ECON 3008 Financial Institutions Lending

Credit Points 10

Legacy Code 200062

Coordinator Sean Toohey ([https://directory.westernsydney.edu.au/search/name/Sean Toohey/](https://directory.westernsydney.edu.au/search/name/Sean%20Toohey/))

Description The major focus of this unit is the assessment and management of credit risk exposures and resulting implications on loan decisions and loan pricing decisions. The unit provides students with knowledge of traditional and modern credit risk measurement and management techniques, regulatory capital adequacy guidelines and economic capital decisions. Special topics covered include modern lending products and pertinent issues in lending. The unit covers current developments and debates in the field.

School Business

Discipline Economics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Assumed Knowledge

Financial Institutions Management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Access, evaluate and use relevant information for decision-making purposes
2. Apply theoretical knowledge to a professional/applied context
3. (Demonstrate an understanding of) Understand the local and international relevance of lending; including recent developments
4. Understand (Explain) the importance of ethical conduct within the field of lending
5. Understand (Articulate) the interrelatedness of topics within the field as well as within an inter-disciplinary context

Subject Content

Financial institutions lending basics and introduction to the current credit and lending environment

Types of lending

Analysis of quantitative and qualitative company information

Analysis of industry and market information

Traditional credit risk models

Regulatory capital adequacy

Economic capital methodologies

Modern credit risk models

Loan pricing

Current issues and developments

Teaching Periods

ECON 3009 Financial Institutions Management

Credit Points 10

Legacy Code 200061

Coordinator Selim Akhter ([https://directory.westernsydney.edu.au/search/name/Selim Akhter/](https://directory.westernsydney.edu.au/search/name/Selim%20Akhter/))

Description This unit provides an introduction to the theory and analytical techniques relevant to the management of Australian financial institutions. The unit presents a thorough examination of the major financial risks faced by Australian banks, and methods of measuring and managing these risks.

School Business

Discipline Economics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Assumed Knowledge

In order to optimise learning outcomes and skill development students are encouraged to have successfully completed or have the assumed equivalent knowledge of the following subjects: 200488 - Corporate Financial Management, 200048 - Financial Institutions and Markets.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critical thinking skills to provide potential solutions for theoretical and/or real-life problems in the banking industry, drawing from a wide range of techniques used in the banking area and also other disciplines such as management,

2. Appreciation of the inter-disciplinary nature of banking and its relations to areas such as HR Management, Organisational Management and Psychology,
3. Information literacy through self-reliant research on current issues, including the identification and evaluation of relevant information and conducting research on an academic standard,
4. Improved numerical skills through understanding and applying various measurement techniques used in banking and through interpreting derived results.
5. Appreciation of the interrelatedness of the various areas and functions in a banking institution,
6. Appreciation of the importance of work ethics, cultural considerations and integrity in banking institutions.

Subject Content

Introduction to financial institution management and the current environment

Measuring performance of financial institutions

Asset and liability management

Interest rate risk measurement and management

Liquidity measurement and management

Liability management

Capital management

Managing the securities portfolio

Securitisation

Operational risk measurement and management

Governance and psychology considerations

Current regulations and developments

Current issues & pertinent topics

Case studies in banking

Teaching Periods

ECON 3010 Globalisation and Asia

Credit Points 10

Legacy Code 200533

Coordinator Andrew Marks ([https://directory.westernsydney.edu.au/search/name/Andrew Marks/](https://directory.westernsydney.edu.au/search/name/Andrew%20Marks/))

Description This unit aims to examine the role of the diverse economies of East Asia, Southeast Asia, and South Asia in the Global economy, and the complex economic, historical, political, social and cultural factors which have influenced and continue to shape the transformation of these economies. The unit will evaluate alternative development paradigms in light of the experience of these economies. The discussion will be cast within the wider debate about the role of foreign trade and investment flows. The unit will take the political economy approach to understanding both the transformation of these economies and their role in the Global Economy.

School Business

Discipline Economics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 4320 - Asian Economies

Assumed Knowledge

200525 - Principles of Economics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the concept of globalisation and its historical perspectives.
2. Examine the debate about the pros and cons of globalisation, such as growth, poverty, inequality, labour and human rights, and the environment.
3. Outline the institutions of globalisation, such as the IMF, World Bank, WTO and APEC.
4. Describe the role of trade and industry policies.
5. Illustrate the role of FDI and short term capital flows and their pitfalls.
6. Assess the role of multinational corporations.
7. Consider managing globalisation.
8. Attain a greater understanding of the Asian economies.

Subject Content

- Explaining The emergence of Asian?fs miracle economies ? The role of The state: An Asian Model?

- Asia?fs role in globalisation, and The rise and fall of The Washington Consensus

- Global capital and The Asian Crisis

- Japan?fs Stagnationist Crisis & its impact on The Global economy

- The rise of China and The Global economy

- India?fs transition to An open economy

- labour intensive Industrialisation and labour rights

- Poverty, inequality and human development

- urbanisation and environmental Issues

- Demographic transition in Asia

- freedom as development ? Civil and economic rights

Teaching Periods

ECON 3011 Government and the Economy

Legacy Code 200532

Coordinator Margaret Moussa ([https://directory.westernsydney.edu.au/search/name/Margaret Moussa/](https://directory.westernsydney.edu.au/search/name/Margaret%20Moussa/))

Description This unit focuses on the nature of state activity in the economy. The unit introduces students to different analytical approaches to the economic role of the state and considers their practical implications for economic policy analysis.

School Business

Discipline Economics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 4318 - Public Finance

Assumed Knowledge

200525 - Principles of Economics, 200549 - The Australian Macroeconomy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. To ensure students can undertake analysis of the economic and financial aspects of government activity, including:
2. To ensure students understand the different theoretical approaches to government economic activity.
3. To have students understand the scope of government activity in historical and international context, and can use analytical concepts to gain that understanding.
4. To ensure students are able to understand contemporary problems in public finance and apply analytical categories to inform that understanding.
5. To ensure students can undertake analysis of specific public finance proposals or problems and present that analysis in written and verbal forms.

Subject Content

Competing theories of the state

The historical and theoretical development of public economics

The state in the context of theories of institutionalism, corporatism, planned economies and bureaucracy.

Public expenditure in economic theory and policy applications.

The economic significance of the welfare state.

Taxation

Federalism

Deregulation, privatisation.

The relations between the state and the ?private?h sector.

The connections between the microeconomic and macroeconomic policy.

The nature of the state in a globalised economy.

Teaching Periods

ECON 3012 Growth, Cycles and Crises

Credit Points 10

Legacy Code 200925

Coordinator Andrew Marks ([https://directory.westernsydney.edu.au/search/name/Andrew Marks/](https://directory.westernsydney.edu.au/search/name/Andrew%20Marks/))

Description Growth, Cycles and Crises gives students an up-to-date understanding of macroeconomic developments, empirical puzzles, theoretical controversies and policy dilemmas of the day. It begins with an overview of different schools of thought and their historical roots. There follows an investigation of recent global crises, their underlying causes, and the policy responses in the major economic powers. We also consider the stresses on Australia resulting from global economic fluctuations and shifts, causing disruptive exchange rate swings and fiscal difficulties. Finally with major developments around the world and the controversies arising from them, such as debt crises and austerity debate, the problem of unbalanced growth in rapidly developing economies, and stagnation and policy zigzags apparent in some advanced economies.

School Business

Discipline Economics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects ECON 3005 - Economic Theories Controversies and Policies

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate alternative theoretical approaches to macroeconomic analysis.
2. Identify the theoretical perspectives of economic commentators.
3. Interpret and evaluate empirical findings relating to macroeconomic relationships.
4. Critically evaluate claims, predictions and policy recommendations regarding the domestic and international macroeconomy.

Subject Content

1. New classical, new Keynesians and post-Keynesians schools of macroeconomic thought.
2. Unemployment and inflation: alternative theories and evidence.
3. Overview of macroeconomic policy tools and dilemmas.
4. Fiscal policy controversies.
5. Monetary policy controversies.
6. Adjustment of the Australian macroeconomy to global shifts and fluctuations.
7. Macroeconomic dilemmas and controversies in the USA, Asia and Europe.

Assessment

ECON 3013 Industry Economics and Markets

Credit Points 10

Legacy Code 200531

Coordinator Satya Paul ([https://directory.westernsydney.edu.au/search/name/Satya Paul/](https://directory.westernsydney.edu.au/search/name/Satya%20Paul/))

Description The first part of this unit develops an understanding of the relationships between industry structure, the conduct of firms, and market performance. Alternative theories of the firm and strategic market behaviour are considered. The unit then examines the characteristics and operation of particular markets, including public goods and utilities, human resources, and natural and environmental resources. The analysis developed in the unit is used to provide insights into applied policy areas such as competition policy, regulation of public enterprises, microeconomic reform and industry policy.

School Business

Discipline Economics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) ECON 1009 OR
ECON 1007 OR
ECON 1011

Equivalent Subjects LGYA 4313 - Industry Economics and Policy

Assumed Knowledge

This subject requires an elementary knowledge of microeconomic principles.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply theoretical microeconomic concepts to the analysis of industry structure, conduct and performance
2. Develop further understanding and modelling of strategic behaviour within firms
3. Analyse the role of public sector enterprises
4. Analyse the operation of markets dealing with human and natural resources
5. Interpret and analyse competition policy (such as Trade Practices Legislation)
6. To undertake case study analysis of particular markets or sectors
7. To critically evaluate policy debate in the areas of industry policy and the reform of public sector enterprises.

Subject Content

- alternative theories of The firm
- industry structure-conduct performance- theory and empirical evidence
- pricing and Supply of public goods and public Utilities, including related privatisation and regulation Issues
- Competition policy in Australia
- industry policy
- The operation of ?elabour markets?f
- natural resources and environmental Issues

Teaching Periods

ECON 3014 International Finance

Credit Points 10

Legacy Code 200055

Coordinator Kevin Daly ([https://directory.westernsydney.edu.au/search/name/Kevin Daly/](https://directory.westernsydney.edu.au/search/name/Kevin%20Daly/))

Description The study of international finance from the vantage point of a multinational enterprise provides students with a global insight into international trade for both manufactured and financial products. The unit recognises the increasing importance of global integration of money and capital markets - a trend that is creating expanded opportunities for both investors and organisations that need to raise capital. The recognition and management of risks associated with international operations are explored including cost of capital and financial structure, international financial markets crisis, international financial management, international monetary system, international diversification, foreign exchange risk management including the use of futures and options, foreign investment analysis, determination of exchange rates, balance of payments analysis, international debt crisis and country risk analysis.

School Business

Discipline Economics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) ECON 2002

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the key financial products operating in the international and domestic financial markets;
2. Analyse the theoretical relationships between spot and forward rates, interest rates and inflation and industry best practice for managing currency and interest rate risk, with a view towards integrating risk management;
3. Classify international investment decisions at the portfolio and project level and examine the different ways of financing or investing, in foreign or domestic operations, the use of debt or equity for funding, and the use of derivative products for risk management;
4. Identify political or country risk issues and the implications arising from the interaction of investment and financing decisions and analyse macroeconomic issues regarding foreign direct investment, international portfolio theory and country risk;
5. Describe the functionality of an Australian multinational corporation and assess how it can take advantage of lower capital costs by being in the international capital market.

Subject Content

- Models of exchange rate determination and Balance of payments
- foreign exchange Risk and management
- The Eurocurrency market
- Parity and market efficiency
- Multinational Corporations ? foreign direct investment
- short-term and long-term international financing
- international banking
- financial Crisis management
- Country Risk management
- case studies

ECON 3016 Macroeconomic Issues

Credit Points 10

Legacy Code 200546

Coordinator James Farrell ([https://directory.westernsydney.edu.au/search/name/James Farrell/](https://directory.westernsydney.edu.au/search/name/James%20Farrell/))

Description In 2016, this unit replaced by 200926 - Macroeconomic Measures and Models. Macroeconomic Issues provides tools to assess competing explanations, predictions and policy recommendations regarding the macroeconomy. Building on the introductory concepts, measures and simple theories, this unit develops a comprehensive model for identifying and quantifying the sources and mechanisms of macroeconomic change. A systematic modelling approach reveals whether differences are rooted in assumptions or empirical claims. We focus on Australia, but consider controversies relating to the USA, Asia and Europe, given their impact on global conditions and the lessons they offer for Australia. Topics include productivity and growth, the determinants of unemployment and inflation, the role of exchange rates in adjustment, and monetary and fiscal policy design.

School Business

Discipline Economics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) ECON 1013 OR
ECON 2007 OR
LGYA 4311

Equivalent Subjects LGYA 4317 - Macroeconomic Theory and Practice

Assumed Knowledge

It is assumed that students will have an understanding of economic methods.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Compare and contrast alternative theories of theories of consumption and investment;
2. Apply economic models to explain or predict changes in policy or the environment;
3. Critically evaluate alternative theoretical approaches as variants of the standard models;
4. Interpret and evaluate empirical findings relating to macroeconomic relationships;

5. Actively participate in discussion of current issues in macroeconomic theory, empirical studies and policy.

Subject Content

Review of basic concepts and measures:

- Standard models: Investment Saving ? Liquidity preference Money supply (IS-LM), Investment Saving ? Liquidity preference Money supply ? Balance of Payments (a.k.a Mundell-Fleming model) (IS-LM-BP), Aggregate Supply ? Aggregate Demand (AS-AD) (as in Blanchard's Law, growth, and The non-Accelerating inflation rate of unemployment (NAIRU): The Standard model.

Aggregate consumption and investment: theories and evidence
New Classical, New Keynesians and Post-Keynesians Schools of macroeconomic thought

Economic Growth: theories and evidence

Unemployment and Inflation: alternative theories and evidence

Overview of macroeconomic policy tools and dilemmas

Fiscal policy controversies

Monetary policy controversies

The exchange rate and external balance

Macroeconomic dilemmas and controversies in the USA, Asia and Europe

Teaching Periods

ECON 3017 Macroeconomic Measures and Models

Credit Points 10

Legacy Code 200926

Coordinator Mamta Chowdhury ([https://directory.westernsydney.edu.au/search/name/Mamta Chowdhury/](https://directory.westernsydney.edu.au/search/name/Mamta%20Chowdhury/))

Description The unit equips students with formal tools to analyse macroeconomic problems. Students learn to use macroeconomic terms and measures competently in discussion, and interpret data from the income, product, external and government accounts, and labour force surveys. Through hands-on experience constructing and applying price indices, deflators and productivity measures, they acquire practical skills and a sound conceptual understanding of economic variables and the accounting framework. Students come to appreciate the power of macroeconomic models, learning how to capture myriad mechanisms and feedbacks in a single framework, for example to define and quantify multipliers and crowding-out effects. Finally, students gain an understanding of fundamental external constraints, such as international parity and balance of payments equilibrium conditions.

School Business

Discipline Economics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects ECON 3016 - Macroeconomic Issues

Assumed Knowledge

Knowledge acquired in introductory microeconomics, macroeconomics and accounting.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Access and transform statistical data from the income, product, external and government accounts, and labour force surveys.
2. Construct and apply price indices, deflators and productivity measures.
3. Demonstrate practical skills in manipulating and presenting data, and a thorough conceptual understanding of economic variables and the accounting framework.
4. Derive and interpret simple macroeconomic models and use them to define and quantify multipliers and crowding-out effects.
5. Explain and apply knowledge of an economy's fundamental external constraints, such as international parity and balance of payments equilibrium conditions.

Subject Content

1. Price indices and computation of real variables.
2. Income and product accounts; measurement of growth and cycles.
3. Labour market measures, Okun's Law.
4. Measurement and analysis of productivity growth.
5. Economic growth accounting, models and theories.
6. Income-expenditure, IS-LM, Phillips Curve and AS-AD models.
7. Demand management and multipliers: modelling and measurement.
8. Balance of payments accounting, dynamics of current account and external liabilities.
9. Parity conditions, external balance, adjustment mechanisms.
10. Exchange rate regimes, parity conditions, balance of payments equilibrium conditions.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

ECON 3018 Microeconomic Theory and Applications

Credit Points 10

Legacy Code 200530

Coordinator Partha Gangopadhyay ([https://directory.westernsydney.edu.au/search/name/Partha Gangopadhyay/](https://directory.westernsydney.edu.au/search/name/Partha%20Gangopadhyay/))

Description In 2016, this unit replaced by 200923 - Corporations, Economic Power and Policy. The aim of Microeconomic Theory and Applications is to extend students' knowledge of microeconomic theory developed in Principles of Economics. After a more formal presentation, the rather idealistic assumptions used in the context of the perfectly competitive markets will be relaxed in order to model typical situations encountered in the business world. The theory of choice will be extended to situations where individuals face uncertainty regarding the outcome of their own actions. In terms of market structure, we will investigate the consequences in terms of price, quantity and consumer's surplus, of monopoly, oligopoly or duopoly markets. As some of these market structures imply that the individuals' decisions might strongly affect or be affected by a limited number of other decision makers, an introduction to Game Theory will be presented. Finally, our concerns for investigating more realistic economic situations will lead us to make a brief incursion into markets characterised by asymmetric information, the presence of public goods or the existence of externalities.

School Business

Discipline Economics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) ECON 1011 OR
ECON 1006

Equivalent Subjects LGYA 4313 - Industry Economics and Policy

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply theoretical microeconomic concepts to the analysis of agent's behaviour.
2. Model strategic behaviour between firms and powerful actors.
3. Demonstrate understanding of the role of markets in coordinating optimal decisions of decentralised decision makers.
4. Demonstrate understanding of sophisticated markets and their welfare implications.
5. Examine market failures and how to redress them.
6. Examine the consequences of asymmetric information on the market outcome and their cures.
7. Demonstrate understanding of social welfare, equity and economic efficiency.

Subject Content

Introduction: Markets and prices. The basics of supply and demand. The analysis of competitive markets.
Consumer behaviour ? Individual and market demand.
Demand theory: A mathematical treatment.
Production and costs.
Monopoly and pricing with market power.
Monopolistic competition and oligopoly.
Game theory and competitive strategy.

General equilibrium and economic efficiency.
Markets with asymmetric information.
Externalities and public goods.

Legacy Code 200077

Coordinator John Ablett ([https://directory.westernsydney.edu.au/search/name/John Ablett/](https://directory.westernsydney.edu.au/search/name/John%20Ablett/))

Description This unit provides students with an understanding of the economics of retirement and retirement income provision, with particular emphasis on the Australian superannuation industry. On completion of this unit, students should have a comprehensive understanding of superannuation in Australia, as well as an appreciation of the economic issues associated with alternative models of retirement income provision.

School Business

Discipline Economics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Assumed Knowledge

200049 - Macroeconomics, 200076 - Introductory Economics, 200488 - Corporate Financial Management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the major economic issues associated with an aging population and the retirement decision;
2. Understand the main economic issues related to **defined** and fully funded age pension schemes, and defined benefit and accumulation superannuation schemes;
3. Describe the evolution the Australian superannuation industry;
4. Explain the likely/possible effects of mandatory retirement income saving on financial markets and macroeconomic variables;
5. Explain the major aspects of taxation and regulation of superannuation;
6. Understand the main investment aspects of superannuation and fund strategies;
7. View the Australian superannuation industry within the international context.

Subject Content

- Demographic transition, economic Rationale of retirement income policy
- alternative Models of retirement income provision: paygo, provident funds, mandatory private
- economic impacts of saving for retirement: The level of saving, labour markets, financial markets
- retirement income policy in Australia: evolution, Age pension, development of The superannuation industry
- theory of taxation and regulation of superannuation, role of trustees
- Investing for The long term, short termism, investment strategies, Australian practice
- retirement Benefits: adverse selection, alternative Benefits, The retirement decision
- pension reforms around The World

Teaching Periods

ECON 3022 Urban and Regional Economics

Credit Points 10

Legacy Code 200075

Coordinator John Ablett ([https://directory.westernsydney.edu.au/search/name/John Ablett/](https://directory.westernsydney.edu.au/search/name/John%20Ablett/))

Description Students wishing to enrol in this unit are advised to contact the Unit Coordinator. This unit deals with: models of short-run fluctuations of regional aggregates and the economic relations between regions; models of long-run change in regional aggregates and the long-run economic relations between regions; equilibrium models of intra-urban location; optimal models of intra-urban allocation; and optimal allocation of capital to urban land.

School Business

Discipline Economics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Assumed Knowledge

Microeconomics and Macroeconomics or Introductory Economics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand the nature and methodology of economics
2. Understand limitations and pitfalls encountered in studying economics
3. Understand the various economic relationships, both domestic and international
4. Learn how the economy works and why governments adopt various policies
5. Gain an understanding of the concepts to apply in their day to day life

Subject Content

- Centripetal versus centrifugal forces in location.
- impact analysis, Regional multipliers, Regional input output.
- shift-share analysis.
- Kaldorian Models of Regional growth versus neo-Classical Models of Regional growth and convergence.
- The fundamental location model of Von Thünen.
- Equilibrium Models of Urban residential and business location.
- Optimal investment in buildings.
- government and The Urban and Regional economy.

Teaching Periods

ECON 4001 Advanced Analysis and Interpretation

Credit Points 10

Legacy Code 200897

Coordinator Suzan Burton ([https://directory.westernsydney.edu.au/search/name/Suzan Burton/](https://directory.westernsydney.edu.au/search/name/Suzan%20Burton/))

Description Building on the introduction to the analysis of qualitative data presented in the core unit Research Design 1: Theories of Enquiry this unit, Advanced Analysis and Interpretation, will provide candidates with the techniques necessary to use, analyse and interpret qualitative data in business research. Presented as a series of seminar-workshops, candidates consider the theories that underpin the employed analytical methods, and then move to employ introduced qualitative software tools to analyse and interpret research data.

School Business

Discipline Econometrics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 4 subject

Co-requisite(s) HUMN 4009

Restrictions Students must be enrolled in program 8083 Bachelor of Research Studies/Master of Research.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe a range of possible research methodologies used to analyse and interpret qualitative business data.
2. Outline the theoretical basis for the methods of analysis they employ in research.
3. Employ a range of software tools for qualitative data analysis.
4. Critique researchers' data analysis and interpretation methods.
5. Plan and undertake the analysis of qualitative business data.
6. Defend their methodological choices in a research proposal.
7. Demonstrate proficiency in citing and referencing a variety of sources.

Subject Content

Effective qualitative analysis is an increasingly important issue in business research. While there has been growth of interest in the area, quality reporting remains low, largely due to lack of training as to how to analyse and communicate qualitative data. This subject will present a series of seminars/workshops on current and emerging qualitative analysis techniques to fill this gap. The seminars will consider the methods of qualitative analysis and the theories that underpin them. They will give an overview of the methods employed in business disciplines and attention will be given as to how to choose the best methods for analysing different qualitative data types. The nature and application of specific techniques and combinations of techniques will be covered in greater detail and hands-on analysis opportunities will give insights into effective analysis and its subsequent reporting. The seminars/workshops will highlight the use of two data analysis packages: NVIVO and Leximancer. NVIVO is a qualitative data analysis computer software package produced and designed for working with very rich text-based and/or multimedia information, where deep levels of analysis on small or large volumes of data is required. Leximancer is a qualitative software analysis package that allows researchers to get text data automatically coded and analysed (rather than the analyst creating and inserting codes). This subject introduces these programs, their basic functions, and presents examples of exemplary original research that have used the programs, in order to give a sense of their possibilities and to highlight how research students might employ them in their own research.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Critical Review	1,000 words	20	N	Individual
Report	1,500 words equivalent	40	N	Individual
Essay	1,500 words	40	N	Individual

ECON 7001 Economics

Credit Points 10

Legacy Code 200425

Coordinator Andrew Marks ([https://directory.westernsydney.edu.au/search/name/Andrew Marks/](https://directory.westernsydney.edu.au/search/name/Andrew%20Marks/))

Description This unit presents a broad overview of economics and the way economic activity, institutions and regulations shape social and business outcomes, knowledge that is critical for any student in a business-related discipline. Students will reflect critically on the key economic processes, theories and ideas. We study the way economics defines growth and wellbeing and the economic theories of income determination and business cycles that shape macroeconomic policy. Students will form perspectives on globalisation, trade, colonisation and development and the causes of, and solutions to, inequalities between Indigenous and non-Indigenous Australians. In the microeconomic component of the unit, we study the way economics understands and models individuals and the consumer, production and firms, markets and market structures, the role of government intervention and regulation, environmental outcomes and policy to control processes of economic power.

School Business

Discipline Economics

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 8981 Economics (PG)

Restrictions

Students must be enrolled in a postgraduate Business program or postgraduate Information and Communications Technology program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically reflect on the economic perspectives of growth, wellbeing, globalisation, trade and development;

2. Identify macroeconomic problems and make policy recommendations to reduce the severity of cycles and crisis;
3. Evaluate the economic outcomes from markets and make policy recommendations;
4. Apply economic principles to resolve environmental and social issues stemming from economic activity and the behaviour of firms;
5. Identify the historical, cultural and economic causes of inequalities between Indigenous and non-Indigenous Australians and evaluate policy recommendations.

Subject Content

Measures of economic activity and well being
Income determination and the causes of business cycles
Economic effects of globalisation, trade and development
Indigenous Australian?fs sovereignty and economic wellbeing and ?
eclosing the gap?f on inequalities
Domestic and international macroeconomic policy and regulation
Individuals and the consumer in economic theory
Production and firms in economic theory
Markets and the role of government intervention
Environmental and climate effects of economic activity
The environmental and social responsibility of firms

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Essay	1,000 words	20	N	Individual
Essay	1,200 words	25	N	Individual
Final Exam	2 hours	55	N	Individual

ELEC 1001 Digital Systems 1

Credit Points 10

Legacy Code 300018

Coordinator Qi Cheng ([https://directory.westernsydney.edu.au/search/name/Qi Cheng/](https://directory.westernsydney.edu.au/search/name/Qi%20Cheng/))

Description This unit provides students with a solid background in digital logic design which is foundational to the fields of electrical and computer engineering. Digital logic design involves building electronic components and hardware, such as circuit boards and microchip processors. Students are first introduced to the fundamentals of digital logic, basic logic devices and Boolean algebra. This is followed by analysis and design of combinational and sequential logic circuits.

School Eng, Design & Built Env

Discipline Communications Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects ELEC 1002 - Digital Systems 1 (WSTC AssocD)

Assumed Knowledge

Knowledge on basic principles of analysing an electric circuit, Kirchhoff's Voltage and Current laws and their use in electric circuits and concept of operational amplifier and its circuit would be desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe basic digital concepts and the operation of basic logic gates.
2. Apply Boolean Algebra to a range of logic expressions
3. Apply Karnaugh maps to a range of logic expressions.
4. Analyse and design combinational logic circuits.
5. Describe the operation of a range of memory devices.
6. Describe the principles of analogue-to-digital and digital-to-analogue conversion schemes.

Subject Content

1. Boolean algebra and logic simplification
2. Karnaugh maps
3. Combinational logic circuits
4. Flip-flops, counters, registers
5. Memory
6. Analogue-to-digital and digital-to-analogue conversion

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Practical	3 hours (per Practical)	20	N	Individual
Intra-session Exam	1 hour	20	N	Individual
Final Exam	2 hours	60	N	Individual

ELEC 1003 Electrical Fundamentals

Credit Points 10

Legacy Code 300021

Coordinator Jamal Rizk ([https://directory.westernsydney.edu.au/search/name/Jamal Rizk/](https://directory.westernsydney.edu.au/search/name/Jamal%20Rizk/))

Description This unit introduces essential electrical engineering concepts that provide students with the basic requirements for analysing, designing, building, and testing simple engineering systems. Students use techniques for analysing different types of circuits based on their knowledge of electrical theory and the characteristics of power, electrical energy, signals, and electrical circuit components. Students have practical activities including conducting experiments in learning how electrical systems work. Students are introduced to Electrical Machines and Renewable Energy systems for a fundamental understanding.

School Eng, Design & Built Env

Discipline Electrical And Electronic Engineering And Technology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects ELEC 1005 Electrical Fundamentals (WSTC)
ELEC 1004 Electrical Fundamentals (WSTC Assoc Deg)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the elements in an electric circuit
2. Apply the basic principles of analysing an electric circuit
3. Apply nodal, mesh, superposition, Thevenin's analysis DC electric circuits.
4. Apply the principles of capacitors and inductors as energy storage elements and their first order circuits.
5. Explain characteristics of electronic devices
6. Explain basic principles of communication waves
7. Explain significance of Logic gates and number systems
8. Explain the operation of transformers, DC and AC machines.
9. Explain principle of operation of Renewable Energy systems
10. Explain the elements in electric circuits and electronic devices
11. Apply appropriate techniques in the analysis of electric circuits
12. Analyse the principles of capacitors and inductors as energy storage elements and their first order circuits
13. Explain the operation of transformers, DC and AC machines
14. Outline the key principles involved in the operation of Renewable Energy systems
15. Use appropriate equipment in conducting experiments in a safe manner.

Subject Content

Introduction to basic electrical quantities

Kirchhoffs current and voltage laws

Series and parallel resistors, current and the voltage divider rules

Nodal and Loop analysis, The principle of superposition and Thevenin and Norton equivalent circuits

Energy storage elements, capacitors and inductors. Transient Response of first-order circuits

An introduction to Electronics

An introduction to communication waves

Logic gates and number systems

An introduction to Transformers, Electrical Machines

An introduction to Renewable Energy systems

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	4 x Inclass tests 15 minutes per test.	10	N	Individual
Intra-session Exam	1 hour and 30 minutes	20	N	Individual
Practical	6 x Laboratories 3 hours per practical	20	N	Individual
Final Exam	2 hours	50	N	Individual

Coordinator Abbas Ranjbar ([https://directory.westernsydney.edu.au/search/name/Abbas Ranjbar/](https://directory.westernsydney.edu.au/search/name/Abbas%20Ranjbar/))

Description The objective of this unit is to introduce to the student a number of concepts within electrical engineering. These include basic definitions of charge, current, potential difference, power; electric circuits and basic laws such as Ohm's and Kirchoff's Laws; Thevenin, Norton's and the maximum power theorems; electromagnetism and the associated fundamental laws; capacitor and resistor circuits and time constants; an introduction to Electronics; communication waves; Logic gates and number systems; and an introduction to Electrical Machines and Renewable Energy systems. Basic principles are explained and applied to a range of typical electrical circuits and devices. These foundations provide students with the basic requirements for a career in engineering where the concepts can be developed or applied to more complex engineering systems.

Assumed Knowledge

Basic knowledge in use of computers and Windows operating system.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Utilise a typical software development environment.
2. Develop solutions to problems using an algorithmic approach.
3. Apply data structures of a common programming language, to translate an algorithm into a coded program. These programming structures should include the following as a minimum - Selection and Repetition statements - Functions - 1 & 2 dimensional Arrays - File processing
4. Implement basic features of data manipulation and graphing using a spreadsheet program, such as EXCEL.

Subject Content

Spread sheet applications - Spread sheet operations

Spreadsheet applications - Spreadsheet functions and macros

Spread sheet applications - Solving engineering problems using spreadsheets

Structured programming - Introduction to programming environment

Structured programming - Decision structures

Structured programming - Repetition structures

Structured programming - Modular programming

Structured programming - Exchanging data with external files

Problem solving & algorithm development will be embedded in each section

ELEC 1009 Electrical Circuit Fundamentals

Credit Points 10

Legacy Code 301336

Coordinator Leigh Sheppard ([https://directory.westernsydney.edu.au/search/name/Leigh Sheppard/](https://directory.westernsydney.edu.au/search/name/Leigh%20Sheppard/))

Description This subject will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This subject is an introductory unit in Electrical Engineering, which provides an introduction to electrical circuits and fundamental electrical elements as well as the technical skills to analyse such circuits. It is suitable for students pursuing further studies in Electrical Engineering such as Power and Energy, Telecommunications, Control, Instrumentation, as well as other related engineering disciplines including Computer Science and Engineering. In the practical section, this course provides hands-on experience in building and testing circuits. This unit is presented in such a way that students who have taken it are capable of building and analysing some practical, useful devices afterwards.

ELEC 2001 Circuit Theory

Credit Points 10

Legacy Code 300005

Coordinator Jeffrey Zou ([https://directory.westernsydney.edu.au/search/name/Jeffrey Zou/](https://directory.westernsydney.edu.au/search/name/Jeffrey%20Zou/))

Description This unit aims to equip the student with the tools needed for the design and analysis of electrical and electronic circuits. It also introduces various techniques of circuit analysis, mutual coupling, frequency response and two-port networks.

School Eng, Design & Built Env

Discipline Electrical Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) ELEC 1003 AND
MATH 1019 OR
MATH 1035

Equivalent Subjects ELEC 2002 - Circuit Theory (WSTC AssocD)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the basic principles of analysing an electric circuit
2. Apply Kirchhoff's Voltage and Current laws and demonstrate their use in a number of electric circuit configurations
3. Apply nodal analysis, mesh analysis and linear circuit theorems to electric circuits.
4. Apply the Laplace Transform to electric circuits
5. Draw conclusions from frequency responses.
6. Mathematically analyse frequency-selective filters.
7. Describe and utilise magnetically coupled circuits
8. Describe and utilise two-port networks.

Subject Content

Phasors relationships for Circuit Elements

Kirchoff's Laws in frequency domain

Impedance combinations

Sinusoidal Steady state analysis (Nodal Analysis, Mesh Analysis, Superposition Theorem and Thevenin equivalent Circuits)

AC Power Analysis (Instantaneous and Average Power, RMS value, Maximum Power and Power factor correction)

Magnetically coupled circuits (Mutual Inductance, Energy in a coupled Circuit)

Frequency response

Laplace Transform and its applications in circuits analysis

Two port network

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical	3 hours (per practical) Approx. 5 pages	20	N	Individual
Intra-session Exam	1.5 hours	20	N	Individual
Final Exam	2 hours	60	N	Individual

ELEC 2004 Electronics

Credit Points 10

Legacy Code 300025

Coordinator Ali Hellany ([https://directory.westernsydney.edu.au/search/name/Ali Hellany/](https://directory.westernsydney.edu.au/search/name/Ali%20Hellany/))

Description This unit further develops skills in the analysis, design, practical implementation and testing of the main analogue electronic circuits. Topics covered are: semiconductor diodes and their applications, Bipolar Junction Transistors (BJT), Field Effect Transistors (FET), analysis of BJT and FET, design of discrete operational amplifiers, and operational amplifier characteristics and circuit configurations.

School Eng, Design & Built Env

Discipline Electrical And Electronic Engineering And Technology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) ELEC 1003 OR ELEC 1009

Equivalent Subjects ELEC 2005 - Electronics (WSTC AssocD)

Assumed Knowledge

The prior knowledge on Vibrations and wave phenomena; Photoelectric effect, atomic structure and periodic table; Electricity and magnetism are required. Students should have a sound understanding on: basic principles of analysing an electric circuit; Kirchhoff's Voltage and Current laws and their use in electric circuits; Nodal analysis, mesh analysis and superposition analysis in DC electric circuits; Thevenin and Norton equivalent and their use in electric circuits; The storage elements capacitor and inductor and understand their performance in first and second order circuits.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the basic structure and mode of operation of pn junction diode.
2. Conduct an AC and DC analysis of a circuit with pn junction diode.
3. Explain the basic structure and mode of operations of BJT, MOSFET transistors and operational amplifiers.
4. Conduct an AC and DC analysis of single-stage amplifying circuits using BJT, MOSFET transistors and operational amplifiers.
5. Design simple electronic circuits for a given specification and application.
6. Use Electronics Workbench as a tool to simulate and understand electronic circuits

Subject Content

1. Semiconductors Diodes.

2. Diode applications.
3. Bipolar Junction Transistor (BJTs).
4. DC Biasing (BJTs).
5. Field Effect Transistors (FETs).
6. DC biasing of FET.
7. AC Analysis of FET Operational Amplifiers .

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical	3 hours and 5 pages (per Practical)	20	Y	Both (Individual & Group)
Quiz	10-15 minutes (per Quiz) - Max 6 Quizzes	10	N	Individual
Intra-session Exam	1.5 hours	20	N	Individual
Final Exam	2 hours	50	Y	Individual

ELEC 2006 Engineering Electromagnetics

Credit Points 10

Legacy Code 300481

Coordinator Khoa Le ([https://directory.westernsydney.edu.au/search/name/Khoa Le/](https://directory.westernsydney.edu.au/search/name/Khoa%20Le/))

Description This unit introduces Maxwell's equations in integral and differential form and their application to basic theory and application of electromagnetic structures, wave propagation, guides waves, antennas and Electromagnetic compatibility.

School Eng, Design & Built Env

Discipline Communications Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) MATH 1019 AND ENGR 1011 OR ENGR 1028

Equivalent Subjects ELEC 2003 - Electromagnetics LGYA 5725 - Electromagnetic Compatibility

Assumed Knowledge

The students should have a good understanding of 300021 - Electrical Fundamentals or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the work of a transmission line
2. Analyse the wave propagation along transmission lines and waveguides

3. Explain the concept of Maxwell's equations in static and dynamic cases
4. Analyse and solve problems of Maxwell's Equations
5. Analyse and solve problems of boundary conditions
6. Explain the basic concept of Hertzian dipole
7. Analyse basic antennas and calculate radiation resistance, gain, ground and mutual impedance

Subject Content

Waves and Phasors
Transmission lines
Vector Analysis
Electrostatics
Magnetostatics
Maxwell's equations
Plane wave propagation
Wave reflection and transmission
Radiation and antenna
Introduction to electromagnetic compatibility
EMC requirement for electric and electronic systems

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

ELEC 2007 Engineering Visualization

Credit Points 10

Legacy Code 300029

Coordinator Jeffrey Zou ([https://directory.westernsydney.edu.au/search/name/Jeffrey Zou/](https://directory.westernsydney.edu.au/search/name/Jeffrey%20Zou/))

Description This unit aims to provide a comprehensive introduction to fundamental concepts and algorithms in engineering visualization. Topics covered include visualization hardware, scan conversion of geometric primitives, 2D and 3D transformations, 3D viewing and projection, hidden surface removal, solid modelling, illumination models and image manipulation.

School Eng, Design & Built Env

Discipline Electrical And Electronic Engineering And Technology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) Students must have passed ELEC 1006 Engineering Computing and either ELEC 2009 Microprocessor Systems or ELEC 2008 Microcontrollers and PLCs

Equivalent Subjects LGYB 0688 - Computer Graphics

Restrictions Students must have successfully completed 160 credit points.

Assumed Knowledge

C++ Programming and 3-D Geometry.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse and select visualization hardware;
2. Draw 2D and 3D objects on a raster display device;
3. Perform affine transformations to 2D and 3D objects;
4. Model a 3D object, project it onto a view plane, and determine its visible surface;
5. Determine the shade of a visible surface
6. Manipulate image for visualization.

Subject Content

1. Visualisation hardware
2. Visualisation software
3. Scan converting primitives and clipping
4. Transformations
5. Curves and surfaces
6. 3D Viewing and visible surface determination
7. Image manipulation and storage
8. Solid modelling

9. Illumination and shading

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

ELEC 2008 Microcontrollers and PLCs

Credit Points 10

Legacy Code 300044

Coordinator Qi Cheng ([https://directory.westernsydney.edu.au/search/name/Qi Cheng/](https://directory.westernsydney.edu.au/search/name/Qi%20Cheng/))

Description Through completion of an applied project students will develop an understanding of the hardware, architecture and the assembly language of microcontrollers in addition to the control of a mechanical system with a programmable logic controller (PLC). The unit looks at the applications of timers, interrupts and serial ports. Furthermore, the general approach in designing a microcontroller in mechanical systems will be studied. Students will use an Omron PLC to control a factory represented by four pneumatic cylinders. After covering the Ladder Logic programming language, they will move on to cover sequential programming and numerical manipulation using PLCs.

School Eng, Design & Built Env

Discipline Computer Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) ELEC 2004 OR
ELEC 1003 OR
ELEC 1009

Assumed Knowledge

Fundamentals of electronics are required.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design small-scale microprocessor controlled mechanical systems.
2. Write software instructions to implement various microcontroller operations.
3. Program a PLC to control a mechanical system.
4. Use Ladder Logic to execute complex logic operations.
5. Use sequential programming and feedback from a mechanical system to control a complex sequence of tasks.
6. Use a PLC to perform numerical manipulation

Subject Content

1. Basics of number systems and Boolean algebra, hardware architecture of microcontrollers.
2. Assembly languages.
3. Timers, interrupts and their applications in microcontrollers.
4. Procedures of designing microcontroller based systems.
5. Operation of a pneumatic-mechanical system .
6. Ladder logic.
7. Sequential programming.
8. Numerical manipulation with PLCs.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Applied Project	50-100 Rungs of Programs	40	N	Individual
Tutorial class work	Continuous assessment of weekly programming exercises	30	N	Both (Individual & Group)
Exam	2 Hours Open Book	30	N	Individual

Credit Points 10

Legacy Code 300076

Coordinator Qi Cheng ([https://directory.westernsydney.edu.au/search/name/Qi Cheng/](https://directory.westernsydney.edu.au/search/name/Qi%20Cheng/))

Description This unit introduces students to the internal structure of microprocessors used in computing systems and their fundamental operations. Topics include assembly language programming, interrupt processing, CPU functions, memory organization, and peripheral programming. The microprocessor and embedded processors are discussed. Students write assembly language programs, debug and create executable files to control microprocessor systems.

School Eng, Design & Built Env

Discipline Computer Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) ELEC 1001

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Write assembly language programs
2. Debug assembly programs and create executable files
3. Describe interrupt (exception) processing
4. Explain CPU hardware functions and address decoding (memory/ IO)
5. Program peripherals

Subject Content

Instruction format, instruction types and assembler directives
Memory segmentation

20-bit address formation and determination

Addressing modes

Types of instructions

Stack operation and access

Assembly programming

Interrupt processing

BIOS and DOS function calls

CPU structure and pin functions

Instruction execution cycles and system timing diagram

Memory and memory address decoding

Memory-mapped and interrupt-driven I/Os
Peripheral Programming

Assessment

ELEC 2010 Power and Machines

Credit Points 10

Legacy Code 300052

Coordinator Mahmood Nagrial ([https://directory.westernsydney.edu.au/search/name/Mahmood Nagrial/](https://directory.westernsydney.edu.au/search/name/Mahmood%20Nagrial/))

Description This unit develops an understanding an understanding of the basic concepts of power and machines, including modern power systems and transformers, in addition to the fundamentals of electromechanical energy conversion. Students will also study magnetic circuits, modern permanent magnet materials and their characteristics, and balanced and unbalanced three-phase power systems.

School Eng, Design & Built Env

Discipline Electrical And Electronic Engineering And Technology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) ELEC 2001 OR ELEC 2013

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain general arrangements of power systems.
2. Identify the various types of power stations, distribution systems, cost of operation and protection.
3. Analyse magnetic circuits with and without permanent magnet materials
4. Analyse magnetically coupled circuits.
5. Explain the construction of 3-phase and single phase transformers, their analyses and performance.
6. Evaluate basic concepts of energy conversion.
7. Understand general arrangements of power systems.
8. Gain knowledge of various types of power stations, distribution systems, cost of operation and protection.
9. Understand and analyse magnetic circuits with and without permanent magnet materials.
10. Understand magnetically coupled circuits.
11. Understand the construction of 3-phase and single phase transformers, their analyses and performance.
12. Understand basic concepts of energy conversion.

Subject Content

1. Historical Development, Arguments of AC versus DC.
2. Balanced and unbalanced three phase power systems, Single phase and three-phase circuits.
3. General arrangement of a power system, interconnected systems, standard voltage levels.
4. Distribution systems and substations, load characteristics and tariff structure and objectives of system protection and earthing systems.
5. Magnetic circuits with permanent magnets, fundamentals and properties of permanent magnet materials
6. Transformers (Construction, Equivalent circuits, Performance, Losses and efficiency, Voltage regulation and tests of transformers),

Determination of equivalent circuit parameters and Three-phase transformers
 7. Electromagnetic energy conversion principles; DC and AC machine fundamentals, Practical considerations and design limitations.
 Historical Development
 Arguments of AC versus DC for widespread usage-examples.
 Balanced and unbalanced three phase power systems.
 Single phase and three-phase circuits.
 General arrangement of a power system.
 Interconnected systems, standard voltage levels.
 Distribution systems and substations.
 Load characteristics and tariff structure.
 Objectives of system protection and earthing systems.
 Fundamentals and properties of permanent magnet materials.
 Magnetic circuits with permanent magnets.
 Mutual and leakage inductances.
 Construction of transformers.
 Equivalent circuits of transformers.
 Performance of transformers.
 Losses and efficiency of transformers.
 Maximum efficiency of transformers.
 Voltage regulation and tests of transformers.
 Determination of equivalent circuit parameters.
 Three-phase transformers, typical connections and phasor group.
 Electromagnetic energy conversion principles.
 DC machine fundamentals.
 AC machine fundamentals.
 Practical considerations and design limitations.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Numerical Problem Solving	1.5 hours	20	N	Individual
Practical	3 hours (per practical)	20	N	Both (Individual & Group)
Final Exam	2 hours	60	N	Individual

ELEC 2011 Signals and Systems

Credit Points 10

Legacy Code 300057

Coordinator Upul Gunawardana ([https://directory.westernsydney.edu.au/search/name/Upul Gunawardana/](https://directory.westernsydney.edu.au/search/name/Upul%20Gunawardana/))

Description This unit aims to develop students' understanding of continuous-time and discrete-time concepts and methods. It covers various signals and their analysis, as encountered in the fields of electrical, computer and telecommunication engineering.

School Eng, Design & Built Env

Discipline Communications Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) MATH 1019 AND ELEC 1003

Equivalent Subjects ELEC 2012 - Signals and Systems (WSTC AssocD)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain common signal types and properties in electrical engineering
2. Explain continuous-time, discrete-time, linear and non-linear systems
3. Describe concepts of power, energy, power spectral density, energy spectral density of signals.
4. Determine impulse response, frequency response and stability of a system
5. Apply the principle of convolution to solve problems in linear systems
6. Perform Fourier analysis and Laplace analysis
7. Apply Z-transforms to discrete-time systems
8. Utilise MATLAB for solving signals and systems related problems

Subject Content

Classification of signals
 Time Domain Representations of Linear-Time Invariant Systems
 The Fourier series
 The Fourier Transform and Its Applications
 The Laplace Transform
 Discrete-Time Signals and Systems and Z-Transforms

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

ELEC 2013 Circuits and Signals

Credit Points 10

Legacy Code 301352

Coordinator Richard Yang ([https://directory.westernsydney.edu.au/search/name/Richard Yang/](https://directory.westernsydney.edu.au/search/name/Richard%20Yang/))

Description This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This unit covers the fundamentals of circuit, system and signal analysis on which most other courses in the electrical engineering curriculum are built. The unit provides a foundation in frequency domain analysis and in transform methods, as well as significantly extending alternate current analysis, transient analysis and other fundamental circuit analysis tools. Although there is a practical program in the laboratory, the theory aspects of this course are the primary focus.

Coordinator Stephen Weissenhofer ([https://directory.westernsydney.edu.au/search/name/Stephen Weissenhofer/](https://directory.westernsydney.edu.au/search/name/Stephen%20Weissenhofer/))

Description This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. The unit combines two maths components, Vector Calculus and Complex Analysis, both of which incorporate calculus and linear algebra and have many applications to physics, engineering and mathematics, particularly electrical engineering. Vector Calculus involves calculus in two and three dimensions, theory of curves, vector functions and partial derivatives, two- and three-dimensional integration, line integrals and curl and divergence. Complex Analysis extends calculus from real numbers to complex numbers, and develops the theory of analytic functions, complex integration and Cauchy's theorem, series expansions, the residue theorem and applications to real improper integrals and trigonometric integrals.

Description This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This unit builds on two maths components begun in first year engineering, that is linear algebra and statistics. For linear algebra, the aim is to learn and apply the theoretical elements about linear combinations of vectors and matrices amongst other topics to problem sets. For statistics, the aim is to learn the various ways in which random variation arises in engineering contexts and apply methods and models for understanding data and making decisions. In both components, students will expand their skills in analytic thinking.

Description This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This unit builds on two maths components begun in first year engineering, which are Finite Maths and Statistics. For Finite Maths, the aim is for students to learn about the ideas in Number Theory, the theory of finite fields, cryptography and Algebraic Coding Theory as techniques for organising information and analysing it. For Statistics, the aim is to learn the various ways in which random variation arises in engineering contexts and apply methods and models for understanding data and making decisions. In both components, students will expand their skills in analytic thinking and making sense of data.

Coordinator Richard Yang ([https://directory.westernsydney.edu.au/search/name/Richard Yang/](https://directory.westernsydney.edu.au/search/name/Richard%20Yang/))

Description This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This unit has a series of software engineering workshops designed to teach students to work in teams and apply their knowledge to solve real-life problems. These workshops offer students opportunities to concentrate on software requirements analysis and design issues including artefacts produced as well techniques and tools to support this process (brainstorming, problem statements, requirements elicitation, producing design documents and prototyping). In addition, it provides students with some teamwork skills, requirements engineering and design techniques that an engineer would use in the early stages of the development process. The students are also getting experience on different aspects of designing a Web application with a major focus on the front-end.

Legacy Code 301345

Coordinator Richard Yang ([https://directory.westernsydney.edu.au/search/name/Richard Yang/](https://directory.westernsydney.edu.au/search/name/Richard%20Yang/))

Description This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This unit reinforces the understanding of discrete mathematics and the role it plays in computing science and engineering. Students learn how to systematically derive implementations from formal specifications using simple mathematics. Students also learn to develop an understanding of the rules for deriving implementations from specifications. Why do they work? What do we have to prove and how? This is crucial for later industrial software engineering practice.

Legacy Code 301347

Coordinator Richard Yang ([https://directory.westernsydney.edu.au/search/name/Richard Yang/](https://directory.westernsydney.edu.au/search/name/Richard%20Yang/))

Description This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. The goal of this unit is to develop skills in writing precise specifications of software programs and to translate these specifications into correct implementations. Further methods for reasoning about programs are introduced, including methods for reasoning about termination, program refinement and data refinement. Students learn to apply these ideas to structure their thinking about programs as well as to build a web application within a project context.

School Eng, Design & Built Env

Discipline Computer Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) ELEC 2018

Assumed Knowledge

Discrete mathematics, particularly predicate calculus
Programming in procedural language (C, Python or Java)

Competence with Unix commands, and interacting with the operating system.

Teaching Periods

ELEC 3001 Communication Systems

Credit Points 10

Legacy Code 300007

Coordinator Khoa Le ([https://directory.westernsydney.edu.au/search/name/Khoa Le/](https://directory.westernsydney.edu.au/search/name/Khoa%20Le/))

Description This unit will provide a basic introduction to communication systems and techniques. Specific topics covered include energy and power spectral density, amplitude modulation, frequency modulation, pulse modulation, an overview of digital modulation techniques, noise in communication systems and an overview of current telecommunication systems; spread spectrum systems, optical communication systems, radio broadcasting and mobile communication systems.

School Eng, Design & Built Env

Discipline Communications Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) ELEC 2011

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse analogue modulation techniques such as amplitude and frequency modulation
2. Analyse pulse modulation techniques, quantisation methods, delta modulation, and pulse code modulation
3. Evaluate analogue communication systems performance in the presence of noise
4. Describe basic digital modulation techniques
5. Apply modulation and Fourier transform techniques to explain spread spectrum systems and other mobile communication systems

Subject Content

Review of Fourier Series and Fourier Transforms
Continuous-wave modulation (AM, DSBSC, SSB, FM)
Pulse Modulation (PAM, PPM, PWM)
Delta Modulation
Digital Data Transmission
Introduction to Digital Modulation techniques
Introduction to spread spectrum communication systems
Mobile Communication System basics

Assessment

Credit Points 10

Legacy Code 300997

Coordinator Ranjith Liyanapathirana ([https://directory.westernsydney.edu.au/search/name/Ranjith Liyanapathirana/](https://directory.westernsydney.edu.au/search/name/Ranjith%20Liyanapathirana/))

Description This unit is concerned with the principles and topics of fundamental importance to digital data communication, computer communication networks and telecommunications. The lower layers of the protocol structure (physical layer, data link layer and some aspects of the network layer) and the physical medium (hardware and transmission lines) are emphasized. An engineering approach will be taken to provide an insight to transmission and transmission media, communication techniques and transmission efficiency.

School Eng, Design & Built Env

Discipline Electrical And Electronic Engineering And Technology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) ELEC 2011

Incompatible Subjects ELEC 4001 - Data Networks

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Outline common data transmission concepts and techniques.
2. Identify the concepts and physical mechanisms underlying data communication in telecommunication networks.
3. Analyse the telephone network to identify the concepts and physical mechanisms underlying data communication.
4. Evaluate the differences between circuit switching and packet switching, and explain how a data communication system can detect and correct channel errors in transmission.

Subject Content

1. Data transmission
2. Guided (including optical fibre) and unguided (wireless) transmission
3. Signal encoding
4. Interfacing
5. Data link control
6. Multiplexing (Synchronous, Asynchronous, Statistical)
7. Spread Spectrum Modulation (Frequency Hopping, Direct Sequence)
8. Error control and flow control techniques
9. Circuit switching and packet switching

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Laboratory assessments performed in a group of no more than 3 students. Written report max 10 pages (individual)	5 x 3 hours	20	Y	Both (Individual & Group)
Written Report is Individual.				
Written mid-semester examination. Closed book (Calculator required).	1.5 hours	20	N	Individual
Written final examination. Closed book (Calculator required).	2 hours	60	Y	Individual

ELEC 3003 Digital Signal Processing

Credit Points 10

Legacy Code 300069

Coordinator Jeffrey Zou (<https://directory.westernsydney.edu.au/search/name/JeffreyZou/>)

Description Students will develop an understanding of the fundamental concepts and principles in digital signal processing by applying the theory learned in their classes to practical exercises. The subject matter includes discrete-time signals and systems, the z-transform, sampling of continuous-time signals, transform analysis of linear time-invariant systems, filter design techniques, structures for discrete-time systems, the discrete Fourier transform and computation of the discrete Fourier transform.

School Eng, Design & Built Env

Discipline Communications Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) ELEC 2011 OR
ELEC 2013

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse discrete-time signals and systems;
2. Apply the z-transform to signal processing;
3. Explain the sampling of continuous-time signals;
4. Apply filter design techniques to the design of discrete-time filters;
5. Analyse structures for discrete-time systems;
6. Apply the discrete Fourier transform to signal processing.

Subject Content

Discrete-time signals and systems

The z-transform

Sampling of continuous-time signals

Transform analysis of linear time-invariant systems

Filter design techniques

Structures for discrete-time systems

The discrete Fourier transform

Computation of the discrete Fourier transform

Assessment

ELEC 3004 Digital Systems 2

Credit Points 10

Legacy Code 300019

Coordinator Qi Cheng (<https://directory.westernsydney.edu.au/search/name/QiCheng/>)

Description This unit covers modern logic design techniques and the process of creating logic circuits and systems from design specifications to implementation. Topics include logic design techniques for combinational and sequential logic circuits; hardware description language (HDL); logic circuit implementation using an

HDL; state-of-the-art logic circuit design tools; and programmable logic devices.

School Eng, Design & Built Env

Discipline Communications Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) ELEC 1001

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe functions of encoders/decoders, adders/subtractors, multiplexers/demultiplexers and their design procedures; and design them using VHDL (combinational logic)
2. Describe functions of flip-flops, registers, counters, finite-state machines and their design procedures; and design them using VHDL (sequential logic)
3. Build ALUs using VHDL
4. Describe VHDL memory functions and use them to design RAM units
5. Describe VHDL bus and I/O functions and use them to design bidirectional bus and tri-state buses
6. Implement logic circuits on FPGA boards

Subject Content

Logic function optimization

State diagram, state table

Logic circuit design

Hardware description languages (VHDL)

Statements, structures, data, variable, signal, type

Logic circuit modelling using VHDL

RAM implementation

Bus implementation

ALU implementation

Field programmable gate array devices

Implementation of logic circuits on FPGA

Assessment

ELEC 3005 Electrical Drives

Credit Points 10

Legacy Code 300070

Coordinator Jamal Rizk ([https://directory.westernsydney.edu.au/search/name/Jamal Rizk/](https://directory.westernsydney.edu.au/search/name/Jamal%20Rizk/))

Description Through practical laboratory exercises students will analyse and evaluate electrical machines and drives. They will examine various types of electrical motors and drive systems, their applications and control. They will also study various types of speed control, starting and braking systems and dynamics.

School Eng, Design & Built Env

Discipline Electrical And Electronic Engineering And Technology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) ELEC 3006

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse various types of electrical drive systems.
2. Evaluate recent developments in the control of electric drive systems.
3. Apply various drive systems to different applications.

Subject Content

Introduction to machine drives. Principal characteristics and requirements. Basic Components of an Electric Drive System.

D.C. motors. Circuit representation. Speed-torque characteristics.

Speed Control of D.C motors

Induction motors. Circuit representation. Speed-torque characteristics.

Speed control of Induction Motors: voltage control, slip-energy recovery, speed control by inverters, frequency and Voltage/Frequency Control. Power electronic devices and basic power converters. Three-phase naturally commutated bridge circuit Braking of Electrical Motors: Regenerative, Dynamics and counter-current braking. Dynamics of DC and Induction Motors

Assessment

Pre-requisite(s) ELEC 2010

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the principles in the operation of DC generators and motors, as well as Induction Motors

2. Apply machine theory techniques in the calculation of voltages, currents, power, speed and torque.
3. Outline the difference between AC & DC machines and their use.
4. Predict the expected responses of electrical machines to the input power.
5. Describe a machine circuit, calculation of machine parameters, machine efficiency and the losses in an electrical machine.
6. Identify different methods of speed control of DC motors and ways to control the speed of Induction Motors.

Subject Content

1. DC Machines
2. Permanent Magnet/ Brushless Machines
3. Induction Machines
4. Synchronous Machines.
5. Single-phase Motors
6. Special Machines

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical	6x3 hours	20	N	Individual
Intra-session Exam	1.5 hour	20	N	Individual
Final Exam	3 hours	60	N	Individual

ELEC 3008 Instrumentation and Measurement

Credit Points 10

Legacy Code 300075

Coordinator Gaetano Gargiulo ([https://directory.westernsydney.edu.au/search/name/Gaetano Gargiulo/](https://directory.westernsydney.edu.au/search/name/Gaetano%20Gargiulo/))

Description Through practical exercises students will engage with engineering measurement and instrumentation systems. Students determine the most appropriate measurement method and instrument, such as multimeters, digital oscilloscopes and interfacing modules, for particular applications. They will gain experience with the measurement of physical quantities and the instrumentation required to accurately present information to a controller. Additionally, transducers used to measure common physical quantities are presented in detail, while instrumentation includes a detailed analysis of zero-span circuits, Wheatstone bridges, instrumentation amplifiers, isolation amplifiers, voltage-to-current and voltage-to-frequency modules used for faithful signal transmission, digital-to-analogue and analogue-to-digital circuits to deepen student learning.

School Eng, Design & Built Env

Discipline Electronic Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) ELEC 2001 OR ENGR 2001

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Make use of a variety of transducers to measure physical parameters
2. Estimate the errors involved in making measurements
3. Design and test electronic instrumentation using discrete and integrated circuit components
4. Interface a wide variety of transducers
5. Utilize A/D and D/A converters in the context of digital control
6. Avoid configurations of equipment that lead to grounding problems

Subject Content

Estimation of errors in measurements.
 Transducers, primary & secondary sensors.
 General measurement systems.
 Design of Signal Conditioners.
 Effects of loading in electronic circuits.
 Noise in measurements.
 Aspects of grounding practices.
 A-D/D-A Conversion.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Professional Task	4 submissions required	50	N	Individual
Practical Exam	2 hours	50	N	Individual

ELEC 3009 Power Systems

Credit Points 10

Legacy Code 300771

Coordinator Mahmood Nagrial ([https://directory.westernsydney.edu.au/search/name/Mahmood Nagrial/](https://directory.westernsydney.edu.au/search/name/Mahmood%20Nagrial/))

Description This unit provides students with a global picture of electrical energy systems. Through practical exercises students will examine and analyse the basic processes of generation, transmission and distribution, power system analysis and planning as well as power systems operation under steady-state and transient conditions. Various aspects of power system operation including harmonics, fundamentals of protection, environmental issues and renewable energy systems are also covered in this unit.

School Eng, Design & Built Env

Discipline Electrical And Electronic Engineering And Technology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) ELEC 2010

Assumed Knowledge

Basic knowledge of power frequency devices and systems.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Summarize and critique the operation of the power supply system grid under normal and transient conditions.
2. Complete basic power systems analysis.
3. Identify and utilize the notions and implications of power system fault levels and stability.
4. Explain Harmonics and their causes, power factor including harmonics.

5. Explain some of the environmental issues associated with energy conversion systems.
6. Identify and critique alternative energy sources.

Subject Content

Overview of generation, transmission and distribution in power systems
 Determination of transmission line parameters
 Power systems behaviour in steady state and transient conditions
 Power system stability
 Economic dispatch and unit commitment
 Renewable energy sources and their impact on power systems

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

ELEC 3010 Renewable Energy Systems Design

Credit Points 10

Legacy Code 301425

Coordinator Ali Hellany ([https://directory.westernsydney.edu.au/search/name/Ali Hellany/](https://directory.westernsydney.edu.au/search/name/Ali%20Hellany/))

Description This unit prepares engineering students to be conversant with renewable energy systems. Students will learn to appraise environmental, social, legal, economic and political issues concerning renewable energy systems. Students will also learn relevant design skills related to renewable energy systems.

School Eng, Design & Built Env

Discipline Electrical And Electronic Engineering And Technology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) ELEC 1003 AND ENGR 1011

Equivalent Subjects ELEC 4006 Sustainable Energy Systems

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the technical aspects of renewable energy systems.
2. Design renewable energy systems for a given set of conditions.
3. Assess the social, legal, policy, political economic and environmental issues associated with renewable energy systems.
4. Demonstrate communication and collaboration skills in working with others in an ethical and respectful manner to produce professional analyses and reports

Subject Content

1. Introduction and principles of renewable energy
2. Heat transfer/solar radiation
3. Solar photovoltaics
4. Wind energy
5. Biofuels
6. Hydro-power
7. Wave energy and tidal power
8. Geothermal energy
9. Nuclear energy
10. Environmental impact of renewable energies
11. Economic issues
12. Political, social, policy and legal issues

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	4 quizzes (open book)	20	N	Individual

Project Report	3,000 words	30	N	Group
Final Report	3,000 words	50	N	Individual

Prescribed Texts

- Peake, S & Open University (eds) 2012, Renewable energy : power for a sustainable future, 4th edn, Oxford University Press, Oxford.

Teaching Periods

ELEC 4002 Power Electronics

Credit Points 10

Legacy Code 300772

Coordinator Jamal Rizk ([https://directory.westernsydney.edu.au/search/name/Jamal Rizk/](https://directory.westernsydney.edu.au/search/name/Jamal%20Rizk/))

Description The unit covers various types of power electronics systems, their applications and use in Electrical Drive Systems. It also covers application considerations and modern developments in electronic systems. This course provides the fundamentals of Power Electronics and Industrial Electronics.

School Eng, Design & Built Env

Discipline Electronic Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) ELEC 2010 AND ELEC 2004

Assumed Knowledge

Basic knowledge of power frequency devices and systems.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Describe various power electronic systems and their requirements.
- Describe power semiconductor devices characteristics.
- Describe and analyze various types of: Diodes (uncontrolled) rectifiers AC-DC rectifiers Non-isolated DC-DC converters DC-AC converters (Inverters).
- Examine the nature and analyze operation of semiconductor power switching devices and configuration for energy conversion purposes.
- Describe new developments in power electronic system and some of the environmental issues associated with energy conversion systems.

Subject Content

Power Semiconductor Switches
Line-Frequency Diode Rectifiers: Line-Frequency ac Uncontrolled dc Line-Frequency Phase-Controlled Rectifiers and Inverters: Line-Frequency ac Controlled dc
dc-dc Switch-Mode Converters
Switch-Mode dc-ac Inverters: dc Sinusoidal ac
Resonant Converters: Zero-Voltage and/or Zero-Current Switchings

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Practical	Laboratories - 3 hours per week for 6 weeks. Mandatory to pass labs	20	N	Individual
Intra-session Exam	1 hour 30 minutes	20	N	Individual
Final Exam	2 hours	60	N	Individual

ELEC 4003 Power Quality

Credit Points 10

Legacy Code 300995

Coordinator Ali Hellany ([https://directory.westernsydney.edu.au/search/name/Ali Hellany/](https://directory.westernsydney.edu.au/search/name/Ali%20Hellany/))

Description This unit is to introduce students to power quality phenomena such as voltage sag/swell, distortions, unbalance, and flicker that occur in power systems. The unit also introduces terms and definitions associated with power quality, following which each phenomenon, that is, voltage sag/swell, transient overvoltage, and harmonics. In addition, flicker is presented and discussed in detail for students to understand the sources and impact of these occurrences on power system as well as typical mitigation techniques. Finally,

students are introduced to power quality benchmarking, monitoring and assessment.

School Eng, Design & Built Env

Discipline Electrical Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Restrictions Students must be enrolled in programs 3689 Bachelor of Engineering, 3740 Bachelor of Engineering (Honours) or 3690 Bachelor of Engineering Advanced (Honours) and must have successfully completed 150 credit points.

Assumed Knowledge

Students are expected to be familiar with basic power system calculations including balanced and unbalanced three-phase systems.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and classify power quality disturbances, their causes, and their impact on electrical equipment.
2. Apply Australian and international codes and standards to Power quality analysis as well as describe the terminology used in power quality engineering.
3. Identify the types of hardware and software tools available for use in power quality investigations.
4. Plan a power quality investigation, examine recorded data, and diagnose specific power quality problems.
5. Recommend appropriate mitigation techniques for power quality problems in proposed or existing designs.
6. Discuss power quality problems and present their written findings and recommendations to non-electrical audiences.

Subject Content

1. Power-Quality Standards
2. Voltage Distortion
3. Harmonics and Interharmonics
4. Harmonic Current Sources
5. Power Harmonic Filters
6. Methods for Correction of Power-Quality Problems
7. Power Quality Events
8. Power Quality Measurements

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Presentation	Assignment should cover a sufficient literature-review study and should be no less than 2000 words	35	N	Individual

Report	A major assignment should normally be around 4000 words. Materials from progress report can be used in the final report.	65	N	Individual
--------	--	----	---	------------

ELEC 4004 Radio and Satellite Communication

Credit Points 10

Legacy Code 300489

Coordinator Ragbir Bhathal ([https://directory.westernsydney.edu.au/search/name/Ragbir Bhathal/](https://directory.westernsydney.edu.au/search/name/Ragbir%20Bhathal/))

Description This unit is offered in alternate years. This unit will develop an understanding of the theory and practice of radio and satellite communication techniques and measurements and provide an introduction to space communication systems. It will complement the general communication engineering units, addressing advanced topics important and specific to radio and satellite communications.

School Eng, Design & Built Env

Discipline Communications Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) ELEC 3001 OR ELEC 4001

Equivalent Subjects LGYA 3699 - Satellite Communication

Assumed Knowledge

Physics and Materials, Mathematics for Engineers 1 and 2, Astrophysics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the special challenges and techniques of radio and satellite communications
2. Explain the launch, maintenance and operation of communication satellites and associated telescopes
3. Demonstrate practical knowledge of tracking stations, earth station equipment, telescopes and communication gateways

4. Explain the techniques and use of radio and optical telescopes and associated equipment used in ground based and space stations
5. Demonstrate an understanding of the different architectures and applications of low earth orbit, medium earth orbit and geostationary earth orbit satellite systems
6. Plan, conduct, interpret and document experiments performed in the laboratory

Subject Content

Satellite systems, orbits and launch methods
 Radio wave propagation and polarization
 Radio antennas, receivers and aperture synthesis
 Analog and digital signals
 The space link, interference, link budget calculation
 Satellite access and services and mobile satellite systems
 CCD, photometric systems and adaptive optics
 Robotic observatories and space telescopes
 Remote sensing of planetary systems and image processing and analysis

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practicals/ tutorials	Average contact hours per week 4 hr (made up of 2h lectures + 2h prac/ tutorial per week)	30	N	Individual
Presentation and report	Each oral presentation 10 minutes per student. Report 2,000 words	10	N	Individual
Final Exam	3 hours	60	N	Individual

Teaching Periods

ELEC 4005 Smart Grids and Distributed Generation

Credit Points 10

Legacy Code 300996

Coordinator Mahmood Nagrial ([https://directory.westernsydney.edu.au/search/name/Mahmood Nagrial/](https://directory.westernsydney.edu.au/search/name/Mahmood%20Nagrial/))

Description This unit is designed to model, analyse and control of newly developing areas of distributed generation and smart grids. The unit will cover modelling, control, simulation and protection of such systems. The unit will cover the impacts of renewable sources and power electronics on the operation of smart grids and micro-grids. The unit will also cover environmental and economic impacts of such systems.

School Eng, Design & Built Env

Discipline Electrical And Electronic Engineering And Technology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) ELEC 3009

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the technical aspects of the Smart Grid and Distributed Generation
2. Analyse and simulate the effects of renewable sources on operation of smart grids
3. Discuss and evaluate the control and protection requirements of smart grids
4. Critically examine and assess the environmental issues associated with the Smart Grid and Distributed Generation
5. Discuss and evaluate the economic aspects of the Smart Grid and Distributed Generation
6. Discuss the social, legal and political issues related to the Smart Grid and Distributed Generation

Subject Content

1. Modeling of Smart Grids
 - Loads Impedance Model,
 - PV Sources (Thermal and PV panels),
 - Wind Turbines and Generators,
 - Storage Systems,
 - Rectifiers, Converters and Inverters.
2. Control of Smart Grid Systems
 - Smart Meters,
 - Micro grids,
 - Control of Converters and Inverters,
 - Load, Voltage and Power Control,
 - Synchronized and Islanding Operations of Micro Grids,
 - Design High MW PV Systems,
 - Design of High Power Wind Farm,
 - control of Smart Grid system with High Green energy Penetration.
3. Environmental and pollution issues.
4. Economic analysis of the Smart Grid and Distributed Generation.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Intra-session Exam	1.5 hours	25	N	Individual
Final Exam	2 hours	50	N	Individual

Report	Each group is expected to submit 2 assignments/reports for assessment. Group reports in groups of 3-5 students. Length of reports between 8-10 pages each.	25	Y	Individual
--------	--	----	---	------------

ELEC 4007 Wireless Communications

Credit Points 10

Legacy Code 300065

Coordinator Ranjith Liyanapathirana ([https://directory.westernsydney.edu.au/search/name/Ranjith Liyanapathirana/](https://directory.westernsydney.edu.au/search/name/Ranjith%20Liyanapathirana/))

Description The unit covers the analysis, design and operation of modern wireless communication systems. The primary focus is on the physical layer and hardware, emphasizing the fundamentals of coding and modulation, spread spectrum and multiple access techniques. Current wireless architectures and mobile communication systems are also covered.

School Eng, Design & Built Env

Discipline Communications Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) ELEC 3001 OR
ELEC 3002

Equivalent Subjects LGYA 5692 - Digital Communication Engineering

Assumed Knowledge

Students should have a good understanding of signals and systems, probability and random processes and fundamentals of communication systems.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe and analyse current wireless communication systems including GSM, CDMA, PCS, W-LAN, Wi-Fi, Bluetooth, 3G and 4G mobile systems.
2. Describe and analyse coding and modulation techniques used in wireless communication systems.
3. Analyse bit error rates, receiver structures (correlation and matched filter), spectral occupancy and antenna diversity.
4. Explain the physical properties of the radio channel.
5. Describe basic forms of multiple access techniques applied to wireless communication.
6. Calculate a free-space link budget and a terrestrial link budget.
7. Determine bit error probabilities and coding gains of coding and modulation techniques used in wireless communication.
8. Design wireless communication systems

Subject Content

Evolution of mobile radio communication
The cellular system; design fundamentals
Frequency reuse, channel assignment strategies, handoff
Interference and system capacity
Mobile radio propagation; multipath fading, Rayleigh and Ricean distributions
Signal Space Design techniques
Matched Filter and Correlation Receiver
Coding and Modulation techniques for wireless communication, Spread Spectrum Modulation
Equalization, diversity and channel coding
Multiple access techniques (FDMA, TDMA, CDMA, OFDM)
Novel wireless architectures, wireless systems and standards (WCDMA)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Intra-session Exam	1 hour, closed book, individual	20	N	Individual
Practical	5 x 3 hrs individual, practical assignments	20	Y	Individual

Final Exam 3 hours 60 Y Individual
individual, closed book

ELEC 6001 Applied Project in Neuromorphic Engineering

Credit Points 40

Legacy Code 800235

Coordinator Saeed Afshar (<https://directory.westernsydney.edu.au/search/name/SaeedAfshar/>)

Description This 40 credit point semester-long unit provides a capstone experience to students enrolled in the Master of Applied Neuromorphic Engineering. Students work on an industry-oriented project with practical application and outcome. Having the intention to go into industry, this unit provides opportunities for students to explore a relevant problem that can be completed in one semester. Students will gain valuable experience and industry insights.

School Graduate Research School

Discipline Electrical And Electronic Engineering And Technology

Student Contribution Band HECS Band 2 40cp

Pre-requisite(s) INFO 7001 AND
ELEC 6003 AND
COMP 6001 AND
COMP 6002

Restrictions Students must be enrolled in 8124 Master of Applied Neuromorphic Engineering

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Propose a feasible project plan in Neuromorphic Engineering
2. Appraise new opportunities in Neuromorphic Engineering with creativity and initiative
3. Systemically and critically analyse data and information sources that are related to the identified industry-oriented problem aiming to enhance the capabilities of the neuromorphic system
4. Effectively communicate a novel solution and its potentials to both specialist and non-specialist audiences by utilising a variety of multimedia formats that fit for purpose
5. Execute an industry-oriented project with practical application and outcomes in the area of Neuromorphic Engineering

Subject Content

- Project scoping
- Project proposal and plan
- Project execution and evaluation

- Stakeholder engagement
- Effective communication and negotiation
- Industry standards
- Processes and considerations for commercialisation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Report	1000 words	5	N	Individual
Portfolio	2000 words or equivalent	20	N	Individual

Legacy Code 800234

Coordinator Bharath Ramesh ([https://directory.westernsydney.edu.au/search/name/Bharath Ramesh/](https://directory.westernsydney.edu.au/search/name/Bharath%20Ramesh/))

Description This is a 80 credit point year-long subject taken over two terms (40 credit points in each term). This subject is offered exclusively on campus for students to benefit from mentorships and regular interactions with leading researchers in the field. Students will have the opportunity to contribute towards impactful research projects, aiming at academic growth and progress. To achieve this goal, the Dissertation subject is designed for students to plan and execute a research-based project in the area of Neuromorphic Engineering. The main task in the year-long 80 credit point dissertation subject is an academic research paper that meets publishing standards and is peer-reviewed by external reviewers (getting the article published on a journal is not a completion requirement to the unit). The students shall be part of regular International Center for Neuromorphic Systems (ICNS) interactions, and benefit from supervisors in a discursive setting as the candidate makes progress.

School Graduate Research School

Discipline Electrical And Electronic Engineering And Technology

Student Contribution Band HECS Band 2 40cp

Restrictions Students must be enrolled in 8123 Master of Neuromorphic Engineering

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Formulate a feasible research plan designed to enhance system capabilities compared to standard sensing frameworks

2. Integrate supervisor feedback into research outcomes using critical reflective practice
3. Systemically and critically analyse data and information sources that are related to the identified research question aiming to enhance the capabilities of the neuromorphic system
4. Effectively communicate project outcomes in a final scientific presentation
5. Compose a scientific research report that synthesises research findings in an application-centred task
6. Produce a scientific article that meets publishing standards by integrating the theory & novel experimental findings

Subject Content

- Literature view
- Research methods
- Ethics
- Portfolio
- Data collection and analysis
- Peer review
- Oral presentation
- Practical experiments
- Writing abstract
- Writing for publication

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Proposal	1000 words or equivalent	5	N	Individual
Portfolio	3000 words or equivalent	10	N	Individual
Practical	3000 words	10	N	Individual
Presentation	30 mins	10	N	Individual
Thesis (Dissertation)*	words	50	Y	Individual
Professional Task*	6,000 words	15	Y	Individual

Teaching Periods

ELEC 6003 Neuromorphic Accelerators

Credit Points 10

Legacy Code 800231

Coordinator Mark Wang ([https://directory.westernsydney.edu.au/search/name/Mark Wang/](https://directory.westernsydney.edu.au/search/name/Mark%20Wang/))

Description Problem-oriented thinking and distributed system design are essential for neuromorphic engineers. This unit is designed to provide students with sufficient understanding to neuromorphic processor. Students will be able to implement spiking neural networks by programming neuromorphic processors. The lab work and programming assignments focus on different key aspects of programming neuromorphic processor: Neural modelling, Python programming, debugging code and hardware/software co-simulation.

The workshops focus on the concrete implementation of neural networks.

School Graduate Research School

Discipline Electronic Engineering

Student Contribution Band HECS Band 2 10cp

Restrictions Must be enrolled in 8124 Master of Applied Neuromorphic Engineering

Assumed Knowledge

Proficient in Python, basic in neural computing, basic in spiking neural networks.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design Spiking Neural Networks (SNNs) systems for efficient on-chip computing
2. Implement SNNs using the Neuromorphic Processors of programming framework
3. Critically appraise novel solutions for efficient neural network systems
4. Effectively communicate the significance and impact of neuromorphic processors to non-specialist audience
5. Accurately compile professional lab reports detailing the methodology employed in implementing the SNN architecture

Subject Content

- * Architectures of Neuromorphic Accelerators
 - Parallel computing
 - Differences between Neuromorphic Accelerator architectures and conventional von-Neumann architecture
- * Features of Spiking Neural Networks
 - Difference between Spiking Neural Networks and conventional numerical computing systems
- * Programming frameworks of Neuromorphic processors

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Practical	1000 words	25	N	Individual
Practical	1200 words	30	N	Individual
Applied Project	1500 words	30	N	Group
Presentation	5 minutes	15	N	Individual

ELEC 6004 Neuromorphic Electronics Design

Credit Points 10

Legacy Code 800229

Coordinator Ying Xu ([https://directory.westernsydney.edu.au/search/name/Ying Xu/](https://directory.westernsydney.edu.au/search/name/Ying%20Xu/))

Description Efficient, parallel, low-power computation is a hallmark of brain computation and the goal of neuromorphic engineering. The focus of this unit is to design, implement and test accurate, electronic, very large scale integrated (VLSI) circuit model of neural systems and the associated signal processing. Students will have opportunities to design and build a neural system on hardware and gain resultant insights into applying neuromorphic engineering to real-world problems. This subject will be undertaken at Parramatta City - Hassall St campus.

School Graduate Research School

Discipline Electronic Engineering

Student Contribution Band HECS Band 2 10cp

Restrictions Students must be enrolled in 8124 Master of Applied Neuromorphic Engineering

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design and implement Leaky Integrate-and-Fire (LIF) neuron circuits on Field-Programmable Gate Arrays (FPGAs) using Verilog Hardware Description Language (HDL).
2. Develop and implement spiking neural network systems to process event-based data using Verilog/Python
3. Develop a solution-orientated way of critically assessing real-world problems architecturally
4. Communicate the significance and impact of digital neuromorphic systems to non-specialist audiences

Subject Content

- Model and design Leaky knowledge of Integrate-and-Fire (LIF) neuron circuits on a hardware platform using a Hardware description language
- Knowledge and skills of implementing a High-speed interface between a hardware platform and PCs to realise high speed data transmission between the hardware and PCs
- Skills of designing and implementing a LIF neural network system on a hardware platform and PCs
- Knowledge and skills of architectural design of a neuromorphic system

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Practical	1200 words or equivalent	30	N	Individual
Practical	1200 words or equivalent	25	N	Individual

Practical	1500 words or equivalent	30	N	Group

ELEC 7001 Advanced Control Systems

Credit Points 10

Legacy Code 300603

Coordinator Upul Gunawardana (<https://directory.westernsydney.edu.au/search/name/Upul Gunawardana/>)

Description This unit covers continuous and discrete control systems. It reviews and builds on the fundamental concepts of the theory of feedback in continuous and discrete time to examine the analysis and design of advanced continuous and discrete time linear control systems. Transfer function and state variable methods are employed. Instruction makes use of extensive experimental tasks. There is also considerable use of Matlab simulations.

School Eng, Design & Built Env

Discipline Electrical And Electronic Engineering And Technology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 5850 - Digital Control LGYA 5813 - Advanced Control Systems

Restrictions

Students must have competence in the use of test equipment, components and data sheets. Students must be enrolled in a postgraduate program.

Assumed Knowledge

Knowledge is assumed in Continuous time control systems, the use of Laplace and Z-transforms, Analog to digital, digital to analog conversion, Vector matrix difference equations, State variable models and familiarity with Matlab or similar software Knowledge is assumed in: Continuous time control systems; The use of Laplace and Z-transforms; Analog to digital, digital to analog conversion; Vector matrix difference equations; State variable models; Introductory Classical Control Systems Theory; Familiarity with MATLAB.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop and use mathematical models of systems in time domain and frequency domain
2. Formulate and analyse models of real systems using physical characteristics

3. Apply root locus and frequency domain techniques for design of feedback controllers
4. Use appropriate computer based tools and laboratory instrumentation to analyse and design feedback control systems.

Subject Content

Continuous and discrete time modelling
 Transfer functions, block diagrams, signal flow graphs, state variable methods
 Stability methods in s-domain, z-domain, time domain
 Root Locus, frequency response methods
 State feedback, pole placement and observers
 Use of the digital computer as main control element
 Converting theoretical designs into hardware

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
In-class quizzes	3 quizzes via vUWS, 2 hours per quiz. Quiz 1, 2 and 3 (10% for each test) * Broad coverage of concepts	30	N	Individual
Practicals	2 hours per week in a computer lab The practical sessions are set up so that students can enhance and apply what is taught in the class. During practical sessions, MATLAB will be utilised for control system modelling and problem-solving. Students will be given 6 problem sets which are equally weighted and to be attempted and solved within a 2-week interval.	20	N	Individual
Final Exam	2 hours	50	N	Individual

ELEC 7002 Advanced Data Networks

Credit Points 10

Legacy Code 300173

Coordinator Ranjith Liyanapathirana ([https://directory.westernsydney.edu.au/search/name/Ranjith Liyanapathirana/](https://directory.westernsydney.edu.au/search/name/Ranjith%20Liyanapathirana/))

Description This unit covers all major network technologies: asynchronous transfer mode (ATM), Internet, and telephony. Essential networking topics such as protocol layering, multiple access, switching, scheduling, routing, congestion control, error and flow control, and network security are covered in detail. An engineering approach is taken to provide insight into network design.

School Eng, Design & Built Env

Discipline Electrical and Electronic Engineering and Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Assumed Knowledge

Communication Systems / Digital Communication.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain network topologies and communication architectures
2. Explain and apply advanced level networking concepts and functions
3. Describe and analyze common protocols used in telephone networks, the Internet and ATM networks.

Subject Content

Introductory concepts: network topologies, packet switching, datagram packet switching and virtual circuits.

Queuing Theory: M/M/1 and other queues, simple applications.

ATM Switching: Service categories, protocol formats, switch fabric architectures

High-speed LANs

Internetworking

Security: private and public key encryption, authentication and digital signatures.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Seminar and individual written report	No more than 15 pages		N	Individual
Practicals assessed as Satisfactory/Unsatisfactory	3 hours per week for 5 weeks	S/U	N	Individual
Mid-term Quiz (Closed Book)	1 hour	25	N	Individual
Final Exam (Closed Book)	2 hours	55	N	Individual

ELEC 7003 Advanced Electrical Machines and Drives

Credit Points 10

Legacy Code 300601

Coordinator Jamal Rizk ([https://directory.westernsydney.edu.au/search/name/Jamal Rizk/](https://directory.westernsydney.edu.au/search/name/Jamal%20Rizk/))

Description The subject covers various types of electrical motors and drive systems, their applications and control. The unit aims to introduce an advanced study of electrical machines and drives. It also covers application considerations and modern developments in high performance drive systems. This course covers various types of the speed control, the starting, the braking and the dynamics of different electrical machines and drives.

School Eng, Design & Built Env

Discipline Electrical And Electronic Engineering And Technology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 5847 - Variable Speed Electric Drives LGYA 5844 - Special Electrical Machines

Restrictions

Students must be enrolled in a postgraduate program

Assumed Knowledge

Electric Circuits and Basic Electro magnetics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply various electrical drive systems to industrial and commercial applications and discuss their requirements.
2. Analyse various types of DC and AC drives.
3. Explain new developments in control of drive systems.
4. Discuss and explain the use of various electrical motors in different electromechanical systems.

Subject Content

Introduction to machine drives. Principal characteristics and requirements. Basic Components of an Electric Drive System.

D.C. motors. Circuit representation. Speed-torque characteristics.

Speed Control of D.C motors

Induction motors. Circuit representation. Speed-torque characteristics.

Speed control of Induction Motors: voltage control, slip-energy recovery, speed control by inverters, frequency and Voltage/Frequency Control.

Power electronic devices and basic power converters.

Three-phase naturally commutated bridge circuit

Braking of Electrical Motors: Regenerative, Dynamics and counter-current braking.

Dynamics of DC and Induction Motors

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Assignment	25 pages which include all the circuits and graphics.	25	N	Individual
Mid-semester exam	2 hours	20	N	Individual
Final Exam	2 hours	55	N	Individual

ELEC 7004 Advanced Power Quality

Credit Points 10

Legacy Code 301025

Coordinator Ali Hellany ([https://directory.westernsydney.edu.au/search/name/Ali Hellany/](https://directory.westernsydney.edu.au/search/name/Ali%20Hellany/))

Description This unit is to introduce students to power quality phenomena such as voltage sag/swell, distortions, unbalance, and flicker that occur in power systems. The unit also introduces terms and definitions associated with power quality, following which each phenomenon, that is, voltage sag/swell, transient overvoltage, and harmonics. In addition, flicker is presented and discussed in detail for students to understand the sources and impact of these occurrences on power system as well as typical mitigation techniques. Finally, students are introduced to power quality benchmarking, monitoring, assessment. In addition Advanced knowledge on network frequency responses is presented.

School Eng, Design & Built Env

Discipline Electrical Engineering

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 3693 Master of Engineering, 3695 Graduate Certificate in Engineering or the Master of Research.

Assumed Knowledge

Students are expected to be familiar with basic power system calculations including balanced and unbalanced three-phase systems.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and classify power quality disturbances, their causes, and their impact on electrical equipment.
2. Apply Australian and international codes and standards to Power quality analysis as well as describe the terminology used in power quality engineering.
3. Review the types of hardware and test software tools available for use in power quality investigations.
4. Plan a power quality investigation, examine recorded data, and diagnose specific power quality problems.
5. Recommend appropriate mitigation techniques for power quality problems in proposed or existing designs.
6. Evaluate power quality problems and document your finding via a written report.

Subject Content

1. Power-Quality Standards
2. Voltage Distortion
3. Harmonics and Inter-harmonics
4. Harmonic Current Sources
5. Power Harmonic Filters
6. Methods for Correction of Power-Quality Problems
7. Power Quality Events
8. Power Quality Measurements
9. Advanced Power quality analysis

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

ELEC 7005 Advanced Signal Processing

Credit Points 10

Legacy Code 300596

Coordinator Jeffrey Zou ([https://directory.westernsydney.edu.au/search/name/Jeffrey Zou/](https://directory.westernsydney.edu.au/search/name/Jeffrey%20Zou/))

Description This unit covers the principles and techniques in signal processing. The subject matter includes advanced topics in discrete-time signals and systems, the z-transform and its applications in signal processing, advanced topics in the sampling of continuous-time signals, FIR and IIR filter design, filter structures, and the discrete Fourier transform and its computation. Students develop skills of analysing and designing digital signal processing systems.

School Eng, Design & Built Env

Discipline Electrical And Electronic Engineering And Technology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 5840 - Signal Processing 1

Restrictions

Students must be enrolled in a postgraduate program

Assumed Knowledge

Engineering mathematics, circuit theory, signals and systems.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse discrete-time signals and systems mathematically;
2. Explain the z-transform and its applications in signal processing mathematically;
3. Explain the sampling of continuous-time signals mathematically;
4. Design FIR and IIR filters;
5. Analyse filter structures mathematically;
6. Explain the discrete Fourier transform mathematically and apply it to signal processing.

Subject Content

Advanced topics in discrete-time signals and systems
 The z-transform and its applications in signal processing
 Advanced topics in the sampling of continuous-time signals
 FIR and IIR filter design
 Filter structures
 The discrete Fourier transform and its computation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Three laboratory	5 pages each	20	N	Individual
Mid-Semester Test	1.5 hours	30	N	Individual
Final examination	2 hour	50	N	Individual

ELEC 7006 Advanced Smart Grids and Distributed Generation

Credit Points 10

Legacy Code 301026

Coordinator Mahmood Nagrial ([https://directory.westernsydney.edu.au/search/name/Mahmood Nagrial/](https://directory.westernsydney.edu.au/search/name/Mahmood%20Nagrial/))

Description This unit is designed to model, analyse and control of newly developing areas of distributed generation and smart grids. The unit will cover modelling, control, simulation and protection of such systems. The unit will also cover the impacts of renewable sources and power electronics on the operation of smart grids and micro-grids. The unit will also cover environmental and economic impacts of such systems.

School Eng, Design & Built Env

Discipline Electrical And Electronic Engineering And Technology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the technical aspects of the Smart Grid and Distributed Generation
2. Analyse and simulate the effects of renewable sources on operation of smart grids
3. Discuss and evaluate the control and protection requirements of smart grids
4. Critically examine and assess the environmental issues associated with the Smart Grid and Distributed Generation
5. Discuss and evaluate the economic aspects of the Smart Grid and Distributed Generation
6. Evaluate and compare various operating requirements with case studies

Subject Content

1. Modelling of Smart Grids.
 - Loads Impedance model
 - PV sources (Thermal and PV panels)
 - Wind Turbines and Generators
 - storage systems
 - Rectifiers, Converters and Inverters
2. Control of Smart Grid Systems.
 - Smart Meters
 - Micro grids
 - control of Converters and Inverters
 - Load, Voltage and power control
 - Synchronized and Islanding Operations of Micro grids
 - design High MW PV systems
 - design of High power Wind farm
 - control of Smart Grid system with High Green energy Penetration
3. Environmental and pollution issues
4. Economic analysis of the Smart Grid and Distributed Generation
5. Case Studies

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Intra-session Exam	1.5 hours	25	N	Individual
Final Exam	2 hours	50	N	Individual
Case Study	Length of reports between 10-15 pages each	25	N	Individual

Prescribed Texts

- Keyhani, A, Marwali, M & Dai, M 2009, 'Smart Grid Distributed Generation Systems', in Integration of green and renewable energy in electric power systems, John Wiley & Sons, Inc., Hoboken, N.J.

ELEC 7008 Instrumentation and Measurement (PG)

Credit Points 10

Legacy Code 300515

Coordinator Gaetano Gargiulo ([https://directory.westernsydney.edu.au/search/name/Gaetano Gargiulo/](https://directory.westernsydney.edu.au/search/name/Gaetano%20Gargiulo/))

Description This unit covers topics associated with the measurement and presentation of physical parameters. A wide range of transducers are presented in detail, while instrumentation includes a detailed analysis of a multitude of analogue and digital circuits used to amplify, transmit, and display electrical signals. The application of these modules in modern measurement equipment is presented in details.

School Eng, Design & Built Env

Discipline Electronic Engineering

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Instrumentation and Measurement (PG).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain limitations of and apply a wide range of transducers
2. Design and analyse systems used for process control
3. Explain the techniques and trade-offs involved in A/D and D/A conversion
4. Design and specify requirements for interfacing a large number of analogue signals to a digital controller
5. Design complete instrumentation systems

Subject Content

Transducers
 Amplification techniques (signal conditioning)
 Digital-to-analogue conversion
 Analog-to-digital conversion
 Digital devices

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

ELEC 7009 Personal Communication Systems

Credit Points 10

Legacy Code 300196

Coordinator Ranjith Liyanapathirana ([https://directory.westernsydney.edu.au/search/name/Ranjith Liyanapathirana/](https://directory.westernsydney.edu.au/search/name/Ranjith%20Liyanapathirana/))

Description This unit covers the design fundamentals of cellular systems, including frequency reuse, channel assignments, radio wave propagation in mobile environments, modulation techniques, coding techniques, spread spectrum and multiple access. It includes topics from emerging wireless technologies, and third-generation mobile communication systems and standards.

School Eng, Design & Built Env

Discipline Communications Technologies

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Assumed Knowledge

Communications Systems. Digital Communications.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of current wireless communication systems including GSM, CDMA, PCS, and 3G systems.
2. Describe coding and modulation techniques used in wireless systems.
3. Demonstrate at an advanced level understanding of implementation issues such as bit error rates, receiver complexity, spectral occupancy and antenna diversity.

Subject Content

Evolution of mobile radio communication
The cellular system; design fundamentals
Frequency reuse, channel assignment strategies, handoff
Interference and System capacity

Mobile radio propagation; multipath fading, Rayleigh and Ricean distributions
Modulation techniques for mobile radio
Equalization, diversity and channel coding
Multiple access techniques
Wireless systems and standards

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Applied Project	Seminar (15 min) and Paper (7500 words)	20	N	Individual
Numerical Problem Solving	1 hour	20	N	Individual
End-of-session Exam	3 hours	60	N	Individual

Teaching Periods

ELEC 7010 Power System Planning and Economics

Credit Points 10

Legacy Code 300197

Coordinator Mahmood Nagrial ([https://directory.westernsydney.edu.au/search/name/Mahmood Nagrial/](https://directory.westernsydney.edu.au/search/name/Mahmood%20Nagrial/))

Description This unit covers planning techniques for energy and electrical power systems. It also covers the economics of various options and reliability of electrical power systems.

School Eng, Design & Built Env

Discipline Electrical And Electronic Engineering And Technology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain and analyse power systems under normal and transient conditions.
2. Analyse power systems using various techniques.
3. Explain optimal control and economic operation of power systems.
4. Identify and utilise the notions and implications of power system fault levels and stability on transmission planning.
5. Explain and analyse harmonics, their causes and effects on system operation & control.
6. Explain and formulate environmental issues associated with energy conversion systems.
7. Identify and critique alternative and renewable energy sources.

Subject Content

Advanced power system components.

Advanced power system control and operation.

Review of econometric generation allocation methods and their limitations.

Transmission planning and distribution planning.

The National Electricity Market - structure, network service and retail services providers.

Alternative energy sources.

1. The National Electricity Market - structure, network service and retail services providers, energy 'wheeling' and trading, the energy 'pool' and typical price behaviours.

2. Review of conventional planning techniques and their limitations.

3. Demand forecasting.

4. System reliability.

5. Transmission planning.

6. Distribution planning and demand management.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practicals	4 practicals with 2 hours duration for each practical	25	Y	Group

Coordinator Zdenka Misanovic ([https://directory.westernsydney.edu.au/search/name/Zdenka Misanovic/](https://directory.westernsydney.edu.au/search/name/Zdenka%20Misanovic/))

Description This unit is designed to assist students to become successful independent reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study. Emphasis is placed on developing the key competencies of scientific inquiry - collecting, analysing, organising and communicating information as well as solving problems, particularly when related to using mathematical ideas and techniques.

School Western Sydney The College

Discipline Engineering and Related Technologies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 0 Preparatory subject

Restrictions Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use both independent and collaborative learning strategies to advance the knowledge of the individual and that of their peers.
2. Communicate effectively through the development of critical reading, listening, speaking and writing skills in context.
3. Locate and use information technology systems and educational technologies to support learning and assessment.
4. Apply critical thinking, and use problem solving skills and research skills, to make informed decisions.
5. Apply the process of reflection to learning experiences, in order to assess their own learning styles and learn how to learn.

6. Describe criteria for successful posters and oral presentations and write and evaluate a scientific report.

Subject Content

Topic 1: Introduction to tertiary study

Topic 2: Blended learning

Topic 3: Advanced tertiary skills

Topic 4: Information skills

Topic 5: Research methods for science and engineering:

- Introduction to scientific methods
- Scientific report writing
- Data handling
- Critical reading
- Research and referencing (journal articles)
- Project report

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Oral presentation	5 minutes	10%	N	Individual
Reflective Learning Journal	800-1200 words	40%	N	Individual
Scientific Report	1000-2000 words	50%	N	Individual
Project: Part A: Analysis of provided data and proposed hypothesis – 10% Part B: Draft Introduction and Method – 10% Part C – Final report – 30%

Description An explanation and description of how the built environment works is essential to designers and construction professionals. This unit provides an introduction to physical units of measurement, tolerance, statics, dynamics, acoustics and thermal properties. It also allows students to interpret and apply the concepts of electricity, energy, work and power to the built environment. Students engage with these concepts through a hands-on learning experience including practical projects and live demonstrations.

School Computer, Data & Math Sciences

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Pre-requisite(s) Students enrolled in 7015 Diploma in Construction Management or 7065 Diploma in Construction Management Extended or 7042 Bachelor of Construction Management (WSTC FYP) or 7081 Bachelor of Construction Management Extended (WSTC FYP) must pass MATH 0027 Scientific Methods for Construction Management (WSTC Prep) before enrolling in this unit

Equivalent Subjects ENGR 1003 Design Science

Restrictions Students must be enrolled at Western Sydney University, The College in a Construction Management program. Students enrolled in Extended Diplomas must pass 40 credit points from the preparatory subjects listed in the program structure prior to enrolling in this University level subject. Students enrolled in the combined Diploma/Bachelor programs listed below must pass all College Preparatory subjects listed in the program structure before progressing to the Year 2 subjects.

Assumed Knowledge

The content of any NSW HSC Mathematics subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply SI units for measurements
2. Explain and apply the principles of industrial design and construction
3. Explain and use the concepts of forces, equilibrium and electricity
4. Explain and use the thermal properties of materials and use the principles of design in acoustics
5. Prepare a design portfolio to professionally document the design process
6. Plan, manage and actively contribute to a team based project

Subject Content

1. SI units and measurements.
2. Principles for design and construction.
3. Forces and equilibrium.
4. Introduction to electricity.
5. Thermal properties of matter.
6. Acoustics and design principles.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz (In Class)	30 minutes	5	N	Individual
Portfolio	20 hours	20	N	Group
Presentation	10 slides	10	N	Group
Report	3,000 words	40	N	Individual
Critical Review	2,000 words	25	N	Individual

Coordinator Karen Yevenes ([https://directory.westernsydney.edu.au/search/name/Karen Yevenes/](https://directory.westernsydney.edu.au/search/name/Karen%20Yevenes/))

Description From Spring 2020, this unit will be replaced by 301286 - Designing for People: Applied Ergonomics. This unit equips students with the skills to use creative design and structured decision making to solve challenging problems. Students will develop their understanding of design process by creating experimental models using various methods, including 3D rapid prototyping. Students will also record their design process via multimodal media, in both digital and non-digital format. They will also reflect upon the design process through the CDIO framework (Conceive, Design, Implement, Operate) and CAD (Computer-Aided Design).

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects ENGR 1017 - Form and Production ENGR 1014 - Engineering and Design Concepts

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Conceive design solutions to meet a brief, taking into account mechanical, structural, human and contextual requirements.
2. Develop and justify a design solution through an iterative process involving peer feedback.
3. Implement and test a design using prototyping.
4. Critically reflect on and document the design process and suggest improvement opportunities successes (using the CDIO framework).
5. Produce a project report reflecting design and engineering content.

Subject Content

History of creativity in design and engineering
 Design brief interpretation and reframing
 Functional analysis
 Project reporting for designers

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Assessment 1: Object design in 3D in groups, evaluation report and visual process diary as e-portfolio.	Full scale physical model, e-portfolio. Consisting of 5 pages.	30	N	Group
Assessment 2: Object design - presentation of digital narrative and evaluation.	10 minutes presentation of design solution including evaluation of design outcome.	30	N	Individual
Assessment 3: Project report and demo presentation of operational model detailing abstract kinetic object design.	10 page e-portfolio and 10 minutes presentation and 1:1 scale kinetic model.	40	N	Individual

Coordinator Qinghua Zeng ([https://directory.westernsydney.edu.au/search/name/Qinghua Zeng/](https://directory.westernsydney.edu.au/search/name/Qinghua%20Zeng/))

Description This unit will introduce fundamentals of engineering materials. The topics will include materials structure, properties, processing and applications, degradation of materials, sustainability, and the selection of materials for various engineering applications.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Assumed Knowledge

HSC mathematics (not General Mathematics), physics and chemistry.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. describe and identify the atomic structure, bonding, crystal structure and defects of materials;
2. explain and determine the various properties of materials (e.g., mechanical, thermal, electrical, optical, magnetic);
3. identify and explain the mechanical failures, corrosion, and degradation of materials and how to prevent them;
4. select an appropriate material for a given application;
5. apply sustainability principles in engineering practice.

Subject Content

Atomic structure and interatomic bonding

Crystalline structure and defects in solids

Mechanical and physical properties

Metals, ceramics and glasses, polymers, composites, and advanced materials

Materials selection

Materials and sustainability

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Self-Assessment	(1) Total mark for tutorials will be 20. (2) There are 10 weekly online tutorials, and each weights 2 marks. 1 hour	20	N	Individual
Quiz	Two quizzes 15 marks each 1 hour each quiz.	30	N	Individual
Practical	2 hours each	20	N	Both (Individual & Group)
Final Exam	2 hours	30	N	Individual

Assumed Knowledge

HSC physics and HSC mathematics (not General Mathematics).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and apply System Internationale (SI) units in the areas covered in this unit
2. Analyse and solve problems by applying the laws and principles of engineering physics in the following areas covered by the subject: - Units, and Vectors, Linear, and circular motion, Photons, electrons, and atoms, Force systems, and equilibrium, Work, and energy applications, Dynamics of rotational motion, Fluid dynamics, Heat, and thermodynamics, Periodic motion, and wave phenomena, Electricity, and magnetism.
3. Plan, conduct and document experiments performed in the laboratory on - Measurements & uncertainties, - Acceleration due to gravity, - Coefficients of friction, - Standing waves, - Spectral line analysis.
4. Interpret the results of experiments against the theory including the estimation of experimental uncertainties.

Subject Content

Units and Vectors,
Linear and circular motion,
Photons, electrons and atoms,
Force systems and equilibrium,
Work and energy applications
Dynamics of rotational motion,
Fluid dynamics,
Heat and thermodynamics
Periodic motion and wave phenomena,
Electricity and magnetism.

ENGR 1018 Fundamentals of Mechanics

Credit Points 10

Legacy Code 300463

Coordinator Md Abdul Alim ([https://directory.westernsydney.edu.au/search/name/Md Abdul Alim/](https://directory.westernsydney.edu.au/search/name/Md%20Abdul%20Alim/))

Description In this unit students acquire knowledge about the action and interaction of forces, moments and couples in two and three dimensions. Students then apply this to the analysis of the equilibrium of single bodies, and of trusses, mechanisms, and transversely loaded beams. In addition, students study the dynamics of a non-rotating body, and a body rotating about a fixed axis. Further, they study the friction between bodies. Students conduct experiments to see how the lecture content applies to the real world, and make extensive use of vector algebra.

School Eng, Design & Built Env

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects ENGR 1020 Fundamentals of Mechanics (WSTC)
ENGR 1019 Fundamentals of Mechanics (WSTC Assoc Deg)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use equilibrium to evaluate unknown reactions, internal loads and represent distributed forces.
2. Evaluate the internal forces in planar trusses, and mechanisms.
3. Calculate the acceleration of a body under the action of an unbalanced force or couple.
4. Analyse static and kinetic friction.
5. Construct bending moment and shear force diagrams.
6. Take measurements in the real world, and use them to verify the theory presented in the lectures.

Subject Content

Statics in two dimensions
Statics in three dimensions
Translational Dynamics
Rotational Dynamics
Beam Diagrams

Assessment

ENGR 1019 Fundamentals of Mechanics (WSTC AssocD)

Credit Points 10

Legacy Code 700113

Coordinator Abbas Ranjbar ([https://directory.westernsydney.edu.au/search/name/Abbas Ranjbar/](https://directory.westernsydney.edu.au/search/name/Abbas%20Ranjbar/))

Description This unit deals with the action and interaction of forces, moments and couples in two and three dimensions. It examines the equilibrium of single bodies, and of trusses and mechanisms. It then looks at the friction between bodies. It covers the dynamics of a non-rotating body, and a body rotating about a fixed axis. Finally, internal loadings are investigated - particularly within a transversely loaded beam. The unit makes extensive use of vector algebra.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Manipulate vectors in 2 dimensions and 3 dimensions.
2. Use the equilibrium equations to evaluate unknown reactions and internal loads.
3. Evaluate the member forces in planar trusses.
4. Evaluate the inter-body forces in planar mechanisms.
5. Calculate the acceleration of a body under the action of an unbalanced force or couple.
6. Analyse static and kinetic friction.
7. Construct bending moment and shear force diagrams.
8. Replace a distributed force by a single equivalent force.
9. Identify under-constrained and statically indeterminate problems.
10. Take measurements in the real world and use them to verify the theory presented in the lectures.

Subject Content

1. Statics in two dimensions
 - Vectors
 - Forces Moments and Couples
 - Free body diagrams
 - Equilibrium
 - Friction
 - Trusses
 - Frames and Machines
2. Statics in three dimensions
 - Vectors
 - Forces Moments and Couples
 - Free body diagrams
 - Equilibrium
3. Translational Dynamics
 - Acceleration
 - The work-energy equation
 - Potential energy
4. Rotational Dynamics
 - Acceleration
 - The work-energy equation
5. Beam Diagrams
 - Internal loads
 - Bending moments and shear force diagrams
 - Distributed forces

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Lab Practicals x5	6 hours	15	N	Both (Individual & Group)
Online Quizzes x10	10x0.5 hour= 5 hours	30	N	Individual
Intra-session exam	1 hours + 30 minutes for online submission	15	N	Individual

End of session exam (in parts): Part 1: written – problem solving/short answer Part 2: Viva Voce	Part 1: 2 hours + 30 minutes for online submission Part 2: 20 minutes per student	40	Y	Individual
--	---	----	---	------------

ENGR 1020 Fundamentals of Mechanics (WSTC)

Credit Points 10

Legacy Code 700023

Coordinator Ben Kelley ([https://directory.westernsydney.edu.au/search/name/Ben Kelley/](https://directory.westernsydney.edu.au/search/name/Ben%20Kelley/))

Description This unit deals with the action and interaction of forces, moments and couples in two and three dimensions, on machine elements and simple structures. It examines the equilibrium of single bodies, of multi-body structures and of mechanisms. It then covers the dynamics of a particle. A systematic approach to solving practical engineering design problems is provided. The unit makes extensive use of vector algebra.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Pre-requisite(s) Students enrolled in 7034 Diploma in Engineering 7066 Diploma in Engineering Extended or 6033 Diploma in Engineering Bachelor of Engineering Studies must pass PHYS 0003 Foundation Physics 2 before enrolling in this unit

Equivalent Subjects ENGR 1018 - Fundamentals of Mechanics ENGR 1019 - Fundamentals of Mechanics (WSTC Assoc Degree)

Restrictions Students must be enrolled at Western Sydney University, The College. Students enrolled in Extended Diplomas must pass 40

credit points from the preparatory subjects listed in the program structure prior to enrolling in this University level subject. Students enrolled in the combined Diploma/Bachelor programs listed below must pass all College Preparatory subjects listed in the program structure before progressing to the Year2 subjects.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Manipulate vectors in 2 dimensions and 3 dimensions
2. Use the equilibrium equations to evaluate unknown reactions and internal loads
3. Evaluate the member forces in planar trusses
4. Evaluate the inter-body forces in planar mechanisms
5. Calculate the acceleration of a body under the action of an unbalanced force or couple
6. Analyse static and kinetic friction
7. Construct bending moment and shear force diagrams
8. Replace a distributed force by a single equivalent force
9. Identify under-constrained and statically indeterminate problems
10. Take measurements in the real world and use them to verify the theory presented in the lectures

Subject Content

1. Statics in two dimensions

ENGR 1023 Introduction to Engineering Business Management (WSTC AssocD)

Credit Points 10

Legacy Code 700114

Coordinator Bader Unnisa Mehdi ([https://directory.westernsydney.edu.au/search/name/Bader Unnisa Mehdi/](https://directory.westernsydney.edu.au/search/name/Bader%20Unnisa%20Mehdi/))

Description This unit will cover aspects of modern engineering business management. This unit of study will provide students an opportunity to look at small, medium and large Engineering businesses and the role of Engineering Associates in those organisations.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Restrictions Students must be enrolled at Western Sydney University, The College in 7022 Associate Degree in Engineering

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the functions and nature of modern engineering business management.
2. Define the role, abilities and core competencies of the Engineering Associate in engineering businesses.
3. Evaluate the principles and processes of modern engineering business management and identify key areas of management in small, medium and large Engineering business for further improvement.
4. Integrate and apply the principles of engineering business management to solve complex engineering problems and become effective in the workplace.
5. Explain the internal and external environment of the business and formulate business strategies

Subject Content

This unit provides engineering students with basic knowledge of engineering business management. The contents of this unit are arranged to provide engineers with an introduction to many of the important topics of management, such as the role of engineers, decision making, human resource management, strategic management, business environment, organizing and leading a business, and control. The weekly contents are described as follows:

1. Introduction to management: roles, functions and organizations
2. The environment and corporate culture
3. Managing in a global environment
4. Ethics, social responsibility and sustainable development
5. Organisational planning and goal setting
6. Strategy formulation and implementation: environmental and internal analyses, and business strategies
7. Managerial decision-making
8. Fundamentals of organising
9. Human resource management
10. Managing diversity
11. Leading and motivation in organizations Marketing
12. Communication and teamwork in organizations
13. Managerial and quality control

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Case Study	3,000 words	25	N	Group
Presentation	15 minutes	15	N	Group
Quiz	30 minutes each	20	N	Individual
Final Exam	2 hours	40	N	Individual

ENGR 1024 Introduction to Engineering Practice

Credit Points 10

Legacy Code 300964

Coordinator Ee Loon Tan ([https://directory.westernsydney.edu.au/search/name/Ee Loon Tan/](https://directory.westernsydney.edu.au/search/name/Ee+Loon+Tan/))

Description This unit encourages students to explore the professional responsibilities and challenges faced by Engineers. Students are introduced to emerging issues and approaches in the engineering profession, with particular attention given to using a systems approach to solve engineering problems. Students engage in a semester-long research and problem solving task that addresses technical, environmental and social sustainability imperatives and fosters fundamental research, communication skills. Special emphasis is placed on lifelong learning, academic literacy and professional skills including information literacy, project management, engineering drawing and teamwork which equip students for subsequent academic and professional pursuits.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Solve an engineering problem using systems approach.
2. Identify and reflect upon the professional responsibilities of the Engineer.
3. Deploy information literacy skills to investigate a complex problem context, alternate approaches and possible solutions.
4. Deploy academic standard literacy skills including academic writing, argument construction and referencing.
5. Communicate research and solutions clearly and professionally in visual and verbal presentations and an illustrated report.

6. Plan, manage, actively contribute to and assess a team based project.
7. Identify and apply environmentally and socially sustainable design criteria to a complex problem.
8. Produce and read an engineering drawing representing simple structures, landscapes, and electric circuit.

Students are introduced to the construction management profession through the use of industry case studies and project problems. Students engage in a research and problem-solving task that addresses sustainability imperatives and fosters fundamental research and communication skills. Special emphasis is placed on academic and business literacy, project management and teamwork which equip students for subsequent academic and professional contexts.

Restrictions

Students must be enrolled at The College. Students enrolled in Extended Diploma programs: 7136 Dip Building Design Management

Extended and 7137 Dip Construction Management Extended must have passed 30 credit points of preparatory subjects in order to enrol in this subject.

Students enrolled in 6045 Diploma in Construction Technology/ Bachelor of Construction Technology or 6031 Dip Building Design Management/B Building Design Management must have passed or be enrolled in the preparatory units in their course in order to enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and reflect upon the roles and responsibilities of construction professionals.
2. Deploy information literacy skills to investigate a construction problem, consider alternate approaches and evaluate possible solutions.
3. Recommend and argue for feasible, innovative and sustainable solutions to problems.
4. Deploy academic and business literacy skills including report writing, argument construction and referencing.
5. Communicate research outcomes clearly and professionally in visual and verbal presentations.
6. Plan, manage and actively contribute to a team based project.

Subject Content

1. Communication skills: written, visual and verbal presentations.
 2. Roles and responsibilities of construction professionals.
 3. Academic and business literacy skills.
 4. Problem-solving.
 5. Critical thinking.
 6. Information literacy and the research process.
 7. Time and project management.
 8. Industry case studies.
 9. Sustainable and innovative approaches.
1. Communication skills: written, visual and verbal presentations.

ENGR 1038 Design Graphics: Presenting Innovation

Credit Points 10

Legacy Code 301283

Coordinator Karen Yevenes ([https://directory.westernsydney.edu.au/search/name/Karen Yevenes/](https://directory.westernsydney.edu.au/search/name/Karen%20Yevenes/))

Description Design visualisation in the form of 2D and 3D graphics is fundamental to the overall design process. This unit provides students with essential knowledge of design principles as used in visual communication. Students will employ graphic techniques to effectively convey a design proposal using creativity, technical skill, and quality design principles in a manner that is consistent with industry expectations. Students will produce graphic work that is portfolio-ready and suitable to display to potential clients and employers.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects ENGR 1022 Industrial Graphics 1 Presentation
ENGR 1021 Graphics 1 2D 3D Industrial Design Communication

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Plan a design solution for a specific design brief using graphic visualisation techniques.
2. Design an object or building concept through the use of Computer-Aided Design (CAD).
3. Use a range of low fidelity and high fidelity representations (ranging from hand sketches to digital models).
4. Communicate a response to a design brief in the form of concept sketches and 2D/3D digital design drawings.

Subject Content

?Use of 2D and 3D graphics tools to represent a design concept
?Design communication to explain working properties and features of design concepts

?Integration of basic drawing skills for industrial design and architecture students; and skills to communicate design ideas

Assessment

ENGR 1039 Designing for Circular Economy

Credit Points 10

Legacy Code 301281

Coordinator Sasha Alexander ([https://directory.westernsydney.edu.au/search/name/Sasha Alexander/](https://directory.westernsydney.edu.au/search/name/Sasha%20Alexander/))

Description Traditional linear consumption patterns have placed considerable load on available natural resources. The lack of comprehensive mitigation strategies has motivated local and international efforts around the United Nations Sustainable Development Goals (UNSDGs 2030) to finding resolutions towards making the world more equitable, sustainable, liveable and with opportunities for new sustainable businesses. Students will choose an existing product and apply the principles of the UNSDGs and Circular Economy to create a proposal and prototype to improve upon its current design. Throughout this process the students will consider product usage, durability, bio-ingredients, the product lifecycle, community impact, and sustainability.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects ENGR 1004 Design Science (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply appropriate methods of approach in designing for circular economy.
2. Examine the inter-relationships between human actions and natural ecosystems with a particular focus on a restorative approach with emphasis on product or service design, material optimisation for remanufacturing, reuse, or recycling processes and effective product design methodology.
3. Identify UNSDGs challenges and provide suggestions on how individuals can make a constructive contribution through their own discipline fields through discourse and reflection.
4. Engage and facilitate discussions around the principles of Circular Economy and their inclusion in all future project briefs.
5. Present a conceptual proposal for a product or service improvement that contributes positively to a circular economy approach at a local community or city-wide level.

Subject Content

1. Introduction to the concept of Circular Economy and power of Circular Design in responding to environmental challenges and meaningful professional practice with impact.
2. Moving from linear to circular economy and understanding your professional role mindset change and related progressive community actions.
3. Introduction to a selection of materials and processes used in the manufacture of consumer products and their related environmental impacts on consumer health and wellbeing.
4. The significance of recycled material utilisation through remanufacture toward new economic and environmental gains.
5. Introduction to the United Nations Sustainable Development Goals (UNSDGs) and relationship to professional practice.
6. Introduction to understanding biodiversity and ecosystems and positive effects of circular thinking through case studies and observing UNSDG progress and ethical decision-making in new product development.
7. Applying Circular Economy principles in conceptually redesigning a product or service in cooperation with an extended product life or material lifecycle strategy.

Special Requirements

Legislative pre-requisites

The WHS module must be completed successfully by all students as a requirement for accessing workshops and undertaking practical exercises.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Case Study	Design Brief (1000 words)	20	N	Group

Report	Report (1000 words), Visualisation (2x graphics)	30	N	Individual
Portfolio	Report (800 words), 3-Dimensional Model, Reflection(500 words)	50	N	Individual

ENGR 1040 Designing for People: Applied Ergonomics

Credit Points 10

Legacy Code 301286

Coordinator Jean Payette ([https://directory.westernsydney.edu.au/search/name/Jean Payette/](https://directory.westernsydney.edu.au/search/name/Jean%20Payette/))

Description Ergonomics is the study of the interaction between people, their environments, and their objects. A sound understanding of the principles of ergonomics allows a designer to develop products, systems and environments with optimum product usability and end user safety. In this unit, students are introduced to modelling workshop procedures and undertake their own ergonomic study. Students then build and test a hand-held scale product, and integrate user feedback into their redesign.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply ergonomics theory and methods to conduct, document and interpret ergonomics research.
2. Analyse the ergonomics of an existing hand-held consumer product.
3. Redesign a hand-held consumer product with reference to ergonomics theory and practical research.
4. Generate basic plan drawings for 1:1 scale Usability Model.
5. Apply modelling techniques to produce a 1:1 scale model to demonstrate product functions and to test product usability.
6. Locate and comply with relevant Australian product safety standards.

Subject Content

-Ergonomics principles and guidelines

-Usability testing
 -Anthropometrics measurements
 -Safety issues in the workshop ? induction
 -Visual systems
 -Ergonomics of lighting
 -Visual and Auditory display
 -Information / Control display
 -Inclusive Design
 -Research methods

Assessment

ENGR 1041 Designing for User Experience (UX)

Credit Points 10

Legacy Code 301284

Coordinator Mauricio Novoa ([https://directory.westernsydney.edu.au/search/name/Mauricio Novoa/](https://directory.westernsydney.edu.au/search/name/Mauricio%20Novoa/))

Description Understanding product-oriented user requirements and mapping user experience journeys provide rich inputs for new product and service innovations. In this unit students will focus on user needs and the interactive elements which, when combined, create

successful user experiences through impactful user interfaces, and highly differentiated outcomes. Students will engage in an applied project in response to an interaction design challenge. As part of their project students will incorporate elements to evoke strong emotional, sensorial and functional connections which are essential in creating inclusive design, engaged usability, and high-quality human-centred experiences, for successful products and services.

ENGR 1042 Sustainable Materials and Smart Manufacturing

Credit Points 10

Legacy Code 301288

Coordinator James Berry ([https://directory.westernsydney.edu.au/search/name/James Berry/](https://directory.westernsydney.edu.au/search/name/James%20Berry/))

Description In this unit we explore the circular 'Cradle to Cradle' design philosophy through material choice and manufacturing systems. Introduced are conventional materials, smart materials, and manufacturing systems within an ecological assessment framework, equipping designers with the tools to select and assess materials and manufacturing processes appropriate to use. Students undertake a life cycle materials research project and a design for manufacture (DFM) project in the context of emergent Industry 4.0 principles.

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects ENGR 1032 Sustainable Design Materials Technology ENGR 1031 Sustainable Design 1 Materials Technology

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the stages involved, and associated environmental and social impacts of contemporary materials processing and manufacturing
2. Identify and describe how the properties of materials relate to contemporary manufacturing processes
3. Use knowledge of materials properties and manufacturing processes in selecting suitable materials to meet a simple (closed) design brief for a physical artefact and to justify the selection
4. Describe potential applications of new and emerging materials and processes in the circular economy and Industry 4.0 framework

Subject Content

1. Introduction to the product manufacturing processes of plastics, metals, wood products, glass, plastic composites and smart materials
2. Material finishes and coatings
3. Material selection and specification for product design
4. Material aesthetics and personalities
5. Sustainable material selection, specification and comparison
6. Life cycle analysis using material library tools
7. Design for manufacturing and assembly
8. Simulating plastic forming through making
9. Introduction to Industry 4.0 for manufactured material accreditation and tracking

Assessment

ENGR 1043 Co-Designing Change with Local Communities

Credit Points 10

Legacy Code 301282

Coordinator James Berry ([https://directory.westernsydney.edu.au/search/name/James Berry/](https://directory.westernsydney.edu.au/search/name/James%20Berry/))

Description Collaboration is the foundation for some of the most successful world achievements ranging from medical breakthroughs, to space travel, to smart phones, to drones. Effective collaboration in diverse teams promotes a dynamic environment for creativity and innovation with good prospects for developing novel solutions. In a real world collaborative, co-design partnership with an external university partner, students will create a design proposal and prototype, based on a project brief. Through this collaborative process, students will develop skills in research, conceptualisation, communication and reflective practice whilst prototyping and testing their ideas before presenting them to their client.

ENGR 1044 Drawing Skills for Design Thinking

Credit Points 10

Legacy Code 301285

Coordinator Karen Yevenes ([https://directory.westernsydney.edu.au/search/name/Karen Yevenes/](https://directory.westernsydney.edu.au/search/name/Karen%20Yevenes/))

Description Drawing skills can unlock and translate creative thoughts as actions, iterations, and guide collaborative dialogue in meeting common goals. In combination with Design Thinking essentials which include empathy, ideation, and experimentation, practiced drawing skills can accelerate decision-making for individuals or groups. This unit is focused on developing hand drawing skills as a tool for generating creative ideas and design solutions. Students will attain an understanding of spatial relationships between humans and objects, and natural and built environments. The emphasis is on using drawing as a method for conducting exploratory investigations, recording creative thinking processes through ideation and inspiring innovation. Students will gain confidence in communicating their creative ideas to a wide audience.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify a variety of representational techniques to communicate three dimensional forms.
2. Identify relationships between humans and the built environment by undertaking observational drawing activities.
3. Apply visual-thinking techniques as a technique for creative problem solving.
4. Create a portfolio of works that apply drawing principles and techniques to generate 2D compositions.
5. Reflect on your drawing technique and development through the use of a sketch book diary.

Subject Content

1. Drawing as a tool for creative thinking
2. Observational drawing
3. Drawing tools and their use
4. Types of drawings and drawing systems
5. Ideation techniques
6. Explanatory drawings
7. Perspective technique and pictorial representation
8. Perception, viewpoints, depth, light and shadow
9. Design principles in drawing: line, shape, tone texture
10. Diagrammatic drawings
11. The human form in context of designed spaces and objects
12. Composition for communication
13. Rendering processes

Legacy Code 301334

Coordinator Leigh Sheppard ([https://directory.westernsydney.edu.au/search/name/Leigh Sheppard/](https://directory.westernsydney.edu.au/search/name/Leigh%20Sheppard/))

Description This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. The aim of this unit is to introduce students to the conceptual, mathematical and practical aspects of the following topics in advanced engineering physics, viz: vectors, linear and circular motion, photons, electrons and atoms, Newtons laws of motion, work and kinetic energy, dynamics of rotational motion, fluid dynamics, thermodynamics, periodic motion and waves/acoustics. The content will be delivered via a combination of lectures, tutorials and hands-on practicals in order to develop the growth of theoretical and applied engineering physics knowledge. This will provide students with a solid foundation for their engineering studies.

Restrictions Students must be enrolled in the program : 7178 Diploma of Aerotropolis Industry 4.0 (Mechatronic Skills) or 7182 Undergraduate Certificate in Engineering

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe and identify the atomic structure, bonding, crystal structure and defects of materials.
2. Explain the various properties of materials (eg mechanical, thermal, electrical, optical, magnetic).
3. Identify and explain the mechanical failures, corrosion and degradation of materials and how to prevent them.
4. Select an appropriate material for a given application.
5. Apply sustainability principles in engineering practice.

Subject Content

1. Atomic structure and interatomic bonding
2. Crystalline structure and defects in solids
3. Various properties of materials (mechanical, thermal, electrical, magnetic and optical)
4. Metals, ceramics and glasses, polymers, composites and advanced materials
5. Diffusion and phase diagrams
6. Corrosion and degradation of materials
7. Materials selection
8. Materials and sustainability

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Real-world problem diagnosis and analysis (Part A)	450 words	15	N	Individual
Real-world problem diagnosis and analysis (Part B)	450 words	15	N	Individual
Lab analysis & report: Crystal structures	600 words	20	N	Individual
Lab analysis & report: Mechanical properties	600 words equivalent	20	N	Individual
Case study: Material selection and eco-audit	900 words	30	N	Individual

Coordinator Shubhekshya Basnet ([https://directory.westernsydney.edu.au/search/name/Shubhekshya Basnet/](https://directory.westernsydney.edu.au/search/name/Shubhekshya%20Basnet/))

Description This unit encourages students to explore the professional responsibilities and challenges faced by Engineers. Students are introduced to emerging issues and approaches in engineering profession, especially particular attention will be given to systems approach. Students engage in a term-long research and problem solving task that addresses technical, environmental and social sustainability imperatives and fosters fundamental research, communication skills. Special emphasis is placed on lifelong learning, academic literacy and professional skills including information literacy, project management, engineering drawing and teamwork which equip students for subsequent academic and professional contexts.

Restrictions Students must be enrolled in 7178 Diploma of Aerotropolis
Industry 4.0 (Mechatronic Skills) Or 7182 Undergraduate Certificate in
Engineering

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Solve an engineering problem using systems approach.
2. Identify and reflect upon the professional responsibilities of the Engineer.
3. Deploy information literacy skills to investigate a complex problem context, alternate approaches and possible solutions.
4. Deploy academic standard literacy skills including academic writing, argument construction and referencing.
5. Communicate research and solutions clearly and professionally in visual and verbal presentations and an illustrated report.
6. Plan, manage, actively contribute to and assess a team based project.
7. Identify and apply environmentally and socially sustainable design criteria to a complex problem.
8. Produce and read an engineering drawing representing simple structures, landscapes and electric circuit.

Subject Content

1. Sustainability
2. Complex systems
3. Innovation
4. Problem-solving
5. Professional responsibility
6. Information literacy and the research process
7. Critical thinking
8. Academic literacy
9. Teamwork
10. Time and project management
11. Professional communication skills: written, visual and verbal presentations
12. Systems approach
13. Engineering drawing

ENGR 1050 Sustainable Engineering Fundamentals

Credit Points 10

Legacy Code 301418

Coordinator Sathaa Arumugam Sathasivan ([https://directory.westernsydney.edu.au/search/name/Sathaa Arumugam Sathasivan/](https://directory.westernsydney.edu.au/search/name/Sathaa%20Arumugam%20Sathasivan/))

Description Engineers need to ensure that their practice is guided by sustainability principles. This unit will introduce students to sustainability and provide an understanding of the environmental and social impacts of human development. Students will be introduced to various national and international initiatives including the United Nations Sustainable Development Goals. Students will learn fundamental scientific concepts in chemistry and ecology, and conduct

and report on laboratory experiments relevant for emerging issues. Students will apply concepts such as material and energy flow, limiting nutrients, carrying capacity, climax, biodiversity, food chain and irreversibility in relation to how an ecosystem responds to changes in the environment to real world case studies.

School Eng, Design & Built Env

Discipline Engineering and Related Technologies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the need for sustainable development and key national and international initiatives.
2. Explain the concepts of ecology.
3. Apply the concepts of ecology to evaluate the effects of human activities on ecosystem.
4. Identify the concept of chemical equilibrium used to evaluate phenomena related to chemical reactions including acids and bases.
5. Apply concepts of oxidation and reduction to analyse electrochemical cells and corrosion.
6. Communicate concepts, experiments and results in a clear and ethical manner.
7. Work safely and collaboratively in groups on laboratory experiments and projects, contributing to reports.

Subject Content

1. Introduction to sustainability
2. Ecology and ecosystems
3. Effects of economic development on environment and society
4. Key international and national initiatives on sustainable development
5. Stoichiometry
6. Chemical equilibrium
7. Acids and bases
8. Electrochemistry
9. Chemical reaction kinetics

ENGR 2001 Automated Manufacturing

Credit Points 10

Legacy Code 300735

Coordinator Leo Zhang ([https://directory.westernsydney.edu.au/search/name/Leo Zhang/](https://directory.westernsydney.edu.au/search/name/Leo%20Zhang/))

Description Automated manufacturing is about increasing the capacity of productivity through a range of integrated technologies so that manufacturing operations can run simultaneously. Students will be introduced to the fundamentals of manufacturing operations, automation, and control technologies, including numerical control and industrial robotics. This subject aims to deepen the understanding of the material selection process and enables students to identify appropriate manufacturing processes in a product manufacturing design. Various manufacturing processes such as material removal, bulk deformation, sheet-metal forming, and non-traditional processes will be examined. Through problem-solving activities, students will enhance their manufacturing engineering skills in the computer-aided design (CAD) and computer-aided manufacturing (CAM) areas and acquire the skills to machine their CAD models on a computer numerical control (CNC) machine.

Level Undergraduate Level 2 subject

Pre-requisite(s) Students must have passed the two subjects MATH 1016 Mathematics for Engineers 1 and ENGR 1018 Fundamentals of Mechanics OR must have passed the two subjects MATH 1034 Mathematics for Engineers 1 (Advanced) and ENGR 1018 Fundamentals of Mechanics before they can enroll in this subject

Equivalent Subjects ENGR 3002 - Automated Manufacturing

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply knowledge of manufacturing processes and automation control technologies to solve problems and design components.
2. Use CAD software to create and modify components designs and CAM software to generate code files for manufacturing those components.
3. Use suitable problem-solving techniques for problems and contexts in manufacturing design.
4. Discuss the advantages of computer integrated manufacturing, flexible manufacturing processes and their applications in the manufacturing industries.
5. Apply mathematical techniques in a manufacturing engineering problem.
6. Conduct work safely and responsibly in the manufacturing lab.

Subject Content

Material properties and product attributes
 Engineering materials
 Solidification processes
 Particulate processing of metals and ceramics
 Metal forming and sheet metalworking
 Material removal processes
 Property enhancing and surface processing operations
 Joining and assembly processes
 Manufacturing systems
 Manufacturing support systems
 Manual and CNC machining processes and tools
 CAD/CAM technologies, applications and programming
 Cost estimation in manufacturing
 Flexible and fixed automation
 Applications of robotics in automated manufacturing
 Computer-integrated manufacturing & processing planning

Assessment

ENGR 2009 Engineering Management for Engineer Associates (WSTC AssocD)

Credit Points 10

Legacy Code 700109

Coordinator Bader Unnisa Mehdi ([https://directory.westernsydney.edu.au/search/name/Bader Unnisa Mehdi/](https://directory.westernsydney.edu.au/search/name/Bader%20Unnisa%20Mehdi/))

Description The unit will provide the knowledge and skills to enable students to support the achievement of organisational goals through applying knowledge of environment and internal culture. The unit evaluates planning processes and goal setting to achieve superior performance and compares alternative approaches to motivation of work team members. Students will consider types of managerial communications and their associated communications channels in achieving best professional practice.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Restrictions Students must be enrolled in 7022 Associate Degree in Engineering

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Manage, integrate and control project time, cost, quality and safety and health.
2. Prepare for project activity planning, time scheduling and project budget.
3. Allocate and balance resources, labour and cash flow within time and cost constraints.
4. Monitor and control the execution of a project.
5. Perform contract and job-site administration.

Subject Content

This unit provides the students with the engineering project management skills and knowledge. It will cover contemporary practices in project planning, costing, scheduling, resourcing, monitoring, controlling, contract administration and job-site administration. The detailed contents are described as following:

1. Introduction to project management (Kloppenborg, 2009)
2. Project selection and prioritization (Kloppenborg, 2009)
3. Organizational capability: structure, culture and roles (Kloppenborg, 2009)
4. Defining scope and constructing work breakdown structures (WBS) (Kloppenborg, 2009)
5. Scheduling projects 1: network technology (Kloppenborg, 2009)
6. Scheduling projects 2: Gantt Chart and MS Project (Kloppenborg, 2009)
7. Resourcing projects 1: Resource allocation (Kloppenborg, 2009)
8. Resourcing projects 2: Compress the project schedule (Kloppenborg, 2009)
9. Budgeting projects 1: cost planning and cost estimating (Kloppenborg, 2009)
10. Budgeting projects 2: cost budgeting and cost control (Kloppenborg, 2009)
11. Project supply chain management (Kloppenborg, 2009)
12. Determining project progress and results Project control (Kloppenborg, 2009)
13. Job-site administration (Gould and Joyce, 2009)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

Coordinator Abbas Ranjbar ([https://directory.westernsydney.edu.au/search/name/Abbas Ranjbar/](https://directory.westernsydney.edu.au/search/name/Abbas%20Ranjbar/))

Description In this unit, students will use project management tools, techniques and practices to plan and control a project that achieves stated requirements on time and within budget. Students will plan a project including the creation of a statement of work, a work breakdown structure and an appropriate set of supporting work packages.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) ENGR 2018 OR ENGR 2031

Restrictions Students must be enrolled at The College in 7022 Associate Degree in Engineering. Student must have completed at least 100 Credit Points in their Associate Degree in Engineering Program prior to enrolling in the 700110 Engineering Project (WSTC AssocD).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the theoretical knowledge gained during the subject to develop practical and innovative engineering solutions.
2. Apply the project management principles to an engineering project.
3. Recognise the importance of client/end-user consultation and satisfaction and good oral presentation and engineering report writing skills.
4. Familiarise themselves with ethical, social, economical and environmental responsibilities of an engineer.
5. Use time and cost management tools and knowledge to plan and control the engineering project.
6. Demonstrate the methods/practices of carrying out systematic engineering project management.

Subject Content

This unit is designed to provide engineering students with the opportunity to create and manage an engineering project with the integration and application of the knowledge and skills of engineering project management. The detailed contents are described as follows:

1. Project brief, assignment, tasks and assessment brief
2. Achieving the primary project objectives: Time, cost, quality and safety
3. Defining the project scope and Planning project activities/tasks
4. Application of project scheduling skills
5. Issues in scheduling and use of MS project
6. Application of financial management skills
7. Application of resources allocation skills
8. Application of project monitoring and control skills
9. Updating master schedule
10. Project quality management planning
11. Project risk management planning
12. Project safety, health and environment management planning
13. Post project reviews

Assessment

ENGR 2012 Graphics 3: 3D Engineering Specifications and Visualisation

Credit Points 10

Legacy Code 301079

Coordinator Jean Payette ([https://directory.westernsydney.edu.au/search/name/Jean Payette/](https://directory.westernsydney.edu.au/search/name/Jean%20Payette/))

Description From 2020, this unit will be replaced by 301290 - Design Graphics: Communication for Manufacture. This unit introduces formal graphical communication methods used by professionals engaged in the design, manufacture and management of manufactured items. Students will learn how to follow Australian Standards for engineering drawings, and to use Computer-Aided Design (CAD) software for accurately representing and modelling basic parts and assemblies. The documentation of design concepts in the form of three dimensional (3D) computer models provides data that can be applied in a wide variety of ways to facilitate the understanding and production of parts and assemblies. The objective of this unit is to introduce students to the industry standard software and hardware employed to generate these models, via a "hands on" approach to creating 3D data. Issues such as data transfer, rapid prototyping, computer numerical control (CNC) machining and visualisation will also be discussed.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) ENGR 1008 or PROC 1008

Equivalent Subjects ENGR 1007 - Engineering Geology and Concrete Materials ENGR 2017 - Pavement Materials and Design

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the properties and manufacture of pavement materials;
2. Design asphalt mix and concrete mix;
3. Evaluate and select the pavement materials for specific pavement construction;
4. Explain the pavement design system;
5. Apply the basic principles to the structural design and construction of flexible and rigid pavements;

6. Conduct pavement evaluation and describe the pavement maintenance practices.

Subject Content

1. Pavement materials and their selection
2. Granular materials: role and function, behaviour, production, properties, and tests for quality
3. Asphalt: mix types, materials selection, mix design, manufacture, and paving
4. Cement: composition, hydration, and properties
5. Concrete: materials selection, mix design, and steel reinforcement materials
6. Pavement design system
7. Design of flexible pavements
8. Design of rigid pavements
9. Pavement construction
10. Maintenance of pavement

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Self- Assessment	1 Hour	5	N	Individual
Practical	2 hours	20	N	Individual
Quiz	1 hour	40	N	Individual
Final Exam	2 hours	35	N	Individual

ENGR 2017 Pavement Materials and Design (WSTC AssocD)

Credit Points 10

Legacy Code 700239

Coordinator Abbas Ranjbar ([https://directory.westernsydney.edu.au/search/name/Abbas Ranjbar/](https://directory.westernsydney.edu.au/search/name/Abbas%20Ranjbar/))

Description This unit will provide students with the basic knowledge and concepts on pavement materials and design. It will cover the common materials used in pavement construction such as aggregates, cement, asphalt and concrete. It will also cover the pavement design system, pavement construction, design of flexible pavements, design of rigid pavements and pavement maintenance. Offerings of alternate units are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate unit.

ENGR 2018 Professional Practice for Engineer Associates (WSTC AssocD)

Credit Points 10

Legacy Code 700118

Coordinator Robert Paluzzano ([https://directory.westernsydney.edu.au/search/name/Robert Paluzzano/](https://directory.westernsydney.edu.au/search/name/Robert%20Paluzzano/))

Description This unit will provide the knowledge and skills to enable students to support the achievement of organisational goals through applying knowledge of environment and internal culture. The unit evaluates planning processes and goal setting to achieve superior performance and compares alternative approaches to motivation of work team members. Students will consider types of managerial communications and their associated communications channels in achieving best professional practice.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) ENGR 2009

Restrictions Students must be enrolled at Western Sydney University, The College in 7022 Associate Degree in Engineering.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Effectively build, motivate and manage project team.
2. Apply managerial communication skills and establish effective communication channels to achieve best professional practice.
3. Make effective oral, written and visual communications.
4. Describe and promote sustainable engineering.
5. Manage occupational health and safety.

Subject Content

This unit provides the engineering students in Australia with the tools and techniques that facilitate the application of the knowledge of engineering management in practical engineering work and study.

The detailed contents are described as following

1. The engineering method
2. Learning to be an engineer
3. Managing occupational health and safety
4. Understanding communication
5. Enabling skills for engineers
6. Information skills
7. Problem-solving tools
8. Sustainable engineering
9. Ethics in engineering
10. Managing engineering projects
11. Developing risk management plan, knowledge management plan and quality plan
12. Communicating information
13. Planning your career

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Essay	1,500-2,000 words	10	N	Individual
Report	2,000-3,000 words	20	N	Group
Quiz	30 minutes each	30	N	Individual
Final Exam	2 hours	40	N	Individual

ENGR 2022 Design Practice: Sustainable Manufacturing

Credit Points 10

Legacy Code 301308

Coordinator Jean Payette ([https://directory.westernsydney.edu.au/search/name/Jean Payette/](https://directory.westernsydney.edu.au/search/name/Jean%20Payette/))

Description Reflecting upon the life cycle of products and their components is important in understanding how decisions at the design level impact on people, resources, sustainable goals and how these contribute towards sustainability-oriented local and global value chains. This unit focuses on sustainable decision-making at the design level. It challenges and motivates students towards using sustainability principles to promote good Design for Disassembly (DfD) practices with linkages to material durability, and material reuse. Through a project-based approach, students will appraise manufacturing considerations for product design applying in succession Design for Manufacturing, Assembly and Disassembly (DfM, DfA, DfD) principles to their products and reflect on product lifecycle management best practice.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Assumed Knowledge

The ability to communicate a design proposal using 2D or 3D computer software with annotations, and application of Australian Standards AS 1100 is desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Conduct a product review and re-design based on principles on DfM, DfA and DfD focusing on durability in regard for fit-for-purpose, and circular economy principles
2. Improve sustainable outcomes by applying Design for Manufacturing, Assembly and Disassembly techniques and approaches
3. Employ design methods that enhance the ease of manufacturing component assemblies and ease of disassembly
4. Effect positive sustainable change in design, manufacture, and end-of-life-cycle use of components supporting a sustainable systems approach

Subject Content

1. Emergent local and global perspectives in Sustainable Manufacturing
2. Design for Assembly (DfA), Manufacturing (DfM), and Disassembly (DfD)
3. Design parts with: self-fastening features, handling & insertion, component symmetry, component minimisation, standardisation, modularity, and waste and part minimisation
4. Product Lifecycle Management (PLM) with emphasis on disposal and reuse of manufactured products material resource legacies

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Proposal	1,000 words	20	N	Group
Applied Project	500 words (10%) 6 X A2 size concept development (20%)	30	N	Individual
Applied Project	Engineering drawings (15 pages)	30	N	Individual
Poster	A1 research poster	20	N	Individual

ENGR 2023 Advanced Engineering Physics 2

Credit Points 10

Legacy Code 301351

Coordinator Leigh Sheppard ([https://directory.westernsydney.edu.au/search/name/Leigh Sheppard/](https://directory.westernsydney.edu.au/search/name/Leigh%20Sheppard/))

Description This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. The aim of the unit is to introduce students to topics such as electricity, magnetism, induction and semiconductivity, and to equip them with mathematical approaches for solving problems in these areas. Content in this unit will be delivered via the combination of lectures, tutorials and practicals in order to foster in students the growth of theoretical and applied physics knowledge. Students completing this unit will have a solid foundation upon which to base their continued engineering studies.

School Eng, Design & Built Env

Discipline Engineering and Related Technologies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) ENGR 1047

Co-requisite(s) MATH 1035

Learning Outcomes

1. Identify and explain the fundamental physical principles and laws relating to electricity, magnetism, physical optics, introductory quantum physics, and solid state physics.
2. Apply mathematical techniques to solve physics problems concerning electricity and magnetism, physical optics, and introductory quantum physics and solid state physics.
3. Execute experimental activities of a fundamental nature.
4. Competently report aims, method, analysis and findings on experimental activities.

Subject Content

1. Electricity and Magnetism: Coulomb's Law, Electric Fields, Gauss's Law, Electric Potential, Capacitance, Magnetic Fields, Magnetic Field's due to currents, Induction and Inductance,
2. Physical Optics: Electromagnetic Waves, Interference, Diffraction
3. Introductory Quantum Physics and Solid State Physics: Photons, Electrons and Atoms, Photos and Matter Waves, Conduction and Electricity in Solids.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical	1000 words (per report) 2 hours (practical exam)	20	N	Individual
Quiz	45 minutes (per Quiz)	30	N	Individual
Final Exam	2 hours	50	N	Individual

ENGR 2024 Design Graphics: Communication for Manufacture

Credit Points 10

Legacy Code 301290

Coordinator Jean Payette ([https://directory.westernsydney.edu.au/search/name/Jean Payette/](https://directory.westernsydney.edu.au/search/name/Jean%20Payette/))

Description Students will design manufacture ready product samples through the use of computer graphics including three-

dimensional (3D) surfacing and solids modelling methods used by professionals engaged in engineering and industrial design practice. Students will produce two-dimensional (2D) and three-dimensional (3D) documentation, which can be widely applied to facilitate the understanding and production of parts and assemblies.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) ENGR 2025

Equivalent Subjects ENGR 2014 Industrial Graphics 2 Transition

Assumed Knowledge

Prior knowledge of computer aided design modelling as well as working knowledge of Australian Standard AS1100 for engineering drawing would be desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Incorporate sustainability manufacturing to product development and manufacturing.
2. Use 3D surface and solid modelling to design parts.
3. Produce engineering drawings in compliance with Australian Standards (AS) 1100 Parts 101 (General Principals) and 201 (Mechanical Drawing).
4. Design products specific to a variety of manufacturing processes.

Subject Content

1. Surface modelling
2. Engineering Drawing to AS1100
3. Manufacturing parts ready for manufacturing
4. Materials and manufacturing processes

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Applied Project	Surface modelling project: 5 parts; Solid modelling project: 5 parts; Full set of engineering drawings (draft 20 pages)	20	N	Individual
Applied Project	Part assembly: 25 parts	40	N	Individual

Applied Project	Full set of engineering drawings (final 30 pages)	40	N	Individual

ENGR 2025 Design Graphics: Engineering Documentation

Credit Points 10

Legacy Code 301287

Coordinator Sasha Alexander ([https://directory.westernsydney.edu.au/search/name/Sasha Alexander/](https://directory.westernsydney.edu.au/search/name/Sasha%20Alexander/))

Description Current and future growth in the areas of product design, virtual reality, and high technology innovation industries require a foundation and working knowledge of 3D computer modelling. In this unit students will be introduced to 3D modelling software and the fundamental principles of current Australian Standards for engineering drawing and documentation. The skills gained will contribute to preparation for future complex projects in engineering, industrial design and creative industries that require prototyping, files for additive manufacturing (3D printing), and component designs that can perform at exact specifications and standards.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects ENGR 2011 - Graphics 2 Visual Simulation

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the principles of AS1100 to specify designed products and parts.

2. Use and interpret standard conventions used in engineering drawing.
3. Generate 2D part(s) and assembly engineering drawings using computer-aided design.
4. Communicate manufacturing requirements for designed parts and product assemblies using CAD software (engineering and reverse engineering).
5. Use 3D CAD modelling to design parts.
6. Design products specific to a variety of manufacturing processes.

Subject Content

Introduction to 3D modelling
 Introduction to engineering drawing AS1100
 Manufacturing processes
 Materials specifications

Assessment

ENGR 2026 Design Semantics: Exploring Product Form

Credit Points 10

Legacy Code 301289

Coordinator Karen Yevenes ([https://directory.westernsydney.edu.au/search/name/Karen Yevenes/](https://directory.westernsydney.edu.au/search/name/Karen%20Yevenes/))

Description Products can engage our senses to evoke an emotional response or mediate an experience. This is a powerful psychological tool for industrial designers to understand in terms of the design interface as it provides a strategic opportunity for innovation. In this unit students will create meaningful and active product relationships, and use product semantics as an agency for proposing design solutions in areas such as health and well-being, ageing populations, and sustainable design.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects ENGR 2006 - Design Studio 1 Themes and Variations ENGR 2008 - Design Studio 3 Design Process and Function

Assumed Knowledge

Students will be required to have basic workshop skills and/or model-making skills. A basic understanding of graphics software, for example Adobe Photoshop and Illustrator, is assumed.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the principles of product semantics as a strategy for creating innovative product solutions.
2. Develop a design brief to address a design problem.
3. Create 2D concepts and 3D prototype models to communicate a design proposal.
4. Validate the product design through testing and evaluation of the designed solution.
5. Apply professional practice and team collaboration in the context of a design project.

Subject Content

Product Semantics as a contemporary research area
 Investigation of key sub-topics and their impact on product form and features: Affordances and signifiers; Design Activism; Kansei Engineering; gender and product design; stereotype; behavioural

change; ergonomics and semantics; relationships with objects; people centred design

Psychology and design opportunity

The product interface and ease of use?

Manufactured details

Development of the Design Brief

Concept graphics to communicate a design solution

Exploratory model-making to investigate product language

Assessment

ENGR 2028 New Product Innovation with IoT Data

Credit Points 10

Legacy Code 301305

Coordinator Sasha Alexander ([https://directory.westernsydney.edu.au/search/name/Sasha Alexander/](https://directory.westernsydney.edu.au/search/name/Sasha%20Alexander/))

Description Design Thinking has had a considerable effect on the ways firms innovate, design and evaluate products and services for use. The evolution of smart products and services in recent years offers both challenges and rewards for organisations as the big data generated provides insights to current product and service utilisation. Interpretation and integration of these new knowledge streams can support future product development, by enhanced understanding of human behaviour and features of sensor technologies. Students will produce an IoT influenced project design brief that provides the directional basis for the deployment of both human and technological resources in preparation for their career progression as a future innovation manager in a global, online marketplace.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects ENGR 2003 - Design Management 1 Product Design Audit

ENGR 2002 - Design Management 1 Process and Manufacturing

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply design thinking methods to a context based challenge;
2. Evaluate a product or service from an Internet of Things requirements perspective;
3. Create a narrative by mapping essential considerations for either product or service use;
4. Develop a design innovation strategy incorporating compelling contextual factors framed in a design brief with actionable items that consider necessary resources to progress to a prototype planning stage.

Subject Content

- introduction to The internet of things (IoT) features as A strategic planning approach to new Product development (NPD) or redesign.
- planning Product to market resource utilisation Employing design thinking methods and IoT feature integration
- Leveraging innovation methodologies supporting Entrepreneurship through user-centred approaches
- Scaffolded design brief planning reflecting upon collaborative transdisciplinary practices
- enhancing Product and service development from An end-Consumer-centred Product innovation perspective

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Report and Annotated Bibliography: Identify and analyse contextual scenario in IoT Context Report with annotated bibliography	1,000 words (report, 20% with annotated bibliography, 10%)	30	N	Individual
Critical Review: IoT Resource Identification critical review with Mapping visualisation	1,000 words (critical review 20%) And Mapping visualisation ⁽¹⁾	30	N	Individual
IoT Innovation Report with Design Brief & proposal	750 words (design brief 15%) and 1250 words (proposal report 25%)	40	N	Individual

ENGR 2029 Simulation in Virtual and Augmented Realities

Credit Points 10

Legacy Code 301306

Coordinator James Berry ([https://directory.westernsydney.edu.au/search/name/James Berry/](https://directory.westernsydney.edu.au/search/name/James%20Berry/))

Description Simulation in three-dimensional (3D) environments provide valuable insights to human-centred perspectives. Whilst investigating the fundamentals of Virtual Reality (VR) and Augmented Reality (AR), students will analyse aspects of functionality, user interfaces, spatial relationships in built environments, sustainability, efficient resource management, instructional support for safety and training, and accelerated design conceptualisation in detailed new product, service or environmental innovation. Students' experiences will equip them for future employment as VR and AR experience designers, interactive experience producers, or creative technologists.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Assumed Knowledge

Possession of 2D or 3D modelling skills is desirable but not essential.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify opportunities to accelerate new product of service development with VR and AR technology strategies
2. Design a 3D model within a virtual reality environment that engages a VR audience
3. Apply VR or AR process steps in developing a new product model for use in a 3D environment
4. Simulate a design for an interactive VR or AR proposal
5. Present a design for an interactive VR or AR proposal that engages an audience in a collaborative discussion around the sustainable simulation benefits of a VR or AR approach

Subject Content

1. Introduction to interactive media namely Virtual Reality (VR) and Augmented Reality (AR)
2. Explore interactive computing and emergent VR and AR applications
3. Discover enabling capabilities for VR and AR
4. Experience VR and AR
5. Designing with VR and for AR
6. Present a design proposal for a 3D environment using interactive media

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
1. Case study	800 word visual report	30	N	Individual
2. Experience proposal	2:00 minute video	25	N	Individual
3. Final applied project and presentation	5 minute presentation of working prototype	45	N	Individual

Coordinator Abbas Ranjbar ([https://directory.westernsydney.edu.au/search/name/Abbas Ranjbar/](https://directory.westernsydney.edu.au/search/name/Abbas%20Ranjbar/))

Description Industry experience provides a significant opportunity for students to understand employer expectations in relation to working on projects and with others in a professional capacity. Students undertake six weeks full-time (37.5 hours per week) employment (or part time equivalent) to obtain relevant workplace experience in Engineering under the supervision of professional engineers in one or more companies. Students identify learning opportunities and goals with a focus on applying academic learning in practice, learning project management, work culture, professional attitude and self-awareness. Students develop critical reflective skills in reporting their progress.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Restrictions Students must be enrolled at The College in 7022 Associate Degree in Engineering. Students must have completed 60 credit points.

Assumed Knowledge

A broad background knowledge in the relevant engineering discipline (ie equivalent to that obtained after completing one and a half (1.5) years of the associate engineering program).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate planning and goal setting skills with a comprehensive plan for work experience.
2. Critically reflect on personal and professional skills required for the workplace context.
3. Report on your experience applying academic learning in the workplace and on your experience learning engineering, engineering processes, and work culture in the workplace context.
4. Provide evidence of working effectively and inclusively with others in multi-disciplinary teams.
5. Assess your work performance using self-assessment and assessment by others.

Subject Content

225 hours of industrial training under the supervision of a professional engineer(s) or engineer associate(s).

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

ENGR 2031 Management Practices for Engineer Associates (WSTC AssocD)

Credit Points 10

Legacy Code 700307

Coordinator Bader Unnisa Mehdi ([https://directory.westernsydney.edu.au/search/name/Bader Unnisa Mehdi/](https://directory.westernsydney.edu.au/search/name/Bader%20Unnisa%20Mehdi/))

Description This unit will enable students to support the achievement of organisational goals. The unit's major focus is project management, culminating in a practical project which gives students the opportunity to work as part of a team to apply key project management skills and knowledge. It also introduces some of the management practices engineers need to understand and master in order to work effectively in the field. This includes effective communication, especially when working in a team, work health and safety, and an ability to plan, develop and build a career as an Engineer Associate.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects ENGR 2009 Engineering Management for Engineer Associates (WSTC AssocD)
ENGR 2018 Professional Practice for Engineer Associates (WSTC AssocD)

Restrictions Students must be enrolled at The College in 7022 Associate Degree in Engineering

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and use appropriate criteria to reflect on career development pathways in engineering.
2. Apply ethical and sustainable engineering principles.
3. Demonstrate an understanding of workplace health and safety.
4. Analyse and apply engineering project management principles, tools and procedures in an engineering project.
5. Communicate professionally and effectively as part of a team.

Subject Content

- Engineering career planning and development.
- Effective study and workplace communication skills.
- Sustainable engineering and ethics in engineering.
- Managing workplace health and safety.
- Fundamentals of project management.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	10 multiple choice questions per quiz	20	N	Individual
Reflection	300 words each	25	N	Individual
Professional Task	1,000 words	25	N	Individual
Presentation	500-750 words per student	30	N	Group

ENGR 2032 Sustainability Analysis and Design

Credit Points 10

Legacy Code 301419

Coordinator Sathaa Arumugam Sathasivan ([https://directory.westernsydney.edu.au/search/name/Sathaa Arumugam Sathasivan/](https://directory.westernsydney.edu.au/search/name/Sathaa%20Arumugam%20Sathasivan/))

Description In this unit, students will learn and appropriately apply technical and socio-economic approaches of achieving sustainability, such as life cycle assessment, environmental impact assessment, environmental auditing, circular economy, design for the environment and cleaner production to real world problems. The students will be taught about policy, financial and social approaches to achieving sustainability through real life problems/cases.

School Eng, Design & Built Env

Discipline Environmental Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Perform Systems Analysis including Environmental Auditing for simple systems or products.
2. Explain the implication of Circular Economy to Sustainable Development.
3. Perform Life Cycle Assessment for a given case.

4. Perform Environmental Impact Assessment for a given project.
5. Explain the term Cleaner Production or Industrial Ecology with examples of applications.
6. Modify a system or product design and perform option analysis considering multiple aspects such as environmental, social, cultural, political, economic, and regulatory factors.
7. Communicate solutions to specialist and non-specialist audiences.

Subject Content

1. Systems analysis and auditing
2. Circular economy
3. Environmental auditing
4. Technical approaches to sustainability such as life cycle assessment; environmental impact assessment
5. Non-technical approaches to sustainability such as tax, policy, marketing.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Report	3000 words	35	N	Individual

Legacy Code 300666

Coordinator Ali Hellany ([https://directory.westernsydney.edu.au/search/name/Ali Hellany/](https://directory.westernsydney.edu.au/search/name/Ali%20Hellany/))

Description This unit provides students with the opportunity to tackle challenging engineering problems. They will study advanced topics in selected areas under the supervision of academics. The advanced topics will prepare students for further study and research.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Restrictions Students must be enrolled in program 3666 Bachelor of Engineering (Advanced) or 3690 Bachelor of Engineering Advanced (Honours) and must have a program GPA equal to or greater than 5.5.

Students should have successfully completed 160 credit points to be able to study the advanced engineering topics in the subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an ability to apply the knowledge learned in the first 2 years of study to a specific area of interest;
2. Demonstrate an ability to tackle a challenging problem in a particular area with limited supervision;
3. Demonstrate an ability to communicate effectively;
4. Demonstrate technical competence in a particular area in engineering.

Subject Content

Lectures for introducing the requirements of this subject;
Self-motivated study in specific topics.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

ENGR 3003 Biomedical Electronics

Credit Points 10

Legacy Code 301122

Coordinator Gaetano Gargiulo ([https://directory.westernsydney.edu.au/search/name/Gaetano Gargiulo/](https://directory.westernsydney.edu.au/search/name/Gaetano%20Gargiulo/))

Description This unit will cover recent advances in biomedical electronics including electronic diagnostic devices, implanted devices, human-computer-interface, bioinstrumentation and neuromorphic engineering. Topics covered span from the bio-electromagnetism and related applications to regulatory aspects (IEC standards and TGA/FDA approval processes) and electrical safety of instrumentation. This unit will have a strong practical design focus with laboratories

and tutorials focused on the design of real instrumentation (including manufacturing) dealing with real biomedical signals.

School Eng, Design & Built Env

Discipline Biomedical Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) ELEC 2001 OR ENGR 2001

Assumed Knowledge

Basic electronic (amplifiers and filters); computer skills.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. identify and describe medical diagnostic devices and biomedical technologies;
2. assess safety and risks of biomedical technologies;
3. apply fundamental principle of bio-electromagnetism to typical biomedical engineering problems;
4. design and test biopotential amplifiers in practical case studies.

Subject Content

1. Introduction to Bioelectronics - The cell and the volume conductor
2. Amplifiers and filters for biomedical signals
3. Interfaces with the 'volume conductor'
4. Electrical safety
5. Biomedical technologies

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Practical	2 submissions required	30	N	Individual
Applied Project	2 submissions required	40	N	Individual
Practical Exam	2 hours	30	N	Individual

ENGR 3006 Control Systems

Credit Points 10

Legacy Code 300009

Coordinator Upul Gunawardana (<https://directory.westernsydney.edu.au/search/name/Upul Gunawardana/>)

Description This unit introduces the fundamental concepts of automatic control engineering. It covers traditional and contemporary design and analysis techniques; the concepts required to design continuous time and discrete time controllers. Matlab is utilized considerably.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) ELEC 2011 OR MECH 3004

Assumed Knowledge

200238 - Mathematics for Engineers 2

- Ordinary Differential Equations
- First order, Second order, and Higher order.
- Laplace transforms
- Multivariable Calculus
- Functions of two or more variables
- Double integrals
- Triple integrals.

Similar to that contained in 200238 - Mathematics for Engineers 2. Students should also have the appropriate background and competence in the safe use of computers, test equipment, components and data sheets.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the meaning of open and closed loop configurations to control systems.
2. Formulate and analyse models of real systems using physical characteristics.
3. Evaluate the performance of control system configurations in the time domain.
4. Analyse block diagrams and signal flow graph models.
5. Apply complex frequency concepts to the s-plane in the context of damping, damped frequency and stability.
6. Apply root locus methods for design of controllers.
7. Identify the issues associated with the use of digital controllers such as the computer.

Subject Content

Continuous and discrete time modelling
 Notion of negative feedback, error and error reduction
 Transfer functions, block diagrams, signal flow graphs, state variable methods
 Time domain responses and stability analysis
 Bode diagrams, root locus, Nyquist stability
 Introduction to digital control concepts

Assessment

ENGR 3013 Engineering Science Project 1

Credit Points 10

Legacy Code 300967

Coordinator Pan Hu ([https://directory.westernsydney.edu.au/search/name/Pan Hu/](https://directory.westernsydney.edu.au/search/name/Pan%20Hu/))

Description This unit describes engineering as a profession, including professional ethics, legal obligations and fundamentals and theories related to project management. The focus will be on development of research and presentation skills of students enrolled in this unit. It will be achieved through employment of appropriate research skills on a capstone project which demonstrates student's knowledge in identifying and planning an engineering project.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Restrictions Students must be enrolled in 3691 Bachelor of Engineering Science, 6033 Diploma in Engineering/Bachelor of Engineering Studies or 7117 Diploma in Engineering/Bachelor of Engineering Studies and must have successfully completed 160 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Annotate and review technical publications;
2. Develop verbal and written communication skills in engineering professionally;
3. Examine Engineering profession and the environment in which these professions operate;
4. Apply the process involved in contract and project management in engineering via a capstone project; and
5. Apply WHS requirements to an engineering project.

Subject Content

1. Research techniques and technical presentation
2. Technical and environmental risk management
3. Professional management principles and practices
4. Project initiation, tender process and tender analysis
5. Contract management, human resources management and value management

Assessment

Credit Points 10

Legacy Code 300968

Coordinator Pan Hu ([https://directory.westernsydney.edu.au/search/name/Pan Hu/](https://directory.westernsydney.edu.au/search/name/Pan%20Hu/))

Description In this unit, the focus will be on development of research and presentation skills of students, which will be achieved through employment of appropriate research skills on a capstone project. It will demonstrate student's knowledge by conducting an engineering project and completion of a technical report.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) ENGR 3013

Restrictions Students must be enrolled in 3691 Bachelor of Engineering Science, 6033 Diploma in Engineering/Bachelor of Engineering Studies or 7117 Diploma in Engineering/Bachelor of Engineering Studies and must have successfully completed 180 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. apply theoretical knowledge gained during the course to develop practical engineering solutions;
2. apply project management principles to an engineering project;
3. demonstrate a understanding of the importance of client/end-user consultation and satisfaction;
4. develop engineering communication skills related to oral presentation and engineering report writing; and
5. implement the ethical, social, economic and environmental responsibilities of an engineer in the context of an engineering project.

Subject Content

1. Development of integrated practical and innovative solutions to engineering problems.
2. Application of engineering project management skills.
3. Client/end-user consultation process and satisfaction assessment.
4. Development of good oral and written presentation skills appropriate for an engineer.
5. Evaluation of the social, economic and environmental impacts of an engineering project.
6. Application of risk analysis, time and financial management skills to an engineering project
7. Development of research skills.

Assessment

Coordinator Ee Loon Tan ([https://directory.westernsydney.edu.au/search/name/Ee Loon Tan/](https://directory.westernsydney.edu.au/search/name/Ee%20Loon%20Tan/))

Description Industry experience is a significant opportunity for students to understand employer expectations in relation to working on projects and with others in a professional capacity. Students undertake 12 weeks full-time (37.5 hours per week) employment (or equivalent) to obtain relevant workplace experience in Engineering under the supervision of professional engineers in one or more companies.

Students identify learning opportunities and goals with a focus on applying academic learning in practice, learning project management, work culture, professional attitude and self-awareness. Students develop critical reflective skills in reporting their progress.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band

Level Undergraduate Level 3 subject

Equivalent Subjects ENGR 3016 - Industrial Experience (Engineering)

Learning Outcomes

On successful completion of this subject, students should be able to:

- Demonstrate planning and goal setting skills with a comprehensive plan for work experience.
- Critically reflect on personal and professional skills required for the workplace context.
- Report on your experience applying academic learning in the workplace and on your experience learning engineering, engineering processes, and work culture in the workplace context.
- Provide evidence of working effectively and inclusively with others in multi-disciplinary teams.
- Assess your work performance using self-assessment and assessment by others.
- be able to relate academic course material to workplace conditions
- develop experience in various aspects of engineering and engineering management -planning, organizing and time management of engineering projects, understanding, and adapting to, the workplace culture
- develop appropriate workplace skills, work habits and professional attitudes by working with a professional engineer
- be able to report the work-log book recording and report writing
- be able to work in a team environment.

Subject Content

A 12 week period of industrial training under the supervision of a professional engineer(s)

A 12-week period of industrial training under the supervision of professional engineers.

ENGR 3020 Numerical Methods in Engineering

Credit Points 10

Legacy Code 300488

Coordinator Haiping Zhu ([https://directory.westernsydney.edu.au/search/name/Haiping Zhu/](https://directory.westernsydney.edu.au/search/name/Haiping%20Zhu/))

Description The finite element method is a powerful numerical tool for analysing a wide range of engineering problems. The objective of this unit is to introduce the basic and fundamental principles of the finite element techniques by primarily focusing on their applications in the area of structural, solid and soil mechanics.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MATH 1019 AND MECH 2003

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the basic principles of finite element theory to analyse the mechanical behaviours of beams, trusses, frames and 2D plane stress and plane strain problems;
2. Formulate finite element algebraic equations for elasticity;
3. Explain the workings and limitations of commercial finite element packages;
4. Apply finite element programs to solve practical engineering problems.

Subject Content

Constitutive stress-strain relationships in elasticity
 Strain-displacement relationship
 Potential energy in elastic body
 Principle of minimum potential energy
 Finite element method for bar, beam, frame and truss analysis
 Governing equations of elasticity
 Shape functions
 Plane analysis
 Two dimensional and axisymmetric finite element analysis
 Linear triangular element,
 Four noded quadrilateral element
 Higher order elements (six-noded triangle and 8-noded quadrilateral Element)
 Solver appreciations
 Constraints and pressure loadings
 Stress and strain results
 Sources of errors

Assessment

ENGR 3021 Professional Practice

Credit Points 10

Legacy Code 300053

Coordinator Peng Zhang ([https://directory.westernsydney.edu.au/search/name/Peng Zhang/](https://directory.westernsydney.edu.au/search/name/Peng%20Zhang/))

Description This unit focuses on ethical conduct for construction managers and on the range of procurement systems utilised in the modern construction industry. It deals with matters of professional responsibility to the community, as well as, honourable and lawful practices in the conduct of business. The issues of confidentiality of information and conflict of interest are examined in the context of real project histories. Risk management and its relationship with quality

project delivery are considered in the light of the changing nature of an industrialised, digitalised and globalised construction industry.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) ENGR 1029 OR
ENGR 1024 OR
ENGR 1036

Assumed Knowledge

Some experience with the range of employment opportunities that are available in the Australian construction industry.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify ethical behavioural requirements of a construction professional in relation to codes of conduct of relevant professional associations
2. Research and evaluate the options available in response to an ethical dilemma on a construction project
3. Describe the most common types of procurement options in use in the modern construction industry and compare their advantages and disadvantages
4. Prioritise risk management strategies on a construction project
5. Reflect on the future direction of the construction industry both in Australia and globally

Subject Content

Individual responsibilities under Professional Codes of Conduct
Characteristics of modern construction procurement systems
Innovation delivery in the construction industry context
Risk management and risk wrapping in project delivery
The future of an industrialised, digitalised and globalised construction industry

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

ENGR 3022 Special Technical Project

Credit Points 10

Legacy Code 301089

Coordinator Ali Hellany ([https://directory.westernsydney.edu.au/search/name/Ali Hellany/](https://directory.westernsydney.edu.au/search/name/Ali%20Hellany/))

Description This is an elective unit offered to students who are engaged in a School approved project. The unit can be taken during the third year of Engineering, Construction Management and Industrial Design courses. This unit consolidates and deepens a students knowledge and capabilities developed through previous years of study. Students will develop complex solutions by collaborating with various discipline specialists. This unit develops management, reflective and leadership skills including the ability to work with team members from other fields of study through practical application.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Restrictions Students need to seek approval from the subject Coordinator to enrol in this subject. Students must have completed 140 credit points or more prior to enrolment and must be enrolled in one of the following programs to enrol in this unit: 3689 Bachelor of Engineering; 3740 Bachelor of Engineering (Honours); 3690 Bachelor of Engineering Advanced (Honours); 3691 Bachelor of Engineering Science; 3727 Bachelor of Building Design Management; 2607 Bachelor of Construction Management; 3692 Bachelor of Construction Technology; 3729 Bachelor of Design and Technology; 3730 Bachelor of Industrial Design; 3731 Bachelor of Industrial Design (Honours).

Assumed Knowledge

Students are expected to have been involved in the project in their 2nd year of study on a voluntary basis.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Synthesise and apply specialist technical knowledge to develop practical and innovative engineering solutions
2. Collaborate within a multidisciplinary team to design and develop elements of an engineering project

3. Employ project management and organisational skills in documenting and producing deliverables on schedule
4. Reflect on their developing skills as a professional and discuss the impact their involvement in the project has had on their attainment of professional and technical competencies
5. Evaluate when new knowledge is required and demonstrate initiative in obtaining and applying this knowledge to improve project outcomes

Subject Content

Major Project Formulation, Planning and Execution

Development of integrated practical and innovative solutions to engineering problems

Development of document management processes and procedures

Application of project time and financial management skills

Development of research skills

Special Requirements

Legislative pre-requisites

WHS Module and Specialist Lab Induction.

Assessment

ENGR 3023 Biomechanics in Product Innovation

Credit Points 10

Legacy Code 301292

Coordinator Karen Yevenes ([https://directory.westernsydney.edu.au/search/name/Karen Yevenes/](https://directory.westernsydney.edu.au/search/name/Karen%20Yevenes/))

Description Designing optimal interactive environments for people requires an overview of human and contextual factors that impact on tasks and activities in the use of everyday products and services as well as specialised equipment. Students will complete a design

challenge to improve product usability with healthy and rewarding outcomes for users through an evidence-based approach. Design challenges are completed with the input of specialist health and science resources with students applying knowledge in the areas of human anatomy, physics and the biomechanics of motion providing insights for new product innovation.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects ENGR 3010 Design Studio 4 Innovation through Systems Thinking

Assumed Knowledge

The ability to generate design concepts that reference human scale and basic knowledge in prototype model fabrication is desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define and explain the principles of biomechanics
2. Describe and illustrate examples of biomechanical principles in action as they apply a product design
3. Apply biomechanical principles as they relate to the description and analysis of motion
4. Develop an experiment to capture human forces and kinematic concepts related to a selected product design
5. Develop conceptual product designs that take advantage of applied biomechanical knowledge
6. Engage an iterative design discovery process and present a final design solution that improves product usability and user quality of life

Subject Content

1. Principles of biomechanics
2. Biomechanical principles in action in product design
3. Description and analysis of motion
4. Experiment Design and Measurement of forces and kinematics related to product design
5. Conceptual product design with applied biomechanical knowledge
6. Iterative design discovery process concluding in a final design solution

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Observational Study	1,000 words with illustrations	20	N	Group

Research experiment and Conceptual Development	1,000 words (15%); 3 x A3 size annotated concept development (15%)	30	N	Individual
Report and Presentation	1,250 words (20%); Final proposal (20%) 7 minutes Presentation (10%)	50	N	Individual

ENGR 3024 Design Research Methods (Advanced)

Credit Points 10

Legacy Code 301291

Coordinator Karen Yevenes ([https://directory.westernsydney.edu.au/search/name/Karen Yevenes/](https://directory.westernsydney.edu.au/search/name/Karen%20Yevenes/))

Description Design and user research methods are critical in establishing efficient and effective processes around resource utilisation in designing, conducting and presenting research findings that are succinct yet open to new innovations. A range of advanced research design methods are presented and students are guided to the strategic selection of methods appropriate to their own self-sourced project theme. Data collection instruments are designed, operationalised, data coded and analysed via both qualitative and quantitative techniques and discussed in a vibrant peer environment inspired by design thinking and other research methods unique to the design profession and within university human ethics policy protocols.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects ENGR 3012 - Designed Inquiry ENGR 3005 - Contextual Inquiry

Restrictions Students must have completed 160 credit points before enrolling into this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop a research proposal based on a design literature review and analysis of contextual problems.

2. Visualise a research design using conceptual diagrams, and apply in managing a research project.
3. Carry out field research into user needs following approved ethics protocols and contextual considerations.
4. Synthesise outcomes emerging from qualitative and quantitative data into design guidelines and recommendations.
5. Develop and apply a methodological research design as part of an iterative design enquiry.
6. Reflect upon and evaluate self-directed research processes.

Subject Content

- Advanced Design Research
- Research topics and design opportunities
- Creating a research design/plan
- Designing an appropriate research methodology
- Literature Review and Annotated Bibliography in design research
- Designing a Research Question
- Advanced referencing, written and oral communication
- Unobtrusive research and documentation
- Research Through Design
- University Human Ethics Protocol in observing and engaging product or service user research
- Field Research
- Designing an appropriate data collection instrument
- Quantitative and qualitative data analysis, reporting and evaluation
- Making and presenting a Research Proposal that meets Ethics Approval requirements
- On-going reflection upon, assessment and management of self-directed research

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

ENGR 3025 Designing for Circular Economy (Advanced)

Credit Points 10

Legacy Code 301293

Coordinator Sasha Alexander ([https://directory.westernsydney.edu.au/search/name/Sasha Alexander/](https://directory.westernsydney.edu.au/search/name/Sasha%20Alexander/))

Description Societies today face up to considerable challenges around the sustainable use of human and physical resources. According to the United Nations Sustainable Development Goals 2030 (UNSDGs) there are certainly rewards for professions that carefully consider current, evolving and future systems with a view of providing an integrated response to the sustainable use of resources in local, city-based or regional built environments. This unit requires students to develop an evidence-based sustainable design proposal through the evaluation of value streams, circular economy impacts, and self-prioritised UNSDGs targets with a view to commercialise. Students will develop a Futures Strategy report on their design challenge informed by industry or community based observations.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects ENGR 2021 Sustainable Design Sustainable Futures

Restrictions Students must have completed 100 credit points

Assumed Knowledge

Sufficient practical knowledge and skills in sustainable design and/or materials related life cycle is desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply Circular Economy principles in response to a socio-technical-environmental challenge.
2. Develop an advanced proposal using Circular Economy principles that references select United Nations Sustainable Development Goals 2030.
3. Apply evidenced-based approach in responding to a development challenge within a specific area and in collaboration with a project industry partner.
4. Propose and present a Futures Strategy for collaborations and investment guided by one's own advanced Circular Economy solution

Subject Content

1. New product or service development guided by Circular Economy principles in cooperation with UNSDGs.
2. Value Stream Mapping from a community impact perspective
3. Developing an advanced sustainable design proposal responding to Circular Economy principles.
4. Futures strategy development timeline for a Circular Economy innovation proposal.

ENGR 3026 Design Thinking for Successful Brands and Products

Credit Points 10

Legacy Code 301301

Coordinator Sasha Alexander ([https://directory.westernsydney.edu.au/search/name/Sasha Alexander/](https://directory.westernsydney.edu.au/search/name/Sasha%20Alexander/))

Description Students will learn how to develop a strategic design management plan that helps a firm not only present itself to its target audience but also clearly differentiate amongst competitors. Foundation design principles involving the evaluation of two-dimensional and three-dimensional designs are explored through a series of case studies based on commercially successful design management strategies. To simulate global, real-world design consultation scenarios students interact in an online environment in preparation for evidence-based innovation in their future workplaces as design managers.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the concepts of design management to a business case study.
2. Evaluate the company's corporate identity aims and their potential impact on its design strategy.
3. Apply a series of methodological approaches in the analysis of pre-existing corporate identity using a staged audit process.
4. Systematically analyse the success of an existing corporate identity outcome by applying the principles of SWOT Analysis methodology.
5. Present and argue for the merits of a design strategy to enhance a company's corporate identity through product portfolio from design perspective.

Subject Content

1. Understanding the attributes of successful brands and products
2. Competitive advantage achieved through differentiated design management strategies
3. Evaluating two and three dimensional designed attributes that combine to communicate and achieve superior marketplace reception and performance
4. Conducting a product, service and brand identity audit
5. Design Thinking methods supporting decision making in new product development

Assessment

ENGR 3029 Specialisation Workshop 1

Credit Points 10

Legacy Code 301438

Coordinator Fidelis Mashiri ([https://directory.westernsydney.edu.au/search/name/Fidelis Mashiri/](https://directory.westernsydney.edu.au/search/name/Fidelis%20Mashiri/))

Description This unit is designed to enhance technical skills development in an engineering discipline. The unit enables students to perform the practical aspects that relate to product development, manufacturing, infrastructure development and service delivery. It also enables students to gain skills to plan, communicate, operate and manage workshops, laboratory settings and work sites while working in a team environment.

School Eng, Design & Built Env

Discipline Engineering and Related Technologies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design engineering solutions by applying engineering fundamental principles, methods and tools to real world problems
2. Apply project management and engineering procedures and processes for engineering solution development and delivery
3. Develop safe work procedures in workshops, laboratory settings and work sites and in discussion with peers and the facilities team

4. Develop collaboration skills in managing teamwork and team projects with respect for diversity and inclusiveness to achieve project outcomes
5. Communicate concepts, solutions and project outcomes clearly and ethically in a range of formats

Subject Content

Civil and Construction Engineering:

1. Engineering drawing and Computer Aided Drafting (CAD)
2. Civil and Construction Design
3. Civil and Construction Management

Electrical:

1. Industrial Electronics and Control
2. Power Electronics and Communications
3. Renewable Energy

Mechanical and Robotics and Mechatronics:

2. Fitting, Machining, and Fabrication
3. Hydraulics and pneumatics

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Short Answer	Approx. 1000 words or equivalent	20	N	Individual
Practical	Approx. 1000 words or equivalent (per submission)	40	N	Individual
Presentation	15 Minutes Group Presentation	15	N	Both (Individual & Group)
Report	Approx. 3000 words or equivalent	25	N	Both (Individual & Group)

Teaching Periods

ENGR 3030 Specialisation Workshop 2

Credit Points 10

Legacy Code 301439

Coordinator Fidelis Mashiri ([https://directory.westernsydney.edu.au/search/name/Fidelis Mashiri/](https://directory.westernsydney.edu.au/search/name/Fidelis%20Mashiri/))

Description This unit is designed to further enhance technical skills development in a team environment and in an engineering discipline through additional workshops that complement and strengthen those completed in previous unit Specialisation Workshop 1. The unit enables students to perform and manage the practical aspects that relate to product development, manufacturing, infrastructure development and service delivery. It also enables students to gain skills to plan, communicate, operate and manage workshops, laboratory settings and work sites while working in a team environment.

School Eng, Design & Built Env

Discipline Engineering and Related Technologies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) ENGR 3029

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design engineering solutions by applying engineering fundamental principles, methods and tools to real world problems
2. Apply project management and engineering procedures and processes for engineering solution development and delivery
3. Implement safe work procedures in workshops, laboratory settings and work sites and in discussion with peers and the facilities team
4. Demonstrate collaboration skills in managing teamwork and team projects with respect for diversity and inclusiveness to achieve project outcomes
5. Communicate concepts, solutions and project outcomes clearly and ethically in a range of formats

Subject Content

Civil and Construction Engineering:

1. Civil and Construction Plant Operations
2. Infrastructure Construction and Maintenance (Roads, Bridges, Pipes, etc.)
3. Supply Industry Operations

Electrical and Robotics & Mechatronics:

1. Electrical Systems Engineering
2. Switchgear and Control gear
3. Outdoor Power Equipment Technology

Mechanical and Robotics and Mechatronics:

1. Electrical machinery, mechanical principles and mechanical equipment
2. Refrigeration and Air-conditioning
3. Automotive Technology

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Short Answer	Approx. 1000 words or equivalent	20	N	Individual
Practical	Approx. 1000 words or equivalent (per submission)	40	N	Individual
Presentation	15 minutes, Group Presentation	15% (5 I), 10 (G))	N	Both (Individual & Group)
Report	Approx. 3000 words or equivalent	25% (5 I), 20 (G))	N	Both (Individual & Group)

Teaching Periods

ENGR 4001 Advanced Engineering Topic 2

Credit Points 10

Legacy Code 300667

Coordinator Ali Hellany ([https://directory.westernsydney.edu.au/search/name/Ali Hellany/](https://directory.westernsydney.edu.au/search/name/Ali%20Hellany/))

Description This unit provides students with the opportunity to tackle engineering problems that are more challenging than those in Advanced Engineering Topic 1. They will study advanced topics in selected areas under the supervision of academics. The advanced topics will prepare students for further study and research.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) ENGR 3001

Restrictions Students must be enrolled in program 3666 Bachelor of Engineering (Advanced) or 3690 Bachelor of Engineering Advanced (Honours) and must have a program GPA equal to or greater than 5.5.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an ability to apply the knowledge learned in the first 3 years of study to a specific area of interest;
2. Demonstrate an ability to tackle complex, challenging problems in a particular area with limited supervision;
3. Demonstrate an ability to communicate effectively;
4. Demonstrate technical competence in a particular area in engineering.

Subject Content

Self-motivated study in specific topics

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Report	1,000 words	35	N	Individual
Report	3,000 words	65	N	Individual

Prescribed Texts

- No specific texts are required. Supervisors will recommend references based on the resources currently available from the library.

ENGR 4004 Design Studio 6: Ambience, Place and Behaviour

Credit Points 10

Legacy Code 301084

Coordinator James Berry ([https://directory.westernsydney.edu.au/search/name/James Berry/](https://directory.westernsydney.edu.au/search/name/James%20Berry/))

Description Designers responding to complex societal challenges require focus on people, places and systems thinking to make sense in guiding new investment in innovation. This unit builds industrial design expertise in four domains including human environments, responsible design, user-centred design, and technology development through applied design research, contextual inquiry methods, and articulation of innovation proposals through conceptual and validated physical modelling, and an interdisciplinary consultative viewpoint.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) ENGR 4003

Equivalent Subjects ENGR 3011 - Design Studio 4 Simulate to Innovate

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply design processes, knowledge and skills to develop a product to meet tangible and intangible user needs.
2. Apply the principles and values embedded in formal professional, legal and industry standards.
3. Provide evidence of iterative design evolution through design research, prototyping and ePortfolio of work.
4. Produce functional and efficient market ready products according to needs, manufacturing constraints, and interdisciplinary protocols.
5. Use lifecycle management principles (e.g. cradle to cradle, analysis of materials and processes, CES EduPack) in the design of products or systems.

6. Scaffold an industrial design capstone project by developing a design brief toward creating a new value proposition of social, economic, and environmental significance.

Subject Content

Design brief development of relevance to a local real-world context

Cultural probe study

Product Development meeting tangible and intangible user needs

Product and service life cycle management

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
User Experimentation Empathic, experiential, affective and meaningful value adding through iterative prototyping and visualization.	3 low fidelity prototypes, 4 concepts, Pecha Kucha, e-Portfolio, 1000 words report.	35	N	Both (Individual & Group)
User-Centered Design: Iterative process of strategy, analysis, specification, design, evaluation and product launch and e-Portfolio submission.	3 high fidelity prototypes, 4 concepts, Pecha Kucha, e-Portfolio, 2000 words report.	65	N	Individual

Prescribed Texts

Teaching Periods

Engineering Project

Credit Points 10

Legacy Code 300483

Coordinator Kejun Dong ([https://directory.westernsydney.edu.au/search/name/Kejun Dong/](https://directory.westernsydney.edu.au/search/name/Kejun%20Dong/))

Description This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). This subject includes a capstone project which demonstrates student's professional level of identifying,

planning, designing, executing, testing and documenting an engineering project or activity.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) ENGR 3021

Co-requisite(s) ENGR 3017

Equivalent Subjects LGYB 1037 - Civil and Environmental Engineering Project 2

Incompatible Subjects LGYA 6084 - Engineering Thesis ENGR 4023 - Advanced Engineering Thesis

Restrictions Successful completion of 240 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the theoretical knowledge gained during the course to develop practical and innovative engineering solutions.
2. Apply the project management principles to an engineering project.
3. Demonstrate the understanding on the importance of client/end-user consultation and satisfaction and develop engineering communication abilities on good oral presentation and engineering report writing skills.
4. Implement ethical, social, economical and environmental responsibilities of an engineer.
5. Recognise the importance of time and financial management in the context of an engineering project.
6. Understand methods for carrying-out systematic research.

Subject Content

- development of practical and Innovative solutions to Engineering problems.
- application of Engineering Project management skills.
- client/ end-user consultation process and satisfaction assessment and development of good oral and written presentation skills appropriate to An engineer.
- evaluation of social, economical and environmental impacts of An Engineering project.
- application of time and financial management skills.
- development of research skills.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Progress Report	Approx. 50 Pages Report	15	N	Group
Presentation	30 minutes	15	N	Group
Final Report	Approx. 100 Pages Report	70	N	Group

Teaching Periods

Engineering Project 1

Credit Points 10

Legacy Code 300971

Coordinator Kejun Dong ([https://directory.westernsydney.edu.au/search/name/Kejun Dong/](https://directory.westernsydney.edu.au/search/name/Kejun%20Dong/))

Description This unit describes engineering as a profession, including professional ethics and legal obligations highlighted. Fundamentals and theories related to contract and project management will form part of this unit. Throughout the semester, the focus will be on development of research and presentation skills of students enrolled in this unit. This will be achieved through employment of appropriate research skills on a capstone project which demonstrates student's professional level of identifying, planning, and designing engineering project and completion of a technical progress report. The capstone project will be continued in unit 300972 Engineering Project 2.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Co-requisite(s) ENGR 3017

Restrictions Students must be enrolled in the Bachelor of Engineering, Bachelor of Engineering (Honours) or Bachelor of Engineering Advanced (Honours) and have successfully completed 200 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique technical publications;
2. Present written professional/technical reports;
3. Examine Engineering profession and the environment in which these professions operate;
4. Apply the process involved in contract and project management in Engineering industry via capstone project;
5. Analyse risk situations in an engineering project and manage them by applying the theories of risk management;
6. Apply WHS requirements to an engineering project;
7. Demonstrate an ability to work in a team.

Subject Content

1. Research techniques and technical presentation
2. Technical and environmental risk management
3. Professional management principles and practices
4. Project initiation, tender process and tender analysis
5. Contract management, human resources management and value management

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Research Proposal	15-20 pages.	35	N	Group

Progress Report	30-40 pages.	65	Y	Group
-----------------	--------------	----	---	-------

Prescribed Texts

- Pinto, JK 2016, Project management : achieving competitive advantage, 4th edn, Boston : Pearson, 2016.

Teaching Periods

Engineering Project 2

Credit Points 10

Legacy Code 300972

Coordinator Kejun Dong ([https://directory.westernsydney.edu.au/search/name/Kejun Dong/](https://directory.westernsydney.edu.au/search/name/Kejun%20Dong/))

Description Throughout the semester, the focus will be on development of research and presentation skills of students enrolled in this unit. This will be achieved through employment of appropriate research skills on a capstone project which demonstrates student's professional level of executing, testing and documenting an engineering project and completion of a technical report. This unit is a continuation of 300971 Engineering Project 1.

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) ENGR 4006

Co-requisite(s) ENGR 3017

Restrictions Students must be enrolled in Bachelor of Engineering, Bachelor of Engineering (Honours) or Bachelor of Engineering Advanced (Honours) and must have successfully completed 200 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Apply the theoretical knowledge gained during the course to develop practical and innovative engineering solutions;
- Apply the project management principles to an engineering project;
- Demonstrate the understanding of the importance of client/end-user consultation and satisfaction and develop engineering communication abilities on good oral presentation and engineering report writing skills;
- Implement ethical, social, economic and environmental responsibilities of an engineer;
- Recognise the importance of time and financial management in the context of an engineering project;
- Apply systems engineering methods for carrying-out systematic research;
- Demonstrate an ability to work in a team.

Subject Content

- Development of integrated practical and innovative solutions to engineering problems.
- Application of engineering project management skills.

- Client/end-user consultation process and satisfaction assessment and development of good oral and written presentation skills appropriate to an engineer.
- Evaluation of social, economic and environmental impacts of an engineering project.
- Application of time and financial management skills and risk analysis as well.
- Development of research skills.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Progress Report Revision	30-40 pages.	15	N	Group
Oral Presentation	20 minutes each group, PowerPoint Slides, group work but marked individually	20	N	Group
Final Report	50-70 pages.	65	Y	Group

Student Contribution Band

Assumed Knowledge

Knowledge related to the successful completion of year 3 Industrial Design or equivalent (e.g. Design & Technology) is assumed. Students undertaking this subject should be able to complete tasks using word processing programs and should have an understanding of basic research methods and the use of library databases. There is an expectation that students have skills in academic writing, report-writing, research, referencing and citations standards. Students should have a sound understanding of project management and record-keeping, including the use of process diaries and minutes to ensure they are able to manage their projects effectively.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Assessment Task 1: Design Research Report	1 x A4 printed & bound document, (12-15 pages)	25	N	Group
Assessment Task 2: Design Brief & Time Management plan (Autumn)	1 x A4 printed & bound document, 5 pages	10	N	Individual
Assessment Task 3: Product Design Specification	1 x A4 printed & bound document (5-8 pages)	15	N	Individual
Assessment Task 4: Concept Communicative Part A: Process Diary (10%) PLUS 1 x A3 Graphic Process Concept Diary Autumn Board (10%) Part B: Graphic Panel (Design Problem)	1 x A3 Process Diary (10%) PLUS 1 x A3 Graphic Process Concept Diary Autumn Board (10%)	20	N	Individual
Assessment Task 5: Physical exploratory model	1:1 model	30	N	Individual

Teaching Periods

ENGR 4010 Major Project Completion

Credit Points 30

Legacy Code 300460

Coordinator Jean Payette ([https://directory.westernsydney.edu.au/search/name/Jean Payette/](https://directory.westernsydney.edu.au/search/name/Jean%20Payette/))

Description Major Project Completion is the project realisation component of the student's final year program. The unit offers the student the chance to consolidate the range of methodologies and processes developed and evaluated in Major Project Commencement, that contextualise the principles and practices that will lead to the realisation of their identified design solution. The final design outcome will form part of the final year graduate exhibition. The design solution which students will be developing and submitting for this unit responds to the design brief developed in Major Project Commencement.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 30cp

Level Undergraduate Level 4 subject

Pre-requisite(s) ENGR 4009

Restrictions Students must have completed Industrial Design/ Engineering Workshop Safety Training.

Assumed Knowledge

Knowledge related to the successful completion of Year 3 Industrial Design is assumed and successful completion of Major Project Commencement.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Plan, manage and report on an in-depth design investigation.
2. Craft an exhibition standard presentation model.
3. Produce detailed industry-standard technical specifications for the manufacture and assembly or production of their design solution.
4. Generate engaging, professional graphic communications that explain their design solutions to a wide audience.
5. Present and defend a logical argument for the novelty, sensitivity/appropriateness and feasibility of a design solution supported by scholarly and practical research and conceptual exploration and development to a wide audience.
6. Communicate how design decisions were arrived at with a detailed visual process diary and concept development models.
7. Prove the structural and/or mechanical integrity and manufacturability of any physical design solutions.

Subject Content

Core area studies which the subject supervisors will guide students through.

Staff/student meetings called on a needs basis to address final year management issues, e.g. exhibition.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Applied Project	A4 x 5 page written document	10	N	Individual
Applied Project	1 x A3 Process Diary (50 pages), 1 x A3 set of draft engineering drawings, 1 x exploratory physical model (scale 1:1)	30	N	Individual

Applied Project	1 x A3 Final set of engineering drawings to AS1100, 1 x 3D CAD model, 1 x presentation model (scale 1:1), 1 x Powerpoint audio visual presentation (5 slides), 1 x A3 Graphic communication	60	N	Individual
-----------------	---	----	---	------------

Teaching Periods

ENGR 4011 Sustainability and Risk Engineering

Credit Points 10

Legacy Code 300798

Coordinator Dharma Hagare ([https://directory.westernsydney.edu.au/search/name/Dharma Hagare/](https://directory.westernsydney.edu.au/search/name/Dharma%20Hagare/))

Description Analysis of sustainability with engineering perspectives is increasingly becoming important in the modern world. Also, often the risk analysis is required to be carried for true sustainable solutions. Engineers with in-depth understanding of different tools that can be used for both sustainability and risk analysis will have significant edge in their future career. The students will discuss and understand various engineering issues including renewable/alternative energy systems, energy/resource efficiency, sustainable/green buildings, sustainable transport and infrastructure, sustainable water management, environmental management systems, sustainability reporting, life cycle analysis, probability/reliability theory, risk assessment models and, overall system analysis.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) CIVL 2002 AND CIVL 4017

Restrictions Successful completion of 200 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply engineering knowledge for sustainable analysis and sustainable design of engineering systems.
2. Choose appropriate tools/ methods for sustainability and risk analysis of engineering systems.
3. Conduct thorough energy/ water/ materials audit for a given engineering system.
4. Determine appropriate water, energy, transport and infrastructure system based on sustainability and risk management criteria.
5. Carry-out comprehensive life cycle analysis of engineering systems.

6. Conduct overall system analysis of engineering systems considering sustainability and risk criteria.

Subject Content

mass balance/ flow analysis
 heat/energy flow/conservation/loss analysis
 renewable/ alternative energy systems
 energy/resource efficiency
 sustainable/green buildings
 sustainable transport and infrastructure
 sustainable water management
 environmental management systems
 sustainability reporting/ framework
 life cycle analysis
 probability/ reliability theory
 risk assessment models
 integrated system analysis.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Participation	13 x submissions and 13 x quizzes; 1 hour per quiz	15	N	Individual
Report	5,000 words including tables, figures and pictures.	30	N	Group
Final Exam	3 hours	55	N	Individual

ENGR 4012 Industrial Design Major Project (Ideation)

Credit Points 10

Legacy Code 301297

Coordinator Jean Payette ([https://directory.westernsydney.edu.au/search/name/Jean Payette/](https://directory.westernsydney.edu.au/search/name/Jean%20Payette/))

Description In this capstone unit students will immerse themselves in a complex real-world design problem and apply their expertise in conceptualisation, problem solving, human factors and aesthetics to create a novel solution. User-centred design, digital futures and sustainable design practice underpin all learning activities. A multidisciplinary approach is fostered, whereby students will engage with industry experts and community groups reinforcing the role of the graduate designer as an empathetic innovator.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) ENGR 4020 OR ENGR 4004

Restrictions Must be enrolled in undergraduate program: Bachelor of Industrial Design (3730) and have completed a minimum of 220 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate research and design in relation to design project brief requirements
2. Produce advanced design research.
3. Generate a wide range of design concepts that respond to an advanced design project brief.
4. Present an evidence-based design solution that responds to user requirements, highlights differentiated innovation, and integrates sustainability principles.
5. Generate engaging, professional graphic communication and physical modelling that explains design research findings to a wide audience.

Subject Content

- Development of a design brief addressing a complex problem.
- Project management technique
- Applied and continuous iterative design process
- Utilisation of research methods to undertake background investigation of the design problem

- Design conceptualisation through annotated visuals such as graphic layouts, process diary, and working drawings.
- Application of inclusive design principles, sustainable design practice, human centred design, innovative design practice.
- Exploratory specification report on materials, manufacturing, technical package
- Engineering drawing documentation
- Model making of exploratory models and prototypes

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

ENGR 4014 Design Practice: Manufactured Product Lifecycle

Credit Points 10

Legacy Code 301310

Coordinator Sasha Alexander ([https://directory.westernsydney.edu.au/search/name/Sasha Alexander/](https://directory.westernsydney.edu.au/search/name/Sasha%20Alexander/))

Description Visualisation analytics for sustainable manufacturing practices provide an essential contribution to planning and adoption for new product development. The application of product lifecycle management (PLM) methods through software interfaces permits the establishment of a digital environment to create, manufacture and manage innovation on a comprehensive basis. Students will engage with an innovation project from a PLM perspective as an extended enterprise with focus on time to market, waste optimisation, prototyping efficiency, and value chain collaboration.

Coordinator Sasha Alexander ([https://directory.westernsydney.edu.au/search/name/Sasha Alexander/](https://directory.westernsydney.edu.au/search/name/Sasha%20Alexander/))

Description Mentorship is highly regarded in preparation for accelerated understanding of the competitiveness and excitement of professional practice. Specialised mentors provide insights and engage students in co-creative processes and guide the pursuit of design innovations that challenge markets and redefine career progression and employment opportunities. This unit permits students to develop their own idea from conceptual discovery to market strategy and launch

preparations with the view to build a new commercial pathway and personal resilience by creating a new value proposition of merit.

Level Undergraduate Level 4 subject

Assumed Knowledge

The ability to communicate a design proposal using 2D or 3D computer software with annotations, and application of Australian Standards AS 1100 or related construction standards are desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Engage with specialised mentors in a co-creative and meaningful way
2. Develop detailed strategies for new product development and market launch
3. Employ a collaborative and iterative design process approach for a new product under specialised mentorship
4. Consider and respond to the commercial realities associated with a self-initiated project
5. Present to a professional peer audience in a competitive pitch environment

Subject Content

1. Self-directed product design development for unique market release and commercialisation
2. Consultative and iterative co-creative design innovation process
3. New Product Development product discovery and development under specialised mentor guidance
4. Intellectual Property
5. New product development pitch to expert panel

Teaching Periods

ENGR 4016 Design Practice: Sustainable Components

Credit Points 10

Legacy Code 301309

Coordinator Chris Nash ([https://directory.westernsydney.edu.au/search/name/Chris Nash/](https://directory.westernsydney.edu.au/search/name/Chris%20Nash/))

Description New Product development in architecture and construction industries draws upon construction knowledge, applied materials specification, design for durable systems, component interfaces supporting assembly and robust design principles with aesthetic considerations, functional and desirable product attributes. This unit forms part of the Design Practice specialisation and builds upon the principles of sustainable manufacturing and product life cycle in response to an emergent construction theme. In this unit, entrepreneurship and product detailing assist decisions that drive future advancements in construction component design.

ENGR 4017 Design Thinking for Competitive Advantage

Credit Points 10

Legacy Code 301302

Coordinator Sasha Alexander ([https://directory.westernsydney.edu.au/search/name/Sasha Alexander/](https://directory.westernsydney.edu.au/search/name/Sasha%20Alexander/))

Description Design Thinking has become widely adopted as a novel problem solving mechanism and asset to market growth, resource utilisation, and competitiveness. This approach incorporates human-centric attributes and iterative processes which are features of professional designers co-creating with stakeholders. In this unit, students focus on empathic viewpoints associated with understanding people, markets and the environment. They explore future possibilities for communities using decision-making processes, informed by global challenges as represented through the UNSDGs. This new global societal driver for equitable living standards, economic prosperity, and sustainable societies is explored through online study involving a series of webinars, digital interactions, and conclude with a student prototype presentation.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate opportunities for competitive advantage using Design Thinking methodology and employing empathetic viewpoints and visualisation techniques.
2. Synthesise knowledge into a human-centred approach that engages with an aspect of the UNSDGs and produces a differentiated outcome
3. Convince a range of stakeholders in multi-disciplinary contexts of the use of Design Thinking for competitive opportunities and outcomes

Subject Content

1. Design Thinking overview and as a strategic competitiveness method
2. Design Thinking as an organisational influencer
3. Empathic viewpoints that accelerate new product development
4. Framing a UNSDG-oriented project brief for new product development
5. Strategic decision-making around UNSDG outcome implementation and commercialisation

Assessment

Legacy Code 301294

Coordinator Sasha Alexander ([https://directory.westernsydney.edu.au/search/name/Sasha Alexander/](https://directory.westernsydney.edu.au/search/name/Sasha%20Alexander/))

Description This unit engages students in a collaborative evidenced based project with local and international expert partners including NASA in the thematic area of Designing for Space Missions 2025 for astronaut health and space architecture for habitat design. Students are able to explore new concepts and integrate their skills within teams across unique research domains. The traditional linear thinking of creativity and innovation is challenged, giving way to a dynamic workspace for discussion, exploration, discovery, critical reflective practice, and maker-culture. This leads to new co-created interdisciplinary innovations which assist in the preparation of students for the Future of Work and decision-making across diverse teams. The focus on the physical and psychological aspects of space are also informing new viewpoints in designing with COVID19 in the Built Environment.

Restrictions Student are required to have completed 120 credit points in any WSU degree.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Evaluate literature in relevant area to reframe a complex project brief in teams.
- Propose a development plan based on a contextual evaluation and interdisciplinary approach to problem solving
- Use systematic and empathic design thinking processes to meet a design project brief from introductory to advanced conceptual proposals and from multi-disciplinary viewpoints to integrated proposals.
- Apply lifecycle management principles in the development of products, services, behaviours and systems for people
- Confidently present the team's iterative development processes for a product design using interdisciplinary perspectives.

Subject Content

- Interdisciplinary teams engaging in a Project Based Learning themed real-world challenge
- Reframing and advancing a project brief from interdisciplinary viewpoints using evidence-based research and collaborative team consensus approaches
- Interdisciplinary discovery to systems lifecycle management observing select United Nations Sustainable Development Goals (UNSDGs) toward refined user-centred needs, and verifiable attributes central to system performance
- Iterative conceptual and detailed development through prototyping as communication of intentions and proposal resolution
- Work Integrated Learning (WIL) oriented professional practice with university and international external industry expert visitations and constructive feedback on team developments

ENGR 4025 Final Year Project 1 (UG Engineering)

Credit Points 10

Legacy Code 301245

Coordinator Pan Hu (<https://directory.westernsydney.edu.au/search/name/Pan Hu/>)

Description This unit describes engineering as a profession, highlighting professional ethics and legal obligations. The focus will be on the development of design skills or research and presentation skills for students enrolled in this unit. This will be achieved through the use of appropriate design/research skills on a capstone project, which will be either design oriented or research oriented on a specialist topic. Under the direction of an academic supervisor and research mentor, the project will demonstrate the student's professional level of identifying, planning, and designing an engineering project while at the same time completing a technical progress report. The capstone project will be continued in the unit Final Year Project 2 (UG Engineering).

Description This unit continues the on-going work started in unit Final Year Project 1 (UG Engineering). Throughout the semester students will further develop their design, research and presentation skills. This will be achieved through employment of appropriate design/research skills to finish a capstone project, either design-oriented or research-oriented project, which demonstrates student's professional level of executing, testing, documenting an engineering project and completing a technical report.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) ENGR 4025

Equivalent Subjects ENGR 4032 Engineering Thesis 2

Restrictions Students must be enrolled in 3728 Bachelor of Engineering (Honours)/Bachelor of Business or 3740 Bachelor of Engineering (Honours) or 3690 Bachelor of Engineering Advanced (Honours) or 3771 Bachelor of Engineering Advanced (Honours) and they must have completed at least 220 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply project management principles that incorporate time and financial management to develop practical and innovative engineering solutions.
2. Apply effective written and verbal communication skills tailored to the appropriate audience (e.g. for client or end-user consultation, or academic and wider professional community).
3. Design and conduct experiments using relevant research methodology, identify data requirements, develop a research problem, research hypotheses and questions to achieve objectives.
4. Apply systems engineering methods for carrying-out systematic research.
5. Evaluate research outcomes to the particular field and to the realms of the Engineering and Construction professions.
6. Demonstrate the ability to work in a team environment when working in a design-oriented project or undertaking self-motivated research with minimal supervision.

Subject Content

1. Development of integrated practical and innovative solutions to engineering problems.
2. Application of engineering project management skills.
3. Client/ end-user consultation process and satisfaction assessment and development of good oral and written presentation skills appropriate to an engineer.
4. Evaluation of social, economic and environmental impacts of an engineering project.
5. Application of time and financial management skills and risk analysis as well.
6. Development of research skills.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Report	8 pages in research paper format	15	N	Individual
Presentation	20 minutes oral presentation during mid-semester break	20	N	Individual
Report	50-70 pages	65	Y	Individual

ENGR 4027 Industrial Design Applied Research Project (Honours)

Credit Points 20

Legacy Code 301299

Coordinator Sasha Alexander ([https://directory.westernsydney.edu.au/search/name/Sasha Alexander/](https://directory.westernsydney.edu.au/search/name/Sasha%20Alexander/))

Description The Industrial Design Honours Program provides candidates with an opportunity to undertake a significant design research project and research training component that explores design issues including products, services, systems and research methods. In this unit students combine scholarly inquiry, critical thinking, design thinking, applied design research methods and exploratory prototyping informed by state of the art research via literature review, and human-centred design methods with ethical considerations. Discussion of results of preliminary concept explorations of low to medium fidelity are further refined towards a reframed and detailed design brief, research project timeline, and evolved design research methodology in preparation for a high quality research proposal and a substantial creative work.

Assumed Knowledge

Knowledge related to the successful completion of year 3 Industrial Design or equivalent (e.g. Design & Technology) is assumed. Ability to use: E-mail, Internet Web Browser, WebCT or equivalent, Word processing program, CAD software, Workshop machinery (e.g. mill, lathe, sander, rapid prototyping machine). Knowledge and/or experience in: Referencing, Lab/Workshop O&HS, Report writing, Essay writing, Process Diary, Group work, Research Methods for Industrial Designers, Project Management, Ethical Research Approval Process.

Special Requirements

Legislative pre-requisites

Ethics clearance if required.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Part A: Research Design, Literature Review and Ethics Approval Part B: Design Brief	Part A: 2000 words Part B: 500 words	15	N	Individual
Design Communicatio	3 x A3 Colour printed Concept rendering	15	N	Individual
Documentation -Part A: Draft Engineering Drawings to AS1100 - Part B: Visual Process Diary	Part A: 10 to 15 pages engineering drawings Part B: 1 x A3 bound document, 50 pages	30	N	Individual
Project Progress Report	5000 words	15	N	Individual
Project Proposal Presentation/ Project Pitch	10 minutes	5	N	Individual
3D Model	Physical/ Tangible 3D Model accompanied by a 10 mins demo presentation	20	N	Individual

ENGR 4029 Industrial Design Project (Completion)

Credit Points 40

Legacy Code 300774

Coordinator Jean Payette ([https://directory.westernsydney.edu.au/search/name/Jean Payette/](https://directory.westernsydney.edu.au/search/name/Jean%20Payette/))

Description The Industrial Design Honours Program provides students with an opportunity to apply their industrial design skills to an in-depth year long design research project. In Industrial Design Major Project (Completion), Honours candidates respond to the research findings and design brief that they produced in Autumn semester. They undertake detailed design development to resolve and communicate a final design solution, which is publicly exhibited at the end of the year. Their design and research communications present a strong argument for the final design and demonstrate the honours candidates capacity to undertake postgraduate design research and to join professional design practice.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 40cp

Level Undergraduate Level 4 subject

Pre-requisite(s) ENGR 4028

Equivalent Subjects LGYB 1049 - Industrial Design Project (Completion)

Restrictions Students must be enrolled in Bachelor of Industrial Design or Bachelor of Industrial Design (Honours). Ethics clearance must be obtained if required.

Assumed Knowledge

Knowledge related to the successful completion of year 3 Industrial Design is assumed and successful completion of Industrial Design Project Commencement and Industrial Design Project Commencement's co-requisite subjects.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Plan, manage and report on an in-depth design investigation
2. Produce a scholarly exegesis which demonstrates a critical, comprehensive understanding of industrial design methods.
3. Craft an exhibition standard presentation model.
4. Produce detailed industry-standard technical specifications for the manufacture and assembly or production of their design solution.
5. Generate engaging, professional graphic communications that explain their design solutions to a wide audience.
6. Present and defend a logical argument for the novelty, sensitivity/appropriateness and feasibility of a design solution supported by scholarly and practical research and conceptual exploration and development to a wide audience
7. Communicate how design decisions were arrived at with a detailed visual process diary and concept development models.
8. Prove the structural and/or mechanical integrity and manufacturability of any physical design solutions.

Subject Content

Industrial Design Project (Completion) is the project realisation component of the students' final year of their studies.

The unit is composed of weekly lectures, tutorials, workshops and consultation sessions: core area studies which the subject supervisors will guide students through and staff/student meetings called on a needs basis to address final year management issues; eg. exhibition. Topics discussed in the sessions include:

Research Methodology
Qualitative Analysis
Quantitative Analysis
Thesis Writing
Low and Hi Fidelity Prototyping
Career and Graduate Options

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
High Resolution Working Model	Working Model	35	N	Individual

Visual Process Diary Completion	A4 Visual Process Diary	3	N	Individual
3D Modeling & Engineering Drawings	Drawings	20	N	Individual
Exegesis	6000-8000 words (5000 words submitted in 300773)	40	N	Individual
Checkpoint Presentations Development	1) Concept (10 minute presentation) 2) Concept Development (10 minute presentation)	2	N	Individual

Coordinator Sathaa Arumugam Sathasivan ([https://directory.westernsydney.edu.au/search/name/Sathaa Arumugam Sathasivan/](https://directory.westernsydney.edu.au/search/name/Sathaa%20Arumugam%20Sathasivan/))

Description Climate change is one of the most significant and urgent challenges facing the world today. In this unit, students will learn and appropriately apply scientific principles, in an engineering context, to reduce our impact on climate as well as in adopting to changing climate conditions. Students will explore both current and emerging technologies, that address climate change, in order to propose workable real world solutions.

School Eng, Design & Built Env

Discipline Engineering and Related Technologies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate designs for climate smartness.
2. Design geoengineering approaches and explain the working principles.
3. Design three climate proof systems/infrastructure and explain the working principles.
4. Develop a comprehensive plan to improve climate smartness of a chosen product, infrastructure or system and communicate to technical and non-technical audience.

Subject Content

1. Climate change and its relation to the technology
2. Geoengineering ? emission reduction, carbon sequestration, forest expansion, orbital mirrors, sunshades etc.
3. Design of climate proof systems ? transport, building, water supply systems, agriculture, water resources etc.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	30 minutes	15	N	Individual

Legacy Code 301484

Coordinator Pan Hu ([https://directory.westernsydney.edu.au/search/name/Pan Hu/](https://directory.westernsydney.edu.au/search/name/Pan%20Hu/))

Description Advanced Engineering Thesis 2 - Detailed Investigations unit consists of a research project designed and implemented under the direction of an academic supervisor and research mentor. This unit is the culmination of studies for students who have completed their first three years of an undergraduate degree and provides substantial training in detailed Investigations. Under staff supervision, students are allocated a particular topic for their research, design their own programme of research, and perform the research. The emphasis of this unit is on the application of research knowledge gained in other units and in Engineering Thesis 1 - Preliminary Investigations to the practical conduct of the individual research project. This unit provides final year Advanced engineering students with the opportunity to undertake research on a specialist topic within their Key Program of undergraduate study.

ENGR 7004 Bushfire Fighting

Credit Points 10

Legacy Code 200500

Coordinator Grahame Douglas ([https://directory.westernsydney.edu.au/search/name/Grahame Douglas/](https://directory.westernsydney.edu.au/search/name/Grahame%20Douglas/))

Description This unit describes the techniques, hardware and extinguishing agents used to fight and control bushfires and focuses on the logistics involved in ensuring safe, efficient and effective control. The content includes bushfire fighting strategies in the context of rural and interface environments, hazard reduction and brigade structure arrangements. The role of planning in supporting firefighting through water supply and access is also considered as are the findings from various Public Inquiries.

School Eng, Design & Built Env

Discipline Fire Technology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

This subject assumes that the student has undertaken undergraduate study in building surveying, planning or related areas or has gained the equivalent building construction knowledge by working in the construction industry in an appropriate capacity for at least four years.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the techniques, hardware and extinguishing agents used to fight and control bushfires;
2. Explain the varying logistics used in both the rural and urban interface during bushfires;
3. Evaluate the role of planning in supporting the firefighting effort during bushfires;
4. Evaluate the role of hazard reduction and its management for reducing fuels;
5. Implement firefighting strategies and incident control used to manage bushfire events.

Subject Content

Fire fighting techniques, hardware and extinguishing agents;
The rural and urban interface;
Planning and undertaking fire fighting operations;
Fire fighting strategies;
Hazard reduction management;
Hazard reduction;
Water supplies and access for developments;
Role of public inquiries

Assessment

ENGR 7005 Emergency Management for Bushfire Prone Areas

Credit Points 10

Legacy Code 200459

Coordinator Grahame Douglas ([https://directory.westernsydney.edu.au/search/name/Grahame Douglas/](https://directory.westernsydney.edu.au/search/name/Grahame%20Douglas/))

Description This unit describes the organisational and administrative arrangements for the management of emergency events in Australia, including the role of States and local government and the techniques available to develop risk management strategies in order to minimise loss of life and property arising from bushfire emergencies. The unit describes how the three tiers of Government interact during major emergency events, the role of community engagement in emergency management and the process of developing a risk management plan for bushfire emergencies. The unit also discusses the role of post-event survey and emergency and evacuation planning at the property scale.

School Eng, Design & Built Env

Discipline Fire Technology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Bushfire behaviour, planning, building and bushfire fighting subjects.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and describe the organisational and administrative arrangements applying to emergency events in their own jurisdiction
2. Describe the process of developing risk management strategies and their applicability to bushfire planning;
3. Discuss the techniques that can be used to develop risk management strategies, including community engagement, monitoring and review;
4. Predict the (qualitative) risk of an area arising from bushfire; and
5. Apply appropriate guidelines, standards and codes to the development of a bushfire emergency plan for a site.

Subject Content

Legislative requirements and organisational arrangements for emergencies

Integration of the fire services and other emergencies authorities
Prevention (mitigation), preparedness, response and recovery concepts

Bushfire risk management processes and strategies

Evacuation planning in bushfire emergencies

Community engagement in planning for bushfire emergencies

Post event surveys, research and their role in emergency planning

Recovery from emergencies.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Short Answer	1000 words	20	N	Individual
Essay	3000 words	35	N	Individual
Report	2000 words	25	N	Individual
Professional Task	Workshop tasks including 20 minute oral presentation	20	N	Individual

ENGR 7006 Fire Engineering 1 (Fire Dynamics)

Credit Points 10

Legacy Code 300709

Coordinator [Sameera Wijesiri Pathirana \(https://directory.westernsydney.edu.au/search/name/Sameera Wijesiri Pathirana/\)](https://directory.westernsydney.edu.au/search/name/Sameera%20Wijesiri%20Pathirana/)

Description This unit aims to develop a detailed knowledge of fire behaviour and dynamics in the built environment. Students will be able to understand fuels and combustion processes; the chemistry of combustion; flammability limits; ignition characteristics; and different types of flames and fire plumes. The content also covers the burning of liquids and solids; flammable vapour/air mixtures; extinction and extinguishment; flame spread mechanisms and modeling; flashover; fire resistance and fire severity; projection of flames from burning compartment openings; spread of fire from a compartment; production and measurement of smoke; and smoke movement.

School Eng, Design & Built Env

Discipline Fire Technology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYB 8308 - Fire Engineering 1 (Fire Dynamics)

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Physics, chemistry, engineering mathematics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the basic principles of the fire phenomenon including the nature of fire, heat transfer, burning of gases, liquids and solids, initiation and propagation and products of combustion
2. Identify fire hazards & causes of fires and health effects of toxic smoke
3. Determine fire loads, fire growth, ventilation factor
4. Explain flashover, fire severity and fire resistance of structural materials, suppression systems, smoke and heat control, detection, warning and how these parameters are used in the development of a fire safety engineering solution
5. Analyse a range of fire scenarios and apply fire science to interpret and develop fire safety engineering solutions

Subject Content

Fuels and the combustion process

Chemistry of combustion in fire

Flammability limits

Premixed flames

Diffusion flames

Flames from natural fires

Fire plumes

Burning of gases and vapours

Burning of liquids

Burning of solids

Smouldering combustion

Flaming combustion

Self-induced ignition

Piloted and non-piloted ignition

Propagation of smouldering and flaming combustion

Growth to flashover

Flashover

Post-flashover fires

Fire resistance

Spread of fire from a compartment

Production and measurement of heat, smoke and toxic gases

Methods for assessment of fire behaviour

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Numerical Problem Solving	Analytical, 2,000 word equivalent, individual	25	N	Individual
Numerical Problem Solving	Analytical, 2,000 word equivalent, individual	25	N	Individual

Legacy Code 300710

Coordinator Md Kamrul Hassan ([https://directory.westernsydney.edu.au/search/name/Md Kamrul Hassan/](https://directory.westernsydney.edu.au/search/name/Md+Kamrul+Hassan/))

Description This unit aims to develop an understanding of various types of computational tools used in engineering design of fire safety systems. The fundamentals of control volume, applications of conservation laws in modeling and the form of predictive equations are explained. The content includes evaluations of fire severity, fire resistance levels of various types of building structures and elements. Hand calculation equations, zone models and field models are covered. The limitations of the models in representing the real phenomena are also discussed.

Coordinator Sameera Wijesiri Pathirana ([https://directory.westernsydney.edu.au/search/name/Sameera Wijesiri Pathirana/](https://directory.westernsydney.edu.au/search/name/Sameera+Wijesiri+Pathirana/))

Description This unit helps to develop a high level of knowledge of fire safety systems relevant to life protection and the design and assessment of such systems. The unit covers the process of fire safety engineering design and assessment including the fire engineering brief, conceptual design, regulatory objectives, fire safety engineering subsystems, verification methods, timeline analysis, design fires, evaluation of performance of passive and active fire protection systems, risk analysis and fire engineering project reporting.

School Eng, Design & Built Env

Discipline Fire Technology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYB 5425 - Fire Safety Systems (Life Safety)

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Fire safety engineering principles, building regulations, fire dynamics, building fire services, fire modelling and human behaviour in fires.

Learning Outcomes

1. explain the fundamentals of building fire modelling
2. undertake a range of calculation methods and utilise computational tools to tackle different aspects of fire safety engineering problems;
3. apply computational methods and simple fire modelling tools to predict fire behaviour and smoke movement in buildings and solve fire safety engineering problems.
4. conduct literature reviews to appreciate the range of model application in fire safety engineering and to obtain data for model input and evaluation.

Subject Content

Correlations and dimensional analysis
 Fire plume calculations
 Fire severity and fire resistance
 Building structure and steel, concrete, timber and glazing elements behaviour
 Radiation models
 Detector and sprinkler activation models
 Zone model and its application
 Fundamentals of field models
 Literature review

Special Requirements

Essential equipment

Calculator, PC or laptop.

Credit Points 10

Legacy Code 301048

Coordinator Won Hee Kang ([https://directory.westernsydney.edu.au/search/name/Won Hee Kang/](https://directory.westernsydney.edu.au/search/name/Won+Hee+Kang/))

Description This unit aims to enhance students' knowledge of the fundamental principles of physics, including heat and mass transfer, fluid mechanism and thermodynamics, which govern the natural phenomena associated with fires. The unit also covers properties of materials, basic mathematics and numerical methods for students to become familiar with quantitative analysis of fire dynamics and structural response. In addition, students will learn probability and risk concepts in fire safety engineering. This is a bridging unit for students who are admitted to the Graduate Certificate and Graduate Diploma in Fire Safety Engineering without an engineering or physical science background. It lays the foundation for further studies in fire safety engineering courses.

Description The unit introduces students to the basic principles of fire behaviour and fire safety design so that they can appreciate fire safety systems and interpret fire safety engineering design concepts. The unit covers the basics of combustion, building fire characteristics, smoke movement, responses of fire safety devices, building fire resistance, response of building occupants, fire safety engineering design and assessment methodology. The unit provides the basis for understanding fire safety engineering and the techniques and tools used in fire safety engineering.

School Eng, Design & Built Env

Discipline Fire Technology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects ENGR 7011 - Fire Technology Principles ENGR 7009 - Fire Engineering Principles

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Undergraduate study in building surveying, planning or related areas or has gained the equivalent building construction knowledge by working

in the construction industry in an appropriate capacity for at least four years.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the basic principles of the fire phenomenon including the nature of fire, heat transfer, and initiation and propagation
2. Identify enclosure fire hazards and be able to determine fire loads, fire growth rates and flashover
3. Describe the principles used in fire engineering design and assessment
4. Describe the functions of various fire safety subsystems, such as suppression systems, smoke and heat control, detection, warning and egress provision, which are used in the development of a fire safety engineering solutions;
5. Interpret fire safety engineering reports.

Subject Content

The nature of fire and heat transfer processes

Fire initiation and propagation

Enclosure fires

Fire suppression

Smoke and heat control

Detection and warning

Introduction to International Fire Engineering Guidelines

The Fire Engineering Brief

Overview of fire engineering methodology

ENGR 7013 Industrial Experience (PG)

Credit Points 0

Legacy Code 301027

Coordinator Ee Loon Tan ([https://directory.westernsydney.edu.au/search/name/Ee Loon Tan/](https://directory.westernsydney.edu.au/search/name/Ee+Loon+Tan/))

Description Students will undertake 12 weeks full time (37.5 hours per week) employment (or part time equivalent) to obtain relevant workplace experience in Engineering companies under the supervision of professional engineers in one company or more. This will give the student a solid grounding in the Key Program of engineering which they have chosen to pursue.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply your engineering knowledge gained through academic studies in real world environment
2. Undertake experience in various aspects of engineering and engineering management
3. Improve appropriate workplace skills, including inter-personal skills, work habits and professional attitudes by working with one or more engineer(s)

Subject Content

- Obtain information on the processes of exploring opportunities and gaining Industrial Experience;
- Attend workshops on resume writing and interview skills run by the WSU Careers team;
- Conduct work experience for 12 weeks full-time or equivalent part-time (60 days) participation in a usually unpaid position at a relevant engineering company. (This experience can also be gained at more than one engineering company.)
- Follow relevant work practices and procedures;
- Perform appropriate workplace tasks as directed;
- Seek feedback on assigned tasks from appropriate person;
- document evidence of Activities carried as required.

Assessment

ENGR 7014 Master Project 1

Credit Points 10

Legacy Code 300597

Coordinator Pan Hu ([https://directory.westernsydney.edu.au/search/name/Pan Hu/](https://directory.westernsydney.edu.au/search/name/Pan+Hu/))

Description This unit is a problem based project unit. Students are expected to conduct self studies under supervision by academic staff. Students will identify research topics in consultation with supervisors, carry out literature survey in one of the fields of engineering, construction, information technology or data science. Students will be required to define research objectives and scope, establish research methodology and prepare a research plan.

School Eng, Design & Built Env

Discipline Engineering and Related Technologies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 5830 - Master of Engineering Specialist Reading LGYA 4574 - Built Environment Project LGYA 4576 - Built Environment Research Project

Restrictions

Students must be enrolled in a postgraduate program. Please note: Students enrolled in 3693 Master of Engineering must select the campus offering, not the online mode.

Assumed Knowledge

- (1) Knowledge in one of the fields in engineering, construction, information technology, data science or a related discipline;
- (2) Knowledge in research methodology; and
- (3) Skills in literature review.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse literature in relevant area to identify potential research problems.
2. Identify and propose research questions and hypothesis based on literature review.
3. Justify the research proposal in relation to its significance in literature and its anticipated impact.
4. Develop a plan and methodology to conduct research on an identified question/issue/problem.
5. Present ideas, concepts, arguments/prototypes and conclusions in a professional report.

Subject Content

Questioning. Develop a research question or hypothesis. The end result of the student's initial reading should be a well-defined research question. The research question will help the student to focus on the scope of their work.

Problem identification. Identify a problem in a relevant field, such as engineering, building surveying, design and construction management, at a general or fundamental, technical or regulatory or philosophical level that needs investigation. It is important that the student examine the assumptions that underlie the problem.

Literature review. Critically review and appraise current literature related to the student's study topic is an essential first step. Extensive reading and referencing the key papers and other sources is seen as a part of the problem solving process. The students must read widely and compare the opinions of the many authors in their paper.

Definition of objective. Define research objectives and scope.

Methodology. Prepare research methodology for the investigation of the research issue.

Planning. Prepare a research plan for carrying out the research.

Reporting. Produce a report and present preliminary findings.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Assumed Knowledge

(1) Knowledge in one of the fields in engineering, construction, information technology, data science or a related discipline; (2) Knowledge in research methodology; and (3) Skills in literature review and oral presentation.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Continuous review of existing literature in the relevant area and draw relevance to the proposed research project.
2. Execute a prepared research plan using appropriate methodologies.
3. Analyse and evaluate research findings to achieve intended project outcomes.
4. Write technical documents on ideas, concepts, arguments and conclusions professionally.
5. Communicate research results at a professional level through an oral presentation.

Subject Content

1. Implementation of research methodology. The methodology and research plan that have been established in Master Project 1 are implemented in this subject. Students may carry out experimental work or numerical simulations or theoretical analysis or field studies.
2. Literature review. Further review and appraise current literature related to the student's study topic.
3. Analysis and discussion. Conduct detailed quantitative and qualitative analyses of the data collected and discuss the results.
4. Reporting. Produce a complete dissertation and present the final findings clearly stating the student's own original contribution to the topic.

Assessment

ENGR 7016 Planning for Bushfire Prone Areas

Credit Points 10

Legacy Code 301049

Coordinator Grahame Douglas ([https://directory.westernsydney.edu.au/search/name/Grahame Douglas/](https://directory.westernsydney.edu.au/search/name/Grahame%20Douglas/))

Description This unit describes the relevant planning issues for bushfire prone areas and the measures that can be implemented to ensure appropriate development in these areas. A knowledge and understanding of the planning, design and construction of the urban form is important if we are to manage the risk of bushfire on the community. It is also fundamental in our understanding of the management of development for bushfires and the necessary infrastructure for bushfire suppression and property protection in bushfire prone areas. Topics include conceptual planning issues, determining bushfire prone areas, bushfire and planning legislation, strategic and regional planning for bushfire, subdivision, defensible space and construction, design, staging and siting, vulnerable developments, industry and other forms of commercial use, landscaping and maintenance, and water and access.

ENGR 7019 Specialised Software Applications

Credit Points 10

Legacy Code 301002

Coordinator Olivia Mirza ([https://directory.westernsydney.edu.au/search/name/Olivia Mirza/](https://directory.westernsydney.edu.au/search/name/Olivia%20Mirza/))

Description This unit offers several streams of practical applications in engineering and industrial design software. Students get to choose a software application stream depending on their key program. Lectures and assignments are delivered online and are enhanced by face to face contact with stream coordinators. Emphasis is placed on teaching students practical software applications skills relevant to industry needs.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects ELEC 7007 - Engineering Software Applications

Restrictions

Students must be enrolled in a postgraduate program. Please note: Students enrolled in 3693 Master of Engineering must select the campus offering, not the online mode.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise and apply the capabilities of software tools in a professional engineering context.
2. Input, model and analyse data and systems using industry standard engineering software.
3. Apply computer based modelling and analysis tools to investigate and professionally report on a specific, in-depth engineering problem.
4. Apply software-generated imagery to support reported analysis, findings or recommendations.

Subject Content

3D CAD

Excel

MATLAB Applications - Telecommunications

MATLAB Applications - Civil Engineering

Finite Element Analysis in Electromagnetism

Abaqus for Civil Engineering

Surface Hydrology Modelling

CFAST/FDS - Fire Safety Engineering

GIS - Bushfire Protection

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Numerical Problem Solving	2000 words	25	N	Individual
Quiz	1 hour	25	Y	Individual
Numerical Problem Solving	4000 words	50	N	Individual

ENGR 7020 Sustainability and Risk Engineering (PG)

Credit Points 10

Legacy Code 300939

Coordinator Dharma Hagare ([https://directory.westernsydney.edu.au/search/name/Dharma Hagare/](https://directory.westernsydney.edu.au/search/name/Dharma%20Hagare/))

Description Analysis of sustainability with engineering perspective is increasingly becoming important in the modern world. Also, in the future sustainability will include risk engineering. Hence, engineers with in-depth understanding of different tools that can be used for both sustainability and risk analysis will have significant competitive edge in their future career. The main objective of this unit is to introduce different tools available for sustainability and risk analysis in various engineering applications. The content includes renewable/alternative energy systems, energy/resource efficiency, sustainable/green buildings, sustainable transport and infrastructure, sustainable water management, environmental management systems, sustainability reporting, life cycle analysis, probability/reliability theory, risk assessment models, overall system analysis.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Assumed Knowledge

Engineering problem solving skills.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply engineering knowledge for comprehensive analysis of engineering systems for sustainability.
2. Choose appropriate tools/methods for sustainability and risk analysis of engineering systems.
3. Conduct thorough energy/water/materials audit for a given engineering system and construct detailed mass balance tables.
4. Determine appropriate water, energy, transport and infrastructure system based on sustainability and risk management criteria.
5. Carry - out triple bottom line based life cycle analysis of engineering systems including rigorous economic analysis tools.
6. Conduct overall system analysis of engineering systems considering sustainability and risk criteria.

Subject Content

mass balance/ flow analysis
 heat/energy flow/conservation/loss analysis
 renewable/ alternative energy systems
 energy/resource efficiency
 sustainable/green buildings
 sustainable transport and infrastructure
 sustainable water management
 environmental management systems
 sustainability reporting/ framework
 life cycle analysis
 probability/ reliability theory
 risk assessment models
 integrated system analysis.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Tutorial submissions and Quizzes	1 hour per quiz	20	N	Individual
Report	4,000 words including tables, figures and pictures	30	N	Group
Final Exam	3 hours	50	N	Individual

Prescribed Texts

ENGR 7023 Advanced Biomedical Data and Images

Credit Points 10

Legacy Code 301211

Coordinator Upul Gunawardana ([https://directory.westernsydney.edu.au/search/name/Upul Gunawardana/](https://directory.westernsydney.edu.au/search/name/Upul%20Gunawardana/))

Description This unit will cover advanced biomedical signal and data analysis including electrocardiography, electroencephalography, human-computer-interface, electromyography, machine learning and biomedical images. This unit will have a strong practical design focus with laboratories and tutorials focused on the design of usable software packages dealing with real biomedical signals.

School Eng, Design & Built Env

Discipline Biomedical Engineering

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Assumed Knowledge

Signals theory; computer skills including use of MATLAB.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Process biomedical signals.
2. Write user-interface to automatically/aid expert scoring signals.
3. Analyse and process biomedical images.
4. Develop complex signal manipulation strategies.

Subject Content

Introduction to Biomedical Signals
 Digital filters for Biomedical Signals
 Automated scoring of Biomedical Signals
 Biomedical images: production and processing
 Advanced techniques for data manipulations

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Professional Task	Three submissions required (see schedule of activities for due dates)	80	N	Individual
Presentation	15 minutes	20	N	Individual

Prescribed Texts

- Semmlow, JL 2004, Biosignal and biomedical image processing MATLAB-based applications, Marcel Dekker, New York.

ENGR 7024 Advanced Biomedical Electronics

Credit Points 10

Legacy Code 301209

Coordinator Gaetano Gargiulo ([https://directory.westernsydney.edu.au/search/name/Gaetano Gargiulo/](https://directory.westernsydney.edu.au/search/name/Gaetano%20Gargiulo/))

Description This unit will cover advanced design of biomedical electronic devices including, implanted devices, human-computer-interface, bioinstrumentation and neuromorphic engineering. Topics covered span from the bioelectromagnetism and related applications to regulatory aspects (IEC standards and TGA/FDA approval processes) and electrical safety of instrumentation. This unit will have a strong practical design focus with laboratories and tutorials focused on the design of real instrumentation (including manufacturing) dealing with real biomedical signals.

School Eng, Design & Built Env

Discipline Biomedical Engineering

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Assumed Knowledge

General principle of circuits analysis and simulation Electronic amplifiers Principle of Instrumentation and Measurements.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply medical diagnostic devices and biomedical technologies
2. Assess safety and risks of biomedical technologies
3. Apply fundamental principle of bio-electromagnetism to typical biomedical engineering problems
4. Design and test biopotential amplifiers in practical case studies
5. Design and test physiological sensors

Subject Content

Principle of biomedical electronic and bio-electromagnetism

Medical devices/diagnostics design principles

Electrical safety applied to the field of biomedical engineering

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Professional Task	Four submissions required, see the schedule of activities for due dates	80	N	Individual
Presentation	15 minutes	20	N	Individual

Prescribed Texts

- Webster, JG & Clark, JW (eds) 2010, Medical instrumentation : application and design, 4th edn, John Wiley & Sons, Hoboken, NJ.

ENGR 7025 Human Physiology and Biomedical Technologies

Credit Points 10

Legacy Code 301210

Coordinator Gaetano Gargiulo ([https://directory.westernsydney.edu.au/search/name/Gaetano Gargiulo/](https://directory.westernsydney.edu.au/search/name/Gaetano%20Gargiulo/))

Description This unit aims to introduce a wide range of biomedical technologies and how they are used in medical practice. Topics will span from data acquisition technologies such as ECG, EEG, body plethysmography, to large imaging diagnostics such as CT scanner, PET scanner and bio-mechanical assisting devices often used for rehabilitation and support. The first part of this unit will include a module on human physiology and bio-mechanics. This module

gives a basic understanding of the human body and introduces the scientific and medical terminology used for anatomy, physiology and biochemistry and bio-mechanics.

School Eng, Design & Built Env

Discipline Biomedical Engineering

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Assumed Knowledge

Computer skills; basic concepts of electronics i.e. amplifiers and filters; knowledge of signal theory

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply basic principles of human physiology to biomedical engineering.
2. Apply the process of development of medical devices from inception to commercialization.
3. Apply principles relating to the functioning of major biomedical technologies.

Subject Content

Biomedical technologies: Signals based devices i.e. ECG, EMG etc
Biomedical technologies: Imaging based devices i.e. MRI, X-rays etc
Principles of human physiology

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Professional Task	Submission 1 Part A: 20 questions; Submission 2 Part B: 3000 words	80	N	Individual
Presentation	15 minutes	20	N	Individual

Prescribed Texts

ENGR 7026 Performance Solutions for Bushfire Protection

Credit Points 10

Legacy Code 301265

Coordinator Grahame Douglas ([https://directory.westernsydney.edu.au/search/name/Grahame Douglas/](https://directory.westernsydney.edu.au/search/name/Grahame%20Douglas/))

Description This subject describes the processes and techniques available to develop performance outcomes to the planning and building of structures required for bushfire protection in Australia. Students learn advanced methods to address performance when considering bushfire protection measures for which the 'bushfire protection guidelines' are relevant as well as the processes similar to that used in developing performance solutions under the National Construction Code. These include the use of event tree analysis, verification methods, bushfire spray/drenching systems and alternative access for evacuation arrangements when developing performance solutions. Students are required to develop suitable measures through a performance solution for bushfire protection of a building.

School Eng, Design & Built Env

Discipline Fire Technology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) None

Co-requisite(s) None

Equivalent Subjects ENGR 7003 Alternate Solutions for Bushfire Prone Areas

Restrictions

Students must be enrolled in 3793 Graduate Diploma in Bushfire Protection or 3708 Master of Bushfire Protection and have completed 40 credit points of study.

Assumed Knowledge

Students must have prior knowledge of Bushfire behaviour, planning, building, bushfire fighting and emergency management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the principles of performance-based design as it applies to bushfire protection.
2. Apply the bushfire safety protection guideline process and techniques applicable to bushfire.
3. Apply the appropriate bushfire protection systems to the development of suitable bushfire design.
4. Apply appropriate alternate performance approaches to access for bushfire protection.
5. Apply the use of 'measures in combination' for developments in bushfire prone areas.
6. Examine the use and limitations of event tree analysis in bushfire protection design.

7. Communicate assessments and recommendations for performance-based solutions for bushfire protection.

Subject Content

1. Introduction to performance-based approaches and bushfire protection measures.
2. Bushfire design guidelines and its application to the bushfire event.
3. Bushfire verification method and event/fault tree analysis.
4. Bushfire spray systems and its impact on design bushfires.
5. Bushfire protection measures in combination.
6. Performance planning as a driver of bushfire protection.
7. Tools, techniques and data for bushfire protection analysis.
8. Alternate access arrangements for performance.
9. Landscaping and maintenance to address performance.
10. Reporting and implementation of performance solutions.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Two Short Answers	500 words (250 words for each question)	20	N	Individual
Essay	1000 words	20	N	Individual
Report	2000 words	25	N	Individual
Report	2500 words	35	Y	Individual

ENGR 7027 Spatial Tools and Mapping

Credit Points 10

Legacy Code 301264

Coordinator [Grahame Douglas \(https://directory.westernsydney.edu.au/search/name/Grahame Douglas/\)](https://directory.westernsydney.edu.au/search/name/Grahame%20Douglas/)

Description This unit offers practical applications in spatial information software. Students will be taught using Geographical Information Systems (GIS) software to prepare maps (such as bushfire prone land) as well as management plans required of planning and design practitioners. Workshops are provided to assist students in the practical use of the GIS system. Students are provided with online module notes and readings as well as assignments being submitted online. Emphasis is placed on teaching students practical software applications skills relevant to industry needs.

School Eng, Design & Built Env

Discipline Other Engineering And Related Technologies

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise and apply the capabilities of spatial software tools in a professional context.
2. Input, model and analyse data and systems using industry standard spatial software.
3. Apply spatial modelling and analysis tools to professionally represent environmental measures of a specific development proposal.
4. Apply software-generated imagery to support planning and construction reports, findings and recommendations.

Subject Content

1. Introduction to GIS
2. GIS Applications
3. Key Concepts
4. Introduction to emergency and environmental risk management planning
5. GIS and other software applications
6. GIS analysis tools
7. GIS mapping layouts
8. Bushfire Prone Land Mapping Guidelines
9. Bushfire Protection/Management Plans and other environmental management plans

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Short Answer	1,000 words	25	N	Individual

ENGR 7028 Engineering Project 1 (PG)

Credit Points 20

Legacy Code 301395

Coordinator Pan Hu ([https://directory.westernsydney.edu.au/search/name/Pan Hu/](https://directory.westernsydney.edu.au/search/name/Pan%20Hu/))

Description This unit introduces the professional engineering skills necessary to practice as an engineer, including project management, professional communication, professional ethics and legal obligations. Students are required to conduct a critical literature survey on a relevant area, identify the design or research problems, propose a plan and methodology for the design or research problems, conduct some preliminary work and analysis, present their work, and complete a project proposal and a project report.

School Eng, Design & Built Env

Discipline Engineering and Related Technologies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 20cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Knowledge in the relevant field of chosen major.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique previous research in terms of its relevance and contribution to the given topic.
2. Manage an engineering project from an environmental perspective, using appropriate contract, project, WHS and risk management processes.
3. Evaluate the major steps in the proposed research by developing the research problem, research hypotheses, research questions and a realistic timeline.
4. Construct experimental design, using appropriate research methodology, identifying data requirements and conducting relevant research to achieve objectives.
5. Apply effective written and verbal communication skills when preparing professional/technical reports.
6. Work collaboratively in a team setting on a design-oriented project or research-based project under minimal supervision.

Subject Content

Introduction to communication
Workplace communication
Technical writing
Introduction to project management
Ethics and professional code of conduct
Statistical methods
Peer-assessed oral presentation
Literature survey
Research proposal
Preliminary study

Legacy Code 301396

Coordinator Pan Hu ([https://directory.westernsydney.edu.au/search/name/Pan Hu/](https://directory.westernsydney.edu.au/search/name/Pan%20Hu/))

Description This unit is a continuation of unit Engineering Project 1 (PG). Students will further develop their professional skills in engineering design, research, and presentation. This will be achieved through the independent work on the proposed engineering design or research topic under an academic supervisor. Students are required to employ the identified design plan or research methodologies to carry out the proposed design or research work, fulfil the design or research objectives, evaluate and analyse the results, and present the results and findings in an oral presentation, a research paper and a final project report. This unit will demonstrate students' professional level of conducting an engineering project.

ENVL 1001 Understanding Landscape

Credit Points 10

Legacy Code 300812

Coordinator Suzanne Ermert ([https://directory.westernsydney.edu.au/search/name/Suzanne Ermert/](https://directory.westernsydney.edu.au/search/name/Suzanne%20Ermert/))

Description This unit explores the historical and cultural perceptions and perspectives of the term 'landscape' and the sustainability and management of landscapes. Students become familiar with the terminology and concepts surrounding the natural landscape experientially through a series of field trips and develop an awareness and appreciation of both of the conceptual and actual landscape issues. Skills in mapping and spatial awareness skills and technologies will be developed through field trips and workshop sessions including GIS. Such skills will assist in developing a capacity to comprehensively describe and analyse the landscape.

School Science

Discipline Environmental Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects LGYA 6199 - Understanding Landscape LGYB 9526 - Understanding Landscape

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Determine the relationship between humans and the natural environment and the impacts of the ecological health of that environment from human development.
2. Identify diverse concepts of landscape.
3. Recognise the range of values and meanings associated with the term 'landscape', including their own and those of their peers.
4. Explain the basis of selected landscape management issues. Evaluate the holistic nature of landscape systems and the links to landscape management issues.
5. Apply skills associated with maps, mapping, spatial investigation (GIS) and associated technologies, and landscape management techniques as a way to interpret the landscape.

Subject Content

1. Landscape concepts, issues and landscape conditions;
2. Effects of humankind on past, present and future landscapes;
3. Maps and mapping: Spatial analysis using GIS and mapping techniques in combination with spatial investigation technologies to characterise and assess landscapes for environmental assessment and the role of habitat;
4. Assessment of heritage landscapes, including aboriginal heritage;
5. Fire ecology in the Sydney Basin; including the influence of fire on various landscapes including urban and wilderness landscapes;
6. Spatial awareness;
7. Compass and map reading;
8. Spatial estimations and calculations using clinometers, measuring wheels;
9. Route construction through a nominated landscape using mapping techniques;
10. Basic plant identification using taxonomic key;
11. Humankind's historical and cultural involvement within the landscape;
12. Principles and practice of fire and fire management issues;
13. Underlying layers within the framework of landscape;
14. Cultural, historical and artistic perspectives of the indigenous relationship with the landscape.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Environmental Autobiography	1,000 words	15	N	Individual
Field trip tasks sheets which evaluate/characterise sites visited	Completed during field trip	20	N	Individual

Poster / Presentation of analysis/ characterisation of specific landscape site not visited in field trips	15 minute presentation	25	N	Individual
Final Exam	2 hours	40	N	Individual

Coordinator Michelle Ryan ([https://directory.westernsydney.edu.au/search/name/Michelle Ryan/](https://directory.westernsydney.edu.au/search/name/Michelle%20Ryan/))

Description This unit explores a variety of environmental issues with a focus on emerging environmental issues. The relationships between human health and environmental health are explored through a number of case studies. Concepts explored include 21st Century contaminants, noise, energy and water. Through a combination of case studies and practical field experience, students will develop the skills and knowledge appropriate to develop solutions to a variety of environmental issues. Students enrolled in the Undergraduate Certificate in Environmental Sustainability will not complete the practical field experience component of this unit, as they will be studying online.

School Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects PUBH 1002 Environment and Health

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and describe a variety of environmental issues
2. Describe a number of emerging environmental issues due to urban development
3. Identify and explain essential characteristics of various environmental issues
4. Monitor, assess and make appropriate recommendations to address environmental noise issues
5. Identify and explain the legal and administrative components of noise.
6. Identify relevant environmental legislation and policy
7. Demonstrate competency in academic writing
8. Research and communicate a case study of an environmental issue
9. Demonstrate critical thinking by identifying solutions to a chosen environmental issue

Subject Content

- Introduction into a number of environmental issues
- Urban development and environment

- Energy use
- Water pollution
- Water security
- Urban environments and human health
- 21st Century contaminants
- Environmental determinants of human health and wellbeing
- Environmental noise
- Assessment, regulation and control of environmental noise
- Environmental health policy, practice and stakeholder responsibilities
- Real world case studies

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Participation: Weekly Online Discussion		20	N	Individual
Mid Semester Quiz	Quiz – 1 hour	20	N	Individual
Noise Report	2,000 words	35	N	Individual
Report: Case Study	1,000 words	25	N	Individual

ENVL 1004 Introduction to Environmental Science

Credit Points 10

Legacy Code 301407

Coordinator Elise Pendall ([https://directory.westernsydney.edu.au/search/name/Elise Pendall/](https://directory.westernsydney.edu.au/search/name/Elise%20Pendall/))

Description Students learn how biology, chemistry and the physical sciences interact to regulate environmental processes in natural and built environments. They will evaluate concepts of sustainability and resilience and apply these perspectives to understand how human actions can alter the natural world. Students will use interdisciplinary approaches, including field studies, to investigate environmental processes and evaluate specific environmental challenges. Local and global environmental issues, sustainability, resilience and stewardship will be explored across diverse social and ecological contexts.

School Science

Discipline Environmental Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe how biological and physical sciences interact to regulate fundamental environmental processes in natural and built environments.
2. Identify key concepts of sustainability and resilience from different perspectives, including Aboriginal and Torres Strait Islander views.
3. Explain how human actions can influence environmental sustainability.
4. Articulate the interdisciplinary approaches, as an individual and in a team, to understand environmental problems in diverse social and ecological contexts.
5. Effectively communicate the scientific principles underpinning environmental processes and the impact of management on sustainability.

Subject Content

1. Framework for a sustainable future, including science and the environment, economics, politics, and public policy.
2. Ecology: the science of organisms and their environment.
3. Human population and essential resources, including human population & development.
4. Water, hydrologic cycle and human use.
5. Soil: foundation for land ecosystems.
6. Production and distribution of food.

7. Pests and pest control.
8. Harnessing energy for human society.
9. Pollution and prevention.
10. Stewardship for a sustainable future.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	4 x 30 min	40	N	Individual

ENVL 2001 Analysis of Spatial Data

Credit Points 10

Legacy Code 101646

Coordinator Awais Piracha ([https://directory.westernsydney.edu.au/search/name/Awais Piracha/](https://directory.westernsydney.edu.au/search/name/Awais%20Piracha/))

Description The making and the use of maps. This unit involves the critical examination of the way geographical data is produced, analysed, mapped and used to inform both private and public decisions. Natural environment, health, accessibility and residential amenity are examples of phenomena that have an important geographical dimension. Policy responses to these phenomena need to be specific with regard to locations and places. Geographic information systems software and census will be used to produce maps based on the analysis and interpretation of data relating to the student's field of interest.

School Social Sciences

Discipline Environmental Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects LGYA 7235 - Analysis of Spatial Data

Restrictions Successful completion of 40 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe and critically analyse geographical information
2. Apply GIS to the analysis and modelling of social, economic or environmental data
3. Identify and describe the spatial dimension of issues in the social or environmental sciences

Subject Content

Basic elements and principles of mapping/cartography
 Basics of Geographic Information Systems (GIS)
 Understanding social and environmental spatial databases
 Spatial analysis of social data
 Modelling urban growth and change within cities
 Geographic Information Systems (GIS) applications
 Web based mapping for communities

Critical appraisal of spatial information

Spatial dimensions of social indices

Legacy Code 300841

Coordinator Ian Wright ([https://directory.westernsydney.edu.au/search/name/Ian Wright/](https://directory.westernsydney.edu.au/search/name/Ian%20Wright/))

Description This unit aims to provide students with a broad understanding of the current environmental regulations available to environment protection and planning authorities at the State and Local Government level to protect and manage the natural and built environments. This unit will also consider environmental policy introduced by the State and Commonwealth governments to manage land use activities so as to encourage sustainable development practices. It is a suitable unit for students entering government or industry in environmental management, health and planning roles. There is a particular focus on the use of legislation and preparation of policy to address environmental and health risks to the community.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Essay	1500 words	45	N	Individual
Report	2000 words	55	N	Individual

Teaching Periods

ENVL 2003 Landuse and the Environment

Credit Points 10

Legacy Code 300875

Coordinator Samsul Huda ([https://directory.westernsydney.edu.au/search/name/Samsul Huda/](https://directory.westernsydney.edu.au/search/name/Samsul%20Huda/))

Description This unit will assist students develop a sound framework for the analysis of land use and its interactions with the environment. The skills gained will assist in the evaluation of land use at various levels from household to international level. Particular emphasis will be placed on students gaining a sound conceptual framework from which to examine sustainability at the environmental, economic, social, and production levels. Emphasis will be placed on the use of ecological footprinting as a tool.

School Science

Discipline Environmental Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects LGYA 6188 - Landuse and the Environment

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Utilise Ecological Footprint principles in the analysis of land-use.
2. Describe the principles of sustainable land-use.
3. Apply the principles of sustainability with respect to land-use.
4. Undertake an analysis at regional, country, enterprise or household level of the impacts of land-use on the environment.
5. Design and develop a computer based calculator for use in predicting the energy consumption of an enterprise.
6. Debate contemporary issues on landuse and the environment, including such issues as carbon emission trading; use of oil, coal and gas; alternative energy; and global warming myths and facts.

Subject Content

1. The theory of climate change and sustainable landuse options primarily for Australian landscapes.
2. 'Real world' examples of relevant landuse activities explored to develop an understanding of the interactions between land-use and the environment.
3. Interactions between land-use, production and consumption.
4. Calculation of the carbon emissions and ecological footprint for an enterprise of choice and with recommendations for improvement with regard to desirable and feasible change.
5. The environmental impact of enterprises and the 'land equivalent' required to sustain such enterprises.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Debate - Oral Presentation	30 minutes overall time for the group debate	10	N	Group
Quiz - Written	2 hours	30	N	Individual
Project - Written and Oral Presentation	2,000 words and 15 minutes group presentation	60 (45% individual and 15% group)	N	Both (Individual & Group)

Prescribed Texts

Teaching Periods

ENVL 2005 Internet of Things for the Environment

Credit Points 10

Legacy Code 301275

Coordinator Basant Maheshwari ([https://directory.westernsydney.edu.au/search/name/Basant Maheshwari/](https://directory.westernsydney.edu.au/search/name/Basant%20Maheshwari/))

Description Internet of things (IoT) is about connecting platforms to internet for monitoring, managing and controlling them. Simply put, IoT can make 'dumb' things 'smart' by connecting them to the Internet and sensors. This results in improved efficiency of data collection, accuracy and decision making. The applications of IoT is rapidly expanding in environmental science and management, and the topics in this unit will cover aspects of IoT for water, air and noise pollution monitoring, extreme weather warning, river water flow monitoring, water quality management, irrigation management, flora and fauna monitoring, broadacre agriculture, protected cropping, biodiversity, ecosystems health, wildlife and more.

Legacy Code 301390

Coordinator Ian Wright ([https://directory.westernsydney.edu.au/search/name/Ian Wright/](https://directory.westernsydney.edu.au/search/name/Ian%20Wright/))

Description This unit is an introduction to environmental planning in local and state government and in particular the role of planning in protecting the natural environment, enhancing population health and/or encouraging sustainable development practices. Students focus on goal-setting for environmental protection and then explore how planning policy can assist with achieving these goals. Current metropolitan planning and strategy is examined using the Metropolitan Strategy for Sydney as the primary case study. The unit scopes environmental planning policies introduced by state, local and Commonwealth governments to adapt to climate induced impacts on the environment and on community health and well being.

School Science

Discipline Environmental Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects PUBH 3009 - Environmental Planning PUBH 2008 - Environmental Planning Climate Change

Incompatible Subjects NATS 2020 - Healthy Built Environments

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain Commonwealth, state and local environmental planning law and policy;
2. Research and set appropriate environmental planning goals for environmental protection and conservation within the built environment context;

3. Describe key elements of building design for energy efficiency, acoustic comfort and water conservation;
4. Outline the main components of the Sydney Metropolitan Plan in relation to the projected environment and human health impacts of climate change;
5. Propose sustainable planning solutions through the application of sustainability policy including BASIX and Part J of the building Code of Australia.

Subject Content

1. Environmental planning practice in local and state government;
2. Environmental planning to enhance environmental sustainability and population health and address the emergent and projected human health and environmental sustainability impacts of global climate change;
3. Professional competencies relating to planning and climate change as required by graduate employers and as reflected in professional accreditation criteria;
4. Environmental management opportunities provided by legislation and government policy such as:
 - a. Environmental Planning and Assessment Act (under review);
 - b. Applicable State Environmental Planning Policies (SEPPs);
 - c. Metropolitan Strategy for Sydney;
 - d. Relevant regional strategies; and
 - e. climate change policy including sea level rise policy and sustainability policy with reference also given to SEPP (BASIX) and part J of the Building Code of Australia.

Assessment

ENVL 2007 Environmental Monitoring and Assessment

Credit Points 10

Legacy Code 301408

Coordinator Matthias Boer ([https://directory.westernsydney.edu.au/search/name/Matthias Boer/](https://directory.westernsydney.edu.au/search/name/Matthias%20Boer/))

Description In this unit, you will develop the practical skills and underlying scientific knowledge required to address environmental questions across natural and built environments. Through practicals, workshops, and an independent research project you will learn how to design a monitoring and assessment program to characterise different environment situations, interpret data and propose management solutions to contemporary environmental challenges.

The unit will introduce a range of topics, including the application of geographic information systems (GIS), remote sensing methodologies, environmental sensors, the internet of things and citizen science approaches to understand and improve environmental situations, and provides opportunities to research a chosen, real-world topic to assess an aspect of environmental sustainability.

School Science

Discipline Environmental Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain different concepts and approaches to environmental monitoring and assessment in the context of natural and built environments.
2. Critique monitoring data and environmental reports that utilise a range of environmental indicators including soil, air, water, microbial.
3. Apply different techniques and approaches for environmental monitoring.
4. Evaluate environmental data to assess the current state of the environment and manage risk in the context of environmental sustainability.

Subject Content

1. Why monitor and assess the environment?
2. Key parameters for monitoring and assessment.
3. Framework for designing a monitoring and assessment program, including field sampling considerations, data collection and statistical analysis.
4. Introduction to Geographic Information Systems.
5. Introduction to remote sensing for environmental monitoring and change detection.
6. Field application of sensors, Internet of things and drones for environmental assessment and management.
7. Plant, animal, microbial and soil monitoring.
8. River and catchment monitoring.
9. Air quality monitoring.
10. The role of citizen science/crowd sourcing in environmental monitoring.
11. Selected case studies for environmental impact assessment.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

ENVL 3003 Environmental Risk Management

Credit Points 10

Legacy Code 300858

Coordinator Samsul Huda ([https://directory.westernsydney.edu.au/search/name/Samsul Huda/](https://directory.westernsydney.edu.au/search/name/Samsul%20Huda/))

Description This unit examines the world of environmental risk management and will introduce students to environmental management systems including Environmental Impact Assessment and Environmental Auditing. The unit considers and examines the application of the precautionary principle in real world situations. Students will also be introduced to methods of quantitative risk assessment as applied to environmental and agricultural risks such as urban, peri-urban and rural growth; industrial and agricultural land use; contaminated land, and climate change.

School Science

Discipline Environmental Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects ENVL 3004 - Environment Risk Management LGYA 6128 - Agriculture Risk

Restrictions Successful completion of 120 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss and critique the environmental impact assessment process and its limitations as a management tool;
2. Explain the environmental auditing process, advantages and limitations of different auditing approaches and assessment and management of contaminated sites;
3. Apply AS 4360 and ISO 140004 in the appropriate context;
4. Apply principles of risk and uncertainty and tools for modelling risk;
5. Apply appropriate tools to effectively manage and/or transfer risk;
6. Research, evaluate, utilise and communicate information on risk assessment and management using multiple sources.

Subject Content

Environmental Impact Assessment (EIA)

Environmental Auditing (EA)

Review and processing of an EIA/EA

Identification, assessment and management of environmental risk
 Application of risk management to solving real world problems
 Management and assessment of Agricultural Risk
 Management of risk from weather and climate change

ENVL 3005 Planning the City: Development, Community and Systems

Credit Points 10

Legacy Code 101593

Coordinator Anna Leditschke ([https://directory.westernsydney.edu.au/search/name/Anna Leditschke/](https://directory.westernsydney.edu.au/search/name/Anna%20Leditschke/))

Description This unit aims to provide students with a fundamental understanding of the role of government, focusing on the role and nature of planning across all levels of government from a variety of theoretical frameworks. It presents a critical examination of the urban development and planning processes, with particular attention given to the environmental and political issues associated with planning at the local government level. It looks at the changes and challenges confronting local government in view of the demands made on them by the changing social and economic conditions and societal values such as those relating to requirements for public participation, transparency and accountability. The unit also examines the role of private sector in planning and assessment processes.

School Social Sciences

Discipline Environmental Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 80 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the historical background and significance of the Planning profession;
2. Apply the key concepts involved in planning and managing development within the context of local planning;

3. Analyse urban development and planning processes within the planning framework; and
4. Explain changes in planning processes that reflect evolution of socioeconomic and cultural values.

Subject Content

1. Origins of town planning
2. The rationale for planning and regulation
3. The political and environmental issues related to the implementation of planning
4. Strategic planning
5. The development control system
6. Participatory planning, access and equity
7. Changes and challenges for Local Government
8. Planning by private sector

Credit Points 10

Legacy Code 101645

Coordinator Awais Piracha ([https://directory.westernsydney.edu.au/search/name/Awais Piracha/](https://directory.westernsydney.edu.au/search/name/Awais%20Piracha/))

Description This unit examines the equity and efficiency issues in the provision of transport in cities and regions from a critical social science perspective. Issues of transport disadvantage and policy and planning responses to improve access to urban services are examined. The social and environmental impact of transport systems are considered in the context of urban management.

School Social Sciences

Discipline Environmental Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 7234 - Transport Access and Equity

Restrictions Successful completion of 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. analyse problems associated with transport and access to urban services and to propose constructive alternatives
2. design and negotiate solutions to transport and access issues in a practical context.
3. Apply critical, reflective and creative skills to transport and access issues in an applied context
4. Demonstrate Social interaction and communication skills in a problem-driven context

Subject Content

- Environmental sustainability of transport systems,
- Social justice issues in the provision of public transport including: the needs of particular groups; social impacts of projects; access to urban services; remote and indigenous communities
- Transport planning and policy: transport demand modelling and management; transport infrastructure investment issues; impacts of telesubstitution.

Credit Points 10

Legacy Code 300860

Coordinator Michelle Ryan ([https://directory.westernsydney.edu.au/search/name/Michelle Ryan/](https://directory.westernsydney.edu.au/search/name/Michelle%20Ryan/))

Description This unit explores the relationships between community, the natural environment and government within an urban context through considering how housing and urban development can influence population health. Concepts explored include "healthy housing", "active living" "safety by design" and "energy efficiency". Through a combination of case studies and practical field experience, students will develop the skills and knowledge appropriate to assessing the "healthiness" and sustainability of urban environments. The unit examines methods of construction and building regulation aimed at the preservation of health and amenity.

School Science

Discipline Environmental Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 6254 - Urban Environment

Incompatible Subjects LGYB 9943 - Environmental Health Law ARCH 3007 - Urban Development Systems NATS 2020 - Healthy Built Environments

Level Undergraduate Level 3 subject

Equivalent Subjects PUBH 3001 - Air Quality and Climate Change LGYA 6192 - Air Quality Management

Restrictions Successful completion of 60 credit points at Level 1 and 40 credit points at Level 2.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Evaluate the major sources of air pollution and critically analyse associated impacts on human health and environmental sustainability.
- Describe the impact of meteorology on air pollution in a local area.
- Critically analyse the health effects of air pollution.

- Evaluate and analyse the monitoring and assessment of air pollution.
- Critically analyse the causes and the main methods of controlling point sources of air pollution.
- Apply and evaluate basic air modelling techniques.
- Evaluate indoor air problems.

Subject Content

Introduction to Air Pollution
Impact of legislation on Ambient Air Pollution
Sources of Air Pollution
Motor Vehicles and their impact on air pollution
Sources and human health effects of air pollution
Climatology
Air quality assessment and air modelling
What is a critical literature review relating to air pollution
Indoor Air Quality Odour Assessment
Global Issues - Climate Change

Teaching Periods

ENVL 3010 Environmental Planning, Policy & Regulation

Credit Points 10

Legacy Code 301403

Coordinator Ian Wright ([https://directory.westernsydney.edu.au/search/name/Ian Wright/](https://directory.westernsydney.edu.au/search/name/Ian%20Wright/))

Description This unit is an introduction to environmental planning and environmental regulations in local and state governments. It covers the role of planning and enforcement of regulations in protecting the natural environment, enhancing public health and/or encouraging sustainable development practices. Students become familiar with the key legislation for environmental protection and then explore how planning and regulations can assist with achieving optimal environmental outcomes. Current planning and regulations are examined using urban development and planning in Sydney as the primary case study. The unit includes key environmental planning policies and important legislation used by state, local and Commonwealth governments to protect the natural and built environment and to protect public health.

School Science

Discipline Environmental Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects PUBH 2007 Environmental Planning and Climate Change
ENVL 2002 Environmental Regulations and Policy

Assumed Knowledge

It is expected that the students will have completed some Level 1 subjects that have some environmental content.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the incorporation of environmental controls into development proposals and approvals;
2. Explain the implementation of environmental protection objectives and policies in development assessment regulations;
3. Relate environmental control principles and remedial strategies to NSW Government key legislation;
4. Investigate and develop sound environmental strategies to rectify or avoid environmental problems using either regulatory or non-regulatory approaches as appropriate;
5. Undertake sound research to inform recommendations to solve environmental problems.
6. Gather evidence and prepare for legal action on an environmental problem under relevant legislation;
7. Explain Commonwealth, state and local environmental planning law and policy;
8. Research and set appropriate environmental planning goals for environmental protection and conservation within the built and natural environment context;

Subject Content

1. Environmental planning practice in local, state and Commonwealth government;
2. Current NSW environmental regulations for environmental protection and management
3. Current NSW legislation, with a key focus on: Local Government Act, Protection of the Environment Operations Act and Environmental Planning and Assessment Act.
4. Environmental regulations and planning approaches to enhance environmental sustainability;
5. Professional competencies relating to environmental regulation and environmental planning as required by graduate employers and as reflected in professional accreditation criteria;
6. Environmental management plans and policies such as:
 - a. Applicable State Environmental Planning Policies (SEPPs);
 - b. Metropolitan Strategy for Sydney;
 - c. Relevant regional strategies;
 - d. Local Environment Plans (LEPs)

Assessment

Coordinator Anna Leditschke ([https://directory.westernsydney.edu.au/search/name/Anna Leditschke/](https://directory.westernsydney.edu.au/search/name/Anna%20Leditschke/))

Description This unit provides students with an understanding of the planning process from both a state and local government perspective. The unit will cover concepts related to the planning process, focusing on development control and regulation issues, planning instruments and development applications. It will also address the areas of planning and environment law, with specific reference to the legal framework that regulates planning and development in NSW.

School Social Sciences

Discipline Environmental Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret and apply legislation and case law to state and local government planning practices.
2. Identify, analyse and explain the statutory processes of land-use regulation and development control.
3. Demonstrate the role of professional planners and advise governments, courts and communities in plan-making and development regulation, assessment and review.
4. Develop and evaluate planning policies, plans, regulations and development proposals.

Subject Content

1. Environmental protection and development
2. Making decision and taking action
3. Implementation issues
4. Planning and the legal framework
5. Development controls within a planning system

6. Development applications and assessment
7. Strategic planning; planning systems and property markets
8. Scope of environmental law
9. Planning and environmental dispute resolution

ENVL 7003 Urban Research Report

Credit Points 10

Legacy Code 101637

Coordinator Nicky Morrison ([https://directory.westernsydney.edu.au/search/name/Nicky Morrison/](https://directory.westernsydney.edu.au/search/name/Nicky%20Morrison/))

Description This capstone unit requires students to write a 5,000 word comprehensive research report on a local or international urban planning issue. Students will select a research topic of individual interest, and work to assemble a range of evidence to address the research question. This facilitates an opportunity for students to apply their skills and knowledge acquired in the Master's program, through a high level of work and quality engagement in an authentic and professional context.

School Social Sciences

Discipline Environmental Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 1299 - Urban Management Placement Thesis

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Formulate a successful research proposal for independent research
2. Demonstrate knowledge and critical analysis skills in the production of a literature review

3. Identify an appropriate research method to address the particular research question, and assemble a range of evidence to address it.
4. Apply their skills and knowledge in a sustained program of research writing
5. Produce a clear report of the outcomes of the research project, based on application of the skills and knowledge acquired

Subject Content

Write a Research Proposal that frames a research question and indicates an appropriate research method by which to address it. Undertake an independent research project under the supervision of an academic supervisor.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

FINC 1001 Management Accounting Fundamentals

Credit Points 10

Legacy Code 200116

Coordinator Rada Massingham ([https://directory.westernsydney.edu.au/search/name/Rada Massingham/](https://directory.westernsydney.edu.au/search/name/Rada%20Massingham/))

Description This subject replaced by ACCT 1010 Management Accounting Fundamentals from Trimester 2, 2022. This subject provides an introduction to management accounting in an e-commerce environment. The interrelations of management accounting to other functional areas, to suppliers, to customers, and to other sources of external information relevant to planning and control are examined. Topics include the development and logic of routine and non-routine analysis performed to support management decision making.

School Business

Discipline Banking, Finance and Related Fields, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Pre-requisite(s) ACCT 1007

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop and describe costing techniques and their strengths and weaknesses;
2. Apply different decision models in the evaluation of product costing, product pricing and sales forecasting;
3. Prepare a master budget with all of the required supplementary schedules;
4. Assess what is relevant and irrelevant information in non-routine decision-making;
5. Explain ethical issues in management accounting;
6. Describe management accounting in an electronic environment;
7. Appraise basic concepts of control, and the behavioural impacts of control systems.

Subject Content

- introduction to management accounting
- Basic cost management concepts and cost behaviour
- cost volume profit analysis
- Product and service costing: job-order system
- Product and service costing: A process systems approach
- relevant decision making
- budgeting for planning and control
- Flexible budgeting, Standard costing and variance analysis
- Allocating costs of support departments and joint products

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical	Weekly	15	Y	Individual
Professional Task	1,000 words	15	N	Group
Intra-session Exam	1.5 hours	20	N	Individual
Final Exam	2 hours	50	Y	Individual

FINC 1003 Professional Relationships and Communication in Business

Credit Points 10

Legacy Code 200747

Coordinator Joanne Ross ([https://directory.westernsydney.edu.au/search/name/Joanne Ross/](https://directory.westernsydney.edu.au/search/name/Joanne%20Ross/))

Description This unit will introduce students to and assist them in the development of a broad range of necessary skills required by today's

professional advisers. Such skills are highly valued, transferable and universally recognised in the world of work and will assist students in managing their day to day relationships with clients and colleagues. Skills include: * Creation and on going maintenance of the client adviser relationship and a recognition of the importance of trust as the foundation of that relationship; * Identification of the broad needs of clients and an appreciation of differing levels of client financial literacy; * Communication and interpersonal skills which contribute to productive relationships with clients and colleagues; * Professional/Academic research and writing skills; * Enhanced team based skills that contribute to productive working relationships and outcomes.

School Business

Discipline Banking, Finance and Related Fields, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects LGYA 4516 - Financial Advisory Relationships

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss what is meant by the term **professional advice** in the context of varying professional environments;
2. Demonstrate effective professional communication and interpersonal skills ? oral and written;
3. Demonstrate effective research and writing skills in an academic and professional business context;
4. Describe what is meant by financial literacy and its application to a variety of clients;
5. Participate in teams which contribute to productive working relationships and outcomes;
6. Demonstrate technological literacy that contributes to effective execution of tasks.

Subject Content

- professional advice in A variety of business contexts
- communication and The professional adviser
- Working in teams
- academic and professional research and writing
- non verbal communication
- interpersonal skills
- oral communication
- Negotiation
- financial literacy
- The advice process, stakeholders and The Regulatory environment
- ethics and Fiduciary relationships
- Behavioural finance and client engagement
- Conflict Resolution

Legacy Code 200265

Coordinator Amanda Craft ([https://directory.westernsydney.edu.au/search/name/Amanda Craft/](https://directory.westernsydney.edu.au/search/name/Amanda%20Craft/))

Description This subject provides students with necessary knowledge and skills to construct and manage a portfolio of personal assets. Emphasis is placed on how the individual, rather than the firm, approaches financing and investing decisions. The subject will consider the theories of portfolio construction, concepts of investment risk, return and diversification, matching asset allocation based on client's individual risk profile, design and management of a personal investment portfolio and the law as it relates to investments. This subject meets accreditation requirements of the Financial Adviser Standards and Ethics Authority (FASEA).

School Business

Discipline Investment and Securities

Student Contribution Band HECS Band 4 10cp

FINC 3001 Bank Management

Credit Points 10

Legacy Code 200818

Coordinator Sean Toohey ([https://directory.westernsydney.edu.au/search/name/Sean Toohey/](https://directory.westernsydney.edu.au/search/name/Sean%20Toohey/))

Description Bank Management provides students with an understanding of modern banking by identifying the main types of risk confronted by banks and applying relevant techniques to measure and manage those risks. Students will recognise that the risks faced, and the methods and markets through which these risks are managed, are similar for the managers of other types of financial institutions such as building societies, investment banks and insurance companies as well as, to some extent, non-financial corporates. Consequently, the unit will prepare students for careers throughout the financial services sector and will also be beneficial for other business professionals.

School Business

Discipline Banking and Finance

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Assumed Knowledge

Students who have completed the subject Corporate Financial Management or equivalent will find this subject more manageable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate critical understanding of the structures and functioning of banking and issues related to banking in a contemporary globalised economy, including the impact of government policy and regulation on banking.
2. Interpret the financial statements of banks and apply various tools and approaches for measuring and evaluating the performance of banks.
3. Evaluate various asset-liability management techniques and hedging against interest-rate risk and credit risk.
4. Analyse and evaluate lending choices in different business and personal lending contexts from the perspective of sources of fee income and other revenue producing services.
5. Evaluate important risk-management tools for banks.

Subject Content

1. Banks and the financial services industry

2. Risks of financial institutions
3. Interest rate risk measurement
4. Managing interest rate risk
5. Market risk
6. Credit risk
7. Liquidity risk
8. Liability and liquidity management
9. Capital management and adequacy

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

FINC 3002 Behavioural Finance

Credit Points 10

Legacy Code 200518

Coordinator Heath Spong ([https://directory.westernsydney.edu.au/search/name/Heath Spong/](https://directory.westernsydney.edu.au/search/name/Heath%20Spong/))

Description Traditional theories of finance are based the assumption that investors are both rational and utility maximizing. The Efficient Markets Hypothesis in particular has assumptions about investor behaviour which underpin its key predictions. The tenants of behavioural finance disputes the validity of these assumptions. This unit challenges traditional theory by examining how decision making and investor behaviour may be driven by personal and market psychology.

School Business

Discipline Banking, Finance And Related Fields

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Assumed Knowledge

Students should have at least an introductory finance background before entering into this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. To understand traditional theories of financial asset pricing and investment decision making;
2. To understand the implications of different assumptions about investor rationality and market psychology for taxation systems for asset pricing and investment decision making;
3. To appreciate alternative theories of investor and market behaviour.

Subject Content

- theoretical and empirical critiques of The Efficient markets Hypothesis/capital Assets pricing model
- The Psychology of investors
- Risk versus uncertainty
- The behaviour of finance markets ? non-normal distributions
- implications of investor irrationality for economics and The analysis of money

FINC 3006 Insurance Advising - Theory and Practice

Credit Points 10

Legacy Code 200272

Coordinator Amanda Craft ([https://directory.westernsydney.edu.au/search/name/Amanda Craft/](https://directory.westernsydney.edu.au/search/name/Amanda%20Craft/))

Description This unit provides a substantial grounding in the theories and practices of insurance and risk management so as to enable students to make knowledgeable and sound risk management decisions, to understand advisory functions and the role and legal obligations of the adviser in the insurance process. The course is useful to students who wish to increase their knowledge generally of personal risk management but also for students specifically interested in the insurance aspects of the financial planning process. The unit is designed to include an understanding and exploration of managing personal risk, the operation of insurance markets, regulation, insurance products including life, general, health and mandated policies and recommendations for using insurance products for individuals, their families and small business.

School Business

Discipline Insurance and Actuarial Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYB 6470 - Insurance and Risk Management

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe how the various risk concepts, classifications, rules and methods of handling risk are integrated into the overall personal risk management process;
2. Demonstrate a comprehensive understanding of the Australian regulatory environment in which risk management advice and insurance products are provided;
3. Understand the client fact find process and how to prepare a needs analysis to provide resulting insurance recommendations;
4. Critically assess the risk management and insurance needs of individuals and small business;
5. Describe the different types of life, general and other insurance products and their application to real world consumers and small business;
6. Demonstrate effective professional communication and interpersonal skills both oral and written;
7. Demonstrate technological literacy which contributes to effective execution of tasks.

Subject Content

- introduction to Risk management
- The Risk management process
- Insurance Law in Australia
- regulation and compliance
- Insurance cover and recommendations
- Insurance underwriting
- personal Insurance
- general, health and mandated Insurance

- business Insurance
- determining client needs and implementation of Insurance recommendations

FINC 3009 Property Finance

Credit Points 10

Legacy Code 200875

Coordinator Mustapha Bangura ([https://directory.westernsydney.edu.au/search/name/Mustapha Bangura/](https://directory.westernsydney.edu.au/search/name/Mustapha%20Bangura/))

Description The aim of this unit is to provide insight into property finance in Australia and overseas. Students critically review equity and debt financing and examine the financing alternatives available, as well as methods for evaluating these alternatives. Students also examine the impact of debt financing on a property and evaluate the taxation aspects of property transactions. In addition, students gain both a theoretical and an applied understanding of an after-tax cash flow projection in this unit. International property finance is also addressed.

School Business

Discipline Banking, Finance and Related Fields, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYB 6469 Property Finance and Tax FINC 3010 Property Finance and Tax

Restrictions External offerings for this subject are only available to students who are enrolled in a Property program or field of study.

Assumed Knowledge

It is assumed that students will have a sound knowledge of:

1. Valuation and financial mathematics
2. Concepts of discounted cash flow analysis and application
3. Statutory valuation legislation and procedures
4. Property portfolio analysis and property investment analysis and application

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the financial environment of Australia.
2. Assess and develop optimal financing strategies for property investments.
3. Outline the factors that determine the impact of leverage upon returns from property investments and developments.
4. Assess the impact of taxation on potential outcomes from investments in property.

Subject Content

1. Overview of property investment financing.
2. The Australian financial system.
3. Mortgage loans including fixed and variable interest rate.
4. Financing analysis of residential properties and income-producing properties.
5. Financial risk analysis.
6. Property taxation (taxes on income, capital, transaction taxes, land tax).
7. Taxation and property investment implications.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Report	2,500 words	50	N	Individual

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 4694 - Property Investment

Restrictions External offerings for this subject are only available to students who are enrolled in a Property program or field of study.

Assumed Knowledge

Students undertaking this subject require the background knowledge achieved through prior study in the general principles of valuation.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate and apply economic and market data to analyse the property market.
2. Apply calculations of risk and returns for investment properties.
3. Utilise the discounted cash flow method in analysing investment properties.
4. Conduct an investment analysis for income producing properties.
5. Explain property investment decision process in a dynamic market environment.
6. Perform risk analysis for investment properties.

7. Explain the impacts of financing and taxation on property returns and the issues of investment in international property.
8. Apply verbal communication skills appropriate to property context.

Subject Content

1. Introduction to property investment.
2. Calculations for property investment.
3. Measuring investment returns.
4. Property market analysis.
5. DCF valuation method.
6. Leases, cashflow proformas and discount rates.
7. Property investment risk.
8. Sensitivity and scenario analysis.
9. Investment decision making.
10. International property investment.

FINC 3014 Retirement and Succession Planning

Credit Points 10

Legacy Code 200899

Coordinator Michelle Cull ([https://directory.westernsydney.edu.au/search/name/Michelle Cull/](https://directory.westernsydney.edu.au/search/name/Michelle%20Cull/))

Description Retirement and Succession Planning aims to provide a study of the legislative framework and financial planning issues that impact on advice and decisions relating to retirement planning and estate and succession planning. The unit focuses on identifying practical and strategic planning opportunities and outcomes. The unit will be run with students discussing case studies and preparing critical analysis reports on contemporary issues. Successful completion of the unit will introduce students to retirement planning and superannuation concepts which could lead to careers in these fields.

School Business

Discipline Banking, Finance and Related Fields, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 1004

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate communication skills through reading and writing in context of issues relevant to retirement and succession planning.
2. Develop information literacy through accessing, evaluating and the use of relevant information in respect of current issues and regulation relevant to unit content.
3. Integrate theoretical and practical knowledge to solve complex and novel retirement and succession planning problems.
4. Demonstrate knowledge of the value of ethical conduct as a professional in the financial services industry.

Subject Content

1. Superannuation investment standards and Public offer and self-managed funds.
2. Preservation standards.
3. Small business issues.
4. Eligible Termination Payments.

5. Superannuation on marriage breakdown.
6. Superannuation planning.
7. Social Security.
8. Role of estate planning within financial planning.
9. Estate and succession planning processes.
10. Wills, trusts, powers of attorney.
11. Capital Gains Tax and estate planning.
12. Succession planning.

FINC 3015 Security Analysis and Business Valuation

Credit Points 10

Legacy Code 200921

Coordinator Joseph Masoud ([https://directory.westernsydney.edu.au/search/name/Joseph Masoud/](https://directory.westernsydney.edu.au/search/name/Joseph%20Masoud/))

Description This unit analyses companies from a fundamental perspective in order to derive an intrinsic value for securities. The focus is on the attempt by active investors to identify mispriced securities using publicly available information, company reports and financial market information. The analytical techniques of financial

statement analysis (e.g. fundamental analysis, free cash flow analysis and pro-forma analysis) and the issue of the "reliability" and "quality" of publicly available information are discussed and explored. Those contemplating careers in investment banking, financial consulting, trust funds, superannuation funds, hedge funds, and brokerage firms will find this applied unit both useful and interesting.

School Business

Discipline Investment and Securities

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) ECON 2002

Assumed Knowledge

Knowledge acquired in the corporate financial management and fundamentals of accounting.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Collect and critically analyse financial and non-financial company and industry information.
2. Assess the implications of the macroeconomic environment, industry structure and operations and strategies of a business for its future prospects.
3. Construct and apply various valuation models to value security and the business.
4. Critically assess the valuations of a business and of its debt and equity based on discounted cash flow analysis.
5. Classify the concepts and limitations of traditional valuation approaches.

Subject Content

1. Overview of valuation.
2. Analysis of the industry structure and operational strategies of a particular business.
3. Forecasting and valuing cash flows.
4. Business and security risk analysis.
5. Estimating the required rates of return for a business.
6. Computation of the firm's cost of capital.
7. Apply various valuation models to assess and value a business.
8. Assess a company's future prospects.
9. Relative valuation using market comparables.
10. Strategic options: evaluating strategic opportunities.

FINC 7007 Financial Planning Research Project

Credit Points 10

Legacy Code 200959

Coordinator Peter Humphreys (<https://directory.westernsydney.edu.au/search/name/Peter Humphreys/>)

Description Financial Planning Research Project encompasses a major research project and presentation. This equips students with skills to address challenges through research and the ability to apply knowledge developed in earlier units of study. This student-centered unit provides supervision of research and analytical practices to enhance skill development and capacity to engage with the problems confronting the financial planning industry. Students will have scope to focus on issues that are of particular concern to the financial planning industry. As an integrating unit, it demands participants bringing their knowledge together and with curiosity to develop recommendations in a format that can showcase their achievements.

Coordinator Peter Kavalamthara ([https://directory.westernsydney.edu.au/search/name/Peter Kavalamthara/](https://directory.westernsydney.edu.au/search/name/Peter%20Kavalamthara/))

Description This unit introduces students to the wide range of investment products and financial securities. Importantly, it develops students' ability to analyse investment opportunities and understand their respective risk and reward profiles. Students will also develop the computational skills necessary for transactions in financial markets, which enable an informed comparison of securities for the purposes of investment decisions.

School Business

Discipline Investment and Securities

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 2807 Master of Stockbroking and Financial Advising or 2808 Graduate Diploma in Stockbroking and Financial Advising or 2809 Graduate Certificate in Stockbroking and Financial Advising.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Compare the features, benefits and risks of a range of securities and discuss how these features affect their application in different investment strategies;
2. Compare the features, benefits and risks of listed and unlisted managed funds and alternative asset classes;
3. Evaluate the risk-reward characteristics of an investment portfolio;
4. Propose an investment portfolio that meets client specified needs.

Subject Content

FINC 7010 Insurance and Risk Management

Credit Points 10

Legacy Code 200870

Coordinator Sharon Taylor ([https://directory.westernsydney.edu.au/search/name/Sharon Taylor/](https://directory.westernsydney.edu.au/search/name/Sharon%20Taylor/))

Description This unit introduces students to the use of a range of insurance types and products to manage risk for individuals and small business. It aims to identify, evaluate and manage risk as part of the financial planning process to produce a compliant statement of advice. A number of risk management strategies are identified and the importance of life insurance, total and permanent disablement, trauma policies, property insurance, health cover, income protection and business insurance in managing risk is addressed. The unit provides an understanding of the various issues that can arise with respect to insurance policies and premiums and uses both the multiple and needs analysis approaches to calculate the level of cover required. A holistic approach to the risk management process is provided where a variety of insurance covers are considered in the context of a full financial plan that is adequate and affordable to the client and their specific needs as identified in the data collection process.

School Business

Discipline Insurance and Actuarial Studies

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) FINC 7020 AND
FINC 7011 OR
FINC 7008

Equivalent Subjects LGYB 6488 Insurance and Risk Management (PG)

Restrictions

Students must be enrolled in program 2793 Master of Financial Planning, 2794 Graduate Diploma in Financial Planning, 2807 Master of Stockbroking and Financial Advising or 2808 Graduate Diploma in Stockbroking and Financial Advising or the following teach out programs: /2770 Master of Commerce (Financial Planning) or 2690 Graduate Certificate in Commerce (Financial Planning).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain how the various risk concepts, classifications, rules and methods of handling risk are integrated into the overall risk management process
2. Illustrate a comprehensive understanding of the Australian regulatory environment in which risk management advice and insurance products are provided

3. Critically assess the risk management needs of individuals
4. Explain the different types of life, general and other insurance products and their application to individuals
5. Critically assess the risk management needs of small business in order to provide resulting insurance recommendations
6. Explain the different types of insurance products and their application to small business
7. Illustrate an holistic understanding of financial planning strategies

Subject Content

- Risk Profiling and Risk analysis
- Risk management: Risk reduction products and strategies

FINC 7019 Statement of Advice Research Project

Credit Points 10

Legacy Code 200960

Coordinator Amanda Craft ([https://directory.westernsydney.edu.au/search/name/Amanda Craft/](https://directory.westernsydney.edu.au/search/name/Amanda%20Craft/))

Description Statement of Advice Research Project encompasses a major research project, a Statement of Advice (SOA). This SOA equips students with knowledge and skills to address challenges through research and the ability to apply knowledge developed in earlier units of study. This student-centered unit provides skill development and capacity to engage with the requirements of the profession. Students will have scope to focus on issues relevant to a case study as a means of developing a comprehensive SOA for a client (in the case study). As an integrating unit, it demands participants bringing together their knowledge to develop recommendations based on learning from earlier units. This unit also ensures students meet the regulatory and accreditation education requirements to be a registered financial adviser.

School Business

Discipline Banking, Finance and Related Fields, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) Students enrolled in 2793 Masters of Financial Planning or 2807 Master of Stockbroking and Financial Advising must have successfully completed 60 credit points

Equivalent Subjects LGYB 6493 - Current Issues in Financial Planning

Restrictions

Students who are currently registered on the National Financial Adviser Register (FAR) may take this subject as a non-award stand-alone subject in order to meet new education requirements as outlined by the Financial Adviser Standards and Ethics Authority (FASEA). Students not currently on the FAR must be enrolled in 2793 Masters of Financial Planning, 2807 Master of Stockbroking and Financial Advising or 2825 Graduate Certificate in Financial Advising.

Assumed Knowledge

Understanding the financial planning environment, business communications skills, as well as substantial knowledge in the discipline.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a broad theoretical and technical knowledge of practice in the development of a Statement of Advice;
2. Apply theoretical and technical knowledge to provide in-depth specialist and professional advice related to financial markets, investments, superannuation, retirement planning, insurance and social planning;
3. Critically analyse and synthesise information to formulate effective financial decisions;
4. Utilise reasoned judgments to solve problems in a client/advisor context with reference to ethical, regulatory and investment perspectives;
5. Integrate professional practice and theory.

Subject Content

- introduction to current Issues and reviews
- basis for advice ? client profile
- financial analysis
- financial analysis?using projections
- development and integration of client focused strategies
- developing cost-benefit analysis and recommendation of strategies

- meeting Disclosure requirements

FINC 7020 Superannuation

Credit Points 10

Legacy Code 200867

Coordinator Julie Knutsen ([https://directory.westernsydney.edu.au/search/name/Julie Knutsen/](https://directory.westernsydney.edu.au/search/name/Julie%20Knutsen/))

Description This unit provides an understanding of the key issues, decisions and frameworks that affect financial planning for retirement. The unit focuses on superannuation and effective financing of retirement. It includes key concepts in prudential supervision of Australian superannuation, exploration of types of funds relevant to retirement, appreciating trends in retirement financing policies and their effects on providing advice, understanding the social security and age care systems' effect on retirement planning strategies; and correctly computing tax liabilities on superannuation, pensions, and estate management. This unit is the principal one for learning about self-managed superannuation funds, for whom they are suitable and for whom they are not.

School Business

Discipline Investment and Securities

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 2671/2770 Master of Commerce (Financial Planning) or 2690 Graduate Certificate in Commerce (Financial Planning).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate key concepts in prudential supervision of Australian superannuation;
2. Evaluate types of funds relevant to retirement;

- Evaluate the trends in retirement financing policies and their effects on providing advice;
- Apply to practical retirement decisions a sufficient understanding of the social security and age care systems;
- Apply the correctly assessed tax to superannuation, pension, fund administration and similar calculations.

FINC 7022 Applied Project (Finance and Property)

Credit Points 10

Legacy Code 201100

Coordinator Hassan Gholipour Fereidouni ([https://directory.westernsydney.edu.au/search/name/Hassan Gholipour Fereidouni/](https://directory.westernsydney.edu.au/search/name/Hassan%20Gholipour%20Fereidouni/))

Description Applied Project (Finance and Property) is the integrating capstone unit, which brings together the skills that property students have developed during the course in preparing a high quality professional report in the finance or property industry. The unit encourages property students to demonstrate their ability to solve multi-disciplinary problems in relation to current and future issues

that affect the finance or property sectors. The unit will also allow students to critically evaluate issues in their industry to determine and assess potential industry implications. The topics are determined from year to year by discussions between the individual student, the unit coordinator and the student's chosen supervisor.

School Business

Discipline Banking, Finance And Related Fields

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects MKTG 7003 - Applied Project (Finance and Property)

Restrictions

Students must be enrolled in a postgraduate Business program and must have successfully completed 40 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of knowledge within their area of study (Finance or Property) in conducting a major project;
2. Assess specific industry (Finance or Property) issues in depth, and to critically evaluate the body of knowledge relevant to a major industry topic;
3. Apply knowledge and skills to produce a report with recommendations relevant to an organisation or sector within the Finance or Property industries.

Subject Content

- selection of finance or property Project Topics
- Preparing A Project Contract
- conducting A literature Review
- sources of finance or property information
- Preparing A major Project report

Legacy Code 200487

Coordinator Wenchi Shou ([https://directory.westernsydney.edu.au/search/name/Wenchi Shou/](https://directory.westernsydney.edu.au/search/name/Wenchi%20Shou/))

Description This subject is designed to provide students with an advanced understanding of the various roles of a quantity surveyor. Students will develop an ability to apply the skills necessary to deliver both pre-contract and post-contract quantity surveying services.

School Eng, Design & Built Env

Discipline Surveying

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) GEOM 2001 OR BLDG 2002

Assumed Knowledge

Building construction including residential, light industrial and small commercial as covered in the subjects Building 1, Building 2 and Quantity Surveying 1.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise the abilities and core competencies of the quantity surveyor as stipulated by the Australian Institute of Quantity Surveyors (AIQS)
2. Measure building works involving multiple trades in accordance with the Australian Standard Method of Measurement of Building Works
3. Comment on building depreciation with respect to contract conditions
4. Comment on insurance and bonds requirement related to construction field
5. Prepare cash flow forecasts for a construction project
6. Prepare progress valuation certificates

Subject Content

- measurement
- feasibility Study - cost-in-use and cost reconciliation
- examine The financial and contractual aspects of construction tenders
- Tax Depreciation
- Progress certificate - valuation of variations, financial statement
- Cash flow forecast and final account
- Insurance and bonds
- Nomination, Assignment, Subletting, Novation and Subcontracting
- Dispute Resolution

Assessment

HLTH 0001 Health Care Environments (WSTC Prep)

Credit Points 10

Legacy Code 700226

Coordinator Charlise Bennett ([https://directory.westernsydney.edu.au/search/name/Charlise Bennett/](https://directory.westernsydney.edu.au/search/name/Charlise%20Bennett/))

Description Health care environments introduces students to foundation knowledge for health science level units in their degree. This includes supporting the independence and well being of clients, regardless of age or disability. Focus in this unit includes working legally and ethically, working with diverse people and following safe work practices. Effective communication is imperative, through written care plans, identifying what has been provided using client centred practice. This unit incorporates most core and elective units in the Certificate III in Individual Support. Students can pursue a qualification

through the College RTO in one of three specialisations- Disabilities, Ageing, and Home & Community.

School Western Sydney The College

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 0 Preparatory subject

Equivalent Subjects HLTH 0002 - Health Care Environments (WSTC)

Restrictions Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of providing individualised support in ageing, disability and home and community care (HACC) service provision
2. Propose methods to support the independence and wellbeing of individuals
3. Develop appropriate communication strategies to effectively work in health care settings
4. Strategise different methods to be inclusive of diversity
5. Evaluate legal and ethical dilemmas in health care settings
6. Recognise safe work practices for direct client care

Subject Content

1. Rationale and processes underpinning individual support, planning and delivery
2. Roles and responsibilities of different people providing individual support
3. Communicating for best client outcomes between professionals, carers, family members, other support workers and managers in health care
4. Legal and ethical considerations in the workplace
5. Safe work practices for client care
6. Supporting individuals and their wellbeing
7. Service delivery models, community practices and inclusion
8. Facilitating skills and practices to empower people with disabilities, in home care and ageing
1. Rationale and processes underpinning individual support, planning and delivery

HLTH 0003 Literacy in Health Science (WSTC Prep)

Credit Points 10

Legacy Code 700227

Coordinator Ryan Sidoti ([https://directory.westernsydney.edu.au/search/name/Ryan Sidoti/](https://directory.westernsydney.edu.au/search/name/Ryan%20Sidoti/))

Description This unit provides an introduction to the provision of health, services and fields associated with the provision of health in Australia. The unit covers a range of health science concepts, including what health literacy is and why it is important and other concepts such as acute care, chronic care, National Health Priority Areas (NHPAs) in Australia, and health education. The unit also introduces examples of terminology used for measuring the distribution and determinants of disease and illness in varied population groups (epidemiology). This includes terms such as health data, morbidity, co-morbidities, mortality, quality of life and disability adjusted life years. This unit aims to give students an understanding of health science practice in Australia both in city and rural settings and identifies minority group issues and challenges in accessing healthcare and services.

School Western Sydney The College

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 0 Preparatory subject

Restrictions Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define health literacy and understand its importance in making appropriate health decisions
2. Use common medical terminology as it relates to health
Demonstrate a foundational understanding of the impact that health education can have on health behaviour
3. Examine and evaluate minority group issues and challenges, regarding National Health Priority Areas, in Australia
4. Describe the role and impact of health professionals in primary and secondary schools regarding health literacy

Subject Content

1. Health Literacy- developing the capacity to obtain, process and understand basic health information and services needed to make appropriate health decisions.
2. Healthcare settings- an introduction to what healthcare encompasses and where it can be practised
3. National Health Priority Areas in Australia (including mental health)
4. Acute and chronic care defining the differences and how it impacts on individual health
5. Minority group issues and challenges in Australia in accessing health services and maintaining health
6. Health in schools- health professionals in schools both primary and secondary education
7. Health education purpose and dimensions to enhance individuals, families, community and society
8. Medical terminology- an introduction to and application of common word roots, prefixes and suffixes used in health science.
1. Health Literacy- developing the capacity to obtain, process and understand basic health information and services needed to make appropriate health decisions.

HLTH 0004 Organisation for Tertiary Study (WSTC)

Credit Points 5

Legacy Code 900089

Coordinator Charlise Bennett ([https://directory.westernsydney.edu.au/search/name/Charlise Bennett/](https://directory.westernsydney.edu.au/search/name/Charlise%20Bennett/))

Description This unit aims to familiarise students with some of the concepts and issues surrounding healthy living, particularly for young people in an environment far from parental support. It introduces students to academic skills and the expectations of learners in a tertiary environment while further developing their language skills. By the end of this unit, the goal is for students to have a better knowledge and understanding of how to improve their health, develop organisational skills and learn to manage their time. The unit also aims to develop their understanding of the effect of drug use on health and lifestyle. There will be a range of teaching and learning strategies used in this unit including working in groups. The aims of this unit are to develop an understanding of the concept of health and wellbeing; develop and maintain organisational skills for various areas of life; create a mindset and learn skills to manage time well.

School Western Sydney The College

Discipline Other Health

Student Contribution Band HECS Band 2 5cp

Level Undergraduate Level 0 Preparatory subject

Equivalent Subjects LGYB 1377 - Living Skills (UWSC)

Restrictions Only students enrolled at The College in Foundation Studies programs can enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify key health issues which confront young people in particular.
2. Define and explain some key concepts related to good health.
3. Identify healthy and unhealthy choices.
4. Demonstrate an ability to organise their study, eating, exercise and leisure schedules.
5. Collect information from AV sources.
6. Undertake research using the skills of collecting, analysing and organising information from a variety of sources.
7. Read at a pre tertiary level.
8. Interpret data in the form of text, graphs, statistics and illustrations.
9. Write notes, summaries and extended responses.
10. Use technology in their studies

Subject Content

1. Introduction

Introduction to the Academic program.

2. Goals and Time Management.

Personal goals, weekly planner, monthly assessment planner.

Choices that we have to make with our time and how these affect our lives and, in particular, tertiary study.

3. Food Matters

Nutritional information about foods and the impact of food on physical and mental health and well being.

4. Drug use and its impact.

Legal and illegal drugs. Personal and societal effects of drug usage in Australia.

5. Customs/Protective Behaviours

Understanding some Australian customs and identifying risky behaviour.

Some basic survival techniques.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

Legacy Code 700303

Coordinator Charlise Bennett ([https://directory.westernsydney.edu.au/search/name/Charlise Bennett/](https://directory.westernsydney.edu.au/search/name/Charlise%20Bennett/))

Description The Health Science Professional is designed to enhance Academic English skills whilst exploring different pathways available in the Bachelor of Health Science degree, and the majors associated with Testamur majors including Clinical Science, Health Promotion, Health Services Management, Public Health and Recreation Therapy. The unit will lead students through the compliance requirements of their intended pathway, and map out the process of meeting these requirements. Students are encouraged to develop their ideas and understanding of health sciences and the areas of specialisation they can pursue.

School Western Sydney The College

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 0 Preparatory subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Initiate the compliance needs for appropriate key programs.
2. Identify the direct pathway through to the completion of studies with key programs in health science and consider ways to enhance opportunities for employability at graduation.
3. Identify and summarise the main points of arguments.
4. Demonstrate an ability to research, critically read, analyse and make meaning from academic texts.
5. Produce a well-structured, logical, coherent and cohesive response to writing tasks using appropriate academic language structures.
6. Understand the importance of Interprofessional Education (IPE) in the Health Sciences and develop reflective professional practices.
7. Demonstrate an understanding of the key policies and procedures relevant to students at The College and Western Sydney University, such as those around Academic Integrity, extensions and special consideration.

Subject Content

1. Unit and course introduction
2. Critical reading and conventions of academic writing
3. Inter-professional learning
4. The structure of academic argument
5. Health, growth and development
6. Working with children and families
7. Compliance for student placements
8. Becoming a reflective practitioner
9. Health science professions
10. Employability, soft skills and volunteering
11. Communication STEPPS & ISBAR
12. Making the most of fieldwork learning opportunities
13. Working in diverse settings
14. Compliance meeting and reflection

HLTH 1001 Foundations of Research and Evidence-Based Practice

Credit Points 10

Legacy Code 400863

Coordinator Nerida Klupp ([https://directory.westernsydney.edu.au/search/name/Nerida Klupp/](https://directory.westernsydney.edu.au/search/name/Nerida%20Klupp/))

Description This unit considers the reasons and roles for evidence-based practice and research in healthcare, introducing students to core concepts and relevant terminology. Skills are developed for asking clinical or professional healthcare questions and translating these skills into search strategies for finding evidence. To make sense of that evidence, students are introduced to quantitative and qualitative research methods, types of data, how data are described and how biostatistics is used to provide meaning to research data.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects HLTH 1002 - Foundations of Research and Evidence-Based Practice (UWSC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the background and reasons for evidence-based practice and health research
2. Design and perform an advanced search strategy for a PICO
3. Identify types and levels of evidence within the healthcare research continuum
4. Describe the ethical responsibilities for EBP and health research
5. Explain how data may be described and summarised in health research

6. Describe the core statistical concepts used to provide meaning from health research data
7. Integrate evidence into academic writing

Subject Content

1. Introduction to evidence-based practice
 - Critical thinking: Type 1 and 2 system thinking
 - The role of EBP: managing human bias, information and uncertainty
 - Ethical and professional considerations in EBP
 - 5 Step EBP process
 - Steps 1/2: Formulating questions, Sources of evidence, Search strategies
 - using evidence in academic writing
2. Introduction to research methods
 - The role of research: enquiry and acquisition of knowledge
 - Qualitative and quantitative research designs
 - levels of evidence
 - Core research concepts (e.g. bias, Validity, reliability)
 - Ethical considerations for research
3. Introduction to biostatistics
 - types of data
 - summarising and describing data
 - interpreting common inferential results
 - clinical and statistical significance
1. Introduction to evidence-based practice (EBP)
 - Steps 1-3: Formulating questions; Sources of evidence; Search strategies

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

Coordinator Rachael Vella ([https://directory.westernsydney.edu.au/search/name/Rachael Vella/](https://directory.westernsydney.edu.au/search/name/Rachael%20Vella/))

Description This unit introduces students to the paramedic profession and its scope of practice in Australia. It includes exploration of the roles and responsibilities of paramedics in the context of the changing health environment. Ethical issues and relevant legal and regulatory requirements will also be discussed. Students will be introduced to the key concepts of paramedicine and to the complexity of normal development and its relationship to the processes of health science.

School Health Sciences

Discipline Paramedical Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Restrictions Students must be enrolled in 4669 Bachelor of Health Science (Paramedicine).

Learning Outcomes

On successful completion of this subject, students should be able to:

- Describe paramedicine with respect to its purpose, role and contribution to health care
- Apply basic communication skills to communicate effectively with the client, peers and academic staff and prepare reports

- Employ critical reflection skills in paramedic contexts
- Practice paramedicine in a safe and ethical manner
- Describe the regulatory requirements for paramedicine in Australia and apply them to case scenarios
- Analyse case scenarios for typical paramedic interventions

Subject Content

- The scope and practice of pre-hospital care and paramedicine
- The roles and responsibilities of paramedics
- The history, culture, organisational structure, policies and procedures of Ambulance Services
- Communication and reporting in paramedicine and related competencies
- Critical reflection in paramedicine
- Groups served by paramedics and their special needs
- Ethics and regulatory requirements in paramedicine
- Future directions for paramedicine

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Reflection	1 x 400 words (10%) 1 x 600 words (20%)	30	N	Individual
Presentation	10 mins	30	N	Individual
Final Exam	1 hour	40	N	Individual

HLTH 1006 Movement and Skill Development

Credit Points 10

Legacy Code 400891

Coordinator Kylie Steel ([https://directory.westernsydney.edu.au/search/name/Kylie Steel/](https://directory.westernsydney.edu.au/search/name/Kylie%20Steel/))

Description This unit examines the scientific basis for movement and sports skill development. An understanding of the principles of movement and motor skill and how they apply to performance is examined through a range of movement tasks required for track and field athletics and some team sports. Laboratory activities will focus upon the basic movement tasks of throwing, jumping, balancing, striking, running and rotary activities. An examination of the instruments used in efficient movement analysis is undertaken.

School Health Sciences

Discipline Human Movement

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Pre-requisite(s) BIOS 1022 OR

BIOS 1035 AND

SPRT 1001

Incompatible Subjects HLTH 1008 - PDHPE Exploring Movement Skills

HLTH 3013 - PDHPE Efficient Movement Principles

Restrictions

Students must be enrolled in program 4659 Bachelor of Health Science (PDHPE), 4549 - Bachelor of Health Science (PDHPE), 4742 Bachelor of Health Science (Health and Physical Education)-Pathway to Teaching (Secondary), 4747 Bachelor of Health Science (Health and Physical Education) or 6001 Diploma in Health Science/Bachelor of Health Science (Health and Physical Education)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the basic anatomy and physiology of the body necessary as a base for efficient movement.
2. Explain basic movement and skill acquisition principles as applied to human movement, with reference to all sports.
3. Demonstrate video analysis skills in relation to sport skill and game analysis.
4. Apply scientific principles in the improvement of motor skill performance.
5. Evaluate the motor skill performance of athletes of varying levels.
6. Identify the basic physical and mechanical principles which underlie movement.

Subject Content

1. Revision of skeletal and muscular systems.
2. Movement principles: balance, force, levers, motion, momentum; associated with track and field athletics and some team sports.
3. Mechanical factors affecting motion in sport: friction, air, water resistance, gravity, impact, spin, elasticity.
4. Application of movement principles through practical sessions in a range of sports.
5. Evaluation of skill performance ? isolating specific motor patterns, determining and applying movement principles (coaching points), classifying skill to enhance performance, learning movement skills.
6. Cinematography ? use of videos for efficient movement analysis of sporting skills.
7. Practice and coaching considerations to enhance the acquisition and development of skills.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Midsemester Quiz	2 hours	30	N	Individual

End Semester Quiz	2 hours	30	N	Individual
Lab Book	1,500 words	40	N	Individual

HLTH 1009 Paramedic Practice 1

Credit Points 10

Legacy Code 401067

Coordinator Buck Reed ([https://directory.westernsydney.edu.au/search/name/Buck Reed/](https://directory.westernsydney.edu.au/search/name/Buck%20Reed/))

Description This unit allows the student to develop professional and clinical skills and techniques in preparation for paramedic practice. Students will be exposed to manual handling techniques to enable safe lifting and movement of patients and equipment, and discuss principles of infection control and scene safety. Students will learn how to undertake a holistic patient assessment and perform basic diagnostic tests. Students will have the opportunity to practice new skills and become oriented to the prehospital setting during clinical placements on non-emergency transport ambulances, preparing them for an extended emergency ambulance clinical placement in the following semester.

School Health Sciences

Discipline Paramedical Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Pre-requisite(s) HLTH 1003

Restrictions

Students must be enrolled in 4669 Bachelor of Health Science (Paramedicine).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply principles of safe practice including manual tasks, infection control, scene safety and scene management.
2. Demonstrate techniques for basic patient assessment and history taking.
3. Interpret basic findings arising from patient assessment, physical examination and history taking
4. Interpret basic and intermediate ECG data

5. Demonstrate clinical reasoning relating to ECG interpretation, dysrhythmia management, and pain assessment and management.
6. Demonstrate an effective patient handover.
7. Demonstrate communication, manual handling and patient interaction skills in a non-emergency transport setting.

Subject Content

1. Infection control & hand hygiene practices
2. Manual handling of equipment and patients
3. Principles of basic scene assessment and safety
4. Patient assessment and history taking
5. Assessment and Management of Pain
6. Interpretation and management of basic ECG dysrhythmias
7. Patient Handover
8. Applied mathematics and medical terminology for paramedicine
9. Placements (spread across the semester). Supervised, 3 days of placement with non-emergency patient transport ambulance crew

Special Requirements

Legislative pre-requisites

NOTE: Due to Covid Restrictions, the First Aid Requirement is currently not needed.

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

HLTH 1012 Evidence in Health

Credit Points 10

Legacy Code 401383

Coordinator Nerida Klupp (https://directory.westernsydney.edu.au/search/name/Nerida_Klupp/)

Description This unit will introduce skills for finding and using the best available evidence in health. This begins with understanding thinking systems, biases and why we often don't accept, or respond, to facts, science and evidence. Students will learn the evidence-based practice process to formulate questions and find appropriate and relevant evidence from the unending amount of information available. The unit covers key concepts in how to read and understand a research paper. Students will develop skills for communicating evidence to strengthen arguments in academic writing and professional practice.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects HLTH 1001 - Foundations of Research and Evidence-Based Practice HLTH 1002 - Foundations of Research and Evidence-Based Practice (UWSC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise personal thinking styles and associated biases;
2. Describe the reasons for the 5 steps of evidence-based practice;
3. Design a sensitive and specific PICO search strategy to find best available evidence;
4. Identify type, level and key research concepts in journal articles;

5. Integrate strength and relevance of evidence findings into academic writing.

Subject Content

1. Critical thinking
 - introduction to epistemology
 - System 1 and 2 thinking
 - Heuristics, biases and certainty
 - ?gWhy we don't believe The facts?h
 - ethics and evidence
 - reflective practice
2. Evidence-based Practice (EBP) Process
 - 5-Step EBP process
 - Step 1 Formulating questions
 - Step 2 Sources of evidence
 Search strategies
 Information literacy
 Reader bias
3. How to read a paper
 - Article sections
 - types of research
 - levels of evidence
 - key research concepts (e.g. measurement, reliability, Validity, causality, probability)
4. Communicating evidence
 - Integrating evidence in writing
 - evidence justification
 - evidence summaries

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Finding Evidence Exam	1 hour	15	N	Individual
Evidence Selection Assignment	No word limit for PICO table/Search strategy/ Selection criteria table. Selection justification = 100 words.	25	N	Individual
Evidence Summary Assignment	800 words	25	N	Individual
Final Exam	2 hours	35	N	Individual

HLTH 1013 Professional Competencies in Health

Credit Points 10

Legacy Code 401396

Coordinator Caterina Tannous ([https://directory.westernsydney.edu.au/search/name/Caterina Tannous/](https://directory.westernsydney.edu.au/search/name/Caterina%20Tannous/))

Description This unit, taken in the first session for commencing students in health science courses, offers an introduction to

foundation knowledge and skills required for future practice in the health workforce. Students will gain an understanding of their roles and will develop skills required for safe, responsible and ethical practice required as health professionals. There is a specific focus on developing students' understanding of the roles of others in the interprofessional health care team as a way of establishing - professional identity. The International Classification of Functioning provides a framework within which client centred and community focussed approaches to practice is discussed. The unit also uses a 'student capital' framework to facilitate reflection of academic capability and development of skills required for success at university.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects HLTH 1011 - Professional Health Competencies
HLTH 1010 - Professional Health Competencies

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Reflect and identify academic and professional capacity needs;
2. Practice information and academic literacy skills for ensuring academic success in a health science degree;
3. Describe and apply principles to ensure ethical and responsible practice in the current academic and future health professional environment;
4. Use global models of health and well-being concepts to demonstrate a holistic understanding of health within the framework of person-centred practice;
5. Describe and apply principles of safe practice in the health sciences;
6. Describe and apply the legal responsibilities and obligations of health science professionals;
7. Explain and describe approaches used in inter-professional health science teams.

Subject Content

- 'Student Capital' framework to promote reflection on academic and professional capacity needs
- transition support pods based on learning needs - information literacy, academic integrity, academic literacy
- Definition of profession and professionalism, special requirements of placements
- Ethical considerations and professional codes of conduct
- legal framework in The health sciences - duty of care, Negligence, Risk minimisation, informed consent and privacy. legal requirements of documentation
- mandatory responsibilities - child protection, Abuse and neglect
- professional Registration
- work health and safety - infection control/hand wash and manual handling
- international Classification of functioning (ICF) framework
- person-centred practice
- Interprofessional Roles and The health science team
- professional identity

3. Describe and apply principles to ensure ethical and responsible practice in the current academic and future health professional environment
4. Use global models of health and well-being concepts to demonstrate a holistic understanding of health within the framework of person-centred practice
5. Describe and apply principles of safe practice in the health sciences
6. Describe and apply the legal responsibilities and obligations of health science professionals
7. Explain and describe approaches used in inter-professional health science teams

Subject Content

1. 'Student Capital' framework to promote reflection on academic and professional capacity needs
2. Transition support pods based on learning needs - Information Literacy, Academic Integrity, Academic Literacy
3. Definition of profession and professionalism, special requirements of placements
4. Ethical Considerations and professional codes of conduct

5. Legal Framework in the Health Sciences - Duty of care, negligence, risk minimisation, informed consent and privacy. Legal requirements of documentation

6. Mandatory responsibilities - Child protection, Abuse and neglect

7. Professional registration

8. Work Health and Safety - Infection control/hand wash and Manual handling

9. International Classification of Functioning (ICF) Fra

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Portfolio	750 words	20	N	Individual
Summary	750 words	20	N	Individual
Case Study	1,500 words	30	N	Individual
Quiz	45 minutes each	20	N	Individual
Participation	10 weeks	10	N	Individual

HLTH 1016 Professional Competencies in Health (UG Cert)

Credit Points 10

Legacy Code 500054

Coordinator Maria Dent ([https://directory.westernsydney.edu.au/search/name/Maria Dent/](https://directory.westernsydney.edu.au/search/name/Maria%20Dent/))

Description This unit offers an introduction to foundation knowledge and skills required for future practice in the health workforce. Students will gain an understanding of their roles and will develop skills required for safe, responsible and ethical practice required as health professionals. There is a specific focus on developing students' understanding of the roles of others in the interprofessional health care team as a way of establishing professional identity. The International Classification of Functioning provides a framework within which client centred and community focussed approaches to practice is discussed. The unit also uses a 'student capital' framework to facilitate reflection

of academic capability and development of skills required for success at university.

Restrictions Students need to be enrolled in one of the following programs: 7171 Undergraduate Certificate in Public Health Support, 7172 Undergraduate Certificate in Health Services Management, 7173 Undergraduate Certificate in Aged Care Support, 7176 Undergraduate Certificate in Disability Care Support

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Reflect and identify academic and professional capacity needs
2. Practice information and academic literacy skills for ensuring academic success in a health science degree
3. Describe and apply principles to ensure ethical and responsible practice in the current academic and future health professional environment
4. Use global models of health and well-being concepts to demonstrate an holistic understanding of health within the framework of person-centred practice
5. Describe and apply principles of safe practice in the health sciences

HLTH 2001 A Field Study: Comparative Studies of Health Care Delivery

Credit Points 10

Legacy Code 400958

Coordinator Shyama Ratnayake ([https://directory.westernsydney.edu.au/search/name/Shyama Ratnayake/](https://directory.westernsydney.edu.au/search/name/Shyama%20Ratnayake/))

Description Australia has strict border measures in place to protect the health of the Australian community. Travel restrictions between Australian states and territories and in some remote areas of Australia are in place to help prevent the spread of COVID-19. Further to this, there is a ban on overseas travel from Australia. You can't leave Australia unless you get an exemption from the Department of Home Affairs (source - <https://covid19.homeaffairs.gov.au/leaving-australia>). Due to this ban on international travel, this unit will not be offered 2021 Summer A. The focus of this unit is to provide nursing students with the problem-solving skills required in assessing and caring for people who are living in poverty in remote or rural areas in Australia and/or internationally. This unit is designed to enable students to develop cultural awareness and understanding of health care delivery and contemporary issues confronting health care for people who are living

in remote or rural areas in Australia and/or internationally. Students will be eligible for up to 80 hours of approved clinical hours following successful completion of the clinical assessment tool by an accredited registered nurse.

School Nursing & Midwifery

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Restrictions Students must be enrolled in 4691 Bachelor of Nursing or 4693 Bachelor of Nursing (Advanced) or 4780 Bachelor of Nursing - WSU Online program/s, and must have passed 80 credit points of the undergraduate Nursing degree at Western Sydney University. Permission required to enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Compare the health care delivery in Western Sydney of regional/ remote areas of Australia or Internationally
2. Identify major influences on, and common challenges to, health care delivery
3. Describe the relationship between the specific characteristics of health care delivery and health status outcomes for populations
4. Compare and contrast the health care delivery of Western Sydney and the country of study in this elective
5. Identify ethnic and cultural issues in the provision of culturally sensitive health care
6. Observe and/or participate in clinical activities of the health care delivery in the country of study
7. Demonstrate an awareness of their own culture and the culture of others

Subject Content

1. Health care delivery components: health care providers, health care consumers, health care institutions and organisations
2. Major influences: environmental conditions, demography of the population, cultural factors, social organisation, economic factors, political system
3. Common challenges: accessibility, affordability, ageing population, changing ethnic composition of populations, chronic diseases and increasing morbidity, commercialised health care, consumer demands, cost control, ethical limits (e.g. on technological growth and innovation), health care quality, health care workforce (e.g. training, regulation, shortage), overspecialisation and focus on tertiary care (? ghospit

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western

Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Equivalent Subjects BIOS 2004 - Biomechanics and Kinesiology HLTH 2008 - Introduction to Biomechanics

Restrictions Students must be enrolled in 4658 Bachelor of Health Science (Sport and Exercise Science), 4661 Bachelor of Health Science/Master of Podiatric Medicine, 4662 Bachelor of Health Science/Master of Physiotherapy, 4706 Bachelor of Physiotherapy, 4707 Bachelor of Physiotherapy (Honours), 4708 Bachelor of Podiatric Medicine or 4709 Bachelor of Podiatric Medicine (Honours)

Assumed Knowledge

It is assumed that students have knowledge of structural and functional anatomy of the human body. Students also need to be able to apply basic concepts in maths and physics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define and explain terms, principles and units of measurement that apply to the biomechanics of motion, sport and exercise.
2. Apply biomechanical principles as they relate to the description and analysis of motion, sport and exercise.
3. Solve quantitative problems related to kinematic and kinematic concepts.
4. Describe and illustrate examples of linear and angular analogues of Newton's Laws of motion.
5. Identify and explain fluid mechanics principles as they apply to motion.
6. Illustrate and explain the biomechanical properties of human tissues, how these tissues respond to loading and how problems to the tissue may affect tissue functioning.
7. Recall and describe concepts relating to the biomechanical analysis human gait and locomotion

Subject Content

1. Introduction to Biomechanics
 - terminology & definitions
 - principles of Motion
 - Qualitative Vs quantitative Motion
 - SI units
2. Introduction to Physics

- Mass, inertia, laws of Motion, density, Force, torque, impulse
 - mechanical loading
 - contact and non-contact forces
 - Friction
 - introduction to levers
 - levers in The human body
 - centre of gravity, Balance and stability
3. Biomechanics of Human Tissue
 - definitions
 - plasticity and Elasticity
 - stress and strain
 - Shear-strain diagrams
 - bone
 - muscle and tendon
 - Articular cartilage
 - synovial joints
 - effects of immobilisation
 - effects of disease processes
 4. Mechanics in action
 - Moments, Moments of inertia, momentum
 - conservation of momentum
 - Rotatory Equilibrium
 - Collisions, impact and impulse
 - Projectile Motion: biomechanics of throwing and kicking
 5. Fluid Mechanics
 - fluid forces
 - Buoyancy, lift and drag
 - Air patterns and ball spin
 6. Linear and angular Kinematics
 - scalar, Vectors and tensors
 - Force Vectors concept
 - torque and moment Vectors concept
 - normal and sheer stresses
 - introduction to angular and linear kinematics
 - collecting kinematic data
 7. Linear and angular Kinetics
 - levers
 - axes of rotation
 - Free body diagrams
 - Calculating kinetics
 8. The Gait Cycle
 - events in The gait cycle
 - muscle activation and sequencing
 - joint range of Motion
 - gait cycle in running
 - Gait cycle in patient populations (eg amputees; rheumatoid arthritis, older population)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HLTH 2004 Exercise Bioenergetics

Credit Points 10

Legacy Code 400883

Coordinator Shona Papalia ([https://directory.westernsydney.edu.au/search/name/Shona Papalia/](https://directory.westernsydney.edu.au/search/name/Shona%20Papalia/))

Description This unit investigates exercise metabolism and related genomics and proteomics in an integrated fashion. Covering: energy pathways; metabolic control; metabolism, oxygen consumption and respiratory quotient relationships; metabolic responses to acute and chronic exercise; pathway contributions to exercise; metabolic limitations to exercise; metabolic contributions to fatigue; metabolic acidosis, cellular and systemic implications of metabolic thresholds, conditions that can alter cellular metabolism. Whilst skeletal muscle metabolism is the primary focus, liver and adipose tissue metabolism are also considered as are anabolic pathways. Students will be exposed to basic biochemical assays of interest to the exercise physiologist.

School Health Sciences

Discipline Human Movement

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) NATS 1009 AND
NATS 1010 AND
SPRT 1001 AND
HLTH 1001

Equivalent Subjects BIOS 2003 - Bioenergetics of Exercise

Restrictions Students must be enrolled in 4658 Bachelor of Health Science (Sport and Exercise Science).

Assumed Knowledge

The knowledge and skills covered in the pre-requisite subjects. In addition students are expected to have a mathematical ability equal to a passing level in the BOSTES (NSW) numeracy test. See <http://www.boardofstudies.nsw.edu.au/rosa/literacy-and-numeracy-tests.html>. Students whose mathematical ability is not at this level or who have not used such mathematics recently are encouraged to seek assistance early through the Mathematics Educational resource Hub (MESH). <http://www.westernsydney.edu.au/mesh/mesh>

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret the information in chemical equations, formulae, structures, as well as understand the general concepts involved in biological applications of thermodynamics, genomics, proteomics and metabolomics.
2. Explain the mechanism of action of enzymes and factors that affect rate of enzyme-controlled reactions.

3. Describe the structure and functions of DNA and RNA, the processes of replication, translation and transcription along with how rates of these to processes can be altered by exercise.
4. Detail the major concepts of aerobic, alactic and lactic energy production including regulation and integration of the metabolic pathways, as well as understand the different terminology for these energy systems.
5. Detail the factors that influence the contribution of carbohydrate, lipid and protein metabolism to the supply of energy for a range of exercise and conditions.
6. Explain the relationships between metabolism, oxygen consumption and respiratory quotient, metabolic rate, blood lactate, pH and metabolic thresholds.
7. Explain the biochemistry of metabolic acidosis and its implication for exercise performance.
8. Proficiently use basic biochemical testing equipment and understand the basis for protocol, objectivity, reliability and validity.
9. Explain the relevance of and interpret an array of biochemical assays used as part of integrated exercise and fitness testing and physiological research.
10. Calibrate equipment used in exercise biochemistry including gas analysers, blood lactate analysers.

Subject Content

Note: For all areas mentioned below the following will be covered: gender differences and changes over the life span.

1. Introduction to Chemistry, Biochemistry and Molecular Biology
 - a. Chemical symbols, formulae, structure representation, bonding, formula mass, moles, pH, ions, solubility, reaction equations, equilibrium vs steady state vs completion.
 - b. Terminology in context metabolism, catabolic, anabolic, genomics, proteomics, metabolomics
 - c. High Energy phosphate and High Energy Carriers.
 - d. Chemical thermodynamics
 - Free energy
 - Enthalpy
 - Entropy
 - spontaneous reactions
 - Catalysts effect on
 - energy and bonds
 - e. Oxidation reduction reactions
 - f. Energy substrates, their structures and storage in humans: CHO, Fat, protein.
 - g. Enzyme structure function and factors influencing rate of enzyme controlled reactions.
 - h. Nucleic acids and gene expression
 - structure and function
 - replication, translation and transcription
 - The basics of The processes
 - Altering rates of
 - Importance in energy metabolism
 - impact of Exercise on current status of research
 - i. The work energy relationship at a cellular level
 - mechanical work
 - muscle contraction energy metabolism link
 - Electrical work.
2. Skeletal Muscle Energy Production Pathways and exercise
 - a. ATP/PC (Alactic) system
 - b. Anaerobic Glycolysis
 - c. Aerobic pathways
 - Aerobic glycolysis
 - Tricarboxylic acid cycle
 - Oxidative Phosphorylation and The Electron transport system
 - Lipolysis and Beta-oxidation of Fats

- protein and Amino acid metabolism
- d. Bioenergetic shuttle systems and the adenylate kinase & deaminase reactions
- e. Measuring contributions of pathways to energy of exercise
 - Oxygen Consumption, Respiratory quotient, metabolic rate, blood lactate, pH and metabolic thresholds (including calculations)
 - Equipment calibration and protocols - Accuracy, Objectivity, reliability, validity; Limitations
 - interpretation of results
- f. Metabolic responses to exercise
 - Acute Exercise - The sprinter, The marathon runner and ultra-marathon runner
 - chronic Exercise - sprint and Endurance running training
 - Factors influencing substrate usage in Exercise
 - metabolic acidosis
 - The fate of lactate
 - Metabolisms Contributions to central and peripheral fatigue
- g. Energy metabolism integration and control
- 3. Differences in energy metabolism between tissues and Overview of other processes related to energy metabolism and exercise.
 - a. Muscle and liver
 - Gluconeogenesis
 - glycogen Synthesis
 - b. Adipose tissue and Fatty Acid synthesis
 - c. Amino acid and pro

Assessment

HLTH 2005 Exercise Prescription I

Credit Points 10

Legacy Code 401143

Coordinator Bobby Cheema ([https://directory.westernsydney.edu.au/search/name/Bobby Cheema/](https://directory.westernsydney.edu.au/search/name/Bobby%20Cheema/))

Description This subject is designed to give students an understanding of and experience in exercise prescription and fitness program construction for the general population (apparently healthy) across all ages and genders. It will focus on the development of general health-related exercise programs, which improve aerobic and anaerobic fitness, muscular strength and endurance, flexibility and body composition. Students will design, implement, supervise and evaluate a self-prescribed exercise program, and instruct training sessions for fellow students.

School Health Sciences

Discipline Human Movement

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) HLTH 2003 AND SPRT 2002

Equivalent Subjects HLTH 2006 - Exercise Prescription for General Populations

Restrictions

Students must be enrolled in 4658 - Bachelor of Health Science (Sport and Exercise Science).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate the principles of exercise prescription with particular emphasis on aerobic training, resistance training, and flexibility training methods
2. Describe how ageing and physical inactivity impact upon health-related physical fitness and how exercise can be used to mitigate these effects
3. Describe the absolute and relative contraindications to exercise participation and criteria to terminate fitness tests of all types
4. Administer and interpret a range of pre-exercise health screening tools to determine the risk for an individual and appropriate action
5. Select, implement, interpret, and modify standard health-related physical fitness tests for low risk individuals
6. Design, implement, supervise, and evaluate training programs in the primary areas of exercise prescription for low risk clients using in-person and telepractice service delivery methods

Subject Content

1. The health benefits and risks of exercise
2. Pre-exercise screening, testing and interpretation
3. General principles of exercise prescription and exercise program development
 - a. aerobic training
 - b. flexibility training
 - c. high-intensity interval training
 - d. resistance training
 - e. circuit training and group-based exercise programming
4. Fundamentals of periodization

5. Exercise prescription across the lifespan
6. Exercise prescription for weight management
7. Resistance training prescription for children and adolescents
8. Exercise prescription during pregnancy
9. Alternative training methods, yoga
10. Design, implement, supervise and evaluate effective exercise prescriptions using in-person and telepractice service delivery methods

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HLTH 2006 Exercise Prescription for General Populations

Credit Points 10

Legacy Code 400326

Coordinator Chloe Taylor ([https://directory.westernsydney.edu.au/search/name/Chloe Taylor/](https://directory.westernsydney.edu.au/search/name/Chloe%20Taylor/))

Description In 2016, this unit is replaced by 401143 - Exercise Prescription I. The exercise prescription area is designed to give students an understanding of and experience in exercise prescription and fitness program construction for the general population of all ages and both genders, including pre exercise screening and fitness testing. It will focus on the development of general health related fitness programs, which improve aerobic and anaerobic fitness, flexibility, muscular strength and endurance, including resistance training. Students will design, implement and evaluate a self-prescribed exercise program as well as provide one-to-one training sessions for fellow students.

School Health Sciences

Discipline Human Movement

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) HLTH 2008 AND BIOS 2011 AND BIOS 2037

Restrictions Students must be enrolled in 4658 Bachelor of Health Science (Sport and Exercise Science).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply knowledge of the principles of exercise prescription with particular emphasis on aerobic training, resistance training, and flexibility training methods.
2. Describe how ageing and physical inactivity impact upon health-related physical fitness and how exercise can be used to mitigate these effects.
3. Describe the absolute and relative contraindications to exercise participation and criteria to terminate fitness tests of all types.
4. Administer and interpret a range of pre-exercise health screening tools to determine the risk for an individual and appropriate action.
5. Select, calibrate, implement and interpret (and modify) standard health-related physical fitness tests for low risk individuals.
6. Design, supervise, and evaluate training programs in the primary areas of exercise prescription (outlined in unit content) for low risk clients.

Subject Content

1. Review:
 - Validity, reliability, accuracy
 - Exercise measurement and Monitoring equipment set up use and calibration
 - warm-up, cool-down, principles of training
 - Progression, maintenance, overtraining, aspects of fitness
 - Measuring BP, HR and RPE; and their relationships to work rate
 - components of fitness
 - types of Exercise
2. Organisational and legal aspects
 - informed consent
 - client information and record booklets
 - OH&S - Inspections, Risk assessments, Risk reduction, Standard Operating procedures
 - Prohibited persons
 - Privacy acts ? PIPPA and HRIPA
3. Health Benefits and Risks of exercise
 - Benefits of Exercise - health related fitness, performance related fitness (everyday life tasks, work, recreation), quality of life
 - Absolute and relative contraindications
 - criteria for terminating tests
 - signs of excessive strain
4. Defining the term General Populations
5. Aerobic exercise intensity setting and monitoring ? advantages and limitations
 - HR - H_{max} (measured vs predicted, formulas to calculate for different exercise modalities), Heart Rate Reserve
 - RPE
6. Pre exercise screening
 - A best practice model Vs PARQ Vs other commonly used tools
7. Fitness Testing
 - common tests and their physiological basis
 - Effect of environmental and subject (client) factors
 - fitness test selection, implementation and interpretation of results
 - modifications based on Age, gender
 - medical, environmental and procedural Risk Factors
8. Applying Biomechanics in exercise prescription
 - identifying movement patterns
 - common errors in body Alignment & technique

- identifying potential risks of injury associated with using common Exercise equipment and types
 - prescribing appropriate substitutions for unsafe exercises
9. Guidelines for training apparently healthy individuals for health related improvements
- Endurance
 - Anaerobic capacity
 - resistance training - Muscular strength, Endurance, power and hypertrophy
 - flexibility
 - Coordination and motor control - Falls prevention
10. Structure of training sessions
- warm up, conditioning, cool down
 - order within conditioning component
 - group Vs individual
 - formal Vs informal settings
11. Phases of training
- initial, improvement, maintenance
12. Exercise Program Evaluation
13. Exercise over the lifespan ? children, adolescents, young adults, older adults
- Acute responses to Exercise and adaptations to training
 - implications for Exercise prescription
 - Age related Musculoskeletal and cardiovascular problems ? implications for Exercise programs
14. Gender and Exercise Prescription
- Male female differences and similarities
15. Pregnancy
- Maternal changes
 - effects on mother and foetus
 - guidelines
16. Applying Psychosocial knowledge and skills in fitness testing and program implementation
- Motivating clients
 - maximising adherence and compliance
 - communication skills
 - goal setting
17. Referring clients to other health professionals

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have:

- 1) submitted a Student Undertaking Form and have applied for a National Police Certificate;
- 2) submitted Working with Children Check Student Declaration;
- 3) possess a current WorkCover Authority approved First Aid Certificate.

Teaching Periods

HLTH 2007 Fundamentals of Medical Concepts and Terminology

Credit Points 10

Legacy Code 300950

Coordinator Jim Basilakis ([https://directory.westernsydney.edu.au/search/name/Jim Basilakis/](https://directory.westernsydney.edu.au/search/name/Jim%20Basilakis/))

Description This unit is designed to provide the student with the knowledge necessary to understand the information contained in the health record, to function in a medical environment through an understanding of the fundamentals of medicine and to effectively use disease classification systems. Within each body system, the student will study anatomy and physiology, disease processes and their treatment, and medical terminology (disease titles, symptomatic terms, surgical terms and investigations). The unit will also focus on specialist topics such as mental health, obstetrics, paediatrics, infectious diseases, oncology, radiotherapy, nuclear medicine, diagnostic and surgical interventions.

School Computer, Data & Math Sciences

Discipline Other Health

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) INFS 2004

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse clinical terms structurally into roots, suffixes, prefixes and combining forms;
2. Accurately spell and pronounce clinical terms;
3. Explain the basic structure, function, disease processes and treatment relating to the major body systems;
4. Identify commonly used drugs and understand how to utilise the Monthly Index of Medical Specialities (MIMS) as a pharmaceutical prescribing reference guide.
5. Use and interpret clinical terms documented in health records.

Subject Content

1. Introduction to medicine and medical terminology;
2. Terms and conditions relating to all the body systems;
3. Terms relating to interventions.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Viva Voce	10 Mins	20	N	Individual
Viva Voce	10 Mins	20	N	Individual
Viva Voce	5 minutes per 15 student		N	Individual
Viva Voce	20 minutes	45	N	Individual

HLTH 2009 Mental Health and Substance Abuse

Credit Points 10

Legacy Code 401095

Coordinator Paul Simpson ([https://directory.westernsydney.edu.au/search/name/Paul Simpson/](https://directory.westernsydney.edu.au/search/name/Paul%20Simpson/))

Description This unit introduces students to mental health and behavioural presentations, and emergencies arising from legal and illegal substance use. Students will explore the epidemiology, pathophysiology, manifestation, recognition, assessment and management of common mental health problems, behavioural presentations, and cases involving legal and illegal drug use in the context of paramedicine. Students will practice techniques for managing these presentations from an interpersonal communication perspective and a clinical management perspective. Acute and sub-acute presentations will be discussed, with specific attention given to the role of the paramedic regarding risk assessment, counselling, and health promotion. Legalities associated with management

of behaviourally disturbed or cognitively impaired patients will be discussed, and issues relating to multi-agency care, collaboration and co-operation will be examined.

School Health Sciences

Discipline Paramedical Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) HLTH 1009

Co-requisite(s) HLTH 2017

Restrictions Students must be enrolled in 4669 Bachelor of Health Science (Paramedicine).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the role of paramedics with regard to health promotion and injury prevention for patients with mental health, drug or alcohol related presentations
2. Describe techniques for undertaking mental health and behavioural assessment and management in the prehospital environment
3. Describe the clinical presentations associated with commonly encountered substances
4. Apply patient assessment and clinical skills to cases involving mental health or substance affected patients
5. Discuss the role of paramedics in the inter-professional care of mental health patients
6. Discuss the professional, ethical and legal considerations surrounding management of a patient with a mental health or substance affected presentation

Subject Content

Mental health and behavioural (MH&B)

1. Epidemiology of MH and behavioural presentations and structure of MH care systems in Australia
 2. Legal, cultural and social considerations associated with MH&B presentations
 3. Communication with, and assessment of, MH&B patients
 4. Anxiety Disorders, Mood Disorders, Psychotic Disorders, Personality Disorders, Dementia, delirium and confusion
- Drug & substance use/abuse
1. Epidemiology of alcohol and drug use in Australia
 2. Assessment, diagnosis and management of acute drug or substance use
 3. Alcohol intoxication and alcoholism
 4. Common illicit substances
 5. Prescription and non-prescription medication abuse presentations
 6. Mental health and drug use ? patients with dual presentations
 7. Role of paramedic in health promotion and injury prevention

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a

Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	Up to 30 questions in 30 minutes	10	N	Individual
Case Study	1,500 words	30	N	Individual
Simulation	30 minutes	40	Y	Individual
Quiz	Up to 60 questions in 60 minutes	20	N	Individual

HLTH 2012 Nutrition and Health 1

Credit Points 10

Legacy Code 300933

Coordinator Sunil Panchal ([https://directory.westernsydney.edu.au/search/name/Sunil Panchal/](https://directory.westernsydney.edu.au/search/name/Sunil%20Panchal/))

Description Nutrition is the science that applies knowledge of the nutritional components of foods to ensure the wellbeing of the human body. This unit presents the basic principles and concepts of human nutrition including nutrient requirements, functions, deficiency symptoms and the effects of dietary excess as well as energy balance and weight control. Students will gain a general understanding of the macronutrients such as carbohydrates, proteins and lipids in human metabolism, energy release and common diseases and disorders such as obesity, malnutrition, diabetes etc. The role of water and electrolytes in cellular and tissue functions, as well as alcohol metabolism and its impact on human health will be covered. The micronutrients are also studied, including the properties, general requirements, functions and the effects of deficiency and excess consumption of vitamins and essential minerals.

School Science

Discipline Food Science and Biotechnology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects HLTH 2011 - Nutrition and Health 1

Assumed Knowledge

Sound understanding of undergraduate Level 1 chemistry and biology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand and evaluate the role of nutrition in human health.
2. Demonstrate an understanding of nutrient intake requirements and recommended dietary allowances.

3. Demonstrate an understanding of the human digestive system and the metabolism of macro and micro nutrients and effects of deficiency and excesses to human health.
4. Understand the health and social issues linked to alcohol intake in general population.
5. Understand the role of essential fatty acids, amino acids, water, electrolytes in the diet and their roles in human health.
6. Solve numerical problems e.g., Body Mass Index, energy content in foods, and interpret its impact on human health.
7. Apply the knowledge gained through lectures and tutorial discussions to address the contemporary health issues in Australian population.
8. Demonstrate the communication skills through group discussion, scientific literacy and essay writing.

Subject Content

- Basic concept of nutrition, food components and its relationships to health and disease
- understand food groups, dietary guidelines, nutrients requirements and Nutrient reference values
- physiology of digestion, absorption and metabolic pathways involving carbohydrates, proteins and lipids and their Roles in maintaining human health
- covers diet related health Issues such obesity and diabetes, protein calorie malnutrition, alcohol and health, electrolyte Balance in body etc
- energy Balance, underweight, obesity and weight management, energy Calculation, body Mass Index, Basel metabolic rate etc
- Roles of all of vitamins and Essential minerals in health and nutrition e.g., general properties, sources, Recommended Daily Allowance, functions, physiology and deficiency diseases
- Current issues such as health related foods nutraceuticals and functional foods, pre- and probiotics, Omega 3 fatty acids, food fortification etc

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Take-home mid-semester exam	1 week	30	N	Individual
Essay	3,000 words	30	N	Individual
Final Exam	2 hours	40	N	Individual

Prescribed Texts

Teaching Periods

HLTH 2013 Nutrition and Health 2

Credit Points 10

Legacy Code 300934

Coordinator Sunil Panchal ([https://directory.westernsydney.edu.au/search/name/Sunil Panchal/](https://directory.westernsydney.edu.au/search/name/Sunil%20Panchal/))

Description This unit explores the basic concepts of human nutrition in relation to various stages of the lifespan from infants to late adulthood. It also explores nutrition in relation to chronic health conditions such as obesity, cardiovascular disease and eating disorders. Students will learn about the development of the Australian Dietary Guidelines and Nutrient Reference Values. Students will also learn to make informed decisions with regard to nutritionally critical moments of the life span, emerging nutrition opinions or contemporary uses of nutrition in physical activity, sports and chronic health conditions.

Take-home intra-session exam	1 week	30	N	Individual
Literature review	1,500 words	30	N	Individual

Teaching Periods

HLTH 2015 Out-of-hospital Medical Care 1

Credit Points 10

Legacy Code 401074

Coordinator Rachael Vella ([https://directory.westernsydney.edu.au/search/name/Rachael Vella/](https://directory.westernsydney.edu.au/search/name/Rachael%20Vella/))

Description The aim of this unit is to extend knowledge and clinical skills required for the assessment and management of cardiovascular, respiratory and neurological medical emergencies. The unit combines pathophysiological principles development of skills and interpretation of diagnostic technology with clinical decision-making to implement advanced life support.

School Health Sciences

Discipline Paramedical Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) BIOS 2029 or
NATS 2038

Co-requisite(s) HLTH 2018

Restrictions Students must be enrolled in 4669 Bachelor of Health Science (Paramedicine).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify patient presentations and select appropriate pre hospital treatment plans
2. Integrate patient history and pathophysiology of cardiovascular, respiratory and neurological emergencies into the pre hospital assessment and treatment
3. Discuss the epidemiology and consequences of acute cardiovascular, respiratory and neurological emergencies
4. Provide an evidence-based justification for guidelines relating to cardiovascular, respiratory and neurological emergencies
5. Demonstrate competency in interpretation of ECGs
6. Provide constructive feedback and integrate feedback into future performance.
7. Provide constructive feedback and integrate feedback into future performance

Subject Content

1. Pathophysiology of cardiovascular, respiratory and neurological emergencies
2. Australian Resuscitation Council guidelines for managing resuscitation at an advanced skill level
3. ECG monitoring, analysis and interpretation
4. Clinical decision-making related to termination of resuscitation
5. Assessment, treatment and evidence-based clinical decision-making in relation to adult respiratory medical emergencies
6. Assessment, treatment and evidence-based clinical decision-making in relation to adult neurological medical emergencies
7. Importance of providing and receiving feedback in a out-of-hospital setting

1. Pathophysiology of cardiovascular, respiratory and neurological emergencies
2. Australian Resuscitation Council guidelines for managing resuscitation at an advanced skill level

HLTH 2017 Paramedic Practice 2

Credit Points 10

Legacy Code 401068

Coordinator Robin Pap ([https://directory.westernsydney.edu.au/search/name/Robin Pap/](https://directory.westernsydney.edu.au/search/name/Robin%20Pap/))

Description This unit focuses on the core competencies for paramedic practice in real world situations. These competencies will be developed through on-campus simulation learning, clinical placements with an emergency ambulance crew over a period of 3 weeks, and through an evidence-based exploration of paramedic practice. The core competencies include communication, documentation, reflections and professional ethical behaviour. In addition, students will practice patient assessment and supervised procedures appropriate to their level.

School Health Sciences

Discipline Paramedical Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) HLTH 1009 AND
NATS 1010 AND
NATS 1009

Restrictions

Students must be enrolled in 4669 - Bachelor of Health Science (Paramedicine).

Assumed Knowledge

A fundamental understanding of paramedic patient assessment, including primary and secondary surveys (vital signs, history taking and physical examination).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Display effective communication skills, ethics and professionalism
2. Demonstrate consistent safe work practices
3. Execute basic paramedic skills in a real-world environment
4. Link patient presentations with appropriate treatment or management plans
5. Reflect on the pre-hospital environment, the patient's experiences and their own learning needs
6. Evaluate appropriate, evidence-based pre-hospital management strategies
7. Identify and discuss current health issues
8. Demonstrate clinical reasoning relating to basic airway management, , parenteral drug administration, cardiac arrest management, basic trauma care , and spinal care

Subject Content

Clinical placement in an emergency ambulance setting:

1. Inter-professional communication, ethics and professionalism
2. Safe work practices
3. Assessment and observation of real-world patients and health professionals
4. Basic skills and protocols associated with patient assessment and management
5. Supervised Interpretation of patient findings and Implementation of appropriate techniques

Post clinical placement:

1. Reflection on clinical placement experience
2. Evidence based pre-hospital practice
3. Awareness of the Australian health sector
4. Basic airway management
5. Introductory pharmacology
6. Cardiac Arrest Management
7. Basic Trauma Care
8. Management of spinal injuries
9. Diagnostics and clinical assessment

HLTH 2018 Paramedic Practice 3

Credit Points 10

Legacy Code 401073

Coordinator Paul Simpson ([https://directory.westernsydney.edu.au/search/name/Paul Simpson/](https://directory.westernsydney.edu.au/search/name/Paul%20Simpson/))

Description This subject introduces students to advanced elements of paramedic practice including advanced life support (ALS) resuscitation, and systematic examination of the cardiorespiratory and neurological systems. Core psychomotor procedures will be explored including advanced airway management and intravenous access. The unit has a strong practical component, during which students can apply theoretical learning to simulated cases of moderate complexity. The unit is underpinned by a strong focus on reasoning and decision making.

School Health Sciences

Discipline Paramedical Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) HLTH 2017

Co-requisite(s) HLTH 2015

Restrictions

Students must be enrolled in 4669 Bachelor of Health Science (Paramedicine).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate reasoning and decision making relating to safe performance of clinical procedures
2. Demonstrate structured physical examination of the cardiovascular, respiratory, and neurological systems
3. Analyse findings of diagnostic assessments and formulate care plans
4. Formulate referral-based care plans involving integration into community-based healthcare services
5. Perform advanced life support procedures in simulation contexts
6. Apply patient safety principles to simulation practice.

Subject Content

1. Physical examination of the cardiorespiratory and neurological systems
2. Advanced life support (ALS)
3. Diagnostics and clinical decision making
4. Parenteral drug administration
5. Advanced airway management
6. Safe drug administration
7. Medical documentation
8. Determination of disposition
9. Referral and integrated care
10. Paramedicine integration with community based healthcare

HLTH 2021 Research Methods (Quantitative and Qualitative)

Credit Points 10

Legacy Code 400864

Coordinator Anannya Singharay ([https://directory.westernsydney.edu.au/search/name/Anannya Singharay/](https://directory.westernsydney.edu.au/search/name/Anannya%20Singharay/))

Description This unit further explores research methods used to acquire knowledge in healthcare. This includes research designs, international standards, key statistics, and interpretation of results. The range of health research methods will be presented, and studies about treatment effectiveness (clinical trials and systematic reviews), diagnostic effectiveness and qualitative approaches will be explored in detail. Pathways for early-career research are also introduced.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) HLTH 1001

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the main questions, types and levels of evidence
2. Interpret the STARD statement, including statistical results, for tests of diagnostic effectiveness
3. Interpret the CONSORT statement, including statistical results, for clinical trials
4. Interpret the PRISMA statement, including statistical results, for systematic reviews
5. Describe designs and key issues for conducting other quantitative research
6. Describe designs and key issues for conducting qualitative research
7. Identify strategies for presenting and describing data from qualitative research
8. Specify pathways, processes and resources for conducting beginner research
9. Specify requirements and resources for research proposal and ethics submission
10. Identify the main methodologies, research questions, types and levels of evidence for quantitative and qualitative research.
11. Describe structured approaches and methods for assessing quality of evidence.
12. Interpret the CONSORT statement for assessing reporting quality of clinical trials.
13. Interpret results in quantitative and qualitative research reports.

14. Specify requirements for research proposals and conducting ethical research.
15. Identify pathways and processes for commencing a career in research.

Subject Content

1. Quantitative Research
 - i. Overview of questions, types and levels for evidence.
 - ii. Randomised controlled trials
 - *RCT design and the CONSORT statement
 - *RCT statistical testing for continuous and categorical data
 - iii. Studies of diagnostic effectiveness
 - *Diagnostic study design and the STARD statement
 - *Statistical testing for diagnostic studies
 - iv. Cohort, case-control and other epidemiological studies
 - v. Systematic reviews
 - *SR design and the PRISMA statement
 - *Meta-analysis for continuous and categorical data
2. Qualitative research
 - i. Overview of qualitative paradigms, methodologies, research questions and study designs
 - ii. Strategies for presenting and describing qualitative data
 - iii. Applications, strengths and limitation of qualitative and quantitative research compared.
 - iv. Integrating or mixed methods
3. Beginning research
 - i. Formal study options
 - ii. Workplace research: action research, audits and quality assurance
 - iii. Research preparation, protocol writing and ethical approval

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	30 minutes	10	N	Individual
Short-answer questions about an RCT	600 words total document text as counted by Turnitin	10	N	Individual
CONSORT appraisal of an RCT	1,200 words total document text as counted by Turnitin	20	N	Individual
Final Examination	2 hours	50	N	Individual
Participation in class activities	Weeks 3-14	10	N	Individual

HLTH 2022 Biostatistics in Health

Credit Points 10

Legacy Code 401381

Coordinator John Bidewell (https://directory.westernsydney.edu.au/search/name/John_Bidewell/)

Description This unit introduces concepts and practice of biostatistics related to public health, healthcare policy and practice, and health science generally. Evidence-based health professionals must be able to interpret and act upon quantitative data from research about the health of individuals, communities and populations; and factors affecting health including determinants of health, and the effects of policies and interventions on the health of individuals and groups. The unit covers essential principles of statistical reasoning, assumptions and methods applied to health scenarios. Learning is achieved by students exploring available statistical information and through analysis of numerical data sets.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

- Describe the importance and contribution of biostatistics to healthcare policy and practice.
- Describe the structure of statistical software databases.
- Explain the logic, assumptions and limitations of inferential statistics and hypothesis testing as they relate to health investigations.
- Conduct valid descriptive and inferential analyses using statistical software.
- Interpret and report the results of statistical analysis.

Subject Content

- The importance and contribution of biostatistics to health policy and practice.
- Structure of data sets in software used for statistical analysis.
- Single-variable descriptive statistics for continuous and categorical data.
- Descriptive statistics combining two or more categorical or continuous variables.
- Descriptive measures of effect: differences, ratios and correlations.

- Main effects and interactions in descriptive analyses with two or more variables.
- Probability: normal and binomial distributions; standard scores and prediction.
- From random sample to population: logic of statistical inference and hypothesis testing.
- Sampling distributions, the standard error, z tests, t tests and confidence intervals.
- Non-parametric inferential statistics: alternatives to t tests; chi-square for two categorical variables.
- One-way analysis of variance.
- Regression analysis.
- Reporting statistical results: tables, graphs and expository prose; document preparation.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	30 minutes per quiz	30	N	Individual
Report	800 words total document	30	N	Individual
Report	1200 words total document	40	N	Individual

Prescribed Texts

HLTH 2023 Introduction to Physical Cultural Studies

Credit Points 10

Legacy Code 401413

Coordinator Nicki Taylor ([https://directory.westernsydney.edu.au/search/name/Nicki Taylor/](https://directory.westernsydney.edu.au/search/name/Nicki%20Taylor/))

Description From 2020 this unit replaces 401239 - Introduction to Physical Cultural Studies. The unit explores the interconnection between physical movement, culture, and society. Students will investigate the relationships among physical culture in its various forms (including health, physical activity, sport, dance, leisure, and movement related practices) and broader contexts (pedagogical, social, cultural, political, economic, and technological). The unit will equip students with knowledge and skills in becoming active, reflective and critical learners in physical culture thereby enacting meaningful changes in sites of inequality.

School Health Sciences

Discipline Human Movement

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects PUBH 1005 - Foundations of Wellbeing PUBH 2014 - Introduction to Physical Cultural Studies

Restrictions Students must be enrolled in 4659 Bachelor of Health Science (PDHPE), 4747 Bachelor of Health Science (HPE) or 6001 Diploma in Health Science/Bachelor of Health Science (Health and Physical Education)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain key tenets, methods and topics in physical cultural studies
2. Examine new ways of thinking about bodies, subjectivities and physical cultures
3. Identify sources of inequality in a range of physical cultural sites and address them to enable meaningful changes
4. Analyse problems regarding questions of gender, sexuality, class, ethnicity and subjectivity in relation to physical culture in the contemporary world

Subject Content

1. Introduction to physical cultural studies
2. Thinking like a sociocultural theorist
3. Historical development in sport
4. Cultural reproduction and taste in physical culture
5. Cultures and bodies in physical culture
6. Identity and difference
7. Gender and sexuality
8. Globalisation and postcolonialism
9. Consumer and Consumption in sport
10. Cultural diversity in physical activity

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
5 Quizzes	10 minutes	30	N	Individual
Group Presentation	10 minutes	20	N	Group
Applied Project	2,500 words	50	N	Individual

HLTH 2024 Research Methods in Health

Credit Points 10

Legacy Code 401403

Coordinator John Bidewell ([https://directory.westernsydney.edu.au/search/name/John Bidewell/](https://directory.westernsydney.edu.au/search/name/John%20Bidewell/))

Description This unit explores quantitative and qualitative research methods used to generate and expand knowledge in healthcare. The principal practice and policy questions in healthcare are identified, along with the research paradigms, methodologies, rationales, designs, sampling, data collection and measurement methods, analysis, controls over bias and validity, reporting methods and ethical standards applied to answer these questions and inform evidence-based practice. Practical experience is gained with tools for the appraisal of research evidence guiding practice. Workplace research and organisation research for quality assurance are included. Pathways to a professional career in research are explained.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) HLTH 1012 OR HLTH 1001

Equivalent Subjects HLTH 2021 Research Methods (Quantitative and Qualitative)

Assumed Knowledge

A basic understanding of research methods and levels of evidence.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the principal research questions applicable to evidence-based practice in health
2. Apply the major quantitative and qualitative paradigms, methodologies, designs, methods and ethical considerations for answering the principal research questions in health

- Analyse criteria and processes for enhancing the generalisability and applicability of qualitative and quantitative research evidence in health
- Interpret quantitative and qualitative results in research reports
- Utilise structured appraisal tools for assessing reporting quality of research evidence in health
- Critique methods for workplace research
- Distinguish pathways and processes for commencing a career in health research

Subject Content

- Contribution of empirical research to the advancement of evidence-based practice and policy in healthcare
- Types of research questions in healthcare
- Levels of evidence in quantitative research
- Research paradigms and methodologies
- Research designs
- Sampling in quantitative and qualitative research
- Data collection methods in quantitative and qualitative research
- Ethics and privacy in human research and the management of data
- Data analysis in quantitative and qualitative research
- Appraisal tools and their use for quantitative and qualitative research
- Study and career pathways for professional research in health; funding and research teams
- Research in the workplace: Action research, quality assurance, audits and benchmarking

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HLTH 2025 Exercise Nutrition

Credit Points 10

Legacy Code 401436

Coordinator Angelo Sabag ([https://directory.westernsydney.edu.au/search/name/Angelo Sabag/](https://directory.westernsydney.edu.au/search/name/Angelo%20Sabag/))

Description This unit provides students with an understanding of the interdependent areas of nutrition within the context of sport, physical activity, and exercise. Nutritional needs and recommendations for all levels and types of physical activity are covered along with the links between nutrition and health, sport performance, body composition and control of body weight. Students will develop skills in nutritional analysis and program development, measurement of energy expenditure and body composition assessment. Students will use these skills and knowledge in the individualisation of advice on exercise nutrition for health and sport performance.

School Health Sciences

Discipline Nutrition and Dietetics

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) NATS 1009 AND SPRT 1001

Equivalent Subjects BIOS 2010 - Exercise Nutrition BIOS 2011 - Exercise Nutrition Body Composition and Weight Control

Restrictions Students must be enrolled in 4658 Bachelor of Health Science (Sport and Exercise Science).

Learning Outcomes

On successful completion of this subject, students should be able to:

- Describe the dietary guidelines and the recommended servings of the core food groups recommended by the National Health and Medical Research Council and other internationally recognized governing bodies.
- Describe the physiological functions of the macronutrients (carbohydrates, fats and protein) and micronutrients (vitamins, minerals and water).
- Explain the digestive system and underpinning physiological mechanisms behind the breakdown and absorption of various food sources.

4. Analyse a diet for its energy, macronutrient and micronutrient content, as well as describe the strengths, weaknesses and limitations of the commonly used methods for measuring and analysing dietary intake.
5. Describe the assumptions and limitations of common methods body composition assessment including BMI, waist hip ratio, skinfolds, body composition estimates (from regression equations) and other indices, and demonstrate the knowledge and ability to use these measures to service athletes, apparently healthy and obese individuals.
6. Explain the relationship between energy balance and control of body composition.
7. Provide general nutrition advice to promote, achieve and maintain a healthy lifestyle and/or improve sport performance.
8. Explain the importance of behavioural modification and other strategies to help individuals to incorporate and adhere to appropriate dietary strategies that support achieving and maintaining a healthy body mass.
9. Explain the nutritional, health and psychological risks of common fad and popular diets.
10. Describe and discuss the role of nutrition and ergogenic supplements in optimising exercise performance.

Subject Content

1. Exercise Nutrition

- general dietary guidelines and recommendations for health and physical performance
- dietary analysis: methods, applications and limitations of methods
- Digestive processes and Nutrient absorption kinetics
- physiological function of macronutrients and micronutrients with An emphasis on their Roles related to energy metabolism and Exercise
- methods of Measuring, Estimating and interpreting body composition
- Estimating individual energy requirements and energy Expenditure
- sport-specific nutrition and hydration for optimising performance, recovery & physiologic adaptation
- Nutritional supplements and Ergogenic AIDS
- Nutritional disorders: Prevalence, signs, Symptoms and key physiological effects

2. Other

- discipline specific WHS ? related to practical tasks of The unit

Assessment

HLTH 3001 Applied Nutrition

Credit Points 10

Legacy Code 300908

Coordinator Li Li ([https://directory.westernsydney.edu.au/search/name/Li Li/](https://directory.westernsydney.edu.au/search/name/Li%20Li/))

Description This unit builds on basic concepts in human nutrition and facilitates the study of nutrition needs across the lifecycle and for specific lifestyle and nutrition related diseases. This study will incorporate how to assess nutritional status (incorporating anthropometric, biochemical, clinical, dietary and physical activity assessment) of individuals and groups, understand the strengths and limitations of various methods, how to manipulate diets to ensure nutritional sufficiency and how to provide nutrition education regarding lifestyle related diseases and sports nutrition.

School Science

Discipline Food Science and Biotechnology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) HLTH 2012 AND HLTH 2013

Equivalent Subjects HLTH 3002 - Applied Nutrition

Assumed Knowledge

An understanding of human nutrition, food, the metabolism of micro- and macro-nutrients, nutritional needs in various contexts, the relationship between dietary intake and disease/health, and computer literacy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe, apply, and interpret results from, tools and methodologies (including anthropometric, biochemical, clinical and dietary) for assessing the nutritional status and level of physical activity of individuals and groups for various purposes
2. Explain the strengths, limitations (including measurement errors), validity and reliability of various nutritional status assessment techniques
3. Utilise nutritional analysis software to organise and present dietary data
4. Provide recommendations for meeting nutritional requirements for the prevention / treatment of lifestyle related chronic disease and for sports nutrition
5. Articulate food laws relating to the nutrition labelling of foods
6. Apply teaching and learning skills or styles for effective nutrition counselling and education

Subject Content

1. Assessment of nutritional status
2. Anthropometric, biochemical, clinical and dietary assessment methods
3. Introductory methods to measure energy expenditure and physical activity levels
4. Use of nutritional analysis software

5. Application of reference values to findings from nutritional assessment methods
6. Manipulating existing diets
7. Provision of nutrition education for the prevention / treatment of lifestyle related chronic disease and for sports nutrition

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Report	3,000 words	40	N	Individual
Practical	15 - 30 minutes	10	N	Individual
Online syndronous presentation and reflection report 500 words	Presentation 15 minutes, Reflection	20	N	Both (Individual & Group)
Quizzes - Three online quizzes (10% each)	30 minutes each	30	N	Individual

HLTH 3003 Clinical Leadership and Patient Safety

Credit Points 10

Legacy Code 401097

Coordinator Navin Naidoo (<https://directory.westernsydney.edu.au/search/name/Navin Naidoo/>)

Description This unit introduces students to clinical leadership, supervision and patient safety in the context of paramedicine. Students will undertake a 4 week clinical placement block with an emergency ambulance crew, which will in part be used as a basis for reflective learning activities and critical analysis. Students will explore and discuss concepts of clinical leadership and supervision, drawing from their clinical placement experiences. Students will learn about

leadership styles, principles of clinical education, mentoring and supervision in the field, clinical governance and patient safety.

School Health Sciences

Discipline Paramedical Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) HLTH 3014

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Display effective communication skills, ethics and professionalism
2. Demonstrate consistent safe work practices
3. Execute intermediate/advanced paramedic skills in a real world environment
4. Assess a patient, formulate a clinical impression, and implement a prioritised clinical management plan under supervision
5. Analyse their individual leadership style and identify personal strengths and weakness
6. Discuss the role paramedics play in contributing to clinical governance, patient safety and quality improvement
7. Analyse medical error incidents
8. Discuss strategies for managing paramedic health and resilience
9. Discuss preceptorship in an ambulance context

Subject Content

A). During clinical placement

1. A four week clinical placement involving application of skills and knowledge in scene management and patient examination and assessment, clinical decision making, and patient management.

B). Post-clinical placement

1. Clinical placement reflection and debrief
2. Leadership styles and approaches
3. Clinical leadership and professional leadership
4. Clinical supervision and preceptorship
5. Mentoring and preceptorship
6. Patient safety and clinical governance
7. Human factors, error and situational awareness

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Professional Practice Performance: Preceptor report	4 weeks	S/U	Y	Individual
Online MCQ quiz	Up to 60 minutes	20%	N	Individual

Self-assessment: Written paper analysing personal pre-and post-360 degree surveys	3,000 words	30%	N	Individual
---	-------------	-----	---	------------

Viva Voce: Oral viva assessment	Up to 45 minutes	50%	Y	Individual
---------------------------------	------------------	-----	---	------------

Teaching Periods

HLTH 3004 Emergency Care for Special Populations

Credit Points 10

Legacy Code 401070

Coordinator Paul Simpson ([https://directory.westernsydney.edu.au/search/name/Paul Simpson/](https://directory.westernsydney.edu.au/search/name/Paul%20Simpson/))

Description This unit explores the issues in caring for special populations in the emergency situation - multicultural and Indigenous settings, the elderly, people with disabilities and people experiencing mental illness. Current trends underlying policies and services and determinants of wellbeing in these contexts are discussed. Particular attention is given to issues, principles and practices relating to ageing, and to the assessment, treatment, rehabilitation strategies and crisis counselling for people experiencing mental illness.

School Health Sciences

Discipline Paramedical Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) HLTH 3014

Restrictions Students must be enrolled in 4669 Bachelor of Health Science (Paramedicine).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the strategic environment and trends underlying policies and services in the aged care and disability contexts
2. Discuss the impact of culture, society and family on wellbeing and health care needs
3. Demonstrate understanding of the psychological and social factors influencing the health care of older people and people with disabilities
4. Examine the range of resources and facilities relevant to services for older people and people with disability

5. Apply knowledge, skills and experience to reflect on and analyse health care needs and emergency situations affecting special populations

Subject Content

1. Special populations and social attitudes
2. Legislation and policy relating to special populations
 - a. Funding
 - b. Rights
 - c. Discrimination
3. Health care contexts
 - a. Determinants of health and wellbeing
 - b. Settings for aged care and disability services
 - c. Carers
4. Ageing
 - a. Psychological, biological, social and psychosocial issues
 - b. Family structures
 - c. Family and community care
5. Mental health
 - a. Assessment, treatment and rehabilitations
 - b. Crisis counselling
6. Implications for pre-hospital and emergency care (this topic is integrated in each of the preceding areas)

Teaching Periods

HLTH 3005 Evidence-Based Practice

Credit Points 10

Legacy Code 400865

Coordinator Nerida Klupp ([https://directory.westernsydney.edu.au/search/name/Nerida Klupp/](https://directory.westernsydney.edu.au/search/name/Nerida%20Klupp/))

Description In this unit, students incorporate previous research and biostatistics knowledge to develop new skills for using evidence to inform all aspects of their professional practice. Evidence-based practice uses an enquiry led approach to manage expanding and uncertain knowledge by formulating answerable questions, effectively searching literature, critically appraising evidence validity and results, and to assess its significance in clinical practice and healthcare decision-making. Students will incorporate evidence in communication and shared decision making processes for patient scenarios relevant to their program.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) Students need to have done HLTH 2021 Research Methods plus one clinical unit from their specific program This will be one of four possible units

Students enrolled in Course Code 4661 (Continuing) or 4708 (Current) must have completed REHA 2007 Podiatry Pre-Clinical

Students enrolled in Course Code 4663 (Continuing) or 4711 (Current) must have completed REHA 2004 Occupational Therapy Practice 2

Students enrolled in Course Code 4662 (Continuing) or 4706 (Current) must have completed REHA 3003 Clinical Education General

Equivalent Subjects LGYA 7051 - Integrating Evidence into Practice

Restrictions

Students must be enrolled in program Codes 4660,4661, 4662, 4663, 4706, 4708, 4710, 4711. 4763, 4788

Assumed Knowledge

Knowledge and skills of Foundations of Research & Evidence-based Practice 400863 and Research Methods (Qualitative and Quantitative) 400864 and at least one clinical subject of the student's program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Conduct sensitive and specific PICO search strategies
2. Identify key classification, design and result information from research studies
3. Critically appraise validity and clinical significance of research
4. Justify value of evidence according to its level, quality and applicability
5. Incorporate evidence into clinical reasoning and decision making
6. Negotiate evidence-informed shared decision-making

Subject Content

1. Exploring reasons for EBP
 - history of EBP development in health care
 - management of professional disagreement, situation effects and bias
 - management of information overload
 - management of uncertainty
2. Appraising evidence
 - for studies of interventions, diagnostic tests, prognosis, experiences and systematic reviews and guidelines
 - level of evidence
 - Internal Validity
 - statistical and clinical significance
 - Generalisability, Applicability and Usefulness
3. Implementing evidence into practice
 - incorporating evidence with expertise, values and situations
 - limitations of EBP paradigm
 - using evidence in clinical reasoning and decision-making
 - communicating evidence to clients
 - evidence-informed shared decision-making
 - evaluation of EBP

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Critically Appraised Topic: Part A written assignment (Report)	600 words plus search strategy	25	N	Individual
Critically Appraised Topic: Part B Viva Examination (Viva Voce)	Approx. 20 minutes	35	Y	Individual

Final Examination: 90 mins 40 N Individual

HLTH 3007 Global Nutrition, Food and Community

Credit Points 10

Legacy Code 300917

Coordinator Li Li ([https://directory.westernsydney.edu.au/search/name/Li Li/](https://directory.westernsydney.edu.au/search/name/Li%20Li/))

Description This unit aims to develop an understanding of the inter relationship between nutrition and health in Australian and Global contexts. The aim is to provide the student with a sound foundation in nutritional anthropology, public health nutrition and health promotion in order that they can systematically analyse nutritional problems associated with world food issues; including those affecting minority and culturally and linguistically diverse groups within Australia; diseases of affluence and current health and nutrition issues in the community. An important objective of the unit is that students learn the principles of health promotion and how to apply effective nutrition promotion strategies in community and population settings in order to reduce the burdens of various nutritional and lifestyle related disorders and diseases like: obesity, some cancers, diabetes and cardiovascular disease and malnourishment.

School Science

Discipline Food Science and Biotechnology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) HLTH 2012

Equivalent Subjects HLTH 3010 - Nutrition and Community Health HLTH 3006 - Global Nutrition Food and Community

Assumed Knowledge

Understanding of human nutrition and associated health issues.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Case Study	1500	30	N	Individual
Oral presentation and written report	15 minutes, 2000 words	30	N	Group
Quiz	15 Mins	5	N	Individual
Final exam	2 hours	35	N	Individual

Teaching Periods

HLTH 3008 Gymnastics and Dance

Credit Points 10

Legacy Code 400896

Coordinator Rhiannon White ([https://directory.westernsydney.edu.au/search/name/Rhiannon White/](https://directory.westernsydney.edu.au/search/name/Rhiannon%20White/))

Description Students actively engage in a variety of gymnastics activities to develop skill competencies on vault, bars, beam, and floor. Students will also learn about a variety of dance styles and apply movement composition principles. Students will consider safety principles and learn teaching strategies that will enable them to teach gymnastics and dance accurately and safely in line with the Health and Physical Education curriculum. Students will also design their own original teaching and learning ideas that are active, enjoyable, and educational, to ensure they can implement quality gymnastics and dance learning experiences in PE.

School Health Sciences

Discipline Human Movement

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Incompatible Subjects LGYA 0700 - Human Movement 5 PERF 3008 - Introduction to Dance

Restrictions

Students must be enrolled in 4742 Bachelor of Health Science (Health and Physical Education)-Pathway to Teaching (Secondary), 4747 Bachelor of Health Science (HPE) or 6001 Diploma in Health Science/ Bachelor of Health Science (Health and Physical Education)

Learning Outcomes

On successful completion of this subject, students should be able to:

- Interpret content from the Australian Health and Physical Education (HPE) curriculum in the contexts of gymnastics and dance
- Demonstrate understanding of safety principles and teaching points relevant to gymnastics and dance activities
- Demonstrate a range of movement skills in the gymnastics and dance context
- Design enjoyable and active games and activities that integrate gymnastics skills into Physical Education lessons.
- Critically analyse the inclusion of gymnastics and dance in physical education.

Subject Content

1. Learning gymnastics skills and dance styles
2. Teaching, planning, and creating gymnastics activities and dance routines
3. Understanding gymnastics and dance in school physical education
4. Cultural interpretations of dance
5. Biomechanics of gymnastics
6. Movement composition to music
7. Safety considerations when teaching sport activities
8. Health and physical education curriculum

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Gymnastics Teaching Resources	Approx. 8 pages	35	N	Individual
Dance Lesson Plan	Approx. 3-4 pages, plus appendix	35	N	Individual
Teaching Experience & Justification	15 mins + 500 words	30	N	Individual

HLTH 3009 Major Incident Management

Credit Points 10

Legacy Code 401075

Coordinator Nicole Peel ([https://directory.westernsydney.edu.au/search/name/Nicole Peel/](https://directory.westernsydney.edu.au/search/name/Nicole%20Peel/))

Description This unit examines the tactical and strategic issues facing a health response team in a major incident. Students will practice team responses to critical incidents and evaluate the effectiveness of different approaches to response and recovery.

School Health Sciences

Discipline Paramedical Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) HLTH 3014

Restrictions Students must be enrolled in 4669 Bachelor of Health Science (Paramedicine).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Research and formulate strategic and tactical responses to major incidents as part of a health response team
2. Demonstrate understanding of the principles and techniques of major incident prevention, response and recovery
3. Demonstrate leadership and decision-making in the context of a health response team

Subject Content

1. Health service and emergency service structure and roles
2. Planning for major incident response
3. The Ambulance Service Management Plan
 - a. Command and control
 - b. Communications
 - c. Safety
 - d. Recovery
4. Medical support
 - a. Triage
 - b. Transport
 - c. Treatment
5. Scene control and management
 - a. Children
 - b. Casualties
 - c. Media
 - d. Psychosocial support
6. Hazardous materials
7. Mass gatherings
8. Natural disasters

Teaching Periods

HLTH 3011 Obstetrics and Paediatrics

Credit Points 10

Legacy Code 401072

Coordinator Liz Thyer ([https://directory.westernsydney.edu.au/search/name/Liz Thyer/](https://directory.westernsydney.edu.au/search/name/Liz%20Thyer/))

Description The aim of this unit is to prepare the student for out-of-hospital care and management of obstetric, neo-natal and paediatric emergencies. It focuses on understanding human birth and development, normal and complicated delivery and the changes that occur in the pregnant woman. Developmental changes throughout childhood and the skills required to manage a broad range of clinical paediatric emergencies are explored.

School Health Sciences

Discipline Paramedical Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) HLTH 2018 AND HLTH 2015

Restrictions Students must be enrolled in 4669 Bachelor of Health Science (Paramedicine).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe and categorise typical and atypical growth and development from birth to adolescence
2. Describe and categorise typical and atypical growth and development of the pregnant woman
3. Demonstrate out-of-hospital assessment and management of select obstetric, neo-natal and paediatric emergencies
4. Apply clinical reasoning to manage obstetric, neo-natal and paediatric clinical problems in out-of-hospital settings
5. Justify a plan of management for an obstetric, neo-natal or paediatric problem that demonstrates professional and ethical behaviour and recognises the role of family and other health practitioners

Subject Content

Theory and practice, within the out-of-hospital setting, for:

1. Basic understanding of normal pregnancy and parturition
2. Common complications in pregnancy and obstetric emergencies
3. Assessment and management of the neonate
4. Basic understanding of typical and atypical growth and development from birth to adolescence
5. Relevant paediatric illnesses and trauma
6. Identifying relevant methods used to assess and monitor infants, children and adolescents, as appropriate to their needs
7. Management of paediatric cases using sound clinical reasoning and understanding the response of the child and the family
8. Relevant signs of child abuse and neglect

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	Two quizzes: 20 each quiz is a duration of 20 minutes and worth 10%	20	N	Individual
Practical Exam	up to 30 minutes	40	N	Individual
Intra-session Exam	1 hour	40	N	Individual

HLTH 3012 Out-of-hospital Medical Care 2

Credit Points 10

Legacy Code 401096

Coordinator Navin Naidoo ([https://directory.westernsydney.edu.au/search/name/Navin Naidoo/](https://directory.westernsydney.edu.au/search/name/Navin%20Naidoo/))

Description The aim of this unit is to extend the foundational knowledge relating to the assessment and management of medical presentations across the spectrum of acuity, including falls, geriatric care, sepsis, gynaecological, genitourinary, ear/nose/throat and complex co-morbid conditions.. The unit combines theoretical and practical aspects to develop knowledge, skills, interpretation and application of diagnostics and clinical decision-making to implement appropriate patient care. Students will investigate fundamental elements of paramedic practice relating to medicolegal documentation, risk assessment and clinical reasoning relating to determination of patient disposition.

School Health Sciences

Discipline Paramedical Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) NATS 1009 AND
NATS 1010 AND
HLTH 2015

Co-requisite(s) HLTH 3014

Restrictions

Students must be enrolled in 4669 Bachelor of Health Science (Paramedicine)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the pathophysiology and clinical presentation of common medical conditions across the spectrum of acuity
2. Formulate care plans using effective clinical reasoning relevant to patients across the lifespan and spectrum of acuity
3. Discuss barriers and enablers to safe and appropriate integrated care and referral
4. Demonstrate safe and effective performance of clinical procedures
5. Analyse principles of medical documentation and their connection to patient safety and clinical quality
6. Demonstrate systematic assessment of cardiorespiratory, neurological, genitourinary and gastrointestinal systems
7. Demonstrate ability to work effectively in a team to provide safe and appropriate care

Subject Content

1. Complex and co-morbid Patient presentations
2. Gynaecological and genitourinary emergencies
3. Endocrine emergencies
4. Sepsis
5. Advanced Life Support Procedures
6. Clinical Reasoning

7. Systematic clinical assessment
8. Medical record-keeping

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	1 hour	20	N	Individual
Short Answer	30 minutes	20	N	Individual
Literature Review	N/A	20	N	Individual
Practical Exam	Up to 60 minutes	40	Y	Individual

HLTH 3014 Paramedic Practice 4

Credit Points 10

Legacy Code 401069

Coordinator Buck Reed (<https://directory.westernsydney.edu.au/search/name/Buck+Reed/>)

Description This unit focuses on the core competencies for paramedic practice in real world situations. Students will review high fidelity simulation scenarios to facilitate simulation debrief sessions exploring scene management, interpersonal communication, decision making, inter-professional cooperation and clinical management. Students will then consolidate and extend these skills through supervised clinical placements with an emergency ambulance crew over a period of 5 weeks. Experiences and exposure gained during the placement will form the basis for analysis of case studies and reflective learning.

School Health Sciences

Discipline Paramedical Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) HLTH 2018

Co-requisite(s) HLTH 3012

Restrictions

Students must be enrolled in the Bachelor of Health Science (Paramedicine).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Plan and assess personal professional goals and performance
2. Display effective situational awareness, operational safety, communication skills, ethics, and professionalism in a paramedic work environment
3. Analyse contemporary paramedic practice in a regulated professional environment
4. Demonstrate holistic paramedic care for patients from vulnerable populations.
5. Execute intermediate level paramedicine skills in a real-world environment
6. Apply a systematic approach to patient assessment, history taking and clinical management in a paramedic work environment to an intermediate level
7. Critique decision making in cases involving patients with moderately complex presentations in a paramedic work environment
8. Analyse scene, professional and clinical management displayed in simulated case scenarios

Subject Content

Prior to clinical placement

- Paramedic practice in intermediate-level simulated scenarios
- Placement planning
- Professional practice, professionalisation and the application of critical non-technical skills and knowledge
- Care and management of vulnerable populations
- Referral, patient disposition and integrated care

During clinical placement

- Paramedicine skills associated with assessment and history taking in a real-world paramedic work environment
- Decision making and judgement in complex real-world patient presentations
- Supervised management of patient disposition and referral decisions
- Supervised formulation of a clinical impression and management plan
- Supervised performance of clinical interventions utilised by registered paramedics
- Clinical documentation and interprofessional communication

After clinical placement

- Self-evaluation of learning and performance
- Evaluation and reporting of clinical experiences

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

HLTH 3015 Resistance Training and Physiology

Credit Points 10

Legacy Code 400890

Coordinator Paul Marshall ([https://directory.westernsydney.edu.au/search/name/Paul Marshall/](https://directory.westernsydney.edu.au/search/name/Paul%20Marshall/))

Description In 2016, this unit is replaced by 401148 - Strength and Conditioning. Resistance Training and Physiology presents the growing body of research evidence supporting specific methods of resistance exercise and training, as well as the role of resistance exercise in disease prevention and health promotion. Students gain an increased understanding of the energetics and physiology of resistance exercise by also completing laboratories focussed on the research of important applied concepts in resistance exercise and training. Students also experience resistance training.

School Health Sciences

Discipline Human Movement

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) HLTH 2004 AND
BIOS 2037 AND
BIOS 3003

Restrictions Students must be enrolled in program 4658 - Bachelor of Health Science (Sport and Exercise Science).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. a detailed understanding of the energetics of muscle contractions during different intensities of resistance exercise;
2. a detailed understanding of the molecular biology of muscular strength and hypertrophy;
3. knowledge of the systemic physiological responses to different intensities of resistance exercise;
4. knowledge of the differences in force and power development between different types of muscle contractions: isometric, isotonic, isokinetic;
5. understanding of the changes to repetitions and sets performed in resistance exercise, and how specific changes in either component can change the training stimuli for either of muscular strength, power or endurance;

6. knowledge of the roles of resistance exercise and training to sports performance, as well as disease prevention and rehabilitation;
7. developed skills for developing and supervising quality resistance training programs specific to certain desired outcomes;
8. mastered techniques required for safe and optimal resistance training of specific muscles and/or muscle groups using free weights and weight machines;
9. Explain the reasoning behind discipline specific OH&S procedures and systems;
10. Perform all practical skills and activities safely and in compliance with standard operating procedures and laboratory rules.

Subject Content

1. The research-based evidence for specific types of resistance training for specific outcomes; such as strength, power and endurance.
2. The cellular response mechanisms to resistance training for stimulation of muscle anabolism and hypertrophy.
3. The neural components of increased muscular strength.
4. Gender differences in strength and responses to resistance training.
5. Different equipment used in resistance training, and how they differ in promoting specific resistance training outcomes.
6. Training paradigms used in resistance training.
7. Potential abuse of pharmacological and nutritional ergogenic aids in resistance training, as well as their performance and health consequences.
8. The roles of resistance exercise and training in sports and athletics.
9. The roles of resistance exercise and training in disease prevention and rehabilitation.
10. Designing resistance exercise training programs.
11. Experiencing resistance exercise training.

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have:

- 1) submitted a Student Undertaking Form and have applied for a National Police Certificate;
- 2) submitted Working with Children Check Student Declaration;
- 3) possess a current WorkCover Authority approved First Aid Certificate.

Teaching Periods

HLTH 3016 Strength and Conditioning

Credit Points 10

Legacy Code 401148

Coordinator Dean Norris ([https://directory.westernsydney.edu.au/search/name/Dean Norris/](https://directory.westernsydney.edu.au/search/name/Dean%20Norris/))

Description Strength and Conditioning presents the growing body of research evidence supporting specific methods of resistance exercise and training, as well as the role of resistance exercise in disease prevention and health promotion. Students gain an understanding of the energetics and physiology of resistance exercise by also completing and experiencing laboratories focussed on the important applied concepts in resistance exercise and training.

Discipline Human Movement

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) HLTH 2003 AND
BIOS 2012 AND
SPRT 2002

Equivalent Subjects HLTH 3015 - Resistance Training and Physiology

Restrictions Students must be enrolled in 4658 - Bachelor of Health Science (Sport and Exercise Science).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain skeletal muscle anatomy and identify the key structures involved with muscle contraction
2. Evaluate contributions to muscle contraction from the nervous system and within the muscle
3. Identify the biological mechanisms that explain different types of training adaptation following resistance exercise
4. Prescribe an evidence based resistance exercise program for a healthy, untrained individual
5. Examine contributing factors to performance of an exercise movement
6. Construct a basic nutritional plan that effectively complements typical resistance exercise prescription
7. Critique the scientific basis and be able to review evidence for modern trends in resistance exercise prescription

Subject Content

- The Anatomy and physiology of muscle contraction
- The research-based evidence for specific types of resistance training for specific outcomes; such as strength, power and endurance
- exposure to different equipment used in resistance training, and how The equipment differs in promoting specific resistance training outcomes
- training paradigms used in resistance training
- potential Abuse of Pharmacological and Nutritional Ergogenic Aids in resistance training, as well as their performance and health consequences
- The Roles of resistance Exercise and training in Sports and athletics
- The Roles of resistance Exercise and training in disease prevention and rehabilitation
- designing resistance Exercise training programs
- experiencing resistance Exercise training

Assessment

HLTH 3017 Traumatic and Environmental Emergencies

Credit Points 10

Legacy Code 401071

Coordinator Robin Pap ([https://directory.westernsydney.edu.au/search/name/Robin Pap/](https://directory.westernsydney.edu.au/search/name/Robin%20Pap/))

Description This unit deals with pathophysiology and pathogenesis of traumatic injuries and environmental emergencies as well as safe and effective out-of-hospital management of these patients. Best patient outcomes are achieved when out-of-hospital care forms part of a trauma system. Paramedics are required to make decisions to achieve the provision of the right care and transfer to the right hospital in the right time. This applies to both, the single-patient incident and the mass casualty situation. This unit aims to develop the knowledge and skills to safely and effectively manage the patient(s) suffering traumatic injury or an environmental emergency. Furthermore, the unit aims to prepare the paramedic student to be part of a major incident response.

School Health Sciences

Discipline Paramedical Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) HLTH 3014

Restrictions Students must be enrolled in 4669 Bachelor of Health Science (Paramedicine).

Assumed Knowledge

First and second year of the BHSc (Paramedicine).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the incidence and mechanism of injury of a range of major traumatic injuries.
2. Integrate patient presentation to underlying pathophysiology of traumatic injuries and environmental conditions.
3. Describe, defend, demonstrate and analyse evidence-based out-of-hospital management of major trauma and environmental emergencies including effective integration into a trauma system.
4. Apply clinical reasoning and problem-solving in complex single- and multiple-patient situations.
5. Explain and apply principles of major incident management.
6. Evaluate the roles and responsibilities of ambulance services and individual paramedics during major incident management including CBRN (chemical, biological, radioactive and nuclear) events.

Subject Content

The subject covers the paramedic response to a range of critical environmental, physiological and traumatic emergencies, including:

1. Mechanisms of injury
2. Head, brain and facial injuries
3. Spinal injury
4. Thoracic injury
5. Abdominal and genitourinary injury
6. Musculoskeletal and soft tissue injury
7. Burns
8. Crush, blast and ballistic injuries
9. Environmental Emergencies
10. Toxicology, poisoning and envenomation
11. Principles of major incident management
12. Roles and responsibilities at major incidents including Chemical, Biological, Radiological and Nuclear (CBRN) events

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

HLTH 3018 Ethical and Legal Issues in Health Care

Credit Points 10

Legacy Code 401408

Coordinator Elizabeth Atteya ([https://directory.westernsydney.edu.au/search/name/Elizabeth Atteya/](https://directory.westernsydney.edu.au/search/name/Elizabeth%20Atteya/))

Description From 2020 this unit replaces 400249 - Ethical and Legal Issues in Health Care. This unit enables students to explore and develop an understanding of the ethical and legal issues important within contemporary health care. Through the use of case studies students will analyse profound ethical and legal challenges facing current health care that are equally important to health professionals, patients/clients and society generally. Critical thinking about these issues will be encouraged. Students will also be encouraged to consider differing theoretical perspectives in their examination of ethical issues. Additionally, students studying to work within health care, including complementary medicine, will develop a comprehensive understanding of the requirements for ensuring that their practice conforms to legal doctrines and ethical standards.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects JUST 3005 - Ethical and Legal Issues in Health Care

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate the relationship between ethics and law and describe the key components of each.
2. Critically analyse the legal and ethical context in which health care occurs and its importance in relation to risk management.
3. Debate the inter-connection between the rights and responsibilities of patients/clients, health practitioners and the wider community within a health care systems.
4. Debate and appraise legal principles and doctrines relevant to health care.
5. Outline the process by which legal rules are determined and changed.
6. Critically evaluate ethical decision-making frameworks in order to evaluate their effectiveness in justifying a response to ethical dilemmas.
7. Critique and apply differing theoretical perspectives and legal principles in relation to ethical issues.
8. Analyse the social and political context of health care and identify the differences between policy and practice in health care implementation.
9. Appraise ethical and legal issues in relation to the practice of complementary and alternative medicine and its relationship with conventional medicine.

Subject Content

1. Ethics:

- The relationship between ethics and Law
- A Definition of ethics and Ethical behaviour
- professional codes of ethics

- historical perspectives on The relationship between complementary and alternative medicine (CAM) and conventional medicine
- Ethics and morality: moral reasoning; morality and the law; the role of emotion
- Ethical theories/approaches and decision-making frameworks
- Ethical principles: autonomy; non-maleficence; beneficence; justice; and their applicability within health care
- Veracity in health care
- The ethics of medical expert testimony
- The ethics of child protection work in health care: mandatory reporting/difficulty of false accusations
- The contradictions between public health and individual rights
- Ethical Issues in current health debates: Vaccination, pesticides and fluoride
- globalisation, profit motives and The pharmaceutical industry
- Current issues in ethics and law: quality of life and sanctity of life issues; health care as a right; ethical aspects of health resource allocation; ethical research and experimentation
- Understanding evidence based medicine, its advantages and disadvantages, in mainstream medicine and complementary/ alternative medicine

2. Law:

- The relationship of ethics to Law
- how laws are made: statute Law and common Law
- Classifications of Law: substantive and procedural law; criminal and civil law and their relevance to health care
- Consent: legal requirements; potential actions in law; ethical underpinnings
- Negligence: Duty of care; Standard of Care; Damage and Litigation
- Professional and client relationships: foundational principles and characteristics; rights and responsibilities; privacy and confidentiality; complaints mechanisms
- Workplace issues: vicarious liability; OH&S requirements, privacy and freedom of information; EEO; New Industrial Relations Laws
- Specific legal requirements of professional practice: including poisons act and administration of drugs, including complementary medicines; Quarantine and Customs requirements and the Therapeutic Goods Administration; Registration and disciplinary proce
- The Importance of ensuring that practice conforms to legal Doctrine and Ethical Standards and its relationship to Risk management

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Presentation	30 minutes	30	N	Group
Essay	2,000 words	40	N	Individual
Quiz	4 questions/10 minutes per quiz	20	N	Individual
Participation	11 weeks	10	N	Individual

HLTH 3019 Nutrition, Health and Disease

Credit Points 10

Legacy Code 301457

Coordinator Sunil Panchal ([https://directory.westernsydney.edu.au/search/name/Sunil Panchal/](https://directory.westernsydney.edu.au/search/name/Sunil%20Panchal/))

Description In this unit you will explore the basic concepts of human nutrition in relation to various stages of the lifespan from infants to late adulthood. It also explores nutrition in relation to chronic health conditions such as obesity, cardiovascular disease and eating disorders. You will learn about the development of the Australian Dietary Guidelines and Nutrient Reference Values. You will also learn to make informed decisions with regard to nutritionally critical moments of the life span, emerging nutrition opinions or contemporary uses of nutrition in physical activity, sports and chronic health conditions.

School Science

Discipline Nutrition and Dietetics

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) HLTH 2012 AND BIOS 2021

Equivalent Subjects HLTH 2014 - Nutrition and Health 2 HLTH 2013 - Nutrition and Health 2

Assumed Knowledge

An understanding of human nutrition, food and the metabolism of micro- and macro-nutrients and computer literacy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the principles of epidemiology and health trends within Australia and worldwide
2. Explain how the Australian Dietary Guidelines and Nutrient Reference Values are determined and used to assess nutritional adequacy at both an individual and population level
3. Evaluate the impact of nutrition on health across the life span
4. Synthesise scholarly evidence on topics related to nutrition and health
5. Critically analyse the role of nutrition in relation to a range of chronic health conditions
6. Critically analyse the role of nutrition in relation to physical activity, sports nutrition issues, diet choices such as veganism and vegetarianism, and controversial fad diets

Subject Content

1. Principles of nutritional epidemiology
2. Health trends in Australia and worldwide
3. Concept, formulation and uses of the Australian Dietary Guidelines, Australian Guide to Healthy Eating, and Nutrient Reference Values (NRV)
4. Methods for assessing body composition and diet.
5. Nutritional requirements and food habits throughout key stages of the lifespan.
6. Relationship between nutrition and chronic metabolic and related diseases.
7. Relationship between nutrition and physical activity and sports nutrition issues.
8. Controversial issues in nutrition such as fad diets, and emerging opinions and misinformation.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	4 x 20 minutes	20	N	Individual
Literature Review	1,200 words	35	N	Individual
Critical Review	4,000 words	30	N	Group
Presentation	5 minutes	15	N	Individual

HLTH 3020 Global Nutrition and Food

Credit Points 10

Legacy Code 301458

Coordinator Li Li (https://directory.westernsydney.edu.au/search/name/Li_Li/)

Description This unit aims to develop an understanding of the inter relationship between nutrition and health in Australian and Global contexts. The aim is to provide you with a sound foundation in nutritional anthropology, public health nutrition and health promotion in order that they can systematically analyse nutritional problems associated with world food issues; including those affecting minority and culturally and linguistically diverse groups within Australia; diseases of affluence and current health and nutrition issues in the community. An important objective of the unit is that you will learn the principles of health promotion and how to apply effective nutrition promotion strategies in community and population settings in order to reduce the burdens of various nutritional and lifestyle related disorders and diseases like: obesity, some cancers, diabetes and cardiovascular disease and malnourishment.

School Science

Discipline Nutrition and Dietetics

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) HLTH 2012 AND BIOS 2021

Equivalent Subjects HLTH 3007 Global Nutrition Food and Community HLTH 3006 Global Nutrition Food and Community HLTH 3010 Nutrition and Community Health

Assumed Knowledge

An understanding of human nutrition and associated health issues.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the anthropological relationship between nutrition and health in the Australian and global context
2. Critique the contributing factors that affect the nutrition status of Australia's indigenous population
3. Evaluate the relationship of lifestyle factors and nutritional status along with the contribution of food systems to community health and wellbeing

4. Critique the influences of world food politics on nutritional status and examine the trends in national and international nutrition and food
5. Critique the role of nutrition promotion and public health nutrition
6. Analyse current diet related nutrition related public health issues
7. Propose a public health nutrition promotion plan for a current public health issue

Subject Content

1. Principles and application of nutritional anthropology
2. Nutritional Epidemiology
3. Nutrition and Health issues in Indigenous populations
4. Lifestyle factors, Australian food habits and Australian food systems
5. Risk factors, nutrition and cardio vascular disease (CVD)
6. Risk factors, nutrition and cancer
7. Risk factors, nutrition and diabetes
8. Obesity and community health
9. Health Promotion and public health nutrition
10. International nutrition and world food politics
11. Quantitative and qualitative data collection methods

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

HLTH 4001 Professional Reasoning

Credit Points 10

Legacy Code 401125

Coordinator Ali Gebhardt (https://directory.westernsydney.edu.au/search/name/Ali_Gebhardt/)

Description This final year unit focuses on the transition from student to practitioner. The aim of this unit is to provide students with learning opportunities that will consolidate and enhance their competence in professional practice throughout their career. Professional

competencies of central concern include advanced clinical reasoning skills, evidence based-practice, reflective practice, personal and career management strategies, self-directed and life-long learning. These competencies contribute positively to the effective management of graduates' clinical practice in various work contexts, and their future career paths. Acquisition of such skills will allow the graduate to direct and adapt to change in these areas.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 3019 AND REHA 3002

Co-requisite(s) REHA 3024

Incompatible Subjects HLTH 7013 - Professional Reasoning

Restrictions Students must be enrolled in 4711 Bachelor of Occupational Therapy or 4712 Bachelor of Occupational Therapy (Honours). This is a specialty subject offered as a compulsory core subject of the occupational therapy program. It is profession specific, preparing students to practice as an occupational therapist and not relevant as an elective for non-occupational therapy students.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify various models and classifications of clinical reasoning and analyse their use in practice
2. Apply occupational therapy theories and conceptual models to guide clinical reasoning in practice scenarios
3. Apply the occupational therapy problem solving process to practice scenarios and reflect on clinical reasoning during the different stages of problem solving
4. Reflect on their own clinical reasoning skills and identify strategies to move from a novice to expert reasoning
5. Apply principles of ethical reasoning to various practice scenarios

Subject Content

1. Models and theories of clinical reasoning
2. Use of clinical reasoning to guide client management
3. Models and theories of occupational therapy practice and process
4. Using evidence based practice to guide client management and the role of evidence-based practice in clinical reasoning
5. Strategies to move from novice to expert in clinical reasoning
6. Principles of ethical reasoning

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

HLTH 4002 Evidence-Based Practice (Advanced)

Credit Points 10

Legacy Code 400944

Coordinator Rosalind Bye ([https://directory.westernsydney.edu.au/search/name/Rosalind Bye/](https://directory.westernsydney.edu.au/search/name/Rosalind%20Bye/))

Description In this unit, students incorporate previous research and biostatistics knowledge to develop new skills for using evidence to inform all aspects of their professional practice. Evidence-based practice uses an enquiry led approach to manage expanding and uncertain knowledge by formulating answerable questions, effectively searching literature, critically appraising evidence validity and results, and to assess its significance in clinical practice and healthcare decision-making. Students will incorporate evidence in communication and shared decision-making processes for patient scenarios relevant to their program. Students will embark on research training through studying the theory and application of research methods to honours research in their chosen field and practising the skills to analyse evidence in the health sciences.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) Students need to have done HLTH 2021 Research Methods plus students in Occupational Therapy Physiotherapy and Podiatric Medicine must have done ONE clinical unit from their specific program These are outlined below
Students enrolled in Course Code 4661 (Continuing) or 4708 (Current) must have completed REHA 2007 Podiatry Pre-Clinical
Students enrolled in Course Code 4663 (Continuing) or 4711 (Current) must have completed REHA 2004 Occupational Therapy Practice 2
Students enrolled in Course Code 4662 (Continuing) or 4706 (Current) must have completed REHA 3003 Clinical Education General

Incompatible Subjects HLTH 3005 - Evidence-Based Practice

Restrictions

Students must be eligible to enrol in honours in the nominated programs. This subject is only relevant to honours students in clinical health sciences and is specifically tailored to accommodate the program and progression requirements of such students. It is not appropriate as a general elective.

Assumed Knowledge

Knowledge and skills of Foundations of Research & Evidence-based Practice 400863 and Research Methods (Qualitative and Quantitative) 400864 AND at least one clinical subject of the student's program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Conduct sensitive and specific PICO search strategies
2. Identify key classification, design and result information from research studies
3. Critically appraise validity and clinical significance of research
4. Justify value of evidence according to its level, quality and applicability
5. Incorporate evidence into clinical reasoning and decision making
6. Negotiate evidence-informed shared decision-making
7. Formulate an appropriate design and research protocol for the honours investigation in conjunction with the honours supervisor
8. Analyse the organisational and ethical issues of research in health practice settings, and practically apply this to the honours research topic
9. Justify the selection of specific data analysis techniques for use in the student's research question

Subject Content

1. Exploring reasons for EBP
 - history of EBP development in health care
 - management of professional disagreement, situation effects and bias
 - management of information overload
 - management of uncertainty
2. Appraising evidence
 - for studies of interventions, diagnostic tests, prognosis, experiences and systematic reviews and guidelines
 - level of evidence
 - Internal Validity
 - statistical and clinical significance
 - Generalisability, Applicability and Usefulness
3. Implementing evidence into practice
 - incorporating evidence with expertise, values and situations
 - limitations of EBP paradigm
 - using evidence in clinical reasoning and decision-making
 - communicating evidence to clients
 - evidence-informed shared decision-making
 - evaluation of EBP
4. Honours research development knowledge and skills
 - transition Issues: Becoming A clinical health science Honours researcher and Understanding The Honours research training process
 - Working with your supervisor and developing good research practice skills
 - Scholarly writing and using library resources
 - research design of Honours Projects
 - ethics of research in The health sciences
 - developing, writing and Presenting An Honours research proposal
 - data analysis techniques and managing data in Honours Projects

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Critical Review: Critically Appraised Topic: Part A Written Assignment	600 words plus search strategy	15	N	Individual
Viva Voce: Critically Appraised Topic: Part B Viva Examination	20 minutes	25	Y	Individual
Final Exam	90 minutes	35	N	Individual
Research Proposal	2,000 words	25	N	Individual

HLTH 7001 A Global Perspective on Social Determinants of Health

Credit Points 10

Legacy Code 400841

Coordinator David Lim ([https://directory.westernsydney.edu.au/search/name/David Lim/](https://directory.westernsydney.edu.au/search/name/David%20Lim/))

Description Evidence is mounting that the health of individuals, groups and whole populations is significantly determined by social factors - the social determinants. The related research has its origins in concern for the growing inequalities in health both within and between countries. This unit examines the framework of the social determinants of health in a global perspective and includes a reflection on the phenomenon of globalisation and its impact, both positive and negative on people's health. Students will critically reflect on this relatively new and emerging body of knowledge and research which clearly situates the maintenance of health and healthy societies within their socioeconomic and socio-cultural contexts. They will also examine implications for policy, health systems and different groups within society.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the social determinants of health in their global and local manifestations
2. Critically evaluate the evidence supporting the social determinants thesis and causal pathways offered to describe the link between social factors and inequitable health outcomes;
3. Critically analyse the impact of globalisation and social structure and processes on health inequalities within Australia and internationally;
4. Critically appraise the link between social stratification, differential exposure, differential susceptibility and differential consequences in generating health inequities
5. Critically assess the capacity of national health systems to reduce health inequities and have a better balance between acute care and prevention/health maintenance.

Subject Content

1. Social Determinants of Health and Illness
 - The social health gradient ? international evidence; Health equity, equality and inequality
 - Proximal and distal Determinants of health inequities
 - The Global marketplace
2. Impacts of Globalization, on:
 - policy making (World bank and WHO); political and economic structures and processes
 - health professional training, manpower and Migration
 - environments for health: local and Global, including climate change
3. Responses:
 - frameworks for policy development using The social Determinants perspective
 - frameworks for Analysing The links between globalization and health
 - Reorienting health services
 - inter-sectoral partnerships and collaboration

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Professional Task	2,000 words	40	N	Individual
Professional Task	3,000 words	50	N	Individual
Professional Task	300 words	10	N	Individual

Teaching Periods

HLTH 7002 Building Organisational Capacity in Health Care

Credit Points 10

Legacy Code 400846

Coordinator Olayide Ogunsiji ([https://directory.westernsydney.edu.au/search/name/Olayide Ogunsiji/](https://directory.westernsydney.edu.au/search/name/Olayide%20Ogunsiji/))

Description The concept, form and structure of health care organisations are explored. Organisational theory is used to analyse contemporary health care structures. Factors which influence organisational design, function and effectiveness are discussed including: organisational behaviour, strategy, culture, power and politics, technology, sustainability and effectiveness. A major focus is planning for strategic organisational development to meet the challenges of rapid change and the need for performance improvements in patient care delivery. Concepts related to the strategic development of workforce capacity in the health care arena considered through the application of theories including the learning organisation. Leadership is examined with emphasis on change management.

School Nursing & Midwifery

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects PUBH 7017 - Leadership and the Development of Organisational Capacity in Health Care

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Assess the impact of organisational culture, power, politics and technology on readiness for change in health care organisations.
2. Critically analyse organisational strategy, design and structure of health care organisations by applying organisational theory.
3. Investigate how effective change leadership can lead to improved organisational capacity and performance.
4. Critically reflect on and critique health care organisational capacity building in a rapidly changing environment.
5. Recommend strategies for workforce capacity development within a contemporary health care setting.

Subject Content

Module 1 - Introduction to organisational theory, design and structure, and its application to the health care environment

- organisational theory and structure - organisational structures, function, formal systems of power and authority, how they are affected by the internal and external environment in the health care sector
- factors influencing organisational design and function in health care including organisational behaviour, strategy, culture, power and politics, technology, sustainability and effectiveness
- organisational culture and subcultures in health care

Module 2 - Organisational capacity building, workforce development and change management in the health care environment

- leadership, adaptive organisational cultures and change
- theories and frameworks for organisational capacity building
- Models and strategies for workforce development

- managing conflict, pandemic, power and politics in health care organisations
 Module 3 - Improving organisational performance
 - theories and concepts underpinning organisational performance improvement in health care
 - Measuring organisational performance and effectiveness
 - leading organisational capacity building and improving organisational performance in the health care arena

Assessment

HLTH 7003 Community and Public Health Nutrition

Credit Points 10

Legacy Code 301186

Coordinator Li Li ([https://directory.westernsydney.edu.au/search/name/Li Li/](https://directory.westernsydney.edu.au/search/name/Li%20Li/))

Description This unit examines the principles of public health nutrition and a systems approach, and enables students to use them to identify and analyse nutrition issues and outcomes. Students will learn about the food and nutrition system and its drivers, and examine their impact on current food, nutrition and nutrition-related health issues. They will explore public health nutrition priorities in Australia and 'at risk' groups such as Aboriginal and Torres Strait Islander peoples, culturally and linguistically diverse groups, and other vulnerable groups. They will learn to interrogate nutrition-related policies in relation to public health nutrition priorities and contemporary topics in Australia and similar contexts. Students will learn about the role of advocacy in promoting a sustainable and equitable food supply system, and improving food and nutrition outcomes for populations.

School Science

Discipline Nutrition and Dietetics

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Unit coordinator permission is required, to ensure that prospective students have completed sufficient undergraduate study (the equivalent of 30 credit points of undergraduate study at Western) that focus on nutrition science, life cycle nutrition, and the relationship

between diet and disease. This is essential, assumed knowledge for this unit, as the subject does not teach these topics.

Assumed Knowledge

Undergraduate knowledge of human nutrition, including nutrition science, life cycle nutrition, and the relationship between diet and disease.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply principles of public health nutrition and a systems approach to analyse population-level food and nutrition issues and outcomes.
2. Analyse the food and nutrition system in Australia and evaluate the impact of relevant drivers on the components as well as the whole of the system.
3. Critique current policies, strategies and advocacy practices in Australia and similar contexts, in relation to public health nutrition and the food system.
4. Identify public health nutrition issues and priorities in Australia and similar contexts, and in their populations and at risk subgroups, and examine how these issues and priorities have been addressed and the outcomes.
5. Communicate professionally and effectively to a range of audiences, in written and oral formats.

Subject Content

1. The principles of public health nutrition and a systems approach, and its relationship with population food, nutrition and health outcomes.
2. An introduction of food and nutrition system and its drivers, such as the social, economical, political, and environmental drivers.
3. Public health nutrition issues and priorities in Australia and in at risk groups such as Aboriginal and Torres Strait Islander peoples, culturally and linguistically diverse groups, and other vulnerable, minority groups.
4. Policies and strategies, such as nutrition and food monitoring and surveillance, to examine current nutrition and nutritionally-related health issues, and promote population-level nutrition outcomes.
5. The purpose and how to of strategic and effective advocacy in influencing nutrition, food and health policy and legislation, and the food and nutrition system, in order to promote a sustainable and equitable food supply, and adequate population-level nutrition.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HLTH 7004 Dissertation

Credit Points 40

Legacy Code 401079

Coordinator Amit Arora (<https://directory.westernsydney.edu.au/search/name/Amit Arora/>)

Description This unit requires students to complete a substantial piece of independent research. Dissertations will involve the in-depth examination of a particular topic/question, and should demonstrate evidence of ability to undertake sustained critical analysis. The dissertation provides an opportunity for students to demonstrate that they can consolidate knowledge acquired throughout their course of study, understand how existing evidence/information relates to research topics, and how their own work adds to this body of knowledge. Independent thinking is required, including the ability to critique one's own work and that of others, as well as articulating the implications of their own research and support their findings through their written dissertation. Students will have the opportunity to participate in workshops where they will gain skills in defining a clear research question, preparing a formal research proposal, conducting a literature review, ethics and research, and formal writing at a professional standard. Findings of student work will be presented at an end of semester research seminar. This unit can also be taken over two semesters (see 401282 Dissertation (Part-Time)).

 HLTH 7008 Introduction to Biostatistics
 OR
 HLTH 7025 Healthcare Data for Decision making
 OR
 HLTH 7015 Qualitative Research Methodology in Health
 For students enrolled in 3749 Master of Science and 4738 Master of Epidemiology courses only
 HLTH 7008 Introduction to Biostatistics
 For all students
 PUBH 7016 Introduction to Epidemiology

Equivalent Subjects The two units below are equivalent to each other

HLTH 7004 Dissertation (Full-time)
 HLTH 7020 Dissertation (Part-time)

Restrictions

To enrol in this unit, students must be enrolled in a post-graduate program and have a GPA of 5.5 or greater. Students must have an

approved Masters Dissertation Proposal before enrolling. Students must submit prior to enrolment a proposal no longer than 3 pages comprising the following: 1. Proposed title 2. Background and rationale 3. Research objectives 4. Research plan (including study design, data sources, and analytic strategy) 5. Expected outcomes and benefits 6. Risk identification and mitigation plan 7. Ethical implications 8. Budget and how research costs are to be met (if required) 9. Timeline 10. Supervisor endorsement. 11. References Approval of the Dissertation Proposal must be provided by the subject Coordinator to ensure that the project meets the expected scale and scope of a 40 credit point Dissertation. For students enrolled in the Master of Public Health, Master of Health Science or Master of Epidemiology, they are also required to have completed 80cp before they can enrol in this subject.

Assumed Knowledge

It is assumed that the student would have completed core (or foundational) subjects associated with their Masters program, ideally in relevant research design and practice related disciplines.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Argue for the significance of research and their impact on society
2. Systemically and critically analyse literature and information sources that are related to the identified research question / hypothesis
3. Justify a research proposal in relation to its significance in the literature, its anticipated impact and the ethical considerations involved
4. Apply appropriate research methods and evaluation processes to collate and critically analyse/interpret data
5. Compose a scientific research report that synthesises research findings.
6. Effectively communicate/disseminate findings of a research project to a variety of audiences

Subject Content

Research proposal development in consultation with supervisor(s)
Data collection, collation, and analysis
Interpretation and dissemination of research findings in the form of a professionally-written research report

1. Research proposal development in consultation with supervisor(s) and subject co-ordinator feedback
2. Data collection, collation, and analysis
3. Interpretation and dissemination of research findings in the form of a professionally-written dissertation or a draft journal article
4. Dissemination of research findings in the form of a seminar presentation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Proposal	3-4 pages	S/U	Y	Individual
Thesis	up to 20,000 words for Dissertation/ up to 8,000 words for draft Journal article	90	Y	Individual
Presentation	15 minutes	10	N	Individual

HLTH 7005 Health Financial Management

Credit Points 10

Legacy Code 400845

Coordinator David Lim ([https://directory.westernsydney.edu.au/search/name/David Lim/](https://directory.westernsydney.edu.au/search/name/David%20Lim/))

Description This unit provides health leaders with an introduction to financial management in health and aged care settings as a basis for understanding the impact of leadership decision-making on financial outcomes and how financial decision-making impacts on clinical service delivery. Content includes an overview of health economics and economic evaluation, health care funding models, the principles, practices and tools for financial planning and management, basic

accounting principles and financial terminology and using financial information and reporting for negotiating financial plans, tracking and evaluating financial performance and using financial information in decision-making within the clinical environment.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 7322 - Health Economics and Comparative Health Systems LGYA 7489 - Resources management in Aged Care

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Be able to critically examine different funding arrangements used internationally, and/or between the Commonwealth and the States in Australia for health and aged care services.
2. Be aware of recent reforms in funding, including government funding, non-government funding, user pays, and current and future issues in financing.
3. Understand basic accounting principles and the language of financial reporting.
4. Understand financial management issues, such as accounting for overheads, capital assets, short and long-term liabilities and depreciation.
5. Critically analyse the reporting systems used by health and aged care organisations, including budget statements.
6. Prepare budgets and economic appraisals of funding options.
7. Understand how health information is used to develop performance indicators for management of cost centres, be able to analyse budget variances and evaluate options eg in response to budget blowouts.
8. Prepare an application for funding, with consideration of offsets and alternative funding strategies.

Subject Content

- national and Regional funding responsibilities, budget determination and Distribution of funds.
- state government role, resource Distribution formula and episode funding.
- Recent policy Initiatives and opportunities for reform.
- Alternative funding strategies to government (e.g., sponsorships, privatization, competitive tendering and fee-for-service arrangements).
- other Models and Initiatives for funding of different health care systems, eg, Hong Kong.
- external and Internal environments which influence financial performance of organisations.
- principles of health and aged care services sector financial management and accounting.
- management accounting and how financial events are reported.
- key performance indicators and cost centre report interpretation.
- how to Evaluate financial position eg with performance ratios, Contract services or purchase, profit, loss and return on investments.
- development and use of health information for eg, casemix funding and performance indicators.
- accounting for capital Assets eg capital charging.
- how to conduct An economic appraisal of A new development.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Short Answer	500 words	20	N	Individual
Report	1,500 words	30	N	Individual
Professional Task	200 words	10	N	Individual
Report	2,000 words	40	N	Individual

Teaching Periods

HLTH 7006 Health Services and Facilities Planning

Credit Points 10

Legacy Code 400844

Coordinator Stacie Powell ([https://directory.westernsydney.edu.au/search/name/Stacie Powell/](https://directory.westernsydney.edu.au/search/name/Stacie%20Powell/))

Description Planning occurs at all levels within all health organisations, government, non-government and in the private sector. There is a hierarchy in planning health services with some global overarching policy documents, national agreed priorities which affect corporate and regional plans as well as local services and projects. Planning focuses on future directions for health, is value based and resource allocation driven. The process of health planning will be outlined including how to conduct a needs analysis, develop an evidence based approach, consult with stakeholders including the community, document an implementation plan and evaluate outcomes.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects BUSM 7104 - Strategic Analysis and Decision Making

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the concept of planning, the planning process and the need for planning by health managers
2. Demonstrate knowledge of the differences between strategic management, strategic planning, business planning and health service planning and their application in the public and private sectors
3. Demonstrate the capability to prepare key planning documents, including corporate and strategic plans, business plans and health service plans
4. Describe the differences between mission statements, goals, strategic objectives, operational objectives and balanced scorecard approaches to planning and their application in developing planning documents
5. Conduct a needs analysis including stakeholder consultation, analysis of relevant qualitative and quantitative data based

on appropriate data sets and the capacity to collect relevant information

6. Develop planning competencies in the preparation of a strategic plan for a service of choice; using external and internal environmental scanning and population based planning approaches
7. Develop planning competencies in the preparation of a health service plan; including application of planning methodologies such as role delineation, data analysis of relevant data sets, clinical stream planning approaches including models of care, situational analysis and links with facility planning and asset management
8. Develop critical analysis skills in defining key issues for the planning process and strategies to address the issues
9. Develop and complete an implementation plan including risk mitigation strategies and identify and apply criteria to evaluate a plan

Subject Content

- 1) Strategic Planning in Health
- 2) Developing and implementing Strategic plans in the health sector
- 3) Developing service plans in the health sector
- 4) Conducting a needs analysis
- 5) Conducting community consultations
- 6) Evaluating health system performance (balanced scorecard)
- 7) Using evidence in health service delivery and evaluation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HLTH 7007 Health Workforce Planning

Credit Points 10

Legacy Code 400843

Coordinator Stewart Alford ([https://directory.westernsydney.edu.au/search/name/Stewart Alford/](https://directory.westernsydney.edu.au/search/name/Stewart%20Alford/))

Description This is a flexible learning unit looking at Human Resource Management as a strategic activity of health organisations especially as workforce shortages pose significant challenges to the health, welfare and aged care sectors. The workforce, with appropriate knowledge and expertise, is essential to the efficient and effective delivery of quality health services. Successful organisations shape their workforce to anticipate current and future business directions and goals. Workforce planning is a crucial element of this approach and its success.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 8572 - Human Resources Management LGYA 7490 - Workforce Planning and HR Issues in Aged Care LGYA 4898 - Human Resource Management

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyze the health industry workforce profile based on appraisal of national and international workforce data.
2. Evaluate human resources management and information management systems used in health care organisations to develop and manage critical workforce data.
3. Identify future workforce needs within the health care industry and apply principles of strategic human resource planning to address workforce issues.
4. Manage an organisational workforce, including recruitment and selection, performance management, training, development and employee relations, for the health and aged care industry

Subject Content

1. The health industry workforce profile based on an analysis of rigorous workforce data.
2. Human resources management and information systems used in health care service organisations to develop and manage critical workforce data.
3. Identification of future workforce needs within the health care industry and apply principles of strategic human resource planning to address workforce issues.
4. Development of skills in workforce management, including recruitment and selection, performance management, training, development and employee relations, for the health and aged care industry
5. Conducting staff appraisals.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Workforce planning report	1500 words	40	N	Individual
Workforce performance report	2500 words	60	N	Individual

Teaching Periods

HLTH 7008 Introduction to Biostatistics

Credit Points 10

Legacy Code 401077

Coordinator Paul Fahey ([https://directory.westernsydney.edu.au/search/name/Paul Fahey/](https://directory.westernsydney.edu.au/search/name/Paul%20Fahey/))

Description Most professions in the health sciences need to read and interpret statistics relating to individual health status, interpret health risks in communities, and engage in the evaluation of interventions, or impact of health policies or programs. Many public health practitioners are actively involved in surveillance, quantitative research and/or evaluation. This unit provides students with the fundamental skills they need to analyse and interpret results from quantitative data collections. Content includes descriptive statistics, undertaking comparisons between groups, quantifying associations between variables, and statistical power. The unit is highly applied with the main focus being on interpretation and appraisal of statistical results and conducting analyses using statistical software.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

High school mathematics (arithmetic, formulas and algebra, reading graphs).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Select appropriate descriptive statistics and graphs for different data types and produce these from a data set using statistical software.
2. Explain key concepts such as statistical inference, the central limit theorem, sampling distributions, probability distributions, confidence intervals, hypothesis tests, etc
3. List the key steps required to produce a confidence interval and to conduct a hypothesis test
4. Use statistical terms and symbols correctly when reviewing and interpreting statistical material
5. Compute statistical power or required sample size for a confidence interval or hypothesis test
6. Select appropriate statistical analyses to address a given research question and implement these analyses on a data set using statistical software
7. Interpret the output of statistical analyses clearly and correctly in a written report
8. Appraise the appropriateness of statistical results relative to all relevant considerations: including the research question, data types, shape of distribution, statistical power and other, procedure specific, assumptions.

Subject Content

1. Data and data types (categorical, ordinal, quantitative, etc)
2. Descriptive statistics (mean, standard deviation, median, quartiles, frequency, relative frequency) and graphs (bar chart, histogram, scatterplot, boxplots, run charts, etc)
3. Using statistical software
4. Statistical inference (populations, random samples and the probability relationship between them)

5. Probability distributions (binomial and normal), what they represent and how they are used
6. Confidence intervals as a method of statistical inference and the role of the central limit theorem
7. Hypothesis tests as a method of statistical inference, the 5 steps in hypothesis testing
8. t-procedures for statistical inference on means and mean differences
9. Chi-square procedures for statistical inference on associations between categorical variables
10. Statistical power and sample size in relation to one sample and difference between two sample confidence intervals and hypothesis tests only
11. Correlation and multiple regression models and associated confidence intervals and hypothesis tests
12. Nonparametric alternatives to t-procedures

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HLTH 7009 Leadership and Change

Credit Points 10

Legacy Code 400414

Coordinator Cannas Kwok ([https://directory.westernsydney.edu.au/search/name/Cannas Kwok/](https://directory.westernsydney.edu.au/search/name/Cannas%20Kwok/))

Description Within the context of a society where change is ongoing, leadership is required in order to achieve optimum outcomes. Students in this unit will be encouraged to critically explore leadership styles, leadership and change theories, leadership in learning organisations and the community within a primary health care framework. This unit will enable students to assess both the internal and external environments of organisations, communities and individuals as the need for change is identified, planned and implemented. The unit identifies the central strategies necessary for the development of leaders who are able to achieve sustainable change outcomes.

School Nursing & Midwifery

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYC 0566 - Processes of Change

Restrictions

Students must be enrolled in 4569 Master of Primary Health Care or 4694 Master of Primary Health Care.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically apply the principles of leadership theory to the development of effective individual and organisational leadership strategies for practice within a primary health care approach;
2. Reflect on the relationship between leadership and management;
3. Understand and incorporate the importance of emotional intelligence as a factor in leading sustainable change processes;
4. Critically examine the empowering role of education in facilitating change outcomes;
5. Critically examine the relationship between leadership, organisational culture and sustainable change;
6. Critically explore the effects of internal and external environmental factors on organisations as they move through change processes.

Subject Content

Theories and styles of leadership.

Empowerment, motivation and sustainable change.

Critical reflection and change outcomes.

Learning organisations and leadership.

Mentorship in leadership development.

Internal and external environmental influences on change processes.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Teaching Periods

HLTH 7010 Nutrition Promotion

Credit Points 10

Legacy Code 301185

Coordinator Li Li ([https://directory.westernsydney.edu.au/search/name/Li Li/](https://directory.westernsydney.edu.au/search/name/Li%20Li/))

Description This unit aims to introduce students to the principles and practices of nutrition and health promotion, for use in primary and secondary prevention. Students will learn and critically appraise all aspects of the program planning cycle, from needs assessment to evaluation. Students will develop their capabilities to design initiatives that are responsive to, and contribute to, the community and public health nutrition evidence base. Students will acquire knowledge related to communication, food and social marketing, nutrition education, and nutrition and behaviour change theories; and learn how to translate this into effective nutrition promotion initiatives that aim to influence food choice, intake, supply and/or access. Lastly, students will learn to work in, and/or manage, multi-disciplinary teams and work with key stakeholders. Negotiation and influencing skills, together with capacity building skills, to guide and upskill individuals and groups, will be developed for the purpose of improving the nutritional status of groups.

School Science

Discipline Nutrition and Dietetics

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Unit coordinator permission is required, to ensure that prospective students have completed sufficient undergraduate study (the equivalent of 30 credit points of undergraduate study at Western) that focus on nutrition science, life cycle nutrition, and the relationship between diet and disease. This is essential, assumed knowledge for this unit, as the subject does not teach these topics.

Assumed Knowledge

Undergraduate knowledge of human nutrition, including nutrition science, life cycle nutrition, and the relationship between diet and disease.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply behaviour change theories to promote nutrition for individuals and populations.
2. Critique nutrition promotion initiatives, and food and social marketing techniques, in Australia and globally, that aim to influence food choice, intake, supply and/or access.
3. Apply program planning skills, models and principles to develop nutrition promotion programs addressing community and public health nutrition priorities.
4. Apply suitable frameworks and education skills to engage communities and build capacity for individuals and groups.
5. Demonstrate professional skills required to conduct successful nutrition promotion practices, such as interpersonal and counselling skills, negotiation and influencing skills, project management, and the ability to develop and maintain effective working relationships within multi-disciplinary teams and with key stakeholders.
6. Communicate professionally and effectively in verbal and written formats in a culturally sensitive manner.

Subject Content

1. Theories and evidence relevant to nutrition promotion, including:
 - i. Behaviour change theories
 - ii. Social and food marketing techniques
 - iii. Other theories and evidence related to the drivers of food choice
 - iv. Communication styles and modes
 - v. Nutrition education
2. The principles, models, and practices for planning successful programs, services and/or strategies:
 - i. Key stages, for example, conducting a needs assessment, designing and planning a program/strategy/intervention/service, identifying implementation challenges and solutions, and conducting process and outcome evaluation
 - ii. Logistical considerations
 - iii. Negotiating, influencing, and developing/maintaining effective working relationships with(in), multi-disciplinary teams and key stakeholders
 - iv. Capacity building
3. The design of effective nutrition promotion programs and strategies that aim to influence food choice, intake, supply and/or access, and are responsive to, and/or contribute to, the community and public health nutrition evidence base.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Intra-session exam	300 words per quiz	30	N	Individual

HLTH 7011 Nutritional Assessment Methods

Credit Points 10

Legacy Code 301184

Coordinator Li Li ([https://directory.westernsydney.edu.au/search/name/Li Li/](https://directory.westernsydney.edu.au/search/name/Li%20Li/))

Description This unit aims to introduce students to methodologies that incorporate anthropometric, biochemical, clinical, dietary and physical activity assessment to assess the nutritional status of individuals and groups. Students will critically explore the strengths and limitations of various methods. Students will also learn to make professional judgement regarding when and how to use methods, including validating nutritional status assessment methods to achieve valid and reliable nutritional assessment outcomes.

School Science

Discipline Nutrition and Dietetics

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Unit coordinator permission is required, to ensure that prospective students have completed sufficient undergraduate study (the equivalent of 30 credit points of undergraduate study at Western) that focus on nutrition science, life cycle nutrition, and the relationship between diet and disease. This is essential, assumed knowledge for this unit, as the subject does not teach these topics.

Assumed Knowledge

Undergraduate knowledge of human nutrition, including nutrition science, life cycle nutrition, and the relationship between diet and disease.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Select, justify, implement, and interpret data from, tools and methodologies for assessing the nutritional status of individuals or groups, for various purposes and assess data/results against various guidelines/references.
2. Critique the strengths and limitations (including measurement errors) of various nutritional status assessment techniques, tools and methodologies.
3. Obtain, organise, analyse, and present dietary data and interpret results, utilising suitable nutritional analysis software, databases, techniques and procedures.
4. Describe, critique, apply, and interpret results from, various methods used to determine the comparative validity and reliability of specific tools and methods used to assess nutritional status.

5. Communicate professionally and effectively in verbal and written formats.

Subject Content

1. Methods, including their strengths, weaknesses, and when and how to use, that can be used to assess the nutritional status of groups and individuals. This includes:
 - i. Anthropometry (for example, body composition)
 - ii. Biochemical (for example, iron deficiency anaemia)
 - iii. Clinical (for example, sarcopenia)
 - iv. Dietary methods (for example, diet diversity or energy intake)
 - v. Physical activity level
 - vi. Energy expenditure
2. Results of various nutritional assessment methods to evaluate nutritionally related issues or assess progress against guidelines/references/standards to assess nutritional status (for example, nutrient reference values).
3. Comparative validity and reliability of methods that are used to assess nutritional status (for those that have not been already validated) and the results from validation studies.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HLTH 7013 Professional Reasoning

Credit Points 10

Legacy Code 400925

Coordinator Rosalind Bye ([https://directory.westernsydney.edu.au/search/name/Rosalind Bye/](https://directory.westernsydney.edu.au/search/name/Rosalind%20Bye/))

Description This final year unit focuses on the transition from student to practitioner. The aim of this unit is to provide students with learning opportunities that will consolidate and enhance their competence in professional practice throughout their career. Professional competencies of central concern include advanced clinical reasoning skills, evidence based-practice, reflective practice, personal and career management strategies, self-directed and life long learning. These

competencies contribute positively to the effective management of graduates clinical practice in various work contexts, and their future career paths. Acquisition of such skills will allow the graduate to direct and adapt to change in these areas.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) REHA 7011 OR REHA 7013

Restrictions

Students must be enrolled in 4663 Bachelor of Health Science/Master of Occupational Therapy, 4664 Master of Occupational Therapy, 4711 Bachelor of Occupational Therapy or 4712 Bachelor of Occupational Therapy (Honours). This is a specialty subject offered as a compulsory core subject of the occupational therapy program. It is profession specific, preparing students to practice as an occupational therapist and not relevant as an elective for non-occupational therapy students.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify various models and classifications of clinical reasoning and analyse their use in practice
2. Apply occupational therapy theories and conceptual models to guide clinical reasoning in practice scenarios
3. Apply the occupational therapy problem solving process to practice scenarios and reflect on clinical reasoning during the different stages of problem solving
4. Critically reflect on their own clinical reasoning skills and identify strategies to move from a novice to expert reasoning
5. Apply principles of ethical reasoning to various practice scenarios

Subject Content

1. Models and theories of clinical reasoning
2. Use of clinical reasoning to guide client management
3. Models and theories of occupational therapy practice and process
4. Using evidence based practice to guide client management and the role of evidence-based practice in clinical reasoning
5. Strategies to move from novice to expert in clinical reasoning
6. Principles of ethical reasoning

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must have permission from subject Coordinator to enrol in this subject. Students must have GPA of 5.0 or above. Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Propose and investigate a topic area relevant to professional practice.
2. Critique peer-reviewed literature pertinent to the proposed topic and identify gaps in knowledge.
3. Design and Implement a relevant professional project.
4. Justify possible areas of inquiry for future research or development.

Subject Content

The design of this subject is flexible so that it can respond to the special needs of the student and their topic chosen for exploration. The learning activities and resources required will be individually negotiated between the student and their project supervisor. Unit content will include:

1. Project-based learning relevant to individual professional goals and available expertise within industry, academia or other relevant body.
2. Critical literature appraisal on topics relevant to the student's project
3. Project management skills
4. Report writing in the form of a scoping paper or research paper or industry project report.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Literature Review	2,500 words	40	N	Individual
Scoping Report OR Applied Research Project OR Industrial Project Performance	3,000 words	60	N	Individual

Teaching Periods

HLTH 7015 Qualitative Research Methodology in Health

Credit Points 10

Legacy Code 401238

Coordinator David Lim ([https://directory.westernsydney.edu.au/search/name/David Lim/](https://directory.westernsydney.edu.au/search/name/David%20Lim/))

Description This unit prepares students to conduct qualitative research. The unit covers ontologies, epistemologies, methodologies, and research methods, particularly those that involve the collection, management and analysis of qualitative data, and how findings are communicated. It also addresses the ethics of research.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appraise qualitative research projects and literature
2. Design quality research projects, connecting ontology, epistemology, methodology, and research methods
3. Judiciously select appropriate methodologies and methods to conduct research
4. Examine qualitative research proposals for their methodological quality and ethical sensitivities

Subject Content

1. Introduction to qualitative research
2. Ontology, epistemology, methodology, and qualitative research methods
3. Research design
4. Quality and ethical qualitative research
5. The use of qualitative research methods and communicating the associated findings for different audiences

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Critical Review	1,000 words	30	N	Individual
Short Answer	500 words	20	N	Individual
Proposal	3,000 words	50	N	Individual

HLTH 7016 Quality and Safety in Health Care

Credit Points 10

Legacy Code 400842

Coordinator Bruce Barraclough ([https://directory.westernsydney.edu.au/search/name/Bruce Barraclough/](https://directory.westernsydney.edu.au/search/name/Bruce%20Barraclough/))

Description Health care managers and clinicians are responsible for the quality and safety of patient care within their units. To introduce a culture of safety they must understand and work within current policy, surveillance and governance strategies. In this unit students will study the cultural and governance environments within which quality and safety systems are introduced in health care. Students will also develop skills required to effectively use the tools available for managing and monitoring quality and safety issues within their workplace.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects PUBH 7018 - Leadership in Quality and Safety in Health Care

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically appraise the human and cultural factors which impact on quality and safety
2. Understand the importance of surveillance, analysis and communication in developing quality and safety systems in health care
3. Develop and manage strategies for crisis management of unfolding quality and safety issues

Subject Content

- Health care standards in Australia; What are they? Who sets them? How are they monitored? Audits? Legislative requirements?
- Policy and organisational structure for the management of quality and safety issues in Australia; (Australian Commission on Safety and Quality and Health Care, NSW Clinical Excellence Commission and so forth)
- Risk management and patient safety

- Crisis management
- Reporting and Legislative requirements
- developing A culture of quality and safety
- clinical Governance
- information systems and quality management systems
- contemporary case studies

Teaching Periods

HLTH 7020 Dissertation (Part Time)

Credit Points 20

Legacy Code 401282

Coordinator Amit Arora ([https://directory.westernsydney.edu.au/search/name/Amit Arora/](https://directory.westernsydney.edu.au/search/name/Amit%20Arora/))

Description This is a 40 credit point year-long subject taken over two terms (20 credit points in each term). This subject requires students to complete a substantial piece of independent research. Dissertations will involve the in-depth examination of a particular topic/question, and should demonstrate evidence of ability to undertake sustained critical analysis. The dissertation provides an opportunity for students to demonstrate that they can consolidate knowledge acquired throughout their program of study and understand how existing evidence/information relates to research topics, and how their own work adds to this body of knowledge. Independent thinking is required, including the ability to critique one's own work and that of others, as well as articulating the implications of their own research and support their findings through their written dissertation. Students will have the opportunity to participate in workshops where they will gain skills in defining a clear research question, preparing a formal research proposal, conducting a literature review, ethics and research, and formal writing at a professional standard. Findings of student work will be presented at an end of semester research seminar. This subject can also be taken over one semester (see HLTH 7004 Dissertation (Full Time)).

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 20cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) For students enrolled in the 4702 Master of Public Health or 4698 Master of Health Science courses only
AGEN 7005 Research Protocol Design and Practice
and

HLTH 7008 Introduction to Biostatistics
OR

HLTH 7025 Healthcare Data for Decision making
OR

HLTH 7015 Qualitative Research Methodology in Health

For students enrolled in 3749 Master of Science and 4738 Master of Epidemiology courses only

HLTH 7008 Introduction to Biostatistics

For all students

PUBH 7016 Introduction to Epidemiology

Equivalent Subjects The two units below are equivalent to each other
HLTH 7004 Dissertation (Full-time)
HLTH 7020 Dissertation (Part-time)

Restrictions

To enrol in this unit, students must be enrolled in a post-graduate program and have a GPA of 5.5 or greater. Students must have an

approved Masters Dissertation Proposal before enrolling. Students must submit prior to enrolment a proposal no longer than 3 pages comprising the following: 1. Proposed title 2. Background and rationale 3. Research objectives 4. Research plan (including study design, data sources, and analytic strategy) 5. Expected outcomes and benefits 6. Risk identification and mitigation plan 7. Ethical implications 8. Budget and how research costs are to be met (if required) 9. Timeline 10. Supervisor endorsement. 11. References Approval of the Dissertation Proposal must be provided by the subject Coordinator to ensure that the project meets the expected scale and scope of a 40 credit point Dissertation. For students enrolled in the Master of Public Health, Master of Health Science or Master of Epidemiology, they are also required to have completed 80cp before they can enrol in this subject.

Assumed Knowledge

It is assumed that the student would have completed core (or foundational) subjects associated with their Masters program, ideally in relevant research design and practice related disciplines.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Argue for the significance of research and their impact on society
2. Systemically and critically analyse literature and information sources that are related to the identified research question / hypothesis
3. Justify a research proposal in relation to its significance in the literature, its anticipated impact and the ethical considerations involved
4. Apply appropriate research methods and evaluation processes to collate and critically analyse/interpret data
5. Compose a scientific research report that synthesises research findings.
6. Effectively communicate/disseminate findings of a research project to a variety of audiences

Subject Content

Research proposal development in consultation with supervisor(s)
Data collection, collation, and analysis
Interpretation and dissemination of research findings in the form of a professionally-written research report

1. Research proposal development in consultation with supervisor(s) and subject co-ordinator feedback
2. Data collection, collation, and analysis
3. Interpretation and dissemination of research findings in the form of a professionally-written dissertation or a draft journal article
4. Dissemination of research findings in the form of a seminar presentation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Proposal	3-4 pages	S/U	Y	Individual
Thesis	Up to 20,000 words for Dissertation/ Up to 8,000 words for draft Journal article	90	Y	Individual
Presentation	15 minutes	10	N	Individual

HLTH 7022 Advanced Health Service Management

Credit Points 10

Legacy Code 401361

Coordinator Paul Preobrajensky ([https://directory.westernsydney.edu.au/search/name/Paul Preobrajensky/](https://directory.westernsydney.edu.au/search/name/Paul%20Preobrajensky/))

Description This unit focuses on the principles and practice of health service management. The unit draws on material from different settings to consider governance, policy, and strategic planning. Students will critique health system reforms, including those that aim to address healthcare inequity. The role of politics and policy will be discussed to clarify the impact on health service management. The unit will explore how health service operations are managed and how

performance and outcomes are measured. Students will also explore how patients, carers, and other stakeholders shape health service management.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) PUBH 7031

Equivalent Subjects HLTH 7007 Health Workforce Planning

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique health service management processes to clarify how to improve workplace processes and organisational culture
2. Distinguish leadership and management skills, particularly the different approaches that are appropriate for individual circumstances
3. Translate data and information into policy and practice
4. Develop a change management plan
5. Effectively communicate to different audiences through verbal and written reports and presentations

Subject Content

1. The relationships between health service management, leadership, organisational culture, politics, and policy
3. Health service management in the public, private, and not-for-profit sectors
4. Strategic planning, including workforce planning, human resources, and resource management
5. Patient, carer, and public engagement
6. Governance and accountability
7. Measuring and managing impact

Assessment

HLTH 7023 Advanced Sport and Exercise Science

Credit Points 20

Legacy Code 401414

Coordinator Simon Green ([https://directory.westernsydney.edu.au/search/name/Simon Green/](https://directory.westernsydney.edu.au/search/name/Simon%20Green/))

Description Please note, unit 401291.1 Advanced Sport and Exercise Science replaced by 401414.1 Advanced Sport and Exercise Science from 2020. This unit provides Bachelor of Research Studies/Masters of Research candidates with an interest in Sport & Exercise Science with an opportunity to further their knowledge and skill-sets in the field. Working closely with their assigned supervisor(s), students will prepare a work-plan to further enhance their theoretical knowledge through a combination of independent and guided-study. The unit will provide students with an opportunity to strengthen their knowledge and expertise in their selected field of Sport & Exercise Science. The unit is focused on the development of discipline-specific knowledge (theoretical and practical) to prepare students for their research thesis and future career in a Sport & Exercise Science related field.

School Health Sciences

Discipline Human Movement

Student Contribution Band HECS Band 4 20cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 8083 - Bachelor of Research Studies/ Masters of Research

Assumed Knowledge

Students to have completed an undergraduate degree in Sport and Exercise Science or other closely related Health, Allied Health or Medical Science/Medicine undergraduate equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Plan, execute and evaluate two programs (learning contracts) of self-directed learning.
2. Develop and demonstrate sound knowledge and understanding of theory and practice in a chosen topic in Sports and Exercise Science.
3. Critically review published research about a topic related to your Masters research project.
4. Develop and demonstrate sound scientific writing skills.
5. Develop and demonstrate sound oral communication and presentation skills.

Subject Content

1. Advanced theoretical content related to the candidates research interests.
2. Developing skill-sets pertaining to Sport & Exercise Science research and/or clinical practice.
3. Management of self-directed learning programs.
4. Interpretation and evaluation of research contributions.

Special Requirements

Legislative pre-requisites

If you are involved in research work with human participants, you will need to consult with supervisors regarding any compulsory training or background checks that might be required.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Learning Contract	2 pages for each contract	10	Y	Individual
Reflection	1 page for each contract	10	Y	Individual
Presentation	45 minutes	40	N	Individual
Report	4,000 - 5,000 words	40	N	Individual

Prescribed Texts

- None. Reading in these subjects will be given by the supervisors and will be recently published primary research and review articles. These publications are available through the library website.

HLTH 7024 Health Services Financing

Credit Points 10

Legacy Code 401362

Coordinator Krista Cockrell ([https://directory.westernsydney.edu.au/search/name/Krista Cockrell/](https://directory.westernsydney.edu.au/search/name/Krista%20Cockrell/))

Description This unit provides health leaders with an introduction to financial management in both public and private sector health services. The learning from this unit forms a basis for understanding the impact of leadership decision-making on financial outcomes and how financial decision-making impacts on clinical service delivery. The development of different approaches to funding to address issues of effectiveness, efficiency and acceptability (including equity) are examined. Pressures for reform are linked to developments at various levels of management and organisation type to enable analysis of potential impacts on clinical delivery. Students will critically analyse the relationship between performance and principles of governance, focusing on developing an improvement in the quality of service delivery. Reflective practice will be used to facilitate the application of resource management and clinical governance to a self-identified workplace issue warranting a clinical governance business case.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) PUBH 7031

Equivalent Subjects HLTH 7005 Health Financial Management

Restrictions

Students must be enrolled in a postgraduate program

Assumed Knowledge

Competent use of Microsoft Excel, and high school mathematics (arithmetic, formulas and algebra, reading graphs).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse funding arrangements used internationally in comparison to those used within the Australian Healthcare system
2. Examine recent reforms in funding, including government funding, non-government funding and user pays in the Australian and international context.
3. Translate key health financial principles and language into practice.
4. Create a budget with consideration to financial risks from a zero-base for a proposed health service.

- Analyse budget variances and evaluate options to mitigate financial risks.

Subject Content

- International comparison of healthcare systems
- Budgeting for health
- The Pharmaceutical Benefits Scheme
- Medicare and the role of private healthcare in Australia
- Accounting and budgeting principles
- Casemix and DRGs
- The State Budget
- Healthcare Agreements and Planning
- The Private Public Partnership and Capital Charging
- Cost-benefit analysis of capital projects in healthcare
- Financial Risks in Healthcare

HLTH 7025 Healthcare Data for Decision-Making

Credit Points 10

Legacy Code 401365

Coordinator Kingsley Agho ([https://directory.westernsydney.edu.au/search/name/Kingsley Agho/](https://directory.westernsydney.edu.au/search/name/Kingsley%20Agho/))

Description Most professions in the health sciences need to read and interpret data relating to individual health status, interpret health risks in communities, and engage in the evaluation of interventions, or impact of health policies or programs. Many public health practitioners are actively involved in surveillance, quantitative research and/or evaluation. This unit provides an opportunity to learn about making health service decisions using appropriate data. Students learn how to explore and use data that are assembled to replicate real patient data to both generate and answer questions. The focus may be managerial or clinical, or an integration of these. Students analyse the assembled patient dataset to generate and interpret health statistics, and translate them into health information and knowledge for decision-making. Students completing this subject develop the ability to explore health data and provide recommendations based on the findings.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Competent use of Microsoft Excel, and high school mathematics (arithmetic, formulas and algebra, reading graphs).

Learning Outcomes

On successful completion of this subject, students should be able to:

- Explore and organise data in order to generate reports and make recommendations
- Identify and compare the relationship between data, information, knowledge and wisdom and how these elements inform practice, management, and policy
- Explain data elements in contemporary health data terminologies

Subject Content

- Health informatics
- Describing and visualising health data using appropriate software e.g. Microsoft Excel and SPSS
- Determining relationships between variables
- Limitations of the data and analysis and risks of misinterpretation
- Administrative Data and Clinical Data
- Demography and Health Indicators
- Working with Excel - Survival Analysis
- Interpreting data to determine health service needs
- Communication and dissemination of health information data to key stakeholders
- Working in Excel (II): Time Series Analysis
- Determining relationships between variables through data linkage
- Unintended errors in technology

6. Standardisation of data
7. Privacy, security and confidentiality

Assessment

HLTH 7026 Professional Internship in Health

Credit Points 40

Legacy Code 401368

Coordinator Stewart Alford ([https://directory.westernsydney.edu.au/search/name/Stewart Alford/](https://directory.westernsydney.edu.au/search/name/Stewart%20Alford/))

Description This unit provides students with the opportunity to translate the content of the postgraduate program to the context of the workplace through an integrated workplace internship. This experience will allow the student to develop the necessary skills and competencies expected of high performing health professionals. The Internship enables a focused opportunity to work in contemporary healthcare settings with leaders and managers from a variety of professions. Students will also engage in coursework with a focus on creating an portfolio that revisits all content learned throughout their courses to critically assess their learning journey and learning outcomes. This process will teach students how to systematically self-reflect in deep and transformative ways, engaging with theory and knowledge acquired and developed through their studies to design and create a portfolio of their skills and competencies through a social capital framework. The unit will culminate in a presentation of the results of their internship project in a research and practice seminar.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 40cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a post-graduate program and have a GPA of 5.5 or greater. Students enrolled in the Master of Public Health or Master of Health Science must have successfully completed 80 credit points. Permission is required for enrolment. Students must submit a CV and cover letter to the subject Coordinator detailing their previous professional experience/background and what they wish to achieve in the internship, including preferred areas of work in health.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique peer-reviewed literature and identify gaps in current knowledge and practice
2. Demonstrate good analytical skills, strong problem-solving skills and a logical approach to achieving outcomes
3. Plan, manage and deliver a comprehensive applied project or set of related tasks relevant to the health work place.
4. Demonstrate the ability to work cooperatively and effectively within a team environment displaying positive and constructive work behaviours to achieve common goals.
5. Engage in self-analysis to identify factors relevant to supporting life-long learning and ethical professional practice

6. Articulate and implement the principles of reflective practice in personal and professional settings
7. Evaluate personal strengths and their applications to leadership and participation in professional teams
8. Assess ones own capabilities in doing and knowing based on evidence of experience and practice

Subject Content

1. Professional experience in selected workplace
2. The reflective practice: Reporting and responding; relating; reasoning; and reconstructing
3. Social capital, habitus, field and practice ? using Bourdieu's social capital theory to self-reflect

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Self-Assessment	800 words	10	N	Individual
Essay	1,000 words	10	N	Individual
Portfolio	3,000 words	40	N	Individual
Presentation	15 minutes	10	N	Individual
Professional Placement Performance	2,500 words	30	N	Individual

HLTH 7027 Professional Project in Health 1

Credit Points 20

Legacy Code 401369

Coordinator David Lim ([https://directory.westernsydney.edu.au/search/name/David Lim/](https://directory.westernsydney.edu.au/search/name/David%20Lim/))

Description Health professionals, particularly those at managerial positions, are frequently tasked with solving very complex problems in their practice. Some of these problems are so complex that they can be called 'wicked' problems, or problems that are highly resistant to resolution. This unit uses project-based learning to provide students with the opportunity to work collaboratively and inter-disciplinarily to solve an industry-driven 'wicked' problem, using systematic and evidence-based techniques to do so. Students will be challenged to think broadly to take into account the interrelationships among a full range of causal factors underlying the 'wicked' problem at hand, and will be required to use more collaborative and innovative approaches to solve industry challenges. Students will be exposed to a range of industry representatives who will pose the difficult, 'wicked' problems to them and who will return to assess the proposed solutions.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 20cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students in 4702 Master of Public Health Pathway) and 4698 Master of Health Science must have successfully completed 40 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use collaboration and interpersonal skills to work together with a group of diverse professionals
2. Apply problem-solving skills to an actual health challenge
3. Critically analyse literature and information sources that are related to the identified **wicked** problem
4. Apply appropriate methods and evaluation processes to create a solution-based proposal
5. Evaluate feasibility, potential impact and limitations of potential solutions
6. Articulate complex health science ideas and solutions to a wide range of audiences
7. Demonstrate innovative thinking in creating a solution to a health challenge

Subject Content

1. Understanding wicked problems
2. Tackling wicked problems by working collaboratively and inter-disciplinarily
3. Design thinking
4. The stages of a solution-based proposal

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Professional Task	500 words	15	N	Individual
Professional Task	1,500 words	25	N	Individual
Professional Task	Minimum of 3 and maximum of 5 minutes	20	N	Individual
Professional Task	3,000 words	40	N	Group

HLTH 7028 Professional Project in Health 2

Credit Points 20

Legacy Code 401370

Coordinator Arianne Reis ([https://directory.westernsydney.edu.au/search/name/Arianne Reis/](https://directory.westernsydney.edu.au/search/name/Arianne%20Reis/))

Description This capstone unit intends to develop students' work-readiness. Health professionals are recurrently asked to engage in reflective practice as a way to improve clinical and non-clinical reasoning. The ability to reflect on action and in action allows health professionals not only to improve their practice but also to more clearly articulate their strengths and weaknesses to potential employers. In this unit, students will focus on creating a portfolio that will require revisiting all content learned throughout their courses to critically assess their learning journey and learning outcomes. It will teach students how to systematically self-reflect in deep and transformative ways, engaging with theory and knowledge acquired and developed through their studies to design and create a portfolio of their skills and competencies through a social capital framework.

Student Contribution Band HECS Band 2 20cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects HLTH 7026 Professional Internship in Health

Restrictions

Students enrolled in 4702 Master of Public Health and 4698 Master of Health Science must have successfully completed 40 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Engage in self-analysis to identify factors relevant to supporting life-long learning and ethical professional practice
2. Articulate and implement the principles of reflective practice in personal and professional settings
3. Evaluate personal strengths and their applications to leadership and participation in professional teams
4. Assess one's own capabilities in doing and knowing relative to their field based on evidence of experience and practice

Subject Content

1. The reflective practice: Reporting and responding; relating; reasoning; and reconstructing
2. Social capital, habitus, field and practice ? using Bourdieu's social capital theory to self-reflect

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

HLTH 7029 Quality and Safety

Credit Points 10

Legacy Code 401371

Coordinator Sarah Auld ([https://directory.westernsydney.edu.au/search/name/Sarah Auld/](https://directory.westernsydney.edu.au/search/name/Sarah%20Auld/))

Description This unit provides an overview of emerging health policy with particular attention to quality and safety. Students develop a critical view on the organisation of healthcare, measurement and delivery of outcomes from the patient and population perspective as well as organisational accountability for quality and safety. The course consists of three components. The first component targets the main constituents of clinical governance, including practice design, analysis and improvement, error reporting and investigation, public accountability and open disclosure, multi-disciplinary teamwork and clinical leadership. The second component introduces the tools of clinical process redesign which help managers make practical improvements to practices in their units. The third component targets risk management by providing an overview of the kinds of risks faced by health service managers by outlining perceptions of risk such as adverse effect versus opportunity capital.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects HLTH 7012 - Organisational Governance and Performance Management

Restrictions

Students must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse health reforms to apply to strategic and operational planning and implementation
2. Critique efforts to improve health systems, in Australia and beyond
3. Design strategies to avert risk and manage adversity
4. Integrate good governance into practice within a health service industry
5. Analyse the role of leadership, professional communication and interpersonal skills as they relate to quality and safety
6. Translate evidence and best practice into organisational and clinical governance to improve outcomes

Subject Content

1. Organisational governance
2. Quality and safety in the Australian and global context
3. Quality Improvement frameworks
4. Quality failings

5. Quality indicators, measurement and reporting
6. Quality management
7. Training and education for quality and safety
8. Risks and complaints management
9. Patient and public involvement in improving quality and safety in healthcare
10. Evaluating quality care through audit

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Summary	800 words	25	N	Individual
Proposal: Implementatic Proposal of a Quality and Safety Plan	1,250 words	35	N	Individual
Report: Evidence- based Policy for Workplace Quality and Safety	2,000 words	40	N	Individual

HLTH 7030 Professional Internship in Health (Part-time)

Credit Points 20

Legacy Code 401435

Coordinator Stewart Alford ([https://directory.westernsydney.edu.au/search/name/Stewart Alford/](https://directory.westernsydney.edu.au/search/name/Stewart%20Alford/))

Description This is a 40 credit point year-long subject taken over two terms (20 credit points in each term). This subject provides students with the opportunity to translate the content of the postgraduate program to the context of the workplace through an integrated workplace internship. This experience will allow the student to develop the necessary skills and competencies expected of high performing health professionals. The Internship enables a focused opportunity to work in contemporary healthcare settings with leaders and managers from a variety of professions. Students will also engage in coursework with a focus on creating a portfolio that revisits all content learned throughout their programs to critically assess their learning journey and learning outcomes. This process will teach students how to systematically self-reflect in deep and transformative ways, engaging with theory and knowledge acquired and developed through their studies to design and create a portfolio of their skills and competencies through a social capital framework. The subject will culminate in a presentation of the results of their internship project. This subject can also be taken over one semester (see HLTH 7026 Professional Internship in Health (Full Time)).

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 20cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a post-graduate program and have a GPA of 5.5 or greater. Students enrolled in the Master of Public Health or Master of Health Science must have successfully completed 80 credit points. Permission is required for enrolment. Students must submit a CV and cover letter to the subject Coordinator detailing their previous professional experience/background and what they wish to achieve in the internship, including preferred areas of work in health.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique peer-reviewed literature and identify gaps in current knowledge and practice
2. Demonstrate good analytical skills, strong problem-solving skills and a logical approach to achieving outcomes
3. Plan, manage and deliver a comprehensive applied project or set of related tasks relevant to the health work place.
4. Demonstrate the ability to work cooperatively and effectively within a team environment displaying positive and constructive work behaviours to achieve common goals.

5. Engage in self-analysis to identify factors relevant to supporting life-long learning and ethical professional practice

6. Articulate and implement the principles of reflective practice in personal and professional settings

7. Evaluate personal strengths and their applications to leadership and participation in professional teams

8. Assess ones own capabilities in doing and knowing based on evidence of experience and practice

Subject Content

1. Professional experience in selected workplace
2. The reflective practice: Reporting and responding; relating; reasoning; and reconstructing
3. Social capital, habitus, field and practice ? using Bourdieu?fs social capital theory to self-reflect

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Honours Research 2 (Podiatric Medicine)

Credit Points 10

Legacy Code 401046

Coordinator Steven Walmsley ([https://directory.westernsydney.edu.au/search/name/Steven Walmsley/](https://directory.westernsydney.edu.au/search/name/Steven%20Walmsley/))

Description This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). In this subject students will complete the significant research component of their honours study as a year-long subject of study (offered as 1H and 2H sessions). They will build upon the skills and knowledge of research, evidence-based practice and scholarly enquiry gained in subjects completed earlier in the program. The emphasis of this subject is the completion of a supervised honours research project. Each student will work individually with their supervisor to complete the stages of data collection and data analysis and will write their results into a format suitable for submission for examination.

School Health Sciences

Discipline Health, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) REHA 4031 AND HLTH 4002 AND REHA 3028 AND REHA 3029

Co-requisite(s) REHA 4018

Restrictions The subject is a Podiatry specific honours research project and therefore restricted only to students enrolled in program code 4709 - Bachelor of Podiatric Medicine (Honours).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Implement data collection plans formulated in the previous unit, Honours Research 1
2. Undertake data analysis suitable for their chosen research topic
3. Formulate and implement data management strategies and data analysis to reach research conclusions
4. Critically discuss and present the project's aims, methodology, results, discussion and conclusions in a scholarly manner
5. Critically analyse the impact of research findings in relation to theory, practice, education and public policy
6. Plan and execute the production of a scholarly research thesis suitable for submission for examination.

Subject Content

Major content of this subject will be determined by the particular research topic being investigated. Generic content will include:

- research design and practical implementation of research methods in health practice
- Ethical conduct of The research process
- data collection, management and analysis relevant to Project
- Critical Review and analysis of literature in relation to research findings
- implications of results for theory, practice, education, policy and future research

- Scholarly writing of The final Honours results in A format suitable for Examination

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HORT 1001 Crop Production

Credit Points 10

Legacy Code 300815

Coordinator Qaiyum Parvez ([https://directory.westernsydney.edu.au/search/name/Qaiyum Parvez/](https://directory.westernsydney.edu.au/search/name/Qaiyum%20Parvez/))

Description This unit aims to provide students with an understanding of the scientific basis of sustainable crop and food production and security. These include broad-acre cropping, fruits/orchards and vegetables. In this unit students will gain an understanding of the physiological controls on crop yield in the variable Australian environment in which crops are grown. Students will become familiar with the science and practice of sustainable crop production and develop crop management skills through the production of nursery crops, vegetables and fruits. Students will also gain an understanding of processing these crops after harvest, to develop an appreciation of factors impacting upon produce quality and safety.

HORT 1004 Horticultural Production Systems

Credit Points 10

Legacy Code 301096

Coordinator Michelle Mak ([https://directory.westernsydney.edu.au/search/name/Michelle Mak/](https://directory.westernsydney.edu.au/search/name/Michelle%20Mak/))

Description Food represents the single largest part of your environmental footprint. This means our modern, urban-oriented society must begin to reconnect with the sources of our food to create more sustainable future. This unit explores the scientific basis of sustainable crop production by examining fruit, vegetable and grain enterprises. Management of produce from harvest to consumption will also be explored to examine factors that impact upon food quality and safety. Students will compare and contrast growing conditions of the highly variable Australian environment to consider the global context for horticultural industry development. By delving into the world of crop management, students will identify the impacts (opportunities and constraints) of plant physiology on the sustainability of food. Students will also consider how novel food products can prompt consumers to appreciate the environmental, economic and social benefits that can arise from sustainable horticultural production.

Level Undergraduate Level 1 subject

Equivalent Subjects HORT 1003 - Horticultural Production 2 LGYA 5944 - Fruit Production HORT 1002 - Crop Production HORT 1001 - Crop Production

Assumed Knowledge

Basic knowledge of plants.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the science and practices in crop production and the cause and effect behind these practices
2. Analyse the benefits and limiting factors of a range of basic techniques used in crop production
3. Explain the basic principles of production management of selected crops
4. Describe the harvesting, processing, quality control and packaging of foods derived from crop production
5. Explain the cost of production for the selected crops grown and justify this against potential market gains
6. Predict the effects of environmental modification on crop yield, quality and market potential
7. Appropriately determine plant biomass and calculate fertiliser and chemical application rates

Subject Content

1. Sustainable crop production practices to food processing and analysis
2. Growing environment, soil media, and nursery practices
3. Seed (collection, viability, storage, germination) production
4. Fruit production (temperate and subtropical), tropical fruits in Australia
5. Plant propagation and micro propagation
6. Comparative analysis of current and innovative extensive and intensive production systems
7. Broad-acre field & agricultural crop production
8. Environmental and physiological factors affecting agricultural crops in Australian and international climates
9. Fresh produce?harvest, quality & processing
10. Grafting, budding & planting crops in field
11. Field crop management from seeding to harvest and post-harvest
12. Fruits / Orchard pruning & management for fruiting plants
13. Apiculture (production & management)
14. Real world experience through field trips to orchards, mushroom industry and broad-acre crops and project based assessment

Assessment

Final Exam	2 hours	50	N	Individual

Teaching Periods

HORT 1006 Protected Cropping Biosecurity and Pollination

Credit Points 10

Legacy Code 301214

Coordinator Lihua Li ([https://directory.westernsydney.edu.au/search/name/Lihua Li/](https://directory.westernsydney.edu.au/search/name/Lihua%20Li/))

Description The protected cropping industry in Australia is a rapidly expanding sector. There is an identified need for trained professionals who have an understanding of the management of plant pests and diseases. Students studying this course will learn industry best practice related to biosecurity, pest and disease management and emergency response procedures. In addition to pest and disease management the challenges of pollination in the context of Australian protected cropping will be explored. Western Sydney University is home to the state of the art National Vegetable and Protected Cropping Centre (NVPCC), this facility will be utilized in the on campus components of this course.

School Science

Discipline Horticulture

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify invertebrate pests and plant pathogens, common to greenhouse and protected cropping systems, and their implications for quarantine, biosecurity and integrated pest and disease management (IPDM)
2. Describe interactions between pests, diseases and their hosts in a closed climate controlled environment, including their impact on yield and economic costs
3. Discuss the types of pollination and pollinators, comparing Australian legislation and practices against international protected cropping systems
4. Explain the importance of pest economic thresholds, population dynamics, and pesticide resistance in relational to biological, chemical and mechanical control strategies
5. Develop a chemical control plan for a protected cropping scenario including identification of chemical classifications, application methods, withholding periods and PPE & WHS
6. Use National standards and industry best practice protocols to plan and oversee an emergency pest and disease control program.

Subject Content

1. Introduction to low, medium and high-tech protected cropping environments. Familiarisation with the unique challenges, biosecurity issues (nationally and on-farm) and pollination services specific to Australian protected cropping.
2. Identification of invertebrate pests including monitoring and economic costs in protected cropping environments.
3. Identification of plant diseases, crop destruction for quarantine purposes and safe re-establishment of production in closed growing environments.
4. Biological pest control techniques, technologies and research specific to protected cropping.

5. PLANTPLAN, Nationally Agreed Standard Operating Procedures (NASOP) and current legislation used to plan and oversee an emergency disease or plant pest control program
6. Chemical pest and disease control, legislation, WHS and PPE.
7. Pesticide resistance in Australia and internationally, commercial crop disease-tolerant packages and their economic advantages and costs.
8. Pollinators suitable to protected cropping and climate controlled horticulture. Alternative pollinators and Australia specific pollinators.
9. Pollination types and mechanisms. Pollination case studies and emerging research opportunities.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Portfolio - A collection of evidence for weekly learning achievements.	1000 words or equivalent	30	N	Individual
Professional Task - Professional documentatio	1500 words or equivalent	30	Y	Individual
Presentation	10 minutes	20	N	Group
Final Quiz - online	2 hours	20	N	Individual

Teaching Periods

HORT 1007 Protected Cropping Plant Nutrition

Credit Points 10

Legacy Code 301277

Coordinator Michelle Mak ([https://directory.westernsydney.edu.au/search/name/Michelle Mak/](https://directory.westernsydney.edu.au/search/name/Michelle%20Mak/))

Description Plant nutrition is essential to plant health and defence, productivity and crop quality; this is especially so in the soilless environment employed by the protected cropping industry. This unit will focus on crop nutrient requirements, nutrient deficiencies and their symptoms, practical nutrient monitoring using hand-held technologies and the PRIVA system and correction techniques. This unit also explores soilless substrates and their influence on nutrient loads, nutrient-rich waste water recovery, reuse and environmentally sustainable disposal options. Western Sydney University is home to the state of the art National Vegetable and Protected Cropping Centre (NVPCC), this facility will be utilized in the on campus components of this course.

School Science

Discipline Horticulture

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the essential elements needed for plant growth and their properties
2. Investigate the relationships between nutrient acidity, electrical conductivity, and plant nutrient requirements and availability in relation to their effect on crop growth and management at different growth stages
3. Explain plant nutrient deficiencies in commonly used substrates including symptoms, sampling techniques and management for correction
4. Illustrate effective waste water management and nutrient optimisation
5. Demonstrate a range of foundational academic skills including oral and written communication, an understanding of scientific method, professional document development, referencing, collaboration skills through group study and independent study skills.

Subject Content

-Factors affecting plant growth, such as; essential elements required for plant nutrition and their properties in response to acid and base changes (pH) and electrical conductivity (EC)
 -Plant nutrient requirements and uptake at different growth stages and their management
 -Plant nutrient deficiencies, their symptoms, sampling and correction
 -Substrates commonly used in protected cropping, their influence on water and nutrient and how these inputs can be recovered, recycled or disposed of in an environmentally sustainable way.
 -Practical skills will include using hand-held monitoring technologies. Analytical skills will include choosing appropriate nutrient substitutions, calculating nutrient recipes and evaluating and utilising online tools to verify crop husbandry decision making.
 -Demonstrate foundational academic skills such as; critical thinking, academic writing skills, oral and written communication, professional document development, avoiding plagiarism and correct referencing techniques, providing fair and constructive criticism.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Portfolio	8 x 100 words or equivalent (800 words)	40	N	Individual
Case Study	1,000 words or equivalent	30	N	Group
Peer Review	100 words	10	N	Individual
Final Quiz	2 hours	20	N	Individual

Teaching Periods

HORT 2001 Greenhouse Technology for Food Sustainability

Credit Points 10

Legacy Code 301097

Coordinator Zhonghua Chen ([https://directory.westernsydney.edu.au/search/name/Zhonghua Chen/](https://directory.westernsydney.edu.au/search/name/Zhonghua%20Chen/))

Description Greenhouses are enclosed structures that optimise temperature, light, water and carbon dioxide to maximise plant production. Also called 'greenhouse horticulture', these advanced systems integrate technologies across disciplines (e.g. horticultural, environmental and material sciences; mechanical engineering and design; robotics and computing programming) to create futuristic indoor environments that increase the quantity and quality of plant-derived foods. Controlled environments can significantly reduce reliance on inputs (fertiliser, pesticide, energy and water) and reduce environmental impacts (including 'food miles'). This unit explores a range of greenhouse technologies in Australia and overseas-from simple low-cost options, through to cutting-edge technology in energy and water-efficient production. Students will observe current status and future trends in the industry to examine how advanced technologies can improve sustainability measures along with the reliability of horticultural output. Students will consider how innovative horticultural enterprises can provide consumers with greater capacity to adopt more sustainable diets.

School Science

Discipline Horticulture

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Assumed Knowledge

Students enrolling in this subject should have knowledge of least one of the following subject areas: horticultural production systems; environmental sustainability analytics; technological design and development; consumer behaviour and/or marketing principles; health promotion and/or human nutrition.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate and communicate the future of greenhouse horticulture in Australia in comparison to international experience
2. Identify and articulate key challenges and opportunities (environmental, economic and social) faced by greenhouse horticulture
3. Explain principles of crop husbandry in the context of greenhouse horticulture
4. Explain objectives of greenhouse environment management
5. Analyse, integrate and promote the benefits of technologies employed in greenhouse horticulture
6. Interpret and communicate wider environmental, social and business impacts of greenhouse horticulture

Subject Content

1. Current status of greenhouse horticulture in Australia and globally
2. Opportunities and challenges (environmental, economic and social) faced by greenhouse horticulture
3. Crop husbandry for yield, profit and sustainability

4. Management of greenhouse environment (temperature, humidity, light, CO₂) for crop growth and yield
5. Technologies for improving input efficiency in greenhouse horticulture
6. Emerging consumer markets, and consumer influences on horticultural supply and demand
7. Postharvest food technologies and promotion of sustainable diets
8. Current and future research opportunities in greenhouse horticulture

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Coordinator Jay Bose ([https://directory.westernsydney.edu.au/search/name/Jay Bose/](https://directory.westernsydney.edu.au/search/name/Jay%20Bose/))

Description This unit will provide you with an understanding of the scientific basis of sustainable plant production in natural and built environments. These include cropping of plants for food production in extensive and intensive systems. In this unit you will gain an understanding of the physiological controls on plant yield in the Australian environment. You will become familiar with the science and practice of sustainable plant production and develop crop management skills through the production of nursery crops, vegetables and fruits.

School Science

Discipline Horticulture

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions 60 credit points of subjects

Assumed Knowledge

Basic knowledge of plants.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the science and practices in plant production and the cause & effect behind these practices.
2. Demonstrate competence in a range of basic techniques used in crop production.

3. Examine the basic principles of production management of selected crops.
4. Analyse the principle components regulating plant production.
5. Predict the effects of environment modification on crop yield & quality.

Subject Content

1. Sustainable plant production practices for food processing and analysis.
2. Growing environments, system modelling and analysis for Australian conditions.
3. Plant propagation and seed (collection, viability, storage, germination) production.
4. Intensive plant production.
5. Broad-acre field & agricultural crop production.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Crop Production Report	1500 words	30	N	Individual
Field Work Project activities/participation	3x 1000 words	30	N	Group
Final Exam	2hours	40	N	Individual

HORT 3001 Postharvest

Credit Points 10

Legacy Code 300869

Coordinator Chris Cazzonelli ([https://directory.westernsydney.edu.au/search/name/Chris Cazzonelli/](https://directory.westernsydney.edu.au/search/name/Chris%20Cazzonelli/))

Description This unit explores the factors affecting the retention of quality of fresh fruit, vegetables and cut flowers from grower to consumer. Topics include: the role of fresh produce for the health and happiness of people; the growth and maturation and physiology of fresh produce; the importance of managing temperature and relative humidity of the storage environment; the responses of fresh produce to changes in temperature and water loss; the role of ethylene in fruit

ripening and senescence; the practical issues of assessing harvest maturity; packaging; distribution and the control of postharvest diseases and pest and the concepts of market access.

HORT 3002 Protected Cropping Technology

Credit Points 10

Legacy Code 301448

Coordinator Michelle Mak ([https://directory.westernsydney.edu.au/search/name/Michelle Mak/](https://directory.westernsydney.edu.au/search/name/Michelle%20Mak/))

Description This unit will develop your understanding of the role technology plays in underpinning plant production, in built environments, as well as the impact on processing and consumption of established and emerging opportunities. This unit explores the factors affecting growth, maturation and physiology of plant products in the protected cropping environment. Industry issues of controlling pests and disease, assessing harvest maturity, post-harvest management are underpinned by systems modelling and sustainable practices.

School Science

Discipline Horticulture

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Must have passed 100 credit points of subjects.

Assumed Knowledge

This subject assumes that students have a basic knowledge of biology, plant morphology and anatomy, chemistry and mathematics. Students are also assumed to be familiar with the World Wide Web and the tools for database searching and basic computer packages such as WORD and EXCEL.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the principles that underpin the production and preservation of protected plant products.
2. Examine the elements of protected cropping technology that alter plant production.
3. Explain how protected cropping technology and data driven systems can be used to manage plant products, from production to consumption.
4. Analyse the factors that contribute to sustainable disease, pest and waste control in protected cropping environments.
5. Critically evaluate the postharvest processes and factors that contribute to plant product transport, storage, processing and quality.

Subject Content

1. Principles of plant product development in protected cropping environments.
2. Pathophysiology disorders of plant products, pre- and post-harvest, in controlled environments.
3. Develop healthy foods and managing waste by modifying plant nutrients and environment.
4. Sustainable protected cropping technology and data driven systems.
5. Postharvest technology and plant product management.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

HORT 7001 Advanced Greenhouse Technology

Credit Points 10

Legacy Code 301358

Coordinator Michelle Mak ([https://directory.westernsydney.edu.au/search/name/Michelle Mak/](https://directory.westernsydney.edu.au/search/name/Michelle%20Mak/))

Description This unit explores a range of advanced greenhouse technologies in Australia and overseas-from simple low-cost options, through to cutting-edge technology in energy and water-efficient production. Students will observe current status and future trends in the industry to examine how advanced technologies can improve sustainability measures along with the reliability of horticultural output. This unit focuses on engineering aspects of greenhouse horticulture systems as well as crop growth and development. The basics of crop growth and development and the physical principles of greenhouse systems at different levels will be taught. The main in depth topics of the unit are: the selection of suitable greenhouse technology, physics of greenhouse climate, greenhouse systems (passive greenhouse, climate controlled, closed or semi-closed greenhouse), cropping systems, cover materials and smart glass technologies, energy saving technologies, water and nutrient recycling, and robotics for de-leafing and picking.

School Science

Discipline Horticulture

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Students entering this subject may have basic knowledge of crop physiology and production, and basic understanding of the physical principles pertaining to glass house design. Student may also have knowledge and experience in one of the following subject areas: horticultural production systems; environmental sustainability analytics; technological design and development; marketing principles and business management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain objectives of advanced greenhouse technologies and their effective application and
2. Articulate key challenges and opportunities for the selection of suitable greenhouse technology
3. Appraise principles of advanced protected cropping technologies in the context of national and
4. Communicate the advanced greenhouse technologies in contributing to the wider

5. Evaluate advances in greenhouse technologies in Australia in comparison to international greenhouse technological advancements.

Subject Content

1. Current status of advanced greenhouse technologies in Australia and overseas with low-tech,
2. The physical principles of greenhouse systems at different levels: passive greenhouse, climate
3. The advanced management monitoring of crop growth and development and the selection of
4. Advanced cropping systems for current vegetables and herbs and future crops under protected
5. Innovations in covering materials and glass technologies for improving energy use efficient and
6. Advances in fertigation, water and nutrient recycling technologies for optimal crop production
7. Progress in robotics for labour-intensive de-leafing, pollination, and picking technologies.
8. Future global innovations of advanced greenhouse technologies and their use for Australian

Assessment

HORT 7002 Greenhouse Control Systems

Credit Points 10

Legacy Code 301359

Coordinator Liz Tucker ([https://directory.westernsydney.edu.au/search/name/Liz Tucker/](https://directory.westernsydney.edu.au/search/name/Liz%20Tucker/))

Description This unit develops an understanding of the leading controlling systems for protected cropping in low, medium and high-tech greenhouses. The main topics are: the integration of hardware and software in a range of different protected cropping systems, management of the aerial environment (e.g. manageable parameters and greenhouse climate engineering, radiation management, energy sources and distribution systems, ventilation, air conditioning and cooling systems, screens, carbon dioxide-sources and distribution), and management of the hydroponic environment (factors, tools, control of water and nutrient balance, water quality, salinity effects). The unit emphasises computing skills, calculation, and analysis that are applicable to a range of different greenhouse control systems.

HORT 7004 Industry Project

Credit Points 10

Legacy Code 301361

Coordinator Michelle Mak ([https://directory.westernsydney.edu.au/search/name/Michelle Mak/](https://directory.westernsydney.edu.au/search/name/Michelle%20Mak/))

Description In this unit, students will complete an industry based project under the guidance of an industry partner and a member of the University's academic staff. Using a project based methodology, students will be required to solve a real world problem on behalf of a protected cropping industry partner. Students will develop skills in scoping, planning, implementing, reporting on the industry project; reflecting on what has been learned in the context of their personal and professional development and how this can be used in their future career.

School Science

Discipline Horticulture

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Students entering this subject should have knowledge of one of the following subject areas: horticultural production systems; environmental sustainability analytics; computing and technological applications; marketing principles and business management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design a project to assist an industry partner to solve a real life problem.
2. Collect and analyse data for the protected cropping project.
3. Develop relationships and rapport with industry and academic professionals.
4. Manage an industry based project to deliver outcomes within the specified
5. Propose innovative solutions to solve uncertain/unforeseen factors using negotiation and
6. Synthesise information from a variety of academic and industry sources.
7. Communicate the project results via a presentation and report to the industry.

Subject Content

Design features of a project undertaken for a protected cropping industry partner.

Reporting on progress to an industry partner to meet appropriate milestones

Management of an industry project
Industry project protocols and methods
Ethical conduct in industry projects
Financial analysis and project budget
Communication and networking
Personal and professional development ? including development of critical and reflective abilities

Special Requirements

Legislative pre-requisites

Students will need to complete a Risk Assessment form for approval of their supervisor before commencing field work for this subject. Students involving research on human participants will need Human Ethics approval from their supervisor and the Subject Coordinator before commencing field data collection. Other approvals may be needed for specific projects.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

HORT 7006 Plant-Climate Interactions in Controlled Environments

Credit Points 10

Legacy Code 301357

Coordinator Jay Bose ([https://directory.westernsydney.edu.au/search/name/Jay Bose/](https://directory.westernsydney.edu.au/search/name/Jay%20Bose/))

Description This unit aims to provide knowledge of relationships between plant growth, controlled environment and crop physiological aspects relevant to protected crop production. The unit will provide students with relevant knowledge to explain and develop concepts that are key to understanding various areas of environmental plant physiology. The unit will also stimulate students to conceptualise interactions between the physical environment and plant functioning. The unit will compare the important parameters and concepts (e.g. plant growth, plant and fruit development, light interception, light use efficiency, biomass partitioning, and water use efficiency) in horticultural crop growth in the controlled systems.

School Science

Discipline Horticulture

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Students entering this subject should have knowledge of one of the following subject areas: horticultural production systems; environmental sustainability analytics; computing and technological applications; marketing principles and business management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain physical and chemical factors that control plant growth.
2. Measure, analyse and explain advantages and disadvantages of the light environments.
3. Dissect the fundamental processes of photosynthesis and understand how leaf photosynthesis can
4. Explain the principles of leaf gas exchange and important parameters and concepts underlying
5. Explain the potential and importance of physical-physiological measurements for plant phenotyping
6. Synthesise experimental results to reach valid conclusions.
7. Appraise the interactions between the physical environment and plant function with a focus on crop
8. Communicate the findings of scientific investigations and literature reviews relating to contemporary issues in plant-climate interactions.

Subject Content

1. Plant microclimates such as air and tissue temperature, light, and air humidity.
2. Common methods for measuring soil and plant nutrition controlling crop growth and development
3. Lighting sources and the effects of the light environment (natural versus artificial light, including intensity, spectrum and duration) on crop production
4. Concepts and measurements of crop primary production for horticultural crops grown in controlled systems and the open field
5. Crop gas exchange, growth analysis and biomass allocation to estimate photosynthesis, stomatal conductance and dark respiration
6. Latest advances in plant phenotyping
7. Environmental impacts on crop growth and production under protected cropping

HUMN 0003 Academic Skills for the Social Sciences (WSTC Prep)

Credit Points 10

Legacy Code 700233

Coordinator Christopher Roffey ([https://directory.westernsydney.edu.au/search/name/Christopher Roffey/](https://directory.westernsydney.edu.au/search/name/Christopher%20Roffey/))

Description This unit introduces students to the essential academic skills required for success in tertiary studies. It employs an explicit pedagogy approach to teach students how to become independent, active, and reflective learners. The unit also includes essential research and writing skills specific to the social sciences.

School Western Sydney The College

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 0 Preparatory subject

Restrictions Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use both independent and collaborative learning strategies to advance the knowledge of the individual and that of their peers.
2. Communicate effectively through the development of critical reading, listening, speaking and writing skills in context.
3. Locate and use information technology systems and educational technologies to support learning and assessment.
4. Apply problem solving skills and research skills, to make informed decisions.
5. Reflect on learning experiences, in order to assess their own learning styles and elearn how to learn.
6. Demonstrate an understanding of the difference between qualitative and quantitative research, as well as primary and secondary sources, as it applies to the social sciences.

Subject Content

1. Introduction to tertiary and academic skills
2. Introduction to academic culture
3. Information skills and blended learning

4. Essential skills for the Social Sciences

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Oral presentation	5 minutes	10	N	Individual
Reference test	1 hour	10	N	Individual
Reflective Learning Journal: Part 1 – 20% Part 2 – 20%	1,200 words	40	N	Individual
Research Project: (a) Article analysis (b) analysis (week 3 or 4) – 10% (b) Concept map – 10% (c) Group presentation – 10% (d) Final submission (Reflective activity) – 10%	(a) 500 words article analysis (b) 500 words (c) 5 minutes (d) 1,200 words	40	N	Both (Individual & Group)

Teaching Periods

HUMN 0006 Australian Studies (WSTC Prep)

Credit Points 10

Legacy Code 700213

Coordinator Chantal Rozairo ([https://directory.westernsydney.edu.au/search/name/Chantal Rozairo/](https://directory.westernsydney.edu.au/search/name/Chantal%20Rozairo/))

Description Australian Studies aims to inform students of some of the aspects of the historical development of Australia and highlight some of the important physical, social, political and economic issues and events which have helped shape the development of Australia as an independent, modern nation. The study of issues, events, attitudes and values in the Australian context along with the development of academic skills will assist students in their study of Humanities units at the tertiary level. In addition, all students, especially international students, should acquire a better appreciation of the environment in which they live and learn to think more critically about issues facing people in the 21st century.

Incompatible Subjects HUMN 0005 - Australian Studies (UWSC) HUMN 0004 - Australian Contemporary Studies (UWSC)

Restrictions Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of key events, processes and debates in the history of Australia.
2. Demonstrate an understanding of the difference between primary and secondary sources and a basic ability to interpret both.
3. Evaluate competing interpretations of central debates in contemporary Australia, including (but not limited to) those surrounding the issues of human rights, multiculturalism, religion, social welfare.
4. Present ideas effectively in written, oral and digital form.
5. Demonstrate an understanding of some of the distinguishing geographical, social and political features of contemporary Australian society.

Subject Content

1. Introduction to Australian geography and demography
2. Aboriginal and Torres Strait Islander civilisation and connections to Asia
3. Aboriginal and Torres Strait Islander and European visitors
4. Colonial Australia: Australian Britons and Aboriginal dispossession
5. Australian nation building: Federation, Anzac and looking to America
6. Australia and migration: from White Australia to multiculturalism
7. Australian identity?
8. Australia in Asia
9. Issues in contemporary Australia

Credit Points 10

Legacy Code 700229

Coordinator Kathy Gooch ([https://directory.westernsydney.edu.au/search/name/Kathy Gooch/](https://directory.westernsydney.edu.au/search/name/Kathy%20Gooch/))

Description This unit introduces students to the internally diverse and dynamic nature of religions in the world today. It explores the values and beliefs of religious traditions around the world, their points of difference and similarity. It aims to equip students with an understanding of the way that religions are embedded in culture. The unit provides students with a social science and humanities based vocabulary for discussing theological notions and debating the influence of religion on history, culture and contemporary issues. The unit also provides students with an opportunity to apply academic research and writing skills.

HUMN 0009 Cultural Perspectives (WSTC Prep)

Credit Points 10

Legacy Code 700212

Coordinator Natalie Quinlivan ([https://directory.westernsydney.edu.au/search/name/Natalie Quinlivan/](https://directory.westernsydney.edu.au/search/name/Natalie%20Quinlivan/))

Description This unit is designed to help students understand why people from diverse cultures and historical periods may think differently, behave differently and have vastly different worldviews. This unit is designed to help students understand more about themselves, their family and friends and the reasons why people do things in particular ways and believe the things that they do. It has a strong theoretical base but is also designed to encourage reflection.

School Western Sydney The College

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 0 Preparatory subject

Equivalent Subjects HUMN 0010 - Cultural Perspectives (UWSC)

Restrictions Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a foundational understanding of the key concept of culture, and its related analytical perspectives of cultural relativism and ethnocentrism.
2. Identify and examine specific locations of historical, geographical and social differences, such as modernity, nationality, gender and social class.
3. Compare how different historical, geographical and social locations foster different cultural perspectives.
4. Demonstrate a proficiency in the basic research and writing skills of tertiary study through the effective presentation of ideas in written, oral and digital form.
5. Work effectively as part of a group, and reflect critically on both individual and group achievements.

Subject Content

1. Foundation ideas in cultural and social analysis
 2. Academic definitions of culture, gender, social class, modernity, power, Indigeneity, the self and the 'Western World'
 3. Introductions to key social and cultural debates around multiculturalism, privilege, religion, globalization
 4. Analysis of students' own socio-cultural locations
1. Foundation ideas in cultural and social analysis

Coordinator Mona Shrestha ([https://directory.westernsydney.edu.au/search/name/Mona Shrestha/](https://directory.westernsydney.edu.au/search/name/Mona%20Shrestha/))

Description This unit aims to help students develop an understanding and appreciation of Australian society. The unit will provide general information and familiarise students with key structures, events, concepts and terminology used in relation to Australia's modern society. At the end of this unit, students should have greater knowledge and understanding on Australia's history, governmental and political systems. They will learn about consumer laws, civilian rights and responsibilities as well as the composition of Australia's population and relevant variations and trends.

School Western Sydney The College

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 0 Preparatory subject

Restrictions Students must be enrolled in a Foundation program at The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define and explain some key concepts related to the subject
2. Identify key elements of Australian society, e.g. population composition and historical events
3. Demonstrate an understanding of Australian institutions and systems, e.g. business, governmental, judicial and political systems
4. Interpret information in the form of text, graphs, statistics and illustrations
5. Write notes, summaries and extended responses based on unit content, readings and class discussions
6. Distinguish and respond to key words and terms in relation to Australian society

Subject Content

1. Australia - History

Settlement by Indigenous peoples and their location across Australia. 1788 the arrival of Europeans.

The role of convicts and migrants in establishing and developing Australia.

2. Australia's Population

Common statistics on size, age, distribution and cultural composition of Australia's population.

Reasons for variations, settlement patterns, range of belief systems and future population trends.

3. Australia's Government System

The three tiered system of government. The role and responsibilities associated with Local, State and Federal levels of government.

4. Australia's Political Framework

Role of political parties in a democratic society. Types of political parties.

Electoral and voting processes in Australia.

5. Australian Legal System

The role of the judicial system (independent of government and military sections)

Common civilian rights and responsibilities as well as consumer laws.

6. Business In Australia - Consumers - Satisfying Wants

Needs, wants, goods, and services.

Factors determining which wants are satisfied.

7. Business In Australia - Consumers - Money

Barter, money, exchange, credit, interest and interest rates, purchasing goods and services - retail, direct sales, direct marketing.

HUMN 1007 Brave New World: Negotiating Social Change in the 21st Century

Credit Points 10

Legacy Code 101886

Coordinator Lucy Nicholas ([https://directory.westernsydney.edu.au/search/name/Lucy Nicholas/](https://directory.westernsydney.edu.au/search/name/Lucy%20Nicholas/))

Description The discipline of Sociology has witnessed a transformation reflecting significant changes in society and social life. This unit re-examines the sociological dimensions of a variety of social concerns, for example: environmental issues, global migration, health, religion, indigeneity, gender, ethnic conflict and sub-cultural groups and asks: In the 'brave new world' of contemporary society we need to re-evaluate the conventional sociological concern of social structure and inequality in the face of these broad social changes. This unit will examine the social transformations which characterise contemporary social life; in particular the pace of social change and the implications of social media. In exploring these social concerns the links are drawn between more recent theoretical constructs and the more traditional focus on national social structures and inequalities. The unit will place special emphasis on concepts such as risk, individualism and uncertainty.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a sound knowledge and understanding of recent developments in sociological thought and the reasons behind them
2. Apply recent sociological perspectives to some of the key social problems and/or challenges presented globally and within contemporary Australian life
3. Demonstrate a reflexive stance on the various sociological perspectives presented
4. Analyse some specific examples of how global processes of change can impact people's everyday lives in local contexts
5. Discuss, through a sociological lens, various possible, probable and preferred social futures with reference to current social trends

Subject Content

Social Change

Rethinking social class in the age of uncertainty

Global poverty and the global economy

Family and social change

Mobility and globalisation

Ecology and risk

Youth subcultures in the face of social change

Identity and identity politics

Social change movements

Religion for generation x and y

Health in the face of the risk society

Social networks in the 21st century

HUMN 1008 Cities: Introduction to Urban Studies

Credit Points 10

Legacy Code 101589

Coordinator Cameron Mcauliffe ([https://directory.westernsydney.edu.au/search/name/Cameron Mcauliffe/](https://directory.westernsydney.edu.au/search/name/Cameron%20Mcauliffe/))

Description This unit is a keystone in the Geography and Urban Studies major. It aims to introduce students to the major urban challenges that will shape our society in the future and to the major substantive concerns in the field of urban management and planning. It will develop students' understanding of how their own urban experiences are shaped by broader historical, cultural, economic, and social forces, and will enable students to compare the Australian urban context and issues with those in other world regions.

School Social Sciences

Discipline Human Geography

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects LGYA 1336 - The Urban Context

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate debates over major urban development issues (such as environmental sustainability, heritage preservation, or social equity);
2. Analyse the physical, social, economic, and cultural structure of the contemporary Australian city, and contrast it with the structure of cities in other world regions;
3. Formulate a coherent argument about the impacts of a current urban issue (such as transportation, large scale redevelopment, or urban growth) ;
4. Explain major contemporary theories about the urban-level interface between global and local forces;
5. Identify the unique and distinctive elements that define particular urban places, and describe the relationships between these urban place and urban inhabitants.

Subject Content

1. Historical evolution of cities, urban problems, and our attempts to resolve those problems
2. Comparative analysis of the social, economic, political, and cultural forces shaping cities in different world regions
3. Globalisation and social equity
4. Environmental and economic sustainability

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 1012 Contextualising Community Development Within Indigenous Australia

Credit Points 10

Legacy Code 102306

Coordinator Jim Ife ([https://directory.westernsydney.edu.au/search/name/Jim Ife/](https://directory.westernsydney.edu.au/search/name/Jim%20Ife/))

Description This unit provides students with the understanding and context for working collaboratively with Aboriginal and Torres Strait Islander peoples in the professional practice of community and social development. Students will learn the core concepts of community development theory and practice in Australian and international contexts, and will then apply them within the context of Indigenous Australia in light of the history of colonisation, the Stolen Generation, self-determination, and reconciliation. Emphasis is placed on ethical standards for Community Work practice and principles for working with Aboriginal and Torres Strait Islander peoples.

School Social Sciences

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects HUMN 1014 - Contextualizing Indigenous Australia (Block Mode) HUMN 1013 - Contextualising Indigenous Australia (Day Mode) LGYA 6068 - Indigenous Australia Back to the Future

Restrictions Students must be enrolled in the Bachelor of Community and Social Development (BCSD)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand the core principles of community development theory and practice.
2. Apply those principles to working with Indigenous communities.
3. Critique conventional community development models and principles in terms of Indigenous knowledges and understandings of community.
4. Identify ways that community development can contribute to Indigenous well-being and cultural security.

Subject Content

Understanding community

The imperative of community development

Foundations of community development: social justice and ecological sustainability

Indigenous understandings of community

Core principles of community development: wisdom from below, change from below, the integrity of process, diversity, empowerment, global/local

Community development practice: Facilitation, Education, Organisation, Representation

Community development in Indigenous communities

Applying Indigenous knowledges to community development

Cultural Security

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

Coordinator Madison Shakespeare ([https://directory.westernsydney.edu.au/search/name/Madison Shakespeare/](https://directory.westernsydney.edu.au/search/name/Madison%20Shakespeare/))

Description This unit will provide a comprehensive overview of Indigenous Australian cultures, histories and identities. The scope of the unit spans pre-colonisation to the twenty-first century across Australia and all relevant fields of study. A cross-section of institutional, community and popular culture contexts will be explored through flipped mode of delivery supported by face to face tutorials. This body of knowledge will provide a context for various professions and discussions. Students will have the exciting opportunity to hear from a diverse range of Indigenous educators from academics to artists through to performers and community elders. A broad understanding of Indigenous Australia will position students to be advocates for change in contemporary Australia.

School Humanities & Comm Arts

HUMN 1015 Development and Sustainability

Credit Points 10

Legacy Code 101572

Coordinator Julie Wen ([https://directory.westernsydney.edu.au/search/name/Julie Wen/](https://directory.westernsydney.edu.au/search/name/Julie%20Wen/))

Description The unit introduces the basic concepts relating to sustainability and development, and explores their relevance to real-world situation at the local, national, and global levels. The causes of unsustainability as well as their short-term and long-term effects on society and the environment will be evaluated. Students will analyse, using appropriate sustainability indicators and social change theories, a social change initiative (i.e., program, project, policy) designed to integrate the socio-economic, cultural and environmental dimensions of sustainability within the context of a specific developmental focus (e.g. poverty alleviation, gender equality, human/social development, heritage conservation, biodiversity, tourism, green accounting, sustainable livelihoods). Students will engage in problem-based learning skills in order to critically analyse and discuss current issues in development, and provide solutions to sustainability.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects HUMN 1040 Peace Sustainability and World Futures

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand the core concepts and practice of sustainability and development at the local, national, and international levels;
2. Identify and assess current issues/problems in achieving sustainable development, including their causes and impacts;

- Apply theories in the sustainable practice of various types/categories of development (i.e. social, cultural, economic, environmental);
- Apply sustainable indicators in the analysis of social change initiatives designed to promote sustainable development (e.g. poverty alleviation, gender equality, human/social development, heritage conservation, biodiversity, tourism, green accounting, sustainable livelihoods); and
- Demonstrate skills in problem-solving, in oral and written communications, and in learning both independently and as a team member

Subject Content

Core concepts/theories about sustainability and development

Major issues concerning the sustainability of developmental initiatives and their effects on the socio-economic and cultural aspects of society (e.g. culture of peace, human rights, gender empowerment, equitable sharing of costs and benefits)

Major issues concerning the sustainability of the natural environment (e.g. climate change, biodiversity conservation, precautionary principle, ecological footprint)

Evaluation of social/cultural, environmental, and economic elements of development for sustainability

Alternative technologies and sustainable living/livelihoods

Basic social change theories and practice

Sustainability indicators of development at different temporal and spatial scales

Barriers to sustainability: Conflicts, social worldviews, ethics

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 1016 Different Ways of Being in the World: Introduction to Social Anthropology

Credit Points 10

Legacy Code 102344

Coordinator Helena Onnudottir ([https://directory.westernsydney.edu.au/search/name/Helena Onnudottir/](https://directory.westernsydney.edu.au/search/name/Helena%20Onnudottir/))

Description The key and foundational focus of Social Anthropology is the relationship between people and their cultures. This unit provides an introduction to key concepts, methods and theories of classical and contemporary Social Anthropology. It will guide the students to an informed and critical understanding of the nature and extent of human diversity and differences, as well as the similarities which unite us as people. The unit has two parts. The first part introduces students to the history and scope of Social Anthropology through selected work of some classical anthropologists, introducing key concepts and conceptual frameworks. The second part is designed around selected case studies of Indigenous Peoples in Australia, the Asia Pacific, and the Americas, providing the students with critical insight into the application of anthropological theory and the epistemological contribution of the discipline of Social Anthropology.

School Social Sciences

Discipline Anthropology

HUMN 1026 Global Structures, Local Cultures

Credit Points 10

Legacy Code 102345

Coordinator Mary Hawkins ([https://directory.westernsydney.edu.au/search/name/Mary Hawkins/](https://directory.westernsydney.edu.au/search/name/Mary%20Hawkins/))

Description Globalisation has created a world of convergence and, at the same time, of division. Nations appear now to be less sovereign and more limited, as their political, economic and cultural systems become enmeshed within, and in some instances subordinate to, a world system. Similarly, certain cultural styles, from the choice of footwear to neo-liberal politics, have become part of a global culture. However, while we as citizens are becoming increasingly international,

we as humans are looking for meaning in smaller, local, communities. Globalisation has not, it seems, created an homogenous world culture, but rather, a world in which citizens participate in, and identify with, both global and local cultures. This subject traces the emergence of a global society and culture and, through the use of case studies drawn from throughout the world, examines the links between global structures and local cultures.

School Social Sciences

Discipline Anthropology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects HUMN 1024 - Global Structures Local Cultures

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Employ the concepts of **eculture**, **esociety**, **estructure** and **eglobalisation**
2. Critically discuss the relationship between imperialism and the emergence of capitalism
3. Critically discuss global structures and how global inequality is maintained
4. Assess through the use of case studies, the ways in which global structures shape, and are shaped by, local lives

Subject Content

Anthropological approaches to globalisation;
 Making the world one ? proto globalisation, imperialism, and the emergence of capitalism;
 The anthropology of global capitalism and global inequalities;
 Institutions of global governance ? unions, funds, banks and treaty organisations;
 The ordering of humanity ? race and racism;
 Gender orders;
 Religion and conflict;
 Nations and communities;
 Indigenous peoples and population movements;
 Connecting humans ? mobile telecommunications and social media;
 Resistance, change and global social movements.

HUMN 1028 Human Rights, Peace and Development

Credit Points 10

Legacy Code 101573

Coordinator Melissa Phillips ([https://directory.westernsydney.edu.au/search/name/Melissa Phillips/](https://directory.westernsydney.edu.au/search/name/Melissa%20Phillips/))

Description The Universal Declaration of Human Rights (UDHR) was written in response to the atrocities of World War II. Since its ratification, the UDHR has been a 'roadmap' for peace, forming the basis for international responses to conflicts, poverty and disadvantage. This unit examines and critiques the concept of human rights. It will be shown how differentials of political and economic power between countries and groups within countries are used to prioritise and preference different rights so as to justify selective humanitarian efforts in the initial phases of peace-making and the policy requirements for peace-building in human social, economic and cultural development.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects HUMN 1033 - Inequality Human Rights

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the concepts and philosophy of human rights, peace and development.
2. Identify and describe the different categories of rights ? civil, political, economic and cultural within the context of peace and development
3. Analyse the impact of human rights to the social conditions of vulnerable persons and groups.
4. Identify and describe the significant debates within the area of human rights as they apply to issues of peace and development.
5. Apply human rights concepts and arguments to analyse and evaluate topical and controversial issues within the areas of peace and development .

Subject Content

1. International Human Rights in an Historical Perspective. Defining Peace and Development.
2. The Philosophical Foundations of Human Rights.
3. Civil and Political Rights.
4. Economic and Social Rights.
5. Cultural and Environmental Rights.
6. The Rights of Different Social Groups (with particular focus on: women, racial/ethnic groups; the disabled)
7. A Critique of the Concept of Human Rights.
8. Examining the UN implementation of the UDHR during conflicts between countries and within countries.
9. Examining the UN implementation of the UDHR to assist the disadvantaged and vulnerable.
10. Human Rights, Peace and Development in the New Millennium.

HUMN 1039 Modern European History and Politics

Credit Points 10

Legacy Code 102000

Coordinator Margarite Poulos ([https://directory.westernsydney.edu.au/search/name/Margarite Poulos/](https://directory.westernsydney.edu.au/search/name/Margarite%20Poulos/))

Description This subject introduces students to the major events and ideas that have shaped Europe in the late modern period. There is a strong focus on the dramatic events of the twentieth century following the demise of empire, and the subsequent rise of competing nationalisms and radical politics. The subject is concerned equally with the cultural and social contexts in which these events occurred. Students will study the diverse ways in which historians have approached the history of the twentieth century from the study of high politics to the focus on daily life. Methodological questions that will be addressed include the relative role of individual agency and of structural constraints in explaining historical change. The subject will encourage students to evaluate the period as a whole, drawing on scholarship which engages the modernity - democracy - violence nexus.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the major themes of modern European politics culture and society;
2. Discuss the impact of war, dictatorship and revolution on everyday life and the reconstruction of Europe since the demise of multi-ethnic empires and the rise of nationalism;
3. Place the specific themes within a broader European and global context;
4. Interpret and critically engage with historical scholarship and evidence;
5. Identify the variety of ways in which historians approach the past.

Subject Content

This subject may include the following themes:

- Modernity and violence
- nations, nationalism, identity
- colonialism and decolonisation
- Conflict-World Wars, revolutions, revolts, resistance
- Transatlantic relations
- The new Europe
- Genocide
- Fascism, Nazism, Stalinism, totalitarianism
- protest and dissent East and West
- gender, race, class, religion
- national Communisms
- Liberalism
- Cold War
- European integration/ disintegration

HUMN 1043 Personal Identities in Professional Practice

Credit Points 10

Legacy Code 102308

Coordinator Corrinne Sullivan ([https://directory.westernsydney.edu.au/search/name/Corrinne Sullivan/](https://directory.westernsydney.edu.au/search/name/Corrinne%20Sullivan/))

Description In this unit students examine their own personal identity as a context for understanding Aboriginal and Torres Strait Islander clients in professional practice. Students will examine the constructions and meanings of Indigenous identity and compare non-Indigenous theories of identity. Research and presentation skills will be developed to create and describe a family tree. The unit will also focus on key social and political issues that have impacted on the lives and identities of Aboriginal and Torres Strait Islander peoples and implications for practice.

School Social Sciences

Discipline Indigenous Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects HUMN 1050 - Who do You Think You Are? (Block Mode) HUMN 1051 - Who do You Think You Are? (Day Mode)

Restrictions Students must be enrolled in the Bachelor of Community and Social Development (BCSD) program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Collect and synthesise historical records to create a family tree;
2. Communicate the process and importance of family history research for Indigenous identity and professional practice;
3. Analyse how the construction of their own Indigenous identity is relevant to professional practice;
4. Argue the key social and political issues that have impacted generationally on the lives and identities of Aboriginal and Torres Strait Islander peoples and explain the implications for professional practice.

Subject Content

Locating and analysing archival/historical documents
 Creating a family history tree

Introduction to theories of identity
 Indigenous identity
 The importance of understanding own personal identity and implications on practice
 Understanding key social and political issues that have impacted on the lives and identities of Aboriginal and Torres Strait Islander peoples and implications on practice

HUMN 1048 Understanding Islam and Muslim Societies (WSTC)

Credit Points 10

Legacy Code 700160

Coordinator Kathy Gooch ([https://directory.westernsydney.edu.au/search/name/Kathy Gooch/](https://directory.westernsydney.edu.au/search/name/Kathy%20Gooch/))

Description This is an introductory level unit that forms part of the Islamic Studies major. The unit will contribute to the development of sound disciplinary expertise in the academic study of Islam - historical and sociological. The unit will familiarise students with critical approaches to the study of Islam that touch on its origins and development, formation of traditions, social structures and institutions as well as familiarising students with issues regarding Islam in the Western context. The unit will assist students to develop cross-cultural awareness and interaction, communication and interpersonal skills, inventiveness and a capacity for independent thinking and analysis and problem solving skills.

School Humanities & Comm Arts

Discipline Sociology

Equivalent Subjects HUMN 1047 - Understanding Islam and Muslim Societies

Restrictions Students must be enrolled at Western Sydney University, The College. Students enrolled in Extended Diplomas must pass 40 credit points from the preparatory subjects listed in the program structure prior to enrolling in this University level subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. After successful completion of this Unit, students will be able to:
2. Discern the basic beliefs and practices that constitute the Islamic faith.
3. Identify Islamic doctrine in relevant historical contexts and distinguish the diversity of Muslim societies and cultures.
4. Describe key discourses within the academic study of Islam.

Subject Content

1. The origins of Islam and the historical and social context in which it emerged.
2. The formation of the Islamic Traditions.
3. Islamic 'arts' and humanities including art, architecture, prose and poetry.
4. Islamic institutions including law and philosophical foundations.
5. Islamic societies in the Middle Islamic period (11th - 15th Century).
6. Education and the transmission of knowledge in the pre-modern period.
7. Transition into modernity: post-Ottoman rule particularly the 18th Century.
8. Islam and Muslims in the modern world.

HUMN 1049 Understanding Visual Culture

Credit Points 10

Legacy Code 101979

Coordinator Alex Ling ([https://directory.westernsydney.edu.au/search/name/Alex Ling/](https://directory.westernsydney.edu.au/search/name/Alex%20Ling/))

Description Visual media are a major feature of everyday life in contemporary society. The circulation of images shapes our sense of who we are individually and collectively; how we move through the world; and the possibilities that exist for enacting social change. This unit introduces students to the histories and theories of visual culture, from painting and photography, through cinema and television, to digital media, including social media and user-generated content. Students will gain practical skills in analyzing visual and audiovisual texts as well as a comprehensive understanding of the role of visual culture in the production and maintenance of power relations. These skills are crucial to engaging critically with contemporary culture.

School Humanities & Comm Arts

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise a range of visual, audio-visual and multi-media forms and genres.
2. Explain relevant key concepts and terminologies
3. Analyse a range of visual texts important to the study of visual culture, historical and contemporary art, and digital media forms
4. Demonstrate critical reading skills in the field of visual culture

Subject Content

This subject is modularised and teaching and content may vary slightly from semester to semester based upon staff teaching and research expertise. The subject will focus on different visual modes, such as painting, photography, screen cultures and digital cultures. The subject will examine concepts and methodologies of visual culture study and analysis, which may include

- representation
- perspective
- composition
- framing
- modes of spectatorship
- viewing practices
- semiotics
- meaning
- ideology
- genre

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	Weekly quiz (run over 10 weeks total): best 8 of 10 will be counted for assessment	20	N	Individual
Essay	1,000 words	40	N	Individual
Final Exam	1,200 words	40	N	Individual

HUMN 1051 Who do you think you are? (Day Mode)

Credit Points 10

Legacy Code 101762

Coordinator Peter Pinnington ([https://directory.westernsydney.edu.au/search/name/Peter Pinnington/](https://directory.westernsydney.edu.au/search/name/Peter%20Pinnington/))

Description This unit is available to all Undergraduate students who have open electives. Who do you think you are? will provide students practice in the analysis of historical documents, family narratives, autobiography, political and social issues around a project that will give a context for their own personal story. Students will develop skills in oral history work, locating and retrieving archival documents and compiling their own 'family tree'. Students will also develop skills in practising speaking and writing genre appropriate to their own family history. An introduction to the theory of identity and identification will enable students to appreciate the complexities of becoming.

School Humanities & Comm Arts

Discipline Indigenous Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Co-requisite(s) HUMN 1013

Learning Outcomes

On successful completion of this subject, students should be able to:

1. At the successful completion of this unit, students will be able to:
2. use effective research skills to locate and retrieve archival documents;
3. critically analyse historical documents;
4. identify key social and political issues that have impacted and shaped their own lives and families lives;
5. critically reflect on their own family narratives and history;
6. compile a ♦family tree♦f;
7. practise skills in speaking and writing genre appropriate to their own family history; and
8. rethink their own identity and identifications.

Subject Content

This subject will address some of the following:

Understanding the archives
 How to access and retrieve archival/historical documents
 Interpreting archival/historical documents
 The importance of history
 The role of family narratives and oral history
 Autobiography work
 Memory work
 How to compile a family history tree
 Identity and identification work

Teaching Periods

HUMN 1052 Australian Politics and Active Citizenship

Credit Points 10

Legacy Code 102738

Coordinator David Burchell ([https://directory.westernsydney.edu.au/search/name/David Burchell/](https://directory.westernsydney.edu.au/search/name/David+Burchell/))

Description We live in an increasingly interconnected world where international trade, foreign policy, digital communication and flows of migrants and cultures across borders appear to undermine the importance of national communities. Despite this, everyday life is still profoundly influenced by the decisions which national governments make and the powers they exercise. This unit introduces Australian political institutions, processes and contemporary issues. It traces democracy beyond Parliamentary representation to encompass active citizenship, through which public opinion is formed and expressed. Students will identify key political issues in contemporary Australia, understand how political institutions respond, and develop the skills to contribute to public debates.

Level Undergraduate Level 1 subject

Equivalent Subjects HUMN 1005 - Australia and the World HUMN 1006 - Australia and the World (WSTC) HUMN 1055 - Australian Politics and Active Citizenship (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe Australia's representative systems of government
2. Explain Australia's federal system
3. Identify key issues in Australian foreign policy
4. Participate in contemporary public debates using a variety of written genres

Subject Content

1. What is liberal democracy? To what extent do Australian political institutions reflect liberal democratic principles?

- The origins and development of Australian Federation
- Responsible government: representative democracy and the policy process

- The Australian State: the Federal system and the Constitution, the legislature, the cabinet, the judiciary, and the public service

2. Political representation: reflecting the political will?

- Australia's electoral system and elections: How democratic are they?
- The history and development of the major parties

- The role of minor parties and independents in Australian politics
- Communal rights in Australian democracy, including the rights of first nations peoples

3. Australia in the world

- Thinking about foreign policy? the traditional agenda

HUMN 1053 Diversity, Language and Culture

Credit Points 10

Legacy Code 102736

Coordinator Sebastian Byrne ([https://directory.westernsydney.edu.au/search/name/Sebastian Byrne/](https://directory.westernsydney.edu.au/search/name/Sebastian+Byrne/))

Description The purpose of this unit is to equip students with skills to understand and navigate a culturally and linguistically diverse society, including that of Greater Western Sydney. Students will gain an historically informed, critical understanding of the meaning of culture, the impact of colonisation, indigenous Australian cultures,

and of approaches to diversity, multilingualism and multiculturalism. They will explore the value of their existing and emerging skills in bilingualism and cross-cultural communication as tools to navigate a rapidly changing global environment. Students will practice their intercultural communication skills in a team setting through a virtual field trip to an Australian community.

Level Undergraduate Level 1 subject

Equivalent Subjects HUMN 1009 - Contemporary Society HUMN 1011 - Contemporary Society (WSTC) HUMN 1056 - Diversity Language and Culture (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain key concepts in the analysis of diversity, language and culture.
2. Develop communicative competence in a range of intercultural settings.
3. Identify and explain the role of cultural diversity, bilingualism and multilingualism in becoming responsible local and global citizens.
4. Engage critically with media and visual culture to ground their theoretical understanding.
5. Achieve academic literacy by locating and assessing sources and expounding an argument in written and verbal forms.
6. Critically reflect upon experiences of intercultural communication and community engagement.
7. Work effectively in teams.

Subject Content

Histories, concepts and policies of cultural diversity.
 Cultures of Indigenous Australian peoples.
 Bilingualism and multilingualism.
 Language as a human endowment.
 Language typology and language learning.
 Concepts of social harmony and social protest.
 Race and colonialism in Australia.
 Arts and visual culture in contemporary Australia.
 Advocating for alternative futures.
 Self-directed field trip including in-class preparation: engaging in cultural and intercultural experiences.

HUMN 1054 When Worlds Collide: European Empires and the World, c.1600-1950

Credit Points 10

Legacy Code 102768

Coordinator Simon Fleming ([https://directory.westernsydney.edu.au/search/name/Simon Fleming/](https://directory.westernsydney.edu.au/search/name/Simon%20Fleming/))

Description This unit provides an historical investigation of the interaction between European empires - specifically the British and the Dutch - and the Americas and Asia-Pacific region, from 1600-1950. It examines the combination of domination and cultural negotiation between colonisers and colonised, which included, among other processes, the trans-Atlantic slave trade. It examines both how peoples were managed as imperial subjects, and how they responded to this management. The unit explores both the effect of imperial rule on the colonised, and of empire upon the colonisers. It draws upon historical literature from a variety of sources and perspectives, and from European and Asian history.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects HUMN 1022 - Global History CULT 1014 - The First Globalisation HUMN 1023 - Global History

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the historical experience of European colonialism, for both colonisers and colonised, with reference the British and Dutch Empires.
2. Describe processes for studying different cultures, Western and non-Western, in contact and collision.
3. Apply selected historiographic and ethnographic skills to the study of historical cultures.
4. Produce compelling arguments with primary and secondary sources.

Subject Content

NB. This content is modular and therefore: the content will be taught according to the available teaching staff's areas of expertise; not all topics will be included each semester; content will not necessarily be taught in the order it is listed below.

1. The origins of modern European empires: the British and the Dutch in context.
2. The early British Empire in the Atlantic and Caribbean
3. The British Empire and property: the case of John Locke

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 1057 Doing Sociology

Credit Points 10

Legacy Code 102787

Coordinator Julia Kantek ([https://directory.westernsydney.edu.au/search/name/Julia Kantek/](https://directory.westernsydney.edu.au/search/name/Julia%20Kantek/))

Description With a focus on what it is that sociologists 'do' and why, this unit considers how sociology contributes to a better understanding of everyday life. That is, to the routine engagements, interactions and practices that make up our individual and social worlds. Where we live, what we consume, how we feel and the meanings we give our work, leisure, environments and relationships will all be analysed with reference to academic and popular content. Serving as an introduction to the discipline of sociology and its various sub-fields and methods, 'Doing Sociology' places emphasis on how sociological knowledge can be applied. In this way, the unit provides students with the opportunity to consider what they might do with sociology; how a sociological perspective might help them better understand the social world and contribute in a meaningful way to resolving contemporary social issues.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify key characteristics of the discipline of sociology and its sub-fields.
2. Examine aspects of everyday life from a sociological perspective.
3. Apply sociological perspectives to contemporary social issues.
4. Evaluate the utility of sociological knowledge in the workplace.

Subject Content

Introduction to the discipline of sociology.
Introduction to sociological research methods.
Sociology in everyday life.
Sociology in the workplace.
Applying sociological knowledge.

HUMN 1058 Indigenous Landscapes

Credit Points 10

Legacy Code 102805

Coordinator Madison Shakespeare ([https://directory.westernsydney.edu.au/search/name/Madison Shakespeare/](https://directory.westernsydney.edu.au/search/name/Madison%20Shakespeare/))

Description Indigenous Landscapes aims to explore 'traditional' Indigenous Australian ways of knowing landscape in contemporary, meaningful, and relevant ways. Specifically, the unit acknowledges and values pre-colonial Australian history and land-use practices. Content includes 'traditional' land management practices; cold-burning, protected area management, sustainable land use; cultural heritage and heritage landscapes, Sovereign land rights. This unit also aims to equip students with cultural competency in order to address issues of dispossession and disadvantage brought about by the historical destruction and disruption of ecological integrity.

School Humanities & Comm Arts

Discipline Indigenous Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects BIOS 1020 - Indigenous Landscape LGYA 6193 - Indigenous Landscapes

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate cultural competency when working with Indigenous Australians
2. Identify ♦etraditional♦ of Indigenous Australian land-use practices
3. Discuss the significance of Native Title and its difference compared to Land Rights
4. Argue the benefits of effective landscape joint-management/co-management for reconciliation
5. Demonstrate understanding of the importance to Indigenous Australians of particular places and sites of significance
6. Explain the concept of protected area management

Subject Content

Indigenous landscapes
 Indigenous land management
 Contemporary environmental sustainability
 Native Title / Sovereign Land Rights
 Protected area management
 Sustainable land use
 Joint Management / Co-management
 Cultural Heritage
 Heritage Landscapes

HUMN 1059 When Worlds Collide: European Empires and the World, c.1600-1950 (WSTC)

Credit Points 10

Legacy Code 700299

Coordinator Chantal Rozairo ([https://directory.westernsydney.edu.au/search/name/Chantal Rozairo/](https://directory.westernsydney.edu.au/search/name/Chantal%20Rozairo/))

Description This unit provides an historical investigation of the interaction between European empires-specifically the British and the Dutch-and the Americas and Asia-Pacific region, from 1600-1950. It examines the combination of domination and cultural negotiation between colonisers and colonised, which included, among other processes, the trans-Atlantic slave trade. It examines both how peoples were managed as imperial subjects, and how they responded to this management. The unit explores both the effect of imperial rule on the colonised, and of empire upon the colonisers. It draws upon historical literature from a variety of sources and perspectives, and from European and Asian history.

Restrictions Students must be enrolled at The College to enrol in this subject. Students enrolled in Extended College programs must have passed 40 credit points of the preparatory subjects in these programs in order to enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the historical experience of European colonialism, for both colonisers and colonised, with reference the British and Dutch Empires.
2. Describe processes for studying different cultures, Western and non-Western, in contact and collision.
3. Apply selected historiographic and ethnographic skills to the study of historical cultures.
4. Produce compelling arguments with primary and secondary sources.

Subject Content

NB This content is modular and therefore: the content will be taught according to the available teaching staff's areas of expertise; not all topics will be included each term; content will not necessarily be taught in the order it is listed below.

1. The origins of modern European empires: the British and the Dutch in context.
2. The early British Empire in the Atlantic and Caribbean
3. The British Empire and property: the case of John Locke
4. The Mughal Empire and its first contact with the British
5. The British and India: 1600-1700
6. Liberal Critics of Empire: Adam Smith and Edmund Burke
7. America revolts against empire: the American Revolution

8. Religion and Liberalism: Raja Rammohun Roy
9. Africa and the trans-Atlantic Slave Trade
10. The Abolition of slavery in the British Empire
11. Gandhi and the Indian independence movement
12. The Dutch Empire in Asia: overview
13. The Dutch in Indonesia
14. British and Dutch colonial policy in SE Asia.
15. A survey of colonial policies and practices re marriage and sex in Asia.
16. A survey of colonial policies on Islam in Asia
17. The battle for ownership in settler colonial Australia
18. The emergence of Australian settler nationalism
19. Issues in the colonial Dutch East Indies
20. The rise of Indonesian nationalism

HUMN 1060 Introduction to Indigenous Australia: Peoples, Places and Philosophies

Credit Points 10

Legacy Code 102815

Coordinator Ian Shearer ([https://directory.westernsydney.edu.au/search/name/Ian Shearer/](https://directory.westernsydney.edu.au/search/name/Ian%20Shearer/))

Description This unit introduces students to the rich diversity: past, present and future of Aboriginal and Torres Strait Islanders in Australia with emphasis placed on the importance of identity, diversity, representation and resilience. You will engage directly with Indigenous sources and learn to critically analyse content from Indigenous Standpoints. Presenting as a challenging and thought-provoking experience of Aboriginal and Torres Strait Islander peoples, places and philosophies, this unit provides a solid theoretical foundation of Indigenous perspectives for the knowledges and professional practices in your chosen field.

Level Undergraduate Level 1 subject

Equivalent Subjects CULT 1020 - Working with Communities CULT 1021 - Working with Communities (WSTC) HUMN 1062 - Introduction to Indigenous Australia Peoples Places and Philosophies (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Outline the history of Indigenous Australia since British colonisation.
2. Discuss the social, cultural and political situations and circumstances that challenge contemporary Indigenous Australia.

3. Explain societal misconceptions, ideas, attitudes and assumptions about Indigenous Australia.
4. Discuss the importance of core concepts including identity, diversity, representation and resilience.
5. Adopt a socially and culturally responsive personal and professional approach to Indigenous Australia.

Subject Content

Indigenous Research Matters: Reading, writing and terminology
 Indigenous Worlds: Where do you stand?
 An historical timeline: tracing major events from pre-colonisation to today
 Contemporary Indigenous Identities
 Indigenous Land and Country
 Indigenous spaces and places
 Indigenous people and the arts: representation and narrative
 Interrogating 'Closing the gap' and other policies in relation to Indigenous social determinants
 Indigenous people and intersectionality
 Racism and Privilege
 Working in Indigenous contexts
 Why Indigenous Social Sciences Matters
 Indigenous Worlds, Land, Country and Kinship
 Race and Settler Colonialism
 Contemporary Indigenous Identities and Intersectionality
 Interrogating Close the Gap and other policies in relation to Indigenous Peoples
 Indigenous Incarceration and Social Activism

HUMN 1061 Islam: Past, Present and Future

Credit Points 10

Legacy Code 102823

Coordinator Vassilios Adrahtas ([https://directory.westernsydney.edu.au/search/name/Vassilios Adrahtas/](https://directory.westernsydney.edu.au/search/name/Vassilios%20Adrahtas/))

Description This is an introductory level unit that forms part of the Islamic Studies major. The unit will contribute to the development of sound disciplinary expertise in the academic study of Islam - historical, anthropological, and sociological. The unit will familiarise students with

critical approaches to the study of Islam that touch on its origins and development, formation of traditions, social structures and institutions, and with issues regarding Islam in the Western context. The unit will aid students in developing cross-cultural awareness and interpersonal communication skills.

Coordinator Mark G. E. Kelly ([https://directory.westernsydney.edu.au/search/name/Mark G. E. Kelly/](https://directory.westernsydney.edu.au/search/name/Mark%20G.%20E.%20Kelly/))

Description The Athens of Pericles is studied from three perspectives: philosophy, politics, and history. The use of reason and rhetoric is examined through the works of some pre-Socratics, Sophists and Socrates. The focus on philosophy and politics will be placed in the context of the history of the city-state and democratic citizenship.

School Humanities & Comm Arts

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points in the students' current enrolled program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the culture of Periclean Athens in terms of philosophy, politics and history.
2. Compare and contrast key sources of the period in philosophy and history; as well as to examine the artistic visual heritage.
3. Analyse the continuities and discontinuities between 5th century B. C. Athens and modernity.
4. Analyse the culture of Periclean Athens in terms of philosophy, art and history.
5. Compare and contrast key sources of the period in philosophy, politics and history.

Subject Content

- The rise of reason and rhetoric as forms of legitimation in public discourse. Philosophical understandings of nature. The Presocratics, particularly Anaxagoras. Sophist tactics and styles of argumentation. Protagoras as The leading example. Truth and virtue in Socratic philosophy.

- The artistic ideals of The Classical Age: harmony and perfection. Developments in architectural style: The Doric. The Acropolis. Sculptural representations of The gods and humans. The Parthenon frieze. The meaning of art in Greek culture. The status of The artist. Phidias, Iktinos and Kallikrates.

- The city-state as An economic, cultural and political entity. The comportment of The body within The polis. Male and female standards. The sexual differentiation of religious ceremonies. public and private. Athenian democracy and The ideals of citizenship. public morality. The rise of reason and rhetoric as forms of legitimation in public discourse.

Philosophical understandings of nature.

The Presocratics, particularly Anaxagoras.

Sophist tactics and styles of argumentation.

Protagoras as the leading example.

Truth and virtue in Socratic philosophy.

The city-state as an economic, cultural and political entity.

The comportment of the body within the polis.

Public and private.

Athenian democracy and the ideals of citizenship.

Public morality.

Teaching Periods

HUMN 2012 Anthropologies of the Everyday

Credit Points 10

Legacy Code 102347

Coordinator Geir Henning Presterudstuen ([https://directory.westernsydney.edu.au/search/name/Geir Henning Presterudstuen/](https://directory.westernsydney.edu.au/search/name/Geir%20Henning%20Presterudstuen/))

Description In 2021, this unit replaced by 102844 - Society, Culture and Human Diversity. Although people's lives vary significantly depending on ethnographic context, it is also through everyday practices and rituals that the universality of the human condition becomes most obvious. Close studies of how people create a living and make meaning of their everyday experiences in various contexts can thus provide valuable lessons about cultural difference as well as about what it means to be human, and is consequently a core aspect of anthropological inquiry. In this unit students engage with this overarching theme via ethnographic case studies as well as through inquiries into their own everyday lives.

School Social Sciences

Discipline Anthropology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) HUMN 1016

Restrictions Students in programs 1667 Bachelor of Social Science, 1733 Bachelor of Social Science (Advanced) and 6023 Diploma in Social Science/Bachelor of Social Science must have successfully completed 40 credit points of Level 1 subjects.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply anthropological concepts to the description of social and cultural phenomena of the everyday
2. Analyse how everyday social behaviour and practice are shaped by cultural factors
3. Articulate some ways that everyday social practice may help us understand human cultures
4. Evaluate the concept of *the everyday* through self-reflection
5. Apply anthropological theories to case studies
6. Utilise basic observational techniques in order to study aspects of everyday life

Subject Content

Theorising the everyday experience;
Belonging and homemaking; space and place;
Everyday communication;
Work, production and exchange;
Childhood and schooling;
Love and friendship;

Food as a cultural entity;
Understanding the human body/emodied experiences;
Understanding violence, illness and death;
Human/animal relations;
Conspicuous consumption;
Developing online identities and virtual communication.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Online Journal	1000 words	30	N	Individual
Field Report	500 words plus visuals	20	N	Individual

Teaching Periods

HUMN 2014 Civil Society in Contemporary China

Credit Points 10

Legacy Code 101968

Coordinator Edmund Fung ([https://directory.westernsydney.edu.au/search/name/Edmund Fung/](https://directory.westernsydney.edu.au/search/name/Edmund%20Fung/))

Description This unit is intended to give students an understanding of the social development of the People's Republic of China (PRC). It will engage with some of the key concepts that scholars have utilised to understand social changes. In this vein, the unit will consider China's socio-political transformation from a civil society perspective. It will consider a range of stakeholders - from non-governmental organisations to trade associations - and examine the events that have contributed to the development of China's civil society.

School Humanities & Comm Arts

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. explain the conception of civil society and its utility in understanding China's social and political development
2. critically assess the emergence of new social stakeholders in China and their impact on civil society
3. assess the Chinese state's response to civil society stakeholders
4. evaluate the future of China's civil society and its potential in affecting socio-political change
5. use social science methods to construct future research.

Subject Content

- . Conceptions of civil society
- . Conceptions of Chinese civil society
- . Social changes in China since 1978
- . State-society relations in China
- . Key domestic social stakeholders, including non-governmental organisations
- . Emergence of voluntarism
- . Role of transnational actors in Chinese civil society
- . Role of the state in Chinese civil society
- . Future social and political developments in China

Legacy Code 101595

Coordinator Michel Edenborough ([https://directory.westernsydney.edu.au/search/name/Michel Edenborough/](https://directory.westernsydney.edu.au/search/name/Michel%20Edenborough/))

Description Dismantling oppressive and complex forms of disadvantage and inequality are social justice and human rights issues demanding collective action. Activism is not solely about disruption and disobedience. This unit focuses on local, national and global social movements, the use of digital technologies and differing forms of activism using theories of social change. We identify and reflect on diverse perspectives, challenging normative constructs between individual and structural explanations of inequality and explore tactics and strategies adopted by activists, from the early 20th century through to contemporary campaigns. Students are enabled to take part in meaningful ways as active change agents through design, planning and participation in a social action campaign, thereby building knowledge and skills in community engagement, relationship building and the strategies and methods involved in bringing about positive social change.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects LGYA 1286 - Education for Social Action

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of social movements and change processes from diverse perspectives.
2. Recognise the challenges for collective action in the social/political context of NPM (New Public Management).
3. Critically analyse the competing interests involved in social change.
4. Identify the links between contested issues in global and local contexts in terms of bringing about social change.

5. Recognise and reflect on skills used in mobilising power necessary for bringing about social change.

Subject Content

Key concepts and theories of social change
 History of Social Movements
 Ethical and respectful advocacy and activism change strategies
 Social Action & the State
 Current Challenges & Opportunities for Social Change
 Organising for Social Change
 Citizenship & Social Change
 Values, competing interests & technology
 Environmental Activism
 Indigenous Activism
 Women & Social Change
 Linking individual & structural social change

HUMN 2017 Complex Emergencies and International Guidelines

Credit Points 10

Legacy Code 102367

Coordinator Garry Stevens ([https://directory.westernsydney.edu.au/search/name/Garry Stevens/](https://directory.westernsydney.edu.au/search/name/Garry%20Stevens/))

Description Over the last five decades, the world has experienced a significant number of disasters, which have occurred in many different forms including natural (e.g. Tsunami or drought) and human-induced (e.g. wars or ethnic conflicts), leading to an unplanned exponential increase in the number of international non-government organisations. This unit examines the causes and consequences of disasters and the application of international guidelines governing humanitarian responses. It provides an outline of theoretical approaches to the understanding of the political aspects of emergencies and introduces real-life case studies that aim to engage students in critical thinking and improve their knowledge of the core humanitarian standard on quality and accountability; the humanitarian charter and minimum standards; and the challenges related to interagency coordination in emergencies

School Social Sciences

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define different types of natural and human-induced disasters and phases of emergencies
2. Identify theoretical frameworks to explain the causes of emergencies and assess their applications in various emergency contexts
3. Describe and critically analyse the principles of disaster preparedness and mitigation
4. Analyse factors and activities associated with various types of disasters
5. Articulate key players in emergency response and management, their roles and challenges they face
6. Identify major international guidelines and standards that govern humanitarian responses and assess enabling and disabling factors associated with the adherence to such standards
7. Critically analyse challenges and ethical dilemmas associated with various emergency scenarios

Subject Content

1. Disasters: Definition, typology, and evolution
2. The right to humanitarian aid: International laws guiding humanitarian response
3. Theoretical foundations of disasters
4. Principal of disaster prevention, preparedness, and mitigation
5. Phases of emergency management and the relief-development continuum
6. Anatomy of disaster response
7. Core humanitarian standard on quality and accountability
8. The SPHERE project: humanitarian charter and minimum standards
9. Key challenges and dilemmas during humanitarian response
10. Militarization and politicization of humanitarian assistance

11. Case studies and lessons learned: Genocide in Rwanda vs. the Asian Tsunami

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 2018 Cultural and Social Geographies

Credit Points 10

Legacy Code 101590

Coordinator Andrew Gorman-Murray ([https://directory.westernsydney.edu.au/search/name/Andrew Gorman-Murray/](https://directory.westernsydney.edu.au/search/name/Andrew%20Gorman-Murray/))

Description Examines the nexus between society, culture and place. Considers contemporary social and cultural planning issues including: local community relations, place management, place redefinitions, ethnic concentration, cultural precincts, and the spatial politics of gender and sexuality. The roles of cultural products in carrying spatial information and reinforcing identity are examined. Introduction to cultural and social geography, and developments in cognate fields of cultural studies and anthropology. Key theories of identity. Case studies range across ethnicity, religion, age, gender, sexuality, class and nationalism. The analysis and assessment advances an appreciation of social and cultural difference and social justice.

School Social Sciences

Discipline Human Geography

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects HUMN 2019 - Cultural and Social Geographies (UWSC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe key paradigmatic shifts within cultural and social geography, social planning, and cultural studies.
2. Critically evaluate and analyse cultural products.
3. Analyse representations of place, culture and society.
4. Evaluate policies and programs for contemporary place management.
5. Identify and describe key theories of identity and place.

Subject Content

1. Old to new cultural geographies, and the rise of social planning, postmodern cities.
2. Theories of identity and place.
3. Representing people and place: national identity in-place
4. Indigeneity, place and post-colonialism.
5. Social distance and spatial distance.
6. The local politics of difference.
7. Geographies of fear and violence.
8. Sexuality and space.
9. The geographies of racism and anti-racism.
10. Constructions of environment.
11. The spaces of religion and faith.
12. Heritage, identity and the production of urban places.

HUMN 2020 Digital Humanities and Research Methods (UG)

Credit Points 10

Legacy Code 102425

Coordinator Rachel Hendery ([https://directory.westernsydney.edu.au/search/name/Rachel Hendery/](https://directory.westernsydney.edu.au/search/name/Rachel%20Hendery/))

Description This unit investigates the methodological possibilities of digital technologies for interdisciplinary humanities and social sciences research. It covers several major digital research methods, exploring previous applications and examining their orientations and implications. Digital research methods and applications may include digitisation, online curation, visualisation, network analysis, geographical information systems, data mining and simulation. In the context of these, the unit will probe histories of technology and knowledge production, the evolution of digital texts and practices, and issues in contemporary culture such as digital design, gamification, virtual identity, and digital rights.

School Humanities & Comm Arts

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 60 credit points at Level 1.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Communicate a clear understanding of the ways digital technologies are applied in interdisciplinary research contexts;
2. Collaborate with fellow students to engage with digital platforms for research;
3. Articulate the ways in which digital technologies are influencing social and cultural research methodologies; and
4. Describe how new digital technologies can be used to address contemporary research questions.

Subject Content

Introduction to subject - The 'computational turn' in the humanities (lecture pods, readings)

Digitisation (lecture pods, readings in own time). Workshop: exercise relating to working with electronic texts.

Data/text mining and visualisation (Lecture pods, readings). Workshop: text mining and visualisation exercise.

Gaming (lecture pods, readings). Workshop: case study exercise in gaming.

GIS and mapping (lecture pods, readings). Workshop: mapping exercise.

Network analysis, social media, metadata (lecture pods, readings).

Workshop: exercise relating to network analysis.

Students present their own final project.

Teaching Periods

HUMN 2021 Doing Business in China

Credit Points 10

Legacy Code 101857

Coordinator Niv Horesh ([https://directory.westernsydney.edu.au/search/name/Niv Horesh/](https://directory.westernsydney.edu.au/search/name/Niv%20Horesh/))

Description This unit is primarily aimed at acquainting undergraduate students with the academic theory and debates surrounding China's business etiquette and its globalizing economy. Drawing on a wide range of English-language studies, unit lectures will cover in broad strokes the historic background of the economic reforms carried out in China over the last three decades, as well as their societal implications. They will discuss, for example, the evolution of corporate law and property rights in the PRC since 1949, and the underlying differences and interdependence between the Chinese and Australian economies.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Students will be able to
2. Explain the historic background and ongoing controversies surrounding China's economic-reform thrust over the last three decades.
3. Carry out effective team or group-based work.
4. Proficiently argue their standpoint, both orally and in writing, in relation to China's development trajectory and the future of Sino-Australian trade.
5. Independently find important sources of data and information that might later help them further develop their knowledge of the Chinese and Australian economies, as well as the process of economic globalization as a whole.
6. Demonstrate team-work allocation capacity, as well as group research and presentation skills.

Subject Content

What have been the most successful/unsuccessful aspects of China's economic reforms?

A Unique Business Etiquette?

Inter-Provincial Competition.

Foreign Investment in China.

Impersonal vs. Personal Trust.

Legal Reform.

The Wenzhou vs. Shanghai Models of Economic Development.

China's Financial and Banking System.

State Owned Enterprises vs. Private Sector.

The Spectre of Corruption/Guanxi.

The Deadweight of Pollution.

The Global Financial Crisis and the End of "Chimerica".

The Future of Sino-Australian Trade and Investment.

Teaching Periods

HUMN 2022 Emergency Field Operations: Supply Management and Logistics

Credit Points 10

Legacy Code 102368

Coordinator Garry Stevens ([https://directory.westernsydney.edu.au/search/name/Garry Stevens/](https://directory.westernsydney.edu.au/search/name/Garry%20Stevens/))

Description This unit will equip students with the required skills to assess organisational capacity to respond to disasters and other complex humanitarian emergencies. The unit will cover logistical frameworks and tools for planning, the sustainable deployment of goods and services, and monitoring and evaluating the effectiveness of local and global supply chains. It will discuss the challenges, ethical, and political dimensions of supply chains and contingency plans in emergency and disaster response contexts.

School Social Sciences

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Co-requisite(s) HUMN 2017

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe logistics principles, processes and frameworks and their adaptations in humanitarian emergencies
2. Articulate key challenges, ethical issues, and political dimensions of humanitarian logistics
3. Identify and use recognised tools to plan and monitor supply chains and evaluate their effectiveness.
4. Critically assess organisational capacity to respond to a humanitarian emergency
5. Conduct and report a Logistics Capacity Assessment (LCA)
6. Critically assess the role and effectiveness of the Logistics Cluster in humanitarian response
7. Articulate principles of sustainable deployment of goods and services

Subject Content

Logistics and supply chain management: key concepts and frameworks
Logistics in humanitarian emergencies: challenges, standards and the Cluster Approach

Preparedness and procurement: setting up local and global supply networks

Transport, warehousing and distribution

Assessment and monitoring: conducting a Logistics Capacity Assessment (LCA)

Co-ordination and Communication in emergency response contexts

Security and civil-military co-operation

New logistics frontiers: services, cash transfers and market support

Human resource management

Sustainability and performance evaluation

HUMN 2023 Empire: European Colonial Rule and its Subjects, 1750-1920

Credit Points 10

Legacy Code 100861

Coordinator David Burchell ([https://directory.westernsydney.edu.au/search/name/David Burchell/](https://directory.westernsydney.edu.au/search/name/David%20Burchell/))

Description A historical investigation of the experience of the 19th century European empires from the perspectives of both the colonised and colonisers. It examines the combination of domination and cultural negotiation between colonisers and colonised. It examines both how peoples were managed as imperial subjects and how they responded to this management. It looks both at the effect of imperial rule on the colonised, and of empire upon the colonisers. It draws upon historical literature from a variety of sources and perspectives, and within European and Asian history. The focus is chiefly, though not exclusively, upon the British empire and its subject peoples.

School Humanities & Comm Arts

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects LGYB 0089 - The World Encircled 1100 - 1600

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the historical experience of European colonialism
2. Describe processes for studying different cultures in contact and collision
3. Apply selected historiographic and ethnographic skills to the study of historical cultures
4. Demonstrate essay-writing and argumentative skills

Subject Content

- . Notions of imperial destiny and mission
- . Similitude: imagining the metropolis in the colony

- . Empire, race and sexuality
- . Hierarchy and the glamour of imperial rule
- . Artefacts of empire and their significance
- . The empires as people-management
- . The ambivalence of the colonised

Assessment

HUMN 2024 Ethnographies of Southeast Asia and the Pacific

Credit Points 10

Legacy Code 102346

Coordinator Geir Henning Presterudstuen ([https://directory.westernsydney.edu.au/search/name/Geir Henning Presterudstuen/](https://directory.westernsydney.edu.au/search/name/Geir%20Henning%20Presterudstuen/))

Description This unit will introduce students to ethnographic field study through a close examination of the anthropology of two regions with which Australia is geographically and politically aligned; the Pacific Islands and South-east Asia. Drawing upon classic and contemporary ethnography the unit will provide opportunities for comparative and trans-historical studies of how cultures in these regions have been constructed and changed in relation to larger global dynamics. It will also provide an insight into the ways in which anthropological theory is developed in the context of attempts to explain and interpret cultural difference. Key topics of study, explored through case studies, will include the colonial experience, traditions and modernities, nations and nationalism, transnationalism, religion, social conflict, and material cultures. The unit will include ethnographic films.

School Social Sciences

Discipline Anthropology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply anthropological concepts to the description of cultural diversity in South-east Asia and the Pacific islands.
2. Analyse some of the ways symbolic cultures and traditions are influenced by political, material and environmental factors.

3. Draw upon ethnographic case studies to explain regional similarities and differences.
4. Apply anthropological theories to case studies about cultural change.
5. Analyse some ways visual anthropology (film, photography) can effectively aid in the description of cultural phenomena.

Subject Content

1. The peoples of Southeast Asia and the Pacific.
2. The South Pacific and Southeast Asia in the colonial imagination.
3. Melanesian and Polynesian anthropologies.
4. Chiefs and Big Men ? governance and tradition.
5. Gifts, symbols and material culture.
6. Anthropologies of Southeast Asia: Indonesia and Thailand.
7. The village, the nation and nationalism in Indonesia, Thailand and Malaysia.
8. Global interventions: the IMF, the World Bank and INGOs in Cambodia, Indonesia, and Laos.
9. Commodifying culture ? Southeast Asia and the pacific as tourist destinations.
10. Australia in the Region.

Teaching Periods

HUMN 2025 Families and Intimate Life

Credit Points 10

Legacy Code 102143

Coordinator Kate Huppatz ([https://directory.westernsydney.edu.au/search/name/Kate Huppatz/](https://directory.westernsydney.edu.au/search/name/Kate%20Huppatz/))

Description This unit will critically examine sociological perspectives on families and intimate life, building on the approaches and theories introduced in the first year of Sociology studies. The familiarity of families and intimate relationships will be thrown into question. Students will be asked to examine their beliefs, unpack myths of the 'naturalness' of family, and question the 'personal'. Families and intimate relationships will be viewed as part of the wider social structure, their constitutions shaped by culture, economies, social policy, technology and globalisation. The unit will demonstrate the

historical and cultural specificity of the nuclear family and its role in the creation and reproduction of social inequality and social difference.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects HUMN 2052 - Sociology of the Family HUMN 2016 - Comparative Studies of Families and Kinship

Restrictions

Successful completion of 40 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise and describe the family and intimate relationships as socially constituted.
2. Describe the contemporary diversity of family and intimate relationship forms across cultures.
3. Provide evidence for the historical specificity of family forms and intimate relationships.
4. Analyse the family and intimate relationships in terms of power relations.
5. Demonstrate an understanding of sociological approaches to the family and intimate life.
6. Apply sociological theory to analyse families and intimate life.
7. Recognise and describe the family as a social rather than a biological construct;
8. Recognise and describe intimate relationships as social constructs;
9. Describe the contemporary diversity of family and intimate relationship forms both in our own and other cultures;
10. Provide evidence for the historical specificity of family forms and intimate relationships;
11. Analyse the family and intimate relationships in terms of power relations;
12. Demonstrate an understanding of sociological approaches to the family and intimate life.

Subject Content

- Diverse families and intimate relationships across time and culture
- Sociological theories on the family and intimate life
- Love and romance
- Marriage and cohabitation
- Gendered division of domestic labour
- Childhood and parenting
- Transnational families and outsourcing care
- Violence in families and intimate relationships
- Relationship breakdown, divorce and re-partnering
- Friendship and social networks beyond the family
- Gender, sexuality and power

HUMN 2026 Growing the Indigenous Economy

Credit Points 10

Legacy Code 102307

Coordinator Jeeva Sajan ([https://directory.westernsydney.edu.au/search/name/Jeeva Sajan/](https://directory.westernsydney.edu.au/search/name/Jeeva%20Sajan/))

Description In Growing the Indigenous Economy, we examine Australia's Indigenous economies and their dynamics. Students are challenged to reflect on the significant contribution Aboriginal and Torres Strait Islander peoples have made and continue to make to Australia's economy. They are also challenged to rethink the politics of the welfare economy as it relates to Aboriginal and Torres Strait Islander peoples; whilst reviewing relevant community development frameworks. Students are introduced to a number of enterprise development case studies, for example: The Arts, mining and land development, environmental and cultural tourism, sport, and small business.

School Social Sciences

Discipline Indigenous Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects HUMN 2047 - Revaluing Indigenous Economics (Block Mode) HUMN 2048 - Revaluing Indigenous Economics (Day Mode)

Restrictions Students must be enrolled in the Bachelor of Community and Social Development (BCSD).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the foundations and structures of **Indigenous** Aboriginal and Torres Strait Islander economies;
2. Identify key issues and challenges impacting Indigenous peoples' business success;
3. Formulate new economic opportunities for diverse Aboriginal and Torres Strait Islander communities and peoples;
4. Discuss Aboriginal and Torres Strait Islander peoples' participation in the mainstream Australian economy;
5. Recognise Aboriginal and Torres Strait Islander peoples' community strengths and attributes that promote individual, family and community development.

Subject Content

- Overview of **Indigenous** foundations and structures of Indigenous economies (e.g., trade and trade routes; importance of land for Aboriginal people, importance of the sea for Torres Strait Islander people, ceremonial practices and **connection** for country?)
- The impact of invasion and colonisation by the British, and Aboriginal and Torres Strait Islander peoples displacement and dispossession from 'country'
- government policies and The management of indigenous lives
- politics of welfare dependence
- politics of stolen wages and unpaid work
- indigenous economic opportunities: The Arts, mining and land development, environmental and cultural tourism, community services and enterprises, small businesses

- developing positive attitudes towards and perceptions of Aboriginal and Torres Strait Islander peoples
 - Exploring proactive community development approaches, including the culturally relevant application of Asset Based Community Development (ABCD).

Assessment

Item	Length	Percent	Threshold	Individual/ Group Task
Report	1,500 words	60%	Y	Individual
Essay	1,000 words	40%	Y	Individual

Teaching Periods

HUMN 2027 Health, Illness and Biomedicine: A Sociological Perspective

Credit Points 10

Legacy Code 101610

Coordinator Irena Veljanova (https://directory.westernsydney.edu.au/search/name/Irena_Veljanova/)

Description The Sociology of Medicine and Health Care starts from the basic premise that illness and health are social as well as biological processes. Traditional areas of the discipline are explored and in each case their applicability to public health is stressed. At the same time, an important goal is to suggest how that field is being redefined and reinvigorated by social and cultural studies of science and technology. The theoretical perspectives and substantive issues raised and developed to study them are critically examined. The provision and organisation of health care are examined with emphasis on the social and political context in which public health is pursued and ill health treated within Australia.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects LGYA 1357 Sociology of Medicine and Health Care

Restrictions Successful completion of 40 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply sociological theories and concepts to the specific area of social activity, medicine and health care;
2. Critically examine the dominant ideologies within the health industry, e.g., the curative model of a health care, the use of technologies in health care, and the medicalisation of society;
3. Identify and critically examine the idea of health and illness, experiences of health & illness and inequalities in those experiences ;

4. Critically examine the role of the health professions, eg medicine, nursing, in social life and their role in social control and the construction of deviance;
5. Critically evaluate health related media content through a sociological lens.

Subject Content

1. What is the social model of health and how does it differ from the biomedical model? What is illness?
2. How do the main sociological perspectives differ in their approach to studying health and illness.
3. Social organisation of health care and the political economy of health. Aging and health: Towards a sociology of ageing and dying
4. Social determinants of health (Issues of inequalities and equity in access)
5. Multicultural Health Applied
6. Medicalisation of Deviance
7. The new health paradigm and the autonomous health consumer (Alternative and complementary health care included).
8. The role of technology in modern health care.
9. Media and Health
10. Constructing medical objects and subjects (Body, Medicine and Society)
11. Transhuman Health Paradigm
12. Health Discrimination

HUMN 2028 Identity and Belonging

Credit Points 10

Legacy Code 101612

Coordinator Jennifer Cheng ([https://directory.westernsydney.edu.au/search/name/Jennifer Cheng/](https://directory.westernsydney.edu.au/search/name/Jennifer%20Cheng/))

Description Identity and belonging are foundational concepts in sociology. This unit commences with an overview of the ways in which these concepts are understood in the social sciences and how these understandings have been impacted more recently by processes of globalisation. Through engagement with films, documentaries and academic texts the unit explores different modes and sites of identity and belonging as they circulate on both local and global scales. Specifically, we will examine topics like gender and sexuality, home and neighbourhood, the nation state and nationality, social class, consumption, work and leisure, ethnicity, youth cultures and new media. The unit equips students with the concepts and theories necessary for an understanding of social continuity and social change and encourages them to reflect on their own identities and social and cultural positionings.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe sociological theories and concepts relevant to identity, belonging and globalisation.
2. Critically reflect on issues of identity and belonging as they emerge in film, documentaries and popular culture.
3. Explain how identities and experiences of belonging have changed, and are changing, over time.
4. Explain the interrelationship between identity and belonging.
5. Analyse the significance of issues of identity and belonging for minority groups.

Subject Content

Identity and belonging
 Genders and sexualities
 Neighbourhood and home
 Ethnicity and race
 Nation-states and nationalism
 New media and global communities
 Consumption and social class
 Globalisation and cosmopolitanism

HUMN 2030 Islam In the Modern World (WSTC)

Credit Points 10

Legacy Code 700162

Coordinator Kathy Gooch ([https://directory.westernsydney.edu.au/search/name/Kathy Gooch/](https://directory.westernsydney.edu.au/search/name/Kathy%20Gooch/))

Description This unit introduces students to Islam and its adherents within contemporary global context. It looks at key Muslim intellectuals from the 19th Century until the present and examines their attempts to come to terms with modernity as a Western project, while addressing critical issues facing Islam. Areas for consideration include: renewal and reform; the impact of colonialism and globalisation on Muslim discourse; independent judgement (ijtihad) versus emulation (taqlid); and issues associated with civil society. Students will also explore the challenge of shaping a Muslim identity in the modern world - in the context of key Muslim institutions and social movements.

School Humanities & Comm Arts

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects HUMN 3055 - Islam in the Modern World

Restrictions Students must be enrolled at Western Sydney University, The College. Students enrolled in extended Diplomas must pass 40 credit points from the preparatory subjects listed in the program structure prior to enrolling in this University level subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. After successful completion of this Unit, students will be able to:
2. Describe historical developments in the Muslim world and their impact on contemporary contexts.
3. Explain the origins, development and diversity of Islamic thoughts on various contemporary issues.
4. Analyse scholarly and popular debates regarding Muslim societies.
5. Analyse changing relations between Islam and the West during the modern period.

Subject Content

1. The thought of key Muslim intellectuals from the 19th century to the present.
2. Muslim intellectuals on/and modernity as a Western project.
3. The impact of globalisation and colonialism on Muslim discourse.
4. Independent judgement (ijtihad) versus emulation (taqlid).
5. Muslim identity in the modern world in light of key Muslim institutions and social movements.
6. Reform and renewal.

HUMN 2032 Issues in World Development: Rich World, Poor World

Credit Points 10

Legacy Code 101331

Coordinator Zulfan Tadjoeeddin ([https://directory.westernsydney.edu.au/search/name/Zulfan Tadjoeeddin/](https://directory.westernsydney.edu.au/search/name/Zulfan%20Tadjoeeddin/))

Description This unit introduces students to the field of international development, where the divide between the rich world and poor world takes a centre stage. While development has created prosperity around the world, it is not without discontents. Social and economic inequality at the global level is a real problem and has been increasing. The 'developed' and 'developing' world paradigm will be critically examined. Students will be equipped with theories and practicum examining development, underdevelopment and their related issues within a contemporary political, economic and social framework. Students will also have exposure to current global development debates such as poverty, global inequality, sustainable development, democracy and security.

School Social Sciences

Discipline Human Geography

Student Contribution Band HECS Band 4 10cp

HUMN 2034 Keeping the Past

Credit Points 10

Legacy Code 100001

Coordinator Karen Entwistle ([https://directory.westernsydney.edu.au/search/name/Karen Entwistle/](https://directory.westernsydney.edu.au/search/name/Karen%20Entwistle/))

Description Legislation requires the preservation of natural, built and movable heritage, but choices about what to keep often produce controversy and reveal starkly varying opinions about what is historic. From the choice of people commemorated in statues to modest buildings on the site of new developments, local communities and central governments are divided about whose past is protected and praised. The historian's investigation of places and objects is an important part of the formal assessment process and may be part of controversial debates. Parramatta has a rich selection of heritage places. How does heritage fit in a modern CBD? Site visits around the city will identify archaeological and architectural heritage to promote discussions, museums will showcase objects from the past, documents preserved in archives will offer insights and historical research techniques will help to answer the questions "What should be kept from the past?" and "Why should it be kept?"

HUMN 2036 Mangamai'bangawarra: Indigenous Science

Credit Points 10

Legacy Code 300959

Coordinator Sam Venables ([https://directory.westernsydney.edu.au/search/name/Sam Venables/](https://directory.westernsydney.edu.au/search/name/Sam%20Venables/))

Description This unit explores aspects of Aboriginal science and medical science in the treatment and prevention of illness. The unit has a particular focus on the knowledge of the local D'harawal People. The culture and history of Indigenous Australians is introduced to provide a contextual backdrop to the study of Indigenous medical remedies from eastern Australia, the deserts, and the tropics. To complement this study, Indigenous perspectives on the seasons, weather and land management will be studied.

School Science

Discipline Indigenous Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Assumed Knowledge

Equivalent to a basic understanding of Level 1 introductory biology and chemistry.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Contrast Indigenous and European methods of transmitting knowledge from generation to generation,

2. Consider Indigenous perspectives on culture and history, and appraise their integration into daily lives in areas such as the role of food sources in maintaining good health.
3. Identify the Indigenous seasons and the perspective on weather.
4. Evaluate the benefits of Indigenous methods of land management, including the roles of fire, conservation and sustainability.
5. Identify and evaluate the effects of common plant treatments in the desert, eastern Australia and the tropics.
6. Identify and evaluate the effects of common treatments based on animal and insect products.
7. Critically appraise the methods and underlying presumptions of modern pharmaceutical science in research on Indigenous medicinal treatments.

Subject Content

1. Introduction to Indigenous culture and history, with an emphasis on the Dharawal people.
2. The diversity of the Indigenous environment, focussing on the desert, eastern Australia and the tropics, and the role of seasons on those environments.
3. Indigenous relationship to the land and to sustainable land management and care.
4. Common plant treatments in the desert, eastern Australia and the tropics.
5. Treatments derived from animal products and insects.
6. The interaction of modern pharmaceutical science with Indigenous medical treatments.
7. The role of diet in maintaining good health in diverse environments (desert, eastern Australia and the tropics).

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Discussion Board Participation	N/A	10	N	Individual
Oral Communicative Exercise	3000 words	25	N	Group
Electronic Presentation	Max 10 minutes	25	N	Individual
Final Examination	2 hours	40	N	Individual

HUMN 2037 Peace-Making and Peace-Building

Credit Points 10

Legacy Code 101575

Coordinator Melissa Phillips ([https://directory.westernsydney.edu.au/search/name/Melissa Phillips/](https://directory.westernsydney.edu.au/search/name/Melissa%20Phillips/))

Description The concept of Peace is more than just an absence or cessation of conflict, but also the achievement of social justice and equitable standards of living. Humanitarian work/interventions in response to war and natural and human-made disasters that result in refugee crises are referred to as peace-making whilst the implementation of sustainable Community Development programs aimed at achieving the empowerment and improved standards of living for vulnerable groups is referred to as peace-building. This unit examines and critiques some of the strategies of peace-making and peace-building that have been adopted both within Australia and internationally.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the moral and philosophical issues of humanitarian intervention
2. Critically assess the justification of armed interventions
3. Describe issues of diplomacy and mediation in conflict resolution situations
4. Identify, examine and critique actions of the State, Business and Third Sectors during humanitarian crises and community development initiatives
5. Design a needs-based program related to peace making and peace building

Subject Content

- War, revolution and humanitarian intervention
- Social dilemmas; fundamental attribution error; evolving motives; communication; changing the pay-offs
- Competition; perceived injustice; misperception; shifting perceptions
- Contact; desegregation; friendship; equal-status contact
- Cooperation and peace; building cohesiveness; setting superordinate goals; improving attitudes; group and superordinate identities
- Bargaining; mediation; integrative agreements; controlled communications
- Arbitration; conciliation; the strategy and stages of GRIT; ?real world? applications of GRIT
- Mapping The ideological battleground: Doubts about humanitarian intervention and development ? moral and legal Theory. - Examining The UN peacekeeping mission (idea, practice and criticism)
- Redressing structural violence and reforming economy

HUMN 2038 Pigments of the Imagination

Credit Points 10

Legacy Code 101752

Coordinator Madison Shakespeare ([https://directory.westernsydney.edu.au/search/name/Madison Shakespeare/](https://directory.westernsydney.edu.au/search/name/Madison%20Shakespeare/))

Description This unit is available to all Undergraduate students who have open electives. Pigments of the Imagination challenges the accepted view that there is such a thing as 'race' based on skin colour and that identity is based on it. This unit will encourage students to consider their own definitions of race and explore the view that it is an imaginary concept. Students will examine the various ways race as an imaginary concept permeates our education practices and cultural representations influencing the construction of racially classified positions for Indigenous Australians as well as all Australians. Students will be encouraged, by critically analysing a range of cultural texts to re-imagine Indigenous and Non-Indigenous relations through flipped mode of delivery supported by face to face tutorials.

School Humanities & Comm Arts

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. explain how race is an imaginary concept and about power;
2. identify the various ways race as an imaginary concept permeates our education practices and cultural representations;
3. critically reflect on their own racialised position within Australian society;
4. critically analyse the way race as an imaginary concept has impacted the lives of Australia's first peoples and Indigenous and Non-Indigenous relations; and
5. explore new ways of thinking and speaking/writing about difference, which challenges old race stereotypes.

Subject Content

This subject will address some of the following:

What does 'race' mean, to whom, where and when?

The history of 'race'

The notion that meanings i.e. race meanings are historically and culturally contingent

The construction and perpetuation of race is about power Cultural politics and the practices of racialisation e.g. racialised identities, racialised relationships and racism

The politics of representations of 'the native', 'the primitive'

The 'real', 'the essentialist' and constructivist positions about race

What does 'strategic essentialism' mean and to whom?

The feminist conjuncturalist approach to race

The intersections of race, gender and nation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

Teaching Periods

HUMN 2039 Political Terror

Credit Points 10

Legacy Code 101797

Coordinator Brett Bowden ([https://directory.westernsydney.edu.au/search/name/Brett Bowden/](https://directory.westernsydney.edu.au/search/name/Brett%20Bowden/))

Description Since the terrorist attacks of 11 September, 2001, threats of terrorism have been entrenched in both headlines and the collective psyche. Across the globe, terrorism, anti-terrorism and the politics of fear are influential factors in the formulation of domestic and foreign policies. The current wave of terror and counter-terror raises important questions. What do we mean by terror? Is the war on terror really a war

like no other? Is the current terrorist threat unprecedented? This unit will examine historical precedents and theories of terrorism.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define terrorism and political violence
2. Understand the history of politically motivated terror tactics
3. Distinguish between different forms of political terror
4. Identify significant events and movements in the history of political terror

Subject Content

- A history of Terror
- Terrorism & political violence
- early modern Terror
- Tyrannicide
- French Revolutionary Terror
- Red & white Terror in Soviet Russia
- Authoritarian Terror
- Genocidal Terror
- Anarchist Terror
- national Liberation Terror
- Fundamentalist Terror
- Anti-Terror

Teaching Periods

HUMN 2040 Politics of Sex and Gender

Credit Points 10

Legacy Code 100882

Coordinator Penelope Rossiter ([https://directory.westernsydney.edu.au/search/name/Penelope Rossiter/](https://directory.westernsydney.edu.au/search/name/Penelope%20Rossiter/))

Description This unit provides an introduction to the study of the contemporary politics of sex and gender. Students study key concepts and learn to apply these concepts in the analysis of current issues. Concepts covered include the meanings of sex, gender and sexuality; biology and social constructionism; gendered bodies; doing gender; equality and difference. The concept of intersectionality - how gender intersects in complex relationships of power with other differences such as ethnicity, sexuality, dis/ability and class - is central to this area of study. The unit explores the meaning and potential for social change for a more equitable society and the obstacles to that. Strategies examined range from the use of targets and quotas, to social and cultural activism. Students have the opportunity to explore areas of personal and scholarly interest.

School Humanities & Comm Arts

Discipline Gender Specific Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects LGYB 0160 - Sex Gender and Social Relations

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain and apply key concepts used to analyse the politics of sex and gender
2. Undertake independent research on the politics of sex and gender
3. Assess the quality and relevance of academic research on a specific topic in this area of study
4. Effectively communicate the results of research in written formats

Subject Content

The meanings of sex, gender and sexualities
Biology and social constructionism
Gender and representation
Doing gender
Equality and difference
Intersectionality: living and researching multiple differences
Gender and politics: equality and representation
Equity and diversity: quotas, targets and other institutional strategies
Social and cultural activism and the politics of sex and gender

Teaching Periods

HUMN 2044 Representing Everyday Life in Literary and Visual Cultures

Credit Points 10

Legacy Code 101917

Coordinator Lorraine Sim ([https://directory.westernsydney.edu.au/search/name/Lorraine Sim/](https://directory.westernsydney.edu.au/search/name/Lorraine%20Sim/))

Description This unit explores how the realm of everyday life has been imagined and represented in a range of literary traditions and visual and media cultures. It examines what we understand by this concept, realist and experimental approaches to its representation, and how everyday life is shaped by various historical, social and cultural factors (e.g. technology, gender, class, war). With a focus on modern and contemporary texts and contexts, students will study primary works in relation to key theories of the everyday. Possible topics include: Victorian realism, Surrealism, stream of consciousness narration, social documentary photography, social realist cinema, postmodern narrative, blogs.

School Humanities & Comm Arts

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse ideas and representations of the ordinary/everyday in relation to specific literary and visual traditions and forms
2. Demonstrate a familiarity with some of the key theories of the everyday in cultural studies and how they can be applied to specific works of literature or visual media
3. Identify the relationship between concepts of the everyday and historical, social and cultural contexts
4. Build capacities in the close reading of literary and/or visual texts
5. Demonstrate skills in oral and written presentation, with a focus on writing skills and effective argument.

Subject Content

. Representations of the ordinary and everyday life in one or more literary genres (e.g. prose fiction, poetry, life writing) and visual media (e.g. photography, film, television)
. Definitions and theories of the everyday in relation to cultural formations and practices (e.g. Walter Benjamin, Surrealism, Henri

Lefebvre, Georg Lukacs, Roland Barthes, Ben Highmore, Rita Felski, Jean Baudrillard);
. Critical debates surrounding the (im)possibility of representing the everyday;
. The intersections between the everyday and modernity as related to the primary texts (e.g. spaces, technology, class, ethnicity, gender, war/terrorism, modes and technologies of representation);
. The close study of a select number (e.g. 4) of specific literary traditions and visual and media cultures in terms of their engagement with the subject matter of the everyday. Possible topics include:
- Victorian realism and series fiction
- Stream of consciousness narration
- The everyday and poetic tradition (e.g. Romanticism, Imagism, Objectivism)
- Postmodern narrative
- Blogs and other online media (Twitter, Facebook etc.)
- Surrealism
- Documentary photography
- social realist cinema (e.g. kitchen sink drama)
- Hyperrealism

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Summary	700 words	25	N	Individual

Teaching Periods

HUMN 2046 Researching Culture

Credit Points 10

Legacy Code 101906

Coordinator Penelope Rossiter ([https://directory.westernsydney.edu.au/search/name/Penelope Rossiter/](https://directory.westernsydney.edu.au/search/name/Penelope%20Rossiter/))

Description This unit introduces students to the diverse field of cultural research. It outlines and explains qualitative research methods and methodologies used by cultural researchers. Tutorials and assessment tasks involve 'hands-on' activities designed to familiarise students with the research process and research practices that explore taken-for-granted aspects of everyday life such as interviews, focus groups and observation based research; as well as sensory research, the use of diary methods, and the critically important ethical dimensions of social and cultural research. Through completion of this unit, students will gain critical literacies in creating and analysing a range of qualitative data.

School Humanities & Comm Arts

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) HUMN 1017 OR HUMN 1049

Restrictions Successful completion of 40 credit points including one of the pre-requisite subjects shown above.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain and appropriately utilise key methods used in cultural research
2. Critically discuss and evaluate cultural research projects
3. Demonstrate understanding of contemporary debates about the practice and ethics of cultural research

Subject Content

- Introduction to cultural research
- Exploring experience: conceptual and ethical issues
- Interviews
- Focus Groups
- Observation based research
- Sensory research
- Conversation analysis
- Researching material culture

Assessment

HUMN 2048 Revaluing Indigenous Economics (Day Mode)

Credit Points 10

Legacy Code 101753

Coordinator Madison Shakespeare ([https://directory.westernsydney.edu.au/search/name/Madison Shakespeare/](https://directory.westernsydney.edu.au/search/name/Madison%20Shakespeare/))

Description Revaluing Indigenous Economics will examine Australia's Indigenous economy and its dynamics. It will challenge students to reflect on the significant contribution Indigenous Australians have made and continue to make to our growing economy. It will also challenge students to rethink the politics of the welfare economy as it relates to Indigenous Australians. Students will be introduced to a number of enterprise development case studies for example, The Arts, Mining and Land Development, Tourism and the Environment, Sports and Small Business.

School Humanities & Comm Arts

Discipline Indigenous Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. explain the foundations and structures of Indigenous Australian economies;
2. identify key issues and challenges impacting Indigenous peoples' business success;
3. investigate the significant contribution Indigenous people have and continue to make to the Australian;
4. discuss Indigenous peoples' participation in the mainstream Australian economy.

Subject Content

Overview of foundations and structures of Indigenous economies e.g. trade and trade routes; importance of land for Indigenous people, ceremonial practices and caring for country? The impact of invasion and colonisation by the British and Indigenous displacement and dispossession from country? Government policies and the management of Indigenous lives Politics of welfare dependence

Politics of stolen wages and unpaid work
 Indigenous contemporary contribution to the Australian economy ?
 The Arts, Tourism and the Environment, Mining and Land Development,
 Community Services and Enterprises, Voluntary Community Work
 rebutting the myths and stereotypes about Indigenous people

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 2050 Social Research Methods (Block Mode)

Credit Points 10

Legacy Code 101767

Coordinator Jane Mears ([https://directory.westernsydney.edu.au/search/name/Jane Mears/](https://directory.westernsydney.edu.au/search/name/Jane%20Mears/))

Description In this unit students are introduced to the research process and different approaches to research. Key research themes and concepts are examined, and students learn methods and techniques for gathering, analysing, and interpreting research data. The ethical and practical implications of research and the use of research results are discussed. Indigenous research issues are addressed, particularly for research with Aboriginal and Torres Strait Islander participants and communities.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects HUMN 2049 - Social Research Methods LGYA 7650 - Research and the Human Services (AREPMETRO)

Restrictions Students must be enrolled in 1689 Bachelor of Community and Social Development and must have successfully completed 60 credit points including subject 101763 - Understanding Society (Block Mode).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Review research literature as a first step in the research process;
2. Identify issues to be considered at each stage of the research process for both qualitative and quantitative research;
3. Identify and explain key research themes and concepts;
4. Apply research knowledge and skills to design a small scale research project;
5. Apply research knowledge and skills to conduct a small scale research project, and analyse and interpret the results;

6. Recognise and act to address issues in research with Aboriginal and Torres Strait Islander participants and communities.

Subject Content

- Approaches to research: key themes and concepts (e.g., epistemology, ontology, axiology; variability and measurement; reliability and validity; correlation and causation)
- methods and methodology: Qualitative, quantitative, mixed methods
- designing research: literature Review, theoretical framework, questions and hypotheses, methodology, data collection, data analysis and interpretation
- research ethics
- Sampling
- Qualitative interviews; qualitative designs
- survey methodology and questionnaire design
- Analysing Qualitative data
- Analysing quantitative data (statistical analysis and analysis software)
- Reporting research
- indigenous research Issues, particularly for research with Aboriginal and Torres Strait Islander participants and communities.

HUMN 2056 The Racial State

Credit Points 10

Legacy Code 101990

Coordinator Alana Lentin ([https://directory.westernsydney.edu.au/search/name/Alana Lentin/](https://directory.westernsydney.edu.au/search/name/Alana%20Lentin/))

Description Racism is often thought of as both primordial and pathological. Racist states, such as Apartheid South Africa or Nazi Germany, are usually considered to be exceptions rather than the rule and mainly a thing of the past. This unit examines the ways in which, despite the challenge to racism, race remains a fundamental organising idea in modern western states, one that has a direct affect on our everyday realities. We will examine how race is reproduced through politics, culture, socialisation and economic structures. We will consider the effects this has on individual and societal lived experience in complex post-immigration, postcolonial societies.

School Humanities & Comm Arts

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects HUMN 2063 - New Ethnicities Old Racisms

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the relationship between concepts of race and racism, state power and individual experience.
2. Apply key theoretical analyses to their understanding of race as 'lived experience'.
3. Critically evaluate the relationship between institutional apparatuses and public cultures within which racist ideas are expressed.
4. Present ideas in a clear and well-constructed manner through seminar discussions and debates.
5. Work interactively using online methods of communication to plan projects and get feedback from student peers
6. Work collaboratively in the design and conduct of a small-scale research project.

Subject Content

- introduction: busting The myths of race?
- what is race, what is racism?
- Whose Country? race and The colonial experience
- mobility and change
- institutional and systemic racism
- race, gender and sexuality
- 'Policing the Crisis
- Abolitionist visions
- Islamophobia
- race, digital Technology and social media

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Level Undergraduate Level 2 subject

Equivalent Subjects HUMN 1046 - Tourism in Society (UWSC) LGYA 1264 - Tourism in Contemporary Society LGYB 8188 - Tourism Issues and Change

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Summarize the various theoretical platforms used in a socio-cultural study of tourism (eg theories of authenticity, modernity/post-modernity, globalisation, identity etc.)
2. Describe the relationships between tourism and the content areas under study (eg commodity culture, visual culture, media culture etc.)
3. Apply theoretical understandings to contemporary tourism issues
4. Demonstrate an understanding of the key concepts taught in this unit

Subject Content

Tourism and contemporary society: an introduction
 Desire, the 'dream of difference' and journeying to 'otherness'
 Tourism and the question of authenticity
 Tourist attractions as a socio-cultural process
 Tourism and visual culture: the tourist gaze
 Commodification, commodity culture and tourism
 Media cultures and tourism (Print, TV, Film, Digital)
 Tourism and developing countries ? selected case-studies
 Diaspora, multi-culturalism, postcoloniality and tourism
 Tourism and international politics (e.g. natural and human disasters, war, terrorism, diseases and climate change)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 2058 Urban Life/Urban Culture

Credit Points 10

Legacy Code 100291

Coordinator George Morgan ([https://directory.westernsydney.edu.au/search/name/George Morgan/](https://directory.westernsydney.edu.au/search/name/George%20Morgan/))

Description Big cities can be frantic, difficult, polluted and often dangerous places in which to live. Yet cities also contain possibilities for social and cultural stimulation not available elsewhere. This unit traces the origins and development of modern cities in all of their complexity. It looks at how industrial cities emerged in Europe

and Australia, and at the threat that uncontrolled urban growth posed to social order. We examine the conditions of urban life that promote alienation and anonymity, and how people overcome social fragmentation. There is discussion of modern cities - from those that sprawl, like Sydney, to the relatively compact and dense centres of Europe, the north-eastern United States and Asia. We look at the gendered nature of public space, and how class and ethnic tensions are played out in cities. Students read a range of texts on urban culture and society. These include classic works by writers like Friedrich Engels, George Simmel and Walter Benjamin, to the contemporary work of David Harvey, Richard Sennet and Mike Davis.

School Humanities & Comm Arts

Discipline Philosophy

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. describe the processes by which early industrial cities were formed;
2. evaluate the public and political responses to social tensions and inequalities in these cities;
3. analyse the forces that promote urban redevelopment and associated social and political reform;
4. evaluate the motivations behind, and consequences of, urban ethnographic writing and reportage in late nineteenth century Britain and Australia;
5. explain how and why suburbanised low density cities (particularly Sydney) emerged in the period after World War II; and
6. assess how social identities are influenced by urban forms - size, density, zoning practices, division of labour.

Subject Content

Growth of cities in early industrial England
 Revolution and Rebuilding in Paris - the legacy of Haussman
 Henry Mayhew and the London Poor
 The Slum Clearance movement in Britain and Australia
 Modernism, Town Planning and the cultivation of social order
 Sydney and the suburbs
 Urban Disorders, Moral Panics and Defensible Space - From Sydney to Los Angeles
 Gender and Public Space

HUMN 2061 Women with Muslim Identity

Credit Points 10

Legacy Code 101879

Coordinator Jan Ali ([https://directory.westernsydney.edu.au/search/name/Jan Ali/](https://directory.westernsydney.edu.au/search/name/Jan%20Ali/))

Description An exploration of perceptions of Muslim women and of the meaning and significance of Muslim identity for women today. Students will analyse ways in which Muslim women perceive themselves and are perceived by others in the context of contemporary Islamic revivalism, focussing on differences and relationships among various outsider's and insider's perceptions. A central focus will be the resurgence of the veil in the context of contemporary Islamic revivalism; Students will explore the meanings of veiling in the context of discussions and debates on the role of women, equality and freedom, cultural diversity, religious values and secularity.

School Humanities & Comm Arts

Discipline Gender Specific Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. describe and analyse cross-cultural perceptions of Muslim women
2. describe and analyse experiences of contemporary Muslim women
3. apply these analyses within discussions of diverse conceptions of freedom and agency, modernity and religion, and women's roles
4. engage in intellectual debate and dialogue on these issues

Subject Content

- . analysis of cross-cultural perceptions of Muslim women
- . social analysis of the resurgence of the veil in the context of contemporary Islamic revivalism
- . social analysis of the role of women in Islam
- . analysis of experiences and self-understandings of some contemporary Muslim women
- . analysis of diverse conceptions of freedom and agency
- . analysis of diverse conceptions of modernity, secularity, and religion
- . analysis of diverse conceptions of women's roles, women's equality and difference

Assessment

Teaching Periods

HUMN 2062 Youth Cultures and Moral Panics

Credit Points 10

Legacy Code 100298

Coordinator George Morgan ([https://directory.westernsydney.edu.au/search/name/George Morgan/](https://directory.westernsydney.edu.au/search/name/George%20Morgan/))

Description Young people have long been the focus of social fears. Public figures regularly express concern about the disorder created by unruly youths, or the effects of change on young people. This is the case in relation to popular music, 'youth gangs', new technologies and other areas. This unit will consider how young people became defined as a problem by politicians, policy, the media and others. Resulting 'moral panics' represent social anxieties around economic, social and technological change, producing calls for 'solutions' which often entail repressive laws or policing. Students will examine a range of case studies from Australia and elsewhere.

School Humanities & Comm Arts

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Assumed Knowledge

Satisfactory understanding of key issues and concepts of first year core subjects.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. understand the nature and formation of moral panics
2. describe and explain the key features and concepts of subculture theory
3. investigate the emergence of the category of youth in public discourse
4. examine the role of the media in amplifying public insecurities around youth and in identifying 'folk devils'
5. assess the social and economic roots of disorder among young people
6. consider the connections between social anxieties, governance, policing and media coverage of youth cultures and disorder
7. evaluate the connections between youth, ethnicity, class and gender in representations of youth in contemporary Australia

Subject Content

- . Social contexts of youth cultures and moral panics - industrialisation, migration, consumer society and urbanisation
- . Social dimensions of youth cultures and moral panics - relations of class, gender and race/ethnicity
- . Moral panic theory, risk and social anxiety
- . Theories of youth culture and subcultures
- . Media reporting and policing of 'problem youth' in contemporary Australia
- . Case studies of youth cultures and moral panics

HUMN 2064 Responses to Disaster: School of Social Sciences Winter School

Credit Points 10

Legacy Code 102790

Coordinator Kathleen Openshaw ([https://directory.westernsydney.edu.au/search/name/Kathleen Openshaw/](https://directory.westernsydney.edu.au/search/name/Kathleen%20Openshaw/))

Description This elective unit, focused on "responses to disaster", is applicable to all undergraduate degree programs with an elective component in the School of Social Sciences. Students will undertake a 14-day international field trip where they will be immersed in a rich intercultural learning and student-centred environment. Students are given the opportunity to apply their discipline specific skills and knowledge in understanding how natural disasters impact various facets of a local community, and how these are managed in a real-world setting. Students must have a medical clearance letter and

any requisite vaccinations. They should provide this letter to the Unit Coordinator prior to enrolment and departure.

School Social Sciences

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Restrictions ? Students must be enrolled in one of the following programs: 1664 Bachelor of Tourism Management 1665 Bachelor of Community Welfare 1666 Bachelor of Social Work 1667 Bachelor of Social Science 1709 Bachelor of Criminal and Community Justice 1710 Bachelor of Criminology 1713 Bachelor of Criminal and Community Justice/Bachelor of Social Work 1732 Bachelor of Planning 1733 Bachelor of Social Science (Advanced) 1734 Bachelor of Policing (Leadership Program) 1735 Bachelor of Humanitarian and Development Studies 1790 Bachelor of Anthropology 1837 Bachelor of Cyber Security and Behaviour 1844 Bachelor of Policing 6023 Diploma in Social Science/Bachelor of Social Science 6025 Diploma in Criminal and Community Justice/Bachelor of Criminal and Community Justice 6027 Diploma in Social Science/Bachelor of Humanitarian and Development Studies 6030 Diploma in Social Science/Bachelor of Tourism Management 6044 Diploma in Social Science (Policing)/Bachelor of Policing ? Students must have achieved a minimum GPA of 5 in order to enrol. ? Students must have completed 80 credit points of study. ? Students must have a medical clearance letter from their GP, and the appropriate vaccinations. They should provide this proof to the subject Coordinator prior to enrolment and departure.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the impacts of, and local strategies to manage, natural disasters across different facets of community life using an evidence-based approach.
2. Identify the relationships between local and global processes through the lens of responses to disaster.
3. Apply intercultural competence and critical reflexivity in a cross-cultural collaborative setting.
4. Disseminate learning and information in various formats and to different audiences.

Subject Content

1. How to prepare for cross-cultural collaboration (in an Indonesian context).
2. The ethics and politics of working in a disaster context.
3. How to understand and apply local responses to disaster through different disciplinary lenses.
4. How to consolidate and disseminate intercultural learning.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 2065 Self and Society

Credit Points 10

Legacy Code 102788

Coordinator Helena Onnudottir ([https://directory.westernsydney.edu.au/search/name/Helena Onnudottir/](https://directory.westernsydney.edu.au/search/name/Helena%20Onnudottir/))

Description This core theory unit for sociology majors introduces students to traditional and contemporary debates in social thought and provides tools for sociological analysis. The unit outlines the development of sociological thought in the context of changing social realities and relations between the individual and society, with a particular focus on the formation of the Self. A number of theorists and theoretical areas are addressed, spanning over 150 years of evolving sociological analysis. This enables students to better grasp the relation between theory and application, the diversity of sociological analysis, as well as providing the capacity to think across a number of different sociological schools of thought.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Incompatible Subjects HUMN 3071 - Self and Society

Restrictions Successful completion of 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe traditional and contemporary sociological debates on the formation of the self.
2. Outline the notion of agency, and critically evaluate the relations between the individual and society.
3. Apply major theories and theorists in sociology and social thought.
4. Demonstrate a critical, reflexive stance on classical and contemporary sociology in written form.
5. Analyse a real-life social issue through a sociological lens.
6. Compare and contrast different schools of sociological thinking.

Subject Content

Introduction: Relation between the Self and Society
 Classical sociologists: from Tradition to Modernity
 Modernity 2: Late, Post- and Liquid Modernity
 Consciousness and Identity
 Values and Critical Theory: The Critique of Instrumental Reasoning and Reification
 Value Freedom, Value Relevance and Political Commitment in Sociology
 The Political Value Commitments of Sociologists and the Philosophical Justification
 The Sociological Imagination and Civic Ethno methods
 The Sociological Imagination and Political Strategy
 'Key Sociological Thinkers'

Assessment

HUMN 2066 Investigating and Communicating Social Problems

Credit Points 10

Legacy Code 102816

Coordinator Rowena Butland ([https://directory.westernsydney.edu.au/search/name/Rowena Butland/](https://directory.westernsydney.edu.au/search/name/Rowena%20Butland/))

Description This unit builds interdisciplinary social science skills to investigate and engage with social challenges that impact contemporary society. Students are introduced to the methods and principles of research for community consultation, strengths assessment and capacity building. Data literacy skills will be developed, with a focus on understanding and creating qualitative and quantitative data and how they are used within contemporary society. Students will be asked to investigate and intervene in social challenges

using ethical and evidence-based analyses. The unit is aimed to suit students who are pursuing either a research or occupational trajectory and assessments are tailored to discipline-appropriate learning.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects HUMN 2049 - Social Research Methods

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss contemporary social challenges and the role of research in taking affirmative action.
2. Develop data literacy skills within the contexts of social research, professional practice, and engaged citizenship.
3. Explain how quantitative and qualitative data are used by various elements of society.
4. Address issues surrounding bias and misinformation regarding social issues.
5. Apply problem solving skills using both written and verbal forms of communication.

Subject Content

Contemporary social issues and challenges within the community

Data literacy for social and professional practice

Bias and misinformation in contemporary society

Numerical Literacy

Data collection and analysis for community consultation and capacity building

Community strengths and needs assessment

HUMN 2067 History of the Ancient World

Credit Points 10

Legacy Code 102814

Coordinator Gregory Barton ([https://directory.westernsydney.edu.au/search/name/Gregory Barton/](https://directory.westernsydney.edu.au/search/name/Gregory%20Barton/))

Description Students explore the rise and fall of major civilizations in the ancient world. The unit surveys empires from Europe to East Asia. The unit surveys the transition from hunter gatherers to the age of agriculture and the rise of city states, and vast empires with far-flung trading networks. It also looks at the impact of ancient pandemics, technology and alcohol, mythology, religion and philosophical ideas. The unit allows students to explore how ideas of nature and spirituality defined imperial power centres and how these empires in turn drove trade and created vast cultural zones that still impact the world today.

Students will read and respond to the voices of the past and forge their own interpretation of the broad outline of the ancient world.

School Humanities & Comm Arts

Discipline History

HUMN 2068 Cultures of Southeast Asia and Oceania

Credit Points 10

Legacy Code 102843

Coordinator Ute Eickelkamp ([https://directory.westernsydney.edu.au/search/name/Ute Eickelkamp/](https://directory.westernsydney.edu.au/search/name/Ute%20Eickelkamp/))

Description This unit will introduce students to ethnographic field study through a close examination of two regions with which Australia is geographically and politically aligned; Oceania (the Pacific Islands) and South-east Asia. Drawing upon classic and contemporary ethnography the unit will provide opportunities for comparative and trans-historical studies of how cultures in these regions have been constructed and changed in relation to larger global dynamics. The unit will also provide an insight into the ways in which social theory is developed in the context of attempts to explain and interpret cultural difference. Key topics of study, explored through case studies, will include the colonial experience, tradition and modernities, nations and nationalism, transnationalism, religion, social conflict, and material cultures. The unit will include a close study of visual and virtual research methodologies.

School Social Sciences

Discipline Anthropology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects HUMN 2024 - Ethnographies of Southeast Asia and the Pacific

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply anthropological concepts to the description of cultural diversity in Southeast Asia and the Pacific islands.
2. Analyse some of the ways symbolic cultures and traditions are influenced by political, material and environmental factors.
3. Draw upon ethnographic case studies to explain regional similarities and differences.
4. Apply anthropological theories to case studies about cultural change.
5. Analyse some ways visual anthropology (film, photography) can effectively aid in the description of cultural phenomena.

Subject Content

The peoples of Southeast Asia and Oceania.
The Pacific Islands and Southeast Asia in the colonial imagination.
Melanesian and Polynesian anthropologies.
Chiefs and Big Men ? governance and tradition.
Gifts, symbols and material culture.
Anthropologies of Southeast Asia: Indonesia and Thailand.
The village, the nation and nationalism in Indonesia, Thailand and Malaysia.
Global interventions: the IMF, the World Bank and INGOs in Cambodia, Indonesia, and Laos.
Commodifying culture ? Southeast Asia and Oceania as tourist destinations.
Australia in the Region.
Climate change, food security and other contemporary challenges in the region.

HUMN 2069 Society, Culture and Human Diversity

Credit Points 10

Legacy Code 102844

Coordinator Malini Sur ([https://directory.westernsydney.edu.au/search/name/Malini Sur/](https://directory.westernsydney.edu.au/search/name/Malini%20Sur/))

Description In this unit students will conduct comparative studies of how people create a living and make meaning of their everyday experiences in various contemporary contexts. By using cultural diversity as an analytical lens, students will engage with the broader questions about what it means to be human, how cultures change

and adapt and how studies of human diversity can provide answers to many of the challenges of the future. Through case studies, critical analyses and self-reflection students will also examine how key unit themes such as cultural competence, ethnographic inquiry and comparativism are applied in anthropology and other key employment areas for social science and humanities graduates.

School Social Sciences

Discipline Anthropology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects HUMN 2012 - Anthropologies of the Everyday

Restrictions Successful completion of 40 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply anthropological concepts to the comparative study of contemporary social and cultural phenomena.
2. Analyse how everyday social behaviour and practice are shaped by cultural factors.
3. Articulate some ways that studying everyday cultural expressions and experiences may help us develop cultural competence.
4. Evaluate the concept of **ecultural diversity** through self-reflection.
5. Apply anthropological theories to case studies.
6. Utilise basic observational techniques in order to study aspects of cultural diversity.

Subject Content

Cultural competence through comparative studies.

Belonging and homemaking; space and place.

Everyday communication.

Work, production and exchange.

Childhood and schooling.

Love and friendship.

Food as a cultural entity.

Understanding the human body/embodyed experiences.

Understanding violence, illness and death.

Human/animal relations.

Conspicuous consumption.

Human/technology relations.

HUMN 2070 First Peoples and Criminal Justice

Credit Points 10

Legacy Code 102916

Coordinator Robyn Newitt ([https://directory.westernsydney.edu.au/search/name/Robyn Newitt/](https://directory.westernsydney.edu.au/search/name/Robyn%20Newitt/))

Description How does colonialism underscore the foundational narratives, knowledges and operation of the legal and criminal justice institutions of colonised nations? Focusing primarily on the Australian context of colonial invasion and settlement, this unit explores the plight of Indigenous peoples and their severe over-representation in the Australian criminal justice system. Studying the impact of colonisation and exploring Indigenous narratives, students will critically examine issues faced by Aboriginal and/or Torres Strait Islander people and their experience of criminal justice in Australia. Overall, the unit will equip students with an understanding of the relationship between dominant colonial narratives of race and institutional racism, while considering how Indigenous knowledge can inform better social and criminal justice outcomes for Indigenous populations. Comparative examples of criminal (in)justice for Indigenous populations in other colonised nations will also be considered.

School Social Sciences

Discipline Indigenous Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects CULT 2019 - First Peoples and Criminal Justice

Incompatible Subjects WELF 2008 - Human Rights Human Services and the Law

Restrictions Successful completion of 40 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand the enduring social and criminal justice impact of colonisation on Indigenous populations.
2. Develop a critical appreciation of the colonial underpinnings of our legal and criminal justice systems and the notion of institutional racism.
3. Demonstrate a robust understanding of intersectional disadvantage as it impacts Australia's First Peoples.
4. Apply decolonial and critical postcolonial texts and knowledges to contemporary criminal justice interventions.

Subject Content

Invasion and settlement: the history of colonisation in Australia
Colonialism, racialisation and criminalisation of Indigenous peoples
Liberalism and the imposition of white man's law

The 'welfare' state, protectionism and Stolen Generations
 The legacies of colonialism: are we post-colonial?
 Contemporary social and criminal justice issues affecting remote and urban Indigenous populations in Australia:
 - Intersectional disadvantages affecting Indigenous populations: race, gender, class, disability
 - Institutional racism and over-intervention
 - Over-policing and deaths in custody
 - Indigenous over-representation in prisons
 Decolonising criminal justice: Indigenous knowledges informing social and criminal justice outcomes

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

Coordinator Zulfan Tadjoeeddin ([https://directory.westernsydney.edu.au/search/name/Zulfan Tadjoeeddin/](https://directory.westernsydney.edu.au/search/name/Zulfan%20Tadjoeeddin/))

Description The key tenet of this unit is the belief that there are superior alternatives to violence for peace building. Holistic development (including socio-cultural, political, economic, governance, etc.) provides the best and most constructive alternatives to violence. The unit examines different alternatives to violence within the broader context of peace and development studies. Students will be equipped with theoretical approaches to alternatives to violence and an ability to evaluate and apply those alternatives in social development contexts.

School Social Sciences

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 80 credit points or subject 101573 Human Rights, Peace and Development.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate key theoretical approaches to alternatives to violence, non-violence and social change
2. Evaluate the logic and merit of different alternatives to violence and how those alternatives work
3. Apply different alternatives to violence to social development issues

Subject Content

Violence, non-violence, conflict and development
Conflict management, resolution and transformation
Religion and ethnicity

Conflict, natural resources and the environment
On structural violence: Poverty, inequality, marginalization and exclusion

Alternatives to violence (1): Democracy and political development
Alternatives to violence (2): Socio-economic development
Alternatives to violence (3): Civil society and participation
Social change and conflict
Social movements or rebellion?
Non-violence in action

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

HUMN 3011 An Introduction to Contemporary Aboriginal Australia

Credit Points 10

Legacy Code 401242

Coordinator [Glenda Mcdonald \(https://directory.westernsydney.edu.au/search/name/Glenda Mcdonald/\)](https://directory.westernsydney.edu.au/search/name/Glenda%20Mcdonald/)

Description This unit introduces the perspectives of Aboriginal people and communities and explores both diverse and unifying aspects of Aboriginal cultures. The unit is informed by a theoretical model of developing cultural competence - cultural knowledge, cultural awareness, cultural skills, cultural encounter and cultural desire (Campinha-Bacote, 2011). To maximize their learning, students will experience an 'on-country' field trip facilitated by Aboriginal Elders. The unit will interest anyone wishing to develop personal and organisational cultural competence related to Aboriginal Australia, extend their understanding of past and contemporary issues relating to Aboriginal people and communities and promote understanding of the intergenerational impacts of the past experiences of Aboriginal people and their communities.

School Nursing & Midwifery

Discipline Indigenous Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse contemporary cultural issues in Aboriginal Australia.
2. Apply newly acquired knowledge to their professional practice,
3. Critically reflect on a transformative learning experience in the development of cultural competence related to Aboriginal Australia.
4. Describe the influence of history, politics and economics on the health of Aboriginal Australians today.

5. Identify workplace strategies and practices which facilitate the improvement of the delivery of culturally competent professional practice.
6. Apply the cultural respect, cultural competence and Communication Framework within a professional capacity in relation to Aboriginal Peoples.
7. Apply theoretical concepts of assessment, communication and decision-making from student's own disciplinary perspective to work with Aboriginal communities.

Subject Content

Three topic areas;

1. History of Aboriginal Australia 1787 - Historical periods of interaction between colonisers and Australian Aboriginal people. The period of colonisation from first contact to mid 1850s. The period of protection from mid 1850s to mid 20th century. The period of activism from mid 20th century onwards
2. Aboriginal Culture: A living culture - How cultural values and practices have continued and grown since colonisation. Values include the Dreaming, spirituality, connection to country, social organisation. Practices include stories/songs/dance/art, lore and law, traditional medicine, and rituals associated with births, deaths and marriages.
3. Aboriginal Australia in the Future: Where to from here? - Where to from here includes current state of land rights, activism, election of Aboriginal women to parliament, contemporary advocates (eg. Stan Grant), rise of media in Aboriginal affairs (eg. NITV)

Teaching Periods

HUMN 3012 Applied Indigenous Research Project

Credit Points 10

Legacy Code 102310

Coordinator [Kaiya Aboagye \(https://directory.westernsydney.edu.au/search/name/Kaiya Aboagye/\)](https://directory.westernsydney.edu.au/search/name/Kaiya%20Aboagye/)

Description In this unit students will undertake a guided personal inquiry project. Students will investigate and reflect on the practical, cultural and ethical complexities of being an Indigenous researcher. Students will examine ethics guidelines for research with Indigenous peoples and the realities of applying them in practice. They will study examples of Indigenous research scholarship to develop and present their own Statement of Research Philosophy.

School Social Sciences

Discipline Indigenous Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) HUMN 2050

Equivalent Subjects LGYA 1682 - Rethinking Research with Indigenous Australians Independent Study project (Block Mode) HUMN 3070 - Rethinking Research with Indigenous Australians Independent Study project (Day Mode)

Restrictions Students must be enrolled in the Bachelor of Community and Social Development (BCSD) program. Students must have successfully completed 60 credit points of study.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the experiences of research of an Indigenous scholar;
2. Undertake a guided personal inquiry research project;
3. Create an individual statement of research philosophy;
4. Demonstrate presentation skills to describe and reflect on statement of research philosophy.

Subject Content

Self-reflective research methods for example personal inquiry, autoethnography

Ethics protocols and guidelines relating to Aboriginal and Torres Strait Islander peoples

Learning from experiences of Indigenous researchers

Complexities (practical, cultural and ethical) of being an Indigenous researcher

Indigenous methodologies and methods

Researcher approach and philosophy towards research

Legacy Code 102004

Coordinator Carol Liston ([https://directory.westernsydney.edu.au/search/name/Carol Liston/](https://directory.westernsydney.edu.au/search/name/Carol%20Liston/))

Description This unit introduces students to the 18th and 19th century foundations of modern Australia, and to the social, economic, political and cultural events that shaped Australian history. Students will be encouraged to consider the process of historical change within an historiographical framework and will use primary sources to explore some of these debates. Some of the themes explored will be colonisation, convictism, class, urbanisation, gender, land, indigenous society, culture and political developments leading to the federation of the Australian colonies in 1901.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects HUMN 1019 - Foundations of Modern Australia
HUMN 3014 - Australian History 1860-1920

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate the skills necessary for an analytical approach to historical documents
2. Use skills of analysis, synthesis and fluid expression in oral and written presentation
3. Describe the various personalities, developments and forces- social, economic, legal, political, geographical and religious- responsible for shaping Australian society in the colonial period.
4. Evaluate historical events through the use of primary sources.

Subject Content

Topics will be chosen from the following:

- European-Aboriginal relations
- British motives for occupation: gaol, trading post or strategic colony?
- Convict Australia: The Convict system and its Legacy
- Geographical expansion: land policies, pastoralism, rural settlements, immigration
- political and constitutional Developments
- cultural and social life: education, religion, art and literature, welfare
- Late 19th-century Australian cities and urbanisation
- immigration
- economic and technological change, such as mining, railways
- colonial politics and The emergence of The Federal movement
- Employment - work in the cities, work in the country; women and work
- The labour movement
- developing/changing attitudes to race, class, gender and social reform/politics
- development of Australian identity through social change, cultural development and recreation

Teaching Periods

HUMN 3015 Australian History Around Us

Credit Points 10

Legacy Code 102516

Coordinator Helen Bones (<https://directory.westernsydney.edu.au/search/name/Helen+Bones/>)

Description Historians are detectives, searching for clues and unravelling the puzzles of the past. A walk down your local street holds many clues about the history of a local area - from the name of the street, the architecture of the buildings, the trees planted by the road, even the new building that indicates a recent change. Local studies are used as the foundation for socio-economic studies across many disciplines while an understanding of local history contributes to establishing personal and community identities. In this unit students will learn research skills to uncover the lives of people from the past, re-imagine familiar places and consider events long forgotten that happened in the streets of their suburbs. The final assignment is a chance to turn these discoveries into a new history for their community.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects HUMN 3038 - Exploring Local History

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Locate historical sources about Australian places
2. Interpret historical sources relating to a particular locality
3. Research people, places and events in the past
4. Explain the historical processes shaping the development of localities
5. Integrate a variety of historical resources into a historical narrative

Subject Content

Local history and national histories

Family history and community history

Observing signs of the past ?walking the streets, wandering the cemeteries

Hearing the past ? using oral histories

Investigating local history ?public records; maps and photographs

Using digital records ? tracing people and places

Investigating communities in the past ? getting around; earning a living; living locally - education, religion, sport and entertainment

Retrieving hidden or forgotten pasts

Telling the story - writing and exhibiting local history

Assessment

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 0953 - Australian History Since 1920 LGYB 4929 - Australian History Since 1920

Restrictions Successful completion of 60 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. To give students the background needed to make them perceptive and critical observers of contemporary Australian society and politics;
2. To present the major issues of political conflict in Australia over the last sixty years;
3. To encourage students to analyse the class interests in various conflicts;
4. To encourage students to develop an awareness of Australia's role in international affairs as it has developed since 1920;
5. To provide students with an overview of themes in recent Australian history, especially as they relate to issues of Australian identity;
6. To encourage students to further incorporate primary sources in their studies of Australian history and to develop skills that will make this possible.

Subject Content

Popular culture in the 1920s and 1930s

D.H. Lawrence, Kangaroo
 The Great Depression- economic, social and political issues
 Kylie Tennant's The Battlers
 Foreign policy in the 1930s
 World War Two- military and homefront issues
 The 1949 coal strike
 The Labor Split
 The Cold War
 The Petrov Affair
 Immigration and suburbanisation
 Aboriginal Issues
 The Swinging Sixties and 1970s radicalism
 The Whitlam dismissal
 The New Right
 The New Labor Right
 Rupert Murdoch and Super League

Teaching Periods

HUMN 3017 Australian Indigenous History from Federation to Reconciliation

Credit Points 10

Legacy Code 101872

Coordinator Timothy Rowse ([https://directory.westernsydney.edu.au/search/name/Timothy Rowse/](https://directory.westernsydney.edu.au/search/name/Timothy%20Rowse/))

Description This unit aims to explore the history of the relationship between Indigenous and non-Indigenous Australians from Federation (1901) to the present. At the beginning of the twentieth century, Australia became a nation without paying much attention to the first Australians. It was widely assumed that they would die out or at least remain an insignificant welfare problem. Instead, these first Australians survived and grew as a minority population; they also increasingly made themselves heard as a people - so successfully that in 2008 the Parliament of Australia felt obliged formally to apologise for their years of mistreatment. This unit highlights two stories: the non-Indigenous transition from complacency to engagement, and the survival and increasing political effectiveness of the descendants of Australia's first peoples.

School Humanities & Comm Arts

Discipline Indigenous Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. describe and date the principal changes in public policy towards Aborigines over the period 1901-2010
2. identify the regional diversity of colonial structures and of Indigenous Australian's experiences

3. contextually interpret primary sources
4. critically appraise historical controversy

Subject Content

- . The political, constitutional and economic position of Indigenous Australians in 1901
- . Queensland's 1897- early 1920s
- . The ideology and practice of 'protection'
- . The rise of Aboriginal critics
- . Torres Strait: industry and ethnic difference
- . 1937 - the impossibility of a national policy
- . Aborigines and TSIs in World War Two - a new deal?
- . Assimilation in theory and practice
- . Indigenous responses to assimilation
- . The 1967 referendum
- . Inclusion of Aborigines and TSIs in welfare state
- . Land rights
- . Remembering and debating 'the Stolen Generations'
- . How the High Court rewrote Australian history
- . The contested meanings of 'reconciliation'

Coordinator Timothy Rowse ([https://directory.westernsydney.edu.au/search/name/Timothy Rowse/](https://directory.westernsydney.edu.au/search/name/Timothy%20Rowse/))

Description Until 1788, Australia was peopled by those who we now call Aborigines. Then Europeans arrived and began to spread across the continent, displacing and marginalising the Aborigines. This unit will tell the stories of that transformation, beginning with an account of the ideas and motivations of British authority in the late eighteenth century and concluding at the moment when six British colonies formed a federated nation. Topics to be covered will include: violence, humanitarianism, Christian missions, institutional authority. The course will emphasise and explain regional and temporal differences in the ways that Indigenous and non-Indigenous interacted. Students will study primary sources and learn to understand them in context.

Discipline Indigenous Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 1557 - Australian Indigenous History

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the key theoretical concepts relevant to understanding Australia as a settler-colonial society.
2. Examine the geographically variable impact of colonisation and thus of Indigenous responses.
3. Describe the different phases and methods of colonial authority and Indigenous response.
4. Explain the persistence of a self-conscious Indigenous minority and of controversy about its entitlements
5. Analyse primary documents in order to understand the perspectives of government policies and social changes.
6. Evaluate the effects of colonising authority, against the stated aims of such authority
7. Apply historical approaches to identity formation to current debates about Australian society and history.

Subject Content

- . European ideas about native peoples in late C18
- .The colonisation of Port Jackson and Cumberland Plain, 1788-1820: law and violence
- .Tasmania, 1804-1836: law and violence
- .The Buxton Report 1837
- .What missionaries tried to do up to 1850.
- .Swan River, King George Sound and South Australia, 1829-1850: law and violence
- .Protection: Coranderrk 1860-1900
- .Protection? : Racial pessimism and Social Darwinism
- .Queensland 1859-1897: law and violence
- .New Norcia Mission 1847-1900
- .The Torres Strait 1879-1900

Legacy Code 102079

Coordinator Simon Burrows ([https://directory.westernsydney.edu.au/search/name/Simon Burrows/](https://directory.westernsydney.edu.au/search/name/Simon%20Burrows/))

Description This unit introduces the social, economic, political and cultural forces that shaped the society from which the first white Australians came. It considers processes of historical change and uses primary sources to explore historical debates concerning these changes. Themes covered include social class; sex and gender; crime and punishment; industrial revolution, urbanisation, and public health; the public sphere; political life; war, militarisation, and empire. This unit places special emphasis on the use of digitised primary sources, training students in their use. It also requires an extended piece of original primary source-based historical research. The unit spans the period 1760-1815.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the nature of the discipline of history.
2. Evaluate debates amongst historians.
3. Analyse historical documents and the conduct of original primary-source based historical research using digital resources.
4. Utilise skills of analysis, synthesis and fluid expression in the oral and written presentation of historical evidence or argument.
5. Utilise skills at video/oral presentation of project work and peer assessment.
6. Demonstrate an awareness of the forces - social, economic, cultural, political, geographical and religious - responsible for British society in the period examined.
7. Assess the influence of history on contemporary issues, attitudes and places.

Subject Content

Topics covered in lectures and tutorials will include:

- Polite society
- Industrialisation and urbanisation
- Commercialisation and Consumer culture
- Crime and Punishment
- sex and gender
- religion
- politics and The public sphere
- War, militarisation and empire
- Radicalism and Working class protest

Most topics will be delivered in a series of lecture pods of about 20 minutes each. Tutorials will serve as research skills workshops, instructing students in the conduct and methodologies of historical research. Emphasis will be laid on the use of key on-line resources, notably ECCO (Eighteenth-Century Collections Online); the Burney collection of early English newspapers; The Old Bailey on line. On line research training materials will also be provided.

Prescribed Texts

- Students will be recommended to buy one of the following for background and reference, according to their interests:
- Hilton, Boyd, A Mad, Bad and Dangerous People: England 1783-1846 (Oxford, 2006)
- Langford, Paul, A Polite and Commercial People: England 1727-1783 (1989)
- O'Gorman, Frank, The long eighteenth century: British political and social history, 1688-1832 (London : Arnold, 1997).
- Porter, Roy English Society in the Eighteenth Century (Allen Lane: London 1982)

Coordinator Fiona R Cameron ([https://directory.westernsydney.edu.au/search/name/Fiona R Cameron/](https://directory.westernsydney.edu.au/search/name/Fiona%20R%20Cameron/))

Description This unit introduces climate change as a complex social, cultural and political phenomenon, one that is re-shaping the way we live in the world and future lifestyles. Because climate change

is highly contested, the course critically examines the issue from different theoretical, disciplinary, social and cultural perspectives. Topics range from cultural theory and forms of social action to the history and construction of climate change as concepts and debates around nature, culture, science, economics and consumption; to social justice, Indigenous knowledge systems, popular culture, the media and Australian politics, global governance, cities and urban planning.

School Humanities & Comm Arts

Discipline Human Geography

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. recognise climate change as a social, political, cultural and economic issue;
2. explain the complexities of current debates and issues governing climate change culture
3. apply knowledge of climate change issues and debate in written analysis;
4. demonstrate skills in online and library-based research.

Subject Content

- . History and construction of climate change and global warming as concepts
- . Science controversies and the construction of climate change
- . Cultural theory, methodologies and social action
- . Post humanism and the climate crisis
- . Debates around nature, culture, economics and consumption
- . Climate change in popular culture
- . Activism, new institutional forms and the climate crisis
- . Indigenous knowledge systems
- . Australian politics and global governance
- . Cosmopolitics, social justice, climate refugees and immigration policy
- . Technology and energy
- . Food security
- . Water
- . Cities and urban planning
- . Climate change and cultural institutions
- . Communication and media as an intervening public
- . Engaging with the Climate Crisis through Music and Art

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Essay	2000 words	40	N	Individual
Written Assessment	300-500 words	30	N	Individual
Presentation and written report	10 mins: presentation 1500 words: report	30	N	Individual

Teaching Periods

HUMN 3024 Comparative Nationalism

Credit Points 10

Legacy Code 102003

Coordinator Margarite Poulos ([https://directory.westernsydney.edu.au/search/name/Margarite Poulos/](https://directory.westernsydney.edu.au/search/name/Margarite%20Poulos/))

Description Nationalism, an ideology considered by many to have passed its peak, now dominates world politics and permeates political discourse. This phenomenon is crucial to understanding Trump's America First campaign, the problems affecting the EU and secession, the tensions and conflicts that are garbed in a religious rhetorical veil, and which constitute much of the agenda of today's "war on terror." What is nationalism? What is national identity? What are the main forms of its articulation in history and in the present, across geographical borders, class boundaries, gender and generational cleavages? This unit will survey the major theories of nationalism, and examine diverse examples of historical and contemporary nationalisms, predominantly within the European context. This is an upper level unit whose readings draw on a variety of approaches and examples and aim at providing a solid introduction to the scholarly literature.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate in-depth knowledge about the development of nationalism in nineteenth and twentieth-century Europe and in representations of the nation in art and literature
2. identify and critically evaluate major historical and political theories concerning nationalism
3. explain the historical background of issues related to nationalism in the contemporary world
4. demonstrate skills in research and interpretation, and skills in written presentation.

Subject Content

This subject may include the following themes:

- theories of nationalism
- independence and unification movements
- Imperialism, Anti- colonialism, and nationalism
- narratives of nation and national identity
- gender race and nation
- Citizenship
- representation and symbolism
- violence, War, ethnic cleansing and Genocide
- economic globalisation and The nation state
- nation after The Cold War
- nationalism and human rights

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 3025 Conceptualising Islam

Credit Points 10

Legacy Code 102494

Coordinator Milad Milani ([https://directory.westernsydney.edu.au/search/name/Milad Milani/](https://directory.westernsydney.edu.au/search/name/Milad%20Milani/))

Description The 'Muslim question' has been a topic of interest to Western scholarship for over four hundred years. This unit introduces students to multidisciplinary approaches to the study of Islam and invites students to consider the construction and deconstruction of Islamic Studies as a field of study at various stages of history. The unit provides students with the opportunity to gain increased awareness of both the debates within the field and those that scrutinise the field. That is, becoming comfortable with interrogating the cluster of theoretical and methodological strategies for scholarly inquiry into Islamic Studies.

School Humanities & Comm Arts

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically assess Islamic Studies scholarship from the past leading up to the present;
2. Describe central thinkers and their works that have contributed to the development of the field
3. Analyse the history of scholarship and approaches to the study of Islam and Muslims;
4. Apply reflexive methodologies and theories to reading Islam in contemporary society; and
5. Recognise key influences and changes in the history of field to the present age.

Subject Content

1. Situating Islam in academic discourse
2. Nineteenth and twentieth century scholarship
 - 2.1 German Orientalism and Islamic Studies
 - 2.2 European Orientalism and the Saidian reaction
3. The invention of geographies and rhetoric
 - 3.1 'Normative' Islam

3.2 'Authenticity debate' in Islamic Studies

4. Identity formations

4.1 Islam and Muslim identities

4.2 Diversity in religious expression and practice

5. Theorising Islam

5.1 The insider-outsider debate

5.2 The role of critics and caretakers

6. The Historical imagination of the Muslim past

6.1 Muslim accounts of origin

6.2 Skeptical accounts of origin

Teaching Periods

HUMN 3026 Convicts and Settlers - Australian History 1788 - 1840

Credit Points 10

Legacy Code 101799

Coordinator Carol Liston ([https://directory.westernsydney.edu.au/search/name/Carol Liston/](https://directory.westernsydney.edu.au/search/name/Carol%20Liston/))

Description In little more than half a century Australia was transformed from a convict prison to a parliamentary democracy. The people who made this transformation were the ex-convicts, free settlers and first generation of colonial born children. The survival of data about ordinary people between 1788-1840 makes it possible to investigate families, communities, employment, law and order and the daily experiences of urban and frontier life in these formative years. Using family history resources on the internet and sophisticated digital archives of historical records in Australia and overseas, this unit will challenge assumptions about "who do you think we were?"

School Humanities & Comm Arts

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand social structures within an historical context
2. Create biographies
3. Describe a variety of historical resources found with on-line searches
4. Identify information in historical source documents
5. Describe the social groups within the colonial population
6. Evaluate conflicting interpretations derived from similar historical evidence

Subject Content

- Background of social structure of 18th century England, Scotland & Ireland

- Convicts, Soldiers, Officials - social backgrounds, criminal backgrounds
- non-European Convicts and Soldiers - African, Indian and Mediterranean connections
- Marriage, bigamy, legitimacy and inheritance in colonial Australia
- colonial Born children - education, employment, family Structures
- what became of The convicts? - The economic and social Contributions of emancipists in The Sydney region
- Immigrant settlers - families of Convicts, adventurers and entrepreneurs, Officials of empire
- Looking out - links to Asia, India and The Pacific

Teaching Periods

HUMN 3029 Cultures of Crime and Punishment

Credit Points 10

Legacy Code 102479

Coordinator Di Dickenson ([https://directory.westernsydney.edu.au/search/name/Di Dickenson/](https://directory.westernsydney.edu.au/search/name/Di%20Dickenson/))

Description The focus of this unit is on the ways in which crime and punishment are defined and practiced in a range of different cultures, and how different countries' social customs and cultural values influence the evolution of their understanding of, and response to, criminal behaviour. Drawing on both theoretical frameworks and practical examples, the unit will provide students with an opportunity to work in a collaborative learning environment, working with both instructors and other students to undertake and communicate research logically.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply contemporary cultural theories of crime and punishment to understanding criminal behaviour.
2. Explain how social structure and culture affect a society's approach to punishment.
3. Assess the impact of digital culture on crime.
4. Use digital tools to identify the changing nature of crime and criminal justice.
5. Develop research proposals in a collaborative learning environment.
6. Communicate research arguments logically and clearly in oral and written form.

Subject Content

1. Social and cultural theories of crime and punishment
2. Punishment in Nordic cultures
3. Cultures of mass incarceration
4. The changing nature of crime and criminal justice
5. Digital culture and crime

Teaching Periods

HUMN 3030 Cyber Justice (UG)

Credit Points 10

Legacy Code 102529

Coordinator David Tait ([https://directory.westernsydney.edu.au/search/name/David Tait/](https://directory.westernsydney.edu.au/search/name/David%20Tait/))

Description The world is being transformed by digital technologies. The same technologies that make life more comfortable for some can unleash violence and destruction for others. Cyber war and cyber terrorism offer new risks for the international community. Bullying, identity theft and bank fraud, on a more local level, are given a new life in the cyber world. Cyber technologies also provide enhanced opportunities for detecting and apprehending criminals, resolving disputes and modernising justice processes. New social spaces are opened up (social media networks, the 'dark web'), and new identities made possible (online grooming profile, avatars). How does the law keep up with the emergence of new crimes and technology-enhanced versions of old ones, and how do the cultural worlds of hackers, crackers and trackers work? The subject examines how justice processes and spaces, as well as criminal networks and strategies, are being reimagined to take advantage of the new technologies.

School Humanities & Comm Arts

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Incompatible Subjects LAWS 3015 - Cyber Law and Justice

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Assumed Knowledge

Successful completion of second-year subjects in cultural and society, history and political thought, law, psychology or criminology would be useful, but are not required. Experience of using social media would also be useful but not required.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the nature of cybercrime (including cyber terrorism and cyber war) and the techniques, targets and harms produced by it.
2. Describe the way cyber technologies are used in policing and courts to transform justice processes and respond to cybercrime.
3. Identify relevant media reports, research material, images and other relevant sources relevant to cybercrime and cyber justice.
4. Assess the quality of research about cybercrime and cyber justice in terms of its method, use of sources and contribution to academic debates.
5. Develop research ideas in a peer-supported learning environment.
6. Communicate research arguments logically and clearly in oral and written form.
7. Use digital technologies to collaborate, develop arguments and settle disputes.

Subject Content

Cybercrime: new and enhanced crimes of the digital age.

Cyberjustice: the transformation of justice by digital technologies.

Cyber war and cyber terrorism.

Cyber bullying and stalking.

Privacy and surveillance.
On-line and virtual justice.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Reflection - Individual Response to Class Activities	800 words	30	N	Individual
Summaries - Group Reviews	200 words	10	N	Group
Essay - Research Brief	1,500 words	40	Y	Individual
'Science Fair' Multi-Media Presentation	10 minutes	20	N	Group

Teaching Periods

HUMN 3031 Death and Culture

Credit Points 10

Legacy Code 100996

Coordinator Di Dickenson ([https://directory.westernsydney.edu.au/search/name/Di Dickenson/](https://directory.westernsydney.edu.au/search/name/Di%20Dickenson/))

Description This unit is a critical introduction to the social practices surrounding death in modernity. Although primarily addressing social arrangements in the West, the unit examines the bio-politics of death in a wider cultural framework, with attention to geographies of power and economic influence. The unit traces the historical development of concepts of the individual; the impact on Western ideas around death of genocide and modern warfare; and assesses contemporary ethical, social and medical controversies (like euthanasia and the trade in body parts). The unit attempts to demonstrate the relationship of death to: social institutions; ideas of community and the construction of self in modernity.

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYC 1307 - Death and Culture LGYA 0949 - Death and Culture

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate the function of social debate around issues of vital social importance.

2. Identify key issues about contemporary experiences of death and dying in a range of learning resources.
3. Demonstrate their understanding of the historical origins of present day beliefs and practices around death and dying
4. Apply theoretical knowledge to real-world situations and give a scholarly context to personal experience.

Subject Content

Content may vary between semesters of offering dependant on the teaching staff expertise and interests.

1. The history of death: 1800-1945
2. Grief, mourning and social ritual
3. Death in High Modernity
4. Mass death and the century of genocide
5. The economics of death: killing for science and profit
6. Death and the media
7. Death, trauma and the unmaking of community
8. Euthanasia
9. Legal Execution
10. Commodifying the corpse: the trade in body parts etc.
11. Deathwork
12. Virtual death
13. Virtual mourning

HUMN 3032 Dictators, Democrats and Dreamers: Indonesia 1942 to now

Credit Points 10

Legacy Code 102188

Coordinator Steven Drakeley ([https://directory.westernsydney.edu.au/search/name/Steven Drakeley/](https://directory.westernsydney.edu.au/search/name/Steven%20Drakeley/))

Description This unit surveys the post-independence history of Indonesia, Australia's nearest and most important Asian neighbour.

Commencing with the Japanese Occupation during World War II, it traces Indonesia's often turbulent contemporary history through dictatorship and poverty to democracy and prosperity, bringing the story up to the latest developments at the time of teaching. Students will study Indonesia's struggle for independence and then equally challenging struggle to build a new nation able to take its place in the world amidst serious economic problems and profound political differences. The unit is also concerned with the historiographical problems confronting students of Indonesian history.

HUMN 3033 Digital Cultures

Credit Points 10

Legacy Code 102410

Coordinator Chris Fleming (<https://directory.westernsydney.edu.au/search/name/Chris+Fleming/>)

Description This is the compulsory Level 3 capstone unit for the Cultural and Society major and a compulsory unit in the Digital Cultures major. It gives students essential skills for researching and analysing contemporary cultural and social processes through a digital lens. Key topics include youth and digital culture, digital citizenship, racism and the digital, film and games, and digital work and economies. Through this unit, students gain an understanding of how digital technologies transform everyday practices, meanings and identities, create new opportunities and problems for addressing societal challenges and explore what it means to participate in a digital society, now and in the future.

School Humanities & Comm Arts

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects HUMN 3028 - Culture Society and Globalisation

Restrictions Successful completion of 60 credit points in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the role of digital technologies in transforming society and culture using central concepts and tools,
2. Apply research inquiry skills and methods involved in researching digital cultures,
3. Identify and describe the dynamics and properties of digital networks, programs and platforms,
4. Evaluate and compare research supported by evidence and observation,
5. Undertake independent and self-directed study/research,
6. Work in teams and collaborate in online settings to undertake research and analysis,
7. Present knowledge in a range of written forms.

Subject Content

- Participatory culture and politics
- Histories and narratives of The digital/future
- Researching digital culture - approaches, methods, ethics
- film, games and users/audiences
- Network dynamics and mobilities
- digital children/youth, gender and race/racisms
- digital identity and Citizenship
- digital work and economies
- digital exclusion and local/Global Divides
- digital Consumption and intimacies

HUMN 3034 Emotions, Culture and Community

Credit Points 10

Legacy Code 100860

Coordinator Penelope Rossiter ([https://directory.westernsydney.edu.au/search/name/Penelope Rossiter/](https://directory.westernsydney.edu.au/search/name/Penelope%20Rossiter/))

Description This unit examines forms of cultural expression and collective selfunderstanding articulated as emotional identifications. Topics covered may include shame, pride, responsibility, forgiveness, resentment, hope, disgust, generosity, happiness, hate and love. The unit explores how these have been taken up in contemporary cultural analysis as a focus for understanding affinities and conflicts between individuals and communities and for how Australians imagine their historical interconnectedness. It introduces some key theoretical perspectives that have been, and might be, applied to the study of emotions, culture and community.

School Humanities & Comm Arts

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the study of emotions, culture and community as a growing area of interdisciplinary inquiry.
2. Identify and apply a variety of theoretical perspectives relevant to study in this area.
3. Utilise an extended conceptual vocabulary pertinent to the study of emotions and modes of sociability.
4. Demonstrate, in written and oral formats, advanced skills in researching and analysing contemporary Australia in terms of the affective dimensions of inter-communal relations.

Subject Content

Each week focuses on a specific topic relevant to the study of emotions, culture and community in contemporary Australia. Topics may include:

Shame
Guilt
Love
Hope
Generosity
Responsibility
Forgiveness
Resentment
Disgust
Pride
Happiness
Hate

HUMN 3035 Enlightenment and Revolution

Credit Points 10

Legacy Code 101974

Coordinator Simon Burrows ([https://directory.westernsydney.edu.au/search/name/Simon Burrows/](https://directory.westernsydney.edu.au/search/name/Simon%20Burrows/))

Description The Enlightenment and Age of Revolutions are pivotal moments in Western and global history and had lasting political and cultural repercussions. This module seeks to explore links between them and to place them in wider intellectual and cultural context. Particular focus will be placed upon the paradigmatic French revolution, but within a framework emphasising other revolutions of the period. Hence individual classes treat society and government in Europe; the moderate and radical strands of enlightenment; precursors to the French revolution in the Atlantic world; the public sphere; the French revolution and Terror; Revolutionary Imperialism and Napoleonic rule; the revolutionary legacy.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate advanced skills of documentary interpretation when confronted with primary source material
2. analyse and offer critical, internationally comparative judgements on the nature of the enlightenment, public sphere and revolutions of the age of revolutions
3. evaluate possible causative links between the political theory of the enlightenment and the politics of revolution
4. demonstrate critical awareness of the historiographical debates and interpretations surrounding the enlightenment and French revolution
5. contextualise the Enlightenment and the French Revolution in a broader context of debates about the nature of late modernity.

Subject Content

1. Political Culture in the Enlightenment
 - . Society and government in Enlightenment Europe
 - . High Politics and the High Enlightenment
 - . Radical Enlightenment
 - . The Rise of the Public Sphere
2. Revolutionary France
 - . The dawn of the Atlantic Revolution
 - . The Political Origins of the French revolution
 - . 1789 - the Year of the Great Revolution
 - . The Fall of the Monarchy and the Birth of the Republic
 - . Violence, Terror and Civil War
3. Legacies: The French Imperium and the Revolutionary Tradition
 - . War and Imperialism
 - . The Napoleonic Episode
 - . The Revolutionary Tradition in Europe, 1815-1871
 - . Conclusions

HUMN 3036 Ethics in Historical Perspective

Credit Points 10

Legacy Code 102007

Coordinator David Burchell ([https://directory.westernsydney.edu.au/search/name/David Burchell/](https://directory.westernsydney.edu.au/search/name/David%20Burchell/))

Description The unit provides an historical overview of the different types of ethical beliefs and practices that have been used in specific social settings from the classical world to the modern West. It looks at different types of spiritual and secular ethical behaviours, and the doctrines associated with each. It focuses upon the types of ethical argument and judgment-making specific to particular professions, occupations and social statuses over time. It concludes by surveying the different types of ethics taught to professionals today in the West, and on the differences between each, as well as the specific requirements of each. It will be of interest both to students with an interest in the history of ideas, and to students who want to learn more about ethics and moral decision-making.

HUMN 3039 Food: A Cultural History

Credit Points 10

Legacy Code 102305

Coordinator Carol Liston ([https://directory.westernsydney.edu.au/search/name/Carol Liston/](https://directory.westernsydney.edu.au/search/name/Carol%20Liston/))

Description The modern world seems obsessed by food. This unit will look at the historical development of sources of food, from archaeological evidence of the earliest human meals through the emergence of agriculture and its scientific modifications to the physical and cultural evidence of technological changes in methods of preservation, preparation, cooking and eating various foods. Food is also integral to our social, religious and cultural lives and the unit will investigate the historical origins of some of these customs. Students will have the opportunity to range across time and place (through readings, recipes and field trips) to explore foods that are part of their cultural heritage - or feasts that they wish they could have eaten from centuries long past.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points in the currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify a selection of places and objects relating to food production and eating in Australian history
2. Explain the historical and cultural significance of certain foods
3. Investigate the historical and cultural origins of a particular dish (recipe)
4. Construct an evidence based argument or narrative of the results of an investigation into the historical and cultural factors associated with particular foods.

Subject Content

Content will include a selection from the following topics:

Archaeological evidence of food origins and cooking methods
Trade and wealth - salt, pepper, sugar, spices
Plants on the move
Keeping it longer - air dried to freeze dried
Pots, Pans and Microwaves
Fingers, forks or chopsticks
Indigenous Australian foods
Australian colonial eating
Portable foods ? take-always ancient and modern
Rations - convicts, military and the home front
Food, health and healing
Religious practice and foods
Recipes, measurements and instruction manuals

Class and custom - manners, etiquette and tradition
Upstairs, downstairs - kitchens great and small
Food Wars

HUMN 3040 From Vindication to Liberation: A Comparative History of Feminism

Credit Points 10

Legacy Code 102520

Coordinator Bridget Brooklyn ([https://directory.westernsydney.edu.au/search/name/Bridget Brooklyn/](https://directory.westernsydney.edu.au/search/name/Bridget%20Brooklyn/))

Description Beginning with Mary Wollstonecraft's A Vindication of the Rights of Woman, this historical survey analyses the Western feminist ideas and action over the past two centuries, exploring examples from Australia, France, the UK and the US. Important stages in the history of Western feminism will be studied, from the early equality feminism of the eighteenth century, to domestic feminism and the woman suffrage campaigns of the nineteenth. Aspects of the history of more recent feminism will include such developments as the role of maternalism in the creation of the welfare state, and the shift to an emphasis on liberation in the 1960s and 1970s.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the principal feminist movements of several western countries over the past two centuries;
2. Appraise the ideas that characterised different feminist movements of the past;
3. Identify key individuals who shaped feminist thought and fostered change;
4. Explain how Australian feminism has fit into the international context, and identify the ways in which it has been both influenced and influential; and
5. Understand some of the intersections between gender and race, particularly with reference to Australia.

Subject Content

1. What is feminism? Problems defining feminism in the past and the present.
2. Articulating women's rights: the French Revolution and equality feminism.
3. Backlash? The rise of evangelism and the cult of domesticity in the nineteenth century.
4. Feminism in the Victorian era: freedom within boundaries.
5. Winning the vote: suffrage campaigns of the nineteenth and early twentieth centuries.
6. Maternalist feminism in the early twentieth century.
7. Interwar feminism in Australia, France and the US; domestic science and the citizen mother.
8. From equality to liberation: the rise of 'second wave' feminism.
9. Race and gender in the second half of the twentieth century.
10. The 'third wave' and why feminism is still important.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 3041 Geographies of Migration

Credit Points 10

Legacy Code 101694

Coordinator Cameron McAuliffe ([https://directory.westernsydney.edu.au/search/name/Cameron McAuliffe/](https://directory.westernsydney.edu.au/search/name/Cameron%20McAuliffe/))

Description An international and cross-institutional discussion of immigration and settlement. Covering the theory and experience of immigration. Considers the international and national regulation of immigration and settlement policies, as well as refugee policy. Case studies are from Australia and Canada, and Singapore. Within mixed tutorial groups (with students from Singapore, Vancouver & Sydney) students will exchange experiences and opinions of immigration.

School Social Sciences

Discipline Human Geography

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Construct case studies and files on the impacts of international migration, drawing upon statistics, experiences, visual material and other technologies
2. Summarise, contrast and critically analyse theories of international migration
3. Integrate theories of immigration with statistics, field data and personal experiences
4. Relate international migration to the forces and theory of globalisation and population movement
5. Critically evaluate the competing political arguments regarding migration and its impacts
6. Relate political arguments regarding migration to their own personal experiences (and those of their peers)
7. Develop a tolerance and appreciation of cultural difference within cities of immigrant reception
8. Develop a sense of international co-operation and citizenship, and establish enduring links with peers in Singapore (The National University of Singapore (NUS)) and Vancouver (The University of British Columbia (UBC))

Subject Content

Migration types and drives

Theorising migration

Australian immigration: history, flows and impacts

Immigrant residential concentration

Transnationalism

Population, immigration and environment

Transnational flows and migration policies in Singapore

Canadian immigration and settlement

Undocumented migration and human trafficking

Australian aspects of forced migration and human trafficking

Environmental refugees

HUMN 3042 Global Politics

Credit Points 10

Legacy Code 101735

Coordinator Brett Bowden ([https://directory.westernsydney.edu.au/search/name/Brett Bowden/](https://directory.westernsydney.edu.au/search/name/Brett%20Bowden/))

Description The experiences of globalization are explored from a variety of levels across time and space, from the individual to the local, the national to the international. The focus in this course will be on issues of politics, both domestic and international, but we will keep in mind that globalization is a phenomenon that is explored and assessed by a wide range of disciplines, including history, sociology, politics, law, economics, anthropology, gender studies, human geography,

economics, regional and area studies, science and technology, health and epidemiology.

School Humanities & Comm Arts

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate understanding of theoretical approaches to globalisation and global politics;
2. Identify and differentiate phenomena of globalisation;
3. Deploy various disciplinary methods to analyse globalisation;
4. Develop and use effective research skills to investigate globalisation

Subject Content

Defining globalization
Thinking about globalization
History and theories of globalization
Globalization and the state
Globalization, technology and deterritorialisation
Global governance and non-state actors
The Global economy and inequality
Globalization and culture
The ethics of globalization
Globalization, order and security
Anti-globalization and alternatives

Teaching Periods

HUMN 3043 Globalisation and Sustainability

Credit Points 10

Legacy Code 200815

Coordinator Margaret Moussa ([https://directory.westernsydney.edu.au/search/name/Margaret Moussa/](https://directory.westernsydney.edu.au/search/name/Margaret%20Moussa/))

Description Globalisation and Sustainability introduces students to critical debates about the role of global and national institutions of power in determining economic, environmental, social and cultural outcomes. Students will be introduced to opposing and controversial theoretical perspectives on globalisation and sustainability and issues relating to Aboriginal and Torres Strait Islander peoples to improve policy and practice in the future. In the process students will be encouraged to consider problems relating to ethics, rights, justice and democracy in society. This unit can also be taken by students who have studied social science and humanities.

School Business

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions

Note that only students enrolled at Sydney City Campus may register in the Sydney City Campus subjects offered at that location.

Assumed Knowledge

Basic understanding of economic concepts.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically assess the role of global and national institutions of power in determining economic, environmental, social and cultural outcomes.
2. Compare and debate opposing theoretical and policy approaches to economic, environmental, social and cultural outcomes.
3. Make recommendations to improve policy and practice with regard to complex economic, environmental, social and cultural issues.
4. Demonstrate recognition of the alternative perspectives on economic and social development held by Aboriginal and Torres Strait Islander peoples.
5. Explain the interdependence of the economy and environment.

Subject Content

1. Local and global institutions
 - comparative advantage
 - Unequal exchange
 - development and uneven development
2. Crises and Cycles
 - Global financial crises
 - sustainable, socially-Just and democratic economic alternatives
3. Aboriginal and Torres Strait Islander issues
 - economic and historical perspectives ? rights
 - sustainable economic development debates
4. Growth and Sustainability: Ecological sustainable development
 - definitions of sustainability
 - limits to growth
5. Energy and climate change
 - Carbon lock-in, fossil fuel energy system
 - Global environmental agreements
 - Clean development mechanism
 - environmental justice
6. Food, water, population, species
 - Global food system and The environment
 - management of water resources
 - population growth and limits
 - species extinction and biodiversity loss

HUMN 3044 Healing and Culture

Credit Points 10

Legacy Code 101716

Coordinator Cristina Rocha ([https://directory.westernsydney.edu.au/search/name/Cristina Rocha/](https://directory.westernsydney.edu.au/search/name/Cristina%20Rocha/))

Description This unit takes as its starting point the idea that disease has social and cultural as well as biological origins. What people define as good health and illness, and how they treat the latter are profoundly shaped by cultural frameworks. Healing practices, including biomedicine, are underpinned by cultural understandings and larger configurations of power. We will examine notions of disease causality across cultures and explore the argument that good and ill health are about more than just the body. Popular understandings of illness and its origins, and techniques for responding to and seeking to remedy illness can be a reflection of how different societies imagine their place in the world.

HUMN 3046 History of Modern China to 1949

Credit Points 10

Legacy Code 100507

Coordinator Eduardo Ugarte ([https://directory.westernsydney.edu.au/search/name/Eduardo Ugarte/](https://directory.westernsydney.edu.au/search/name/Eduardo%20Ugarte/))

Description This Asian history unit is concerned with the transformation of China in a social, political and intellectual context since the late eighteenth century. The unit focuses on China's modern transformation in the first half of the twentieth century and its relevance for contemporary China. The scope is broad, encompassing changes from the last phases of the Qing Dynasty to the Republican era and the rise to power of the Communists in 1949. The approach is issue-oriented, thematic and, where appropriate, chronological.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYB 0142 - History of Modern China 1850-1949 Reform and Revolution

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the relevance of major social, political, and intellectual developments in pre-1949 China to contemporary China;
2. Analyse the relationship between change and continuity, reform and revolution, liberalism and illiberalism, tradition and modernity in the process of change in modern China;
3. Critique the different views of Chinese modernity expressed by statesmen and intellectuals.

Subject Content

The Topics will be based on all or part of the following

1. The 'Century of Humiliation' and its relevance to contemporary China
2. The Qing Empire in Decline: Insularity and Grandeur
3. The Opium Wars
4. Rebellions
5. Wars with France and Japan
6. The 100 Days of Reform
7. The last decade of imperial rule
8. The Xinhai Revolution of 1911
9. The May 4th Movement
10. The Rise of the KMT and CCP
11. The Nanjing Decade
12. The Second Sino-Japanese War and the Xi'an Incident
13. World War II in China and the Civil War

HUMN 3048 History of Sexuality

Credit Points 10

Legacy Code 101991

Coordinator Alison M Downham Moore ([https://directory.westernsydney.edu.au/search/name/Alison M Downham Moore/](https://directory.westernsydney.edu.au/search/name/Alison%20Downham%20Moore/))

Description This unit introduces students to some key debates about the definition and origin of sexuality as a concept, and to the historical origins of particular sexual identities and the political values attributed to them. It teaches students to take account of the differing ways that forms of desire, pleasure, obscenity, pornography, perversion, sin and transgression have been articulated across time and place. In the unit we traverse an array of temporal moments and geographic loci, drawn to the 'hotspots' of historiographic contention.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain important issues in the history of sexuality.
2. Articulate differences in the way societies have articulated desire across time and place.
3. Identify the challenges of tracing historical themes that are differently defined in every time.
4. Outline the methodologies employed by historians in the study of sexuality.
5. Explore the historical contingency of sexual categories.

Subject Content

- Same-sex desire in Ancient Greece
- religion and sexual sin
- Pornography, libertinism and The French revolution
- Nineteenth-century female 'frigidity'; the emergence of the term 'sexuality' in nineteenth-century thought
- The regulation of prostitutes in The Nineteenth century
- The emergence of sexual science in modern medicine
- The invention of the idea of 'perversion'
- The politicisation of homosexuality in The twentieth century
- Interwar psychoanalysis of sexuality
- sexuality during War
- The use of sexuality in historical Memory
- The sexual revolutions of The nineteen-sixties
- The emergence of claims about sexual practice as A form of transgression in Recent sexual identity movements.

HUMN 3049 Home and Away: Ethnicity and Migration in Australia

Credit Points 10

Legacy Code 101611

Coordinator Jennifer Cheng ([https://directory.westernsydney.edu.au/search/name/Jennifer Cheng/](https://directory.westernsydney.edu.au/search/name/Jennifer%20Cheng/))

Description Using contemporary and historical sociological accounts of migration and ethnicity, this unit analyses the social, cultural and economic impact of international migration, with specific reference to Australia. It further introduces students to major sociological issues, both theoretical and empirical, relating to the construction of migrant groups within settler societies through interviews and qualitative analysis. Key concerns of the unit include the position of indigenous peoples, race and racism, ethnic identity, and ethnic conflict and cooperation in society.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 1305 - Sociology of Ethnicity and Migration

Restrictions Successful completion of 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Upon completion of this subject students will be able to:
2. Demonstrate an understanding of the significance of migration in the formation of Australian class structures and cultures.
3. Critically assess the linkages between ethnic identity construction and other forms of identity in Australia.
4. Understand, and be able to demonstrate the specific issues and problems involved in conducting sociological research in the area of migration and ethnicity.
5. Locate the sociology of migration and ethnic formation in the broader context of social transformation in the world system and the international division of labour.
6. Identify and describe the significance of indigenous peoples in the construction of settler societies like Australia.

Subject Content

History of population movements
 Concepts of race and ethnicity
 Indigenous peoples
 Theories of migration
 Ethnicity and the nation-state
 Demographic characteristics of Australian society
 Multiculturalism in Australia
 Whiteness and ethnicity
 Transnationalism and new forms of migration
 Refugees and asylum seekers in Australia
 Ethnicity and Violence

HUMN 3050 Housing Markets and Policy

Credit Points 10

Legacy Code 101592

Coordinator Emma Power ([https://directory.westernsydney.edu.au/search/name/Emma Power/](https://directory.westernsydney.edu.au/search/name/Emma%20Power/))

Description Housing affordability and equity are central urban problems. This unit focuses on the history and current challenges of housing markets and policy in Australia. Comparisons are drawn between rental and home ownership, the roles of the public, social, and private sectors, and between Australian, European, and North American housing markets and policies. We will critically evaluate how policy, markets and the experiences and practices of households interact. We will consider key housing challenges including ending homelessness, housing for health, housing in an ageing society, and housing in times of crisis such as climate change, bushfire and pandemic.

School Social Sciences

Discipline Human Geography

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 1331 Regional Planning

Restrictions Successful completion of 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain how specific policies affect different segments of the housing market.
2. Analyse how future financial, economic, social and environmental trends could alter the outcomes of specific housing strategies.
3. Critically evaluate how the Australian housing sector has evolved, and why this path has been different than the path of other economically similar countries, such as Canada, the UK, and the USA.

4. Explain how the role of major housing actors (local and state governments, housing associations, private developers, small and large investors, tenants, and home owners) has evolved, and why.
5. Demonstrate understanding of the major sources of local housing data.

Subject Content

What is housing and why is it so important

Tenure: social / legal construction of housing classes and homeownership as a social policy

Housing affordability and housing subsidies

Tenants in the public, social, and private sectors

Housing and the labour market

Housing as home

Housing and health

Housing and ageing

Responses to homelessness

Housing in times of crisis (e.g in context of climate change, sea level rise, bushfire, pandemic)

Alternative models of housing

HUMN 3051 Human Rights and Culture

Credit Points 10

Legacy Code 101988

Coordinator Di Dickenson ([https://directory.westernsydney.edu.au/search/name/Di Dickenson/](https://directory.westernsydney.edu.au/search/name/Di%20Dickenson/))

Description This unit examines the cultural consequences of the rise of the global human rights regime. It introduces debates about cultural relativism and universal human rights and explores a number of areas of contemporary conflict between cultural practices and human rights norms. It also examines the role of human rights NGOs in creating a new global human rights culture, and asks what it means to be a subject of human rights.

School Humanities & Comm Arts

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the history of the global human rights regime.
2. Engage in reasoned debate about human rights universalism and cultural relativism.
3. Analyse contemporary tensions between respecting cultural diversity and compliance with human rights norms.
4. Critically reflect on the relation between human rights and neoliberal capitalism.
5. Demonstrate an understanding of the role of NGOs in shaping a global human rights culture.
6. Display effective research skills and analytical processes in investigating the cultural issues raised by the rise of the global human rights regime.

Subject Content

- WWII and The drafting of The Universal Declaration of human rights
- The rise of The human rights NGOs (Amnesty international, human rights Watch)
- theoretical debates about Universal human rights and cultural relativism
- Controversies about human rights and culture: private property rights and communal cultures; the 'Asian values debate'; individual rights and indigenous cultures; women's rights and gendered violence
- human rights, The nation-state and self-determination
- 'Humanitarian intervention' and the militarisation of human rights
- The relation between The human rights regime and The emergence of neoliberal capitalism
- human rights and subjectivity: what does It mean to be A subject of human rights?

Teaching Periods

HUMN 3054 Islam in Southeast Asia

Credit Points 10

Legacy Code 101467

Coordinator Steven Drakeley ([https://directory.westernsydney.edu.au/search/name/Steven Drakeley/](https://directory.westernsydney.edu.au/search/name/Steven%20Drakeley/))

Description Islam is a significant feature of Southeast Asia's past and present. Employing methodologies and insights drawn primarily from history, political science, and anthropology, this unit explores Islam's place in and contribution to contemporary Southeast societies and politics, as well as its history in the region. Major themes to be explored include: the debates about Islam's spread to Southeast Asia and its interaction with the region's established socio-religious features, the colonial experience, Islam's often contested place in the national life of Southeast Asian nations, its past and ongoing links with the rest of the Muslim world, as well as contemporary issues associated with the War on Terror and conflicts in Muslim societies.

School Humanities & Comm Arts

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYB 0177 - Islam in Asian and World Politics

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the main historical factors that have shaped the various practices of Islam in Southeast Asia;
2. Outline the main variations in Islamic practice in different Southeast Asian societies both in the contemporary context and over time;
3. Explore the role of Islam in Southeast Asian politics both in the contemporary context and over time;
4. Develop coherent arguments about the interactions of local traditions and beliefs and orthodox and reforming waves of Islam emanating from the Middle East;
5. Identify the main issues and problems confronting scholars working on Islam in Southeast Asia;
6. Apply historical and religious studies research skills to other countries and cultures.

Subject Content

- Timing, Origins, and mechanisms by which Islam came to Southeast Asia
- Mechanisms and history of Islam's continuing spread throughout Southeast Asia
- Islam's interaction with existing beliefs, customs and political structures in the region, both in the past and present
- Past and ongoing interaction between currents of Islamic thought and teachings in Southeast Asia and those in The rest of The Muslim World
- The impact of colonialism on Islam and Muslims in Southeast Asia
- The role of Islam in Southeast Asia in resistance against colonial rule
- Southeast Asian Muslims and The development of nationalism and independence movements in Southeast Asia
- The history of Islam's place in the national life of Southeast Asian nations, including economies, culture and politics

-Islam's contemporary place in the national life of Southeast Asian nations, including economies, culture and politics
 -The role of Islam in Regional rebellions in Southeast Asia (especially Mindanao, Pattani, Aceh)
 -Islamist movements in contemporary Southeast Asia such as Jemaah Islamiyah and Abu Sayyaf
 -academic debates over methodology and approaches to The Study of Islam in Southeast Asia

HUMN 3056 Islam in the West

Credit Points 10

Legacy Code 101822

Coordinator Jan Ali ([https://directory.westernsydney.edu.au/search/name/Jan Ali/](https://directory.westernsydney.edu.au/search/name/Jan%20Ali/))

Description The unit focuses on the question of Muslim presence in the West with reference to the dynamics of inclusion and exclusion. Its aim is to enable students to look at the question of Muslim presence in terms of an action-reaction phenomenon in which different outlooks, ideas, institutions and nodes of information and authenticity interact to create an environment in which identities are developed. These identities then go on to shape the cooperative and conflictual relationships between different subsections of Muslim minorities and the majority non-Muslim Western states and societies. While focusing on the contemporaneity of the question, the unit looks at the study of Muslim presence in the West in a socio-historical context by providing an understanding of how Muslim-Western contacts shaped the nature of their relationship in the past. Then, the unit looks to contrasting the changes before and after 9/11 with reference to a set of ideas, institutions and contexts.

School Humanities & Comm Arts

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. explain the sociological complexities of Muslim presence in the West and the intricacies of negotiating Muslim living through the processes of social inclusion and exclusion;
2. analyse the issue of Muslim presence in the West in terms of an action-reaction dynamics and how Muslim identities are developed;

3. recognise and describe how Muslim identities affect relationships among Muslim communities and between Muslims and majority non-Muslims and the state;
4. analyse the impact of colonialism on the relationship between Muslims and the people of the West; and
5. examine the relationship between Muslims and the people of the West before and after 9/11 particularly in relation to a set of constantly changing ideas, institutions and contexts that are subject to the imperatives of globalisation.

Subject Content

- this subject focuses on The question of Muslim presence in The West with reference to The dynamics of The processes of inclusion and exclusion.

- It seeks to enable students to gain comprehensive and Critical insights into The question of Muslim presence in terms of An action-reaction phenomenon.

- It also provides students to better appreciate how different outlooks, ideas, institutions and nodes of information and authenticity interact to Create An environment in which Muslim identities are forged and formed.

- these identities then help shape The relationships of Muslims among and within their communities and between Muslims and The majority non-Muslims and The state.

- The students will also gain insight into the impact of colonialism on the relationship between Muslims and the people of the West and how this relationship has come under intense scrutiny before and after 9/11 particularly in relation to a set of consta

HUMN 3057 Islam, Media and Conflict

Credit Points 10

Legacy Code 101468

Coordinator Jan Ali ([https://directory.westernsydney.edu.au/search/name/Jan Ali/](https://directory.westernsydney.edu.au/search/name/Jan%20Ali/))

Description Provides students with an understanding of global, regional and local news media production and representations of Islam and Muslim societies. It discusses new, emerging and alternative forms of media discourses of conflict in the Muslim world, and analyses selected news reports as forms of case studies. Taking the notion of 'Orientalism' as its starting point, the subject/unit critically examines the extent to which the mediatisation of conflict impacts relations between Islam and the West vis-a-vis debates on Orientalism, 'Asian values' and Islamic world views.

School Humanities & Comm Arts

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. analyse media representations of Islam and Muslim communities;
2. analyse the effects of media representations on Muslim and non-Muslim audiences;
3. understand theoretical paradigms for critical analysis of social and political relations of Muslim and non-Muslim communities and societies; and
4. analyse a variety of media discourses about religion and religious communities.

Subject Content

- historical encounters: Islam and The West
- Islam in Western thought
- Mass media: theories, Structures and Organisations
- content analysis: representations of Islam and Muslims
- media effects
- Reporting Islam: Operations Realities
- Reporting War and Conflict
- Image and Reality of Global Conflicts
- audience analysis: impact of media content
- An Islamic theory of media
- media in The Muslim World

HUMN 3058 Islamic Revivalism in the Globalised World

Credit Points 10

Legacy Code 102297

Coordinator Jan Ali ([https://directory.westernsydney.edu.au/search/name/Jan Ali/](https://directory.westernsydney.edu.au/search/name/Jan%20Ali/))

Description In the last decades there has been a surge in Islamic consciousness in Muslim communities across the globe. Islamic history has been punctuated by periods of revivalist activity and its hallmark always has been a desire for the return to Islamic origins - the basics of the faith as enshrined in the Islamic scripture. This unit explores the phenomenon of contemporary Islamic revivalism. The unit contrasts contemporary Islamic revivalism with earlier expressions. It aims to demonstrate that contemporary Islamic revivalism has manifested itself in a multiplicity of forms as a defensive reaction to an epoch characterised as modernity.

School Humanities & Comm Arts

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify key issues and concepts in the literature on contemporary Islamic revivalism
2. Analyse scholarly debates surrounding contemporary Islamic revivalism
3. Assess the causes and consequences of contemporary Islamic revivalism
4. Examine the theoretical models of Islamic revivalism
5. Analyse the ideology, diversity and activities of Islamic revivalist movements
6. Apply conceptual and theoretical approaches to the understanding of Islam and Muslims in a globalised world
7. Develop analytical tools necessary in conducting sociological research.

Subject Content

- Islam: An introduction
- The development of Islamic Civilisation
- Islam and The processes of modernisation and Globalisation
- Explanations of Islamic Revivalism
- theories of social change and religious response
- colonialism and its impact on The Muslim World
- Islam-West relations
- Crisis of Islam and Muslim Societies
- Islamic Reformism and The foundational thinkers
- emergence of Islamic Revivalist movements
- methods of Islamic Revivalism
- Islamic invention, Tolerance and Modernity
- Islam in The modern Globalised World

Teaching Periods

HUMN 3060 Modern Japanese History

Credit Points 10

Legacy Code 100271

Coordinator Peter Mauch ([https://directory.westernsydney.edu.au/search/name/Peter Mauch/](https://directory.westernsydney.edu.au/search/name/Peter%20Mauch/))

Description This unit considers Japan's trajectory from the battle of Sekigahara in 1600 until the atomic bombings in 1945. We will examine the samurai and ritual suicide, the tea ceremony and Zen Buddhism. We will read tales told by those who frequented the "floating world," populated by wealthy merchants, geisha, and sumo wrestlers. We will consider the creation of Imperial Japan, and we will study its emergence as the only non-Western Great Power. We will enquire into Japan's fledgling democracy in the 1920s, and its descent into militarism and aggression in the 1930s. Finally, we will consider Japan's participation in World War II: its victories, its losses, its propaganda, and its abject defeat.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. analyze important events, both domestic and international, that have shaped modern Japan;
2. critique the role of the emperors in modern Japanese history;
3. evaluate the ways in which the Japanese, from all walks of life, have responded to seminal events;
4. apply academic skills of research, appropriate to the discipline of history including the discriminating use of sources, analysis, and the communication of ideas in both oral and written forms.

Subject Content

1. Battle of Sekigahara
2. The Tokugawa Shogunate
3. Japan's Meiji restoration (1868)
4. Modernization and Westernization
5. Victory in the Sino-Japanese (1894-95) and Russo-Japanese (1904-05) Wars
6. Death of the Meiji Emperor
7. Taisho Democracy and cooperation with the Anglo-American powers
8. Militarism, aggression, and increasing isolation
9. World War II

HUMN 3061 Mystical Islam: The Emergence of Sufism in World History

Credit Points 10

Legacy Code 102495

Coordinator Milad Milani ([https://directory.westernsydney.edu.au/search/name/Milad Milani/](https://directory.westernsydney.edu.au/search/name/Milad%20Milani/))

Description Global Islamism has projected a particularly severe, even militant face of Islam across much of the world. Much less well known is the fact that for much of its history Islam has had a quite different face: it has been mystical and contemplative more than proselytising. The Sufist tradition was formed within the first three centuries of Islamic history; its influence spread far and wide across the Muslim World where "Sufis" played a pivotal role in engaging non-Muslim peoples both within and on the fringes of their world. The unit explores religious pluralism and an alternative narrative in Islam.

School Humanities & Comm Arts

HUMN 3062 Napoleon: the Making of a Legend

Credit Points 10

Legacy Code 102343

Coordinator Simon Burrows ([https://directory.westernsydney.edu.au/search/name/Simon Burrows/](https://directory.westernsydney.edu.au/search/name/Simon%20Burrows/))

Description This unit appraises the achievement of Napoleon Bonaparte and the manner in which he has been portrayed in his own propaganda, by his contemporaries and by historians. It also considers the historical impact of the Napoleonic and anti-Napoleonic myths in the history of France and Europe. At the heart of the module is the paradox of Napoleon's enduring popularity in France, despite his responsibility for crushing defeats in 1812-1814 and again 1815.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the main features of the career of Napoleon Bonaparte
2. Critically evaluate historiographical debates concerning Napoleon's historical significance, reputation and legacy
3. Present historical evidence and argument in a recorded oral presentation
4. Discuss the importance of myth in history
5. Demonstrate skills at interpreting historical primary source documents
6. Present, analyse and synthesise historical evidence and argument in written form.

Subject Content

1. Napoleon Bonaparte's political career and policies in France and abroad; his attempts to control his own image; the Napoleonic legends; Bonapartism and its legacy after 1815.
2. Historical and contemporary images and interpretations of Napoleon;
3. The circumstances of Napoleon's rise;
4. Napoleon's claims to be a great general and how his victories were achieved;
5. Napoleonic diplomacy and whether he was personally responsible for the persistent warfare of the period 1799-1815;
6. The nature of Napoleonic imperialism; and whether Napoleon's rule in France might be considered enlightened or socially reactionary;
7. Napoleon's claims to liberalism and the appeal of the Napoleonic legend.

HUMN 3064 Politics, Power and Resistance

Credit Points 10**Legacy Code** 101985

Coordinator Alana Lentin ([https://directory.westernsydney.edu.au/search/name/Alana Lentin/](https://directory.westernsydney.edu.au/search/name/Alana%20Lentin/))

Description This unit examines the effects of politics on society and of the social on politics. Politics is understood as a struggle for defining how we live in common with others. We examine how power is attained and maintained and how some ideologies dominate over others to shape opportunities for challenging the status quo. Our focus is the contemporary nation-state in the context of globalisation, increased transnationalism, and shifting balances of power. Key themes include economic and social inequality in the modern state, the colonial power matrix, discipline and punishment, gender and race, and resistance to oppression. Each week will combine theoretical approaches and case-study based 'perspectives' on the topic.

School Humanities & Comm Arts**Discipline** Sociology**Student Contribution Band** HECS Band 4 10cp**Level** Undergraduate Level 3 subject**Restrictions**

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the relationship between political phenomena and social relations in contemporary societies
2. Engage deeply with the set readings and be able to articulate their main arguments.
3. Critically reflect upon the meaning, relevance and impact of resistance strategies.
4. Use written, visual and oral methods for communicating the above.

Subject Content

1. Introduction: "All Power to all the People"
2. Why everything costs money?
3. The Coloniality of Power
4. Global health inequities (perspective)
5. Indigenous resistance (perspective)
6. Stigma Power
7. Anti-Poverty Activism (perspective)
8. Gender and Power
9. Gender and Resistance (perspective)
10. The Punishing State
11. "Change Everything": The movement for abolition (perspective)
12. Conspiracy theory and the far-right
13. Conclusion

HUMN 3065 Postcolonial Australian Cinema

Credit Points 10

Legacy Code 101987

Coordinator Anne Rutherford ([https://directory.westernsydney.edu.au/search/name/Anne Rutherford/](https://directory.westernsydney.edu.au/search/name/Anne%20Rutherford/))

Description This unit will examine the role of cinema in forming images of national and cultural identity. The unit will explore the development of Indigenous and postcolonial cinema in Australia. The unit will discuss political debates and issues in postcolonial Australian cinema, and will raise questions about the nature of memory as it is mediated by cinematic experience, the representation of history, and the history of representation of indigenous cultures and peoples. The unit will examine these questions through a study of postcolonial Australian cinema produced by both Indigenous and non-Indigenous filmmakers.

HUMN 3066 Power as a Cultural System

Credit Points 10**Legacy Code** 102348

Coordinator Andrew McWilliam ([https://directory.westernsydney.edu.au/search/name/Andrew McWilliam/](https://directory.westernsydney.edu.au/search/name/Andrew%20McWilliam/))

Description In this unit students will explore notions of power, domination, authority and conflict from an anthropological perspective. Students will draw upon specific case studies of the social and political organisation of a variety of communities to understand how social order is perceived, achieved and maintained cross-culturally, through local systems of governance but also through social categories such as race, kinship, ethnicity and nations. Through these examinations students will also apply anthropological insights in order to understand how social practices such as participation, collaboration, resistance and violence operate in local political contexts. In the final part of the unit students will assess the various ways anthropologists work with and against local power structures and to what extent ethnography and applied anthropological work can intervene in systems of oppression.

School Social Sciences**Discipline** Anthropology**Student Contribution Band** HECS Band 4 10cp**Level** Undergraduate Level 3 subject**Pre-requisite(s)** HUMN 1016

Restrictions Successful completion of 80 credit points in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify major anthropological theories and paradigms that can be utilised to understand power relationships and political systems.
2. Use ethnographic case studies to analyse how the political is construed in various cultural contexts.
3. Critically reflect on some of the power relationships intrinsic to ethnographic fieldwork and other professional situations anthropologists are involved in.
4. Formulate research plans and strategies for conducting short term research projects in the anthropological tradition.

Subject Content

1. Social order and the structure of social life
2. Neighbourhoods, villages, cities as sites of power
3. Kinship as a social structure
4. Political anthropology
5. Warfare and violence/peace and conflict resolution
6. The politics of culture
7. Race, ethnicities and nations
8. Religion and power
9. Power and knowledge
10. Research ethics and power

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Literature Review	4 x 200 words	20	N	Individual
Intra-session Exam	800 words	20	N	Individual
Applied Project	1,500 words	40	N	Individual
Critical Review	20 minutes	20	N	Individual

HUMN 3067 Power, Politics and Knowledge

Credit Points 10**Legacy Code** 200752

Coordinator Patty Hodgson ([https://directory.westernsydney.edu.au/search/name/Patty Hodgson/](https://directory.westernsydney.edu.au/search/name/Patty%20Hodgson/))

Description Please note that this unit is no longer on offer. Please contact business.courses@uws.edu.au or phone (02) 9685 9200 for further information. The aim of this unit is to provide students with a thorough grasp of the complex relationships between power, politics and knowledge in organisational settings. It also highlights the need for managers to use power ethically and equitably in workplaces. These aims are addressed through an examination of a range of theories of power, and topics such as: distribution and exercise of power in organisations, organisational politics, gender and power, language and power, resistance to power, and others. Innovative class activities and assessment methods (e.g., brainstorming; storytelling; film analysis) are used in this unit to ensure that students are able to effectively apply theoretical concepts to real life situations.

School Business**Discipline** Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYB 9015 - Power Politics and Knowledge BUSM 3056 - Power Politics and Knowledge

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the links between power, politics and knowledge.
2. Critically appraise various classical and contemporary theories of power.
3. Apply elements of various theories of power to organisational events.
4. Explain the operation of power at micro- and macro levels.
5. Analyse patterns of distribution and operation of power in organisational settings.
6. Reflect on the importance of using power ethically in organisational settings

Subject Content

Unit overview/Introducing the notion of power.

Theories of power ? past and present.

Power elites.

Organisational power.

Organisational politics.

Power and leadership.

Power and ethics.

Language and power.

Resistance to power.

Subtle forms of power.

Gender and power: Are women as powerful as men in work settings?

Online discussion (exam preparation).

Summary and conclusions.

Teaching Periods

HUMN 3068 Public Health Response in Complex Emergencies

Credit Points 10

Legacy Code 102369

Coordinator Nidhi Wali (<https://directory.westernsydney.edu.au/search/name/Nidhi+Wali/>)

Description This unit examines several different aspects of public health in emergencies including rapid assessment of the health status of the population, public health surveillance measures, and the priorities in an emergency phase. To effectively respond to complex emergencies, government and non-government organisations must enact policy and activity to prevent, protect against, and respond to injuries and threats posed by infectious disease outbreaks and hunger. The unit provides an outline of the principles of disaster prevention, preparedness and mitigation, and introduces students to aspects of human resources in the coordination of different operational initiatives.

School Social Sciences

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Co-requisite(s) HUMN 2017

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define different types of natural and human-induced disasters and outline public health responses required for different phases of emergencies.
2. Outline conceptual and methodological approaches related to public health in complex emergencies to inform health priorities, and articulate frameworks and standards that inform and govern the prioritisation process in complex emergencies.
3. Describe an understanding of complex emergency management systems and plans including the humanitarian charter, minimum standards, and the anatomy of disaster response.
4. Describe key players in emergency response and management, their roles and challenges they face.
5. Identify and critically analyse major international guidelines and standards that govern humanitarian responses, and recognise enabling and disabling factors associated with the adherence to such standards.
6. Analyse the national and international contextual, policy, and legal frameworks that govern a complex emergency response.
7. Critically analyse challenges and ethical dilemmas associated with various emergency scenarios.

Subject Content

1. Epidemiology of disasters
2. Principles of disaster prevention and mitigation
3. Generating the evidence to inform interventions
4. Top health priorities in complex emergencies
5. Mass vaccination and vaccine-preventable diseases
6. Water and sanitation
7. Food and nutrition
8. Shelter and site planning, and non-food items
9. Reproductive health
10. Accountability, effectiveness, and ethical dimensions of humanitarian response
11. Bringing it together: Critical appraisal of the evidence

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Reflection	150 words per week (1-8)	20	N	Individual
Essay	1,500 words	40	N	Individual
Quiz	2 hours	40	N	Individual

HUMN 3069 Queer Culture

Credit Points 10

Legacy Code 102191

Coordinator David McInnes (<https://directory.westernsydney.edu.au/search/name/David+McInnes/>)

Description Queer culture will introduce students to queer theory and provide opportunities to use these theories in the close study of cultural practice and politics. Queer theory counters the idea that people have stable sexes, genders and sexualities. Instead, queer theory argues that the experience of those that are homosexual, bisexual, transgender, and intersex highlight the frequent mis-matches in what are taken for granted to be 'normal' experiences of identity. Queer theory demonstrates the impossibility of a natural or normal sexuality, but it also demonstrates the problem with the terms 'man' and 'woman', 'male' and 'female', 'normal' and 'abnormal'. In Queer culture students will learn about queer theories and have the opportunity to apply these theories to an in-depth and personally engaging study of queer politics and activism; queer media, film and performance; and queer sex, selfhood, and identity trans/formations.

School Humanities & Comm Arts

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of key aspects of queer theory
2. Apply a range of queer theories to the research and analysis of cultural practice
3. Engage in debate and discussion, in writing online about questions of queer politics, activism and research.
4. Write a well-structured, analysis-based report on research into an aspect of queer culture using queer theory.

Subject Content

- Queer theory
- Queer politics and activism - gay Liberation, The Queer movement, HIV/AIDS politics and activism, international Queer politics and activism
- Queer media, film and performance - drag, Queer film, Queer critiques of mainstream film, online and virtual communities
- Queer sex, selfhood and identity trans/formation - Queer sexual practice and sexual cultures, queerings of masculinity and femininity, for example, female masculinities
- research approaches for investigating Queer cultures and Queer cultural practice

Prescribed Texts

- A book of readings/online reading resources will also be produced.

Teaching Periods

HUMN 3070 Rethinking Research with Indigenous Australians: Independent Study Project (Day Mode)

Credit Points 10

Legacy Code 101759

Coordinator Madison Shakespeare (<https://directory.westernsydney.edu.au/search/name/Madison+Shakespeare/>)

Description This unit will provide students with an exciting opportunity to undertake an Independent Study Project on an Indigenous topic. Students will gain greater knowledge of Indigenous people and develop effective communication skills as well as a level of cultural competency. The Independent Study Project will expose students to the complexities of the cultural inter-relationships and the politics of undertaking research with Indigenous people. It will also provide students with skills and ideas for future research projects that will add to Indigenous knowledge and provide a sound foundation for ethical research.

School Humanities & Comm Arts

Discipline Indigenous Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Undertake culturally appropriate desk top research on an Indigenous topic.
2. Review and analyse appropriate literature relevant to their Independent Study Project.
3. Identify appropriate research methodologies relevant to Indigenous people and their communities.
4. Record and report their research findings to Indigenous people/communities.

Subject Content

- Introduction to research and research methodologies
- Conducting culturally appropriate and ethical research
- Undertaking a literature review
- Applying relevant and current theory when ?doing?f research with and for Indigenous people/communities
- Designing an appropriate and creative project
- Reporting research finding to Indigenous people and their communities

HUMN 3071 Self and Society

Credit Points 10

Legacy Code 101330

Coordinator Helena Onnudottir ([https://directory.westernsydney.edu.au/search/name/Helena Onnudottir/](https://directory.westernsydney.edu.au/search/name/Helena%20Onnudottir/))

Description In Spring 2020 this unit replaced by 102788 - Self and Society. This core theory unit for sociology majors introduces students to traditional and contemporary debates in social thought. The unit reviews sociological thought in the context of changing conceptions of the relation between the individual and society and the formation of the self. A number of theorists and theoretical areas are addressed, employing as the focal point of study or analysis what has been called middle range theory. This enables students to better grasp the relation between theory and application and to uncover competing theorists and ideas that may complement or be opposed to the positions argued in the unit.

HUMN 3075 Sociology of Religion

Credit Points 10

Legacy Code 101359

Coordinator David Tittensor ([https://directory.westernsydney.edu.au/search/name/David Tittensor/](https://directory.westernsydney.edu.au/search/name/David%20Tittensor/))

Description In this subject some of the main sociological approaches to the study of religion will be considered. The subject will be orientated particularly to the tension between religion and social theory in the evolution of sociological thought. It addresses the impact of religion and religious bodies on Australian society and politics. The unit will focus on the relation of theory and practice, on the research of contemporary religious practice, and on the contemporary relevance of major theorists in the sociology of religion. It will address issues such as Buddhism, Fundamentalism(s), gender in religion, globalisation, Islam, modernity/post modernity, neo-paganism, networks in spiritualities, New Age, popular culture, and new religious movements.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects Unit LGYB 5040 - Sociology of Religion

Restrictions

Successful completion of 80 credit points of study.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Provide a critical introduction to some of the major theorists in the sociology of religion.
2. Explore the major rationales for religion as a belief system and their relevance to the contemporary and historical development of institutionalised, and networking forms of, religious practice - with particular reference to the secularisation debate.
3. Investigate the formation of major religious institutions and emergent religious groups, the part they have played in the formation and support of dominant ideologies and the existing social structure, and how these factors have influenced the peculiar nature of religion in Australia.

Subject Content

1. Religion ideology and the individual (the nature of belief systems and the role of sociology in the analysis of religion)
2. Is the influence of religion in society declining? Modernity and the secularisation debate.
3. Durkheim and the functions of religious belief. Religion, community and integration in contemporary society.

4. Weber - Religion and the rational overview
5. State and Religion- The Church of England and the Catholic Church.
6. Islam
7. Buddhism and Eastern Religions
8. New Religious Movements and Cults.
9. Alternative Spiritualities (New Age and Neo-Paganism)
10. Post-modern religions: Fundamentalism(s), Consumer Religions and Hyper-Real Religions.

HUMN 3076 Sultans, Colonists and Nationalists: Indonesia C1200-1942

Credit Points 10

Legacy Code 102187

Coordinator Steven Drakeley ([https://directory.westernsydney.edu.au/search/name/Steven Drakeley/](https://directory.westernsydney.edu.au/search/name/Steven%20Drakeley/))

Description This unit examines the historical background of Indonesia's struggle to attain independent nationhood. Emphasis will be placed on social, cultural and political factors that shaped Indonesia prior to 1942, encompassing the classical period of the Hindu-Buddhist kingdoms, the rise of the early modern Islamic sultanates, the first encounters between Europeans and the peoples of the 'Malay world', the emergence of the Dutch East India Company (VOC) as a dominant force in the region, the subsequent imposition of the Dutch colonial rule, and, most significantly, the development of modern Indonesian nationalism.

Discipline History

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Incompatible Subjects HUMN 2054 - The History of Modern Indonesia

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the significant historical forces that shaped Indonesia prior to 1942
2. Describe the cultural, religious and political diversity of Indonesian society
3. Recognise the factors that contributed to the rise and fall of traditional Indonesian polities during the pre-colonial era
4. Outline key differences between the Hindu-Buddhist and Islamic kingdoms
5. Discuss the pattern of Dutch colonial rule and changing economic structures in Indonesia
6. Evaluate the impact of modern and traditional influences on the development of Indonesian nationalism
7. Demonstrate effective literacy skills and research techniques.

Subject Content

- Indonesia as An archipelagic cross-roads
- Traditional patterns of state formation and The Legacy of cultural borrowings from India and China
- religious Transformation under Islam and The emergence of A Muslim commercial class
- The rise of Islamic maritime States in The early modern period
- The arrival of European trading companies and their impact upon indigenous political and trading systems
- VOC ascendancy and expansion
- Consolidation of Dutch colonial rule in the 19th century
- The impact of colonialism on indigenous society
- The Dutch Civilising mission and its unexpected outcomes
- The rise of Indonesian nationalism in the early 20th century
- forms of organised resistance to Dutch colonial rule and key ideological influences
- Cooperation versus non-Cooperation
- Subversive forms of Indonesian resistance to Dutch rule
- The Dutch colonial state on The eve of World War II

HUMN 3077 Sustainable Futures

Credit Points 10

Legacy Code 101569

Coordinator Sebastian Pfautsch ([https://directory.westernsydney.edu.au/search/name/Sebastian Pfautsch/](https://directory.westernsydney.edu.au/search/name/Sebastian%20Pfautsch/))

Description In this unit we will explore the questions 'can we create a sustainable society? If so what would it look like and how could it be done; is it possible to live ethically with each other and the planet?' While major contemporary theoretical concepts will be explored the emphasis is on developing sustainable alternatives to the way we now live both locally and globally. Particular attention will be paid to thinking ecologically, postcolonial development and issues of race and gender.

School Social Sciences

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Compare and contrast contemporary theoretical approaches to sustainable development

2. Apply key concepts and theories to practical solutions for sustainable living
3. Critically reflect upon major critiques of sustainability and development theories and practices i.e. postcolonial perspectives; ecofeminism and gender.
4. Create sustainable solutions to a key issue of sustainable living
5. Recognise key theories and concepts as presented in class and reading materials.

Subject Content

Discourses of development, globalisation and sustainability

Post colonialism

Ecofeminism

Social movements and activism for sustainability

Developing diversity

Sustainable consumption: agriculture, food & resources

Living spaces and places: urban, regional and rural planning and design

HUMN 3078 The Anthropologies of Gender and Sexualities

Credit Points 10

Legacy Code 102349

Coordinator Helena Onnudottir ([https://directory.westernsydney.edu.au/search/name/Helena Onnudottir/](https://directory.westernsydney.edu.au/search/name/Helena%20Onnudottir/))

Description Examining the social construction of gender has been central to anthropological inquiries since the 1930s. Early ethnographic studies were instrumental in debunking gender essentialism and challenging the hegemony of western constructs about 'masculinity'

and 'femininity'. Since the 1930s, critical Anthropological theories and ethnographies have through cross-cultural comparison, demonstrated the great variation in expressions of individual sexuality/ies, the dynamics and confines behind the construction of gender roles and the cultural meaning and expression of gender categories across the globe. This unit will address the ongoing exploration of and challenges to the sex (biology) vs. gender (culture) dichotomy and contemporary cultural, social and political transformation (manipulation) of these categories.

School Social Sciences

Discipline Anthropology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) HUMN 1016

Restrictions Successful completion of 80 credit points in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the concepts and theories of the Anthropologies of Gender and Sexuality.
2. Produce a reflective and comparative analysis on cross-cultural case studies.
3. Critically analyse the gender diversity across human cultures and societies.
4. Apply Anthropological theory to contemporary case studies.
5. Articulate some of the ways biological categories are culturally mediated.

Subject Content

Anthropology of gender.
 Anthropology of Sexualities.
 Masculinities/femininities/third gender categories.
 Sex/gender.
 Gender and power
 Cultural constructs vs. biological determinism.
 Cross-cultural comparison of gender roles.
 Fluidity and diversity of human sexualities.
 To do or not to do? Sex and taboos.
 The gendered body

HUMN 3079 The Asian Century

Credit Points 10

Legacy Code 101957

Coordinator Karen Entwistle ([https://directory.westernsydney.edu.au/search/name/Karen Entwistle/](https://directory.westernsydney.edu.au/search/name/Karen%20Entwistle/))

Description This unit explores whether the 21st century can be referred to as the Asian Century. It addresses itself to a host of questions, including: What is the Asian Century? How does it differ from the American Century (20th Century) and the British Century (19th Century)? What are the historical, cultural and philosophical foundations of the Asian Century? How has Asia been transformed since World War II, and more recently? What are the risks and challenges for Asian states in the Asian Century? What are the challenges and the opportunities for the West (including Australia) in the Asian Century?

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. explore and evaluate Asia's regional dynamics
2. discern the historical, philosophical, and cultural underpinnings of the Asian Century
3. compare and contrast various Asian nations' trajectories since the arrival of the West in the mid-19th Century
4. appraise the contributions which different scholars have made to our understanding of the Asian century

Subject Content

- The British and The American centuries
- The Transformation (and rise) of Asian nations, including Japan, China, India, South Korea, Singapore and Indonesia
- The development and Importance of Southeast Asia
- Crisis points in The region
- Central Asia's role in the Asian century

- Applicability of various theories, including modernisation and realist theory, to The Asian century
- social inequality and disparity, political Corruption, The middle income gap, Competition for finite natural resources, environmental damage and Global warming
- China as a threat theory: containment or engagement (or somewhere in between)?
- Continued US primacy in The region? or power-sharing between The US and China? strategic competition? or partnership?

HUMN 3080 The History of Southeast Asia

Credit Points 10

Legacy Code 102491

Coordinator Steven Drakeley ([https://directory.westernsydney.edu.au/search/name/Steven Drakeley/](https://directory.westernsydney.edu.au/search/name/Steven%20Drakeley/))

Description This unit introduces students to the history of Southeast Asia, and to the major ideas and debates pertaining to the historical development of Southeast Asia as an important and distinctive world region in its own right. The course will examine the historical, cultural and religious factors that have shaped Southeast Asian

societies, from antiquity to the modern era. Key topics include the origins and characteristics of early civilisations, traditional patterns of state formation, global trade networks and European imperialism, popular resistance and the nationalist challenge to the colonial order, decolonisation in Cold War Southeast Asia, and nation-building in the twentieth century.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the central themes and debates pertaining to the historical development of Southeast Asian societies and the region.
2. Demonstrate basic analytical skills of historical interpretation, argument and evidence relevant to Southeast Asia.
3. Explain the various ways in which geography and environment have affected the historical development of the Southeast Asian region.
4. Analyse the historical processes that created the complex societies of Southeast Asia.
5. Scrutinise major cultural borrowings, religious influences and the impact of European colonialism on individual nations of Southeast Asia.
6. Distinguish between the historical development of Southeast Asian states from the early modern to the post-colonial era.

Subject Content

The setting: the population, environment and geography of Southeast Asia

The Indianisation of Southeast Asia

The rise and fall of the classical states

The Islamisation of Southeast Asia

Trade and its networks during the 'The Age of Commerce'

East-west encounters in Southeast Asia: the first European impact

European colonialism in 19th century Southeast Asia

The economic transformation of Southeast Asia during the colonial era

The rise of nationalism and challenges to colonial rule

Progress and modernity in 20th century Southeast Asia

The impact of the Japanese occupation and the revolutionary moment

Independence and a new world order

Cold War Southeast Asia

The Southeast Asian region in the modern world

HUMN 3081 The International Relations of the Middle East Since 1945

Credit Points 10

Legacy Code 101783

Coordinator James Trapani ([https://directory.westernsydney.edu.au/search/name/James Trapani/](https://directory.westernsydney.edu.au/search/name/James%20Trapani/))

Description This unit offers a historical study of the international relations of the Middle East from 1945 to the present. It examines the relations of Middle Eastern states to global structures of power; the pattern of relations between regional states; the causes of regional wars and international co-operation; the impact of domestic factors on the foreign policy of states; the importance of oil to international politics and the global economy; and the role of ideologies and non-state forces in international relations and between states in the Middle East.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate ability to develop and expound an argument in written form
2. Skills in oral expression refined by discussing and debating key issues, episodes and themes relevant to the history of the Middle East since 1945
3. Ability to conduct research and demonstrate a depth of knowledge and analysis of particular themes, issues or aspects of post-1945 Middle Eastern history
4. Ability to demonstrate a broad understanding and knowledge of the content of the subject
5. Demonstrate ability to discuss and critically analyse primary texts and other literature related to the subject
6. Develop both written and oral expression, essential skills for students at the upper-level and beyond.

Subject Content

Historical perspectives on the Middle East
The formation of the modern Middle East
The interplay of domestic, regional and international rivalries
The Cold War and the Middle East
The enduring Arab/Israeli conflict
Crises and conflict in the Middle East after the Cold War
Modern and religious ideologies and challenges to the Middle East states: transnational movements
Oil and the Middle East: regional and international political and economic implications

The modern Middle East in historical perspective

HUMN 3082 The Making of the 'Aborigines'

Credit Points 10

Legacy Code 101757

Coordinator Madison Shakespeare ([https://directory.westernsydney.edu.au/search/name/Madison Shakespeare/](https://directory.westernsydney.edu.au/search/name/Madison%20Shakespeare/))

Description This unit is available to all undergraduate students who have open electives. The Making of the 'Aborigines' explores the complex human relations and historical forces that have constructed Australia's indigenous people as 'Aboriginal' and/or 'Torres Strait Islander'. It will involve a critical examination of a range of contemporary social and political issues impacting on and being engaged by Indigenous people. A more comprehensive understanding of the position of Indigenous people in contemporary Australian society will enable students to engage more effectively with Indigenous people.

School Humanities & Comm Arts

Discipline Indigenous Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. identify key social and political issues that have impacted and shaped Aboriginal and/or Torres Strait Islander lives and communities;
2. critically analyse the impact of key social and political issues on Indigenous Australia;

- explain the impact of colonisation on Indigenous peoples and the ramifications of such for Non-Indigenous Australians;
- identify Indigenous peoples' strategies of resistance to the colonising process - comparative studies;
- use effective research skills to investigate the social and political issues that impact Indigenous Australia.

Subject Content

Invasion and Colonisation
 Terra Nullius
 State and Commonwealth Policies e.g. Protection, Assimilation, Integration, Self-Determination
 Indigenous social indicators
 Indigenous welfare dependence
 US Civil Rights Movement and influence on Indigenous Australia
 1967 Referendum
 Politics of Land/Land Rights/Native Title
 Deaths in Custody
 Stolen Generation
 National Apology to the Stolen Generation
 Northern Territory Intervention
 Stolen wages
 Repatriation of Indigenous Remains
 Revisionist policies e.g. NSW DSE Aboriginal Education Policy

HUMN 3084 Theories of Conflict and Violence

Credit Points 10

Legacy Code 100969

Coordinator Mark G. E. Kelly ([https://directory.westernsydney.edu.au/search/name/Mark G. E. Kelly/](https://directory.westernsydney.edu.au/search/name/Mark%20G.%20E.%20Kelly/))

Description Why do humans kill? What is the nature of war? This course is a selection of different established theories offering explanations of human violence and social conflict. Both theories of individual violence and aggression, and collective conflict are studied to give students a perspective on the forces behind these phenomena. Theories from politics, philosophy, psychoanalysis, sociobiology, sociology, and cultural studies are introduced to exemplify the classic positions and lines of reasoning. These are used to question and explain current forms of violence and conflict, and to give students better understanding of the issues behind attempts to forestall, manage or end conflict.

School Humanities & Comm Arts

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 0295 - Theories of Violence and Conflict

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Explain the accepted causes and origins of human violence - individual and collective.
- Analyse the traditions and forces at work in different particular instances of human violence.
- Describe the typical forms of argument used in explaining or justifying conflict.
- Evaluate the reasoning in such explanations and justifications.
- Examine ethical issues in human conflict and violence.

Subject Content

- introduction to evolutionary theories - role of inter and intra species struggles.
- Origins and development of social Darwinism and socio-biology
- Recent sociobiology and new field of evolutionary Psychology and critiques
- Basic Psychoanalytic accounts of human aggression and violence/violence and sexuality
- Classic theories of War: Sun Tzu and Von Clausewitz
- Ethical Issues of War and its justification
- The state and violence - Classic statements and modern amendments from Machiavelli, Hobbes, Kant to Weber, Benjamin, Foucault
- Conflict views of modern society - Marx, Sorel and class
- Spectacles of violence in contemporary culture
- Categories of violence: naming and representing
- contemporary Issues of Conflict and violence

Equivalent Subjects HUMN 3014 - Australian History since 1860 - 1920
HUMN 3016 - Australian History since 1920

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the chronology of events in twentieth century Australia.
2. Analyse the causal factors underlying events and social movements in twentieth century Australia.
3. Identify and analyse significant trends and themes in twentieth-century Australian history.
4. Implement a variety of skills and approaches to historical interpretation
5. Evaluate sources to employ historical analysis and argument.

Subject Content

Unit content may vary according to teaching staff available, and may include the following:

- Federation: inclusion and exclusion.
- Australia and The first World War.
- Australia in the 1920s.
- The Great Depression and the 1930s.
- Australia and The second World War.
- The Petrov Affair.
- post-War rumblings: Feminism, race and assimilation.
- Social protest in the 1960s.
- The Whitlam years and their impact on Australian society.
- The final decades: globalisation, indigenous politics and prosperity.

Assessment

HUMN 3088 Understanding Freedom

Credit Points 10

Legacy Code 101798

Coordinator Dimitris Vardoulakis ([https://directory.westernsydney.edu.au/search/name/Dimitris Vardoulakis/](https://directory.westernsydney.edu.au/search/name/Dimitris%20Vardoulakis/))

Description "Understanding Freedom" consists of a close analysis of major theories of freedom from ancient times to the contemporary world. It explores the relation between freedom and imprisonment, freedom and politics, freedom and the everyday, as well as the way that freedom informs the production of culture.

School Humanities & Comm Arts

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. explore contemporary theories of freedom;
2. recognise ways in which theories of freedom can inform contemporary political ideas;
3. outline theories of freedom in Western thought;
4. discuss the role of freedom in philosophy and culture;
5. analyse and critique the traditional understanding of freedom;
6. evaluate how theories of freedom structure the thought of key-thinkers; and

7. apply knowledge gained in this subject to other areas of their experience

Subject Content

- "Understanding Freedom" looks at the way that freedom has been conceptualized and traces the development of that idea in Western thought.
- It examines how freedom is articulated in every-day life, and explores contemporary theories of freedom.
- The Examination of The concept of freedom will be carried out by concentrating on key thinkers who have written on freedom.

HUMN 3091 Violence in Everyday Life

Credit Points 10

Legacy Code 101898

Coordinator David Tait ([https://directory.westernsydney.edu.au/search/name/David Tait/](https://directory.westernsydney.edu.au/search/name/David%20Tait/))

Description The unit provides an overview of the 'dark side' of human society and culture - violence. It examines how violence shapes, threatens and informs aspects of everyday life at home, work, school, the sports field and the street. Through a series of structured learning activities students engage with a range of documents and images to explore practices and experiences of violence. The role of institutions like the state, churches and sporting bodies in regulating violence will be considered. Students will gain skills in understanding the cultural milieu of marginal groups, languages of power and the emotions of excitement, fear and terror produced by acts of violence, skills useful for effective functioning in the workplace and family. The unit provides skills for honours level research in social and cultural analysis, law and legal studies, criminology, and history and political thought.

School Humanities & Comm Arts

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. critically read, evaluate and interpret texts about violence
2. integrate ideas and data from several different disciplinary traditions to develop an argument
3. work productively with peers to develop a shared research project
4. elaborate a research concept into a researchable question.

Subject Content

- . Violence as 'ordinary' behaviour - human nature, social structure or individual deviance?
- . Structural violence - slavery, racism and totalitarianism
- . Religion and violence - crusades, conquistadores and coexistence
- . Violence at home - conflict in intimate relationships
- . Ritualised violence and sport - on and off the field
- . Psychopaths in the workplace - creating safe environments
- . Turf wars - gangs, neighbourhoods and community safety
- . Cyberbullying and cybercrime
- . Hoons and hooligans - young men, alcohol and thrill-seeking
- . Violent education - shaping young minds, reproducing class inequalities
- . Making violence routine: training killers in the military
- . Developing peaceful futures?

HUMN 3092 WWII in Asia and the Pacific

Credit Points 10

Legacy Code 101830

Coordinator Peter Mauch ([https://directory.westernsydney.edu.au/search/name/Peter Mauch/](https://directory.westernsydney.edu.au/search/name/Peter%20Mauch/))

Description This unit provides inquiry into the origins, course, and aftermath of WWII in Asia and the Pacific. We will ask why Japan and China went to war with each other in the 1930s; we will also seek understanding of why and how that war came to include the United States, Britain, the Soviet Union, the Netherlands, Australia, New Zealand, and practically all of Asia. We will examine the atomic attacks against Hiroshima and Nagasaki: Was the bomb a necessary evil? Or could/should the US have avoided using the bomb? We will also look intensively at post-WWII Asia. How did two wartime allies - the US and the Soviet Union - become bitter enemies within months of the war's end? Why did China descend into civil war? What was the war in Korea all about? Were wars of independence throughout SE Asia unavoidable? How was it that Japan escaped much of this postwar misery?

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. identify the complexity of international affairs (in general), and (more specifically) analyse the international environment before, during, and after WWII
2. outline the issues that spark wars (in general), and (more specifically) discern the issues over which nations fought during WWII
3. evaluate key differences in scholarly interpretations of events
4. analyse primary source materials
5. construct a sound argument based on solid research into both primary and secondary sources

Subject Content

Origins, course, and aftermath of WWII in Asia and the Pacific
 Japanese-U.S. relations; Sino-Japanese relations; Sino-U.S. relations; Soviet-U.S. relations; Japanese-Soviet relations
 Colonialism and SE Asian independence
 The atomic bomb
 The International Military Tribunal for the Far East (IMTFE), war crimes, and international law
 Ideology (including democracy, autocracy, authoritarianism, and communism) as a factor in international relations

HUMN 3093 War

Credit Points 10

Legacy Code 102423

Coordinator Peter Mauch ([https://directory.westernsydney.edu.au/search/name/Peter Mauch/](https://directory.westernsydney.edu.au/search/name/Peter%20Mauch/))

Description Have you ever wondered what war is good for? Edwin Starr thought it was good for "absolutely nothing." This unit will take you on an intellectual journey, around the globe and across history, as you reach your own answer to this question. You will evaluate the norms associated with war as well as the experiences of warriors from ancient through modern times. You will assess the role of militias, armies, navies, and air forces in the broad sweep of history. You will consider nuclear weaponry, terrorism, guerrilla warfare, just war theory, as well as anti-war movements.

Teaching Periods

HUMN 3096 What is the Human?

Credit Points 10

Legacy Code 101010

Coordinator Chris Fleming ([https://directory.westernsydney.edu.au/search/name/Chris Fleming/](https://directory.westernsydney.edu.au/search/name/Chris+Fleming/))

Description This unit examines theories of human nature from a variety of historical and disciplinary perspectives. It engages with, and encourages the student to evaluate, conceptions of the human - some of which have had wide currency in the broader culture and some which have not. The unit also engages the idea of whether a unified conception of human nature is tenable at all.

School Humanities & Comm Arts

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYC 1283 - What is the Human?

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate their familiarity with the most pervasive ideas of human nature in the western philosophical and anthropological traditions.
2. Recognise the complex and intricate links between concepts of human nature and epistemology, religion, ethics and art.
3. Be conversant with debates surrounding the idea of 'the human' and the very possibility of theorising at this level of generality.

Subject Content

1. Classical and contemporary philosophies of human nature
2. Contemporary anthropology and cross-cultural studies
3. Perspectives on human nature from science, especially contemporary biology
4. Postmodern critiques of the possibility of the 'sciences of man'
5. Implications for ideas of human nature on epistemology, ethics, and art
6. The idea of the 'post-human' and technology

Assessment

Teaching Periods

HUMN 3098 Genders and sexualities: beyond the binary

Credit Points 10

Legacy Code 102733

Coordinator Kerry Robinson ([https://directory.westernsydney.edu.au/search/name/Kerry Robinson/](https://directory.westernsydney.edu.au/search/name/Kerry%20Robinson/))

Description This unit encourages students to critically reflect on how their own identities and experiences of genders and sexualities are shaped by broader social practices that define what is natural and what is normal. The unit focuses on two substantive topics: the body and institutions. Bodies are usually understood through biological explanations of gender and sexuality. However, this unit will consider how the body is shaped by the social discourses and practices through which genders and sexualities are produced. The unit investigates how age, race, class and ability are coded differently in terms of gender and sexuality. Institutions - families, schools, workplaces and religions - will be studied as sites where genders and sexualities may be observed but also produced and negotiated.

School Social Sciences

Discipline Gender Specific Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse gender and sexuality in historical, political and social context.
2. Apply a critical understanding of social theories to gender and sexuality.
3. Demonstrate capacity to apply theories of gender and sexuality to personal experiences.
4. Assess institutional discourses of gender and sexuality.

Subject Content

Introduction: Gender, sexuality, identity and intersectionality
 Theoretical perspectives on gender and sexuality; relationship between gender and sexuality
 Gender, sexuality & power: Discourse, knowledge & subjectivity
 Gender and sexuality across the lifespan
 Gender, sexuality and the body

Gender, sexuality and violence
 Gender, sexuality and the family
 Gender, sexuality and the workplace
 Gender, sexuality and education
 Gender, sexuality and politics (National & global)

HUMN 3100 Social Sciences International Placement (1): Preparation for Placement

Credit Points 10

Legacy Code 102723

Coordinator Nichole Georgeou ([https://directory.westernsydney.edu.au/search/name/Nichole Georgeou/](https://directory.westernsydney.edu.au/search/name/Nichole%20Georgeou/))

Description This unit is designed to equip students with the knowledge and skills required to successfully undertake a placement abroad, or in the case of those students who need to undertake a local placement, an organisation in Australia that is focused on international development. To this end, to prepare students for 102724 Social Sciences International Placement (II) the unit examines issues of sustainability and the political and ethical dimensions of volunteering, development and/or fieldwork. It interrogates the rise of volunteering and learning for development abroad experiences, and provides opportunities for students to reflect on their own part in this growth 'industry'. Workshops and online activities will cover practical topics such as health and wellbeing, and living and working in development contexts. They will also provide students with opportunity to learn more about their placement country and/or organisation and to begin

developing skills in intercultural communication and interaction, ethnographic observation and reflexivity.

HUMN 3101 Social Sciences International Placement (II): Placement

Credit Points 20

Legacy Code 102724

Coordinator Nichole Georgeou ([https://directory.westernsydney.edu.au/search/name/Nichole Georgeou/](https://directory.westernsydney.edu.au/search/name/Nichole%20Georgeou/))

Description This unit provides students with the opportunity to apply skills and knowledge acquired during the first two years of their degree to a 'real world' setting. Students will undertake a 14 week internationally focused placement with organisations in, for example, the community, not-for-profit or government sectors. The unit coordinator will partner students with an international organisation, and together with the placement host(s) will jointly supervise the student. The work that students undertake during placement will vary, but may include: community visits, community consultation, development of educational programs, policy evaluation, research and report writing. Relevant activities may also be undertaken at another university in the placement country. The work placement will provide students with invaluable experience working in social sciences related fields in cross-cultural contexts. Prior to commencing the placement, students are required to complete pre-placement coursework (in co-requisite unit 102723 Social Sciences International Placement (I)). On return from placement the experience will be rounded out with the completion of 102725 Social Sciences International Placement (III). Students are required to complete a Working with Children Check, and medical clearance may also be required to undertake placement in a developing country, along with a Working With Children check for certain organisations. Those students unable to undertake an internationally based placement for health or personal reasons should contact the Unit Coordinator before enrolment in this unit to discuss

available options for being placed locally. Students should also note that NSW Health facilities have further, specific requirements, and should seek advice from the Unit Coordinator.

Co-requisite(s) HUMN 3100

Restrictions NOTE: Enrolment in the Summer session is only available under limited circumstances. Please contact the subject Coordinator for any further information. Students must be enrolled in program 1667 Bachelor of Social Science; 1733 Bachelor of Social Science (Advanced); 1790 Bachelor of Anthropology; 1664 Bachelor of Tourism Management; 1735 Bachelor of Humanitarian and Development Studies, 6023 Diploma in Social Science/ Bachelor of Social Science, 6027 Diploma in Social Science/Bachelor of Humanitarian and Development Studies or 6030 Diploma in Social Science/Bachelor of Tourism Management. Students enrolled in 1667, 1664, 1733, 6023 or 6030 must have achieved a minimum GPA of 5 in order to enrol. All students must also have completed 160 credit points of study, and should seek medical clearance if they are to undertake placement in a developing country context. Students who have not been cleared for undertaking international placement may be able to undertake a local placement, pending medical clearance for local placement activities.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Draw on placement experience to identify challenges in the workplace.
2. Develop responses to workplace challenges.
3. Demonstrate reflexivity in professional and cross-cultural settings.
4. Demonstrate intercultural understanding and awareness.
5. Apply social sciences knowledge in the workplace.

Subject Content

Intercultural immersion
Practising reflexivity in professional and cross-cultural settings
Development, volunteering and fieldwork in practice

Work experience: applying social sciences skills and knowledge in international work contexts.

HUMN 3102 Social Sciences International Placement (III): Post-placement Reflections

Credit Points 10

Legacy Code 102725

Coordinator Nichole Georgeou ([https://directory.westernsydney.edu.au/search/name/Nichole Georgeou/](https://directory.westernsydney.edu.au/search/name/Nichole%20Georgeou/))

Description This unit is the final component of the Social Sciences International Placement. Facilitated by the unit coordinators the unit comprises a series of workshops and assessments, which will provide opportunities for students to debrief and reflect critically on their placement experience. Assessments and workshops are designed so that students learn how to convey newly acquired skills, perspectives and life choices in different settings (classroom; job interviews and applications), and to apply the placement experience in immediate and life-long educational, professional and personal endeavours. For those students who have undertaken a placement overseas, the unit is also designed to encourage reintegration into their home culture. Specifically, assessments and workshops are designed so that students

intentionally process and analyse the layered meanings of their time spent abroad, and the feelings and experiences of coming 'home'.

Credit Points 10

Legacy Code 102741

Coordinator Alexandra Coleman ([https://directory.westernsydney.edu.au/search/name/Alexandra Coleman/](https://directory.westernsydney.edu.au/search/name/Alexandra%20Coleman/))

Description This unit is designed to extend the employability, professional skills and networks of Bachelor of Arts students. Every year, a range of options will be offered to students. These may involve activities as diverse as group research projects with existing available databases; simulation projects with 'real world' problems determined in partnership with an external agency or internal Western organisational unit; the development of a small-scale event that services a School objective and a community need; or a disciplinary or inter-disciplinary capstone project. The common objective is the development of students' skills in collaboration and team work through a focus on authentic tasks and problem-solving.

HUMN 3104 Historical Methodologies

Credit Points 10

Legacy Code 102766

Coordinator Bridget Brooklyn ([https://directory.westernsydney.edu.au/search/name/Bridget Brooklyn/](https://directory.westernsydney.edu.au/search/name/Bridget%20Brooklyn/))

Description The unit is an overview of Western historical thought and writing, from Herodotus to Foucault, demonstrating different approaches to historical knowledge. We examine some of the many ideas and sources that have influenced historical writing as well as some of the enduring questions, such as 'What is historical truth?' and 'Can history ever be objective?' Our exploration will include both close reading of texts and more 'hands-on' exercises to gain insight into different historical methodologies.

HUMN 2042 OR

HUMN 2067

Equivalent Subjects HUMN 3083 - Theories and Methods of History

Restrictions

Students are required to have completed two of the three Level 1 and 2 History and Political Thought or Modern History core units.

Successful completion of 80 credit points of study in currently enrolled program.

Assumed Knowledge

Students are expected to have completed prior study in either the History and Political Thought or Modern History majors and to understand the conventions of essay writing and referencing in history.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise key developments in European historiography over several centuries.
2. Analyse important debates over historical writing, such as the question of historical truth.
3. Evaluate the ways in which historical ideas are communicated to the public at large, and the role they play in matters of community identity.
4. Interpret the challenges posed by different types of historical sources.
5. Assess the ways in which historical knowledge is developed.

Subject Content

Historians of classical and medieval Europe.

Historicism

The emergence of social history.

The development of alternative histories of class, race and gender.

Facts, interpretation, objectivity and the postmodern challenge.

Ideas of historical time.

Contested histories, including the Australian frontier wars.

Oral history and oral tradition, including Aboriginal and Torres Strait Islander oral forms in Australian history.

Interpreting sources

Public history

History and the creative imagination.

1. Analyse the effect of culture as it applies to a national/ workplace setting
2. Apply academic knowledge to existing situations
3. Integrate existing knowledge with new, on-the-spot discoveries

4. Reflect on the impact of the subject on your intellectual and professional development

Subject Content

1. Planned short course in an international or domestic setting.
2. Integration of knowledge gained in an international or domestic context with discipline knowledge.
3. Intercultural understanding and skill development.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Portfolio	1,000 words (or equivalent)	20%	N	Individual
Presentation	10 Minutes	20%	N	Individual
Critical Review	2,500 - 3,000 words	60%	N	Individual

Teaching Periods

HUMN 3107 Labour and Culture

Credit Points 10

Legacy Code 102781

Coordinator George Morgan ([https://directory.westernsydney.edu.au/search/name/George Morgan/](https://directory.westernsydney.edu.au/search/name/George%20Morgan/))

Description In recent history, social, economic, political and technological forces have produced profound changes to work and working life, undermining the stability of jobs and vocational skills, and disrupting and fragmenting career structures. This unit traces 1) the history of work, from pre-industrial to post-industrial times, 2) the rise of the factory system, 'Fordism' and scientific management of production, 3) the modern idea and experience of leisure and recreation as an adjunct to wage labour, and, in post-Fordist times, of culture and creativity as a central part of work, 4) the influence of technology on skills, and the rise of the 'knowledge economy' in the digital era, 5) the role of worker organisations in securing and protecting conditions of work.

School Humanities & Comm Arts

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the changes to the organisation of productive work through history.
2. Analyse the forces that have led to changes in production processes and to the contractual arrangements around paid work over time.

3. Critically evaluate ongoing debates about the future of work and employment.
4. Critically evaluate ongoing debates about the role and influence of technological change on working life.
5. Articulate the distinction between material and immaterial labour and between Fordism and post-Fordism.
6. Identify the roles that knowledge, innovation and symbolic creativity plays in contemporary economic life and commodity production.

Subject Content

Content may include:

Pre-Industrial Work: Gathering, Hunting, Making and Growing
Crafts, Guilds and Artisans
Industrial Revolution, Factory Labour and 'Clock Time'
Work and Leisure
Mass Production, Taylorism and De-Skilling
Fordism, to Post-Fordism
Ethnicity, Indigeneity and Divided Labour Markets
Globalisation, Outsourcing and Supply-Chain Capitalism
Digital Technology, Immaterial Labour and The Knowledge Economy
Organised Labour in Industrial and Post-Industrial Times
Creative Industries, Networking and the Projective City
Jobs, Vocations, and Careers
Co-Working, Digital Nomadism and the New Geography of Work
Towards a Post-Work Society?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Portfolio: 5 written summaries of a weekly topic to be submitted over the course of the semester	300 words x 5	30	N	Individual
Research-based argumentative discussion in essay format	2,000 words	40	N	Individual
Final Exam	2 hours	30	N	Individual

HUMN 3108 We Are The University: Students Co-creating Change

Credit Points 10

Legacy Code 102791

Coordinator Tai Peseta ([https://directory.westernsydney.edu.au/search/name/Tai Peseta/](https://directory.westernsydney.edu.au/search/name/Tai%20Peseta/))

Description This project-based unit offers students a chance to learn, negotiate and practise change-making skills in, and for, our University, Western Sydney University. At the heart of this unit is student partnership, curriculum co-creation, and an invitation for students to be involved in improving the educational experience at Western. Working in groups and alongside a university mentor, students will have an opportunity to contribute genuine solutions to an authentic education challenge that might be (a) commissioned by senior staff of the University; (b) intended to support students' aspirations to become a student leader; or (c) offers students a chance to undertake a project that advances their existing student leader or representative role. By choosing this elective unit, students not only receive credit for the partnership work they undertake, the University will have a new way of involving students in its decision-making processes. This is a unit intended to sharpen students' analytical skill-set and provide a taste of what it's like to operate as a change-maker inside a large and complex institution. This unit is recommended for all students, regardless of discipline.

School Social Sciences

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 80 credit points. Please note that this subject is recommended for all students, regardless of discipline.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate a view of the purpose of universities and students' role in them, drawing on the scholarly literature and multiple sources of data.
2. Carry out an inquiry project that addresses a substantial challenge intended to improve students' educational experience at Western.
3. Create an artefact that communicates the findings of the project to the broad university community.

4. Identify why and how a student partnership approach can contribute to successful change-making in universities.
5. Describe the applicability of a partnership approach to your life as a student, and to your likely future endeavours.

Subject Content

1. Why study the University (and WSU)? History and Purpose
 - Jeffrey J. Williams' concept 'Teach the University'
 - Representations of the (Australian) University: influenced by philosophy, history, fiction, sociology
 - An overview of the university sector in Australia
 - An official history of WSU (Forsyth and Hutchinson) / An indigenous history of WSU
2. The difference between Governance and Leadership in universities
 - Act of Parliament for WSU
 - Leadership / Governance / Committee structure: who are the leaders and what do they lead?
 - Role of Office of Governance at WSU: how does the business of university actually work?
 - Where is student leadership, gove

HUMN 3109 Catastrophe: The Environmental History of the Ancient World

Credit Points 10

Legacy Code 102835

Coordinator Gregory Barton ([https://directory.westernsydney.edu.au/search/name/Gregory Barton/](https://directory.westernsydney.edu.au/search/name/Gregory%20Barton/))

Description This unit examines past human interactions with the environment with its primary focus on the ancient Mediterranean and Near East between 2000 BC to 1600 AD. Case studies include Sumer, the lost civilisations of the Sahara, Egypt, Greece, Rome, the Maya and later European colonial empires. Students will assess, evaluate and synthesize data drawn from environmental history to analyse how the limits of natural resources constrain civilisations. The unit asks how catastrophic collapse of civilisations informs the sustainability of our own societies. Key topics will be soil fertility, deforestation, desertification, and climate change from ancient times to the Anthropocene.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects HUMN 3020 - Catastrophe The Environmental History of the Ancient and Modern World

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define the interaction between Nature and Civilisation in the past
2. Explain the concept of resource constraint
3. Evaluate competing paradigms of environmental explanations for the collapse of civilisations in the ancient world
4. Define, with empirical examples, the key concepts: civilization ♦f, ♦enature ♦f, ♦environmentalism ♦f, ♦empire ♦f, ♦edesertification ♦f, ♦edesiccation theory ♦f, globalism
5. Distinguish civilisations of the world in terms of their relationship with nature

Subject Content

Civilisation and Nature: an overview

The World Inheritance: Religion and Nature

The Sumerians: For the want of a tree a kingdom was lost?

Ancient Greece and Deforestation

Ancient Rome: Soil Fertility and the Rot in the Heart of the Empire

The Mayan Catastrophe: Deforestation and Starvation?

Central Asia: Desertification on the Silk Road

Columbian Exchanges and Encounters 1400-1600

Colonialism and the fear of Global Desert

Forests and Power: An Australian Fantasy

Air Pollution and Climate Change

The Globalization (and future collapse?) of Nature

The Natural Limits of Homo Sapiens

Assessment

HUMN 3110 Gender and Sexualities Across Cultures

Credit Points 10

Legacy Code 102845

Coordinator Helena Onnudottir ([https://directory.westernsydney.edu.au/search/name/Helena Onnudottir/](https://directory.westernsydney.edu.au/search/name/Helena%20Onnudottir/))

Description Examining the social construction of gender has been central to social science inquiries - including anthropology and sociology - since the 1930s. Early ethnographic studies were instrumental in debunking gender essentialism and challenging the hegemony of western constructs about 'masculinity' and 'femininity'. Since the 1930s, critical social theories and ethnographies have through cross-cultural comparison, demonstrated the great variation in expressions of individual sexuality/ies, the dynamics and confines behind the construction of gender roles and the cultural meaning and expression of gender categories across the globe. This unit will address the ongoing exploration of and challenges to the sex (biology) vs. gender (culture) dichotomy and contemporary cultural, social and political transformation (manipulation) of these categories.

School Social Sciences

Discipline Anthropology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects HUMN 3078 - The Anthropologies of Gender and Sexualities

Restrictions Successful completion of 80 credit points of study

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the concepts and theories of the social and historical construct of gender and sexualities across cultures.
2. Produce a reflective and comparative analysis on cross-cultural case studies.
3. Critically analyse the gender diversity across human cultures and societies.
4. Apply Anthropological theory to contemporary case studies.
5. Articulate some of the ways biological categories are culturally mediated.

Subject Content

Anthropology of gender.

Anthropology of Sexualities.

Masculinities/femininities/third gender categories.

Sex/gender.

Gender and power.

Cultural constructs vs. biological determinism.

Cross-cultural comparison of gender roles.

Fluidity and diversity of human sexualities.

To do or not to do? Sex and taboos.

The gendered body.

HUMN 3111 History of the People's Republic of China

Credit Points 10

Legacy Code 102842

Coordinator Niv Horesh ([https://directory.westernsydney.edu.au/search/name/Niv Horesh/](https://directory.westernsydney.edu.au/search/name/Niv%20Horesh/))

Description This unit is concerned with the historical complexities during the period between the establishment of the People's Republic in 1949 and up to the present day. It will equally focus on the Mao Zedong era (1949-1976) and on the post-1976 period, which saw the adoption and implementation of an "open-door" policy, and the launch of the "Four Modernisations". Due attention will also be paid to the Xi Jinping era (2012-present). We will explore a wide range of social and political issues that have a bearing on China's future as a potential world leader in the twenty-first century.

Coordinator Corrinne Sullivan ([https://directory.westernsydney.edu.au/search/name/Corrinne Sullivan/](https://directory.westernsydney.edu.au/search/name/Corrinne%20Sullivan/))

Description This unit provides an introduction to Indigenous research methodologies. It will develop the conceptual and theoretical knowledge of Indigenist, decolonial and anti-racist research methodologies to research with Indigenous peoples, and research that is of significance to Indigenous Australians. The unit also addresses ethical considerations and processes providing students with the skills and knowledge to engage in ethical research praxis.

School Social Sciences

Discipline Indigenous Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) HUMN 1060

Learning Outcomes

On successful completion of this subject, students should be able to:

- Examine the ethical research processes and practices relating to research with Indigenous peoples and/or communities.
- Explain the principles of a range of Indigenous research methodologies appropriate for application in research with Indigenous peoples, or matters related to Indigenous Australia.
- Reflect on the role as an Indigenous or non-Indigenous researcher or practitioner undertaking research or work with Indigenous people/communities/subject matter.
- Analyse the major social, political and scholarly influences that have underpinned the development of Indigenous research methodologies.
- Apply the principles of current Australian research guidelines and codes of conduct.

Subject Content

Standpoint and Decolonisation
 Critical self-reflection
 Indigenous principles in research
 Western research and Indigenous peoples, communities, and cultures
 Decolonising frameworks for research with Indigenous Australian peoples
 Indigenous Methodologies and Methods
 Data sovereignty and Intellectual Property
 Ethics and Research Practice

HUMN 3113 Migration and Social Change

Credit Points 10

Legacy Code 102862

Coordinator Sukhmani Khorana ([https://directory.westernsydney.edu.au/search/name/Sukhmani Khorana/](https://directory.westernsydney.edu.au/search/name/Sukhmani%20Khorana/))

Description This unit will address the key concepts and issues of migration particular to settler colonies like Australia as well as nations in Europe and the Asia Pacific. It will consider the lives of first and second generation migrants and the spaces they inhabit, that is, rapidly growing suburbs and urban fringes. Attention will be paid to how migrant identities intersect with their class, gender and other categories. This includes a close examination of how their livelihoods are impacted by increasing gentrification, health and environmental crises, and intensified forms of border control and anti-immigration sentiment. Finally, the unit will encourage student to understand the contemporary influences such as solidarity movements and online cultures that impact our understanding of migration and prompt social change.

School Humanities & Comm Arts

Discipline Sociology

HUMN 4001 Researcher Development 1: Reading, Writing, and the Business of Research

Credit Points 10

Legacy Code 800218

Coordinator Alex Norman ([https://directory.westernsydney.edu.au/search/name/Alex Norman/](https://directory.westernsydney.edu.au/search/name/Alex%20Norman/))

Description Research is the process of using knowledge to generate new understandings of the world. Research is also a social enterprise, with communities and norms of behaviour, and is an industry that is shaped by numerous cultural and economic forces. Taking a holistic approach that includes general research skill development, this unit focuses on four main topics: (1) critical reading, (2) effective writing, (3) research as a professional industry, and (4) the ethics of stewardship and personal responsibility. The unit equips students with vital skills that underpin their discipline-specific learning, and lays the ground for their development as professional researchers.

School Graduate Research School

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 4 subject

Equivalent Subjects HUMN 4009 - Research Design 1 Theories of Enquiry

Restrictions Students must be enrolled in 8083 Bachelor of Research Studies/Master of Research, 8084 Master of Research (High Cost) or 8085 Master of Research (Low Cost), 8119 Bachelor of Research Studies (Planning), 1712 Master of Planning, 3702 (8112) Master of Information and Communications Technology (Research), 1870 Master of Chinese Cultural Relations, 1883 Master of Cross-cultural Relations or 3761 Master of Architecture (Urban Transformation).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appraise the personal, societal, institutional, and intellectual process of creating new knowledge or new understanding of current knowledge.
2. Appraise the scholarly literature, identify research problems, and formulate research questions.
3. Employ academic referencing conventions and document production at a research standard;
4. Demonstrate the principles of professional academic writing to generate research grade text
5. Integrate knowledge from other units and sources to create a preliminary research proposal.

Subject Content

- The nature of research as a professional industry;
- The attitudes and the tools required to develop as a professional researcher;
- The principles of effective academic writing;
- The principles of detailed critical reading;
- Theories of how research fields develop over time;
- The external forces that shape research fields and research agendas;

- The concept of stewardship and personal responsibility in research; and
- The importance of reflective writing for developing a research project.

HUMN 4002 Researcher Development 2: Proposing and Justifying Research

Credit Points 10

Legacy Code 800220

Coordinator Alex Norman ([https://directory.westernsydney.edu.au/search/name/Alex Norman/](https://directory.westernsydney.edu.au/search/name/Alex%20Norman/))

Description An essential skill required by researchers is the ability to propose research and justify it in a persuasive manner. Through interactive workshops, Researcher Development 2 helps students develop and refine a research proposal. The unit includes workshops on research ethics that will help students articulate the significance and relevance of their work and will assist those requiring ethics clearance. The written proposal is defended through the oral Presentation of Proposal (POP). After successful completion of this unit, students will have demonstrated an ability to design and justify a research project in their discipline.

School Graduate Research School

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) HUMN 4001

Equivalent Subjects HUMN 4010 - Research Design 2 Practices of Research

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate knowledge of codes and laws surrounding the ethical conduct of research.
2. Design a research project that adapts knowledge from diverse sources and articulates research questions that can be feasibly interrogated through research.
3. Identify, assess, and recommend feasible approaches or methods for undertaking the proposed research project.
4. Defend the design, impact, significance, and feasibility of a research proposal to a panel of scholars composed of one or more broader discipline.

Subject Content

- Planning for research
- Managing human research ethics applications
- Conceptual introduction to ethical considerations of being a researcher and conducting research as public good
- Understanding the genre of research proposals
- Understanding the notion of impact
- Writing abstracts and impact statements
- Strategies for oral presentation of project proposals

HUMN 4003 Writing Beyond the Academy: Knowledge Translation and Public Audience Communication

Credit Points 10

Legacy Code 800219

Coordinator Declan Kuch ([https://directory.westernsydney.edu.au/search/name/Declan Kuch/](https://directory.westernsydney.edu.au/search/name/Declan%20Kuch/))

Description It is now more important than ever for researchers to explain their research to the public. Although it can be challenging to translate specialist knowledge for non-specialist readers, this is the skill students will receive training for in Writing Beyond the Academy. By following the model of The Conversation, a widely popular knowledge translation platform, students will learn the principles of public audience writing, how to pitch to an editor and how to work with their feedback, and produce their own public audience essay.

School Graduate Research School

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 4 subject

Equivalent Subjects HUMN 4012 - Research Literacies

Restrictions Students must be enrolled in 8083 Bachelor of Research Studies/Master of Research or 8119 Bachelor of Research Studies/

Master of Research (Planning) or 4698 Master of Health Science, 4700 GD Health Science or 4702 Master of Public Health.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically appraise public audience communication conventions used by researchers.
2. Develop a pitch of a research translation story suitable for a public audience in response to editorial guidelines.
3. Discuss how their own research field addresses issues of broader public concern.
4. Apply knowledge translation skills by writing for a non-specialist public audience;
5. Critically assess their own writing through engagement with reviewer feedback.

Subject Content

HUMN 4006 Honours Thesis Part Time 2

Credit Points 20

Legacy Code 101807

Coordinator Rae Dufty-Jones ([https://directory.westernsydney.edu.au/search/name/Rae Dufty-Jones/](https://directory.westernsydney.edu.au/search/name/Rae%20Dufty-Jones/))

Description This unit is the second unit of the research project and thesis of the BSS Honours program and consists of a research project designed and implemented under the direction of an academic supervisor and research mentor. It is only available to students who have been accepted into the honours programmes for the following Bachelors degrees - Community Welfare, Policing, Social Science and Tourism Management. This unit is the culmination of studies for students who have completed their undergraduate degree and provides substantial training in research. Under staff supervision, students choose the particular topic for their research, design their own programme of research , perform the research and analyse the results. The production of a thesis is at the end of this process. Students describe the rationale for their topic, their research programme, ethical issues, results and their conclusions.

HUMN 7001 Advanced Social Research Methods

Credit Points 10

Legacy Code 102177

Coordinator Rowena Butland ([https://directory.westernsydney.edu.au/search/name/Rowena Butland/](https://directory.westernsydney.edu.au/search/name/Rowena%20Butland/))

Description Students in Advanced Social Research Methods concentrate on methods for collecting and analysing research data. The unit builds on the key research concepts established in 102175 Research in the Social Sciences, in particular research methodology. Advanced Social Research Methods provides students with an

overview of research design and the methods for collecting and analysing research data within the broad spectrum of the social sciences. This includes purposes, strengths and limitations and applications to professional domains and/or discipline contexts. Students attend in-depth workshops on specific methods offered by practicing researchers to evaluate the merits of different research methods.

School Social Sciences

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) HUMN 7036

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically compare different research methodologies and approaches in the Social Sciences.
2. Demonstrate critical and strategic understanding of qualitative, quantitative and mixed methods research traditions in the social sciences.
3. Demonstrate depth of understanding of a range of methods of collecting and analysing research data, including their purposes, strengths and limitations.
4. Explicate the potential application of methods for collecting and analysing research data in relation to a research topic in a social science setting.

Subject Content

1. Research Methodologies in the Social Sciences ? theories and frameworks
2. Evaluation of qualitative, quantitative and mixed methods traditions
3. Methods of collecting and analysing research data (a range of methods will be reviewed)
4. Reading and evaluating social research reports
5. Application in professional fields of social research and social research methods

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Participation - online discussion on guest lectures	4 x 250 word contributions (total 1,000 words)	10	N	Individual
Reflection - critical reflections on 3 methods of data collection	3 x 1,000 word reflections (3000 words total)	45	N	Individual

Report - 2,000 words 45 N Individual
critical
reflection on
data analysis
based on 2 of

Teaching Periods

HUMN 7002 Applied Imagination

Credit Points 10

Legacy Code 101651

Coordinator Christy Hartlage ([https://directory.westernsydney.edu.au/search/name/Christy Hartlage/](https://directory.westernsydney.edu.au/search/name/Christy%20Hartlage/))

Description This unit asks students to reflect upon imagination and its use in research, inquiry, and social action. It challenges students to develop an applied understanding of imagination in the development of creative responses to personal and social concerns. Underlying this exploration is a challenge to students to reflect upon the relationship between form, content and communication, objectivity and subjectivity, arts theory and practice, the writer, performer, artist and educator. The unit considers mediums for expression and communication; imagination as an analytical tool, and imagination as a means for understanding, communicating and enabling intentions and outcomes.

School Education

Discipline Education Studies

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program, with the exception of those students enrolled in the Bachelor of Research Studies.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. analyse and differentiate qualities in creative texts
2. communicate creative understandings
3. apply theory to the imaginative process
4. produce an imaginative response to a chosen issue
5. critically reflect upon personal imaginative processes through unit content
6. demonstrate appreciation of imaginative underpinnings of social construction

Subject Content

- An historical survey of conceptualisations of imagination
- Mapping The imaginative process: inter-relating personal and theoretical responses to performance, writing and Visual representation in A variety of contexts
- Evaluating quality and effectiveness in imaginative work

- Inquiring into The use of imagination in shaping personal and social agendas: The personal and social politics of imagination
- work with A variety of genres of Creative expression
- Creatively exploring personal experience and process of imagining
- imagining and developing Creative means for bringing about personal, social and cultural change

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Textual analysis in essay form	2,500 words	40	N	Individual
Imaginative presentation supported by written critical reflective discussion with unit coordinator)	2,500 words plus imaginative work (subject to negotiation with unit coordinator)	60	N	Individual

HUMN 7003 Applied Innovation and Entrepreneurship

Credit Points 10

Legacy Code 800211

Coordinator Michael O'Connor ([https://directory.westernsydney.edu.au/search/name/Michael OConnor/](https://directory.westernsydney.edu.au/search/name/Michael%20Connor/))

Description Entrepreneurial & innovative skills are more important than ever for today's graduates where applying creativity to drive commercial outcomes is commonplace both for those working inside organisations and those developing their own business. This unit, based on the fundamental principle of 'doing', proposes to deliver principles and content through a highly applied approach. This is a unit that teaches entrepreneurship in a fundamentally different way to the traditional course structures. The unit is delivered through Western Sydney University's highly successful "Launch Pad Innovation Centre" which provides both Tech Start-up and SME business support. This unit maximises the opportunity for real-world application by delivering through a case study driven approach and utilising a mix of presenters including: academia, business mentors, industry specialists from Launch Pad partners such as KPMG, NAB and government industry representatives, and actual start-up and SME business owners as guest lecturers.

HUMN 7026 AND

HUMN 7037

Restrictions

Students must be enrolled in a Doctoral (HDR) program and also enrolled in program 8111 - Graduate Certificate in Researcher Engagement, Development and Impact.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise complex interactions among business, social, scientific and technological inputs;
2. Appreciate the dynamics and process of entrepreneurial and research leadership;
3. Demonstrate generic skills in a range of topics surrounding innovation and entrepreneurship;
4. Explain the process of research commercialisation;
5. Identify market opportunities;
6. Identify and understand the driving forces of enterprise success - finance, cash-flow, resources, logistics & strategy;
7. Demonstrate evidence of skills and experiences gained in an ePortfolio;
8. Reflect on own performance and identify own development needs.

Subject Content

- Fuelling innovation
- Understanding lean business models
- Research commercialisation in an innovation economy
- Reinventing through disruption and big data
- Business model innovation
- Customer discovery, validation and acquisition
- Starting your venture
- Challenging inertia
- Financing your innovation
- Staying afloat
- Growth hacking
- The entrepreneurial journey and continuing to be innovative

HUMN 7004 Australian Cultural Policy and Practice

Credit Points 10

Legacy Code 102542

Coordinator Diane Colman ([https://directory.westernsydney.edu.au/search/name/Diane Colman/](https://directory.westernsydney.edu.au/search/name/Diane%20Colman/))

Description Understanding of Australia's cultural identity is essential for those who intend to engage in its promotion or in the management of cultural exchanges between Australia and other countries. This unit will describe the main features of Australian cultures including Indigenous culture, Western culture as inherited through settlement from Britain and elsewhere, and of multiculturalism arising from recent migration patterns. Students will study the history and current status of Australia's political institutions, its important international alliances and treaties, and the development of its independent foreign policy. An introduction will be given to Australia's major cultural management organisations and arts institutions (including invited guest speakers).

School Humanities & Comm Arts

Discipline Anthropology

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the Australian cultural identity in relation to a range of current or historic debates
2. Evaluate examples of Indigenous culture, multiculturalism and inherited British and Commonwealth cultures
3. Interpret the roles of state and non-state agencies in the cultural sphere and policy development
4. Develop proposals that represent Australian identity in major cultural events and anniversaries

Subject Content

The complexity of Australian cultural identity
 The cultural heritage of Australia?fs First Nations
 British settlement and its cultural inheritance
 A changing Australia and the diversity of multiculturalism
 The development of cultural policy and practice in Australia
 Cultural institutions in Australia and how they operate
 Representing Australia on film
 How the world sees Australia through the visual arts
 The sporting life brings Australia to the world stage
 How the world hears Australia in words and music

Assessment

HUMN 7005 Career and Personal Development

Credit Points 10

Legacy Code 800198

Coordinator Jessica Weir ([https://directory.westernsydney.edu.au/search/name/Jessica Weir/](https://directory.westernsydney.edu.au/search/name/Jessica%20Weir/))

Description A key skill in becoming a professional researcher is learning how to manage your career options. Fundamental aspects of this include making strategic choices regarding research focus and employment directions, learning to build professional networks both locally and internationally, and undertaking self-directed learning to continually expand your abilities and knowledge. This unit is designed to provide a structured approach to these aspects of career planning, and will include collaborative workshops where experienced researchers join the group to discuss the art of navigating around external constraints while forging your own path forward. As an early application of these principles, the unit involves completion of your Confirmation of Candidature proposal.

School Graduate Research School

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a PhD program or program 8111 - Graduate Certificate in Researcher Engagement, Development and Impact

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Assess the skills required for a range of employment options, both within and outside academia;
2. Clearly articulate their career options and goals;

3. Demonstrate the worthiness of the proposed research with respect to gaps or conflicts in present knowledge or understanding;
4. Prepare a comprehensive and critical literature review;
5. Explain how their thesis is related to the literature;
6. Demonstrate the ability to professionally present themselves to potential employers and networks in an ePortfolio.

Coordinator Jocelyn Chey ([https://directory.westernsydney.edu.au/search/name/Jocelyn Chey/](https://directory.westernsydney.edu.au/search/name/Jocelyn%20Chey/))

Description This unit provides students with opportunities outside the usual classroom experience. The unit uses knowledge acquired previously in the unit Chinese Cultural Policy and Practice and offers a real life application of this knowledge within a Chinese cultural context. Students will be required to travel to China for two to three weeks during their inter session break. While in China, they will visit important cultural and academic institutions and keep a daily diary of this experience. On their return to Australia students will be finalising assessment tasks required as part of this unit.

School Humanities & Comm Arts

Discipline Anthropology

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) HUMN 7007

Restrictions

Students must be enrolled in 1870 Master of Chinese Cultural Relations.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss Chinese culture, as it applies to social and artistic settings.
2. Consider the roles of cultural institutions in relation to knowledge of contemporary Chinese society and China's international cultural links.
3. Integrate existing knowledge with new, on-the-spot discoveries.
4. Reflect on observations of contemporary China in relation to historical, social, artistic and technological developments.

Subject Content

Planned short visit in an international setting.
Integration of discipline knowledge in an international context.
Intercultural understanding and skill development.

Teaching Periods

HUMN 7007 Chinese Cultural Policy and Practice

Credit Points 10

Legacy Code 102541

Coordinator Qiang Guo ([https://directory.westernsydney.edu.au/search/name/Qiang Guo/](https://directory.westernsydney.edu.au/search/name/Qiang%20Guo/))

Description China's relationship with Australia and the rest of the world is critical to Australia's future success. This unit offers a broad introduction to Chinese society, history and politics and will cover in more detail cultural developments, including the creative arts such as music, literature, visual arts and film, together with popular arts and the digital transformation of media and the arts. An outline of Chinese aesthetic theories, cultural policies and the work of critics will be presented. The roles of art institutions such as museums, galleries, performance companies and publishers will be considered, together with agencies involved in international cultural exchange such as translators, censors and copyright agencies. The study of the interplay of Chinese language, thought and culture will be an integral part of this unit. A case study of a particular cultural medium may be presented by an invited guest speaker. This unit may be further developed through the China Culture Study unit which is an alternate unit within the Master of Chinese Cultural Relations course.

School Humanities & Comm Arts

Discipline Anthropology

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss developments in Chinese history and social changes
2. Critically analyse theoretical frameworks related to Chinese culture
3. Critically evaluate contemporary Chinese cultural manifestations
4. Analyse the development of a particular Chinese art form and its institutional management
5. Discuss issues applying to the technological development and internationalisation of Chinese culture

Subject Content

1. Introduction to Chinese history, society and political developments
2. An overview of aspects of Chinese language, thought and culture
3. Introduction to Chinese aesthetics and cultural policies
4. Outline of Chinese cultural forms including art, music, theatre, film, literature and popular culture
5. An examination of a selected art form through literature search
7. Digitalisation and globalisation of Chinese culture
6. Arts management and the functions of art institutions in China

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Proposal and Presentation	800 - 1000 words, 5-10 minutes	20	N	Individual
Portfolio Report	1,000 words (equivalent)	30	N	Individual
Report	2,500 words	50	N	Individual

HUMN 7008 Contemporary Theories of Religion and Society

Credit Points 10

Legacy Code 102201

Coordinator Adam Possamai ([https://directory.westernsydney.edu.au/search/name/Adam Possamai/](https://directory.westernsydney.edu.au/search/name/Adam%20Possamai/))

Description Covering Australia and other parts of the world, this unit explores current social theories of religion at the micro, meso, macro, and cyber levels. Starting from the micro or individual level, it deals with theories on the emergence of post-dogmatic religion and the growth of subjectivised forms of religion in the non-institutional field. It then moves to the group or meso level and covers the activities of religious and non-religious groups in the public and post-secular sphere. It then reaches the global (macro) level to discuss notions of multiple modernities, transnationalism and civilizational analysis. Finally, at the cyber level the unit analyses recent theories on the impact of new social media on religion.

School Social Sciences

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Students must have completed an undergraduate degree or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Differentiate and articulate major theories and theorists in religion and society
2. Illustrate critical reading and writing skills in social theory

- Critique the literature and concepts routinely employed in contemporary social science discourses on religion and society

Subject Content

- Emergence of post-dogmatic religion
- Growth of subjectivised forms of religion in the non-institutional field
- Theories of conversion
- Mega and Emergent Churches
- Social Construction of New Religious Movements
- Post-Secularism
- Religion and Multiple Modernities
- Religion and Transnationalism
- Civilizational Analysis and Religion
- Religion and Web 2.0

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Literature review	2,000 words	45	N	Individual
Essay	3,000 words	55	N	Individual

Teaching Periods

HUMN 7009 Critical and Creative Enquiry

Credit Points 20

Legacy Code 102628

Coordinator Patricia Parish ([https://directory.westernsydney.edu.au/search/name/Patricia Parish/](https://directory.westernsydney.edu.au/search/name/Patricia%20Parish/))

Description This unit is designed to extend students' capacity to undertake critical and creative research in the arts therapies. Students will have the opportunity to work together and extend each other's work while undertaking a small research project that does not involve human research subjects. The theories and ethics of difference and diversity will be central to the process of enquiry. This includes formulation of research questions or problems, the choice and articulation of appropriate methodologies; data gathering and analysis; and the preparation of a research report. Students will learn to systematically question the dominant assumptions of their field and generate alternatives to a tendency for practitioner research to reproduce 'the same'.

School Social Sciences

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 20cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) WELF 7008 OR HUMN 7036

Equivalent Subjects HUMN 7025 - Integrated Project LGYA 7525 - Integrating Theory Research and Practice

Incompatible Subjects HUMN 7010 - Critical and Creative Enquiry WELF 7020 - Practising Research and Researching Practice

Restrictions

Students must be enrolled in program 4595 Master of Art Therapy

Assumed Knowledge

Introductory knowledge of theory and research methodology.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Plan and implement a sustained critical reading program in a relevant area.
- Map and critically analyse the connections between theory, research and practice.
- Investigate a research question so as to critically conceptualise relationships between theory, research and practice in arts therapy.
- Demonstrate an understanding of the research process in practice.
- Organise, create and reflect on an oral, visual and/or performative presentation of their work.
- Exemplify high level analytical and written skills in the completion of the final written report.

Subject Content

Advanced literature searching.

Advanced analysis of how theories of difference and diversity relate to research methods and research practice.

Ethics of practitioner research.

Exploration of theoretical, critical, collaborative and arts-based research practice.

Developing and implementing a research project.

Developing collaborative and research team skills.

Preparing and giving a seminar presentation on the process of working in teams/groups.

Preparing a written research report.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Proposal: Brief research project plan	750 words	10	N	Individual
Report: Research project report	4,500 words	60	N	Individual
Participation: Participation in Group Seminar Presentation	No more than 30 minutes per small group		N	Group

HUMN 7011 Cultural Diplomacy and Soft Power

Credit Points 10

Legacy Code 102543

Coordinator Nicholas Ng ([https://directory.westernsydney.edu.au/search/name/Nicholas Ng/](https://directory.westernsydney.edu.au/search/name/Nicholas%20Ng/))

Description This unit provides an introduction to key topics and debates in diplomacy and international relations. Relationships with other governments depend on diplomacy, which has been defined as the art of persuasion. Diplomatic modes, including those based on universalist values and those based on pragmatic self-interest will be considered and tested in the context of contemporary bilateral, regional and multilateral relations. The concepts of soft power and international public relations will be considered in the light of current cultural diplomacy campaigns, and tested through simulated role-play.

School Humanities & Comm Arts

Discipline Anthropology

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the theories of soft power and cultural diplomacy and describe examples of their application
2. Discuss the history and main trends in public and cultural diplomacy worldwide
3. Describe and analyse examples of Australian and Chinese cultural diplomacy
4. Develop solutions to real-life cases involving the application of cultural diplomacy

Subject Content

Theories of cultural diplomacy.

History of cultural diplomacy and international cultural organisations.

Australia's cultural diplomacy.

China's cultural diplomacy.

Case studies developed through role play.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Presentation: Part (a) Presentation on personal investigation of a current issue. It involves (a) 500 word overview of the presentation and (b) Presentation (10 minutes per student)	500 words; Part (b) 10 minutes per student	15%	N	Individual
Research Essay: It involves: (a) 2 x 500 word blogs while preparing essay (10%) and (b) Essay 2,500 words (30%)	Part (a) 2 x 500 words; Part (b) 2,500 words	40%	N	Individual
Case Study: Team inquiry task on case-study problem. It involves (a) Group presentation (30%) (b) Individual diary (15%)	Part (a) 20 minutes; Part (b) 1,000 words	45%	N	Both (Individual & Group)

Teaching Periods

HUMN 7012 Cyber Justice (PG)

Credit Points 10

Legacy Code 102424

Coordinator David Tait ([https://directory.westernsydney.edu.au/search/name/David Tait/](https://directory.westernsydney.edu.au/search/name/David%20Tait/))

Description This subject explores the evolving relationship between digital technology, justice and crime. How are the temptations and risks associated with harmful or illicit behaviour being re-shaped by information and communication technologies, by social media and the computer networks that increasingly hold organisations together? Cyber crime is typically understood as use of information and communication technologies to assist in the commission of other crimes, actions that target computer networks or software, or new offences that could only exist with the technology. Cyber justice meanwhile emphasises the use of information and communication technologies to improve access to justice and the efficiency of justice procedures, not just to deal with cyber crime. How does the law keep up with the emergence of new crimes and technology-enhanced versions of old ones, and how do forensic investigators and analysts contribute to this process? The subject examines how justice

processes and spaces, as well as criminal networks and strategies, are being reimaged to take advantage of the new technologies.

School Humanities & Comm Arts

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Previous study of cultural and social analysis, history and political thought, law, psychology or criminology would be useful, but is not required. Experience of using social media would also be useful but not required.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe and critically evaluate the nature of cybercrime (including cyber terrorism and cyber war) and the techniques, targets and harms produced by it.
2. Describe and critique the way cyber technologies are used in policing and courts to transform justice processes and respond to cybercrime.
3. Identify and evaluate relevant media reports, research material, images and other relevant sources relevant to cybercrime and cyber justice.
4. Analyse and interpret research about cybercrime and cyber justice in terms of its method, use of sources and contribution to academic debates.
5. Develop research ideas in a peer-supported learning environment.
6. Communicate research arguments logically and clearly in oral and written form.
7. Use digital technologies to collaborate, develop arguments and settle disputes.

Subject Content

- Cybercrime: new and enhanced crimes of the digital age
- Cyberjustice: the transformation of justice by digital technologies
- Cyber war and cyber terrorism
- Cyber bullying and stalking
- Privacy and surveillance
- On-line and virtual justice

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Essay - Research paper	4000 words	40	Y	Individual
Summaries - Group Reviews	200 words	30	N	Group

Reflections 800 words 30 N Individual
- Individual response to class activities

Teaching Periods

HUMN 7013 Debates in Global History

Credit Points 10

Legacy Code 102341

Coordinator Gregory Barton (<https://directory.westernsydney.edu.au/search/name/Gregory+Barton/>)

Description The unit considers the history of the ways that different regions of humanity have interacted, since 1400. The unit will consider such topics as: ethnic-centrism (how to address it in historical and political knowledge?); the era of 'Pan Asia' (what does the rise of China and India mean for historical and political studies?); the prominence of 'nation' in historical knowledge (how to treat human history as 'global?'); the relationship of ethno-nationalism to globalization; the periodization of global history (turning points in the emergence of a global humanity); the determinants of difference and commonality in human history; the characteristics of 'empires'; the natural limits of humanity.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

History and Political Thought Major, International Relations and Asian Studies Major or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyze the debates among historians that explain globalization
2. Apply an understanding of the competing paradigms of Global History to historical practice.
3. Distinguish regions of the world in terms of their relationship with 'modernity'.
4. Evaluate globalization as a cultural phenomenon through the use of key theoretical texts
5. Construct persuasive arguments around major debates in Global history

Subject Content

1. Global History: an overview
2. Ecumenical Integrations and Empires 500 to 1500
3. Columbian Exchanges and Encounters 1400-1600
4. The Enlightenment and Global History
5. Afro-Eurasian and Atlantic Worlds
6. Globalization and The Great Divergence

7. Global Governance and Informal Empire
8. Globalizations and its Discontents
9. The Rise of Asia
10. The Natural Limits of Homo Sapiens

Assessment

Credit Points 10

Legacy Code 102426

Coordinator Rachel Hendery ([https://directory.westernsydney.edu.au/search/name/Rachel Hendery/](https://directory.westernsydney.edu.au/search/name/Rachel%20Hendery/))

Description This unit investigates the methodological possibilities of digital technologies for interdisciplinary humanities and social sciences research. It covers several major digital research methods, exploring previous applications and examining their orientations and implications. Digital research methods and applications may include digitisation, online curation, visualisation, network analysis, geographical information systems, data mining and simulation. In the context of these, the unit will probe histories of technology and knowledge production, the evolution of digital texts and practices, and issues in contemporary culture such as digital design, gamification, virtual identity, and digital rights.

School Humanities & Comm Arts

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the range of ways digital technologies are applied in advanced interdisciplinary research contexts;

2. Apply the key principles of collaborative design and participation in digital projects in academic and industry settings;
3. Analyse the applications and influence of digital technologies on social and cultural research methodologies; and
4. Create a digital project based on an application of digital technologies to a contemporary research question.

Subject Content

1. Introduction to subject ? The ?computational turn?f in the humanities
2. Digitisation
3. Data/text mining and visualisation
4. Gaming
5. GIS and mapping
6. Network analysis, social media, metadata
7. Students present their own final project.

Assessment

HUMN 7016 Diversity in Practice

Credit Points 10

Legacy Code 102183

Coordinator Jane Durie ([https://directory.westernsydney.edu.au/search/name/Jane Durie/](https://directory.westernsydney.edu.au/search/name/Jane%20Durie/))

Description This unit offers students the opportunity to systematically apply the theories and concepts developed in the Difference and Diversity and /or Religion and Society Specialisations to a project relevant to students' areas of professional practice, or interest. The focus of the project will be drawn from those issues of race, class, sexuality, disability, gender, religion and ethnicity embedded in the

theoretical and conceptual work undertaken in the earlier units of the named specialisations.

School Social Sciences

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) HUMN 7044 AND HUMN 7030

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate and apply social theories, concepts and issues to a specific project context;
2. Undertake in-depth analysis and critique of relevant literature, policy and/or media and present an oral synthesis;
3. Present in written form a synthesis of the in-depth analysis and critique;
4. Plan, undertake and complete a self-directed project at master level of study.

Subject Content

Project Planning

Relate theories of Difference and Diversity to the development and completion of a project

Review and critically analyse literature, policy and/or media relevant to the project

Research/write the complexities and intersections of race, class, gender, sexuality, religion, disability and so on as appropriate within the project context

Project report requirements

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Proposal	2000 words	30	N	Individual
Presentation	15 minutes	20	N	Individual
Report	3000 words	50	N	Individual

Teaching Periods

HUMN 7017 Ecopedagogies

Credit Points 10

Legacy Code 102157

Coordinator Tonia Gray ([https://directory.westernsydney.edu.au/search/name/Tonia Gray/](https://directory.westernsydney.edu.au/search/name/Tonia%20Gray/))

Description In simplest terms, ecopedagogies is teaching and learning in partnership with Nature. This interdisciplinary unit examines place-based theory and outdoor-experiential education. Research

has repeatedly shown that outdoor experiential learning promotes health, well-being, cognitive advancement, growth and development for children, youth and adults. Correspondingly, the importance of ecopedagogies in this historical era cannot be underestimated. The precariousness of human/nature interrelationships compels us to explore new ways of learning and knowing and ecopedagogies provides new ways of connecting with the natural world. Further insight is gained through engaging with First Peoples' knowledge systems through the conceptualisation of 'country' and relational frameworks.

School Education

Discipline Education Studies

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the broad theoretical underpinnings of ecopedagogies
2. Engage with First Peoples' knowledge systems and apply them to their understandings of human/nature relationships
3. Apply knowledge of human development and the ways in which it is supported by applied ecological learning
4. Apply ecopedagogical principles to support human health and well-being
5. Critically reflect upon own insights and applications of specific ecopedagogical experiences

Subject Content

Ecological consciousness and its implications in precarious times

Ecopedagogies and the reciprocity of human/nature relationships

First Peoples' ways of knowing as a foundation for ecopedagogies

Human development and the foundational role of experiential outdoor education

The role of ecopedagogies in learning, health and well-being

Theories and models of childhood/youth/adult outdoor provision and pedagogy

Global perspectives and place-based understandings of human/nature relationships in an increasingly urbanized and technological world

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Learning sequence	2,500 words	50	N	Individual
Implement and report on the project. Include personal reflections on pedagogies and processes and participant feedback	2,500 words	50	N	Individual

Teaching Periods

HUMN 7018 Ecopsychology and Cultural Change

Credit Points 10

Legacy Code 101652

Coordinator Erin Mackenzie ([https://directory.westernsydney.edu.au/search/name/Erin Mackenzie/](https://directory.westernsydney.edu.au/search/name/Erin%20Mackenzie/))

Description From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. Ecopsychology is concerned with the relationship between human consciousness, human actions and environmental issues. It seeks to understand the sources, both phenomenological and socio-cultural, of the disjuncture between nature and psyche and to develop possibilities for personal and cultural re-connection and healing. Through applying experiential methods, critical inquiry and engagement with ecopsychological writings, students develop their awareness of "self", "nature", "culture" and explore the dynamics between them. The unit incorporates perspectives on ecological identity, ecospirituality and sense of place as ways of re-imagining the human-nature relationship and effecting ecologically-oriented change.

School Education

Discipline Education Studies

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

- critically analyse and reflect upon the experiential and socio-cultural dimensions of their own personal relationships with nature;
- employ a range of methods for developing a critical and reflexive ecological consciousness;
- critically evaluate differing psychological, spiritual and ecological standpoints as they apply to the development of ecological identity;
- critique the influence of personal, cultural and cosmological narratives in shaping human-nature relationships;
- apply ecopsychological perspectives to inform processes of cultural transformation;
- articulate potentials and challenges associated with the project of ecopsychology.

Subject Content

Nature and psyche - perceived oppositions and integrative possibilities
 Ecological consciousness and ecological identity
 Ecological perspectives on self and society
 Sense of place
 Somatic, archetypal and transpersonal approaches to ecopsychology
 Deep ecology & new cosmologies
 Place, story, relationships and reconciliation
 Ecopsychology and cultural change

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Ecopsychology reflection and project plan	1,000 words	25	N	Individual
Project report	4,500 words	75	N	Individual

HUMN 7019 Emergency and Disaster Management

Credit Points 10

Legacy Code 102575

Coordinator Spyros Schismenos ([https://directory.westernsydney.edu.au/search/name/Spyros Schismenos/](https://directory.westernsydney.edu.au/search/name/Spyros%20Schismenos/))

Description This unit uses comparative analysis of different emergency responses to humanitarian disasters to provide students with the skills and knowledge required to play a role in future emergency and disaster management. Students will gain knowledge of the geo-political forces and key international frameworks and standards that shape humanitarian responses, and of the motivations and approaches of aid donors and humanitarian NGOs when intervening in states. They will also gain foundational knowledge of assessment of NGO capacities and organisational infrastructure for managing emergencies, for example their organisational structures and cultures, donor priorities, support systems and personnel.

School Social Sciences

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

- Contrast the different emergency responses to humanitarian disasters through a comparative analysis of the skills and knowledge required in emergency and disaster management.
- Critically analyse the geo-political forces and key international frameworks and standards that shape humanitarian responses
- Articulate the motivations and approaches of aid donors and humanitarian NGOs when intervening in states.
- Demonstrate a foundational knowledge in the assessment of NGO capacities and organisational infrastructure such as organisational structures and cultures, donor priorities, support systems and personnel for managing emergencies.

Subject Content

- A comparative analysis of the different emergency responses to humanitarian disasters in development of the skills and knowledge required in emergency and disaster management.
 - A critical analysis of the geo-political forces and key international frameworks and standards that shape humanitarian responses.
 - An exploration of the motivations and approaches of aid donors and humanitarian NGOs when intervening in states.
 - A foundational knowledge of the assessment of NGO capacities and organisational infrastructure such as organisational structures and

cultures, donor priorities, support systems and personnel for managing emergencies.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

HUMN 7021 Fieldwork in Complex and Hostile Places

Credit Points 20

Legacy Code 800213

Coordinator Scott Flower (https://directory.westernsydney.edu.au/search/name/Scott_Flower/)

Description Working overseas is demanding and poses unique research challenges as well as risks to personal security and safety. This seven-day intensive subject teaches a range of applied research approaches, field skills, techniques and technologies to prepare students for operating safely overseas. The immersive scenario-based role-play learning is delivered at an off-site location. Drawing on United Nations accredited curriculum, the subject equips students with an appreciation for the major methodological, ethical, legal, logistical and personal challenges they are likely to confront when working 'in the field'. The unit is of special relevance to students seeking employment in Government and NGO sectors.

School Graduate Research School

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 20cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate or High Degree Research program code.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. produce a high-quality fieldwork-focused Research Plan, Ethics Application and Risk Management Plan with supporting documentation;
2. demonstrate a practical understanding of the University Risk Management, OHS, Security and Travel Guidelines;
3. understand the range of personal and institutional moral, legal and ethical issues involved with fieldwork;
4. articulate the pros and cons of specific research methods and analytical tools appropriate for addressing their fieldwork research question/problem
5. undertake applied research or work in a complex and hostile location;
6. demonstrate their awareness of the key personal security challenges confronting researchers in the field and how to respond appropriately to mitigate or manage such risks;
7. understand in advanced capacity what complex and hostile environments are, and be able to manage personal and research participant risks whilst undertaking effective research; and
8. make effective plans and decisions regarding fieldwork (prior to, during and after deployment) as part of an overarching research strategy.

Subject Content

1. A Fieldwork Philosophy
2. Scoping the research question/s in preparation for the field
3. Applied Research Design
4. Ethical considerations and applications
5. Legal issues and obligations
6. Data collection methods, data management and cyber security in the field
7. Fieldwork planning and risk management: approaches and techniques
8. Practical field craft ? travel, health and safety skills for fieldwork in complex and hostile places
9. Security Context
10. Field Preparedness and Evacuation
11. Field Communication Protocol
12. Sexual Assault
13. Residence Assessment Exercise
14. Basics of Negotiation
15. Coping with Insecure Environments: Stress Awareness
16. Weapons Awareness
17. Fire and Movement
18. Introduction to GPS and Navigation
19. Field Communication Equipment
20. First Aid: Essentials for life support (EAR/CPR, major bleeding control & evacuation/repatriation)
21. Image and Acceptance
22. Vehicle Check Points/Road Blocks
23. Trip Planning
24. Crowds and Mobs
25. Field Security
26. Kidnap Avoidance and Hostage Survival
27. What to do on arrival in-country (i.e. flexible organisation, travelling light for mobility & security)
28. Patterns of behaviour and predictability including counter-surveillance
29. Stress Disorders (ASD & PTSD and mental health first aid)
30. How to not be a target (image and acceptance)
31. What to do regarding the presence of small arms

32. How to avoid and/or cope with threats of physical violence and physical violence

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Reflection	3,000 words	25	N	Individual
Proposal	7,000 words	65	N	Individual
United Nations learning modules	4 x modules - 10 9-10 hours in total	10	N	Individual

Teaching Periods

HUMN 7022 Global Criminology and Human Rights

Credit Points 10

Legacy Code 102200

Coordinator Stephen Tomsen ([https://directory.westernsydney.edu.au/search/name/Stephen Tomsen/](https://directory.westernsydney.edu.au/search/name/Stephen%20Tomsen/))

Description Global criminology is concerned with the process of respecting and fostering ideals of justice, the rule of law and human rights in an expanding range of transnational and domestic locations. These include stable, divided and post-conflict societies that are variously dealing with issues of discrimination, exploitation, insecurity and violence via international agreements, judicial and political means. The global development of justice initiatives has challenged the traditional criminological concern with individual offenders prosecuted by the sovereign nation state acting on behalf of a sole victim. In this unit students will gain a critical understanding of theories and concepts of global criminology, detail of the key aspects and uses of international criminal law, and the potential of alternative modes of attaining social justice. Case studies from around the globe will be analysed along with an emphasis placed on assessing the significance of issues, rights and justice reforms in developing regions.

School Social Sciences

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Undergraduate degree in criminology, criminal justice or a related social science area, or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain key terms and issues in global criminology;
2. Distinguish theories of global criminology and globalisation;
3. Assess key literature and research evidence demonstrating a critical understanding of policy implications;
4. Design and successfully complete a research project in International Criminology.

Subject Content

Theory and scope of global criminology
 State crimes and legal liability
 Transitional justice
 The globalisation of law and human rights
 Victimology and international victim rights
 Crime, Human Rights and the UN
 Gender and international justice
 Health and human security
 Human rights and worker exploitation
 Criminalisation versus protection of refugees
 Strengths and weaknesses of international criminal justice (the ICC)
 Justice initiatives in developing regions

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Opinion Piece (Op-ed)	1,000 words	20	N	Individual
Book Review	1,000 words	20	N	Individual
Applied Project: Research project	3,000 words	60	N	Individual

Teaching Periods

HUMN 7023 Global Health, Migration and Development

Credit Points 10

Legacy Code 102576

Coordinator Melissa Phillips ([https://directory.westernsydney.edu.au/search/name/Melissa Phillips/](https://directory.westernsydney.edu.au/search/name/Melissa%20Phillips/))

Description This unit introduces students to the intersection between global health, human migration and economic development. Students are introduced to international efforts to manage and support better health for all populations, particularly those under stress through civil conflict or epidemic. Through the lens of migration theories, the course will examine why and how people migrate, the dynamisms and complexities of migrants' settlement in their new environment, the socio-economic and political dimensions of forced migration and its consequences, and the relationship between voluntary migration and economic and development goals at regional, national and international level.

School Social Sciences

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

A broad and coherent knowledge, with depth in the underlying principles and concepts in one or more disciplines in Arts or Social Sciences.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and critically review conceptual frameworks for understanding migration processes and causes and effects of migration locally, regionally, and internationally.
2. Explain the socio-political dimensions of different types of migration and the social and health burden associated with various types of migration.
3. Articulate relevant policy responses to maximise the socio-economic impact of voluntary migration including the strengths and limitations of their application.
4. Succinctly summarise international standards and guidelines as well as best practices governing the needs of forced migrants.
5. Differentiate the roles of key UN agencies from those of international NGOs and the civil society in response to the needs of various types of migrants and in relation to advocacy.
6. Develop competence in analysing the role of voluntary migration in the context of development assistance, poverty alleviation and skill transfer.
7. Critically review the ethical dimensions associated with the militarisation of development aid and humanitarian response.

Subject Content

Globalisation and international migration

- relationship between globalisation and Migration
- international Migration theories
- patterns of international Migration
- dialogue on international Migration: United Nations position and other key players
- international Migration Controversies

Forced Migration: Internally displaced people

- Who is an internally displaced person (IDP)?
- Overview of The social and health Burden of IDPs: fleeing, returning and post Conflict phases.
- policy response: soft vs. hard laws

Forced Migration: Refugees and complex humanitarian emergencies

- history and patterns of complex humanitarian emergencies
- Disaster epidemiology
- Refugees health and Burden of disease
- setting priorities and decision making and programming
- international guidelines and Standards
- Refugee Governance and Regional mechanisms and policy response

Forced Migration: Asylum seekers

- who is an Asylum seeker? how do they differ from An IDP or A Refugee
- Detention practice and Ethical dimensions
- UNHCR Detention guidelines
- social and health Burden of asylum seekers in Detention
- alternatives to Detention: The European perspective Vs An Australian perspective
- social and health policy response: role of NGOs in Detention vs. political response.

Forced Migration: Climate Change and Displacement

- Complexity and definitional issues as to what constitutes an 'environmental migrant'

- The Challenge of predicting The scale of climate and environmentally induced Migration
- current Trends, patterns and approaches to address The issue
- explore interconnected effects of climate change, health, and Migration including The types of health consequences linked to climate change that act as drivers of Migration
- Voluntary Migration: Rural to

Coordinator Melissa Phillips ([https://directory.westernsydney.edu.au/search/name/Melissa Phillips/](https://directory.westernsydney.edu.au/search/name/Melissa%20Phillips/))

Description This unit enables students to map the emergence of international humanitarian and development agencies from the mid-20th century to the modern day. Students will consider and assess international efforts to end poverty, such as the United Nations Conference on the Human Environment, the Rome Declaration and Plan of Action on World Food security, the Millennium Development Goals (MDGs) and the post-2015 Sustainable Development Goals (SDGs). A particular emphasis is placed on developing the skills to gauge the accountability and ethical approaches of humanitarian actors and agencies in global development.

School Social Sciences

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

A broad and coherent knowledge, with depth in the underlying principles and concepts in one or more disciplines in Arts or Social Sciences.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and assess enablers and barriers to development from historical, geographical, political, demographic, sociological and

economic perspectives, and the various roles of different actors in development processes.

2. Describe and critically assess current international efforts to end poverty.
3. Critically consider the accountability and ethical approaches of humanitarian actors and agencies in global development.
4. Theorise the nexus between humanitarian interventions and development processes.
5. Critically review the ethical dimensions associated with the militarisation of development aid and humanitarian response.

Subject Content

1. The complex interplay of ideas surrounding international response and management of natural and man-made disasters, and the consequent efforts to induce development or to rebuild states.
 2. The emergence of international humanitarian and development agencies from the mid-20th century to the modern day.
 3. Current International efforts to end poverty, such as the United Nations Conference on the Human Environment, the Rome Declaration and Plan of Action on World Food security, the Millennium Development Goals (MDGs) and the post-2015 Sustainable Development Goals (SDGs).
 4. Enablers and barriers to development from historical, geographical, political, demographic, sociological and economic perspectives.
 5. Humanitarian and development actors and the various roles they play in intervention and development processes.
 6. Accountability and ethical approaches of humanitarian actors and agencies in global development.
- Ethical dimensions associated with the militarisation of development aid and humanitarian response.

HUMN 7026 Knowledge Translation

Credit Points 10

Legacy Code 800199

Coordinator Michael O'Connor ([https://directory.westernsydney.edu.au/search/name/Michael OConnor/](https://directory.westernsydney.edu.au/search/name/Michael%20OConnor/))

Description Knowledge translation looks at how knowledge created through research can be applied in real world contexts. It takes research from the theoretical stage (i.e. "that's interesting, but so what?") to the applied stage where it can be used to create real impact. In this unit, we explore the two main processes of knowledge translation - communication and implementation. This is a highly collaborative unit where the interdisciplinary group meets to engage in general theoretical discussion and practice various knowledge translation activities based on our various fields of research.

School Graduate Research School

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a PhD program or program 8111 - Graduate Certificate in Researcher Engagement, Development and Impact

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Integrate academic presentation experience into a coherent narrative that demonstrates development and refinement of advanced oral and written communication skills for an academic setting, highlighting relevant outcomes and impacts.
2. Understand concepts and frameworks in implementation science and how to utilise implementation science theory to effect change
3. Establish an effective research profile to build networks and dissemination avenues, including various platforms such as Twitter, LinkedIn, ResearchGate, Academia.edu etc
4. Demonstrate evidence of skills, personal attributes and experiences gained in an ePortfolio.

Subject Content

What is knowledge translation?

Knowledge translation as a pathway to building impact opportunities
Strategies for building networks, end users and dissemination avenues
Developing a knowledge translation strategy
Communicating research results and impact within and outside academia

Implementation science and how it can be harnessed to create change

HUMN 7027 Leading Change

Credit Points 10

Legacy Code 102161

Coordinator Christine Woodrow ([https://directory.westernsydney.edu.au/search/name/Christine Woodrow/](https://directory.westernsydney.edu.au/search/name/Christine%20Woodrow/))

Description From 2020 students should note that core units are now taught in semesters rather than half yearly sessions. This unit explores change and leadership through a range of contexts. In this unit we critically analyse cultural, structural and political dimensions of change in organisations, systems and communities. This unit is grounded in leadership models that feature collaborative and relationship enhancing approaches to enable purposeful change.

School Education

Discipline Education Studies

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the nature of change, change agency and the role of individuals, organisations and systems
2. Critique change strategies, including media, contexts, systems and impacts.
3. Articulate a holistic perspective on leaders as activists, advocates and capacity builders within change processes
4. Analyse models of leadership for productive change
5. Use cases to apply theoretical understandings about leadership and change
6. Evaluate a range of effective strategies, processes and skills that may be used to develop and maintain constructive teamwork;
7. Evaluate a case study of successful change leadership
8. Evaluate reflective and ethical approaches to case study conduct

Subject Content

1. Understanding and critically analysing change and change contexts.
2. Theory and practice of leadership for change.
3. Critiquing and building models of leadership for activism, advocacy and capacity building
4. Application of understandings about leadership and change to specific cases and examples.
5. Building strategic partnerships and active team work.
6. Using and developing case studies to examine change.
7. Reflective and ethical approaches to case study conduct.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Critical text analysis of policy, report or media text	2,500 words	40	N	Individual
Case study of a person or team who has (have) led successful change	3,500 words	60	N	Individual

Teaching Periods

HUMN 7028 Management and Evaluation of Aid Programs

Credit Points 10

Legacy Code 102578

Coordinator Thierno Diallo ([https://directory.westernsydney.edu.au/search/name/Thierno Diallo/](https://directory.westernsydney.edu.au/search/name/Thierno%20Diallo/))

Description Evaluation of development aid and relief programs is an instrument for accountability and effective learning in terms of what works, for whom, in what circumstances, and at what cost. This unit uses critical and practical analyses to provide students with the skills and knowledge required to plan, implement, manage, and evaluate development aid and relief programs. Students are introduced to program planning and management strategies, types of evaluation approaches and their application, and evaluation dissemination utilisation. They gain practical skills to translate evaluation into policy and practice

School Social Sciences

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Students have undergraduate level knowledge of research design, method and analysis.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and assess approaches to differing evaluation and monitoring frameworks for humanitarian and development projects.
2. Demonstrate skills in developing theory of change/project logic to guide the establishment of project/program effectiveness.
3. Demonstrate the knowledge and skills required to develop a project proposal in response to a call for an evaluation.
4. Critically examine both internal and external forces and realities that may hinder the acceptance of evaluation findings.
5. Critically evaluate project/program proposals and evaluation reports.

6. Identify and assess approaches to differing evaluation and monitoring frameworks for humanitarian and development projects
7. Demonstrate skills in developing theory of change/project logic to guide the establishment of project/program effectiveness
8. Demonstrate the knowledge and skills required to develop an evaluation project proposal
9. Critically examine both internal and external forces and realities that may hinder the acceptance of evaluation findings
10. Critically evaluate project/program proposals and evaluation reports

Subject Content

Introduction to stages in program planning.
 Six Normative Approaches to Evaluation.
 Types of evaluation: Formative, process and summative.
 Evaluation designs.
 Methods of data collection.
 Summarising evaluation data: data analysis and report writing.
 Evaluation dissemination and utilisation.
 Writing terms of reference for an evaluation.
 Developing an expression of interest and an inception report.
 Ethical and quality evaluation standards.
 Appraising project proposals and evaluation reports.
 Debriefing and reflection: Q and A.
 Defining the approach and objectives of evaluation
 Theories of change models
 Approaches to evaluation
 Approaches to evaluation: synthesis and meta-evaluation
 Designing evaluations: starting questions
 Selection evaluation designs: introduction to experimental, quasi-experimental and case study methods
 Designing and conducting evaluations: data collection strategies and tools
 Sampling strategies and real world / real time evaluation techniques
 Planning for and conducting data analysis
 Evaluating complex interventions
 Evaluation of organizational strategies and sector-wide programs
 Managing, presenting and disseminating evaluations
 The impact, ethics, and politics of evaluation in international organizations

Assessment

Teaching Periods

HUMN 7029 Master of Social Science Thesis

Credit Points 20

Legacy Code 102040

Coordinator Kamel Taoum ([https://directory.westernsydney.edu.au/search/name/Kamel Taoum/](https://directory.westernsydney.edu.au/search/name/Kamel%20Taoum/))

Description This is a 40 credit point year-long subject taken over two terms (20 credit points in each term). This yearlong subject requires the completion of a research thesis and associated activities. The purpose of this subject is the completion of a research study building on the research subjects so far completed in the core subjects of the Master of Social Science. Students will work with a supervisor to frame, conceptualise, conduct and complete a research study and present a final research thesis.

School Social Sciences

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 20cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) HUMN 7036 AND HUMN 7045

Co-requisite(s) HUMN 7001

Restrictions

Students must be enrolled in 1770 Master of Social Science or 1712 Master of Planning and have successfully completed 80 credit points including subjects 102175 Research in the Social Sciences & 102179 Theories of the Social.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate advanced knowledge and critical analysis skills in reviewing relevant literature
2. Formulate a successful research proposal for high level independent research thesis
3. Identify and apply a comprehensive understanding of the purpose and the requirements for ethics approval
4. Successfully argue the case for the methodology and theoretical perspective for a research project
5. Apply their skills and knowledge in a sustained program of critical reading, research activities and research writing
6. Present the research at a professional standard to an academic audience
7. Exemplify advanced academic analytical and written skills in the completion of the final written research thesis

Subject Content

Supervision contract with an academic supervisor
 Seminars and workshops conducted from time-to-time to support completion of the research thesis
 Literature review
 Research proposal ? research question, methodology, research design, collection and analysis methods
 Ethics application and clearance, as necessary

Research activities to complete the thesis
 Writing activities to complete the thesis
 Written and seminar presentation of the research findings and report

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

Proposal	2,000 words	10	N	Individual
Theory & Methodology Discussion paper	2,500 words	15	N	Individual
Seminar presentation & Attendance	20 minutes	5	N	Individual
Thesis	15,000 words	50	Y	Individual

Teaching Periods

HUMN 7031 Political Economy of Development

Credit Points 10

Legacy Code 101895

Coordinator Zulfan Tadjoeeddin ([https://directory.westernsydney.edu.au/search/name/Zulfan Tadjoeeddin/](https://directory.westernsydney.edu.au/search/name/Zulfan%20Tadjoeeddin/))

Description The unit introduces students to the main theories and the diverse political economy dimensions of development. It consists of three modules. The first deals with key concepts that interrogate the meaning of development, origins of prosperity and the concepts of poverty, inequality and redistribution, which are contentious in their applications to various groups. The second module examines core issues in the political economy of development, which include globalisation, foreign aid, democracy, conflict and the role of the state. The last module engages with pertinent case studies focusing on Asia, the Pacific as well as problems with development in the Western world.

School Social Sciences

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Review various theoretical perspectives of development and debates surrounding them.
2. Identify and critically analyse the core issues and their inter-linkages in the diverse perspectives of political economy of development.
3. Critically analyse cases of development using appropriate theoretical frameworks.

Subject Content

Module I - Concepts

1. Defining and measuring development
2. Origins of prosperity: Capital, geography, culture and institutions
3. Poverty, inequality and redistribution

Module II ? Core Issues

4. Globalisation: The West and the rest
5. Development assistance and foreign aid
6. Fragile and failed states: The bottom billion
7. Democracy and development
8. The state and development: Searching for a right balance

Module III ? Case Studies

9. The East Asian and Southeast Asian miracle
10. Global financial crisis (GFC) and populism
11. Development in the Pacific: Vulnerability of small island states
12. The struggle of Indigenous peoples

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 7032 Public Health in Complex Emergencies (Advanced)

Credit Points 10

Legacy Code 102574

Coordinator Nidhi Wali ([https://directory.westernsydney.edu.au/search/name/Nidhi Wali/](https://directory.westernsydney.edu.au/search/name/Nidhi%20Wali/))

Description The health, socio-economic, and political aspects of conflicts and disasters are complex and multidimensional, requiring political commitment and coordinated and effective prevention. This unit uses critical analyses to provide students with the skills and knowledge required to understand the politics of public health response in emergency situations. Students will be introduced to rapid health assessment protocols in, and health priorities and the prevention of public health effects of, complex emergencies. They will gain practical skills to evaluate and critically appraise the evidence used to inform public health policy and the effectiveness of different decision-making practices in emergency situations.

School Social Sciences

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique the principles that govern health response in complex emergencies, including the responsibility to respond and protect, and the roles and responsibilities of various actors.
2. Articulate relevant policy responses pertaining to decision making frameworks including when to respond, who does what and when, and when to leave or phase out the intervention.
3. Critically review the political and ethical dimensions of public health response in complex emergencies and how they relate to international agendas.
4. Evaluate the strengths and limitations of available evidence and epidemiological data that inform the public health response.
5. Analyse both internal and external forces and realities that may facilitate or impede the delivery of public health services and programs in complex emergencies.
6. Demonstrate the practical skills to plan, implement, and evaluate evidence-based prevention programs.
7. Deploy critical appraisal skills to evaluate the effectiveness of NGO coordination and interagency decision making in the humanitarian response.

Subject Content

- Multidimensional health, socio-economic, and political aspects of conflicts and disasters.
- Analysis of the requisite political commitment and coordinated effort for effective prevention.
- Critical analyses and their use in understanding the politics of public health response in emergency situations.
- Rapid health assessment protocols for priorities in health, and the prevention of public health effects of complex emergencies.
- The development of practical skills in the evaluation and critical appraisal of the evidence used to inform public health policy, and the effectiveness of different decision-making practices in emergency situations.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Case Study Essay	3000 words	50	N	Individual

Teaching Periods

HUMN 7033 Religion and Law in Contemporary Public Discourse

Credit Points 10

Legacy Code 102202

Coordinator Jane Durie ([https://directory.westernsydney.edu.au/search/name/Jane Durie/](https://directory.westernsydney.edu.au/search/name/Jane%20Durie/))

Description Debates over the role of religion as well as religious law in the public sphere have been ongoing themes in recent decades in many countries. Religion and law are two important yet rival sources of normative reasoning of public order in which they are constitutive, regulative and coercive forces. The unit introduces students to various understanding of the interrelations between religion and law in the societal and individual domains of the public sphere; and reflects on the contentious nature of the relationships given sensitive issues such as religious education, equal marriage, abortion, human rights. In the first part of the unit, students study the relationship between law and religion in various faiths such as Judaism, Christianity, Islam and Hinduism. The second part examines how different religious traditions interact and intersect with different legal traditions (common and civil law system) in a range of countries (for example Australia, UK, Israel, Indonesia, India, Iran).

School Social Sciences

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Undergraduate degree or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the intricate relationship between religion and law in multi-faith contexts and in relation to diverse social issues;
2. Analyse prevailing debates about state policies that concern faith and religious communities in various countries with different legal systems;
3. Assess the implications of the positioning of religious discourses and religious law in the public sphere.

Subject Content

The intersections of religion and law

Religion and law in Judaism

Religion and law in Christianity

Religion and law in Islam

Religion and law in Hinduism

Between religious and secular legislations

Between official and unofficial courts

Between private and public schools

Between pillarisation and deprofessionalisation

Can religion and law reconcile?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Essay	1,000 words	20	N	Individual
Book Review	1,500 words	30	N	Individual
Essay	2,000 words	50	N	Individual

Teaching Periods

HUMN 7034 Research Project in Cultural Exchange

Credit Points 40

Legacy Code 102545

Coordinator Nicholas Ng ([https://directory.westernsydney.edu.au/search/name/Nicholas Ng/](https://directory.westernsydney.edu.au/search/name/Nicholas%20Ng/))

Description In this unit you will undertake a research/development project in relation to cultural exchange with China. This may include professional involvement in a cultural exchange activity and/or a research project on an issue relating to cultural exchange. The activity will include researching the literature and interpreting this in relation to the chosen task in a research/project report. There is no class work. Each student will be supervised by a member of staff in the School of Humanities and Communication Arts.

School Humanities & Comm Arts

Discipline Anthropology

Student Contribution Band HECS Band 4 40cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) HUMN 4010

Restrictions

Students must have successfully completed 70 credit points in the Master of Chinese Cultural Relations or the Master of Cross-cultural Relations.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse historical and current Australian and Chinese cultural traditions that may influence current cross-cultural exchange activities
2. Apply theoretical perspectives, knowledge and experience based on working with practitioners to developments in intercultural exchange
3. Research issues relating to cross-cultural exchanges and events to resolve barriers to effective cultural interaction
4. Design and implement communication strategies and a business plan in relation to a cultural exchange activity
5. Develop and evaluate an innovative approach to cross-cultural communication and practice

Subject Content

Major practical or theoretical research project supported by documentation.

Documentation of project and progress reports.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Thesis	12,000 words	100	N	Individual

HUMN 7035 Research and Public Policy

Credit Points 10

Legacy Code 800212

Coordinator Anna Denejkina ([https://directory.westernsydney.edu.au/search/name/Anna Denejkina/](https://directory.westernsydney.edu.au/search/name/Anna%20Denejkina/))

Description Public policy can effect change in society at global, national and local levels. This unit examines public policy and the role of research in its development. Students will explore, analyse and understand the link between research and public policy, will receive guest lectures from experts in public policy development, and have the opportunity to produce a peer-reviewed public policy paper or article.

School Graduate Research School

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) HUMN 7038 AND
HUMN 7005 AND
HUMN 7026 AND
HUMN 7037

Restrictions

Students must be enrolled in a Doctoral (HDR) program and 8111 - Graduate Certificate in Researcher Engagement, Development and Impact.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse public policy in local, national and global contexts
2. Recognise and appraise the sources of existing public policies, their purpose and the processes used in their development.
3. Evaluate how policies can be designed to support basic principles of social justice.
4. Examine the contribution of a number of alternative approaches to the identification of issues, research methods, implementation and analyses of public policy.
5. Prepare an outline of public policy journal article or draft of public policy general audience article addressing a topic relevant to the student's research area.
6. Reflect on own performance and identify own development needs.

Subject Content

Role of public policy
Ethics and public policy
Theory of public policy
Development of public policy
Role of public policy
Ethics and public policy
Theory of public policy
Development of public policy

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Reflection	2 x 750 (1,500 words total)	S/U	Y	Individual
Proposal	(a) 800-word draft OR (b) 1,250-word outline of article	S/U	Y	Individual
Report	2,000 words	S/U	Y	Individual

HUMN 7036 Research in the Social Sciences

Credit Points 10

Legacy Code 102175

Coordinator Sharon Kwok (<https://directory.westernsydney.edu.au/search/name/Sharon Kwok/>)

Description From 2016 this unit replaced by 102357 - Ethics and Diversity in Research and Therapy for students enrolled in 4595-Master of Art Therapy only. This unit provides foundational skills and knowledge for research in the Social Sciences including contemporary developments such as digital and online research. It introduces key research concepts of epistemology, ethics, theory and methodology drawing on different fields of studies within the Social Sciences. The unit canvasses critical debates and approaches to research in the Social Sciences; the processes by which knowledge is created through research; and the purposes to which knowledge is applied in the Social Sciences. Finally, the unit focusses on developing student's skills and knowledge for developing research questions and research proposals.

School Social Sciences

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects CULT 7005 - Research for Practice

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Undergraduate degree in the Social Sciences or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate critical understanding of the importance of research in the social sciences
2. Critically analyse the processes by which knowledge is created through research
3. Explain and evaluate epistemological and theoretical frameworks for research in the social sciences
4. Understand and demonstrate the steps required in completing a research proposal
5. Appraise different methodological approaches to research in the social sciences

Subject Content

1. Introduction ? research in the social sciences
2. Contemporary approaches to research in the social sciences
3. Doing ethical research in the social sciences
4. From research interest to research question ? developing a research question
5. Conceptualising research in the social sciences - What is ontology/ epistemology
6. Theoretical perspectives in the social sciences
7. Research Methodologies
8. Methods for collecting and analysing research data
9. The research proposal template
10. Writing as research

Assessment

Essay	100 words each, (total 1,000 words)	10	N	Individual
Report	2,000 words	50	N	Individual

Teaching Periods

HUMN 7037 Researcher Engagement and Impact

Credit Points 10

Legacy Code 800209

Coordinator Jessica Weir ([https://directory.westernsydney.edu.au/search/name/Jessica Weir/](https://directory.westernsydney.edu.au/search/name/Jessica%20Weir/))

Description Maximising impact requires strategy. In addition to an extensive relationship-building with external parties as well as a general commitment to knowledge translation, achieving impact also means being strategic with research design from the earliest stages of project planning. Who is your research targeted to? What are the broader social aims of your research? Which individuals and organisations might have a stake in the outcomes of your research? What are the relevant disciplinary, policy, economic, industry, and social contexts for your research? What barriers or opportunities exist within these contexts? What social media and other communication platforms are available for you to transfer knowledge? What types of public communication should you engage in, and at what stages of your research? This unit will explore how to design research projects with such questions in mind, by combining collaborative workshops with assessments tailored specifically to your own circumstances. Whatever stage your research is at, you will have the opportunity to produce output that will feed into your broader impact or engagement objectives.

School Graduate Research School

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a PhD program or program 8111 - Graduate Certificate in Researcher Engagement, Development and Impact.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the role of innovation and creativity in research;
2. Demonstrate evidence of skills, personal attributes and experiences gained in an ePortfolio;
3. Reflect on own performance and identify own development needs;
4. Initiate research networks and relationships with colleagues, mentors and peers;
5. Appreciate the importance of engagement and the impact of research on society;

6. Translate their discipline to audiences both inside and outside the academy.

Subject Content

- How to become an engaging researcher
- How to communicate with confidence
- Effective collaboration skills
- Networking skills/extending outwards
- Global citizenship
- Importance of engagement and the impact of research on wider society and of the impact of society on research
- How to become an engaging researcher

HUMN 7040 Social Ecology

Credit Points 10

Legacy Code 102152

Coordinator David Wright (<https://directory.westernsydney.edu.au/search/name/David Wright/>)

Description This unit focuses on learning in the context of social-ecological understanding. It asserts that ecological sustainability is a consequence of the understanding and enactment of social-ecological relationships. In this regard 'social ecology' describes a field of understanding while 'sustainability' describes praxis in a social-ecological context. Both experience and the understanding of experience - learning- are subject matter. This study is undertaken through reference to ecological systems of understandings in the context of challenges to that understanding. It is grounded in reference to learning, change, creativity, culture, politics and the physical environment. The unit introduces key theorists and invites students to examine their personal relationship to social-ecological learning.

School Education

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects HUMN 7039 - Researching Social Ecology

Restrictions

Students must be enrolled in a postgraduate program, with the exception of those students enrolled in the Bachelor of Research Studies.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand social ecology as a contested term through insight into the history of its use (and thereby possible future uses) in the field of sustainable social practice.
2. Communicate understanding of the systemic base of ecological relationships.
3. Evaluate transformative learning theory for its relevance to individual and social sustainability.
4. Design a project that demonstrates a capacity to work with learning, in and through personal, social and environmental relationships, and design a sustainable response to an issue of learning.
5. Create insight into the relationship between personal experience and learning through ecological understanding.
6. Evaluate ecological understanding and transformative learning theory as socio-cultural phenomena, through reference to real world experience

Subject Content

1. Social ecology, sustainability and the ecological discourse
2. Systemic perspectives and the perspective of the participant
3. Social ecology, sustainability and ecological science
4. Learning in relation to Indigenous ways of knowing, place and the local?
5. Learning through imaginative and creative ways of understanding and communicating
6. Mindfulness in relation to ecological understanding
7. Social ecology, sustainability, social action and patterns and perceptions of change

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Literature review	1500 words	40	N	Individual
Essay	3500 words	60	N	Individual

Teaching Periods

HUMN 7041 Social Research in the Digital World

Credit Points 10

Legacy Code 102194

Coordinator Jenna Condie ([https://directory.westernsydney.edu.au/search/name/Jenna Condie/](https://directory.westernsydney.edu.au/search/name/Jenna%20Condie/))

Description This unit provides a critical introduction to the opportunities and challenges of digital social research as well as the theoretical, methodological, and ethical implications of carrying out research in and on the digital. The social web provides researchers both with a tool and an environment to explore the intricacies of everyday life. In this unit, students will be immersed in online environments to further understand the theoretical, methodological and ethical issues of social research in the digital world. Through such activities, students participate as active digital researchers in online social science spaces to result in a professional online web presence and an in depth understanding of current and future research trends in digital social research.

School Social Sciences

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the similarities and differences between emerging methods of digital research and traditional social research methods;
2. Undertake in-depth evaluation of the possible challenges of digital technologies to established theoretical assumptions and paradigms in the social sciences and in interdisciplinary contexts;
3. Articulate a critical understanding of different digital research methods and analyse their relative merits and limitations for different research contexts;
4. Demonstrate their ability to participate in networked scholarly practices across the social web.

Subject Content

Overview of the field of digital research

Conceptualising digital research settings

Digital scholarly practices including networking, open access

approaches, and developing a professional web presence

Digital research similarities and differences in comparison to more traditional research practices

Understanding of the place of digital research in the broader field of social research

Limitations and possibilities for digital research

Ethical concerns associated with digital data gathering, analysis and production

The political economy of digital data; power, control, and politics

Working with big data and data science techniques

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Online contributions	2000 (4 x 500)	40	N	Individual

Report	2000 words	40	N	Individual
Discussion	30 minutes	20	N	Individual

Prescribed Texts

- There is no set textbook for this subject. Relevant reading will be given throughout the subject and made available on vUWS.

Teaching Periods

HUMN 7042 Space, Place and the Field

Credit Points 10**Legacy Code** 102295

Coordinator Stephen Healy ([https://directory.westernsydney.edu.au/search/name/Stephen Healy/](https://directory.westernsydney.edu.au/search/name/Stephen%20Healy/))

Description This unit explores the relevance and application of the 'spatial turn' across social sciences and humanities disciplines. It examines various ways of thinking spatially, theorizing processes that shape urban space, and researching in place. Through concrete engagements with Sydney as a living laboratory it explores how the spatial turn adds to and counters dominant ways of thinking that privilege temporality or deep structure. Space, Place and the Field is analysed at varying scales, including from bodies to species, streets to cities, interpersonal to macro politics, drawing on the wealth of social, cultural, economic and environmental studies of Sydney.

School Social Sciences**Discipline** Human Geography**Student Contribution Band** HECS Band 4 10cp**Level** Postgraduate Coursework Level 7 subject**Restrictions**

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Undergraduate degree in the Social Sciences or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine and assess current debates about space and place in social analysis
2. Define and apply methods for qualitative and quantitative spatial analysis
3. Explain and conduct different approaches to field-based data collection.

Subject Content

Key concepts and traditions in geographic thought
 Environmental determinism then and now
 Cultural ecology then and now
 Regionalism
 Spatial science: Sydney's Social Atlas
 Field observations
 Inequality and urban geography
 Humanistic geography and phenomenology
 Gender and the city
 Power, diversity and difference on the street

Materialities and the more than human city

HUMN 7044 Theories of Difference and Diversity

Credit Points 10**Legacy Code** 102176

Coordinator Peter Bansel ([https://directory.westernsydney.edu.au/search/name/Peter Bansel/](https://directory.westernsydney.edu.au/search/name/Peter%20Bansel/))

Description This unit will introduce students at post-graduate level to contemporary theories and concepts of difference and diversity. The unit will particularly examine feminism, post-structuralism, new materialism, queer theory and critical realism. It will also address specific concepts such as inequality, human rights, freedom and marginalisation. It will apply these theories and concepts to investigations of contemporary social issues and debates related to race, disability, ethnicity, sexuality, gender and other categories of individual identity and collective belonging. The unit will provide a strong theoretical base to the work that students have undertaken in the unit Theories for Critical Practice, and inform the work to be undertaken in the other units in this specialisation.

School Social Sciences**Discipline** Studies In Human Society**Student Contribution Band** HECS Band 4 10cp**Level** Postgraduate Coursework Level 7 subject**Restrictions**

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Undergraduate degree in the Social Sciences or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Differentiate and analyse contemporary theories of difference and diversity
2. Argue a personal position of difference and diversity
3. Critically appraise concepts of inequality, human rights, freedom, marginalisation
4. Demonstrate the application of theories in relation to contemporary social issues of difference and diversity

Subject Content

1. What is meant by the terms difference and diversity
2. Concepts of inequality, human rights, freedom, marginalisation
3. Contemporary theories of difference and diversity
4. Assumptions and perspectives and impacts of contemporary theories
5. Developing a theoretical position
6. Linking theories and concepts to the Australian context and social issues

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

HUMN 7045 Theories of the Social

Credit Points 10

Legacy Code 102179

Coordinator Sky Hugman ([https://directory.westernsydney.edu.au/search/name/Sky Hugman/](https://directory.westernsydney.edu.au/search/name/Sky+Hugman/))

Description This unit examines the notions that humans are intrinsically social beings who are at once products of and producers of their own circumstances. By providing an overview and critical engagement with a wide array of social theories, the unit explores key aspects of human society including structure and agency; knowledge and power relations; culture and identity; class, economy and consumption; self, society and the public sphere; social change and social justice. Students consider the social, political and discursive processes through which theories are made and applied, and how theories may both limit and create possibilities for research and practice. Throughout the unit students will be encouraged to use critical social theory to not only expose and analyse social systems but also to engage in reflection about how theoretical perspectives can inform practices of change.

School Social Sciences

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects HUMN 7043 - Theories for Critical Practice HUMN 7050 Theories of the Social

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Undergraduate degree in the Social Sciences or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically reflect the inter-relationships between theory, research and social practices in a discipline/field of practice
2. Appraise core assumptions operating within a discipline and/or field of practice
3. Demonstrate high level judgement in the deployment of key theoretical constructs within a discipline and/or field of practice
4. Contribute to contemporary theoretical debates within and across disciplines and fields of practice.
5. Develop an advanced critical understanding of how social theory can inform transformative practice on an individual and collective level.

Subject Content

Foundations of social theory

Modernity

Marx and Historical Materiality

Ideology, discourse and power

Critical Theory

Subjectivity, existentialism and phenomenology

Post-structuralism, post-modernity and feminism

Psychoanalysis as social theory

Post colonialism and southern theory

Structuration and multiple modernities

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Teaching Periods

HUMN 7047 Transnational Crime

Credit Points 10

Legacy Code 102198

Coordinator Sharon Kwok ([https://directory.westernsydney.edu.au/search/name/Sharon Kwok/](https://directory.westernsydney.edu.au/search/name/Sharon+Kwok/))

Description In traditional criminology crimes have been understood as acts that breach the criminal code of a given nation state. By contrast,

transnational crimes are defined as violations of law that embrace more than one nation in their planning, operation or impact. These crimes often have a much broader (though often veiled) relation to serious individual and collective social harm and can be especially difficult to prevent or investigate and prosecute. Students will be expected to understand the global and regional developments that foster transnational crime, its range and security impacts, and international agreements and conventions as well the new forms of policing developed to counter it.

School Social Sciences

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Undergraduate degree in criminology, criminal justice or a related social science area, or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe evidence about the full range of transnational forms of crime;
2. Critically describe, distinguish between and assess rival theoretical explanations of transnational crime;
3. Explain criminal justice policy and policing implications of these new forms of crime.

Subject Content

1. Introduction to organised crime and transnational crime
2. Economics of transnational crime
3. Borderless criminal organisation
4. Transnational Crime - Drug Trafficking
5. Transnational Crime - Human trafficking and smuggling
6. Cyber crime and virtual border
7. Wildlife trafficking
8. Policing the globe

Assessment

HUMN 7048 Understanding Race

Credit Points 10

Legacy Code 102601

Coordinator Alana Lentin ([https://directory.westernsydney.edu.au/search/name/Alana Lentin/](https://directory.westernsydney.edu.au/search/name/Alana%20Lentin/))

Description What is race? What is racism? How are they related? Why do they continue to shape social, political and economic relations well after the biological concept of race was disproven? What are the links between race and colonialism and in Australia particularly, the invasion and settlement of Aboriginal land? How is race related to property? How do ideas of race become embedded in state institutions and why do they continue to shape disadvantage and inequality? Though race develops differently in different contexts, it is best thought about through relational readings that draw out both the differences but also the similarities between places and times. This unit will draw on race critical and decolonial texts to focus on race as a modern idea that is shaped in the contexts of colonialism, slavery, and persists in post-immigration multicultural societies.

School Humanities & Comm Arts

Discipline Sociology

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify major sociological, literary and cultural approaches to race and racism
2. Analyse primary texts from the race critical literature
3. Apply race critical analyses to socio-political and historical events and issues

Subject Content

Unit content will draw on the following topics in race critical scholarship:

1. Defining the race concept
2. Race and state
3. Race as property
4. Race critical and decolonial epistemologies
5. Postracialism

Assessment

HUMN 7049 Violence, Culture and Criminal Justice

Credit Points 10

Legacy Code 102199

Coordinator Stephen Tomsen ([https://directory.westernsydney.edu.au/search/name/Stephen Tomsen/](https://directory.westernsydney.edu.au/search/name/Stephen%20Tomsen/))

Description In recent decades, a new wave of racial, ethnic and religious violence and terrorism has been linked to rapid patterns of globalisation and tensions over group and national identities. Specific knowledge about violence and considerations about its real extent, causes and cultural meanings remain uncertain. Yet there is evidence of a recent general decline in violence with a significant role for legal and quasi-legal bodies for acknowledging injury, punishing previously 'deniable' violence and promoting reconciliation. Seminar topics in this course will include the global patterns and forms of violence; individual versus societal and historical explanations; biology, evolution and culture; gender, race and inequality; hatred, genocide, collective identity and psychoanalysis; the role of states and law in countering and condoning interpersonal and collective violence; debates about victimhood and the cultural symbols of violence and its memorialisation.

School Social Sciences

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Undergraduate degree in criminology, criminal justice or a related social science area; or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe evidence of the global patterns, histories and forms of interpersonal violence and collective conflict;
2. Critically read, distinguish between, and write about rival theories of human violence;
3. Give examples of the role of international criminal law in countering violence

Subject Content

1. Defining violence
2. The global scope and forms of violence
3. Collective violence and warfare
4. Criminology, biology and evolutionary explanation
5. Society, culture and the civilising process
6. Violence, law and masculinities
7. State violence
8. Violence, race and genocide
9. The Holocaust
10. Industrial killing and distanced suffering
11. Violence, victimhood and memory
12. Memorialising violence, truth and international justice

HUMN 7051 How to Write History

Credit Points 10

Legacy Code 102661

Coordinator Alison M Downham Moore ([https://directory.westernsydney.edu.au/search/name/Alison M Downham Moore/](https://directory.westernsydney.edu.au/search/name/Alison%20M%20Downham%20Moore/))

Description This unit introduces students to specific styles of historical methodology, considering how each of these styles alter the kinds of questions historians ask, how they select their sources, and how they account for the differences between past and present. Students undertake an independent, guided Applied Project on a historical methodology relevant to their intended thesis project.

School Humanities & Comm Arts

Discipline History

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Make an informed choice of methodological approach in your Masters thesis, having considered a range of possible options
2. Relate your eventual choice of Masters thesis methodology to existing scholarship of that style
3. Explain why your chosen Masters thesis methodology is the most appropriate approach for their chosen topic
4. Describe the range of methodological approaches that characterise much current historical research
5. Understand what is at stake in historians' choices of particular methodologies
6. Detect and analyse the methodological approach of any piece of historical scholarship

Subject Content
