verification of the clearance number with the NSW Department of Education.

a) Students will need to:

- i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.
- ii. Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.
- iii. Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record. WesternNow Student Portal link (https://wsu.service-now.com/student/?id=sc_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed)

b) Students will need to:

- i. Access the NSW Department of Education WWCC Verification declaration form <https://online.det.nsw.edu.au/jecpc/crc/wwcc.jsf>
- ii. Carefully read the information about Identity Documents and obtain a copy of the relevant ID documents.
- iii. Complete and submit the verification declaration form.
- iv. Once your WWCC verification is complete you will receive an email reply from the DoE Probity Unit confirming your WWCC number has been verified.
- v. Submit the verification confirmation email via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.

2. Students must complete the **two** components of the NSW Department of Education's Child Protection Awareness Training (CPAT)

a) Students will need to:

- i. Access the NSW Department of Education's MyPL website <https://mypl.education.nsw.gov.au/>
- ii. Complete the online Child Protection Awareness Training: Induction
- iii. Save certificate of completion
- iv. Submit certificate via WesternNow Student Portal

b) Students will need to:

- i. Access the NSW Department of Education's MyPL website <https://mypl.education.nsw.gov.au/>
- ii. Complete the Child Protection Awareness Training (CPAT): Annual Update for the calendar year
- iii. Save certificate of completion
- iv. Submit certificate via WesternNow Student Portal

Both certificates will be recorded on your student record as Special Requirements with the end date for the Annual CPAT recorded. The CPAT: Annual Update will need to be renewed and submitted on an annual basis.

Students who have not completed both components of the Child Protection Awareness Training will need to withdraw from the subject.

3. Students must complete the ASCIA anaphylaxis e-training and submit their certificate to Submit certificate via WesternNow Student Portal.

4. Students must meet the Inherent Requirements for the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education (<https://hbook.westernsydney.edu.au/programs/bachelor-education-primary-aboriginal-torres-strait-islander-education/>).

5. From 2H/Spring 2022, students must be COVID-19 fully vaccinated as per the NSW Public Health Order and NSW Department of Education requirement. If a student is unable to be get an approved vaccination for medical reasons, they will need to approach their doctor who must complete a contraindication form available at: [covid-19-vaccine-contraindication.pdf](https://www.health.nsw.gov.au/Infectious/covid-19/vaccine/Documents/covid-19-vaccine-contraindication.pdf) (nsw.gov.au) (<https://www.health.nsw.gov.au/Infectious/covid-19/vaccine/Documents/covid-19-vaccine-contraindication.pdf>). Students to submit details of all vaccination

doses or contraindication form via Western Now form for it to be recorded on their academic record.

TEAC 1030 Science and Engineering in Early Childhood

Credit Points 10

Legacy Code 102667

Coordinator Joanne Orlando ([https://directory.westernsydney.edu.au/search/name/Joanne Orlando/](https://directory.westernsydney.edu.au/search/name/Joanne%20Orlando/))

Description This subject will develop students' critical and meaningful understanding of the way in which engineering, science and technology shape our lives and the world we live in. It will extend students' understanding of how engineering, science and technology integrate and impact on each other and how they can be promoted in creative and meaningful ways in the learning environment. This subject will foster a positive disposition in students towards teaching and applying engineering, science and technology in diverse and multi-dimensional educational settings for children aged birth to 5 years. It will focus on investigation, critical thinking and problem solving as they relate to young children's learning processes. The subject will engage with relevant pedagogical approaches and the Early Years Learning Framework principles, practices and learning outcomes.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in 1879 Bachelor of Education (Birth – 5 Years).

Learning Outcomes

1. Investigate the key concepts of science, technology and engineering in society and in everyday applications.
2. Explain the relationships between science, technology and engineering and the processes of investigation, critical thinking and problem solving.
3. Examine the different theoretical and pedagogical approaches relevant to science, technology, engineering teaching and learning for birth to 5 years.
4. Apply the principles, practices and outcomes of The Early Years Learning Framework for Australia to investigate the relationships between science, technology and engineering and play based pedagogies.
5. Propose learning experiences that integrate science, technology and engineering concepts, processes and language.
6. Discuss issues of diversity and equity in STEM and strategies to support the learning needs of diverse students.

Subject Content

1. Key concepts of science, technology and engineering in society and in everyday applications
2. Science, Technology, Engineering for Birth - 5 years
3. Processes of investigation, exploration and problem solving
4. Theory and approaches for teaching science, technology and engineering for children Birth-5 Years
5. Use of the Early Years Learning Framework principles, practices and learning outcomes to investigate the relationships between science, technology and engineering and play based pedagogies
6. Issues of diversity and equity in STEM – addressing the needs of diverse students

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have satisfactorily completed online Child Protection Awareness Training, have a current Working with Children Check, and completed the online course ASCIA Anaphylaxis: Australasian childcare.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 1031 Sociology for Educators

Credit Points 10

Legacy Code 102629

Coordinator Tania Ferfolja ([https://directory.westernsydney.edu.au/search/name/Tania Ferfolja/](https://directory.westernsydney.edu.au/search/name/Tania%20Ferfolja/))

Description This unit includes the study of society, culture, gender, ethnicity, sexuality and social class. It explores sociological understandings of the impact of the social on individuals and how this influences education, knowledge, society and change. The unit addresses the diverse needs of children in complex contexts. It provides students with opportunities to reflect on universal assumptions often imposed on children, families and communities, through applying analytical tools and developing their professional identity as critical reflexive educators.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Restrictions Students must be enrolled in 1876 Bachelor of Education (Primary)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify key sociological theories, range of theoretical approaches and tools for explaining the sociological dimensions of education and care;
2. Analyse the role and impact of political, economic and social aspects of difference and how they have influenced sociological constructions of family, community and schooling;
3. Explain key concepts and theoretical approaches for exploring culture, community, class, identity, subjectivity, diversity, religion, gender, sexuality, ethnicity, power and agency;
4. Examine the social construction of contemporary childhood and its influence on the changing nature of being a child in families, the community and educational settings;
5. Describe how social, historical and cultural practices have impacted on the educational outcomes for Aboriginal and Torres Strait Islander children;
6. Apply critical thinking skills to analyse contemporary teaching and learning based on sociological theories;
7. Construct and evaluate arguments by reference to appropriate sources and theory;
8. Analyse one's own personal, physical, learning and emotional needs to apply appropriate self-directed learning strategies.

Subject Content

- society and community, The political, economic and social aspects of difference and community through historical and contemporary sociological understandings
 - concepts of subjectivity and identity as related to consciousness, agency, personhood, Reality and relationship to how individuals are shaped by being in The World

- understandings of culture, agency, power through theories of culture, diversity, postcolonial, Feminism and social Constructivism
 - social class, levels of power and wealth
 - foundational concepts in The Study of gender: identity, sexuality, family, religion, The body, cultural practices and gender norms in light of contemporary gender theories
 - The social construction of childhood and The Importance of Examining contemporary and diverse childhoods and Understanding children's role in families, community and education
 - sociological perspectives on race, ethnicity and shared cultures: practices, values, and beliefs of A group, cultural characteristics as objects of Collective discrimination
 - impact of social and cultural practices on The educational outcomes for Aboriginal and Torres Strait Islander students: their heritage and cultural practices

Assessment

TEAC 1032 The Developing Child

Credit Points 10

Legacy Code 102046

Coordinator Sheridan Hewson ([https://directory.westernsydney.edu.au/search/name/Sheridan Hewson/](https://directory.westernsydney.edu.au/search/name/Sheridan%20Hewson/))

Description An in-depth knowledge of child development is essential for educators to plan and provide culturally and developmentally appropriate practices for children in the early years. In this context, this subject aims to explore the diverse nature, processes and aspects of children's development from conception to 12 years of age. The subject investigates the physical, socio-emotional, cognitive, language, moral, creative, spiritual and academic domains of development. Students will gather an understanding of the evolving methods used to develop theory about child development – from traditional case study approaches to contemporary brain research. The role of family, community, and other sociocultural influences will also be considered in relation to understanding the holistic nature of children's development. Students will apply their knowledge of theories and methods of child study in the compilation of a Child Portfolio. Students must complete the WSU's online Child Protection Awareness Training before undertaking the Child Portfolio.

School Education**Discipline** Teacher Education: Early Childhood**Student Contribution Band** HECS Band 1 10cp**Level** Undergraduate Level 1 subject**Equivalent Subjects** TEAC 1033 - The Developing Child (WSTC)**Restrictions**

Students must be enrolled in 1708 Bachelor of Arts (Pathway to Teaching Birth-5/Birth-12).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain children's development from conception to 12 years of age across all domains;
2. Analyse the major theories and contemporary research relating to children's development and apply theoretical understandings of child development in their learning;
3. Discuss evolving methods used to develop theory about child development – from traditional case study approaches to contemporary brain research;
4. Demonstrate understanding of the diversity in families, cultures, environments and communities and consider the implications for children's development, health, care and education;
5. Critique developmentally and culturally appropriate practices and principles and their implications for care and education that is responsive to needs of children and their families;
6. Apply knowledge of observational and assessment techniques to the study of children's development;
7. Document and interpret observations using related theory and research and suggest implications for planning for children's developments.

Subject Content

1. An overview of theories of children's development
2. Child development: history, methods and sociocultural perspectives of child development
3. Biological foundations of child development, prenatal development, and birth
4. Child development: physical and motor development; cognitive development; language development; socio-emotional development; moral and spiritual development; creative and academic development.
5. Diversity in families, cultures and communities and importance of working with children, families and communities professionally and ethically.
6. Methods of observation, documentation and analysis of child development.
7. Developmentally and culturally appropriate practices for children in the early years and their application to education contexts.
8. Academic literacy, including analytical and reflective writing and the organisation of a child portfolio.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 1034 Ways with Words and Images

Credit Points 10

Legacy Code 102633

Coordinator Katina Zammit ([https://directory.westernsydney.edu.au/search/name/Katina Zammit/](https://directory.westernsydney.edu.au/search/name/Katina%20Zammit/))

Description In this unit students will gain knowledge and understanding about how texts convey meaning through choices in language (written) and images (visual). It introduces students to analytical tools to talk about both written and visual texts by focusing on the meaning making resources used in constructing the texts. The unit explores texts as cultural artefacts, theories of visual literacy and how image and text combine to create meaning. It develops students' critical media literacy and understandings of text design and production.

Description This unit supports pre-service teachers in the understanding of mathematical processes and content. Pre-service teachers will develop competence and confidence in the content areas of Number and Algebra, Measurement and Geometry; Probability and Statistics. They will be able to solve problems related to these areas and communicate their solution methods, using processes from the Working Mathematically strand.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Restrictions Students must be enrolled in the Bachelor of Education (Primary).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand fundamental concepts of problem solving strategies and mathematical modelling and their application in the solution of open-ended investigations;
2. Apply knowledge of problem solving and the modelling process in variety of mathematical applications;
3. Understand the fundamental concepts of Number and Algebra, Measurement and Geometry; Statistics and Probability;
4. Investigate the connections between Number and Algebra, Measurement and Geometry; Statistics and Probability
5. Use a range of strategies to perform calculations with integers, fractions, decimals, percentages, ratios and rates;
6. Analyse and create patterns with numbers and generalise these patterns into algebraic expressions that can be displayed on the Cartesian Number Plane;
7. Use deductive reasoning to investigate geometrical investigations;
8. Use a range of strategies to perform conversions between measurement units;
9. Analyse data using measures of central tendency and spread;
10. Use appropriate graphical displays of data;
11. Investigate probabilities that result from simple or compound events;
12. Use diagrams, symbols and terminology to communicate and connect mathematical ideas;

13. Use the common conceptual misconceptions in Number and Algebra, Measurement and Geometry; Statistics and Probability to improve understanding.

Subject Content

- skills in The four Operations with integers, fractions and decimals
- patterns and Algebra
- Graphing on The Cartesian number Plane
- Perimeter and area of Plane shapes, quadrilaterals and circles
- parallel lines and angle relationships with transversals
- Volumes of prisms and cylinders
- Operations with ratios and rates
- time and time zones
- financial problems involving The purchase of goods
- data collection, interpretation and display
- mean, mode, median range and Standard deviation
- probability and its application to real World problems
- Problem solving strategies
- apply mathematical Problem strategies in real World applications
- positive attitudes about mathematical concepts

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	20-minutes per quiz	20	N	Individual
Report	1,500 words	30	N	Individual
Professional Task	2,000 words	50	Y	Individual

TEAC 1038 Literacy and Numeracy for Educators

Credit Points 10

Legacy Code 102794

Coordinator Stephanie Watts ([https://directory.westernsydney.edu.au/search/name/Stephanie Watts/](https://directory.westernsydney.edu.au/search/name/Stephanie%20Watts/))

Description The primary purpose of this subject is to equip first-year students with personal literacy and numeracy skills necessary for their academic success. This subject aims to develop students' personal

literacy and numeracy skills necessary for participating in academic and professional contexts. It also supports pre-service teachers as literate and numerate citizens to strengthen positive attitudes, skills, and knowledge about literacy and numeracy roles in everyday contexts. Students will have opportunities to develop their interpersonal, verbal and non-verbal communication skills. These skills are integral to the inherent requirements of a graduate teacher who are required to undertake the national literacy and numeracy test mandated by the Australian Government. Pre-service teachers will develop confidence and competence in their understanding of the roles of literacy and numeracy in society, with particular emphasis on problem-solving and effective communication in practical situations. Students will be provided with opportunities to develop critical self-awareness, self-regulation and the ability to organise oneself as a self-directed learner. Essential elements of academic scholarship, including information media literacy, understanding assessment, and academic integrity, will be developed.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in the Bachelor of Education (Primary).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop personal literacy and numeracy skills and attitudes in academic and other contexts;
2. Demonstrate professional digital competence effectively and creatively for learning and assessment purposes;
3. Apply critical reading and writing skills that are appropriate to academic situations;
4. Apply critical numeracy skills to make discerning decisions about how to use mathematical knowledge and skills purposefully;
5. Evaluate and manage resources that are relevant to specific inquiry areas;
6. Use effective communication strategies to interact with individuals and groups for a range of purposes and audiences;
7. Analyse specific assessment requirements and implement effective task and time management strategies;
8. Recognise the importance of integrity to demonstrate respect, responsibility and honesty in academic scholarship.

Subject Content

1. Personal literacy and numeracy skills and attitudes in contemporary contexts
2. Professional digital competence
3. Critical reading and writing
4. Mathematics and critical numeracy skills in solving real-world, practical problems
5. The literate and numerate learner as an effective communicator and problem solver with a focus on creative, intercultural and critical thinking
6. Task and time management
7. Academic Integrity

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Log/ Workbook	500 Words	20	N	Individual
Essay	1,000 words	40	N	Individual
Reflection	500 words reflection with a 3- minute digital story	40	N	Individual

TEAC 1039 Scientist, Artist, Teacher

Credit Points 10

Legacy Code 102821

Coordinator Karin Mackay ([https://directory.westernsydney.edu.au/search/name/Karin Mackay/](https://directory.westernsydney.edu.au/search/name/Karin%20Mackay/))

Description This unit is designed to develop pre-service teachers' efficacy and identities in the content area of science and the arts. Building on the concepts of teaching-artists and scientist-as-teacher this unit gives future teachers agency to create innovative and transformative learning experiences for the primary classroom. In this unit students build on their content knowledge in science and the arts, as developed in the units Science and Technology in the Primary Years, and Creative Arts Education. They will develop science, performing arts (dance, drama and music), visual arts and media arts skills which can enhance their repertoire for the classroom. This unit will additionally explore the intersection of science and the arts, developing knowledge of creativity, aesthetics, innovation, artistic and scientific processes. It has been designed to give all students the opportunity to develop their knowledge, understanding, skills, confidence and competence in the science and the arts in discrete and integrated forms.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Restrictions Students must be enrolled in 1876 Bachelor of Education (Primary).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of Science and Arts in the context of the Primary classroom, including theories, philosophies and practices that underpin them;
2. Research, reflect on and critically analyse the importance of Science, the Arts and their integration in the holistic development of children and their role in building innovation and skills for the future.
3. Exhibit competencies in a range of skills and knowledge in Science, Performing Arts (Dance, Drama and Music), Visual Arts and Media that can be translated effectively to the primary context.
4. Articulate the ways that scientific and artistic knowledge and skills contribute to teacher identity and efficacy in teaching Science and the Arts.
5. Integrate Science and the Arts, through exploration of collaborative learning processes, experimentation, innovation, imagination, creativity and problem-based learning.
6. Use physical and digital technologies to exhibit practical skills in Science and the Arts.

Subject Content

1. Theory, principles and practices related to Science and Arts education, for example, working scientifically and artistically, using collaborative learning processes, experimentation, innovation, imagination, creativity and problem-based learning;
2. Research the importance of Science and the Arts in the holistic development of primary-aged students and its role in building innovation and skills for the future
3. Development of identities and efficacy of teaching-scientist and teaching-artist;
4. Ways of integrating working scientifically and artistically
5. Using physical and digital technologies to exhibit practical skills in Science and the Arts
6. Concepts pervasive in sciences and the arts, for example colour, shadows, music, rhythmic body movement, landforms, shapes

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	30 multiple choice questions	30	N	Individual
Reflection	1,200 words	40	N	Individual
Presentation	3-8 minute performance	30	N	Individual

TEAC 1040 Mathematical Patterns and Relationships (Block)

Credit Points 10

Legacy Code 500072

Coordinator Rachel Renwick ([https://directory.westernsydney.edu.au/search/name/Rachel Renwick/](https://directory.westernsydney.edu.au/search/name/Rachel%20Renwick/))

Description Students will use a variety of investigative techniques to highlight the evidence of patterns and relationships in mathematics. The inherent structure of mathematics will be approached through the examination of various mathematical systems. In addition, students will examine the nature of mathematical thought including inductive and deductive reasoning. This subject contributes directly to the achievement of a sound foundation in mathematics.

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects LGYA 2716 - Mathematics 1 Patterns and Relationships LGYB 2441 - Mathematics for K-6 Teachers TEAC 1025 - Mathematical Patterns and Relationships (WSTC) TEAC 2041 - Mathematical Patterns and Relationships TEAC 1024 - Mathematical Patterns and Relationships

Restrictions

Students must be enrolled in 7181 Undergraduate Certificate in Early Childhood Studies

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate and apply skills and understandings of number theory and numeration systems.
2. Demonstrate and apply skills and understanding of multiple representations and ways of calculating fractions and decimals.
3. Understand and apply calculations of factors and multiples.
4. Use patterns and relationships in number and their application to real life problems.
5. Recount the historical evolution of measurement systems.
6. Explain the basic feature of the metric system and the relationships between the Hindu-Arabic numeration system and the metric system.
7. Explain the mathematical patterns and relationships that can be found in space and geometry.
8. Apply basic geometrical concepts and principles.
9. Explain geometrical patterns and relationships in the environment.

10. Apply knowledge of the metric system to investigations of real-life problems.

Subject Content

1. Patterns and relationships in geometry:
 - environmental instances and applications
 - basic concepts, principles and relationships
2. Patterns and relationships in number:
 - number patterns in space
 - factors, multiples, prime numbers,
 - fractions and decimals
 - number patterns
 - number theory
3. Mathematical systems
 - transformational geometry
 - numeration systems
 - number systems
4. Mathematical reasoning
 - historical evolution of mathematical thought
 - inductive and deductive reasoning
 - the investigation of mathematical ideas
5. Measurement
 - basic features of the metric system
 - relationship to the numeration system the investigation of mathematical ideas

TEAC 1041 The Developing Child (Block)

Credit Points 10

Legacy Code 500071

Coordinator Rachel Renwick ([https://directory.westernsydney.edu.au/search/name/Rachel Renwick/](https://directory.westernsydney.edu.au/search/name/Rachel%20Renwick/))

Description An in-depth knowledge of child development is essential for educators to plan and provide culturally and developmentally appropriate practices for children in the early years. In this context, this subject aims to explore the diverse nature, processes and aspects of children's development from conception to 12 years of age. The subject investigates the physical, socio-emotional, cognitive, language, moral, creative, spiritual and academic domains of development. Students will gather an understanding of the evolving methods used to develop theory about child development – from traditional case study approaches to contemporary brain research. The role of family, community, and other sociocultural influences will also be considered in relation to understanding the holistic nature of children's development. Students will apply their knowledge of theories and methods of child study in the development of a Child Portfolio. Students will apply their knowledge of theories and methods of child study in the development of a Child Portfolio. Students will complete Working with Children Check (WWCC) (or the equivalent in their home state), the NSW Department of Education's online Child Protection Awareness Training and Annual update as part of the subject.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects TEAC 1032 - The Developing Child TEAC 1033 - The Developing Child

Restrictions

Students must be enrolled in program 7181 - Undergraduate Certificate in Early Childhood Studies

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain children's development from conception to 12 years of age across all domains;
2. Analyse the major theories and contemporary research relating to children's development and apply theoretical understandings of child development in their learning;
3. Discuss evolving methods used to develop theory about child development – from traditional case study approaches to contemporary brain research;
4. Demonstrate understanding of the diversity in families, cultures, environments and communities and consider the implications for children's development, health, care and education;
5. Critique developmentally and culturally appropriate practices and principles and their implications for care and education that is responsive to needs of children and their families;
6. Apply knowledge of observational and assessment techniques to the development of a child's case study.
7. Document and interpret observations using related theory and research and suggest implications for planning for children's developments.

Subject Content

1. An overview of theories of children's development.
2. Child development: history, methods and sociocultural perspectives of child development
3. Biological foundations of child development, prenatal development, and birth.
4. Child development: physical and motor development; cognitive development; language development; socio-emotional development; moral and spiritual development; creative and academic development.
5. Diversity in families, cultures and communities and importance of working with children, families and communities professionally and ethically.
6. Methods of observation, documentation and analysis of child development.
7. Developmentally and culturally appropriate practices for children in the early years and their application to education contexts.
8. Academic literacy, including analytical and reflective writing and the organisation of a child portfolio.

TEAC 2001 Active and Healthy Childhoods

Credit Points 10

Legacy Code 102669

Coordinator Prathyusha Sanagavarapu ([https://directory.westernsydney.edu.au/search/name/Prathyusha Sanagavarapu/](https://directory.westernsydney.edu.au/search/name/Prathyusha%20Sanagavarapu/))

Description Early childhood educators are responsible for promoting the health, safety and wellbeing of young children from birth to five years including children from vulnerable backgrounds. This includes children from migrant, low SES, refugee and Aboriginal and Torres Strait Islander backgrounds. This subject focuses on developing students' understandings of holistic health, safety, nutrition, and wellbeing of young children. It also assists students to recognise the factors that impact on children's socio-emotional wellbeing and promote resilience.

This subject promotes students' ability to identify, source, and apply relevant policies and resources to respond to children's emerging health and wellbeing issues in collaboration with various stakeholders and by taking into consideration the children's and families' rights, needs, values and cultural practices.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions

Students must be enrolled in 1879 Bachelor of Education (Birth – 5 Years) and have completed 80cp in that program

Subject Content

- Module 1: Understanding safety, holistic health and wellbeing of children: birth-5 years**
 - Physical health
 - Hygiene
 - Safety and risk
 - Nutrition
 - Socio-emotional wellbeing
 - Physical movement
- Module 2: Health and wellbeing issues**
 - Current issues in children's physical health
 - Chronic illnesses
 - Mental health including bullying
- Module 3: Positive relationships and communication**
 - Relationships
 - Identity development
 - Positive communication
- Module 4: What guides healthy environments in early childhood contexts**
 - Policies
 - National and State Health programmes and initiatives
- Module 5: Promoting holistic health and wellbeing in early childhood settings**
 - Preventative health
 - Holistic approach to planning healthy environments in early childhood
 - Applying policies and research in health promotion
 - Developing partnerships and linkages with the wider community.

Work integrated learning

- Examine the changing health and wellbeing needs of young children.
- Discuss the essential elements and theories of physical health, safety, nutrition, and holistic wellbeing in early childhood years.
- Recognise the factors that impact on children's socio-emotional wellbeing and promote resilience.
- Analyse the importance of promoting physical and fundamental movement skills through areas such as dance, gymnastics, games and sports and a range of physical and outdoor activities.
- Examine factors supporting healthy relationships and promote these in a professional capacity.

6. Apply policies and guidelines, to engage with childhood health and wellbeing issues and promote safe and healthy early childhood environments.
7. Apply strategies for working in partnership with health professionals, referral agencies and support personnel in promoting holistic health and wellbeing in early childhood settings.

Assessment

Description Theory and the practice of teaching are explored in depth in this unit. This unit explores the necessary teaching and interpersonal skills required to build positive relationships with students and manage the classroom. Students will develop skills in planning, implementing and evaluating the students' learning which are designed to meet primary school students' curriculum needs. It introduces students to a range of teaching strategies and assists with helping to identify when and why to use them. It explores how educational theories and practitioner research underpin and inform curriculum development and pedagogical practice. Integrated in the learning will be the use of information technologies. This unit will also facilitate students in developing a critical understanding of their individual progress towards satisfying the Australian Professional Standards for Teachers at the Graduate level. The knowledge and skills developed in the other units of study in the course can be applied in this and the Professional Experience units.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Co-requisite(s) TEAC 2048

Restrictions

Students must be enrolled in the Bachelor of Education (Primary) and have successfully completed 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify a range of teaching and behaviour management strategies and their purpose;
2. Demonstrate knowledge of lesson planning and assessment;
3. Assess a range of resources, including ICT, that engage students in their learning;
4. Evaluate a range of verbal and non-verbal communication strategies to support student engagement;
5. Identify ways in which core teaching practices can be adapted for varied classrooms settings and for varied curriculum;
6. Apply critical thinking skills to solve teaching and learning challenges in contemporary education;
7. Apply educational research to inform pedagogies and assessment to maximise student outcomes;
8. Build and apply skills related to research and reflection to identify personal achievement of the Australian Professional Standards for Teachers at the Graduate Level.

Subject Content

1. Conceptions of Good Teaching
2. Types of Teaching Strategies
3. Creating and maintaining positive learning environments
 - Classroom environment
 - Classroom behaviour
 - wellbeing and resilience
4. Teaching Standards and Policies
5. Introduction to Learning Portfolios
6. Lesson planning

7. Assessment

Special Requirements

Legislative pre-requisites

1. Students are required to complete a Working with Children Check leading to the issuance of a clearance number under the category of volunteer.

Students will need to:

- Access the Office of the Children's Guardian website and complete an online application form to generate an application number.
- Present an application number and identification to a NSW Motor Registry or Government Access Centre prior to issuance by mail a Working with Children Check number.
- Email the letter with a valid Working With Children Check number to facilitate processing of a school placement where the document is trimmed and recorded in Banner as a Special Requirement.

Students must complete the online Child Protection Awareness Training prior to undertaking any visits/placements. Students who have not completed Child Protection Awareness Training will need to withdraw from the subject.

2. Students must complete the ASCIA anaphylaxis e-training and email their certificate to AnaphylaxisPrm@westernsydney.edu.au

3. Students must meet the Inherent Requirements for the Master of Teaching (Primary (<https://hbook.westernsydney.edu.au/programs/master-teaching-primary/>)).

TEAC 2005 Play in the Lives of Children

Credit Points 10

Legacy Code 102670

Coordinator Prathyusha Sanagavarapu ([https://directory.westernsydney.edu.au/search/name/Prathyusha Sanagavarapu/](https://directory.westernsydney.edu.au/search/name/Prathyusha%20Sanagavarapu/))

Description This subject focuses on analysing the changing nature, contexts and multiple perspectives on children's play. Drawing upon classical and contemporary theories, it examines how educators can facilitate young children's development, authentic learning and wellbeing in prior-to-school contexts as they play. Students will apply their knowledge of theories of play pedagogy and the principles of The Early Years Learning Framework to consolidate their understandings of the importance of play for children birth to 5 years. Students will further develop skills in observing and analysing children's play and plan play experiences for young children.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions

Students must be enrolled in 1879 Bachelor of Education (Birth – 5 Years) and have completed 80cp in that program.

Learning Outcomes

- Explain the changing nature of play, including digital play and contemporary perspectives on play.
- Explore diversity in children's play; its nature, contexts and opportunities, from family perspectives, including community and Aboriginal and Torres Strait Islander values and expectations about play.
- Investigate the role and value of play in fostering children's development, learning, and wellbeing in early childhood settings.
- Examine classical and modern theories of play.
- Analyse children's play based on observations and documentation.
- Apply knowledge of theories of play in designing developmentally and culturally appropriate play experiences, considering context, safety, resources and inclusivity.

Subject Content

- Changing nature and perspectives on children's play
- Categories of play - physical/outdoor, creative, linguistic/heuristic, emotional and creative, digital
- The value of children's play
- Children's play in diverse families and communities
- Play and children with additional needs
- Theoretical foundations of play
- Play curriculum and pedagogy
- The Early Years Learning Framework

Special Requirements

Legislative pre-requisites

Students must satisfactorily complete Child Protection Awareness Training, have Working with Children Check certification and ASCIA anaphylaxis training prior to undertaking visits in an early childhood setting.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	10% each; 45 minutes for each quiz	20	N	Individual
Critical review	1,600 words (400 words for each reading)	40	N	Individual
Portfolio	1,500 words	40	N	Individual

Description The unit is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This unit is a service learning unit that focuses on the link between the school and the community. It incorporates a 5 day placement in a local school to enable students to develop their understanding of the value of community involvement for a school. Students will negotiate a project in the school that links the school with their community. They will build a research base in the areas of community engagement and service learning with an emphasis on the benefits to both student, the community, the school, the teachers and the school children. They will learn how to plan, negotiate, implement and use reflective practices to evaluate their project.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects TEAC 2007 - Connecting Schools and Communities

Restrictions Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the services available to schools from the community.
2. Explain the benefits of community involvement and service learning to schools, themselves and the community.
3. Liaise with their local school, community, community organizations and businesses.
4. Design and implement a small negotiated school-based project related to community involvement.
5. Create a multimodal and written project report with supporting evidence.

6. Identify the principles of self-evaluation and appraisal.
7. Critically evaluate and gauge their own progress and be capable of articulating how and in what ways they have developed.
8. Examine and demonstrate ethical considerations relating to teaching and the practice of research involving individuals from diverse groups.
9. Integrate and apply professional approaches while working in school and community settings including child protection obligations.

Subject Content

1. School - Aboriginal and Torres Strait Islander community links & projects.
2. Communities of practice within school settings that embrace support personnel from the extended community. Community engagement and establishing partnerships.
3. Understandings of agency settings specifically aimed at improving the educational outcomes for disadvantaged learners.
4. Issues faced by learners from diverse groups including those of Aboriginal and Torres Strait Islander backgrounds.
5. Understandings about reflective and reflexive practice.
6. The use of evidence-based strategies for appraising achievement and documenting experiences.
7. Collating and reporting in a professional learning portfolio.
8. Knowledge integration through theory, service learning experience and relevant policy and its application in school settings.
9. Knowledge construction and skill development related to civic engagement and people from a range of backgrounds.
10. Program development, application and evaluation for improving educational outcomes for individuals from diverse groups.
11. Ethics related to service learning, teaching practice and research.
12. Professional conduct and legal obligations in child protection

Special Requirements

Legislative pre-requisites

Students must have: Working with Children Check, Completion of Child Protection Training, Anaphylaxis certification.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Report: Annotated bibliography and project plan	1,000 words	40	N	Individual
Presentation: Multimodal, oral and written project reflection	10 minute presentation	30	N	Individual

Report: Implementation and evaluation of negotiated community-school project	Plus 500 words and reflection	30	N	Individual
Practical: Service Learning	5 days equivalent	S/U	Y	Individual

Legacy Code 102048

Coordinator Katina Dimoulis ([https://directory.westernsydney.edu.au/search/name/Katina Dimoulis/](https://directory.westernsydney.edu.au/search/name/Katina%20Dimoulis/))

Description In this subject students will engage in an exploration of what it means to be a child in a postmodern world and how different theoretical approaches influence ways of understanding children's lives. Alongside questions of how gender, sexuality, ethnicity, 'race', language, class, ability and religion are constituted through a child's identity, students will explore the notion of a child's subjectivity. A child's subjectivity is the conscious and unconscious thoughts and emotions of the child, their sense of self, their body and their way of understanding their relationship to the world. Building on this knowledge, students will also explore the four key child-environment identities of the physical child, the social child, the learning child and the natural child and by analysing a variety of scholarly and non-scholarly texts around childhood, children's bodies and behaviour will reflect on a child's individuality and emerging identity.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects TEAC 2012 - Contemporary Perspectives of Childhoods TEAC 2010 Contemporary Childhoods (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

- Investigate diverse texts, images, practices and constructions of what it means to be a child in contemporary society.
- Discuss the social meaning of childhood including the historical, social and political factors and how they have influenced changing views of children and childhood.
- Explain how different theoretical perspectives have positioned children and childhood as a social construction.
- Identify the ways in which gender, sexuality, ethnicity, 'race', language, class, ability and religion are constituted through a child's identity and the significance of this on everyday lived experiences.
- Examine how social, institutional and cultural constructions of childhood play a role in shaping children's identities, subjectivities and everyday lives.
- Examine the ways in which children negotiate and construct their identities in contexts of diversity and difference.
- Describe how children's rights and responsibilities are enacted by children and adults.
- Describe how child-environment identity is connected to place, space, location and time.

Subject Content

- Who is, and what does it mean to be a child in a postmodern world?
- Analysis of texts, images and constructions about 'the child'.
- Introduction to contemporary national and international theories and philosophies related to the child.
- Significance of gender, sexuality, ethnicity, 'race', language, class, ability and religion and how they are constituted through a child's identity and everyday lived experiences.
- Questions of subjectivity and a child's sense of self, body, and relationship to the world.
- Children's negotiation of identity and difference in a globalised world.
- Rights and responsibilities of the child.
- Child-environment identity and connections to place, space, location and time through encounters with tangible social-cultural artefacts such as toys, homes, landscapes, animals, digital technology.
- Constructions of diversity and difference in education and community settings.

TEAC 2011 Contemporary Issues in Aboriginal Education

Credit Points 10

Legacy Code 102121

Coordinator Cameron Thomson ([https://directory.westernsydney.edu.au/search/name/Cameron Thomson/](https://directory.westernsydney.edu.au/search/name/Cameron%20Thomson/))

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to meet the needs of teachers entering the profession who require in depth knowledge of the field which frames Australia's Aboriginal identity. It investigates both Aboriginal historical perspectives and interactions

with educational institutions and the policies which frame the delivery of Aboriginal content and resources to all students. The subject provides a contextualised framework on which many Key learning area's perspectives and background knowledge delivery is based. The subject specifically relates to working successfully with Aboriginal children, families and communities in educational and social settings. It will examine relationships between Aboriginal and non-Aboriginal societies, social indicators and also critique the impacts of current policy changes in areas such as self-determination, representation, mutual obligation and perspectives for positive, respectful educational outcomes for future generations of students.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects EDUC 1006 - Issues in Aboriginal Education

Restrictions

Students must be enrolled in 1717 - Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the origins, history and contemporary issues and initiatives of Aboriginal and Torres Strait Islander people.
2. Show respect for present and past Aboriginal and Torres Strait Islander cultures.
3. Describe Australia's history of 'settlement', colonisation, invasion and the development of sustainable futures for Aboriginal peoples.
4. Explain the importance of teaching Aboriginal Studies and cross curriculum perspectives in the context of Australia as a contributing nation to developing a global society.
5. Create appropriate Aboriginal Studies teaching and learning activities for HSIE and other curriculum areas in classrooms.
6. Evaluate appropriate Aboriginal and Torres Strait Islander Studies teaching resources and the importance of consultation with Indigenous communities.

Subject Content

1. Social systems and kinship; significance of country, language, cultural continuum
2. What are the historical understandings required in order to deliver strong Aboriginal perspectives in HSIE classrooms (Topics Pre-invasion' – kinship and social systems, significance of land, language, 'Post Invasion' –war, segregation, assimilation, self-determination, reconciliation, Stolen Generations, Aboriginal health, wellbeing and esteem issues, closing the GAP, Origin theories, Native Title, Mabo, Wik, Mutual Obligation, sovereignty)
3. Mutual Obligation, aspirations, sovereignty and future directions as evidence through the UN Declaration on the Rights of Indigenous people
4. What are Aboriginal people's relationship with the History of Aboriginal education in NSW and Aboriginal Education Policies
5. What are the currently available on-line resources to support curriculum delivery to Aboriginal students and Aboriginal communities
6. What are the models and programs to promote social inclusion for Aboriginal students and Aboriginal families

TEAC 2013 Creative Arts

Credit Points 10

Legacy Code 102125

Coordinator Sarah Pacey ([https://directory.westernsydney.edu.au/search/name/Sarah Pacey/](https://directory.westernsydney.edu.au/search/name/Sarah%20Pacey/))

Description The unit is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This unit introduces students to theoretical models and sound pedagogical practices of using Music, Media Arts and Visual Arts in the primary classroom. Collaborative, experiential and blended learning as well as reflective practices are the key operating principles of the unit. Students will explore the theory and practice of the arts in the education process of children through practical and professional experiences. The unit provides an understanding of the importance of the art forms, both as powerful teaching and learning strategies across the primary curriculum and as creative arts in their own right in the K-2 classroom.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects EDUC 2008 - Creative Arts 2

Restrictions

Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Design, implement and evaluate lessons, in each art form, based on the Creative Arts syllabus and the relevant documents.
- Explain the principles and practices of teaching, learning and assessing, Music, and the Visual Arts.
- Exhibit practical skills, and broad, critical knowledge in the discrete forms of Dance, Drama, Music, Visual and Media Arts.
- Apply different models of pedagogy for teaching and assessing Music, and Visual Arts.
- Apply critical reflection to their own learning and practice within each of the art forms of Music, and Visual Arts.
- Explain the nature and role of the creative arts in relation to current and emerging concepts and philosophies.
- Identify and plan for Aboriginal perspectives embedded in the new NSW Creative Arts syllabus for the Australian Curriculum.

Subject Content

- Broad and critical knowledge and understandings of the theory, principles and practices related to Dance, Drama, Music, Media Arts and Visual Arts and in the integration of these art forms.
- Curriculum concepts, strategies and content in Dance (performing and composing), Music (singing, playing and moving, and organising sound), and Visual Arts (2D, 3D/4D, and art history), and in the integration of these subjects across the arts and across the curriculum, including Literacy and Aboriginal and Torres Strait Islander perspectives.
- Designing, making and appreciating in each of the art forms, based on the NSW Creative Arts K-6 syllabus/Australian Arts Curriculum with a focus on K-2.
- Effective classroom management and teaching strategies for teaching and learning in the Creative Arts.
- Planning an integrated creative arts program to include all five art forms, based on relevant literature and pedagogies within a primary classroom.
- Range of strategies for teaching, reflecting on and assessing in the Creative Arts.
- Workstations in the primary Creative Arts program

TEAC 2014 Cultural Diversity, Society and Learning

Credit Points 10

Legacy Code 102120

Coordinator Sarah Pacey ([https://directory.westernsydney.edu.au/search/name/Sarah Pacey/](https://directory.westernsydney.edu.au/search/name/Sarah%20Pacey/))

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Teachers are required to understand the diverse cultural make up of schools and how to teach a diverse range of children. Using sociological and cultural theory, the subject examines conservative, liberal and radical approaches to cultural diversity in education. This cultural diversity includes dimensions of gender, religion, ethnicity, race, class, language and sexuality. The subject develops cultural literacy through the application of various theories such as Marxist and feminist-post structuralist analysis of these social relations to cultural diversity; pedagogy and cyberspace. Within this framework it is also essential that teachers engage with and understand the diversity and fluidity of individuals and the broader Australian community in order to promote equitable practices in schooling and to facilitate educational and professional transformation. Developing understandings of society, culture and the formation of subjectivities will promote an enhanced awareness of equity issues as well as crucial analytical and critical tools to address the needs of diverse students, their families, teachers, and the broader school community.

School Education

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects EDUC 1001 - Cultural Diversity Society and Learning

Restrictions

Students must be enrolled in 1717 - Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explore the relationships between Social Identities, institutional power and discourses in a variety of political contexts through sociological frameworks;
2. Examine the historical, social and political circumstances which have shaped postcolonial Australian identities;
3. Evaluate different ways that individual subjectivities are socially constructed within sociocultural and educational contexts;

4. Examine the changing nature and role of family and family diversity and how educators can help sustain the capacity of families, communities and the school to engage all students.
5. Identify complexities within the construction of conformity and non-conformity in school sociocultural contexts related to age, gender, sexuality, 'race', class, ethnicity, ability, language and religion;
6. Examine relevant policies and legislative requirements related to rights and responsibilities of students, parents, other community members and teachers in relation to cultures of schools and the effects on learning.
7. Evaluate key representations of identities and cultural groups in popular culture, with a particular focus on the popular media, e.g. television, games, internet sites, using different theoretical lenses.

Subject Content

1. Key sociological concepts and their relationship to education including but not limited to: culture; 'Whiteness'; White privilege; subjectivity; discourse; power; knowledge; discipline; embodiment; surveillance; silence; normalisation; punishment; habitus; capital; field.
2. Policy and legislation pertaining to school-based issues regarding access and equity.
3. Discrimination, prejudice and privilege; bullying, cyber bullying, violence and its manifestation in educational contexts.
4. Social construction of childhood and family. Political, economic and social policy perspectives. Contemporary debates.
5. Theories of diversity and difference.
6. Understanding culture as constituted in class, ethnicity, racialization, gender and sexualities.
7. Aboriginal and Torres Strait Islander heritage and cultural practices and their links to the educational outcomes of Aboriginal and Torres Strait Islander learners.
8. Site of analysis – cultural diversity, pedagogy and cyberspace
9. Critical reading of academic texts and oral presentation skills.

Assessment

TEAC 2015 Diversity and Difference

Credit Points 10

Legacy Code 101112

Coordinator Christine Jones Diaz ([https://directory.westernsydney.edu.au/search/name/Christine Jones Diaz/](https://directory.westernsydney.edu.au/search/name/Christine%20Jones%20Diaz/))

Description This subject introduces students to a range of contemporary theoretical frameworks that will develop their understandings about the social construction of difference, identity and subjectivity within social, historical and political contexts. A critical awareness of the intersections between language, knowledge, power and discourse provides students with the practical and theoretical tools necessary for reflecting, analyzing and deconstructing inequalities and subjectivity in personal and professional contexts.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects LGYA 0317 - Diversity and Difference 2 Understanding the 'Self' in Socio-Cultural Contexts

Learning Outcomes

After successful completion of this Unit, students will be able to:

1. Understand the social construction of gender, sexuality, 'race', ethnicity, language, age, ability, religion and class;
2. Critique processes of power in sociocultural, historical and political contexts through feminist poststructuralism, critical, cultural and post-colonial frameworks;
3. Recognise the historical, social and political circumstances which have shaped postcolonial Australian identities;
4. Explain how subjectivity, identity, knowledge, and power operate in contexts of equity, diversity and difference;
5. Analyse the different ways that individual subjectivities are socially constructed within socio-cultural and educational contexts;
6. Articulate the relationships and intersections between social identities, institutional power and discourses;
7. Analyse the construction of 'difference' and 'deviance' and processes of 'othering and marginalisation in sociocultural contexts related to age, gender, sexuality, 'race', class, ethnicity, ability, language and religion;
8. Identify the implications of equity and social justice issues for children, families and staff in early childhood settings and schools from minority communities.

Subject Content

1. Feminist poststructuralism, cultural, critical and queer theory, concepts of normalisation and post-colonial perspectives

2. Cultural capital and relations of power in macro and micro contexts
3. Discourse
4. Language, knowledge and discourse
5. Subjectivity and identity
6. Agency and subjectivity
7. Relationships and intersections between social identities, institutional power and discourses
8. The construction of difference, deviance and innocence in the construction of social identities
9. Processes of othering and marginalization in discursive and institutional contexts
10. Equity and social justice for children, families and staff from minority communities

Coordinator Michele Simons ([https://directory.westernsydney.edu.au/search/name/Michele Simons/](https://directory.westernsydney.edu.au/search/name/Michele%20Simons/))

Description This unit provides opportunities for students to examine theories and practices associated with Transformative Learning in relation to their personal development as educators. Transformative Learning is learning that is empowering, deep and life changing. It and similar ways of approaching learning - the holistic, ecological and systemic - share a reflective base. All are inquiries into the relationships that make learning work. Students investigate these as theoretical and practical approaches to learning in real world settings: as powerful educational feedback systems. This unit combines the design and practical enactment of theoretically grounded approaches to socially relevant and personally meaningful learning.

Discipline Teacher Education

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain transformative learning theory through reference to key writers in the field;
2. Analyse transformative learning theory through reference to personal learning experiences;
3. Apply transformative learning principles to the design of teaching and learning activities;
4. Articulate an understanding of the relationship between transformative, holistic, ecological and systemic perspectives;
5. Evaluate personal participation, reflection and vulnerability in transformative learning systems;
6. Synthesise the process and outcomes of a transformative learning initiative in the university class context.

Subject Content

1. Theoretical models of transformative learning and variations in emphasis developed by key writers in the field;
2. Relationships between transformative learning and holistic, ecological, systemic models and critiques;
3. The transformative perspective in teaching and learning: transmission, transaction and transformation in educational practice;
4. Transformative Learning and vulnerability: emotion and sensitivity in learning about and designing educational futures;
5. Participation, reflection, transformation and the systemic perspective in progressive social change and cultural development;
6. Case studies of transformative, holistic and ecological initiatives in education and social change.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Essay	2,000 words	50	N	Individual
Critical reflection	1,000 words	50	N	Individual

TEAC 2018 Education for Sustainability

Credit Points 10

Legacy Code 101663

Coordinator Annette Sartor ([https://directory.westernsydney.edu.au/search/name/Annette Sartor/](https://directory.westernsydney.edu.au/search/name/Annette%20Sartor/))

Description Increasingly, the need to develop sustainable ways of living that can reduce our ecological footprint and conserve precious natural resources for future generations is recognised as a critical concern of education at all levels. Developing 'sustainability literacy' requires new ways of thinking and learning that enable us to recognise the connections between environmental concerns, social patterns and individual actions. This unit approaches key issues in sustainability education with a learner-centred approach that builds skills for inquiry, analysis and creative action and involves a three-hour field trip. It promotes personal and social change, develops civic values and empowers learners to be leaders for a sustainable future.

School Education

Discipline Teacher Education

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate a critical understanding of the concept of sustainability
2. Describe the ways that living systems exist and interact
3. Identify major sustainability concerns, what contributes to them and ways to address them
4. Analyse the production-consumption-disposal cycle of a selected consumable and associated sustainability impacts
5. Identify actions required for promoting sustainability at the personal, local, national and global levels
6. Evaluate the role of values, action, creativity and collaboration in education for sustainability
7. Design, conduct and evaluate a sustainability education initiative.

Subject Content

1. Sustainability as a concept and a value system
2. Educational frameworks for promoting sustainability
3. Thinking like a system ? the ecological web
4. Ecological footprints ? resources, consumption and carrying capacity
5. Environmental impacts ? climate, biodiversity, social justice
6. Getting active ? personal and community action for sustainability

7. Teaching sustainability ? sustainable schools
8. Place-based learning
9. The social ecology of sustainability & change
10. Education for peace
11. Making a difference ? design for learning and action

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Reflection	800-1000 words	20	N	Individual

TEAC 2020 Educational Psychology for Teaching Children

Credit Points 10

Legacy Code 102126

Coordinator Milena Ilisevic (<https://directory.westernsydney.edu.au/search/name/Milena+Ilisevic/>)

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Responsive teaching engages students holistically in learning that is tailored to meet their physical, cognitive, social, emotional and developmental needs. This subject will consider the learning needs and styles of primary children, including Indigenous children. It will introduce key approaches to instruction based on theories and research in educational psychology. A particular focus will be the development of children's sense of self and the ways that children's school experiences interact with cultural and familial influences to shape identity, motivation and engagement throughout the primary years. Particular emphasis is given to developing responsive teaching practices which promote social and emotional wellbeing of children and are underpinned by high-quality relationships which extend to include the valuing of families and the wider community.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects EDUC 2002 - Educational Psychology for Primary Teaching

Restrictions

Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe children's physical, cognitive, social and emotional development and ways that teachers can respond to different learning styles and needs.
2. Apply theoretical understandings from educational psychology to constructing responsive learning environments for primary children, including Indigenous children.
3. Explain how children's sense of self develops in the context of socio-cultural, familial and school influences, with particular attention to the impacts on school motivation and engagement.
4. Apply cooperative group learning structures to address teaching and learning goals.
5. Apply appropriate and effective practices to promote positive behaviour and student wellbeing.
6. Utilise strategies for building rapport with primary students & responding to a range of student wellbeing needs including communication with parents, guardians and caregivers.

Subject Content

1. Development in context: Bronfenbrenner's ecological model
2. Learning, cognition and memory: Learning as a constructive process
 - Information processing theories
 - Metacognition and self-regulation
3. Learning in context: Theories of learning and their implications for instruction and constructing learning environments
 - Behaviourism
 - Social cognitive theory
 - Constructivism
 - Humanism
 - Instructional strategies applied to learning in context
 - Motivation and affect
 - Learning and teaching preferences for Aboriginal and Torres Strait Islander peoples
4. Children's development and related needs in context:
 - Cognitive, physiological, and social/affective development
 - Moral and prosocial development
 - Identity development and dispositions
 - Sense of self and peer relations
 - Aboriginal and Torres Strait Islander development in context
5. Positive learning environments and supporting children's wellbeing
 - Sociocultural factors influencing mental health and wellbeing of children
 - Risk and resilience
 - Belonging and inclusion
 - Cultivating high-quality respectful relationships
 - Initiatives and resources for promoting positive development
6. Issues and prevalence of mental health for Aboriginal and Torres Strait Islander peoples

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Critical Review: Case Study Linked to school health and well-being policy	1800 words	50	N	Individual
PowerPoint Presentation: voice over Supporting Student Engagement and Learning	15 slides plus 50		N	Individual

TEAC 2021 Engaging Learners

Credit Points 10

Legacy Code 102674

Coordinator Denise Fraser ([https://directory.westernsydney.edu.au/search/name/Denise Fraser/](https://directory.westernsydney.edu.au/search/name/Denise%20Fraser/))

Description This subject supports a developing understanding of the principles and practices of early childhood curriculum and pedagogy. A range of approaches to curriculum and pedagogy will also be examined. Students will learn about approaches to observing and documenting children's learning in ways that celebrate children's competencies and build connections between children, families and educators while also identifying any areas where children's experiences may be extended. Students will develop strategies for planning and connecting curriculum to children's social worlds which facilitate children's in-depth investigations and critical thinking in ways that cater for diverse interests.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions

Students must be enrolled in 1879 Bachelor of Education (Birth – 5 Years) and have completed 80cp in that program.

Learning Outcomes

1. Explain the theoretical bases of learning, development and play.
2. Critically analyse a range of curriculum approaches and pedagogies.
3. Discuss the influence of different contexts on curriculum and pedagogies.
4. Observe, document and assess children's interests, funds of knowledge, learning, development and play.
5. Create learning experiences that engage children and support investigation, critical thinking and problem solving.
6. Critique strategies for engaging children from diverse communities, including Aboriginal and Torres Strait Islander backgrounds, as competent and capable learners.

Subject Content

1. Theoretical underpinnings of early childhood curriculum - theories of learning, development, and motivation, play based pedagogy
2. Approaches to Curriculum: Child centred curriculum - Inquiry Based Learning, Emergent Curriculum, Project approach, Reggio approach
3. Observation, documentation, assessment and planning
4. Strategies to engage diverse learners; investigating, inquiry learning, questioning, facilitating, sustained shared thinking, deep thinking, sensory play with children aged 0-2
5. Using questioning to facilitate thinking across the curriculum (mathematical thinking, scientific thinking, critical thinking, creative thinking, problem solving, cooperative thinking)
6. Reflective thinking on engaging children

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Essay	1,000 words	20	N	Individual
Reflection	1,500 words	40	N	Individual
Professional Task	1,500 words	40	N	Individual

TEAC 2023 Engaging the Professional Educator

Credit Points 10

Legacy Code 102673

Coordinator Denise Fraser ([https://directory.westernsydney.edu.au/search/name/Denise Fraser/](https://directory.westernsydney.edu.au/search/name/Denise%20Fraser/))

Description This subject incorporates 20 days of professional experience in an early childhood setting. Prior to external practicum work, students engage in intensive on campus coursework. The coursework prompts students to reflect on the nature of early childhood teaching, their role as teachers in teaching and learning, the frameworks that guide practice and contemporary issues related to teaching young children. Students also apply skills in observation-based assessment of children's interests, development, dispositions and learning, explore curriculum decision making based on their

assessments of learning and development and other strategies to facilitate children's engagement, learning and development.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions

Students must be enrolled in 1879 Bachelor of Education (Birth – 5 Years) and have completed 80cp in that program.

Learning Outcomes

1. Describe the relationships between elements of the National Quality Framework.
2. Articulate the implications of positioning children as active social agents for teaching and learning.
3. Apply strategies for effectively partnering with families to support children's learning and development.
4. Assess and document children's interests, development, dispositions and learning using a range of techniques consistent with the outcomes of the Early Years Learning Framework.
5. Design learning experiences that promote engagement and reflect children's interests, development and funds of knowledge.
6. Exercise initiative, responsibility, professional communication skills and ethical practice, as an educator.

Subject Content

1. Policy frameworks guiding the work of teachers
2. Children's rights as learners
3. Curriculum decision making
4. Teaching for learning
5. Partnering with families

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, pre-service teachers must have satisfactorily completed the online Child Protection Awareness Training, a current Working with Children Check, and the online course ASCIA e-Anaphylaxis for education and care.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

Legacy Code 102645

Coordinator Kerry Staples ([https://directory.westernsydney.edu.au/search/name/Kerry Staples/](https://directory.westernsydney.edu.au/search/name/Kerry%20Staples/))

Description This unit explores the importance of engaging with children, families, colleagues and communities of diverse backgrounds to foster a child's learning, health and well-being. Preservice educators will reflect on complex interrelationships between theories, research, policies and practices and the importance of positive relationships and partnerships with children, families, colleagues, and communities. Students will explore discourses associated with disadvantage through the analysis of children's life experiences and contexts. In this way, preservice educators will gain an understanding of the nuances of working collaboratively and in partnership with children, families, colleagues, and communities, including strategies to work ethically, sensitively and confidentially.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions Students must be enrolled in the Bachelor of Education (Primary) and have successfully completed 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate understanding of children and families within an ecological context and the influence on learning, health and well-being;
2. Discuss the complex interrelationships between learning, children, family, community contexts and policies;
3. Reflect on theoretical principles and current research on changing practices of collaborating with children, families, colleagues and communities, and specialist professionals, including community liaison officers;
4. Evaluate the application of a broad a range of strategies to effectively partner with children, families, colleagues and community in learning contexts;
5. Reflect on ethical, sensitive and confidential approaches to working collaboratively;
6. Analyse contemporary approaches to strengthen engaging with children, families, colleagues and community;
7. Work collaboratively to design a responsive community program that enhances outcomes for children, families and communities.

Subject Content

- theories, principles, practices and Philosophical frameworks that inform partnerships with children, families of diverse backgrounds and communities
- role of teachers in developing strategies for strengthening relationships with children, family, colleagues and community
- Aboriginal and Torres Strait Islander and culturally and Linguistically diverse backgrounds
- ecological contexts and their influence on learning, health and well-being

- Policies and frameworks relevant to children, family, colleagues and community engagement
- strategies and Ethical approaches to effectively collaborate with children, family, colleagues and community
- engagement with children, family, colleagues and community

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 2025 English Language Analysis

Credit Points 10

Legacy Code 102439

Coordinator David McInnes ([https://directory.westernsydney.edu.au/search/name/David McInnes/](https://directory.westernsydney.edu.au/search/name/David%20McInnes/))

Description In this subject, students will develop a thorough understanding of the structure of English and the use of English across contexts. Students will study the workings of the English language, including its sounds, grammar, syntax and textual forms, through the analysis of diverse texts. The skills developed through the analysis of real-world texts throughout the subject will prepare students for effective participation in a range of personal and professional contexts, enhancing their capacity for study and for employment.

School Humanities & Comm Arts

Discipline English as a Second Language Teaching

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the grammatical structures of English at the word, phrase, clause and sentence level.
2. Apply grammatical analyses to real world contexts.
3. Explain how context impacts the use of English.
4. Prepare and write a report on the analysis of extended textual samples.
5. Critically consider the role language plays in effective communication.

Subject Content

English sounds, words and grammar.

The analysis of phrases, clauses, sentences and texts.

Semantics and pragmatics.

Cohesion and coherence.

Texts and genres in context.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Discourse Analysis (in class) x9	20-30 minutes each	60	N	Individual

TEAC 2026 Ethical Practice

Credit Points 10

Legacy Code 102668

Coordinator Denise Fraser ([https://directory.westernsydney.edu.au/search/name/Denise Fraser/](https://directory.westernsydney.edu.au/search/name/Denise%20Fraser/))

Description Professionals working with children, young people and families must base all action on sound ethical and legal foundations. In

this subject students are introduced to the concept of professionalism and oriented to the ethical aspects of the teaching profession, the policy, guidelines and codes that apply to teachers. In particular students are introduced to the Early Childhood Australia Code of Ethics. Contemporary and global approaches to ethics and critiques of traditional western approaches are introduced. The subject is also designed to build leadership capacity through an understanding of contemporary issues in educational policy and practice and an exploration of the concepts of social justice and advocacy.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions

Students must be enrolled in 1879 Bachelor of Education (Birth – 5 Years).

Learning Outcomes

1. Explain what it means to be a professional.
2. Reflect on the interrelationship between personal and professional values.
3. Examine the application and implications of traditional and contemporary ethical frameworks and tools that support wise professional practice.
4. Apply policy, legislation, codes of practice and ethics in professional contexts.
5. Analyse the embedded ethical and political dimensions of contemporary issues in early childhood policy and practice.
6. Discuss processes for promoting ethically informed advocacy, activism, transformation and change.

Subject Content

1. Professions and Professionalism
2. Morals, values and ethics
3. Contemporary and traditional ethical frameworks
4. Decision making tools and theories
5. Policy, legislation, codes of conduct and ethics, particularly the Early Childhood Australia's Code of Ethics
6. Agency, citizenship and democracy
7. Advocacy and activism

Assessment

TEAC 2029 Fundamentals for Working Mathematically

Credit Points 10

Legacy Code 102208

Coordinator John Ley ([https://directory.westernsydney.edu.au/search/name/John Ley/](https://directory.westernsydney.edu.au/search/name/John%20Ley/))

Description In this unit students will acquire a variety of problem solving, investigation and mathematical modelling techniques that incorporate the application of algebra and highlight the importance of understanding probability, data and graphical representations in real life. Students will apply mathematics in real contexts; evaluate data gathered in real time and identify patterns while engaging with the concepts of number, probability, measurement, problem solving, linear and exponential representations. Engagement with this unit contributes directly to the achievement of a sound understanding and application of mathematical concepts and develops mathematical thinking.

School Education

Discipline Teacher Education

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects TEAC 2042 - Mathematics Principles and Applications

Restrictions Successful completion of 40 credit points at Level 1.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the occurrence of algebraic patterns and relationships in real life contexts;
2. Use deductive reasoning to justify and support conclusions that are appropriate to the context;
3. Analyse the relationships between data and graphical representations and evaluate their validity;
4. Demonstrate research strategies as part of the investigation process and apply them in an appropriate manner to real life data;
5. Demonstrate the development of mathematical thinking by identifying ways to extend mathematical concepts;
6. Demonstrate the relationships between functions and graphical representations;
7. Apply fundamental concepts of problem solving and mathematical modelling;
8. Apply knowledge of problem solving and the modelling process in variety of mathematical applications.

Subject Content

1. Algebraic reasoning and application (Reasoning, Communication Fluency, Problem Solving)
 - Basic concepts, principles and relationships
 - application of algebraic techniques in Problem solving
 - links between graphical representation and linear and exponential functions
2. Statistical representations (Communication, Reasoning, Fluency)
 - patterns and relationships in real life data including proportional representation
 - analysis of graphical representations including misrepresentations

- Basic concepts and principles of graphical representations
- 3. Mathematical Problem Solving and Modelling (Problem Solving, Communicating, Reasoning, Understanding, Fluency)
- Basic concepts and principles of Problem solving and investigations
- mathematical modelling as structured Problem solving
- Working mathematically through communication of reasoning
- 4. Mathematical Applications including modelling techniques (Understanding, Fluency, Reasoning)
- common everyday applications including financial literacy
- use of Technology for mathematical modelling
- Investigate The principles of probability and their applications

TEAC 2030 Health and Physical Education

Credit Points 10

Legacy Code 102124

Coordinator Zara Ruggero ([https://directory.westernsydney.edu.au/search/name/Zara Ruggero/](https://directory.westernsydney.edu.au/search/name/Zara%20Ruggero/))

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Students will work on developing their knowledge

and understanding of Health and Physical Education (HPE). This subject is designed to introduce the NSW Syllabus for the Australian Curriculum: Personal Development, Health and Physical Education K-10 (incorporating Health and Physical Education K-6). Through an examination of the syllabus, modules and support documents, students will develop the necessary skills to design an effective scope and sequence for K-6 Health and Physical Education (HPE) and develop a program of work suitable for a specific stage of learner K-2. Assessment and evaluation will be addressed and the need to develop descriptive student profiles relating to student achievement of outcomes will be highlighted.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects EDUC 2005 - Personal Development Health and Physical Education 1 (AREP)

Restrictions

Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the central concepts, modes of enquiry and structure of H and PE, including recent theory and practice, and Aboriginal content embedded in H and PE Syllabus.
2. Explain the nature and role of H and PE as a discipline for supporting the development of health and wellbeing.
3. Demonstrate competence in fundamental movement skills through areas such as dance, gymnastics, games and sports and a range of physical activities.
4. Apply understandings of assessment and children's learning within the H and PE K-6 key learning area with a focus on K-2.
5. Utilise a variety of teaching, behaviour and organisational management strategies to cater for the range of diverse learners.
6. Design and implement programs, lessons and scope and sequence, using knowledge of the NSW syllabuses or other curriculum requirements
7. Explain the role and value of H and PE in the broader school curriculum.
8. Select and utilise an array of resources designed to meet the needs of diverse K-2 students in the H and PE K-6 including Aboriginal and Torres Strait Islander content and catering for students with special needs.

Subject Content

1. Active Lifestyle - Ways to be physically active, class games, forming groups, instructing, demonstrating, correcting technique, providing feedback, competition & cooperation, teaching & coaching, safety, learning types, etc. Obstacle courses, Ball games, Circuits / Tabloids, Partner Activities, Effects of physical activity.
2. Games and Sports - Fundamental Movement Skills & motor development, learning stages, Invasion Games, Game Sense, Primary Schools sports program– Striking games, Net/Wall/Court games, modified games.
3. Safe Living: Strategies for keeping safe, including Road Safety Unit.
4. Programming and Planning in Primary Classrooms

5. Assessment - assessing students' health and well-being; assessment tools; assessing risk, and risk management practices in the Health and Physical Education (H and PE) space.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 2031 History, Geography, Civics and Citizenship

Credit Points 10

Legacy Code 102122

Coordinator Suzanne Kenney (https://directory.westernsydney.edu.au/search/name/Suzanne_Kenney/)

Description The unit is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This unit provides opportunities for students to develop knowledge of the outcomes, subject matter, pedagogies and experiences that define the key learning area of History, Geography, Civics and Citizenship (HSIE). Key concepts of change in family history, local history, and Australia's history and understanding Australia as a Nation are explored. In Geography, concepts that develop a sense of curiosity about environments, peoples, cultures and place, in both Australia and the world, are a priority. In Civics and Citizenship, the focus is on relationships between the individual and the state, and the values and mutual responsibilities and obligations for civil, political and social participation in Australian society. It enables students to develop their own content knowledge and understandings, skills and dispositions necessary for planning, programming and teaching HSIE K-6. It promotes teaching strategies that prepare primary children for informed and effective citizenship, contributing to the quality of their society and environments.

Restrictions Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Apply knowledge of the disciplines, theories and pedagogies that underpin the learning area of HSIE K-6 to learning design.
- Explain the aim, outcomes, stage statements, subject matter, skills, attitudes and values, perspectives and experiences defined in the NSW HSIE K-6 syllabus, and History, Geography and Civics and Citizenship syllabus documents in designing learning experiences for diverse learners in primary classrooms.
- Design HSIE lesson sequences, programs, scope and sequence and assessment items using knowledge syllabuses and other curriculum requirements.
- Identify and apply to lessons Aboriginal perspectives embedded in the HSIE K-6 syllabus.
- Use assessment strategies to assess children's learning within the HSIE K-6 key learning area.
- Explain the role and value of HSIE K-6 in the broader school curriculum and the relationship between HSIE K-6, and the general capabilities.
- Select and utilise an array of resources that cater to the needs of diverse K-6 students in HSIE K-6 including students with special needs.

Subject Content

- The discipline, epistemological and pedagogical theories that underpin HSIE in terms of History, Geography and Civics and Citizenship K-6.
- Nature and role of human society and its environment in relation to current and emerging concepts of change and continuity, cultures, environments, social systems and structures

3. History with a focus on Australia?fs history and understanding Australia as a nation, incorporating personal, local, national and global concepts, integration

Assessment

Credit Points 10

Legacy Code 102130

Coordinator Sarah McNabb ([https://directory.westernsydney.edu.au/search/name/Sarah McNabb/](https://directory.westernsydney.edu.au/search/name/Sarah%20McNabb/))

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Teacher education students develop understanding and skills that enable them to understand and assess the intellectual, emotional, social and physical needs of all children in the classroom. This subject assists teacher education students to develop appropriate skills, attitudes and methodologies to enable them to plan, implement

and evaluate programs which meet the educational needs of individual children with disabilities, learning difficulties and/or behaviour disorders as well as those who are gifted and talented. This subject also explores strategies and theoretical approaches which promote and enable inclusion and effective learning within the context of National and State policy and legislation.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects EDUC 2011 - Inclusive Education Practices - AREP

Restrictions

Students must be enrolled in 1717 - Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply theoretical understandings in special education and behaviour management to the construction of supportive and inclusive learning environments.
2. Design and implement individualised programs for learning and intervention based on sound understanding of theory and research-based strategies.
3. Apply theories of development, learning and behaviour to construct educational programs that meet the diverse needs of students with disabilities, learning difficulties and those who are gifted and talented.
4. Plan effectively for a diverse range of learners and use a variety of learning and teaching strategies to engage learners and maximise their potential.
5. Demonstrate appropriate and sensitive attitudes and practices in interactions with students with special education needs.
6. Plan programs and approaches which, whilst meeting the student's learning needs also acknowledge their culture and background.
7. Utilise practical approaches for promoting positive behaviour and supporting student engagement whilst maintaining effective both ways dialogues with parents and caregivers.

Subject Content

1. Policy and legislation to support inclusion, such as the Disability Standards for Education (2005) and the Disability Discrimination Act.
2. Systems and services to effectively support students with diverse learning needs.
3. Theory, research and practice in relation to the establishment and maintenance of inclusive classrooms to meet the diverse psychological, emotional and cognitive needs of learners.
4. Identification and documentation of individual behaviour and academic needs incorporating curriculumbased assessment for learning.
5. Design and implementation of individualised educational and behaviour management programs to meet specific individual and special needs.
6. Working in collaboration with families and multidisciplinary teams.

7. Diversity within and between families respecting family values and beliefs; and structured behaviour management strategies and processes for inclusion.

TEAC 2033 Indigenous Landscapes and Sustainability

Credit Points 10

Legacy Code 102133

Coordinator Dianne Burrell ([https://directory.westernsydney.edu.au/search/name/Dianne Burrell/](https://directory.westernsydney.edu.au/search/name/Dianne%20Burrell/))

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. The subject explores how Aboriginal ways of knowing country, and how tacit Aboriginal cultural knowledge embeds many of the principles of sustainability. Country defines First Nations people's identity and spirituality globally. The subject provides opportunity of the exploration and development of self and identity in terms of traditional stewardship practices that underpin the practice and principles related to the maintenance of place/country, language, spirituality. The subject builds awareness and understanding about Aboriginal 'ways of knowing' and 'caring' for Country. The subject provides community engagement opportunities for the exploration of oral traditions, language, writings about nurturing, visiting, talking, singing and feeling 'sorry' for Country. It will design a framework whereby as future educators they will be able to use an ecological approach to their teaching of significant global issues such as: sustainable land and energy use, the impact of human society on land and land management, global warming, the concept of self-sustaining systems and valuing sustainable patterns of living. The subject requires students to undertake visits to Environmental Field Studies Centres, the

UWS Sustainability Subject and local cultural learning centres to work with Elders.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects EDUC 2010 - Human Society and Its Environment 2

Restrictions

Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Identify and outline the features of 'knowing country', culture and place for Aboriginal and Torres Strait Islanders and the traditional of stewardship in communities
- Describe Aboriginal people's stewardship models in the broader understandings required to support more sustainable patterns of living (consideration of environmental, social, cultural and economic systems and their interdependence).
- Demonstrate knowledge and understanding of sustainability in the developing world and the responses to the challenges of living in them
- Assess and develop knowledge of appropriate resources, information and communication technologies, from a range of field and sites visits.
- Analyse the impact of politics and economics of environmental sustainability on Indigenous people at the global level.

Subject Content

- Spiritualities and the concept of Country, locally and globally using case studies of First Nations Communities
- Indigenous people's stewardship models
- The concept of sustainability
- The integration of Indigenous landscapes and sustainability as expressed through community, global and political forums
- Inquiry approaches to learning, development of cultural knowledge systems related to nature and the environment.
- The politics and economics of environment and Indigenous people's sustainability
- Environmental field study centres, cultural centres, museums, galleries and other learning centres.
- Knowledge- who owns 'Aboriginal knowledge'? Keeping knowledge safe, intellectual cultural property, policies and international law.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 2034 Language Assessment and Testing

Credit Points 10

Legacy Code 102475

Coordinator Julie Lim (<https://directory.westernsydney.edu.au/search/name/Julie+Lim/>)

Description This unit introduces students to fields of language assessment and testing in teaching English as a foreign/second language. It provides students with some insight into the key language components for assessment, assessment design and development. It also equips students with updated knowledge about different assessment approaches which impact on the teaching and learning of English as a foreign/second language in local and global contexts.

School Humanities & Comm Arts

Discipline English as a Second Language Teaching

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate understanding of key terms in language assessment and testing
2. identify and discuss various issues in language skills assessment and testing
3. use different and appropriate techniques and methods in language assessment and testing
4. design and develop valid and reliable language skills tests
5. demonstrate understanding of language assessment feedback and improve testing methods

6. apply language assessment and skills testing in specific educational contexts

Subject Content

Purposes of language assessment and testing
 Properties of language assessment (validity and reliability)
 Current second language proficiency assessment and issues
 Methods for language assessment and skills testing with reference to learner profiling and curriculum design
 Language assessment and test design and development with consideration of diverse education systems
 Development of valid and reliable international standardised tests
 Language assessment feedback and analysis for improving teaching and learning outcomes

TEAC 2037 Learning and Creativity

Credit Points 10

Legacy Code 101259

Coordinator Karin Mackay ([https://directory.westernsydney.edu.au/search/name/Karin Mackay/](https://directory.westernsydney.edu.au/search/name/Karin%20Mackay/))

Description This unit examines the inter-related processes of learning and creativity and the application and practice of these in all aspects of life. Learning and Creativity is contextual. This context is personal, social, cultural and environmental. The unit content is critically positioned within diverse theories, with an emphasis on

experiential learning and ongoing critical reflection. The unit promotes understanding of feeling and experience as much as concepts and ideas. It emphasises the tools and skills of learning, the everyday nature of creativity and enables students to develop and apply their creativity. It is designed for students interested in personal, community and cultural development, in the context of far reaching change.

School Education

Discipline Teacher Education

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and discuss the multiplicity of personal and social factors that contribute to learning and creativity using social ecology understandings;
2. Examine theory and examples from personal experience to the construction of learning and creativity and the contextual factors that determine this;
3. Apply key aspects of the creative process to learning styles and pedagogy;
4. Critically analyse the relationship between learning and creativity;
5. Document learning contained in works of personal creative expression;
6. Communicate understanding of the learning processes using creative arts;
7. Critically analyse the learning contained in creative representations

Subject Content

1. Personal and community stories of learning and creating,
2. Learning styles: preferred personal learning styles; and experiential creative arts-based pedagogy;
3. Power and learning: discourses, language and learning;
4. Learning, creativity and emotion;
5. Learning and power: resisting discourses; creativity in the margins
6. Learning, creativity and movement: the body as a learning system;
7. Learning, creativity and change with reference to performance theories;
8. Learning and ecological processes: ecology as a way of meaning making
9. Multiple epistemologies: learning through nature
10. Learning in action: feedback systems

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Presentation - Applied critical and creative study of learning using media or creative arts for personal, community & cultural development	10 minutes	35	N	Individual
Reflection - Evaluation of student's own learning from the presentation as an analytical narrative informed by relevant theory	500 words	15	N	Individual
Essay - Critical comparative reflection of experiential learning & literature	2000 words	50	N	Individual

TEAC 2038 Learning in Community Contexts

Credit Points 10

Legacy Code 102642

Coordinator Annette Sartor ([https://directory.westernsydney.edu.au/search/name/Annette Sartor/](https://directory.westernsydney.edu.au/search/name/Annette%20Sartor/))

Description This unit focuses on the role of the educator within a diverse, complex and changing society, including effective communication and professional collaborative relationships with children, families, practitioners and/or other professionals. It seeks to promote the importance of reciprocal and reflexive learning by positioning learning and effective teaching as highly dependent on the development of trust, rapport and critical understandings between individuals. In particular, the unit explores through an agency placement experience, social justice issues within educational contexts that may influence educational outcomes. It also provides a space to critically explore the nuances and subtleties of teaching and learning through individual and group interactions. This unit includes a placement requiring a minimum of 26 hours of work integrated learning and engagement in a community agency or educational setting. Mandatory requirements for this unit include Working with Children Check, anaphylaxis certification and Child Protection Awareness Training.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) TEAC 1023

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject:

1. Students are required to complete a Working with Children Check leading to the issuance of a clearance number under the category of volunteer.

Students will need to:

- Access the Commission for Children and Young People website and complete an online application form to generate an application number.
- Present an application number and identification to a NSW Motor Registry or Government Access Centre prior to issuance by mail a Working with Children Check number.
- Submit the letter with a valid Working With Children Check number to Student Central where the document is trimmed and recorded in Banner as a Special Requirement.

2. Students must have completed Child Protection Awareness Training (Online) prior to undertaking any visits/placements.

3. Students must have completed the ASCIA anaphylaxis e-training and registered their certificates with Student Central.

Teaching Periods

TEAC 2040 Management and Administration in Early Childhood Settings

Credit Points 10

Legacy Code 102672

Coordinator Kerry Staples ([https://directory.westernsydney.edu.au/search/name/Kerry Staples/](https://directory.westernsydney.edu.au/search/name/Kerry%20Staples/))

Description Early childhood teachers work in complex and dynamic environments that are influenced by historical, social, cultural and political contexts. As advocates for quality children and family services that embrace social justice, inclusivity and equity, early childhood teachers must enact their ethical, legal and professional responsibilities. Early Childhood Education and Care (ECEC) services are similar to small businesses, requiring teachers to be knowledgeable about systems, strategies and processes to meet organisation goals and mandatory regulatory and licensing requirements. This subject builds students' foundational skills in strategic planning, policy development, staff management, conflict resolution and team building. Students will investigate effective management and administration dimensions, including human resources, marketing, financial accountability, governance and compliance processes.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions

Students must be enrolled in 1879 Bachelor of Education (Birth – 5 Years) and have completed 80cp in that program.

Learning Outcomes

1. Investigate the historical, social, cultural and political contexts influencing early childhood education and care (ECEC) service provision.
2. Analyse the factors influencing quality service provision in ECEC services.
3. Discuss ethical, legal, legislative and regulatory responsibilities of ECEC services and teachers.
4. Critique theories of management and their application to ECEC services.
5. Apply strategies to support the development of partnerships with families and communities.
6. Identify the role of advocacy for managers and administrators in ECEC services.
7. Apply strategies for the development and maintenance of effective administration, team work, staff management and development in ECEC contexts.

Subject Content

1. Historical, social, cultural and political contexts influencing Early Childhood Education and Care (ECEC) service provision
2. Dimensions of quality ECEC services
3. Legislation influencing ECEC services
4. ECEC licensing and compliance
5. Professional responsibilities

6. Organisational management
7. Ethics and legal responsibilities
8. Theories of management and administration
9. Administration and financial responsibilities
10. Marketing
11. Team building, conflict resolution, communication

Assessment

Teaching Periods

TEAC 2043 Numeracy and Mathematics in the Early Years

Credit Points 10

Legacy Code 102641

Coordinator Donna Dorahy ([https://directory.westernsydney.edu.au/search/name/Donna Dorahy/](https://directory.westernsydney.edu.au/search/name/Donna%20Dorahy/))

Description The unit will develop students' understandings of children's construction of mathematical and numeracy concepts during the years from Kindergarten to Year 3. Students will develop their ability to assess young children's mathematical understandings and numeracy development, and to provide learning experiences for a diversity of learners, including investigation and the use of digital technologies, to enhance the growth of children's mathematical thinking. The unit will study the NSW K-10 Syllabus in all of its strands, with a particular emphasis on the Working Mathematically strand.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions Students must be enrolled in the B Education (Primary) and have successfully completed 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine ways the beliefs, attitudes, and values held by themselves and their students affect their mathematical learning and teaching;
2. Apply the concepts, skills and processes of mathematics related to the teaching of space, measurement, data, patterns and algebra and number for 5 to 9 year olds in accordance with the current NSW Syllabus for the Australian Curriculum: Mathematics K-10, Support Documents and ACARA Numeracy Progressions;
3. Apply a range of pedagogies for teaching and learning mathematics, including problem solving and investigation based approaches;

4. Explain the importance of Working Mathematically for primary school mathematics learners and teachers, and the relationship to literacy;
5. Identify appropriate assessment strategies to inform the planning of teaching/learning activities that cater for the diverse needs of individual students with an emphasis on programs such as Count Me In Too, Count Me In Too (Indigenous), Targeted Early Numeracy (TEN) and Taking off with Numeracy (TOWN);
6. Apply understandings of the role of mathematics within the broader school curriculum, including the relationship between mathematics, numeracy and literacy;
7. Examine the mathematical learning needs of students from diverse backgrounds, such as Aboriginal and Torres Strait Islander, English as an Additional Language/ Dialect, culturally diverse.

Subject Content

- The development and construction of mathematical ideas during The early years of schooling
- Recognition of early mathematical thinking that children can bring to school
- early Understanding of whole number relationships
- Numerical thinking strategies
- early spatial thinking
- The development of measurement concepts
- use of Problem solving and investigation as An effective pedagogy in The mathematics Classroom
- programming and planning for mathematics in The early years
- assessment strategies for The mathematics Classroom
- pedagogies that address diversity within The mathematic Classroom
- integration of mathematics with other key learning areas
- using programs such as Count Me in Too, TENS, and The ACARA Numeracy Progressions for Numeracy Teaching and learning
- children's literature, concrete manipulatives, and digital tools for Teaching mathematics and Numeracy

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 2044 Outdoor Learning and Sustainability in the Primary Years

Credit Points 10

Legacy Code 102640

Coordinator Son Truong ([https://directory.westernsydney.edu.au/search/name/Son Truong/](https://directory.westernsydney.edu.au/search/name/Son%20Truong/))

Description This unit critically examines the cross-curriculum priority area of Sustainability. It develops students' understanding of the key theoretical and pedagogical underpinnings of ecological principles that can be applied across the K-6 curriculum. It gives future educators knowledge and skills to teach civic engagement and ethical actions in order to sustain and improve natural and social environments. The unit examines the interrelatedness of individual, social, and environmental wellbeing within the context of education for sustainability in school settings. Students will gain a deeper understanding of place-based outdoor learning as an approach to teach across the primary school curriculum, support student wellbeing and engagement, and create meaningful learning experiences with nature.

TEAC 2046 Pedagogy and Praxis in Aboriginal and Torres Strait Islander Education

Credit Points 10

Legacy Code 102643

Coordinator Annette Sartor ([https://directory.westernsydney.edu.au/search/name/Annette Sartor/](https://directory.westernsydney.edu.au/search/name/Annette%20Sartor/))

Description This unit is designed to meet the needs of students learning how to apply the theories of Aboriginal and Torres Strait Islander pedagogy in an engaging and practical way. It investigates the current knowledge base for teaching Aboriginal and Torres Strait Islander children in primary school settings and informs students

how they can apply these theories to develop their own practice. This unit provides a basis to understanding the background of historical Aboriginal and Torres Strait Islander teaching and learning strategies and how these relate to contemporary teaching and learning in schools. The unit specifically relates the protocols of successfully working with Aboriginal children, families and communities in educational settings to maximise learning outcomes for Aboriginal and Torres Strait Islander students.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions Students must be enrolled in program 1876 Bachelor of Education (Primary) and must have satisfactorily completed 80 credit points in their program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand the traditional learning styles and historical pedagogy of Aboriginal and Torres Strait Islander people;
2. Understand contemporary Aboriginal and Torres Strait Islander approaches to education;
3. Apply knowledge of relationships beyond the school community to engage with Aboriginal and Torres Strait Islander families and communities;
4. Create pedagogically appropriate Aboriginal and Torres Strait Islander teaching, learning and assessment activities for curriculum areas in classrooms;
5. Evaluate appropriate Aboriginal and Torres Strait Islander Studies teaching resources and the importance of consultation with Indigenous communities;
6. Demonstrate critical understanding of the relationship between educational theory and practice in relation to Aboriginal and Torres Strait Islander pedagogy.

Subject Content

- assumptions of Aboriginal and Torres Strait Islander culture and learning styles
- The Importance of ?eplay?f and ?ehands on?f tasks to engage Aboriginal and Torres Strait Islander learning
- Assessing resources for Aboriginal and Torres Strait Islander students for suitability in The Classroom
- Aboriginal workers in The Classroom as A resource
- engaging The Aboriginal and Torres Strait Islander student
- pedagogical frameworks for Teaching Aboriginal and Torres Strait Islander students
- The Importance of Building relationships when Working with Aboriginal and Torres Strait Islander students
- protocols of Working with Aboriginal and Torres Strait Islander parents and communities
- learning from Aboriginal and Torres Strait Islander parents and students
- Aboriginal and Torres Strait Islander concepts of STEM (science, Technology, Engineering, mathematics)

TEAC 2048 Primary Professional Experience 1: Working in Classrooms

Credit Points 10

Legacy Code 102639

Coordinator Jacqueline Humphries ([https://directory.westernsydney.edu.au/search/name/Jacqueline Humphries/](https://directory.westernsydney.edu.au/search/name/Jacqueline+Humphries/))

Description This unit is designed to introduce students to the practical and pedagogical perspectives of becoming a teacher in the primary school context. As Pre-service Teachers, students will engage in the culture of schools to gain an understanding of how schools and classrooms operate. This professional experience provides opportunities for students to observe and engage in classroom organisation, classroom management strategies, lesson planning and delivery, and student/teacher interactions. Primary Professional Experience 1: Working in Classrooms has a two week (15 day) placement component.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Co-requisite(s) TEAC 2004

Restrictions

Students must be enrolled in the Bachelor of Education (Primary) and have successfully completed 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interact ethically and professionally with educators, colleagues, students and the broader school community;
2. Explore how schools and classrooms are organised and managed;
3. Analyse planning and teaching lessons to a group of students;
4. Effectively use educational research to inform ethical professional practice to maximise student outcomes;
5. Apply teaching and learning strategies that support student engagement in the classroom context;
6. Outline relevant legislative, administrative and organisational policies and processes;
7. Reflect on own learning and feedback from school-based and university-based teacher educators.
8. Execute an enthusiastic and positive attitude towards students as individuals and learners.

9. Reflect on own learning and feedback from school-based and university-based teacher educators;

- Whitton, D., Barker, K., Nosworthy, M., Humphries, J., & Sinclair, C., (2016). Learning for teaching, teaching for learning. (3rd. ed.). Southbank, Vic: Cengage

Subject Content

- organisation of professional experience ? placement Schools, planning and Teaching requirements, Understanding Expectations
- Lesson planning and Structuring A Lesson
- Teaching, learning and Classroom management strategies
- Legislative, administrative and organisational policies
- Critical self-reflection with reference to The Australian professional Standards for graduate teachers

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject:

1. Students are required to complete a Working with Children Check leading to the issuance of a clearance number under the category of volunteer.

Students will need to:

- i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.
 - ii. Present an application number and identification to a NSW Motor Registry or Government Access Centre prior to issuance by mail a Working with Children Check number.
 - iii. Submit the letter with a valid Working With Children Check number to Student Central where the document is trimmed and recorded in Banner as a Special Requirement.
2. Students must have completed Child Protection Awareness Training (Online) prior to undertaking any visits/placements.
 3. Students must have completed the ASCIA anaphylaxis e-training and registered their certificates with Student Central.
 4. From 2H/Spring 2022, students must be COVID-19 fully vaccinated as per the NSW Public Health Order and NSW Department of Education requirement. If a student is unable to be get an approved vaccination for medical reasons, they will need to approach their doctor who must complete a contraindication form available at: covid-19-vaccine-contraindication.pdf (nsw.gov.au) (<https://www.health.nsw.gov.au/Infectious/covid-19/vaccine/Documents/covid-19-vaccine-contraindication.pdf>). Students to submit details of all vaccination doses or contraindication form via Western Now form for it to be recorded on their academic record.

TEAC 2049 Professional Experience 2: School-based Learning

Credit Points 10

Legacy Code 102128

Coordinator Jacqueline Humphries ([https://directory.westernsydney.edu.au/search/name/Jacqueline Humphries/](https://directory.westernsydney.edu.au/search/name/Jacqueline%20Humphries/))

Description The unit is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Students will have 20 days placement in schools. During these days students will work in partnership with classroom teachers to further develop and begin to put into practice their knowledge of curriculum and pedagogy. Students will observe classrooms, assist individuals and groups of students with their learning, and begin to teach lessons. By the end of the unit students will have taught lessons in all of the Key Learning Areas, assessed student learning and evaluated their teaching.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects EDUC 2007 - Professional Experience 2 School-based learning (AREP)

Restrictions

Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Select relevant syllabus content in relation to the planning of lessons for teaching individuals, groups and whole classes.
2. Design and teach effective learning sequences and lesson plans based on curriculum, assessment and reporting knowledge that cater to students of varying abilities and characteristics.
3. Identify different curriculum and implementation decisions made by schools.
4. Assess and interpret student learning using a range of strategies, including formal and informal, diagnostic, formative and summative approaches.

5. Utilise a range of teaching strategies, spaces and resources (including ICT) that support inclusive student participation and engage students in their learning.
6. Utilise a range of verbal and non-verbal communication strategies to support student engagement.
7. Provide timely and appropriate feedback to students about their learning.
8. Complete Professional Experience placement with demonstrated ability to manage classroom behaviour and to teach across all KLAS.

Subject Content

1. Teachers' Professional roles and responsibilities in the classroom and the school community.
2. Technology in the classroom - teaching and learning supported by ICT - introduction of the 'Weebly' or another web platform.
3. 5 days in residential 1 at a school close to WSU Bankstown.
4. Professional Portfolios - Using portfolios to show professional growth and development in teaching, and linking with the Australian Professional Graduate Teaching Standards.
5. 10 days in residential 2 at same schools as residential 1.
6. Presentation of portfolios to show professional growth and development in teaching - linking with the Australian Professional Graduate Teaching Standards.

Special Requirements

Legislative pre-requisites

1. Students are required to complete the **two** components of the Working with Children Check (WWCC) process leading to (a) the issuance of a clearance number under the category of volunteer and (b) verification of the clearance number with the NSW Department of Education.

a) Students will need to:

- i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.
- ii. Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.
- iii. Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record. WesternNow Student Portal link (https://wsu.service-now.com/student/?id=sc_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed)

b) Students will need to:

- i. Access the NSW Department of Education WWCC Verification declaration form <https://online.det.nsw.edu.au/jecpc/crc/wwcc.jsf>
- ii. Carefully read the information about Identity Documents and obtain a copy of the relevant ID documents.
- iii. Complete and submit the verification declaration form.
- iv. Once your WWCC verification is complete you will receive an email reply from the DoE Probity Unit confirming your WWCC number has been verified.
- v. Submit the verification confirmation email via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.

2. Students must complete the **two** components of the NSW Department of Education's Child Protection Awareness Training (CPAT)

a) Students will need to:

- i. Access the NSW Department of Education's MyPL website <https://mypl.education.nsw.gov.au/>
- ii. Complete the online Child Protection Awareness Training: Induction
- iii. Save certificate of completion

- iv. Submit certificate via WesternNow Student Portal

b) Students will need to:

- i. Access the NSW Department of Education's MyPL website <https://mypl.education.nsw.gov.au/>
- ii. Complete the Child Protection Awareness Training (CPAT): Annual Update for the calendar year
- iii. Save certificate of completion
- iv. Submit certificate via WesternNow Student Portal

Both certificates will be recorded on your student record as Special Requirements with the end date for the Annual CPAT recorded. The CPAT: Annual Update will need to be renewed and submitted on an annual basis.

Students who have not completed both components of the Child Protection Awareness Training will need to withdraw from the subject.

3. Students must complete the ASCIA anaphylaxis e-training and submit their certificate to Submit certificate via WesternNow Student Portal.

4. Students must meet the Inherent Requirements for the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education (<https://hbook.westernsydney.edu.au/programs/bachelor-education-primary-aboriginal-torres-strait-islander-education/>).

5. From 2H/Spring 2022, students must be COVID-19 fully vaccinated as per the NSW Public Health Order and NSW Department of Education requirement. If a student is unable to get an approved vaccination for medical reasons, they will need to approach their doctor who must complete a contraindication form available at: [covid-19-vaccine-contraindication.pdf](https://www.health.nsw.gov.au/Infectious/covid-19/vaccine/Documents/covid-19-vaccine-contraindication.pdf) (nsw.gov.au) (<https://www.health.nsw.gov.au/Infectious/covid-19/vaccine/Documents/covid-19-vaccine-contraindication.pdf>). Students to submit details of all vaccination doses or contraindication form via Western Now form for it to be recorded on their academic record.

TEAC 2052 Science and Technology

Credit Points 10

Legacy Code 102123

Coordinator Terrence Wright ([https://directory.westernsydney.edu.au/search/name/Terrence Wright/](https://directory.westernsydney.edu.au/search/name/Terrence%20Wright/))

Description This unit is designed to introduce the NSW Syllabus for the Australian Curriculum: Science K-10 (incorporating Science and Technology K-6), with a focus on K-2. The significance of children's views is emphasised in the selection, design and sequencing of activities for primary students in the development of science and technology experiences. Scientific concepts are considered in the context of distinct but related science and technology areas of built environments, information and communications, living things, natural phenomena, products and services, and Earth and its surroundings. Relevant science and technology content, together with strategies useful in developing primary science and technology knowledge, understandings, skills, processes, values and attitudes will be explored. The tutorials and assignments are designed to place student teachers in situations where they can focus on themselves as learners and to reflect on the implications of their learning and the learning of others in their future professional practice.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects EDUC 2006 - Science and Technology 1

Restrictions Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain central concepts in science and technology and understandings of the processes of investigating, designing and making and using technology K-2.
2. Demonstrate research-based knowledge of the pedagogies appropriate for science and technology education in primary schools.
3. Apply appropriate strategies to create a positive environment supporting student effort and learning and to engage students as well as address student needs when implementing learning experiences in science and technology.
4. Design and implement learning experiences that demonstrate an in-depth knowledge of the NSW Syllabus for the Australian Curriculum: Science K-10 (incorporating Science and Technology K-6) and focussing on K-2.

5. Identify and articulate clear learning goals in preparing learning experiences for science and technology education that are appropriate for the cognitive, social and language abilities of students in primary schools.
6. Plan and implement coherent lessons, lesson sequences, scope and sequences that are designed to engage students and improve learning outcomes in science and technology K-2.
7. Utilise knowledge of a range of resources appropriate to science and technology education.
8. Engage in teamwork for the purposes of an investigation, the production of a designed and made artefact and, the presentation of a discussion about the process.

Subject Content

1. The nature of science and technology as ?disciplines and the strategies of investigating, designing and making and using technology?f K-2
2. The nature of Science and Technology K-6 (NSW Syllabus for the Australian Curriculum), Its outcomes for Skills: (Working Scientifically, Working Technologically), Knowledge and Understanding Strands (Natural Environment, Made Environment), Knowledge and Understanding Substrands (Physical World, Earth and Space, Living World, Material World, Built Environments, Information, and, Products).
3. Affective issues in science and techn

Legacy Code 102644

Coordinator Lesley Gough ([https://directory.westernsydney.edu.au/search/name/Lesley Gough/](https://directory.westernsydney.edu.au/search/name/Lesley%20Gough/))

Description This unit introduces students to the NSW Syllabus for the Australian Curriculum: Science and Technology K-6. It focuses on developing students' pedagogical content knowledge appropriate for teaching science and technology to learners in the primary years. This unit demonstrates how scientific and technological learning experiences can be developed to cater for the needs of the diverse groups of learners in primary schools, including English as an Additional Language or Dialect (EAL/D), Aboriginal and Torres Strait Islander and low socioeconomic status (SES) learners. Students will also focus on themselves as learners and reflect on the implications of their learning and the learning of others in their future professional practice.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions

Students must be enrolled in the Bachelor of Education (Primary) and have successfully completed 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain central concepts in science and technology and understandings of the processes of investigating, designing, making and using technology;
2. Examine principles and practices of teaching and learning Science & Technology in primary classrooms;
3. Utilise knowledge of a range of resources appropriate to science and technology education in primary classrooms, including Digital Technologies;
4. Design learning experiences that demonstrate in-depth knowledge of the NSW Science & Technology K-6 Syllabus and use a range of pedagogies appropriate for science and technology education in primary schools;
5. Apply appropriate strategies to create a positive, engaging learning environment to support student effort and learning outcomes;
6. Examine the literacy and numeracy demands of Science and Technology; and demonstrate effective ways of integrating with classroom teaching;

7. Identify and articulate specific learning goals in preparing learning experiences for science and technology education that are appropriate for the cognitive, social and language abilities of students in primary schools;
8. Plan and implement coherent lessons and lesson sequences that are designed to engage students from English as an Additional Language or Dialect (EAL/D), Aboriginal and Torres Strait Islander and low socioeconomic status (SES) backgrounds and improve their learning outcomes in science and technology.

Subject Content

- The role and value of science and Technology in The broader school curriculum
- The components of the NSW Science & Technology K-6 Syllabus, including structure, aims and objectives, outcomes and content
- Problem solving, investigating, designing and making in science and Technology
- developing positive attitudes and motivation to learn more about scientific fields
- Understanding of concepts and concept development and strategies for developing sound conceptual understandings and skills
- designing Teaching and learning experiences and programming for effective science and Technology education
- The role of ICTs in science and Technology education: Integrating science and Technology in other curriculum areas and for Integrating other curriculum areas into science and Technology

TEAC 2054 Scientific Discovery and Invention

Credit Points 10

Legacy Code 102209

Coordinator Jessie Abraham ([https://directory.westernsydney.edu.au/search/name/Jessy Abraham/](https://directory.westernsydney.edu.au/search/name/Jessy%20Abraham/))

Description Scientific discovery and inventions have made a significant impact on contemporary society. Science is a dynamic, futures oriented, collaborative human endeavour arising from curiosity and interest. In this unit students explore science as a distinctive way of thinking about and explaining events and phenomena. This unit aims to develop students' understanding of the creativity of

science and technology concepts and investigative and innovative processes. As the unit also aims to investigate the impact of scientific discoveries and inventions on society, students will examine how various perspectives, such as cultural (including Australian Aboriginal and Torres Strait Islander) perspectives, explain natural phenomena. This unit will benefit students interested in teaching as a career to design authentic learning programs that explore how scientific discovery and invention are applied in everyday life.

School Education

Discipline Teacher Education

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain concepts which form the basis of knowledge associated with various scientific discoveries and inventions that have arisen from physics, chemistry, earth science, biology and astronomy;
2. Compare and contrast natural phenomena through cultural (including Australian Aboriginal and Torres Strait Islander) and scientific frameworks;
3. Assess the impact of scientific discoveries and inventions on contemporary society through experimentation and research;
4. Analyse a wide range of science fiction (films and novels) to illustrate a wide variety of multi-discipline scientific concepts;
5. Apply a variety of ICT tools for scientific discoveries and inventions in the context of science and technology education;
6. Articulate clear learning goals in preparing learning experiences for science and technology education that are appropriate for the cognitive, social and language abilities of young people.

Subject Content

1. Science, technology and innovation concepts associated with the physics, chemistry, earth science, biology and astronomy and other contributing disciplines;
2. Scientific processes of investigation and communication;
3. Cultural perspectives of examining natural phenomena;
4. Learning about scientific discoveries and inventions from science fiction stories;
5. Students' own experiences with innovative science and technologies;
6. Attitudes and values regarding the core role of science and technology in today's society;
7. Scientific and technological research, processes and creative applications to everyday life;
8. Social and educational impact of variances of understandings of science and technology;
9. Information and communication technologies as a means of investigating ideas, creative problem solving and representing understandings.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 2055 TESOL Teaching Methodology

Credit Points 10

Legacy Code 102474

Coordinator [Julie Lim](https://directory.westernsydney.edu.au/search/name/Julie%20Lim/) ([https://directory.westernsydney.edu.au/search/name/Julie Lim/](https://directory.westernsydney.edu.au/search/name/Julie%20Lim/))

Description This unit focuses on the process of teaching English as a foreign/second language. It aims to give students in the field of TESOL knowledge, skills and strategies in teaching such as choosing teaching approaches, selecting and sequencing language content, managing classrooms, evaluating and designing teaching and learning resources for a wide range of learner levels and types. The unit also aims to develop skills of critical reflection, action research and evaluation of their own practice for potential teachers.

School Humanities & Comm Arts

Discipline English as a Second Language Teaching

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate understanding of the theory and practice of effective English language teaching
2. understand the language learning process in classroom and self-access settings
3. analyse and adapt language teaching resources for use in a range of settings
4. develop skills in designing, implementing and evaluating effective learning opportunities for a range of learner types
5. identify ways to reflect upon and develop their own teaching skills
6. analyse language teaching principles including cognitive, socio-affective and linguistic principles
7. demonstrate capacity to apply teaching approaches and use materials with cultural awareness

Subject Content

- Acquire knowledge about various English language Teaching theories, principles, and methods
- discuss how to teach The macro-skills of listening, speaking, reading, and writing effectively in EFL and ESL/settings
- learn to plan, sequence and Evaluate language learning event
- Debate on how to manage The language learning Classroom
- discuss how to manage Issues in The language learning Classroom such as cultural diversity, mixed levels and abilities, differing needs and scarcity of resources
- role play to experience how to manage The physical environment- seating arrangements, Teaching resources and AIDS, grouping learners
- understand The teacher's role, Timing, facilitation and instruction Roles, and variety, interest, flexibility and learning
- develop language Teaching resources
- Evaluate commercial resources for use in language learning setting
-

TEAC 2056 Teaching Art in the Early Years

Credit Points 10

Legacy Code 102671

Coordinator Denise Fraser ([https://directory.westernsydney.edu.au/search/name/Denise Fraser/](https://directory.westernsydney.edu.au/search/name/Denise%20Fraser/))

Description This subject continues students' exploration of the creative arts and focuses on pedagogies to support the creative child. The role of the teacher and environment as art educators will be explored in detail, specifically the role of the pedagogical leader in facilitating meaningful, sustained and inclusive art experiences for the young child. Students will explore the relevance of the arts in the development of children's play and will engage with appropriate information and communication technologies for learning in the arts. Students will also draw from theory and research literature to critically analyse traditional and contemporary approaches to teaching the arts and the role of the teacher in supporting children's ability to make meaning from and express their social and cultural worlds.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions

Students must be enrolled in 1879 Bachelor of Education (Birth – 5 Years) and have completed 80cp in that program.

Learning Outcomes

1. Explain the social and cultural place of the arts in contemporary, diverse and inclusive societies.
2. Advocate for learning in the arts in the early childhood curriculum.
3. Apply art elements and concepts as they relate to cultural diversity, in particular Aboriginal and Torres Strait Islander peoples and the cultures of the Asia region in the development of creative arts experiences.
4. Apply pedagogies and resources that encourage divergent thinking, creative expression and meaning making that assist children to communicate their ideas through creative arts experiences.
5. Use theoretical knowledge of drama, music, dance, visual arts and media arts in the development of creative arts experiences.
6. Develop sequential learning experiences in the creative arts that are consistent with the Early Years Learning framework.

Subject Content

1. **The Arts:**
 - Key elements of drama, music, visual arts, dance and media arts
 - Creative arts pedagogies for children birth to 5 years
 - The creative arts and the Early Years Learning Framework
2. **The Child:**
 - The role of the creative arts in contemporary childhoods
 - Technology and contemporary arts in early childhoods

- The arts as a social and cultural lens for meaning making and collaboration and agency

3. The Teacher:

- Multiple Intelligence as teaching pedagogy in the creative arts
- The role of the arts educator, contemporary and traditional approaches and arts pedagogies
- Creative arts curriculum and Intentional teaching strategies
- Environments and resources that support accessibility, time frames and collaborative decision making in art making processes

Coordinator Shirley Gilbert ([https://directory.westernsydney.edu.au/search/name/Shirley Gilbert/](https://directory.westernsydney.edu.au/search/name/Shirley%20Gilbert/))

Description The unit is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. One in four children in Australia grows up in bilingual or multilingual households. Many of these children need support to develop their English. This unit aims to contribute to the overall course aims by preparing teacher education students to evaluate and critique strategies for the teaching of English as an Additional Language (EAL) or Dialect. Whilst the emphasis will be on developing an understanding of appropriate classroom strategies for learners of English as a second language within a mainstream cross-curricula program, particular emphasis will be given to the learning needs of and appropriate pedagogies for Aboriginal and Torres Strait Islander students learning English as an Additional Language/ Dialect.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects TEAC 3045 - Teaching English as a Second Language in K-6 Mainstream Classes – AREP

Restrictions Students must be enrolled in 1717 - Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and explain elements and principles of Aboriginal English.
2. Explain the role of the home language in second language learning, socio-cultural and intellectual development.
3. Explain the need for English as an Additional Language teaching at the primary level and the nature of the individual second language needs of learners.
4. Describe the different theoretical frameworks for teaching English as an Additional Language.
5. Examine recent research in additional language acquisition and be able to synthesise and reflect upon some of the major findings.
6. Use principles and develop strategies for teaching English as an Additional Language across the curriculum.
7. Evaluate and apply teaching classroom resources to cater for learners from a diverse range of backgrounds including refugees, new migrants, Aboriginal and Torres Strait Islanders.
8. Apply appropriate methods of assessing second language and literacy learning;
9. Plan, refine and reflect upon teaching and learning activities designed to meet the needs of English as Second Language learners.

Subject Content

1. Elements and principles of Aboriginal English
2. Second language and literacy development:
 - The factors influencing second language development:
 - First language proficiency, age, prior educational and life experiences, cultural and linguistic background;
 - context and environment of second language learning in mainstream classes and whole school organisation.
3. Parent/Teacher communication:
 - Reasons for parent/teacher involvement;
 - Using an interpreter;
 - Collaborating with bilingual families and other strategies
4. Assessment and evaluation:
 - identifying L2 language proficiency: English as second language (ESL) Scales
 - Planning and programming;
 - class and whole school evaluation framework.
5. Pedagogy focusing on English as an Additional Language learners:
 - Communicative teaching and learning principles;
 - language and literacy strategies across The curriculum.
6. Teaching and learning resources for second language development in the primary classroom;
 - Select and critically evaluate culturally inclusive materials;
 - use, analyse and Evaluate online software, human and paper resources to match The specific language learning purpose.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Essay	1500 words	40	N	Individual
Professional Task	2000 words	60	N	Individual

Legacy Code 102129

Coordinator Erin Mackenzie ([https://directory.westernsydney.edu.au/search/name/Erin Mackenzie/](https://directory.westernsydney.edu.au/search/name/Erin%20Mackenzie/))

Description The unit is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. The purpose of this unit is for prospective teachers to develop an understanding of the individual and contextual factors which influence children's behaviour and to apply this knowledge to building and maintaining positive learning environments. The unit focuses on proactive and preventative measures through the establishment of a healthy learning ecology. It draws upon professional experiences to apply sound theoretical foundations to base approaches to responding to a range of student behaviours while simultaneously promoting student mental health, wellbeing and resilience. The unit provides support for the development of an integrated management plan that reflects the diverse nature of children's behaviour and is informed by both theory and a critical evaluation of personal and professional dispositions.

School Education

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects EDUC 2013 - Personal Development Health and Physical Education 2 (AREP)

Restrictions

Students must be enrolled in 1717 - Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe children's development, cultural and socio-cultural factors influencing students' learning and behaviour.
2. Explain the nature and causes for children's behaviour.
3. Implement a repertoire of preventative and proactive strategies to promote positive learning environments and minimise disruptive behaviour.
4. Evaluate a range of theoretical approaches to student discipline.
5. Analyse the influence of teacher behaviour and discipline practices on the behaviour and wellbeing of students from diverse backgrounds.
6. Implement a range of management and well-being strategies used across teaching and learning contexts and apply effective techniques for intervening in challenging behaviours.
7. Critically evaluate personal and professional dispositions and their effectiveness for preventing and appropriateness for responding to children's behaviour.

8. Establish supportive learning environments where students feel safe to fully participate.

Subject Content

1. Influences on children's behaviour: Ecological systems theory and implications.
2. Healthy learning ecology: a proactive and preventative approach.
 - Understanding children's development and their diverse needs.
 - promoting positive learning environments.
 - establishing positive relationships.
3. Theoretical foundations.
 - theoretical bases and related discipline models.
 - developing A personal philosophy and integrated model of discipline.
4. Teacher and student mental health, wellbeing and resilience: Implications for behavior.
5. Policies, legislation and support services for promoting positive behavior and the mental health and wellbeing needs of students and teachers.
6. Deeping of knowledge and skills to meet the specific needs of Aboriginal and Torres Strait Islander young people.

TEAC 2060 Developing Aboriginal Languages K-6

Credit Points 10

Legacy Code 102747

Coordinator Susan Price ([https://directory.westernsydney.edu.au/search/name/Susan Price/](https://directory.westernsydney.edu.au/search/name/Susan%20Price/))

Description This subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander education program. This subject introduces teacher education students to the developing and planning processes required to develop Aboriginal and Torres Strait Islander languages and LOTE opportunities

across K-6. Students will engage with the complexities in teaching Aboriginal languages. As they engage with a diverse array of themes, debates and contested issues in Australia's Aboriginal language revitalisation programs they develop understanding about protocols and consultations that are required to deliver programs in schools. Students will learn to create culturally-responsive learning experiences for primary classrooms that embrace Aboriginal and Torres Strait Islander histories and cultures and develop skills and knowledge in teaching Aboriginal languages.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions

Students must be enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the role of the home language in second language learning, socio-cultural and intellectual development. (Standards 1.1.1; 3.3.1) [CLO 1; 2; 3]
2. Describe the different theoretical frameworks for teaching English as an Additional Language. (Standards 2.2.1) [CLO 1; 2]
3. Synthesise broad and critical knowledge about the history, complexities, protocols and challenges involved in teaching Aboriginal and Torres Strait Islander languages in K-6 schools (Standards 1.4.1, 2.1.1, 2.2.1, 2.4.1; CLO1,2,3,4,7)
4. Incorporate locally driven aspects of Aboriginal history and culture into learning experiences about language learning (Standards 1.4.1, 2.1.1, 2.4.1; CLO 1,2,3,4,5,6,7,8)
5. Design experiences which recognise and celebrate connections between Aboriginal culture, language, land and a sense of peoples' identities (Standards 1.4.1, 2.1.1, 2.3.1, 2.4.1; CLO 1,2,3,4,5,6,7,8)
6. Plan for learning experiences, lessons and lesson sequences that provide opportunities to identify and respond to key words, phrases and simple sentences in context in written Aboriginal languages (using local texts including ICTs)(Standards 1.4.1, 2.4.1; CLO 1,2,3,4,7)
7. Design engaging and culturally-responsive lessons, support materials and programs that embrace Aboriginal Languages K-6 (Standards 1.4.1, 2.1.1, 2.2.1, 2.3.1, 2.4.1, 3.1.1, 3.2.1, 3.3.1, 3.4.1; CLO 1,2,3,4,5,6,7,8)

Subject Content

1. Teaching strategies, approaches and program requirements to teach Aboriginal LOTE languages in the Primary classroom.
2. The design and implementation of culturally-responsive language learning experiences that recognise the complexities of Aboriginal history, Aboriginal English, EAL/D learner diversity to support and embrace Aboriginal language achievements.
3. The development of the Aboriginal Languages K–10 Syllabus, historical themes and debates, and contested languages histories.
4. The state-wide Aboriginal languages policy and associated policy documents at state, national and global levels (including NESA, NSW DET, OCHRE and UNESCO).
5. The development of a language culture nest program, including staffing, community consultation, protocols and delivery.

6. Recognition of the connections between Aboriginal culture, language, land and a sense of identity, and the importance of Aboriginal languages to cultural maintenance.

TEAC 2061 Teaching K-6: Pedagogies, Priorities and Capabilities

Credit Points 10

Legacy Code 102749

Coordinator Paul Rooney ([https://directory.westernsydney.edu.au/search/name/Paul Rooney/](https://directory.westernsydney.edu.au/search/name/Paul%20Rooney/))

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. The subject will develop students' knowledge and skills for planning and teaching in K-6 classrooms using both the Cross-Curriculum Priority Areas (CPPA) through the incorporation of the seven General Capabilities (GC). The subject enables the delivery of learning area content focusing on key learning areas, HSIE and English at the same time as developing knowledge, understanding and skills relating to Aboriginal and Torres Strait Islander histories and cultures, Asia and Australia's engagement with Asia and/or Sustainability. The subject will explore how Literacy, Numeracy, ICT capability and Critical and creative thinking are fundamental in students becoming successful lifelong learners whilst the areas of Personal and social capability, Ethical understanding, and Intercultural understanding focus on ways of being, behaving and learning to live with others, and taught through the HSIE and English learning areas.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects TEAC 1021 - Learning Teaching and Technologies

Incompatible Subjects TEAC 2036 - Learning Futures and Curriculum Integration

Restrictions

Students must be enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate understanding of the three CCPA's: developing opportunities for inclusive narratives from Aboriginal and Torres Strait Islander cultures, Asia and Australia;s engagement with Aisia, and Sustainability . (Standard 2.4.1) [CLO 1; 2; 3]
2. Identify and explain the ways different cultures, cultural stories and icons, are depicted in a range of multimodal texts to support teaching of CCPA's in K-6 classrooms using HSIE and English. (Standard 1.4.1; 2.4.1) [CLO 1; 2; 3]
3. Design resources for lessons, programs and school events to support students' personal and social capability, ethical understanding, and intercultural understandings.
4. Evaluate social debates around the politics of representation presented in the CCPA's. (Standards 1.4.1; 2.4.1) [CLO 1; 2; 3]
5. Examine the use of technology for teaching the General Capabilities. (Standard 2.6.1, 3.4.1, 3.5.1) [CLO 1; 2; 3]
6. Collaborate with colleagues in disciplinary and cross-disciplinary groupings in order to support personal learning about the role of the CCPA's and General Capabilities.

Subject Content

1. Aboriginal and Torres Strait Islander histories and cultures, Asia and Australia's engagement with Asia and/or Sustainability in K-6 classrooms
2. Classroom technologies to support the teaching and learning linked to the cross curriculum priority areas (CCPAs)
3. Embedding CCPAs in the teaching and learning of English and/or Human Society & its Environments.
4. Culturally-responsive curriculum
5. Theoretical and pedagogical understandings linked to the General Capabilities of Literacy, Numeracy, ICT capability, and Critical and creative thinking
6. Ethical thinking in classrooms
7. Social and intercultural capacities
8. Critical numeracy and literacy skills related to media

TEAC 2062 Teachers as Change Makers

Credit Points 10

Legacy Code 102796

Coordinator Annette Sartor ([https://directory.westernsydney.edu.au/search/name/Annette Sartor/](https://directory.westernsydney.edu.au/search/name/Annette%20Sartor/))

Description Through engaged learning, Teachers as Change Makers builds professional teaching skills by enhancing pre-service teachers' understandings of the clientele with whom they will be professionally involved as teachers. This subject includes a practical component requiring a minimum of 25 hours of engaged learning in primary schools that provide support to children from a range of diverse backgrounds and experiences. Through practical experience such as learning support programs, the subject explores the criticality of ethical understandings and teaching practices that may influence the educational outcomes of children. In particular, this subject focuses on promoting the importance of reciprocal and reflexive teaching approaches for providing inclusive settings that make a difference to children's educational experiences and provides a space to critically explore how teaching practices can empower students and communities.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions

Students must have completed 40 credit points to enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Using the sociological theory of reflexivity, outline existing personal perceptions of the role of a teacher.
2. Analyse issues faced by children with diverse needs and from diverse backgrounds, and how issues impact on educational achievement (APST 1.3, 1.4, 1.6).
3. Undertake an engaged learning placement through facilitating programs (e.g. reading, numeracy, special needs), specifically aimed at improving outcomes for children with diverse learning needs.
4. Using a flipped classroom approach, apply Freire's theory of praxis to examine the responsibilities and practices of teachers who work with children with diverse needs and from diverse backgrounds (APST 1.3, 1.5, 1.6, 4.1, 4.4).

5. Explain how ethical and professional decisions, understandings and practices lead to positive educational outcomes for children. (APST 1.3, 1.5, 1.6, 4.1, 4.4, 7.1).
6. Critically reflect on the effectiveness of teaching practices, for empowering learners with diverse needs and from diverse backgrounds. (APST 1.1, 1.3, 1.4, 1.5, 1.6, 4.1, 4.4).
7. Explore the changing roles of teachers with reference to providing inclusive settings, working with parents and communities, and preparing children for the changing landscape of work. (APST 7.3).
8. Using theory, examine how teachers can act as agents of change.
9. Apply professional approaches during placement in school settings including child protection obligations. (APSTs 7.2, 7.4).

- iii. Save certificate of completion
 - iv. Submit certificate via WesternNow Student Portal
- b) Students will need to:
- i. Access the NSW Department of Education's MyPL website <https://mypl.education.nsw.gov.au/>
 - ii. Complete the Child Protection Awareness Training (CPAT): Annual Update for the calendar year
 - iii. Save certificate of completion
 - iv. Submit certificate via WesternNow Student Portal

Both certificates will be recorded on your student record as Special Requirements with the end date for the Annual CPAT recorded. The CPAT: Annual Update will need to be renewed and submitted on an annual basis.

Students who have not completed both components of the Child Protection Awareness Training will need to withdraw from the subject.

3. Students must complete the ASCIA anaphylaxis e-training and submit their certificate to Submit certificate via WesternNow Student Portal.

4. Students must meet the Inherent Requirements for the Master of Teaching (Primary) (<https://hbook.westernsydney.edu.au/programs/master-teaching-primary/>).

5. From 2H/Spring 2022, students must be COVID-19 fully vaccinated as per the NSW Public Health Order and NSW Department of Education requirement. If a student is unable to get an approved vaccination for medical reasons, they will need to approach their doctor who must complete a contraindication form available at: [covid-19-vaccine-contraindication.pdf](https://www.health.nsw.gov.au/Infectious/covid-19/vaccine/Documents/covid-19-vaccine-contraindication.pdf) (nsw.gov.au) (<https://www.health.nsw.gov.au/Infectious/covid-19/vaccine/Documents/covid-19-vaccine-contraindication.pdf>). Students to submit details of all vaccination doses or contraindication form via Western Now form for it to be recorded on their academic record.

Subject Content

1. Responsibilities and practices in the profession of teaching
2. The changing roles of teachers in the social and cultural institution of education
3. Knowledge integration through sociological theory, engaged and work integrated learning and its application for 'work' in school settings
4. Knowledge and skills for working with diverse children
5. Reflective and reflexive practice
6. Ethical and professional responsibilities for working with diverse groups of children

Special Requirements

Legislative pre-requisites

1. Students are required to complete the **two** components of the Working with Children Check (WWCC) process leading to (a) the issuance of a clearance number under the category of volunteer and (b) verification of the clearance number with the NSW Department of Education.

a) Students will need to:

- i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.
- ii. Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.
- iii. Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record. WesternNow Student Portal link (https://wsu.service-now.com/student/?id=sc_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed)

b) Students will need to:

- i. Access the NSW Department of Education WWCC Verification declaration form <https://online.det.nsw.edu.au/jecpc/crc/wwcc.jsf>
- ii. Carefully read the information about Identity Documents and obtain a copy of the relevant ID documents.
- iii. Complete and submit the verification declaration form.
- iv. Once your WWCC verification is complete you will receive an email reply from the DoE Probity Unit confirming your WWCC number has been verified.
- v. Submit the verification confirmation email via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.

2. Students must complete the **two** components of the NSW Department of Education's Child Protection Awareness Training (CPAT)

a) Students will need to:

- i. Access the NSW Department of Education's MyPL website <https://mypl.education.nsw.gov.au/>
- ii. Complete the online Child Protection Awareness Training: Induction

TEAC 2063 History, Geography, Civics and Citizenship in the Primary Years

Credit Points 10

Legacy Code 102820

Coordinator Maree Skillen ([https://directory.westernsydney.edu.au/search/name/Maree Skillen/](https://directory.westernsydney.edu.au/search/name/Maree+Skillen/))

Description This unit provides opportunities for students to develop knowledge of the outcomes, subject matter, pedagogies and experiences that define the key learning area of History, Geography, Civics and Citizenship in primary (Kindergarten to Year 6) classrooms. Key concepts of change in family history, local history, and Australia's history and understanding Australia as a Nation are explored. In Geography, concepts that develop a sense of curiosity about environments, peoples, cultures and place, are a priority. In Civics and Citizenship, the focus is on relationships between the individual and the state. The values and mutual responsibilities and obligations for civil, political and social participation in Australian society are also explored. These areas enable students to develop their own content knowledge and understandings, skills and dispositions necessary for planning, programming and teaching. This unit promotes teaching strategies that prepare primary children to be informed and effective change agents.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions Students must be enrolled in 1876 Bachelor of Education (Primary) and have successfully completed 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explore the disciplines, theories, pedagogies and Cross-Curriculum-Priorities that underpin the learning area of History, Geography, Civics and Citizenship in learning design.
2. Apply the learning principles and cross-curriculum-priorities that underlie teaching History, Geography, Civics and Citizenship in the primary years.
3. Design a sequence of learning and detailed lesson plans using knowledge of the NSW HSIE and other curriculum areas.
4. Identify Aboriginal perspectives embedded in the History, Geography, Civics and Citizenship for teaching the NSW HSIE key learning area.
5. Reflect on personal exploration of History, Geography, Civics and Citizenship K-6 and practices in relation to place-based and project-based learning in History, Geography, Civics and Citizenship K-6.

6. Apply ICT, literacy demands and engaging pedagogical approaches in design of lessons.

Subject Content

1. The NSW History K-10 syllabus and Geography K-10 syllabus with a focus on Kindergarten (1st year of schooling) ? Year 6
2. Inquiry process, outdoor learning, place-based and project-based learning
3. Historical and Geographical skills including ethnographic reports and cartographic mapping
4. Cross-Curriculum Priorities with a focus on Aboriginal and Torres Strait Islander Peoples and Histories
5. Literacy and Information Communication Technology demands for teaching History, Geography, Civics and Citizenship.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 2064 Contemporary Childhoods (Block)

Credit Points 10

Legacy Code 500073

Coordinator Rachel Renwick ([https://directory.westernsydney.edu.au/search/name/Rachel Renwick/](https://directory.westernsydney.edu.au/search/name/Rachel+Renwick/))

Description In this subject students will engage in an exploration of what it means to be a child in a postmodern world and how different theoretical approaches influence ways of understanding children's lives. Alongside questions of how gender, sexuality, ethnicity, 'race', language, class, ability and religion are constituted through a child's identity, students will explore the notion of a child's subjectivity. A child's subjectivity is the conscious and unconscious thoughts and

emotions of the child, their sense of self, their body and their way of understanding their relationship to the world. Building on this knowledge, students will also explore the four key child-environment identities of the physical child, the social child, the learning child and the natural child and by analysing a variety of scholarly and non-scholarly texts around childhood, children's bodies and behaviour will reflect on a child's individuality and emerging identity.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects TEAC 2009 - Contemporary Childhoods TEAC 2010 - Contemporary Childhoods

Restrictions

Students must be enrolled in program 7181 ? Undergraduate Certificate in Early Childhood Studies.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Investigate diverse texts, images, practices and constructions of what it means to be a child in contemporary society.
2. Discuss the social meaning of childhood including the historical, social and political factors and how they have influenced changing views of children and childhood.
3. Explain how different theoretical perspectives have positioned children and childhood as a social construction.
4. Identify the ways in which gender, sexuality, ethnicity, 'race', language, class, ability and religion are constituted through a child's identity and the significance of this on everyday lived experiences.
5. Examine how social, institutional and cultural constructions of childhood play a role in shaping children's identities, subjectivities and everyday lives.
6. Examine the ways in which children negotiate and construct their identities in contexts of diversity and difference.
7. Describe how children's rights and responsibilities are enacted by children and adults.
8. Describe how child-environment identity is connected to place, space, location and time.

Subject Content

1. Who is, and what does it mean to be a child in a postmodern world?
2. Analysis of texts, images and constructions about 'the child'.
3. Introduction to contemporary national and international theories and philosophies related to the child.
4. Significance of gender, sexuality, ethnicity, 'race', language, class, ability and religion and how they are constituted through a child's identity and everyday lived experiences.
5. Questions of subjectivity and a child's sense of self, body, and relationship to the world.
6. Children's negotiation of identity and difference in a globalised world.
7. Rights and responsibilities of the child.
8. Child-environment identity and connections to place, space, location and time through encounters with tangible social-cultural artefacts such as toys, homes, landscapes, animals, digital technology.

9. Constructions of diversity and difference in education and community settings.

TEAC 3002 Classroom Inquiry and improving professional practice

Credit Points 10

Legacy Code 102138

Coordinator Shirley Gilbert ([https://directory.westernsydney.edu.au/search/name/Shirley Gilbert/](https://directory.westernsydney.edu.au/search/name/Shirley%20Gilbert/))

Description The unit is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Teachers are continually seeking new ways of understanding and improving their practices in the classroom. A range of applied evidence-based research methods provides valuable tools to aid this process. This unit will introduce students to educational research methods in general and action research in particular. The unit will assist students to become reflective practitioners who are capable of making informed improvements to the way they apply teaching strategies in their professional practice as teachers. Students will apply their evolving understandings of evidence-based practice and focus on how they use ICT supported learning across a range of educational contexts.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Co-requisite(s) TEAC 3022

Equivalent Subjects LGYA 1484 - ICT and Research in Education

Restrictions Students must be enrolled in 1717 - Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe a range of practitioner research methods and classroom inquiry skills.
2. Identify KLA's where ICTs may be utilised for teaching and learning.
3. Locate, analyse and synthesise literature relevant to educational theories, curriculum topics and pedagogical issues.
4. Investigate and evaluate the role of ICT supported learning strategies across the primary curriculum.
5. Investigate and articulate their theories about learning with reference to the use of ICTs in educational contexts.
6. Design, plan and evaluate learning experiences based on the application of ICT related resources in a school setting

Subject Content

1. What is the action research model? In what ways are teachers also researchers?
2. Reflect on the first school visit. Choose an area of teaching interest and write research questions and sub-questions.
3. What ICT teaching opportunities, action research opportunities and logistical requirements are available?
4. Writing a lit review APA referencing and avoiding plagiarism. Literature searching, plagiarism and referencing.
5. Plan the second school visit. What needs to be negotiated? Going in with a plan and negotiate teaching opportunities based on what ICTs are available.
6. What ways can common ICT resources be integrated into your teaching plans and research agendas?
7. Data collection and analysis methods. Ethical issues to be considered.
8. Planning for assessment and evaluation.
9. Organise teaching, data collection, analysis and interpretation of findings. Plan ahead for data collection analysis and writing of journal article.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Case Study	1200 words	30	N	Individual
Professional Task	1000 words	20	N	Individual
Professional Task	2000 words	50	N	Individual

Teaching Periods

TEAC 3003 Community Responsive Pedagogies and Leadership

Credit Points 10

Legacy Code 102139

Coordinator Dianne Burrell (<https://directory.westernsydney.edu.au/search/name/Dianne+Burrell/>)

Description The unit is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This unit is designed to build on students' sociological understandings of primary schooling and how it impacts on First Nation peoples. The unit builds on experiential, theoretical and curriculum knowledge developed in the course. Schools have a long tradition of working with communities at the 'chalkface' of social change. Such relationships are complex, evolving and spatially/temporally different because of a local/global sense of place and the socio-political context. Possibilities for promoting socially just practices for different communities are therefore contingent upon a range of strategies for inclusion. This unit examines theoretical frameworks that can assist in understanding the complexities of these processes and will incorporate a 5 day community engagement activity involving First Nation peoples.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects EDUC 3001 - Communities and Primary Schools

Restrictions Students must be enrolled in 1717 - Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the multiple dimensions of community; (Standards:1.3.1, 1.4.1, 2.4.1, 7.3.1)
2. Describe the relationship between place, identities and communities as they relate to schools and institutions; (Standards:1.3.1, 1.4.1, 2.4.1, 7.2.1, 7.3.1)
3. Critically analyse representations of school in community environments; (Standards:1.3.1, 1.4.1, 2.4.1, 7.2.1, 7.3.1)
4. Demonstrate knowledge of and respect for the diverse social, cultural, ethnic and religious backgrounds of students, including

gender and sexuality and the effects of these factors on learning. (Standards: 1.1.1, 1.2.1, 1.3.1, 1.4.1, 2.4.1, 7.2.1, 7.3.1)

5. Examine the ways in which primary schools and Institutions can engage in capacity building of communities. (Standards: 7.2.1, 7.3.1)
6. Explain Aboriginal and Torres Strait Islander history, the impact of culture, cultural identity and diversity in rural, remote and urban schooling. (Standards: 1.1.1, 1.2.1, 1.3.1, 1.4.1, 2.4.1, 7.2.1, 7.3.1)
7. Identify specific learning needs of Aboriginal and Torres Strait Islander students in rural, remote and urban settings and contrast with other First Nation peoples. (Standards: 1.4.1, 2.4.1, 4.1.1, 4.4.1, 7.2.1, 7.3.1)
8. Examine the roles and responsibilities of Aboriginal and Torres Strait Islander support personnel within systems and at school, and their contribution to education and community in improving educational outcomes for Aboriginal and Torres Strait Islander students. (Standards: 1.4.1, 2.4.1, 7.2.1, 7.3.1)
9. Assess and reflect upon International, National and State educational priorities and policies which impact on Aboriginal and Torres Strait Islander education compared to other First Nation peoples. (Standards: 1.4.1, 2.4.1, 7.2.1, 7.3.1)
10. Evaluate the role teachers, staff and schools play in the promotion of communication strategies which will enhance community consultation and the establishment of partnerships with Aboriginal and Torres Strait Islander parents and communities compared to other First Nation peoples. (Standards: 1.1.1, 1.2.1, 1.3.1, 1.4.1, 2.4.1, 7.2.1, 7.3.1)

Subject Content

1. What is a community? Rural, Isolated, inner and outer urban. How does the community affect subjects taught in schools?
2. Place and identity - role of visual narratives in school and community social life
3. Whiteness, power and the politics of advantage/outcomes
4. School/community relations and the education of Indigenous and non-Indigenous children;
5. Spatial dynamics of school buildings, playgrounds and structures/ cultures of feelings in school-community contexts
6. The socio-political and socio-cultural dynamics of educational inequalities in school communities
7. Social justice theories, invitational thinking, multicultural perspectives, Social capital theory ? bonding, bridging and linking
8. What is leadership ? being an agent of change, being an advocate and different models of leadership
9. Transforming school cultures and engaging the community, long-term and short term strategies and tactics
10. Multiple ways of communicating to enhance school-community partnerships with First Nation peoples

Assessment

TEAC 3004 Creative Arts Education

Credit Points 10

Legacy Code 102647

Coordinator Rachael Jacobs ([https://directory.westernsydney.edu.au/search/name/Rachael Jacobs/](https://directory.westernsydney.edu.au/search/name/Rachael+Jacobs/))

Description This unit explores the importance of the creative arts in the primary classroom, addressing the content and pedagogies appropriate to dance, drama, music and visual arts. This unit has been designed to give students the opportunity to develop their knowledge, understanding, skills, confidence and competence in the five art forms of creative arts. It also provides students with the opportunity to develop their planning and teaching skills in the creative arts, through exploring pedagogies for the teaching of practical arts classes. This unit develops students as teachers who demonstrate creativity when teaching, empathy with diverse groups of student learners, a commitment to socially just schools and classrooms and who understand artistic processes. It aims to give students an understanding of the role of aesthetics, imagination and play in learning. An independent learning program also encourages learners to develop their own arts skills in three strands.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Students must be enrolled in the Bachelor of Education (Primary) and have successfully completed 160 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of arts education in the context of the Primary classroom, including theories, philosophies and practices of creativity, aesthetic learning and play;
2. Critically analyse research on the importance of arts education in the holistic development of children and its role in building positive school and community cultures;
3. Demonstrate an understanding of the content and central concepts of arts syllabus documents in a range of contexts, including Aboriginal and Torres Strait Islander perspectives;
4. Design and create learning experiences that value the distinct knowledge and skills associated with Dance, Drama, Music and Visual Arts education, along with an understanding of integrated approaches;
5. Plan and implement arts education experiences that use a range of pedagogical approaches, with a working knowledge

of management strategies, assessment tools and resources appropriate for arts education;

6. Exhibit practical skills in the instruction of Dance, Drama, Music and Visual Arts, with a working knowledge of the literacy and numeracy demands of the Creative Arts.

Subject Content

- theory, principles and practices related to Arts education, including creativity, Aesthetic learning and play
- research on The role of Arts education in The holistic development of children and its contribution to positive school and community cultures
- Attributes, elements and The cognitive processes embedded in Dance, drama, music and Visual Arts
- curriculum concepts and content specific to Dance, drama, music and Visual Arts education including Aboriginal and Torres Strait Islander perspectives
- strategies to integrate art forms and integrate The Arts across The curriculum
- effective pedagogical approaches for Arts education, including management strategies, assessment tools and resources appropriate for Arts education
- practical skills in The instruction of Dance, drama, music, Visual Arts
- Critical reflection on students' emerging skills and practices in Arts education

Teaching Periods

TEAC 3005 Critical Literacies

Credit Points 10

Legacy Code 102678

Coordinator Jaydene Barnes ([https://directory.westernsydney.edu.au/search/name/Jaydene Barnes/](https://directory.westernsydney.edu.au/search/name/Jaydene%20Barnes/))

Description This subject increases students' understanding of literacy as a dynamic, social and cultural practice. It explores the changing nature of literacy by globalisation, new technologies and the diversity of language/language dialects. Students will explore the importance of valuing children's culture, home language/dialect as an integral component to identity, particularly for bilingual and Aboriginal and Torres Strait Islander children. Issues of power and language are considered through social, cultural and critical theories surrounding diversity and difference, and how this shapes the decisions of educators to build the literacy capacities of all children. Students will learn about contemporary frameworks of literacy and language and draw on this knowledge to extend children's literacy learning.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in 1879 Bachelor of Education (Birth – 5 Years) and have completed 160cp in that program.

Learning Outcomes

1. Examine contemporary views of literacy, literacy learning, and literacy as a social practice.
2. Analyse issues of language, culture and identity and the power of language to privilege/marginalise.
3. Discuss the diversity of literacies, languages and dialects in Australia and different approaches to the revival and retention of Aboriginal and Torres Strait Islander and community languages.
4. Apply respect for diverse literacies and understandings of issues of gender, class and language through a critical literacies approach.
5. Analyse family literacy practices and children's literacy funds of knowledge.
6. Plan literacy-enriched play that builds on children's family literacies and scaffolds children's literacy learning.

Subject Content

1. Literacy as a social practice
2. Multi-literacies; multimodality, diverse texts and literacy practices, diverse languages/dialects including Aboriginal languages and community languages, globalisation and new technologies
3. Bilingualism and Multilingualism
4. Language and power; linguistic and cultural capital
5. Diverse dialects including Aboriginal English; language loss, language maintenance & language revival
6. Children's funds of knowledge
7. The role of play-based pedagogies in literacy learning
8. Selecting and sharing children's literature

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Teaching Periods

TEAC 3006 Education in a Cosmopolitan Society

Credit Points 10

Legacy Code 101661

Coordinator Zainab Mourad ([https://directory.westernsydney.edu.au/search/name/Zainab Mourad/](https://directory.westernsydney.edu.au/search/name/Zainab%20Mourad/))

Description This subject responds to the question of what it might mean to educate "world teachers" for a cosmopolitan age where classrooms and schools are being shaped by the increasing mobility of ideas, people, technology, media and finance. For some time, multicultural education, as policy and practice, has dominated schooling in Australia. While this was an important period in Australia, times have changed. The globalisation of teaching is one dimension of this change as supranational bodies more and more shape what

teachers do. Set against these global agendas are the mobilities that teachers must respond to at the local level. This subject examines cosmopolitan social and education theory as a means to understand these dynamics, framing teachers as agents of change.

School Education

Discipline Teacher Education

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the key ideas associated with the concept and the theories of 'cosmopolitanism';
2. Use theoretical explorations of cosmopolitanism to investigate contemporary ideas about Australian schooling;
3. Critically analyse the relationship between multiculturalism and cosmopolitanism;
4. Analyse the process of constructing educational disadvantage;
5. Critically analyse NSW Department of Education and Communities curriculum documents in the light of the above;
6. Explain cosmopolitanism through the analysis of multimedia texts;
7. Apply understanding of concepts in using multimedia.

Subject Content

1. Multiculturalism and the 'cosmopolitan turn'
2. Cosmopolitan scapes
3. Cosmopolitan imagination
4. Cosmopolitan learning

TEAC 3008 English Language Linguistics

Credit Points 10

Legacy Code 102476

Coordinator David McInnes ([https://directory.westernsydney.edu.au/search/name/David McInnes/](https://directory.westernsydney.edu.au/search/name/David%20McInnes/))

Description In 2021, this unit replaced by 102813 - English Talk. This unit offers students a formal study of the workings of the English language as it is used around the world. Using real-world examples, this unit builds on the content and skills which students have developed in the unit: English as an International Language. It prepares students with a thorough knowledge of variations in English across the globe, introducing them to the ways in which English varies at phonological, grammatical and register levels across contexts. This unit is essential for a student's development of more formal skills in the English language, developing their English knowledge and skill into a professional and personal asset.

School Humanities & Comm Arts

Discipline English as a Second Language Teaching

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LANG 3099 - English Talk

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a foundational knowledge of working grammar and linguistic concepts
2. Apply theoretical ideas to real-world practice of variant Englishes
3. Analyse power structures by contrasting theory and actual practices of language
4. Demonstrate applications of grammaticality to an analysis of textual examples of World Englishes.
5. Reflect on and explain miscommunication between Englishes, by proposing solutions at the grammatical and sociolinguistic levels.
6. Demonstrate knowledge of English grammar and linguistic concepts
7. Demonstrate applications of grammatical analysis to textual examples of World Englishes.
8. Reflect on and explain miscommunication between Englishes.

Subject Content

The essentials of the English language: grammar, punctuation, prosody, morphology, non-verbals, phonology, paralinguistics.

The concept of World Englishes and real differences in meaning and practice.

Communication styles: idiolects, familiolects, sociolects, language varieties and dialects.

Languages in contact and pidginisation.

The global context: lingua franca, language death and imperialism.

Sociolinguistics and power structures

Standardisation and non-standards: prescriptivism and descriptivism

Variation in the English language: grammar, punctuation, prosody, morphology, non-verbals, phonology, paralinguistics.

The details of World Englishes and real-world differences in meaning and practice.

Sociolinguistics and power structures.

Standardisation and non-standards.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Discourse analysis x 2	40 mins each	40	N	Individual
Short answer x 4	300 words each	60	N	Individual

TEAC 3009 Ethical Futures

Credit Points 10

Legacy Code 101623

Coordinator Denise Fraser ([https://directory.westernsydney.edu.au/search/name/Denise Fraser/](https://directory.westernsydney.edu.au/search/name/Denise%20Fraser/))

Description This subject is designed to build the leadership capacity of educators through exploring, understanding and expressing the values and ethics embedded in policy, practice and educational change. The subject also addresses the importance of ethically informed advocacy and its role in educational futures and democratic processes.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects TEAC 2047 - Policy Politics and Educational Futures

Learning Outcomes

On successful completion of this subject, students should be able to:

- Discuss the political, ethical and contested nature of educational provision;
- Articulate the relationship between agency, citizenship and democracy;
- Define what it means to be a professional and the interrelationship between personal and professional values;
- Explain the application and implications of traditional and contemporary frameworks and tools that support wise professional practice;
- Analyse the embedded ethical and political dimensions of contemporary issues in early childhood policy and practice;

Subject Content

- Module 1 Citizenship, Ethics and the Creation of Wellbeing
 - Values, citizenship and work as a professional
 - Ethics principles and frameworks
 - Wise professional practice: models and tools
- Module 2: Educational Policy: Contents and Discontents
 - Exploration of contested values that underpin policy and pedagogical practice

- Policy studies
- The business of policy making
- Contemporary issues and debates in educational policy
- Institutions as sites for ethical encounters

3. Module 3: Ethically Informed Advocacy and Activism

- Democratic processes for change
- Ethical entrepreneurship
- Futures, futures thinking and scenario planning

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz - Online quiz in each Module of the unit	Approximately 15 30 minutes (10 minutes for each quiz)		N	Individual
Reflection - Online discussion and reflective journal analyzing two ethical scenarios	2,000 words	45	N	Individual
Presentation - Multimedia uploaded to presentation vUWS - Ethical implications of a policy issue.	5 minutes,	40	N	Individual

TEAC 3010 Health and Physical Education in the Primary Years

Credit Points 10

Legacy Code 102652

Coordinator Jorge Dorfman Knijnik ([https://directory.westernsydney.edu.au/search/name/Jorge Dorfman Knijnik/](https://directory.westernsydney.edu.au/search/name/Jorge%20Dorfman%20Knijnik/))

Description This unit is designed to explore the content and pedagogies of Health and Physical Education (HPE) in the PDHPE NSW K-6 curriculum. Students will develop an understanding of effective pedagogies of HPE. The knowledge and skills developed in this unit can be applied in the other units of study in the course and Professional Experience units. This unit aims to develop teachers who demonstrate empathy with diverse groups of student learners and commitment to socially just schools and classrooms.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Students must be enrolled in and have successfully completed 160 credit points of study in the 1876 Bachelor of Education (Primary).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the content and central concepts of the NSW K-10 PDHPE Syllabus and support documents within primary educational settings.
2. Create programs of integrated learning experiences covering all Health and Physical Education subject matters using a range of relevant pedagogies, assessment and teaching strategies.
3. Apply teaching strategies that are responsive to a diversity of student needs and backgrounds, including Aboriginal and Torres Strait Islander students, English as Additional Language students and students with additional needs.
4. Identify the role of Health and Physical Education within the broader school curriculum, including the relationship between Health and Physical Education contents and other Key Learning Areas of the curriculum and cross curriculum perspectives of literacy and numeracy.
5. Identify and critically analyse appropriate teaching and learning resources that can be used to enhance students' understandings of health concepts.
6. Apply appropriate Health and Physical Education pedagogies to improve learning.
7. Analyse the value of PDHPE as a lifelong learning experience through critically reflecting upon personal experiences with movement, and values and attitudes around health and physical activity.
8. Examine the Wellbeing framework and the relationship between wellbeing and students' learning engagement and educational outcomes.

Subject Content

1. Health and Physical Education syllabus content and pedagogical knowledge.
2. Quality teaching pedagogies and engaging learning experiences that achieve the aims and outcomes of the NESA Personal Development, Health and Physical Education syllabus documents.
3. Organisational management strategies for teaching and learning in Health and Physical Education.
4. Planning and writing effective learning experiences for Health and Physical Education.

5. Student assessment in the key learning area of Health and Physical Education.

6. Using information and communication technologies to design, deliver and evaluate learning experiences and improve their own professional skills.

TEAC 3012 Humanities in Early Childhood

Credit Points 10

Legacy Code 102675

Coordinator Denise Fraser ([https://directory.westernsydney.edu.au/search/name/Denise Fraser/](https://directory.westernsydney.edu.au/search/name/Denise%20Fraser/))

Description This unit explores the key concepts of learning and teaching in the areas of history, geography, civics and citizenship, and incorporates place studies, sustainability and environmental education. Aboriginal and Torres Strait Islander studies in birth to 5 years early childhood settings are a focus in this unit. The unit will explore a broad, complex and engaging field of study which reflects people as social beings who interact together and with the environment through and over time. Perspectives including those of Aboriginal and Torres Strait Islander peoples, socio-cultural influences and place-based pedagogies will be investigated. Students will be encouraged to explore their own place in Australian society and the way in which this contributes to their professional identity and teaching practice.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in 1879 Bachelor of Education (Birth – 5 Years) and have completed 160cp in that program.

Learning Outcomes

1. Investigate local and global policies that respect cultural identity, rights and sustainability of marginal groups within society.
2. Explain the central concepts and a range of strategies for teaching history, geography, civics and citizenship, social and environment education and their relevance for early childhood settings.
3. Design curriculum and assessment, that incorporates family and community contexts and theories of place and place pedagogies, Aboriginal and Torres Strait Islander histories and contemporary perspectives on culture, diversity and inclusion.
4. Recommend appropriate community and educational resources to support children's deep engagement with society.
5. Identify appropriate resources to assist children to express their understandings of society, place and culture.
6. Describe the critical role of research in broadening their own professional knowledge and the knowledge of their students.

Subject Content

1. Theory related to teaching history, geography, civics and citizenship, social and environmental education
2. Contemporary Aboriginal and Torres Strait Islander perspectives
3. Cultural Identity and social policy
4. History, geography, civics and citizenship in the early childhood curriculum
5. Sustainability education and nature play in childhood
6. The role of professional research in understanding history, geography, civics and citizenship and curriculum development

TEAC 3013 Inclusive Practices

Credit Points 10

Legacy Code 102654

Coordinator Marion Sturges ([https://directory.westernsydney.edu.au/search/name/Marion Sturges/](https://directory.westernsydney.edu.au/search/name/Marion%20Sturges/))

Description Effective and inclusive teaching requires knowledge of how students learn as well as proficiency in applying appropriately tailored teaching strategies to cater to needs of all students. The unit provides a foundation of knowledge and practice that facilitates development of appropriate and inclusive attitudes and skills for teaching learners with diverse needs in the regular classroom. It will address professional skills, approaches and relevant legislation in the implementation of the principles of inclusive education practices in primary school settings. In particular, the capacity to structure individualised education programs will be developed drawing on practical experiences and a broad familiarity with the field.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Students must be enrolled in and have successfully completed 240 credit points in the Bachelor of Education (Primary).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply theoretical, policy and legislative understandings to the construction of supportive and inclusive learning environments;
2. Develop an appropriate attitude towards diversity and the approaches to inclusion within schooling systems;

3. Design individualised programs for learning and intervention based on sound understanding of theory and evidence-based strategies;
4. Apply development, learning and behaviour theories to construct educational programs that meet the diverse needs of learners;
5. Plan effectively for a diverse range of learners and use a variety of learning and teaching strategies and assistive technologies to engage learners to maximise their potential;
6. Apply appropriate and sensitive attitudes and practices in interactions with students with differing education needs;
7. Utilise practical approaches for promoting positive behaviour and supporting learner engagement;
8. Discuss theories of collaboration and the role of families, educators, colleagues, and professionals in supporting students with disabilities.

Subject Content

- Legislation and policy frameworks governing inclusion
- appropriate and sensitive attitudes towards diversity and inclusion
- theoretical understandings to The construction of supportive and inclusive learning environments
- identification and documentation of individual needs incorporating curriculum-based planning and assessment for learning
- design of individualised educational programs to meet The needs of learners with diverse needs
- structured Teaching strategies and processes for inclusion

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Intra-session Exam	1 hour	10	N	Individual
Professional Task	2,000 words	50	N	Individual
Short Answer	2 hours	40	N	Individual

Prescribed Texts

Teaching Periods

TEAC 3014 Language and Literacy 2

Credit Points 10

Legacy Code 102134

Coordinator Ruth Lusty ([https://directory.westernsydney.edu.au/search/name/Ruth Lusty/](https://directory.westernsydney.edu.au/search/name/Ruth%20Lusty/))

Description This unit will continue the development of students' understandings about language and literacy in a K-6 context. The unit will focus of the area of writing, including literary, factual, media and multi-media texts. Students will develop their theoretical knowledge about the teaching and learning of writing and the relationship between writing, reading, talking and listening.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects EDUC 2012 - Language and Literacy 2

Restrictions Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain methodologies for the teaching and learning of reading and writing, including emergent literacy and the teaching of spelling and handwriting and using digital technologies and their implications for a range of learners.
2. Utilise strategies that connect language and literacy to learning in other curriculum areas.
3. Compare the current NSW English Syllabus, K-6 with the NSW syllabus for the Australian curriculum : English, K-10 Volume 1.including the different text types
4. Identify resources for Language and Literacy that relate to Aboriginal and Torres Strait Islander perspectives.
5. Complete a mini unit of work with a literacy focus, with clear outcomes and a plan to implement a coherent sequence of lessons via a range of strategies for the teaching of reading, writing, talking listening and viewing, across the curriculum.
6. Identify assessment measures to assess children's literacy development against set goals and outcomes.
7. Utilise appropriate oral and written feedback strategies and techniques.

Subject Content

- 1.?????? Review of reading theory from Language and Literacy 1
- 2.?????? Theories of literacy development and the NSW syllabus for the Australian

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 3015 Language and Literacy in Years 3-6

Credit Points 10

Legacy Code 102650

Coordinator Lynde Tan ([https://directory.westernsydney.edu.au/search/name/Lynde Tan/](https://directory.westernsydney.edu.au/search/name/Lynde%20Tan/))

Description The unit extends understandings of English content based on the strands of language, literature and literacy and the NSW Syllabus for the Australian Curriculum: English K-10 with a focus on years 3-6. Students will draw on contemporary theories of literacy learning and teaching, and will examine a repertoire of teaching and assessment strategies for deconstructing and constructing a range of texts in classrooms. By investigating a range of written and multimodal genres, their textual structures and grammar, students will develop their meta-semiotic awareness. This awareness is crucial when they plan to teach primary school students literacy skills related to various learning areas of the Australian Curriculum. In this unit, students' technological, pedagogical and content knowledge is progressively enhanced to prepare them to teach innovatively with digital media with simultaneous infusion of emergent language and literacy practices.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Students must be enrolled in and have successfully completed 160 credit points in the Bachelor of Education (Primary).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse formal and informal literacy events to identify how they promote children's literacies in the digital age;
2. Examine strategies for teaching language and literacy skills to students based on the Australian Curriculum: English and NSW English K-10 syllabus;
3. Evaluate assessment tasks and their accompanying marking criteria for monitoring students' progress in meeting language and literacy learning outcomes;
4. Distinguish the purpose, structure and grammar of informative, persuasive and imaginative texts;
5. Plan lesson sequences that use resources, including ICT, to support diverse learners (including EAL/D, Aboriginal and Torres Strait Islander students) in responding critically to multimodal texts and composing digital texts.

Subject Content

- children's literacies in The digital Age

- Content and accompanying strategies for teaching language and literacy skills based on the Australian Curriculum: English and NSW English K-10 syllabus
- assessment of language and literacy skills: principles, practices and strategies
- The purpose, structure and Grammar of informative, persuasive and imaginative texts
- The language of meaning-making resources in various learning areas of The Australian curriculum and NSW syllabuses
- planning to teach multimodal literacies and authoring with A unit of work
- digital media for language and literacy learning and Teaching

Teaching Periods

TEAC 3016 Language and Literacy in the Early Years

Credit Points 10

Legacy Code 102646

Coordinator Jacqueline D'Warte ([https://directory.westernsydney.edu.au/search/name/Jacqueline DWarte/](https://directory.westernsydney.edu.au/search/name/Jacqueline%20DWarte/))

Description The subject examines ways of understanding English content based on the strands of language, literature and literacy in the Australia Curriculum: English and the NSW K-6 English Syllabus. Students will understand how language skills are acquired and introduced to theories related to language and literacy learning, particularly from a sociocultural perspective. Students will explore the relationships between language, literacy and literature across a range of contexts with the focus on children in the early years, aged five to eight. Students will also develop an understanding of current theoretical and pedagogical approaches for English language teaching and learning with a focus on culturally and linguistically diverse learners. Students will determine young children's speaking, listening, reading, phonological and graphological awareness, and writing strengths and needs and develop strategies for teaching students in the early years.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in the Bachelor of Education (Primary) and have satisfactorily completed 80 credit points of study.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the nature of language acquisition, language and literacy development.
2. Examine strategies for teaching language skills based on the Australian Curriculum: English and the NSW Syllabus for the

Australian Curriculum: English K-10 syllabus, in the early years i.e. 1st year of schooling (Kindergarten) to year 3.

3. Identify and evaluate strategies for teaching and assessing the strengths, needs and knowledge of a range of diverse learners in K-3 classrooms, particularly EAL/, Aboriginal and Torres Strait Islander learners and learners from low SES backgrounds.
4. Analyse and critique student assessment data, and apply assessment moderation principles to monitor progress towards meeting learning outcomes.
5. Apply understandings of pedagogy and curriculum design to plan engaging lesson sequences that use a range of resources, for example, high quality children's literature, and information and communications technology (ICT).
6. Synthesize opportunities for English language and literacy learning across the curriculum.

Subject Content

1. Overview of language and literacy acquisition and learning theories
2. Content and accompanying strategies for teaching language skills (talking & listening, reading, phonological and graphological awareness, viewing and writing based on the Australian Curriculum: English and the NSW K-6 English syllabus
3. Language and literacy teaching and learning for diverse learners including Aboriginal and Torres Strait Islander learners, EAL/D, Special Needs and Low SES Learners
4. Assessment of speaking, listening, reading, writing and viewing skills in the early years
5. Programming lesson sequences for language and literacy learning using a variety of texts
6. Planning and implementing English language learning across the curriculum

Legislative pre-requisites

Prior to enrolling in this subject:

1. Students are required to complete a Working with Children Check leading to the issuance of a clearance number under the category of volunteer.

Students will need to:

- i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.
 - ii. Present an application number and identification to a NSW Motor Registry or Government Access Centre prior to issuance by mail a Working with Children Check number.
 - iii. Submit the letter with a valid Working With Children Check number to Student Central where the document is trimmed and recorded in Banner as a Special Requirement.
2. Students must have completed Child Protection Awareness Training (Online) prior to undertaking any visits/placements.
 3. Students must have completed the ASCIA anaphylaxis e-training and registered their certificates with Student Central.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

TEAC 3017 Learning Environments

Credit Points 10

Legacy Code 102679

Coordinator Kerry Staples ([https://directory.westernsydney.edu.au/search/name/Kerry Staples/](https://directory.westernsydney.edu.au/search/name/Kerry%20Staples/))

Description This subject engages students in exploring the role of physical environments that support children's learning in early childhood and community settings. Theoretical perspectives, including Aboriginal and Torres Strait Islander perspectives, sociocultural influences and place-based pedagogies will be investigated. Relevant policy and regulation documents around risk, play and pedagogy will be examined. Through field visits to early childhood and community settings, students will have the opportunity to plan and design indoor and outdoor learning environments that encourage investigation and discovery using natural and open-ended materials. The overall focus of this subject is for students to develop an understanding and appreciation for learning environments that promote a connection to place and sustainability.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in 1879 Bachelor of Education (Birth – 5 Years) and have completed 160cp in that program.

Learning Outcomes

- Evaluate children's engagement and interaction with environments.
- Analyse the role and impact of stimulating and engaging physical environments for the development of the child.

- Apply key policy and regulatory documents to the planning and design of children's physical learning spaces.
- Apply contemporary theoretical and philosophical perspectives related to the child nature relationship and sustainability education to inside and outside learning spaces.
- Design a space for children incorporating space, place and time on the lived experience and identity of individual children.

Subject Content

- Theories that integrate concepts of children, nature and play
- Significance of space, place, time and silence as lived experience and its influence on everyday practice
- Contemporary national and international theories and philosophies related to the child-nature relationship and sustainability education, including Aboriginal and Torres Strait Islander perspectives, socio-cultural influences and place-based pedagogies
- Key policies and regulations for outdoor learning, play and inclusive physical environments
- Documenting and implementing learning programs that support place-based pedagogies and sustainability learning
- Researching inside and outside learning environments for and with children
- The relationship between physical environments and children's experiences of place
- The design of children's physical learning spaces

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, pre-service teachers must have satisfactorily completed online Child Protection Awareness Training, have a current Working with Children Check, and the online course ASCIA Anaphylaxis: Australasian childcare.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Report	750 words	25	N	Individual
Case Study	750 words	25	N	Individual
Applied Project	1,600 words	50	N	Individual

Teaching Periods

TEAC 3019 Numeracy and Mathematics in Years 3-6

Credit Points 10

Legacy Code 102649

Coordinator Maree Skillen ([https://directory.westernsydney.edu.au/search/name/Maree Skillen/](https://directory.westernsydney.edu.au/search/name/Maree%20Skillen/))

Description This unit explores pedagogy specifically relating to the teaching and learning of primary mathematics in years 3 - 6. This unit is one of 16 units that provide opportunities for students as Pre-service Teachers to prepare for their future employment as a teacher and to engage with the key elements of the New South Wales Education

Standards Authority (NESA). Students will develop skills in pedagogy and practice within the area of primary mathematics. The knowledge and skills developed in the other units of study in the course can be applied in this unit and the knowledge and skills developed in this unit can be applied in other units in the course.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Students must be enrolled in and have successfully completed 160 credit points in the Bachelor of Education (Primary).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate knowledge and understanding of the development of the concepts, skills and processes of mathematics related to the teaching of number and algebra, measurement and geometry, and statistics and probability for 8 to 12 year olds in accordance with the NSW K-10 Syllabus for the Australian Curriculum: Mathematics K-10 syllabus (for K-6), and the ACARA Numeracy Progressions;
2. Explain the importance of the Working Mathematically processes for primary school mathematics learners and teachers;
3. Plan effective and engaging teaching and learning experiences for mid to upper primary learners that include the use of a range of digital resources to enhance student outcomes;
4. Apply knowledge and understanding of a range of engaging pedagogies for teaching and learning mathematics, including cooperative learning, problem solving and investigation based approaches;
5. Evaluate student learning against curriculum requirements by interpreting student work samples, practising consistent and comparable judgements, and explain the importance of timely and appropriate feedback for student learning;
6. Demonstrate knowledge and understanding of teaching and assessment strategies for differentiating teaching and learning experiences in mathematics to meet the specific needs of students across the full range of abilities.

Subject Content

- theories of engagement, Numeracy development and learning in mathematics for students in The primary years
- Implementation of the NSW K-10 Mathematics syllabus across all strands, with particular focus on the Working Mathematically strand
- Incorporation of Problem solving and investigation-based pedagogies in primary mathematics and Numeracy
- strategies to address Affective Issues relating to The Teaching and learning of primary mathematics
- effective use of digital technologies to enhance The Teaching and learning of mathematics and improve student engagement
- Catering to learners from diverse backgrounds (e.g. cultural and linguistic)
- differentiation to address A range of abilities (including special needs and gifted and talented)
- investigation of rich tasks to promote Critical Numeracy
- effective assessment of mathematics and Numeracy
- investigation of The requirements of The ACARA Numeracy Progressions

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject:

1. Students are required to complete a Working with Children Check leading to the issuance of a clearance number under the category of volunteer.

Students will need to:

- i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.
- ii. Present an application number and identification to a NSW Motor Registry or Government Access Centre prior to issuance by mail a Working with Children Check number.
- iii. Submit the letter with a valid Working With Children Check number to Student Central where the document is trimmed and recorded in Banner as a Special Requirement.

2. Students must have completed Child Protection Awareness Training (Online) prior to undertaking any visits/placements.

3. Students must have completed the ASCIA anaphylaxis e-training and registered their certificates with Student Central.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Critical Review	500 words	10	N	Individual
Professional Task	2000 words	40	N	Individual
Report	2000 words	50	N	Individual

Teaching Periods

TEAC 3020 Primary Professional Experience 2: Working with Assessment Data for Instruction

Credit Points 10

Legacy Code 102648

Coordinator Jacqueline Humphries ([https://directory.westernsydney.edu.au/search/name/Jacqueline Humphries/](https://directory.westernsydney.edu.au/search/name/Jacqueline%20Humphries/))

Description This unit focuses on student data and assessment in relation to Pre-service Teachers' curriculum specialisation. As Pre-service Teachers, students will develop the capacity to interpret student assessment data to inform their teaching as well as develop knowledge

of formal and informal assessment strategies. The unit has a two week (15 day) placement component, which provides opportunities to examine and interpret student data to inform planning and teaching. It also has one day on campus. Students will employ formal and informal assessment strategies to support student learning and inform teaching. Students are required to analyse their own learning in relation to the Graduate Teacher Standards as a review of the progress of their Learning Portfolio is undertaken in this unit.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) TEAC 2048

Restrictions

Students must be enrolled in the Bachelor of Education (Primary) and have satisfactorily completed 160 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret student English/Literacy or Mathematics/Numeracy data;
