2. Explain how English/Literacy or Mathematics/Numeracy assessment data has been applied to their planning and teaching practice;
3. Apply assessment strategies, including informal and formal, diagnostic, formative and summative approaches to monitor and assess student learning;
4. Use informal and formal assessment strategies of student learning to inform teaching;
5. Interact ethically and professionally with staff, students and the broader school community;
6. Reflect on own learning, teaching and feedback from school-based and university-based teacher educators in relation to the Australian Professional Standards for Graduate Teachers;
7. Execute an enthusiastic and positive attitude towards students as individuals and learners.

Subject Content

- informal and formal assessment strategies (including, diagnostic, formative and summative approaches to assess student learning)
- student learning and assessment data
- observing and recording student learning
- planning cycle- using data and assessment to inform Lesson planning
- Critical self-reflection with reference to The Australian professional Standards for graduate teachers

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject:

1. Students are required to complete a Working with Children Check leading to the issuance of a clearance number under the category of volunteer.

Students will need to:

- i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.

- ii. Present an application number and identification to a NSW Motor Registry or Government Access Centre prior to issuance by mail a Working with Children Check number.
- iii. Submit the letter with a valid Working With Children Check number to Student Central where the document is trimmed and recorded in Banner as a Special Requirement.

2. Students must have completed Child Protection Awareness Training (Online) prior to undertaking any visits/placements.

3. Students must have completed the ASCIA anaphylaxis e-training and registered their certificates with Student Central.

4. From 2H/Spring 2022, students must be COVID-19 fully vaccinated as per the NSW Public Health Order and NSW Department of Education requirement. If a student is unable to be get an approved vaccination for medical reasons, they will need to approach their doctor who must complete a contraindication form available at: covid-19-vaccine-contraindication.pdf (nsw.gov.au) (<https://www.health.nsw.gov.au/Infectious/covid-19/vaccine/Documents/covid-19-vaccine-contraindication.pdf>). Students to submit details of all vaccination doses or contraindication form via Western Now form for it to be recorded on their academic record.

Legacy Code 102656

Coordinator Jacqueline Humphries ([https://directory.westernsydney.edu.au/search/name/Jacqueline Humphries/](https://directory.westernsydney.edu.au/search/name/Jacqueline%20Humphries/))

Description This subject explores the key concepts of learning and teaching in the areas of history, geography, civics and citizenship, and incorporates place studies, sustainability and environmental education. Aboriginal and Torres Strait Islander studies in birth to 5 years early childhood settings are a focus in this subject. The subject will explore a broad, complex and engaging field of study which reflects people as social beings who interact together and with the environment through and over time. Perspectives including those of Aboriginal and Torres Strait Islander peoples, socio-cultural influences and place-based pedagogies will be investigated. Students will be encouraged to explore their own place in Australian society and the way in which this contributes to their professional identity and teaching practice.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) TEAC 3020

Restrictions

Students must be enrolled in and have successfully completed 240 credit points in the Bachelor of Education (Primary).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply knowledge of research on how students' skills, interests and prior achievements affect learning and use this information to inform teaching strategies;
2. Implement lesson plans detailing objectives and outcomes, specifying content and pedagogy assessment, in consultation with the supervising teacher;
3. Evaluate students' specific strengths, needs and learning styles;
4. Design teaching and learning programs and/or lesson plans with differentiated tasks to meet the learning needs of individual students and that promote student engagement;
5. Use a variety of resources to support the learning style and needs of diverse students;
6. Execute an enthusiastic and positive attitude towards students as individuals and learners;
7. Design a respectful and collegial classroom environment where all students are valued and supported.

Subject Content

- Connecting research with practice to inform planning and Teaching
- student diversity and how it affects Teaching and learning
- identifying students' strengths, needs and learning styles
- planning lessons and programming
- Differentiated learning tasks
- resources to support students' needs
- The Professional Teacher ? Planning, teaching; effective communication, professional interactions and ethical and professional conduct

Special Requirements

TEAC 3023 Professional Experience 4: Teaching in Country

Credit Points 10

Legacy Code 102141

Coordinator Jacqueline Humphries ([https://directory.westernsydney.edu.au/search/name/Jacqueline Humphries/](https://directory.westernsydney.edu.au/search/name/Jacqueline%20Humphries/))

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject will build on previous Professional Experience in the program. Students will be placed for 30 days in one of the partner local/regional/rural schools with a high Aboriginal and Torres Strait Islander student population. Students are required to develop skills related to effective planning, programming, evaluating and teaching in a teaching context, which will be assessed against the Graduate Teacher Standards and as part of their Teaching Performance Assessment (TPA). Students will experience how school and classroom curricula and policy are influenced by the nature of the school's community.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) TEAC 1029 AND TEAC 2049 AND TEAC 3040

Equivalent Subjects LGYA 1486 - Professional Experience 3 Teaching in Context - AREP

Restrictions

Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify NSW syllabus documents, stage and outcome learning goals, plan lessons with a clear understanding of the research that will inform short and long term student progression
2. Plan a cycle of teaching, learning and assessment events involving individuals, small groups and whole classes activities across all KLAS.
3. Set a series of learning goals for a variety of learners exhibiting varying abilities and capabilities across a learning continuum using a range of teaching strategies.

4. Assess classroom data and make informed adjustments in the delivery of lessons over time which foster student's well-being and engagement.
5. Identify individual and group learning needs of the class, plan for 3 teaching episodes, that include the principles of assessment provisions for the delivery of appropriate timely e feedback and support to selected students about their learning.
6. Make informed judgements through a series of professions conversations with colleagues about how schools and teachers make different curriculum decisions depending on their understanding of the community context.
7. Assess their own individual learning needs through the application of self-reflective/reflexive engagements with National Professional Standards in the self-identification of their professional learning needs
8. Demonstrate graduate outcome achievement levels in the preparation of their professional portfolio

2. Students must complete the **two** components of the NSW Department of Education's Child Protection Awareness Training (CPAT)

- a) Students will need to:
 - i. Access the NSW Department of Education's MyPL website <https://mypl.education.nsw.gov.au/>
 - ii. Complete the online Child Protection Awareness Training: Induction
 - iii. Save certificate of completion
 - iv. Submit certificate via WesternNow Student Portal
- b) Students will need to:
 - i. Access the NSW Department of Education's MyPL website <https://mypl.education.nsw.gov.au/>
 - ii. Complete the Child Protection Awareness Training (CPAT): Annual Update for the calendar year
 - iii. Save certificate of completion
 - iv. Submit certificate via WesternNow Student Portal

Both certificates will be recorded on your student record as Special Requirements with the end date for the Annual CPAT recorded. The CPAT: Annual Update will need to be renewed and submitted on an annual basis.

Students who have not completed both components of the Child Protection Awareness Training will need to withdraw from the subject.

3. Students must complete the ASCIA anaphylaxis e-training and submit their certificate to Submit certificate via WesternNow Student Portal.

4. Students must meet the Inherent Requirements for the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education (<https://hbook.westernsydney.edu.au/programs/bachelor-education-primary-aboriginal-torres-strait-islander-education/>).

5. Students must satisfactorily complete the national Literacy and Numeracy TEST prior to undertaking the final Professional Experience placement in this subject.

6. From 2H/Spring 2022, students must be COVID-19 fully vaccinated as per the NSW Public Health Order and NSW Department of Education requirement. If a student is unable to be get an approved vaccination for medical reasons, they will need to approach their doctor who must complete a contraindication form available at: [covid-19-vaccine-contraindication.pdf \(nsw.gov.au\)](https://www.health.nsw.gov.au/Infectious/covid-19/vaccine/Documents/covid-19-vaccine-contraindication.pdf) (<https://www.health.nsw.gov.au/Infectious/covid-19/vaccine/Documents/covid-19-vaccine-contraindication.pdf>). Students to submit details of all vaccination doses or contraindication form via Western Now form for it to be recorded on their academic record.

Subject Content

1. Professional Standards for Graduate teachers
2. Evidence-based practice and reflection– observing, analysing, reflecting and evaluating personal professional practice
3. Classroom management
4. Community contexts
5. Lesson planning, implementation and assessment for effective learning
6. Individual, group and whole class teaching
7. Undertake professional conversations regarding the collection and revision of classroom data with a supervising teacher/mentor/s.

Special Requirements

Legislative pre-requisites

1. Students are required to complete the **two** components of the Working with Children Check (WWCC) process leading to (a) the issuance of a clearance number under the category of volunteer and (b) verification of the clearance number with the NSW Department of Education.

a) Students will need to:

- i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.
- ii. Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.
- iii. Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record. WesternNow Student Portal link (https://wsu.service-now.com/student/?id=sc_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed)

b) Students will need to:

- i. Access the NSW Department of Education WWCC Verification declaration form <https://online.det.nsw.edu.au/jecpc/crc/wwcc.jsf>
- ii. Carefully read the information about Identity Documents and obtain a copy of the relevant ID documents.
- iii. Complete and submit the verification declaration form.
- iv. Once your WWCC verification is complete you will receive an email reply from the DoE Probity Unit confirming your WWCC number has been verified.
- v. Submit the verification confirmation email via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.

TEAC 3024 Professional Portfolio 3: Management and Leadership

Credit Points 10

Legacy Code 101624

Coordinator Denise Fraser ([https://directory.westernsydney.edu.au/search/name/Denise Fraser/](https://directory.westernsydney.edu.au/search/name/Denise%20Fraser/))

Description This unit involves a 25 day placement in a long day care setting with children from birth to five years of age. Students are required to reflect on their own learning and the potentials and challenges of the early childhood setting to develop appropriate goals and a relevant action research project. The focus of this unit is philosophy development, curriculum design, pedagogical leadership and reflective practice.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) TEAC 2051

Restrictions Students must be enrolled in program 1670 Bachelor of Education (Birth - 5 Years).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate a strong philosophy of teaching and approaches to curriculum and implement these through the use of appropriate pedagogies;
2. Draw on current research and policy to design, implement and evaluate curriculum for children birth -5 years;
3. Demonstrate strategies for developing collaborative partnerships with children, educators, families and communities that underpin respectful, responsive care and education
4. Assume a critically reflexive pedagogical leadership role within the early childhood setting, that demonstrates the potential to undertake the role of a beginning early childhood teacher;
5. Undertake collaborative centre-based research that builds on contemporary curriculum and policy frameworks; and

6. Demonstrate initiative and negotiation skills in interactions with staff, families and communities.

Subject Content

Module 1: Teamwork and Leadership

- team work and negation
- Working within A professional team as A team member, leader and researcher
- collaborative research

Module 2: Pedagogical leadership

- using tools of curriculum analysis and reflective practice to localise and develop own philosophy and approaches to curriculum
- teacher as researcher and reflexive practitioner Working towards developing Critical pedagogies
- Reflexive curriculum decision-making;
- application of approaches to curriculum evaluation and improvement (e.g. Collective Biographies, action research, quality assurance)

Special Requirements

Legislative pre-requisites

Students must have completed an approved Child Protection workshop prior to enrolling in this subject.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Professional Practice and Portfolio	3,000 words	100%	N	Individual

Teaching Periods

TEAC 3025 Researching Practice

Credit Points 10

Legacy Code 102681

Coordinator Denise Fraser ([https://directory.westernsydney.edu.au/search/name/Denise Fraser/](https://directory.westernsydney.edu.au/search/name/Denise%20Fraser/))

Description This subject develops students' capacity to engage with the tenets of research as they investigate and reflect on their teaching practice, pedagogy and professional identity as a practitioner. Students are introduced to research through action research. The students use the Principles and Practices sections from the Early Years Learning Framework to reflect on their pedagogy, which requires them to consider the strength of their practice and the subsequent areas for improvement to develop their teaching practice. Through this process, students develop an understanding of critical reflective practice and improvement cycles. The action research model requires students to explore research processes of data collection, analysis techniques, literature review and using this information to develop a new cycle of investigation.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in 1879 Bachelor of Education (Birth – 5 Years) and have completed 160cp in that program.

Learning Outcomes

1. Analyse the key ideas and assumptions underlying aspects of research and education research debates.
2. Explore research processes and the role of each step of the action process for quality research.
3. Examine key factors influencing the practice and identities of teachers in contemporary education contexts.
4. Reflect critically on their own teaching and learning philosophy, ethical practice and pedagogical leadership.
5. Critique field experience and plan strategies for enhancing practice.
6. Apply the outcomes of the research process to support professional learning, reflection and continuous improvement.

Subject Content

1. The value of engaging with educational research
2. The use of research literature to identify and analyse the social, cultural, economic and political structures important to the role and identity of teachers
3. Research processes: research design, data analysis and ethical issues
4. Research on key factors of contemporary teaching and learning, professional practice and professional identities
5. The role and work of teachers as defined by the research literature
6. Action research and practitioner research principles and practices

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

Teaching Periods

TEAC 3026 Responsive Pedagogies

Credit Points 10

Legacy Code 102676

Coordinator Kerry Staples ([https://directory.westernsydney.edu.au/search/name/Kerry Staples/](https://directory.westernsydney.edu.au/search/name/Kerry%20Staples/))

Description Responsive, respectful and reciprocal relationships with children are a basic tenet of early childhood education and lead to quality outcomes for children. Interactions among children, adults and environments are key to children's learning. Responsive pedagogies use a relationship-based approach to nurture children and families' unique dispositions, cultural and social strengths. This subject promotes respectful interactions that are associated with social

justice, equity, inclusivity and ethical practice. Responsive interactions require teachers to be engaged, to connect and use diverse, nuanced knowledge of curriculum and content to extend children's learning and thinking.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in 1879 Bachelor of Education (Birth – 5 Years) and have completed 160cp in that program.

Learning Outcomes

1. Examine the connections between responsive pedagogies, the provision of quality early childhood education and care, and outcomes for children.
2. Identify the unique ways in which socially and culturally diverse families and communities enhance relationships and interactions between children and teachers.
3. Apply knowledge of child development and theories of learning to analyse children's dispositions, ways of communication and interactions.
4. Apply pedagogical principles for enhancing reciprocal interactions and positive relationships between children, and between children and adults/teachers.
5. Develop evidence-based strategies to connect, engage and build trusting relationships with children that enhance play, learning and well-being.
6. Critique responsive pedagogies for engaging in sustained shared conversations with children that extend children's interests, play and learning.

Subject Content

1. Relationship between quality outcomes for children's learning and responsive pedagogies
2. Children's language and communication development
3. Factors influencing children's interactions, development and learning
4. Socio-cultural approaches to analysing interactions and relationships
5. Responsive teaching strategies that scaffold and enhance children's learning
6. Responsive pedagogies that support participation and inclusion of children from diverse backgrounds.
7. Socially and culturally inclusive community and family approaches, (including Aboriginal and Torres Strait Islander families and communities) for nurturing relationships with children.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Case Study	1,000 words	20	N	Individual
Report	1,200 words	30	N	Individual

Teaching Periods

TEAC 3028 Supporting Positive Learning

Credit Points 10

Legacy Code 102682

Coordinator Kerry Staples ([https://directory.westernsydney.edu.au/search/name/Kerry Staples/](https://directory.westernsydney.edu.au/search/name/Kerry%20Staples/))

Description Educators have a key responsibility for guiding and facilitating young children's positive behaviours, their sense of belonging, and wellbeing. This subject provides students with an opportunity to analyse a range of theoretical approaches and various developmental and socio-cultural contextual factors that influence children's behaviours, learning and social interactions. Specifically, students will develop knowledge about diverse approaches to guiding children positively in partnership with families that are responsive to the children's needs, family's aspirations and expectations. Students will apply the legislative and ethical protocols in designing a guidance plan to support the development of positive behaviours and socio-emotional wellbeing in an early childhood setting. Students will also critically evaluate their personal and professional dispositions relating to guiding young children's positive learning and behaviours.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Co-requisite(s) TEAC 4008

Restrictions

Students must be enrolled in 1879 Bachelor of Education (Birth – 5 Years) and have completed 160cp in that program.

Learning Outcomes

1. Analyse theoretical approaches and socio-cultural factors associated with children's learning, developments, and behaviours.
2. Explore strategies for accommodating diversity in children's characteristics, learning and behavioural styles in relation to their social interactions.
3. Explain the importance of mental health and sense of wellbeing for children's overall development and learning.
4. Critique the importance of children's understandings of themselves and others and their capacity for agency.
5. Examine guidance strategies and techniques for promoting children's positive learning and wellbeing in partnerships with families and other professionals.
6. Evaluate the impact of environmental factors on individual and group behaviour in educational settings and organise learning environments in ways that promote positive behaviours.

7. Apply knowledge of theories and guidance policies to plan, implement and evaluate a selected guidance approach to promote children's positive behaviours.
8. Reflect on personal dispositions and professional approaches in relation to learning and teaching, with a particular emphasis on monitoring and guiding children's behaviour.

Subject Content

1. Traditional and contemporary approaches to guiding children's behaviour, social-emotional development and social interactions
2. Theories of developmental, contextual, ecological factors that influence children's behaviour and learning
3. Educators', families', and communities' beliefs, values and attitudes about children's behaviours
4. Partnering with educators, families and other professionals to support children's prosocial behaviour, social-emotional health and well-being
5. Methods of documenting and analysing behaviour, interactions and social-emotional development
6. Approaches to understanding and responding to children's challenging behaviour
7. Planning positive learning environments that promote responsive interactions and relationships with children
8. Planning, implementing and monitoring prevention and intervention strategies with consideration of legislative, policy and philosophical frameworks

Assessment

TEAC 3029 TESOL Curriculum Design

Credit Points 10

Legacy Code 102477

Coordinator Dariush Izadi ([https://directory.westernsydney.edu.au/search/name/Dariush Izadi/](https://directory.westernsydney.edu.au/search/name/Dariush%20Izadi/))

Description This unit explores issues, approaches and stages in the TESOL curriculum design process within a range of contexts. It assists students to identify and implement effective strategies for planning, designing and evaluating language learning programs relevant to the needs of the learners and the contexts of learning.

School Humanities & Comm Arts

Discipline English as a Second Language Teaching

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Assumed Knowledge

Sufficient knowledge about teaching international English and English language teaching methodology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. understand concepts and issues relating to the development of English as a foreign/second language curriculum;
2. explore English language curriculum design in current Australian and international contexts;
3. critically analyse approaches to curriculum design;
4. analyse a range of language learning contexts and the implications for planning, programming and evaluating learning;
5. analyse the equity issues in developing and evaluating programs;
6. examine and critique various needs analysis approaches;
7. develop skills in designing English language teaching syllabi;
8. develop skills in planning, designing, evaluating programs for diverse groups of learners;
9. develop skills in developing teacher skills and knowledge for planning and managing the materials design process; and
10. enhance intercultural awareness in selecting teaching materials and teaching international English.

Subject Content

Explore the concept of curriculum in language learning settings- the historical background, underlying assumptions, current issues in adult learning and teaching and constraints

Understand contexts of language curriculum design in Australia and internationally

Discuss and model the curriculum design processes, including: needs analysis

situation analysis

planning goals and learning outcomes

course planning and syllabus design

selecting, sequencing and organising content

selecting teaching and learning strategies

role and design of instructional materials

methods of student assessment

evaluating programs

Understand key issues in curriculum design:

approaches to analysing needs

ideology, objectives, language and non-language outcomes

effective teaching- the institution, the teacher, the teaching and learning process

intercultural awareness in selecting and using resources and materials

managing resources and material development

approaches to curriculum evaluation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 3030 TESOL Placement

Credit Points 20

Legacy Code 102478

Coordinator Ping Yang ([https://directory.westernsydney.edu.au/search/name/Ping Yang/](https://directory.westernsydney.edu.au/search/name/Ping%20Yang/))

Description This unit provides students an opportunity to undertake a professional practice unit which consists of an internship in an English language teaching organisation for students of TESOL. It involves participation in the various aspects of the work of the teaching organisation, including classroom observation, service learning, supervised English language teaching practice component, and volunteer tutoring either in Australia or overseas. In-context placement experience assists TESOL students' career development.

School Humanities & Comm Arts

Discipline English as a Second Language Teaching

Student Contribution Band HECS Band 1 20cp

Level Undergraduate Level 3 subject

Pre-requisite(s) TEAC 2055

Learning Outcomes

On successful completion of this subject, students should be able to:

1. identify through observation various TESOL approaches in different teaching situations
2. demonstrate an understanding of successful TESOL teaching through observation of teaching and consultation with experienced teachers regarding their practice
3. analyse and meet students' learning materials and resources
4. adapt for use a variety of TESOL teaching materials and resources
5. plan, deliver and evaluate TESOL teaching and learning activities; and
6. demonstrate understanding of important non-teaching elements in language teaching and learning settings such as planning, classroom management, teacher collaboration, reflection of teaching materials design.

Subject Content

The placement builds on the knowledge and skills students gain in TESOL Teaching Methodology by situating it in differing TESOL settings such as ELICOS, AMEP, SEE, English for Specific Purposes, and general English skills. It involves in context experience with either teaching ESL

in Australia or EFL overseas. The main components of the placement are:

1. Attending on-campus information sessions, meetings, group discussions, and presentations
2. Observation of classes in a range of English language teaching settings, consultation with teaching staff, team-teaching, and teaching of small withdrawal groups as appropriate in English language teaching organisations, and participation in all aspects of work in these organisations
3. Examination of commercial and teacher-produced teaching resources and materials, including computer assisted language learning resources, current curriculum approaches, and language assessment materials in the range of TESOL settings
4. Supervised practice teaching in the centre in which they are undertaking their internship or through an English language centre
5. Tutoring adult learners on a volunteer basis based on their learning needs
6. Practicum may be undertaken in the partner universities overseas depending on funding and placement availability

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 3031 The Brain and Learning

Credit Points 10

Legacy Code 102207

Coordinator Neil Pedley ([https://directory.westernsydney.edu.au/search/name/Neil Pedley/](https://directory.westernsydney.edu.au/search/name/Neil%20Pedley/))

Description Interest in the relationship between the brain and how people learn is at an all-time high. Surprisingly, most theories of teaching and learning say little about the brain. In an age where 'brain-based' educational products are a multimillion-dollar industry, there is a need for students, parents, and anybody with an interest in education to have some basic knowledge of the brain. This unit is designed to provide students with a straightforward introduction into the limitations and possibilities of brain function, especially with respect to memory and learning. In addition, this unit also examines motivation, exceptional learners, and challenging groups.

School Education

Discipline Teacher Education

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects TEAC 3034 - Young People Their Futures and Education

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss aspects of the brain that underlie human cognition, problem-solving, motivation, and exceptional learners
2. Critique current theories of learning and teaching based on current knowledge of the human brain.
3. Apply current knowledge of the human brain to a range of teaching and learning scenarios.
4. Examine how deficiencies in brain development and social-contextual factors contribute to anti-social grouping of children and young people.

Subject Content

1. The brain, evolution and culture. The intricacies of brain function particularly in relation to human memory and implications for teaching and learning. Comparisons between knowledge that humans have evolved to acquire (biologically primary knowledge) and knowledge that is the product of cultural advancements from the last few millennia (biologically secondary knowledge).
2. Motivation and learning. The study of human motivation of Freudian, behaviourist, social-cognitive, and neuroscience perspectives.
3. Exceptional learners. The cognitive and social-affective characteristics of exceptional learners, particularly school students identified as gifted and talented.
4. Group relationships and challenging groups. The importance that school-aged adolescents place on their peer-networks as they engage in complex inter-group relationships.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quizzes x 2	30 minutes each	50	N	Individual
Essay	2,000 words	50	N	Individual

TEAC 3032 Understanding and Teaching in Context

Credit Points 10

Legacy Code 102136

Coordinator Paul Rooney ([https://directory.westernsydney.edu.au/search/name/Paul Rooney/](https://directory.westernsydney.edu.au/search/name/Paul%20Rooney/))

Description The unit is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. The unit aims to directly challenge students to inquire into, reflect upon, collect classroom data, analyse and respond to the data and subsequently begin to develop a repertoire of pedagogies that cater to the needs of learners within contexts which reflect the diversity of today's educational settings. The unit aims to develop skills related to effective planning, programming, evaluating and teaching in a wide variety of teaching contexts in Primary classrooms.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Co-requisite(s) TEAC 3040

Equivalent Subjects LGYA 1494 - Understanding and Teaching in Context - AREP

Restrictions Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Assumed Knowledge

This subject draws upon, consolidates and synthesises previous knowledge from a range of subjects in years 1-3 as they relate to a classroom learner.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate literature related to school practices, school contexts, curriculum and teaching practices. (Standard 6.2.1)
2. Consolidate syllabus and pedagogical knowledge taught in previous units. (Standards 2.1.1, 2.3.1, 2.5.1, 2.6.1)
3. Critically examine significant equity issues for their impact on teaching and learning. (Standards 1.3.1 2.4.1, 4.4.1, 6.4.1)
4. Critically examine the theory and practice surrounding the pursuit of equality and equity. (Standard 1.3.1, 2.4.1)
5. Critically evaluate the features of planning, programming, assessing and evaluation strategies, in terms of their appropriateness for diverse learning contexts. (Standards 1.1.1, 1.3.1, 1.5.1, 2.4.1)
6. Plan, program, assess and evaluate for a group of learners in a specific learning context by translating personal philosophies, sound educational theory and system/school requirements into effective classroom practices. (Standards 2.1.1, 2.2.1, 2.3.1, 3.1.1, 3.6.1, 5.1.1, 5.5.1)

Subject Content

Understanding learner diversity.

The nature of learning: Implications for curriculum design
The curriculum and the learning environment.

Teaching in new times, the use and impact of technology

Fair Go project- and related literature

Assessment and the MeE assessment cycle

Programming for student engagement

Annotation of student work samples to demonstrate outcomes achieved

Presentation of MeE assessment & professional conversations

TEAC 3033 Working and Teaching with Diverse Communities

Credit Points 10

Legacy Code 102655

Coordinator Christine Jones Diaz ([https://directory.westernsydney.edu.au/search/name/Christine Jones Diaz/](https://directory.westernsydney.edu.au/search/name/Christine%20Jones%20Diaz/))

Description This unit focuses on equity and social justice issues in diverse communities and educational settings. It explores a range of contemporary theoretical frameworks and pedagogical approaches that will develop students' understandings about the social construction of difference, identity and subjectivity within social, historical and political contexts. A critical awareness of the intersections between language, knowledge, power and discourse provides students with theoretical knowledge and practical analytical tools. Students will analyse and deconstruct inequalities and subjectivity in personal and professional contexts. They will apply this critical understanding to interrogate educational policies, programs, and services, and develop effective teaching and learning strategies for diverse and multilingual learners, including English as an Additional Language/Dialect and Aboriginal and Torres Strait Islander learners.

TEAC 3036 Data and Assessment in the Primary classroom

Credit Points 10

Legacy Code 102754

Coordinator Paul Rooney ([https://directory.westernsydney.edu.au/search/name/Paul Rooney/](https://directory.westernsydney.edu.au/search/name/Paul%20Rooney/))

Description The unit is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This unit investigates the functions and roles of assessment in K-6 classrooms. It considers ways in which assessment can provide positive support that enhances students' progression within the school context. Teacher education students will review, refine and develop their knowledge and skills connected with being an assessment-literate teacher in their own classrooms. The unit will explore both national and international data sets and how these inform policy, classroom practices and professional roles into the future.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Students must be enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine how assessment data are used to inform classroom and policy in national and International discourses;
2. Make judgements of students' assessment tasks to practice consistent and comparable judgements, including moderation;
3. Critically reflect on the purposes and roles of diverse assessment strategies and their impacts on student learning processes;
4. Explore strategies to record, represent and analyse students' assessment data;
5. Design assessment items that relate to student outcomes in a range of K-6 curriculum areas.

Subject Content

- data and assessment in primary classrooms
- keeping records, observational notes, anecdotal data and Numerical data
- Assessing students using standardised data: NAPLAN, and other school based literacy and Numeracy programs
- Data representation and interpretations used in the profession, including a range of data displays: ? Side by side column graphs ? Two categorical variables ? Digital media representations of data ? Statistics and probability: Baffling box plots
- using assessment data to improve student learning and outcomes

- formative assessment strategies that build visibility around student learning
- consistency of teacher judgement related to student assessment data

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Investigating Assessment: system, school & class assessment data - their functions and role in classrooms	2,000 words	50	N	Individual
Designing Assessment tools: Designing assessment items for given units of work (Including formative summative and differentiated)	2,000 words	50	N	Individual

TEAC 3037 Engaging in the Profession

Credit Points 10

Legacy Code 102755

Coordinator Dianne Burrell ([https://directory.westernsydney.edu.au/search/name/Dianne Burrell/](https://directory.westernsydney.edu.au/search/name/Dianne%20Burrell/))

Description The unit is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. Students need to have a variety of experiences that are set in the context of their future profession. Through these experiences they need to draw together, as a capstone, all the previous units in the course, integrating them through a well-balanced program that allows the students to refine their skills as beginning teachers. This gives them opportunity to reflect on the processes involved, identify their competencies and assist the school by recognising potential issues and assisting in implementation of the resulting praxis. This unit includes all areas of foundations and curriculum complementing a final practicum experience that will show the interrelationship between theory and practice. It also addresses issues that assist in the development of the individual student toward their transition into teaching. Students will produce a professional learning portfolio in this unit to demonstrate achievement of the Graduate Teacher Standards. The learning portfolio will enable students to reflect deeply on their emerging skills and understanding, towards development of a critical perspective of their practice as a teacher.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 1496 - Engaging the Profession - (AREP)

Restrictions Students must be enrolled in the 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the importance of and implement evidence-based practice in their teaching;
2. Investigate classroom and school environments;
3. Design an integrated three-week unit of work;
4. Select appropriate resources, including ICTs, when designing curriculum and learning experiences;
5. Reflect on their school-based experiences with a view to enhancing their teaching practice and understanding of the relationship between theory and practice;
6. Develop a teaching portfolio that demonstrates their teaching philosophy, professional learning, experience and achievement of the Graduate Teacher Standards;
7. Utilise ICT skills in the preparation of assessment tasks.

Subject Content

- Preparing for Teaching - Standards and Expectations
- Classroom management, school policies and learning environments
- programming and development of curriculum programs and units of work
- assessment across The key learning areas
- ICTs in learning and Teaching
- portfolios, and demonstrating achievement of The graduate teacher Standards
- beginning teachers: Teaching philosophy, being A reflective practitioner
- The professional teacher: evidence-based practice

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

TEAC 3038 Health and Physical Education 2

Credit Points 10

Legacy Code 102752

Coordinator Zara Ruggero ([https://directory.westernsydney.edu.au/search/name/Zara Ruggero/](https://directory.westernsydney.edu.au/search/name/Zara+Ruggero/))

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject further builds students' knowledge and understandings of the NSW Syllabus for the Australian Curriculum: Health and Physical Education K-10 (incorporating Health and Physical Education K-6) with a focus on the personal development and health components. Through an examination of the syllabus, modules and support documents, students will develop the necessary skills to design an effective scope and sequence for K-6 Health and Physical Education (HPE) and develop a program of work suitable for a Year 5 - 6 learner. Assessment and evaluation will be addressed and the need to develop descriptive student profiles relating to student achievement of outcomes will be highlighted.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) TEAC 2030 AND TEAC 2058

Equivalent Subjects EDUC 2005 - Personal Development Health Physical Education 1 (AREP)

Restrictions

Students must be enrolled in the 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the central concepts, modes of enquiry and structure of H and PE, including recent theory and practice as relating to key topics of drug education; health education, road safety; and personal development. (Standards 2.1.1, 7.1.1, 7.2.1)
2. Evaluate the cultural, socio-economic and geographical factors of the health and personal development components of the H and PE syllabus with a specific focus on Aboriginal content. (Standards: 2.1.1, 2.4.1)
3. Explain the nature and role of H and PE as a discipline for supporting the development of health and wellbeing. (Standards 4.1.1, 4.4.1)
4. Apply understandings of assessment and students' learning in Years 5 – 6 within the H and PE key learning area. (Standards 1.5.1, 5.1.1.)
5. Design a variety of teaching, classroom behaviour and organisational management strategies to cater for a range of diverse learners. (Standards 4.1.1, 4.2.1, 4.3.1, 4.4.1)
6. Design learning experiences, lessons and lesson sequences, (Standards 1.1.1, 2.1.1, 2.5.1)
7. Undertake risk assessments using knowledge of the NSW syllabuses or other curriculum support documentation requirements. (Standards 7.1.1 7.2.1)
8. Explain the role and value of H and PE in the broader school curriculum, including literacy and Numeracy in H and PE. (Standards 2.5.1, 3.5.1, 3.6.1)

Subject Content

1. Personal identity and how it impacts on our health.
2. Factors of resilience.
3. Concepts of health, safety (including road safety) and wellbeing.
4. Interpersonal skills that enable students to interact effectively and respectfully with others, build and maintain respectful relationships.
5. Cultural and socio-economic and geographical factors of health including Aboriginal and Torres Strait Islander specific content.
6. Drug education and lifestyle choices.
7. Syllabus delivery and classroom practices that meet Years 5-6 requirements for Health and Physical Education (H and PE).
8. Assessment practices for H and PE

TEAC 3039 Mathematics 1: Geometry, Number and Algebra Years K-6

Credit Points 10

Legacy Code 102751

Coordinator John Ley ([https://directory.westernsydney.edu.au/search/name/John Ley/](https://directory.westernsydney.edu.au/search/name/John%20Ley/))

Description The unit is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This unit is designed to enhance teacher education students' understanding of the NSW Syllabus for the Australian Curriculum: Mathematics K-10. The unit provides greater understanding of the content areas of measurement, number, geometry, algebra and statistics in the K-6 classroom focusing on years 5 and 6 and into the secondary school mathematics curriculum. The unit makes clear links to secondary school (year 7) mathematics and will develop the students' conceptual understanding of mathematics and numeracy learning progression from primary to secondary school.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) TEAC 1028 AND TEAC 1010

Restrictions Students must be enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design learning experiences and lessons with a focus on years 5 and 6;
2. Provide classroom opportunities to use continuous scales in measurement linked to an understanding of the number system, particularly of decimals;
3. Use appropriate measurement units based on the degree of accuracy required for a range of mathematical tasks;

4. Explore relationships within existing data sets and explore these data sets, using a variety of representations;
5. Use deductive reasoning to justify and support conclusions that are appropriate to the context;
6. Demonstrate the development of geometrical concepts and apply them in an appropriate manner to real world classroom teaching including ICT;
7. Demonstrate the relationship between patterns and algebra;
8. Selects and apply appropriate problem-solving strategies in undertaking mathematical investigations.

Subject Content

- Identifies, draws, and classifies 2 dimensional shapes and 3 dimensional objects and their properties
- Measure, construct and calculate angles. Geometry: 3D Space, 2D Space, Angles and Angle Relationships, Position, Properties of Geometrical Figures, Right-Angled Triangles, Trigonometry and Pythagoras' Theorem
- Circle geometry
- explore relationships between number and algebraic representations of number sentences
- use Problem solving skills to complete modelling Activities
- Planning mathematics lessons and learning experiences for students in years 5 and 6

Assessment

TEAC 3040 Professional Experience 3

Credit Points 10

Legacy Code 102750

Coordinator Jacqueline Humphries ([https://directory.westernsydney.edu.au/search/name/Jacqueline Humphries/](https://directory.westernsydney.edu.au/search/name/Jacqueline%20Humphries/))

Description The unit is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This unit is a 10 credit point unit. The unit is designed to enable students to have direct experience of teaching in schools,

building towards a final professional experience. The Professional Experience stream integrates with the curriculum content and pedagogy delivered in other course units. The rationale behind this Professional Experience unit is to give students the opportunity to synthesise and apply their knowledge and skills from all previous units for a total of 20 days. The teaching block will enable students to build or cement relationships with a school community. Teacher Education students will be able to consolidate their teaching through the integration of theory and practice as their final preparation as beginning teachers.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) TEAC 1029 AND TEAC 2049

Incompatible Subjects TEAC 3022 - Professional Experience 3 Engaging with the Profession

Restrictions

Students must be enrolled in the 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the characteristics and elements of classrooms, teaching, learning and curriculum responding to the learning strengths and needs of students from diverse linguistic, cultural, religious and socioeconomic backgrounds;
2. Utilise outcomes-based planning in all subject areas and demonstrate aspects of professional teaching standards;
3. Communicate effectively with students in classrooms;
4. Implement and reflect upon various teaching approaches;
5. Implement and reflect upon various assessment and classroom management strategies;
6. Initiate and guide learning by using specific teaching strategies;
7. Apply and demonstrate their continuing understanding of curriculum through appropriate professional experience;
8. Demonstrate a reflexive understanding of their role in the teaching profession and the need to continually improve their professional knowledge and practice;
9. Demonstrate an understanding of how to develop strategies for the establishment of partnerships with parents and the community.

Subject Content

- professional Standards for graduate teachers
- evidence-based practice and reflection? observing, Analysing, reflecting and Evaluating personal professional practice
- Classroom management
- community contexts
- Lesson planning, implementation and assessment for effective learning
- programming and Teaching A unit of work
- individual, group and whole class Teaching
- Looking at Classroom data and assessment

Special Requirements

Legislative pre-requisites

1. Students are required to complete the **two** components of the Working with Children Check (WWCC) process leading to (a) the issuance of a clearance number under the category of volunteer and (b) verification of the clearance number with the NSW Department of Education.

a) Students will need to:

i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.
ii. Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.

iii. Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.

WesternNow Student Portal link (https://wsu.service-now.com/student/?id=sc_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed)

b) Students will need to:

i. Access the NSW Department of Education WWCC Verification declaration form <https://online.det.nsw.edu.au/jecpc/crc/wwcc.jsf>
ii. Carefully read the information about Identity Documents and obtain a copy of the relevant ID documents.

iii. Complete and submit the verification declaration form.

iv. Once your WWCC verification is complete you will receive an email reply from the DoE Probiy Unit confirming your WWCC number has been verified.

v. Submit the verification confirmation email via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.

2. Students must complete the **two** components of the NSW Department of Education's Child Protection Awareness Training (CPAT)

a) Students will need to:

i. Access the NSW Department of Education's MyPL website <https://mypl.education.nsw.gov.au/>
ii. Complete the online Child Protection Awareness Training: Induction
iii. Save certificate of completion

iv. Submit certificate via WesternNow Student Portal

b) Students will need to:

i. Access the NSW Department of Education's MyPL website <https://mypl.education.nsw.gov.au/>
ii. Complete the Child Protection Awareness Training (CPAT): Annual Update for the calendar year
iii. Save certificate of completion

iv. Submit certificate via WesternNow Student Portal

Both certificates will be recorded on your student record as Special Requirements with the end date for the Annual CPAT recorded. The CPAT: Annual Update will need to be renewed and submitted on an annual basis.

Students who have not completed both components of the Child Protection Awareness Training will need to withdraw from the subject.

3. Students must complete the ASCIA anaphylaxis e-training and submit their certificate to Submit certificate via WesternNow Student Portal.

4. Students must meet the Inherent Requirements for the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education (<https://hbook.westernsydney.edu.au/programs/bachelor-education-primary-aboriginal-torres-strait-islander-education/>).

5. From 2H/Spring 2022, students must be COVID-19 fully vaccinated as per the NSW Public Health Order and NSW Department of Education

requirement. If a student is unable to get an approved vaccination for medical reasons, they will need to approach their doctor who must complete a contraindication form available at: [covid-19-vaccine-contraindication.pdf \(nsw.gov.au\)](https://www.health.nsw.gov.au/Infectious/covid-19/vaccine/Documents/covid-19-vaccine-contraindication.pdf) (<https://www.health.nsw.gov.au/Infectious/covid-19/vaccine/Documents/covid-19-vaccine-contraindication.pdf>). Students to submit details of all vaccination doses or contraindication form via Western Now form for it to be recorded on their academic record.

TEAC 3041 Science and Technology 2

Credit Points 10

Legacy Code 102753

Coordinator Susan Price ([https://directory.westernsydney.edu.au/search/name/Susan Price/](https://directory.westernsydney.edu.au/search/name/Susan%20Price/))

Description The subject is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This subject is designed to enhance prior work in the science and technology areas with a particular focus on the primary years: 3 – 6. The significance of children's views is emphasised in the selection, design and sequencing of activities for primary students in science and technology experiences through the four content areas: Biological sciences, Chemical sciences, Earth and Space sciences and the Physical sciences. Emphasis will be given to Aboriginal and Torres

Strait Islander science elaborations and to develop authentic locally driven, land based teaching of content and classroom resources.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate key Aboriginal land based content knowledge in the areas of Biological sciences, Chemical sciences, Earth and space sciences and the Physical sciences (Standard 2.1.1, 2.4.1) [CLO 1, 2, 3].
2. Plan lessons, lesson sequences and assessment items that engage and motivate students in science and technology. (Standard 2.2.1, 2.3.1, 3.1.1, 3.2.1, 3.6.1, 5.4.1) [CLO 1,2,3,4,5,7].
3. Articulate clear learning goals in preparing learning experiences for science and technology education that are appropriate for the cognitive, social and language abilities of students in years 3 – 6. (Standard 1.3.1, 1.4.1, 1.5.1, 5.1.1) [CLO 1,2,4,5,7].
4. Demonstrate proficiency with the content knowledge, pedagogical content knowledge and legislation appropriate to support learning in primary classrooms (years 3-6) (Standard 1.2.1, 1.6.1, 2.1.1, 2.5.1, 3.1.1, 3.6.1, 7.2.1).
5. Design learning experiences, lessons and lesson sequences that integrate the Australian curriculum's general capabilities into science and technology. (Standard 1.5.1, 2.5.1, 2.6.1, 4.1.1, 4.2.1) [CLO 1,2,3,4,5,6,8]

Subject Content

1. Knowledge, skills, values and attitudes necessary to cultivate interest and positive, informed ethical values, attitudes, and student self-efficacy in the sciences for students in Years 3 – 6.
2. The distinctive nature of scientific inquiry as it relates to the Aboriginal and Torres Strait Islander science elaborations.
3. Local knowledge sources and how they underpin pedagogies of teaching and learning science, and teaching and learning technology (design and digital).
4. Strategies for teaching and assessing Primary Science and Technology with a focus on the development of skills for practical problem and project-based learning that is student driven and /or student directed for students in Years 3 – 6.
5. Knowledge and understanding of the use and selection of digital technologies to support teaching and learning in Primary Science and Technology;
6. Supporting students with disabilities to access the Primary Science and Technology curriculum and demonstrate achievement;
7. Content requirements for the teaching of Biological sciences, Chemical sciences, Earth and Space sciences and the Physical sciences, for students in Years 3 – 6.
8. Knowledge and understanding of the Australian Curriculum's general capabilities.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Using a chosen site, prepare a Scope and sequence for students in a Year 3 – 6 class incorporating Aboriginal and Torres Strait Islander science elaborations and justification for selection of learning experiences.	1,500 words	40	N	Individual
Prepare a sequence of 6 lesson plans and one summative assessment task for students in a Year 3 – 6 class which links specifically to the site. Lessons must use a range of General Capabilities and include ICT	2,000 words	60	N	Individual

TEAC 3043 Reading Children's Literature and Digital Texts

Credit Points 10

Legacy Code 102798

Coordinator Katrina Barker ([https://directory.westernsydney.edu.au/search/name/Katrina Barker/](https://directory.westernsydney.edu.au/search/name/Katrina%20Barker/))

Description In this unit students will gain knowledge and understanding about using children's literature and digital texts to teach reading, critical literacy, comprehension, media literacy and how texts convey meaning through choices in language (written) and images (visual). It will explore how children's literature and digital contexts can be used in a K-6 classroom for the teaching of the mechanics of reading, information literacy, comprehension skills (literal, implied, inferential), text design and the social construction of texts. It will develop students deeper understanding of the four resources model of reading and viewing: text decoder, text participant, text user and text analyst. This unit will examine literature experiences and practices in digital environments and the principles of interactivity, connectivity and access that now characterise the reading experience in the digital age. Through the unit, students will be introduced to a language to talk about both written and visual texts by focusing on the meaning making resources used in constructing the texts.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Students must have successfully completed 240 credit points in the Bachelor of Education (Primary).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe how texts vary according to purpose, audience and situation;
2. Develop a metalanguage for understanding written, visual and multimodal texts;
3. Develop critical media literacies in close study of children's literature and digital texts;
4. Read, view, interpret and analyse a range of texts;
5. Demonstrate an awareness of how the selection of words, phrases, images, structure, composition influences meaning within different subject disciplines;
6. Apply understanding of texts to the teaching of reading.

Subject Content

1. Early reading and learning the mechanics of reading using children's literature and digital texts

2. Four resources model or roles of the reader: text decoder, text participant, text user and text analyst
3. Variation of written and visual texts according to their social purpose, audience and situation
4. Grammars and affordances of written, visual and multimodal texts
5. Critical media literacy, including fake news, posters, credibility of sources, (ethical) stance, related to choice of language and images
6. Representations of identity/identities and stereotypes in children's literature
7. Comprehending written and visual texts in different disciplines, for example, Science, History, Art, and in digital formats
8. Aboriginal and Torres Strait Islander literature, Asian literature and bilingual texts

Teaching Periods

TEAC 3044 STEM Principles and Practices in the Primary Years

Credit Points 10

Legacy Code 102797

Coordinator Grant Jones ([https://directory.westernsydney.edu.au/search/name/Grant Jones/](https://directory.westernsydney.edu.au/search/name/Grant%20Jones/))

Description The purpose of this unit is for students to gain exposure to authentic contexts for integrating science, technology, engineering and mathematics (STEM) and to develop knowledge and skills with designing and implementing STEM learning experiences. Students will have the opportunity to complete authentic interdisciplinary STEM tasks, and draw upon this experience to design and implement interdisciplinary STEM learning activities aligned to syllabus outcomes. This unit will allow students to simulate and evaluate the teaching practices associated with high-quality interdisciplinary STEM lessons.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Students must be enrolled in and have successfully completed 160 credit points in the Bachelor of Education (Primary).

Assumed Knowledge

1. Mathematics K-10 Syllabus (2012).
2. Science & Technology K-6 Syllabus (2017).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a critical understanding of theoretical constructs underlying STEM curriculum development as it relates to classroom teaching practice and student learning;
2. Demonstrate a critical understanding of computational and algorithmic thinking;
3. Apply knowledge of the K-6 syllabus documents in developing authentic STEM learning experiences;
4. Incorporate design thinking into STEM curriculum integration and development;
5. Create and evaluate interdisciplinary STEM units which integrate STEM principles in meaningful ways across traditional subject boundaries.

Subject Content

1. What is STEM and where does it fit in today's educational climate?
2. Applying interdisciplinary STEM pedagogies in the classroom (K-6)
3. Authentic STEM tasks and what do they look like in the classroom
4. Designing interdisciplinary STEM learning experiences (K-6)
5. Computational Thinking through robotics and coding in the classroom
6. Design making with a STEM approach

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Simulation	500 words	15	N	Individual
Critical Review	1400 words	35	N	Individual
Professional Task	2000 words	50	N	Individual

Teaching Periods

TEAC 3046 Engaging Pedagogies

Credit Points 10

Legacy Code 102819

Coordinator Eva Vass ([https://directory.westernsydney.edu.au/search/name/Eva Vass/](https://directory.westernsydney.edu.au/search/name/Eva%20Vass/))

Description This unit is designed to prepare students for their role as active, thoughtful leaders of learning environments for children in the primary years. It challenges students to inquire and reflect upon contemporary issues that affect learning and teaching in classrooms, including working with students from low socio-economic backgrounds, culturally and linguistically diverse (CALD) students, students who have English as an additional language or dialect (EAL/D), Aboriginal and Torres Strait Islander learners, and students from diverse religious backgrounds. It enables students to investigate and consider a range of contemporary pedagogical approaches to facilitate substantive student engagement, and relate these to educational philosophy and contemporary learning theories.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Students must be enrolled in 1876 Bachelor of Education (Primary) and have successfully completed 160 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Investigate the relationship between theory, research and practice in understanding student engagement.
2. Examine issues that affect the engagement and motivation of learners in classrooms.
3. Explore why contemporary education is focused on creating active and engaging classrooms, rather than just educational delivery.

4. Refine their educational philosophy, based on their explorations of contemporary theorising, research and practice around student engagement.
5. Consider the implications of their developing philosophy to their practice, especially the potential effect on the students' authentic and engaged learning experiences.
6. Apply their new understandings of engaging pedagogies in their planning of a hypothetical learning experience.
7. Use logical and critical skills to develop solutions to educational problems in contemporary teaching and learning.

Subject Content

1. Theory and practice surrounding student engagement - Elements of the Fair Go Framework
 - engaging task design/engaging learning experiences
 - engaging processes/The Insider Classroom
2. Contemporary and evolving approaches to engaging teaching and engaged learning:
 - engaging through dialogue (Working with peers, teacher inclusive conversations)
 - engaging through Technology
 - Engaging through active learning (project based/inquiry based learning, tinkering, makerspace)
 - engaging through culturally appropriate pedagogic practices
 - engaging through personalised learning
 - Creative classrooms and engagement

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	30 minutes	20	N	Individual
Report	800 words + original and revised lesson plans attached	35	N	Individual
Teaching plan	1,500 words	45	N	Individual

Teaching Periods

TEAC 3047 Pedagogical Leadership

Credit Points 10

Legacy Code 102822

Coordinator Kumara Ward ([https://directory.westernsydney.edu.au/search/name/Kumara Ward/](https://directory.westernsydney.edu.au/search/name/Kumara%20Ward/))

Description Early childhood teachers have a significant role in providing the pedagogical leadership required to deliver quality early childhood services for children and families. This unit introduces key concepts

of pedagogical leadership which are then applied in other units in the course. In this unit students examine a range of theoretical perspectives and approaches to curriculum and analyse the ways different theories and approaches shape pedagogical practices. Students will have opportunities to research contemporary theories of early childhood education, reflect on their own beliefs and values, refine their personal philosophy of teaching and learning, and consider the implications for their future role as pedagogical and educational leaders in early childhood settings.

Teaching Periods

TEAC 3048 Creative Arts 2

Credit Points 10

Legacy Code 102851

Coordinator Sarah Pacey ([https://directory.westernsydney.edu.au/search/name/Sarah Pacey/](https://directory.westernsydney.edu.au/search/name/Sarah%20Pacey/))

Description This unit examines theoretical models and pedagogical practices for using Dance, Drama and Media Arts in primary classrooms and builds on the unit 102125 Creative Arts. Students will develop a range of skills required in the teaching of the arts that support young learner's self-efficacy and awareness. Aboriginal media and performing arts form the basis for strong cultural identity formations for all students. The unit focuses on positive media representations, personal histories and experiences that shape and influence Aboriginal and Torres Strait Islander peoples and their community life.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) TEAC 2013

Incompatible Subjects TEAC 2059 - Creative Arts 2

Restrictions Students must be enrolled in the 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explore the principles, practices and pedagogies related to the teaching, learning and assessment of Dance, Drama, and Media Arts
2. Demonstrate a range of practical skills, critical knowledge in the discrete forms required for the teaching of Dance, Drama, and Media Arts
3. Apply critical reflection to their own learning and practice within each of the art forms of Dance, Drama, and Media Arts
4. Identify and plan for Aboriginal perspectives embedded in the new NSW Creative Arts syllabus for the Australian Curriculum
5. Design programs, resources, assessments and learning sequences for inclusive creative arts education in the primary classrooms.

Subject Content

Media

- Two-dimensional media areas- drawing, painting, printmaking and photography

- Three- and four-dimensional areas such as sculpture and object design

- artists and art appreciation linked to media including Aboriginal media artists

Dance

- Risk and Safe Dance practice

- Dance techniques/s in The performance of dances including Aboriginal Dance forms

- Processes: exploration; improvisation, and responses to a variety of stimuli

- Choreographic forms: particularly narrative forms from A range of cultural groups.

- developing Dance appreciation

Drama

- making drama in A collaborative drama and theatre environment

- performing drama using A variety of performance techniques

- developing appreciation of drama and theatre

Assessment

Legacy Code 102135

Coordinator John Ley ([https://directory.westernsydney.edu.au/search/name/John Ley/](https://directory.westernsydney.edu.au/search/name/John%20Ley/))

Description The unit is only offered to students enrolled in the Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education program. This unit is designed to extend the development of mathematical concepts, skills and understandings for children from years 3 to 6 based on the Australian curriculum and the NSW Educational Standards Authority (NESA) requirements. An awareness of relevant research and curriculum documents, combined with the practical knowledge of teaching, learning and assessment strategies, will assist teachers to program and implement a series of investigative experiences that will enhance the conceptual knowledge of their students.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 4 subject

Equivalent Subjects EDUC 2009 - Developing Primary Mathematics (AREP)

Restrictions Students must be enrolled in 1717 Bachelor of Education (Primary) Aboriginal and Torres Strait Islander Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the central concepts, modes of enquiry and structure of Mathematics.
2. Design and implement lesson sequences using developing knowledge of the NSW Syllabus For The Australian Curriculum: Mathematics K-10 Syllabus (K-6 Section).and recent Mathematics' theory and practice.
3. Apply the five interrelated processes of questioning, applying strategies, communicating, reasoning, reflecting when working mathematically.
4. Describe the five content strands of Number, Patterns and Algebra, Data, Measurement and Space and Geometry up to stage 4.
5. Apply concepts of assessment and children's learning within the Mathematics K-6 Learning Area and up to Stage 4.
6. Design and implement lesson sequences using knowledge of the NSW Syllabus For The Australian Curriculum: Mathematics K-10 Syllabus (K-6 Section) or other curriculum requirements.
7. Explain the role and value of Mathematics in the broader school curriculum and the relationship between numeracy and literacy.
8. Utilise a range of resources to meet the needs of diverse K-6 students in Mathematics K-6 including an Indigenous Australian perspective and catering to students with special needs.

Subject Content

1. The nature of mathematics learning and current trends in the teaching/learning of mathematics as a way to interpret the world, stages 2-4.
2. The place of communicating and problem solving, reasoning, understanding and fluency in working mathematically.
3. The development of number concepts and the number operations - addition and subtraction, multiplication and division, fractions and decimals.
4. The development of understanding patterns and algebra.
5. The development of measurement (length, area, volume and capacity, mass, time) and geometry concepts (3D, 2D space, angles and position)
6. The development of rational number concepts and data collection, including planning, gathering, organising, applying data to solve problems and communicating results through the selection of appropriate representations.
7. The development of chance concepts
8. Student assessment strategies

Assessment

TEAC 4003 Early Literacies

Credit Points 10

Legacy Code 102684

Coordinator Jaydene Barnes ([https://directory.westernsydney.edu.au/search/name/Jaydene Barnes/](https://directory.westernsydney.edu.au/search/name/Jaydene%20Barnes/))

Description This subject explores the history of literacy in the early years from different theoretical perspectives and the tensions between theory, expectations and practice. It breaks down language development for diverse learners and develops students' understanding of strategies to scaffold children's language learning and development when working in diverse community contexts. The subject builds on the previous subject of Critical Literacies and focuses the changing nature of literacy and the diverse literacy pathways individuals take up. Students will investigate the processes children go through when speaking, listening, reading and writing in the early years, and the interrelatedness of these processes to make meaning. Students will develop play-based, literacy-enriched experiences underpinned by contemporary literacy perspectives.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 4 subject

Restrictions

Students must be enrolled in 1879 Bachelor of Education (Birth – 5 Years) and have completed 240cp in that program.

Learning Outcomes

- Examine the history of literacy in the early years within the Australian context and the impact of policy and theoretical perspectives on practice.

- Explore language development as it occurs from birth, with consideration of cultural, developmental and linguistic differences.
- Discuss new literacies, multiliteracies and the role of ICTs in children's literacy development.
- Explore the processes of children as code breakers, meaning-makers, text participants, text users and text critics in early childhood contexts through a multiliteracies approach.
- Analyse the tensions between theory, expectations and practice when supporting children's literacy capabilities in prior to school settings.
- Apply a contemporary, multi-literacies approach when planning play-based learning experiences to extend children's literacy.

Subject Content

- Historical and contemporary literacy perspectives
- Language development, including bilingual/multilingual children, supporting Aboriginal Dialects/Aboriginal English and supporting children with additional speech, communication and language needs
- Young children as code breakers, meaning makers, text participants, text users and text critics.
- Multi-literacies
- Literacy learning through play
- Transition to school and literacy learning

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Essay	1,000 words	20	N	Individual

Professional Task	2,000 words	50	N	Individual

Teaching Periods

TEAC 4004 Leadership and Portfolio

Credit Points 10

Legacy Code 102687

Coordinator Kerry Staples ([https://directory.westernsydney.edu.au/search/name/Kerry Staples/](https://directory.westernsydney.edu.au/search/name/Kerry%20Staples/))

Description This subject explores the complexity of leadership in the early childhood context. Students will analyse leadership theories and consider how the leadership role can and does influence the quality of practitioners' practices and Early Childhood Education and Care (ECEC) service provision. Students will reflect on their professional identity, values, experiences, knowledge and practices to develop a personal perspective of how effective leadership is enacted to lead staff teams, partner with families and strengthen relationships with the local community. A critical analysis of how leadership influences pedagogy, relationships, collaboration, and change will provide a basis for developing a professional portfolio.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 4 subject

Co-requisite(s) TEAC 4009

Restrictions

Students must be enrolled in 1879 Bachelor of Education (Birth – 5 Years) and have completed 240cp in that program.

Learning Outcomes

1. Evaluate leadership theories and their application in the ECEC context.
2. Analyse a range of effective leadership strategies, processes and skills that are enacted to lead in the ECEC setting.
3. Analyse the complexity and diversity of the leadership roles including activism, advocacy and capacity building in ECEC and the wider community.
4. Examine how leadership styles and characteristics influence quality ECEC service provision.
5. Apply Action Research to improve teaching practice.
6. Create a digital professional portfolio that reflects individual professional identity and leadership style and demonstrates capacity to meet the Australian Professional Teaching standards.

Subject Content

1. Leadership theory
2. Leadership styles and characteristics
3. Leadership in ECEC - complexity, diversity and professional identity
4. Influencing quality, relationships, pedagogy and change
5. Reflecting on professional identity and leadership
6. Action Research to improve professional practice
7. Developing and refining a professional portfolio

Teaching Periods

TEAC 4005 Mathematics and Numeracy in the Early Years

Credit Points 10

Legacy Code 102683

Coordinator Jana Kovtun ([https://directory.westernsydney.edu.au/search/name/Jana Kovtun/](https://directory.westernsydney.edu.au/search/name/Jana%20Kovtun/))

Description This subject explores the powerful mathematical and numeracy ideas that shape children's lives from birth to five years. Students will develop the ability to identify, assess and plan for young children's diverse mathematical and numeracy understandings, whilst using current curriculum frameworks and theoretical underpinnings to guide them. This subject will support students to make connections to mathematics and numeracy in everyday life, develop knowledge of effective pedagogical practices, and develop positive dispositions towards being a teacher of mathematics in the early years.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 4 subject

Restrictions

Students must be enrolled in 1879 Bachelor of Education (Birth – 5 Years) and have completed 240cp in that program.

Learning Outcomes

1. Apply deep understanding of numeracy and mathematical concepts, skills and processes relevant to young children aged birth-5 years.
2. Examine effective pedagogical practices that contribute to maximising children's understanding of mathematics and numeracy.
3. Apply principles and learning outcomes of the Early Years Learning Framework for Australia and the Mathematics K-10 Syllabus to plan rich mathematics experiences.
4. Assess young children's early mathematical thinking skills, diverse abilities, and needs, to plan creative, engaging mathematics experiences.
5. Examine the role of mathematics and numeracy in everyday contexts such as home, educational settings and community.
6. Evaluate theoretical approaches and current mathematics education literature and ICTs in supporting children's mathematics and numeracy development.
7. Discuss the importance of developing a positive disposition towards mathematics and numeracy.

Subject Content

1. The innate presence of mathematical and numerate thinking in young children from birth-5 years, including the role of language and real-life experiences
2. Teaching strategies including questioning and assessment to promote mathematical understanding
3. The role of concrete materials, technology, stories, investigation, problem solving and play in maximising learning opportunities
4. Implementing current curriculum (NSW Mathematics K-10 Syllabus) and curriculum frameworks (EYLF) for children birth-5 years
5. Early understanding of number, measurement, statistics and probability concepts.
6. Catering for diverse learners, skills and needs
7. The relevance of theory and research in supporting mathematics and numeracy development
8. Instilling positive attitudes and values to become confident teachers of mathematics

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 4006 Primary Professional Experience 4a: Transition into the Profession 1

Credit Points 10

Legacy Code 102659

Coordinator Jacqueline Humphries ([https://directory.westernsydney.edu.au/search/name/Jacqueline Humphries/](https://directory.westernsydney.edu.au/search/name/Jacqueline%20Humphries/))

Description Students will participate in a 30-day professional experience set in the context of their future profession and under the supervision of qualified teachers. This is the final professional experience unit in your degree. The completion of this Professional Experience recognises you as a conditionally qualified teacher. This unit aims to recognise your shift from pre-service teacher to beginning teacher. Students will be prepared by exploring issues involved in understanding the needs of learners within specific school and classroom contexts, and will design and teach experiences in ways that will enhance student engagement and student learning outcomes. The unit is designed to develop your professional identity and the importance of continued professional learning, the relationship between professional and community organisations in supporting educators, and how these influence student outcomes. It will build awareness of skills and practices that will help facilitate preservice teacher's personal wellbeing and resilience in their teaching career. The unit links theory and practice and enables students to construct new knowledge and new ways of practice as part of their transition into the teaching profession. In line with primary teaching specialisation requirements, your professional experience may focus on teaching, evaluating and assessing in the subject area of Science and Technology. Students are required to analyse their own learning in relation to the Graduate Teacher Standards through the completion of a Learning Portfolio and the TPA (Teaching Performance Assessment).

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) TEAC 3021

Restrictions

Students must be enrolled in and have successfully completed 240 credit points in the Bachelor of Education (Primary).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply knowledge of current research to competently plan, deliver, assess and evaluate lesson sequences and units of work across all Learning Areas;
2. Demonstrate the capacity to create and maintain supportive and safe learning environments;
3. Identifies personal learning goals in relation to the Australian Professional Standards for Teachers;
4. Effectively participates in the specific roles and responsibilities of a primary school teacher and contributes positively to the school community beyond the classroom;

5. Refine skills and knowledge related to being a teaching professional, including classroom management; relationships with families, community and other professionals; student wellbeing;
6. Understand professional and ethical practice related to NSW Education policy frameworks;
7. Identify a range of appropriate professional associations and how they can contribute to professional learning and improve teaching practices to support student learning;
8. Compile a range of strategies to build and maintain teacher wellbeing and resilience.

Subject Content

- Teaching and planning cycle- using data and assessment evidence about students to inform Lesson planning, assessment and The provision of feedback to students
- Critical self-reflection with reference to The Australian professional Standards for graduate teachers
- Connecting research with practice to inform planning and Teaching
- pedagogical knowledge to support Teaching and learning decision making
- professional and Ethical practices of The Teaching profession
- differing Roles and responsibilities of teachers
- Essential skills and knowledge as A Teaching professional including, professional identity, registering as A teacher, professional associations and professional learning
- teacher wellbeing and resilience

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject:

1. Students are required to complete a Working with Children Check leading to the issuance of a clearance number under the category of volunteer.

Students will need to:

- i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.
 - ii. Present an application number and identification to a NSW Motor Registry or Government Access Centre prior to issuance by mail a Working with Children Check number.
 - iii. Submit the letter with a valid Working With Children Check number to Student Central where the document is trimmed and recorded in Banner as a Special Requirement.
2. Students must have completed Child Protection Awareness Training (Online) prior to undertaking any visits/placements.
 3. Students must have completed the ASCIA anaphylaxis e-training and registered their certificates with Student Central.
 4. Students must also have completed the National Literacy and Numeracy TEST (NSW Education Standards Authority) prior to enrolment in this subject.
 5. From 2H/Spring 2022, students must be COVID-19 fully vaccinated as per the NSW Public Health Order and NSW Department of Education requirement. If a student is unable to be get an approved vaccination for medical reasons, they will need to approach their doctor who must complete a contraindication form available at: [covid-19-vaccine-contraindication.pdf](https://www.health.nsw.gov.au/Infectious/covid-19/vaccine/Documents/covid-19-vaccine-contraindication.pdf) (nsw.gov.au) (<https://www.health.nsw.gov.au/Infectious/covid-19/vaccine/Documents/covid-19-vaccine-contraindication.pdf>). Students to submit details of all vaccination

doses or contraindication form via Western Now form for it to be recorded on their academic record.

Teaching Periods

TEAC 4007 Primary Professional Experience 4b: Transition into the Profession 2

Credit Points 10

Legacy Code 102660

Coordinator Jacqueline Humphries ([https://directory.westernsydney.edu.au/search/name/Jacqueline Humphries/](https://directory.westernsydney.edu.au/search/name/Jacqueline%20Humphries/))

Description This unit is an Internship and as such is an intensive period of in-school experience that will induct students into the nature, structure and organisation of schools and the work, roles and responsibilities of teachers. The internship is a valuable opportunity for further professional learning guided by an experienced mentor teacher. To allow a strong focus on quality of preparation, reflection and deep evaluation, the expectation is that each intern will teach 60 per cent of a full teaching load. Interns do not have to be supervised in the same way as a Pre-Service Teacher on previous professional experience units. Interns may be left unsupervised to take responsibility for groups of students. It is expected that Principals and Mentor Teachers will assign duties and responsibilities to Interns at a level appropriate for an early career teacher. The NSW Education Standards Authority (NESA) requires all Pre-Service Teachers entering an internship to have been assessed within the preceding supervised Professional Experience as achieving all the requirements of the Professional Standards for Graduate Teachers. As such the internship provides not only an opportunity for consolidation of these standards but also preparation towards standards appropriate for full accreditation at Professional Competence level in early teaching years.

TEAC 4009 Professional Practice 3-5 years

Credit Points 10

Legacy Code 102686

Coordinator Denise Fraser ([https://directory.westernsydney.edu.au/search/name/Denise Fraser/](https://directory.westernsydney.edu.au/search/name/Denise%20Fraser/))

Description This subject begins with an intensive on-campus series of workshops. The unit is the final professional experience subject in the Bachelor of Education (Birth – 5 Years), comprising of a 35-day placement with children aged 3-5 years. It has a strong focus on pedagogical leadership, initiating and sustaining collaborative partnerships with staff, children and families, and implementation of integrated curriculum through effective programming and planning. The subject facilitates in-depth investigation and critical thinking, preparing students to connect to children's social worlds and provide innovative, inclusive and meaningful learning environments. This subject requires students to apply the principles, practices and outcomes of Belonging, Being and Becoming: The Early Years Learning Framework for Australia.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) TEAC 4008

Co-requisite(s) TEAC 4004

Restrictions

Students must be enrolled in 1879 Bachelor of Education (Birth – 5 Years) and have completed 240cp in that program.

Learning Outcomes

1. Apply reflective practice through the establishment and ongoing evaluation of professional goals, and planning and programming documentation.
2. Evaluate children's play, learning, dispositions and relationships, using theories of early childhood development and learning, and use this information to inform planning and practice.
3. Apply curriculum approaches and pedagogies that are contextually responsive and promote children's investigation, problem solving, critical thinking and the development of deep knowledge.
4. Plan for resources that encourage children to use a range of media and technologies to investigate their ideas and values and represent their thinking.
5. Implement innovative teaching and learning cycles, providing experiences and project opportunities that extend on children's strengths and interests.
6. Apply pedagogical leadership, social and administrative skills relative to the professional experience setting.
7. Apply the principles, practices and learning outcomes of The Early Years Learning Framework, drawing on content knowledge in the areas of science and technology, mathematics, human society, physical education health and wellbeing, creative arts and literacy to engage in interactions with children that extend their learning.

Subject Content

1. Development of a professional portfolio, including a situational analysis of the professional experience setting, critically reflective professional learning goals, planning documentation, observations, and philosophy of practice
2. Curriculum approaches in early childhood, such as Emergent Curriculum, Developmentally Appropriate Practice, High Scope, Reggio Emilia, and the Early Years Learning Framework in the Australian context
3. Pedagogical leadership skills: supporting reflective thinking and inquiry, collaborative planning, implementing and evaluating an inclusive and engaging total learning environment, and nurturing dispositions
4. Grouping strategies for promoting positive interactions and pro-social guidance, extending learning and strengthening relationships
5. Pedagogies for learning: play, projects, small groups, learning centres, integrated curriculum
6. Efficient practices for planning documentation and observations
7. Intentional teaching: Teaching strategies and techniques that facilitate children's investigation, problem-solving and critical thinking; planning, implementing and evaluating the total learning environment
8. The Early Years Learning Framework principles, practices and learning outcomes to document, assess and plan for learning in key content areas

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, pre-service teachers must have satisfactorily completed online Child Protection Awareness Training, have a current Working with Children Check, and the online course ASCIA Anaphylaxis: Australasian childcare.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

Professional Placement Performance	35 days placement	S/US	Y	Individual

Teaching Periods

TEAC 4010 Researching Professional Practice

Credit Points 10

Legacy Code 102657

Coordinator Eva Vass ([https://directory.westernsydney.edu.au/search/name/Eva Vass/](https://directory.westernsydney.edu.au/search/name/Eva%20Vass/))

Description The unit is designed to develop students' skills and expertise in investigating their own teaching in Science and Technology. The unit facilitates a researcherly disposition towards their own professional practice. Students will focus on a specific aspect of their teaching practice related to the concept of engagement and critically reflect upon their own evolving professional identity, philosophy and practice. The unit draws upon key principles and methods of participatory action research to facilitate students' skills and expertise as teacher-researchers. Students will plan an action research proposal that could be implemented in their future practice.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 4 subject

Restrictions Students must be enrolled in and have successfully completed 240 credit points in the Bachelor of Education (Primary).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand contemporary approaches to teaching and learning, with a specific focus on issues and practices surrounding student engagement and quality teaching;
2. Apply these contemporary approaches through the analysis and critique of professional teaching practice;

3. Apply technological, curriculum content and pedagogical knowledge and skills learnt in previous units to inform investigations of their own teaching practices and research process;
4. Demonstrate an understanding of principles and methods of action research to inform teaching plans and evaluation of teaching;
5. Design an action research project utilising principles of participatory action research and self-reflective practice, focusing on own self as pre-service teacher;
6. Demonstrate an appreciation of research as part of professional practice.

Subject Content

1. Critical self-reflective practice and analytical skills
2. Principles and methods of participatory action research and the research cycle
3. Relationship between researcher and practitioner
4. Fair Go Pedagogies: The MeE Framework of substantive student engagement
 - engaging discourses (links with other units challenging dominant discourses)
 - individual Motivational strategies

Teaching Periods

TEAC 4011 Inclusion in the Early years

Credit Points 10

Legacy Code 102685

Coordinator Kerry Staples ([https://directory.westernsydney.edu.au/search/name/Kerry Staples/](https://directory.westernsydney.edu.au/search/name/Kerry%20Staples/))

Description Inclusion is both a right and an expectation for all children. Its effectiveness, however, depends upon teachers having the competencies, dispositions and skills to advocate for equity of access, participation and inclusion for children with a broad range of abilities within early childhood settings. In this subject, students reflect on the social construction of disability, policy and research in relation to the identification of additional needs, intervention and inclusion. Students will learn to assess curriculum and environments for learning, and to design, evaluate and communicate inclusive plans. The subject will focus on enhancing quality inclusive early childhood education through responsive adaptation and modification of the environment, curriculum and teaching practices. The importance of forming genuine partnerships with families and collaborating with the team around the child are advocated as essential for effective inclusion.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 4 subject

Restrictions

Students must be enrolled in 1879 Bachelor of Education (Birth – 5 Years) and have completed 240cp in that program.

Learning Outcomes

1. Analyse the theoretical, ethical, philosophical, legislative and policy frameworks supporting inclusion in the early years.
2. Critique perceptions, attitudes and beliefs about disability and inclusion.
3. Apply knowledge of development, learning dispositions and learning theories to identify children with additional needs and make appropriate recommendations for referral to relevant community and educational support services.
4. Assess early childhood curricula to ensure it appropriately recognises the impact of specific disabilities and has an underlying basis for promoting engaged learning for all children.
5. Develop responsive inclusion plans that reflect the family's priorities for their child and facilitate learning.
6. Evaluate the learning spaces, resources, curriculum and pedagogies and modify them to provide quality inclusive learning environments.
7. Create strategies to support access, participation and learning.
8. Describe practices that support collaboration and shared decision making between families, early childhood environments and service systems.

Subject Content

1. Assumptions and contradictions of inclusion
2. Legislative policies and philosophical frameworks that guide inclusive practice
3. Assessment for learning
4. Identification and referral
5. Family-centred practices and relationships
6. Collaboration and working with other professionals
7. Planning for inclusion: adapting and modifying learning environments, pedagogical practices, embedding learning, monitoring and evaluating implementation
8. Supporting school transitions

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Critical Review	1,000 words	20	N	Individual
Case Study	1,500 words	35	N	Individual
Professional Task	2,000 words	45	N	Individual

Teaching Periods

TEAC 4012 Teaching EAL/D Students in the Primary Years

Credit Points 10

Legacy Code 102799

Coordinator Jacqueline D'Warte ([https://directory.westernsydney.edu.au/search/name/Jacqueline D'Warte/](https://directory.westernsydney.edu.au/search/name/Jacqueline%20D'Warte/))

Description The 2016 ABS Census reveals that Australia is a 'fast changing, ever expanding culturally diverse nation'. One in four Australian children come from language backgrounds other than English including children born in Australia and immigrants, refugees and asylum seekers arriving in Australia each year. Many of these students will require English language learning support in the classroom. This support will vary depending on learner needs and language proficiency. The focus of this subject is to provide initial education teachers with a foundation of theoretical principles related to teaching and learning English. The emphasis will be on developing an understanding of appropriate classroom strategies within a mainstream, cross-curricula program, for learners of English as a second language including appropriate pedagogies for Aboriginal and Torres Strait Islander students.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 4 subject

Restrictions Students must be enrolled in the Bachelor of Education (Primary) and have successfully completed 240 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the importance and role of the home language in second language learning development including Aboriginal and Torres Strait Islander dialects;
2. Demonstrate understanding of research based pedagogies for teaching EAL/D students;
3. Create and assess resources, including ICT, that engage EAL/D students in their learning;
4. Use research based pedagogies and develop strategies for teaching English as an Additional Language across the curriculum;
5. Apply knowledge of quality teaching resources to cater for learners from a diverse range of backgrounds including refugee, migrant, Aboriginal and Torres Strait Island students;
6. Apply appropriate methods of assessing second language learning;
7. Plan, refine and reflect upon teaching and learning activities designed to meet the needs of English as Second Language learners.

Subject Content

1. Multicultural Education

Setting the context: immigration and multicultural policies and practices in Australia

- history of migration

- current policies?migration and education

Theoretical concepts of the nature, scope and meaning of culture

- elements of culture ? cultural inclusivity

- effects of change and time on culture

- culturally and linguistically diverse communities

- Aboriginal and Torres Strait Islander cultural factors
Multicultural Education: curriculum, policy and perspectives

- examination, analysis and evaluation of various policy and support materials

- advocacy for EAL/D students

- Australian Professional Teaching Standards - relevant Standard Descriptors

2. Teaching of English as a second language

Language and language learning

- similarities and differences between language one and language two learning

- importance of bilingualism/multilingualism (maintaining first language)

Factors influencing second language development

- first language proficiency, age, prior educational and life experiences, cultural and linguistic background

- context and environment of second language learning in mainstream classes

- whole school organisation and timetable arrangements for EAL/D and mainstream teachers

- Quality Teaching CESE - High Expectations, Explicit Teaching, Effective Feedback, Use of Data, Classroom Management, Wellbeing, Collaboration (https://www.cese.nsw.gov.au/images/stories/PDF/What_Works_Best_Reflection_Guide_202016_AA.pdf)

- Quality Teaching Framework ? Intellectual Quality, Quality learning environment, Significance (<https://theelements.schools.nsw.gov.au/introduction-to-the-elements/policy-reforms-and-focus-areas/quality-teaching-framework.html>)

3. Assessment and evaluation

- identifying English language proficiency: ACARA EAL/D Learning Progression

- planning and programming for language learning support based on data

- collecting student assessment data

- EAL/D school evaluation framework

4. English language learning pedagogy

- language and literacy across all Key Learning Areas (Curriculum Documents)

- Mode Continuum ? moving from ?spoken like?f to written like?f

- teaching and learning in the four modes; speaking, listening, reading and writing

- communicative teaching and learning principles

5. Teaching and learning resources for second language development in the Primary classroom

- culturally laden/anti bias materials

- online, software, human and paper resources to support teaching/ learning programs

- Deadly Ways to Learn (<http://www.whatworks.edu.au/dbAction.do?cmd'displaySitePage1&subcmd'select&id'154>)

6. Parent-teacher communication

- using an interpreter

- communicating without an interpreter

- reporting student progress to parents using the ACARA EAL/D Learning Progression

- engaging culturally and linguistically diverse communities

Prescribed Texts

- Hertzberg, M. (2012). Teaching English language learners in mainstream classes. Marrickville Metro, Australia: Primary Teaching Association Australia

Teaching Periods

TEAC 7001 Aboriginal & Culturally Responsive Pedagogies

Credit Points 10

Legacy Code 102085

Coordinator Shirley Gilbert ([https://directory.westernsydney.edu.au/search/name/Shirley Gilbert/](https://directory.westernsydney.edu.au/search/name/Shirley%20Gilbert/))

Description In this unit students will be introduced to research, perspectives and practices associated with successful and culturally appropriate curriculum and pedagogy for teaching Aboriginal and Torres Strait Islander adolescent students. The unit is informed by current research practices, policy developments and curriculum deliverables that require culturally appropriate, responsive, respectful and informed teaching and learning practices that will benefit all education participants. Students will gain knowledge, insight, skills and appreciation of the importance and implications of consultation, negotiation and two-way partnerships with local Aboriginal communities and schools. It will also focus on empowering students to effectively reflect on all aspects of inquiry-based teaching with respect to Aboriginal perspectives and the delivery of lessons and effective support to all secondary students.

School Education

Discipline Teacher Education: Secondary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1714 Master of Teaching (Secondary) or 1848 Master of Teaching (Secondary) STEM.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain Aboriginal and Torres Strait Islander histories, the impact of culture, cultural identity and diversity, and languages in rural, remote and urban schooling.
2. Identify specific learning needs of Aboriginal and Torres Strait Islander adolescent students in rural, remote and urban settings.
3. Examine the roles and responsibilities of Aboriginal and Torres Strait Islander support personnel within systems and at school, and their contribution to education and community in improving educational outcomes for Aboriginal and Torres Strait Islander adolescent students.
4. Apply evidence-based principles when selecting specific literacy and numeracy strategies and developing resources that address the cultural and Aboriginal English and language learning needs of Aboriginal and Torres Strait Islander adolescent students.
5. Assess Australian and NSW government educational priorities and policies which impact on Aboriginal and Torres Strait Islander education.
6. Evaluate the role teachers, staff and schools play in the promotion of communication strategies which will enhance community consultation and the establishment of partnerships with Aboriginal and Torres Strait Islander parents and communities.

Subject Content

1.???? What does it mean to be Aboriginal or Torres Strait Islander?

2.???? What role does Aboriginal history play in the understanding of Australia and its national and international identity? Why is developing an understanding of Aboriginal history and cultures important in teacher education? Why are perspectives and deep knowledge of Aboriginal history; key government policies, legislation and legal decisions in relation to land and water rights, and heritage and identity important to the life of an effective teacher? How will teachers use this knowledge in their own teaching areas to provide engagement, authenticity and respect in the delivery of content to students of Aboriginal and Torres Strait Islander backgrounds?

3.???? What do current attendance, retention, literacy, numeracy and suspension data tell us about the status of Aboriginal and Torres Strait Islander education in Australia? How representative are these data of Australian community expectations? What can be done to improve the life outcomes of Aboriginal and Torres Strait Islander students?

4.???? What are current Aboriginal and Torres Strait Islander educational policies? How are Aboriginal and Torres Strait Islander perspectives and delivery requirements embedded in the curriculum? What does research tell us about Aboriginal and Torres Strait Islander education

a.??? Brief history of Aboriginal education and policy

b.??? Definitions and complexities of Aboriginal identities

c.??? Demographics and schooling: what are the links? My School, NAPLAN, Australian Curriculum

d.??? Distribution of power and power relationships in schools

e.??? School is for me (2006) / Teachers for a Fair Go (2012)

f.???? Review of Aboriginal education (2005)

g.??? For example Yunkaporta (2009) and Sarra (2007)

5.???? How can teachers and schools enhance community consultation and the establishment of partnerships with Aboriginal and Torres Strait Islander parents and communities? How do teachers and schools work with community to develop and sustain resource networks, classroom materials, strategies and partnerships that are appropriate for our teaching?

a.??? Working with schools developing a whole school plan

b.??? Aboriginal Education Policy 2010

c.??? Working with community, Aboriginal Education Consultative Groups, Aboriginal workers and professional associations parents and caregivers, and school support staff

Assessment

TEAC 7002 Addressing Diversity in Mathematics Teaching and Learning

Credit Points 10

Legacy Code 102322

Coordinator Peter Mcdonald ([https://directory.westernsydney.edu.au/search/name/Peter Mcdonald/](https://directory.westernsydney.edu.au/search/name/Peter%20Mcdonald/))

Description In this unit students will apply their knowledge of curriculum and pedagogy to address diversity within the primary mathematics classroom. Students will explore strategies to address a broad range of learning needs incorporating gifted and talented students, students from diverse cultural backgrounds including Aboriginal students and students with additional needs including dyscalculia. Other issues such as gender and mathematics for English as an Additional Language Learners (EALD) will be investigated.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1682 Master of Special Education; 1720 Master of Inclusive Education; 1830 Graduate Certificate in Primary Mathematics Education; 1847 Master of Education (STEM) or 1911 Master of Education.

Assumed Knowledge

Students must have either completed all core mathematics subjects of the 1781 Master of Teaching (Primary) program at Western Sydney University, or be an accredited primary teacher, or enrolled in the Master of Inclusive Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain how concepts located within the primary mathematics curriculum are inter-connected
2. Apply contemporary research relating to students considered mathematically gifted and talented to primary mathematics pedagogy
3. Summarise issues relating to Aboriginal children and the teaching and learning of mathematics
4. Demonstrate an understanding of pedagogies that promote differentiation in the primary mathematics classroom
5. Identify the implications of specific issues relating to diversity for primary mathematics teaching and learning
6. Design a range of inclusive mathematical tasks/activities

Subject Content

1. Identifying the big ideas within the primary mathematics curriculum
2. Teaching mathematics to children who are gifted and talented
3. Teaching mathematics to a variety of cultures including Aboriginal students
4. Gender issues in primary mathematics education
5. Primary mathematics and English language learners (ELL)
6. Differentiation in mathematics
7. Problem solving for differentiation
8. Programming and planning for students with additional needs in relation to mathematics and numeracy

TEAC 7003 Addressing Diversity in Science Teaching and Learning

Credit Points 10

Legacy Code 102486

Coordinator Karina Mckoy ([https://directory.westernsydney.edu.au/search/name/Karina Mckoy/](https://directory.westernsydney.edu.au/search/name/Karina%20Mckoy/))

Description The purpose of this unit is for students to develop knowledge of science teaching for primary aged children of science with additional needs and diverse linguistic and cultural backgrounds. Students will explore a range of needs, including gender issues with science learning, EAL/D backgrounds, learning difficulties, and gifted and talented abilities, and identify strategies to respond to those needs with specific instructional plans. In addition, students will learn to implement culturally relevant and context-based pedagogies in primary science education.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1845 Graduate Certificate in Primary Science Education.

Assumed Knowledge

A basic understanding of differentiated instruction, features of positive classroom environments, and outcomes of the primary science syllabus is desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the role of academic, social, economic, cultural, and linguistic considerations for teaching primary science
2. Critique the relationships among teachers' worldview of diversity and disability, students' experiences and backgrounds, and the learning context to generate implications for future practice
3. Differentiate plans for primary science instruction based on primary students' learning needs
4. Design culturally relevant pedagogies into primary science instruction
5. Apply appropriate context-based pedagogies into primary science instruction

Subject Content

1. Constructing knowledge of academic, social, economic, cultural, and linguistic considerations for teaching primary science
2. Critiquing the relationships among teachers' worldviews of diversity and disability, children's experiences and backgrounds, and the learning context to generate implications for future practice
3. Differentiating primary science instruction based on students' needs
4. Culturally relevant science pedagogy
5. Context-based pedagogies in primary science

Assessment

Pre-requisite(s) Students enrolled in 1652 1823 2804 2786 1843 4742 3756 or 6021 must have passed 160 credit points to enrol in this subject

Restrictions

Students must be enrolled in course 1714 Master of Teaching (Secondary), 1848 Master of Teaching (Secondary) STEM, 1652 Bachelor of Arts (Pathway to Teaching Secondary), 1823 Bachelor of Arts (Pathway to Teaching Secondary) Dean's Scholars, 2804 Bachelor of Business (Pathway to Teaching Secondary), 1843 Bachelor of Graphic Design (Pathway to Teaching Secondary), 4742 Bachelor of Health Science (Health and Physical Education)-Pathway to Teaching (Secondary), 6013 Diploma in Design/Bachelor of Graphic Design (Pathway to Teaching Secondary), 6021 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Secondary) or 3756 Bachelor of Science (Pathway to Teaching Primary/Secondary).

In addition, students enrolled in 1652 Bachelor of Arts (Pathway to Teaching Secondary), 1823 Bachelor of Arts (Pathway to Teaching Secondary) Dean's Scholars, 2804 Bachelor of Business (Pathway to Teaching Secondary), 1843 Bachelor of Graphic Design (Pathway to Teaching Secondary), 4742 Bachelor of Health Science (Health and Physical Education)-Pathway to Teaching (Secondary), 6013 Diploma in Design/Bachelor of Graphic Design (Pathway to Teaching Secondary) or 6021 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Secondary) must have passed 160 cp to enrol in this unit.

Students enrolled in 3756 Bachelor of Science (Pathway to Teaching Primary/Secondary) must have passed 120cp in this unit.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Integrate knowledge about issues relating to pre-teen and adolescent development in a diverse community.
2. Appraise how legislation, policy resources, school-based processes and system supports impact upon adolescent development.
3. Apply creative and critical insight into the processes and skills required to teach adolescents through the application of evidence-based principles.
4. Analyse the influence of teacher practices and the wider community on the behaviour, well-being and development of adolescents.
5. Assess and reflect upon ethical and legislative responsibilities for responding to adolescent development and propose classroom and school-wide strategies that promote well-being and resilience in adolescence.
6. Explain the role of teachers and schools in the promotion, prevention and early identification of at-risk and marginalised adolescents.
7. Demonstrate a critically informed approach to solving complex real-world problems in relation to teaching adolescents.
8. Demonstrate teaching strategies informed by evidence based principles to meet the diverse needs of adolescents.

Subject Content

1. What is Adolescence?
2. Biological Foundations of Adolescence
3. Cognitive Foundations of Adolescence
4. Adolescents at-risk
5. Social-Emotional Foundations of Adolescence
6. Adolescence and Schooling
7. Building a Learning Portfolio for teaching adolescents
8. Helping adolescents thrive

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7005 Advanced Academic English Skills

Credit Points 10

Legacy Code 102325

Coordinator Adrijana Tomovic ([https://directory.westernsydney.edu.au/search/name/Adrijana Tomovic/](https://directory.westernsydney.edu.au/search/name/Adrijana%20Tomovic/))

Description This is a language-analysis intensive unit with practical application for real situational English language teaching. It offers students theoretical overviews of language analysis, from the sentential-clausal-lexical-grammatical level to highly contextualised discourse study. It requires students to engage with a variety of real-life instances of language use while also investigating the potentialities of extensive linguistic repertoires. By exposing students to both the realities of actual language use and the possibilities inherent in varieties of English, students are better prepared for the demands of English (second and foreign) language teaching across multiple contexts.

School Humanities & Comm Arts

Discipline English as a Second Language Teaching

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in programs 1800 Master of Arts in TESOL, 1801 Graduate Diploma in TESOL, 1816 Master of Translation and TESOL, 1777 Master of Interpreting and Translation, 1780 Master of Arts Translation and Interpreting Studies or 8083 Bachelor of Research Studies. The subject may also be undertaken as a non-award subject.

Assumed Knowledge

English language proficiency equivalent to an overall IELTS score of 7.0.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically read and synthesise practical-theoretical frames from research literature in linguistics, discourse analysis and academic English
2. Discuss, in linguistic terms, key aspects of language interaction
3. Demonstrate an understanding of the differences between written and spoken discourse
4. Use systematic diagramming techniques for the analysis of English grammar in real-life textual examples
5. Demonstrate theoretical understandings through practical analysis of textual examples.

Subject Content

- The history of English and its lessons for modern speakers: Etymology and historical linguistics
- The Essentials of language: linguistics Overview
- Standard and non-Standards: codification, prescriptive and Descriptive grammars, dictionaries, Grammar Teaching and lexicology
- The sound of English: prosody, phonics and Phonology
- The shapes of words: Morphology, The lexical item and lexical im/ possibilities
- The Essentials of language: Grammar, parsing and trees/boxes
- World Englishes: sounds, shapes and sentences around The World
- Semantics and pragmatics: sociolinguistics and speech community and personal style
- discourse analysis: Overview
- Discourse Analysis from the ground up: Conversational Analysis; Systemic Functional Analysis; Ethnography of Communication; Transcription
- Discourse Analysis from the top down: Critical Discourse Analysis; Narrative Theory; Interactional Sociolinguistics
- real-life communication: analysis and learning and adaptation

Legacy Code 102147

Coordinator William Nketsia ([https://directory.westernsydney.edu.au/search/name/William Nketsia/](https://directory.westernsydney.edu.au/search/name/William_Nketsia/))

Description Professionals' knowledge and skill in assessment supports the identification, planning, monitoring and evaluation of their work with individuals with additional needs. Assessment not only applies to assessing the needs of the individual, but extends to identifying the needs of the family and the educational setting. This unit explores various models of assessment (and their underlying theory and implications for practice). Various approaches are investigated that are utilised to elucidate a range of educational needs across the lifespan by a range of professionals (e.g. functional, standardised, diagnostic, strengths-based, curriculum-based). Students apply problem-based learning by selecting and critiquing assessment strategies to inform the goals, educational instruction and adjustments, and progress for an individual, their family and educational setting. Students also develop skills in communicating with colleagues and families regarding issues around assessment.

School Education

Discipline Teacher Education: Special Education

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1682 Master of Special Education; 1720 Master of Inclusive Education; 1721 Graduate Certificate in Inclusive Education or 1911 Master of Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply an understanding of the role that assessment plays in the learning and teaching cycle.
2. Evaluate the impact of adopting various assessment strategies.
3. Critique models, objectives and tools of assessment that are utilised for individuals with additional needs.
4. Design an assessment strategy to identify the needs of an individual, their family and their educational setting.
5. Analyse how assessment can be used to inform educational practice and instruction, and monitor progress.
6. Judge the limitations of assessment and the impact of ethical issues.
7. Utilise appropriate and effective communication skills when discussing assessment issues with all relevant stakeholders.

Subject Content

1. The role of assessment in educational contexts;
2. Using assessment to clarify needs of the individual, family and educational setting;
3. The diverse range of assessment approaches (e.g. functional, standardised, diagnostic, strengths-based, curriculum-based) and their implications;
4. Strategies and tools to assess the needs of the individual (e.g. social, emotional, adaptive behaviour, intelligence, academic), and the needs of the family and the educational setting;
5. Current practices used by school systems to assess the needs of students;
6. Assessing need across the lifespan (e.g. special consideration of pre-schoolers);
7. Ethical and legal considerations, limitations and the impact of assessment;
8. Issues of reliability and validity (e.g. cultural and linguistic considerations);
9. Assessment and decision making;
10. Making instructional decisions (e.g. identifying adjustments);
11. Collaborative team decision making;
12. Developing skills in communicating in a written and oral form to both colleagues and families regarding various stages of the assessment cycle.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

TEAC 7011 Assessment and Intervention for Mathematics and Numeracy Learning

Credit Points 10

Legacy Code 102324

Coordinator Peter Mcdonald ([https://directory.westernsydney.edu.au/search/name/Peter Mcdonald/](https://directory.westernsydney.edu.au/search/name/Peter+Mcdonald/))

Description A significant aspect of teachers' work is focused on assessment and mathematics classrooms are renowned for their traditional reliance on pen and paper testing. In this unit students will investigate contemporary formative and summative assessment practices of and for learning mathematics. Students will investigate how to use results from assessments including NAPLAN to plan teaching and learning, and provide intervention where appropriate. A range of intervention programs used in Australian schools will be explored and compared.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1682 Master of Special Education; 1720 Master of Inclusive Education; 1830 Graduate Certificate in Primary Math Education; 1847 Master of Education (STEM) or 1911 Master of Education.

Assumed Knowledge

Students must be either within their final semester of the Master of Teaching (Primary) program; Master of Teach (Birth to 12) or enrolled in the Master of Inclusive Education or a qualified primary teacher.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify a range of high quality assessment tasks that are aligned to the Australian Curriculum: Mathematics
2. Select formative and summative assessment tasks that address specific content in the primary mathematics curriculum
3. Analyse assessment data to assist in addressing student needs
4. Propose learning interventions based on assessment data
5. Justify the use of specific intervention programs used in Australian primary mathematics classrooms
6. Compare intervention programs in relation to their effectiveness and feasibility in Australian primary mathematics classrooms

Subject Content

1. Formative and summative assessment practices for the contemporary primary mathematics classroom
2. Assessment practices to promote positive engagement, growth mindset and positive mathematics identities
3. Laying Foundations for Assessment
4. Evidence-based practice
5. Dealing with high-stakes mathematics assessment
6. Which intervention?
7. Interventions and mathematics

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7012 Assessment and Intervention for Science Learning

Credit Points 10

Legacy Code 102488

Coordinator Karina Mckoy ([https://directory.westernsydney.edu.au/search/name/Karina Mckoy/](https://directory.westernsydney.edu.au/search/name/Karina%20Mckoy/))

Description The purpose of this unit is for students to be informed of different types of diagnostic, formative, and summative assessment strategies used in primary science contexts. Examination of assessment methods and resources will help teachers develop a comprehensive philosophy of assessment in primary science. Students will develop skills in adapting instructional units to incorporate a research-based assessment system, become familiar with strategies to analyse assessment data, and design interventions in response to assessment data.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1845 Graduate Certificate in Primary Science Education; 1847 Master of Education (STEM); 1887 Graduate Certificate in Primary STEM Education or 1911 Master of Education.

Assumed Knowledge

A basic understanding of classroom assessment practices, features of positive classroom environments, and outcomes of the primary science syllabus is desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify contemporary, research-based diagnostic, formative, and summative assessment strategies specific to science education
2. Adapt a unit in primary science to incorporate appropriate diagnostic, formative, and summative assessment strategies
3. Develop assessment strategies for an integrated unit using a scientific context in the primary science curriculum
4. Explain research-based strategies for utilising assessment data to inform future teaching in primary science
5. Synthesize information from a set of assessment data and articulate how to respond with future interventions

Subject Content

1. Diagnostic assessment strategies in primary science education
2. Formative assessment strategies in primary science education
3. Summative assessment strategies in primary science education
4. Analysis of assessment data in primary science
5. Pedagogical interventions based on assessment data in primary science

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7013 At the cultural interface - learning two ways

Credit Points 10

Legacy Code 102165

Coordinator Erin Mackenzie ([https://directory.westernsydney.edu.au/search/name/Erin Mackenzie/](https://directory.westernsydney.edu.au/search/name/Erin%20Mackenzie/))

Description From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. History, politics and ignorance make the cultural interface between Aboriginal and non-Aboriginal Australians contested and fraught. In turn, cultural misunderstanding contributes to inequities in educational attainment, employment and social disadvantage. Students apply a critical perspective to the discourses surrounding Aboriginal disadvantage and white privilege. They develop processes to engage respectfully with local Aboriginal and Islander communities in order to learn and share in a two-way exchange of knowledge. They listen deeply and intersubjectively in their exploration of Aboriginal worldviews, and they reflect on what it means to decolonise their own thinking so as to build partnerships based on mutuality and reciprocity.

School Education

Discipline Teacher Education

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate the issues that impact on social disadvantage in Aboriginal and Torres Strait Islander communities
2. Apply critical race perspectives to analyse white privilege and dominant knowledge systems
3. Advocate for Aboriginal and Torres Strait Islander cultures, worldviews and languages and identify ways to support them to flourish
4. Reflect critically on the process of decolonisation in terms of personal insights and contributions
5. Communicate ethically and respectfully with local Aboriginal and Torres Strait Islander people Engage effectively with the diversity of circumstances and needs experienced within Aboriginal and Torres Strait Islander communities
6. Develop ethical and constructive professional and research partnerships with Aboriginal and Torres Strait Islander individuals and communities

Subject Content

1. Rights and wrongs: traversing the contact zone in black and white Australia
2. Deep listening: stories of life, land, dispossession and remembering
3. The cultural interface - no neutral place to be
4. Whose knowledge matters? The need for unlearning
5. Intersubjectivity and decolonising practices
6. Being in place, sharing in country
7. Research politics; decolonising methodologies
8. Closing the gap? Deinstitutionalising whiteness

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Case Study	2,500 words	50	N	Individual
Essay	2,500 words	50	N	Individual

Teaching Periods

TEAC 7015 Children, Families, Communities

Credit Points 10

Legacy Code 102102

Coordinator Kerry Staples ([https://directory.westernsydney.edu.au/search/name/Kerry Staples/](https://directory.westernsydney.edu.au/search/name/Kerry%20Staples/))

Description From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. The subject examines the implications of cross-disciplinary research into children's early life experiences for creating innovative services and service models that both foster children's early learning and encourage and strengthen families and carers' capacity to support their children's early development and wellbeing. In this way, students will gain an understanding of the complex field of early intervention and prevention, consider national and international innovations in policy and service delivery, examine new tools and frameworks for community intervention, analyse discourses associated with family and social disadvantage and consider how communities can best support young children. Studying this subject will provide an opportunity to consider the nexus between early childhood education and child and family services, how these might interact and work together seamlessly and the implications for the kind of knowledge and skills required to work in these innovative contexts. Students will reflect on the complex interrelationship between collaboration, research and practice to identify their role as community leaders enhancing families' and carers' capacities and children's development, learning, health and wellbeing.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 1118 - Early Intervention and Prevention in Educational Contexts TEAC 7036 - Early Intervention and Prevention in Early Childhood Contexts

Restrictions

Students must be enrolled in one of the following programs: 1708 Bachelor of Arts (Pathway to Teaching Birth-5/Birth-12), 6017 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Birth-5/Birth-12) or 1783 Master of Teaching (Birth-5 Years/Birth-12 Years). Note: Students in 1708 Bachelor of Arts (Pathway to Teaching Birth-5/Birth-12) or 6017 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Birth-5/Birth-12) must have completed 160 credit points before enrolling in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse international and national research about early intervention and prevention, its relationship to community, family, carers including those from Aboriginal and Torres Strait Islander backgrounds, diversity, individual and social outcomes and its applicability to inclusive early childhood programs and policy contexts.

- Discuss the complex interrelationship between capacity building and early intervention and prevention, including the importance of cross-sectoral collaboration and the role of early childhood educators as community leaders.
- Reflect on current research and evidence-based practice for early childhood educators and the implications for advocacy, partnership with families/carers and development of responsive communities and services that support children's development, learning, health and wellbeing.
- Work collaboratively to design responsive ethical and inclusive community programs that enhance outcomes for children and families/carers from diverse backgrounds.
- Identify the strengths and limitations of current policy contexts and the capacity of early childhood programs to be responsive to and inclusive of socially and culturally diverse communities.
- Utilise effective research skills to review practice and literature and gather data.

Subject Content

- Theories and philosophical frameworks that inform early intervention policy and service delivery and partnership with families/carers from diverse backgrounds, including Aboriginal and Torres Strait Islander families/carers.
- Conceptualisation of responsive communities.
- Deconstruction of discourses of risk, resilience, adversity and vulnerability.
- Use of a socio-cultural framework to identify influences on children's development, learning health and well-being and family and community strengths.
- The early childhood educator as a community leader within an early intervention and prevention context.
- Research skills: review of literature and interview techniques.
- Collaborative partnerships with and within teams.
- Use of research and evidence-based practices to substantiate design decisions. Reflection on research and practice and implications for future practice.

TEAC 7018 Computational Thinking across the STEM Curriculum

Credit Points 10

Legacy Code 102509

Coordinator Nathan Berger ([https://directory.westernsydney.edu.au/search/name/Nathan Berger/](https://directory.westernsydney.edu.au/search/name/Nathan%20Berger/))

Description This unit will enable students to develop knowledge of computational thinking as it can be applied across the STEM curriculum in schools. Students will learn about the nature of computational thinking as a problem solving approach which can be applied to produce digital solutions. The unit will allow students to undertake a critical examination of innovative, interdisciplinary approaches to the development of computational thinking and relevant pedagogical strategies to maximise student learning and engagement with STEM disciplines.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

An understanding of at least one STEM (science, technology, engineering or mathematics) school syllabus.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Demonstrate a critical understanding of computational and algorithmic thinking
- Apply knowledge of the K-10 Australian curriculum: Digital Technologies in developing STEM units.
- Create and evaluate interdisciplinary STEM units which integrate computational thinking in meaningful ways across traditional subject boundaries.
- Apply an understanding of data management, organisation and representation for analytical problem solving.

Subject Content

1. The nature of computational thinking
2. The Australian Curriculum: Digital Technologies
3. Algorithmic thinking
4. Working with data across the curriculum
5. Computational thinking across the curriculum

Assessment

Teaching Periods

TEAC 7020 Contemporary Teacher Leadership

Credit Points 10

Legacy Code 102098

Coordinator Paul Rooney ([https://directory.westernsydney.edu.au/search/name/Paul Rooney/](https://directory.westernsydney.edu.au/search/name/Paul%20Rooney/))

Description This multidisciplinary subject seeks to redefine and inform practice about what it means to be part of teacher-led development in the 21st century. Students will need to develop unique skills and understanding necessary for creating, sustaining and expanding communities of practice within and beyond classrooms. Through an examination of relevant literature connected with local and global networks, students will build, an understanding of cultural assets; professional leadership capacity; and what is required to effect change, leadership and innovation in school culture through teaching and learning innovations and program evaluation. Learning outcomes are based on learning about leadership within an established community of practice.

School Education

Discipline Teacher Education: Secondary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) -

Co-requisite(s) -

Restrictions

Must be enrolled in the 1714 Master of Teaching (Secondary) or 1914 Graduate Certificate in Secondary Teaching

Learning Outcomes

1. Apply knowledge and skills necessary to create, sustain and expand communities of practice within and beyond their classrooms, faculties and schools

2. Explain the role of relevant and appropriate professional learning to ensure effective on-going leadership and 21st century change in schools
3. Evaluate current, future and virtual use of various digital technologies and innovations in schools and how pre-service teachers collaborate with others to effect positive change of themselves as part of 21st century teaching team
4. Critically analyse the roles, responsibilities, cultural assets and personal/professional attributes required of leaders in understanding what is required to effect change and innovation in teaching
5. Examine the political and social changes impacting education at global, regional and local levels
6. Critically analyse research and pre-service teachers' individual practices to identify and address leadership needs and skills which are required to make them 21st century educational change agents

Subject Content

1. What does teacher leadership look like in the 21st Century?
2. How transformational are contemporary models of educational leadership?
3. What is authentic leadership? How is authentic leadership ethical?
4. How does contemporary leadership work in cross-cultural contexts at local and global levels?
5. How does leadership provide sustainable solutions to increasing educational complexity?
6. What evidence-based research informs actions / responsibilities / dimensions that characterise leadership for learning? How can I apply leadership for changing learning practices in schools?
7. What are communities of practice and how do they contribute to successful curriculum transformation in teaching and learning?
8. How can cultural assets that recognise Aboriginal and Torres Strait Islander knowledge and learning be applied in school curriculum change?

Assessment

TEAC 7022 Creative Teaching and Learning

Credit Points 10

Legacy Code 102105

Coordinator Joanne Frost ([https://directory.westernsydney.edu.au/search/name/Joanne Frost/](https://directory.westernsydney.edu.au/search/name/Joanne%20Frost/))

Description From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. This unit focuses on processes of creative thinking and creative expression in children and introduces students to the theory and practices of using drama, music, dance, media arts and visual arts in prior to school and school contexts. Arts-based pedagogies, collaborative learning, multiple modes of learning and reflective practices are the key operating principles of the unit. The unit will encompass creativity both as it relates to the arts as well as its critical role in fostering creative thinking and teaching and learning practices. Students will explore the relevance of the arts in the development of children's play and will engage with appropriate information and communication technologies for learning in the arts. The unit provides an understanding of the importance of the art forms both as pedagogical approaches across the early childhood and primary years and as creative arts in their own right.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7045 - Fostering Creativity in Children's Learning

Restrictions

Students must be enrolled in 1691 Master of Teaching (Birth-5 Years/ Birth-12 Years), 1670 Bachelor of Education (Birth ? 5 Years) or 1783 Master of Teaching (Birth-5 Years/Birth-12 Years).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the physical, social, creative and intellectual capabilities of birth -12 year olds as they relate to drama, music, dance, visual arts and media arts education.
2. Reflect the importance of creative teaching and learning across the curriculum in the design of creative sequential learning experiences consistent with the Early Years Learning Framework and the NSW K ? 6 Creative Arts Syllabus and related support documents.
3. Apply arts concepts and elements as they relate to cultural diversity and in particular Aboriginal and Torres Strait Islander peoples and the cultures of the Asia region.

4. Develop pedagogies, resources, experiences and projects that encourage divergent thinking, creative expression and meaning making and that assist children to communicate their ideas.
5. Display practical skills and knowledge in the areas of drama, music, dance, visual and media arts.
6. Explain the socio-cultural and multicultural place of the arts in contemporary society in a manner that incorporates an understanding of diversity and appreciation of difference.
7. Demonstrate commitment to and advocacy for arts learning across early childhood and primary educational contexts.
8. Develop pedagogies, resources, experiences and projects that encourage divergent thinking, creative expression and meaning making assist children to communicate their ideas and incorporate technology as a way of creative thinking, communication and expression.

Subject Content

1. The physical, social, creative and intellectual capabilities of birth -12 year olds as they relate to creativity in the areas of drama, music, dance, visual arts and media arts.
2. Creative teaching and learning pedagogies consistent with the Early Years Learning Framework and the NSW K ? 6 Creative Arts Syllabus and related support documents
3. Arts concepts and elements as they relate to cultural diversity and in particular Aboriginal and Torres Strait Islander and cultures of the Asia region.
4. Pedagogies, resources, experiences and projects that encourage divergent thinking, creative expression and meaning making and that assist children to communicate their ideas.
5. Practice of skills and knowledge in the areas of drama, music, dance, visual and media arts.
6. The socio-cultural place of the arts in contemporary society that incorporates diversity and appreciation of difference and the educator's role as an advocate
4. Pedagogies, resources, experiences and projects that encourage divergent thinking, creative expression and meaning making assist children to communicate their ideas and incorporate technology as a way of creative thinking, communication and expression.
5. Practice of skills and knowledge in the areas of drama, music, dance, visual and media arts using technology.
6. The socio-cultural place of the arts in contemporary society that incorporates diversity and appreciation of difference and the educator's role as an advocate.

TEAC 7023 Culture, Subjectivities and Schooling

Credit Points 10

Legacy Code 102071

Coordinator Mohamed Moustakim ([https://directory.westernsydney.edu.au/search/name/Mohamed Moustakim/](https://directory.westernsydney.edu.au/search/name/Mohamed%20Moustakim/))

Description From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. This unit focuses on the socio-political, economic and cultural milieu that shapes teacher and student subjectivities. Teachers are required to understand the variety of, and changing nature of, discourses and ideologies that both constitute and are constituted in society, schooling, teaching, and learning, in an increasingly multifaceted, globalized and cosmopolitan environment. Within this framework it is also essential that teachers engage with and understand the diversity and fluidity of individuals and the broader Australian community in order to promote equitable practices in schooling and to facilitate educational and professional transformation. Aboriginal and Torres Strait Islander peoples and their relationship to schooling will also be explored in this unit, providing pre-service teachers with deeper understandings of Australia's first nations people. Developing understandings of society, culture and the formation of subjectivities will promote an enhanced awareness of equity issues as well as crucial analytical and critical tools to address the needs of diverse students, their families, teachers, and the broader school community.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) Students enrolled in 1651 Bachelor of Arts (Pathway to Teaching Primary) 1822 Bachelor of Arts (Pathway to Teaching Primary) Dean's Scholars or 6019 Diploma in Arts Bachelor of Arts (Pathway to Teaching Primary) must have successfully completed 160 credit points. Students enrolled in 3756 Bachelor of Science (Pathway to Teaching Primary/Secondary) must have completed 120 credit points.

Restrictions

Note that only students enrolled at WSU Online may register in the WSU Online subjects offered at that location.

Students must be enrolled in 1781 Master of Teaching (Primary) or 1651 Bachelor of Arts (Pathway to Primary Teaching), 1822 Bachelor of Arts (Pathway to Teaching Primary) Dean's Scholars, 3756 Bachelor of Science (Pathway to Teaching Primary/Secondary) or 6019 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Primary).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the role and impact of broader socio-political, economic, historical and/or cultural dimensions on the formation of teacher and student subjectivities, pedagogy and education more broadly.
2. Describe Aboriginal and Torres Strait Islander social and kinship systems, significance of country, language and culture with a view to understanding Aboriginal and Torres Strait Islander learners and communities. Students will be able to articulate approaches to redress discrimination and inequity.
3. Explain how subjectivities are socially constructed and describe how culture/cultures of schooling can perpetuate and position particular understandings of diversity, with a focus on Aboriginal and Torres Strait Islander communities, gender, sexualities, ethnicities, ~~erace~~ of, religion and class and their intersections.
4. Explain the new sociology of childhood including how childhood is socially constructed and the implications for learning, teaching and young people.
5. Discuss the changing nature and role of family and family diversity and how educators can help sustain the capacity of families, communities and the school to engage all students.
6. Evaluate relevant policies and legislative requirements related to rights and responsibilities of students, parents, other community members and teachers and apply appropriate theoretical tools to critically analyse these in relation to cultures of schools and the effects on learning.
7. Describe how supportive learning environments might be developed where students feel safe to risk

Subject Content

- 1.?? Sociology in the curriculum. Merit/competition. Hidden and manifest curriculum. Knowledge and governmentality.
- 2.?? Social construction of childhood and family. Political, economic and social policy perspectives. Contemporary debates.
- 3.?? Theories of diversity and difference. Understanding culture as constituted in class, ethnicity, racialization, religion, gender

Assessment

TEAC 7025 Curriculum for Under Threes

Credit Points 10

Legacy Code 101098

Coordinator Prathyusha Sanagavarapu ([https://directory.westernsydney.edu.au/search/name/Prathyusha Sanagavarapu/](https://directory.westernsydney.edu.au/search/name/Prathyusha%20Sanagavarapu/))

Description This unit examines the role of families and communities in children's learning and emphasizes the essential role of partnerships in the provision of meaningful curriculum for young children. It also examines approaches to observing and documenting children's learning in ways that celebrate children's competencies and build connections between children, families and educators while also identifying any areas where children may require additional assistance. Curriculum for under threes also includes the role of interactions, play experiences and culturally responsive routines in the provision of learning environments for under threes.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in programs 1625 Master of Teaching (Early Childhood), 1631 Graduate Diploma in Educational Studies (Early Childhood), 1673 Master of Teaching (Birth-12 years), 1672 Master of Teaching (Birth-5years) or 1691 Master of Teaching (Birth-5years/ Birth-12years). This subject relies heavily on professional knowledge acquired across the range of other core subjects and professional experiences within the Master of Teaching (Early Childhood) programme.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appreciate the role of families and communities in children's learning and the diversity of child-rearing practices, expectations and values families hold for their children;
2. Apply a range of strategies for strengthening partnerships between educators, children and families;
3. Understand strategies for providing a culturally responsive curriculum and continuity of care for young children;
4. Document children's learning in ways that encourage connections between children, families, educators and communities and that celebrate children's competencies;
5. Initiate interactions and relationships and implement teaching strategies that support young children's relationships and learning;
6. Implement planned and spontaneous experiences and learning centres that encourage young children's exploration and creativity

Subject Content

- Socio-cultural contexts for learning;
- Partnerships between educators, children and families;
- Connecting early childhood curriculum to children's family and community experiences;
- The importance of relationships and interactions for children's learning;
- Teaching and learning strategies for under threes eg scaffolding, peer guidance and play;
- children's learning portfolios
- socio-cultural and pedagogical documentation
- Planned and spontaneous play experiences that extend children's interests, friendships and strengths.

Special Requirements

Legislative pre-requisites

Students must have completed Child Protection training.

Prescribed Texts

Teaching Periods

TEAC 7026 Designing Curriculum Futures

Credit Points 10

Legacy Code 102159

Coordinator Anne Power ([https://directory.westernsydney.edu.au/search/name/Anne Power/](https://directory.westernsydney.edu.au/search/name/Anne%20Power/))

Description This unit considers the research and theoretical basis of curriculum futures, with a focus on design for learning and learning design, and critically examines contextual factors and their implications for learning design in a range of settings. The unit provides a critical overview of perspectives on curriculum, curriculum design and examines authentic learning and assessment. Examples of curriculum futures will be negotiated and explicated. The overall focus is on curriculum decision-making and planning for improved learning outcomes.

School Education

Discipline Teacher Education

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7024 - Curriculum Futures

Restrictions

Students must be enrolled in a postgraduate program or 8083 Bachelor of Research Studies

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Investigate the theoretical basis of curriculum and design for learning
2. Critically evaluate contextual factors which have implications for curriculum
3. Strengthen individual teaching philosophy and application of learning and teaching
4. Develop learning design responding to curriculum issues, towards planning for improved learning outcomes

Subject Content

1. Theoretical basis of curriculum
 - curriculum futures
 - design for learning
 - learning design
2. Critical review of factors that have implications for curriculum: e.g. digital learning; citizenship; and globalisation
3. Critical overview of perspectives on curriculum, followed by a focused examination of connected learning and assessment
4. Action research and collaborative decision making
5. Examination of topical curriculum issues
6. Focus on curriculum decision-making and planning for improved learning outcomes

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7027 Designing Teaching and Learning

Credit Points 10

Legacy Code 102086

Coordinator Kay Carroll ([https://directory.westernsydney.edu.au/search/name/Kay Carroll/](https://directory.westernsydney.edu.au/search/name/Kay%20Carroll/))

Description In this unit, students will explore a range of contemporary issues impacting upon adolescent learning in the 21st century and how those issues may be addressed through the thoughtful re-design of teaching and learning. In a future characterised by rapid change and re-conceptualisations of compulsory schooling, attention will be given to the role of the secondary school teacher in assisting their students to develop new ways to think and new ways to work, as well as acquiring new tools and skills for living and working in the 21st century. Students will be encouraged to articulate their own vision for sustainable and engaged secondary education appropriate to the first half of the 21st century. In particular, it is critical that students possess the capacity to develop secondary students' abilities to engage in real world problem solving and collaborate meaningfully through emerging technologies. Students will collect evidence in an e-portfolio to demonstrate they meet the Australian Professional Standards for Teachers at the graduate level. Students begin their e-portfolio in 102086 Designing Teaching and Learning and continue to collect evidence throughout their Master of Teaching (Secondary) course.

School Education**Discipline** Teacher Education: Secondary**Student Contribution Band** HECS Band 1 10cp**Level** Postgraduate Coursework Level 7 subject**Pre-requisite(s)** Students enrolled in 1652 1823 2804 2786 1843 4742 3756 or 6021 must have successfully completed 160 credit points**Equivalent Subjects** TEAC 7081 - Pedagogies in Practice TEAC 7080 - Pedagogies for Learning CART 1003 - Literacies for Learning**Restrictions**

Students must be enrolled in program 1714, 1848, 1652, 1823, 2804, 2786, 1843, 4742, 3756 or 6021. In addition, students enrolled in 1652, 1823, 2804, 2786, 1843, 4742, 3756 or 6021 must have passed 160 credit points to enrol in this unit

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the interrelationship between learning outcomes, literacy and numeracy strategies, the interpretation and reporting of assessment data and content selection using the National Professional Standards for Teachers to inform lesson sequencing and planning.
2. Analyse through research applications, actions and solutions for preventing and intervening in classroom management events that acknowledge Work, Health and Safety and risk management legislation.
3. Apply ICT tools in meaningful learning and appropriately integrate the safe and ethical use of Technological Pedagogical and Content Knowledge (TPACK) into teaching.
4. Organise lesson content, resources and activities based on contemporary syllabus requirements and student learning needs.
5. Analyse the models of pedagogy for the designing of learning goals and activities for the full range of student abilities, including gifted and talented students, and for addressing the literacy needs of Aboriginal and Torres Strait Islander and English as an Additional Language or Dialect (EALD) students.
6. Use resources to evaluate how safe, ethical and responsible use of technology and student differences can impact on how students learn.
7. Use the National Professional Standards for Teachers to deconstruct a lesson plan and justify how the standards have been achieved.
8. Analyse key issues underlying research debate to increase own confidence as narrators on the educational research landscape.

Subject Content

- 1.???? How can teachers evaluate the interrelationship between learning outcomes, assessment and literacy strategies to inform lesson sequencing and planning?
- 2.???? In what ways can analysis of case applications suggest actions and solutions for preventing and intervening in classroom management events?
- 3.???? How can teachers emphasise the safe, ethical and responsible use of ICT when integrating ICT tools in meaningful learning experiences? How does an understanding of Technological Pedagogical and Content Knowledge (TPACK) inform teaching ?
- 4.???? How do different learning theories such as the constructivist approach, co-construction of learning, personalised learning contribute to learning in the 21st century?

5.???? How does analysing models of pedagogy and assessment assist in designing learning activities and providing student feedback on learning?

6.???? How can teachers identify ways in which technology and student differences impact on students' learning?

7.???? How can teachers create 21st century learning using teacher standards for the profession?

8.???? In what ways is the self-evaluation of teacher performance significant alongside student achievement of outcomes according to stages of adolescent development?

9.???? In what ways can a global perspective of teaching and learning be acquired in order to develop a personal construction of sustainable practices in the teaching environment?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7029 Disability in Context**Credit Points** 10**Legacy Code** 102156

Coordinator Kerry Staples ([https://directory.westernsydney.edu.au/search/name/Kerry Staples/](https://directory.westernsydney.edu.au/search/name/Kerry%20Staples/))

Description The developmental trajectory and quality of life of individuals with additional needs is affected not only by the nature and level of the disability itself but also by the ways in which that disability interacts with the contexts in which they live their lives. In turn, the impact of the disability will affect the individual's family and those working with them. This subject adopts both a developmental and ecological perspective to enable analysis of the specific impact of

disability on an individual, their family, the professionals working with them and the contexts in which they do so. In so doing, it evaluates the efficacy of theoretical models and frameworks available to assist in ensuring best outcomes for the individual and those around them.

School Education

Discipline Teacher Education: Special Education

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects HUMN 7046 - Transformative Leadership

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Professionals with teaching or other relevant qualifications.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate the relevance of theories and models of development to their practice;
2. Assess the impact of an individual's disability in learning contexts;
3. Evaluate the impact of an individual's disability on their current level of functioning and developmental trajectory;
4. Utilise an ecological model to determine the ways in which an individual's disability affects and is affected by the contexts in which they live their lives;
5. Determine the impact of a disability on the individual's family and the implications for family functioning;
6. Synthesise the factors affecting outcomes for individuals with a disability and their families and consider the implications for quality of life.

Subject Content

1. Theories and models of development and their relevance to disability studies;
2. Ecological theory and its implications for individuals with additional needs;
3. The impact of cognitive, physical, sensory, emotional and behavioural disabilities on development;
4. Models for analysing level of functioning e.g. International Classification of Functioning, International Classification of Functioning – Children and Youth, Developmental Needs Model;
5. Impact of disability on the individual, the family and social and environmental contexts;
6. The interaction between individual characteristics and learning and social contexts;
7. Theory and research on quality of life and its implications for working with individuals with additional needs;
8. Evaluation of outcomes for individuals with additional needs and their families;
9. Implications of functional analysis for policy and practice in the disability field.

Assessment

Teaching Periods

TEAC 7030 Diverse Literacies

Credit Points 10

Legacy Code 102101

Coordinator Christine Jones Diaz ([https://directory.westernsydney.edu.au/search/name/Christine Jones Diaz/](https://directory.westernsydney.edu.au/search/name/Christine%20Jones%20Diaz/))

Description From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. This unit increases students' understandings of the impact of globalisation, new technologies and the diversity of Australian languages and dialects on children's literacy practices. It provides opportunities for students to develop insights into the importance of languages and cultures in children's identity formation, particularly in relation to the importance of the home language and dialect for bilingual and Aboriginal and Torres Strait Islander children. Contemporary social theories of diversity and difference and frameworks of literacy and languages learning will be introduced to students and the links between theory and practice will be applied. Students will have the opportunity to investigate the literacy practices in diverse family and community contexts and apply literacy-enriched play and pedagogies to extend languages learning and literacy for all children.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7046 - Global Literacies TEAC 1026 - Multiliteracies

Restrictions

Students must be enrolled in 1691 Master of Teaching (Birth-5 Years / Birth-12 Years) or 1783 Master of Teaching (Birth-5 Years/Birth-12 Years).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the impact of globalisation and new information technologies on literacy and literacy learning.
2. Explain understandings of theory related to literacy as social, cultural and technological practice.
3. Discuss the diversity of literacies, languages and dialects in Australia and different approaches to the revival and retention of Aboriginal and Torres Strait Islander and community languages.
4. Identify the impact of past and present language policies on literacy pedagogies and practices.
5. Understand the cultural context of Aboriginal and Torres Strait Islander learners and the significance of Aboriginal languages and dialects.

6. Analyse issues of language, culture and identity and their relationship to multicultural education.
7. Research diverse family literacy practices and children's literacy funds of knowledge.
8. Apply respect for diverse literacies and understandings of issues of culture, gender, class, inclusion and language in work with children and families.
9. Select and share texts with children and engage children in critical literacy.
10. Implement literacy-enriched play that builds on children's family literacies.

Subject Content

1. Literacy as social and technological practice
2. Multiliteracies - multiple modes of communication, diverse texts, diverse literacy practices, diverse languages including Aboriginal languages and community languages
3. Globalisation and new technologies - the role of digital texts and popular media culture in literacy learning and the importance of critical literacy
4. Linguistic and cultural capital and the power and status of languages
5. Bilingualism and multilingualism
6. Diverse dialects including Aboriginal English
7. Language loss, language maintenance and language revival
8. Issues of gender, class, ethnicity and language for literacy learning
9. Researching family literacy practices and children's literacy funds of knowledge
10. The role of play-based pedagogies in literacy learning
11. Selecting and sharing children's literature

Inherent Requirements

Students must meet the Inherent Requirements for the Master of Teaching (Birth – 5 Years / Birth -12 Years) (<https://hbook.westernsydney.edu.au/programs/master-teaching-birth-5-years-birth-12-years/>)

TEAC 7032 Diversity, Social Justice and Learning

Credit Points 10

Legacy Code 102083

Coordinator Erika Smith ([https://directory.westernsydney.edu.au/search/name/Erika Smith/](https://directory.westernsydney.edu.au/search/name/Erika%20Smith/))

Description The unit explores diversity, social justice, equity and learning through the multi-layered operation of social power and privilege. It advances students' understanding of how social and cultural difference in Australia has shaped contemporary education, schooling and cross-cultural relationships. In particular, the unit examines diversity as a social construct that has promoted the differential treatment of particular social and cultural groups and served as the basis for response to subsequent social and cultural inequities by these groups. The unit engages students in critical analysis essential for professional pedagogical practice in education for diversity and social justice in Australia and beyond.

School Education

Discipline Teacher Education: Secondary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) Students enrolled in 1652 1823 2804 2786 1843 4742 3756 or 6021 must have successfully completed 160 credit points

Equivalent Subjects TEAC 7031 Diversity Social Justice and Equity
TEAC 7033 Diversity Social Justice and Schooling

Restrictions

Students must be enrolled in program 1714 Master of Teaching (Secondary), 1848 Master of Teaching (Secondary) STEM, 1652 Bachelor of Arts (Pathway to Teaching Secondary), 1823 Bachelor of Arts (Pathway to Teaching Secondary) Dean's Scholars, 2804 Bachelor of Business (Pathway to Teaching Secondary), 2786 Bachelor of Business, 1843 Bachelor of Graphic Design (Pathway to Teaching Secondary), 4742 Bachelor of Health Science (Health and Physical Education)-Pathway to Teaching (Secondary), 3756 Bachelor of Science (Pathway to Teaching Primary/Secondary) or 6021 Diploma in Arts/ Bachelor of Arts (Pathway to Teaching Secondary).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the impact of differences (e.g. Gender, Sexuality, Socioeconomic background, Race, Language) upon secondary students' access to, participation in and learning outcomes at school.
2. Critically analyse the importance of productive relationships and the role theory and research play in understanding the needs of marginalised groups in society to build and maintain community.
3. Explore how varying philosophies of teaching and learning among school communities, including cultural and linguistically diverse communities can impact teaching practice.
4. Investigate the relationships between power, privilege and disadvantage among marginalised (especially Aboriginal and Torres Strait Islander, English as an Additional Language or Dialect (EALD), refugee and low SES students) and non-marginalised groups.
5. Critically analyse their own professional practice as teachers by connecting knowledge of diverse groups (visible and non-visible) to their pedagogical program.
6. Investigate how supportive learning environments might be developed where secondary students feel safe to risk full participation and strong community values are engendered.
7. Critically analyse the impact of government legislation and educational policy on the education of marginalised students.
8. Assess how policies, legislation and research impact on social justice principles to inform and guide professional practice and judgements as teachers.
9. Evaluate the relationship between home literacy and school literacy with regard to cultural identity and linguistic background for the improved learning outcomes of students.
10. Apply initial critical research skills of searching, synthesising and analysing literatures in relation to diversity.

Subject Content

- 1.???? How is diversity defined in the secondary school context? What is the significance of diversity and social justice and equity for Australia as expressed through the principles and practices of teaching and learning for equity and access, knowledge and governmentality?
- 2.???? How does diversity relate to the concepts of power; culture; religion; Whiteness; White privilege; subjectivity; discourse; ethnicity; race; knowledge; discipline; embodiment; surveillance; silence; normalisation; punishment; habitus; capital; field; gender; sexuality; socio-economic status; globalization; literacy and language?
- 3.???? What are the complexities facing educators in a 21st Century context? How do capitalist market economy agendas and increasing practices of standardization alongside social justice and ethical issues affect educators? Why is lifelong learning for all important? How effective are pedagogical approaches such as adaptive ability, creativity; critical thinking, critical pedagogy, culturally responsive teaching, and inquiry based learning and a

TEAC 7037 Early Learning Environments

Credit Points 10

Legacy Code 102622

Coordinator Katina Dimoulis ([https://directory.westernsydney.edu.au/search/name/Katina Dimoulis/](https://directory.westernsydney.edu.au/search/name/Katina%20Dimoulis/))

Description This subject will support students to develop their philosophy, approach to and practice of teaching within the context of a rapidly changing and dynamic human global culture that has important cultural, social, historical and environmental dimensions. The subject explores theoretical perspectives and approaches, including indigenous perspectives, human/nature theories, socio-cultural considerations, inclusivity and place-based pedagogies that support learning and teaching in the curriculum areas of history, geography, civics and citizenship and sustainability for children in early childhood and primary school settings. Drawing on their understanding of theory students will examine key local and international policies and frameworks around risk, play and pedagogy. Through field and / or virtual visits to early childhood and community settings, students will have an opportunity to evaluate the relationship between physical environments and children's experience of place and everyday learning. Students will also design, plan and rationalise learning experiences that support children's investigation, discovery, problem solving and

meaning making using man made and natural materials. A strong focus of this subject is for students to develop an understanding and appreciation for learning environments that promote a connection to place and sustainability.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1783 Master of Teaching (Birth-5 Years/ Birth-12 Years) or 1708 Bachelor of Arts (Pathway to Teaching Birth - 5 / Birth -12) or 6017 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Birth-5/Birth-12). Students in 1708 or 6017 must have passed 160 credit points before enrolling in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Investigate central concepts, modes of enquiry and a range of pedagogies for teaching history and geography, civics and citizenship and their application for early childhood and primary school settings
2. Critique key local and global policies and regulatory documents to identify the way in which children and marginalised groups within society and their cultural identity and citizenship is respected and valued.
3. Discuss the relationship between indigenous perspectives of place, contemporary theories and philosophies of child - nature relationships and sustainability education
4. Explain the way in which pedagogical approaches support place-based learning and connection in early education and primary school settings
5. Examine the role and impact that stimulating and engaging physical environments have for the development of the whole child
6. Analyse the impact of sociocultural and inclusive representations in physical environments on children's learning experiences
7. Design and justify learning environments, curriculum and assessment items for children in early education and school settings that draw on theories of place and place pedagogies, child-nature connections and sustainability
8. Integrate strategies that support differentiation and inclusivity to meet the diverse needs of children in early childhood and primary school settings

Subject Content

1. Introduction to theories of children in nature and outdoor learning through play.
2. Methods for researching inside and outside physical learning environments for and with children, including evaluating relationships between these environments and children's experiences of place.
3. Changes to children's play and learning spaces over time.
4. Significance of place, space and time as influencing factors on everyday interactions.
5. Relevant national and international theories and philosophies related to child-nature relationships and sustainability education, including Indigenous perspectives, socio-cultural influences, and place-based pedagogies.

6. Key global policies and regulations for outdoor learning, play, safety and risk, and inclusive environments that recognise agency, cultural identity, rights and responsibilities.
7. Documenting and implementing learning programs through a range of strategies that support place-based pedagogies, sustainability learning, civics and active citizenship, and social sciences in early childhood and primary school contexts.
8. Planning and designing children's physical learning spaces that are underpinned by place-based pedagogies, child/nature theories and integrated sustainability learning and play affordances.
9. Planning and designing curriculum and assessment utilising the NSW History and Geography Syllabi, and curriculum frameworks such as the Early Years Learning Framework for Australia.

Inherent Requirements

Students must meet the Inherent Requirements for the Master of Teaching (Birth – 5 Years / Birth -12 Years). (<https://hbook.westernsydney.edu.au/programs/master-teaching-birth-5-years-birth-12-years/>)

Assessment

TEAC 7038 Early Mathematics and Numeracy

Credit Points 10

Legacy Code 102603

Coordinator Janene Rox ([https://directory.westernsydney.edu.au/search/name/Janene Rox/](https://directory.westernsydney.edu.au/search/name/Janene%20Rox/))

Description From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. This subject aims to develop students' critical understandings of how numeracy and powerful mathematical ideas shape young children's lives during their first eight years. Students will develop their ability to provide rich learning experiences that enhance and assess the growth of children's numeracy and foundational mathematical concepts. The subject will foster positive dispositions towards teaching and applying mathematics and numeracy in diverse settings for children aged birth to eight years, using the current Early Years Learning Framework and the NSW Mathematics K-10 Syllabus curriculum document.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 1111 - Mathematics Science Technology 0-8
TEAC 7060 - Investigating with Mathematics Science and Technology

Restrictions

Students must be enrolled in the Master of Teaching (Birth-5 Years/ Birth-12 Years).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the different theoretical approaches relevant to early years' mathematics teaching and learning.
2. Develop understandings of deep mathematical concepts, skills and processes relevant to young children birth-8 years.
3. Apply the principles, practices and learning outcomes of The Early Years Learning Framework for Australia to mathematical assessment and planning.
4. Apply knowledge and understanding of the NSW Mathematics K-10 Syllabus and Australian Curriculum documents to plan rich mathematical lessons for lower primary school students.
5. Demonstrate understandings of issues of diversity and equity in mathematics teaching and learning for example, and strategies to support the learning needs of Aboriginal and Torres Strait Islander students and students from low socio-economic communities.
6. Assess and Plan appropriate, engaging experiences to develop mathematical concepts and numeracy for young children.
7. Assess the mathematical understandings of young children.
8. Locate, select and apply a range of appropriate resources, including digital technologies to promote the development of mathematical concepts and skills for a diverse range of abilities.

Subject Content

1. Knowledge and understanding of mathematics curriculum birth - 8 years.
2. Understanding development of number and algebra, measurement and geometry, and statistics and probability concepts.
3. The processes of working mathematically to investigate explore and engage in problem solving.
4. Applying the Early Years Learning Framework principles, practices and learning outcomes to document, assess and plan for experiences in the teaching and learning of mathematics.

5. Using the current NSW Mathematics K-10 syllabus to plan appropriate, engaging mathematics lessons.
6. Issues of diversity and equity in mathematics teaching and learning, for example, addressing the needs of Aboriginal and Torres Strait Islander students, bilingual students, and students from low socio-economic communities.
7. Teaching strategies that promote deep mathematical understanding incorporating a range of materials including digital technologies, concrete manipulatives, games and children's literature.
8. Effective programming, planning and assessment strategies for early year's mathematics and numeracy learning.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

TEAC 7041 Effective Working Relationships

Credit Points 10

Legacy Code 102146

Coordinator Kerry Staples ([https://directory.westernsydney.edu.au/search/name/Kerry Staples/](https://directory.westernsydney.edu.au/search/name/Kerry%20Staples/))

Description From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. This unit supports the development of students' knowledge and skills by analysing a range of consultation models; examining the perspectives and needs of families as well as professionals from different discipline

backgrounds; and developing effective interpersonal communication skills, collaborative problem solving, dispute resolution, teamwork and teambuilding. In addition, professionals with advanced knowledge of inclusive education and disability studies may serve as agents of change within their professional setting. The unit explores this role and encourages students to reflect upon how they may enact this ability to advocate inclusive education and facilitate the capacity of others.

School Education

Discipline Teacher Education: Special Education

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1682 Master of Special Education; 1714 Master of Teaching (Secondary); 1720 Master of Inclusive Education; 1721 Graduate Certificate in Inclusive Education or 1911 Master of Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the changing nature of service delivery for individuals with additional needs, and the implications for the way professionals partner, facilitate, consult and lead.
2. Determine the varied and multiple perspectives of key partners (e.g. the individual, families, other professionals).
3. Analyse the efficacy of models of practice and the implication for working relationships and roles.
4. Evaluate key professional and personal skills required in the field.
5. Reflect on personal and professional attributes and skills that may assist or hinder their capacity to partner, facilitate, consult and lead.
6. Create professional goals to develop skills to partner, facilitate, consult and lead.

Subject Content

1. Critique of the changing nature of service delivery and the shifting roles of professionals.
2. Exploration of the multiple roles and vital partnerships experienced by professionals.
3. Perspective-taking for the individual, families and other professionals.
4. Models of practice and ways of working (e.g. team around the child).
5. Review of empirical research that evaluates the impact of partnership models.
6. Analysis of key skills required in the current field (e.g. communication, conflict resolution, case management).
7. Reflection on personal attributes and skills as well as critiquing previous professional experience.
8. Goals for professional and personal growth in relation to partnering, communicating and facilitating.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7043 Engaging Communities

Credit Points 10

Legacy Code 102148

Coordinator Erin Mackenzie ([https://directory.westernsydney.edu.au/search/name/Erin Mackenzie/](https://directory.westernsydney.edu.au/search/name/Erin%20Mackenzie/))

Description From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. Community engagement is variously seen as a strategy for improving educational outcomes, increasing community ownership and/or empowering citizens to take collective action. Although appeals to 'community' often assume a homogeneous ideal, active community engagement needs to respond to a diversity of needs and experiences. This subject begins by exploring the notion of community, its uses and meanings in different discursive and professional contexts. Students will be introduced to theory and praxis aimed at identifying community needs, partnering across diversity and working effectively and inclusively to build community strengths and engagement. The subject's applied learning focus requires students to develop and implement a community engagement strategy for a selected setting.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program, with the exception of those students enrolled in the 8083 Bachelor of Research Studies.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate notions of community and community engagement
2. Audit a community's membership, strengths and assets
3. Analyse community profile data to determine needs
4. Respond to a diversity of community needs and interests
5. Develop a community engagement strategy
6. Evaluate various forms of feedback and develop recommendations to enhance engagement

Subject Content

1. Notions of 'community' - ideals and realities
2. Diversity within and between communities – strengths and tensions
3. Sites and contexts for community engagement
4. Engagement – purpose, process and dilemmas
5. Mapping community
6. Skills and strategies for working with community
7. Critical competencies for cross-cultural engagement
8. Establishing and maintaining effective partnerships
9. Building inclusive communities

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Case Study - Community Mapping & Initial Engagement Strategy	1,500 words	40	N	Individual
Report - Report on Design and Implementation of Community Engagement Strategy	4,000 words	60	N	Individual

Teaching Periods

TEAC 7044 English Linguistics for TESOL

Credit Points 10

Legacy Code 101825

Coordinator Stacey Sherwood ([https://directory.westernsydney.edu.au/search/name/Stacey Sherwood/](https://directory.westernsydney.edu.au/search/name/Stacey%20Sherwood/))

Description This unit provides students with a linguistics background, including English grammar, necessary to excel in English language teaching and assessment. Encompassing the areas of syntax, semantics, morphology, phonology and phonetics, the unit equips students with the technical vocabulary of linguistics and pedagogical grammar as well as the analytical skills necessary to identify and describe both the English language and patterns of performance by second and bilingual language learners. These foundational skills prepare students for success in language teaching, assessment and second language research.

School Humanities & Comm Arts

Discipline English as a Second Language Teaching

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify phonemes, morphemes and syntactic constituents in English and other languages.
2. Describe articulatory configurations required to produce English sounds.
3. Describe English grammar to L2 learners, language researchers, and general audiences.
4. Identify sources of second language comprehension and production difficulties.
5. Demonstrate the relation of linguistic structure and second language developmental patterns.

Subject Content

- Morphology - units of meaning and their combination / The arbitrariness of sound-meaning correspondence / L2 morphological development.
- Phonology - phonemic Categories and allophonic variation / stress and tone in English / sources of L2 pronunciation errors.
- Phonetics - mechanics of speech production / processes involved in L2 perception.
- Syntax - parts of speech / constituent structure / verbal inflection and agreement / pedagogical labels for grammatical Structures / obligatory and optional grammatical constructions
- Semantics/pragmatics - lexical and structural ambiguity / linguistic relativity

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7051 Inclusive Environments

Credit Points 10

Legacy Code 102149

Coordinator William Nketsia ([https://directory.westernsydney.edu.au/search/name/William Nketsia/](https://directory.westernsydney.edu.au/search/name/William%20Nketsia/))

Description Significant reform has occurred over the last three decades with regard to educating individuals with additional needs. This unit explores the history and current position on disability as well as philosophy, policy, legislation, and practice around educating individuals with additional needs internationally. The research literature examining the benefits and barriers to inclusive education will be analysed. Students will develop skills of critical review required to evaluate the research in the field. Lastly, the unit addresses the ways in which educational settings can be designed to be more responsive to learners with additional needs and how students can promote inclusion through organisational change.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1682 Master of Special Education; 1714 Master of Teaching (Secondary); 1720 Master of Inclusive Education; 1721 Graduate Certificate in Inclusive Education; 1723 Master of Education (Social Ecology); 1726 Master of Education (Leadership) or 1911 Master of Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically reflect upon social change in relation to the learning and teaching of learners with additional needs.
2. Apply current inclusive education research, legislation, educational policies, Work Health & Safety and risk assessment within educational settings.
3. Critically analyse the barriers to, and benefits of inclusion from the perspective of multiple stakeholders.
4. Critically analyse the ways in which educational settings can be designed to be more inclusive of learners with additional needs.
5. Differentiate curricula and adapt environments to promote authentic learning for all individuals in the setting.
6. Implement learning as a social process determined by particular values and ideologies.
7. Reflect on personal and professional values, practices, and skills to effect positive change in learning environments.
8. Examine and apply action research methodology to improve the strategies, practices and knowledge of inclusive environments.

Subject Content

- historical, current and future perspective on Advocacy, social change, terminology, attitudes
- Legislation and policies including a worldwide perspective (e.g. NSW anti-discrimination, DDA, Standards, WHS, Every Student, Every School, Early Years Learning Framework, National Partnerships)
- introduction of Models and concepts of adjustments and accommodations: e.g. M2ECCA, Loreman's Seven Pillars, UDL, Bronfenbrenner's ecological model
- role of personnel and stake holders overtime
- Benefits and barriers: labelling, language and disability e.g. barriers, attitudes, collaboration, support ? evidence based and empirical studies
- identifying and Critiquing school/organisational climate and how it supports inclusion, or otherwise.

- reflection on role and capacity to act as agents of social change within The context of The organisation and learning environments.
- action research methodology

Teaching Periods

TEAC 7057 Introduction to Pedagogical Leadership

Credit Points 10

Legacy Code 101899

Coordinator Joanne Orlando ([https://directory.westernsydney.edu.au/search/name/Joanne Orlando/](https://directory.westernsydney.edu.au/search/name/Joanne%20Orlando/))

Description From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. Early childhood educators have a significant role in providing the pedagogical leadership required to deliver quality early childhood services for children and families. This subject introduces the concept of pedagogical leadership which is then explored further in other subjects in this program. In this subject students examine a range of theoretical perspectives and approaches to curriculum and analyse the ways different theories and approaches shape pedagogical practices. Students will have opportunities to research contemporary theories of early childhood education, reflect on their own beliefs and values, refine their personal philosophy of teaching and learning, and consider the implications for their future role as pedagogical leaders.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) Students enrolled in 1708 Bachelor of Arts (Pathway to Teaching Birth - 5/Birth - 12) or 6017 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Birth-5/Birth-12) must have successfully completed 160 credit points

Restrictions

Students must be enrolled in 1708 Bachelor of Arts (Pathway to Teaching Birth - 5/Birth - 12) or 1783 Master of Teaching (Birth-5 Years/ Birth-12 Years) or 6017 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Birth-5/Birth-12).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate and theorise the role of the contemporary pedagogical leader in the provision of quality early childhood programs.

- Analyse and synthesise a range of historical and contemporary theoretical perspectives on early childhood education.
- Articulate the research and theoretical underpinnings of current Australian legislative frameworks and policy in early childhood education.
- Critique the influence of different contexts on curriculum and explore a range of curriculum approaches and pedagogies including those that incorporate science and technology and nature pedagogies.
- Use skills of reflective practice to identify and examine personal values and beliefs and consider the implications for professional and ethical practice.
- Communicate a personal philosophy of learning and teaching that draws on contemporary theories and research.
- Critique a range of perspectives on “school readiness” and approaches to transition to school and the implications for programs for four and five year olds.
- Explain the continuum of children’s learning from home and prior to school settings and the early years of school and the implications for practice.

Subject Content

- Theoretical perspectives on early childhood education – e.g. developmentalism, ecological theory, sociocultural theory, postmodernism, poststructuralism, sociology of childhood – including approaches relevant to science and technology teaching and learning, and reconceptualising early childhood.
- Current research on approaches to curriculum and pedagogy – e.g. play-based learning and pedagogy, intentional teaching, sustained shared thinking, reflective practice, pedagogical documentation, collaborative partnerships, funds of knowledge, nature pedagogies and implications for practice.
- Legislative frameworks and policies, e.g. DEEWR National Quality Standards, Early Years Learning Framework, and the role of the early childhood educator as a pedagogical leader.
- Processes of evaluation and critical reflection, tools for reflection, reflective practice.
- Developing a philosophy of education that draws on critical reading, research and reflection
- Continuity of learning and transitions for children.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7061 Leadership and Management

Credit Points 10

Legacy Code 102108

Coordinator Denise Fraser (<https://directory.westernsydney.edu.au/search/name/Denise Fraser/>)

Description From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. In this unit students critically review the ethical, legal and professional accountabilities of early childhood teaching within a complex socio-political context. The conceptual frames of pedagogical and community leadership afford the opportunity to interrogate discourses associated with advocacy, leadership and management across a range of settings. Students will explore dimensions of effective leadership and management practices and consider the efficacy of new and emerging policies and resources in the field.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7073 Managing Child and Family Services

Restrictions

Students must be enrolled in 1691 Master of Teaching (Birth-5 Years/ Birth-12 Years), 1670 Bachelor of Education (Birth ? 5 Years) or 1783 Master of Teaching (Birth-5 Years/Birth-12 Years). Note:). Students must have completed 40 credit points in 1783 Master of Teaching (Birth ? 5 Years) or 80 credit points in 1670 Bachelor of Education (Birth ? 5 Years).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the roles, functions and accountabilities of leaders and managers in early childhood contexts.
2. Explain theories of management and leadership and their application in early childhood contexts.
3. Analyse the legal, professional and ethical dimensions of management practice in early childhood contexts.
4. Analyse the influence of management and leadership on quality outcomes in early childhood contexts.
5. Discuss strategies for the development and maintenance of effective administration, teamwork, staff management and professional development in early childhood contexts.
6. Examine strategies to support the development of partnerships with families and communities and advocacy for children, families and the early childhood field.

Subject Content

1. Legal and professional frameworks affecting teachers
2. Theories of leadership and management
3. The role of the early childhood manager/ leader
4. Administration of early childhood settings
5. Staff management and development
6. Advocacy as a professional responsibility in early childhood professional practice
7. Ethical dimensions of leadership and management

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Essay	2,000 words	50	N	Individual
Report	2,000 words	50	N	Individual

TEAC 7063 Leadership, Mentoring and Professional Growth

Credit Points 10

Legacy Code 100701

Coordinator Anne Power ([https://directory.westernsydney.edu.au/search/name/Anne Power/](https://directory.westernsydney.edu.au/search/name/Anne%20Power/))

Description Becoming a professional is a complex and intricate process. Beyond adequate initial training (both theoretical and the implementation of theory into practice) it takes a commitment and undertaking to career-long learning and professional development. Such commitment and undertaking need not be an isolated process. Educational leaders are available to assist in the promotion of professional development. This unit provides leaders with the understandings and strategies for implementing mentoring and professional development programs.

School Education

Discipline Teacher Education

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. critically review current research on teaching, mentoring and promoting the professional development of teachers, student teachers or other educational professionals;
2. use formative evaluation models as a basis for promoting professional growth;
3. analyse in verbal and written form one particular model of professional development;
4. critically evaluate one of various models of professional development leading to the application of such knowledge to the design and implementation of a program of professional development for teachers, student teachers or other educational professionals and,
5. critically reflect on the implementation of the trialled model of professional development.

Subject Content

1. Definition, principles and practices of promoting professional growth
2. Principles and practices to promote adult learning
3. The leaders role in professional development
4. Effective teaching
5. Promoting professional growth of teachers at different career stages
 - student teachers
 - beginning teachers
 - experienced teachers
6. Introduction to the common elements of effective professional development and mentoring
 - establishing relationships: knowing your student teacher/ teacher
 - formative evaluation for needs assessment
 - effective communication and active listening
 - sharing knowledge, collaborative planning
 - observing and being observed (modelling)
 - feedback, coaching and coaching plans
 - encouraging reflection
 - assessment and Reporting
7. Alternative models for promoting professional growth (for example...)

- action research and case Study writing
 - clinical supervision and its modifications (eg. Developmental Instructional Supervision, developmental supervision, Garman (1990) model of clinical supervision)
 - internships
 - Joyce and Showers' theory, practice, demonstrate, practice, feedback and follow-up model
 - national Schools Network protocols
 - peer coaching
 - professional practice/ development Schools
 - schools as learning communities,
 - school improvement and renewal
 - school-university partnerships
 - performance appraisal
8. Ethics and supervisor/leader professional development

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Vodcast seminar presentation and review of literature	8 minutes presentation, 1000 words review	50	N	Individual
Report on design and evaluation of program of teacher professional growth	2500 words	50	N	Individual

TEAC 7065 Leading Mathematics in the Primary School

Credit Points 10

Legacy Code 102323

Coordinator Peter Mcdonald ([https://directory.westernsydney.edu.au/search/name/Peter Mcdonald/](https://directory.westernsydney.edu.au/search/name/Peter%20Mcdonald/))

Description This unit provides an in-depth exploration of the required mathematics knowledge for primary teaching and for leading other teachers in their professional learning. Students will explore and further develop their pedagogical content knowledge, applying it to the primary mathematics curriculum. They will develop a deep understanding of specific mathematical content, the ways in which children learn that content and appropriate, research based pedagogies.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1830 Graduate Certificate in Primary Mathematics Education; 1847 Master of Teaching (Secondary) STEM or 1911 Master of Education.

Assumed Knowledge

Students must have either completed all core mathematics subjects of the MTeach (Primary) program at Western Sydney University, or be a fully qualified primary teacher.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the essential components of pedagogical content knowledge as it relates to the teaching of primary mathematics
2. Examine learning theory relating to primary mathematics
3. Apply mathematical ideas to the Pedagogical Content Knowledge domains map for mathematical knowledge for teaching
4. Demonstrate pedagogical content knowledge across the primary mathematics curriculum by aligning specific mathematical concepts to curriculum, content and pedagogical practices
5. Formulate a whole-school approach to teaching mathematics
6. Design professional learning resources based on specific mathematical concepts or ideas

Subject Content

1. Knowledge for mathematics education leadership
2. Pedagogical Content Knowledge domains for primary mathematics teachers
3. Effective pedagogy in mathematics
4. Programming and planning across the primary school
5. Understanding and addressing mathematics anxiety
6. Beliefs and identity in mathematics
7. Leading change in mathematic pedagogy
8. Effective strategies for in situ professional development and mathematics

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Essay	3,000 words	50	N	Individual
Presentation	Presentation (20 minute) with accompanying resource (1,000 words)	50	N	Individual

TEAC 7067 Leading Science in the Primary School

Credit Points 10

Legacy Code 102487

Coordinator Karina Mckoy ([https://directory.westernsydney.edu.au/search/name/Karina Mckoy/](https://directory.westernsydney.edu.au/search/name/Karina%20Mckoy/))

Description The purpose of this unit is for students to engage in leadership practices and theory associated with an expert primary science teacher. Students will evaluate curriculum resources and consider strategies for integrating science with other disciplines in primary teaching contexts. Students will develop their capacity for leading science professional learning experiences and innovation to other educators.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1845 Graduate Certificate in Primary Science Education.

Assumed Knowledge

A basic understanding of planning units of work, features of positive classroom environments, and outcomes of the primary science syllabus is desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Evaluate a set of curriculum resources for primary science education and its use in an authentic teaching context
- Justify the integration of science outcomes across the curriculum
- Analyse strategies for engaging the local community with implementation of the primary science curriculum
- Defend how you have developed pedagogical content knowledge and leadership skills for teaching a selected primary science topic
- Propose how action research can be used to develop professional knowledge of primary science teachers
- Design a professional development session that supports colleagues in primary science with developing knowledge and skills for teaching a selected primary science topic
- Articulate future professional development opportunities in primary science education

Subject Content

- Evaluating curriculum resources for primary science
- Integrating science with other disciplines
- Developing professional knowledge and leadership skills for teaching primary science
- Action research in primary science
- Leading science professional learning experiences
- Engaging the community in primary science

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Critical Review	2,000 words	50	N	Individual
Presentation Report	20 minutes	30	N	Group
	1,000 words	20	N	Individual

Teaching Periods

TEAC 7068 Learning and Teaching in Challenging Contexts

Credit Points 10

Legacy Code 102158

Coordinator Katina Zammit ([https://directory.westernsydney.edu.au/search/name/Katina Zammit/](https://directory.westernsydney.edu.au/search/name/Katina%20Zammit/))

Description This subject involves the study of pedagogy in contexts regarded as 'challenging'. The main focus will usually be on the contexts of school and early childhood, but alternative sites of education will also be studied as appropriate. The definition of a challenging context will be considered with an emphasis on contexts of poverty. Students will undertake a critical analysis of policies and practices that impact and respond to challenging contexts. The subject is structured around the investigation of dilemmas and specific provocations, and explores engaging pedagogies for education.

School Education

Discipline Teacher Education

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program, with the exception of those students enrolled in 8083 Bachelor of Research Studies.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Audit areas of challenge in an educational context
2. Locate 'challenge' within the larger context of global educational policy and 'policy travel'
3. Analyse the notion of pedagogical / institutional effectiveness
4. Critically analyse policy and discourse around 'challenge' in contemporary educational contexts
5. Critically analyse responses to policy around challenge in contemporary educational contexts
6. Apply key theoretical perspectives in analysis of challenge and responses to challenge

Subject Content

1. What are challenging contexts in contemporary education?
2. What dilemmas can arise from challenging contexts at the classroom and institutional levels?
3. Is education a way out of poverty?
4. How do/can systems respond to challenging contexts?
5. What are the key features of effective pedagogies for challenging contexts?
6. What is the role of policy instruments such as 'data' in contemporary education, especially in challenging contexts?
7. What are the roles of expectations and aspirations in contemporary education in challenging contexts?
8. How can educational sites/pedagogies be engines of change?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
An audit and detailed analysis of a 'challenging' educational context	20 minutes+ 10 minutes of questions and discussion	50	N	Group
Critical analysis of a pedagogical or institutional or systemic intervention in a challenging context	2,000 words	50	N	Individual

Teaching Periods

TEAC 7071 Literacy in the Early Years

Credit Points 10

Legacy Code 101803

Coordinator Janene Rox ([https://directory.westernsydney.edu.au/search/name/Janene Rox/](https://directory.westernsydney.edu.au/search/name/Janene%20Rox/))

Description From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. In this subject students investigate processes of speaking, listening, reading, writing, viewing and representing and creative and critical thinking across the prior to school and primary school years. The subject includes a focus on strategies for supporting emergent literacy and for teaching beginning readers, including strategies for working with children who are learning Standard Australian English as an additional language or dialect. There is a strong focus on the role of the educator in assessing children's language and literacy learning and planning experiences and lessons that extend learning.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) TEAC 7030

Equivalent Subjects LGYA 1112 - Literacy 0-8

Restrictions

Students must be enrolled in 1691 Master of Teaching (Birth-5 Years/ Birth-12 Years) or 1783 Master of Teaching (Birth-5 Years/Birth-12 Years)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a sound knowledge of language development as it occurs from birth, with consideration of cultural, developmental and linguistic differences.
2. Explain the processes of speaking, listening, reading, writing and representing and the role of the educator in extending children's language and literacy learning.
3. Demonstrate a sound understanding of first and second language learning and effective strategies for supporting children who are learning English as an additional language.
4. Demonstrate a sound knowledge of Aboriginal English and effective strategies for supporting children learning Standard Australian English as an additional dialect.
5. Explain the key processes in learning to read, i.e., phonological and phonemic awareness, letter/sound relationships, concepts of print, semantic and syntactical cues, the four literacy resources, contextual information and wide reading.

- Implement effective teaching strategies that support children's early reading and writing.
- Assess children's language and literacy using the Early Years Learning Framework, NSW Board of Studies syllabus documents and the Continuum of the Critical Aspects of Early Literacy and set appropriate learning goals.
- Plan, implement and evaluate culturally responsive and innovative play-based learning centres and projects that utilise a range of paper-based and digital resources and everyday texts to extend children's literacy learning.
- Implement effective teaching strategies that support children's early literacy.

Subject Content

- Language development
- Processes of speaking, listening, reading, viewing and representing and creative and critical thinking
- Second language learning processes and teaching strategies
- Aboriginal English and strategies for children learning Standard Australian English as an additional dialect
- Pedagogy of reading – balanced approach including phonemic awareness, phonics, concepts of print, semantic and syntactic cues, the four literacy resources model
- Teaching beginning readers
- Guided, modelled and independent reading strategies
- Assessment of children's language and literacy learning and useful tools to support assessment – e.g. Early Years Learning Framework learning outcomes, English K-10 – NSW Syllabus for the Australian Curriculum and The Continuum of the Critical Aspects of Early Literacy Development
- Planning and evaluating literacy experiences and lessons

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7072 Managing Challenging and Diverse Behaviour

Credit Points 10

Legacy Code 102151

Coordinator Christine Grima-Farrell ([https://directory.westernsydney.edu.au/search/name/Christine Grima-Farrell/](https://directory.westernsydney.edu.au/search/name/Christine%20Grima-Farrell/))

Description This unit provides professionals with the skills to successfully and systemically manage challenging behaviours exhibited by individuals in classrooms, early childhood, or other educational settings. This unit will focus on managing critical features of the environment to encourage positive behaviours and prevent challenging behaviours from occurring. Intervention strategies are also developed to address significant negative behavioural challenges when preventative measures are ineffective. Professionals will develop competencies in identifying and analysing problem behaviours and designing suitable management plans. Such skills will be helpful to either professionals working directly with individuals with additional needs, or as consultants supporting those who provide direct support to individuals with challenging and diverse behaviours.

School Education

Discipline Teacher Education: Special Education

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7014 - Behaviour Management

Restrictions

Students must be enrolled in 1682 Master of Special Education; 1720 Master of Inclusive Education; 1721 Graduate Certificate in Inclusive Education or 1911 Master of Education.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Analyse behaviours in terms of function and motivating factors, reinforcement and educational curriculum and learning environment;
- Make appropriate decisions in managing challenging behaviour and altering environments within the system of educational settings;
- Examine theoretical assumptions of school-wide and classroom management systems;
- Analyse behaviour interventions in the context of theoretical approaches, ethics, legislation, and the rights of the individual;
- Create positive behavioural systemic support for individuals with challenging behaviours;
- Adequately describe, monitor and track behaviour;
- Communicate effectively with key stakeholders to enhance positive behaviours for individuals and initiate change in the learning environment.

Subject Content

- Tiers of prevention and intervention approaches and their application;
- Ethical and legal conduct when working with young children, students and adults with challenging and diverse behaviours;
- Assessment of behaviour using a range of strategies;

- Developing an individual learning support plan to address challenging and diverse behaviours;
- Models for understanding behaviour and developing programs using a systems approach;
- Addressing challenging and diverse behaviours through curriculum and whole-setting/classroom management;
- Managing challenging and diverse behaviours, promoting positive behaviour systems reducing challenging behaviours;
- Analysis of behaviour in an educational setting with reference to classroom and early childhood curricula;
- Guiding others to identify and manage challenging and diverse behaviour.

Special Requirements

Legislative pre-requisites

Students are required to complete a Working with Children Check leading to the issuance of a clearance number.

Students will need to:

- Access the NSW Office of the Children's Guardian website and complete an online application form to generate an application number.
- Present an application number and identification to a NSW Motor Registry or Government Access Centre prior to issuance by mail of a Working with Children Check number.
- Email the letter with a valid Working With Children Check number to enrolments@westernsydney.edu.au (<https://hbook.westernsydney.edu.au/subject-details/teac7072/Students> are required to complete a Working with Children Check leading to the issuance of a clearance number. Students will need to: i. Access the NSW Office of the Children's Guardian website and complete an online application form to generate an application number. ii. Present an application number and identification to a NSW Motor Registry or Government Access Centre prior to issuance by mail of a Working with Children Check number. iii. Email the letter with a valid Working With Children Check number to enrolments@westernsydney.edu.au. Where students already have a current Working with Children Check evidence of this must be submitted as above.html).

Teaching Periods

TEAC 7074 Mathematics for Contemporary Learners

Credit Points 10

Legacy Code 102321

Coordinator Peter McDonald ([https://directory.westernsydney.edu.au/search/name/Peter McDonald/](https://directory.westernsydney.edu.au/search/name/Peter%20McDonald/))

Description In this unit students will explore issues relating to the teaching and learning of mathematics in the contemporary primary classroom. These issues will include promoting positive dispositions of learners, engaging pedagogies and developing creative and critical thinking for critical numeracy. Students will explore theory relating to the integration of information and communication technologies in the mathematics classroom including the development of teachers' Technological Pedagogical Content Knowledge (TPACK).

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1809 Graduate Certificate in Primary Mathematics or 1830 Graduate Certificate in Primary Mathematics Education or 1911 Master of Education

Assumed Knowledge

Students must have either completed all core mathematics subjects of the 1781 Master of Teaching (Primary) program at Western Sydney University, or be an accredited primary teacher.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the importance of promoting positive dispositions towards mathematics amongst teachers and students
2. Locate a range of mathematical pedagogical practices to engage primary students with mathematics
3. Demonstrate how the use of rich tasks can promote critical and creative thinking in the primary mathematics classroom
4. Apply the Substitution, Augmentation, Modification and Redefinition (SAMR) model of technology integration to a range of technology-based mathematics activities
5. Analyse a range of digital resources in relation to their ability to enhance the understanding of mathematical concepts
6. Assess a range of digital resources in relation to their alignment with the NSW K-10 Mathematics Syllabus

Subject Content

1. Issues relating to disposition towards mathematics
2. Engaging teachers and students with mathematics
3. Critical and creative thinking in the mathematics classroom
4. Developing students' critical numeracy
5. Exploring the Technological Pedagogical Content Knowledge (TPACK) framework
6. Supporting the integration of technology into primary mathematics teaching and learning

Assessment

TEAC 7076 Multicultural Nonverbal Communication

Credit Points 10

Legacy Code 102283

Coordinator Ping Yang ([https://directory.westernsydney.edu.au/search/name/Ping Yang/](https://directory.westernsydney.edu.au/search/name/Ping%20Yang/))

Description This unit introduces students to the interdisciplinary fields of linguistics, communication and cultural semiotics. It builds links between these areas of studies and beyond, which provide students with knowledge of how human beings use nonverbal communication systems and channels to achieve effective communication in intercultural and multicultural contexts. This unit covers three key perspectives, including paralinguistics, proxemics and kinesics. Authentic audio and visual materials are used to facilitate students' awareness of the multidimensional process in which people communicate verbally and nonverbally simultaneously. It also helps enhance their sensitivity when they interact with people from diverse linguistic and cultural backgrounds.

School Humanities & Comm Arts

Discipline English as a Second Language Teaching

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate understanding of three major areas (paralinguistics, proxemics and kinesics) in nonverbal communication;
2. Interpret connotative meaning conveyed nonverbally in a range of contexts;
3. Identify various functions performed and roles played via nonverbal channel;

4. Demonstrate awareness of social and cultural codes embedded in body language;
5. Use ELAN to transcribe and code audio and video data, particularly nonverbal information;
6. Demonstrate cross-cultural sensitivity and understanding of cross-cultural differences in nonverbal communication;
7. Use nonverbal communication effectively across languages and cultures.

Subject Content

- Paralinguistic aspects of nonverbal communication, e.g. articulation, tone, volume, pitch, rate, duration, quality, regularity as in music, pause and silence as in casual conversation, and their in-context meaning
- Proxemic dimensions, including space (intimate, personal and public), territory (self and others), power distance (High and low) and time (punctuality and zones)
- Kinesic perspectives, such as gestures (head, hand, finger) facial expressions (anger, disgust, happiness, sadness, smile), eye contact, body movement (bodily contact, posture and pose as in dancing) and artefacts (clothing, colours, shape, size, ornaments with reference to Religions and cultural practices)
- audio and video data transcription and analysis using ELAN (A linguistic annotator for creating complex annotations on video and audio data) and Adobe Premiere Pro CS5
- communication functions, e.g. providing information, regulating interaction, expressing emotions, allowing meta-communication, controlling social situation, and forming and managing impressions
- body language and cultural differences, applauding, smiling, eye contact, head shaking, hand touch, shoulder shrug, head nodding and shaking, hand shake and cheek kissing, etc.
- Applications of nonverbal communication in health care (doctor-patient interaction), legal setting (interpreters' body language in court), political communication (high-profile politicians' body language in public address and debate), business negotiat

Assessment

Legacy Code 102082

Coordinator Patricia Maidens ([https://directory.westernsydney.edu.au/search/name/Patricia Maidens/](https://directory.westernsydney.edu.au/search/name/Patricia%20Maidens/))

Description From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. This subject is designed to promote the application and integration of current psychological and educational theory, evidence and best practice in creating positive learning environments for the purposes of learning, behaviour and wellbeing. A problem-based approach to learning and teaching is used employing case-based vignettes depicting various specific school-based behaviour management challenges. The subject is delivered by providing students with an unfamiliar problem, situation or task related to promoting students learning, positive behaviour and wellbeing. Students are required to determine for themselves how they will go about solving the problem. This occurs through small group work and self-directed research in which students are encouraged to utilise their prior knowledge in the topic area and identify the gaps in their knowledge as they attempt to solve the problem whilst being supported by their tutor and peers.

School Education

Discipline Teacher Education: Secondary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) TEAC 7004

Equivalent Subjects TEAC 7086 - Positive Learning Environments TEAC 7113 - Psychology for Teaching

Restrictions

Students must be enrolled in 1714 Master of Teaching (Secondary)

Assumed Knowledge

An understanding of Adolescent Development.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Analyse and resolve complex real-world problems in relation to learning, behaviour and social and wellbeing management including how culturally and linguistically diverse communities' philosophies and beliefs about learning and behaviour can affect teaching practice.
- Locate, evaluate and model the use of specific strategies and resources to support students' behaviour and well-being.
- Explain ethical and legislative responsibilities, including Work Health and Safety, and risk management legislation, for responding positively to challenging secondary student behaviour, including students with significant behavioural difficulties such as violent behaviour.
- Evaluate personal beliefs, values and teaching practices in light of theory, applied learning and research evidence relating to effective behaviour management practices.
- Articulate the importance of teaching social and emotional skills, both alongside and embedded within substantive curriculum content at the secondary level.
- Use self-reflective teaching practices, alongside relevant empirical findings and theory, when applying preventative and restorative pedagogies so as to prioritise secondary student wellbeing and promote individual and whole-class learning outcomes.
- Link theories of classroom learning and behaviour to practical assessment of individual secondary students' needs.

Subject Content

- What is Problem Based Learning (PBL)? How does this approach work?
- What is contemporary classroom management?
- What causes secondary students to become disengaged from their learning?
- What strategies, systems and pedagogy can teachers use to promote sustainable culturally and linguistically informed student engagement, positive behaviour and wellbeing in schools?
- How can we assess the social and emotional wellbeing needs of secondary students?
- How do teachers individualise approaches to learning, positive behaviour & wellbeing management?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Report	2,000 words	50	N	Individual
Reflection	Part A: 15 minutes; Part B: 1,000 words	50	N	Both (Individual & Group)

Coordinator Tessa McGavock ([https://directory.westernsydney.edu.au/search/name/Tessa McGavock/](https://directory.westernsydney.edu.au/search/name/Tessa%20McGavock/))

Description From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. This unit will provide students with the opportunity to explore key concepts of learning and teaching in the curriculum areas of social studies, history, geography, place studies, civics and citizenship, economics, sustainability and environmental education and Aboriginal and Torres Strait Islander studies in early childhood and primary education. The unit will encourage pre-service educators to develop their philosophy and practice of teaching and learning, particularly within the contexts of a rapidly changing and dynamic human global culture that has significant cultural, historical, social and environmental dimensions. The unit will cover a broad, complex and engaging field of study reflecting that people are social beings who interact with one another and with the natural and social environments through and over time. Aboriginal and Torres Strait Islander perspectives, socio-cultural influences and place-based pedagogies will be investigated, and relevant policy and regulation documents around risk, play and pedagogy will be examined.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1783 Master of Teaching (Birth-5 Years/ Birth-12 Years) or 1784 Master of Teaching (Birth-5 Years/Birth-12 Years).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the central concepts, modes of enquiry and a range of strategies for teaching history, geography, civics and citizenship, economics and business, social and environment education and their relevance for early childhood and primary school settings.
2. Investigate and develop critical skills of inquiry, advocacy and leadership around local and global policies that respect and value people and their cultural identity (especially children and marginal groups within society) their rights and responsibilities and the importance of sustainability and the future planet.
3. Design curriculum and assessment, engaging and embedding it within family and community contexts and drawing on theories of place and place pedagogies, Aboriginal and Torres Strait Islander histories and contemporary perspectives on culture, diversity and inclusion.
4. Reflect critically on theory and practice across the key fields of study and consider ways to incorporate theoretical frameworks to inform their professional identity and philosophies and how they come to understand their own place in the world.
5. Describe the critical role of research in developing their own professional knowledge and the knowledge of their students and community.

6. Apply research findings and propositions around place, people and pedagogy within their educational settings.

Subject Content

1. Theory and practice across the key field of study including ways to incorporate theoretical frameworks to inform personal professional philosophies and coming to understand their own place in the world
2. Knowledge of students and community and application of research resulting in findings and propositions around place, people and pedagogy within their educational settings
3. Critical skills of inquiry, advocacy and leadership around local and global policies that respect and value people and their cultural identity (especially children and other marginal groups within society) their rights and responsibilities, and the importance of sustainability and the future of the planet.
4. Concepts, modes of enquiry and a range of strategies for teaching history, geography, civics and citizenship, economics and business, social and environmental education and their relevance for early childhood and primary school settings
5. Approaches and strategies for designing and implementing curriculum and assessment, engaging and embedding it within family and community contexts drawing on theories of and research in place and place pedagogies, Aboriginal and Torres Strait Islander histories and contemporary perspectives on culture, diversity and inclusion.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Teaching Periods

TEAC 7084 Person-Centred Practice

Credit Points 10

Legacy Code 102166

Coordinator Christine Johnston ([https://directory.westernsydney.edu.au/search/name/Christine Johnston/](https://directory.westernsydney.edu.au/search/name/Christine%20Johnston/))

Description The shift in educational policy and legislation to one of inclusion has been accompanied by a move to models of service delivery which are person- and family-centred and which also recognise the need for tiers in intervention. Whilst the range of service delivery models currently operating across educational and community settings for varied levels of need and developmental stages will be explored and evaluated, emphasis will be given to person-centred practice. Through an analysis of the literature encompassing both evidence-based practice and practice-based evidence students will evaluate the implications of the model for individuals, families, teachers, other professionals, schools, services, their own practice and for systems practice.

School Education**Discipline** Teacher Education: Special Education**Student Contribution Band** HECS Band 1 10cp**Level** Postgraduate Coursework Level 7 subject**Restrictions**

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Professionals with teaching or other relevant qualifications.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique the range of service delivery models through an analysis of the research literature;
2. Apply the underlying philosophies of person-centred and family-centred practice to their own work with individuals with disabilities;
3. Determine the impact of the context in which they work to the implementation of person-centred practice;
4. Apply understandings of the issues arising at times of transition for individuals with disabilities and their families and work collaboratively and systemically to achieve smooth transitions within and between services;
5. Evaluate the effectiveness of specific programs for individuals and families under the framework of person-centred and family-centred practice.
6. Develop, implement and evaluate person-centred programs.

Subject Content

1. Historical review of approaches to designing and delivering educational and intervention programs across the lifespan;
2. The philosophy of empowerment: policy and practice;
3. Models of service delivery: Family-centred practice; person-centred practice; team around the child; multi-disciplinary, interdisciplinary, transdisciplinary and systems models;
4. The impact of context on service delivery: the ecology of service provision;
5. Evidence-based practice and practice-based evidence for the efficacy of person-centred and family-centred practice;
6. Person-centred practice in educational settings and the implications for individualised learning and teaching;
7. The challenge of transition between service models;
8. The role of the family and carers in person-centred models;
9. The role of the teacher and other professionals in developing and implementing person-centred models;
10. Brokerage models and the implications for the maintenance of professional expertise.

TEAC 7087 Practising Pedagogical Leadership

Credit Points 10**Legacy Code** 102107**Coordinator** Jennifer Green ([https://directory.westernsydney.edu.au/search/name/Jennifer Green/](https://directory.westernsydney.edu.au/search/name/Jennifer%20Green/))

Description Practising Pedagogical Leadership is a capstone subject for students in the Master of Teaching (Birth – 5 Years) and is undertaken in the same semester as Professional Experience 3-5 Years. In this subject students apply the principles, practices and outcomes of Belonging, Being and Becoming: The Early Years Learning Framework for Australia and understandings of curriculum and pedagogy from other Master of Teaching subjects to design and implement interest-based projects and integrated curriculum. The focus is on curriculum that connects to children's social worlds and facilitates children's in-depth investigations, creativity and critical thinking. Students will also develop their research skills by engaging in research into their own teaching practices.

School Education**Discipline** Teacher Education: Early Childhood**Student Contribution Band** HECS Band 1 10cp**Level** Postgraduate Coursework Level 7 subject**Co-requisite(s)** TEAC 7103 OR TEAC 3024**Equivalent Subjects** TEAC 7042 - Engaging Children in Curriculum**Restrictions**

Students must be enrolled in 1691 Master of Teaching (Birth-5 Years/ Birth-12 Years), 1670 Bachelor of Education (Birth - 5 Years) or 1783 Master of Teaching (Birth-5 Years/Birth-12 Years).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate pedagogical leadership in planning meaningful curriculum for children using the principles, practices and learning outcomes of Belonging, Being and Becoming: The Early Years Learning Framework for Australia, understanding of curriculum content and a range of pedagogies
2. Observe, document, assess and plan for children's learning in the areas of mathematics, science and technology, literacy, creative arts, education for sustainability, and human society

- Design integrated interest-based experiences and projects that build on children's family experiences, strengths and interests and facilitate the development of deep knowledge
- Provide a range of media, technologies, tools and everyday resources for children to investigate ideas, explore mathematical and scientific concepts and processes, and to represent their thinking
- Work in partnerships with families to support children's learning
- Reflect critically on issues relating to their own teaching and learning philosophy, ethical practice and pedagogical leadership
- Engage in action research in relation to own teaching practice.

Subject Content

- Early Years Learning Framework principles, practices and learning outcomes and the role of the educator as a pedagogical leader
- Observing, assessing and documenting children's learning and sharing with families
- Planning integrated sequences of learning, integrated units and projects
- Resources for learning - literacy resources, investigative resources, creative arts resources
- Partnerships with families and communities to provide authentic contextually responsive experiences that extend learning
- Action research and practitioner research principles and practices

Special Requirements

Legislative pre-requisites

1. Students are required to complete the Working with Children Check (WWCC) process leading to the issuance of a clearance number under the category of volunteer. Students will need to:

- Access the Commission for Children and Young People website and complete an online application form to generate an application number.
- Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.
- Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is recorded as a Special Requirement on your academic record.

WesternNow Student Portal link (https://wsu.service-now.com/student/?id=sc_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed)

2. Students must complete the **two** components of the NSW Department of Education's Child Protection Awareness Training (CPAT).

a) Students will need to:

- Access the NSW Department of Education's MyPL website <https://mypl.education.nsw.gov.au/>
- Complete the online Child Protection Awareness Training: Induction
- Save certificate of completion
- Submit certificate via WesternNow Student Portal

b) Students will need to:

- Access the NSW Department of Education's MyPL website <https://mypl.education.nsw.gov.au/>
- Complete the Child Protection Awareness Training (CPAT): Annual Update for the calendar year
- Save certificate of completion
- Submit certificate via WesternNow Student Portal

Both certificates will be recorded on your student record as Special Requirements with the end date for the Annual CPAT recorded. The

CPAT: Annual Update will need to be renewed and submitted on an annual basis.

Students who have not completed both components of the Child Protection Awareness Training will need to withdraw from the subject.

3. Students must complete the ASCIA anaphylaxis e-training and submit their certificate to Submit certificate via WesternNow Student Portal.

4. Students must meet the Inherent Requirements for the Master of Teaching (Birth – 5 Years / Birth -12 Years) (<https://hbook.westernsydney.edu.au/programs/master-teaching-birth-5-years-birth-12-years/>).

Assessment

TEAC 7088 Primary Creative Arts

Credit Points 10

Legacy Code 101585

Coordinator Rachael Jacobs ([https://directory.westernsydney.edu.au/search/name/Rachael Jacobs/](https://directory.westernsydney.edu.au/search/name/Rachael%20Jacobs/))

Description From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. This unit introduces students to pedagogical theory and practices in the four diverse art forms of Dance, Drama, Music, and Visual Arts in the primary classroom. The unit provides practical knowledge, skills and understandings of the importance of all four art forms both as powerful teaching and learning strategies across the primary curriculum and as the creative arts in their own right for pre-service teachers. This unit builds students' capabilities to demonstrate creativity when teaching, empathy with diverse groups of student learners, a commitment to socially just schools and classrooms and an understanding of artistic processes. This unit will give students an understanding of the role of aesthetics, imagination and play in learning.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in the 1781 Master of Teaching (Primary).

Assumed Knowledge

Basic computer literacy skills.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain central concepts in science and technology and understandings of the processes of investigating, designing and making and using technology.
2. Demonstrate research-based knowledge of the pedagogies appropriate for science and technology education in primary schools.
3. Apply appropriate strategies to create a positive environment supporting student effort and learning and to engage students as well as address student needs when implementing learning experiences in science and technology.
4. Implement learning experiences that demonstrate an in-depth knowledge of the NSW Syllabus for the Australian Curriculum: Science K-10 (incorporating Science and Technology K-6), including Aboriginal and Torres Strait Islander perspectives, and a range of pedagogies appropriate for science and technology education in primary schools
5. Demonstrate proficiency and the capacity to use a variety of ICTs (including IWBs, digital cameras/microscopes etc. and a variety of software) in the context of science and technology education.
6. Identify and articulate clear learning goals in preparing learning experiences for science and technology education that are appropriate for the cognitive, social and language abilities of students in primary schools.
7. Plan and implement coherent lessons and lesson sequences that are designed to engage students and improve learning outcomes in science and technology.
8. Utilise knowledge of a range of resources appropriate to science and technology education.
9. Work in a team to investigate, the production of a designed and made artefact and, the presentation of a discussion about the process.

Subject Content

1. Theory, principles and practices related to Dance, Drama, Music, and Visual Arts and in the integration of these art forms.
2. Curriculum concepts, strategies and content in Dance, Drama, Music, and Visual Arts and in the integration of these subjects across the arts and across the curriculum, including Aboriginal and Torres Strait Islander perspectives.
3. Creating, presenting and appreciating in each of the art forms, based on the NSW Creative Arts K-6 syllabus/Australian Arts Curriculum.
4. Effective classroom management and teaching strategies for teaching and learning in the Creative Arts.
5. Planning an integrated creative arts program to include all four art forms, based on relevant literature and pedagogies within a primary classroom.
6. Range of strategies for teaching, reflecting on and assessing in the Creative Arts.
7. Teaching perspectives and protocols related to the teaching of Aboriginal and Torres Strait Islander arts in the primary school
8. Integration of the arts across the curriculum focussing particularly on Literacy
9. Development and sharing of personal practical skills, understandings and knowledge to create personal meaning in and through each of the art forms.
10. Critical reflection on their own learning styles and practices within each of the art forms and how this relates to the classroom.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7089 Primary English and Literacy 1

Credit Points 10

Legacy Code 101579

Coordinator Kathleen Williams ([https://directory.westernsydney.edu.au/search/name/Kathleen Williams/](https://directory.westernsydney.edu.au/search/name/Kathleen%20Williams/))

Description From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. This unit is designed to explore key concepts associated with the teaching of the English Key Learning Area in the K-6 years, set in the broader context of a contemporary new literacies environment. It will examine the processes involved in the teaching of oracy and reading with a focus on traditional print-based literacies and multiliteracies. Students will investigate the teaching and learning of oracy and reading of a range of factual and literary texts, involving every day and specialised knowledge for a range of readers/viewers. Students will be introduced to the use of children's literature and authentic texts for the development of students' reading skills and abilities. Students will develop skills in pedagogy and practice within the area of K-6 English.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1663 or 1781 Master of Teaching (Primary).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and interpret the key processes in learning to read, i.e., phonological and phonemic awareness, letter/sound correspondence, semantic and syntactical understandings, four roles of the reader, contextual information and wider reading theories and processes.
2. Explain the aim, objectives, outcomes and indicators statements, of the NSW Syllabus for the Australian Curriculum: English K-10

syllabus, as they pertain to Early Stage 1 to Stage 4, with particular focus on listening, reading, responding and viewing.

3. Review current children's literature, including Australian literature.
4. Analyse the relationship between reading and writing and L1 and L2 language acquisition.
5. Examine the mechanics of learning to read in the early years.
6. Utilise strategies and concepts involved in reading to learn through the integration of literacy with other KLAs.
7. Identify and interpret the learning needs of diverse learners: English as an Additional Language or Dialect, Aboriginal and Torres Strait Islander learners, refugees, boys, girls, low socio-economic, gifted and talented
8. Explain and apply a range of relevant teaching/ learning experiences and strategies for teaching

Subject Content

1. Introduction to Theories that underpin Speaking & Listening, Reading and Viewing, Thinking Imaginatively and Creatively, Expressing Themselves
2. Introduction NSW Syllabus for the Australian Curriculum: English K-10 syllabus. (Early Stage 1 to Stage 4)
3. Learning to read and reading to learn (practices and processes 1) Beginning Reading
 - Introduction to case study methodology
 - Shared, Guided and Independent Reading Pedagogies
4. Reading (Learning to read and reading to learn practices and processes II)
 - Phonemic Awareness and picture books
 - Assessing Reading: Running records and interest inventories
 - Strategies and Activities
5. Assessing reading:
 - State and National testing e.g. NAPLAN
 - Authentic reading assessment (identifying all students strengths and needs)
 - Reading and Viewing strategies and activities (Focus on learning needs of Aboriginal and Torres Strait Islander students, including specific strategies for English as an Additional Language or Dialect)
 - Reading groups
6. Multimodal development, Responding and Composing, Speaking and listening, Reading and Viewing
 - Second language acquisition: theory and practice models
7. Increasingly complex meaning making: Independent Reading
 - Multiliteracies and new literacies
 - Visual, multimodal and critical literacies
8. Working with independent readers
 - A focus on reading to learn
 - Factual texts, literature circles and poetry
9. Reading across the KLAs
 - Reading for different purposes, critical literacy and independent research
10. Poetry and Readers Theatre
 - Reader identities and academic self-concepts

Assessment

TEAC 7090 Primary English and Literacy 2

Credit Points 10

Legacy Code 101586

Coordinator Lynde Tan ([https://directory.westernsydney.edu.au/search/name/Lynde Tan/](https://directory.westernsydney.edu.au/search/name/Lynde%20Tan/))

Description From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. This unit is designed to provide a comprehensive account of the teaching of spoken, written and multimodal texts in the primary years of schooling. Students gain an understanding of different theories related to producing texts in a range of modes for different purposes. They investigate a range of written and multimodal genres, their textual structures and grammar and learn to apply these in planning and teaching in mainstream, English as an Additional Language or Dialect (EAL/D) and Aboriginal and Torres Strait Islander contexts, gaining a critical awareness of varying pedagogic approaches. Students will develop skills in pedagogy and practice, including next practice,

within English & Literacy for K-6 students. The knowledge and skills developed in the other units of study in the course can be applied in this unit and Professional Practice units.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1663 Master of Teaching (Primary), 1691 Master of Teaching (Birth-12 Years), 1781 Master of Teaching (Primary), 1782 Graduate Diploma in Educational Studies (Primary) or 1783 Master of Teaching (Birth - 5 Years/Birth - 12 Years).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Compare and interpret different theories related to writing and creating of monomodal and multimodal texts.
2. Consider the aims, objectives, outcomes and indicator statements, of the NSW Syllabus for the Australian Curriculum: English K-10 syllabus, as they pertain to Early Stage 1 to Stage 4, with particular focus on composing: speaking, writing and representing.
3. Distinguish the purpose, structure and grammar of a range of literary and factual written and multimodal texts.
4. Examine the metalanguage (grammar) for written, visual and other semiotic modes, such as aspects of grammar at the level of the sentence.
5. Examine strategies for teaching spelling, punctuation and handwriting.
6. Apply knowledge about text and grammar in teaching and assessing childrens writing and representation of ideas.
7. Apply understandings of curriculum design and the use of information and communication technologies (ICT) regarding the teaching of text and grammar in integrated units of work.
8. Evaluate and critique strategies for the teaching of English to diverse learners, focusing on EAL/D and Aboriginal and Torres Strait Islander learners
9. Analyse and critique student assessment data, and apply assessment moderation principles to monitor progress towards meeting learning outcomes and to establish clear and achievable goals for future learning
10. Compare and interpret different theories related to writing and creating of monomodal and multimodal texts.
11. Distinguish the purpose, structure and grammar of a range of literary and factual written and multimodal texts.
12. Examine strategies for teaching spelling, punctuation and handwriting.
13. Apply knowledge about text and grammar in teaching and assessing childrens writing and representation of ideas.
14. Evaluate and critique strat

Subject Content

1. Theories of language acquisition and writing
2. Differences between speech and writing
3. Content of NSW Syllabus for the Australian Curriculum: English K-10 syllabus (Early Stage 1 to Stage 4)
4. The purpose, structure and grammar of a range of literary and factual written and multimodal texts and strategies for teaching children
5. Metalanguage of written and multimodal texts

6. Strategies for teaching spelling, punctuation and handwriting
7. Assessment of children's spoken, written and multimodal texts
8. Planning an integrated approach to literacy teaching and teaching literacy in context of other curriculum areas
9. Strategies for the teaching of English to English as an Additional Language/Dialect and Aboriginal and Torres Strait Islander learners

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Report	2,000 words	50	N	Individual
Professional Task	2,000 words	50	N	Individual

TEAC 7091 Primary Health and Physical Education

Credit Points 10

Legacy Code 102072

Coordinator Jorge Dorfman Knijnik ([https://directory.westernsydney.edu.au/search/name/Jorge Dorfman Knijnik/](https://directory.westernsydney.edu.au/search/name/Jorge%20Dorfman%20Knijnik/))

Description From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. This unit is designed to explore the content and pedagogies of Health and Physical Education (HPE) in the NSW primary curriculum. Students will develop an experiential understanding of the pedagogy of HPE. The knowledge and skills developed in the other units of study in the course can be applied in this unit and Professional Experience units. In this unit students will also continue to develop their research skills. This unit aims to develop teachers who demonstrate empathy with diverse groups of student learners and commitment to socially just schools and classrooms.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7095 - Primary Personal Development Health and Physical Education

Restrictions

Students must be enrolled in 1663 or 1781 Master of Teaching (Primary).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the content and central concepts of the NSW primary curriculum (K-6) components of the Personal Development, Health and Physical Education (PDHPE) K - 10 Syllabus and support documents when designing instruction.
2. Create a program of integrated learning experiences covering all Health and Physical Education strands using a range of relevant pedagogies, assessment and teaching strategies, based on the NSW primary curriculum (K-6) components of the Personal Development, Health and Physical Education (PDHPE) K - 10 Syllabus.
3. Apply teaching strategies that are responsive to a diversity of student needs including differences in cultural and linguistic backgrounds.
4. Identify the role of Health and Physical Education within the broader school curriculum, including the relationship between Health and Physical Education contents and Information and Communications Technology, numeracy and literacy.
5. Identify through critical analysis appropriate teaching and learning resources (print and digital) that can be used to enhance students' understandings of health concepts.
6. Examine the concept of "teacher as researcher" by critically reflecting on views of Health and Physical Education and the body as a social construction.
7. Apply appropriate Health and Physical Education pedagogies to improve learning outcomes for primary education.

>

Subject Content

1. Health and Physical Education Content and pedagogical knowledge.
2. Teaching Games for Understanding (TGfU)/ Game Sense approach for Physical Education.
3. Quality teaching pedagogies and engaging learning experiences that achieve the aims and outcomes of the NSW Board of Studies Health and Physical Education syllabus documents.
4. Organisational management strategies for teaching and learning in Health and Physical Education.
5. Case study narrative and podcasts as components of the self-reflective teacher.
6. Planning and writing effective learning experiences for Health and Physical Education.
7. Student assessment in the key learning area of Health and Physical Education.
8. Using information and communication technologies to design, deliver and evaluate learning experiences/ or improve their own professional skills.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Case Study	2,000 words	50	N	Individual
Presentation	Four 5 minutes' duration podcasts	50	N	Individual
Peer Review	8 hours	S/U	Y	Individual

TEAC 7092 Primary Human Society and its Environment

Credit Points 10

Legacy Code 101582

Coordinator Grant Jones ([https://directory.westernsydney.edu.au/search/name/Grant Jones/](https://directory.westernsydney.edu.au/search/name/Grant%20Jones/))

Description From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. Human Society and Its Environment focuses on History, Geography and three cross-curriculum priority areas in: Aboriginal and Torres Strait Islander histories and cultures; Asia and Australia's engagement with Asia; and Sustainability. As a key learning area in the K-6 curriculum HSIE provides opportunities for students to develop knowledge, understanding and skills in the subject matter, as well as proficiency in teaching inquiry learning approaches. In History, key concepts of changes in family history and local history are explored and Australia's history and understanding Australia as a Nation are explored through the relationships between the individual and the state, and the values and mutual responsibilities, and obligations for civil, political and social participation in Australian society. In Geography, concepts that develop a sense of curiosity about environments, peoples, cultures and place, in both Australia and the world are a priority. The unit emphasises pedagogy and lesson design for high possibility classrooms that specifically address the literacy and technology general capabilities. The unit also focuses on inquiry, place and project based learning which engages diverse groups of learners, develops their understanding about local and global communities, and prepares them to become informed and active citizens who contribute to the quality of Australian society.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) Students enrolled in 1651 Bachelor of Arts (Pathway to Teaching Primary) 1822 Bachelor of Arts (Pathway to Teaching Primary) Dean's Scholars 3756 Bachelor of Science (Pathway to Teaching PrimarySecondary) or 6019 Diploma in Arts Bachelor of Arts (Pathway to Teaching Primary) must have completed 160 credit points before enrolling in this subject

Restrictions

Note that only students enrolled at WSU Online may register in the WSU Online subjects offered at that location.

Students must be enrolled in 1651 Bachelor of Arts (Pathway to Teaching Primary), 1781 Master of Teaching (Primary), 1822 Bachelor of Arts (Pathway to Teaching Primary) Dean's Scholars, 3756 Bachelor

of Science (Pathway to Teaching Primary/Secondary) or 6019 Diploma in Arts/ Bachelor of Arts (Pathway to Teaching Primary).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply knowledge of the disciplines, theories and pedagogies that underpin the learning area of Human Society and its Environment (HSIE) to learning design.
2. Implement the aim, outcomes, stage statements, subject matter, skills, attitudes and values, perspectives and experiences defined in the NSW HSIE K-6 syllabus, and History, and Geography syllabus documents in designing learning experiences for diverse learners in primary classrooms.
3. Design an inquiry and outcome-based unit of work, and whole-school plan that develops a connected set of deep HSIE understandings, and concepts and dispositions of citizenship, and employs pedagogies that promote the development of skills in acquiring information, using inquiry processes and social and civic participation.
4. Design assessment tasks that assess the learning achievements and needs of diverse learners in primary classrooms.
5. Present a personal exploration of HSIE content, and the deep understandings about people, times, places and events related to the Syllabus strands of change and continuity, environments, social systems and structures and cultures.
6. Demonstrate competencies in, teaching with a variety of appropriate resources, including TPACK theory and by integration of information and communication technologies, field visits and site studies.
7. Explain the role and value of HSIE in the broader school curriculum and the relationships with literacy and numeracy.
8. Appreciate the role of an ecological approach to school organisation, events and programs in enhancing HSIE and civics and citizenship.

Subject Content

1. The discipline, epistemological and pedagogical theories that underpin HSIE in terms of History and Geography.
2. The content of HSIE and its expression through the rationale, place of the subject in K-10 syllabus documents, aims, objectives, outcomes, stage statements and organisation of content, including assessment.
3. History including integration of technology and assessment strategies.
4. Geography including integration of technology and assessment strategies.
5. Inquiry Learning approaches and their relationship with methods and processes in History and Geography.
6. Using project-based learning for HSIE in the primary classroom.
7. Civics and Citizenship including digital citizenship.
8. Cross curriculum priority areas including integration of technology and working with local communities.
9. Engaging with, learning from and critiquing innovative practitioners from the field in HSIE classrooms.

TEAC 7093 Primary Mathematics and Numeracy 1

Credit Points 10

Legacy Code 101580

Coordinator Grant Jones ([https://directory.westernsydney.edu.au/search/name/Grant Jones/](https://directory.westernsydney.edu.au/search/name/Grant%20Jones/))

Description The unit will develop students' understandings of children's construction of mathematical and numeracy concepts during the years from Kindergarten to Year 3. Students will develop their ability to assess young children's mathematical understandings and numeracy development, and to provide learning experiences for a diversity of learners, including investigation and the use of digital technologies, to enhance the growth of children's mathematical thinking. The unit will study the NSW K-10 Syllabus in all of its strands, with a particular emphasis on the Working Mathematically strand.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1781 Master of Teaching (Primary)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand ways the beliefs, attitudes, and values held by themselves and their students affect their mathematical learning and teaching.
2. Apply knowledge and understanding of the development of those concepts, skills and processes of mathematics related to the teaching of space, measurement, data, patterns and algebra and number for 5 to 9 year olds in accordance with the current NSW K-10 Syllabus document, Support Documents and ACARA Numeracy Progressions.
3. Apply knowledge and understanding of a range of pedagogies for teaching and learning mathematics, including problem solving and investigation based approaches.
4. Explain the importance of Working Mathematically for primary school mathematics learners and teachers.
5. Identify appropriate assessment strategies to inform the planning of teaching/learning activities that cater for the diverse needs of individual students with an emphasis on programs such as Count Me In Too, Count Me In Too (Indigenous), Targeted Early Numeracy (TEN) and Taking off with Numeracy (TOWN).
6. Apply understandings of the role of mathematics within the broader school curriculum, including the relationship between mathematics, numeracy and literacy.

Subject Content

1. The development and construction of mathematical ideas during the early years of schooling;
2. Recognition of early mathematical thinking that children can bring to school;
3. Early understanding of whole number relationships;

4. Numerical thinking strategies;
5. Early spatial thinking;
6. The development of measurement concepts;
7. Use of problem solving and investigation as an effective pedagogy in the mathematics classroom;
8. Programming and planning for mathematics in the early years;
9. Assessment strategies for the mathematics classroom;
10. Pedagogies that address diversity within the mathematic classroom;
11. Integration of mathematics with other Key Learning Areas;
12. Using programs such as Count Me In Too, TENS, and the ACARA Numeracy Progressions for numeracy teaching and learning; and
13. Children's literature, concrete manipulatives, and digital tools for teaching mathematics and numeracy.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7094 Primary Mathematics and Numeracy 2

Credit Points 10

Legacy Code 101584

Coordinator Maree Skillen ([https://directory.westernsydney.edu.au/search/name/Maree Skillen/](https://directory.westernsydney.edu.au/search/name/Maree%20Skillen/))

Description From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. This unit builds on the unit Primary Mathematics and Numeracy 1 with a focus on learners from Year 3 to Year 6, and assumes students have gained familiarity with the knowledge, skills and understandings children require across all strands of the NSW K-10 Syllabus, including the Working Mathematically components. In this unit students develop their understanding of primary mathematics in the mid to upper primary years, with a strong emphasis on aspects of teaching such as student engagement, assessment, differentiation for diversity and the integration of technology. By engaging with this unit, students will have the opportunity to experience, plan and assess a broad range of practices to enhance student learning outcomes and improve student engagement with mathematics.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) Students enrolled in course 17811663 Master of Teaching (Primary) must have completed the pre-requisite unit TEAC 7093 - Primary Mathematics before enrolling in this unit Students enrolled in course 17831691 Master of Teaching (Birth – 5Birth – 12 Years) must have completed the pre-requisite unit TEAC 7038 - Early Mathematics and Numeracy before enrolling in this unit

Restrictions

Students must be enrolled in one of the following programs, 1663 Master of Teaching (Primary), 1691 Master of Teaching (Birth - 5 Years/ Birth - 12 Years), 1781 Master of Teaching (Primary) or 1783 Master of Teaching (Birth - 5 Years/ Birth - 12 Years)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate knowledge and understanding of the development of the concepts, skills and processes of mathematics related to the teaching of number and algebra, measurement and geometry, and statistics and probability for 8 to 12 year olds in accordance with the NSW K-10 Syllabus for the Australian Curriculum: Mathematics K-10 syllabus (for K-6), and the ACARA Numeracy Progressions.
2. Explain the importance of the Working Mathematically processes for primary school mathematics learners and teachers.
3. Plan effective and engaging teaching and learning experiences for mid to upper primary learners that include the use of a range of digital resources to enhance student outcomes.
4. Apply knowledge and understanding of a range of engaging pedagogies for teaching and learning mathematics, including

cooperative learning, problem solving and investigation based approaches.

5. Evaluate student learning against curriculum requirements by interpreting student work samples, practising consistent and comparable judgements, and explain the importance of timely and appropriate feedback for student learning.
6. Demonstrate knowledge and understanding of teaching and assessment strategies for differentiating teaching and learning experiences in mathematics to meet the specific needs of students across the full range of abilities.

Subject Content

1. Theories of engagement, numeracy development and learning in mathematics for students in the primary years.
2. Implementation of the NSW K-10 Mathematics syllabus across all strands, with particular focus on the Working Mathematically strand.
3. Incorporation of problem solving and investigation-based pedagogies in primary mathematics and numeracy.
4. Strategies to address affective issues relating to the teaching and learning of primary mathematics.
5. Effective use of digital technologies to enhance the teaching and learning of mathematics and improve student engagement.
6. Catering to learners from diverse backgrounds (e.g. cultural and linguistic).
7. Differentiation to address a range of abilities (including special needs and gifted and talented).
8. Investigation of rich tasks to promote critical numeracy.
9. Effective assessment of mathematics and numeracy.
10. Investigation of the requirements of the ACARA Numeracy Progressions.

TEAC 7099 Primary Science & Technology

Credit Points 10

Legacy Code 101583

Coordinator Jessy Abraham ([https://directory.westernsydney.edu.au/search/name/Jessy Abraham/](https://directory.westernsydney.edu.au/search/name/Jessy%20Abraham/))

Description From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. This unit will focus on developing scientific and technological pedagogical content knowledge appropriate for teaching science and technology for students in the K-6 years. It models appropriate pedagogical and pedagogical content knowledge. Students use collaborative social learning situations to develop content knowledge, along with interpersonal and communication skills. The pedagogies modelled will be inclusive and demonstrate how scientific and technological learning experiences can be developed to cater for the needs of the diverse groups of student learners in primary schools. Students learn about engaging science and technology activities that empower primary school students and create futures for students where the capacity to engage with and critically evaluate scientific and technological activity will become increasingly necessary. Students focus on themselves as learners and reflect on the implications of their learning and the learning of others in their future professional practice.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in the 1691 Master of Teaching (Birth-12 Years), 1781 Master of Teaching (Primary), or 1783 Master of Teaching (Birth - 5 Years/Birth - 12 Years).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain central concepts in science and technology and understandings of the processes of investigating, designing and making and using technology.
2. Demonstrate research-based knowledge of the pedagogies appropriate for science and technology education in primary schools.
3. Apply appropriate strategies to create a positive environment supporting student effort and learning and to engage students as well as address student needs when implementing learning experiences in science and technology.
4. Implement learning experiences that demonstrate an in-depth knowledge of the NSW Syllabus for the Australian Curriculum: Science K-10 (incorporating Science and Technology K-6), including

Aboriginal and Torres Strait Islander perspectives, and a range of pedagogies appropriate for science and technology education in primary schools

5. Demonstrate proficiency and the capacity to use a variety of ICTs (including IWBs, digital cameras/microscopes etc. and a variety of software) in the context of science and technology education.
6. Identify and articulate clear learning goals in preparing learning experiences for science and technology education that are appropriate for the cognitive, social and language abilities of students in primary schools.
7. Plan and implement coherent lessons and lesson sequences that are designed to engage students and improve learning outcomes in science and technology.
8. Utilise knowledge of a range of resources appropriate to science and technology education.
9. Reflect on the process of production involving the designing and making of an artefact for a Primary science and technology classroom, and consider how this process has influenced their attitudes towards teaching science and technology.

Subject Content

1. The nature of science and technology as disciplines and the strategies of investigating, designing and making and using technology
2. The nature of Science and Technology K-6 (NSW Syllabus for the Australian Curriculum), its outcomes for Skills: (Working Scientifically, Design and Production), Knowledge and Understanding Strands (Digital Technologies, Physical World, Earth and Space, Living World, Material World).
3. Affective issues in science and technology education gender, culture, attitudes, beliefs etc.; responding to student perceptions and attitudes towards Science and Technology.
4. Problem solving, investigating, designing and making in science and technology.
5. Understandings of concepts and concept development and strategies for developing sound conceptual understandings and skills.
6. The structure, aims and objectives, outcomes and content of the NSW Syllabus for the Australian Curriculum Science K-10, (Science and Technology K-6) Syllabus.
7. Preparing teaching and learning experiences and programming for effective science and technology education.
8. The role of ICTs in science and technology education.
9. Integrating science and technology in other curriculum areas and for integrating other curriculum areas into science and technology.
10. Practical experiences associated with a number of content strands in science and technology.
 - The nature of science and Technology as ?disciplines and The strategies of investigating, designing and making and using technology?f
 - The nature of the NSW Science and Technology K-6 syllabus, its outcomes for Skills: (Working Scientifically, Design and Production), Knowledge and Understanding Strands (Digital Technologies, Physical World, Earth and Spac

TEAC 7100 Principles and Practices of Evaluation

Credit Points 10

Legacy Code 102168

Coordinator [Michele Simons \(https://directory.westernsydney.edu.au/search/name/Michele Simons/\)](https://directory.westernsydney.edu.au/search/name/Michele%20Simons/)

Description This unit provides opportunities to examine and apply evaluation strategies to assess and evaluate learning, educational and social programs and policies. Theories drawn from evaluation will be used to assist students to develop evaluative frameworks and approaches to critically evaluating programs.

School Education

Discipline Teacher Education

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 1545 - Evaluating Learning Programs

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse purposes and forms of programs
2. Critically examine a range of program evaluation approaches, theories, planning processes and methodologies
3. Design an evaluation study
4. Critically reflect on approaches to evaluation of programs.

Subject Content

1. Purposes of evaluation
2. Different approaches to evaluation
3. Forms of evaluation
4. Designing evaluation
5. Reporting, dissemination and driving change from evaluation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Professional Task	2500 words	50	N	Individual
Critical Review	2500 words	50	N	Individual

TEAC 7101 Professional Experience (Additional Needs)

Credit Points 10

Legacy Code 102153

Coordinator [William Nketsia \(https://directory.westernsydney.edu.au/search/name/William Nketsia/\)](https://directory.westernsydney.edu.au/search/name/William%20Nketsia/)

Description This unit provides students with an opportunity to apply the knowledge and skills about teaching students with additional needs to a real-life classroom. In turn, this authentic learning experience enriches their future professional growth and capacity to support individuals with additional needs. Students complete a practicum and, where appropriate, a series of field visits and observations, within an educational setting, that supports individuals with additional needs. The placement will be completed in the student's area of specialisation in an early childhood, primary, secondary or other relevant setting. Students are able to demonstrate a range of skills in planning, implementing and evaluating educational programs for students with additional needs that optimise learning outcomes and inclusion.

School Education

Discipline Teacher Education: Special Education

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 1090 - Professional Practice in Context

Restrictions

Students must be enrolled in 1720 Master of Inclusive Education and have successfully completed 40 credit points.

Assumed Knowledge

Must be a qualified teacher.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. work in a special education or inclusive setting working with students with additional needs;
2. administer systems for assessments across the curriculum and programming areas to determine current levels of performance;
3. interpret assessment data, and plan an individualised education program for young children and/or school students with additional needs;
4. plan a series of learning experiences to cater for the individual needs of young children and/or school students;
5. implement a series of lessons, demonstrating a developing range of effective teaching strategies;
6. implement positive approaches to managing challenging behaviours;
7. participate in collaborative planning to meet the needs of young children and/or school students with families/carers and other service providers;
8. evaluate child/student outcomes and demonstrate skills in making decisions about the effectiveness of instruction and progress;
9. reflect on own teaching and knowledge to enhance skills.

Subject Content

- An extended placement in an education setting, plus an extensive range of observations and field visits;
- Collaborative participation in collaborative planning;
- Developing an individual learning plan in collaboration with families/carers, service providers and child;
- Skills and knowledge used in assessments;
- Instructional strategies for assisting young children or school students to meet learning outcomes;
- Knowledge of the teaching and learning cycle in a range of Key Learning Areas and/or programming areas;
- Communication strategies used during placement teaching sessions including alternative and augmented communication;
- learning organisation and management of learning environments that maximise learning time for all students.

Special Requirements

Legislative pre-requisites

1. Students are required to complete a Working with Children Check leading to the issuance of a clearance number.

Students will need to:

- i. Access the NSW Office of the Children's Guardian website and complete an online application form to generate an application number.
- ii. Present an application number and identification to a NSW Motor Registry or Government Access Centre prior to issuance by mail of a Working with Children Check number.

- iii. Email the letter with a valid Working With Children Check number to enrolments@westernsydney.edu.au.

Where students already have a current Working with Children Check evidence of this must be submitted as above.

2. Students must also attend Child Protection Awareness Training prior to undertaking any visits/placements. Students who have not completed Child Protection training will need to withdraw from the subject. Students who have current Child Protection Certification must also present this when presenting their Working with Children Check.

3. Students must complete the ASCIA anaphylaxis e-training and email their certificate to AnaphylaxisSec@westernsydney.edu.au

4. Students must meet the Inherent Requirements for the Master of Inclusive Education (<https://hbook.westernsydney.edu.au/programs/master-inclusive-education/>).

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Professional Task: Practicum and Teaching Portfolio	20-25 days	S/U	Y	Individual

TEAC 7103 Professional Experience 3 - 5 Years

Credit Points 10

Legacy Code 102110

Coordinator Denise Fraser ([https://directory.westernsydney.edu.au/search/name/Denise Fraser/](https://directory.westernsydney.edu.au/search/name/Denise%20Fraser/))

Description In this subject students engage in critical reflection as they apply knowledge of and develop skills in pedagogical leadership during a 25 day placement with children aged 3 - 5 years. The placement includes 5 observation days where students orient themselves to the setting, gain informed consent to work with focus children and undertake detailed observation of the children. Students will work collaboratively with setting staff and families to implement an integrated curriculum that engages children, facilitates in-depth investigation and critical thinking, and connects to children's social

worlds. The subject requires students to apply the principles, practices and outcomes of Belonging, Being and Becoming: The Early Years Learning Framework for Australia to design, implement and evaluate innovative, inclusive and meaningful learning environments. Students must have satisfactorily completed Professional Experience Birth – 2 Years, the School of Education Academic Literacy Assessment Task, child protection awareness training and Working with Children check, and obtained anaphylaxis certification before enrolling in this subject. Students must also meet the Inherent Requirements for the Master of Teaching (Birth – 5 Years / Birth – 12 Years), details of which are available at http://www.uws.edu.au/ir/inherent_requirements/inherent_requirements_for_teaching_courses_postgraduate/master_of_teaching_birth_to_5_years/birth_to_12_years. The subject Practising Pedagogical Leadership must be completed in the same semester as Professional Experience 3-5 Years.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) TEAC 7104

Co-requisite(s) TEAC 7087

Equivalent Subjects TEAC 7035 - Early Childhood Professional Experience 2 TEAC 2051 - Professional Portfolio

Restrictions

Students must be enrolled in 1691 Master of Teaching (Birth – 5 Years / Birth – 12 Years), 1670 Bachelor of Education (Birth – 5 Years) or 1783 Master of Teaching (Birth-5 Years/Birth-12 Years).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Engage in ethical and reflective practice and establish and evaluate goals for own professional learning that lead to refinements in practice.
2. Document and assess children's play, development, learning, dispositions and relationships and use this information to inform planning and practice.
3. Implement, document and evaluate interest-based experiences and projects that extend on children's strengths and interests, support children's learning needs, foster relationships and support partnerships with children's families.
4. Apply curriculum approaches and pedagogies that are contextually responsive and promote children's investigation, problem-solving, critical thinking and the development of deep knowledge.
5. Apply the principles, practices and learning outcomes of The Early Years Learning Framework and draw on their own content knowledge in the areas of science and technology, mathematics, human society, physical education health and wellbeing, creative arts and literacy to engage in interactions with children that extend their learning.
6. Provide resources that encourage children to use a range of media and technologies to investigate their ideas and values and represent their thinking.
7. Demonstrate pedagogical leadership by collaboratively planning, implementing and evaluating a total learning environment that is inclusive and engaging for diverse learners, including learners from Aboriginal and Torres Strait Islander backgrounds which includes

a range of grouping strategies, promotes positive interactions, extends learning and strengthens relationships.

8. Demonstrate the oral and written literacies expected of a graduate teacher.

Subject Content

1. Critical reflection, reflective practice, and development of a professional portfolio, including the development and evaluation of professional learning goals.
2. Approaches to curriculum: e.g. emergent curriculum, Reggio Emilia, The Early Years Learning Framework.
3. Pedagogies for learning: e.g. play, projects, learning centres, integrated curriculum.
4. Documentation of children's learning: individual and small groups, projects.
5. Intentional teaching: Teaching strategies and techniques that facilitate children's investigation, problem-solving and critical thinking; planning, implementing and evaluating the total learning environment.
6. Use of the Early Years Learning Framework principles, practices and learning outcomes to document, assess and plan for learning in the areas of mathematics, science and technology.

Special Requirements

Legislative pre-requisites

1. Students are required to complete the Working with Children Check (WWCC) process leading to the issuance of a clearance number under the category of volunteer. Students will need to:

- i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.
- ii. Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.
- iii. Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is recorded as a Special Requirement on your academic record.
WesternNow Student Portal link (https://wsu.service-now.com/student/?id=sc_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed)

2. Students must complete the **two** components of the NSW Department of Education's Child Protection Awareness Training (CPAT).

a) Students will need to:

- i. Access the NSW Department of Education's MyPL website <https://mypl.education.nsw.gov.au/>
- ii. Complete the online Child Protection Awareness Training:

Induction

- iii. Save certificate of completion
 - iv. Submit certificate via WesternNow Student Portal
- b) Students will need to:
- i. Access the NSW Department of Education's MyPL website <https://mypl.education.nsw.gov.au/>
 - ii. Complete the Child Protection Awareness Training (CPAT): Annual Update for the calendar year
 - iii. Save certificate of completion
 - iv. Submit certificate via WesternNow Student Portal

Both certificates will be recorded on your student record as Special Requirements with the end date for the Annual CPAT recorded. The CPAT: Annual Update will need to be renewed and submitted on an annual basis.

Students who have not completed both components of the Child Protection Awareness Training will need to withdraw from the subject.

3. Students must complete the ASCIA anaphylaxis e-training and submit their certificate to Submit certificate via WesternNow Student Portal.

4. Students must meet the Inherent Requirements for the Master of Teaching (Birth – 5 Years / Birth -12 Years) (<https://hbook.westernsydney.edu.au/programs/master-teaching-birth-5-years-birth-12-years/>)

5. From 2H/Spring 2022, students must be COVID-19 fully vaccinated as per the NSW Public Health Order and NSW Department of Education requirement. If a student is unable to be get an approved vaccination for medical reasons, they will need to approach their doctor who must complete a contraindication form available at: [covid-19-vaccine-contraindication.pdf](https://www.health.nsw.gov.au/Infectious/covid-19/vaccine/Documents/covid-19-vaccine-contraindication.pdf) (nsw.gov.au) (<https://www.health.nsw.gov.au/Infectious/covid-19/vaccine/Documents/covid-19-vaccine-contraindication.pdf>). Students to submit details of all vaccination doses or contraindication form via Western Now form for it to be recorded on their academic record.

Assessment

TEAC 7104 Professional Experience Birth - 2 Years

Credit Points 10

Legacy Code 102109

Coordinator Sally Arthur ([https://directory.westernsydney.edu.au/search/name/Sally Arthur/](https://directory.westernsydney.edu.au/search/name/Sally%20Arthur/))

Description This subject has a strong focus on supporting children's health and wellbeing through the building of relationships with children, staff, and children's families. Students apply their knowledge of work health and safety and the Australian Children's Education and Care Quality Authority's National Quality Standard as they complete 25 days of placement with children under the age of 3. Students will complete a minimum of 10 days working with children under the age of 2 years and a minimum of 10 days working with children aged 2- 3 years. The placement includes 5 observation days that allow students to orient themselves to the setting and the groups of children with whom they will work. Students have the opportunity to document and assess children's learning and to apply knowledge of curriculum and pedagogy to plan innovative and engaging learning experiences that respond to children's family and community experiences and funds of knowledge. Students must satisfactorily complete the School of Education Literacy and Numeracy TASKs, Child Protection Awareness Training and Working with Children check and obtain anaphylaxis certification prior to undertaking visits to the early childhood setting and also meet the Inherent Requirements of the Master of Teaching (Birth – 5 Years / Birth – 12 Years), details of which are available at: http://www.uws.edu.au/ir/inherent_requirements/inherent_requirements_for_teaching_courses_postgraduate/master_of_teaching_birth_to_5_yearsbirth_to_12_years

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) TEAC 7147

Equivalent Subjects TEAC 7034 - Early Childhood Professional Experience 1

Restrictions

Students must be enrolled in 1691 Master of Teaching (Birth-5 Years / Birth-12 Years), 1670 Bachelor of Education (Birth ? 5) or 1783 Master of Teaching (Birth-5 Years/Birth-12 Years).

Learning Outcomes

1. Demonstrate professional and ethical practice, including appropriate oral and written communication.
2. Establish and evaluate professional goals that draw on graduate teacher standards, the early childhood placement and local community context and feedback from university and setting staff.
3. Provide culturally responsive curriculum and continuity of care for children, reflecting respect for the role of families and communities in children's learning and the diversity of child rearing practices, expectations and values families hold for their children.
4. Document and assess children's play, learning, relationships and dispositions in ways that identify children's capabilities and emerging understandings and build connections between children, families and educators.

5. Design, implement and evaluate play-based experiences and learning centers that extend children's capabilities, interests and funds of knowledge, encourage exploration and creativity and promote social interactions and language.
6. Demonstrate understandings of the principles, practices and learning outcomes of the Early Years Learning Framework and diverse languages, cultures and abilities in documentation and assessment of children's learning and in curriculum planning and interactions.
7. Interact with children in ways that support children's sense of identity and wellbeing, build relationships, guide behavior and extend learning.
8. Create environments and implement practices that promote children's health, safety and wellbeing and reflect legal requirements and current recommendations in the areas of health and safety

Subject Content

1. Professional and ethical practice
 - a) Australian Professional Standards for Graduate Teachers
 - b) The National Quality Standard for Early Childhood Education and Care and School Age Care
 - c) Legislation and recommendations for children's health, safety and wellbeing including healthy eating and physical activity
 - d) Work health and safety
 - e) Establishing and evaluating goals
 - f) Professional portfolios
 - g) Effective communication skills
 - h) Partnerships with families
2. Documentation and assessment of children's learning
 - a) Documenting individual children's family and community experiences and funds of knowledge
 - b) Documenting and analysing individual children's play, learning, dispositions and relationships.
3. Designing learning experiences
 - a) Using the principles, practices and learning outcomes of the Early Years Learning Framework and understandings of health, wellbeing and safety to design, implement and evaluate learning experiences and learning centres
 - b) Pedagogies that build relationships, guide behaviour and extend children's learning – e.g. scaffolding, co-construction.
4. Meaningful curriculum
 - a) Culturally responsive curriculum - Connecting to children's family and community experiences and funds of knowledge
 - b) Dispositions – e.g. curiosity, cooperation, creativity
 - c) Learning processes – e.g. exploration, investigation
 - d) Play-based curriculum and pedagogies.

Special Requirements

Legislative pre-requisites

1. Students are required to complete the Working with Children Check (WWCC) process leading to the issuance of a clearance number under the category of volunteer. Students will need to:
 - i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.
 - ii. Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.
 - iii. Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is recorded as a Special Requirement on your academic record.

TEAC 7106 Professional Experience K - 6

Credit Points 10

Legacy Code 102111

Coordinator Jaydene Barnes ([https://directory.westernsydney.edu.au/search/name/Jaydene Barnes/](https://directory.westernsydney.edu.au/search/name/Jaydene%20Barnes/))

Description This unit provides students with a professional experience in a primary school, building on their prior experience in early childhood and community-based settings. The professional experience component of this unit consists of 30 days. Students will link theory and practice while exploring issues involved in understanding the needs of learners within specific school and classroom contexts. Students will design and teach experiences, lessons and units of work in ways that enhance student engagement and learning outcomes, and make relevant links with NSW Education Standards Authority syllabus documents that align with the Australian Curriculum. This professional experience unit supports students to meet the Australian Professional Standards for graduate teachers by focusing on developing professional knowledge, practice and engagement in the primary school context. The unit also gives students opportunities to reflect on their own teaching and learning, and to develop professional goals.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) TEAC 7103

Equivalent Subjects TEAC 7096 - Primary Professional Experience

Restrictions

Students must be enrolled in 1783 Master of Teaching (Birth-5 Years/ Birth-12 Years).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate understanding of and sensitivity to students' diverse social and cultural contexts, languages and dialects and physical, social and intellectual development, and use this information to inform meaningful and inclusive curriculum planning, including additional literacy and numeracy support.
2. Design sequences of experiences or lessons and units of work that apply knowledge of curriculum content and pedagogies, including science and technology, utilising a range of resources that link meaningfully with NSW Education Standards Authorities documents and the Australian Curriculum.
3. Apply assessment moderation principles to monitor students' progress towards meeting learning outcomes, establish clear, achievable goals for future learning that provide achievable challenges for children of different abilities, and share feedback and goals with students and their families.
4. Evaluate lessons, experiences and units of work and use these evaluations to inform future curriculum planning and practice.
5. Implement appropriate pedagogies including a range of grouping strategies, questioning techniques, and prosocial guidance strategies designed to support student learning and promote student engagement and positive behaviours.
6. Communicate ethically and professionally with staff, students and families, including those from culturally and linguistically diverse backgrounds, and demonstrate evidence of collegial teamwork.
7. Critically reflect on own learning, cultural assumptions in own teaching and schooling practices, feedback from field-based and university-based supervising teachers, and the National Professional Standards framework to develop and enact professional goals, and utilise external professionals and community representatives to broaden professional knowledge and practice.
8. Demonstrate understandings of the relevant legislative, administrative and organisation policies required for teachers and understandings of students' wellbeing and safety including the safe and responsible use of tools and Information and Communication Technologies.
9. Understand the responsibilities of teachers in relation to disability and identify strategies for collaborating with families and other professionals to negotiate learning outcomes and make reasonable adjustments to learning experiences.
10. Utilise Aboriginal English as an Additional Language or Dialect and other support personnel and Indigenous and bilingual community organisations as appropriate to improve educational outcomes for all students.
11. Demonstrate academic literacy and numeracy for professional application.

Subject Content

1. Applying content from current mandated curriculum documents in planning experiences/lessons and units of work in the primary school context
2. Planning, teaching, managing and assessing for learning: literacy and numeracy assessment, science and technology content and assessment, lesson plans and units of work, processes of assessment moderation, negotiated and differentiated curriculum.
3. Collaborative practice - working effectively with the team around the child
4. Reflective practice - observing, analysing, reflecting on and evaluating own personal professional practice
5. Selecting appropriate resources for teaching and learning, for example, digital, paper-based and concrete materials
6. Professional and ethical practice
7. Relevant legislation and policy documents
8. Australian Professional Standards for Graduate Teachers

Special Requirements

Legislative pre-requisites

1. Students are required to complete the **two** components of the Working with Children Check (WWCC) process leading to (a) the issuance of a clearance number under the category of volunteer and (b) verification of the clearance number with the NSW Department of Education.

a) Students will need to:

- i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.
- ii. Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.

iii. Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.

WesternNow Student Portal link (https://wsu.service-now.com/student/?id=sc_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed)

b) Students will need to:

- i. Access the NSW Department of Education WWCC Verification declaration form <https://online.det.nsw.edu.au/jecpc/crc/wwcc.jsf>
- ii. Carefully read the information about Identity Documents and obtain a copy of the relevant ID documents.

iii. Complete and submit the verification declaration form.

iv. Once your WWCC verification is complete you will receive an email reply from the DoE Probity Unit confirming your WWCC number has been verified.

v. Submit the verification confirmation email via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.

2. Students must complete the **two** components of the NSW Department of Education's Child Protection Awareness Training (CPAT)

a) Students will need to:

- i. Access the NSW Department of Education's MyPL website <https://mypl.education.nsw.gov.au/>
- ii. Complete the online Child Protection Awareness Training: Induction
- iii. Save certificate of completion
- iv. Submit certificate via WesternNow Student Portal

b) Students will need to:

- i. Access the NSW Department of Education's MyPL website <https://mypl.education.nsw.gov.au/>
- ii. Complete the Child Protection Awareness Training (CPAT): Annual Update for the calendar year
- iii. Save certificate of completion

- iv. Submit certificate via WesternNow Student Portal

Both certificates will be recorded on your student record as Special Requirements with the end date for the Annual CPAT recorded. The CPAT: Annual Update will need to be renewed and submitted on an annual basis.

Students who have not completed both components of the Child Protection Awareness Training will need to withdraw from the subject.

3. Students must complete the ASCIA anaphylaxis e-training and submit their certificate to Submit certificate via WesternNow Student Portal.

4. Students must meet the Inherent Requirements for the Master of Teaching (Birth – 5 Years / Birth -12 Years) (<https://hbook.westernsydney.edu.au/programs/master-teaching-birth-5-years-birth-12-years/>).

5. Students must satisfactorily complete the national Literacy and Numeracy TEST prior to undertaking the final Professional Experience placement.

6. From 2H/Spring 2022, students must be COVID-19 fully vaccinated as per the NSW Public Health Order and NSW Department of Education requirement. If a student is unable to be get an approved vaccination for medical reasons, they will need to approach their doctor who must complete a contraindication form available at: [covid-19-vaccine-contraindication.pdf \(nsw.gov.au\)](https://www.health.nsw.gov.au/Infectious/covid-19/vaccine/Documents/covid-19-vaccine-contraindication.pdf) (<https://www.health.nsw.gov.au/Infectious/covid-19/vaccine/Documents/covid-19-vaccine-contraindication.pdf>). Students to submit details of all vaccination doses or contraindication form via Western Now form for it to be recorded on their academic record.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical	30 days	S/U	Y	Individual
Portfolio	15 minutes	S/U	Y	Individual

TEAC 7108 Professional Practice Community Engagement

Credit Points 10

Legacy Code 102605

Coordinator Christina Curry ([https://directory.westernsydney.edu.au/search/name/Christina Curry/](https://directory.westernsydney.edu.au/search/name/Christina%20Curry/))

Description Professional Practice Community Engagement is a Professional Experience unit of the Master of Teaching (Secondary), incorporating a five-day or 30 hours academic service learning placement and is designed to develop sustainable practical knowledge and skills that supplement those developed in the other Professional Experience units. This unit will expand Teacher Education students' understandings of the contemporary issues confronting the wider education community. As such, a diverse range of educational settings including secondary school contexts are utilised to provide a deeper perspective for future secondary teachers beyond curriculum matters, and to facilitate engagement with holistic schooling practices. Teacher Education students choose from the available educational contexts to suit their needs, interests, expertise and communities.

School Education

Discipline Teacher Education: Secondary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) Students enrolled in 1652 1823 2804 2786 1843 4742 3756 or 6021 must have successfully completed 160 credit points

Equivalent Subjects EDUC 7002 - Professional Experience 3 TEAC 7139 - Secondary Professional Practice 3

Restrictions

Students must be enrolled in program 1714, 1848, 1652, 1823, 2804, 2786, 1843, 4742, 3756 or 6021. In addition, students enrolled in 1652, 1823, 2804, 2786, 1843, 4742, 3756 or 6021 must have passed 160 credit points to enrol in this unit

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Engage in critical and sustained reflection on their practice throughout the Professional Practice.
2. Integrate knowledge, understandings and skills relevant to teaching and learning in traditional and non-traditional educational settings.
3. Apply the requirements and responsibilities of all teachers / educators to the specific context of this Professional Practice.
4. Integrate personal learning experiences into the situation in which they will teach to promote student learning.
5. Demonstrate good communication skills and the ability to work effectively and contribute as part of a team of educators.
6. Display initiative and take responsibility for formulating a personal professional development plan.
7. Critically evaluate personal professional development and articulate this development through a written reflective response.

Subject Content

1. How diverse are educational settings? What are the implications of my setting for my future as a secondary school teacher?
2. What is outcomes-based education? Why is an outcomes-based approach relevant in any educational setting?
3. What role does critical reflection play in the professional development of teachers? How can I apply critical reflection to learn through my interactions with my setting?
4. What evaluation strategies can I use in my setting? How will these strategies help me to appraise the effectiveness of teaching and learning in my setting?
5. How do I prepare for a 30 hour professional practice in an educational learning context?

Special Requirements

Legislative pre-requisites

1. Students are required to complete the **two** components of the Working with Children Check (WWCC) process leading to (a) the issuance of a clearance number under the category of volunteer and (b) verification of the clearance number with the NSW Department of Education.
 - a) Students will need to:
 - i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.
 - ii. Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.
 - iii. Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record. WesternNow Student Portal link (https://wsu.service-now.com/student/?id=sc_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed)
 - b) Students will need to:
 - i. Access the NSW Department of Education WWCC Verification declaration form <https://online.det.nsw.edu.au/jecpc/crc/wwcc.jsf>
 - ii. Carefully read the information about Identity Documents and obtain a copy of the relevant ID documents.
 - iii. Complete and submit the verification declaration form.
 - iv. Once your WWCC verification is complete you will receive an email reply from the DoE Probity Unit confirming your WWCC number has been verified.
 - v. Submit the verification confirmation email via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.
2. Students must complete the **two** components of the NSW Department of Education's Child Protection Awareness Training (CPAT)
 - a) Students will need to:
 - i. Access the NSW Department of Education's MyPL website <https://mypl.education.nsw.gov.au/>
 - ii. Complete the online Child Protection Awareness Training: Induction
 - iii. Save certificate of completion
 - iv. Submit certificate via WesternNow Student Portal
 - b) Students will need to:
 - i. Access the NSW Department of Education's MyPL website <https://mypl.education.nsw.gov.au/>
 - ii. Complete the Child Protection Awareness Training (CPAT): Annual Update for the calendar year
 - iii. Save certificate of completion
 - iv. Submit certificate via WesternNow Student Portal

Both certificates will be recorded on your student record as Special Requirements with the end date for the Annual CPAT recorded. The

CPAT: Annual Update will need to be renewed and submitted on an annual basis.

Students who have not completed both components of the Child Protection Awareness Training will need to withdraw from the subject.

3. Students must complete the ASCIA anaphylaxis e-training and submit their certificate to Submit certificate via WesternNow Student Portal.

4. Students must meet the Inherent Requirements for the Master of Teaching (Secondary) (<https://hbook.westernsydney.edu.au/programs/master-teaching-secondary/>).

5. From 2H/Spring 2022, students must be COVID-19 fully vaccinated as per the NSW Public Health Order and NSW Department of Education requirement. If a student is unable to be get an approved vaccination for medical reasons, they will need to approach their doctor who must complete a contraindication form available at: [covid-19-vaccine-contraindication.pdf](https://www.health.nsw.gov.au/Infectious/covid-19/vaccine/Documents/covid-19-vaccine-contraindication.pdf) (nsw.gov.au) (<https://www.health.nsw.gov.au/Infectious/covid-19/vaccine/Documents/covid-19-vaccine-contraindication.pdf>). Students to submit details of all vaccination doses or contraindication form via Western Now form for it to be recorded on their academic record.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7111 Professional Project

Credit Points 10

Legacy Code 102163

Coordinator Christine Johnston ([https://directory.westernsydney.edu.au/search/name/Christine Johnston/](https://directory.westernsydney.edu.au/search/name/Christine%20Johnston/))

Description Professional project enables students to engage in an intensive study of an aspect of work related learning in order to develop, implement or improve some aspect of current professional or personal practice. It provides opportunities for students to use research skills and related theory directly as they implement a practice-based research-informed project within their own areas of specialisation. Students will be required to consult, present 'work in progress' and prepare a final report for a suitable audience.

School Education

Discipline Teacher Education

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) TEAC 7115

Equivalent Subjects TEAC 7055 - Independent Studies – Practice in Context

Restrictions

Students must be enrolled in 1726 Master of Education (Leadership), 1720 Master of Inclusive Education or 1723 Master of Education (Social Ecology). Students enrolled in Graduate Certificates in School of Education programs are not permitted to enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse their own personal or professional practice;
2. Identify theoretical assumptions underpinning the areas and issues in the study;
3. Evaluate research literature and determine its relevance for practice;
4. Implement a project which applies research skills to develop or improve current practice;
5. Critique the project and its links to the disciplinary field

Subject Content

Unit content will be individualised according to the students' project needs. Specific project content, negotiated with peers and lecturers/mentors, should be directly relevant to and enhancing their personal professional knowledge practice.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Professional Task	Presentation: 20 minutes to present & 1,500 words AND Report: 3500 words; OR Project: 5,000 words	100	N	Individual

TEAC 7112 Prosocial Learning Environments

Credit Points 10

Legacy Code 101105

Coordinator Yvette Barton ([https://directory.westernsydney.edu.au/search/name/Yvette Barton/](https://directory.westernsydney.edu.au/search/name/Yvette%20Barton/))

Description From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. Educators have a key responsibility for guiding and leading children in the development of self-discipline, moral autonomy, and a sense of social belonging and wellbeing while acknowledging developmental needs, pluralistic community values, expectations, standards, norms and rules. Despite increased knowledge of child development and children's social and cultural contexts, the guidance and management of children's behaviour remains a contentious area for educators, parents and children. This subject will provide students with the opportunity to focus in depth on a range of approaches to behaviour, social interactions and guidance, to reflect on the impact of these approaches on children's development and learning, and to critically evaluate their personal and professional dispositions regarding behaviour and guidance. The subject also focuses on the design of learning environments that promote engaged learning and a positive physical and socio-emotional climate.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled 1691 Master of Teaching (Birth ? 5 Years / Birth ? 12 Years), 1670 Bachelor of Education (Birth ? 5 Years) or 1783 Master of Teaching (Birth-5 Years/Birth-12 Years).

Learning Outcomes

1. Evaluate theories related to learning prosocial behaviours that include consideration of developmental continuums, individual and socio-cultural differences and behaviour and identify strategies for accommodating this diversity.

2. Explain the importance of children's mental health and sense of wellbeing for their overall development and learning.
3. Explain the importance of children's understandings of themselves and others and children's capacity to make informed life choices.
4. Describe the impact of guidance strategies and techniques on children's learning, wellbeing and self-concept development.
5. Evaluate the impact of environmental factors on individual and group behaviour in educational settings and organise learning environments in ways that promote positive behaviours.
6. Explain personal and professional dispositions and preferences in relation to learning and teaching, with a particular emphasis on monitoring and guiding children's behaviour.
7. Generate a defensible, scholarly position regarding professional approaches to behaviour and guidance of individuals and groups of children.
8. Utilise a repertoire of strategies to promote positive interactions and guide children's behaviour and examine the implications of these strategies for individual and group management.

Subject Content

1. Social and emotional needs of children and adults.
2. Diversity in children's family and community contexts, learning and behavioural styles: need for contextually and culturally appropriate guidance and individualised guidance for children with additional needs.
3. The impact of families on children's learning, behaviour and development; family roles and social issues; family dynamics and the implications of these for children's learning and behaviour.
4. Strategies to assist children to make informed lifestyle choices.
5. Developmental factors associated with typical behaviours of children, e.g. social cognition; memory and perception; temperament; moral development; self-concept development.
6. Critique of theoretical models of guiding and managing children's behaviour, e.g. control (Dobson, Canter, Jones); management (Rogers, Dreikurs, Glasser); influence (Gordon); analysis of related assumptions and strategies; impact on adult-child relationships and children's self-concept.
7. Professional approaches to guiding children's behaviour – analysis of eclecticism as selective and combined use of techniques and strategies; unintended and intended outcomes of eclecticism; mixed models of behaviour guidance; implications of an eclectic approach for teaching and learning.
8. Constructive guidance and behaviour management policies - critical assessments of theoretical models; focused understanding of individual, group and community needs; developing professionally sound, philosophically cohesive and practical policies; school/service professional development program.
9. Behavioural assessment – purpose, approaches, legal implications, involvement of children and parents.
10. The impact of physical and human environments on learning and on prosocial behaviours: designing learning environments that promote a positive physical and socio-emotional climate

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7114 Research and Professional Practice

Credit Points 10

Legacy Code 102100

Coordinator Beatriz Cardona ([https://directory.westernsydney.edu.au/search/name/Beatriz Cardona/](https://directory.westernsydney.edu.au/search/name/Beatriz%20Cardona/))

Description From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. This unit aims to develop students' capacity to reflect on and develop their teaching practice and professional identity as practitioner researchers. Vital to this process is the capacity to use research to interpret current educational contexts and the implications for their role as teachers. Students will explore research processes including data collection, analysis techniques and the processes that experienced researchers take in order to ensure their research is valid, reliable, ethical, useful and socially responsible. Contemporary theories as well as social, cultural, economic and political structures important to the role and work of teachers will also be critically reviewed. In this unit students will challenge established, historical conceptualisations of 'teacher' to develop their own understanding of this role in contemporary, early childhood and primary education contexts.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1691 Master of Teaching (Birth-5 Years/ Birth-12 Years) or 1783 Master of Teaching (Birth-5 Years/Birth-12 Years)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Engage critically with contemporary literature about research and education research debates.
2. Discuss the research process and the role of each step of the process for quality research.
3. Analyse the key factors (including historical perspectives) influencing the practice and identities of teachers in contemporary multicultural and Aboriginal and Torres Strait Islander educational contexts.
4. Articulate key arguments about educational discourse and their implications for education birth ? 12 years.
5. Advocate for the early childhood sector and make informed comment on the educational landscape.

6. Communicate the importance of the research process for professional identity and practice.

Subject Content

The value of engaging with educational research.

The strategies for locating and critically evaluating peer reviewed educational research.

The social, cultural, economic and political structures important to the role and identity of teachers.

Research processes: research design, data analysis and ethical issues. Research on the key factors (including historical perspectives) of contemporary teaching and learning.

Accountability requirements and their impact on professional practice and identities.

Engaging with research literature as a way to continually refine one's understanding of the role and work of teachers.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Literature Review	2000 words	50	N	Individual
Applied Project	2000 words	50	N	Individual

TEAC 7115 Researching Practice

Credit Points 10

Legacy Code 101656

Coordinator Susanne Gannon ([https://directory.westernsydney.edu.au/search/name/Susanne Gannon/](https://directory.westernsydney.edu.au/search/name/Susanne%20Gannon/))

Description This unit enables students to engage in research practice in their area of professional interest or specialisation. Students will develop deep insight into the application of research in practice contexts and diverse research methodologies appropriate to practitioner research. They will develop skills in analysing, critiquing, and synthesising the literature in a relevant research area. Evaluation of research literature will be the basis for planning a self-directed

professional project that employs identifiable research methods and tools to address a question of personal and/ or professional relevance.

School Education

Discipline Teacher Education

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Must be enrolled in 1714 Master of Teaching (Secondary); 1726 Master of Education (Leadership), 1720 Master of Inclusive Education, 1723 Master of Education (Social Ecology), 1847 Master of Education (STEM), 1888 Master of Education (Leadership and Management), 1911 Master of Education or 1912 Graduate Certificate in Professional Practice.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify areas of inquiry in a personal or professional context;
2. Analyse issues of research process, design and implication;
3. Critique theories underpinning methodologies in practitioner-oriented research;
4. Apply qualitative, quantitative and/ or mixed-method approaches to practice-based research;
5. Demonstrate skills and knowledge involved in conducting academic inquiry;
6. Evaluate research literature and determine its relevance;
7. Critically reflect on own practice/experience and relationship to evidence from the field

Subject Content

1. Explore a range of mixed-methods approaches to practitioner-oriented research methodologies and methods;
2. Articulate a researchable thematic concern, problem or area of investigation relevant to the student's life/work;
3. Scope a working interpretation of the identified area of professional practice and use it as a framework for designing and conducting research;
4. Conduct a comprehensive and focussed literature search and write a critical review, analysing and synthesising literature relevant to the research;
5. Prepare a preliminary research plan that includes a consideration of ethical research practices.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7116 Researching STEM Education for Future Leadership

Credit Points 10

Legacy Code 102512

Coordinator Nathan Berger ([https://directory.westernsydney.edu.au/search/name/Nathan Berger/](https://directory.westernsydney.edu.au/search/name/Nathan%20Berger/))

Description From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. This unit seeks to redefine and inform practice about what it means to be a contemporary STEM teacher by engaging with literature on a specific research topic in STEM education and designing and implementing a research project in a team on that area of STEM education. The focus is also on the role of teacher/practitioner-research as central to professional learning in contemporary education. The central role of practitioner research in the practice of future STEM educational leaders is emphasised. Students will also be required to complete evidence-gathering in an e-portfolio to demonstrate they meet the Australian Professional Standards for Teachers at: <http://www.aitsl.edu.au/australian-professional-standards-for-teachers/standards/list>.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) TEAC 7121

Restrictions

Students must be enrolled in the program 1714 M Teaching (Secondary) or 1848 Master of Teaching (Secondary) STEM. These students are required to have completed 120 Credit Points from within the Master of Teaching. Or students must be enrolled in 1882 Graduate Certificate in Secondary STEM Education or 1887 Graduate Certificate in Primary STEM Education.

Assumed Knowledge

Students will require a knowledge of STEM education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the role of relevant and appropriate professional learning in STEM education and the role of research in that professional learning.
2. Investigate the roles of future leaders in understanding what is required to effect valuable innovation in STEM education.
3. Locate and select relevant research literature to investigate a particular research question in STEM education.
4. Analyse key ideas, assumptions and domains of knowledge in the literature around a research question.
5. Identify appropriate research methods and design in the literature relevant to a particular research question in STEM education.
6. Demonstrate understanding of the ethical frameworks impacting on research in education.
7. Critically apply appropriate forms of data collection and data analysis to a research design on STEM education.

Subject Content

How can an orientation to research be part of the culture of contemporary STEM education and contemporary professional learning?

How is research a central role in contemporary teacher professional learning?

What is the place of research in the practice of future STEM education leaders?

What evidence-based research informs actions / responsibilities / dimensions that characterise effective STEM education in contemporary times?

What modes of research are commonly used in practitioner research in education (e.g. text analysis, action research, case studies, surveys)?

How is research on a nominated key problem or research question in contemporary STEM education best designed, carried out and analysed?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
1a. Collaborative identification of a research question and discussion of its importance	500 words (submitted by each member of group)	10	N	Individual

TEAC 7119 Researching and Developing Engaging Pedagogies

Credit Points 10

Legacy Code 102075

Coordinator Eva Vass ([https://directory.westernsydney.edu.au/search/name/Eva Vass/](https://directory.westernsydney.edu.au/search/name/Eva%20Vass/))

Description This subject builds on the interplay between research and practice. It extends students' understanding of the processes and uses of participatory action research, also known in this context as teacher-based inquiry. It reviews theories on engaging practices in diverse professional contexts, with a focus on working with students from low socio-economic backgrounds, Aboriginal and Torres Strait Island learners and students who have English as an additional language or dialect (EAL/D). It also reviews pedagogic approaches linked to 21st century education. It challenges students to inquire into and reflect upon their professional practice and develop engaging classroom pedagogies and assessment practices in the area of their primary teaching specialisation (English, Mathematics or Science and Technology). The unit expands students' research skills through the critical review and application of various approaches to document, measure and evaluate student engagement. In line with NESA primary teaching specialisation requirements, students must apply these research skills and understandings to their school, classroom context and selected curriculum area specialisation.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) TEAC 7154 - Professional Experience 1 and TEAC 7141 - Teaching and Learning in Classrooms

Restrictions

Students must be enrolled in 1663 or 1781 Master of Teaching (Primary).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse contemporary approaches to teaching and learning, with a specific focus on issues and practices surrounding student engagement;

2. Explore pedagogic approaches linked to 21st century teaching and learning practices and review their value and relevance for student engagement;
3. Engage in professional self-reflection to identify issues in practice which warrant further exploration;
4. Interrogate their own teaching and identify strategies for future action in regards to student engagement;
5. Use relevant methodological literature to develop their own methodological design to measure and evaluate student engagement.

Subject Content

- Issues surrounding student engagement and motivation from sociological and psychological perspectives
- 21st century teaching and learning approaches including emerging and innovative pedagogies and how these relate to student engagement
- Classroom environments and processes supporting engaging Teaching and learning experiences, with A focus on students from low socio-economic, EAL/D and Aboriginal and Torres Strait Islander backgrounds
- The use and value of Participatory action research in education and Continuing professional development
- Critiquing personal and professional Teaching practices
- The use of student data to document, measure and Evaluate student engagement
- The symbiotic relationship between theory, research and practice

Inherent Requirements

Students must meet the Inherent Requirements for the Master of Teaching (Primary) (<https://hbook.westernsydney.edu.au/programs/master-teaching-primary/>)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7120 STEM Pedagogies in Practice

Credit Points 10

Legacy Code 102511

Coordinator Erin Mackenzie ([https://directory.westernsydney.edu.au/search/name/Erin Mackenzie/](https://directory.westernsydney.edu.au/search/name/Erin%20Mackenzie/))

Description The purpose of this unit is for students to gain exposure to authentic contexts for integrating science, technology, engineering and mathematics and to develop knowledge and skills with designing and implementing STEM learning experiences. Students will have the opportunity to complete an authentic interdisciplinary STEM task, and draw upon this experience to design and implement interdisciplinary STEM learning activities aligned to syllabus outcomes. This unit will allow students to simulate and evaluate the teaching practices associated with high-quality interdisciplinary STEM lessons, and collaborate with peers who have expertise in different STEM disciplines.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

It is assumed that students will have some knowledge of STEM based pedagogies, for example design thinking, project based learning, and case based instruction.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse essential features of authentic interdisciplinary STEM contexts
2. Critique the design of tasks that require learners to draw upon the STEM disciplines
3. Apply interdisciplinary pedagogies to the design of STEM learning experiences
4. Implement a STEM learning experience aligned to primary or secondary-level syllabus outcomes
5. Evaluate the classroom teaching practices of an interdisciplinary STEM lesson

Subject Content

Authentic STEM contexts

Authentic STEM tasks

Applying interdisciplinary STEM pedagogies

Designing interdisciplinary STEM learning experiences

Classroom teaching practices for interdisciplinary STEM lessons

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Simulation	1500 words	30	N	Individual
Professional Task	1000 words & 30 minutes	50	N	Individual
Report	1,000 words	20	N	Individual

TEAC 7121 STEM foundations

Credit Points 10

Legacy Code 102508

Coordinator Mary Southall ([https://directory.westernsydney.edu.au/search/name/Mary Southall/](https://directory.westernsydney.edu.au/search/name/Mary%20Southall/))

Description This unit will enable students to engage with knowledge of research-based integrated approaches to the teaching of science, technology, engineering and mathematics in schools. Students will learn about interdisciplinary methods for STEM learning, including project based learning and design thinking. The unit will allow students to undertake a critical examination of innovative, interdisciplinary approaches to curriculum development and relevant pedagogical strategies to maximise student learning and engagement with STEM disciplines.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

An understanding of at least one STEM (science, technology, engineering or mathematics) school syllabus.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a critical understanding of theoretical constructs underlying STEM curriculum development as it relates to classroom teaching practice and student learning.
2. Create and evaluate interdisciplinary STEM units

3. Demonstrate a critical understanding of project based learning as a pedagogical strategy for STEM learning.
4. Incorporate design thinking into STEM curriculum integration and development.
5. Critically reflect upon the use of action research to evaluate STEM teaching practices.

Subject Content

K-12 STEM research
 Teachers as action researchers
 Interdisciplinary curriculum development
 Project Based learning
 Design thinking

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7122 Science for Contemporary Learners

Credit Points 10

Legacy Code 102485

Coordinator Karina Mckoy ([https://directory.westernsydney.edu.au/search/name/Karina Mckoy/](https://directory.westernsydney.edu.au/search/name/Karina%20Mckoy/))

Description The purpose of this unit is for students to investigate how primary-age children think scientifically and develop knowledge of the natural world, and explore constructivist strategies for teaching primary science aligned to current reform efforts. An emphasis will be placed on understanding the essential features of inquiry-based pedagogies, scientific practices, and the role of creativity, coding, and technology in teaching and learning science. Students will apply their understandings of learning and constructivist pedagogies to the design of a series of primary science lessons.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1845 Graduate Certificate in Primary Science Education; 1847 Master of Education (STEM); 1887 Graduate Certificate in STEM Education or 1911 Master of Education.

Assumed Knowledge

A basic understanding of primary learners' cognitive development, features of positive classroom environments, and outcomes of the primary science syllabus is desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss how young learners develop knowledge to explain the natural world
2. Evaluate alternative conceptions related to primary science topics
3. Synthesize research-based strategies for confronting alternative conceptions
4. Apply inquiry-based pedagogical models to primary technology syllabus outcomes
5. Design primary science learning experiences that incorporate creativity, coding, and authentic scientific practices
6. Integrate appropriate technologies into primary science instruction

Subject Content

1. Understanding big ideas in the primary science curriculum
2. Constructivist frameworks for learning science
3. The role of inquiry, creativity, coding, and scientific practices in learning and teaching primary science
4. The relationship between science and technology in primary education
5. Technologies in primary science education
6. Lesson and unit planning in primary science education

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7140 TESOL Methodology and Curricula

Credit Points 20

Legacy Code 101697

Coordinator Milena Ilisevic ([https://directory.westernsydney.edu.au/search/name/Milena Ilisevic/](https://directory.westernsydney.edu.au/search/name/Milena%20Ilisevic/))

Description Focusing on the process of teaching English as a second or other language, the unit provides students with knowledge about approaches to teaching necessary to plan, design and evaluate curricula most appropriate to the needs of different learners. Students will develop skills in action research to facilitate critical evaluation of their teaching practices as independent professionals.

School Humanities & Comm Arts

Discipline English as a Second Language Teaching

Student Contribution Band HECS Band 1 20cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 0753 - TESOL Methodology LGYA 0746 - TESOL Curriculum Development

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the theory and practice of effective English language teaching and curricula in Australian and international contexts;
2. Demonstrate skills in managing the language learning process in classroom and self-access settings;
3. Critically analyse, design and adapt language teaching resources and curricula for use in a range of settings;
4. Design, implement and evaluate effective syllabus and curricula, incorporating needs and equity analysis, for a range of learner types, including adult learners; and
5. Critically reflect on their own practice as language teachers.

Subject Content

Teaching the macro language skills of speaking, listening writing, reading

Planning, sequencing and evaluating language learning events

Managing the language learning classroom

Developing language teaching resources

Contexts of language curriculum development in Australia and internationally

Analysis of the process of teaching English as a second or other language, including needs analysis, syllabus design, methods of student assessment

Effective teaching strategies and critical self-reflection, including action research

Approaches to curriculum evaluation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Essay	3,000 words	40	N	Individual

TEAC 7141 Teaching and Learning in Classrooms

Credit Points 10

Legacy Code 102076

Coordinator Kellie Jorda ([https://directory.westernsydney.edu.au/search/name/Kellie Jorda/](https://directory.westernsydney.edu.au/search/name/Kellie%20Jorda/))

Description From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. This unit is designed to prepare students for their role as active, thoughtful leaders of learning environments for primary students. Students will come to an understanding of their trajectory as professional learners as they develop a deeper understanding of who they are as teachers. The portfolio that they begin in this unit will be a vehicle for them to reflect deeply on their emerging skills and understandings and will be part of their development of a critical perspective of their practice as a teacher. Building on previous understanding about how children learn the students will plan lesson sequences using a range of teaching strategies. The unit will familiarise students with the processes needed to implement the mandated national and state curriculums in their unique classrooms with the diversity of students with whom they are working. A study of techniques to create safe and well managed learning environments where school students feel a sense of ownership of their learning will aid successful completion of the associated practicum unit. The practice of continuous assessment, planning, implementation and reflection that is the curriculum cycle will provide an organising principle around which the understandings gained in the curriculum units can be built.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) TEAC 7097 OR
TEAC 7154

Equivalent Subjects TEAC 7069 - Learning for Teaching

Restrictions

Students must be enrolled in 1663 or 1781 Master of Teaching (Primary)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Implement teaching strategies that meet the needs of classroom learners from diverse backgrounds and who have a range of learning needs and abilities.
2. Identify the requirements of the practice of teaching through an examination of the curriculum planning and implementation and assessment cycle, including the use of software for profiling and reporting, lesson preparation and class administration.
3. Apply a range of teaching strategies, using digital and traditional resources, to match the learning needs of the children with whom they will be working.
4. Apply principles from theoretical models of discipline to promote positive behaviours for learning and so identify a range of approaches to managing student behaviour and promoting their wellbeing in classrooms.
5. Examine the thoughtful creation of safe classroom environments that promote student engagement and positive learning cultures.
6. Evaluate the role of a range of assessment practices that consistently interpret available data and facilitate feedback to students and parents.
7. Use appropriate data collection methods to assist student teachers to plan and reflect on their classroom practices and to develop a learning portfolio that responds to the Australian Professional Standards for Teachers.
8. Review the skills and understanding required to contribute to educational communities of practice within schools and in broader contexts.
9. Engage in critical reflection of their teaching practice with their peers through the exploration of the links between personal philosophy and practice.

Subject Content

1.?? Teaching and Learning taking into account: the teaching and learning cycle, evolving curriculum contexts, student learning needs and the creation of positive learning environments over a longer term.
2.?? Australian Professional Standards for Teachers as benchmarks by which teachers are judged in their professional practice. Use of reflective evidence collection about personal teaching practices to begin the creation of a learning portfolio

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7142 Teaching and Learning with Adults

Credit Points 10

Legacy Code 102155

Coordinator Michele Simons ([https://directory.westernsydney.edu.au/search/name/Michele Simons/](https://directory.westernsydney.edu.au/search/name/Michele%20Simons/))

Description This subject explores the pedagogical issues which shape the ways in which teaching and learning for adults might be organised in a variety of contexts. It is suitable for leaders, teachers, tutors, trainers and other staff working in schools, organisations, workplaces and communities. The subject will draw upon a range of theoretical perspectives including approaches to learning, knowledge

and assessment, the relationship between organisational context, teaching and learning, and the role of the adult educator as a 'practical theorist'.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the scope and nature of adult education as a field of practice
2. Explore the relationship between learning and development across the lifespan
3. Demonstrate approaches to facilitating adult learning in contexts relevant to students' practice
4. Analyse the relationship between theory, practice and experience in the work of an educator

Subject Content

1. Purposes of adult learning; exploration of the concepts of theory, practice and experience and their relevance to the field of adult learning
2. The learning process; personal and social dimensions;
3. Theories of learning development; learning throughout life
4. The characteristics of an effective educator
5. Planning and preparing learning experiences from curricula/training packages/other frameworks for identifying adult learner needs
6. Teaching strategies (individual, group, workplace based, online)
7. Assessment and evaluation in adult settings

Teaching Periods

TEAC 7144 Technology Assisting Learning

Credit Points 10

Legacy Code 102154

Coordinator Samantha Hornery ([https://directory.westernsydney.edu.au/search/name/Samantha Hornery/](https://directory.westernsydney.edu.au/search/name/Samantha%20Hornery/))

Description Assistive technologies have the potential to meet a range of simple to complex needs for individuals with additional needs, and boost an individual's participation, communication, learning outcomes and quality of life. As such, professionals must develop both knowledge and skill in identifying and embedding appropriate technology into the assessment, goal-setting, teaching and evaluation cycle. Emphasis will be placed on demonstrating deep knowledge of the literature and demonstrating skills in assessment and instructional practices employing technology to support learning, communication, curricular, and instructional access either in a learning or natural setting. Students will be expected to critically examine the educational function and efficacy of communication technology, assistive technology, digital and multimedia text, or educational software.

School Education

Discipline Teacher Education: Special Education

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7077 - Multiliteracies and additional needs

Restrictions

Students must be enrolled in 1714 M Teaching (Secondary), 1720 Master of Inclusive Education; 1721 Graduate Certificate in Inclusive Education; 1726 Master of Education (Leadership) or 1723 Master of Education (Social Ecology).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique current research on assistive technology to support learning and promote inclusive practices in educational settings and beyond
2. Assess the learning environment, curriculum and a child's participation so as to contribute to the decision-making process about which assistive technologies, programs or devices will support learning and inclusion
3. Evaluate the suitability of a range of assistive technologies, programs and devices to enhance equitable participation
4. Collaborate with families, professionals, other educators and teaching assistants to implement strategies consistently that embed appropriate assistive technologies within learning environments to promote learning and inclusion
5. Demonstrate leadership in implementing technologies to enhance the learner's continuity of learning between home and inclusive settings (or across environments) and through transitions to the next learning environment

Subject Content

1. Benefits and challenges of using assistive technology.
2. Evaluation of a range of digital media, computers, software, applications, programs and assistive technology and devices.
3. Assessment and decision-making to enhance inclusive teaching and learning using assistive technologies.
4. Collaboration to support integrated use of technology and continuity across environments.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Essay: Empirical review regarding the benefits and challenges of assistive technology	2,500 words	50	N	Individual

Report:	2,500 words	50	N	Individual
Assess learner's needs and propose and justify an Assistive Technology solution				

Teaching Periods

TEAC 7147 Theorising Play

Credit Points 10

Legacy Code 102104

Coordinator Yvette Barton ([https://directory.westernsydney.edu.au/search/name/Yvette Barton/](https://directory.westernsydney.edu.au/search/name/Yvette%20Barton/))

Description Play provides a foundation for children's development, learning and wellbeing in the early years. An integral part of this subject will be the focus on inquiry, emphasising a critical approach to play and its pedagogical potential to facilitate children's development and wellbeing. Various theoretical orientations will be considered in the study of play. Further, the subject provides guidelines to educators for implementing play based curriculum, an integral component of The Early Years Learning Framework as well as the Health and Physical Education curriculum in the school years. Students will apply their knowledge of theory and research to undertake a case study of a child and make recommendations for practice.

School Education

Discipline Teacher Education: Early Childhood

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) Students enrolled in 1708 Bachelor of Arts (Pathway to Teaching Birth-5/Birth -12) or 6017 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Birth-5/Birth-12) must have successfully completed 160 credit points

Equivalent Subjects TEAC 7085 Play development and learning

Restrictions

Students must be enrolled in 1708 Bachelor of Arts (Pathway to Teaching Birth-5/Birth -12), 1783 Master of Teaching (Birth-5 Years/ Birth-12 Years) or 6017 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Birth-5/Birth-12).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the importance of play for children's development, learning, health and wellbeing and their physical education.
2. Analyse the major theories and contemporary research relating to play, development and learning and the implications for early childhood educators.
3. Explain the diversity in children's play contexts, family values and practices and opportunities provided for children's play and the relevance of these for planning children's play in prior-to-school and school contexts.
4. Propose plans for children's play, development and learning, including active play, movement activities and games.

5. Apply a case study approach to understanding children's play, development and learning

Subject Content

1. Contemporary perspectives on play.
2. Classical and modern theories and research on play, development and learning and critique of developmentally and culturally appropriate play.
3. Play in a digital world.
4. Promoting health and physical education – being healthy, safe and active play, games, health-related physical activities, movement skills.
5. Diversity in play (age, gender, society, culture, socio-economic status, additional needs children).
6. Play for promoting holistic development (physical, cognitive, language, socio-emotional and spiritual developments).
7. Play and curriculum: Approaches to play-based curriculum.
8. Researching play, development and learning: A case study approach.
9. Play and pedagogy: Scaffolding play and appropriate adult and peer interventions.
10. Planning for play curriculum and environments: Documentation, planning and assessment of play and play environments

Inherent Requirements

Students must meet the Inherent Requirements for the Master of Teaching (Birth – 5 Years / Birth -12 Years).

The Master of Teaching (Birth – 5 Years / Birth – 12 Years) Inherent Requirements have been approved by Disability Services. The Inherent Requirements are currently available in the WSU Inherent Requirements website: https://www.westernsydney.edu.au/ir/inherent_requirements/inherent_requirements_for_teaching_courses_postgraduate/master_of_teaching_birth_to_5_yearsbirth_to_12_years (https://www.westernsydney.edu.au/ir/inherent_requirements/inherent_requirements_for_teaching_courses_postgraduate/master_of_teaching_birth_to_5_yearsbirth_to_12_years/)

TEAC 7148 Transformative Learning

Credit Points 10

Legacy Code 101658

Coordinator David Wright ([https://directory.westernsydney.edu.au/search/name/David Wright/](https://directory.westernsydney.edu.au/search/name/David%20Wright/))

Description This subject provides opportunities to examine and apply theories drawn from critical pedagogy, transformative learning and ecological thinking. It challenges students to critically examine the relationships through which personal and social knowledge is constructed and their efficacy in the construction of learning for the future. Inherent in such thinking are questions about the processes of change in education systems that lead through equity, inclusiveness, wellbeing, social justice and ecological sustainability.

School Education

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Provide evidence of understanding of learning as a social process that is profoundly influenced by prior assumptions, in the form of worldviews, belief and insights that are largely 'taken-for-granted',
2. Recognise that assumptions (or epistemologies) reflect personal values and ideologies constructed through personal, social and cultural relationships,
3. Critically analyse the epistemic origins, developments and systemic qualities of Education and its construction of individual epistemic perspectives (particularly as they relate to learning),
4. Effectively communicate learning about the critical relationship between changes in the world 'out there' and changes in personal understanding (cognitive systems) of processes of 'making meaning' of that world,
5. Critically analyse personal relationships to the assumptions, informed by learning systems, that (a) challenge, and (b) underpin ecological sustainability,
6. Analyse the relationships between social discontent, critical reflectivity, social learning processes, epistemic awareness and transformative learning,
7. Develop a policy response, in an area of personal significance, that reflects a transformative perspective upon learning

Subject Content

1. Epistemological foundations of learning;
2. Transformative learning theory and the experience of transformation;
3. The construction of learning through social-ecological experience
4. The communication of learning.
5. Social-ecological sustainability and learning;
6. Applications of transformative processes;
7. Transformative pedagogies

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Essay	2,500-3,000 words	40	N	Individual
Case Study	3,500-4,000 words	60	N	Individual

Teaching Periods

TEAC 7149 Understanding and Teaching Children

Credit Points 10

Legacy Code 102077

Coordinator Bettina Stevanovic ([https://directory.westernsydney.edu.au/search/name/Bettina Stevanovic/](https://directory.westernsydney.edu.au/search/name/Bettina%20Stevanovic/))

Description From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. This unit is designed to facilitate prospective teachers to develop the dispositions and critical skills to create learning communities that are academically challenging, developmentally responsive, socially equitable and promote social and emotional wellbeing. The unit

highlights the interacting contributions of biology and environment to the development of children and explores how teachers' knowledge of this process informs their instructional strategies. Specifically, this unit examines a body of classic, as well as current theories, research and practice relating to the cognitive, physiological, and social/affective needs of children and focuses on the relevance of these for classroom practice. Particular emphasis is given to developing responsive teaching practices which promote social and emotional wellbeing of children and are underpinned by high-quality relationships which extend to include the valuing of families and the wider community.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) Students enrolled in 1651 Bachelor of Arts (Pathway to Teaching Primary) 1822 Bachelor of Arts (Pathway to Teaching Primary) Dean's Scholars 3756 Bachelor of Science (Pathway to Teaching Primary/Secondary) or 6019 Diploma in Arts Bachelor of Arts (Pathway to Teaching Primary) must have completed 160 credit points before enrolling in this subject

Restrictions

Note that only students enrolled at WSU Online may register in the WSU Online subjects offered at that location.

Students must be enrolled in 1663/1781 Master of Teaching (Primary), 3756 Bachelor of Science (Pathway to Teaching Primary/Secondary), 1822 Bachelor of Arts (Pathway to Teaching Primary) Dean's Scholars, 1651 Bachelor of Arts (Pathway to Teaching Primary) or 6019 Diploma in Arts/Bachelor of Arts (Pathway to Teaching Primary).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Assess instructional strategies designed to support students' learning and development as well as their motivation and engagement.
2. Apply an understanding of issues relating to children's development, giving regard for social and cultural differences.
3. Utilise evidence-based strategies which promote positive learning environments and support children's wellbeing and their development.
4. Evaluate external supports and programs to assist with the promotion and prevention of at-risk and marginalised children.
5. Develop an action plan underpinned by relevant theory and research to address the wellbeing and development needs of a child experiencing difficulties at school.

Subject Content

1.??? Development in context: Bronfenbrenner's ecological model

2.??? Learning, cognition and memory: Learning as a constructive process

-??????????? Information processing theories

-??????????? Metacognition and self-regulation

3.??? Learning in context: Theories of learning and their implications for instruction and constructing learning environments

-??????????? Behaviourism

-??????????? Social cognitive theory

-??????????? Constructivism

-??????????? Humanism

-??????????? Instructional strategies applied to learning in context

-??????????? Motivation and affect

-??????????? Learning and teaching preferences for Aboriginal and Torres Strait Islander peoples

4.??? Children's development and related needs in context:

-??????????? Cognitive, physiological, and social/affective develop

TEAC 7150 Universal Design for Learning

Credit Points 10

Legacy Code 102150

Coordinator Annette Sartor ([https://directory.westernsydney.edu.au/search/name/Annette Sartor/](https://directory.westernsydney.edu.au/search/name/Annette%20Sartor/))

Description Developing the ability to meet the needs of a diverse group of learners within a flexible learning situation is critical to promote inclusion. This subject reviews multiple approaches and strategies employed (e.g. accommodation, adjustment, differentiation) and advocates for Universal Design for Learning to achieve this goal. Strategies are critiqued based on their capacity to enhance learning outcomes for individuals with additional needs and to advance inclusion. These analyses are then used to develop strategies and methods which can facilitate the learning and inclusion of individuals with a range of abilities, skills and needs. Students evaluate strategies, plan and reflect on a learning experience based on Universal Design for Learning.

School Education

Discipline Teacher Education: Special Education

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7048 - Inclusion in Practice

Restrictions

Students must be enrolled in 1714 Master of Teaching (Secondary), 1720 Master of Inclusive Education or 1721 Graduate Certificate in Inclusive Education

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the principles of UDL to promote authentic learning for diverse learners.
2. Assess the effect of diversity within the educational setting for learning and teaching.
3. Implement practices that facilitate continuities between systems and settings.
4. Design programs that foster positive relationships between individuals with additional needs and their peers.
5. Establish effective, collaborative relationships with families, colleagues, and other professionals to optimise the planning, implementation and monitoring of learning experiences.
6. Document the learner's strengths and needs, and how these will be addressed within the educational setting.
7. Evaluate the effect of UDL on learner's development and belonging.
8. Reflect on personal and professional values, practices and skills to implement UDL.

Subject Content

1. Universal Design for Learning
2. Bronfenbrenner's ecological model, M2ECCA (Methods of instruction, Materials of instruction, Environment of the classroom,

Content of instruction, Collaboration, Assessment), EYLF (Early Years Learning Framework), Loreman's 7 pillars of support, Building Blocks, Ambrose's model of change

3. Adaptations and accommodations
4. Diversity and impact on learning
5. The social ecology of the educational setting
6. Considering the needs of the learner with a disability, their families, their peers and the educator in an inclusive setting (e.g., cooperative learning)
7. Differentiating teaching, learning and assessing to promote development and belonging for all individuals in the setting.
8. Collaboration for inclusion
9. Documenting the learner's strengths and needs, and progress
10. Developing an inclusion plan
11. Planning for transitions

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TEAC 7151 Applied Mathematics and Science in Secondary STEM Education

Credit Points 10

Legacy Code 102764

Coordinator Les Vozzo ([https://directory.westernsydney.edu.au/search/name/Les Vozzo/](https://directory.westernsydney.edu.au/search/name/Les%20Vozzo/))

Description This unit develops in-service teachers' knowledge and skills in the application of mathematics and science in the STEM (science, technology, engineering and mathematics) disciplines. The unit content and assessments are designed to (1) build teachers' foundational skills in science/mathematics, and (2) build teachers' professional skills in the implementation of science/mathematics in their classrooms. A particular focus of the unit is how science/mathematics can be used to authentically integrate curriculum content from across the different STEM disciplines through inquiry- and problem-based learning, with the ultimate aim of enhancing student engagement and achievement in the STEM disciplines.

School Education**Discipline** Teacher Education: Secondary**Student Contribution Band** HECS Band 1 10cp**Level** Postgraduate Coursework Level 7 subject**Restrictions**

Must be enrolled in 1882 Graduate Certificate in Secondary STEM Education.

Assumed Knowledge

Students are assumed to be qualified secondary school teachers with classroom experience in delivering the NSW or Australian curriculum.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate foundational knowledge and skills in mathematics and science as applied in integrated secondary STEM education
2. Design teaching and learning sequences which apply mathematics and science as part of integrated STEM units in secondary school contexts.
3. Critically appraise the role of mathematics and science in creating authentic learning experiences for students in secondary school contexts, including through inquiry- and problem-based learning.

Subject Content

- development of An Understanding of mathematical and scientific content relevant to integrated STEM Teaching and learning in secondary schools.
- using mathematics and science to Create authentic learning experiences for secondary school students.
- application of effective mathematical and scientific pedagogy in secondary school contexts.
- inquiry- and Problem-based learning with science/mathematics in integrated STEM Teaching and learning.

Assessment

TEAC 7152 Applied Robotics and Programming in Secondary STEM Education

Credit Points 10**Legacy Code** 102763

Coordinator Nathan Berger ([https://directory.westernsydney.edu.au/search/name/Nathan Berger/](https://directory.westernsydney.edu.au/search/name/Nathan%20Berger/))

Description This unit develops in-service teachers' knowledge and skills in the application of robotics and coding in the STEM (science, technology, engineering and mathematics) disciplines. The unit content and assessments are designed to firstly build teachers' foundational skills in robotics/coding, and secondly, build teachers' professional skills in the implementation of robotics/coding in their classrooms. A particular focus of the unit is how robotics/coding can be used to authentically integrate curriculum content from and across the different STEM disciplines through inquiry- and problem-based learning, with the ultimate aim of enhancing student engagement and achievement in the STEM disciplines.

School Education**Discipline** Teacher Education: Secondary**Student Contribution Band** HECS Band 1 10cp**Level** Postgraduate Coursework Level 7 subject**Restrictions**

Students must be enrolled in 1882 Graduate Certificate in Secondary STEM Education, 1847 Master of Education (STEM), 1911 Master of Education or 1714 Master of Teaching (Secondary).

Assumed Knowledge

Students are assumed to be qualified secondary school teachers with classroom experience in delivering the NSW or Australian curriculum.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate foundational knowledge and skills in both robotics and programming languages.
2. Design teaching and learning sequences which apply robotics and programming languages as part of integrated STEM units in secondary school contexts.
3. Critically appraise the role of robotics and programming languages in creating authentic learning experiences for students in secondary school contexts, through both inquiry- and problem-based learning.

Subject Content

- Robots and other programmable autonomous systems and their application in educational contexts.
- programming languages for The Creation of computer programs and The control of robotics and other autonomous systems.
- using robotics and coding to Create authentic learning experiences for school students.
- inquiry- and Problem-based learning with robotics/coding in integrated STEM Teaching and learning.

TEAC 7153 Inclusive Education: Principles and Practices

Credit Points 10

Legacy Code 102746

Coordinator Kerry Staples ([https://directory.westernsydney.edu.au/search/name/Kerry Staples/](https://directory.westernsydney.edu.au/search/name/Kerry%20Staples/))

Description This unit examines the theoretical, legislative, ethical and policy frameworks that inform inclusive practices in early childhood and school settings. Inclusive principles and evidence-based practices will be critically analysed to identify best practice for assessment for learning, effective planning, teaching, monitoring, and evaluating learning when working with children and young people with a range of abilities and disabilities. The importance of establishing collaborative partnerships with families, educational professionals and community support services will be examined and the role of such partnerships in promoting social inclusion and enhanced learning outcomes, health and wellbeing for all children and young people determined.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7052 - Inclusive Practices TEAC 7053 - Inclusive Teaching for Effective Learning TEAC 7049 - Inclusive Education –Theory Policy and Practice

Restrictions

Students must be enrolled in one of the three following programs: 1714 Master of Teaching (Secondary) 1781 Master of Teaching (Primary) 1783 Master of Teaching (Birth-5 Years/Birth-12 Years) 1848 Master of Teaching (Secondary) STEM

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse theoretical, ethical, philosophical, legislative and policy frameworks underpinning inclusive practices.
2. Reflect on how community and personal assumptions, values and attitudes influence interactions, pedagogies and the provision of high-quality inclusive environments.
3. Critically assess the enablers and barriers to play and learning which facilitate access, meaningful participation, and social inclusion.
4. Apply knowledge of development, learning and dispositions to identify and refer children/students who would benefit from educational and community support services.
5. Design inclusion plans, personalised learning programs/ lessons, and differentiated curriculum, in partnership with families and other stakeholders, that promote authentic learning experiences, coordinated transitions and continuity of learning.
6. Create responsive physical and social environments, incorporating technology and resources that facilitate health, wellbeing and inclusion.

Subject Content

1. Children/students with disability and diverse learning needs in the context of their family, community and learning environment.
2. Theoretical, ethical, philosophical, legislative and policy frameworks for inclusive practices.
3. Personal and community assumptions, values and attitudes and the impact on the provision of high-quality inclusive practices for children and learners.
4. Enablers and barriers to learning and development: identification, assessment, and referral.
5. Design, implement, monitor and evaluate, personalised education, inclusion and transition plans, lessons, and programs.
6. Inclusive learning environments for diverse children and learners.
7. Teaching strategies and adjustment for inclusive play and learning.
8. Collaboration and partnership with families/caregivers and community support services and other stakeholders using family-centred/caregiver-centred and/or child/young people-centred approaches.
9. Incorporating technology and resources to enhance inclusive education and learning.

TEAC 7154 Professional Experience 1

Credit Points 10

Legacy Code 102792

Coordinator Marion Sturges ([https://directory.westernsydney.edu.au/search/name/Marion Sturges/](https://directory.westernsydney.edu.au/search/name/Marion%20Sturges/))

Description This subject is the first Professional Experience subject of the Master of Teaching (Primary) and Master of Teaching (Secondary) programs. This subject incorporates a 30-day placement in a NSW school. It is designed to introduce all students to the philosophical, ethical, practical and pedagogical perspectives of becoming a teacher in diverse, contemporary educational settings. The aim of this subject is to enable you to proactively engage in real-life educational settings to learn and enhance your professional development as a future teacher. This subject gives you the opportunity to explore the relationship between practical and theoretical knowledge of teaching. This subject will provide you with an opportunity to explore a range of learning activities that occur inside and outside the classrooms, and the roles of the teaching and non-teaching staff within the school. Through ongoing observation, supervised teaching and contribution in the wider school community, the subject ensures you work towards the achievement of the national standards for a graduate teacher.

Students enrolled in 1714 - Master of Teaching (Secondary) must have successfully completed TEAC 7004 Adolescent Development and Teaching TEAC 7032 Diversity Social Justice and Learning and TEAC 7027 Designing Teaching and Learning before enrolling in this subject

Co-requisite(s) Students enrolled in 1714 - Master of Teaching (Secondary) must have successfully completed or be enrolled in TEAC 7082 Pedagogy for Positive learning Environments
Students enrolled in 1781 - Master of Teaching (Primary) must have successfully completed or be enrolled in TEAC 7141 Teaching and Learning in Classrooms

Equivalent Subjects TEAC 7097 - Primary Professional Practice 1 TEAC 7135 - Secondary Professional Practice I TEAC 7109 - Professional Practice 1 TEAC 7102 - Professional Experience 1 TEAC 7136 - Secondary Professional Practice 1 STEM

Restrictions

Students must be enrolled in the 1714 Master of Teaching (Secondary), 1846 Graduate Certificate in Education (Curriculum Specialisation), 1781 Master of Teaching (Primary) or 1848 Master of Teaching (Secondary) STEM.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand how schools and classrooms are organised and managed.
2. Understand relevant legislative, administrative and organisational policies and processes.

3. Plan lessons that demonstrate knowledge of students, learning theory, quality teaching, Australian Curriculum and NSW Syllabus documents, with support from senior educators.
4. Implement required lessons that use appropriate pedagogies to engage diverse learners and address learning goals, with support from senior educators.
5. Propose ideas/solutions to enhance safe and challenging learning environments based on relevant theories, policies and practices.
6. Utilise appropriate resources including ICTs and other technologies to foster students' engagement and to support learning, with guidance from senior educators.
7. Interact ethically and professionally with staff, students, peers, and the broader school community
8. Reflect on own learning and feedback from senior educators to develop their teaching performance with the Australian Professional Standards for Graduate Teachers.

Subject Content

1. Organisation of professional experience (Placement schools; planning and teaching requirements, understanding expectations).
2. Understanding the context of contemporary Australian schools and classrooms.
3. The roles and responsibilities of a teacher in NSW schools (Australian Professional Standards for Teachers, policies, ethics).
4. The Professional Teacher –effective communication, professional interactions, ethical and professional conduct.
5. Who are my learners? (impact of physical, cultural, social, linguistic and intellectual characteristics on learning; strategies to build rapport with students).
6. How can I make the classroom work for me? (Student engagement, Teaching strategies, assessment, ICT in education).
7. How do I engage in critical reflection? (reflection on teaching-WHAT-WHY-HOW; action research; Australian Professional Standards for Graduate Teachers).
8. How do I use and respond to feedback in teaching.

Special Requirements

Legislative pre-requisites

1. Students are required to complete the **two** components of the Working with Children Check (WWCC) process leading to (a) the issuance of a clearance number under the category of volunteer and (b) verification of the clearance number with the NSW Department of Education.

a) Students will need to:

- i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.
- ii. Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.
- iii. Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record. WesternNow Student Portal link (https://wsu.service-now.com/student/?id=sc_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed)

b) Students will need to:

- i. Access the NSW Department of Education WWCC Verification declaration form <https://online.det.nsw.edu.au/jecpc/crc/wwcc.jsf>
- ii. Carefully read the information about Identity Documents and obtain a copy of the relevant ID documents.
- iii. Complete and submit the verification declaration form.

iv. Once your WWCC verification is complete you will receive an email reply from the DoE Probity Unit confirming your WWCC number has been verified.

v. Submit the verification confirmation email via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.

2. Students must complete the **two** components of the NSW Department of Education's Child Protection Awareness Training (CPAT)

a) Students will need to:

- i. Access the NSW Department of Education's MyPL website <https://mypl.education.nsw.gov.au/>
- ii. Complete the online Child Protection Awareness Training: Induction
- iii. Save certificate of completion
- iv. Submit certificate via WesternNow Student Portal

b) Students will need to:

- i. Access the NSW Department of Education's MyPL website <https://mypl.education.nsw.gov.au/>
- ii. Complete the Child Protection Awareness Training (CPAT): Annual Update for the calendar year
- iii. Save certificate of completion
- iv. Submit certificate via WesternNow Student Portal

Both certificates will be recorded on your student record as Special Requirements with the end date for the Annual CPAT recorded. The CPAT: Annual Update will need to be renewed and submitted on an annual basis.

Students who have not completed both components of the Child Protection Awareness Training will need to withdraw from the subject.

3. Students must complete the ASCIA anaphylaxis e-training and submit their certificate to Submit certificate via WesternNow Student Portal.

4. Students must meet the Inherent Requirements for the Master of Teaching (Primary) (<https://hbook.westernsydney.edu.au/programs/master-teaching-primary/>), or the Master of Teaching (Secondary) (<https://hbook.westernsydney.edu.au/programs/master-teaching-secondary/>).

5. Students must satisfactorily complete the National Literacy and Numeracy TEST prior to undertaking the final Professional Experience placement in this program.

6. From 2H/Spring 2022, students must be COVID-19 fully vaccinated as per the NSW Public Health Order and NSW Department of Education requirement. If a student is unable to be get an approved vaccination for medical reasons, they will need to approach their doctor who must complete a contraindication form available at: [covid-19-vaccine-contraindication.pdf \(nsw.gov.au\)](https://www.health.nsw.gov.au/Infectious/covid-19/vaccine/Documents/covid-19-vaccine-contraindication.pdf) (<https://www.health.nsw.gov.au/Infectious/covid-19/vaccine/Documents/covid-19-vaccine-contraindication.pdf>). Students to submit details of all vaccination doses or contraindication form via Western Now form for it to be recorded on their academic record.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Intra-session Exam	2 x 1 hour	S/U	Y	Individual
Professional Placement Performance	30 days	S/U	Y	Individual

Professional Placement Performance 30 days S/U Y Individual

Reflection 500 words S/U Y Individual

TEAC 7155 Professional Experience 2

Credit Points 10

Legacy Code 102793

Coordinator Jacqueline Humphries ([https://directory.westernsydney.edu.au/search/name/Jacqueline Humphries/](https://directory.westernsydney.edu.au/search/name/Jacqueline%20Humphries/))

Description Professional Experience 2 is a final capstone unit in your Master of Teaching course. The aim of this unit is to enable education students to proactively engage in real-life educational settings to learn and enhance their professional development as a future teacher. This second professional experience unit provides 30 of the 60 required professional experience days. This provides you with an opportunity to explore ranges of learning activities that occurs inside and outside the classrooms and the roles of the teaching and non-teaching staff within the school. You will also have opportunity to reflect on the teaching and learning cycle and refine your competencies as a beginning teacher under the supervision of qualified educators. This unit includes the TPA (Teaching Performance Assessment) which is designed to assess Teacher Education Students teaching as measured by the Australian Professional Standards for Teachers at the Graduate level.

School Education

Discipline Teacher Education, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) TEAC 7154

Co-requisite(s) -

Equivalent Subjects TEAC 7110 Professional Practice II TEAC 7098 Primary Professional Practice 2 TEAC 7105 Professional Experience II TEAC 7137 Secondary Professional Practice 2 TEAC 7138 Secondary Professional Practice 2 - STEM

Restrictions

Students must be enrolled in 1714 Master of Teaching (Secondary), 1781 Master of Teaching (Primary) or 1848 Master of Teaching (Secondary) STEM.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply knowledge of student diversity, current research, quality teaching, Australian Curriculum and NSW Syllabus documents to competently plan, deliver, assess and evaluate lesson sequences and units of work.
2. Implement a wide range of differentiated lessons using appropriate pedagogies to engage diverse learners and address learning goals.

3. Propose ideas/solutions to enhance safe and challenging learning environments based on relevant theories, policies and practices.
4. Utilise appropriate resources including ICTs and other technologies to foster students' engagement and to support learning.
5. Communicate ethically and professionally with students, peers, staff, families and community.
6. Identifies a range of appropriate professional associations and how they can contribute to professional learning and improve teaching practices to support student learning.
7. Compiles a range of strategies to build and maintain teacher wellbeing and resilience.
8. Use evidence-based approaches to reflect and evaluate their professional practice that demonstrate the achievement of the professional teaching standards for graduates.

Subject Content

1. Teaching and Planning Cycle- using data and assessment evidence about students to inform lesson planning, assessment and the provision of feedback to students.
2. Critical self-reflection with reference to the Australian Professional Standards for Graduate Teachers.
3. Connecting research with practice to inform planning and teaching.
4. Pedagogical knowledge to support teaching and learning decision making.
5. Essential skills and knowledge as a teaching professional including, professional identity, registering as a teacher, professional associations and professional learning.
6. Teacher wellbeing and resilience.

Special Requirements

Legislative pre-requisites

1. Students are required to complete the **two** components of the Working with Children Check (WWCC) process leading to (a) the issuance of a clearance number under the category of volunteer and (b) verification of the clearance number with the NSW Department of Education.

a) Students will need to:

- i. Access the Commission for Children and Young People website and complete an online application form to generate an application number.
- ii. Present an application number and identification to a Service NSW office who will issue a Working with Children Check number via mail or email.
- iii. Submit the letter with a valid Working With Children Check number via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record. WesternNow Student Portal link (https://wsu.service-now.com/student?id=sc_cat_item&sys_id=9c8b61a2dbbed8504f58e434059619ed)

b) Students will need to:

- i. Access the NSW Department of Education WWCC Verification declaration form <https://online.det.nsw.edu.au/jecpc/crc/wwcc.jsf>
- ii. Carefully read the information about Identity Documents and obtain a copy of the relevant ID documents.
- iii. Complete and submit the verification declaration form.
- iv. Once your WWCC verification is complete you will receive an email reply from the DoE Probity Unit confirming your WWCC number has been verified.
- v. Submit the verification confirmation email via WesternNow Student Portal. The document is trimmed and recorded as a Special Requirement on your academic record.

2. Students must complete the **two** components of the NSW Department of Education's Child Protection Awareness Training (CPAT)

a) Students will need to:

- i. Access the NSW Department of Education's MyPL website <https://mypl.education.nsw.gov.au/>
- ii. Complete the online Child Protection Awareness Training: Induction
- iii. Save certificate of completion
- iv. Submit certificate via WesternNow Student Portal

b) Students will need to:

- i. Access the NSW Department of Education's MyPL website <https://mypl.education.nsw.gov.au/>
- ii. Complete the Child Protection Awareness Training (CPAT): Annual Update for the calendar year
- iii. Save certificate of completion
- iv. Submit certificate via WesternNow Student Portal

Both certificates will be recorded on your student record as Special Requirements with the end date for the Annual CPAT recorded. The CPAT: Annual Update will need to be renewed and submitted on an annual basis.

Students who have not completed both components of the Child Protection Awareness Training will need to withdraw from the subject.

3. Students must complete the ASCIA anaphylaxis e-training and submit their certificate to Submit certificate via WesternNow Student Portal.

4. Students must meet the Inherent Requirements for the Master of Teaching (Primary) (<https://hbook.westernsydney.edu.au/programs/master-teaching-primary/>), or the Master of Teaching (Secondary) (<https://hbook.westernsydney.edu.au/programs/master-teaching-secondary/>).

5. Students must satisfactorily complete the National Literacy and Numeracy TEST prior to undertaking the final Professional Experience placement in this program.

6. From 2H/Spring 2022, students must be COVID-19 fully vaccinated as per the NSW Public Health Order and NSW Department of Education requirement. If a student is unable to be get an approved vaccination for medical reasons, they will need to approach their doctor who must complete a contraindication form available at: [covid-19-vaccine-contraindication.pdf](https://www.health.nsw.gov.au/Infectious/covid-19/vaccine/Documents/covid-19-vaccine-contraindication.pdf) (nsw.gov.au) (<https://www.health.nsw.gov.au/Infectious/covid-19/vaccine/Documents/covid-19-vaccine-contraindication.pdf>). Students to submit details of all vaccination doses or contraindication form via Western Now form for it to be recorded on their academic record.

Assessment

TEAC 7156 Aboriginal Education: Past, Present and Future

Credit Points 10

Legacy Code 102810

Coordinator Phil Devitt ([https://directory.westernsydney.edu.au/search/name/Phil Devitt/](https://directory.westernsydney.edu.au/search/name/Phil%20Devitt/))

Description This subject builds the capacity of students to work in culturally competent and sensitive ways in relation to Aboriginal and Torres Strait Islander education in primary schools. It allows for the development of understandings of the similarities and/or diversities of local Aboriginal and Torres Strait Islander groups including culture, histories, languages and identity. It examines the social and cultural contexts that influence engagement by Aboriginal and Torres Strait Islander children, families and communities in schooling. It explores ways of improving engagement through effective school culture, curriculum and community approaches. The unit explores the protocols for successfully working with Aboriginal children, families and communities in education settings to maximise learning outcomes for Aboriginal and Torres Strait Islander students. By investigating current approaches for teaching Aboriginal and Torres Strait Islander children and integrating Aboriginal knowledges, perspectives and culturally sensitive pedagogies into schooling, the students develop their own practices in providing an inclusive learning environment for all children.

The unit explores the protocols for successfully working with Aboriginal children, families and communities in education settings to maximise learning outcomes for Aboriginal and Torres Strait Islander students.

School Education

Discipline Teacher Education: Primary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) Students enrolled in 1651 Bachelor of Arts (Pathway to Teaching Primary) 1822 Bachelor of Arts (Pathway to Teaching Primary) Dean's Scholars 3756 Bachelor of Science (Pathway to Teaching Primary/Secondary) or 6019 Diploma in Arts Bachelor of Arts (Pathway to Teaching Primary must have successfully completed 160 credit points

Restrictions

Note that only students enrolled at WSU Online may register in the WSU Online subjects offered at that location.

Students must be enrolled in 1781 Master of Teaching (Primary), 1783 Master of Teaching (Birth - 5 Years/Birth - 12 Years), 1651 Bachelor of Arts (Pathway to Primary Teaching), 1822 Bachelor of Arts (Pathway to Teaching Primary) Dean's Scholars, 3756 Bachelor of Science (Pathway to Teaching Primary/Secondary) or 6019 Diploma in Arts/ Bachelor of Arts (Pathway to Teaching Primary).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and implement the incorporation of Aboriginal and Torres Strait Islander histories, knowledges and experiences into the curriculum. (addresses NESA item 1,2,3)
2. Critically analyse how teachers' understandings of Aboriginal and Torres Strait Islander knowledges, cultural issues, languages and identities can impact on the educational outcomes of Aboriginal and Torres Strait Islander students. (addresses NESA item 1,2,4,5)
3. Identify and apply theories of cultural competence and culturally responsive teaching for working effectively with Aboriginal and Torres Strait Islander children, families and communities. (addresses NESA item 7,8)
4. Evaluate appropriate Aboriginal and Torres Strait Islander studies teaching resources and the importance of consultation with Indigenous communities and external personnel with appropriate qualifications and/or knowledge. (addresses NESA item 1,2,3,8)
5. Explain and apply Aboriginal and Torres Strait Islander peoples' learning styles and pedagogies. (addresses NESA item 1,6)
6. Create pedagogically appropriate Aboriginal and Torres Strait Islander learning and assessment activities for teaching a range of curriculum areas. (addresses NESA item 6,7)
7. Understand and apply the knowledge of relationships beyond the school community, to engage in a culturally sensitive manner with Aboriginal and Torres Strait Islander families and communities. (addresses NESA item 1,5,6,7,8)

Subject Content

1. Local knowledge, histories, languages and identities relating to Aboriginal and Torres Islander peoples.
2. Social, cultural (including the connections to community, country and kin) and contextual influences (including media representations) on the identities of Aboriginal and Torres Strait Islander people.

- Cultural awareness, competence and sensitivity for providing inclusive educational opportunities for Aboriginal and Torres Strait Islander children, families and communities.
- Culturally appropriate pedagogies, resources, assessments, terminology, learning styles and communication.
- Aboriginal and Torres Strait Islander content in the curriculum.
- The importance of building relationships and using appropriate protocols when working with Aboriginal and Torres Strait Islander students, families, workers and communities.
- Current and historical government policies and programs and their impacts on Aboriginal and Torres Strait Islander communities.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

TEAC 7157 Action Research in Teaching

Credit Points 10

Legacy Code 102811

Coordinator Helen Lelei ([https://directory.westernsydney.edu.au/search/name/Helen Lelei/](https://directory.westernsydney.edu.au/search/name/Helen%20Lelei/))

Description This unit provides an opportunity for students to engage with literature on a particular aspect of a research topic and design a research project in a team. Students will: locate and select relevant research literature to investigate a particular research question; analyse key ideas, assumptions and domains of knowledge in the literature around that question; identify appropriate research methods and designs for answering it; critically apply appropriate forms of data collection and data analysis to that research design, and develop research findings into an informed discussion linking to broader academic conversations around the field being researched.

School Education

Discipline Teacher Education: Secondary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7117 - Researching Teaching Learning 2

Restrictions

Must be enrolled in the 1714 Master of Teaching (Secondary) and have completed 90cp.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Select relevant primary research literature to investigate a nominated action research question.
- Analyse key ideas, assumptions and domains of knowledge in the literature related to a nominated research question.
- Select appropriate research methods relevant to action research design.
- Demonstrate understanding of the ethical frameworks impacting on research in education.
- Critically apply appropriate forms of data collection and data analysis to a research design.
- Apply research findings to inform discussion of the nominated theme, linking to the broader research area.

Subject Content

1. How is research on a nominated key problem or research question in education best designed?
2. What is the goal of a literature review?
3. What range of data can be gathered to answer a particular research question?
4. What methods, instruments and approaches are most appropriate to answer a particular research question?
5. How is data collected and analysed?
6. What are evidence and ethics?
7. What modes of research are commonly used in practitioner research in education (e.g. text analysis, action research, case studies, surveys)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	15 minutes each	20	N	Individual
Literature Review	2,000 words	50	N	Individual
Presentation	20 minutes	30	N	Individual

Prescribed Texts

TEAC 7158 Researching Teaching and Learning

Credit Points 10

Legacy Code 102852

Coordinator Erika Smith ([https://directory.westernsydney.edu.au/search/name/Erika Smith/](https://directory.westernsydney.edu.au/search/name/Erika%20Smith/))

Description This unit builds on the premise that, in contemporary education environments, teachers continue to develop their professional knowledge and practice through their engagement in reflective inquiry. The capacity to read and make sense of research is an important professional attribute for teachers interested in sustainable practices, engaged inquiry learning by adolescents, and diversity, social justice and equity. The unit provides pre-service teachers with a starting point and practical insights into the day-to-day decision making of educators. The content will follow the order and logic that experienced researchers take in order to ensure quality in their research, and also to ensure that it is valid, reliable, ethical, useful and socially responsible. Given the professional skills required by teachers, the unit pays particular attention to the elements involved in action research.

School Education

Discipline Teacher Education: Secondary

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7118 - Researching Teaching and Learning 1

Restrictions

Students must be enrolled in the Master of Teaching (Secondary) or Master of Teaching (Primary)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Utilise a range of academic sources to select and evaluate published research relevant to a given educational issue or debate.
2. Engage critically with a range of research literature on a given educational issue or debate.
3. Analyse the key ideas, assumptions and domains of knowledge underlying aspects of research on a given educational issue or debate.
4. Contrast, synthesise and articulate key arguments in public discourse around educational issues or debates.
5. Interpret data concerning educational issues or debates in the educational research landscape.
6. Demonstrate how different sources and types of secondary school classroom/student data are suitable to respond to different typologies of research questions and associated aims.
7. Explore how research data can be used to make evidence-based recommendations for teaching and learning.

Subject Content

1. What is the value of engaging with educational research literature?
2. Where do we locate relevant peer-reviewed research?
3. What is the breadth of evidence in educational research?
4. How can research literature inform public policy and debates around educational issues?
5. How do I become a critical reader of educational research?
6. How can engaging with the research literature inform my understanding of how students learn and factor that impact on learning?
7. How can engaging with research literature contribute to my ongoing development as a teacher?

8. What forms of data are schools collecting and how are they interpreting and using the data?
 9. What are the limits and possibilities of data in schools?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

TOUR 1002 Tourism and Global Trends

Credit Points 10

Legacy Code 101901

Coordinator Julie Wen ([https://directory.westernsydney.edu.au/search/name/Julie Wen/](https://directory.westernsydney.edu.au/search/name/Julie%20Wen/))

Description This unit introduces students to the foundational knowledge and skills required for tourism study at UWS and professional practice in a range of tourism related careers. This unit provides students with opportunities to familiarise themselves with

the core concepts and basic theory of tourism management studies. It aims to equip students with an understanding of sustainable tourism, the tourism system, and mega trends of tourism. It covers the global complexity of the tourism industry; of the social, environmental, and political realities; and the role of governments - federal, state and local together with private enterprise in the development of tourism experience, industry practice, and destinations.

School Social Sciences

Discipline Tourism

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects TOUR 1001 - Tourism Sustainability and Global Trends

Incompatible Subjects LGYA 1263 - Sustainable Tourism in Practice
LGYA 1262 - Managing Tourism

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the history and contemporary issues related to tourism .
2. Analyse the tourism system, the complexities of the tourism phenomenon and key tourism concepts.
3. Assess the economic, sociocultural, and environmental impacts of tourism and their management.
4. Identify the functions and strategies of selected organizations/ agencies responsible for promoting and managing tourism.
5. Identify and analyse the changing patterns and trends in global tourism over a given period of time using available data.

Subject Content

1. History and core concepts of leisure, recreation, tourism and sustainability.
2. The tourism system
3. The tourist experience
4. Tourism industry and products
5. Tourism markets and marketing
6. Economic dimensions of tourism
7. Valuation of resources
8. Tourism Satellite Account
9. Forecasting
10. Characteristics of the global industry
11. Destinations and their development: case studies

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Multiple Choice	Three during the semester	30	Y	Individual
Report	1,500 words per student	30	Y	Individual
End-of-session Exam	2 hours, approximately 750 words	40	Y	Individual

TOUR 2001 Issues in Contemporary Heritage

Credit Points 10

Legacy Code 101601

Coordinator Donna James ([https://directory.westernsydney.edu.au/search/name/Donna James/](https://directory.westernsydney.edu.au/search/name/Donna%20James/))

Description The aim of this unit is to get students thinking critically about heritage. To do so, it examines two main questions: "What is heritage?" and "Why does it matter?". While the answers to both may appear fairly straightforward, this unit is designed to make students question and problematise their own assumptions, rethink what is and is not heritage, and consider why, in fact, we even care at all. The unit will introduce concepts such as national identity, ethics, memorialisation, belonging, nostalgia, heritage values, status, control and repatriation. It will also introduce and examine heritage legislation, theory and practice.

School Social Sciences

Discipline Tourism

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Generate an inventory of different types and uses of heritage;
2. Summarize different approaches to heritage in varying geographic and cultural settings;
3. Analyse a contemporary heritage issue in a real-world context, namely: heritage and conflict; heritage ownership; heritage and identity; heritage and politics; looting; repatriation; heritage and destruction; and commemoration;
4. Identify Indigenous standpoints within contemporary heritage debates;
5. Utilise appropriate online technologies to organise, share and communicate heritage-related topics and issues.

Subject Content

The nature of heritage & its philosophies ? what is heritage?

A history of heritage

Heritage taxonomies (natural, cultural, tangible, intangible, digital etc.)

Who owns heritage?

The geography of heritage (global distribution, types of heritage, relationships to different urban, archaeological, historic and natural spaces/places)

Heritage and collective memory

Heritage and Identities (communities, ethnicities, nationalism, patriotism etc.)

Heritage and values; heritage and eurocentrism; non-western heritages

Conflicts over heritage (dissonance)

Heritage and Multiculturalism

Museums and heritage

Heritage and profits (looting, fakes and forgeries)

Repatriation and Indigenous heritage

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Literature Summary	1,200 words	30	N	Individual
Essay	1,500 words	40	N	Individual
E-Portfolio	3 blog entries	20	N	Individual
Workshop Workbook: Completion of tutorial workbook to evidence preparation	Completion of tutorial workbook	10	N	Individual

TOUR 2002 Tourism Industry Experience

Credit Points 0

Legacy Code 101607

Coordinator Julie Wen ([https://directory.westernsydney.edu.au/search/name/Julie Wen/](https://directory.westernsydney.edu.au/search/name/Julie%20Wen/))

Description This unit provides students with opportunities to work with private industry, government or non-government organisations, or commercial establishments, and be able to relate this experience with their professional and academic interests. It is a non fee paying but compulsory component of tourism management degree at Western Sydney University. Students will seek to learn about the many aspects of industry related work including environmental, social, cultural, and business matters.

School Social Sciences

Discipline Tourism

Student Contribution Band

Level Undergraduate Level 2 subject

Equivalent Subjects LGYB 8194 - Tourism Industry Experience

Restrictions Students must be enrolled in 1632 Bachelor of Tourism Management or 1664 Bachelor of Tourism Management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply their University studies to real workplace situations with greater awareness of employer expectations and the nature of their professional field
2. Develop personal and professional skills through the use of various communication genres and hands-on practice
3. Establish and develop their industry network
4. Make contribution to the work experience providers through their access to knowledge, research output, and other academic resources

Subject Content

Students discuss with the subject Coordinator about their design of career

Student explore options of work experience and gain approval from the Coordinator

Work experience provider supplies evaluation of students performance
Coordinator keeps in contact with students and work experience provider

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

VISU 2003 From Ochre to Acrylics to New Technologies

Credit Points 10

Legacy Code 101755

Coordinator Madison Shakespeare (<https://directory.westernsydney.edu.au/search/name/Madison+Shakespeare/>)

Description This unit examines the emergence of the Indigenous Australian visual arts movement. It will provide students with a body of knowledge which explores the transition of art-making as it emerged from an historical cultural practice: from ochre to acrylics to new technologies. In examining the Indigenous visual arts movement beginning with the Papunya Tula artists, students will gain an insight into the significant contribution urban and regional Indigenous artists make to the Australian economy and culture. Students will have the exciting opportunity to participate in site visits and engage with a number of Indigenous visual artists. This unit is available to all Undergraduate students who have open electives.

School Humanities & Comm Arts

Discipline Visual Arts And Crafts

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. outline the Indigenous visual art movement beginning with the Papunya Tula artists;
2. identify different contemporary Indigenous visual artistic styles;
3. differentiate between what is culturally symbolic and what is contemporary visual art form;
4. Examine the way in which Indigenous visual artists are often expected to produce stereotypical works;
5. explore new creative forms in telling their own story.

Subject Content

Historical overview of the emergence of the Indigenous Australian visual arts movement

Introduction to cultural symbolism and meaning in contemporary visual art form

Overview of the different Indigenous visual artistic styles

Understanding of the politics of representation as it relates to Indigenous visual artists

Understanding of the politics of identity/?faboriginality?f/?findigeniety? f

Understanding of the politics of collectors and collections

Understanding of working in creative partnership with Indigenous visual artists

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Reflection	1000 words	25	N	Individual
Professional Task and Presentation	1000 words (for the written part) 10 minutes (for Group Presentation)	35	N	Both (Individual & Group)
Professional Task	2000 words	40	N	Individual

VISU 2007 Animation and Visual Effects (WSTC)

Credit Points 10

Legacy Code 700328

Coordinator Ben Fletcher ([https://directory.westernsydney.edu.au/search/name/Ben Fletcher/](https://directory.westernsydney.edu.au/search/name/Ben%20Fletcher/))

Description Explore the art and technology of animation and visual effects as applied to digital screen media production. In this unit, you will be introduced to the principles of animation and compositing and learn how to create effective motion sequences integrated with sound. Working with commercial software, you will explore the unique possibilities of animation and visual effects production and experiment with alternative, creative, narrative storytelling approaches. Develop critical, conceptual and practical skills within the context of animation and visual effects which will then enable you to deliver powerful and compelling visual stories on multiple media platforms.

VISU 3002 Photomedia: Fashion and Identity

Credit Points 10

Legacy Code 100941

Coordinator Enrico Scotece ([https://directory.westernsydney.edu.au/search/name/Enrico Scotece/](https://directory.westernsydney.edu.au/search/name/Enrico%20Scotece/))

Description This unit explores issues of identity through photographic practice as used in Fashion Photography. Fashion is a universal form of self-expression, making it the communication strategy most employed to express identity based on material and non-material cultures. The role of photography in the creation of iconic and culturally referential images in both commercial and editorial work will be researched, analysed and interpreted in order to place the student's work in context. It provides students with capacity building through an advanced experience with studio lighting, digital effects for fashion based image making and experience with location and studio photography and of professional photography as it is used in fashion publications.

School Humanities & Comm Arts

Discipline Photography

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) DESN 2013

Equivalent Subjects LGYA 0822 - Fashion Style and Identity
LGYA 2433 - Photomedia 2 Fabrication

Restrictions Students must be enrolled in program 1571 Bachelor of Design (Visual Communication), 1737 Bachelor of Design - Visual Communication (Dean's Scholars) or 1843 Bachelor of Graphic Design (Pathway to Teaching Secondary). Students from other degrees must be enrolled in the Graphic Design major or sub-major in order to enrol into this subject. Specialist photography facilities with limited space, equipment and limited specialist technical support preclude students who have not completed the pre-requisite subjects from taking this subject as an elective.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply resourceful, creative methods of project development
2. Apply research methods into history, theory and practice of fashion and portraiture photography in developing image content for published forms.
3. Demonstrate proficiency in the use of high-end cameras, studio and location lighting.

- Utilize sequencing, image editing and post production methods for image enhancement.
- Demonstrate proficiency in art direction of images for an identified target audience

Subject Content

- The practice of contemporary fashion photography and portraiture will be revealed through The exercises and projects.
- technical skills gained in The exercises will feed into The major Project, helping students develop A professional approach to their chosen topic.
- Visual narrative, as expressed in The multi page spread will be researched and analysed, providing contexts for final photographic and design work.
- Projects will allow students to research and develop appropriate Visual communication strategies, through A range of approaches and perspectives.
- Creative strategies for design solutions revealing aspects of Visual identity will be explored through class presentations and Discussion of work.
- Lynda.com courses: as determined

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

WELF 1002 Context of Human Services

Credit Points 10

Legacy Code 101596

Coordinator Maggie Hall ([https://directory.westernsydney.edu.au/search/name/Maggie Hall/](https://directory.westernsydney.edu.au/search/name/Maggie%20Hall/))

Description This unit introduces students to the role of human services within the Australian political context. Students will develop a critical analysis of the contribution of the market, state and community encouraging reflection on underpinning values. It will also identify the change strategies which can be developed and used in each of these domains to bring about socially just outcomes.

School Social Sciences

Discipline Human Welfare Studies and Services, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Incompatible Subjects WELF 1005 - Introduction to Welfare POLI 1005 - Social Policy

Learning Outcomes

On successful completion of this subject, students should be able to:

- Describe the shifts in Australian socio-political environment and apply this knowledge to locate how the human services are positioned within our contemporary context
- Explain the competing interests that challenge explanations of human services provision
- Distinguish the values of divergent perspectives underpinning competing explanations to critically evaluate their own values
- Develop strategies which can be used to generate positive social change

Subject Content

Australian political structure
 Australian welfare provision
 Introduction and analysis of the state
 Introduction and analysis of the market
 Introduction and analysis of community
 Value underpinnings of individual and systemic understandings
 Identification of change strategies
 Operationalisation of change towards socially just ends

Assessment

WELF 1003 Human Services Intervention Strategies

Credit Points 10

Legacy Code 400193

Coordinator Teddy Nagaddya ([https://directory.westernsydney.edu.au/search/name/Teddy Nagaddya/](https://directory.westernsydney.edu.au/search/name/Teddy%20Nagaddya/))

Description This is an introductory unit which examines underlying theories of social welfare work, community work, youth work and international social development. Students will explore the ideological underpinnings of theories and discourses in the human services, particularly with regard to the impact of poverty, inequity and the experience of vulnerable populations. The contribution of other disciplines to knowledge and practice in these fields of practice will also be examined. This unit will focus on developing beginning assessment and intervention skills in working with individuals, groups, and communities. Students will also develop an understanding of ethical issues related to social work practise and working in human service organisations as a member of a team.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in one of the following programs: 1665 Bachelor of Community Welfare, 1666 Bachelor of Social Work, 1709 Bachelor of Criminal and Community Justice, 1713 Bachelor of Criminal and Community Justice/Bachelor of Social Work, 1735 Bachelor of Humanitarian and Development Studies, 1874 Postgraduate Bridging Program (Social Work), 2767 Bachelor of Criminal and Community Justice/Bachelor of Laws, 6027 Diploma in Social Science/Bachelor of Humanitarian and Development Studies or 7170 Undergraduate Certificate in Counselling and Mental Health..

Learning Outcomes

On successful completion of this subject, students should be able to:

- Describe theories, concepts and models underpinning social work and community welfare work.
- Develop assessment and intervention skills or working with individuals, groups and communities within a context of the inequitable distribution of wealth and power.
- Apply ethical issues related to working with individuals, groups and communities.
- Apply professional decision making in the organisational contexts.

Subject Content

- Basic concepts underlying human service practice.
- Human Rights.
- Empowerment.
- Advocacy.
- Self-determination.
- Self-help.
- Social Justice.
- Democratic Participation.
- Anti-Oppressive Practice: gender, ethnicity, class, politics, Aboriginality, culture, religion, (dis)ability, age and sexual orientation.
- Theories underlying human services practice.
- Different ways of understanding the world.
- Different levels of theory: formal and informal.
- Working with individuals.
- An overview major models of casework.
- Assessment and intervention.
- Working with groups.
- Types of groups facilitated by human service workers.
- Principles of working for and with groups.
- Group dynamics and group processes.
- Stages of group development.

- Community Work.
- Personal, professional and organisational power and social control.
- Issues related to accountability.
- The inter relationship of the worker's personal, professional values and those of their agency.
- Understanding of ethics and professional practice in the welfare sector and the role of training and supervision in supporting this.
- A Brief Introduction to Human Services in Contemporary Australia.
- The New 'helping era' - Social Innovation in Human Service Practice.
- Human services within rural and remote regions of Australia.

WELF 1007 Mental Health Workforce Training

Credit Points 10

Legacy Code 102530

Coordinator Tim Griffin ([https://directory.westernsydney.edu.au/search/name/Tim Griffin/](https://directory.westernsydney.edu.au/search/name/Tim%20Griffin/))

Description This unit is a Level 1 Open Elective for eligible students who have completed the Certificate IV in Mental Health (CHC43315) with Wesley Mission. This Certificate prepares mental health workers for the provision of self-directed, recovery oriented support for people affected by mental illness and psychiatric disability. The initial training is carried out on campus at Western Sydney University under the guidance of Wesley Mission (Sydney). The unit involves reflecting on the links between mental health workforce training and the academic discipline of psychology. The focus of this unit is on the knowledge required for mental health workers.

School Psychology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Co-requisite(s) BEHV 1018 OR BEHV 1016

Restrictions Permission from the subject Coordinator to enrol following evidence of successful completion of Certificate IV in Mental Health CHC43315 with Wesley Mission.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Draw links between knowledge drawn from the science of psychology and from knowledge required for work in the mental health workforce.

Subject Content

- Working with diverse people, and promoting Aboriginal and/or Torres Strait Islander cultural safety.
 - establishing self-directed recovery relationships in collaboration with recovery oriented mental health services.
 - The care Network and other services, particularly in Trauma informed care.
 - The provision of services to people with co-existing mental health and alcohol and other drug issues.
 - The assessment and promotion of social, emotional and physical wellbeing in The facilitation of self-advocacy.
 - Working legally and ethically, and participating in workplace health and safety.
- Working with diverse people, and promoting Aboriginal and/or Torres Strait Islander cultural safety.
- Establishing self-directed recovery relationships in collaboration with recovery oriented mental health services.
- The care network and other services, particularly in trauma informed care.
- The provision of services to people with co-existing mental health and alcohol and other drug issues.
- The assessment and promotion of social, emotional and physical wellbeing in the facilitation of self-advocacy.
- Working legally and ethically, and participating in workplace health and safety.

WELF 1011 Introduction to Social Work in Australia

Credit Points 10

Legacy Code 102860

Coordinator Sharlotte Tusasiirwe ([https://directory.westernsydney.edu.au/search/name/Sharlotte Tusasiirwe/](https://directory.westernsydney.edu.au/search/name/Sharlotte%20Tusasiirwe/))

Description This unit introduces students to social work, its common values, different perspectives, and current debates. Diverse constructions of social work embedded in different knowledge systems and models will be explored. Social work perspectives in a multicultural cosmopolitan Australia will be analysed including, amongst others, Indigenous social work, White western social work, Pacific social work, Afrocentric social work, memorial social work, Brazilian social work, etc. An overview of the changing Australian socio-political environment, policy and practice context will be explored and the role of social work in the different fields of practice analysed, to locate strategies for generating positive and creative social change.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe social work and the common values that underpin social work practice
2. Discuss different constructions of social work embedded in different knowledge systems and their application in multicultural cosmopolitan Australia and globally
3. Recognise Australia's socio-political environment and the nature of disadvantage experienced by certain socio-cultural groups such as women, refugees & asylum seekers, First Nations Peoples, older people, People with Disabilities, LGBTIQ, the unemployed, homeless etc
4. Describe how government policies and practices are developed and implemented to address disadvantage
5. Develop strategies that work towards the broader goals of social justice and human rights and individual and community advocacy and empowerment

Subject Content

Introduction to social work; unifying values like social justice, human rights, anti-oppressive practice

Current debates in social work (like westernisation vs indigenisation/ decolonisation; social work as an agent of social control or social change; globalisation vs localisation; Universalism/professionalism vs multiculturalism)

Introduction to different social work perspectives and the types of social work they inform: Indigenous social work; Western social work Pacific social work
 Afrocentric social work, a Nepalese model of social work, etc
 Australian socio-political context: contemporary social issues related to inequality: poverty & inequality
 Australian socio-political context: Gender & Inequality, racial inequality; environmental injustice etc
 Making and implementing social policy to address disadvantage
 Social work fields of practice and our roles and responsibilities for practice (Social work with First Nations People, LGBTIQ, Older people and People with Disability, community work, mental health
 Research, environmental and disaster work
 Social work in a changing world; different landscapes: where to now?

WELF 1012 Understanding Disability: Historical and Contemporary Frameworks

Credit Points 10

Legacy Code 102846

Coordinator [Karen Soldatic \(https://directory.westernsydney.edu.au/search/name/Karen_Soldatic/\)](https://directory.westernsydney.edu.au/search/name/Karen_Soldatic/)

Description Disability Studies is a multi-disciplinary field that investigates, critiques, and enhances society's understandings of disability. The unit will introduce students to contemporary frameworks for recognising how people with disabilities have experienced disadvantage and exclusion because of personal and societal responses to impairment. The unit will explore how disability activists and scholars have re-conceptualised disability from a

more empowering social-political and human rights perspective as an element of human diversity. The unit is grounded in case study pedagogy to ensure the integration of applied practice with rich conceptual and rigorous frameworks.

School Social Sciences

Discipline Care for the Disabled

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply key concepts and the major frameworks (models) for analysing disability.
2. Describe how society's concept of normalcy results in everyday forms of discrimination, exclusion and poverty, in local, national, and global contexts.
3. Explain the ways in which disability rights movements and disabled people have driven change at the local, national and international level.
4. Present information and arguments related to disability studies using an appropriate academic style.
5. Apply strategies to work effectively in a team.

Subject Content

Historical developments in the field and their continuance in contemporary practice.

Introduction of contemporary understandings for recognising how people with disabilities have experienced disadvantage and exclusion. Personal and societal responses to impairment since industrialisation to the contemporary time.

The work of disability activists and scholars in re-conceptualising disability including contemporary perspectives governed by international socio-legal policy that promote rights, justice and equality.

Assessment

WELF 2001 Community Management and Organisations

Credit Points 10

Legacy Code 101644

Coordinator Jeeva Sajan ([https://directory.westernsydney.edu.au/search/name/Jeeva Sajan/](https://directory.westernsydney.edu.au/search/name/Jeeva%20Sajan/))

Description This unit focuses on community management in Australia and the social and economic factors that influence and frame community management practices. At the macro level, it examines the effects of neo-liberal (economic rationalist) reforms in the public and community sectors; and the rise of developments such as managerialism and 'third way' approaches, on community management practices. The unit also explores developments in management practices in response to social developments such as multiculturalism, recognition of diversity, equal employment opportunity and recognition of contextual and local issues. It further looks at community management work practices, including volunteerism, steering committees, management committees, and collectives.

School Social Sciences

Discipline Social Work

WELF 2007 Group Work in Social Work

Credit Points 10

Legacy Code 400509

Coordinator Ben Joseph ([https://directory.westernsydney.edu.au/search/name/Ben Joseph/](https://directory.westernsydney.edu.au/search/name/Ben%20Joseph/))

Description This unit will provide students with the opportunity to develop knowledge of group work theory, group dynamics and facilitation skills in group work practice in the human services. In addition, students will be learning about working in teams in human service agencies, and effectively collaborate with their colleagues in group settings. Students will integrate theory with practice in an experiential group setting in the classroom. Students will also be examining issues related to culturally responsive group work practice with marginalised people, and addressing group work issues of diversity in gender and culture.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) WELF 1003

Restrictions Students must be enrolled in program 1666 Bachelor of Social Work, 1665 Bachelor of Community Welfare or 1713 Bachelor of Criminal and Community Justice / Bachelor of Social Work.

Assumed Knowledge

Basic understanding of groups and group dynamics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse a range of theories of groups, group dynamics and group processes;

2. Critically reflect on their use of self as group participants and facilitator;
3. Outline the significance of professional and agency contexts of group work practice;
4. Apply an understanding of, and respect for, ethical and culturally responsive practice in group work;
5. Utilise group work knowledge and skills to facilitate group work exercises.

Subject Content

Group dynamics and processes including group stages, communication in groups, group roles, different theories of leadership in groups, different models of group decision making, power and conflict, approaches to diversity

Facilitating effective group work processes

Ethics in group work

Responding appropriately to gender and cultural diversity

The context of professional social work with groups

Evaluation and closing of groups

WELF 2010 Lifespan Development and the Human Services

Credit Points 10

Legacy Code 400505

Coordinator Samia Michail ([https://directory.westernsydney.edu.au/search/name/Samia Michail/](https://directory.westernsydney.edu.au/search/name/Samia%20Michail/))

Description This unit takes a 'lifespan perspective' to studying human development, covering related concepts, theories, methods and debates, and develops an understanding of bio-psycho-social dimensions across the lifespan, underpinned by a sensitivity to cultural and social differences in development. There is an emphasis on relating lifespan issues to current human services.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) BEHV 1021

Equivalent Subjects LGYB 6026 - Lifespan Development in the Human Services

Restrictions Students must be enrolled in 1666 Bachelor of Social Work, 4598 Bachelor of Social Work, 4522 Bachelor of Community Welfare or 4523 Bachelor of Community Welfare (Family and Community). Successful completion of 60 credit points including the pre-requisite subject above.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Summarise the key concepts, theories and methods related to the ♦eLifespan Perspective♦ of studying human development.
2. Explain how cultural and social differences influence lifespan development.
3. Relate concepts of lifespan development, including cultural and social differences, to current human services.
4. Recognise bio-psycho-social dimensions across the lifespan.

Subject Content

Foundational concepts related to the lifespan perspective and approaches to understanding human development, theories, debates and methods.

Cultural and social differences in lifespan development, including indigenous Australians and gender.

Lifespan development related to human services.

Heredity, prenatal development and birth

Bio-psycho-social development related to:

- Infancy
- Pre-school years
- middle childhood
- Adolescence
- early, middle and Late adulthood
- Old Age and end of life

WELF 2017 Working with Individuals and Families

Credit Points 10

Legacy Code 400508

Coordinator Daniel Doh ([https://directory.westernsydney.edu.au/search/name/Daniel Doh/](https://directory.westernsydney.edu.au/search/name/Daniel%20Doh/))

Description This unit introduces students to the theories and practice related to social work with individuals and families in diverse practice contexts. It builds on knowledge gained through the prerequisite units. Students examine systems theory in relation to family work, and the contributions of feminist therapies and psychological themes. Relevant clinical and social issues such as cross-cultural casework, the impact of the stolen generation on indigenous people’s access to social services, and working effectively with grief and loss are examined. This unit assists in preparing students for their first or second fieldwork placement.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) WELF 1003

Restrictions Students must be enrolled in 1666 Bachelor of Social Work, 4598 Bachelor of Social Work, 1665 Bachelor of Community Welfare or 4522 Bachelor of Community Welfare or 4523 Bachelor of Community Welfare (Family and Community), 1713 Bachelor of Criminal and Community Justice/Bachelor of Social Work.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identifies theories and intervention strategies for working with individuals and families
2. Choose, apply and evaluate a practice model in interviews
3. Critically analyse practice
4. Reflect on own practice
5. Develop further skills in working appropriately with Aboriginal and Torres Strait Islander peoples

Subject Content

1. this subject introduces students to theories and develops clinical practice skills related to social work with individuals and families in diverse practice contexts.
2. A major theory studied and applied in this subject is the strengths-based approach to casework & work with families.
3. Students also apply systems theory in relation to family work and examine the contribution of feminist therapies, post-modern theory and psychological themes.
4. Relevant clinical and social issues such as cross cultural casework, the impact of the stolen generation on indigenous people’s access to social services and working effectively with involuntary clients are examined and practiced.
5. Finally students develop skills in conducting a risk assessment at interview.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	5 questions x 12 weeks = 60 questions	20	N	Individual
Professional Task	10 minutes & 1000 words	50	N	Individual
Case Study	1000 words	30	N	Individual

Coordinator Rashid Flewellen Jr ([https://directory.westernsydney.edu.au/search/name/Rashid Flewellen Jr/](https://directory.westernsydney.edu.au/search/name/Rashid%20Flewellen%20Jr/))

Description This unit builds on Introduction to Working with Families and Communities and focuses on direct practice skills with individuals and families in welfare and community settings. Students examine contemporary theories of direct practice and build upon their ability to use theory to reflect upon and develop practice skills. There is an emphasis on safe, inclusive and responsive practice with Aboriginal and Torres Strait Islander peoples with a focus on trauma informed practice.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) WELF 1006

Equivalent Subjects WELF 2017 - Working with Individuals and families
LGYA 7656 - Working with individuals and families

Restrictions Students must be enrolled in 1689 Bachelor of Community and Social Development and must have successfully completed 60 credit points.

Assumed Knowledge

It is assumed that the student has successfully completed the Year 1 subjects in 1689 - Bachelor of Community and Social Development.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply theories and skills for working with individuals and families
2. Evaluate a practice model in a simulated interview
3. Critically analyse practice models and strategies for case work
4. Demonstrate the ability to use theory to reflect upon and develop practice skills
5. Utilise cultural competence skills in casework practice and analysis

Subject Content

- introduction to theories and Models for direct practice with individuals and families
- development of clinical practice skills for Working with individuals and families in diverse practice contexts
- Working with voluntary and involuntary individuals and families in diverse practice settings.
- Core verbal and written communication skills for work with individuals and families (e.g. engagement, assessment, designing and implementing interventions, evaluation, report writing and record keeping).
- The strengths-based approach to casework and work with families
- Trauma informed practice
- Working with individuals and families experiencing grief and loss.
- Safe, inclusive and responsive practice with Aboriginal and Torres Strait Islander peoples and people from culturally and diverse backgrounds

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

WELF 3001 Child Abuse as a Social Issue

Credit Points 10

Legacy Code 101381

Coordinator Samia Michail ([https://directory.westernsydney.edu.au/search/name/Samia Michail/](https://directory.westernsydney.edu.au/search/name/Samia%20Michail/))

Description This unit enables students to examine the way in which child abuse has become a public issue. It considers the assumptions, values and interests which underlie definitions of abuse as well as intervention and prevention strategies promoted to protect children from abuse. In order to do this, students will examine constructions of childhood, the positioning of children and attitudes towards children and families. They will explore the various responses to child abuse in contemporary systems, policies and practices that work to address

child abuse. Students will develop the skills required to ensure that children are active participants in decisions made for their protection.

School Social Sciences

Discipline Human Welfare Studies and Services, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYB 5808 - Child Abuse as a Social Issue

Restrictions Successful completion of 80 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and describe the ideologies in society that shape child abuse discourse including social constructions of children and childhood
2. Critically analyse the child protection system (policy, research and practice) including the roles of key stakeholders; agencies, families, the State, the media and children themselves
3. Evaluate the role of children in child protection contexts; children's rights, children's views and children's participation particularly in relation to decision-making
4. Recognise and examine the impact of social, cultural, political and contextual factors on the position of children; issues of CALD, disability, Aboriginality, class, gender)
5. Demonstrate critical thinking skills required to respond to the needs of children in a child protection context

Subject Content

History of child abuse; definitions and social constructions of children, childhood and abuse; incidence and prevalence; discourse on risk and protection

Theoretical frameworks, approaches, methods and how they are applied in practice; the role of values

Child protection systems I (key stakeholders; statutory, welfare and social responses)

Child protection systems II (policies and processes, legislation, out-of-home care, early intervention and prevention)

Children's role in child protection; children's rights, children's views and children's participation in decision-making

Social relations and diversity within child abuse; issues of CALD, disability, Aboriginality, class, and gender.

Macro view; system reviews and inquiries, research, reflexive practice, future directions

Equivalent Subjects LGYB 5808 - Child Abuse as a Social Issue
WELF 3001- Child Abuse as a Social Issue

Restrictions Students must be enrolled in program 1689 Bachelor of Community and Social Development and must have successfully completed 60 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse state and community responses to child abuse
2. Identify the ideologies and theories underpinning different definitions of child abuse
3. Recognise the impact of social and cultural factors in shaping social discourses about children and their families, including gender relations, power relationships between children and adults and the position of children within families
4. Demonstrate critical understanding of intervention and prevention strategies within Aboriginal and Torres Strait islander communities
5. Examine the impact on children of child abuse interventions and prevention programs
6. Demonstrate an understanding of the skills required for working directly with children in abusive situations

Subject Content

1. Theoretical and ideological frameworks for understanding Child Abuse
2. The construction of Childhood
3. Competing cultural and social definitions of childhood
4. Power relationships between adults and children and between children and the state
5. Construction of child abuse as a social problem
6. The position of children particularly in relation to child protection
7. Roles of key stakeholders including agencies, families, communities, the state and children
8. Skills in working with children
9. Role of the legal system in child protection
10. Intervention strategies including out-of-home care
11. Prevention and early intervention with a particular focus on Aboriginal and Torres Strait Islander communities

WELF 3003 Community Engaged Learning

Credit Points 10

Legacy Code 102526

Coordinator Renu Narchal ([https://directory.westernsydney.edu.au/search/name/Renu Narchal/](https://directory.westernsydney.edu.au/search/name/Renu%20Narchal/))

Description Community Engaged Learning provides students with an opportunity for direct community engagement in an ethical way through experience in various settings including government agencies, not for profit organisations, community organisations, industry partners, and other professional bodies. The unit offered in block mode, facilitates first-hand learning through active participation with the community, to develop leadership skills within a team with enhanced capacity to understand social and organisational responsibilities. Students will be encouraged to utilise their knowledge, skills and experience gained over their degree within real-life situations. They are required to complete mandatory orientation activities and briefing and debriefing workshops at the start, middle and end of the semester. They will complete 60 hours of community/industry engagement and 15 hours of interaction at academic workshops. Academic support will be available online via vUWS through the duration of the community engagement. Debriefing sessions will provide ample scaffolding for the development of skill, knowledge, professionalism and potential leadership. Students should obtain their Police Clearance prior to the start of the semester to commence their placement in a timely manner. Late enrolments may affect this.

School Psychology

Discipline Welfare Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 120 credit points of study in currently enrolled program. This subject may be taken by students in any WSU undergraduate program where elective spaces are available.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate strategies for effective engagement with community partners and knowledge of ethical and professional conduct in various community settings.
2. Critically reflect on the community engaged learning in relation to service learning theory in addressing issues faced by community organisations.
3. Demonstrate the process of planning, developing, implementing and evaluating programs for improvement as part of community engaged learning.

4. Apply academic knowledge and theory learnt through their degree to real-world situations/issues that concern community organisations.
5. Demonstrate an understanding of and sensitivity toward cultural and social diversity and its impact on social capital.
6. Demonstrate an awareness of their own cultural perspectives and that of other cultures in relation to the community engaged learning, such as Aboriginal and Torres Strait Islander cultures, and the needs and perspectives of various disadvantaged groups.

Subject Content

1. Concerns surrounding public sector agencies and non-profit community organisations.
2. Lifelong learning through personal engagement with public sector and non-profit community agencies
3. Effective and logical problem solving, and creative thinking
4. Strategies and skills for service delivery and advocacy
5. Effective communication and interpersonal skills
6. Research and collaborative service provision in public sector and non-profit community agencies
7. Leadership and advocacy toward social responsibility and analytical skills for effective intervention.
8. Cross-cultural and social diversity in heritage needs/cultural perspectives.

WELF 3006 Family Violence: Policy and Practice

Credit Points 10

Legacy Code 101597

Coordinator Michel Edenborough ([https://directory.westernsydney.edu.au/search/name/Michel Edenborough/](https://directory.westernsydney.edu.au/search/name/Michel%20Edenborough/))

Description This unit examines the nature, incidence and extent of family violence. The focus is on the effects on women and children, who are the victims of this violence. Current sociological explanations are examined, including a critical examination of the myths and stereotypes that help to reinforce the hidden nature of this problem. Some solutions and possible ways of alleviating the suffering caused by this violence are canvassed.

School Social Sciences

Discipline Human Welfare Studies and Services, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 1388 - Family Violence

Restrictions Successful completion of 60 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the scope and impact of family violence.
2. Critically evaluate a range of theoretical perspectives utilised to understand family violence.
3. Evaluate cross-cultural (including Aboriginal) perspectives in relation to family violence.
4. Critically evaluate policies that have been devised to deal with family violence.
5. Critically assess policies and practices that deal with family violence.

Subject Content

Conceptualising the family; official definitions and assumptions; diversity and difference; public and private domains.

Theories of the family from the 'haven in a heartless world', to the 'family as a place of harm'.

History of research on family violence: Australia and internationally.

Family violence and the effects and consequences for children, young women, older women, Aboriginal women, women with disabilities, women from non-English speaking backgrounds, women living in rural or isolated areas, gay couples, lesbian couples and men.

Overview of policy initiatives, programs and strategies to deal with family violence: Australia and international.

Developing promising practices and policies.

WELF 3009 Managing Offenders in the Community

Credit Points 10

Legacy Code 102065

Coordinator Melanie Thomas ([https://directory.westernsydney.edu.au/search/name/Melanie Thomas/](https://directory.westernsydney.edu.au/search/name/Melanie%20Thomas/))

Description Managing Offenders in the Community is a unit that draws links between the theory and practice of working with offenders in a variety of roles and settings. It provides a legal and policy framework for this work and covers the main theoretical perspectives and research insights into what is effective practice in this work. The unit takes a practical, applied approach linking the material directly to work with offenders and will be of particular interest to current or future practitioners in community justice, corrections, social work and policing.

School Social Sciences

Discipline Criminology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 100 credit points in the currently enrolled program. This subject is designed to be taken in the third year of the program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise the main theoretical perspectives and research insights that inform work with offenders in the community - Integrate theoretical knowledge;
2. Identify legislative and policy requirements that are relevant to work with offenders in the community - demonstrate understanding of crime etc;
3. Differentiate and compare the various approaches to working with offenders in the community - critically evaluate community justice principle: basic research and analysis;
4. Construct a principled and theoretically informed argument for taking particular approaches in response to offending behaviour, with a particular focus on Aboriginal and Torres Strait Islander peoples - produce clear written evaluations of crime; knowledge and understanding of Aboriginal and Torres Strait Islander cultures and ways of knowing;
5. Assess the main issues in working with an individual offender in the community and recommend approaches to work with him or her - exercise critical skills to solve problems of crime;
6. Formulate a planned intervention for working with an offender in the community, based on theory and research - evaluate and apply criminological knowledge to solve applied problems.

Subject Content

Community Justice in Australia

Working with Adult Offenders in Australia
 Working with Young Offenders in Australia
 Theories of Offending and Evidence-Based Practice
 Restorative Justice and Victims
 Risk Management and Public Protection
 Diversity: Criminal Justice work with particular groups
 Organisation and Management of Criminal Justice
 Technology and Criminal Justice
 Facilitating Desistance and Building Good Lives
 Values and Ethics in Community Justice
 Practice Skills: Assessing and Engaging with Involuntary Clients

WELF 3011 Professional Practice in Aged Care and Disability

Credit Points 10

Legacy Code 400968

Coordinator Nicole Peel ([https://directory.westernsydney.edu.au/search/name/Nicole Peel/](https://directory.westernsydney.edu.au/search/name/Nicole%20Peel/))

Description This unit provides the student with an understanding of current trends underlying policies and services in the aged care and disability industry, which will help them to understand the dynamics of the changing aged care and disability service sector. Students will examine the strategic environments of aged care and disability to develop global and national perspectives, identify drivers of change and development, and the major players in aged care and disability policies. Students will develop an understanding of the aged care and disability competencies and determinants of well-being for aged and disabled persons, which can be used in their future roles in the health industry. Through reflections on practice in aged care and disability, students will develop an individual approach to aged care and disability service issues which they can use in the future as health care professionals.

School Health Sciences

Discipline Care for the Aged

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 7162 - Professional Practice in Aged Care
REHA 2008 - Professional Practice in Aged Care and Disability

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate knowledge of the strategic environment of the aged care and disability contexts;
2. Discuss the central notions and trends underlying policies and services in aged care and disability services;
3. Examine a range of resources and facilities relevant to services for older people and people with disability;
4. Explore how the service systems for aged people and people with disabilities impact on services provision and interdisciplinary teamwork;
5. Critically apply knowledge of factors leading to the well-being of older persons and people with disabilities and the appropriate service models and processes required to maintain well-being;
6. Critically apply skills in developing processes leading to well-being of older people and people with disabilities in a range of service settings.

Subject Content

Orientation to unit.

Introduction to the aged care and disability environment

1. Legislation & Policy

- funding and policy in aged care and disability

- legal Issues and rights

- tensions in aged care and disability

- drivers of change

- social policy

2. Care Contexts

- globalisation

- population Trends

- Ageism

- economic Fundamentalism and internationalization

- social capital

3. Professional Vision & Change

- quality care

- management and leadership in aged care and disability

- aged care settings

- reflective practice

- team Building

4. Clinical reasoning and practice Issues

- Determinants of health & well-being

- Transcultural Issues

- mental health Issues

- individual control

- direct care workers in aged care and support workers in disability

- carers

- private sector care

- family care

- community care and aged care packages and respite services

WELF 3013 Social Work and Health

Credit Points 10

Legacy Code 400513

Coordinator George Turner ([https://directory.westernsydney.edu.au/search/name/George Turner/](https://directory.westernsydney.edu.au/search/name/George%20Turner/))

Description This unit integrates health as focus for social work as a profession and as a specific domain of practice. This advanced unit has three main areas of focus. The first area is developing knowledge and skills to critically analyse concepts related to health in global and local social work practice, including decolonising and Indigenous ways of knowing. The second is exploring health for specific populations and communities, the context of health service provision in Australia, and social work in health services. The third is professional skills for social work practice, including social work assessment and health promotion.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) WELF 2017

Restrictions Students must be enrolled in 1666 Bachelor of Social Work, 4598 Bachelor of Social Work or 4599 Bachelor of Social Work (Honours) and 1713 Bachelor of Criminal and Community Justice/ Bachelor of Social Work

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Distinguish the relevant social work concepts of health in contemporary health issues.
2. Critically analyse health concepts for global and local social work practice, incorporating decolonisation and Indigenous ways of knowing.
3. Critically analyse health for specific populations and communities, health service provision, and the context of social work practice in health services.
4. Apply foundational social work assessment skills to a health context, including demonstration of skills identified by the AASW mental health competency standards.

Subject Content

Concepts of health for social work practice, including health as a social issue, social determinants of health, and health and social justice
Social work practice in health settings, health services, and with specific populations
Social work practice skills for health, including assessment and health promotion

WELF 3014 Social Work and Social Policy

Credit Points 10

Legacy Code 400511

Coordinator Robyn North ([https://directory.westernsydney.edu.au/search/name/Robyn North/](https://directory.westernsydney.edu.au/search/name/Robyn%20North/))

Description This unit examines the context and challenges for social policy in Australia and the relationship between social policy and social work practice. Topics covered include: fundamental debates in welfare policy; comparative and historical contexts in how welfare policy is developed; the impacts of remedial welfare policy and policy solutions to disadvantage; and strategies to influence policy development related to social work practice.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) WELF 1002

Equivalent Subjects WELF 3010 - Political Economy of the Welfare State

Restrictions Students must be enrolled in program 1666/4598 Bachelor of Social Work, 1713 Bachelor of Criminal and Community Justice/ Bachelor of Social Work or 1874 Postgraduate Bridging Program (Social Work).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify fundamental debates in social policy about the aims and achievements of Australia's welfare system.
2. Critically assess the relationships between policy making, policy analysis, policy research and social work practice.
3. Consider the implications of policy values for alternative forms of social welfare practice.
4. Analyse current policy issues from a standpoint directed toward developing alternative policy and practice pathways to the future.

5. Reflect on personal values and attitudes in relation to significant social policy in practice issues.

Subject Content

What is social policy?

Fundamental debates in social policy.

History of social welfare provision in Australia and social policy.

Policy making process.

Social policy in practice and current reforms.

Case studies in policy making, policy analysis and policy advocacy.

Assessment

Equivalent Subjects LGYA 7657 - Welfare Field Education 2 (AREPMETRO) WELF 3018- Welfare Field Education 2

Restrictions Students must be enrolled in 1689 Bachelor of Community and Social Development and must have successfully completed a minimum of 80 credit points including subject 101765 - Welfare Field Education 1 (Block Mode).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate the skills needed for working in welfare and community organisations
2. Show evidence of networking and career planning
3. Demonstrate an advanced level of knowledge and skills in welfare practice
4. Critically evaluate their own performance, a variety of aspects of agency functioning
5. Demonstrate an ability to critically assess the need for appropriate services and be able to take action to develop these services.

Subject Content

Casework skills, including assertiveness and strategies and techniques for working with a range of client groups

The contexts of welfare and community work ? community, institutional and governmental structures and inter-connections

Group work skills

Community work skills

Ethical practice in welfare work

Resume writing skills and career planning

Occupational Health and Safety issues including dealing with violence in the workplace

Peer support and supervision on placement

Integration of theory with practice

Debriefing placement experiences

Advanced report writing

Special Requirements

Legislative pre-requisites

To be eligible to enrol in a subject and attend a health-related placement in your program, students must meet Western Sydney University program requirements and Special Legislative Requirements to be assessed in their first year of study against the following.

1. National Criminal History Check: Students must have a current (expiring 3 years from date of issue) check valid for their entire program. A valid National Criminal history check must be an Australia wide check, include the student's full name matching their Student ID card and date of birth and not have any offences listed. If a student has a criminal history identified on their check, they must provide a Clinical Placement Authority Card (CPAC) or conditional letter from the NSW HealthShare Employment Screening and Review Unit https://www.health.nsw.gov.au/careers/student_clearance/Documents/appendix-10-student-application.pdf
2. A NSW Working with Children Check (WWCC) clearance letter issued under the category of volunteer valid for their entire program.
3. A current approved first aid certificate valid for their entire program. Approved provider courses can be found at <http://training.gov.au> (<http://training.gov.au/>).
4. A completed vaccination/immunisation card with all serology results containing expiry dates and currency must be maintained by the student to ensure compliance for their entire course.
5. NSW Undertaking/Declaration form.
6. Completed any additional health forms required (such as NSW Health Code of Conduct, Health Student Undertaking/Declaration and Tuberculosis (TB) Assessment Tool).
7. Relevant Local Health District specific documentation as requested.

Contact your School for further details. Resources are also available on the Placement Hub (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/) website.

Coordinator Justine O'Sullivan ([https://directory.westernsydney.edu.au/search/name/Justine OSullivan/](https://directory.westernsydney.edu.au/search/name/Justine%20OSullivan/))

Description This unit enables students to participate in a structured and supervised field placement experience, providing the opportunity for students to combine their knowledge of theory and application of their skills into practice in the human services sector. Placements will be offered in direct or indirect service work with a wide range of client groups and communities in the government and nongovernment sectors. A variety of social work and community welfare-related agencies in and around Sydney will be utilised. Students will attend skills based workshops and complete 408 hours of placement in accordance with accreditation requirements of the Australian Association of Social Workers (AASW) guidelines, and the Australian Community Workers Association (ACWA).

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 20cp

Level Undergraduate Level 3 subject

Pre-requisite(s) WELF 2017

Incompatible Subjects WELF 2005 - Field Education 1 WELF 3004 - Community Welfare Field Education

Restrictions Students must be enrolled in programs 1665 Bachelor of Community Welfare, 1666 Bachelor of Social Work or 1713 Bachelor of Criminal and Community Justice/Bachelor of Social Work and must have successfully completed 120 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain and demonstrate the different communication skills needed for working with a range of clients and volunteers in human services organisations.
2. Prepare for work within the human services sector through developing a network for future employment and career planning after successful completion of 408 hours of practicum.
3. Demonstrate an advanced level of knowledge and skills in human services practice including the role of supervision in the field placement and workplace.
4. Critically evaluate their own learning and practice, and evaluate their readiness for entering the human services workforce; understand concepts of self-care.
5. Demonstrate an ability to critically assess the need for appropriate services and be able to take action and develop these services.

Subject Content

- 408 hours of supervised practicum in a welfare/human services agency.
- Intervention skills: casework, group work, community work, including assertiveness and strategies and techniques for working with a range of client/consumer groups.
- Professional communication skills, including telephone skills and report writing skills, critical thinking and analysis, networking and referral skills.
- Community needs and human services available to people within a particular region.
- The nature of supervision, peer support, assessment and self-care on placement.
- Ethical practice in human services work; consideration of the values and ideology in practice frameworks.
- Working with volunteers and bureaucracies.
- Work Health and Safety issues including dealing with violence in the workplace.
- Methods of critical reflection on process of intervention in light of personal agency ideology and social welfare values.
- Debriefing from the placement experience; integrating theory with practice and future learning.

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Refer to the Special Requirements website for more information.

WELF 3021 Disability Rights, Policy and Governance

Credit Points 10

Legacy Code 102849

Coordinator Karen Soldatic ([https://directory.westernsydney.edu.au/search/name/Karen Soldatic/](https://directory.westernsydney.edu.au/search/name/Karen%20Soldatic/))

Description Since the ratification of the United Nations Convention on the Rights of Persons with Disabilities, laws, policy and service supports concerning persons with disability have transformed. This has resulted in significant reforms in Australia and globally. Disability rights have now become central to addressing long standing inequalities and discrimination experienced by persons with disability. Disability rights now also govern social services, supports and programs. This unit examines these developments with the global ratification of disability rights and critically evaluates the ensuing policies and practices that frame the context within which professional practice and expertise occurs. Drawing upon in-depth case studies, students will critically examine and engage in key issues surrounding the translation and realisation of disability rights in governance of social service systems, policy and practices.

School Social Sciences

Discipline Care for the Disabled

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

- Examine international disability rights norms and their impact on national and state policy and governance.
- Evaluate key international and national governance and policy issues for the realisation of disability rights in everyday life.
- Apply critical analytical frameworks to disability rights to professional practice to foster learning and improvement.
- Assess contemporary developments in disability policy impact the practices in professional service environments and practices.

Subject Content

Disability rights frameworks ? historical through to most recent (international conventions, declarations, global governance institutions ? WB, UN, ILO, OECD etc).

National and international responses to disability rights (legislation, policy and service provision).

In-depth case study examples from Australia, UK, EU and the Global South (Peru, South Africa, Sri Lanka) to illustrate legislative reforms with the ratification of disability rights.

The role of disability activists and advocates in driving social change for the realisation of the disability rights (boomerang activism, national activism, online activism).

WELF 3022 Disability and Sexuality

Credit Points 10

Legacy Code 102848

Coordinator George Turner ([https://directory.westernsydney.edu.au/search/name/George Turner/](https://directory.westernsydney.edu.au/search/name/George%20Turner/))

Description This unit introduces students to the mutual fields of sexuality studies and disability studies by employing the critical lenses of queer, disability, and feminist theory to interrogate the privileging and ownership by mainstream culture of sex. By illuminating how people with physical, emotional, and cognitive disabilities experience romance, love, emotional intimacy and physical connection, students will explore how insufficient sexuality supports create diminished agency, excessive vulnerability, lack of access and "otherness" for disabled people. Students will ground their critical thinking by examining how they have constructed sexuality and disability norms based on their values, beliefs and views of these two intersecting and often taboo topics. Students will be encouraged to appreciate the importance of sexuality in the lives of people with disabilities and view the expression of our sexuality, sexuality agency, and access to sexual health as a basic human right.

School Social Sciences

Discipline Care for the Disabled

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Distinguish relevant concepts including sexual literacy, sexual justice and sexual voice within sexuality and disabilities scholarship.

2. Critically reflect on comfort, skills and knowledge through the lens of sexuality and disability.
3. Evaluate the sexuality model, such as the Circles of Sexuality as it applies to sexuality in everyday life for people with disabilities.

Subject Content

The Circles of Sexuality - an integrative, holistic practice model of sexual health.

Sexual justice & activism ? scholarly and professional approaches to sexuality as a human right.

Role of sexual well-being advocates ? Embracing frameworks of strengths, perspective and positive sexuality to support clients with a disability.

Countering the medicalisation of disability and reproduction-focus of sexuality.

WELF 3023 Indigenous Disability and Inclusion

Credit Points 10

Legacy Code 102847

Coordinator Scott Avery ([https://directory.westernsydney.edu.au/search/name/Scott Avery/](https://directory.westernsydney.edu.au/search/name/Scott%20Avery/))

Description Intersecting two socially and economically marginalised groups, Australia's Indigenous peoples living with disability require services and supports that are both culturally safe and disability aware. Through this unit, future practitioners of the disability and Indigenous services workforce will be exposed to an Indigenous philosophy of disability that is characterised by a culture of inclusion, as a contrast to westernised medical models of disability. The unit will examine the unique exposures to social and economic marginalisation and discrimination encountered by people who are Indigenous and live with disability, and how these factors intersect as barriers to their access to service systems, supports and lives with dignity.

School Social Sciences

Discipline Care for the Disabled

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain how the cultural knowledge of disability interact with western models of disability for Indigenous peoples.
2. Describe the barriers that Indigenous peoples with disability face in accessing services and support systems.
3. Identify how culturally informed disability can facilitate the participation of Indigenous people with disability and other marginalised groups.
4. Examine the ways in which Indigenous knowledge of disability and social inclusion can be enabled in policy and practice.

Subject Content

Indigenous cultural and conceptual understandings of disability and social inclusion, in comparison to western models of disability.

The historical and contemporary impact of colonisation on the discrimination and social inequality experienced by Indigenous people with disability.

Applications of Indigenous disability and inclusion in international human rights and Australian public policy, focussing on the National Disability Insurance Scheme (NDIS) and Closing the Gap.

Contemporary developments in culturally led social inclusion, healing and narrative practice.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

WELF 3024 Professional Practice in Aged Care and Disability (UG Cert)

Credit Points 10

Legacy Code 500061

Coordinator Maria Dent ([https://directory.westernsydney.edu.au/search/name/Maria Dent/](https://directory.westernsydney.edu.au/search/name/Maria%20Dent/))

Description This unit provides the student with an understanding of current trends underlying policies and services in the aged care and disability industry, which will help them to understand the dynamics of the changing aged care and disability service sector. Students will examine the strategic environments of aged care and disability to develop global and national perspectives, identify drivers of change and development, and the major players in aged care and disability policies. Students will develop an understanding of the aged care and disability competencies and determinants of well-being for aged and disabled persons, which can be used in their future roles in the health industry. Through reflections on practice in aged care and disability, students will develop an individual approach to aged care and disability service issues which they can use in the future as health care professionals.

School Health Sciences

Discipline Care for the Aged

Level Undergraduate Level 3 subject

Equivalent Subjects WELF 3011 Professional Practice in Aged care and Disability

LGYA 7162 Professional Practice in Aged Care

REHA 2008 Professional Practice in Aged Care and Disability

Restrictions Students Must be enrolled in: 7173 Undergraduate Certificate in Aged Care Support Or 7176 Undergraduate certificate in Disability Support

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate knowledge of the strategic environment of the aged care and disability contexts;
2. Discuss the central notions and trends underlying policies and services in aged care and disability services;
3. Examine a range of resources and facilities relevant to services for older people and people with disability;
4. Explore how the service systems for aged people and people with disabilities impact on services provision and interdisciplinary teamwork;
5. Critically apply knowledge of factors leading to the well-being of older persons and people with disabilities and the appropriate service models and processes required to maintain well-being;
6. Critically apply skills in developing processes leading to well-being of older people and people with disabilities in a range of service settings.

Subject Content

Orientation to unit.

Introduction to the aged care and disability environment

1 Legislation & Policy

1.Funding and policy in aged care and disability

2.Legal issues and rights

3.Tensions in aged care and disability

- 4. Drivers of change
- 5. Social Policy
- 2 Care Contexts
 - 1. Globalisation
 - 2. Population trends
 - 3. Ageism
- 4. Economic Fundamentalism and internationalization
- 5. Social capital

WELF 4001 Contemporary Social Work Practice

Credit Points 10

Legacy Code 400518

Coordinator Suzanne Egan ([https://directory.westernsydney.edu.au/search/name/Suzanne Egan/](https://directory.westernsydney.edu.au/search/name/Suzanne%20Egan/))

Description This unit provides a forum in which students can examine contemporary issues that impact on social work practice. The use of technology in social work practice and its implications for clients and practitioners; the exploration of culturally and spiritually sensitive and creative approaches to social work practice; and human rights based practice. Students are encouraged to take a critical best practice approach, identifying the best aspects of social work practice and seeking to replicate it. There is a particular emphasis on applying this approach to child wellbeing and protection, mental health and work with Aboriginal Australians and Torres Strait Islander groups.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) WELF3020 - Field Education 1 OR WELF2005 - Field Education 1

Restrictions

Students must be enrolled in 1666 Bachelor of Social Work or 1713 Bachelor of Criminal and Community Justice/Bachelor of Social Work.

Assumed Knowledge

Advanced understanding of practice theories and range of social work methods including casework, group work, community work, research and policy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify major contemporary issues influencing the ways social workers practise, particularly related to the use of technology and social media;
2. Demonstrate understanding of the need to practise in a culturally and spiritually sensitive manner, including in work with Aboriginal Australians and Torres Strait Islanders;
3. Apply critical, reflective and creative skills to make informed decisions in professional and applied contexts;
4. Outline ways in which practitioners can work to intervene effectively to assist individual and groups of clients in a variety of contexts;

- Analyse their own social work practice and that of colleagues, to identify and replicate the best aspects;
- Generalise their learning from a specific practice situation to the overall context in which such situations arise.

Subject Content

- Technology and social media in social work practice and services
- Disability
- Critical best practice and appreciative inquiry
- Mental health
- Child protection and child well being
- Working alongside Aboriginal and Torres Strait Islander peoples and communities
- Interdisciplinary practice
- Culturally sensitive approaches to social work
- Working with older people and communities

Assessment

WELF 4002 Counselling and Consultation

Credit Points 10

Legacy Code 101247

Coordinator Martin Daly ([https://directory.westernsydney.edu.au/search/name/Martin Daly/](https://directory.westernsydney.edu.au/search/name/Martin%20Daly/))

Description This unit introduces students to the basic skills underlying professional helping, providing a foundation for further training in counselling or psychological therapy. Students explore the professional helping relationship, the counselling process, common counselling and therapeutic frameworks, and learn key counselling micro-skills. There is a strong focus on applied skill development through in-class skills practice and assessment. Professional ethics and responsiveness to client characteristics including age, gender and cultural background are also emphasised. The unit provides structured opportunities to reflect on personal and professional development and readiness for further training in professional helping.

School Psychology

Discipline Counselling

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 4 subject

Equivalent Subjects LGYA 0475 - Counselling and Collaborative Consultation 1

Restrictions

Students must be enrolled in one of the following programs: 1796 Graduate Diploma in Psychology, 1860 Bachelor of Psychological Studies (Honours), 1905 Bachelor of Psychological Science (Honours), 1504 Bachelor of Arts (Psychology) Honours, 1500 Bachelor of Psychology students who have successfully completed 240 credit points including the 160 credit point core sequence in Psychology, 1834 Bachelor of Psychology/1865 Bachelor of Psychology (Honours) students who have successfully completed 240 credit points including the 120 credit point core sequence in Psychology and the 40 credit point Psychology Extension sub-major prior to 2022 or for students who commenced 1865 Bachelor of Psychology (Honours) from 2022, students must have successfully completed 240 credit points including the 140 credit point core sequence in Psychology. All students must have met the minimum requirements for entry into fourth year of the Australian Psychology Accreditation Council (2010; Section 4.1.1): The entry requirement for a fourth year program is previous successful completion within the last 10 years, of an accredited three year sequence in psychology or the first three years of an integrated accredited four year program.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Demonstrate a working knowledge of the nature of the professional helping relationship, including the role of empathy and active listening
- Build and maintain rapport in a simulated professional helping relationship
- Demonstrate, apply and evaluate appropriate interpersonal communication and interview skills relevant to psychological practice, including active listening skills, clarifying and reflecting, paraphrasing and summarising, questioning, empathic responding, motivational interviewing, normalising, reframing, and challenging
- Explain the basic components of common counselling and psychological therapy frameworks, and their application across different client types and presenting problems
- Demonstrate a working knowledge of key ethical, professional and interprofessional considerations
- Explain the principles of cultural responsiveness in professional helping

- Apply self-reflection to evaluate professional strengths and limitations, fitness for practice, and avenues for professional development.

Subject Content

- The nature of the professional helping relationship.
- Developing and maintaining rapport.
- The counselling process.
- Basic counselling micro-skills, including verbal and non-verbal active listening skills, clarifying and reflecting, paraphrasing and summarising, questioning, empathic responding, motivational interviewing, normalising, reframing, and challenging.
- Cultural and minority group sensitivity and responsiveness.
- Introduction to ethical frameworks and responsibilities in psychological therapy.
- Introduction to risk management.
- Overview of intervention strategies in counselling and psychological therapy.
- Adaptation of basic skills to varied professional helping contexts and formats.
- Challenges and rewards as a professional helper.
- Readiness for a career in professional helping.

WELF 4006 Ideologies of Practice in Social Work

Credit Points 10

Legacy Code 400517

Coordinator Frances Gale ([https://directory.westernsydney.edu.au/search/name/Frances Gale/](https://directory.westernsydney.edu.au/search/name/Frances%20Gale/))

Description Social work practice is not a neutral activity arising from an objective viewpoint but is inextricably bound to varying ideologies and propositions that are concerned with human conduct. This subject examines the various ideologies that inform psycho-social and political analysis. Ideologies such as liberalism, critical feminism, critical masculinity, critical class theory, critical race theory, and adultism, and their explanations for psycho-social problems and proposals for change are examined in relation to methods of social work practice. Students will be encouraged to explore how all theory and practice methods incorporate ideological assumptions and how, therefore, the

construction of creative solutions demands practice that is reflective and self-critical.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) WELF 3020 OR WELF 2005

Restrictions Students must be enrolled in 1666 Bachelor of Social Work) or 1713 - Bachelor of Criminal and Community Justice/Bachelor of Social Work

Learning Outcomes

On successful completion of this subject, students should be able to:

- Demonstrate critical knowledge of some of the assumptions, values and interests influencing explanations for psycho-social problems and proposals for change, and their application to social work practice.
- Apply critical and reflective skills to identify the ideological and political influences inherent in the processes of knowledge construction.
- Analyse the ambiguity inherent in social science knowledge and its application to social work practice.
- Critique the professional use and ownership of knowledge and its implication for service users of self-determination and empowerment.
- Critically reflect on the influence of ideologies on their own action in practice.

Subject Content

- Critical reflection on the concept of ideology
- Construction of knowledge in social work practice
- Contributions of Psychology in social work practice
- Contributions of Sociology in social work practice
- Liberalism and social work practice
- Critical race theory and social work practice
- Social class and social work practice
- Gender constructions and social work practice
- Adultism and social work practice
- Spiritualities in social work practice
- Post Modern approaches in social work practice

WELF 4008 Professional Decision Making in Social Work

Credit Points 10

Legacy Code 102352

Coordinator Daniel Doh ([https://directory.westernsydney.edu.au/search/name/Daniel Doh/](https://directory.westernsydney.edu.au/search/name/Daniel%20Doh/))

Description This unit uses a problem-based learning approach to develop students' critical and practical reasoning abilities in professional decision making. Students will compare several models of decision making used at the interface of organisational and individual/family work contexts, and evaluate the usefulness of evidence based inquiry as a decision aid. Through case studies, students will discern the unique characteristics of a situation requiring professional judgement, explore their own habits or preferences in decision making, and develop reasoning skills that produce sound and ethical responses to the situation at hand.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) WELF 3020 OR
WELF 2005

Equivalent Subjects WELF 4004 - Critical Social Work Practice Indirect

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a capacity to search for, analyse and present best practice evidence in relation to a social work intervention.
2. Critically evaluate evidence based inquiry as a decision making aid in social work practice.
3. Demonstrate understanding of assumptions underpinning several formal and informal (discretionary) decision making models; also, of how decision making models in social work are affected by organisational culture and political context.
4. Demonstrate understanding of how a worker's values, purpose/ goals, reasoning and relationship skills impact on decision making.

Subject Content

- Models and principles of decision making in professional social work practice
- Research skills to undertake evidence-based practice (EBP) inquiry; understanding how evidence is produced and how social workers interpret and apply evidence in practice
- skills in Critical thinking, negotiated decision making, and practical reasoning.

Assessment

WELF 4010 Social Work Honours Thesis 2

Credit Points 10

Legacy Code 101790

Coordinator Neil Hall ([https://directory.westernsydney.edu.au/search/name/Neil Hall/](https://directory.westernsydney.edu.au/search/name/Neil%20Hall/))

Description This unit is designed to support the process of completion of a Social Work honours degree and the production of an honours thesis. It is only available to students who have been accepted into the honours programme for the Bachelor of Social Work. This unit is the culmination of studies for students who have completed their undergraduate degree and provides substantial training in research. Under staff supervision, students choose the particular topic for their research, design their own programme of research, perform the research and analyse the results. The culmination of this process is the production of a thesis in which students describe the rationale for their topic, their research programme, ethical issues, results, and their conclusions.

WELF 6001 Ethics and Diversity in Counselling

Credit Points 10

Legacy Code 102909

Coordinator Susan Sisko ([https://directory.westernsydney.edu.au/search/name/Susan Sisko/](https://directory.westernsydney.edu.au/search/name/Susan%20Sisko/))

Description This unit is designed to prepare students to work in a diverse society as counsellors and advocates. Students will study the emergence of research in the counselling professions and explore connections and tensions between personal, professional and research ethics. Students will have the opportunity to examine their own cultural identity development, their own relationship with power and privilege and how these may impact their counselling practice. The unit will critically examine the evolution of the multicultural movement in the counselling profession and will consider issues and concerns of several non-dominant populations, including intersectionality in working with diverse ethnicities, genders, sexualities, religions, age and ability status.

School Social Sciences

Discipline Counselling

Student Contribution Band HECS Band 4 10cp

Equivalent Subjects WELF 7008 - Ethics and Diversity in Research and Therapy HUMN 7036 - Research in the Social Sciences

Restrictions Students must be enrolled in 1817 - Master of Psychotherapy and Counselling.

Assumed Knowledge

Concurrent or previous study of any foundational subject in counselling.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate theories, evolution and contemporary issues in the counselling profession and in multicultural counselling.
2. Analyse diversity, ethical issues and considerations in multicultural counselling.
3. Collaborate with individuals from intersecting and diverse backgrounds to contribute to the solution for ethical issues in multicultural counselling.
4. Reflect on own values and awareness to enhance personal and professional development in multicultural counselling.

Subject Content

Theories and evolution of the multicultural movement in the counselling profession.

Diversity issues in counselling practices.

Ethical issues in multicultural counselling.

Key principles and frameworks in multicultural counselling.

Personal and professional awareness development in multicultural counselling.

Counsellors' role in social justice and advocacy.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Participation		10	N	Individual

WELF 7001 Clinical Studies (Art Therapy)

Credit Points 20

Legacy Code 101784

Coordinator Elizabeth Fitzgerald ([https://directory.westernsydney.edu.au/search/name/Elizabeth Fitzgerald/](https://directory.westernsydney.edu.au/search/name/Elizabeth+Fitzgerald/))

Description This unit aims to develop clinical practice skills for students enrolled in the Master of Art Therapy. The unit will involve preparation for the field placements and group supervision of casework

and issues arising from the placements. The unit involves 375 hours of clinical placement working under the guidance of a clinical supervisor.

School Social Sciences

Discipline Counselling

Student Contribution Band HECS Band 4 20cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) CART 7004 AND

CART 7005 AND

CART 7010 AND

WELF 7009 OR

WELF 7029 AND WELF 7032

Assumed Knowledge

Knowledge of art therapy theory and practice and counselling theory and practice.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate their ability to relate theoretical knowledge to the placement setting
2. Demonstrate appropriate clinical, ethical and cultural competencies for a trainee practitioner within the placement setting.
3. Begin art therapy clinical practice with individuals and/or groups
4. Observe an agency at work and gain an understanding of agency philosophy, policies and practices
5. Participate appropriately as a member of a professional team alongside experienced employees of the host organisation.
6. Accept, reflect on and respond reflexively to feedback from on and off-site supervisors.
7. Demonstrate their ability to critically and constructively reflect upon their clinical and placement experiences.
8. Conduct a focussed reading project around a particular client group, problem or issue relevant to the student's placement agency, and doc

Subject Content

1. Placement in an appropriate setting for 375 hours
2. Examination of the way in which the treatment models and management structures of the agency affect the functioning of the therapist
3. Working as part of a team
4. Working with clients under supervision
5. Development of clinical skills in practice: therapeutic skills, maintaining the frame of therapy, observation of appropriate boundaries, adherence to ethical practices, cultural competency and sensitivity, engagement and assessment of issues with clients, use of supervision, presentation skills, report writing, record keeping, maintaining art materials, safe and sustainable art therapy studio and clinical practice
6. Observation of an agency at work

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance ([https://](https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance)

Discipline Counselling

Student Contribution Band HECS Band 4 20cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) WELF 7009 AND WELF 7010 AND WELF 7006

Equivalent Subjects LGYA 1627 - Clinical Studies (Counselling)

Restrictions

Students must be enrolled in 1817 Master of Psychotherapy and Counselling or 1647 Graduate Diploma in Counselling.

Assumed Knowledge

Knowledge of counselling theory and practice and professional practice in a clinical context.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Integrate theoretical knowledge and practical skills in order to effectively work with clients in the placement setting
2. Demonstrate ability to reflect critically upon one's clinical work through observation, documentation, audiotape and case study analysis
3. Participate appropriately and effectively as a member of an agency clinical team as demonstrated through consistent professional conduct inclusive of ethical, legal and cross-cultural considerations.
4. Achieve an appropriate standard of professional and clinical practice for a graduating clinician in counselling and psychotherapy through completion of required number of supervised placement hours.
5. Demonstrate understanding of the counselling experience from the position of the client and how this learning informs clinical practice

Subject Content

- Placement in an appropriate setting for 100 hours
- Observation of an agency at work
- Examination of the way in which the treatment models and management structures of the agency affect the functioning of the therapist or counsellor
- Working as part of a team
- Working with clients under supervision.
- Development of clinical skills in practice: therapeutic skills, maintaining the frame of therapy, observation of appropriate boundaries, adherence to ethical practices, engagement and assessment of issues with clients, use of supervision, presentation skills, report writing, record keeping.
- Development of professional skills including reflective practice, professional and ethical conduct and understanding of inherent requirements for counselling practice.

WELF 7003 Contextualised Practice

Credit Points 10

Legacy Code 102394

Coordinator Maggie Hall ([https://directory.westernsydney.edu.au/search/name/Maggie Hall/](https://directory.westernsydney.edu.au/search/name/Maggie%20Hall/))

Description Social work practice is informed by, and negotiated through, policy, legislative and ethical frameworks. This unit focuses on how these frameworks influence and shape social work practice in Australia and provides an opportunity for students to critically reflect upon their power, responsibilities and obligations. In this unit, students will acquire the knowledge and skills to advocate for marginalised and disadvantaged individuals and groups through activism and advocacy and, work for social justice change through reform of legislation and policy.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1792 Master of Social Work (Qualifying)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse legislative and policy practices that both enhance and inhibit wellbeing at individual, family and community levels.
2. Analyse aspects of state mental health, domestic violence and child protection legislation relevant to social work practice, including confidentiality, involuntary interventions and guardianship.
3. Critically analyse different models of social policy making in Australia
4. Analyse and integrate knowledge of and commitment to social work values and ethics to guide professional practice.
5. Critically evaluate the application of advocacy skills in relation to legislative and policy frameworks and processes.

Subject Content

- legal frameworks for social work practice in Australia
- The policy process
- political institutions and policy making
- Legislative and policy practices that both enhance and inhibit wellbeing at individual, family and community levels.

Case studies:

child wellbeing and protection
 mental health
 family violence
 Aboriginal and Torres Strait Islander peoples
 - ethics and social work practice
 - Advocacy strategies using knowledge of Legislative and policy frameworks and processes

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

WELF 7006 Counselling and Psychotherapy Practice

Credit Points 10

Legacy Code 102364

Coordinator Amanda Webb ([https://directory.westernsydney.edu.au/search/name/Amanda Webb/](https://directory.westernsydney.edu.au/search/name/Amanda%20Webb/))

Description This unit builds on the experiential learning from Foundations of Psychotherapy and Counselling 1 by offering further practice in interpersonal counselling skills in dyadic and group contexts. Students will consolidate and expand the range of skills appropriate to the unfolding counselling relationship through continued skills practice. Students will develop capacity to analyse their own responses in depth and respond reflexively in their work with clients, within an increased understanding of the therapeutic relationship and of what makes counselling effective. Students will continue to participate in small group experiential training, thereby increasing their awareness of interpersonal and group processes.

School Social Sciences

Discipline Counselling

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) WELF 7004 OR WELF 7009

Equivalent Subjects WELF 7005 - Counselling 2

Restrictions

Students must be enrolled in 1817 Master of Psychotherapy and Counselling, 4595 Master of Art Therapy or 1770 Master of Social Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate advancing skills in listening, empathic responding, use of silence, and exploratory questioning.
2. Practice beginning skills in immediacy and other skills of encounter such as providing feedback, and consider the ethical issues and dilemmas encountered in the responsible use of self in counselling and therapy.
3. Facilitate the stages of a short-term counselling relationship.
4. Apply skills in engaging in a therapeutic relationship with clients.
5. Identify how to assess the effectiveness of counselling with and for clients, and how to work constructively toward closure.
6. Critically analyse and make comparisons between individual and group counselling as experienced by both client and counsellor.

Subject Content

Continuing counselling skills practice including triadic work eight practice sessions with an advanced counselling student in their second year of studies.

Further development of existing and new skills in listening, empathic responding, use of silence and exploratory questioning, immediacy, highlighting of conflicts, providing feedback, and interpretation.

Consideration of concepts of transference and countertransference, and the use of self within the counselling/therapy process.

Exploration of the use of psychoeducational and experiential groups within professional counselling practice, including the development of group facilitation skills.

Critical consideration of how change occurs, inside and outside of the counselling relationship, and of how counsellors know when clients are better.

Exploration of when and how to end therapy - the concept of termination as mature, premature or delayed.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Reflection on counselling skills practice and in-class supervision	1,000 words + submission of session review templates	25	Y	Individual
Session transcript and written analysis	2000 words, plus 10 minute transcript & analysis, from a 50-60min audiotaped session	50	Y	Individual
Reflective report on interpersonal and intrapersonal group process	1500 word written assignment	25	Y	Individual

WELF 7007 Critical Social Work Practice

Credit Points 10

Legacy Code 102395

Coordinator Linda Briskman ([https://directory.westernsydney.edu.au/search/name/Linda Briskman/](https://directory.westernsydney.edu.au/search/name/Linda%20Briskman/))

Description This unit focuses on the application of critical theories, models and methods of social work practice through the exploration of diverse fields of practice including: child wellbeing and protection; mental health; working with older people; disability; housing and homelessness; LGBTQI social work; and rural and remote practice. The emphasis will be on the contribution of various critical perspectives (Feminist, Post-colonial, Postmodern, Marxist, Green, Critical Race, etc) to social work theory and to the development of alternative forms of practice.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) WELF 7023 AND WELF 7024

Restrictions

Students must be enrolled in 1792 Master of Social Work (Qualifying)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Compare and contrast critical social work practice theories, approaches and models analysing their application in organisational, social and cultural contexts.
2. Demonstrate an understanding of critical practice skills and of the different ways they can be applied across the spectrum of indirect and direct practice areas, including interpersonal engagement, assessment, professional writing, counselling, health promotion, advocacy and team work.
3. Engage in critical reflection on the use of self in practice, identifying strengths and areas for further development.
4. Demonstrate a thorough understanding of the experience of marginalised individuals, groups and communities within a range of different fields of practice, settings, client groups and geographical locations.

Subject Content

- Examination of various theoretical contributions to critical social work, including:

Human rights

Feminist analysis

Postcolonial and critical whiteness studies

Indigenous world views

Postmodernism

Marxist analysis

Green political theory and environmentalism

- These will be examined across a number of different fields of social work practice, such as:

Child wellbeing and child safety ? including child protection risk assessment

Mental Health- including mental health assessment

Disability ?inclusive and accessible practice

Working with individuals, groups and communities from rural and remote locations

Working with older people

Community Justice

Social work in health settings ? including skills for team and family conferences

International social work ? social work in a global context

LGBTQI social work practice

Housing and homelessness

Assessment

WELF 7008 Ethics and Diversity in Research and Therapy

Credit Points 10

Legacy Code 102357

Coordinator Patricia Parish ([https://directory.westernsydney.edu.au/search/name/Patricia Parish/](https://directory.westernsydney.edu.au/search/name/Patricia%20Parish/))

Description This unit introduces students to key considerations for practicing therapy and research in a diverse and neo-colonial context. Students will study the emergence of research in the arts therapy profession and explore connections and tensions between personal, professional and research ethics. Through close reading of professional documents, case studies and research papers, students will examine how the 'subjects' of therapy and research are conceptualised and constructed. From a perspective that links knowledge and power, students will look at what the published research says about what works and how in therapy; ask whom therapy and research work for; and examine the work these therapy and research practices do.

School Social Sciences

Discipline Counselling

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects HUMN 7036 - Research in the Social Sciences

Restrictions

Students must be enrolled in 4595 Master of Art Therapy or 1770 Master of Social Science Specialisations (Studies in Art Therapy).

Assumed Knowledge

Concurrent or previous study of any foundational subject in either counselling or art therapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the key discourses and power relations that shape professional, clinical and research practice in the arts therapies.
2. Critically evaluate what constitutes research evidence in the arts therapies and other psychotherapies.
3. Formulate a sound basis for ethical and relational decision-making in therapy and research.
4. Reflect on one's own positioning and intersectionality, in order to work sensitively with diverse therapy and research participants.
5. Engage art therapy as a practice of social justice to counter ongoing effects of colonisation and the widespread inequities that bring people to therapy.

Subject Content

History and significance of research in the psychotherapies and arts therapy.

Evidence in the psychotherapies

Values and ethics in arts therapy research and clinical practice.

Ethical considerations and scenarios for arts therapy research and practice within a culturally and socially diverse and neo-colonial context.

Historical and emerging discourses that shape the psychotherapies
Normality, abnormality, diversity and difference within counselling and art therapy research and professional literature.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

WELF 7009 Foundations of Psychotherapy and Counselling 1

Credit Points 20

Legacy Code 102353

Coordinator Penny Gardner ([https://directory.westernsydney.edu.au/search/name/Penny Gardner/](https://directory.westernsydney.edu.au/search/name/Penny%20Gardner/))

Description Foundations of Psychotherapy and Counselling 1 is a foundational unit for postgraduate counselling and therapeutic studies. It forms the first part of a 40 credit point sequence undertaken during the first year. Foundations of Psychotherapy and Counselling 1 presents the foundational skills necessary for the successful inception of a productive therapeutic relationship. The sequenced, progressive presentation of these skills via experiential learning is framed by the simultaneous presentation of key theoretical concepts relevant to the skills in question. Students will be required to analyse the features of their own personalities, and to reflect on feedback that they receive from others in the role of psychotherapist/counsellor, in order to develop the self-awareness and sensitivity necessary for this professional role.

School Social Sciences

Discipline Counselling

Student Contribution Band HECS Band 4 20cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects WELF 7004 - Counselling 1

Restrictions

Students must be enrolled in 1647 Graduate Diploma in Counselling, 1648 Graduate Certificate in Counselling, 1817 Master of Psychotherapy and Counselling, 4595 Master of Art Therapy or 1770 Master of Social Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate the basic counselling skills of **holding**, **exploring** and **immediacy**.
2. Demonstrate how (genetic) temperament and attachment style interact in the formation of a **core personality** and the role of attachment as the foundation of **transference**.
3. Recognise ethical issues fundamental to the counselling relationship: power/expertise, inequality, boundaries.
4. Demonstrate a capacity for self-reflection, and understanding of how their preferred interpersonal style in the role of counsellor may affect others in the role of client.
5. Develop observational ability in recognising intrapersonal and interpersonal processes in group, with focus on how groups may function as a **social microcosm**.
6. Demonstrate the ability to critically analyse the similarities and differences in the experience of both client and counsellor in individual counselling and group counselling

Subject Content

- introduction to The nature of counselling/psychotherapy as A relational, rather than An instrumental, process
- The therapeutic Contract or **Contract**: The promotion of safety, consistency and clear boundaries

- The nature of psychoeducational and experiential groups as A facet of counselling.
- introduction to The counselling skills appropriate for group facilitation
- The skills of 'holding', which facilitate this type of relationship: empathic reflection of content and feeling; purposeful use of silence; open questioning.
- The skills of 'exploring', which open up particular areas of The client's experience for conscious reflection: open questioning, targeted (assessment) questioning, stating

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical	1,500 words	30	N	Individual
Reflection	1,500 words	20	N	Individual
Essay	2,000 words	30	N	Individual

WELF 7010 Foundations of Psychotherapy and Counselling 2

Credit Points 10

Legacy Code 102355

Coordinator Melissa Maclean ([https://directory.westernsydney.edu.au/search/name/Melissa Maclean/](https://directory.westernsydney.edu.au/search/name/Melissa%20Maclean/))

Description Foundations of Psychotherapy and Counselling 2 presents and critically evaluates the major theoretical paradigms of counselling and psychotherapy. These include; psychoanalytic / psychodynamictherapies; humanistic psychotherapies; behavioural and cognitive behavioural therapies; systemic therapies; constructivist/postmodern therapies; and expressive therapies. Students will consider the assumptions about human development and behaviour that are central to each of these ways of working, as well as their underlying 'theory of change'. Students will also be introduced to common ways that clients present with psychological difficulties, and will explore

various clinical responses to such client issues. These issues will be explored considering intrapsychic, relational and life stressor factors. Students will consider how presenting issues relate to the norms and extremes of various personality types, and what consideration should be given to life-stages in understanding client problems.

School Social Sciences

Discipline Counselling

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) WELF 7009

Equivalent Subjects WELF 7005 - Counselling 2

Restrictions

Students must be enrolled in 1647 Graduate Diploma in Counselling, 1648 Graduate Certificate in Counselling, 1817 Master of Psychotherapy and Counselling, 4595 Master of Art Therapy or 1770 Master of Social Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the major therapeutic models for treating mental distress, and critically analyse their major assumptions and practices;
2. Articulate the difference between intrapsychic and interpersonal/relational concepts of self, personality and dysfunctional behaviour;
3. Demonstrate an understanding of the basic issues and themes particular to each of the nine Enneagram personality types, and how these issues at their extreme may manifest in the forms of emotional illness and dys

Subject Content

- The major theoretical paradigms of counselling and psychotherapy and their assumptions about human development and behaviour
- The principles of change central to Each of The major theoretical Models and The interventions and ways of Working they Utilise
- The differences and similarities in how The major theoretical paradigms of psychotherapy and counselling inform approaches to Working with human difficulties
- how Established personality traits feed into, and may be potentiated or modified by, life events and new relationships, taking into account The individual/intrapsychic model and The relational/constructivist model for Understanding Problem formation and dysfunctional behaviour
- personality: norms and extremes. personality as A 'package', with both potentially constructive and potentially destructive aspects and how these relate to common client Issues and presentations
- how childhood experiences of being parented (functionally or d

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Analytic Essay - Description of student's own adult development and family of origin relationships	2500 words plus Genogram	50	N	Individual
Practical - Demonstrate a key therapeutic approach in practice (one session)	30 minute audio recording	35	N	Individual
Participation	20 minutes (maximum)	15	N	Group

WELF 7011 Further Clinical Studies (Art Therapy)

Credit Points 20

Legacy Code 101785

Coordinator Sheridan Linnell ([https://directory.westernsydney.edu.au/search/name/Sheridan Linnell/](https://directory.westernsydney.edu.au/search/name/Sheridan%20Linnell/))

Description This unit aims to develop clinical practice skills to the level required for professional registration. The unit involves 375 hours of clinical placement working under the guidance of a clinical supervisor. It will involve group supervision of casework and in-depth discussion of issues arising from placements.

School Social Sciences

Discipline Counselling

Student Contribution Band HECS Band 4 20cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) WELF 7001

Equivalent Subjects LGYA 1491 - Further Clinical Studies

Restrictions

Students must be enrolled in program 4595 Master of Art Therapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Integrate theoretical knowledge and practical skills in order to effectively work with clients in the placement setting.
2. Demonstrate ability to reflect critically upon one's clinical work through observation, documentation and case study analysis.
3. Participate appropriately and effectively as a member of an agency or clinical team as demonstrated through consistent professional conduct inclusive of ethical, legal and cross-cultural considerations.
4. Achieve an appropriate standard of professional and clinical practice for a graduating clinician in art therapy through completion of required number of supervised placement hours.
5. Apply an intrapersonal and interpersonal understanding of the therapeutic relationship in art therapy to clinical practice.

Subject Content

- Continuing art therapy practice and associated activities in approved settings for the required number of hours in order to reach 750 total hours for the clinical year.
- Examination of The ways in which The philosophies, approaches to practice and management Structures of The setting affect The work of The trainee therapist.
- Working as part of A team alongside experienced professionals.
- Working with clients/ participants with The support of clinical supervision
- Observation, documentation, enquiry and reflection in relation to one's art therapy practice.
- further development of clinical skills in practice: therapeutic and counselling skills, establishing A therapeutic Contract and maintaining The frame of therapy, observation of appropriate professional boundaries, adherence to Ethical practices, engagement with participants, assessment of Issues and planning of therapeutic approach, use of supervision, presentation skills, report writing, record keeping.

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

WELF 7013 Integrated Practice 1: Self and Story

Credit Points 10

Legacy Code 102370

Coordinator Melissa Maclean ([https://directory.westernsydney.edu.au/search/name/Melissa Maclean/](https://directory.westernsydney.edu.au/search/name/Melissa%20Maclean/))

Description This unit explores the concept of 'self' and how stories might shape self-identity or a sense of 'what it means to be me'. The enduring characteristics of stories will be examined alongside their different workings across cultures, traditions, technologies, genres and time. The unit will cover historical and contemporary notions of the unconscious as they inform an understanding of self and story. It will examine how an understanding of the brain, particularly of memory, and the workings of the right and left hemispheres, fit into this exploration. Working with selves and stories, as instruments for change in therapeutic work, will be considered across lifespan and a range of psychotherapies.

School Social Sciences

Discipline Counselling

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) WELF 7009

Restrictions

Students must be enrolled in program 1817 Master of Psychotherapy and Counselling

Assumed Knowledge

Concurrent or previous study of any foundational subject in counselling.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Reflect constructively on the concept of **self**.
2. Integrate findings from contemporary neuroscience into an understanding of the workings of the unconscious and memory in relation to storytelling and self-narratives.
3. Critically compare concepts and use of self and story across different approaches to psychotherapy, including Jungian Analysis, Narrative Therapy.
4. Understand psychotherapy in the broader context of how stories work within a range of other genres, contexts and media.
5. Analyse how the **self** is connected to broader familial and cultural narratives.
6. Demonstrate how story-telling and story-making can unfold within a therapeutic relationship, drawing on the client's and others' stories, through various forms including traditional and popular cultures and new technologies.

Subject Content

1. Introduction to historical and contemporary concepts of the self and identity, as they influence counselling and psychotherapy.
2. Introduction to the characteristics and workings of stories within and across cultures incorporating oral and written traditions, as well as electronic and digital technologies.
3. Consideration of storytelling genres (myths, parables, fairytales and narratives of survival, redemption and transformation) as shared in various forms (books, TV, movies, music videos, computer games and social media).
4. Understanding of the context and significance of the use of story in various fields including psychotherapy, and how this relates to **self**.
5. Examination of the implications of contempor

WELF 7014 Integrated Practices 2: Affliction and Recovery

Credit Points 10

Legacy Code 102371

Coordinator Amanda Webb ([https://directory.westernsydney.edu.au/search/name/Amanda Webb/](https://directory.westernsydney.edu.au/search/name/Amanda%20Webb/))

Description This unit critically examines the nature of mental illness and mental wellbeing. Historical and contemporary approaches to mental health and recovery will be reviewed. Diverse explanations for the origins of profound symptoms will also be explored. Mental health assessment tools commonly encountered by counsellors and psychotherapists are presented and their practical applications examined. Through case studies and autobiographical accounts, the voices of those with lived experience of major mental health issues will inform student learning in this unit. This unit invites students to critically evaluate mental health services from a range of perspectives and consider the role of counselling and psychotherapy alongside multiple pathways to recovery. Students will critically evaluate this knowledge and apply it in their development of skills in various psychotherapeutic methods to assist recovery and mental wellness.

School Social Sciences

Discipline Counselling

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) WELF 7009 AND WELF 7013

Co-requisite(s) WELF 7010

Restrictions

Students must be enrolled in 1817 Master of Psychotherapy and Counselling.

Assumed Knowledge

Concurrent or previous study of any foundational subject in counselling.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the historical context of mental health and recovery, and how that informs current approaches to mental illness;
2. Show advanced working knowledge of the major categories of psychological and emotional affliction;
3. Compare multiple explanations for profound symptoms described as mental illness;
4. Demonstrate knowledge and critical appraisal of current diagnostic and assessment methods/tools;
5. Demonstrate a knowledge of available mental health treatment services as an adjunct to counselling and psychotherapy;
6. Effectively practice skills in various psychotherapeutic methods to assist recovery and mental wellness.

Subject Content

1. Consideration of approaches to mental health over time, including historical notions of 'madness', the birth of the asylum and the development of modern psychiatry, and the implications of these for current approaches to working with and recovery from mental illness
2. Identification of the major categories of psychological and emotional affliction and understanding of the lived experience of mental illness
3. Examine the diverse explanations of profound symptoms, including the notion that symptomatology may originate childhood or adolescence
4. Examination of mental health diagnostic and assessment tools and how these may be applied in practice
5. Development of a working knowledge of mental health services in the community and how these intersect or complement the role of counsellors and psychotherapists
6. Understanding of the application of various therapies in the context of a trauma model approach or diagnostic approach to mental health

Assessment

WELF 7016 Integrated Practices 4: Self and Relationships

Credit Points 20

Legacy Code 102627

Coordinator Ireni Farag ([https://directory.westernsydney.edu.au/search/name/Ireni Farag/](https://directory.westernsydney.edu.au/search/name/Ireni%20Farag/))

Description In this capstone unit, students integrate their learning about interpersonal awareness and the value of the therapeutic relationship, which are central to the Master of Psychotherapy and Counselling. A focus on multiple relational influences enhances students' ability to work therapeutically with individuals, couples and families. Clients bring themselves and their current and past relationships into the therapy room with them, as does their counsellor. Students will have the opportunity to investigate their personal values and beliefs about relationships and how these influence their work with clients. Family life-cycle and developmental models are discussed, critiqued and applied to promote understanding of common and diverse client issues and presenting concerns. Ultimately students will explore the concept of interdependence and how relationship is central to human wellbeing.

School Social Sciences

Discipline Counselling

Student Contribution Band HECS Band 4 20cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) BEHV 7018

Co-requisite(s) WELF 7012

Incompatible Subjects HUMN 7010 - Critical and Creative Enquiry WELF 7015 - Integrated Practices 4 Self and Relationships

Restrictions

Students must be enrolled in 1817 Master of Psychotherapy and Counselling, and must have successfully completed 120 credit points.

Assumed Knowledge

Concurrent or previous study in counselling and/or psychotherapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise how diverse and multiple relational influences and family systems present in working with counselling and psychotherapy clients.
2. Critique and integrate knowledge from models such as the family life cycle and Erikson's developmental model in order to undertake assessment of client issues.

- Analyse and apply family systems with regard to the patterns and diversity of self and relationship within wider cultural and social systems.
- Effectively practice working hypotheses and the use of counselling skills in working with couples and families.
- Identify own personal values and biases about the nature of healthy relationships and the influence these have on work as a counsellor or psychotherapist.

Subject Content

Examination of relationship dynamics at the individual, couple and family level.
 Identification of the diverse nature of relationships, kinship and the modern family.
 Consideration of factors such as the family life cycle, and Erikson's psychosocial stages in understanding the dynamics of interpersonal and intrapersonal presenting issues.
 Presentation of family systems theories and approaches to working with couples to help inform working with relationships.
 Examination of personal values and biases as related to relationships and how these may influence therapeutic practice.
 Participation in experiential workshops to develop counselling skills applicable to working with more than one person at a time in counselling and psychotherapy.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Critical Review	1,500 words	30	N	Individual

WELF 7018 Leadership in Organisations

Credit Points 10

Legacy Code 102392

Coordinator Michael Houlbrook ([https://directory.westernsydney.edu.au/search/name/Michael Houlbrook/](https://directory.westernsydney.edu.au/search/name/Michael%20Houlbrook/))

Description This subject focuses on leadership in human service organisations and the social and economic factors that influence and frame practice. Students in the subject will briefly review the contemporary political economic circumstances underpinning human services and the ongoing changes to policy and practice. The subject will examine the idea of what leadership is and present major leadership theories relevant to the human services. The content will address contexts of leadership including setting organisational culture, situational leadership in relation to practice and people, management and governance and leading through change. The subject will also examine trust, ethics and fairness in leadership and leadership in difficult circumstances. The emphasis of the subject will be to equip students with the means to describe, question and reshape leadership practice.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1792 Master of Social Work (Qualifying)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe contemporary factors that impact leadership and management in organisations;
2. Analyse and appraise a diverse range of leadership theories, styles and models relevant to the Human Services;
3. Apply leadership skills and strategies for working in the Human Services;
4. Describe, critically analyse and shape their own leadership practices.

Subject Content

Social and economic factors that influence and frame organisational practices including neoliberalism, managerialism and human services sector reforms

Leadership as a concept and leadership theories

Contextual approaches to leadership ? culture, situation, practice, change

Leadership styles and the development of leadership practice

Giving and getting supervision and support

WELF 7019 Power and Marginalisation

Credit Points 10

Legacy Code 102393

Coordinator Jeeva Sajan ([https://directory.westernsydney.edu.au/search/name/Jeeva Sajan/](https://directory.westernsydney.edu.au/search/name/Jeeva%20Sajan/))

Description This unit complements theoretical frameworks introduced in Difference and Diversity to explore issues of power and marginalisation through the experiences of Aboriginal and Torres Strait Islander peoples, mental health consumers, children and young people, and people with disability. Practice and policy responses that challenge or reinforce power and marginalisation are explored.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1792 Master of Social Work (Qualifying).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically apply theoretical frameworks to analyse the construction and processes of marginality.
2. Analyse the impact of powerlessness, marginality, stigma and disadvantage, on individuals, families and communities.
3. Analyse the history and contemporary debates in policy and practice relating to marginality and empowerment of children and families, Aboriginal and Torres Strait Islander peoples, mental health consumers, and people with disability.
4. Evaluate social work's role in mediating power.
5. Critically apply social work knowledge to respond effectively within a human rights and social justice framework at the individual and systemic level.

Subject Content

- Frameworks of power and empowerment
- Contemporary debates in policy and practice relating to marginalisation and empowerment of Aboriginal and Torres Strait Islander peoples, mental health consumers, children and young people, and people with disability.
- Mediating power: the history of Australian social work in marginalisation and empowerment
- Understanding, contesting and privileging marginalised peoples
- Designing strategies for contesting policies and practices that marginalise

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Essay	10 minutes	40	N	Individual
Presentation	20 minutes	30	N	Group
Reflection	1,000 words	30	N	Individual

WELF 7020 Practising Research and Researching Practice

Credit Points 10

Legacy Code 102358

Coordinator Ireni Farag (<https://directory.westernsydney.edu.au/search/name/Ireni+Frag/>)

Description This unit equips Therapy Studies students with the conceptual frameworks and skills needed to conduct basic research in the areas of counselling and psychotherapy. The question 'How do we know what we know?' becomes the connecting thread throughout an introduction to quantitative, qualitative and mixed method approaches to practitioner research. Building on considerations from the prerequisite unit 102357 Ethics and Diversity in Research and Therapy, students will develop their understanding of research as a scholarly, professional, social and intersubjective practice. They will learn to generate answerable research questions and a coherent research proposal within appropriate intellectual and methodological frameworks.

School Social Sciences

Discipline Counselling

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) WELF 7008

Equivalent Subjects HUMN 7001 - Advanced Social Research Methods

Restrictions

Students must be enrolled in 1817 Master of Psychotherapy and Counselling.

Assumed Knowledge

Concurrent or previous study of at least one first year postgraduate subject in counselling theory and practice. Broad foundations and ethics of research at postgraduate level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate critical understanding of qualitative, quantitative and mixed method research design and its applications in counselling research.
2. Compare the strengths and limitations of a range of research methods in relation to the sub-discipline of counselling and psychotherapy.
3. Reflect constructively on the positioning of researchers and research participants in practitioner research.
4. Critically position and evaluate selected published research studies in counselling.
5. Frame an answerable research question that is significant and relevant for their field of practice, and plan how they would systematically approach this question.
6. Relate questions of method to research epistemology and an understanding of research as a scholarly, professional and social practice.

Subject Content

- introduction to A broad range of research methodologies and methods relevant to practitioner research in psychotherapy and counselling.
- introduction to The foundations of quantitative, Qualitative and mixed method research design.
- exploration of The relationships between epistemological assumptions, methodology and method.
- Critical reading and evaluation of selected published research in The areas of counselling and psychotherapy.

- practice in framing research questions and A research proposal in The student's professional field.
- reflection on research as A social, professional and interpersonal practice.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Participation (in-class article review activity)	N/A	10	N	Individual
Literature Review: Review of counselling literature in a substantive area of interest	900 words	30	N	Individual
Proposal: Research Proposal in a substantive area of interest	2,100 words	60	N	Individual

WELF 7021 Social Work (Qualifying) Field Education 1

Credit Points 20

Legacy Code 102391

Coordinator Hong-Jae Park ([https://directory.westernsydney.edu.au/search/name/Hong-Jae Park/](https://directory.westernsydney.edu.au/search/name/Hong-Jae%20Park/))

Description This unit enables students to participate in a structured and supervised field placement (408 hours). Social Work (Qualifying) Field Education 1 provides students with the opportunity to apply their knowledge and experience in linking theory with the realities of practice, and extend their skills for social work practice with the support of practitioners working in the human services sector. Placements are offered in a variety of agency types spanning all areas

of social work practice: direct service work with individuals, groups and families, community development; research and policy.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 20cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) WELF 7023

Restrictions

Students must be enrolled in 1792 Master of Social Work (Qualifying)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate the skills needed for working within human services organisations (as described in the Field Education Manual);
2. Explain the different skills needed for working with a range of service users and organisations;
3. Critically evaluate their own performance in a variety of practice contexts including mental health and child wellbeing.
4. Critically evaluate their own performance in a variety of practice contexts.

Subject Content

408 hours of supervised practice

Campus based Integrative workshops covering:

Learning styles

Developing a Learning Plan and negotiating a promising learning experience

The nature of supervision and assessment

Peer support and teamwork

The use of critical thinking on placement

Intervention Skills focus: Casework, Group work, Community Work, Submission writing writing in diverse fields of practice including mental health and child wellbeing

Professional context: ethical practice, stress and burnout, the role of ideology in practice frameworks

Winding up the placement and developing a learning plan for future social work learning

Intervention Skills focus: Casework, Group work, Community Work, Submission writing

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Refer to the Special Requirements website for more information.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

WELF 7022 Social Work (Qualifying) Field Education 2

Credit Points 30

Legacy Code 102397

Coordinator Hong-Jae Park (<https://directory.westernsydney.edu.au/search/name/Hong-Jae Park/>)

Description Social Work (Qualifying) Field Education 2 incorporates the final social work placement (600 hours) and will consolidate the experiences gained from both field placements. It will further assist students to clearly articulate their frame of reference within a critically reflective practice framework, before entering employment. Placements are offered in a variety of agency types spanning all areas of social work practice: direct service work with individuals, groups and families, community development; research and policy.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 30cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) WELF 7023 AND WELF 7021

Restrictions

Students must be enrolled in 1792 Master of Social Work (Qualifying)

Learning Outcomes

On successful completion of this subject, students should be able to:

- Utilise advanced skills in a specialised area of social work;
- Demonstrate advanced social work skills and knowledge in diverse fields of practice including Aboriginal and Torres Strait Island, cross-cultural, mental health and child wellbeing;
- Be autonomous and independent in practice;

- Articulate the values, interests and ideologies that underpin practice in the agency, and evaluate their implications for social work practice;
- Constructively contribute to the work of the organisation and contribute ideas for change or improvement;
- Critically reflect on their own practice, and evaluate their readiness for entering the social work workforce.
- Demonstrate advanced social work skills and knowledge in diverse fields of practice including Aboriginal and Torres Strait Island, cross-cultural, mental health and child wellbeing.

Subject Content

600 hours of supervised practice

Writing a job application and resume for a social work position

Examining practice competence - the theory and practice divide?

Exploring skills in dealing with difficult situations

Effective use of supervision

Understanding social work competence in diverse fields of practice including Aboriginal and Torres Strait Island, cross-cultural, mental health and child wellbeing

Evaluating evidence-based practice

Social justice as a framework for practice; social work as political practice

Dual relationships in social work practice

Working in uncertainty - the first year of practice

Examining practice competence - the theory and practice divide?

Understanding social work competence

Working in uncertainty - the first year of practice

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

Student Compliance Information for all Health-Related Placements

To be eligible to enrol in a subject and attend a health-related placement in your program at a NSW Health facility, students must meet Western Sydney University course requirements and Special Legislative Requirements to be assessed in their first year of study against the following.

- Student Undertaking form.
- National Criminal History Check: Students must have a current (expiring 3 years from date of issue) check valid for their entire program. A valid National Criminal history check must be an Australia wide check, include the student's full name matching their Student ID card and date of birth and not have any offences listed. If a student has a criminal history identified on their check, they must provide a Clinical Placement Authority Card (CPAC) or conditional letter from the NSW HealthShare Employment Screening and Review Unit https://www.health.nsw.gov.au/careers/student_clearance/Documents/appendix-10-student-application.pdf International students must additionally have a translated International Police Check or statutory declaration.
- A NSW Working with Children Check (WWCC) clearance letter issued under the category of volunteer valid for their entire program. Contact your School for further details. Resources are also available on the Placement Hub (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/) website

Assessment

WELF 7023 Social Work Practice Methods 1

Credit Points 10

Legacy Code 102390

Coordinator Hong-Jae Park (<https://directory.westernsydney.edu.au/search/name/Hong-Jae Park/>)

Description Social Work Practice Methods1 introduces students to a range of skills, knowledge and professional values for work with individuals and families in diverse practice settings. Students are supported to develop core verbal and written communication skills including engagement, assessment, designing and implementing interventions, evaluation, report writing and record keeping practices. There is an emphasis on safe, inclusive and responsive practice with Aboriginal and Torres Strait Islander peoples and people from culturally diverse backgrounds.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1792 Master of Social Work (Qualifying)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Compare and contrast social work practice theories, approaches and models with individuals and families.

2. Utilise communication and interviewing skills for engaging with individuals and families in social work practice.
3. Integrate social work theories, models and methods to facilitate casework practice.
4. Critically reflect on personal values, skills and use of self in a way that allows professional values to guide own professional practice to enhance professional development.
5. Evaluate the application of individual and family work to diverse fields of practice including mental health and child wellbeing.
6. Demonstrate an awareness of safe, inclusive and responsive practice with Aboriginal and Torres Strait Islander peoples and people from culturally and diverse backgrounds.

Subject Content

1. Knowledge, skills and professional values for Social Work practice.
2. Core verbal and written communication skills for work with individuals and families (e.g. engagement, assessment, designing and implementing interventions, evaluation, report writing and record keeping).
3. Advocacy, self-determination, empowerment and social justice.
4. Individual and family work in diverse fields of practice including mental health and child wellbeing.
5. Safe, inclusive and responsive practice with Aboriginal and Torres Strait Islander peoples and people from culturally and diverse backgrounds.
6. Working with voluntary and involuntary individuals and families in diverse practice settings.
7. Critically reflexive practice.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Reflection	3 x 300 word entries (900 words)	30	N	Individual
Interview	12 minute video	20	N	Individual
Reflection	300 words	10	N	Individual
Report	1,200 words	40	N	Individual

WELF 7024 Social Work Practice Methods 2

Credit Points 10

Legacy Code 102396

Coordinator Fran Kendrick ([https://directory.westernsydney.edu.au/search/name/Fran Kendrick/](https://directory.westernsydney.edu.au/search/name/Fran%20Kendrick/))

Description Social Work Practice Methods 2 introduces theories and skills for work with groups and communities in diverse practice settings. This unit will provide students with the opportunity to develop core group work, community work and community development skills. Students will engage in simulated practice activities in Western's Social Work Skills Lab.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1792 Master of Social Work (Qualifying)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Assess social work theories, models and methods for practice with groups and communities.
2. Reflect on personal values in a way that allows professional values to guide community work and community development practice.
3. Integrate social work theories, models and methods to facilitate group work practice.
4. Apply group and community work skills and knowledge to diverse fields of practice including Aboriginal and Torres Strait Islander, cross cultural work, mental health and child wellbeing.
5. Examine ethics in group work and strategies of ethical reasoning to arrive at principled decisions for work with groups and community.

Subject Content

- Group dynamics and processes
- Social work values in group work and community practice
- Facilitating effective group work processes
- Ethics in group work
- The context of professional social work with groups
- Theories informing community work
- Ideologies, values and visions underlying community work
- Models of community work practice - community development, social planning, community and social action
- Skills required in community work and community development practice.
- Application of group and community work to diverse fields of practice including Aboriginal and Torres Strait Island, cross cultural work, mental health and child wellbeing

Assessment

WELF 7029 Indigenous Australia: History, Knowledge and Professional Practice

Credit Points 10

Legacy Code 102744

Coordinator Scott Avery ([https://directory.westernsydney.edu.au/search/name/Scott Avery/](https://directory.westernsydney.edu.au/search/name/Scott%20Avery/))

Description Working with Indigenous communities is an important field of practice for social and human service workers in statutory as well as community contexts. This unit introduces students to Aboriginal and Torres Strait Islander histories, including pre-contact, colonisation and contemporary developments. Specific attention will be paid to engaging communities - including practice principles, strategies and skills. This subject will emphasise the importance of culturally responsive practices requiring students to have an understanding of their own values and cultures. Critical self-reflection and positioning are vital skills for cultural responsiveness, and will be developed in this unit.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in programs 1792 Master of Social Work (Qualifying), 4595 Master of Art Therapy or 8083 Bachelor of Research Studies/Master of Research at Western Sydney University.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and discuss specific ways of doing, being and knowing from Indigenous perspectives.
2. Articulate Indigenous worldviews for use in professional practices.
3. Examine the impacts of history and policy upon the lived experiences of Indigenous peoples.

4. Detail key concepts of wellbeing as determined by Indigenous peoples.
5. Critically analyse professionals' role as agents of social change.

Subject Content

Indigenous history in Australia
 Indigenous identities and contemporalities
 Policies- past and present
 Cultural Safety
 Indigenous people and their concepts of well-being
 Working with and for Indigenous people
 Indigenous social work practices
 Reflecting on your role

WELF 7030 Research for Social Work Practice

Credit Points 10

Legacy Code 102745

Coordinator Daniel Doh ([https://directory.westernsydney.edu.au/search/name/Daniel Doh/](https://directory.westernsydney.edu.au/search/name/Daniel%20Doh/))

Description This subject introduces students to the different approaches to knowledge generation for social work practice and policy. The subject highlights how social workers can design and implement ethical research activities including the theories and methods that support different research approaches. The subject explores and analyses contemporary research design issues and the dominant qualitative, quantitative and mixed method approaches in knowledge generation. This is in the context of incorporating Indigenous knowledges and methodologies, and those specifically relevant to gender and cultural diversity. The subject highlights practice-based uses of research including program evaluation, meta-analysis, systematic reviews and community needs assessment.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in programs 1792 Master of Social Work (Qualifying) or 8083 Bachelor of Research Studies/Master of Research. Students in program 1792 Master of Social Work (Qualifying) must have successfully completed 10 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse research relevant to social work.
2. Demonstrate a critical understanding of the ways in which research is used in a variety of social work settings.
3. Critically reflect on the ways in which social workers can undertake research as part of their day-to-day practice.
4. Demonstrate a capacity to design and undertake a community needs analysis.
5. Demonstrate a capacity to design and undertake an agency/ program evaluation.

Subject Content

The context, roles and purposes of research for social work practice. Understanding and critically analysing social research, evidence and policy in the context of diverse political agendas. Theoretical perspectives for knowledge generation in social work, including Indigenous knowledges and methodologies, and those specifically relevant to gender and cultural diversity. Critical self-reflection on the 'practitioner as researcher'/'researcher as practitioner' model. Ethics and social work research. Understanding social need and population census data for community needs assessments. Program evaluation, meta-analysis and systematic reviews. Appraising practice effectiveness research. Knowledge translation: communicating research for practice and policy.

WELF 7031 Theories and Knowledges for Social Work

Credit Points 10

Legacy Code 102743

Coordinator Rimple Mehta ([https://directory.westernsydney.edu.au/search/name/Rimple Mehta/](https://directory.westernsydney.edu.au/search/name/Rimple%20Mehta/))

Description This unit explores different strands of social theory and their relevance for contemporary social work practice, both in the context of Western Sydney, and also globally. The heritage of the European Enlightenment will be critically examined as providing the basic paradigm for the construction of 'social theory' and also of social work knowledge and practice. The contribution of the humanities, as providing space for creativity and inspiration as well as insight, will also be considered. The limitations as well as the positives of Western epistemologies will be explored, and alternatives such as Southern Theory, Indigenous knowledges, critical theory, and 'new paradigm' thinking will be evaluated.

School Social Sciences

Discipline Social Work

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in program 1792 Master of Social Work (Qualifying)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate the range of theories used by social workers, their strengths and their limitations.
2. Demonstrate an understanding through a critique of the Enlightenment heritage of social work, and its epistemological assumptions.
3. Examine and evaluate the relevance of alternative epistemologies for social work, especially in relation to indigenisation and decolonisation.
4. Identify ways in which the humanities and the creative arts can be incorporated into social work knowledge.
5. Demonstrate how these alternative epistemologies can be contextualised for practice in culturally diverse communities.

Subject Content

Theory for practice: theories that social workers use

The relationship between knowledge, theory and practice

Paradigms of social theory: positivist, interpretive, critical and postmodern

The Western Enlightenment tradition: strengths and limitations

Social work?fs Enlightenment heritage

Alternative epistemologies

Indigenisation and decolonisation of social work knowledge

The humanities and social work: history, philosophy, literature

Creativity, the arts and social work

Contextualising social work knowledge in culturally diverse communities

WELF 7032 Counselling Skills for the Allied Professions

Credit Points 10

Legacy Code 102806

Coordinator Ireni Farag ([https://directory.westernsydney.edu.au/search/name/Ireni Farag/](https://directory.westernsydney.edu.au/search/name/Ireni%20Farag/))

Description This unit introduces postgraduate students from allied professions to the major theoretical frameworks and foundational practices of counselling. An in-depth exploration of the embodied and situated experience of the trainee practitioner will be central to learning how to attend to and support others. Students will engage in an ongoing critical consideration of how discourses and practices of selfhood, social justice, power, colonisation, intersectionality, diversity and place shape the subjects of therapy and influence the therapeutic relationship. These intersubjective and scholarly enquiries will inform a scaffolded, intensive practice of microskills. (Legacy code 102806)

School Social Sciences

Discipline Counselling

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects WELF 7009 - Foundations of Psychotherapy and Counselling 1 WELF 7004 - Counselling 1

Restrictions

Students must be enrolled in program 4595 - Master of Art Therapy or students must be enrolled in another postgraduate program in Social

Sciences, such as Social and Community work, Health, Arts in Health Education or Bachelor of Research Studies.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Effectively and empathically practice beginning skills in counselling.
2. Integrate these counselling skills effectively into professional practice, from a critical social science perspective.
3. Recognise and constructively critique the major frameworks of counselling.
4. Respond appropriately in professional situations that require counselling skills.
5. Understand the similarities and differences between different professional roles and the possibilities and limits of their own role and expertise.
6. Establish a **◆**eholding environment **◆**f with people in distress, in order to continue to offer therapeutic/ relational support or refer on.

Subject Content

Reflection on the development of the self as practitioner.

In-class practice of foundational counselling skills.

Reflexive analysis of the experience of counselling practice from the position of trainee practitioner, participant and observer, including close analysis of recordings of practice sessions.

Critical consideration of the major theoretical frameworks of counselling.

Exploration of the connections and tensions between the values, beliefs and practices of the student's chosen profession and the values, beliefs and practices of professional counselling.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Applied Project	20 minute edited video recording plus 1,000 words (not including transcript)	40	Y	Individual
Critical Review	1,000 words	25	N	Individual
Reflection	1,500 words; or 1,000 words plus 6 annotated images	35	N	Individual

Prescribed Texts

- Geldard, D. Geldard, K. & Yin Foo, R. (2016). Basic personal counselling. 8th Ed. Australia: Cengage Learning
