Programming for Data Science

Credit Points 10

Legacy Code 301113

Coordinator Franco Ubaudi ([https://directory.westernsydney.edu.au/search/name/Franco Ubaudi/](https://directory.westernsydney.edu.au/search/name/Franco%20Ubaudi/))

Description The use of computers and computer programming for Data Science is fundamental to the discipline. This introductory unit will briefly cover the use of spreadsheet systems and then will consider programming in the statistical system "R" in detail. Other special purpose languages will also be touched on briefly including SQL (Structured Query Language).

School Computer, Data & Math Sciences

Discipline Statistics

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use Excel to manage and manipulate data.
2. Extract, transform and load data using R and R-Studio; including reading and writing data files.

3. Create complex R programs to conduct Data Science tasks.
4. Use basic SQL to access databases.
5. Apply simulation techniques to Data Science tasks.
6. Create reports using Markdown and R-Markdown.

Subject Content

1. Use of Spreadsheets for Data Science
2. Introduction to R and R-Studio
3. Data Types, Variables , Expressions, and Data Structures
4. Input and Output
5. Control Structures: Loops, ,Conditional Expressions, and Functions
6. Simulation techniques
7. Object-oriented programming in R
8. Introduction to SQL
9. Using Markdown for reporting

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Online Quizzes	5 x 30 minutes	20	N	Individual
Computer Test	Lab based 1 hour practical	40	N	Individual
Assignment	3,000 words	40	N	Individual

Teaching Periods

MATH 7014 Social Media Intelligence

Credit Points 10

Legacy Code 301116

Coordinator Laurence Park ([https://directory.westernsydney.edu.au/search/name/Laurence Park/](https://directory.westernsydney.edu.au/search/name/Laurence%20Park/))

Description Social Media Intelligence presents the theory and practice of extracting and analysing information from social media networks. The aims are to identify properties of social networks, and to make predictions about future events. Topics included will cover areas such as Graph theory, Game theory and Network dynamics and we will identify how these can be used to model and extract information from Facebook and Twitter.

School Computer, Data & Math Sciences

Discipline Computer Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Basic algebra and computing skills.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and describe properties of social media networks.
2. Compute graph statistics from given social media networks.
3. Analyse simple games and describe their connection to social media networks.
4. Compute and interpret centrality scores over social media networks.
5. Generate and identify small world networks.
6. Use a computer to assist in the analysis of large scale social networks.

Subject Content

1. Graph theory and social networks
2. Introduction to Game theory
3. Information networks and the Web
4. Network population models
5. Network structural models

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Online quizzes	5 x 30 minutes	20	N	Individual
Project	2000 words	30	N	Individual
Exam	2 hours	50	N	Individual

Teaching Periods

MATH 7015 Statistics for Accountants (PG)

Credit Points 10

Legacy Code 200424

Coordinator Kenan Matawie ([https://directory.westernsydney.edu.au/search/name/Kenan Matawie/](https://directory.westernsydney.edu.au/search/name/Kenan%20Matawie/))

Description Statistics for Accountants introduces the basic concepts and techniques for statistical inference and decision making in a business context.

School Computer, Data & Math Sciences

Discipline Statistics

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Business program.

Assumed Knowledge

Mathematics to the HSC level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. organise, summarise and graph data appropriately;
2. apply probability and risk measures to solve business decision making problems;
3. formulate economic and financial hypotheses into statistically testable forms and carry out tests of hypotheses accordingly;
4. derive confidence intervals for unknown population parameters
5. identify the underlying assumptions associated with each statistical technique; be able to carry out the technique and interpret the results
6. employ appropriate statistical methods and techniques for statistical analysis and forecasting;
7. use one or more statistical analysis packages.

Subject Content

Data presentation, descriptive statistics and index numbers
Probability, probability distributions and decision analysis
Sampling distributions
Statistical inferences -estimation
Statistical inferences - hypothesis testing
Linear regression and correlation analysis
Analysis of categorical data

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

MATH 7016 The Nature of Data

Credit Points 10

Legacy Code 301114

Coordinator Franco Ubaidi ([https://directory.westernsydney.edu.au/search/name/Franco Ubaidi/](https://directory.westernsydney.edu.au/search/name/Franco%20Ubaidi/))

Description This Unit covers concepts of data centric thinking. The main areas discussed are; Populations and Samples; Sampling concepts; Types of Data; Descriptive Methods; Estimation and Inference; and Modelling. The Unit takes a computational and nonparametric approach, before discussing theoretical concepts and Normal distribution theory as large sample approximations.

School Computer, Data & Math Sciences

Discipline Computer Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Undergraduate degree with some statistical content (1 subject) is useful.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe types of data and the relevance to real world examples
2. Design data collection strategies that provide unbiased and reliable data
3. Apply appropriate computer based strategies to estimate population parameters of interest
4. Analyze data to make inferences about populations
5. Create and evaluate simple predictive models, using computer software
6. Evaluate literature and identify common statistical mistakes.

Subject Content

1. The Types, Description and Exploration of Data
2. Collecting Good Data
3. Probability Theory
4. Computer assisted Estimation and Inference
5. Linear Modelling
6. Large Samples and Normal Theory
7. Common Statistical Mistakes

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	5 x 30 minutes	20	N	Individual

MATH 7017 Probabilistic Graphical Models

Credit Points 10

Legacy Code 301365

Coordinator Oliver Obst ([https://directory.westernsydney.edu.au/search/name/Oliver Obst/](https://directory.westernsydney.edu.au/search/name/Oliver%20Obst/))

Description Modelling data provides us with a method for inference, but there are many occurrences when interest lies in the reasoning behind the decision making. In this unit, students learn to model processes and the reasoning behind the processes using probabilistic graphical models. The unit investigates the construction and application of model-based approaches for complex systems. Students will manually create models based on prior knowledge and investigate methods of learning model structures from data, which can be used to make decisions under uncertainty. Topics covered include Monte Carlo Methods, Decision Theory, Bayesian networks, Markov networks, and the use of information theory.

School Computer, Data & Math Sciences

Discipline Statistics

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) MATH 7016

Assumed Knowledge

Probability, Linear Algebra, Basic Programming.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Manually construct probabilistic models for specific data.
2. Automatically construct probabilistic models by learning from data.
3. Use the models to make decisions under uncertainty.
4. Accurately represent a probabilistic model using a graphical representation.

Subject Content

1. Network representation and graphical models
2. Probabilistic models and entropy
3. Inference in graphical models
4. Learning graphical models

MATH 7018 Scientific Informatics

Credit Points 10

Legacy Code 301388

Coordinator Miroslav Filipovic ([https://directory.westernsydney.edu.au/search/name/Miroslav Filipovic/](https://directory.westernsydney.edu.au/search/name/Miroslav%20Filipovic/))

Description This unit discusses the most important scientific revolutions in informatics throughout history and the role of Scientific Informatics in modern scientific research. It examines the influence of computing and informatics on the major paradigm shifts in the social, behavioural, biological, health and physical sciences and assesses the societal impact of future discoveries. The unit aims to provide training for Research and Coursework Masters in the computational techniques that are integral to much of modern scientific research as well as cultural and philosophical perspectives on the Science, Technology, Engineering and Mathematics (STEM). Students complete practical assessment items that are relevant to their field of research, which are designed to develop transferrable skills and familiarity with computing tools.

School Computer, Data & Math Sciences

Discipline Mathematics

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects MATH 7013 - Scientific Informatics

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique the most important scientific revolutions that took place in Informatics related to social, behavioural, biological, health and physical sciences, their causes, and their historical context.
2. Critically examine the social impact of Informatics revolutions through the use of relevant information.
3. Assess the impact on society of the major Informatics discoveries of the future.
4. Examine the role of Informatics in modern human history.
5. Analyse the impact of Informatics in larger socio-cultural context.
6. Write low-level scientific software to solve problems, using several standard languages/tools.
7. Present a solution to an Informatics problem with discussion of strengths and weaknesses.
8. Express research related contents through presentation and report writing.

Subject Content

These scientific informatics revolutions had a deep social impact by changing the way the world is seen and understood and by laying the foundations for the emergence of game-changing new technologies that continue to profoundly shape our lives and social order.

The Unit will promote deep thinking and open discussion on the social contexts and socio-cultural impacts of the major scientific revolutions with the main emphasis on the Scientific Informatics (Computing). Scientific Informatics knowledge and its application by scientists influence, even unconsciously, the way individuals in society think about themselves and interact with others and the world around them. The way of life for billions of people is deeply affected by the technologies and truths that have emerged.

The Unit will address the following fundamental issues

1. What is science informatics and how does it work (apply)?
2. What is the nature of scientific (informatics) research?
3. How does science (and informatics) develop and how do paradigms change?
4. How do scientific controversies begin and end so that rival professional commitments become shared scientific endeavour; For example, what distinguishes creationism from evolutionary theory, or astrology from astronomy?
5. What are the social, cultural and technological impacts and consequences of scientific revolutions with the main emphasis on Computing & Informatics and its applications?
6. What is the nature of observation and experiment?
7. How to question the scientific realism,
8. The rationality or irrationality of scientific revolutions,
9. The relation between science and values and the nature of explanation.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

Teaching Periods

MATH 7019 Mathematics of Signal Processing

Credit Points 10

Legacy Code 301440

Coordinator Paul Hurley ([https://directory.westernsydney.edu.au/search/name/Paul Hurley/](https://directory.westernsydney.edu.au/search/name/Paul%20Hurley/))

Description This unit teaches students to abstract and develop algorithms, in Python, for analysing and processing deterministic and stochastic data/signals. Students are taught strategies in developing solutions that are optimal and efficient to implement. They learn how to analyse signals under the Fourier transform and under different bases, allowing for an appreciation of how lossy compression works, and how to formulate and solve some convex optimisation algorithms. This subject will be undertaken at Parramatta City - Hassall St campus.

School Computer, Data & Math Sciences

Discipline Mathematics

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Assumed Knowledge

Students should know and understand basic linear algebra. Basic programming skills are necessary. Familiarity with Python notebooks is helpful but not mandatory.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Explain mathematical formulations of signal processing algorithms
- Demonstrate mastery of tools for tackling advanced signal and data processing problems
- Analyse advanced signal and data processing algorithms using numerical python programming
- Design applications as advanced signal and data processing algorithms
- Appraise applications of mathematical signal processing

Subject Content

- Motivation - what is mathematics of signal processing, etc.
- Linear algebra and Hilbert spaces
Examples ? neural networks
Basis and frames

- Fourier Transforms
Continuous Fourier series, Fast Fourier transforms
Convolution
- Sampling and interpolation
1D, 2D (sphere/manifold)
- Filtering
Finite Impulse Response (FIR) filters, Infinite Impulse Response (IIR) filters
- Approximation and compression
Wavelets
Time-frequency analysis
- Inverse problems and optimisation
Compressed sensing
LASSO
- Random signals
Probabilistic modelling
Wiener filter, etc.
Max likelihood / EM
- Event-driven sampling/filtering
Sampling in time vs sampling in amplitude
Filtering in asynchronous time
- Array signal processing
Beamforming

Assessment

MECH 2001 Kinematics and Kinetics of Machines

Credit Points 10

Legacy Code 300035

Coordinator Helen Wu ([https://directory.westernsydney.edu.au/search/name/Helen Wu/](https://directory.westernsydney.edu.au/search/name/Helen%20Wu/))

Description Kinematics is the study of the motion of objects, and Kinetics is the study of the causes of the motion. The focus for this unit is on rigid body kinematics which involves the study of a solid body with little or no deformation in planar motion, such as those in machines. The motion of key machine components and the forces they generate gives rise to design problems. Students gain an understanding of the relevance of kinematics and kinetics in the analysis and design of mechanical systems and of methods to ensure machines operate efficiently and safely.

School Eng, Design & Built Env

Discipline Mechanical Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) MATH 1016 AND ENGR 1018

Equivalent Subjects MECH 2002 Kinematics and Kinetics of Machines (WSTC AssocD)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret the kinematic structure of mechanisms
2. Identify freedom and constraint in machine
3. Apply graphical velocity and acceleration analysis techniques to mechanisms
4. Predict the movement of particles, a single rigid body
5. Analyse translational and angular displacements, velocities and accelerations of a single rigid body
6. Analyse multi-body mechanisms, gear trains, and cams
7. Verify measurements in the real world against theory presented in the lectures.

Subject Content

Freedom and constraints in mechanisms
 Velocity and acceleration analysis of mechanisms
 Particle kinematics
 Particle kinetics
 Rigid body kinematics
 Rigid body kinetics
 Mechanism kinematics
 Simple and epicyclic gear trains.
 Involute geometry of gear teeth
 The geometry of cams.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Participation	12 x 2 hours in class; 12x2 hours before class	5	N	Both (Individual & Group)
Quiz	15 minutes (per Quiz)	20	N	Individual
Practical	3 hours (per Practical)	15	N	Both (Individual & Group)
Final Exam	2 hours	60	N	Individual

MECH 2002 Kinematics and Kinetics of Machines (WSTC AssocD)

Credit Points 10

Legacy Code 700244

Coordinator Abbas Ranjbar ([https://directory.westernsydney.edu.au/search/name/Abbas Ranjbar/](https://directory.westernsydney.edu.au/search/name/Abbas%20Ranjbar/))

Description Kinematics is the study of the motion of objects, and Kinetics is the study of the causes of the motion. The focus for this unit is on rigid body kinematics, which involves the study of a solid body with little or no deformation in planar motion, such as those in machines. The motion of key machine components and the forces they generate gives rise to design problems. Students gain an understanding of the relevance of kinematics and kinetics in the analysis and design of mechanical systems and of methods to ensure machines operate efficiently and safely.

School Eng, Design & Built Env

Discipline Mechanical And Industrial Engineering And Technology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) MATH 1017 AND ENGR 1019

Equivalent Subjects MECH 2001 - Kinematics and Kinetics of Machines

Restrictions

Students must be enrolled at Western Sydney University, The College in 7022 Associate Degree in Engineering

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret the kinematic structure of mechanisms
2. Identify freedom and constraint in machines
3. Apply graphical velocity and acceleration analysis techniques to mechanisms
4. Predict the movement of particles
5. Analyse translational and angular displacements, velocities and accelerations of a single rigid body
6. Analyse multi-body mechanisms, gear trains, and cams

7. Verify measurements in the real world against theory presented in the lectures

Subject Content

- Freedom and constraints in mechanisms
- Velocity and acceleration analysis of mechanisms
- Particle kinematics
- Particle kinetics
- Rigid body kinematics
- Rigid body kinetics
- Mechanism kinematics
- Simple and epicyclic gear trains
- Involute geometry of gear teeth
- The geometry of cams

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Lab Reports x 3	2 hrs each	30	N	Individual
Online Quizzes x 5	30 mins each	20	N	Individual
Numerical Problem Solving	2 hours each	20	N	Individual
Research report and presentation	5 - 10 pages (Depending on the design, including images, graphs, photos, calculations and drawings using any simple drawing package Presentation 10 min including question time	30	N	Individual

MECH 2003 Mechanics of Materials

Credit Points 10

Legacy Code 300040

Coordinator Jonathan Vincent ([https://directory.westernsydney.edu.au/search/name/Jonathan Vincent/](https://directory.westernsydney.edu.au/search/name/Jonathan%20Vincent/))

Description Mechanics of Materials is the study of the stresses and deformation of a body made of any elastic solid material, and how these are related to the body's shape and the load applied to it. This unit looks at how and why structural components including bars and beams deform and break. It concentrates on how these are affected by the geometry of the body and loading. Types of loadings considered include normal loads, torsional loads and bending loads. The main objective of the unit is to introduce students to the aspects of stress, strain and internal force development in the components and the methods to determine the deformation and deflections of the components. Energy methods and impact loadings are also considered.

Level Undergraduate Level 2 subject

Pre-requisite(s) ENGR 1018

Equivalent Subjects LGYA 5707 Mechanics and Materials MECH 2004 Mechanics of Materials (WSTC Assoc Deg)

Learning Outcomes

On successful completion of this subject, students should be able to:

- Represent a general traction as stresses and a general displacement as strains and predict stress, strain and deformation for an engineering component under a static/dynamic loading
- Calculate support reactions, stress, strain and deformation in statically indeterminate an axially loaded member
- Predict stress and angle of twist in a circular shaft undergoing torsion
- Construct bending moment, shear force diagrams, bending stresses, deflections and transverse shear stresses for beams carrying point forces, distributed forces, and couples
- Calculate strain energy in axially loaded columns, shafts under torsion and beams under bending and use energy methods to calculate the deflection of a truss
- Predict the buckling of columns
- Take measurements in the real world, and use them to verify the theory presented in the lectures
- Predict stress, strain and deformation in an axially loaded member
- Calculate support reactions in statically indeterminate an axially loaded member
- Represent a General Traction as Stresses
- Represent a General Displacement as Strains
- Construct bending moment and shear force diagrams, for beams carrying point forces, distributed forces, and couples
- Calculate bending stresses and deflections for beams
- Calculate transverse shear stresses in beams
- Calculate strain energy in axially loaded columns, shafts under torsion and beams under bending

16. Predict stress, strain and deformation as a result of an impact loading
17. Use energy methods to calculate the deflection of a truss

Subject Content

Normal stress, strain and deformation
 Statically indeterminate components
 Representing a General Traction as Stresses
 Representing a General Displacement as Strains
 Torsional stresses and deformations
 2D stress transformations
 Bending moment and shear force diagrams
 Bending stresses and deflections
 Transverse shear stresses
 Energy methods
 Buckling of columns

Assessment

MECH 2005 Mathematics for Mechanical and Mechatronic Engineers

Credit Points 10

Legacy Code 301342

Coordinator Stephen Weissenhofer ([https://directory.westernsydney.edu.au/search/name/Stephen Weissenhofer/](https://directory.westernsydney.edu.au/search/name/Stephen%20Weissenhofer/))

Description This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This unit introduces mathematical tools and analytical reasoning useful for a wide range of professions, as well as highlighting mathematical foundations that have contributed to advances in engineering. The course content focuses more on useful concepts at the core of applied mathematics rather than theoretical mathematics. Students learn a range of concepts and methods from applied mathematics and how these apply to various fields of engineering.

School Eng, Design & Built Env

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MECH 3004 OR

MECH 2001

Incompatible Subjects ENGR 3006 - Control Systems

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse and develop mathematical models of multi-degree of freedom mechanical dynamical systems.
2. Analyse system response characteristics based on physical properties of the system.
3. Determine absolute and relative stability of a system using system responses to various control inputs and disturbances.
4. Analyse the effects of a controller in the system and its effects on system stability.
5. Design controllers in both frequency and time domain for linear time-invariant systems.

Subject Content

- Multi-degree of freedom vibration analysis and modelling;
- Open and closed loop systems;
- Transfer function and state variable methods in mechanical system modelling;
- System responses and concepts of stability;
- design and analyse control systems using root-locus, bode diagram and state-space methods for mechanical systems.

MECH 3002 Advanced Mechanics of Materials

Credit Points 10

Legacy Code 300761

Coordinator Jonathan Vincent ([https://directory.westernsydney.edu.au/search/name/Jonathan Vincent/](https://directory.westernsydney.edu.au/search/name/Jonathan%20Vincent/))

Description This unit builds on the Mechanics of Materials to provide students with knowledge about impacts of deformation, stresses, strains and strength on materials and components essential in understanding how to improve mechanical design. Students' analytic and problem solving skills are developed through analysis of impacts including non-elastic deformation, orientation of the reference axes, and how materials fail. Using knowledge about materials, students evaluate impacts on materials, the mechanisms to control properties of materials, and use mathematical calculations and techniques to determine stresses and strains on simple components. Overall, students develop the capacity to select appropriate materials and improve mechanical design.

School Eng, Design & Built Env

Discipline Mechanical Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MECH 2003

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use mathematical calculations to determine a range of stresses
2. Use graphical techniques to represent transformation equations for stresses and angles
3. Evaluate failure of materials in demonstrating knowledge of the relationship between the structure of materials and mechanical properties
4. Outline the mechanisms associated with creep, fatigue, and stress concentrations
5. Determine appropriate methods for controlling the properties of materials such as an alloy

Subject Content

Stresses beyond the yield point.

Residual stresses

Use Mohr's stress circle

Failure Theories

Creep and fatigue

Stress concentrations

Alloys, heat treatments and phase diagrams

MECH 3004 Dynamics of Mechanical Systems

Credit Points 10

Legacy Code 300480

Coordinator Helen Wu ([https://directory.westernsydney.edu.au/search/name/Helen Wu/](https://directory.westernsydney.edu.au/search/name/Helen%20Wu/))

Description This unit looks at how non-rigid components deform and oscillate. It looks at undamped and damped systems undergoing free vibration, steady state forced vibration and transient forced vibration. The principles of virtual work are used to investigate the equilibrium and dynamics of mechanisms.

School Eng, Design & Built Env

Discipline Mechanical Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MECH 2001 AND MECH 2003

Equivalent Subjects LGYA 5694 - Dynamics and Mechanical Systems

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use Virtual work to determine the equilibrium position of a mechanism.
2. Calculate the acceleration of a mechanism subjected to an applied force or torque.
3. Model a real world system as a collection of simple mechanical components.
4. Determine the equation(s) of motion for a system of simple mechanical components.
5. Solve the equation of motion for a free, 1dof system.
6. Calculate the response to a forced vibration.
7. Balance a rotating disk.
8. Use Laplace transforms to determine the response to impulse and step forces.
9. Take measurements in the real world, and use them to verify the theory presented in the lectures.

Subject Content

Virtual work, and the equilibrium position of a mechanism.
Acceleration of a mechanism subjected to an applied force or torque.
Modelling a real world system as a collection of simple mechanical components.
Determining the equation(s) of motion for a system of simple mechanical components.
Solution of the equations of motion for a free, 1dof system.
Calculation of the response to a forced vibration.
Balancing a rotating disk.
Using Laplace transforms to determine the response to impulse and step forces.

Assumed Knowledge

This subject assumes that the student has undertaken first and second year studies in Western Sydney University engineering programs or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Design mechanical components using belt drives and chain drives
- Design typical gears
- Conduct a typical shaft design
- Design mechanical components using bearings
- Design mechanical components using threaded fasteners
- Design mechanical components using welded joints
- Design a mechanical assembly in a team working environment.

Subject Content

Design of Belt drives and chain drives

Design of gears

Design of shafts

Design of bearings

Design of threaded fasteners

Design of welded joints

Nature of mechanical design

Engineering drawing and design standards

Engineering Materials in design

Design under different loading conditions

Assessment

MECH 3006 Mechatronic Design

Credit Points 10

Legacy Code 300487

Coordinator Richard Yang ([https://directory.westernsydney.edu.au/search/name/Richard Yang/](https://directory.westernsydney.edu.au/search/name/Richard%20Yang/))

Description Through practical lab exercises and a design project, students will integrate basic skills of mechanics, mechanical systems, and automation in the practice of engineering design (Design for X and system engineering) as applied to mechatronic devices and systems. Students will perform detailed design analysis on important machine elements such as bearings, brakes, clutches, shaft, motor and to integrate those elements to form an automatic mechatronic system is the intended outcome of undertaking this unit. The project-based tasks incorporated into this program build team work experience as well as each student's individual capabilities.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically discuss how mechanical/mechatronic design concepts are applied in an industrial context
2. Design main machine elements, such as bearings, shaft, linear motion element and motion control elements
3. Design solutions for automatic mechanical/mechatronic systems

4. Undertake a design of typical mechanical/mechatronic systems including the selection of components in senses of system engineering and design for X
5. Design an integrated mechanical/mechatronic system in a project-based environment
6. Work in a team for a project in designing and building a mechanical/mechatronic device

Subject Content

System Engineering Approach and Theory for Engineering Design Principles and Applications of Design for X (Disassembly, Environment, Recycling, and Fatigue) in Product Design Tolerances and Fits

Shaft Design

Design of Bearings

Design of Linear Motion Elements

Electric Motors and Controls

Design of Automatic Mechatronic System

Brakes and Clutches

Project-based design of integrated mechanical/mechatronic systems including selection of suitable components

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Short Answer	2,000 words (each)	30	N	Individual
Report	8,000 – 10,000 words	40	Y	Group
Presentation	3 minutes	10	N	Individual
Log/Workbook	800 words (each)	20	N	Individual

MECH 3007 Thermal and Fluid Engineering

Credit Points 10

Legacy Code 300759

Coordinator Ming Zhao ([https://directory.westernsydney.edu.au/search/name/Ming Zhao/](https://directory.westernsydney.edu.au/search/name/Ming%20Zhao/))

Description The unit provides an understanding of thermo-fluid principles and their engineering applications related to thermal processes and energy conversion used in power plants, heat pumps, wind turbines, and airplanes. Students analytical skills are developed through the evaluation of laminar, turbulent and compressible fluid flows, as well as combustion processes and products. Students are introduced to special thermal and fluid engineering topics, including alternative energy options for Indigenous Australians. In addition to examining the theoretical principles, students evaluate thermodynamic systems and apply basic computational techniques to solve thermodynamics and fluid flow problems in practical laboratory sessions.

School Eng, Design & Built Env

Discipline Mechanical Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) CIVL 2003 AND MECH 3008

Assumed Knowledge

Fundamentals on Fluid Mechanics, Thermodynamics, and Heat Transfer.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse laminar, turbulent and compressible flows
2. Analyse combustion processes and products
3. Perform basic design selection of pumps and turbines
4. Evaluate dynamics of fluid flow and solid body interaction

5. Apply basic computational techniques in solving thermal and fluid engineering problems

Subject Content

Laminar, turbulent and compressible flows

Thermal process of combustion

Turbo-machinery

Fluid-structure interactions

Introduction to computational techniques for thermodynamics and fluid flow applications

Special thermal and fluid engineering topics, e.g., alternative energy for indigenous Australia, buoyancy driven and multiphase flows, etc.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	3 x 15-minute (per Quiz)	15	N	Individual
Practical	3 x Practical reports 1000 words (per report)	30	N	Individual
Participation	9 x 2-hour tutorials	5	N	Individual
Final Exam	2-hour	50	N	Individual

MECH 3008 Thermodynamics and Heat Transfer

Credit Points 10

Legacy Code 300760

Coordinator Ming Zhao (<https://directory.westernsydney.edu.au/search/name/Ming Zhao/>)

Description This unit introduces students to the fundamentals of thermodynamics which involves energy in the form of heat and heat transfer. Students explore the basic laws and properties of thermodynamics to discover how energy is converted and transferred. Students will apply their knowledge to evaluate power and refrigeration cycles, industrial devices, as well as to design a simple industrial device.

School Eng, Design & Built Env

Discipline Mechanical Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MATH 1019 AND ENGR 1011 OR ENGR 1028

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe thermodynamic systems and the associated heat transfer processes
2. Illustrate the concepts of thermodynamic parameters and processes
3. Explain thermodynamic relations
4. Apply thermodynamic principles to evaluating power and refrigeration cycles
5. Explain the nature of heat transfer processes
6. Apply heat transfer principles to design and evaluation of simple industrial device

Subject Content

Properties of thermodynamic systems
Laws of thermodynamics
Concepts of energy, work, heat and entropy
Thermodynamic relations
Reversible and irreversible processes
Power and refrigeration cycles
Heat conduction
Natural and forced convection
Radiation heat transfer
Heat exchangers

Teaching Periods

MECH 4001 Computational Fluid Dynamics

Credit Points 10

Legacy Code 300999

Coordinator Ming Zhao (https://directory.westernsydney.edu.au/search/name/Ming_Zhao/)

Description This unit introduces students to the fundamentals of computational fluid dynamics. The unit covers the conventional methods for solving the ordinary and partial differential equations. The numerical method for solving the inviscid flow and the viscous flow problems will be introduced. The students learn the application of the commercial software in the engineering problems.

School Eng, Design & Built Env

Discipline Mechanical Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) ELEC 1006 AND
MECH 3007

Assumed Knowledge

Numerical methods, thermal dynamics and fluid mechanics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Solve flow equations using the basic concepts of Computational Fluid Dynamics;
2. Analyse laminar flow, turbulent flow and heat transfer using numerical method;
3. Apply computational methods to solve simple flow and heat transfer problems;
4. Use commercial CFD software to analyse practical flows.

Subject Content

1. Flow topics governed by ordinary differential equations;
2. Numerical simulation of inviscid fluid flows;
3. Numerical simulation of viscous flows;
4. Heat transfer;
5. CFD modelling using commercial software;
6. Engineering applications of CFD.

Assessment

MECH 4002 Computer Aided Engineering

Credit Points 10

Legacy Code 301000

Coordinator Leo Zhang (https://directory.westernsydney.edu.au/search/name/Leo_Zhang/)

Description This unit describes the basics and fundamentals of computer aided engineering focusing on the advanced topics of finite element methods, which is a powerful numerical tool for analysing a wide range of engineering problems. Through applied projects students will apply the finite element method (FEM)-based computer aided engineering (CAE) and its applications in the fields of solid mechanics, fluid mechanics, thermodynamics and heat transfer and product design and development as well. The development of students' academic skills in research and communication are also achieved through the completion of FEM-based CAE projects.

School Eng, Design & Built Env

Discipline Mechanical Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) ENGR 3020

Learning Outcomes

On successful completion of this subject, students should be able to:

- Apply the basic and fundamental principles of finite element method on solving typical engineering problems with aids from computer modelling and simulation
- Investigate and explain boundary conditions, mesh generation, error control and other practical considerations in finite element models for conducting finite element analyses for different types of problems
- Implement finite element method into design process for optimal solution
- Apply commonly-used finite element programs to solve practical engineering problems in solid mechanics
- Apply commonly-used finite element programs to solve practical engineering problems in fluid mechanics and thermodynamics and heat transfer

Subject Content

Review on fundamentals of finite element method
3-D finite element methods (solid, shell and plate elements)
Boundary conditions, mesh generation, error control and other practical considerations
Finite element analysis on Solid Mechanics Problems (Linear and Nonlinear Finite Element Analysis)
Finite element analysis on Fluid Mechanics Problems
Finite element analysis on Heat Transfer Problems
FEA-based design optimisation
Computer aided engineering and product design and development

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

MECH 4003 Mobile Robotics

Credit Points 10

Legacy Code 300043

Coordinator Gu Fang ([https://directory.westernsydney.edu.au/search/name/Gu Fang/](https://directory.westernsydney.edu.au/search/name/Gu%20Fang/))

Description To develop an understanding of the basic concepts involved in Mobile Robotics. The areas of mobile robot mechanics, localisation, map building and path planning of mobile robots will be introduced. Various sensors and their applications in mobile robotics are also to be introduced.

School Eng, Design & Built Env

Discipline Mechanical and Industrial Engineering and Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) ENGR 1018

Restrictions Successful completion of 160 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe and classify the different types of mechanical structures of mobile robots.
2. Examine the issues of localisation in mobile robots.
3. Examine and apply the map building and path planning techniques used in mobile robotics
4. Evaluate various sensors and assess their applications in mobile robots

Subject Content

Mechanics of Mobile robots

Localisation, map-building and path planning

Sensors and sensing techniques.

Actuators for mobile robots

Recent development in mobile robots

Credit Points 10

Legacy Code 300056

Coordinator Gu Fang ([https://directory.westernsydney.edu.au/search/name/Gu Fang/](https://directory.westernsydney.edu.au/search/name/Gu%20Fang/))

Description The aim of this unit is to develop an understanding of the basic concepts involved in Robotics. The kinematics, dynamics, control and sensing aspects in robotics will be introduced. In addition, the concepts of artificial intelligence (AI) and their applications in robotics will also be introduced. There will be considerable use of MATLAB in the unit.

School Eng, Design & Built Env

Discipline Mechanical and Industrial Engineering and Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) MECH 3004

Restrictions Successful completion of 200 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. analyse and develop mathematical models of a robot.
2. design suitable controllers for robot systems.
3. understand the use of sensors in robots.
4. appreciate the fundamental aspects of artificial neural networks and fuzzy logic systems.
5. undertake the design and implementation of artificial intelligence in robot applications.
6. Effectively communicate their results via professional report writing.
7. Work as a team to complete different learning tasks that include lab experiments and team assignments.

Subject Content

Robot kinematics and dynamics
 Robot trajectory planning and control
 Robot sensing
 Artificial neural networks
 Fuzzy logic control
 Recent developments in robotics

Advanced Engineering Thesis 1: Preliminary Investigations

Credit Points 10

Legacy Code 300969

Coordinator Kejun Dong ([https://directory.westernsydney.edu.au/search/name/Kejun Dong/](https://directory.westernsydney.edu.au/search/name/Kejun%20Dong/))

Description Advanced Engineering Thesis 1 - Preliminary Investigations unit consists of a research project designed and implemented under the direction of an academic supervisor and research mentor. This unit is the culmination of studies for students who have completed their first three years of an undergraduate degree and provides substantial training in Preliminary Investigations. Under staff supervision, students are allocated a particular topic for their research, design their own programme of research, and perform the research. The emphasis of this unit is on the application of research knowledge gained in other units to the practical conduct of the individual research project. This unit provides final year Advanced engineering students with the

opportunity to undertake research on a specialist topic within their Key Program of undergraduate study.

Legacy Code 301023

Coordinator Ming Zhao ([https://directory.westernsydney.edu.au/search/name/Ming Zhao/](https://directory.westernsydney.edu.au/search/name/Ming%20Zhao/))

Description This unit introduces students to commonly used numerical methods used in computational fluid dynamics (CFD). The unit covers the theory and the application of CFD for solving engineering problems. The numerical methods for solving the in viscid flow and the viscous flow problems will be introduced. The students learn the application of the engineering software in the engineering problems.

School Eng, Design & Built Env

Discipline Mechanical Engineering

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Assumed Knowledge

Finite element methods, Thermal dynamics and Fluid mechanics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Solve flow equations using numerical methods;
2. Analyse laminar flow, turbulent flow and heat transfer using CFD;
3. Design computer code for simulating flow problems;
4. Apply computational methods to solve simple flow and heat transfer problems;
5. Analyse practical flows using commercial CFD software.

Subject Content

1. Numerical methods for in viscid fluid flows;
2. Numerical methods for vicious flows;
3. Heat transfer;
4. Numerical stability analysis;
5. CFD modelling using commercial software;

6. Engineering applications of CFD.

MECH 7002 Advanced Computer Aided Engineering

Credit Points 10

Legacy Code 301022

Coordinator Richard Yang (https://directory.westernsydney.edu.au/search/name/Richard_Yang/)

Description This unit focuses on advanced topics in computer aided engineering and their applications in mechanical engineering in analysing a wide range of engineering problems. The objective of this unit is to advance students' knowledge and skill level on the finite element method (FEM)-based computer aided engineering (CAE) and its advanced applications in the fields of solid mechanics, fluid mechanics, thermodynamics and heat transfer and product design and development as well. Academic skills on research and communication are ensured to be achieved through conducting FEM-based CAE projects.

School Eng, Design & Built Env

Discipline Mechanical Engineering

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 3693 Master of Engineering, 3695 Graduate Certificate in Engineering, or the Master of Research.

Assumed Knowledge

Students are assumed to have a good understanding on basics of finite element method and analysis, fundamentals and advanced topics in mechanics of materials, fundamentals on fluid mechanics and heat transfer and thermal dynamics.

Learning Outcomes

On successful completion of this subject, students should be able to:

- apply the basic and fundamental principles of finite element method on solving typical engineering problems with aids from computer modelling and simulation;
- investigate and explain boundary conditions, mesh generation, error control and other practical considerations in finite element models for conducting finite element analyses for different types of problems;
- implement finite element method into design process for optimal solution;
- apply commonly-used finite element programs to solve practical engineering problems in the following fields: a. Solid mechanics b. Flumechanics c. Thermodynamics and heat transfer d. Optimisation design e. Product design and development

Subject Content

- Review on fundamentals of finite element method
- Finite element methods (spring, bar, beam, solid, shell and plate elements)
- Boundary conditions, mesh generation, error control and other practical considerations
- Finite element analysis on Solid Mechanics Problems (Linear and Nonlinear Finite Element Analysis)
- Finite element analysis on Fluid Mechanics Problems
- Finite element analysis on Thermodynamics and Heat Transfer Problems
- FEA-based design optimisation
- Computer aided engineering and product design and development

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Tutorial Assignments	3 x approx. 6 pages each	30	N	Individual
Four Lab Reports	4 x approx. 5 pages each	20	N	Individual
CAE Project	15-min oral presentation conducted in class and marked individually (5%) and CAE project report marked as group work(30%)	35	Y	Individual
Two Quizzes	1 hour each including ten minutes reading time	15	N	Individual

MECH 7003 Advanced Dynamic Systems

Credit Points 10

Legacy Code 301019

Coordinator Helen Wu ([https://directory.westernsydney.edu.au/search/name/Helen Wu/](https://directory.westernsydney.edu.au/search/name/Helen%20Wu/))

Description This unit covers three-dimensional kinematics and kinetics of a rigid body. The principles of virtual work are used to investigate the equilibrium and dynamics of mechanisms. Some key aspects of mechanical vibrations are introduced, including vibration response, vibration isolation and vibration measurement.

School Eng, Design & Built Env

Discipline Mechanical Engineering

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use Virtual work to determine the equilibrium position of a mechanism
2. Analyse the three-dimensional kinematics and kinetics of a rigid body
3. Model a real world system as a collection of simple mechanical components
4. Determine the response to free and forced vibrations using standard differential methods or Laplace transforms
5. Balance a rotating disk to reduce vibrations according to standards
6. Analyse vibration isolation systems and measurement systems
7. Verify the theory presented in the lectures by taking the measurements in the real world and use them for verification purposes

Subject Content

1. Virtual work and potential energy method
2. Three-dimensional kinematics and kinetics of a rigid body
3. Modelling a real world system and determining the equations of motion for mechanical systems
4. Response to free and forced vibrations
5. Balancing a rotating disk
6. Vibration isolation
7. Vibration measurement

8. Using Laplace transforms to determine the response to impulse and step forces.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Final Exam	2 hours	50	N	Individual
Quiz	4 x 1 hour	20	N	Individual
Report	10 pages	20	N	Individual
Practical	2 times x 3 hours each	10	N	Individual

MECH 7004 Advanced Mobile Robotics

Credit Points 10

Legacy Code 301020

Coordinator Gu Fang ([https://directory.westernsydney.edu.au/search/name/Gu Fang/](https://directory.westernsydney.edu.au/search/name/Gu%20Fang/))

Description This unit is designed to develop an understanding of the concepts involved in Mobile Robotics. The areas of mobile robot mechanics, localisation, map building and path planning will be introduced. Various sensors and their applications in mobile robotics are also to be introduced.

School Eng, Design & Built Env

Discipline Mechanical And Industrial Engineering And Technology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Assumed Knowledge

Some basic skills in MATLAB and C/C++ programming.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Classify and model different types of mechanical structures of mobile robots.
2. Examine and solve issues of localisation in mobile robots.

3. Examine and apply the map building and path planning techniques used in mobile robotics
4. Evaluate various sensors and assess their applications in mobile robots

Subject Content

1. Mechanics of Mobile robots
2. Localisation, map-building and path planning
3. Sensors and sensing techniques.
4. Recent development in mobile robots

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Lab	3x 2hrs	20	N	Individual
In class Quiz	3x0.5hr	30	N	Individual
Group Project Report is (no more than 3 students in each group)	limited to 15 pages max.	30	N	Both (Individual & Group)
Individual Project	Report is limited to 15 pages max.	20	N	Individual

MECH 7005 Advanced Robotics

Credit Points 10

Legacy Code 300599

Coordinator Gu Fang ([https://directory.westernsydney.edu.au/search/name/Gu Fang/](https://directory.westernsydney.edu.au/search/name/Gu%20Fang/))

Description This unit is designed to introduce the engineering concepts involved in Robotics. The kinematics, dynamics, control and sensing aspects in robotics will be introduced. In addition, the concepts of artificial intelligence and their applications in robotics will also be discussed and assessed.

School Eng, Design & Built Env

Discipline Mechanical and Industrial Engineering and Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 5817 - Advanced Robotics LGYA 5833 - Mobile Robotic Systems

Restrictions

Students must be enrolled in a postgraduate program

Assumed Knowledge

Some Knowledge of MATLAB/Simulink.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse and develop mathematical models of an industrial robot.
2. Design advanced controllers for robot systems.
3. Analyse and apply sensors in robots.
4. Design and implement artificial intelligence in robot applications.

Subject Content

1. Robot kinematics
2. Robot dynamics
3. Robot trajectory planning
4. Robot controller design
5. Sensing in robotics
6. Artificial neural networks and fuzzy logic and their applications in robotics

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical	No more than 3 pages for each lab.	20	N	Individual
Numerical Problem Solving	no more than 10 pages	20	N	Individual
Professional Task	No more than 15 pages	30	N	Individual
Professional Task	No more than 15 pages	30	N	Group

MECH 7006 Advanced Thermal and Fluid Engineering

Credit Points 10

Legacy Code 301021

Coordinator Mariam Darestani ([https://directory.westernsydney.edu.au/search/name/Mariam Darestani/](https://directory.westernsydney.edu.au/search/name/Mariam%20Darestani/))

Description This unit covers fundamental principles in the thermal and fluid engineering. While the main focus will remain on incompressible fluids, effects of compressible fluids will also be discussed. The contents of this unit include fluid mechanics, thermodynamics and heat transfer. Students will learn the engineering applications of thermal and fluid principles.

School Eng, Design & Built Env

Discipline Mechanical Engineering

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Assumed Knowledge

Fundamental knowledge of fluid mechanics, theory of thermodynamics, knowledge of heat transfer including conduction, convection.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply fundamental knowledge of fluid kinematics and dynamics to solve problems in the fluid engineering.
2. Apply the energy equation to solve the energy and mass flow.
3. Analyse the thermodynamics process and heat transfer of a system.
4. Apply heat transfer principles to the design and evaluation of industrial device.
5. Evaluate heat engine and refrigeration cycles using the thermodynamics principles.

Subject Content

1. Fluid statics and kinematics
2. Steady incompressible flow in pressurised pipe system
3. Forces on bodies immersed in fluid flow
4. Laws of thermodynamics
5. Energy analysis
6. Fundamental mechanisms of heat transfer

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Practical report 1	2500-word practical report	25	N	Individual
Practical report 2	2500-word written report	25	N	Individual
Mid-term in-class quiz	1-hour closed book	25	N	Individual
End-term quiz	1-hour closed book	25	N	Individual

Prescribed Texts

- C'engel, YA, Cimbala, JM & Turner, RH 2012, Fundamentals of thermal-fluid sciences, 4th edn, McGraw-Hill Higher Education, Boston.

MECH 7007 Mechanical System Design

Credit Points 10

Legacy Code 301018

Coordinator Richard Yang ([https://directory.westernsydney.edu.au/search/name/Richard Yang/](https://directory.westernsydney.edu.au/search/name/Richard%20Yang/))

Description This unit advances students understanding on product design and development of machine components and assemblies using systems engineering approaches. The unit covers a review on the design of main components of machinery to ensure their functionality, strength and durability, which includes drive components - gears, shafts, belt drives, and bearings, and structural components - welds and treaded fasteners. The machine assembly design is delivered based on systems engineering. Academic skills on research and communication are ensured to be achieved through conducting systems engineering approached-based mechanical system design projects.

School Eng, Design & Built Env

Discipline Mechanical Engineering

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in the Master of Engineering, Graduate Certificate in Engineering or Bachelor of Research Studies / Master of Research.

Assumed Knowledge

The students are assumed to have a good understanding on basics of mechanical design, fundamentals and advanced topics in mechanics of materials, fundamentals on fluid mechanics and heat transfer and thermal dynamics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the concepts of machine design in devising machine components design
2. Recognise standard engineering formats of representing machine parts
3. Apply governing standards guiding mechanical design to interpret and evaluate mechanical component and system design

4. Apply the design process towards an applied end
5. Examine the typical design process using basics of main machine components and bearing design and their selection
6. Apply principles of stress analysis for sizing of machine components and systems engineering approaches to perform a mechanical system design overall
7. Practise design alternatives to enhance CAD skills using commercial software
8. Conduct mechanical design in a team working environment

Subject Content

1. Nature of Mechanical System Design and Systems Engineering
2. Machine Component Design I - Chain Drives, Belt Drives, and Gears
3. Machine Component Design II - Shaft, Keys, Couplings and Seals
4. Machine Component Design III - Machine Frames, Bolted Connection and Welded Joints
5. Systems Engineering Design I - Systems Engineering Landscape and Structure of Complex Systems
6. Systems Engineering Design II - The System Development Process and Systems Engineering Management
7. Systems Engineering Design III - Systems Engineering Management
8. Systems Engineering Design IV - Concept Development
9. Systems Engineering Design V - Engineering Development
10. Systems Engineering Design VI - Post Development

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Short Answer	3 x approx. 6 pages each	30	N	Individual
Log/ Workbook	4 x approx. 5 pages each	20	N	Individual
Report	15-min oral presentation conducted in class and marked individually (10%) and design project report marked as group work (30%)	40	Y	Group
Quiz	1 hour each including ten minutes reading time	10	N	Individual

Prescribed Texts

- Mott, RL 2013, Machine elements in mechanical design, 5th edn, Pearson, Boston.
- Kossiakoff, Alexander; Sweet, William N.; Seymour, Sam; Biemer, Steven M., 2011, Systems Engineering : Principles and Practice, 2nd edn., Wiley (ebook, online available)

MECH 7008 Mechatronic System Design

Credit Points 10

Legacy Code 300600

Coordinator Richard Yang ([https://directory.westernsydney.edu.au/search/name/Richard Yang/](https://directory.westernsydney.edu.au/search/name/Richard%20Yang/))

Description This unit will advance the skills of mechanics, mechanical systems and automation in the practice of engineering design as applied to mechatronic devices and systems. The ability to perform detailed design analysis of machine elements as well as control systems as applicable to manufacturing and process machinery is the intended outcome of undertaking this unit and project-based tasks will form part of the learning process and team work experience.

School Eng, Design & Built Env

Discipline Mechanical and Industrial Engineering and Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 6106 - Servo Systems Design (PG) LGYA 5832 - Mechatronic System Design

Restrictions

Students must be enrolled in a postgraduate program

Assumed Knowledge

Equivalent Bachelor of Engineering degree.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design machine elements, such as shafts, bearings, brake, gears & clutches.
2. Design of a mechatronic system.
3. Design and analyse fluid power servo systems
4. Compare available equipment and select suitable components for the designed system.
5. Design an integrated mechatronic system in a team project-based environment

Subject Content

Shaft, bearing and gear analysis and design.

Belt drives, shaft, clutches, brakes, coupling and motor systems.

Pneumatic and hydraulic equipment and circuits.

Feedback loops and equipment selection.

Project based design of an integrated mechanical system including selection of suitable components.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Tutorial Assignments X 4	4 X Tutorial Assignments (7.5% each)	30	N	Individual
Computer Lab Workbooks X 4	4 X Lab Workbooks (5% each) Finish lab workbooks within 2 hour practical sessions	20	N	Individual
Design Project: Report and Presentation	3,000 words (Report 25%) and 15 minutes (Presentation 5%)	30	Y	Group
Quizzes X 2	2 X Quizzes (10% each) 1 hour each	20	N	Individual

MEDI 1002 Foundations of Medicine 1

Credit Points 40

Legacy Code 400861

Coordinator Ritesh Raju ([https://directory.westernsydney.edu.au/search/name/Ritesh Raju/](https://directory.westernsydney.edu.au/search/name/Ritesh%20Raju/))

Description This is a 80 credit point year-long subject taken over two terms (40 credit points in each term). This subject integrates the foundational sciences with clinical skills. Students learn the structure and function of the human body, particularly, whole body organisation, basic anatomy, nutrition and metabolism, function and pathology of the gastrointestinal system (including liver), cardiovascular system and respiratory system. In addition, students will gain an understanding of health psychology, patient experience, the medical system, identifying risk, errors in medical practice, managing error and basic procedures such as hand washing. A particular focus will be the communities that make up Greater Western Sydney. Students will also participate in clinical tutorials and will gain skills in history taking and communication in Session 1H and skills in history and examination of the gastrointestinal tract, cardiovascular system and respiratory systems during Session 2H. The subject outline is available from the link on the left-hand menu.

School Medicine

Discipline General Medicine

Student Contribution Band HECS Band 3 40cp

Level Undergraduate Level 1 subject

Restrictions Students must be enrolled in 4641 Bachelor of Medicine, Bachelor of Surgery or 4647 Bachelor of Medical Research.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Patient Care
2. Health in the Community
3. Personal and professional development
4. Scientific basis of medicine

Subject Content

1. The major objectives are to gain an integrated understanding of the structure and function of the human body. This will be addressed at the levels of organ systems, tissues, cells and molecules. The scientific basis of the following topics will be discussed: whole body organisation including basic anatomy, roles of the major organ systems, functional organisation of cells and their specific organelles, characteristics of specialised cells, structure-function characteristics of major biological molecules including carbohydrates, lipids, proteins, enzymes and DNA, the biochemical basis of complex processes such as homeostasis, reproduction and inheritance, growth and development, defence against infectious agents, pathological changes, ageing and death.
2. The unit then examines nutrition and metabolism before exploring the structure, function and pathology of the gastrointestinal system (including liver), cardiovascular system and respiratory system.
3. In the Personal and Professional Development (PPD) stream there is a focus on developmental psychology, the patient experience, the doctor, human interactions, the human in context and the healthcare system.
4. Population health will focus on Evidence Based Medicine in sessions 1 and 2.
5. Introduction to Clinical Medicine will cover generic history taking and communication skills in semester 1 and skills in history and examination of the gastrointestinal tract, cardiovascular system and respiratory systems during semester 2.

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Short Answer	2 hours	18	N

Legacy Code 401276

Coordinator Ritesh Raju ([https://directory.westernsydney.edu.au/search/name/Ritesh Raju/](https://directory.westernsydney.edu.au/search/name/Ritesh%20Raju/))

Description This is a 80 credit point year-long subject taken over two terms (40 credit points in each term). Foundational learning for medicine is provided in this yearlong subject that integrates the biomedical sciences through the use of authentic clinical scenarios. Small group problem based learning and bedside teaching with patients, scaffolded by lectures, tutorials and practicals cover each of the body systems in turn, so that students are well prepared for clinical learning. Students will also learn about the human context of health and disease, medical professionalism, the quality and safety of healthcare, evidence based practice, research and clinical skills through community visits, hospital based sessions and workshops. The Professional Portfolio component within this unit will provide students in the Doctor of Medicine (MD) program with the means to monitor and support their acquisition of professional competencies in medicine. Supported by teaching sessions, learning resources and Professional Advisors, students will collate and review evidence of their learning, such as clinical assessments and case studies, preparatory work and outcomes from research and scholarly projects. By identifying and addressing their learning and professional development needs, students will create their own personalised learning journey as the basis for life-long learning in medicine. The Professional Portfolio will also prepare students for the portfolios used extensively in post graduate specialty training in medicine. The subject outline is available from the link on the left-hand menu.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Patient Care
2. Health in the Community
3. Personal and professional development
4. Scientific basis of medicine

Subject Content

Patient Care

????????? Communicating with patients, carers, families and healthcare professionals

????????? Practical skills in history taking, physical examination

????????? Diagnostic and clinical problem formulation

Health in the Community

????????? Determinants of health and illness in communities and populations

????????? Understanding health needs of diverse communities, the social and cultural context of health, illness and healthcare

????????? Aboriginal and Torres Strait Islander health

????????? Disease prevention and health promotion

Professional and Personal Development

????????? Medical professionalism, professional standards and codes of conduct, legal obligations of students and medical practitioners

????????? Identifying and addressing own learning and personal needs

????????? Quality and safety of health care

????????? Self-evaluation and critical reflection on learning

Scientific Basis of Medicine

. Demonstration of an understanding of the body as a complex, adaptive biological system

????????? Application of the biomedical, social and psychological sciences to clinical and health problems

????????? Information skills and academic literacy

????????? Evidence based practice and research skills

Coordinator Neeshaan Abrahams ([https://directory.westernsydney.edu.au/search/name/Neeshaan Abrahams/](https://directory.westernsydney.edu.au/search/name/Neeshaan%20Abrahams/))

Description This is a 80 credit point year-long subject taken over two terms (40 credit points in each term). This subject integrates the biomedical sciences with clinical skills. Students continue to build their knowledge of the structure and function of the human body, particularly: renal, musculoskeletal, neuroscience, reproduction and development, endocrinology, infectious disease, immunology and cancer. In addition, students will gain an understanding of the human context of health and disease, global health, medical professionalism, the quality and safety of healthcare, evidence based practice and research skills. On clinical days, students will participate in bedside tutorials to further develop their skills in history and examination of body systems and will also learn how to carry out basic clinical procedures. The subject outline is available from the link on the left-hand menu.

School Medicine

Discipline General Medicine

Student Contribution Band HECS Band 3 40cp

Level Undergraduate Level 2 subject

Pre-requisite(s) MEDI 1002

Incompatible Subjects MEDI 2003 - Clinical Sciences 2

Restrictions Students must be enrolled in 4641 Bachelor of Medicine, Bachelor of Surgery or 4647 Bachelor of Medical Research.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Provides patient centred care as a member of an interdisciplinary team under appropriate supervision: Communication, Patient Assessment, Patient Management
2. Promotes the health and wellbeing of individuals and populations, with particular focus on Greater Western Sydney, rural, regional and Aboriginal and Torres Strait Islander Australia: Determinants of Health & Illness, Health Needs, Health Care Systems, Health Promotion, Indigenous Health
3. Demonstrates and develops professional skills, responsibilities and attitudes: Ethical Practice, Teamwork, Learning and Teaching, Personal Needs, Medical humanities
4. Develops and applies a sound understanding of the scientific foundations (social, basic and clinical) of medical practice: Applies Science to Practice, Uses Evidence, Research

Subject Content

1. The Scientific Basis of Medicine integrates understanding of the structure and function of the human body. This will be addressed at the level of organ systems, tissues, cells and molecules. The scientific basis of the following topics will be discussed: renal system, musculoskeletal system, neuroscience, reproduction and development, endocrinology, infectious disease, immunology and cancer.
2. In the Personal Professional and Development (PPD) stream there is a focus on medical professionalism, professional standards and codes of conduct, legal obligations of students and medical practitioners and identifying and addressing own learning and personal needs
3. Quality and Safety tutorials are part of PPD, looking at identifying risk, the way errors occur in medical practice, managing error as a medical student
4. Population Health will explore statistics, translational research, epidemiology, outbreaks, health promotion and other challenges to public health.
5. Introduction to Clinical Medicine and Clinical Procedural Skills will continue to extend the history and examination of body systems and will introduce students to clinical procedures.

Supported by teaching sessions, learning resources and Professional Advisors, students will collate and review evidence of their learning, such as clinical assessments and case studies, preparatory work and outcomes from research and scholarly projects. By identifying and addressing their learning and professional development needs, students will create their own personalised learning journey as the basis for life-long learning in medicine. The Professional Portfolio will also prepare students for the portfolios used extensively in post graduate specialty training in medicine.

School Medicine

Discipline General Medicine

Student Contribution Band HECS Band 3 40cp

Level Undergraduate Level 2 subject

Pre-requisite(s) MEDI 1004

Incompatible Subjects MEDI 2002 Foundations of Medicine 2

Restrictions Students must be enrolled in 4758 - Doctor of Medicine (MD)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Patient Care: Provides patient centred care at all stages of care, from pre-pregnancy to end of life
2. Health in the Community: Promotes the health and wellbeing of individuals and populations, with particular focus on Greater Western Sydney, rural, regional and Aboriginal and Torres Strait Islander communities
3. Personal & professional development: Evaluates and continuously develops own personal and professional capabilities, and those of others
4. Scientific basis of medicine: Applies a sound understanding of the biomedical, psychological and social sciences to medical practice

Subject Content

Patient Care

- Communicating with patients, carers, families and healthcare professionals

- Practical skills in history taking, physical examination and procedural skills

- Diagnostic and clinical problem formulation

Health in the Community

- Determinants of health and illness in communities and populations

- Understanding health needs of diverse communities, the social and cultural

context of health, illness and healthcare

- Aboriginal and Torres Strait Islander health

- Disease prevention and health promotion

Professional and Personal Development

- Medical professionalism, professional standards and codes of conduct, legal obligations of students and medical practitioners

- Identifying and addressing own learning and personal needs

- Quality and safety of health care

- Self-evaluation and critical reflection on learning

Scientific Basis of Medicine

- Application of the biomedical, social and psychological sciences to clinical and health problems

- Information skills and academic literacy

- Evidence based practice and research skills

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical Exam	40 minutes	10	Y	
Short Answer	2 hours	18	N

Legacy Code 400879

Coordinator Richard Thomas ([https://directory.westernsydney.edu.au/search/name/Richard Thomas/](https://directory.westernsydney.edu.au/search/name/Richard%20Thomas/))

Description This unit is designed to introduce students to basic principles and essential skills of physical examination and diagnostic/laboratory investigation procedures, required for successful approach to diagnosis of health impairment states. Primary contact health practitioners are expected to have sound understanding of disease presentation, techniques of patient interviewing and examination for collection of relevant clinical information as well as the ability to select appropriate laboratory tests and interpret their findings. This unit will also help students to develop fundamental clinical reasoning skills required in the medical decision making process.

Level Undergraduate Level 3 subject

Pre-requisite(s) BIOS 2029 AND
NATS 1009 AND
NATS 1010

Equivalent Subjects LGYA 7174 - Clinical Diagnosis

Assumed Knowledge

Understanding of human anatomy & physiology and pathophysiology of common impairments of health.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate the ability to conduct a patient interview and to take a structured and directed patient history relating to the presenting complaint;
2. demonstrate competency in the physical examination of major body systems;
3. explain and interpret the clinical significance of common symptoms and signs in each system;
4. explain and interpret the results of common laboratory diagnostic investigations;
5. demonstrate the skills required in the clinical reasoning process.

Subject Content

- medical history and interviewing techniques
- techniques for The assessment of vital signs
- common Symptoms and signs of cardiovascular disorders
- cardiovascular assessment
- common Symptoms and signs of pulmonary disorders
- Thoracic and pulmonary assessment
- common Symptoms and signs of gastrointestinal disorders
- Abdominal and gastrointestinal assessment
- common Symptoms and signs of neurologic disorders
- neurologic assessment
- interpretation of common laboratory tests

Assessment

MEDI 3003 Integrated Clinical Rotations 1

Credit Points 40

Legacy Code 400810

Coordinator Scott Mackenzie ([https://directory.westernsydney.edu.au/search/name/Scott Mackenzie/](https://directory.westernsydney.edu.au/search/name/Scott%20Mackenzie/))

Description This is a 80 credit point year-long subject taken over two terms (40 credit points in each term). Integrated Clinical Rotations 1 is the first major clinical year of the MBBS program. It consists of 10 weeks each in Surgery, Medicine and Medicine in Context (MiC), and 5 weeks in Critical Care. Surgery, Medicine and Critical Care attachments will be at Campbelltown, Blacktown, Mt Druitt, Bankstown, Fairfield and Liverpool hospitals. In Surgery and Medicine students spend 5 weeks in each of two sub-specialities. In Critical Care students spend time in Emergency and Anaesthetics Departments. The 10-week MiC attachment is conducted in two 5-week blocks and involves community-based aspects of the health care system including community organisations and general practice. Students also have 3 Conference Weeks; tutorials in clinical communication skills; and undertake an assignment in Evidence-Based Medicine and 3 online Scientific Streams learning modules. The subject outline is available from the link on the left-hand menu.

School Medicine

Discipline General Medicine

Student Contribution Band HECS Band 3 40cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MEDI 2002

Restrictions

Students must be enrolled in 4641 Bachelor of Medicine/Bachelor of Surgery.

Learning Outcomes

On successful completion of this subject, students should be able to:

As years 3-5 of the MBBS program are an integrated whole and students will undertake various aspects of the clinical and community programs asynchronously in any of the three years it is not possible to divide the learning outcomes on a year by year basis, so the overall course learning outcomes are presented below. However, each of the attachments will have their own learning outcomes which will be made explicit to students in Learning Guides.

CURRICULUM THEMES

1. Patient Care

COURSE LEARNING OUTCOMES

Provides patient centred care as a member of an interdisciplinary team under appropriate supervision.

1.1 Communication

1.1.1 Communicates empathically and effectively with patients, families and health care team members to interact, negotiate, learn and foster understanding.
1.1.2 Establishes trusting relationships and communicates sensitively, empathically and effectively, without prejudice, with individuals and families from diverse backgrounds.
1.1.3 Creates and manages communication and information in all media, for example orally, in writing, electronically, by telephone.

1.2 Patient Assessment

1.2.1 Assesses patient health needs, attending to physical, functional, social, cultural and psychological factors.
1.2.2 Gathers a relevant and comprehensive patient history, generating and testing differential diagnoses
1.2.3 Performs an accurate and appropriate clinical examination, testing & refining differential diagnoses
1.2.4 Synthesises clinical findings to develop prioritised differential diagnoses and a comprehensive problem list
1.2.5 Selects, justifies and interprets investigations to evaluate likely diagnoses.

1.3 Patient Management	<p>Develops, implements and monitors a management plan through a process of shared decision making which addresses the patient’s unique medical, psychological and social needs and preferences:</p> <p>1.3.1 Formulates and implements (under supervision) a comprehensive management plan.</p> <p>1.3.2 Ensures that management addresses the patient’s unique psycho-social, functional & cultural needs and preferences.</p> <p>1.3.3 Explores the role of integrative and complementary therapies utilised by patients for their health care.</p> <p>1.3.4 Monitors the effectiveness of management and provides continuity of care throughout the duration of clinical responsibility.</p> <p>1.3.5 Makes timely, informed and rational decisions in circumstances of uncertainty according to best practice.</p> <p>1.3.6 Performs an appropriate range of technical and practical procedures safely and effectively.</p> <p>1.3.7 Prescribes and administers an appropriate range of medications and other therapeutic agents safely and effectively.</p> <p>1.3.8 Recognises, assesses, initiates management and seeks assistance for deteriorating and critically unwell patients who require immediate care.</p>	2.2 Health Needs	<p>2.2.1 Analyses the health needs and priorities of communities and populations, taking into consideration the historical, cultural, social and political forces which impact on health and wellbeing.</p> <p>2.2.2 Evaluates a range of strategies, including patient and population oriented approaches, for illness prevention and management, and health promotion.</p> <p>2.2.3 Demonstrates culturally sensitive communication and effective engagement with diverse communities and populations.</p>
		2.3 Health Care Systems	<p>2.3.1 Explains the roles of health agencies, services and providers and how they interact to provide health care to individuals and populations.</p> <p>2.3.2 Evaluates the effectiveness of health care systems and services in addressing individual and population needs and priorities.</p>
		2.4 Health Promotion	<p>2.4.1 Promotes the health and wellbeing of individual patients and populations within the context of the culture, health status and health needs of the community of which that patient is a member.</p> <p>2.4.2 Articulates the role of advocacy and public policy in promoting and protecting health and preventing disease.</p>
2. Health in the Community	<p>Promotes the health and wellbeing of individuals and populations, with particular focus on Greater Western Sydney, rural, regional and Aboriginal and Torres Strait Islander Australia.</p>	2.5 Indigenous Health	<p>2.5.1 Explains how various factors, including historical, cultural and political, interact to influence the health of the Aboriginal and Torres Strait Islander peoples.</p>
2.1 Determinants of Health & Illness	<p>2.1.1 Evaluates the determinants of health and illness in populations.</p> <p>2.1.2 Explains how health inequities arise from the interplay of biological, socio-economic, behavioural, sociocultural and environmental factors.</p> <p>2.1.3 Discusses and evaluates the major issues and trends confronting global health, their determinants and effects on individuals and populations.</p>	3. Personal and professional development	<p>Demonstrates and develops professional skills, responsibilities and attitudes</p>
		3.1 Ethical Practice	<p>3.1.1 Aware of and adheres to accepted medical professional codes of conduct.</p> <p>3.1.2 Applies ethical principles in professional practice.</p> <p>3.1.3 Displays and reflects on, appropriate professional attitudes and values.</p> <p>3.1.4 Values patient autonomy, privacy and confidentiality.</p> <p>3.1.5 Aware of and complies with legal responsibilities and requirements, and the guidelines of regulatory bodies.</p> <p>3.1.6 Maximises patient safety, ensures quality care, and manages risk and adverse medical outcomes</p>

3.2 Teamwork	3.2.1 Works effectively and cooperatively as a member of a multidisciplinary team and as a member of the health care system.
3.3 Learning & Teaching	3.3.1 Engages in self and peer evaluation, lifelong learning and teaching.
3.4 Personal Needs	3.4.1 Recognises own personal, physical and emotional needs and is aware of the pathways available for assistance.
3.5 Medical humanities	3.5.1 Engages in scholarship of the arts and humanities to interpret the diverse human experience of health, illness and medical care.
4. Scientific basis of medicine	Develops and applies a sound understanding of the scientific foundations (social, basic and clinical) of medical practice.
4.1 Applies Science to Practice	Applies an understanding of the social and biomedical sciences to the assessment and management of the health needs of individuals and populations: <ul style="list-style-type: none"> 4.1.1 Demonstrates an understanding of the body as a complex adaptive biological system. 4.1.2 Applies an understanding of the basic, social and clinical sciences to clinical reasoning. 4.1.3 Explains the underlying mechanisms of health problems. 4.1.4 Explains the underlying mechanisms of investigative and therapeutic measures, including emerging technologies. 4.1.5 Applies an understanding of the psychological and social sciences to interpret health and illness within a social and cultural context.
4.2 Uses Evidence	Seeks, critically appraises and applies best available evidence relevant to health and illness in individuals and populations.
4.3 Research	4.3.1 Takes opportunities to engage in research and scientific endeavour. 4.3.2 Applies an understanding of research rigour by formulating answerable research questions, selecting appropriate study designs, synthesising, critically analysing and disseminating research findings. 4.3.3 Applies an understanding of ethical principles, and relevant guidelines and laws, to the conduct of research

- 3. 10 weeks of Medicine in a hospital practicum
- 4. 10 weeks of Medicine in Context in community-based practicum
- 5. Five weeks of Critical Care in a hospital practicum
- 6. Three Scientific Streams online learning packages (25 hours each)
- 7. One Evidence-Based Medicine project

MEDI 3004 Medical Research Project

Credit Points 30

Legacy Code 400813

Coordinator Andrew Page ([https://directory.westernsydney.edu.au/search/name/Andrew Page/](https://directory.westernsydney.edu.au/search/name/Andrew%20Page/))

Description This is a 60 credit point year-long subject taken over two terms (30 credit points in each term). This subject is the principal component in the Bachelor of Medical Research. It aims to give students, enrolled in the Western Sydney University MBBS, the opportunity to develop their critical thinking and gain a more detailed experience in medical research than is provided in the medical program. It consists of a research project in any area of medical research for which the School can provide suitable supervision. Students will study the relevant literature, develop and conduct the program of research with the assistance of their supervisor, take part in research seminars in their research group, and present the results as a dissertation. The main learning outcomes are a subset of the 15 Learning Tasks/Outcomes for the medical program as a whole, but will be achieved at a considerably higher level than is expected in the main MBBS program. The task numbers relate to the complete set in the MBBS learning outcomes.

School Medicine

Discipline Medical Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 3 30cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MEDI 1002 AND MEDI 2002

Co-requisite(s) Must pass two of the following- HLTH 3006 Methods of Scientific Researching HLTH 2021 - Research Methods (Quantitative and Qualitative) HLTH 1001 -Foundations of Research and Evidence-Based Practice

Restrictions This program requires the background of at least two years of a medical degree before it can be successfully attempted. It will therefore be available only to currently enrolled Western Sydney University medical students as part of an intercalated year leading into the Bachelor of Medical Research.

Assumed Knowledge

Knowledge from successful completion of years 1 and 2 of Bachelor of Medicine, Bachelor of Surgery (MBBS).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Task 11. Seeking and applying knowledge: G.11. in seeking and applying knowledge to health problems **◆c**; G.11.1 Identify the question/s posed by the health problem; G.11.2 Find information efficiently to answer the question/s; G.11.3 Evaluate the quality of the information / evidence; G.11.4 Decide whether to apply the information / evidence to the problem, and justify the decision taken.
2. Task 12. Developing new knowledge: G.12. in developing new knowledge **◆c**; G.12.1 Identify gaps in existing knowledge, and develop precise research questions; G.12.2 Plan, design and implement (alone or in appropriate collaboration) studies designed to answer the research question(s); G.12.3 Write up and submit for publication (alone or in appropriate collaboration) the results of such studies; G.12.4 Provide clear and intelligible presentations of the results of such studies in appropriate professional forums

Subject Content

1. Identify an area of achievable research in consultation with the supervisor of the unit
2. Perform a detailed literature search and analysis, relevant to the area of proposed research
3. Develop a research plan
4. Obtain ethical approval
5. Perform the planned experiments
6. Present the literature review then the interim research findings to the supervisor?fs research group and/or other B Med Res students at intervals during the year
7. Present the literature review, research plan, results and discussion as a dissertation for examination

MEDI 3005 Professional Portfolio 2

Credit Points 5

Legacy Code 401257

Coordinator Jennifer McDonald ([https://directory.westernsydney.edu.au/search/name/Jennifer McDonald/](https://directory.westernsydney.edu.au/search/name/Jennifer%20McDonald/))

Description This is a 10 credit point year-long subject taken over two terms (5 credit point in each term). This subject is the second of five Professional Portfolio subjects which will provide students in the Doctor of Medicine (MD) course with the means to monitor and support their acquisition of professional competencies in medicine. Supported by workshops, resources and your Academic Supervisor, you will collate and review evidence of your learning, such as clinical assessments and case studies, preparatory work and outcomes from research and scholarly projects. By identifying and addressing your learning and professional development needs, you will create your own personalised learning journey as the basis for life-long learning in medicine. The Professional Portfolio will also prepare you for the portfolios used extensively in post graduate specialty training in medicine.

Level Undergraduate Level 3 subject

Pre-requisite(s) MEDI 1001 AND MEDI 1003

Co-requisite(s) MEDI 2001

Restrictions Restricted to students enrolled in 4758 - Doctor of Medicine (MD). Students must also meet the inherent requirements of the program as outlined in the University of Western Sydney Inherent Requirements for Medicine: (www.uws.edu.au/ir/inherent_requirements/inherent_requirements_for_medicine_courses). Inherent requirements are personal capabilities which are essential for achieving the learning outcomes of the program or subject in a way that will preserve the integrity of the University's teaching, learning and assessment standards and the accreditation requirements for the program. The Disability Education Standard, Section 3.4 (3) states:
♦ In assessing whether an adjustment to the program, subject of the program or program in which the student is enrolled, or proposes to be enrolled, is reasonable

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Provides patient centred care at all stages of care, from pre-pregnancy to end of life
2. Promotes the health and wellbeing of individuals and populations, with particular focus on Greater Western Sydney, rural, regional and Aboriginal and Torres Strait Islander communities
3. Evaluates and continuously develops own personal and professional capabilities, and those of others
4. Applies a sound understanding of the biomedical, psychological and social sciences to medical practice

Subject Content

Medical professional competencies in

- Application of science to understanding of health and disease
- Evaluation of health and disease in individuals and communities
- Evidence based practice and introductory research skills
- Teaching and evaluation of learning
- Scholarly competencies in
 - Academic literacy
 - Critical inquiry through application of the biomedical, psychological and social sciences, arts and humanities
- Self-evaluation and critical reflection on learning, personal and professional development

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement.

Use the link to the Special Requirements webpage below for more information. http://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements (http://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Students are required to obtain and provide all necessary documentation to be verified by NSW ClinConnect. This verification is a requirement of the NSW Health Department for all students enrolled in medical programs. If a student fails to produce this documentation to ClinConnect they will not be able to attend hospital and health service teaching sessions, and placements. Attendance is a mandatory requirement of the program to ensure that professional competencies are met. Failure to attend will result in a Fail Grade for the subject. Documents that must be provided to ClinConnect are:

1. National Police Certificate
2. Adult Health Immunization Schedule
3. Code of Conduct Agreement

Teaching Periods

MEDI 3006 Applied Clinical Sciences 1

Credit Points 40

Legacy Code 401278

Coordinator Scott Mackenzie ([https://directory.westernsydney.edu.au/search/name/Scott Mackenzie/](https://directory.westernsydney.edu.au/search/name/Scott%20Mackenzie/))

Description This is a 80 credit point year-long subject taken over two terms (40 credit points in each term). Applied Clinical Sciences 1 is the first major clinical year of the Doctor of Medicine. Students will apply and extend the knowledge and skills gained in previous subjects during clinical and community placement rotations. Attachment modules Surgery 1 and General Medicine 1 each cover two placement rotations. The Critical Care 1 placement includes experience in the Emergency, Intensive Care, and Anaesthetics departments. The Medicine in Context 1 placement focuses on community-based aspects of the health care system, including community services and general practice. The Doctor of Medicine MD Scholarly Project attachment rotation will be conducted in a site suited to the student's medical research, service, or education project. Placement sites include the Campbelltown, Blacktown/Mt Druitt, Bankstown, Fairfield and Liverpool hospitals, and a variety of community organisations throughout the Greater Western Sydney region. Theoretical Modules support student experiential learning and research skills development in the clinical and community placements. These are 'Evidence-based Medicine and Research Skills 1', 'Professional and Personal Development 1', 'Scientific Streams 1'. Students continue preparation of their Professional Practice Portfolio.

Students undertake a minimum of 1050 clinical practice hours, a 175-hour project rotation, and 3 conference weeks in this unit. Travel and accommodation - Students are required to arrange and pay for their own travel, accommodation, and living expenses for the duration of the placement rotations.

School Medicine

Discipline General Medicine

Student Contribution Band HECS Band 3 40cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MEDI 2003

Incompatible Subjects MEDI 3003 - Integrated Clinical Rotations 1

Restrictions Students must be enrolled in program 4758 Doctor of Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Patient care - Provides patient centred care at all stages of care, from pre-pregnancy to end of life
2. Health in the Community - Promotes the health and wellbeing of individuals and populations, with particular focus on Greater Western Sydney, rural, regional and Aboriginal and Torres Strait Islander communities
3. Personal & professional development - Evaluates and continuously develops own personal and professional capabilities, and those of others
4. Scientific basis of medicine - Applies a sound understanding of the biomedical, psychological and social sciences to medical practice

Subject Content

1. Theoretical Modules
 - i. Professional Practice Portfolio 1
 - ii. Scientific Streams- 1
 - cardiac disease
 - Immunity and allergy
 - nutrition and metabolism
 - iii. Professional and Personal Development 1
 - iv. Evidence-based Medicine and Research Skills 1
2. Attachment Modules (and clinical practicum)
 - i. Critical Care 1 (Clinical attachment 5 weeks)
 - ii. Surgery 1 (Clinical Attachment 10 weeks)
 - iii. General Medicine 1 (Clinical Attachment 10 weeks)
 - iv. Medicine in Context (Clinical attachment 5 weeks)
 - v. MD Scholarly Project ? Year 3 (Attachment of 5 weeks)
3. Conference

Special Requirements

Legislative pre-requisites

Students are required to obtain and provide all necessary documentation to be verified by NSW ClinConnect. This verification is a requirement of the NSW Health Department for all students enrolled in medical programs. If a student fails to produce this documentation to ClinConnect they will not be able to attend hospital and health service teaching sessions, and placements. Attendance is a mandatory requirement of the program to ensure that professional competencies are met. Failure to attend will result in a Fail grade for the subject.

All Students

To be eligible to enrol in and attend a health-related placement in your program, students must meet Western Sydney University requirements **and** Special Legislative Requirements to be assessed in their first year of study against the following:

1. National Criminal History Check: Students must have a current check valid for their entire program. Criminal history check must be an Australia wide check, include the student's full name matching their Student ID card and date of birth offences listed. If a student has a criminal history identified on their check, they must provide a Clinical Placement Authority Card (CPAC from the NSW HealthShare Employment Screening and Review Unit:https://www.health.nsw.gov.au/careers/student_clearance/Documents/appendix-10-student-application.pdf)
- International students must additionally have a translated International Police Check or statutory declaration.
2. A NSW Working with Children Check (WWCC) clearance letter issued under the category of volunteer valid for their entire program.
3. A current approved first aid certificate valid for their entire program, approved provider courses can be found at <http://training.gov.au>
4. A completed vaccination/immunisation card with all serology results containing expiry dates and currency must be maintained by the compliance for their entire program.
5. NSW Undertaking/Declaration form.
6. Completed any additional health forms required (such as NSW Health Code of Conduct, Health Student Undertaking/Declaration and Assessment Tool).
7. Relevant Local Health District specific documentation as requested. Contact your School for further details. Resources are also available on the Placement Hub (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/) website.

Inherent Requirements

Students must also meet the inherent requirements of the program as outlined in the University of Western Sydney University Inherent Requirements for Medicine:

(www.uws.edu.au/ir/inherent_requirements/inherent_requirements_for_medicine_courses). ([https://hbook.westernsydney.edu.au/subject-details/medi3006/\(www.uws.edu.au/ir/inherent_requirements/inherent_requirements_for_medicine_courses\).html](https://hbook.westernsydney.edu.au/subject-details/medi3006/(www.uws.edu.au/ir/inherent_requirements/inherent_requirements_for_medicine_courses).html))

Inherent requirements are personal capabilities which are essential for achieving the learning outcomes of the Program or Subject in a way that will preserve the integrity of the University's teaching, learning and assessment standards and the accreditation requirements for the program. The Disability Education Standard, Section 3.4 (3) states:

"In assessing whether an adjustment to the course, unit of the course or program in which the student is enrolled, or proposes to be enrolled, is reasonable, the provider is entitled to maintain the academic requirements of the course or program, and other requirements or components that are inherent in or essential to its nature. Note: In providing for students with disabilities, a provider may continue to ensure the integrity of its courses or programs and assessment requirements and processes, so that those on whom it confers an award can present themselves as having the appropriate knowledge, experience and expertise implicit in the holding of that particular award."

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Professional Placement Performance	10 weeks. 1a = 1 hour	12	Y	
Professional Placement Performance	10 weeks. 1a = 1 hour (total)	12	Y	
Professional Placement Performance	5 weeks. 3a = 30 minutes	6	Y	
Professional Placement Performance	5 weeks	10	Y	
Applied Project	5 weeks	10	Y	
Quiz	75 hours	S/U	Y	
Short Answer	2 hours	15	Y	
Multiple choice	2 hours	15	Y

Legacy Code 401406

Coordinator Stewart Alford ([https://directory.westernsydney.edu.au/search/name/Stewart Alford/](https://directory.westernsydney.edu.au/search/name/Stewart%20Alford/))

Description This unit involves a 140hr work-integrated placement conducted at a health setting. Online public health students will have the option of completing an online project placement with a health organisation. Online health promotion and recreational therapy students will have placements arranged for them within a reasonable distance from their place of residence.

School Health Sciences

Discipline Medical Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 3 10cp

Level Undergraduate Level 3 subject

Restrictions Students must be enrolled in 4656 Bachelor Health Science in either the MT4003 Public Health, MT4001 Health Promotion or MT4002 Health Services Management testamur major and have completed 160cp.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a capacity for critical self-assessment regarding professional competence, social and professional responsibility and ethical conduct
2. Identify the elements of best practice from a health policy, process or program perspective using a range of evidence-based sources and discuss how these elements can be applied to contemporary health practice
3. Evaluate a current policy, process or program within an organisational setting, using a range of techniques for measurement and evaluation
4. Develop recommendations for a policy, process or program within an organisational setting
5. Collate information, write relevant reports and disseminate information to stakeholders and peers
6. Collaborate professionally and effectively as part of a work team to achieve a shared goal

Subject Content

1. Health competencies and professional behaviour
2. Models of self-reflection
3. Managing the supervisory relationship
4. What is best practice
5. Case studies of best practice and innovation
6. Applying best practice to contemporary health practice.
7. Developing best practice interventions
8. Evaluating best practice interventions
9. Develop future recommendations for interventions

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a

Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

MEDI 3008 Mortuary Practice

Credit Points 10

Legacy Code 301394

Coordinator Hayley Green ([https://directory.westernsydney.edu.au/search/name/Hayley Green/](https://directory.westernsydney.edu.au/search/name/Hayley_Green/))

Description This unit introduces the student to processes and techniques used in a forensic mortuary context. Students will undertake activities that prepare them for clinical placement with an operational forensic mortuary setting, which includes a brief placement within a NSW Forensic and Analytical Science Service (FASS) facility or NSW Organ and Tissue Donation Service. Student must have demonstrated full compliance with NSW Health placement requirements in the first year of their candidature before enrolling in this unit and 301128 Advanced Mortuary Practice. This unit, together with completion of 301128 Advanced Mortuary Practice is essential for graduates of this course seeking employment as a forensic mortuary technician with FASS.

School Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) NATS 2015 AND NATS 2005 AND NATS 1001 AND NATS 1008

Co-requisite(s) NATS 2004

Restrictions Students must be enrolled in 3733 Bachelor of Medical Science (Forensic Mortuary Practice).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply principles of safe work practice
2. Demonstrate knowledge of key Acts, policies and procedures directly related to a forensic mortuary facility
3. Reflect on the role of the forensic mortuary technician
4. Demonstrate professional behaviours, communication skills and self management
5. Apply beginning level skills in forensic mortuary practices
6. Appraise practice experiences and skills
7. Produce industry relevant documentation for forensic mortuary practice

Subject Content

Professional attitudes and behaviour
 Professional roles and relationships
 Professional communication skills
 Legislative requirements related to practice
 Professional ethics
 Safe work practices
 Scope of mortuary practice
 Forensic mortuary practice skills

Special Requirements

Legislative pre-requisites

To be eligible to enrol in a subject and attend a health-related placement in your program, students must meet Western Sydney University program requirements and Special Legislative Requirements to be assessed in their first year of study against the following.

1. National Criminal History Check: Students must have a current (expiring 3 years from date of issue) check valid for their entire program. A valid National Criminal history check must be an Australia wide check, include the student's full name matching their Student ID card and date of birth and not have any offences listed. If a student has a criminal history identified on their check, they must provide a Clinical Placement Authority Card (CPAC) or conditional letter from the NSW HealthShare Employment Screening and Review Unit https://www.health.nsw.gov.au/careers/student_clearance/Documents/appendix-10-student-application.pdf
- International students must additionally have a translated International Police Check or statutory declaration.
2. A NSW Working with Children Check (WWCC) clearance letter issued under the category of volunteer valid for their entire program.
3. A current approved first aid certificate valid for their entire program. Approved provider courses can be found at <http://training.gov.au> (<http://training.gov.au/>).
4. A completed vaccination/immunisation card with all serology results containing expiry dates and currency must be maintained by the student to ensure compliance for their entire course.
5. NSW Undertaking/Declaration form.
6. Completed any additional health forms required (such as NSW Health Code of Conduct, Health Student Undertaking/Declaration and Tuberculosis (TB) Assessment Tool).
7. Relevant Local Health District specific documentation as requested.

Contact your School for further details. Resources are also available on the Placement Hub (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/) website.

Assessment

MEDI 3009 Foundational Diagnostic Imaging

Credit Points 10

Legacy Code 401468

Coordinator Paul Stoodley ([https://directory.westernsydney.edu.au/search/name/Paul Stoodley/](https://directory.westernsydney.edu.au/search/name/Paul%20Stoodley/))

Description This unit will introduce students to a range of diagnostic imaging modalities providing an overview of both the technical and practical aspects. Three imaging modalities will be covered, MRI, cardiac sonography and vascular sonography. Within the MRI module, you will learn how to view MRI images and compare them with CT/ultrasound as well as understand the clinical values of each modality and the risks associated. In the cardiac module you will learn the principles of cardiac ultrasound image acquisition, methods used to evaluate cardiac anatomy and function, and the essentials of complimentary tests such as electrocardiograms and stress tests. In the vascular module, undertaking non-imaging assessments will be covered, alongside imaging principles. The practical skills are aimed at providing students with a working knowledge of imaging modalities and enhancing students' prospects of successful application for a training position. The majority of this course is delivered online. However, students must attend a compulsory one-day face-to-face practical skills workshop at Blacktown clinical school.

School Medicine

Discipline Medical Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 3 10cp

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explore key imaging concepts and principles to inform clinical practice
2. Review 3D and relational anatomy and the relationship to advanced diagnostic imaging
3. Apply theories and strategies used in the performance of both imaging and non-imaging assessments
4. Assess the clinical values of different imaging modality covering diagnostic confidence of each modalities and the risks associated
5. Examine professional pathways and development within medical imaging

Subject Content

MRI: MR image acquisition / 3D and relational anatomy / clinical aspect.

Cardiac ultrasound: image acquisition / evaluating anatomy and function / complimentary tests.

Vascular ultrasound: image acquisition / evaluating anatomy and haemodynamics / non-imaging assessments.

Assessment

MEDI 4001 Integrated Clinical Rotations 2

Credit Points 40

Legacy Code 400811

Coordinator Stephen Tobin ([https://directory.westernsydney.edu.au/search/name/Stephen Tobin/](https://directory.westernsydney.edu.au/search/name/Stephen%20Tobin/))

Description This is a 80 credit point year-long subject taken over two terms (40 credit points in each term). Integrated Clinical Rotations 2 is the second major clinical year of the MB BS program. It consists of 9 weeks in each of Paediatrics, Obstetrics & Gynaecology and Mental Health and four weeks in each of Oncology/Palliative Care and Community Research. There will also be 2 weeks of "Year 4 Campus Learning". These will be one week each and held at either Campbelltown Campus or Blacktown Clinical School. During the year, students will be based at a number of appropriate hospitals throughout Sydney, Bathurst and Lismore. Students will also undertake 3 online learning modules (Scientific Streams). Students will complete a reflective portfolio. Slight variations in the delivery of ICR2 occur in the Rural clinical schools. Learning outcomes & assessment requirements do not differ. The unit outline is available from the link on the left-hand menu.

School Medicine

Discipline General Medicine

Student Contribution Band HECS Band 3 40cp

Level Undergraduate Level 4 subject

Pre-requisite(s) MEDI 3003

Restrictions Students must be enrolled in 4641 Bachelor of Medicine/ Bachelor of Surgery.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Provides patient centred care as a member of an interdisciplinary team under appropriate supervision; Communication, Patient Assessment, Patient Management.
2. Promotes the health and wellbeing of individuals and populations, with particular focus on Greater Western Sydney, rural, regional and Aboriginal and Torres Strait Islander Australia; Determinant of Health and Illness, Health Needs, Health Care Systems, Health Promotion, Indigenous Health.
3. Demonstrates and develops professional skills, responsibilities and attitudes; Ethical Practice, Teamwork, Learning and Teaching, Personal Needs, Medical humanities.
4. Develops and applies a sound understanding of the scientific foundations (social, basic and clinical) of medical practice; Applies Science to Practice, Uses Evidence, Research.

Subject Content

Integrated Clinical Rotation 2 (ICR 2) consists of three 9-week attachments in each of Mental Health, Paediatrics, Obstetrics & Gynaecology and two 4-week attachments in Community Research and Oncology, in addition to two Campus Learning weeks.

1. Obstetrics & Gynaecology
 - normal Pregnancy and childbirth
 - The more common obstetric emergencies
 - The principles of antenatal and Postnatal care
 - aspects of family planning
 - common womens health problems
2. Mental health - discuss and describe (at the level of an undifferentiated practitioner) the assessment, aetiology, epidemiology, classification, phenomenology, medical and psychological co-morbidities, prognosis and management of the following psychiatric problems:

- Affective (mood) disorders
- anxiety disorders
- common disorders of childhood and adolescence (including autism; ADHD, ODD and separation anxiety)
- disorders related to Pregnancy and The post-natal period
- eating disorders
- loss and other crises
- organic Brain disorders (particularly delirium and dementia)
- personality disorders
- schizophrenia and related psychoses
- somataform disorders (including chronic pain, unexplained physical syndromes and psychological problems in general medicine)
- substance Abuse and dependence
- suicidal and Dangerous behaviour

3. Paediatrics - students will be prepared for encounters, in their early postgraduate years, with children.

- Recognition of A sick child
- management of common diseases
- challenges faced by children with disability
- The value of public health interventions such as Vaccination and newborn Screening
- problems faced by indigenous children

4. Oncology

- talking with and Examining people affected by all stages of cancer
- talking with and Examining people affected by all common cancers
- observing all components of multidisciplinary cancer care
- Seeing shared decision-making between people with cancer and their doctors

- talking with and Examining dying people
- students will experience management of cancer in all stages of disease, predominantly Managed in A non-inpatient setting, although inpatient and emergency management is also involved as well as dedicated time in A Palliative care unit Seeing inpatient, community and Home care.

5. Community Research

The Community Research (CR) rotation aligns with the broader goals of the School of Medicine to improve the health of communities in Greater Western Sydney and other under-served areas through education and research. The aim of the rotation is to extend students' previous learning on research skills such as; literature review, critical appraisal, biostatistics, quantitative and qualitative research and evidence-based medicine by supporting the student in undertaking research that investigates the relationships between determinants of health, access to healthcare and health outcomes.

6. Personal and Professional Development (PPD)

- ethics case presentation and written statement
- learning journal

For the ethics case presentation and analysis, students are required to present a case with significant et

MEDI 4002 Integrated Clinical Rotations 3

Credit Points 40

Legacy Code 400977

Coordinator Benjamin Woodham ([https://directory.westernsydney.edu.au/search/name/Benjamin Woodham/](https://directory.westernsydney.edu.au/search/name/Benjamin%20Woodham/))

Description The Unit Outline for this unit can be found by clicking on the "Current MBBS, MD Unit Outlines" link in the left-hand menu. Integrated Clinical Rotation 3 is the first session of the third major clinical year of the MB BS program. It consists of five weeks in each Medicine, Surgery, General Practice or Indigenous Health or ICU, ED & Anaesthetics. There will also be two Conference weeks where all students will be based at either Campbelltown Campus, Macarthur Clinical School or Blacktown Clinical School. Students will be based at a number of appropriate hospitals throughout Sydney. Students will also undertake two online learning modules (Scientific Streams). Students will also undertake a reflective portfolio. The unit outline is available from the link on the left-hand menu.

School Medicine

Discipline General Medicine

Student Contribution Band HECS Band 3 40cp

Level Undergraduate Level 4 subject

Pre-requisite(s) MEDI 4001

Restrictions Students must be enrolled in 4641 Bachelor of Medicine/ Bachelor of Surgery.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Patient Care: Provides patient centred care as a member of an interdisciplinary team under appropriate supervision; Communication, Patient Assessment, Patient Management.
2. Health in the Community: Promotes the health and wellbeing of individuals and populations, with particular focus on Greater Western Sydney, rural, regional and Aboriginal and Torres Strait Islander Australia; Determinants of Health & Illness; Health Needs; Health Care Systems; Health Promotion; Indigenous Health.
3. Personal and professional development: Demonstrates and develops professional skills, responsibilities and attitudes; Ethical Practice, Teamwork, Learning & Teaching, Personal Needs, Medical humanities.
4. Scientific basis of medicine: Develops and applies a sound understanding of the scientific foundations (social, basic and clinical) of medical practice; Applies Science to Practice, Uses Evidence, Research.

Subject Content

1. Elective (Five weeks)
2. Five weeks of Medicine in a hospital practicum and
3. Five weeks of Surgery in a hospital practicum and
4. Five weeks of General Practice in a practicum or
5. Five weeks of Indigenous Health in a community practicum or
6. Five weeks of ICU, ED & Anaesthetics in a hospital practicum
7. Conference weeks x 2, including one in the last week of Teaching
8. Two Scientific Streams ? on line learning packages appropriate to rotation (25 hours each)

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

MEDI 4004 Integrated Clinical Rotations General (ICR General)

Credit Points 60

Legacy Code 401201

Coordinator Benjamin Woodham ([https://directory.westernsydney.edu.au/search/name/Benjamin Woodham/](https://directory.westernsydney.edu.au/search/name/Benjamin%20Woodham/))

Description This is a 120 credit point year-long subject taken over two terms (60 credit points in each term). Integrated Clinical Rotations General is a specific subject for students who have deficiencies in performance at the end of Integrated Clinical Rotations 3 or who have not completed Integrated Clinical Rotations 2 and Integrated Clinical Rotations 3. The content will be tailored to each student to enable them to achieve competence in medicine. The subject will run from the middle of one year to the middle of the following year and the examination assessment will be held in conjunction with Integrated Clinical Rotations 3.

School Medicine

Discipline General Medicine

Student Contribution Band HECS Band 3 60cp

Level Undergraduate Level 4 subject

Pre-requisite(s) MEDI 3003

Equivalent Subjects LGYA 7789 - Integrated Clinical Rotations (General)

Restrictions Students must be enrolled in 4641 - Bachelor of Medicine, Bachelor of Surgery.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. As years 3-5 of the MBBS program are an integrated whole, and students will undertake various aspects of the clinical programs asynchronously in any of the three years, it is not possible to divide the learning outcomes on year by year basis. However, each of the attachments will have their own learning outcomes which will be made explicit to students in Learning Guides.

Subject Content

1. Evidence based medicine project
2. 10 weeks of Medicine in a hospital practicum (2 x 5 week attachment) and
3. 10 weeks of Surgery in a hospital practicum (2 x 5 week attachment) and
4. 5 weeks Critical Care in a hospital practicum and
5. Paediatrics attachment in a hospital practicum and
6. Conference weeks x 2 (Conference Weeks 5.1 and 5.2)
7. PPD via a log book of weekly clinical activities and weekly self-reflection

MEDI 4005 Professional Portfolio 3

Credit Points 5

Legacy Code 401259

Coordinator Jennifer McDonald ([https://directory.westernsydney.edu.au/search/name/Jennifer McDonald/](https://directory.westernsydney.edu.au/search/name/Jennifer%20McDonald/))

Description This is a 10 credit point year-long subject taken over two terms (5 credit point in each term). This subject is the third of five Professional Portfolio subjects which will provide students in the Doctor of Medicine (MD) program with the means to monitor and support their acquisition of professional competencies in medicine. Supported by workshops, resources and your Academic and Project Supervisors, you will collate and review evidence of your learning, such as clinical assessments and case studies, preparatory work and outcomes from research and scholarly projects. By identifying and addressing your learning and professional development needs, you will create your own personalised learning journey as the basis for life-long learning in medicine. The Professional Portfolio will also prepare you for the portfolios used extensively in post graduate specialty training in medicine.

School Medicine

Discipline General Medicine

Student Contribution Band HECS Band 3 5cp

Level Undergraduate Level 4 subject

Pre-requisite(s) MEDI 2001 AND MEDI 3005

Co-requisite(s) MEDI 3001

Restrictions Restricted to students enrolled in 4758 - Doctor of Medicine (MD). Students must also meet the inherent requirements of the program as outlined in the University of Western Sydney Inherent Requirements for Medicine: (www.uws.edu.au/ir/inherent_requirements/inherent_requirements_for_medicine_courses). Inherent requirements are personal capabilities which are essential for achieving the learning outcomes of the program or subject in a way that will preserve the integrity of the University's teaching, learning and assessment standards and the accreditation requirements for the program. The Disability Education Standard, Section 3.4 (3) states: In assessing whether an adjustment to the program, subject of the program or program in which the student is enrolled, or proposes to be enrolled, is rea

Learning Outcomes

On successful completion of this subject, students should be able to:

- Provides patient centred care at all stages of care, from pre-pregnancy to end of life
- Promotes the health and wellbeing of individuals and populations, with particular focus on Greater Western Sydney, rural, regional and Aboriginal and Torres Strait Islander communities
- Evaluates and continuously develops own personal and professional capabilities, and those of others
- Applies a sound understanding of the biomedical, psychological and social sciences to medical practice

Subject Content

Medical professional competencies in

- Application of science to understanding of health and disease
- Evaluation of health and disease in individuals and communities
- Application of evidence based practice and research skills
- Teaching and evaluation of learning

- Application of clinical and professional skills in clinical and community settings

Scholarly competencies in

- Academic literacy
- Aspects of the research process, including problem and question formulation, data collection and analysis
- Critical inquiry through application of the biomedical, psychological and social sciences, arts and humanities

Self-evaluation and critical reflection on learning, personal and professional development

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement.

Use the link to the Special Requirements webpage below for more information. http://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements (http://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Students are required to obtain and provide all necessary documentation to be verified by NSW ClinConnect. This verification is a requirement of the NSW Health Department for all students enrolled in medical programs. If a student fails to produce this documentation to ClinConnect they will not be able to attend hospital and health service teaching sessions, and placements. Attendance is a mandatory requirement of the program to ensure that professional competencies are met. Failure to attend will result in a Fail Grade for the subject. Documents that must be provided to ClinConnect are:

- National Police Certificate

2. Adult Health Immunization Schedule
3. Code of Conduct Agreement

MEDI 4006 Honours Project (Medicine)

Credit Points 0

Legacy Code 401172

Coordinator Phillipa Hay ([https://directory.westernsydney.edu.au/search/name/Phillipa Hay/](https://directory.westernsydney.edu.au/search/name/Phillipa%20Hay/))

Description Students who meet prerequisite requirements are offered an opportunity in this Unit to undertake enhanced research and scholarship activities while enrolled in the Bachelor of Medicine / Bachelor of Surgery (MBBS) 4641.5. A key objective is to assist students towards the independent application of knowledge and skills in the principles and methods of medical research on a specialist topic of their choice. With supervision, students will further develop their ability to critically evaluate theories and evidence in disciplines relevant to medicine, and to disseminate their work to a range of audiences. Prior to enrolment in the Unit, students must have satisfactorily completed a Research Portfolio and given a 10 minute oral PowerPoint presentation summarising the research program and outcomes. The presentation is to be at a venue approved by the research supervisor and the supervisor must consider the presentation to be of a satisfactory standard.

School Medicine

Discipline General Medicine

Student Contribution Band

Level Undergraduate Level 4 subject

Pre-requisite(s) MEDI 4002

Co-requisite(s) MEDI 4003

Restrictions Due to the GPA requirements for the Honours Award, this subject is restricted to students enrolled in 4641 MBBS who have achieved an overall program GPA \geq 5.5 (combining grades from 400861 Foundations of Medicine 1, 400862 Foundations of Medicine 2, 400810 Integrated Clinical Rotations 1, 400811 Integrated Clinical Rotations 2 and 400977 Integrated Clinical Rotations 3) in order for the student to have a realistic expectation of achieving an Honours Award of Class II Division II. Students must be concurrently enrolled in subject 400978, Integrated Clinical Rotations 4 in Session 2H to be enrolled in the subject. Prior to enrolment in the Unit, students must have satisfactorily completed both the Seminar Presentation and Research Portfolio requirements. To obtain pre-approval, a structured research proposal, endorsed by a research supervisor, must be submitted to the School of Medicine Research and Higher Degrees Committee (RHDC) for review. The research proposal may be submitted to the RHDC any time between the completion of subject 400861, Foundations of Medicine 1 and before commencement of subject 400811, Integrated Clinical Rotations 2. Pre-approval must be obtained prior to collating evidence towards the Research Portfolio. The Research Portfolio will comprise written documentation and evidence of a pre-approved program of research, including a research supervisor endorsement stating that 200 hours was spent on the research.

Assumed Knowledge

MBBS Years 1 to 4 research methodology. Students will be expected to have applied knowledge and skills in designing and conducting research.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate academic writing skills required for writing peer reviewed journal publications
2. Independently identify and seek to address own learning needs for the planning and completion of a defined program of research
3. Seek, critically appraise and apply best available evidence relevant to a defined program of research
4. Demonstrate research rigour by systematically formulating answerable research questions, selecting and implementing appropriate study designs to generate, support or refute a testable hypothesis
5. Demonstrate an understanding of all aspects of the research process, including appropriate data collection and data analysis methods, and the synthesis, appraisal and dissemination of research findings
6. Apply ethical principles, relevant guidelines and laws to the conduct of own research

Subject Content

There is no formal teaching for the Unit. The workload is self-managed, supported by regular meetings with research supervisor(s). The Unit requires submission of an Honours dissertation, a seminar presentation and a research portfolio, together with attainment of the minimum GPA. Students will be assisted individually by their supervisor(s) to develop and apply skills in critical analysis, evaluation and synthesis of their research findings with knowledge from relevant disciplines. Students will be assisted by their supervisor(s) to develop academic writing and oral presentation skills to an Honours standard.

MEDI 7002 Allergic Sciences 1

Credit Points 20

Legacy Code 401249

Coordinator Miriam Codarini ([https://directory.westernsydney.edu.au/search/name/Miriam Codarini/](https://directory.westernsydney.edu.au/search/name/Miriam%20Codarini/))

Description This unit will consist of four online modules dealing with the immunological and clinical aspects of allergic diseases. These modules will cover basic immunology and fundamental theoretical and clinical concepts underlying Eczema and Contact Dermatitis, Urticaria and Angioedema, and Drug Hypersensitivity Reactions, Insect Allergy and Anaphylaxis. The purpose of Allergic Sciences 1 is to provide students with sound knowledge of essential immunological principles and common allergic conditions. Students will use self directed learning to link basic science with clinical understanding, and

must attend a written exam at a university approved venue for one of the assessments.

School Medicine

Discipline Internal Medicine

Student Contribution Band HECS Band 3 20cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 7790 Allergic Sciences 1 AND LGYA 7791 Allergic Sciences 2 MEDI 7001 Allergic Sciences

Restrictions

Students must be enrolled in program Graduate Certificate in Allergic Diseases, the Graduate Diploma in Allergic Diseases (exit only) or Master of Medicine (Allergic Diseases). Students must be qualified and registered medical practitioners.

Assumed Knowledge

Must have completed a medical degree (MBBS, MBChB or equivalent qualification) and preferably have previous clinical experience.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the immune mechanisms involved in allergic disease pathogenesis and implications for diagnosis and treatment.
2. Examine the pathophysiology, epidemiology, clinical presentation and treatment of allergic skin disease, drug and insect allergy, and anaphylaxis.
3. Consider key aspects of the professional practice required of doctors caring for patients with allergic skin disease, drug and insect allergy, and anaphylaxis including their limitations and referral pathways for complex patients.
4. Apply critical thinking to assess and manage patients with allergic skin disease, drug and insect allergy, and anaphylaxis.
5. Acquire evidence based knowledge that informs best clinical allergy practice via online self-directed learning strategies.

Subject Content

This subject consists of four modules covering:

1. Immunology
2. Eczema and Contact Dermatitis
3. Urticaria and Angioedema
4. Drug Hypersensitivity Reactions, Insect Allergy and Anaphylaxis

These modules explain the immunological mechanisms underpinning allergic diseases and link basic science with clinical aspects of specific allergic diseases to provide students with clinically relevant knowledge. The learning materials will enable students in the Graduate Diploma in Allergic Diseases (exit only) and Master of Medicine (Allergic Diseases) to undertake the required clinical experiences.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	30 mins x 4	S/US	Y	Individual
Reflection	300 words x 4 (one chosen randomly for marking)	30	Y	Individual

MEDI 7003 Allergic Sciences 2

Credit Points 20

Legacy Code 401250

Coordinator Miriam Codarini (https://directory.westernsydney.edu.au/search/name/Miriam_Codarini/)

Description This unit will consist of four online modules dealing with the immunological and clinical aspects of allergic diseases. These modules will cover fundamental theoretical and clinical concepts underlying Food Allergy, Allergic Airways Diseases, and Rhinoconjunctivitis, Sinusitis and Immunotherapy. The purpose of Allergic Sciences 2 is to complement Allergic Sciences 1 and provide students with comprehensive knowledge for managing patients with allergic conditions in clinical practice. Students will use self directed learning to link basic science with clinical understanding, and must attend a written exam at a university approved venue for one of the assessments.

School Medicine

Discipline Internal Medicine

Student Contribution Band HECS Band 3 20cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) MEDI 7002

Equivalent Subjects LGYA 7790 - Allergic Sciences 1 and LGYA 7791 - Allergic Sciences 2 MEDI 7001 - Allergic Sciences

Restrictions

Students must be enrolled in the Graduate Certificate in Allergic Diseases or Master of Medicine (Allergic Diseases). Students must be qualified and registered medical practitioners.

Assumed Knowledge

Students must have completed a medical degree (MBBS, MBChB or equivalent qualification) and preferably have a basic understanding of core immunological concepts and previous clinical experience.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the immune mechanisms involved in allergic disease pathogenesis and implications for diagnosis and treatment.
2. Examine the pathophysiology, epidemiology, clinical presentation and treatment of food allergy and respiratory allergy.
3. Consider key aspects of the professional practice required of doctors caring for patients with food allergy and respiratory allergy, including their limitations and referral pathways for complex patients.
4. Apply critical thinking to assess and manage patients with food allergy and respiratory allergy.
5. Acquire evidence based knowledge that informs best clinical allergy practice via online self-directed learning strategies.

Subject Content

This subject consists of four modules covering:

1. Food Allergy ? IgE Mediated
2. Food Allergy ? Non IgE Mediated
3. Allergic Airways Disease
4. Rhinoconjunctivitis, Sinusitis and Immunotherapy

These modules link basic science with clinical aspects of specific allergic diseases to provide students with clinically relevant knowledge. The learning materials will enable students in the Graduate Diploma in Allergic Diseases (exit only) and Master of Medicine (Allergic Diseases) to undertake the required clinical experiences.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Multiple Choice	30 mins x 4	U/S	Y	Individual
Reflection	300 words x 4 (one chosen randomly for marking)	30	Y	Individual
Multiple Choice	60 mins	10	Y	Individual
Multiple Choice	2 hrs	60	Y	Individual

MEDI 7004 Applications of Magnetic Resonance from Cancer to Neuroanatomy

Credit Points 10

Legacy Code 401203

Coordinator Bill Price ([https://directory.westernsydney.edu.au/search/name/Bill Price/](https://directory.westernsydney.edu.au/search/name/Bill%20Price/))

Description Magnetic resonance (MR) provides a suite of versatile information rich and non-invasive techniques of which magnetic resonance imaging (MRI), Magnetic Resonance Spectroscopy (MRS) and Nuclear Magnetic Resonance (NMR) spectroscopy are the best known. These techniques have enormous applications across the sciences (e.g., inorganic and organic chemistry) but increasingly to medicine (e.g., to cancer diagnosis and treatment). Western Sydney University has state-of-the-art MR infrastructure and an international reputation in MR development. This unit will explore the diverse applications and teach experimental practice and fundamental physical principles that underpin all the MR-based techniques. It is intended for medical science, medical and science students who use/intend to use NMR/MRI technology or merely want a deeper understanding of its rapidly expanding capabilities (e.g., functional MRI) and applications.

School Science

Discipline Medical Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate a clear understanding of the concepts of magnetic resonance and imaging.
2. Discuss the current and potential applications of magnetic resonance to medicine and other fields.
3. Conduct basic and advanced magnetic resonance experiments.
4. Process and analyse MRS and MRI data.
5. Apply magnetic resonance and imaging to other disciplines.
6. Understand OH&S issues related to magnetic resonance.

Subject Content

1. Safety in the Research Magnetic Resonance/Clinical MRI Laboratory
2. Basic NMR theory
3. Chemical shift and spin-spin coupling
4. Spin relaxation and diffusion
5. Standard 1D and multidimensional NMR experiments
6. Basic magnetic resonance imaging (MRI) experiments
7. Magnetic resonance spectroscopy (MRS) in brain and tissues
8. Functional magnetic resonance imaging of the brain

9. Medical image processing
10. Diffusion imaging
11. Advanced Techniques in magnetic resonance

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Written worksheet submission	5 x 3 hours	30	N	Individual
Essay	1,500-2,000 words	20	N	Individual
Written Examination	2 hours	50	N	Individual

Teaching Periods

MEDI 7008 Chronic Disease Management in Rural Practice

Credit Points 10

Legacy Code 401272

Coordinator Andrew Page ([https://directory.westernsydney.edu.au/search/name/Andrew Page/](https://directory.westernsydney.edu.au/search/name/Andrew%20Page/))

Description This unit will examine the pathophysiology, epidemiology, clinical presentation and treatment of chronic diseases in rural and remote settings in the Australian context. Students will develop systems to effectively manage chronic disease within their clinical environment and consider key aspects of the professional practice required of doctors caring for patients with chronic diseases. This unit will also introduce the concepts of collaboration with a multidisciplinary team.

School Medicine

Discipline General Medicine

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4760 Master of Medicine (Rural Generalism)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and evaluate the pathophysiology, epidemiology, clinical presentation and treatment of chronic diseases in rural and remote settings in the Australian context
2. Explain key aspects of the professional practice required of doctors caring for patients with chronic diseases in rural and remote settings in the Australian context, including their limitations and referral pathways for complex patients.
3. Assess and manage patients with chronic diseases in rural and remote settings in the Australian context

4. Reflect on own practice to promote best practice in rural generalism
5. Develop systems within your clinical setting that promote chronic disease management
6. Evaluate policies, ethical, professional and legal statutory requirements applicable to rural medical practitioners
7. Work effectively and in collaboration with a multidisciplinary team to effect chronic disease management

Subject Content

What is Chronic Disease in Rural and Remote Australia ULO 1,2,3
Principles of Chronic Disease Management ULO 1,2,3,4,5,7
Common Chronic Disease Presentations in Rural Generalist practice 1 ULO 1,2,3,6,7
Chronic Disease Care in the Aboriginal and Torres Islander Community ULO 1,2,3,6,7
Common Chronic Disease Presentations in Rural Generalist practice 2 ULO 1,2,3,6,7
Practice Systems to Promote Chronic Disease Management ULO 2,3,4,5,6,7

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Online Quizzes	15mins at end of each module	10	N	Individual
Online Forum Participation	Twice weekly throughout the semester	10	N	Individual
Case Study x 2	500 words each	30	N	Individual
Reflection: Essay	2000 words	50	N	Individual

Prescribed Texts

- No prescribed text. All learning resources will be provided on vUWS

Teaching Periods

MEDI 7009 Clinical Allergy

Credit Points 10

Legacy Code 401064

Coordinator Miriam Codarini ([https://directory.westernsydney.edu.au/search/name/Miriam Codarini/](https://directory.westernsydney.edu.au/search/name/Miriam%20Codarini/))

Description This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). This yearlong subject will consist of 50 hours of supervised consultation of patients with allergic diseases within the setting of a specialist Immunology/Allergy clinic. The purpose of Clinical Allergy is to apply previously acquired knowledge of allergic diseases to patient care in real time. Students will be supervised by experienced Clinical Immunologists/Allergists and develop skills in allergy diagnosis and management of children and adults. Clinical experiences will include history taking, physical examination, skin prick testing and spirometry interpretation, and management of various allergic conditions. Students will need to

participate in online case conference discussions also, and attend two course workshops, the Australasian Society of Clinical Immunology and Allergy (ASCIA) Annual Scientific Meeting and the Macarthur Series in Immunology.

School Medicine

Discipline Internal Medicine

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) MEDI 7002 AND
MEDI 7003

Equivalent Subjects LGYA 7792 - Clinical Allergy 1 LGYA 7793 - Clinical Allergy 2

Restrictions

Students must be enrolled in 4689 Graduate Certificate in Allergic Diseases or 4753 Master of Medicine (Allergic Diseases)

Assumed Knowledge

Must have completed a medical degree (MBBS, MBChB or equivalent qualification) and be practising as a medical practitioner in clinical practice. Also, must have sound knowledge and understanding of immunological concepts and clinical aspects of allergic diseases including diagnosis and management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine aspects of the professional practice required of doctors caring for patients with allergic diseases, including their limitations, referral pathways for complex patients, and reflection and collaboration with other health professionals.
2. Recognise and interpret patient history, physical examination and test results.
3. Diagnose and manage patients with allergic diseases with a safe, caring, ethical and professional practice.
4. Perform and analyse common tests used to investigate and monitor patients with allergic diseases.
5. Communicate relevant clinical information about allergic diseases to patients, their family and health professionals.
6. Perform self-directed learning strategies to enhance evidence based clinical practice.

Subject Content

This subject consists of the following clinical experiences:

1. History and physical examination of patients with allergic diseases
2. Investigation of patients with allergy including skin prick testing and spirometry
3. Management of patients with allergic diseases including anaphylaxis

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Participation	1.5 hrs x 12	S/U	Y	Individual
Professional Task	30 mins each	S/U	Y	Individual
Professional Task	Variable time per patient (total 50 hours of clinical consultation during placement)	S/U	Y	Individual
Presentation	30 mins each x 4	S/U	Y	Individual
Professional Task	300 words each x 15	S/U	Y	Individual
Log/Workbook	Throughout the year (all clinical consultations undertaken during placement)	S/U	Y	Individual

MEDI 7011 Clinical Minimally Invasive Gynaecological Surgery 2

Credit Points 15

Legacy Code 401057

Coordinator Harry Merkur ([https://directory.westernsydney.edu.au/search/name/Harry Merkur/](https://directory.westernsydney.edu.au/search/name/Harry%20Merkur/))

Description This is a 30 credit point year-long subject taken over two terms (15 credit points in each term). Students undertaking this subject will have a detailed knowledge of open abdominal surgery at commencement. This subject will extend their knowledge in the practical aspects of laparoscopic surgery. This subject will be completed in Year 2 of the program.

School Medicine

Discipline Obstetrics and Gynaecology

Student Contribution Band HECS Band 3 15cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) MEDI 7010

Restrictions

Students must be advanced trainees in Obstetrics and Gynaecology undertaking a Fellowship in Minimally Invasive Gynaecological Surgery at Blacktown Hospital or other accredited site. Students must be enrolled in 4690 Master of Surgery in Advanced Gynaecological Surgery

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Perform minimally invasive gynaecological surgery in a competent and safe manner for all appropriate problems
2. Perform competent patient assessment and postoperative care of complex problems
3. Demonstrate the theory and practice of minimally invasive gynaecological surgery to junior staff
4. To achieve these, the student needs to demonstrate a high level of critical thinking and judgement through the completion of extensive clinical experience treating patients across the full range of gynaecological surgical disorders, receiving continual critical feedback and engaging in reflective discussion with their clinical specialist supervisor. Achievement of these learning outcomes demonstrate extensive experience in the area of Clinical Minimally Invasive Gynaecological Surgery.

Subject Content

Surgical techniques required in minimally invasive gynaecological surgery

Pre-operative assessment and post operative care

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Teaching Periods

MEDI 7012 Critical Care: Skills and Practice

Credit Points 10

Legacy Code 401271

Coordinator Andrew Page ([https://directory.westernsydney.edu.au/search/name/Andrew Page/](https://directory.westernsydney.edu.au/search/name/Andrew%20Page/))

Description This unit that will enhance the student's critical and practical clinical skills for rural generalist practice. The student will become familiar with common critical care presentations and develop a structured approach to the common practical skills of practice. They will also develop effective decision making skills that incorporate a team management approach. The development of these skills will be supported by a mandatory two day face to face practical simulation workshop.

School Medicine

Discipline General Medicine

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4760 Masters of Medicine (Rural Generalism)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and evaluate common critical care presentations in rural and remote practice
2. Outline the importance of effective decision making skills in an emergency situation including team management and delegation of tasks
3. Manage the common trauma and medical presentations expected to be seen, and identify the key clinical procedures likely to be required in pre hospital/ primary aeromedical environments
4. Develop a structured approach to common practical skills applicable to rural practice
5. Recognise, assess and manage the deteriorating patient using a structured ABCDE approach
6. Execute effective life-saving procedural skills required in emergency situations
7. Present relevant information to patients, their family and health professionals in a professional manner
8. Manage an effective working plan for professional development in rural generalism practice

Subject Content

Module 1: Common Critical Care (cardiac/sepsis/collapse) ULO 1,2,3,4,5,6,7

Module 2: Common Practical Skills ULO 1,3,4

Module 3: The Seriously Ill Child ULO 1,2,3,4,5,6,7
 2-day workshop (Critical Care Simulation and Practical Skills) ULO
 1,2,3,4,5,6,7,8
 Module 4: The Obstetric Emergency ULO 1,2,3,4,5,6,7
 Module 5: Emergency Response (triage/retrieval/organisation) ULO
 1,2,3,4,5,6,7
 Module 6: Trauma in a Rural Setting (#; MVA; farming) ULO 1,2,3,4,5,6,7

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.

- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

MEDI 7015 Diversity in Generalist Practice

Credit Points 10

Legacy Code 401273

Coordinator Andrew Page ([https://directory.westernsydney.edu.au/search/name/Andrew Page/](https://directory.westernsydney.edu.au/search/name/Andrew%20Page/))

Description This unit will explore the diversity of populations and examine the complexities of health and health care delivery in rural and remote settings in Australia. Students will develop a structured approach to managing the undifferentiated clinical presentations in a rural practice setting and will also analyse cultural, social, community, population and health factors influencing the practice of rural and remote medicine. Critical reasoning skills will be developed and students will be encouraged to self-reflect on their current clinical situation.

School Medicine

Discipline General Medicine

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4760 Masters of Medicine (Rural Generalism)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the diversity of populations in rural and remote settings in the Australian context
2. Analyse cultural, social, community, population and health factors influencing the practice of rural and remote medicine
3. Identify and evaluate the complexities of health and health care delivery in rural and remote communities
4. Develop a structured approach to manage the undifferentiated clinical presentation in rural practice settings
5. Differentiate health care needs of culturally diverse and disadvantaged groups
6. Discuss patient history, physical examination and test results relevant to medical practices in rural and remote settings in the Australian context
7. Access professional networks to maintain professional skills and to access support and debriefing where required

8. Acquire evidence based knowledge that informs best clinical generalism practice via online self-directed learning strategies

Subject Content

Diversity in the Practice Setting (populations & social factors) ULO 1,2,3,5

The Undifferentiated presentation (Structured approach) ULO 3,4,6,7,8

Rural Generalist Practice 1 (Obstetric; Psychiatry; Palliative Care) ULO 1,2,3,4,5,6,8

MEDI 7016 Endometriosis

Credit Points 10

Legacy Code 401058

Coordinator Harry Merkur ([https://directory.westernsydney.edu.au/search/name/Harry Merkur/](https://directory.westernsydney.edu.au/search/name/Harry%20Merkur/))

Description This is an alternate unit in Year 2 of the Master of Surgery (Advanced Gynaecological Surgery) course. Endometriosis commonly presents with pelvic pain and infertility, with gynaecological surgery being a significant treatment option. Surgery in women with endometriosis can be challenging, with gynaecological surgeons requiring advanced training and a multi-disciplinary approach to obtain the best patient outcomes. This unit will provide the students with the opportunity to explore management aspects of endometriosis tailoring treatment options depending on the patient's symptoms and goals. By enrolling in this unit, the student will be expected to produce a detailed discussion on various aspects of endometriosis, focusing on minimally invasive techniques. This includes exploring the pre-operative rationale to perform surgery, intra-operative nuances of surgical techniques used and post-operative care of importance to ensure the best outcomes for the patient.

School Medicine

Discipline Obstetrics and Gynaecology

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Student must be enrolled in 4770 Master of Surgery (Advanced Gynaecological Surgery) or 4690 Master of Surgery in Advanced Gynaecological Surgery

Assumed Knowledge

All students are expected to have a knowledge base commensurate with a level of an Advanced Trainee or Specialist in Obstetrics & Gynaecology (RANZCOG or other accredited college) and satisfactory completion of the Graduate Diploma in Advanced Gynaecological Surgery [ie, Year 1 of the Master of Surgery (Advanced Gynaecological Surgery) program].

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate diagnostic and treatment options for patients with endometriosis
2. Effectively counsel patients with endometriosis regarding treatment options and therapy dependent on patient symptoms and goals
3. Critique complex endometriosis surgical techniques, focusing on minimally invasive surgical techniques
4. Reflect on the importance of multi-disciplinary and collaborative surgical approaches for patients with severe endometriosis
5. Critically appraise the medical literature on specific aspects of endometriosis

Subject Content

1. Aspects of the diagnosis and management of endometriosis
2. Tailoring treatment options dependent on the patient's symptoms and goals
3. The benefits and disadvantages of surgical intervention in endometriosis including complications from surgery
4. Complex surgical techniques, especially focusing on minimally invasive techniques required to surgically treat endometriosis
5. The importance of a multi-disciplinary and collaborative surgical approach with other surgical specialities in severe endometriosis to optimise patient outcomes
6. Review of current literature on endometriosis

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Report	Total 5,000 words: 1a. Literary Review 4,000 words (SLOs 1, 3, 4); 1b. ~ 1,000 words (SLOs 2, 5)	100	N	Individual

MEDI 7017 Gynaecological Surgery Ergonomics

Credit Points 10

Legacy Code 401059

Coordinator Harry Merkur ([https://directory.westernsydney.edu.au/search/name/Harry Merkur/](https://directory.westernsydney.edu.au/search/name/Harry%20Merkur/))

Description This is an alternate unit in the Graduate Diploma in Advanced Gynaecological Surgery and Year 1 of the Master of Surgery (Advanced Gynaecological Surgery) course. This unit provides students with the knowledge on surgical ergonomics in both open and minimally invasive gynaecological surgery. This unit will extend their knowledge in theoretical and practical aspects, focusing on strategies to maximise ergonomics and its effects on situational awareness, communication and leadership during gynaecological surgery. Students will explore factors associated with gynaecological surgery ergonomics, such as surgeon and surgical assistant positions, theatre setup, incision sites, port placement and surgical techniques to maximise surgical ergonomics in order to reduce surgeon fatigue, injury and improve patient safety and outcomes. It is expected the student will be able to perform operations safely, with economy of movement to optimise surgeon comfort and ultimately improve patient outcomes.

School Medicine

Discipline Obstetrics and Gynaecology

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4766 Graduate Diploma of Advanced Gynaecological Surgery or 4770 Master of Surgery (Advanced Gynaecological Surgery) or 4690 Master of Surgery in Advanced Gynaecological Surgery

Assumed Knowledge

All students are expected to have a knowledge base commensurate with a level of a Trainee or Specialist in Obstetrics & Gynaecology (RANZCOG or other accredited college) with satisfactory completion of RANZCOG written examination as per enrolment restrictions.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the factors that influence surgical ergonomics with various approaches to gynaecological surgery
2. Develop effective techniques in gynaecological surgery to optimise surgical ergonomics leading to safe work practices
3. Critically analyse the benefits of improving surgical ergonomics from a patient, surgeon and surgical team perspective
4. Examine strategies to improve theatre communication, situational awareness and leadership in an operative setting
5. Reflect on specific aspects of surgical ergonomics in gynaecological surgery to enhance professional practice

Subject Content

1. Factors that influence ergonomics within different approaches to gynaecological surgery including surgeon and surgical assistant positions, theatre setup, incision sites, port placement and surgical techniques
2. The benefits of improving surgical ergonomics for both the surgeon and patient
3. Strategies to improve theatre communication, situational awareness and leadership in an operative setting
4. Current practices to ensure safe work practices to protect both patients and staff

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Report	Total 5,000 words: 1a. Literature Review 4,000 words (SLOs 1, 3, 4); 1b. Reflection ~1,000 words (SLOs 2, 5)	100	N	Individual

MEDI 7021 Mental Health Aspects of Allergic Diseases

Credit Points 10

Legacy Code 401252

Coordinator Natalie Morrison ([https://directory.westernsydney.edu.au/search/name/Natalie Morrison/](https://directory.westernsydney.edu.au/search/name/Natalie%20Morrison/))

Description Allergic diseases are chronic conditions which can influence psychosocial wellbeing. Early recognition of effects on mental health is essential to ensure optimal support and enhance quality of life. This unit provides students with knowledge and skills to address mental health concerns in patients with allergic diseases. Modules will cover the psychological effects of living with chronic disease, anxiety and depression, somatic symptom disorders and eating disorders. Students will use online lectures, case discussion and evidence-based materials to explore key elements and strategies for effective mental health assessment and management in clinical allergy practice.

School Medicine

Discipline Internal Medicine

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) MEDI 7002 AND
MEDI 7003 OR
MEDI 7001

Co-requisite(s) MEDI 7009

Restrictions

Students must be enrolled in Master of Medicine (Allergic Diseases). Students must be medical practitioners registered with AHPRA or the New Zealand Medical Board.

Assumed Knowledge

A completed medical degree (MBBS, MBChB or equivalent qualification) is required and current practice as a clinician is desirable to successfully undertake this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explore common psychological conditions and effects in patients with allergic diseases.
2. Consider the best strategies to assess and manage psychological conditions early in patients with allergic diseases.
3. Use evidence-based resources to promote best practice in caring for patients with allergic diseases and mental health conditions.

Subject Content

1. Psychological effects of living with chronic disease including adaptation, loss, grief, coping and adjustment from the child and adult perspective.
2. Anxiety disorders associated with allergic diseases including generalised anxiety, social phobia and post-traumatic stress disorder.
3. Depression in relation to allergic diseases.
4. Somatoform disorders associated with allergic diseases including chronic pain, unexplained physical syndromes and psychological problems.

5. Eating disorders associated with allergic diseases including food avoidance and aversion.

6. Child specific mental health conditions associated with allergic diseases including separation anxiety, oppositional defiant disorder and other emotional, behavioural and educational effects.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Participation: Facilitation of Group Discussion	30 mins	30	Y	Individual
Critical Review: Written assignment on topic nominated by lecturer	3,000 words	40	Y	Individual
Final exam: Multiple choice questions (MCQ)	1 hour	30	Y	Individual

MEDI 7022 Nutritional Aspects of Allergic Diseases

Credit Points 10

Legacy Code 401251

Coordinator Miriam Codarini ([https://directory.westernsydney.edu.au/search/name/Miriam Codarini/](https://directory.westernsydney.edu.au/search/name/Miriam%20Codarini/))

Description Dietary and nutritional aspects of allergic diseases often need consideration in patient management. This unit provides students with a detailed understanding of nutritional fundamentals and requirements especially for children and adults with food allergy. Online learning materials and case discussion facilitated by an experienced dietitian will promote essential knowledge and practical skills. Modules will provide the latest evidence on nutritional basics, weight management, diagnosis and management of food allergies and intolerances, food labelling, and early infant feeding recommendations. This content will complement the clinical experiences in the Master of Medicine (Allergic Diseases) and enhance clinical allergy practice.

School Medicine

Discipline Internal Medicine

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) MEDI 7002 AND
MEDI 7003 OR
MEDI 7001

Co-requisite(s) MEDI 7009

Restrictions

Students must be enrolled in Master of Medicine (Allergic Diseases).
Students must be medical practitioners registered with AHPRA or the
New Zealand Medical Board.

Assumed Knowledge

A completed medical degree (MBBS, MBChB or equivalent qualification)
is required and current practice as a clinician is desirable to
successfully undertake this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explore nutritional fundamentals and requirements for patients with allergic diseases.
2. Examine feeding recommendations for children with and without food allergies.
3. Determine best evidence to assess and manage nutritional aspects of allergic diseases.
4. Use evidence-based resources to enhance learning in the nutritional aspects of allergic diseases.

Subject Content

This subject consists of four modules covering:

- Nutritional fundamentals and bone health
- weight management and The effect of Corticosteroids
- restrictive diets and supplementation, particularly for children with food allergies
- food intolerances
- food labelling
- early feeding recommendations
- evidence for food chemicals and additives causing allergy
- tests for food allergy

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Multiple Choice	30 minutes each	S/U	Y	Individual
Case Study	100 words each	20	Y	Individual

MEDI 7023 Pelvic Anatomy

Credit Points 10

Legacy Code 401061

Coordinator Harry Merkur ([https://directory.westernsydney.edu.au/search/name/Harry Merkur/](https://directory.westernsydney.edu.au/search/name/Harry%20Merkur/))

Description This is an alternate unit in the Graduate Diploma in Advanced Gynaecological Surgery and Year 1 of the Master of Surgery (Advanced Gynaecological Surgery) course. The student is expected to attain an advanced understanding and knowledge of the Anatomy of the Female Pelvis. The eventual aim is to become a competent surgeon in this field. Detailed Pelvic Anatomy is a vital component required to attain the skills necessary for the performance of Advanced Gynaecological Surgery. Knowledge of the normal versus the abnormal anatomy is required for the correct identification of pelvic structures. When abnormal features are present caused by pathological changes, the student is expected to know how to recognise the distortion caused, thus paving the way to try and normalise the anatomy as best as possible. The student should choose a topic relevant to the operations observed and learned. An analysis of the anatomy important to the topic should be presented in a detailed fashion. Evidence for any conclusions drawn or reflections made should be provided from a review of the literature. An important aspect of detailed knowledge of Pelvic Anatomy is crucial in the avoidance or detection and management of complications at surgery.

School Medicine

Discipline Obstetrics and Gynaecology

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4766 Graduate Diploma of Advanced Gynaecological Surgery or 4770 Master of Surgery (Advanced Gynaecological Surgery) or 4690 Master of Surgery in Advanced Gynaecological Surgery

Assumed Knowledge

All students are expected to have a knowledge base commensurate with a level of a Trainee or Specialist in Obstetrics & Gynaecology

(RANZCOG or other accredited college) with satisfactory completion of RANZCOG written examination as per enrolment restrictions.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse aspects of pelvic anatomy relevant to the performance of advanced gynaecological surgery
2. Assess the distortion of anatomy that occurs with pathology
3. Critique surgical techniques to manage pathology appropriately
4. Evaluate surgical anatomy and landmarks required to facilitate safe gynaecological surgery and avoid inadvertent surgical injury
5. Apply reflective and evidence based approaches with respect to pelvic anatomy to enhance professional practice

Subject Content

1. Detail aspects of anatomy of the female pelvis relevant to Advanced Gynaecological Surgery
2. Appreciation of the distortion of anatomy that occurs with pathology
3. Spatial awareness required for the location of important anatomical structures during gynaecological surgery
4. Anatomical landmarks which are key to performing advanced gynaecological surgical procedures
5. Surgical anatomy to avoid complications at gynaecological surgery

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Applied Project	Total 5,000 words: 1a. Literature Review 4,000 words (SLOs 1, 3, 4); 1b. Reflection ~1,000 words (SLOs 2, 5)	100	N	Individual

MEDI 7025 Port Entry

Credit Points 10

Legacy Code 400995

Coordinator Harry Merkur ([https://directory.westernsydney.edu.au/search/name/Harry Merkur/](https://directory.westernsydney.edu.au/search/name/Harry%20Merkur/))

Description This is an alternate unit in the Graduate Diploma in Advanced Gynaecological Surgery and Year 1 of the Master of Surgery (Advanced Gynaecological Surgery) course. Students undertaking this unit are expected to have a working knowledge on port entry techniques at commencement. This unit will extend their knowledge in theoretical and practical aspects, focusing on the port entry techniques and strategies of port placement and management of port site complications. Students will explore the multitude of port types which are commercially available in minimally invasive gynaecological surgery, the current technologies and tailoring their use in patients to provide optimal surgical outcomes. By enrolling in this unit, the student will be expected to produce a detailed discussion on various aspects of minimally invasive port entry, exploring the pre-operative and intra-operative nuances of surgical planning and techniques. This will extend the student's knowledge so they can safely and effectively establish port entry in minimally invasive gynaecological surgery.

School Medicine

Discipline Obstetrics and Gynaecology

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4766 Graduate Diploma of Advanced Gynaecological Surgery or 4770 Master of Surgery (Advanced Gynaecological Surgery) or 4690 Master of Surgery in Advanced Gynaecological Surgery

Assumed Knowledge

All students are expected to have a knowledge base commensurate with a level of a Trainee or Specialist in Obstetrics & Gynaecology (RANZCOG or other accredited college) with satisfactory completion of RANZCOG written examination as per enrolment restrictions.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique various port entry techniques and their application.
2. Manage pre-operative and intra-operative nuances of surgical planning and techniques with respect to port entry to safely and effectively establish port entry in minimally invasive gynaecological surgery.
3. Evaluate commercially available port site equipment and current technologies to appropriately tailor these products to patient care.
4. Examine port entry complications and manage these complications in a clinical setting.
5. Review the medical literature on specific aspects of port entry utilising an evidence based approach to enhance patient care.

Subject Content

Port entry techniques and its application in an operative setting. Pre-operative and intra-operative surgical planning to ensure effective and safe use of ports in minimally invasive gynaecological surgery. Various commercially port entry equipment and current technologies.

Port entry complications and management of such complications in a clinical setting.
Review of the medical literature in an evidence based approach to port entry.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

MEDI 7026 Power Modalities

Credit Points 10

Legacy Code 400996

Coordinator Harry Merkur ([https://directory.westernsydney.edu.au/search/name/Harry Merkur/](https://directory.westernsydney.edu.au/search/name/Harry%20Merkur/))

Description This is an alternate unit in the Graduate Diploma in Advanced Gynaecological Surgery and Year 1 of the Master of Surgery (Advanced Gynaecological Surgery) course. A thorough understanding of the range of power modalities available when performing gynaecological surgery is a key fundamental concept to gynaecologists performing such surgery. Students undertaking this unit are expected to have a working knowledge on power modalities at commencement. This unit will extend their knowledge in theoretical and practical aspects. Students will explore the physics behind various power modalities, its physiological effect on human tissue and potential complications related to each power modality. Students will review and compare the current range of commercially available power modalities, assisting them to be competent with its use in a clinical setting and tailoring their use dependent on the type of surgery and pathology. By enrolling in this unit, the student will be expected to produce a detailed discussion on various aspects of power modalities, exploring the nuances of surgical planning and techniques. This will extend the student's knowledge so they can safely and effectively use various power modalities in gynaecological surgery.

School Medicine

Discipline Obstetrics and Gynaecology

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4766 Graduate Diploma of Advanced Gynaecological Surgery or 4770 Master of Surgery (Advanced Gynaecological Surgery) or 4690 Master of Surgery in Advanced Gynaecological Surgery

Assumed Knowledge

All students are expected to have a knowledge base commensurate with a level of a Trainee or Specialist in Obstetrics & Gynaecology (RANZCOG or other accredited college) with satisfactory completion of RANZCOG written examination as per enrolment restrictions.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the physics of various power modalities and its effect on human tissue
2. Evaluate the current range of available power modalities, their potential complications and strategies to minimize risk to patients
3. Assess the use of different power modalities in different surgeries and pathologies, tailoring their use for optimal patient outcomes
4. Employ safe principles to assist in the effective use of various power modalities in a clinical setting
5. Review the medical literature on specific aspects of power modalities in a clinical setting

Subject Content

Physics of various power modalities and its effect on human tissue
Potential complications that may arise from the use of various power modalities (some of which are specific to each power modality) and strategies to minimize the risks to patients

Explore the current range of power modalities available to gynaecological surgeons

Compare the use of different power modalities in different surgeries and pathologies, tailoring their use for optimal patient outcomes

MEDI 7027 Professional Portfolio 4

Credit Points 20

Legacy Code 401261

Coordinator Jenny McDonald (https://directory.westernsydney.edu.au/search/name/Jenny_Mcdonald/)

Description This is a 40 credit point year-long subject taken over two terms (20 credit points in each term). This subject is the penultimate subject of five Professional Portfolio subjects which will provide students in the Doctor of Medicine (MD) program with the means to monitor and support their acquisition of professional competencies in medicine. Supported by workshops, resources and your Academic Supervisor, you will collate and review evidence of your learning, such as clinical assessments and case studies, preparatory work and outcomes from research and scholarly projects. By identifying and addressing your learning and professional development needs, you will create your own personalised learning journey as the basis for life-long learning in medicine. The Professional Portfolio will also prepare you for the portfolios used extensively in post graduate specialty training in medicine.

School Medicine

Discipline General Medicine

Student Contribution Band HECS Band 3 20cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) MEDI 3001 AND MEDI 4005

Co-requisite(s) MEDI 7006

Restrictions

Restricted to students enrolled in 4758 - Doctor of Medicine (MD). Students must also meet the inherent requirements of the program as outlined in the University of Western Sydney Inherent Requirements for Medicine: (www.uws.edu.au/ir/inherent_requirements/inherent_requirements_for_medicine_courses). Inherent requirements are personal capabilities which are essential for achieving the learning outcomes of the program or subject in a way that will preserve the integrity of the University's teaching, learning and assessment standards and the accreditation requirements for the program. The Disability Education Standard, Section 3.4 (3) states: "In assessing whether an adjustment to the program, subject of the program or

program in which the student is enrolled, or proposes to be enrolled, is reas

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Provides patient centred care at all stages of care, from pre-pregnancy to end of life
2. Promotes the health and wellbeing of individuals and populations, with particular focus on Greater Western Sydney, rural, regional and Aboriginal and Torres Strait Islander communities
3. Evaluates and continuously develops own personal and professional capabilities, and those of others
4. Applies a sound understanding of the biomedical, psychological and social sciences to medical practice

Subject Content

Medical professional competencies in

- Application of science to understanding of health and disease, including recent developments in local, regional, national and international contexts
 - Evaluation of health and disease in individuals and communities
 - Application and evaluation of evidence based practice
 - Teaching and evaluation of learning
 - Application and evaluation of clinical and professional skills to a broad range of situations in diverse clinical and community settings
- Scholarly competencies in
- All aspects of the research process, including data collection, analysis and interpretation, and dissemination of research findings to professional academic and community audiences through conducting an independent project
 - Critical inquiry through application of the biomedical, psychological and social sciences, arts and humanities
- Self-evaluation and critical reflection on learning, personal and professional development

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement.

Use the link to the Special Requirements webpage below for more information. http://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements (http://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Students are required to obtain and provide all necessary documentation to be verified by NSW ClinConnect. This verification is a requirement of the NSW Health Department for all students enrolled in medical programs. If a student fails to produce this documentation to ClinConnect they will not be able to attend hospital and health service teaching sessions, and placements. Attendance is a mandatory requirement of the program to ensure that professional competencies are met. Failure to attend will result in a Fail Grade for the subject. Documents that must be provided to ClinConnect are:

1. National Police Certificate
2. Adult Health Immunization Schedule
3. Code of Conduct Agreement

MEDI 7029 Reflective Clinical Allergy Practice

Credit Points 20

Legacy Code 401253

Coordinator Miriam Codarini ([https://directory.westernsydney.edu.au/search/name/Miriam Codarini/](https://directory.westernsydney.edu.au/search/name/Miriam%20Codarini/))

Description This is an online bridging unit for students with a Graduate Certificate in Allergic Diseases qualification or other recognised allergy training who wish to pursue further study in allergic diseases. Students with acceptable prior learning to enrol in this unit will enter Year 2 of the Master of Medicine (Allergic Diseases) with the option to exit at the Diploma level. The unit enables students to revise the latest theoretical and clinical concepts in allergic diseases and reflect on their

own clinical allergy practice. Reflection will be promoted through case presentation and reports and literature review.

School Medicine

Discipline Internal Medicine

Student Contribution Band HECS Band 3 20cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) MEDI 7001 OR

MEDI 7002 AND

MEDI 7003

Restrictions

Students must be enrolled in Master of Medicine (Allergic Diseases). Students must be medical practitioners registered with AHPRA or the New Zealand Medical Board.

Assumed Knowledge

A completed medical degree (MBBS, MBChB or equivalent qualification) is required and current practice as a clinician is desirable to successfully undertake this subject. Also, must have knowledge of immunological concepts and clinical aspects of allergic diseases, and experience with allergy diagnosis and management in clinical practice. Satisfactory knowledge and experience in clinical allergy will have been acquired through the existing Graduate Certificate in Allergic Diseases (program code 4689) or via other accredited professional training.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine current literature regarding the pathophysiology, epidemiology, clinical presentation and treatment of allergic diseases.
2. Review key aspects of the professional practice required of doctors assessing and managing patients with allergic diseases.
3. Present clinical cases in a clear and well structured manner.
4. Reflect on aspects of diagnosis and management of allergic diseases.
5. Conduct a literature review to inform clinical allergy practice.

Subject Content

1. All learning modules from Allergic Sciences 1 and 2 units
2. Clinical case reflection:
 - a. Case study 1 (own case)
 - present and discuss case with PowerPoint slides via Zoom
 - summary report of main diagnostic and treatment challenges
 - b. Case study 2 (provided by lecturer)
 - choose one question emerging from The case, modules or set Topics for literature Review

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	30 minutes x 8	S/U	N	Individual
Quiz	60 mins x 2	S/U	N	Individual

Presentation	15 minutes	15	Y	Individual
Reflection	500 words	20	Y	Individual
Reflection	500 words	25	Y	Individual
Literature Review	1,500 words	40	Y	Individual

MEDI 7030 Research Project in Rural Generalist Medicine

Credit Points 20

Legacy Code 401275

Coordinator Andrew Page ([https://directory.westernsydney.edu.au/search/name/Andrew Page/](https://directory.westernsydney.edu.au/search/name/Andrew%20Page/))

Description This unit is an essential part of the final year of the Masters of Medicine (Rural Generalism). It will build on the students' knowledge and skills gained in prior units and the aim of this unit is to design and conduct a research project from an area relevant to their practice of rural generalism. Successful completion of the unit results in the composition of a report, and in an oral presentation, which will include details of the aims, methods, results and conclusions of the project.

School Medicine

Discipline General Medicine

Student Contribution Band HECS Band 3 20cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Must be enrolled in the Master of Medicine (Rural Generalism)

Assumed Knowledge

401080 Research Protocol and Design.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the theories and real-life issues relevant to rural medical practice
2. Design and conduct a research project in a rural and remote context
3. Communicate the results of the project to peers and other health professionals in oral and written forms in a professional manner
4. Reflect on own learning and professional development needs
5. Apply technology and self-directed learning strategies to enhance evidence-based practice.

Subject Content

Online Tutorial 1: Introduction to the Unit outlining Objectives and Timelines ULO 1,2,3,4,5

Online Tutorial 2: Reflection on Research Protocol and Design Unit ULO 1,2,3,4,5

Online Tutorial 3: Project design tutorial: designed to address design aspects of the project in response to student ?es research proposal ULO 1,2,3,4,5

Online Tutorial 4: Data collection and measurement tutorial: aimed at ensuring data collection and measurements are being made appropriately ULO 1,2,3,4,5

Online Tutorial 5: Data analysis tutorial: aimed at ensuring data analysis will be appropriately performed ULO 2,3,4,5

Online Tutorial 6: Report writing (Introduction; Methods; results and discussion) ULO 1,2,3,4,5

Online Tutorial 7: Research Presentation Skills aimed at identifying the key aspects of the research (for inclusion in the presentation ULO 2,3,4,5

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Research Project Proposal	500-1000 words	10%	N	Individual
Oral Presentation	20 minute	25%	N	Individual
Research Project	4000 words excluding references	65%	Y	Individual

Teaching Periods

MEDI 7031 Rural and Remote Medicine: The Generalist Approach

Credit Points 10

Legacy Code 401270

Coordinator Andrew Page ([https://directory.westernsydney.edu.au/search/name/Andrew Page/](https://directory.westernsydney.edu.au/search/name/Andrew%20Page/))

Description This unit introduces the student to the concepts of rural generalist practice and provides them with an understanding of the complexities and inequalities of providing health care in rural and remote Australian settings. Students will be expected to appraise the current literature around generalist practice and evaluate the models of care and health systems that support a generalist approach. The students will also determine the skills required to effectively deliver the required scope of practice

School Medicine

Discipline General Medicine

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4760 Masters of Medicine (Rural Generalism)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explore key concepts and principles of rural health and generalist practice
2. Assess the impact of different models of rural practice from a practitioner and patient perspective
3. Describe the diversity of populations in rural and remote settings in the Australian context
4. Evaluate and describe models of care and health systems that support a generalist approach
5. Identify and evaluate the requirements of skills for rural generalist practice
6. Appraise the current rural health policy as it relates to scope of practice
7. Use critical thinking to review literature relevant to (diseases and) medical practices in rural and remote settings in the Australian context
8. Examine the ethical and standards applicable to rural generalist practice

Subject Content

Module 1: What is generalist practice? ULO 1,4,5

Module 2: Diversity in populations in rural and remote Australia ULO 2,3

Module 3: Models of Care for Generalist practice ULO 2,4,5

Module 4: Using the Library Resources for Research ULO 7

Module 5: Rural Health Policy and its Impact ULO 4,5,6

Module 6: Skills for generalist practice ULO 4,5,8

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	15 minutes at the end of each module	10	N	Individual
Participation	Twice weekly throughout the semester	10	N	Individual
Presentation	15 minutes	30	N	Individual
Literature review	1500 words	50	N	Individual

Teaching Periods

MEDI 7032 Surgical Pathology 1

Legacy Code 401227

Coordinator Tristan Rutland ([https://directory.westernsydney.edu.au/search/name/Tristan Rutland/](https://directory.westernsydney.edu.au/search/name/Tristan%20Rutland/))

Student Contribution Band

Assumed Knowledge

A basic undergraduate level knowledge in Pathology and microscopy skills is expected, as the candidates will have a MBBS or equivalent pre-requisite degree.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Neuropathology Diagnostic Case Studies (Online tasks)	10 cases - 50-100 words each	50	Y	Individual
Practical exam - Surgical Pathology Microscopy and reporting (held during conference week)	2 hours	50	Y	Individual

Teaching Periods

MEDI 7033 Surgical Pathology 2

Credit Points 10

Legacy Code 401229

Coordinator Tristan Rutland ([https://directory.westernsydney.edu.au/search/name/Tristan Rutland/](https://directory.westernsydney.edu.au/search/name/Tristan%20Rutland/))

Description In 2022 this unit replaced by unit 401474 - Surgical Pathology of the Genito-urinary Tract, Salivary Gland and Endocrine System. This unit will re-inforce the diagnostic entities in genito-urinary tract, salivary gland and endocrine system pathology that were introduced in Surgical Pathology I. Two self-directed online learning modules with digitalized images and practical notes on the diagnostic approach to important pathological entities of the above sub-specialties will be provided. The basic concepts in surgical, cyto- and small biopsy pathology, including the appropriate ancillary techniques in the diagnosis, prognostication and treatment prediction will be assessed. This unit is designed to further develop the basic research and communication skills, and critical thinking acquired in Surgical Pathology I, and to reinforce the resources and technical requirements needed to reach the correct pathological diagnosis.

School Medicine

Discipline Pathology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions Students must be enrolled in 4750 Masters of Medicine (Pathology).

Assumed Knowledge

A basic undergraduate level knowledge in Pathology and microscopy skills is expected, as the candidates will have a MBBS or equivalent pre-requisite degree.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine and interpret diagnostic entities in surgical pathology in the subspecialties of genito-urinary pathology, salivary gland and endocrine pathology
2. Identify and apply appropriate ancillary techniques in the diagnosis and treatment of conditions within the subspecialties of genito-urinary pathology, salivary gland and endocrine pathology
3. Identify common and uncommon disease entities in genitourinary pathology, salivary gland and endocrine pathology, including the diagnosis of non-neoplastic, benign and malignant entities
4. Define the resources and technical requirements needed to reach the correct diagnosis in genitourinary pathology, salivary gland and endocrine pathology
5. Produce a written report that communicates surgical and cytopathology diagnostic findings
6. Exemplify the behaviour required to create a safe, caring, ethical and professional practice required by pathologists

Subject Content

1. Genito-urinary tract pathology
2. Salivary gland pathology
3. Endocrine system pathology

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Genito- Urinary Pathology Diagnostic Case Studies (Online task)	20 cases ~300-500 words each	S/U	Y	Individual
Salivary Gland and Endocrine Pathology Diagnostic Case Studies (Online task)	20 cases ~300-500 words each	S/U	Y	Individual
Essay	1500 word limit	50	Y	Individual
Histopathology Case Reports	10 cases ~300-500 words each	50	Y	Individual

Legacy Code 401230

Coordinator Tristan Rutland ([https://directory.westernsydney.edu.au/search/name/Tristan Rutland/](https://directory.westernsydney.edu.au/search/name/Tristan%20Rutland/))

Description In 2022 this unit replaced by unit 401475 - Surgical Pathology of Skin, Bone and Soft Tissue. This unit will re-inforce the diagnostic entity in skin and soft tissue pathology that were introduced in Surgical Pathology I. The first self-directed online learning module is composed of digitalized images and practical notes on the diagnostic approach to important pathological entities of these sub-specialties. The second online module will revise prior learning of the sub-specialties neuropathology, cardiorespiratory pathology, genitourinary pathology, salivary gland and endocrine pathology. A literature review and discussion of contemporary and emerging developments in the relevant pathological entity will be conducted. This unit is designed to not only re-inforce/revise the above topics, but to harness effective communication and analytical research skills and to understand the importance of professional development.

School Medicine

Coordinator Tristan Rutland ([https://directory.westernsydney.edu.au/search/name/Tristan Rutland/](https://directory.westernsydney.edu.au/search/name/Tristan%20Rutland/))

Description In 2022 this unit replaced by unit 401476 - General Surgical Pathology and Gastrointestinal Pathology. This unit introduces diagnostic entities in surgical pathology entities gastrointestinal and liver, breast, head and neck, paediatric, gynaecological and haemato-pathology. The unit provides training in basic research skills, communication skills, and critical thinking. The self-directed online learning module is composed of digitalized images, practical notes, recorded lectures and quizzes on the diagnostic approach to important pathological entities of the gastrointestinal tract and liver.

School Medicine

Discipline Pathology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4750 Masters of Medicine (Pathology).

Assumed Knowledge

A basic undergraduate level knowledge in Pathology and microscopy skills is expected, as the candidates will have a MBBS or equivalent pre-requisite degree.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine diagnostic entities in surgical pathology in the subspecialties of gastrointestinal and liver, breast, head and neck, paediatric, gynaecological, and haematopathology.
2. Assess ancillary techniques in the diagnosis and treatment of conditions within the subspecialties of gastrointestinal and

liver, breast, head and neck, paediatric, gynaecological, and haematopathology.

3. Assess common and uncommon disease entities in gastrointestinal and liver pathology, including the diagnosis of non-neoplastic, benign and malignant entities.
4. Engage in professional development activities related to anatomical pathology.
5. Use evidence-based approach to inform the practice of surgical pathology in the subspecialties of gastrointestinal and liver, breast, head and neck, paediatric, gynaecological, and haematopathology .

Subject Content

1. Gastrointestinal tract and liver pathology
2. Breast pathology
3. Head and neck pathology
4. Paediatric pathology
5. Gynaecological pathology
6. Haematopathology

Special Requirements

Legislative pre-requisites

Students need to meet the legislative requirements to be in a supervised specialist training role in Pathology, and hence be working clinically in a hospital/laboratory setting.

MEDI 7038 Telehealth and Rural Communities

Credit Points 10**Legacy Code** 401274**Coordinator** Andrew Page ([https://directory.westernsydney.edu.au/search/name/Andrew Page/](https://directory.westernsydney.edu.au/search/name/Andrew%20Page/))

Description This unit will examine the main clinical, technical and contextual aspects of telehealth relevant to the practice in rural and remote communities. Students will appraise the literature and evidence-based resources regarding e-health to promote best practice in rural generalism and formulate an implementation plan for the introduction or expansion of telehealth services in their practice. They will also develop skills that will enable them to conduct a safe, effective and culturally appropriate telehealth consultation

School Medicine**Discipline** General Medicine**Student Contribution Band** HECS Band 3 10cp**Level** Postgraduate Coursework Level 7 subject**Restrictions**

Students must be enrolled on Masters of Medicine (Rural Generalism)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Practice e-health to provide effective clinical care for patients in rural and remote communities
2. Identify and evaluate the main clinical, technical and contextual aspects of telehealth relevant to the practice in rural and remote communities
3. Appraise the literature and evidence-based resources regarding e-health to promote best practice in rural generalism and with view to further research and study

- Provide quality medical care or facilitate access to specialised care for patients in rural and remote communities
- Formulate and promote an implementation plan for the introduction or expansion of telehealth services in their practice
- Conduct a safe, effective and culturally appropriate telehealth consultation
- Apply technology and self-directed learning strategies to enhance evidence-based practice.

examine the overall management of the different types of diabetes that are fundamental for advance and specialised diabetes clinical practice.

School Medicine

Discipline General Medicine

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program with evidence of 12 month clinically relevant practice or substantial experience in working with people with diabetes

Assumed Knowledge

Basic knowledge and understanding of diabetes pathophysiology and sufficient experience working with diabetes patients in a clinical setting.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Examine the classification, aetiology and pathophysiology of the three major types of Diabetes
- Integrate lifestyle modification and Medical Nutrition Therapy as an integral part in the management of DM
- Analyse diagnostic criteria and treatment target ranges for each of the three major types of diabetes to determine treatment and management options for each type of diabetes
- Provide education and training on the pharmacodynamics of oral agents, insulin and other injectable medication in the management of DM
- Apply best practice guidelines, clinical recommendations and evidence based practice to support diabetes education

Subject Content

- Aetiology and pathophysiology of diabetes assessment and management
- Diabetes Medication Management
- Blood Glucose Monitoring
- Understanding of the interrelationship between nutrition, exercise, stress, and medications on diabetes and prediabetes management
- Acute complications of diabetes Hypoglycaemia
- Hyperglycaemic states
- Sick day management
- Immunisation for people with diabetes
- Implications for driving and reporting
- Clinical management considerations for identified population groups (Elderly, Paediatric and Diabetes in pregnancy)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Online Quiz 1: Type 1 Diabetes	45 minutes	15	N	Individual

Subject Content

Module 1: What is e-health and telehealth? ULO 1,2,3

Module 2: Setting up telehealth ULO 2,3,4,5,7

Module 3: Evidence Based Use of e-health ULO 1,2,3,7

Module 4: Telehealth Decision Making (Risk Management in Rural and Remote Practice) ULO 1,2,4,5,6,7

Module 5: Introducing e-health and telehealth into practice ULO 1,2,4,5,6,7

Module 6: The Telehealth consultation ULO 2,4,5,6,7

Assessment

Legacy Code 401286

Coordinator Cathy Wilson ([https://directory.westernsydney.edu.au/search/name/Cathy Wilson/](https://directory.westernsydney.edu.au/search/name/Cathy%20Wilson/))

Description This unit will focus on the disease process leading to chronic complications of diabetes. Students will examine the screening process, interventions and the management of established microvascular and macrovascular disease associated with diabetes. Students investigate the elderly and vulnerable populations for the synthesis of individualisation of diabetes care and management. Health practitioner clinical skills directly impact on the short and long term health status of people with diabetes. In this online unit, there is a mandatory five day face-to-face clinical workshop component and a mandatory 40 hours of clinical practicum that will be undertaken by all students in this unit.

School Medicine

Discipline General Medicine

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) MEDI 7039 AND MEDI 7041

Restrictions

Students must be enrolled in 4761 Graduate Certificate or 4762 Graduate Diploma in Person-centred Diabetes Care and Education.

Assumed Knowledge

Basic knowledge and understanding of pathophysiology and clinical diabetes. Demonstrated understanding of psychosocial education and support in diabetes self-management.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Analyse the pathophysiology in the development of chronic complications for people living with diabetes.
- Support and educate people living with diabetes to prevent, detect and delay the onset of diabetes related chronic complications in the context of their lives.
- Educate people living with diabetes with the practical skills required for the self-management of diabetes.
- Adapt diabetes clinical management for vulnerable populations with diabetes such as the elderly, people having surgery and with mental health issues.
- Adapt critical thinking skills and reflection to enhance professional practice in diabetes self-management and education.

Subject Content

Overview pathophysiology in complications

Practical skills in diabetes management

Chronic complications in diabetes

Macrovascular complications associated with diabetes

Microvascular complications associated with diabetes

Vulnerable populations with diabetes such as the elderly, people having surgery and with mental health issues

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

MEDI 7041 Diabetes Self-Management Support 1: Individuals

Credit Points 10

Legacy Code 401285

Coordinator Therese Fletcher ([https://directory.westernsydney.edu.au/search/name/Therese Fletcher/](https://directory.westernsydney.edu.au/search/name/Therese%20Fletcher/))

Description Supporting individuals to self-manage their diabetes is the central element of advanced diabetes practice. Underpinned by the empowerment approach, students undertaking this unit will learn the necessary knowledge and skills in educating people with diabetes how to best manage their condition and support behaviours and emotional wellbeing that achieves person centred goals. Drawing on educational, psychological, social and behavioural theories students will learn practical skills in communication, psychological assessment, goal setting and problem-solving that will promote self-care for people with prediabetes and diabetes. This unit is only offered in Spring Session.

School Medicine

Discipline General Medicine

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in the a postgraduate program with evidence of 12 month clinically relevant practice or substantial experience in working with people with diabetes.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Establish an empowerment and person-centred approach in supporting and educating a person with diabetes to optimally self-manage their condition and partner with health professionals involved with their health care.
2. Apply interpersonal communications strategies to develop a trusting rapport and assess a person's value

Subject Content

1. Empowerment and Person-Centred Care.
2. Therapeutic relationship
3. Advanced communication and psychosocial assessment
4. Educating people with diabetes in self care
5. Promoting, supporting and sustaining person centred healthy behaviours
6. Psychosocial issues in diabetes education and care
7. Mental health co-morbidities

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Participation	Four Tutorials - 90 minutes	20	N	Individual
Quiz	30 minutes	10	N	Individual
Interview	15 minutes	15	N	Individual
Reflection	500 words	15	N	Individual
Case Study	2,000 words	40	N	Individual

Prescribed Texts

MEDI 7042 Diabetes Self-Management Support II: Systems and Organisations

Credit Points 10

Legacy Code 401287

Coordinator Therese Fletcher ([https://directory.westernsydney.edu.au/search/name/Therese Fletcher/](https://directory.westernsydney.edu.au/search/name/Therese+Fletcher/))

Description The increasing number of people with diabetes in Australia and globally is a major public health issue. This unit will explore the increasing burden of diabetes, why some groups of people are more at risk of developing diabetes than others, how society and the way health services are organised and delivered influence the risk of developing diabetes, access to quality health care and individual health outcomes. This subject will examine social determinants related to diabetes, the impact of diabetes on Indigenous Australians, diabetes public policy, workforce capability and the integrated nature of service delivery in reducing prevalence and improving health outcomes for people with diabetes and prediabetes.

School Medicine

Discipline General Medicine

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the prevalence and economic burden of diabetes
2. Explore the broader social determinants and the organisation of health service delivery that influence diabetes prevalence, diabetes self-management and health outcomes for individuals and community
3. Appraise the high incidence of diabetes and diabetes related complications amongst Indigenous Australians and the provision of culturally appropriate health care
4. Analyse the impact of public health, non-health policies, and the role of primary health care in reducing diabetes prevalence and its complications
5. Analyse primary, secondary and tertiary prevention in diabetes and the importance of the integrated approach at the macro, meso and micro levels.
6. Critically evaluate the central role of primary care, general practice and interventions that maximise service delivery effectiveness
7. Critically appraise evidence and practice through research and quality improvement activities

Subject Content

- Epidemiology of diabetes and social determinants of diabetes
- Primary Health Care and Primary Prevention
- Diabetes public policy
- Models of integrated person-centred diabetes care
- Integrated patient centred diabetes care -Provider focussed interventions
- Evidence based diabetes practice
- Workforce capability and scope of practice

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Presentation	30 minutes	30	N	Individual
Participation	400-600 words	25	N	Group
Critical Review	1400 words	30	N	Individual
Quiz	1 Hour	15	N	Individual

MEDI 7043 Diabetes in Paediatrics, Transition and Pregnancy

Credit Points 10

Legacy Code 401290

Coordinator Therese Fletcher ([https://directory.westernsydney.edu.au/search/name/Therese Fletcher/](https://directory.westernsydney.edu.au/search/name/Therese+Fletcher/))

Description The physical and psychosocial developmental stage and age of the person with diabetes directly impacts on diabetes self-management, diabetes care and quality of life. This specialised unit will explore diabetes in the context of physical, psychological and social development with a focus on children, young adults and pregnant women. Ongoing family, therapeutic and social relationships are central to optimising diabetes management. Family, friends, peers, healthcare providers/organisations role will be examined in the ongoing holistic care and self-management of diabetes and prevention of diabetes complications. Students will evaluate the physiological impact of diabetes, treatment and emerging technology in the management of diabetes such as insulin pump therapy and continuous blood glucose monitoring systems. Accessing and interpreting data for the overall management of diabetes will be undertaken in this unit.

School Medicine

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) MEDI 7039 AND
MEDI 7041 AND
MEDI 7040 AND
MEDI 7042

Restrictions

Students must be enrolled in the a postgraduate program with evidence of 12 month clinically relevant practice or substantial experience in working with people with diabetes.

Assumed Knowledge

Advanced knowledge in diabetes care and skills, Graduate Certificate in Diabetes.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the aetiology, pathophysiology and clinical management of Diabetes in children, young adults and pregnant women.
2. Utilise current guidelines in balancing nutritional, physical activity and medication requirements for children, young adults and pregnant women with different types of diabetes in optimising their health status and support diabetes self-management.
3. Assess the impact on diabetes management in relation to the physiological, psychological and social/cultural developmental stages across the life span.
4. Formulate a person-centred approach in planning care taking into account the developmental and life stages of individuals and families.
5. Consider the implication of using emerging technology and devices for children in the management of diabetes.

Subject Content

- Diabetes in children and young adults
- Diabetes in pregnancy
- Psychological and social/cultural impact of diabetes on children, young adults and pregnant women
- Emerging technology in the management of diabetes

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Teaching Periods

MEDI 7044 Diabetes in Primary Care

Credit Points 10

Legacy Code 401288

Coordinator David Simmons ([https://directory.westernsydney.edu.au/search/name/David Simmons/](https://directory.westernsydney.edu.au/search/name/David+Simmons/))

Description Most of the health care provided to people with diabetes is provided by general practice clinicians and multidisciplinary health care professionals in primary care. This unit will explore the core issues that arise in primary care relating to foundational aspects of care. The unit will comprise of Learning Pods/modules that enable students to choose and learn about areas of practice that are most relevant to their health discipline, context of care and gap in knowledge. There will be a compulsory Learning Pod/modules on primary prevention, secondary and tertiary prevention in primary care and the role of inter-professional integrated practice. Students will also be able to choose from the following diabetes related Learning Pods such as medication therapy, exercise therapy, nutrition therapy and podiatry, insulin pumps and continuous glucose monitoring sensors, cardiovascular and renal health, aged care in diabetes in primary care.

School Medicine

Discipline General Medicine

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in the a postgraduate program with evidence of 12 month clinically relevant practice or substantial experience in working with people with diabetes.

Assumed Knowledge

Advanced knowledge in diabetes care and education.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the concept and principles of primary, secondary and tertiary prevention for people with diabetes in primary care.
2. Individualise holistic management and education for people with diabetes when prescribing, titrating and monitoring one central approach (medication, nutritional, exercise, podiatric therapy)
3. Individualise holistic management and education for people with diabetes with complex needs.
4. Apply primary care strategies to overcome common barriers to self-management for people with diabetes in the context of their lives.

Subject Content

- Diabetes primary, secondary and tertiary prevention
- Inter-professional practice
- Diabetes Medication intensification
- Weight loss and nutrition
- Podiatry therapy
- Exercise therapy

Teaching Periods

MEDI 7045 Diabetes in the Hospital

Credit Points 10

Legacy Code 401289

Coordinator David Simmons ([https://directory.westernsydney.edu.au/search/name/David Simmons/](https://directory.westernsydney.edu.au/search/name/David%20Simmons/))

Description People with diabetes are more likely to be admitted to hospital, experience more complications, have longer length of stay and have higher mortality rates compare to people without diabetes. This unit will provide students with the skills and knowledge to optimise metabolic health in the complex care of i- patients with diabetes. The unit will examine the prevalence and economic costs of people with diabetes in hospitals and review current pathological hypotheses on why poor glycaemic control is associated with poorer inpatient health outcomes. Best practice management in inpatient diabetes care, treatment targets and medication intensification for patient in critical, noncritical, peri-operative, end of life will be analysed Clinical governance in providing safe quality diabetes care and organisation response will be included in this unit. An online inter-professional case based approached to learning will be the mode of delivery.

School Medicine

Discipline General Medicine

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in the a postgraduate program with evidence of 12 month clinically relevant practice or substantial experience in working with people with diabetes.

Assumed Knowledge

Advanced knowledge of diabetes pathophysiology and diabetes clinical care.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the prevalence and economic burden of patients with hyperglycaemia and diabetes in hospital.
2. Review current pathological hypotheses pertaining to the association of poor glycaemic control with poor inpatient health outcomes.
3. Justify the optimisation of blood glucose levels and the prevention and treatment of hypoglycaemia and hyperglycaemia in the care of inpatients with diabetes.
4. Apply evidence based diabetes inpatient management, treatment targets, nutrition and medication intensification in caring for inpatients with diabetes in critical, noncritical, peri-operative, end of life clinical contexts.
5. Evaluate the role of clinical governance and hospital wide systems in supporting safe and effective diabetes care.

Subject Content

Diabetes inpatient prevalence and health outcomes

Inpatient glycaemic targets

Hyperglycaemia and hyperglycaemia emergencies

Insulin pharmacology and best practice in inpatient prescribing and titrating

Hypoglycaemia and appropriate management

Inpatient diabetes education

Diabetes in patient care for critical, perioperative, end of life and mental health patients

Clinical governance, quality and safety

Teaching Periods

MEDI 7046 Advanced Gynaecological Surgery 1

Credit Points 10

Legacy Code 401317

Coordinator Harry Merkur ([https://directory.westernsydney.edu.au/search/name/Harry Merkur/](https://directory.westernsydney.edu.au/search/name/Harry%20Merkur/))

Description This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). This is a year long core subject in the Graduate Diploma in Advanced Gynaecological Surgery and Year 1 of the Master of Surgery (Advanced Gynaecological Surgery). This subject aims to allow students to discuss and reflect on a broad range of topics pertaining to Advanced Gynaecological Surgery with an emphasis on minimally invasive techniques. The pre-operative, intra-operative and post-operative management of patients and their conditions are considered with a review of the literature to substantiate and support any conclusions made which may help shape future clinical practice.

School Medicine

Discipline Obstetrics and Gynaecology

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4766 Graduate Diploma of Advanced Gynaecological Surgery or 4770 Master of Surgery (Advanced Gynaecological Surgery). All students are expected to have a knowledge base commensurate with a level of a Trainee or Specialist in Obstetrics & Gynaecology (RANZCOG or other accredited college) with satisfactory completion of RANZCOG written examination as per admission requirements.

Assumed Knowledge

All students are expected to have a knowledge base commensurate with a level of a Trainee or Specialist in Obstetrics & Gynaecology (RANZCOG or other accredited college) with satisfactory completion of RANZCOG written examination as per admission requirements.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Assess the pre-operative management where Gynaecological Surgery is contemplated
2. Critically analyse intra-operative surgical principles involved in performing Gynaecological Surgery, particularly focusing on minimally invasive techniques
3. Diagnose and manage complications, with particular reference to laparoscopic surgical methods utilised when returning to theatres
4. Evaluate the post-operative care to patients following gynaecological surgery
5. Appraise the medical literature to improve clinical judgment and gynaecological surgical competency
6. Employ a safe, caring and ethical approach in the practice of gynaecological surgery
7. Communicate effectively with patients, family and other health care professionals to convey outcomes and concerns in the professional practice of advanced gynaecological surgery

Subject Content

1. Pre-operative assessment of the patient's condition where surgery is an option for the patient
2. Surgical principles required to deal with the contemplated surgical problem, particularly focusing on minimally invasive techniques
3. Intra-operative surgical techniques used at operations to prevent complications with algorithms and pathways to clinically diagnose complications
4. Post-operative care used in Advanced Gynaecological Surgery, particularly in minimally invasive techniques
5. Literature review on proposed gynaecological surgical procedures, including ethical and safety frameworks

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

MEDI 7047 Advanced Gynaecological Surgery 2

Credit Points 10

Legacy Code 401318

Coordinator Harry Merkur (<https://directory.westernsydney.edu.au/search/name/HarryMerkur/>)

Description This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). This is a yearlong core subject in Year 2 of the Master of Surgery (Advanced Gynaecological Surgery) program. The student is expected to attain a comprehensive understanding and knowledge of the procedures performed in the management of Gynaecological Disorders where surgery is indicated. The ultimate aim is to become a competent surgeon in this field. This subject aims to build upon the knowledge gained from Advanced Gynaecological Surgery 1 to allow students to further discuss and reflect on a broad range of topics pertaining to Advanced Gynaecological Surgery with an emphasis on minimally invasive techniques. The theoretical aspects of teaching surgery is an important aspect in the development of competent surgeons. A review of teaching

techniques, including simulation is an area to be evaluated, appraised and developed. The pre-operative, intra-operative and post-operative management of patients and their conditions are considered with a critical review of the literature to substantiate and support any conclusions made which may help shape future clinical practice.

School Medicine

Discipline Obstetrics and Gynaecology

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) MEDI 7046

Co-requisite(s) MEDI 7050

Restrictions

Student must be enrolled in 4770 Master of Surgery (Advanced Gynaecological Surgery)

Assumed Knowledge

All students are expected to have a knowledge base commensurate with a level of an Advanced Trainee or Specialist in Obstetrics & Gynaecology (RANZCOG or other accredited college) and satisfactory completion of the Graduate Diploma in Advanced Gynaecological Surgery [ie, Year 1 of the Master of Surgery (Advanced Gynaecological Surgery) program].

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appraise the pre-operative management where Gynaecological Surgery is contemplated
2. Critically evaluate the intra-operative surgical principles involved in performing Gynaecological Surgery, particularly focusing on minimally invasive techniques
3. Effectively diagnose and manage complications, with particular reference to laparoscopic surgical methods utilised when returning to theatres
4. Critique the post-operative care to patients following gynaecological surgery
5. Conduct research reports on the practice of gynaecological surgery to empower continued self-improvement
6. Reflect on the practice of surgery and teaching strategies relevant to gynaecological surgery and their effectiveness
7. Execute safe, caring and ethical approaches to gynaecological surgery involving patients, family and other health care professionals in a clinical setting

Subject Content

1. Pre-operative assessment of the patient's condition where surgery is an option for the patient
2. Surgical principles required to deal with the contemplated surgical problem, particularly focusing on minimally invasive techniques
3. Intra-operative surgical techniques used at operations to prevent complications with algorithms and pathways to clinically diagnose complications
4. Post-operative care used in Advanced Gynaecological Surgery, particularly in minimally invasive techniques
5. Literature review on proposed gynaecological surgical procedures
6. Theoretical aspects of teaching gynaecological surgery

MEDI 7048 Advanced Imaging Research Project

Credit Points 20

Legacy Code 401330

Coordinator James Nol (<https://directory.westernsydney.edu.au/search/name/JamesNol/>)

Description In 2021 this unit replaced by 401467 - Medical Research Project (PG). This unit is an essential part of the final year of the Masters of Advanced Imaging (MRI). It will consolidate and build on the students' knowledge and skills gained in prior units. Students will design and conduct a research project from an area of inquiry relevant to Advanced Imaging - MRI. Successful completion of the unit results

in the composition of a report, and in an oral presentation which will include details of the aims, methods, results and conclusions of the project.

School Medicine

Discipline Radiology

Student Contribution Band HECS Band 3 20cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4767 Master Advanced Imaging (MRI) and have successfully completed 100 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the theories and real-life issues relevant to the use of Magnetic Resonance Imaging (MRI) in Australia.
2. Conduct a research project in the field of MRI.
3. Communicate the results of the project to peers and other health professionals in oral and written forms in a professional manner.
4. Reflect on own learning and professional development needs in MRI.
5. Effectively employ technology and self-directed learning strategies to enhance evidence-based practice and patient safety in the field of medical Imaging and MRI.

Subject Content

1. Research Proposal
2. Ethics
3. Research Protocol and Design
4. Data collection and measurement
5. Data analysis
6. Project Report

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Research Project Proposal	1,000 words	10	N	Individual
Oral Presentation	15 minutes	25	N	Individual
Research Report	4,000 words excluding references	65	N	Individual

Teaching Periods

MEDI 7049 Advanced MR Theory

Credit Points 10

Legacy Code 401324

Coordinator James Nol ([https://directory.westernsydney.edu.au/search/name/James Nol/](https://directory.westernsydney.edu.au/search/name/James%20Nol/))

Description This subject provides students with a detailed understanding of “MR Accessories, Image Quality and Contrast Media” employed in Magnetic Resonance Imaging (MRI) technology and the relationship between magnet and coil, the utilisation of the different channels for image formation and pixilation, as well as exploring the role contrast media plays in enhancing body organs. Students will have an in-depth understanding of interactive effects of scanning parameters on the image quality and how to prevent the formation of artefacts and reduce Specific Absorption Rate to improve image quality, reduce artefact, monitor and improve signal to signal to noise ratio and reduce heat generation to prevent harm of burns to the patient.

School Medicine

Discipline Radiology

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) MEDI 7057 MRI Physics

Restrictions

Students must be enrolled in 4767 Master of Advanced Imaging (MRI) or 4768 Graduate Diploma of Advanced Imaging (MRI)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the principles of Nuclear Magnetic Resonance and the process of Magnetic Resonance Imaging (MRI) signal acquisition
2. Apply MRI physics in clinical practice
3. Examine MRI parameters, image contrast and image formation
4. Evaluate pulse sequences and their applications to better respond to clinical indications
5. Optimise image resolution, Signal to Noise Ratio and scan time, to produce high-quality diagnostic images
6. Explore the origin of image artefact, measures applied to reduce artefact formation in images as well as preventing burns to a patient due to a specific absorption rate
7. Explore the causes of Signal to Noise Ratio deterioration and the methods to maximise relevant diagnostic data acquisition

Subject Content

1. MRI Physics in practice
2. MRI equipment relationship between the main unit and coil and channels
3. Differences in Pulsation artefacts, environmental effects and image visual artefacts and distortion
4. Contrast Media “composition and side effects
5. Image reconstruction include k-space concept, Fourier transformation, spatial frequency in image reconstruction
6. The interactive factors on image optimisation
7. The latest hardware and software technology in fast MR imaging

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

MEDI 7050 Advanced Practice in Gynaecological Surgery

Credit Points 5

Legacy Code 401314

Coordinator Harry Merkur ([https://directory.westernsydney.edu.au/search/name/Harry Merkur/](https://directory.westernsydney.edu.au/search/name/Harry%20Merkur/))

Description This is a 10 credit point year-long core subject taken over two terms (5 credit point in each term) in Year 2 of the Master of Surgery (Advanced Gynaecological Surgery) program. Students undertaking this subject are expected to apply advanced knowledge and skills in clinical settings in a safe and effective manner. There is a strong emphasis in reflecting and reviewing surgical cases based on clinical experience the student has gained at surgery. A review of the relevant medical literature and what changes are envisaged when performing this procedure into the future. This subject provides students with the opportunity to produce a detailed discussion on various aspects relating to pre-operative, intra-operative and post-operative gynaecological surgery and provide an evidence based approach. Ultimately, the aim is to improve the student's surgical skills and patient outcomes.

School Medicine

Discipline Obstetrics and Gynaecology

Student Contribution Band HECS Band 3 5cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) MEDI 7046

Co-requisite(s) MEDI 7047

Restrictions

students must be enrolled in 4770 Master of Surgery (Advanced Gynaecological Surgery)

Assumed Knowledge

All students are expected to have a knowledge base commensurate with a level of an Advanced Trainee or Specialist in Obstetrics & Gynaecology (RANZCOG or other accredited college) and satisfactory completion of the Graduate Diploma in Advanced Gynaecological

Surgery [ie, Year 1 of the Master of Surgery (Advanced Gynaecological Surgery) program].

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate surgical principles, techniques and technologies in advanced gynaecological surgery to perform surgery in a safe manner with a high level of confidence
2. Critically analyse aspects relating to pre-operative, intra-operative and post-operative gynaecological surgery to provide an evidence based approach
3. Evaluate the medical literature on various aspects of gynaecological surgery
4. Reflect on aspects of gynaecological surgery to improve surgical acumen and patient outcomes in future practice
5. Critically analyse clinical cases utilising an evidence based approach

Subject Content

1. Dissect components of gynaecological surgery based on the student's clinical exposure
2. Review clinical cases, including pre-operative surgical planning, surgical technique and recognition and management of surgical complications
3. Review of the medical literature on specific aspects of gynaecological surgery
4. Reflect on professional practice in aspects of gynaecological surgery to improve surgical acumen and patient outcomes

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

MEDI 7051 Evidence Based Imaging and Clinical Pathways

Credit Points 10

Legacy Code 401321

Coordinator James Nol ([https://directory.westernsydney.edu.au/search/name/James Nol/](https://directory.westernsydney.edu.au/search/name/James%20Nol/))

Description Evidence based imaging is a foundation tool that ensures patients are referred to pertinent modalities for tests of high sensitivity and specificity while fostering a cognisance to the harm of investigations such as the low sensitivity of certain modalities to certain investigations, radiation effects and the societal costs of the health budget. This core unit will enable health professionals with an understanding of the best evidence based diagnostic algorithm "pathway" for the different clinical presentations. In conjunction with the radiobiology unit, this will also equip clinicians with the knowledge to better evaluate the risk versus benefit for any examination requested.

School Medicine

Discipline Radiology

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) MEDI 7059

Restrictions

Must be enrolled in 4767 Master of Advanced Imaging (MRI), 4768 Graduate Diploma of Advanced Imaging (MRI) or 4769 Grad Certificate in Advanced Imaging (MRI)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the principles of evidence-based health care practice for the delivery of diagnostic imaging in the clinical context.
2. Develop a template algorithm for diagnostic imaging studies of the brain, spine, upper abdomen, pelvis, knee and shoulder.
3. Develop Algorithm Charts for different clinical indications.
4. Review ethical and safety frameworks in health care and their application to practical diagnostic referral issues.
5. Advocate Evidence Based Medicine practice for Imaging Pathways.
6. Identify the ideal clinical and diagnostic pathway best suited for a patient's condition.

Subject Content

1. Principles of evidence based medicine to Imaging.
2. Algorithm Charts to incorporate continuing change for diagnostic pathways.
3. Evaluation of current diagnostic Imaging pathways of different clinical presentations.
4. Ethical evaluation of the harm versus benefit of diagnostic imaging modalities.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Literature Review	1500 words	40	N	Individual
Professional Task	1500 words including charts, tables and figures x 8	40	N	Individual
Presentation	10 minutes + 1 Abstract	20	N	Individual

MEDI 7052 MR Angiography and Cardiac

Credit Points 10

Legacy Code 401329

Coordinator James Nol ([https://directory.westernsydney.edu.au/search/name/James Nol/](https://directory.westernsydney.edu.au/search/name/James%20Nol/))

Description The MR Angiography (MRA) and MR Cardiac (MRC) Imaging unit is a core unit in the course of Advanced Imaging (MRI). The unit provides students with in-depth knowledge of cardiac anatomy, the vascular system, and the relevant protocols to create MRI sequences for the anatomical regions of MRC and MRA in different clinical examinations. It is expected that students will develop the ability to recognise normal anatomy, identify common pathologies and be able to provide diagnostic solutions and/or develop new MRI algorithms for clinical problems. They will have the ability to either produce, request or recommend the proper sequence and the best method of operating the MRI equipment for the anatomical region in question. The unit is offered to students who completed the Graduate Diploma in Advanced Imaging (MRI) 4768, with a varied pathway for the clinical component relevant to their undergraduate discipline. Students will have 2 weeks of clinical training in an MRI clinical site.

School Medicine

Discipline Radiology

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) MEDI 7055 MR Neurology - Head Neck and Spinal Imaging
MEDI 7054 MR Musculoskeletal Imaging
MEDI 7053 MR Body and Pelvis Imaging

Restrictions

Students must be enrolled in 4767 Master of Advanced Imaging (MRI) and have successfully completed 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse sectional Magnetic Resonance –Cardiac (MRC) and Magnetic Resonance – Angiography (MRA) that can be produced on Magnetic Resonance Imaging (MRI) equipment.
2. Critique MRC and MRA scanning principles and their common applications for different clinical problems, and/or any proposed modification to suit individual patient's clinical needs.
3. Create departmental MRC and MRA Magnetic Resonance Imaging (MRI) protocols.
4. Propose new MRC and MRA imaging algorithm and techniques to peers and health professionals.
5. Review MRA and MRC clinical cases to provide image Interpretation with high-level diagnostic confidence.
6. Critique clinical and operational pathways focusing on efficiency, productivity and provision of access to patients to MRA and MRC imaging.
7. Reflect on clinical and operational pathways based on the MR Angiography and Cardiac imaging

Subject Content

1. Sectional cardiovascular anatomy: Heart, valves, major coronary vessels, systemic vasculature of head and neck, body and peripheral vascular structures.
2. Common pathology
3. Selection of appropriate sequences and imaging protocol setup.
4. The use of contrast medium, dosage, type and timing of image acquisition.
5. Contrast and non-contrast Magnetic Resonance –Cardiac (MRC) and Magnetic Resonance – Angiography (MRA) techniques.
6. Advanced Cardiac Imaging: T1 & T2 Mapping, Late Gadolinium Enhancement (LGE), Perfusion
7. Clinical Training via 3 different pathways

- Medical Officer – Image Interpretation and observation of practical work and Interaction with an MRI team.

- Medical MRI Practitioner – Hands on Practical training and basic Image interpretation.

- Allied Health – Interaction with the MRI Operations team, close observation of the operation and patient management and basic Image interpretation.

Special Requirements

Legislative pre-requisites

Note: Due to covid restriction, the Working with Children Check (WWCC) and Student Undertaking has been temporarily removed.

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history

- Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
- Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Case Study	1,500 words	30	N	Individual
Literature Review	2,000 words	30	N	Individual
Reflection	500 words each x 8	40	N	Individual

MEDI 7053 MR Body and Pelvis Imaging

Credit Points 10

Legacy Code 401327

Coordinator James Nol ([https://directory.westernsydney.edu.au/search/name/James Nol/](https://directory.westernsydney.edu.au/search/name/James%20Nol/))

Description MR Body and Pelvis Imaging is a core subject in the course of Advanced Imaging (MRI). The subject provides students with in-depth knowledge of Body and Pelvis anatomy and the relevant protocols to create Magnetic Resonance Imaging (MRI) sequences for the anatomical regions in the Thoracic, Abdominal and Pelvic Region for different clinical examinations. It is expected that students will develop the ability to recognise normal anatomy, identify common pathologies and be able to provide diagnostic solutions and/or develop new MRI algorithms for clinical problems. They will have the ability to either produce, request or recommend the proper sequence and the best method of operating the MRI equipment for the anatomical region in question. The subject is offered to all eligible students with a varied pathway for the two weeks clinical component relevant to their undergraduate discipline. Students will have 2 weeks of clinical training in an MRI clinical site.

School Medicine

Discipline Radiology

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) MEDI 7051 AND
MEDI 7049

Restrictions

Successful completion of 60 credit points and Students must be enrolled in 4767 Master of Advanced Imaging (MRI) or 4768 Graduate Diploma of Advanced Imaging (MRI).

Learning Outcomes

On successful completion of this subject, students should be able to:

- Critically examine sectional chest, abdominal and pelvic anatomy that can be produced on Magnetic Resonance Imaging (MRI) equipment
- Critique chest, abdominal and pelvic scanning principles and their common applications for different clinical problems
- Set up the departmental chest, abdominal and pelvis MRI protocols
- Present new Body and Pelvis imaging algorithm and techniques to peers and health professionals
- Critique the use of the different equipment design for body and pelvis imaging and the different MR frequencies required to achieve the best outcome for the patient
- Review image interpretation cases and analyse operation and technical setup to achieve high-level diagnostic confidence during clinical placement
- Reflect on clinical and operational pathways based on the MR Body and Pelvis imaging

Subject Content

- Anatomy of neck, chest, and torso, including chest wall and ribs, Magnetic Resonance (MR) mediastinum and pulmonary Angiography (MRPA), liver, kidney, adrenal, Magnetic Resonance Cholangiopancreatography (MRCP), small bowel and appendix imaging; female pelvis and prostate.
- Common pathology.
- Selection of appropriate sequences and imaging protocol setup.
- Contrast and non-contrast Body and Pelvis imaging techniques.
- Clinical Training via 3 different pathways.

- Medical Officer - Image Interpretation and observation of practical work and Interaction with an MRI team.
- Medical Radiation Practitioner - Hands on Practical training and basic Image interpretation.
- Allied Health - Interaction with the MRI Operations team, close observation of the operation and patient management and basic Image interpretation.

MEDI 7057 MRI Physics

Restrictions

Students must be enrolled in 4767 Master of Advanced Imaging (MRI) or 4768 Graduate Diploma of Advanced Imaging (MRI).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine sectional neuro-anatomy that can be produced on Magnetic Resonance Imaging (MRI) equipment
2. Critique Neurology scanning principles and their common applications for different clinical problems
3. Set up departmental neurology MRI protocols
4. Present new MRI imaging algorithm and techniques to peers and health professionals
5. Critique the use of the different equipment design for MRI imaging and the different MR frequencies required to achieve the best outcome for the patient
6. Review Neurology cases to provide image Interpretation with high-level diagnostic confidence
7. Critique Clinical and Operational pathways focusing on efficiency, productivity and provision of access to patients to neurology imaging

Subject Content

1. Anatomy of head, neck and spine to include spinal and plexuses scan, head scan, cranial nerve imaging, orbits and optic nerve, internal auditory meatus, sinuses, pituitary, skull base, temporal seizure protocol, temporomandibular joint, brain tumour imaging
2. Common pathology
3. Selection of appropriate sequences and imaging protocol setup.
4. The use of contrast medium, dosage, type and timing of image acquisition relevant to Head, Neck and Spinal Imaging.
5. Clinical Training via 3 different pathways:

- a. Medical Officer – Image Interpretation and observation of practical work and Interaction with an MRI team.
- b. Medical MRI Practitioner – Hands on Practical training and basic Image interpretation.
- c. Allied Health – Interaction with the MRI Operations team, close observation of the operation and patient management and basic Image interpretation.

Special Requirements

Legislative pre-requisites

Note: Due to covid restriction, the Working with Children Check (WWCC) and Student Undertaking has been temporarily removed.

All Students

To be eligible to enrol in a subject and attend a NSW- located health-related placement in your program, students must meet Western Sydney University program requirements **and** Special Legislative Requirements to be assessed early in their second year of part-time study against the following:

1. National Criminal History Check: Students must have a current (expiring 4 years from date of issue) check valid for their entire program. A valid National Criminal history check must be an Australia wide check, include the student's full name matching their Student ID card and date of birth and not have any offences listed. If a student has a criminal history identified on their check, they must provide a Clinical Placement Authority Card (CPAC) or conditional letter from the NSW HealthShare Employment Screening and Review Unit.

https://www.health.nsw.gov.au/careers/student_clearance/Documents/appendix-10-student-application.pdf

International students must additionally have a translated International Police Check or statutory declaration.

2. A NSW Working with Children Check (WWCC) clearance letter issued under the category of volunteer valid for their entire course.

3. A current approved first aid certificate valid for their entire course, approved provider courses can be found at

<http://training.gov.au>

4. A completed vaccination/immunisation card with all serology results containing expiry dates and currency must be maintained by the student to ensure compliance for their entire program.

5. NSW Undertaking/Declaration form.

6. Completed any additional health forms required (such as NSW Health Code of Conduct, Health Student Undertaking/Declaration and Tuberculosis (TB) Assessment Tool).

7. Relevant Local Health District specific documentation as requested. Contact your School for further details. Resources are also available on the Placement Hub (https://www.westernsydney.edu.au/placements_hub/placements_hub/student_compliance/) website.

Where Clinical training is in a private setting, the special requirements may differ from public institutions; students will need to comply with requirements identified by their training organisation. Training for some students outside of NSW will be as per the state based requirements.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

MEDI 7056 MR Screening

Credit Points 10

Legacy Code 401328

Coordinator James Nol ([https://directory.westernsydney.edu.au/search/name/James Nol/](https://directory.westernsydney.edu.au/search/name/James%20Nol/))

Description MR Screening is a core subject in the program of Advanced Imaging. Magnetic Resonance (MR) Screening tests are essential to categorise patients' conditions for faster and reliable patient management. In a real clinical environment, less than 10 per cent of MR Screening patients will need to go for a full Magnetic Resonance Imaging (MRI) examination. This subject will provide students with a detailed understanding of the rationale and principles of setting up

MR Screening protocols. It will demonstrate the determinant criteria for the setup of the screening protocols in collaboration with the referring clinical team. Students will learn to create research programs to validate the effectiveness of the screening protocols. Students will develop the ability to recognise normal anatomy, normal variants, identify common pathologies and be able to provide diagnostic solutions and/or develop new MRI algorithms for clinical problems. They will have the ability to either produce, request or recommend the proper sequence and the best method of operating the MRI equipment for the anatomical region in question. The subject is offered to students who completed the Graduate Diploma in Advanced Imaging (MRI) 4768, with a varied pathway for the clinical component relevant to their undergraduate discipline. Students will have 2 weeks of clinical training in an MRI clinical site.

School Medicine

Discipline Radiology

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) MEDI 7055 MR Neurology - Head Neck and Spinal Imaging
MEDI 7054 MR Musculoskeletal Imaging
MEDI 7053 MR Body and Pelvis Imaging

Restrictions

Successful completion of 80 credit points and students must be enrolled in 4767 Master of Advanced Imaging (MRI).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique the rationale for setting up Magnetic Resonance (MR) screening protocols and the pros and cons of the screening protocol
2. Create effective MR Screening protocols to provide confident diagnostic outcomes without the lengthy scan time
3. Evaluate the safety requirement of a dedicated "Multiposition" MRI room in comparison with a traditional "Bore" technology
4. Streamline workflow and patient centred care to facilitate Open Access to dedicated MR screening protocols
5. Explore future research projects to add to the list of MR Screening tests in collaboration with specialists from different clinical specialities
6. Employ a reflective approach to recommend and establish an MR screening protocol based on the patient condition mentally, physically and clinically during clinical placements
7. Review MR Screening cases to provide image Interpretation with a high-level of diagnostic confidence

Subject Content

1. Rationale and principles for setting up screening protocols of: Brain Stroke, Appendix, Musculoskeletal, Renal Colic, Biliary Colic, Prostate, Breast Screen.
2. Advanced anatomy and normal variants as well as identifying the anatomy of abnormal organs and the different pathologies associated with different pathologies.
3. Pros and cons of Magnetic Resonance Imaging ('MR' or 'MRI') screening tests.
4. MR screening protocol setup guidelines
5. Research a program to validate the effectiveness of the screening protocol to additional clinical indications.

6. The relationship between Evidence Based Imaging and MRI.
7. Clinical Training via 3 different pathways

- Medical Officer – Image Interpretation and observation of practical work and Interaction with an MRI team.
- Medical MRI Practitioner – Hands on Practical training and basic Image interpretation.
- Allied Health – Interaction with the MRI Operations team, close observation of the operation and patient management and basic Image interpretation.

Special Requirements

Legislative pre-requisites

Note: Due to covid restriction, the Working with Children Check (WWCC) and Student Undertaking has been temporarily removed.

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements

- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Applied Project	1,500 words	30	N	Individual
Literature Review	2,500 words	30	N	Individual
Reflection	500 words each	40	N	Individual

MEDI 7057 MRI Physics

Credit Points 10

Legacy Code 401323

Coordinator James Nol ([https://directory.westernsydney.edu.au/search/name/James Nol/](https://directory.westernsydney.edu.au/search/name/James%20Nol/))

Description This unit provides the students with a detailed understanding of the design of the different Magnetic Resonance Imaging (MRI) Scanners. Differences in Electromagnets and Superconducting magnets; production of the magnetic field; radiofrequency (RF) energy; the physics behind pulse sequence absorption of RF Energy and MR Property of Protons are explored. This unit briefly explains their application and how they interrelate with essential accessories such as coils to form an image. The unit also explores the various forms of image contrast that can be obtained using MRI, along with various basic and intermediate MRI pulse sequences and image reconstruction techniques. Students will learn the factors that may cause artefact formation, image quality concerns, and an understanding of the noise producing factors. It also focuses on

the safety requirements, and the serious consequences if proper safety procedures are not implemented and followed.

School Medicine

Discipline Radiology

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4767 Master of Advanced Imaging (MRI), 4768 Graduate Diploma of Advanced Imaging (MRI) or 4769 Grad Certificate in Advanced Imaging (MRI)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse Magnetic Resonance Imaging (MRI) Physics, characteristics of the different equipment and the role of the accessories required to form an image.
2. Employ magnetic resonance imaging as the primary diagnostic tool for the production of safe, and reliable diagnostic images.
3. Explore maintenance requirement for the different MRI designs.
4. Explore the different design of magnetic resonance imaging that employs patient-friendly and safer technology.
5. Analyse safety measures to protect MRI equipment, patients and staff.

Subject Content

Magnetic Resonance (MR) Radiofrequency, Equipment Design and Safety.

1. Principles of Magnetic Resonance Imaging (MRI) Physics and basic electromagnetism.
2. Principle of MR image formation, from proton spin signal to final image requisition.
3. Different configurations and designs of MRI equipment.
4. Maintenance ? what parts require (or may require) regular maintenance.
5. Frequencies and methods of production of the magnetic field.
6. MRI Safety Guidelines.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Reflection	500 words each (Reflective Journal x 8)	40	N	Individual
Applied Project	1500 words	40	N	Individual
Literature Review	1000 words	20	N	Individual

MEDI 7058 Multi-sectional and 3D Human Anatomy

Credit Points 10

Legacy Code 401320

Coordinator James Nol ([https://directory.westernsydney.edu.au/search/name/James Nol/](https://directory.westernsydney.edu.au/search/name/James%20Nol/))

Description This subject includes detailed 3D high resolution multi-sectional anatomy of the human body. Learning human anatomy in a 3D high resolution platform will enable students to conceptualise biological organs in 3D. Students will develop the ability to differentiate between normal and abnormal anatomy as well as understanding the demographics of pathological lesions in their daily clinical works. Delivered online, students will have opportunities to interact with medical imaging specialists as well as other subspecialists, such as surgeons, neurologists, and Emergency Specialists.

School Medicine

Discipline Radiology

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4767 Master of Advanced Imaging (MRI), 4768 Graduate Diploma of Advanced Imaging (MRI) or 4769 Grad Certificate in Advanced Imaging (MRI)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine high resolution theoretical and practical 3D anatomy.
2. Examine high resolution 3D Advanced Imaging cross-sectional anatomy.
3. Analyse the most appropriate anatomical planes for commonly investigated structures.

Subject Content

1. Differentiation between 2D and 3D anatomy.
2. Cross-sectional 3D anatomy of human body, which includes head, spine, neck, chest, Abdomen and pelvis, upper and lower extremities.
3. Illustration of anatomical structures in their common scanned planes
4. Reconstructed 3D imaging in 2D and 3D interactive platforms

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Reflection	500 words x10	50	N	Individual
Applied Project	2,000 words	30	N	Individual
Presentation	15 minutes	20	N	Individual

MEDI 7059 Radiobiology

Credit Points 10

Legacy Code 401322

Coordinator James Nol ([https://directory.westernsydney.edu.au/search/name/James Nol/](https://directory.westernsydney.edu.au/search/name/James%20Nol/))

Description This subject provides a specialised study of the Characteristics and Properties of Radiation Chemistry, Structure of Matter, Chemical Behaviour, Ionisation and Excitation, as well as in-depth study of the effects of exposure to ionising radiation on biological systems from the cellular level to systemic effects. The topics of the unit will be focused on the biological response to irradiation which will be considered from the perspective of susceptibility versus resistance for the purposes of radiation protection in medical, occupational and environmental exposures to radioactivity. There will be specialist lectures by radiobiology and/or radiotherapy experts during the unit.

School Medicine

Discipline Radiology

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) MEDI 7058

Restrictions

Students must be enrolled in 4767 Master of Advanced Imaging (MRI), 4768 Graduate Diploma of Advanced Imaging (MRI) or 4769 Grad Certificate in Advanced Imaging (MRI)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the characteristics of the different levels of radiofrequencies and their interaction with matter to identify the difference between ionisation and the excitation of cells
2. Analyse the biological effects of radiation at a cellular and systemic level to assess the risks and benefits of exposure to radiation
3. Analyse the differences in response for healthy and mutagenic cells and the stages of destabilising of molecular structure and cancer formation

4. Assess stochastic and non-stochastic effects of exposure to low level of radiation from medical, occupational and environmental exposure to radiation
5. Communicate the significance of the assessment to a non-specialist audience
6. Determine the proper radiation and risk measurement tools and unit and the illegitimacy of frequented risk assessment tools.

Subject Content

1. Fundamentals of radiofrequency physics.
2. Physiology of excitable and ionisable cells.
3. Biological effects of radiation on the human body and genome.
4. Stochastic and non-stochastic effects of low levels of radiation.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Reflection	500 words minimum each x 8	40	N	Individual
Case Study	2,000 words	20	N	Individual
Literature Review	2,500 words	25	N	Group
Presentation	20 minutes	15	N	Individual

MEDI 7060 Adnexal Surgery

Credit Points 10

Legacy Code 401319

Coordinator Harry Merkur ([https://directory.westernsydney.edu.au/search/name/Harry Merkur/](https://directory.westernsydney.edu.au/search/name/Harry%20Merkur/))

Description This is an alternate unit in Year 2 of the Master of Surgery (Advanced Gynaecological Surgery) course. The performance of Adnexal Surgery and the ability to avoid complications is paramount in order to produce a safe environment for the patient. The ability to diagnose and successfully manage complications, should they occur, is a necessary part of every surgeon's makeup. The preoperative assessment of adnexal masses is to be considered, with data provided to help avoid the inadvertent operation on malignant lesions by the generalist. This unit will allow the student to explore various aspects of adnexal surgery and review evidence in the literature to support any conclusions made by the student.

School Medicine

Discipline Obstetrics and Gynaecology

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) MEDI 7046

Equivalent Subjects MEDI 7018 Laparoscopic Adnexal Surgery

Restrictions

Students must be enrolled in 4766 Graduate Diploma of Advanced Gynaecological Surgery or 4770 Master of Surgery (Advanced Gynaecological Surgery)

Assumed Knowledge

All students are expected to have a knowledge base commensurate with a level of an Advanced Trainee or Specialist in Obstetrics & Gynaecology (RANZCOG or other accredited college) and satisfactory completion of the Graduate Diploma in Advanced Gynaecological Surgery [ie, Year 1 of the Master of Surgery (Advanced Gynaecological Surgery) program].

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate surgical principles involved in performing Adnexal Surgery, focusing on minimally invasive techniques including strategies for specimen removal
2. Diagnose and manage complications, with particular reference to laparoscopic surgical methods utilised when returning to theatres
3. Evaluate various approaches to Adnexal Surgery including the benefits and limitations of each technique
4. Critically appraise the evidence, with an emphasis on strategies to avoid inadvertent operations on malignant lesions
5. Reflect on aspects of Adnexal Surgery in gynaecological surgery to enhance professional practice

Subject Content

1. Surgical principles of Adnexal Surgery, particularly focusing on minimally invasive techniques
2. Surgical techniques used in minimally invasive surgery to prevent complications including the need for laparotomy.
3. Literature review on Adnexal Surgical procedures with emphasis on strategies to avoid inadvertent operations on malignant lesions

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Applied Project	Total 5,000 words: 1a. Literature Review 4,000 words (SLOs 1, 3, 4); 1b. Reflection ~1,000 words (SLOs 2, 5)	100	N	Individual

MEDI 7061 Hysterectomy

Credit Points 10

Legacy Code 401315

Coordinator Harry Merkur ([https://directory.westernsydney.edu.au/search/name/Harry Merkur/](https://directory.westernsydney.edu.au/search/name/Harry%20Merkur/))

Description This is an alternate unit in Year 2 of the Master of Surgery (Advanced Gynaecological Surgery) course. Students undertaking this unit will be expected to explore aspects of hysterectomy through various approaches in different clinical and pathological settings. This unit will enhance their ability to develop a foundation for improving their skills and achieving competency at hysterectomy, particularly utilising minimally invasive techniques. This unit will allow students to explore the rationale behind decisions to perform a hysterectomy, the nuances of surgical techniques used in a safe manner. It will allow an appreciation of the pre-operative and post-operative issues to ensure optimal patient outcomes.

School Medicine

Discipline Obstetrics and Gynaecology

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) MEDI 7046

Equivalent Subjects MEDI 7019 Laparoscopic Hysterectomy

Restrictions

Students must be enrolled in 4770 Master of Surgery (Advanced Gynaecological Surgery) or 4690 Master of Surgery in Advanced Gynaecological Surgery

Assumed Knowledge

All students are expected to have a knowledge base commensurate with a level of an Advanced Trainee or Specialist in Obstetrics & Gynaecology (RANZCOG or other accredited college) and satisfactory completion of the Graduate Diploma in Advanced Gynaecological Surgery [ie, Year 1 of the Master of Surgery (Advanced Gynaecological Surgery) program].

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate surgical principles involved in performing hysterectomy, particularly focusing on minimally invasive techniques.
2. Effectively diagnose and manage surgical complications with respect to hysterectomy
3. Critically assess important factors in pre-operative and post-operative care when performing hysterectomy
4. Critically review the medical literature on hysterectomy techniques and strategies to minimise and manage complications

Subject Content

1. Surgical principles of hysterectomy, particularly focusing on minimally invasive techniques
2. Surgical techniques used at hysterectomy to prevent complications
3. Pre-operative and post-operative issues relevant to hysterectomy
4. Review the medical literature on hysterectomy techniques and strategies to minimise and manage complications

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

MEDI 7062 Pelvic Floor Surgery

Credit Points 10

Legacy Code 401316

Coordinator Harry Merkur (https://directory.westernsydney.edu.au/search/name/Harry_Merkur/)

Description This is an alternate unit in Year 2 of the Master of Surgery (Advanced Gynaecological Surgery) course. This unit provides the student with in depth knowledge of procedures to treat pelvic floor disorders. The performance of Pelvic Floor Surgery and the ability to avoid complications is paramount in order to produce a safe environment for the patient. This unit will allow the student to explore and critically appraise various aspects of Pelvic Floor Surgery and utilise the evidence in the literature to support any conclusions made.

School Medicine

Discipline Obstetrics and Gynaecology

Student Contribution Band HECS Band 3 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) MEDI 7046

Equivalent Subjects MEDI 7024 Pelvic Floor Function and Dysfunction

Restrictions

Students must be enrolled in 4770 Master of Surgery (Advanced Gynaecological Surgery) or 4690 Master of Surgery in Advanced Gynaecological Surgery

Assumed Knowledge

All students are expected to have a knowledge base commensurate with a level of an Advanced Trainee or Specialist in Obstetrics & Gynaecology (RANZCOG or other accredited college) and satisfactory completion of the Graduate Diploma in Advanced Gynaecological Surgery [i.e., Year 1 of the Master of Surgery (Advanced Gynaecological Surgery) program].

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Review surgical principles involved in performing Pelvic Floor Surgery, particularly focusing on minimally invasive techniques
2. Effectively diagnose and manage complications related to Pelvic Floor Surgery
3. Assess factors responsible for prolapse and urinary incontinence
4. Evaluate procedures used to avoid and treat recurrence
5. Critically appraise the literature to improve clinical judgment and surgical competency
6. Reflect on theoretical and practical aspects of Pelvic Floor Surgery to enhance professional practice

Subject Content

1. Surgical principles of Pelvic Floor Surgery, particularly focusing on minimally invasive techniques
2. Surgical techniques used at Pelvic Floor Surgery to prevent complications.
3. Procedures used in prolapse and urinary incontinence
4. Literature review on prolapse and urinary incontinence procedures

Assessment

MEDI 7063 Applied Clinical Sciences 2

Credit Points 40

Legacy Code 401279

Coordinator Stephen Tobin ([https://directory.westernsydney.edu.au/search/name/Stephen Tobin/](https://directory.westernsydney.edu.au/search/name/Stephen%20Tobin/))

Description This is a 80 credit point year-long subject taken over two terms (40 credit points in each term). Applied Clinical Sciences 2 covers the second clinical year of the Doctor of Medicine. Students apply and extend on clinical knowledge and skills learned in previous subjects. Students engage in clinical and community placements to develop professional competencies. Placements may be held in hospitals and community-based service organisations in the Greater Western Sydney area, or as rural placements in Bathurst or Lismore. Students enrolled in this subject must complete each of the subject's theoretical modules and each compulsory attachment module which corresponds with the student's allocated placement site rotations. Students will also continue to work through the MD Scholarly Project. Note: The professional practice students undertake in this subject is a minimum of 1225 hours (subject to location- based placement availability) Travel and accommodation - Students are required to arrange and pay for their own travel, accommodation and living expenses for the duration of the placement.

School Medicine

Discipline General Medicine

Student Contribution Band HECS Band 3 40cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) MEDI 3006

Incompatible Subjects MEDI 4001 - Integrated Clinical Sciences 2
MEDI 7006 - Applied Clinical Sciences 2
MEDI 7027 - Professional Portfolio 4

Restrictions

Students must be enrolled in program 4758 Doctor of Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Patient Care: Provides patient centred care at all stages of care, from pre-pregnancy to end of life
2. Health in the Community: Promotes the health and wellbeing of individuals and populations, with particular focus on Greater Western Sydney, rural, regional and Aboriginal and Torres Strait Islander communities
3. Personal & professional development: Evaluates and continuously develops own personal and professional capabilities, and those of others.
4. Scientific basis of medicine: Applies a sound understanding of the biomedical, psychological and social sciences to medical practice.

Subject Content

Theoretical Modules:

- Professional and Personal Development 2
- Scientific Streams 2 - Oncology, Neurology, Genetics, Growth and development
- Professional Portfolio 2
- Conference weeks - 2
- Attachment modules aligned to each student's clinical rotations

Special Requirements

Legislative pre-requisites

Students are required to obtain and provide all necessary documentation to be verified by NSW ClinConnect. This verification is a requirement of the NSW Health Department for all students enrolled in medical programs. If a student fails to produce this documentation to ClinConnect they will not be able to attend hospital and health service teaching sessions, and placements. Attendance is a mandatory requirement of the program to ensure that professional competencies are met. Failure to attend will result in a Fail grade for the subject.

All Students

To be eligible to enrol in and attend a health-related placement in your program, students must meet Western Sydney University requirements **and** Special Legislative Requirements to be assessed in their first year of study against the following:

1. National Criminal History Check: Students must have a current check valid for their entire program. Criminal history check must be an Australia wide check, include the student's full name matching their Student ID card and date of birth offences listed. If a student has a criminal history identified on their check, they must provide a Clinical Placement Authority Card (CPAC from the NSW HealthShare Employment Screening and Review Unit:https://www.health.nsw.gov.au/careers/student_clearance/Documents/appendix-10-student-application.pdf)

International students must additionally have a translated International Police Check or statutory declaration.

2. A NSW Working with Children Check (WWCC) clearance letter issued under the category of volunteer valid for their entire program.
3. A current approved first aid certificate valid for their entire program, approved provider courses can be found at <http://training.gov.au>
4. A completed vaccination/immunisation card with all serology results containing expiry dates and currency must be maintained by the compliance for their entire program.

5. NSW Undertaking/Declaration form.

6. Completed any additional health forms required (such as NSW Health Code of Conduct, Health Student Undertaking/Declaration and Assessment Tool).

7. Relevant Local Health District specific documentation as requested. Contact your School for further details. Resources are also available on the Placement Hub (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/) website.

Inherent Requirements

Students must also meet the inherent requirements of the program as outlined in the Western Sydney University Inherent Requirements for Medicine:

(www.uws.edu.au/ir/inherent_requirements/inherent_requirements_for_medicine_courses/)
([https://hbook.westernsydney.edu.au/subject-details/medi7063/\(www.uws.edu.au/ir/inherent_requirements/inherent_requirements_for_medicine_courses/\)](https://hbook.westernsydney.edu.au/subject-details/medi7063/(www.uws.edu.au/ir/inherent_requirements/inherent_requirements_for_medicine_courses/)))

Inherent requirements are personal capabilities which are essential for achieving the learning outcomes of the Program or Subject in a way that will preserve the integrity of the University's teaching, learning and assessment standards and the accreditation requirements for the program. The Disability Education Standard, Section 3.4 (3) states:

"In assessing whether an adjustment to the course, unit of the course or program in which the student is enrolled, or proposes to be enrolled, is reasonable, the provider is entitled to maintain the academic requirements of the course or program, and other requirements or components that are inherent in or essential to its nature. Note: In providing for students with disabilities, a provider may continue to ensure the integrity of its courses or programs and assessment requirements and processes, so that those on whom it confers an award can present themselves as having the appropriate knowledge, experience and expertise implicit in the holding of that particular award."

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

MEDI 7064 Applied Clinical Sciences 3

Credit Points 40

Legacy Code 401280

Coordinator Neil Merrett ([https://directory.westernsydney.edu.au/search/name/Neil Merrett/](https://directory.westernsydney.edu.au/search/name/Neil%20Merrett/))

Description During Applied Clinical Sciences 3 students will complete clinical attachments from the pool of clinical rotations (General Medicine 2 or 3, Surgery 2 or 3, General Practice, Aboriginal Health, Critical Care, Paediatrics, Obstetrics and Gynaecology, Mental Health and Oncology) which they did not undertake during enrolment in unit 401279 'Applied Clinical Science 2'. Placements may be held across a range of hospitals and community-based services and organisations in Greater Western Sydney, Bathurst or Lismore. The learning and assessment requirements of each rotation are consistent across training sites. This learning is underpinned by the theoretical modules Professional and Personal Development 3', 'Professional Portfolio 3' and 'Scientific Streams 3'. Students will also prepare for barrier exams and continue their MD Scholarly Project. Experiential learning is supported by campus, clinical school and online activities designed to prepare students for clinical practice as a graduate doctor. Note: The professional practice students undertake in this unit is a minimum of 525 hours (subject to location-based placement availability) Note: Travel and accommodation - Students are required to arrange and pay for their own travel, accommodation and living expenses whilst on clinical placement.

Students must be enrolled in program 4758 - Doctor of Medicine.

Assumed Knowledge

Medical science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Patient Care: Provides patient centred care at all stages of care, from pre-pregnancy to end of life
2. Health in the Community: Promotes the health and wellbeing of individuals and populations, with particular focus on Greater Western Sydney, rural, regional and Aboriginal and Torres Strait Islander communities
3. Personal and professional development: Evaluates and continuously develops own personal and professional capabilities, and those of others
4. Scientific basis of medicine: Applies a sound understanding of the biomedical, psychological and social sciences to medical practice

Subject Content

1. Theoretical Modules

- Professional and Personal Development 3.

- Scientific Streams 3

- Addiction

- Trauma and Injury

- Professional Portfolio 3

2. Attachment Modules

3. MD Scholarly Project Year 5

4. 2 x Conference weeks

Special Requirements

Legislative pre-requisites

Students are required to obtain and provide all necessary documentation to be verified by NSW ClinConnect. This verification is a requirement of the NSW Health Department for all students enrolled in medical programs. If a student fails to produce this documentation to ClinConnect they will not be able to attend hospital and health service teaching sessions, and placements. Attendance is a mandatory requirement of the program to ensure that professional competencies are met. Failure to attend will result in a Fail grade for the subject.

All Students

To be eligible to enrol in and attend a health-related placement in your program, students must meet Western Sydney University requirements **and** Special Legislative Requirements to be assessed in their first year of study against the following:

1. National Criminal History Check: Students must have a current check valid for their entire program. Criminal history check must be an Australia wide check, include the student's full name matching their Student ID card and date of birth offences listed. If a student has a criminal history identified on their check, they

must provide a Clinical Placement Authority Card (CPAC from the NSW HealthShare Employment Screening and Review Unit: https://www.health.nsw.gov.au/careers/student_clearance/Documents/appendix-10-student-application.pdf)

International students must additionally have a translated International Police Check or statutory declaration.

2. A NSW Working with Children Check (WWCC) clearance letter issued under the category of volunteer valid for their entire program.

3. A current approved first aid certificate valid for their entire program, approved provider courses can be found at <http://training.gov.au>

4. A completed vaccination/immunisation card with all serology results containing expiry dates and currency must be maintained by the compliance for their entire program.

5. NSW Undertaking/Declaration form.

6. Completed any additional health forms required (such as NSW Health Code of Conduct, Health Student Undertaking/Declaration and Assessment Tool).

7. Relevant Local Health District specific documentation as requested. Contact your School for further details. Resources are also available on the Placement Hub (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/) website.

Inherent Requirements

Students must also meet the inherent requirements of the program as outlined in the Western Sydney University Inherent Requirements for Medicine:

(www.uws.edu.au/ir/inherent_requirements/inherent_requirements_for_medicine_courses) ([https://hbook.westernsydney.edu.au/subject-details/medi7064/\(www.uws.edu.au/ir/inherent_requirements/inherent_requirements_for_medicine_courses\)](https://hbook.westernsydney.edu.au/subject-details/medi7064/(www.uws.edu.au/ir/inherent_requirements/inherent_requirements_for_medicine_courses)))

Inherent requirements are personal capabilities which are essential for achieving the learning outcomes of the Program or Subject in a way that will preserve the integrity of the University's teaching, learning and assessment standards and the accreditation requirements for the program. The Disability Education Standard, Section 3.4 (3) states:

"In assessing whether an adjustment to the course, unit of the course or program in which the student is enrolled, or proposes to be enrolled, is reasonable, the provider is entitled to maintain the academic requirements of the course or program, and other requirements or components that are inherent in or essential to its nature. Note: In providing for students with disabilities, a provider may continue to ensure the integrity of its courses or programs and assessment requirements and processes, so that those on whom it confers an award can present themselves as having the appropriate knowledge, experience and expertise implicit in the holding of that particular award."

Legacy Code 401281

Coordinator Neil Merrett ([https://directory.westernsydney.edu.au/search/name/Neil Merrett/](https://directory.westernsydney.edu.au/search/name/Neil%20Merrett/))

Description This capstone experience unit will engage students in professional practice placement rotations drawn from the integrated fields of General Medicine, Surgery, Critical Care, Aboriginal and Torres Strait Islander People's Health and General Practice. Depending on rotations already taken, and the meeting of minimum clinical training hours requirements of the course, students may have the opportunity for an elective rotation. Students will complete their study in scientific streams, professional and personal development and finalise their Professional Practice Portfolio and MD Scholarly Project. The professional practice students undertaken in Medicine in Practice is approximately 700 hours. (subject to location based placement availability). Travel and accommodation - Students are required to arrange and pay for their own travel, accommodation and living expenses whilst on clinical placement.

Credit Points 20

Legacy Code 401467

Coordinator Andrew Page ([https://directory.westernsydney.edu.au/search/name/Andrew Page/](https://directory.westernsydney.edu.au/search/name/Andrew%20Page/))

Description This capstone unit requires students to design and conduct a research-based project in an area of interest or discipline specialty in consultation with the Unit Coordinator and relevant Program Coordinator.

School Medicine

Discipline Medical Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 3 20cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) HLTH 7008

Equivalent Subjects RAD1 7010 - Research Project in Cardiac Sonography
MEDI 7048 - Advanced Imaging Research Project
NURS 7042 - Research Project in Health Care

Restrictions

Students must be enrolled in a postgraduate program at Western Sydney University.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design and conduct a research-based project addressing a contemporary area of interest
2. Employ initiative and responsibility in the execution of a research-based project
3. Compose a project report utilising high quality academic writing skills
4. Deliver an oral presentation of project findings

Subject Content

Project design and ethical considerations
Data collection and measurement
Data analysis
Report writing
Composing a research report
Preparing a research presentation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Proposal	1,000 words	15	N	Individual
Presentation	20 minutes	20	N	Individual
Report	5,000 words	65	N	Individual

MEDI 7067 Cytopathology, Small Biopsy and Breast Pathology

Credit Points 10

Legacy Code 401477

Coordinator Tristan Rutland ([https://directory.westernsydney.edu.au/search/name/Tristan Rutland/](https://directory.westernsydney.edu.au/search/name/Tristan%20Rutland/))

Description This subject introduces diagnostic entities in surgical pathology entities gastrointestinal and liver, breast, head and neck, paediatric, gynaecological and haemato-pathology. The unit provides training in basic research skills, communication skills, and critical thinking. The self-directed online learning module is composed of digitalized images, practical notes, recorded lectures and quizzes on the diagnostic approach to important pathological entities of the breast pathology.

School Medicine

Discipline Pathology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects MEDI 7014 - Cytopathology and Small Biopsy Pathology 2

Restrictions

Students must be enrolled in 4750 Masters of Medicine (Pathology).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate advanced diagnostic entities of non-gynaecological and gynaecological cytopathology and small biopsies.
2. Assess diagnostic entities in surgical pathology in the subspecialty of breast pathology.
3. Critique the resources needed and technical requirements to reach the correct diagnosis in Breast Pathology.
4. Effectively disseminate research outcomes using highly developed communication skills.

Subject Content

Advanced non-gynaecological cytopathology
Advanced gynaecological cytopathology
Advanced small biopsy pathology
Breast pathology

Special Requirements

Legislative pre-requisites

Students need to meet the legislative requirements to be in a supervised specialist training role in Pathology, and hence be working clinically in a hospital/laboratory setting. If a student fails to meet these requirements they will not be allowed to enrol in the subject.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical Exam	2 hours	30	Y	Individual
Practical Exam	2 hours	30	Y	Individual
Case Study	20 cases ~50-100 words each	40	Y	Individual

MEDI 7068 Cytopathology, Small Biopsy and Cardiorespiratory Pathology

Credit Points 10

Legacy Code 401473

Coordinator Tristan Rutland ([https://directory.westernsydney.edu.au/search/name/Tristan Rutland/](https://directory.westernsydney.edu.au/search/name/Tristan%20Rutland/))

Description This unit uses a blended learning approach to introduce diagnostic entities in surgical pathology entities of neuropathology, cardiorespiratory pathology, genito-urinary pathology, salivary gland and endocrine pathology, skin and soft tissue pathology. The unit provides training in basic research skills, communication skills, and critical thinking. The self-directed online learning module is composed of digitalized images, practical notes, recorded lectures and quizzes on the diagnostic approach to important pathological entities of the respiratory and cardiovascular systems.

School Medicine

Discipline Pathology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects MEDI 7013 - Cytopathology and Small Biopsy Pathology 1

Restrictions

Students must be enrolled in 4750 Masters of Medicine (Pathology).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse diagnostic entities in both non-gynaecological and gynaecological cytopathology.
2. Examine small biopsies particularly relating to surgical pathology of the cardiorespiratory system to reach a diagnosis.
3. Justify relevant information regarding pathological findings using evidence-based approach.
4. Communicate key findings in a written report regarding surgical and cytopathology.

Subject Content

Non-gynaecological cytopathology
Gynaecological cytopathology
Small biopsy pathology
Cardiorespiratory systems pathology

Special Requirements

Legislative pre-requisites

Students need to meet the legislative requirements to be in a supervised specialist training role in Pathology, and hence be working clinically in a hospital/laboratory setting. If a student fails to meet these requirements they will not be allowed to enrol in the subject.

MEDI 7070 General Surgical and Central Nervous System Pathology

Credit Points 10

Legacy Code 401472

Coordinator Tristan Rutland ([https://directory.westernsydney.edu.au/search/name/Tristan Rutland/](https://directory.westernsydney.edu.au/search/name/Tristan%20Rutland/))

Description This unit uses a blended learning approach to introduce diagnostic entities in surgical pathology entities of neuropathology, cardiorespiratory pathology, genito-urinary pathology, salivary gland and endocrine pathology, skin and soft tissue pathology. The unit provides training in basic research skills, communication skills, and critical thinking. The self-directed online learning module is composed of digitalized images, practical notes, recorded lectures and quizzes on the diagnostic approach to important pathological entities of the central nervous system and spinal cord.

School Medicine

Discipline Pathology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects MEDI 7032 - Surgical Pathology 1

Restrictions

Students must be enrolled in 4750 Masters of Medicine (Pathology) postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine diagnostic entities in surgical pathology in the subspecialties of neuropathology, cardiorespiratory pathology, genito-urinary pathology, salivary gland and endocrine pathology, skin and soft tissue pathology.
2. Examine ancillary techniques in the diagnosis and treatment of conditions within the subspecialties of neuropathology, cardiorespiratory pathology, genito-urinary pathology, salivary gland and endocrine pathology, skin and soft tissue pathology.
3. Analyse important common and uncommon disease entities in Neuropathology, including a number of non-neoplastic, benign and malignant diagnoses.
4. Define the resources needed and technical requirements to reach the correct diagnosis.
5. Produce a diagnostic case study report to the professional standard required of a pathologist.

Subject Content

This subject covers the following organ systems:

Neuropathology
 Cardiorespiratory system pathology
 Genito-urinary tract pathology
 Salivary gland pathology
 Endocrine system pathology
 Skin pathology
 Soft tissue pathology

Students will be required to generate 10 case studies relevant to the above systems, which will include completing a review of the relevant literature, interpretation and application to diagnosis.

Special Requirements

Legislative pre-requisites

Students need to meet the legislative requirements to be in a supervised specialist training role in Pathology, and hence be working

clinically in a hospital/laboratory setting. If a student fails to meet these requirements they will not be allowed to enrol in the subject.

On successful completion of this subject, students should be able to:

- Examine and interpret diagnostic entities in surgical pathology in the subspecialties of genito-urinary pathology, salivary gland and endocrine pathology
- Identify and apply appropriate ancillary techniques in the diagnosis and treatment of conditions within the subspecialties of genito-urinary pathology, salivary gland and endocrine pathology
- Identify common and uncommon disease entities in genitourinary pathology, salivary gland and endocrine pathology, including the diagnosis of non-neoplastic, benign and malignant entities
- Define the resources and technical requirements needed to reach the correct diagnosis in genitourinary pathology, salivary gland and endocrine pathology
- Produce a written report that communicates surgical and cytopathology diagnostic findings
- Exemplify the behaviour required to create a safe, caring, ethical and professional practice required by pathologists

Subject Content

Genito-urinary tract pathology

Salivary gland pathology

Endocrine system pathology

Special Requirements

Legislative pre-requisites

Students need to meet the legislative requirements to be in a supervised specialist training role in Pathology, and hence be working clinically in a hospital/laboratory setting. If a student fails to meet these requirements they will not be allowed to enrol in the subject.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Genito- Urinary Pathology Diagnostic Case Studies (Online task)	20 cases ~300-500 words each	S/U	Y	Individual
Salivary Gland and Endocrine Pathology Diagnostic Case Studies (Online task)	20 cases ~300-500 words each	S/U	Y	Individual
Essay	1,500 word limit	50	Y	Individual
Histopathology Case Reports	10 cases ~300-500 words each	50	Y	Individual

Prescribed Texts

Teaching Periods

MEDI 7074 Surgical Pathology of the Head and Neck, Haematopathology and Paediatric Pathology

Credit Points 10

Legacy Code 401478

Coordinator Tristan Rutland ([https://directory.westernsydney.edu.au/search/name/Tristan Rutland/](https://directory.westernsydney.edu.au/search/name/Tristan%20Rutland/))

Description This unit will re-inforce the diagnostic entities in haematopathology, head and neck, and paediatric pathology that were introduced in Surgical Pathology IV. Two self-directed online learning modules with digitalized images and practical notes on the diagnostic approach to important pathological entities of the above sub-specialties will be provided. Upon completion of the unit students will have advanced knowledge in surgical, cyto- and small biopsy pathology, including appropriate ancillary techniques and recent research developments. This unit will promote behaviours that create a safe, caring, ethical and professional practice required by pathologists.

School Medicine

Discipline Pathology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects MEDI 7036 - Cytopathology and Small Biopsy Pathology 5

Restrictions

Students must be enrolled in 4750 Masters of Medicine (Pathology).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine and interpret advanced diagnostic entities in surgical pathology in the subspecialties of haematopathology, head and neck, and paediatric pathology, including a number of non-neoplastic, benign and malignant diagnoses
2. Define the resources and technical requirements needed to reach the correct diagnosis in haematopathology, head and neck, and paediatric pathology
3. Apply basic research skills to identify and describe pathological entities encountered in the professional practice of pathology
4. Reflect on the behaviour required to create a safe, caring, ethical and professional practice required by pathologists

Subject Content

Head and neck pathology
Paediatric pathology
Haematopathology

Special Requirements Legislative Prerequisites

Students need to meet the legislative requirements to be in a supervised specialist training role in Pathology, and hence be working clinically in a hospital/laboratory setting. If a student fails to meet these requirements they will not be allowed to enrol in the unit.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Case Study	20 cases ~300-500 words each	S/U	Y	Individual
Case Study	20 cases ~300-500 words each	S/U	Y	Individual
Essay	1,500 word limit	50	Y	Individual
Report	10 cases ~300-500 words each	50	Y	Individual

Medicine in Practice

Credit Points 40

Legacy Code 401264

Coordinator Neil Merrett ([https://directory.westernsydney.edu.au/search/name/Neil Merrett/](https://directory.westernsydney.edu.au/search/name/Neil%20Merrett/))

Description Medicine in Practice is the final clinical unit of the MD program during which you will confirm and consolidate your knowledge, skills and professional competencies in readiness for graduate practice. Immersion in clinical and community placements continues, and you will act, under supervision, as a junior doctor member of the healthcare team where it is considered safe to do so. Placements include Medicine, Surgery, General Practice, Aboriginal Health and Critical Care rotations in a wide range of healthcare settings, from tertiary hospitals to community based services and practices in Greater Western Sydney. Learning and assessment requirements do not differ across sites. This experiential learning is supported by campus,

clinical school and online activities, including seminars, workshops and modules to ensure readiness for graduate practice.

School Medicine

Discipline General Medicine

Student Contribution Band HECS Band 3 40cp

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Provides patient centred care at all stages of care, from pre-pregnancy to end of life
2. Promotes the health and wellbeing of individuals and populations, with particular focus on Greater Western Sydney, rural, regional and Aboriginal and Torres Strait Islander communities
3. Evaluates and continuously develops own personal and professional capabilities, and those of others
4. Applies a sound understanding of the biomedical, psychological and social sciences to medical practice

Subject Content

The major specialties and subspecialties of Medicine, Surgery, General Practice, Aboriginal Health and Critical Care are covered in Applied Clinical Sciences 3 through a combination of clinical and community based placements, campus and clinical school lectures, workshops and tutorials. Topics covered in these specialties include the following

1- Patient care

- o Diagnosis and investigation of problems and presentations in General Medicine, Surgery, General Practice, Aboriginal Health and Critical Care
- o Formulation and implementation (under supervision) of patient centred management plans

- o Prescribing medications and other therapeutic agents

- o Application and evaluation of clinical and procedural skills

2. Health in the Community

- o Health care systems and services

- o Advocacy for disease prevention and health promotion

3. Scientific Basis of Medicine

- o Appraisal, application and evaluation of evidence to clinical problems

- o Application of the biomedical, psychological and social sciences to medical and health problems and presentations

- o Conducting Research

4. Professional and Personal Development

- o Ethical practice

- o Multidisciplinary teamwork and communication

- o Learning and teaching in clinical environments

- o Safety and quality in clinical settings

Teaching Periods

MGMT 1001 Introduction to Property

Credit Points 10

Legacy Code 200601

Coordinator Mohamad Zraika ([https://directory.westernsydney.edu.au/search/name/Mohamad Zraika/](https://directory.westernsydney.edu.au/search/name/Mohamad%20Zraika/))

Description Introduction to Property comprises six main topic areas. The first section covers the various professions within the property industry with particular emphasis on the valuation profession. The second section covers land law and legal concepts concerning

property. The third section addresses issues in property development controls and planning. The fourth section concentrates on the areas of academic and industry report writing. This section also addresses the areas of academic study, lecture procedures and examination technique. The fifth section covers topics in relation to residential valuation and introduces methodologies for valuing more advanced properties as well as the skills required for collecting data for valuation purposes. The sixth section introduces students to mathematics required for later valuation units.

MGMT 1002 Principles of Valuation

Credit Points 10

Legacy Code 200602

Coordinator Sharon Yam ([https://directory.westernsydney.edu.au/search/name/Sharon Yam/](https://directory.westernsydney.edu.au/search/name/Sharon%20Yam/))

Description This unit covers five main topic areas. The first area covers various valuation methods and extends the students' knowledge in relation to industrial property valuation. The second area covers the hypothetical development method of valuation as well as strata valuation principles. The third area introduces the valuation of partial interests and advanced valuation mathematics. The fourth area provides an introduction to statutory valuation, rating and taxing of property. The last area introduces the students to commercial property valuation.

School Business

Discipline Valuation

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects LGYC 1564 - Principles of Valuation

Restrictions

External offerings for this subject are only available to students who are enrolled in a Property program or field of study.

Assumed Knowledge

Students undertaking this subject should have a sound knowledge of the property industry and an understanding of introductory financial mathematics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the concepts of valuation and apply various valuation methods, including hypothetical development and Discounted Cash Flow;
2. Collect, analyse and apply data in relation to the valuation of industrial property;
3. Explain partial interests in real property and apply the appropriate method to value them;

4. Apply advanced valuation mathematics using financial calculators and computers;
5. Describe strata subdivision of real property and apply the appropriate method to value these properties;
6. Prepare statutory and taxation valuation at federal, state and local levels;
7. Apply client communication and risk management skills in the context of valuation instructions to avoid issues of professional negligence.

Subject Content

- valuation methods
- valuation of industrial properties
- advanced valuation mathematical concepts
- financial valuation concepts
- introduction to statutory and taxation valuations
- Strata property principles and valuation
- Negligence, Risk and ethics

Assessment

Coordinator Mohamad Zraika ([https://directory.westernsydney.edu.au/search/name/Mohamad Zraika/](https://directory.westernsydney.edu.au/search/name/Mohamad%20Zraika/))

Description This unit provides students with a comprehensive understanding of theory and practice of commercial valuation. All aspects of commercial valuation are covered, including commercial valuation reporting standard of the Australian Property Institute. Knowledge of land use planning, property economics and property investment are applied to commercial valuation in this unit.

School Business

Discipline Valuation

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects LGYC 1565 - Commercial Valuation

Restrictions External offerings for this subject are only available to students who are enrolled in a Property program or field of study.

Assumed Knowledge

Good conceptual knowledge of property valuation methodology and valuation mathematics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Collect, analyse and apply data to the valuation of commercial land and buildings;
2. Identify and assess the risk factors in retail and commercial property investments;
3. Apply the requirements of the Australian Property Institute commercial valuation practice standards and guideline notes in commercial valuation;
4. Apply the due diligence process in relation to commercial property valuation;
5. Apply the principles and practice of commercial property valuation.

Subject Content

- commercial property market analysis
- commercial property as An investment Asset
- commercial valuation methodology, including capitalisation and DCF in detail
- Rent reviews and premium valuation
- Insurance valuation concepts
- retail valuations
- Due diligence and valuation Reporting Standards

Assessment

MGMT 3002 Rural Valuation

Credit Points 10

Legacy Code 200605

Coordinator Peter Wills ([https://directory.westernsydney.edu.au/search/name/Peter Wills/](https://directory.westernsydney.edu.au/search/name/Peter%20Wills/))

Description To provide students with a full understanding of rural land/property valuation procedures and techniques. This includes being aware of those factors, inherent and external, that need to be taken into account when assessing different types of rural property holdings. To be aware of those environmental factors that affect rural land productivity, sustainability and end value.

School Business

Discipline Valuation

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYC 1567 - Rural Valuation

Restrictions External offerings for this subject are only available to students who are enrolled in a Property program or Major.

Assumed Knowledge

Students undertaking this subject should have a good understanding of valuation principles. It is also expected that they will understand land tenure systems, collection and analysis of property sales data and technical valuation report writing.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand the principles of rural land tenure and title in New South Wales and how it operates in different agricultural regions;
2. Be aware of those factors that affect and impact on the productivity and value of rural property and enterprises;
3. Identify relevant rural data sources, then collate and analyse such data;
4. Appreciate the impact of the added value concept of rural improvements and the impact that farm management practices have on overall value;
5. Demonstrate a detailed knowledge of the different valuation methods and then apply these to varying rural properties and enterprises;
6. Be aware of the ANZPI Professional Practice Standard in relation to rural valuation report writing;
7. Show an understanding of the impact that environmental and sustainability aspects have on rural enterprises and land values;
8. Realise the differing types of specialised rural land uses and understand what factors have to be taken into account when valuing them.

Subject Content

- rural land in Australia and rural valuation research
- NSW agriculture regions and rural land use
- Factors affecting rural land Productivity and value
- rural property data sources
- rural improvements
- The impact of farm management on rural valuation practice
- valuation methods
- rural property valuation inspection procedure
- rural sales analysis
- rural valuation reports
- valuation calculations and reconciliation
- valuation of specific rural properties

Teaching Periods

MGMT 3003 Specialised Valuation

Credit Points 10

Legacy Code 200876

Coordinator Mohamad Zraika ([https://directory.westernsydney.edu.au/search/name/Mohamad Zraika/](https://directory.westernsydney.edu.au/search/name/Mohamad%20Zraika/))

Description The value of special premises constitutes an important segment of valuation practice in Australia. A number of special valuation considerations arise in the appraisal of this class of premises. However, the most compelling reason for studying the valuation of special premises is the fact that these classes of property provide an ideal vehicle whereby valuation principles and methods of valuation can be critically evaluated by students.

School Business

Discipline Valuation

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYC 1566 Valuation of Special Premises MGMT 3005 Valuation of Special Premises

Restrictions External offerings for this subject are only available to students who are enrolled in a Property program or field of study.

Assumed Knowledge

It is assumed that students will have a sound knowledge of:

1. Valuation principles and practices
2. Accounting principles
3. Commercial property practices
4. Property investment analysis and application
5. Property portfolio analysis

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Outline the nature of specialised property types and their use.
2. Identify property type characteristics and their relationship to productivity, profitability and management.
3. Describe the factors which cause depreciation, obsolescence and alternative use of special premises improvements.
4. Analyse the ramifications of contamination and environmental issues on the operation and management of special premises.
5. Apply a range of valuation techniques and data analysis pertinent to the various classes of special premises.
6. Utilise basic principles to develop procedures for undertaking comprehensive valuations of any specialised property and preparation of industry standard  full speaking  narrative reports.

Subject Content

1. Nature of special premises and valuation methods.
2. Accounting issues and professional liability in relation to special premises.
3. Super profit, going concerns and goodwill issues.
4. Plant and machinery valuations.
5. Specialist valuation reports and reconciling evidence.
6. Valuation considerations including good average management in relation to specialised uses.
7. Valuation of special premises and limited market properties (such as both public and accommodation hotels, motels, nursing homes, retirement villages, extractive industries, resorts, marinas, service stations etc.).

MGMT 3004 Statutory Valuation

Credit Points 10

Legacy Code 200711

Coordinator Sharon Yam ([https://directory.westernsydney.edu.au/search/name/Sharon Yam/](https://directory.westernsydney.edu.au/search/name/Sharon%20Yam/))

Description This unit covers the area of statutory valuation. It is the prescribed unit for registration as a valuer with the NSW Fair Trading. It is also the prescribed unit for Certified Practising Valuer (CPV) membership of the Australian Property Institute. Upon completion of this unit, students will demonstrate a comprehensive understanding of the relevant property and related laws, necessary valuation methods and principles required for statutory valuations.

School Business

Discipline Valuation

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 4819 - Compulsory Acquisition and Litigation

Restrictions External offerings for this subject are only available to students who are enrolled in a Property program or field of study.

Assumed Knowledge

An understanding of the basic principles of land administration, in particular, the various interests to be held in land and forms of tenure; An understanding of the NSW planning system, the development approval process and administrative controls over decision making; An understanding of various valuation principles and methodologies and valuation of various types of property and interest in land.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the principles of property and related laws and valuation methods related to compensation and resumption;
2. Explain the process of land acquisition or resumption, and the concepts of market value, special value to the owner, injurious affection, severance, enhancement, disturbance and a loss of goodwill;
3. Apply the important court decisions in compensation valuation;
4. Prepare a professional standard report on a parcel of real estate for the purpose of a claim for compulsory acquisition;

5. Discuss the role of expert witnesses or a legal representative in compensation disputes;
6. Apply legal and valuation concepts in assessing the compensation payable on a compulsory taking;
7. Explain the importance and responsibility of acting professionally as a valuer.

Subject Content

- compensation concepts for compulsory acquisition of property
- valuation procedures in handling compensation cases
- principles and valuation methods for rating and taxing valuation
- valuation report writing
- preparation of evidence for court
- professional Negligence

MKTG 0001 Marketing Skills

Credit Points 10

Legacy Code 201035

Coordinator Jess Richards (<https://directory.westernsydney.edu.au/search/name/Jess Richards/>)

Description This subject delivers an overview of the marketing process and how it works within the business environment. Students will learn the basic foundations of marketing so they have a general understanding of marketing concepts. Students who successfully pass this subject, will have achieved some of the required assessments needed to satisfy English entry requirements (IELTS 6.5) to postgraduate Business study at Western Sydney University.

School Business

Discipline Marketing

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 0 Preparatory subject

Restrictions

Students must be enrolled in 2845 Masters Qualifying Program with Business English.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify important marketing concepts and frameworks;
2. Apply marketing concepts and frameworks to case based situations;
3. Demonstrate how marketing creates value in a societal context; and
4. Demonstrate English language skills in the key IELTS test areas: writing, speaking, listening and reading.

Subject Content

- Marketing concepts and terminology
- Market segmentation and target markets
- Buyer behaviour
- Marketing as a social system

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Report	1,500 Words	40	N	Individual
Portfolio	1000 Words equivalency	40	N	Individual
Final Exam	1 hour	20	Y	Individual

MKTG 1003 Consumer Behaviour

Credit Points 10

Legacy Code 200084

Coordinator Francine Garlin ([https://directory.westernsydney.edu.au/search/name/Francine Garlin/](https://directory.westernsydney.edu.au/search/name/Francine%20Garlin/))

Description From 2022 this subject replaced by MKTG 2010 Customer Experience Fundamentals. A focus on the consumer is critical in marketing philosophy. Effective marketing strategies are necessarily formulated as a result of the understanding of basic consumer behaviour. The aim of the unit Consumer Behaviour is to introduce students to consumer behaviour as a critical component in marketing philosophy, and fundamental to the development of effective marketing strategies. This unit applies concepts, theories and models derived from disciplines such as sociology, anthropology, psychology, economics, and mass communications theory to a consumer context. Students will learn to apply such concepts, theories and models through a range of individual and collaborative means using a blended learning design that draws on current and future consumer trends in various marketplaces.

School Business

Discipline Marketing

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects LGYA 9902 - Consumer Behaviour LGYC 0177 - Buyer Behaviour MKTG 1004 Consumer Behaviour

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate understanding of key consumer behaviour theories, concepts, models and frameworks;
2. Apply relevant theory to explain consumer behaviour in the marketplace/space;
3. Discern how consumer behaviour informs marketing practices;
4. Explain the relevance of Australia's First People in a consumer behaviour and marketing context;
5. Explain the importance of social, economic and environmentally responsible consumer behaviour and marketing practice;
6. Collaborate effectively in teams.

Subject Content

- Overview of Consumer behaviour
- introduction to theory
- external, social influences of culture, sub-culture, social class and non-family and family groups (reference groups) and lifestyle
- The diffusion of innovations
- Internal, psychological influences of involvement, motivation, learning and Memory, perception and information-processing, attitude formation and change, personality, self-concept, emotion
- Situational influences
- The Consumer decision-making process involving: Problem Recognition, information search, Evaluating alternatives, purchase and post-purchase behaviour
- consumerism, ethics, public policy
- future Trends in Consumer behaviour
- Marketing implications of Consumer behaviour including, but not limited to: market research, segmentation, Marketing strategy, planning and evaluation, and Marketing decisions relating to Product, promotion, place and price

MKTG 1006 Marketing Principles

Credit Points 10

Legacy Code 200083

Coordinator Daniela Spanjaard ([https://directory.westernsydney.edu.au/search/name/Daniela Spanjaard/](https://directory.westernsydney.edu.au/search/name/Daniela%20Spanjaard/))

Description Marketing Principles is an introductory marketing course that delivers an overview of the marketing process and how it works within the field of business. This unit examines how organisations use marketing decisions to satisfy customer needs and deliver value, with a focus on the impact of digital technology. Areas of study include market segmentation and positioning; product decisions and branding; customer decision processes, omnichannel marketing; digital marketing communications; pricing strategies; and customer insights. The unit provides a foundation for those students in the marketing major; however, it also provides a broad overview for those who seek a general understanding of marketing practice and theory.

School Business

Discipline Marketing

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects MKTG 1008 - Marketing Principles (UWSC) MKTG 1007 - Marketing Principles (Creative Industries)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify important marketing concepts, frameworks and theories.
2. Apply marketing concepts, theories and frameworks to different case situations.
3. Recognise the importance of customer relationships within marketing situations
4. Demonstrate how marketing creates value in a societal context and for non-profit organisations.

Subject Content

1. Marketing concepts and terminology
2. Understanding the market and marketing channels
3. Marketing research and customer insights.
4. Market segmentation and target markets.
5. Customer behaviour
6. Designing marketing mix strategies.
7. Digital communications

Assessment

MKTG 1009 Public Relations Theory and Practice

Credit Points 10

Legacy Code 100212

Coordinator Nicole Bridges ([https://directory.westernsydney.edu.au/search/name/Nicole Bridges/](https://directory.westernsydney.edu.au/search/name/Nicole%20Bridges/))

Description This unit introduces the student to the theory and research that serves as the foundation of the practice of public relations. The unit surveys the history of the discipline, the theories on which the discipline is based, and current models of practice. The unit

focuses on understanding how to research and analyse the opinions of organisational publics in order to develop mutually beneficial relationships with those publics. The contemporary practice of public relations requires an understanding of a broad range of social science theory and research and the ability to incorporate that knowledge in the solution of public relations problems.

School Humanities & Comm Arts

Discipline Public Relations

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects LGYB 0099 - Public Relations Theory and Practice
MKTG 1010 - Public Relations Theory and Practice (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. explain relevant public relations concepts, theories and contexts;
2. describe and critique current practices of the public relations industry;
3. identify and critically assess current issues for public relations practice;
4. explain the value of socially responsible, ethical public relations practice;
5. identify the legal implications for public relations activities;
6. describe and identify publics for public relations clients, issues and activities.

Subject Content

- introduction to strategic public relations: Understanding relationships with publics. Situational theory of publics.

- public relations principles, concepts and contexts: Models of public relations practice. public relations as A communication process. historical, social, economic and political contexts for public relations practice. public relations and social responsibility.

- The public relations industry. different sectors: corporate, consultancy, not-for-profit and public. Global industry challenges.

- The public relations professional: Roles and responsibilities. legal Issues affecting public relations practice. Ethics. industry associations.

- Introduction to public relations strategies and techniques: Media relations and publicity; understanding the nature of news and media needs.

MKTG 2001 Advertising: Creative

Credit Points 10

Legacy Code 100552

Coordinator John Greig ([https://directory.westernsydney.edu.au/search/name/John Greig/](https://directory.westernsydney.edu.au/search/name/John%20Greig/))

Description This is a practice-oriented unit designed to teach students how to conceive and produce original and effective advertising to meet strategic goals. From interpretation of a brief, to creating and evaluating concepts, and presenting campaigns, the course aims to mirror real processes within the advertising industry.

School Humanities & Comm Arts

Discipline Advertising

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) MKTG 1001

Learning Outcomes

On successful completion of this subject, students should be able to:

- engage meaningfully in the 'creative process' of advertising, integrating image, word, and other elements into effective advertising concepts, across a range of media
- continually improve on their ideas. Collaboration, and critical self and peer evaluation are key to this process.
- apply a variety of approaches to idea generation and development, in order to identify techniques and processes which maximize students' own potential.
- explain many of the unique and differing issues involved in creating effective concepts for different media and audiences
- create a number of advertising concepts within a common campaign theme, as the foundation for effective brand building
- explain a range of fundamental executional terms and issues, and typical processes involved in the production of advertising concepts
- present a portfolio which showcases, professionally and clearly, a range of advertising concepts
- apply presentation skills which clearly communicate creative concepts

Subject Content

The brief as a tool; how to interpret/interrogate it
Different approaches to the creative process and concept development
Working with visuals and copy
Characteristics of different media - what works, what doesn't & why
Campaigns - 'characteristics and elements of big ideas' in brand-building
Evaluation and criticism
Presentation & production - overview of processes

MKTG 2002 Incubator 1: Innovation and Creativity for Entrepreneurship

Credit Points 10

Legacy Code 301165

Coordinator Anton Bogdanovych ([https://directory.westernsydney.edu.au/search/name/Anton Bogdanovych/](https://directory.westernsydney.edu.au/search/name/Anton%20Bogdanovych/))

Description From time to time we hear stories about successful multi-million (or billion) dollar companies that started in a suburban garage. Is it that simple? The heart of the success of entrepreneurship is innovation and creativity. This unit explores the ways innovative ideas for a product or service can be turned into a successful start-up business. As such, this unit will cover topics including, but not limited to: factors essential for being able to initiate a creative idea, what is innovation, stages of developing a conceptual idea. The unit will be delivered through a number of modules. As an integral part of the unit, students are expected to engage and work in "start-up co-working space" on a regular basis. At the successful completion of this unit, students would have some possible start-up options that could be further explored into creating that multi-million (or billion) dollar company.

School Computer, Data & Math Sciences

Discipline Project Management

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the key drivers behind innovation and creativity
2. Identify commercialisation opportunities out of innovation
3. Utilise a creative process to develop a product concept
4. Explain the importance of applying a suitable model for the start up

5. Unpack innovative business models and business strategies
6. Demonstrate effective verbal and written communication skills that appeal to a wide audience
7. Apply individual skills and knowledge in a collaborative and effective manner in achieving a common goal in a group setting

Subject Content

Creativity and design thinking

The relationship between creativity and entrepreneurship

Innovation and creative process.

Commercialisation, understanding the market & identifying emerging opportunities

Environmental, political, cultural, financial, and organisational forces behind innovation.

Creative principles behind new venture creation.

Models for entrepreneurship

Innovative business models and business strategies

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Case Study	1,500 words	30	N	Individual
Professional Task	3,000 words	50	N	Individual
Presentation	20 mins	20	N	Group

MKTG 2003 Incubator 3: Product Development

Credit Points 10

Legacy Code 301168

Coordinator Anton Bogdanovych ([https://directory.westernsydney.edu.au/search/name/Anton Bogdanovych/](https://directory.westernsydney.edu.au/search/name/Anton%20Bogdanovych/))

Description A creative spark or innovative idea is not enough to succeed as a start-up organisation. A new idea behind a product or a service needs to be first verified to understand the business opportunities out there. Then the identified opportunities need to be adjusted to formalise in a business concept. This unit aims to guide students through that process of converting the creative or innovative idea into the development of a product or service as a sound business concept. This objective is driven through teams of students advancing with their practical projects and along the way learning about a number of theoretical topics such as: prototyping, user testing, etc. The unit will be delivered through a number of modules. As a vital part of the unit, students are expected to engage and work in "start-up co-working

space" on a regular basis. At the successful completion of this unit, students would have converted the innovative idea into a business product or service.

School Computer, Data & Math Sciences

Discipline Marketing

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Follow through the steps associated with product development
2. Test the product for any issues
3. Resolve any product issues by applying iterative development approach
4. Develop initial marketing material for product promotion
5. Apply individual skills and knowledge in a collaborative and effective manner in achieving a common goal in a group setting
6. Demonstrate effective verbal and written communication skills that appeal to a wide audience

Subject Content

- 1) Interplay between product, service and system aspects of product design
- 2) Developing the product prototype utilising technological skills
- 3) Testing and refinement of a product
- 4) Creative problem-solving in product development
- 5) Marketing material development that promotes the product

Assessment

MKTG 2004 International Marketing Research

Credit Points 10

Legacy Code 200374

Coordinator Aila Khan ([https://directory.westernsydney.edu.au/search/name/Aila Khan/](https://directory.westernsydney.edu.au/search/name/Aila%20Khan/))

Description This unit aims to provide students with tools to undertake and critically evaluate simple international marketing research projects. It covers basic marketing research concepts and statistical techniques with emphasis on the impact of the international environment in conducting both primary and secondary data research.

School Business

Discipline Marketing

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) MATH 1030 AND
MKTG 1006 AND
BUSM 1015

Assumed Knowledge

An understanding of the basic principles of marketing, international business and statistics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the information needs of international marketing managers;
2. Evaluate and access secondary sources of information about international trade and foreign markets;
3. Assess and apply relevant research concepts, tools and techniques;
4. Use a statistical package to analyse survey data;
5. Formulate and implement research designs that are appropriate for specific international marketing research problems;
6. Use research results to solve international marketing problems.

Subject Content

- marketing research in a global environment
- international marketing research process
- secondary data research in international marketing
- international marketing research design issues
- survey research
- scale development and questionnaire design for multi-country surveys
- sampling
- basic data analysis
- basic statistical techniques
- application of statistical techniques using SPSS
- interpretation of data analysis results
- report writing

Teaching Periods

MKTG 2005 Issues, Risk and Crisis Communication

Credit Points 10

Legacy Code 102064

Coordinator Misty Mcphail ([https://directory.westernsydney.edu.au/search/name/Misty Mcphail/](https://directory.westernsydney.edu.au/search/name/Misty%20Mcphail/))

Description This unit explores the principles and practice of issues management in order to avoid crises, manage when one arises, and seek opportunities to learn and benefit from a crisis where possible, using effective communication. It investigates the development of

crisis management plans, and the testing and implementing of these plans. Dealing with the media and pressure groups is covered, along with training a crisis communication team and organising a response to a crisis situation.

School Humanities & Comm Arts

Discipline Public Relations

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) MKTG 1009

Equivalent Subjects LGYA 1068 - Issues in Corporate Public Relations

Assumed Knowledge

Basic knowledge of public relations theory and current public relations practice.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify issues and crisis communication management as a strategic organisational activity
2. Demonstrate an understanding and apply leadership skills needed to be an effective communicator in issues and crisis situations
3. Critically review the literature on risk, crises and issues management
4. Consider issues and crises management in communication ethics and best practice in relations with stakeholders, including government and the media.

Subject Content

1. Communication and issues management
2. Reputation, image and impression management
3. The nature of crises and preparing for a crisis
4. How governments and organisations respond to environmental challenges
5. Corporate social responsibility, also key publics and their needs
6. Media management and media training of key executives
7. Group behaviour in a crisis
8. Critical path management, and
9. Ways of preventing a crisis in the first place

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Hot Topic Presentation	15 minutes	20	N	Group
Critique Essay (30%) + Proposal (10%)	2,500 words	40	N	Individual

Crisis Simulation:	1,500 words	40	N	Group
Crisis Response	+ 10 minute presentation			
(20% Individual, 10% Group) + Group Reflection (10% Group)

MKTG 2006 Marketing Communications

Credit Points 10

Legacy Code 200086

Coordinator Michael Lwin ([https://directory.westernsydney.edu.au/search/name/Michael Lwin/](https://directory.westernsydney.edu.au/search/name/Michael%20Lwin/))

Description From 2022 this subject replaced by MKTG 3019 Marketing and Digital Communications. Developing and managing an effective integrated marketing communications (IMC) program is a vital part of successful marketing. Moreover, IMC is a highly visible and demanding aspect of marketing communication effort at brand level. This unit, grounded in marketing principles, provides students with an understanding of IMC, the marketing communication process, and coordinating major elements of the marketing communications mix - advertising, digital marketing, sales promotions, personal selling, sponsorship marketing, public relations, direct marketing.

School Business

Discipline Marketing**Student Contribution Band** HECS Band 4 10cp**Level** Undergraduate Level 2 subject**Pre-requisite(s)** MKTG 1006**Assumed Knowledge**

Basic principles of marketing.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate the development of a brand's integrated marketing communications campaign, and the application of communication creativity;
2. Interpret the theoretical foundations of integrated marketing communications, the marketing communications process, and the major elements of the marketing communications mix at brand-level;
3. Analyse, through the use of appropriate theories, how integrated marketing communications is applied at brand-level;
4. Discuss marketing communications in terms of cultural, social economical and environmental issues at brand-level.

Subject Content

- theoretical foundations of IMC, Marketing Communications decision making process, and Brand equity enhancement
- The communication process
- attitude and persuasion in Marketing Communications
- Marketing segmentation and Brand positioning
- Advertising and digital Marketing Communications
- message planning and implementation
- Broadcast media, Print and support media, and media analysis
- direct Marketing, sales promotion, digital Marketing, personal selling, Marketing public relations and sponsorship Marketing
- Evaluating IMC effectiveness

Assessment

MKTG 2008 Principles of E-Marketing

Credit Points 10

Legacy Code 200233

Coordinator Hugh Pattinson ([https://directory.westernsydney.edu.au/search/name/Hugh Pattinson/](https://directory.westernsydney.edu.au/search/name/Hugh%20Pattinson/))

Description This subject introduces students to emerging electronic business environments and their implications for the marketing manager. There will be emphasis on how organisations may rethink the ways in which they build relationships directly with customers. Using the Internet as a template for emerging new businesses, students will be introduced to electronic business models, concepts and tools. Students will explore at an introductory level legal, social and organisational issues related to the development of virtual communities and corporations within emerging electronic environments.

School Business

Discipline Marketing

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the nature and scope of electronic business through analysing electronic business models.
2. Be able to describe electronic infrastructure.
3. Demonstrate awareness of the contemporary electronic business developments.
4. Describe the concepts and development of the internet and the World Wide Web.
5. Critically assess, implement and value electronic business models and initiatives.
6. Complete a research or business plan project related to electronic business initiatives and activities.

Subject Content

Electronic business models
 Designing the customer interface
 Market communications and branding
 Implementation of e-business initiatives
 Metrics, capital infrastructure and financing
 Managing customer relationships using information
 Enterprise resource planning (ERP)
 Legal and ethical issues
 Emerging issues within the e-paradigm

Teaching Periods

MKTG 2010 Customer Experience Fundamentals

Credit Points 10

Legacy Code 201082

Coordinator Daniela Spanjaard ([https://directory.westernsydney.edu.au/search/name/Daniela Spanjaard/](https://directory.westernsydney.edu.au/search/name/Daniela%20Spanjaard/))

Description Customer experiences occur when there is interaction between a company and their customers. Increasing digitisation of this interface has resulted in a shift of buyer expectations where communication is no longer a one-way process. The result being that this exchange comprises of the customer journey where internal factors such as attitudes, learning and emotions combined with external factors such as culture, social communities, and global networks influence decisions. This unit introduces the complexity of technology driven relationships where customers become co-creators of their own personalized experiences and how companies can be part of this. Students will learn the importance of creating positive customer experiences and how this adds value to organisation strategy.

School Business

Discipline Marketing

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects MKTG 1003 - Consumer Behaviour

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the interactions between a company, their partners and customers on the quality of customer experiences and the customer journey.
2. Apply theoretical concepts, models and frameworks to address a real-world customer experience demonstrating an understanding consumer behaviour
3. Analyse the influence of brand and social communities especially within the digital space
4. Identify social, economic and environmentally responsible customer behaviour
5. Describe how global customer experiences influence local customer decisions

Subject Content

- The Customer Experience journey
- Customer Decision Making
- Internal consumer behaviour theories including learning, attitudes, memory, emotions, perception and motivation
- External consumer behaviour theories including culture, subculture, social stratification and reference groups
- Social Media and influencers
- Brand Communities
- Social Wellbeing
- Global Customer Experience

MKTG 2011 Customer Insights

Credit Points 10

Legacy Code 201084

Coordinator Aila Khan ([https://directory.westernsydney.edu.au/search/name/Aila Khan/](https://directory.westernsydney.edu.au/search/name/Aila%20Khan/))

Description Digital technologies are generating large volumes of information (data) about customers and markets. The key is determining how to organise and analyse this data to generate useful insights about customers for marketing decisions. The focus of this unit is on data analysis and reasoning to better understand the culture of insight-driven businesses. Students will examine different sources of information and the processes needed to ensure the generation of quality output. Activities around data visualization, and the role of social media platforms which support this, will prepare students for their future business careers.

School Business

Discipline Marketing**Student Contribution Band** HECS Band 4 10cp**Level** Undergraduate Level 2 subject**Pre-requisite(s)** MATH 1030**Equivalent Subjects** MKTG 2007 - Marketing Research BUSM 3064 - Service Industry Analytics LGYA 4334 - Fundamentals of Marketing Research**Assumed Knowledge**

It is recommended that students have an understanding of data analytics

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the managerial importance of market research in gaining customer insights
2. Develop a customer insights plan which incorporates appropriate research approaches
3. Analyse quantitative/qualitative data for effective decision-making in the context of a business problem
4. Communicate through effective written texts, infographics and other visual tools
5. Outline expected ethical and socially responsible behaviour within research methods and customer insight management

Subject Content

1. Introduction to marketing research and the role of customer insights
2. Gathering insights via the marketing research process
3. Designing and implementing effective research to capture customer insights
4. Quantitative methods
5. Qualitative methods
6. Impact of digital technology and User Experience
7. Data Visualisation
8. Social research ethics and responsibility

MKTG 3001 Brand and Product Management

Credit Points 10**Legacy Code** 200088**Coordinator** Nicole Stegemann ([https://directory.westernsydney.edu.au/search/name/Nicole Stegemann/](https://directory.westernsydney.edu.au/search/name/Nicole%20Stegemann/))**Description** From 2022 this subject replaced by MKTG 3021 Strategic Brand Management. Brand and Product Management focuses on the role brands and products play in the planning and execution of marketing strategies. Aspects of brand and product management

include the building, implementation and maintenance of brands within a range of different contexts are covered in this unit. Students will develop a critical view of the inherent challenges firms encounter in creating and maintaining brands from a marketing perspective. This unit uses workshop sessions and online activities to create an interactive learning environment and bring the content to life.

MKTG 3002 Business to Business Marketing

Credit Points 10

Legacy Code 200091

Coordinator Neeru Sharma ([https://directory.westernsydney.edu.au/search/name/Neeru Sharma/](https://directory.westernsydney.edu.au/search/name/Neeru%20Sharma/))

Description From 2022 this subject replaced by MKTG 3020 Omnichannel Marketing. Unlike consumer marketing where an individual makes decisions based on their own needs or those of their household, business-to-business (B2B) marketing involves individuals or companies promoting and selling products and/or services to other companies. This unit encompasses all these aspects of B2B marketing including organisational buying behaviour, B2B market research, management of the marketing mix from a B2B perspective, relationship and network marketing, supply chain management and Customer Relationship Management (CRM) strategies, and business marketing strategy.

School Business

MKTG 3003 Commercial Property Management

Credit Points 10

Legacy Code 200600

Coordinator Kamel Taoum ([https://directory.westernsydney.edu.au/search/name/Kamel Taoum/](https://directory.westernsydney.edu.au/search/name/Kamel%20Taoum/))

Description This unit examines the operation of commercial property management as a discrete professional discipline of the property industry. Students examine the fundamental principles of the day-to-day management of the various classes of mainstream commercial investment property. In this unit, students acquire an understanding of the various roles, duties, obligations and legal liabilities of the Commercial Property Manager. Various legislative and statutory provisions are explored, as well as the inter-relationship of commercial property management with the professional disciplines of asset management, investment management and portfolio management,

and other sectors of the property Industry. Students also gain an understanding of contemporary commercial leasing practice and the relationships which operate between the building owner, the building manager, and commercial tenants, including the interests and objectives of all concerned parties.

School Business

Discipline Real Estate

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYC 0055 - Commercial Property Management

Restrictions External offerings for this subject are only available to students who are enrolled in a Property program or field of study.

Assumed Knowledge

It is assumed that candidates attempting this subject are already in possession of a basic understanding of the nature of commercial real estate as an investment and asset class. It is assumed that this level of understanding includes a familiarity with the fundamental characteristics of retail, industrial and office-building properties, plus the sub-markets existing within each of those use categories, and how the characteristics differ between these three prime categories of commercial property use. It is also assumed that, prior to entry into this subject, students already possess a rudimentary understanding of investment analysis, risk analysis and financial appraisal (i.e. valuation) techniques, principles and practice as they apply to commercial real estate.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the wide-ranging nature of the roles, objectives, duties, instructions and obligations inherent in commercial property management, and the economic and market forces which influence them;
2. Explain the various legislative provisions, legal obligations and professional liability issues affecting commercial property management;
3. Demonstrate a sound understanding of the distinctive characteristics of each of the mainstream classes of commercial investment property (retail, industrial, & office buildings) and the manner in which those characteristics dictate the specialist property management considerations in each category;
4. Explain the professional relationships and synergies which occur between the discipline of commercial property management and those of property investment, property development, marketing, leasing, research, valuation, portfolio asset and facilities management.

Subject Content

- Roles, duties and responsibilities of The commercial property manager
- commercial property management ? legal implications
- commercial leases
- Monitor and control of Expenditure in commercial properties
- management of commercial, office, industrial and retail properties
- Facilities management concepts
- The economy and commercial property cycles
- Ecologically sustainable development and its impact on commercial property management

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

MKTG 3004 Export Strategy and Applications

Credit Points 10

Legacy Code 200589

Coordinator Shveta Sharma ([https://directory.westernsydney.edu.au/search/name/Shveta Sharma/](https://directory.westernsydney.edu.au/search/name/Shveta%20Sharma/))

Description Australia's export opportunities have yet to be fully realised. In other words, of all the firms that could be considered as having an export potential, only a very small percentage of them actually do (export). This unit teaches students about the management perspectives and the operational requirements needed for a successful export initiative. Specific topics include strategic intent, capability assessment, information gathering, export entry models evaluation, market mix factors, risk management, export finance, logistics and sales management. The overriding aim of the unit is to enable students to be confident in working in an international business environment

and to seek out and undertake management and operational tasks necessary to the global development of the firm.

School Business

Pre-requisite(s) BUSM 1015

Restrictions

Note that only students enrolled at Sydney City Campus may register in the Sydney City Campus subjects offered at that location.

Assumed Knowledge

Principles of international business including the dynamics of foreign business markets, international marketing and research methods, comparative global economics, international corporate finance and strategy. The basics of economics, accounting, law, statistics and business communications are also assumed.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate how international trade varies between industries, and the drivers of the internationalisation of firms.
2. Appraise a firm's international intent and operational capabilities
3. Identify and research international information relevant to that intent.
4. Design strategies used by companies to select overseas markets and to provide and promote goods and services to buyers in those markets.
5. Evaluate common export transaction activities related to trade finance, risk and logistics

Subject Content

Nature of exporting activity and strategic intent

Export entry model evaluation

Capability assessment,

Marketing Mix

Export Sales Management

Risk Management

Export finance

Logistics management

MKTG 3005 Incubator 6: Funding and Start-up

Credit Points 10

Legacy Code 301171

Coordinator Anton Bogdanovych ([https://directory.westernsydney.edu.au/search/name/Anton Bogdanovych/](https://directory.westernsydney.edu.au/search/name/Anton%20Bogdanovych/))

Description This unit investigates various funding opportunities that might be suitable for your business concept through a number of theoretical topics, such as: possible funding sources including venture capitalists and angel investors, joint venture funding, pitching your ideas. The unit is structured into a number of modules. Further, as activities associated with this unit, students would have to actively seek and secure funding for the start-up.

School Computer, Data & Math Sciences

Discipline Sales And Marketing

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse pros and cons of various funding options
2. Develop a pitch to a possible financier
3. Apply individual skills and knowledge in a collaborative and effective manner in achieving a common goal in a group setting
4. Demonstrate effective verbal and written communication skills that appeal to a wide audience
5. Demonstrate resilience when faced with probable disappointing rejections from financiers

Subject Content

1. Possible funding sources
2. Venture capitalist market
3. Bank loans
4. Self-funding
5. Joint venture funding
6. How to pitch your idea to possible financier

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

MKTG 3006 Incubator 7: Growth and Exit Strategies

Credit Points 10

Legacy Code 301172

Coordinator Anton Bogdanovych ([https://directory.westernsydney.edu.au/search/name/Anton Bogdanovych/](https://directory.westernsydney.edu.au/search/name/Anton%20Bogdanovych/))

Description This unit will assist students with selecting the further growth strategy, which includes deciding whether their business would grow organically or will require a fast growth model and rapid expansion strategies. The growth strategy will determine further funding decisions. Apart from this, as entrepreneurs, the students would need to also consider possible exit strategies (e.g. initial public offering (IPO), trade sales or personal redundancies). This objective is driven through a number of topics such as: elements of market research and strategies for business growth, risk management, possible exit strategies, etc. The unit will be delivered through a number of modules. As a tangible outcome, at the completion of this unit, students would have developed a future growth plan with an

identification of possible exit strategies. NOTE: This unit is offered at the Werrington Campus "Launch Pad".

MKTG 3007 International Marketing

Credit Points 10

Legacy Code 200094

Coordinator Nicole Stegemann ([https://directory.westernsydney.edu.au/search/name/Nicole Stegemann/](https://directory.westernsydney.edu.au/search/name/Nicole%20Stegemann/))

Description Marketing internationally has become a necessity for many firms that wish to survive and grow in today's dynamic and increasingly linked world economy. International Marketing is concerned with understanding and successfully managing the different international economic, cultural, political and legal environments as they affect the marketing activities of companies. International Marketing examines

the role of marketing research, international finance, overseas market entry and expansion strategies and the marketing mix in international markets. On completion of this unit students will have acquired a sound theoretical basis and, particularly, a practical understanding of how companies operate in international markets.

School Business

Discipline Marketing

Student Contribution Band HECS Band 4 10cp

MKTG 3009 Marketing Planning Project

Credit Points 10

Legacy Code 200096

Coordinator Ned Doyle ([https://directory.westernsydney.edu.au/search/name/Ned Doyle/](https://directory.westernsydney.edu.au/search/name/Ned%20Doyle/))

Description Marketing planning project (MPP) assimilates and builds on the wide range of marketing units that students have previously completed. MPP assimilates students' specialist knowledge developed in other units through the use of a 'real-life' case context in which students demonstrate their mastery of marketing in the development and presentation of a professional marketing plan.

School Business

Discipline Marketing

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MKTG 1006

Equivalent Subjects LGYA 9911 - Marketing Project LGYC 0196 - Marketing Planning Project

Assumed Knowledge

An understanding of marketing concepts including the elements of consumer behaviour, marketing research methods, marketing communications, channel management and distribution, brand and product management, competitive strategy and quantitative methods in marketing. The basics of economics, finance and accounting, mathematics and statistics and general communications are also assumed.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Confront the reality that marketing practice is, in large part, a team activity;
2. Recognise that one's effectiveness as a marketing professional is largely dependent on one's ability to function and contribute as part of a team;
3. Experience the task of marketing oneself to a client, and to manage the ongoing process of working with a client in the preparation of a detailed plan;
4. Gain award

Subject Content

The core of this subject is the development of a marketing plan for a real commercial enterprise. The creation of the marketing plan itself (which is a team effort) comprises the major component of this subject. There is also a substantial emphasis on individual effort and assessment. The individual component comprises a reflective journal exercise as well as a short final exam. Teams of 5-6 participants will be assigned to a client organisation that has already formally agreed to work with the university. The aim is to produce a detailed marketing plan that can be assessed by the client organisation for its viability, appropriateness, forecasted financial cost and payback and if so decided by the client, actually implemented. Contact with client companies will be between nominated team members and senior company executives, at times and dates to be confirmed.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

MKTG 3010 Marketing and Society

Credit Points 20

Legacy Code 200888

Coordinator Jayne Bye ([https://directory.westernsydney.edu.au/search/name/Jayne Bye/](https://directory.westernsydney.edu.au/search/name/Jayne%20Bye/))

Description This online marketing unit is made up of three key themes. In Social Marketing students examine the nature of social marketing and how the adoption of marketing concepts, frameworks and techniques developed for commercial marketers can be applied to the solution of social problems. Ethics and Marketing considers why ethical conflict occurs in marketing and explores a range of ethical issues that can occur when applying the theory and practice of marketing. In Responsible Business Marketing students will be introduced to the idea that commercial marketing practices can take into account business responsibilities towards society and the environment.

School Business

Discipline Marketing

Student Contribution Band HECS Band 4 20cp

Level Undergraduate Level 3 subject

Restrictions Students must be enrolled in 2773 Bachelor of Business Administration or any Western Sydney Undergraduate program where permission has been granted by that program's DAP or Academic program Advisor.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain concepts, theories and debates about the roles and responsibilities of marketing in society;
2. Apply marketing thinking to health and social behaviour;
3. Demonstrate an understanding of ethics and marketing;
4. Illustrate an understanding of green and environmental marketing, sustainability, fair trade and ethical consumption;
5. Apply and evaluate the relevance of the concepts to a variety of other contexts;
6. Synthesise, and critically evaluate arguments and assumptions from a variety of sources and competing perspectives;
7. Recognise the limitations of knowledge and research in the area;
8. Identify and critically analyse relevant issues involved in responsible social and business marketing;
9. Effectively communicate ideas and arguments to relevant audiences;
10. Demonstrate self-directed learning and the ability to reflect on development as an independent learner.

Subject Content

- Understanding The nature of social Marketing

- Understanding Consumer behaviour
- social Marketing planning
- situation analysis
- Stakeholder analysis
- market segmentation and targeting
- social Marketing objectives
- The Marketing mix and The service element in social Marketing
- The role of Communications and branding in social Marketing programmes
- The social Marketing Network: moving upstream
- relationship Marketing
- The role of research in social Marketing
- The role of ethics in social Marketing
- Evaluating social Marketing programmes

Prescribed Texts

- On line materials will be supplied through vUWS.

Teaching Periods

MKTG 3011 Marketing of Services

Credit Points 10

Legacy Code 200090

Coordinator Karina Wardle ([https://directory.westernsydney.edu.au/search/name/Karina Wardle/](https://directory.westernsydney.edu.au/search/name/Karina%20Wardle/))

Description Given the service-based nature of modern economies, business graduates will either work for firms whose central offering is service or be employed by organisations that use service as an integral supporting element in what they do and what they offer. Therefore, increasingly, knowledge and skills in the field of marketing of services are required by personnel operating across various industries and in a range of roles. The unit aims to: expose students to relevant theory and practice in the field of services marketing; develop participants into more complete marketers capable of operating in service marketing environments.

School Business

Discipline Marketing

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MKTG 1006

Equivalent Subjects BUSM 2040 - The Service Enterprise

Assumed Knowledge

An advanced understanding of marketing theory and practice.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the unique characteristics of services marketing with the context of modern organisations;
2. Analyse key services marketing concepts and theories to address practical service situations;
3. Demonstrate the ability to critically evaluate and use information to formulate distinctive strategies and operational plans for service based businesses;

4. Demonstrate advanced communication competencies ? including debating, team building skills and creativity in working on service related projects.

Subject Content

- introduction and Overview of services, including The extended Marketing mix for services, The characteristics of services Marketing etc.
- The gaps model of service quality
- Customer Expectations and perceptions of service
- listening to service customers
- Building Customer relationships
- service recovery
- service innovation and design
- physical evidence and The servicescape
- Employees?f Roles in service delivery
- Customers?f Roles in service delivery
- managing demand and capacity
- integrated service Marketing Communications
- pricing of services

MKTG 3013 Property Development 2

Credit Points 10

Legacy Code 200748

Coordinator Za Manaf ([https://directory.westernsydney.edu.au/search/name/Za Manaf/](https://directory.westernsydney.edu.au/search/name/Za%20Manaf/))

Description This unit builds upon previous preliminary studies in the professional discipline of Property Development within the Bachelor of Business (Property) degree and is designed to provide a more in-depth and advanced educational exposure to the wide range of essential inherent functions, core activities, contemporary issues and associated considerations relevant to Property Development, in the context of both theory and practice.

School Business

Discipline Real Estate

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 4693 - Property Development 2

Restrictions External offerings for this subject are only available to students who are enrolled in a Property program or Major.

Assumed Knowledge

It is assumed that students attempting this subject already possess a sound understanding of the logical sequence of phases and activities which comprise the overall Property Development Process. Moreover, before attempting this subject, students should already be in command of an appreciation of the wide range of Risk and Sensitivity Factors which arise both in financial feasibility workings and throughout the entire development process. In addition, students should be able to

competently interpret and discuss all aspects of a financial feasibility appraisal, prior to entering study in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the property development process from project conception through to the management of a newly constructed development;
2. Identify the sources and impacts of risk associated with property development in terms of physical, legal, organisational, and financial practical viability;
3. Evaluate and defend a property development project in terms of an individual's or organisation's financial and non-financial objectives;
4. Critically evaluate project prospects using Risk Management Framework and apply them to the preliminary financial feasibility study models;
5. Make reasoned recommendations regarding whether or not an organisation should commit to a development project.

Subject Content

- client's objectives and requirements
- legal physical organisational and commercial viability
- market research and projections
- property development process ? Marketing for development
- Preliminary feasibility Study ? conceptual and financial viability
- sustainability Issues in PD
- Risk and Risk management framework in PD
- contemporary Issues ? heritage listed property development
- development site appraisal ? DCF analysis
- NPVs and IRR

Prescribed Texts

MKTG 3014 Property Development Process

Credit Points 10

Legacy Code 200874

Coordinator Za Manaf ([https://directory.westernsydney.edu.au/search/name/Za Manaf/](https://directory.westernsydney.edu.au/search/name/Za%20Manaf/))

Description In this unit, students critically evaluate the property development process, from the initial development concept through to the end-use of completed development projects. Consideration is given to the implications of the property development process and development decisions from the viewpoints of developers, end users, financiers, public authorities and the community. Students acquire a theoretical understanding of the property development process, development appraisal techniques including financial and feasibility aspects, as well as an understanding of how to apply these techniques to a property scenario. Planning issues are also critically examined.

School Business

Discipline Real Estate

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYB 7468 Property Development MKTG 3012 Property Development

Restrictions External offerings for this subject are only available to students who are enrolled in a Property program or field of study.

Assumed Knowledge

It is assumed that students will have a sound knowledge of valuation practices and principles, economic theory and town planning principles.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Outline the holistic process of property development;
2. Critically evaluate the property development process and its key phases and stages ? from initial development concept through to the end-use of completed development projects;
3. Analyse the roles of all relevant industry stakeholders who, in various groups and combinations, occupy vital positions within the property development process;
4. Discuss the implications of the property development process and development decisions from the viewpoints and objectives of developers, end-users, financiers, public authorities, and the community;
5. Interpret and describe various aspects of a financial appraisal and provide advice regarding the financial feasibility, or otherwise, of a development scheme;
6. Analyse and discuss various contemporary issues relevant to the property development industry.

Subject Content

- Overview of property development objectives, input, processes and outputs
- market research, demand & Supply and participants in property development
- Timing of development Projects and economic cycles
- property development appraisal and feasibility techniques
- finance and Risk management in property development
- sustainable property development

MKTG 3016 Strategic Marketing Management

Credit Points 10

Legacy Code 200087

Coordinator Farid Ahmed ([https://directory.westernsydney.edu.au/search/name/Farid Ahmed/](https://directory.westernsydney.edu.au/search/name/Farid%20Ahmed/))

Description Customer-centric marketing strategies are vital to capturing competitive advantage and sustaining business success. This unit explores the core concepts and tools of contemporary strategic marketing management. The unit focuses on the skills and framework to develop and manage an integrated marketing strategy that creates value for customers and generates growth for the firm in both online and offline environments. Using a marketing simulation, the unit provides the students the opportunity to make a series of complex, real-world marketing decisions in a competitive environment.

School Business

Discipline Marketing

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MKTG 1006

Assumed Knowledge

It is assumed that students have knowledge of basic marketing concepts, theories, and frameworks in consumer behaviour, marketing communications and marketing research.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a strategic orientation for marketing decision-making;
2. Apply key marketing theories and models to analyse Australian and global corporate business strategies;
3. Integrate financial and forecasting considerations in the development of marketing strategies;
4. Formulate marketing strategies which reflect business context and utilise best practice theory and tools.

Subject Content

- The relationship between corporate, business and Marketing strategies

- Assessing Marketing opportunities
- establishing viable Target markets and positioning which align with context and business strengths
- developing Marketing strategies for new, growth and mature industry environments
- E-Marketing strategies
- Evaluating strategic Marketing outcomes

MKTG 3018 Public Relations: Campaigns

Credit Points 10

Legacy Code 102729

Coordinator Nicole Bridges ([https://directory.westernsydney.edu.au/search/name/Nicole Bridges/](https://directory.westernsydney.edu.au/search/name/Nicole%20Bridges/))

Description In this capstone unit students will learn to professionalise key aspects of the public relations management process. The unit links and applies theoretical understanding with writing, planning and presentation skills in response to a client brief. The 'real-world' situation allows students to demonstrate their capacity for problem analysis and to develop appropriate and timely program solutions. Students are required to work within a limited budget and to realistic industry timelines to produce a public relations campaign for their portfolios. Assessment tasks enable students to demonstrate emerging professional capacity to develop a campaign and prepare for a public relations position, either in an in-house or consultancy role.

School Humanities & Comm Arts

Discipline Public Relations

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) COMM 2011 AND COMM 2015

Equivalent Subjects COMM 3029 - Public Relations Campaigns COMM 3007 - Communication Campaigns

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique public relations campaigns and describe best practice.
2. Develop a systematic approach to public relations campaigns, including appropriate strategies and tactics.
3. Describe measurable goals and objectives applicable to campaign preparation and delivery.
4. Develop creative and effective campaigns for internal and external publics in an environment of social change using appropriate theoretical models.
5. Present a professional public relations campaign that demonstrates capacity for problem analysis and ability to develop appropriate and timely program solutions, within a limited budget and to realistic industry timelines.

Subject Content

(1) Campaign Practice.

Components include

- Research
- Formulating objectives
- Identifying publics/audiences
- Planning strategies and tactics
- Media planning
- Budgeting
- Timely delivery
- Writing and design
- Evaluation

(2) Campaign Theory.

- Reading and research on campaigns
- Role of digital and traditional media
- Examination of best practice
- Reviewing other work
- Self-reflection
- Developing a portfolio
- Application of digital and traditional media
- Planning public relations campaigns in a multidisciplinary, multicultural and multimodal context

MKTG 3019 Marketing and Digital Communications

Credit Points 10

Legacy Code 201086

Coordinator Michael Lwin ([https://directory.westernsydney.edu.au/search/name/Michael Lwin/](https://directory.westernsydney.edu.au/search/name/Michael%20Lwin/))

Description The evolving role of digital technologies and digital media has changed how marketers effectively manage a communication campaign in the digital age. This unit offers insights into marketing communication strategies that can effectively reach tech savvy audiences. The principles taught in this unit will provide a strong understanding of the communication process and help utilise the marketing communications mix (advertising, sales promotions, personal selling, sponsorship marketing, public relations, and direct marketing) more effectively. Students completing this unit will be able to build and manage marketing and digital communication campaigns.

School Business

Discipline Marketing

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MKTG 1006

Equivalent Subjects MKTG 2006 - Marketing Communications

Assumed Knowledge

Students should have foundation knowledge in marketing principles and customer experience.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the marketing communication principles to develop a campaign that reach and engage with customers.
2. Provide a critical analysis of advertisements and recommend strategies to improve the effectiveness.
3. Evaluate the effectiveness of digital media, traditional media, and non-traditional media.
4. Analyse campaign metrics to measure the campaign's success.
5. Communicate clearly and concisely (concepts, analyses and recommendations) in a range of formats and following academic integrity.

Subject Content

1. Overview of the marketing communication process
2. Communication frameworks and theories
3. Segmentation and targeting strategies
4. Application of new technologies in a communication campaign
5. Effectiveness of digital media, traditional media, and non-traditional media
6. Analytics and metrics to measure the success of the campaign

MKTG 3020 Omnichannel Marketing

Credit Points 10

Legacy Code 201087

Coordinator Neeru Sharma (<https://directory.westernsydney.edu.au/search/name/Neeru Sharma/>)

Description Technology advances are changing customer value requirements. As a result, customers expect an efficient, insightful and tailored service which requires personalised selling processes through high performance technology and customer-centred business models. Multiple touchpoints and digitally driven processes are created to reach them in the right place at the right time. Omnichannel marketing is now central to business transactions. This unit provides students with an understanding of the dynamics and complexities in creating value across various touchpoints in the business to business space. It considers the need to develop an enterprise-wide digital strategy and align technology, organizational structure and processes to develop an omnichannel approach to provide consistent and seamless engagement with buyers.

School Business

Discipline Marketing

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MKTG 1006

Equivalent Subjects MKTG 3002 - Business to Business Marketing

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Plan ways to align strategy, technology, organisational structure and processes to develop an omni-channel approach using omni-channel marketing concepts and frameworks in a business context.
2. Construct the business to business customer journey to identify diverse touch points.
3. Analyse customer behaviour and their needs using business marketing theories and digital technologies

4. Devise omnichannel marketing strategies for delivering value across all stages of the customer journey.
5. Use analytical, interpersonal and decision-making skills appropriate to a business marketing situation.

Subject Content

1. Introduction to Omnichannel approach of business to customer marketing.
2. Organisational buying behaviour: business buyer personas, buying journey mapping; buying centre.
3. Segmenting the business market and organisational demand analysis.
4. Customer Relationship Management (CRM) strategies and omnichannel marketing strategies
5. Strategic business marketing planning
6. Managing products for business markets and innovation.
7. Value chain management

Assessment

MKTG 3021 Strategic Brand Management

Credit Points 10

Legacy Code 201083

Coordinator Nicole Stegemann ([https://directory.westernsydney.edu.au/search/name/Nicole Stegemann/](https://directory.westernsydney.edu.au/search/name/Nicole%20Stegemann/))

Description Consumers' brand interaction in the marketplace is shaped by a digital and technology driven marketing environment. Innovative and interactive branding strategies have become the key to a successful marketing strategy. Students learn to strategically create, develop, innovate, position and protect branding in an ever-changing environment to establish a sustainable competitive advantage. Through these industry-related activities, students create a business driven portfolio, which can be presented to potential employers. This unit uses workshop sessions and online activities to create an interactive learning environment and bring the content to life.

MKTG 7008 Creating Markets

Credit Points 10

Legacy Code 200732

Coordinator Minas Poulos ([https://directory.westernsydney.edu.au/search/name/Minas Poulos/](https://directory.westernsydney.edu.au/search/name/Minas%20Poulos/))

Description Understanding markets is central to the effective management of the marketing system. This unit is designed to provide a framework for exploring well-established, current, and emerging topics in consumer and organisational buyer behaviour. An applied approach is used to explore how buyers (from different organisational, social and culturally diverse backgrounds) behave and how strategic marketing efforts can be adapted to create value in different markets.

School Business

Discipline Marketing

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 8734 - Buyer Behaviour

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Illustrate how the different disciplines (psychology, anthropology, sociology and economics) explain the basis of buyer behaviour within both consumer and organisational contexts
2. Identify and evaluate how diverse cultural and social contexts influence interactions between organisational and consumer buyer behaviour.
3. Demonstrate how the activities between customer and organisational behaviour influence marketing strategies and options for value creation.

Subject Content

Overview of market behaviour
Organisational buying behaviour
Consumer Decision Making Processes
Creating value in different markets

Cultural, social and psychological influences
 Economic Influences
 Organisational influences
 Building Relationships
 Market Trends

Teaching Periods

MKTG 7009 Customer Relationship Marketing

Credit Points 10

Legacy Code 200736

Coordinator Nicole Stegemann ([https://directory.westernsydney.edu.au/search/name/Nicole Stegemann/](https://directory.westernsydney.edu.au/search/name/Nicole%20Stegemann/))

Description This is a hands-on unit introducing students to the concept and application of customer relationship marketing. It will present an understanding of relationship management principles as well as an overview and analysis of the various techniques available to companies. This unit will examine CRM in the context of different industries and examine the impact that CRM can have on firm performance. The key is to develop an understanding of customer and consumer needs and aspirations to create effective and long-term relationship strategies. There will be a emphasis on consumer loyalty programs and value-added services. It will also examine how CRM can fit into the overall strategy of the firm.

School Business

Discipline Marketing

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of key CRM concepts and techniques
2. Illustrate ROI implications for CRM
3. Development of CRM strategies for marketing organisation
4. Demonstrate the importance of CRM strategies to enhance customer relationships

Subject Content

Introduction to Customer Relationship Marketing
 Paradigm Shift in Marketing
 Consumer Motivations to Engage with Marketers
 Business Customer Motivations and Longterm Benefits
 Consumer Lifetime Value
 Data Mining
 Loyalty Programs: Retailer Programs, Memberships and Contracts
 Internet as CRM tool
 Brand Communities
 Added Value
 Business CRM strategies

Teaching Periods

MKTG 7010 Customer Value Management

Credit Points 10

Legacy Code 200791

Coordinator Nicole Stegemann ([https://directory.westernsydney.edu.au/search/name/Nicole Stegemann/](https://directory.westernsydney.edu.au/search/name/Nicole%20Stegemann/))

Description In an economy where products, marketing campaigns and management practises are ever changing, business executives are increasingly recognising that understanding the value of their customers is vital to the survival of the business. Loyal customers are what every organisation seeks. However, increasingly complex supply/demand relationships also result in 'promiscuity' among customers. Therefore, it is crucial that managers have the skills to not only strive for excellence and consistency in product-centric perspectives, but also foster and strengthen those that are customer-centric. This unit fundamentally examines the opportunities and challenges in: a) identifying customers, b) adding value to supplier/consumer relationships, including tools that firms/organisations can use to provide value for customers while ensuring profitability over the entire life of the relationship.

School Business

Discipline Marketing

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects MKTG 7009 - Customer Relationship Marketing

Restrictions

Students must be enrolled in 2755 Master of Business Administration, 2757 Graduate Certificate in Business Administration, 2762 Executive Master of Business Administration.

Assumed Knowledge

It is expected that students will have a basic understanding of marketing prior to the commencement of this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a knowledge of key Customer Relationship and Value Management concepts and techniques;
2. Evaluate the complexity of customer and organisation interaction as part of the value process;
3. Demonstrate the importance of Customer Relationship and Value Management strategies to enhance customer relationships;
4. Develop Customer Relationship and Value Management strategies for marketing organisation including non-profit organisations.

Subject Content

1. Defining who 'customers' are:
 - the differences between promiscuous vs. loyal customers;
 - backward vs. forward relationships;
 - characteristics of potential customer.
2. How different environments impact customer profiles, including Business to Business (B2B), Business to Consumer (B2C), Small to Medium sized Enterprise (SME), government, and not for profit organisations
3. Identifying potential customers in new/existing markets, and incorporating the global customer perspective
4. Identifying/defining the value of customers
5. Adding value via competitive offerings, including those that are not always based on profit decisions
6. How customers perceive, create and demand value
7. Understanding customer and organisational interaction as drivers of value

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Portfolio	1,500 words	30	N	Individual
Report	Report (30%): 1,500 words, Presentation (10%): 15-30 minutes.	40	N	Individual
Applied Project	Report (20%): 2,000 words, Class activity (10%): 15-25 minutes.	30	N	Group

Coordinator Sarah Duffy ([https://directory.westernsydney.edu.au/search/name/Sarah Duffy/](https://directory.westernsydney.edu.au/search/name/Sarah%20Duffy/))

Description This unit studies the marketing process from a holistic viewpoint, considering the intersection of the economy, the government, and the community. This perspective will help students to analyse and understand the interrelated and interdependent parts that comprise a marketing system. Specifically, this unit examines: consumer behaviour, market regulation, social responsibility and sustainability. Students will learn to consider the marketing process and its consequences at both an aggregate and micro level. This unit exposes students to the systematic and analytical approaches expected from them in postgraduate studies in marketing.

MKTG 7022 Property Feasibility Study

Credit Points 10

Legacy Code 200893

Coordinator Za Manaf ([https://directory.westernsydney.edu.au/search/name/Za Manaf/](https://directory.westernsydney.edu.au/search/name/Za%20Manaf/))

Description In 2019 this unit is replaced by 201014 Feasibility Modelling. This unit emphasises the evaluation and development of feasibility studies for the purposes of selecting development projects, evaluating different options and making the decision as to whether to proceed to a more detailed feasibility study. The unit provides students with the knowledge and skills to prepare a full feasibility report and analysis of a project's concept and financial feasibility. This is achieved through the application of theories and concepts to a case study. Students will have access to applications being used in the industry to complete a feasibility report. Additionally, students will develop skills to carry out both scenario and sensitivity testing on the outcomes of the proposed development project.

School Business

Discipline Real Estate

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYB 7483 - Feasibility Studies

Restrictions

Students must be enrolled in a postgraduate Business program.

Assumed Knowledge

Knowledge of property development.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the meaning of the term feasibility study in terms of comparison of potential objectives with outcomes;
2. Design and evaluate feasibility studies for use in different property development contexts;
3. Prepare and evaluate preliminary feasibility studies used for the purposes of determining whether or not to proceed with consideration of a particular development and / or compare different development options;
4. Prepare and evaluate financial feasibility studies, calculate return and risk of projects and compare risks and returns of different projects, different project options and different financing options;

5. Prepare and evaluate the returns and risks of the different financial stakeholders in a project;
6. Critically evaluate project prospects using sensitivity, simulation and scenario analysis applied to the preliminary financial feasibility study models;
7. Proceed beyond preliminary feasibility studies towards detailed feasibility testing of projects prior to committing to the decision to proceed with the project;
8. Use feasibility testing for the purpose of evaluating and monitoring the performance of ongoing or completed projects.

Subject Content

- what feasibility studies are and The different types of feasibility studies
- components of The feasibility Study
- The Preliminary feasibility Study
- The various concepts of financial feasibility studies
- Minimising Risk in The feasibility process
- Sensitivity analysis, Simulation Scenario analysis, financial feasibility and The decision making process
- returns and risks for The various financial stakeholders in Projects
- further Sensitivity and financial analysis using alternative spreadsheet scenarios
- Monitoring The Project against The feasibility proposal
- feasibility testing, end of Project evaluation and The Reporting process

MKTG 7029 Strategic Value Creation

Credit Points 10

Legacy Code 200734

Coordinator Nicole Stegemann ([https://directory.westernsydney.edu.au/search/name/Nicole Stegemann/](https://directory.westernsydney.edu.au/search/name/Nicole%20Stegemann/))

Description This unit focuses on a holistic approach to creating value through the brand building process and including integrated marketing communication strategies. The main objective of the unit is to address the value creation process and the central role that brands play as the mechanism for value creation and communication with interest groups

(consumers, employees and other stakeholders). This unit will also cover corporate communications and new media as means of value creation strategies.

School Business

Discipline Marketing

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 8737 - Promotion Management LGYA 4475 - Promotion and Advertising Overseas

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appreciate the role of brand and product management in creating value for the organisation
2. Communicate the critical importance of brand equity and of developing a distinct brand identity
3. Apply innovative marketing communications to value creation.
4. Demonstrate how regulatory issues pertaining to consumer protection affect brand building and value creation

Subject Content

Introduction and Overview
 Objectives of Value Creation
 Building Brands
 Positioning Strategies
 Theoretical perspectives in value creation
 Brand and Message Strategies
 Integrated Brand Promotion Strategies
 New Media
 Corporate communication
 Co-creation of value in the communication channel
 Co-Branding and Communication Strategies
 Integrated Message Strategies

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Report	1500 words individual seminar paper	30	N	Not Known
Applied Project	2500 words group reports and 15minute presentation	30	N	Not Known

Portfolio	Prepare and conduct a seminar activity, weekly online posts 200 words as well as preparation of discussion questions for weeks 2 to 8	40	N	Not Known

MKTG 7032 Valuation of Special Premises

Credit Points 10

Legacy Code 201017

Coordinator Za Manaf ([https://directory.westernsydney.edu.au/search/name/Za Manaf/](https://directory.westernsydney.edu.au/search/name/Za%20Manaf/))

Description The value of special premises constitutes an important segment of valuation practice in Australia. A number of special valuation considerations arise in valuation of this class of premises. However, the most compelling reason for studying the valuation of special premises is the fact that such properties provide an ideal

vehicle whereby valuation principles and methods of valuation can be practiced and critically evaluated by students.

School Business

Discipline Real Estate

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) MKTG 7028

Restrictions

Students must be enrolled in a postgraduate Business program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the nature of specialised property types, their characteristics and relationships to productivity, profitability and management;
2. Examine the effect of contamination and environmental issues on special premises;
3. Apply appropriate valuation techniques and data analysis to the valuation of special premises;
4. Preparation of industry standard reports.

Subject Content

- valuation of special premises and associated Issues
- special premises accounting Issues, super profit and goodwill
- Hotels and motels
- tourist accommodations
- Marinas
- child care Centres
- Nursing homes and retirement villages
- service stations
- Overview of rural valuation
- Asset valuation and business valuation
- Plant and machinery valuation
- Contamination Issues in valuation

Assessment

MKTG 7033 Customer Experience

Credit Points 10

Legacy Code 201022

Coordinator Lynne Freeman ([https://directory.westernsydney.edu.au/search/name/Lynne Freeman/](https://directory.westernsydney.edu.au/search/name/Lynne%20Freeman/))

Description Customer experiences occur when there is interaction between a company and their customers for the duration of their relationship. It comprises the customer journey, the consumer-brand 'touchpoints' and the environment in which these experiences happen. Increasing digitisation of the organisation-customer interface has resulted in a shift of buyer expectations where it is easier to compare market offerings and where communication is no longer a one way interaction. This unit considers the complexity of the technology driven relationship where customers become co-creators of their own personalized experiences and how companies can be part of this.

School Business

Discipline Marketing

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects MKTG 7004 - Buyer Behaviour

Restrictions

Students must be enrolled in a postgraduate Business program or 3749 - Master of Science.

Assumed Knowledge

An understanding of marketing theory and relevant principles is assumed.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the complex interactions between a company, their partners and customers which influence the quality of all customer experiences and the customer journey
2. Apply the process of dividing people into social networks based upon criteria such as communication, demographics, product usage, digital use and psychographic attributes and behaviours
3. Formulate a virtual customer experience via the application of digital media and networks
4. Evaluate customer-centric metrics for better decision making
5. Reflect on the issues around maintaining customer privacy in the digital age

Subject Content

1. Investigating customer experience ecosystems
2. Social segmentation
3. The virtual customer experience

4. How human emotions drive positive customer experiences in real-time
5. Customer Insights
6. Managing customer privacy

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

MKTG 7034 Digital Marketing

Credit Points 10

Legacy Code 201026

Coordinator Michael Lwin ([https://directory.westernsydney.edu.au/search/name/Michael Lwin/](https://directory.westernsydney.edu.au/search/name/Michael%20Lwin/))

Description In the last decade or so, marketing has moved from traditional practice to the digital realm where technology now drives many decisions in marketing strategy. It is now even more important that all types of organisations are able to deliver the right message, to the right people, at the right time. Digital marketing is often closely linked to the internet as the primary channel of contact and where success is measured via mobile and social media marketing. This unit will teach students the principles of digital marketing so they understand the key frameworks of digital marketing technology and are able to apply marketing strategies to target tech savvy consumers.

School Business

Discipline Marketing

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects BUSM 7089 - Strategic Marketing for Managers

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

MKTG 7035 Frontiers of Branding

Credit Points 10

Legacy Code 201024

Coordinator Nicole Stegemann (<https://directory.westernsydney.edu.au/search/name/Nicole Stegemann/>)

Description Technology has dramatically changed the way brands interact in the marketplace. Marketers are increasingly faced with the challenge of meeting the needs of sophisticated consumers who have multiple brands to choose from in a very competitive environment. This makes innovative branding strategies the key differentiating variable. This unit helps students understand the concept of branding and the utilization of brand assets by learning to strategically create, develop, innovate, position and protect the brand in an ever-changing environment in order to establish a sustainable competitive advantage.

Legacy Code 201021

Coordinator Daniela Spanjaard ([https://directory.westernsydney.edu.au/search/name/Daniela Spanjaard/](https://directory.westernsydney.edu.au/search/name/Daniela%20Spanjaard/))

Description This unit provides a unique opportunity for students to personalise their postgraduate degree and have a meaningful readily-built portfolio for future employers. It comprises a range of short learning modules designed to provide students with a selection of employment related skills such as career preparation, personal brand building, industry certification and how to use the latest technology pertinent to their field of study. Students will follow certain paths in order to travel through 150 hours of educational participation time, including a range of modules and their final portfolio. Students can pick

and choose the relevant modules at any time during their course, thus allowing flexibility to manage their choices as they progress through the degree. Please note that students in the Master of Marketing, will automatically be given access to vUWS to complete their learning modules, without the need to formally enrol in this unit. However, in order to successfully complete this unit, students should enrol in it when in their final session of study. You will be required to gain approval from your Director of Academic Program to enrol in this unit by submitting an online eForm.

MKTG 7037 Multichannel Marketing

Credit Points 10

Legacy Code 201023

Coordinator Farid Ahmed ([https://directory.westernsydney.edu.au/search/name/Farid Ahmed/](https://directory.westernsydney.edu.au/search/name/Farid%20Ahmed/))

Description Today's customers have far greater control over the buying process than previously, be that in business or consumer markets. Multichannel marketing is about providing your customers with every opportunity to engage with your business across a variety of offline and online platforms. This unit looks at how the messages and media deployed by an organisation create and sustain demand as a means to build network relationships. As customer expectations rise and the influences of technology becomes more prevalent, students will learn about the importance of personalized campaigns that will resonate with each customer account.

School Business

Discipline Marketing

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects BUSM 7009 - Business Marketing

Restrictions

Students must be enrolled in a postgraduate Business program.

Assumed Knowledge

Students should have a solid understanding of the foundations of marketing theory and practice.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop business marketing strategies that align with global opportunities and challenges
2. Apply innovative and personalized communication strategies for omni-channel business models
3. Investigate customer-business marketing relationships within the context of marketing channels, networks and supply chains
4. Analyse how organizations create and sustain product or service demand to optimize network relationships.

Subject Content

1. Develop messages through different media to communicate with the market to create and sustain demand
2. Concentrate sales and marketing resources on a clearly defined set of target accounts within a market
3. Build network relationships through the personalized integration
4. Deploy deliberate personalized campaigns
5. Manage marketing technology to meet customers through the various channels and devices
6. Optimize value for business marketing channels and supply chains.

Legacy Code 201025

Coordinator Sarah Duffy ([https://directory.westernsydney.edu.au/search/name/Sarah Duffy/](https://directory.westernsydney.edu.au/search/name/Sarah%20Duffy/))

Description Social Marketing is the application of marketing concepts to the achievement of social ends. Usually this will involve changing attitudes and behaviours in a way that benefits both individuals and communities. This unit builds students' knowledge of how social marketing theory can be used to facilitate behaviour change and improve social outcomes within communities. It will include how to design, manage and evaluate social and behaviour change programs.

School Business

Discipline Marketing

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Business program.

Assumed Knowledge

An understanding of marketing theory and relevant principles is assumed.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate social marketing problems based on social marketing theory to suggest ways of changing attitudes or behaviours
2. Investigate the stakeholders involved in social marketing issues and their role as target markets in social marketing campaigns
3. Assess the role of marketing activities in achieving change for individuals and communities
4. Evaluate the economic, social, and environmental consequences of a social marketing strategy and develop recommendations

Subject Content

1. Social marketing strategy
2. Stakeholder analysis and target markets
3. Behaviour and attitude change theory
4. Analysis of social marketing campaigns
5. The ethical implications of social marketing campaigns for community and individuals

Credit Points 10

Legacy Code 700225

Coordinator Charlise Bennett ([https://directory.westernsydney.edu.au/search/name/Charlise Bennett/](https://directory.westernsydney.edu.au/search/name/Charlise%20Bennett/))

Description This unit is designed to assist students to become successful independent learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study. Emphasis is placed on developing the key competencies such as time management, critical thinking, researching, learning how to learn and referencing.

School Western Sydney The College

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 0 Preparatory subject

Equivalent Subjects NATS 0002 - Academic Skills for Health Science (WSTC)

Restrictions Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand and develop time management skills.
2. Develop appropriate online communication skills for tertiary studies and beyond.
3. Communicate effectively through the development of critical reading and writing skills in context.
4. Locate and use information technology systems and educational technologies to support learning and assessment.

5. Apply critical thinking, and use problem solving skills and research skills, to make informed decisions.
6. Assess their own learning styles and the contribution to elearning how to learn.

Subject Content

1. Learning styles and cue awareness
2. Referencing
3. Goals, time management and procrastination
4. Successful learning and critical thinking
5. Note taking, summarising and paraphrasing
6. Sources of information and researching
7. Strengths and weaknesses in what we read
1. Learning styles and cue awareness
2. Referencing
3. Goals, time management and procrastination
4. Successful learning and critical thinking

Description This unit is designed to assist students to become successful independent reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study. Emphasis is placed on developing the key competencies of scientific enquiry - collecting, analysing, organising and communicating information as well as solving problems, particularly when related to using mathematical ideas and techniques.

School Western Sydney The College

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 0 Preparatory subject

Restrictions Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use both independent and collaborative learning strategies to advance the knowledge of the individual and that of their peers.
2. Communicate effectively through the development of critical reading, listening, speaking and writing skills in context.
3. Locate and use information technology systems and educational technologies to support learning and assessment.
4. Apply critical thinking, and use problem solving skills and research skills, to make informed decisions.
5. Apply the process of reflection to learning experiences, in order to assess their own learning styles and ◆elearn how to learn◆f.
6. Describe criteria for successful posters and oral presentations and write and evaluate a scientific report.

Subject Content

Topic 1: Introduction to tertiary study

Topic 2: Blended learning

Topic 3: Advanced tertiary skills

Topic 4: Information skills

Topic 5: Research methods for science and engineering:

- Introduction to scientific methods
- Scientific report writing
- Data handling
- Critical reading
- Research and referencing (journal articles)
- Project report

chemistry and biology are represented within the unit and presented in context within an integrated framework.

School Western Sydney The College

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 0 Preparatory subject

Restrictions Students must be enrolled in a Western Sydney University The College Foundation Studies program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise, recall and display an understanding of specific scientific facts, terminology, principles, concepts and practical techniques;
2. Display an understanding of the benefits and drawbacks of applications of science;
3. Represent scientific information appropriately as diagrams, graphs, tables, reports and equations;
4. Describe, explain and interpret phenomena and ideas in terms of scientific principles;
5. Carry out relevant calculations;
6. Interpret data to draw conclusions which are consistent with the evidence, recognising patterns and relationships where they exist.

Subject Content

1. The Nature of Science
Observations; Physical Quantities and Units; International System of Units and Measurement; Graphs.
2. Force and Motion
Motion Graphs; Accelerated Motion; Free Fall Motion; Forces; Weight; Friction; Newton's Laws.
3. Elements, Compounds and Mixtures
Understanding of Chemistry; Pure and impure substances - properties; Examples of elements, mixtures and compounds; Particles in solids, liquids and gases.
4. Atomic Structure and the Periodic Table
Current atomic theory; Subatomic particles and arrangement; Atomic structure and position on periodic table; Metals and non-metals.
5. The Chemical Reaction
Physical and chemical changes - evidence; Ionic and covalent bonds; Common reactions - word equations - formula equations (balanced only); Common compounds and properties.
6. Cell Theory
Characteristics and requirements of living things; Cell Theory.
7. Body Systems
Major organ systems - organs and functions; Diseases - causes and cures.

Coordinator Ryan Sidoti ([https://directory.westernsydney.edu.au/search/name/Ryan Sidoti/](https://directory.westernsydney.edu.au/search/name/Ryan%20Sidoti/))

Description The depth of knowledge and practical skills required by health professionals in the 21st century is very different to that which was required in the past. Medical treatment of illness and disease has become increasingly technical and health professionals are expected to work in partnership in determining patient care. In order to achieve this, today's health professional must have a basic understanding of the fundamental scientific principles behind health and disease. Increasingly, modern health science is concerned with maintaining health as a way of preventing disease and this is achieved through a holistic approach to the human condition. This unit is an introduction to the basic concepts in human body systems, health and disease, that is required in order to commence any tertiary health science course.

School Western Sydney The College

Incompatible Subjects BIOS 1023 - Introduction to Human Biology (WSTC) BIOS 1022 - Introduction to Human Biology

Restrictions Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use and interpret a wide range of biological and scientific terms describing the structure, function and location of human body systems.
2. Use and interpret information about the interdependence of human body systems and their components.
3. Interpret and implement information related to health and safety.
4. Describe factors that contribute to healthy functioning of the body.
5. Critically evaluate health-related information and evidence.

Subject Content

Topic 1:Cell structure and function

1.Prokaryotic and eukaryotic cells

2.Eukaryotic cell organelles? structure and function

Topic 2:Introduction to Body Systems

1.Overview of human body systems

2.Cardiovascular and respiratory systems

3.Musculo-skeletal system

4.Endocrine system

5.Digestive system

6.Integumentary system

7.Lymphatic system

8.Nervous system, including sensory systems (eye and ear)

9.Special senses (vision, hearing, smell, taste, equilibrium)

10.Immune system

11.Reproductive system

Topic 3:Reproduction and Genetics

1.Cell division

2.Introduction to DNA, genes and proteins

3.Simple genetics in health and disease

Topic 4:Homeostasis?Interdependence of body systems

1.Maintaining body temperature

2.Maintaining fluid and electrolyte balance

3.Maintaining blood pressure

Topic 5:Health and Disease

1.Nutrition

2.Physical and mental activity

3.Infectious disease and protection from infection

4.Vaccination and immunisation

Topic 1:Cell structure and function

1.Prokaryotic and eukaryotic cells

2.Eukaryotic cell organelles? structure and function

Topic 2:Introduction to Body Systems

1.Overview of human body systems

2.Cardiovascular and respiratory systems

3.Musculo-skeletal system

4.Endocrine system

5.Digestive system

6.Integumentary system

Credit Points 10

Legacy Code 700231

Coordinator Phillip Newman ([https://directory.westernsydney.edu.au/search/name/Phillip Newman/](https://directory.westernsydney.edu.au/search/name/Phillip%20Newman/))

Description In its broadest sense, science is an evolving body of skills, theories and knowledge about the nature of the world, based on observation, measurement and experiment. In order to begin participating in tertiary science studies, students require a fundamental toolkit of scientific literacy that includes key concepts, language, and skills. This unit provides an overview of, and grounding in, fundamental scientific concepts including the nature of matter and energy, and the flow of energy and cycling of matter through key processes in the biosphere. Integrating these concepts within a framework of a contemporary issue, climate change, enables students to build skills in applying scientific concepts, methods and problem-solving techniques, as well as furthering an understanding of interrelationships between science and other aspects of society. The unit imparts a basic body of essential scientific knowledge, as well as facilitating skills in collecting and analysing information and writing coherent explanations within a scientific framework.

School Western Sydney The College

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 0 Preparatory subject

Equivalent Subjects NATS 0008 - Fundamentals of Science (WSTC)

Restrictions Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Solve real life problems involving mathematical concepts and construct appropriate graphs, charts and tables and interpret them.
2. Extract information from written text, graphs and tables and critically evaluate this information and evidence.
3. Describe the structure of the atom and relate this to the formation of molecules and ions.
4. Identify chemical compounds which make up organisms and classify organic molecules according to the arrangement of the chemical bonds.
5. Describe energy changes in chemical reactions and identify and explain chemical reactions important in the environment.
6. Explain the role of living systems in the cycling of matter and flow of energy.
7. Apply the principles of the Scientific Method to solving problems in science and assesses conclusions in relation to evidence and sources.

Subject Content

Topic 1: Basic Mathematical Operations and Data Handling

- Basic mathematical operations with whole numbers, decimals and fractions
- Ratio, rates and percentages
- Graphing and Data handling
- Basic Statistics

Topic 2: Simple and Complex Substances

- Atomic structure and the periodic table
- Molecules and Ions
- Solutions

Topic 3: Biologically Important Molecules

- Organic molecules and functional groups
- Carbohydrates, lipids, nucleic acids and proteins
- Acids, Bases, Salts and Buffers

Topic 4: Chemical Reactions and Energy

- Types of reactions- acid/base, redox, combustion
- Energy changes and stability
- Enthalpy, bond energy and Hesss Law

Topic 5: Biochemical Reactions and Energy

- Living systems as open systems: flow of energy and cycling of matter in the biosphere
- Uphill or downhill? Energy-consuming and energy-producing reactions
- ATP as the link between energy-consuming and energy-producing reactions
- Two great global cycles: photosynthesis and cellular respiration

Topic 6: Applying Concepts: Global Climate Change

- Regulation of average global temperature by greenhouse gases
- Planetary homeostasis: the role of living systems in global temperature regulation
- Carbon and hydrological cycle
- Evidence for and impacts of human-induced global warming
- Reconstructing the past: The Permian extinction event

Topic 1: Basic Mathematical Operations and Data Handling

- Basic mathematical operations with whole numbers, decimals and fractions
- Ratio, rates and percentages
- Graphing and Data handling
- Basic Statistics

Level Undergraduate Level 0 Preparatory subject

Equivalent Subjects LGYB 1382 - Nursing Communication (UWSC)

Restrictions This subject is only available to College students enrolled in Foundation Studies programs.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Identify verbal and non-verbal cues and how they relate to health.
- Employ different types of questioning, speaking and listening skills and demonstrate an awareness of their benefits and limitations.
- Reflect on own communication strengths and areas for improvement and how these impact on subjective and objective communication.
- Examine the impact of cultural and situational context on communication when working with people from diverse backgrounds.
- Provide evidence of written and verbal communication skills used in a range of contexts including data entry, charts, journals, reports and publicity (this includes the appropriate use of medical terminology).
- Demonstrate effective interpersonal skills used in team work and holistic practice.
- Demonstrate the ability to work legally and ethically within healthcare.

Subject Content

Understanding communication and its application in health and nursing: verbal, non-verbal and textual

Introduction to cultural and situational sensitivity, safety and competences.

Working ethically, legally, collaboratively and effectively in health care
The importance of reflection and self-awareness and its influence on communication, learning and the relationship to professional life
The practice of health & nursing: examining contexts for professional practice & implications for communication such as effective listening & professional documentation

Understanding communication and its application in health and nursing: verbal, non-verbal and textual

Introduction to cultural and situational sensitivity, safety and competences.

Working ethically, legally, collaboratively and effectively in health care
The importance of reflection and self-awareness and its influence on communication, learning and the relationship to professional life
The practice of health & nursing: examining contexts for professional practice & implications for communication such as effective listening & professional documentation

Understanding communication and its application in health and nursing: verbal, non-verbal and textual

Introduction to cultural and situational sensitivity, safety and competences.

Working ethically, legally, collaboratively and effectively in health care
The importance of reflection and self-awareness and its influence on communication, learning and the relationship to professional life
The practice of health & nursing: examining contexts for professional practice & implications for communication such as effective listening & professional documentation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Reflection	700 words	20%	N	Individual
Presentation	In-class - 10 mins	20%	N	Group
Professional Task	In-class - 75 mins	35%	N	Individual
Simulation	In-class - 30 mins	25%	N	Individual

NATS 0010 Interpreting Data In Science (WSTC Prep)

Credit Points 10

Legacy Code 700287

Coordinator Phillip Newman ([https://directory.westernsydney.edu.au/search/name/Phillip Newman/](https://directory.westernsydney.edu.au/search/name/Phillip%20Newman/))

Description Science is a way of knowing about the world. It is a process of discovery whose product, an evolving body of scientific knowledge and technology, is a significant determinant of modern Western societies. Engaging with the content, process, and social functions of science requires foundational scientific literacy, including the ability to access multiple textual forms, to construct meaning, and to critically evaluate new information in a scientific framework. In this unit students will develop skills in scientific literacy through undertaking case studies of contemporary relevance. Emphasis is placed on key competencies in scientific academic writing - collecting, analysing, organising, interpreting and communicating information - as well as solving problems related to mathematical ideas and techniques.

School Western Sydney The College

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 0 Preparatory subject

Restrictions Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a command of academic English, including grammar, phrasing, effective sentence structure, spelling and punctuation in a variety of written contexts.
2. Utilise appropriate reading strategies to comprehend academic texts.
3. Demonstrate an understanding of scientific concepts, terminology, principles, concepts and practical techniques.
4. Display an understanding of the benefits and drawbacks of applications of science.
5. Present data in an appropriate manner.
6. Identify and explain patterns in data including anomalies.
7. Interpret various textual forms, including written text, diagrams, graphs and numerical formulae in the context of contemporary case-studies that incorporate concepts from physics, chemistry and biology.
8. Evaluate scientific information in the context of contemporary case-studies that incorporate concepts from physics, chemistry and biology.

Subject Content

1. Interpreting texts and analysing information in relation to sustainability and the environment
2. Synthesis of scientific texts through understanding of scientific history
3. Relating experimental data to scientific concepts
4. Introduction to academic writing in scientific context
5. Interpreting texts and analysing information involving numeracy and concepts from physics, chemistry and biology
1. Interpreting texts and analysing information in relation to sustainability and the environment

NATS 0016 Science for Health Professionals (WSTC)

Credit Points 10

Legacy Code 900090

Coordinator Virginia Shepherd ([https://directory.westernsydney.edu.au/search/name/Virginia Shepherd/](https://directory.westernsydney.edu.au/search/name/Virginia%20Shepherd/))

Description The depth of knowledge and practical skills required by health professionals in the 21st century is very different to that which was required in the past. Medical treatment of illness and disease has become increasingly technical and health professionals are expected to work in partnership to determine patient care. In order to achieve this, today's health professional must have a basic understanding of the fundamental scientific principles behind health and disease.

Increasingly, modern health science is concerned with maintaining health as a way of preventing disease and this is achieved through a holistic approach to the human condition. This unit is an introduction to the basic concepts in human body systems, health and disease, that are required in order to commence any tertiary health science course.

School Western Sydney The College

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 0 Preparatory subject

Equivalent Subjects NATS 0017 - Science for Health Science (WSTC)
NATS 0018 - Science for Health Science (WSTC Prep)
LGYB 1383 - Science for Nursing (WSTC)

Restrictions Only students enrolled at The College in Foundation Studies programs can enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret and apply a wide range of biological and scientific terms describing the structure, function and location of human body systems.
2. Interpret and apply information about the interdependence of human body systems and their components.
3. Interpret and apply and/or implement information related to health and safety.
4. Describe in basic terms the nature of genes and inheritance.
5. Describe factors that contribute to healthy functioning of the body.
6. Critically evaluate health-related information and evidence.

Subject Content

Topic 1: Basic Scientific Concepts for Health Professionals

1. Atoms and Molecules
2. Liquids and Solutions
3. Acids, Bases, Salts and Buffers
4. Gases? Pressure, Volume and Temperature
5. Energy, Reactions and ATP

Topic 2: Cell structure and function

1. Prokaryotic and eukaryotic cells
2. Eukaryotic cell organelles? structure and function

Topic 3: Introduction to Body Systems

1. Overview of human body systems
2. Cardiovascular and respiratory systems
3. Musculo-skeletal system
4. Endocrine system
5. Digestive system
6. Integumentary system
7. Lymphatic system
8. Nervous system, including sensory systems (eye and ear)
9. Special senses (vision, hearing, smell, taste, equilibrium)
10. Immune system
11. Reproductive system

Topic 3: Reproduction and Genetics

1. Cell division
2. Introduction to DNA, genes and proteins
3. Simple genetics in health and disease

Topic 4: Homeostasis? Interdependence of body systems

1. Maintaining body temperature
2. Maintaining fluid and electrolyte balance
3. Maintaining blood pressure

Topic 5: Health and Disease

1. Nutrition

2. Physical and mental activity
 3. Infectious disease and protection from infection
 4. Vaccination and immunisation
 Topic 6: Tools of Diagnosis
 1. Diagnostic testing.
 2. X-rays, ultrasound, CT scans and MRIs, radio/chemotherapies

Description This unit is designed to give students skills in health science to become successful independent reflective learners in health sciences. It introduces students to a range of theories and concepts to facilitate the development of referencing conventions used in health science as well as practical skills and personal attitudes necessary for success in tertiary study and eLearning. Emphasis is placed on developing the key competencies of inquiry - analysing, organising, researching and communicating information as well as problem solving.

Level Undergraduate Level 0 Preparatory subject

Restrictions

Students must be enrolled at Western Sydney The College in Foundation Studies programs

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and apply independent learning strategies to demonstrate knowledge on a health topic.
2. Communicate effectively using critical reading and writing skills within a health context using APA referencing.
3. Use technology, and a range of eLearning skills in assessment tasks to demonstrate understanding of health topics.
4. Apply critical thinking, and analyse information using research skills, to make informed decisions.
5. Apply the process of reflection to learning experiences.
6. Demonstrate an understanding of the requirements for successful presentations and develop a visual representation of research using appropriate language style.

Item	Length	Percent	Threshold	Individual/ Group Task
Reflective Presentation: Oral presentation	5 mins	10	N	Individual
Reflective Writing: Drafting a Reflective Learning Journal	800-1200 words	30	N	Individual
Scientific Writing: Researching and drafting a Scientific Essay or Report	1000-2000 words	30	N	Individual
Seminar Presentation: Researching, organising and presenting in a seminar	5 min oral presentation	30	N	Individual

Teaching Periods

NATS 1001 Concepts in Human Anatomy

Credit Points 10

Legacy Code 301126

Coordinator Hayley Green ([https://directory.westernsydney.edu.au/search/name/Hayley Green/](https://directory.westernsydney.edu.au/search/name/Hayley%20Green/))

Description This unit provides a basic understanding of human embryological development, anatomical terminology, and a range of foundation concepts in human anatomy. Students must attend a 'wet'

laboratory session where the learning of anatomy will be enhanced through the study of human cadaveric material. Wet laboratory sessions are not available on all campuses, and therefore students will need to travel to other campuses in order to attend.

School Science

Discipline Medical Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects NATS 1013 - Introduction to Anatomy
NATS 1002- Concepts in Human Anatomy (WSTC)

Restrictions Because of space and resource limitations, this subject will be restricted to students in the following programs: 3673 Bachelor of Medical Science 3682 Bachelor of Medical Science (Advanced) 3733 Bachelor of Medical Science (Forensic Mortuary Practice) 3589 Bachelor of Science (Forensic Science) 3755 Bachelor of Medical Science 3758 Bachelor of Advanced Medical Science and MT3022 Forensic Science

Assumed Knowledge

HSC Biology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use anatomical terminology correctly.
2. Describe the process of human development from fertilisation to organogenesis
3. Describe the major structural levels of organisation in the human body
4. Identify and describe the general features of the major tissue types and explain their relationship with major structural levels of organisation
5. Describe and apply the basic principles of the integumentary and endocrine systems
6. Describe and apply the basic principles of osteology: bone formation and repair, classifications and functions, names of major bones
7. Describe and apply the basic principles of arthrology: functional and structural joint classifications
8. Describe and apply the basic principles of myology: skeletal muscle classification and functions
9. Identify and describe the anatomy of the body cavities. Identify and describe the major organ systems that occupy these cavities and the physical and functional relationships of these systems to one another.

Subject Content

1. Anatomical terminology
2. Human development
3. Organisation of the human body
4. Overview of Human tissues
5. Osteology
6. Arthrology
7. Myology
8. Structure and function of the major organ systems

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz - 1x online worksheet	Available online for completion for 1 week. Opens in week 2	10	N	Individual
3x MCQ mini tests (progressive – assessing new material covered since last test. Equally weighted)	3 x 50 mins each (20% x 3)	60	N	Individual
End of session exam	40 minutes	30	N	Individual

Restrictions Students must be enrolled at Western Sydney University The College. Students enrolled in Science Extended Diploma programs 7086 or 7087 must have passed 40 credit points. Students enrolled in the combined Diploma/Bachelor programs listed below must pass all College Preparatory subjects listed in the program structure before progressing to the Year 2 subjects.

Assumed Knowledge

HSC Biology, and/or at least one first year level biology subject: Biodiversity and/or Cell Biology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use anatomical terminology correctly.
2. Describe the process of human development from fertilisation to organogenesis.
3. Describe the major structural levels of organisation in the human body.
4. Describe the general features of the major tissue types and explain their relationship with major structural levels of organisation.
5. Describe and apply the basic principles of osteology: bone formation and repair, classifications and functions, names of major bones.
6. Describe and apply the basic principles of arthrology: functional and structural joint classifications.
7. Describe and apply the basic principles of myology: skeletal muscle classification and functions.
8. Identify and describe anatomy and main functions of the major body systems: cardiovascular; respiratory; gastrointestinal; reproductive; urinary; neurological.
9. Identify and describe the general features of the major tissue types and explain their relationship with major structural levels of organisation.
10. Describe and apply the basic principles of the integumentary and endocrine systems
11. Identify and describe the anatomy of the body cavities, the major organ body systems that occupy these cavities and the physical and functional relationships of these systems to one another

Subject Content

1. Anatomical terminology
2. Human development
3. Organisation of the human body
4. Overview of Human tissues
5. Osteology
6. Arthrology
7. Myology
8. Structure and function of the major organ systems

NATS 1003 Digital Forensic Photography

Credit Points 10

Legacy Code 300874

Coordinator Robert Ebeyan ([https://directory.westernsydney.edu.au/search/name/Robert Ebeyan/](https://directory.westernsydney.edu.au/search/name/Robert%20Ebeyan/))

Description Forensic photography serves an important function within forensic science for the purpose of scene and item documentation, as well as the detection and enhancement of forensic evidence. This unit introduces the student to the fundamental principles and practices of forensic photography. Topics include: principles of light science, digital imaging, camera and lighting operations, technical photography composition, and the maintenance of image integrity.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Pre-requisite(s) NATS 1008

Equivalent Subjects NATS 2012 - Digital Forensic Photography 1

Restrictions Students must be enrolled in 3589 Bachelor of Science (Forensic Science), 3562 Bachelor of Science (Advanced Science) (Forensic Science) or MT3022 Forensic Science

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Investigate the conceptual relationship between the collection of images, their optical enhancement and the production of physical evidence
2. Evaluate how the reliability of photographic evidence may be considered in the context of an Australian legal framework
3. Relate theoretical principles of the behaviour of light and image formation to photographic optics and image analysis
4. Evaluate the utility and interpretation of imaging science principles in the context of forensic evidence
5. Describe concepts of light propagation, colour temperature, wavelength and spectral distribution of light and its collection as digital images
6. Utilise digital imaging methods and theory for the extraction of forensic evidence

- Analyse two and three dimensional images in terms of the veracity and fidelity as forensic evidence
- Discuss the validity of photographic evidence as a means of forensic examination

Subject Content

- Forensic photography principles and practices
- Digital SLR camera functions and operations, photographic lenses and image perspective
- Understanding digital imaging and image processing
- Light and photographic science principles, exposure, white balance and colour space
- Maintaining forensic digital image integrity
- Lighting and technical composition for forensic photography

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quizzes	3x quizzes (30 minutes each)	30	N	Individual
Practical Folio	Exercises during prac sessions	30	N	Individual
Practical Exam	4 hours	40	N	Individual

Prescribed Texts

NATS 1004 Drugs on Line

Credit Points 10

Legacy Code 400961

Coordinator Robyn Moroney ([https://directory.westernsydney.edu.au/search/name/Robyn Moroney/](https://directory.westernsydney.edu.au/search/name/Robyn%20Moroney/))

Description This unit deals with selected issues in drug use, misuse and abuse. An introductory section discusses mechanisms of drug action in the body and their likely effects. Some topical areas include; drugs in society (illicit drug taking and drug taking in sports), antidepressants and weight management therapeutic agents, and the exploration of complementary alternative medicines (CAMs) in Australian society.

School Nursing & Midwifery

Discipline Pharmacology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects NATS 1005 - Drugs On Line

Learning Outcomes

On successful completion of this subject, students should be able to:

- describe the principles of pharmacokinetics, pharmacodynamics, pharmacogenetics and the placebo effect
- describe safe practices in the administration of a range of therapeutic substances
- explain the dynamics and potential consequences of selected compounds commonly used to promote health, e.g. anti-obesity agents, and antidepressants, identify current management practices related to obesity and depression
- describe the common effects and misuse of performance enhancing and recreational drugs
- explain the physiological effects of recreational drug use/abuse
- identify the role of Complementary and Alternative Medicines (CAMs) within Australian society

Subject Content

Module 1: Foundations of Pharmacology

- orientation to clinical Pharmacology

- pharmacokinetics

- pharmacodynamics

- Pharmacogenetics

- Placebo effect

Module 2: Drugs in Society: Drugs in Sports and Illicit Drugs

- drugs in sport

- illicit recreational drugs and drug misuse

Module 3: Drugs Commonly Used To Promote Health

- Anti-obesity agents

- Antidepressants

- complementary and alternative medicines (CAMs)

NATS 1008 Forensic Science

Credit Points 10

Legacy Code 300806

Coordinator Alicia Haines ([https://directory.westernsydney.edu.au/search/name/Alicia Haines/](https://directory.westernsydney.edu.au/search/name/Alicia%20Haines/))

Description This unit aims to give students a basic understanding of scientific methodology as it applies to the collection, analysis and interpretation of forensic evidence. Students are introduced to a range of crime scene investigation methods and analysis methods that are used with various types of forensic evidence. The concept of individualisation is introduced and the importance of this concept in forensic science is explained. Case studies are used to explain the concepts discussed in this unit. The role of human factors is discussed, together with the importance of critically evaluating forensic evidence and the means by which it was obtained.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects NATS 1006 - Forensic Science NATS 1007 - Forensic Science

Assumed Knowledge

Basic academic skills, including the ability to write essays in English at a level appropriate to a first-year undergraduate student.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify physical evidence and determine its significance and value.
2. Explain the use of basic scientific methodology as it applies to the collection, analysis and interpretation of forensic evidence.
3. Describe the basic principles of collecting and conserving forensic evidence and give examples of standard procedures for maintaining evidence integrity and continuity.
4. Apply identification concepts and methodologies to the collection, analysis and interpretation of evidence.
5. Describe the value of trace evidence to forensic investigations, and explain the ways in which it may be collected and analysed.
6. Evaluate case studies to illustrate a range of possible deficiencies in the way in which forensic evidence may be collected, analysed and interpreted.
7. Critically evaluate the role of expert witnesses in the justice system.
8. Communicate the results of forensic investigation correctly in written form, using an appropriate language style, placing the findings in context of the forensic investigation.

Subject Content

Explanation of what is considered physical evidence and the purpose of collecting and analysing physical evidence

Basic scientific methodology as it applies to the collection, analysis and interpretation of forensic evidence

Principles of collecting and conserving forensic evidence, including crime-scene protection, contemporaneous note taking, chain of custody, and quality management

Presumptive testing and its role in crime scene investigation

An introduction to spectroscopy and its incorporation in crime scene investigation

The concepts of evidence integrity and continuity

History of the concept of identification and its development

Identification concepts and methodology, including pattern matching / comparative analysis, classification, elimination of suspects and databases

Analysis of a range of forensic evidence and its interpretation within the concept of identification

The role of the expert witness within the justice system, including presentation of evidence, and an introduction to the Australian judicial system

An introduction to contemporary issues in forensic science

Quality Control and Quality Assurance in evidence handling and forensic analysis

A range of case studies, including satisfactory and unsatisfactory use of forensic evidence

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical	~ 1000 words in total (written during the practicals)	20	N	Both (Individual & Group)
Essay	1,500 words	30	N	Individual
Final Exam	2 hrs	50	N	Individual

NATS 1009 Human Anatomy and Physiology 1

Credit Points 10

Legacy Code 400868

Coordinator Garry Niedermayer ([https://directory.westernsydney.edu.au/search/name/Garry Niedermayer/](https://directory.westernsydney.edu.au/search/name/Garry%20Niedermayer/))

Description This is the first of two subjects covering systematic anatomy and physiology at an introductory level. This subject is designed to provide students in medical science and applied health science programs with an overview of body systems and their functions to ensure a suitable basis for their future studies. The subject studies the basic concepts of biochemistry and histology, general anatomy and physiology of the major body systems including the central and peripheral nervous systems, integumentary system, musculoskeletal system (bones, muscles and joints), special senses and endocrine system. Emphasis will be placed on the interconnection and relationship between structure and function at every level of organisation.

School Science

Discipline Medical Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Restrictions

No restrictions

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify, describe and explain the basic form and function of specific anatomical structures
2. Identify, describe and explain the physiological processes of major body systems
3. Describe and explain the interrelationships within and between anatomical and physiological systems of the human body
4. Describe and explain how body systems help to maintain a constant internal environment

Subject Content

- The special Senses
- The Muscular system
- The Skeletal system
- Chemical and Cellular organisation of The human body
- Welcome to HAP1
- The Nervous system
- The Integumentary system, Tissues and Histology
- The Endocrine system
- Preparing for anatomical examinations

Coordinator Cherylea Browne ([https://directory.westernsydney.edu.au/search/name/Cherylea Browne/](https://directory.westernsydney.edu.au/search/name/Cherylea%20Browne/))

Description Human Anatomy and Physiology 2 systematically covers anatomy and physiology at an introductory level. This subject is designed to provide students in medical science and clinical health science programs, with an overview of body systems and their functions, to ensure a suitable basis for their future studies. The subject studies the basic structure and function of the major body systems such as cardiovascular, respiratory, digestive, urinary, reproductive and lymphatic. This subject also explores the physiological processes involved in the immune response, cell metabolism, regulation of body fluids and acid-base balance. Emphasis is placed on the interconnection and relationship between structure and function at every level of organisation.

NATS 1019 Scientific Literacy

Credit Points 10

Legacy Code 300811

Coordinator Luke Barnes ([https://directory.westernsydney.edu.au/search/name/Luke Barnes/](https://directory.westernsydney.edu.au/search/name/Luke%20Barnes/))

Description This unit is designed to provide students with scientific literacy, personal and employability skills and attitudes required to successfully undertake science-related undergraduate studies and to prepare for professional life. Students learn, develop and utilise academic and interpersonal methodologies and approaches within the context of applied scientific principles and take responsibility for their own learning and develop a work ethic. Students are introduced to the contestable and uncertain nature of science and the scientific method that underpins academic integrity and ethical behaviour. Activities encourage development of oral and written communication skills, self-confidence, self-efficacy, creative and critical thinking through problem solving, group process, and peer support and assessment. Academic and employability skills include scientific reading and writing, time management, researching scientific information and library skills, oral presentation, taking tests and exams, effective personal and group based learning strategies, and approaches to online learning.

NATS 1020 Scientific Literacy (WSTC)

Credit Points 10

Legacy Code 700124

Coordinator Virginia Shepherd ([https://directory.westernsydney.edu.au/search/name/Virginia Shepherd/](https://directory.westernsydney.edu.au/search/name/Virginia%20Shepherd/))

Description This unit is designed to provide students with scientific literacy, personal and employability skills and attitudes required to

successfully undertake science-related undergraduate studies and to prepare for professional life. Students learn, develop and utilise academic and interpersonal methodologies and approaches within the context of applied scientific principles and take responsibility for their own learning and develop a work ethic. Students are introduced to the contestable and uncertain nature of science and the scientific method that underpins academic integrity and ethical behaviour. Activities encourage development of oral and written communication skills, self-confidence, self-efficacy, creative and critical thinking through problem solving, group process and peer support and assessment. Academic and employability skills include scientific reading and writing, time management, researching scientific information and library skills, oral presentation, taking tests and exams, effective personal and group based learning strategies and approaches to online learning.

School Science

Discipline Other Natural And Physical Sciences

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects NATS 1018 - Professional Skills for Science LGYB 0464 - Professional Skills for Science (UWSC) NATS 1019 - Scientific Literacy

Restrictions Students must be enrolled at Western Sydney University, The College. Students enrolled in Extended Diplomas must pass 40 credit points from the preparatory subjects listed in the program structure prior to enrolling in this University level subject. Students enrolled in the combined Diploma/Bachelor programs listed below must pass all College Preparatory subjects listed in the program structure before progressing to the Year 2 subjects.

Assumed Knowledge

Basic literacy & numeracy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Communicate effectively through a written report that meets the professional standards of scientific discipline
2. Present a structured argument confidently in front of peers, as audience, and assessors
3. Apply the processes of thinking and writing reflectively to develop the ability of reflecting on their learning
4. Develop an understanding of the skills and attitudes required for group work interactions
5. Apply critical thinking to make informed decisions

Subject Content

1. Academic reading in the sciences ? understanding the question;
2. Note-taking & summarising information;
3. Getting the most from lectures, workshops, tutorials & practicals;
4. Time management & procrastination;
5. Scientific literacy ? the field of study, & the scientific method
6. Personal, academic and employability skills
7. Learning styles & theories of adult learning;
8. Writing in science ? structure, logic & constructing academic arguments;
9. Using the library - critical thinking & evaluation of research literature;
10. Using evidence to support your case - referencing and citation;
11. Plagiarism & academic integrity;
12. Other scientific writing formats ? essays, literature reviews, lab books & posters;

13. Working as a member of a group ? personal and group skills; teamwork and peer assessment.
14. Reflective thinking & problem solving;
15. Visual literacy ? using and reading graphs and charts;
16. Oral presentation skills; debating, using visual aids.
17. Taking exams ? approaches for success.
18. Creation of a peer support network - enhanced enjoyment through making friends

NATS 1021 Concepts in Human Physiology (WSTC)

Credit Points 10

Legacy Code 700295

Coordinator Virginia Shepherd ([https://directory.westernsydney.edu.au/search/name/Virginia Shepherd/](https://directory.westernsydney.edu.au/search/name/Virginia%20Shepherd/))

Description This unit introduces the core concepts and terminology necessary to provide a basic understanding of the physiological responses of the human body using relevant examples. These include the processes of homeostasis, cell-cell interactions and the physical and chemical transport processes that are required to carry out integrated functions. Students will explore these key physiological concepts through practical hands-on experiments and in interactive group work in prac and tutorial classes, respectively. The unit provides the foundation to study the physiology of human organ systems.

BIOS 1026 Introduction to Physiology (WSTC)

Restrictions Students must be enrolled at Western Sydney University, The College. Students enrolled in Extended Diplomas must pass 40 credit points from the preparatory subjects listed in the program structure prior to enrolling in this University level subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the component parts of a cell and how cell interactions occur
2. Recognise that all physiological systems are interdependent
3. Define the concept of homeostasis and explain how different mechanisms regulate its function
4. Explain physical, chemical and electrical principles of cell communication
5. Recognise structure and function relationships
6. Collect and interpret data from practical classes investigating physiological principles

Subject Content

1. Cell function, membranes, communication and their interdependence
2. Information flow:

- a. Physical principles of physiology: pressure driven (flow, viscosity and resistance) and electrically driven (force, potential, and currents)
 - b. Chemical principles of physiology: energy, intermolecular forces, gradients and kinetics
3. Homeostasis
 4. Interpretation of physiological data

Assessment

NATS 1022 Functional Anatomy

Credit Points 10

Legacy Code 401410

Coordinator Sam Merlin ([https://directory.westernsydney.edu.au/search/name/Sam Merlin/](https://directory.westernsydney.edu.au/search/name/Sam%20Merlin/))

Description From 2020 this unit replaces 400881 - Functional Anatomy. This unit covers in depth the functional anatomy of the musculoskeletal system. Special attention is given to the relationship between form and function, the terminology used to describe human movement and thorough knowledge of the bony landmarks, joints, muscle attachments, innervation, blood supply along with detailed actions of specific muscles and muscle groups. Emphasis is on a practical functional context with the relevance to clinical applications such as surface and imaging anatomy, and the anatomical basis of common injuries. Learning experience intends to stimulate proactive deep approach in learning anatomy motivated by the outcomes driven from specialist work within the Health professions.

School Science

Discipline Medical Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Pre-requisite(s) NATS 1009 OR
NATS 1010

Equivalent Subjects BIOS 1019 - Human Medical Sciences 3 BIOS 1015 - Functional Anatomy

Incompatible Subjects LGYA 5933 - Introduction to Human Anatomy and Histology BIOS 1024 - Introduction to Human Physiology BIOS 1018 - Human Medical Sciences 2 NATS 2029 - The Appendicular Skeleton

Restrictions

Students must be enrolled in Science, Sport and Exercise Science, Physiotherapy, Occupational Therapy or Podiatry due to limited Wet Anatomy laboratory space.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe and explain bone, joint and muscle tissue types, properties and functions;
2. Identify and describe in detail the muscle attachments, innervations and blood supply of the upper limb including the pectoral girdle;
3. Identify and describe in detail the muscle attachments, innervations and blood supply of the lower limb including the pelvis, and the pelvic girdle;
4. Identify and describe in detail the muscle attachments, innervations and blood supply of the trunk, and the head and the neck;
5. Identify, describe and evaluate the role of muscular activity in these regions;
6. Describe and explain the joint structure and function in these regions;
7. Describe and analyse the range of motion of the joints of the spine and extremities to functional situations.

Subject Content

The musculoskeletal system, including both the appendicular and the axial skeleton, will be studied in accordance with the following content:

- Language of Anatomy: such as the anatomical position and body movements, anatomical planes, axes, and regions;
- Bones: classifications, features, relative positions, and muscle attachments;
- Joints: classifications, structure and function, ligaments, joint mechanics including the muscles - prime movers and stabilizers;
- Muscles: muscle types, precise attachments, actions and topography;
- Nerves: major plexuses and major branches, functionally relevant muscle-nerve relationships, dermatomes and myotomes;
- Blood supply: arterial supply and venous drainage;
- Problem-based and case-based studies relevant to health professions, including examples of Daily Activities, sport exercises, common injuries, surface Anatomy and medical imaging.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

NATS 1025 Management of Aquatic Environments (UG Cert)

Credit Points 10

Legacy Code 500051

Coordinator Jack Isherwood ([https://directory.westernsydney.edu.au/search/name/Jack Isherwood/](https://directory.westernsydney.edu.au/search/name/Jack%20Isherwood/))

Description This unit introduces students to the physical, chemical and biological nature of water systems and the linkages to human activity. These linkages include a development of an appreciation of the essential services and broad uses and values of water in modern human society, and the natural environment. Students are challenged to examine the causes and effects of water pollution and environmental degradation. Students are introduced to scientific water sampling, analysis and reporting of water quality and pollution.

School Science

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects BIOS 1028 Management of Aquatic Environments
BIOS 1027 Management of Aquatic Environments BIOS 1034
Management of Aquatic Environments

Restrictions Students must be enrolled in: 7175 ? Undergraduate Certificate of Environmental Sustainability

Learning Outcomes

On successful completion of this subject, students should be able to:

- List and compare and contrast the physical, chemical and biological components of a freshwater system;
- Design an experiment to measure the condition of a freshwater system using physical chemical and biological indicators.
- Assess impacts of human development on the ecological health of freshwater aquatic environments;
- Recommend management strategies for improved freshwater environmental management.
- Explain the concept and principles of Ecologically Sustainable Development.
- Demonstrate competencies in written and oral communication, teamwork, experimental design, information literacy and data processing.
- Discuss the potential risk to human health from exposure to degraded aquatic environments.

Subject Content

- The role of water in modern society
- Water as a renewable resource
- Demands of human activity on waterways
- Ecosystems and waterways
- Disposal of waste using waterways
- Water pollution and its causes
- Water quality and recreation
- Government policy and regulation of water
- Water sample collection
- Laboratory analysis of water chemistry and biology
- Communication and teamwork
- Designing and delivering an oral presentation
- Interpretation of water quality data
- Use of field water quality meters

NATS 1026 Digital Forensic Photography (WSTC)

Credit Points 10

Legacy Code 700329

Coordinator Phillip Newman ([https://directory.westernsydney.edu.au/search/name/Phillip Newman/](https://directory.westernsydney.edu.au/search/name/Phillip%20Newman/))

Description Forensic photography serves an important function within forensic science for the purpose of scene and item documentation, as well as the detection and enhancement of forensic evidence. This unit introduces the student to the fundamental principles and practices of forensic photography. Topics include: principles of light science, digital imaging, camera and lighting operations, technical photography composition, and the maintenance of image integrity.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Pre-requisite(s) NATS 1027

Equivalent Subjects NATS 2012 Digital Forensic Photography 1
NATS 1003 Digital Forensic Photography

Restrictions Students must be enrolled in The College. Students in extended programs must pass 40 CPs of preparatory subjects prior to enrolling in this unit

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Investigate the conceptual relationship between the collection of images, their optical enhancement and the production of physical evidence
2. Evaluate how the reliability of photographic evidence may be considered in the context of an Australian legal framework
3. Relate theoretical principles of the behaviour of light and image formation to photographic optics and image analysis
4. Evaluate the utility and interpretation of imaging science principles in the context of forensic evidence
5. Describe concepts of light propagation, colour temperature, wavelength and spectral distribution of light and its collection as digital images.
6. Utilise digital imaging methods and theory for the extraction of forensic evidence
7. Analyse two and three dimensional images in terms of the veracity and fidelity as forensic evidence
8. Discuss the validity of photographic evidence as a means of forensic examination.

Subject Content

1. Forensic photography principles and practices
2. Digital SLR camera functions and operations, photographic lenses and image perspective
3. Understanding digital imaging and image processing
4. Light and photographic science principles, exposure, white balance and colour space
5. Maintaining forensic digital image integrity
6. Lighting and technical composition for forensic photography

Assessment

Legacy Code 700330

Coordinator Phillip Newman ([https://directory.westernsydney.edu.au/search/name/Phillip Newman/](https://directory.westernsydney.edu.au/search/name/Phillip%20Newman/))

Description This unit aims to give students a basic understanding of scientific methodology as it applies to the collection, analysis and interpretation of forensic evidence. Students are introduced to a range of crime scene investigation methods and analysis methods that are used with various types of forensic evidence. The concept of individualisation is introduced and the importance of this concept in forensic science is explained. Case studies are used to explain the concepts discussed in this unit. The role of human factors is discussed, together with the importance of critically evaluating forensic evidence and the means by which it was obtained.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Restrictions Students must be enrolled at the College. Students in extended programs must pass 40 CPs of preparatory subjects prior to enrolling in this unit

Assumed Knowledge

Students must be enrolled at the College. Extended students need to have passed 40 CPs of preparatory subjects in order to enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify physical evidence and determine its significance and value.
2. Explain the use of basic scientific methodology as it applies to the collection, analysis and interpretation of forensic evidence.
3. Describe the basic principles of collecting and conserving forensic evidence and give examples of standard procedures for maintaining evidence integrity and continuity.
4. Apply identification concepts and methodologies to the collection, analysis and interpretation of evidence.
5. Describe the value of trace evidence to forensic investigations, and explain the ways in which it may be collected and analysed.
6. Evaluate case studies to illustrate a range of possible deficiencies in the way in which forensic evidence may be collected, analysed and interpreted.
7. Critically evaluate the role of expert witnesses in the justice system.
8. Communicate the results of forensic investigation correctly in written form, using an appropriate language style placing the findings in context of the forensic investigation.

Subject Content

- Explanation of what is considered physical evidence and the purpose of collecting and analysing physical evidence
- Basic scientific methodology as it applies to the collection, analysis and interpretation of forensic evidence.
- Principles of collecting and conserving forensic evidence, including crime-scene protection, contemporaneous note taking, chain of custody, and quality management.
- Presumptive testing and its role in crime scene investigation
- An introduction to spectroscopy and its incorporation in crime scene investigation
- The concepts of evidence integrity and continuity.

- History of the concept of identification and its development
- Identification concepts and methodology, including pattern matching / comparative analysis, classification, elimination of suspects and databases.
- Analysis of a range of forensic evidence and its interpretation within the concept of identification
- The role of the expert witness within the justice system, including presentation of evidence, and an introduction to the Australian judicial system.
- An introduction to contemporary issues in forensic science
- Quality Control and Quality Assurance in evidence handling and forensic analysis
- A range of case studies, including satisfactory and unsatisfactory use of forensic evidence.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

Legacy Code 300937

Coordinator Sabine Piller ([https://directory.westernsydney.edu.au/search/name/Sabine Piller/](https://directory.westernsydney.edu.au/search/name/Sabine%20Piller/))

Description The unit is design to teach students what is required to successfully begin to answer a scientific question. It specially focuses on teaching students how to access and critically review literature on a given topic, chosen in consultation with a supervisor in the student's preferred field of study. Students will present their findings in both written and poster formats. Students also attend a one day workshop

where they engage with researchers in a wide variety of fields to broaden their understanding of research.

School Science

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects LGYA 6165 - Advanced Science Research Project A

Restrictions Students must be enrolled in 3562 Bachelor of Science (Advanced Science) or 3682 Bachelor of Medical Science (Advanced) or 3683 Bachelor of Natural Science (Advanced) and must have passed 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Assess research activities and research presentations
2. Access, review, assess and critically evaluate relevant research literature on a topic chosen by the supervisor
3. Communicate in written and poster formats
4. Reflect on experiences and exposure to the research environment broadly

Subject Content

1. Define research and gain a wide understanding of research
2. Find and critically assess the available literature on a given topic and write a critical review of the literature on a given topic
3. Present critical review in written and poster presentation formats
4. Engage with researchers in different fields to gain knowledge of the broader research environment

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Proposal	1,000 words	20	N	Individual
Reflection	500 words	10	N	Individual
Poster	Poster	25	N	Individual
Critical Review	2,000 words	45	N	Individual

NATS 2002 Advanced Science Project B

Credit Points 10

Legacy Code 300938

Coordinator Eleonora Egidi ([https://directory.westernsydney.edu.au/search/name/Eleonora Egidi/](https://directory.westernsydney.edu.au/search/name/Eleonora%20Egidi/))

Description This unit continues the students' training in thinking as a research scientist whilst developing analytical and critiquing skills in a range of science disciplines. Students will form hypothetical companies and develop a portfolio of scientific products that they will have to present as prospectus and in oral presentations. The students will have to assess the constraints of research having to address the WHS, gene technology, ethics and other legislative issues impacting their projects. Students will also have to manage budgets, market analyses and intellectual property issues.

School Science

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) NATS 2001

Equivalent Subjects LGYA 6166 - Advanced Science Project B

Restrictions Students must be enrolled in 3562 Bachelor of Science (Advanced Science) or 3682 Bachelor of Medical Science (Advanced Science) or 3683 Bachelor of Natural Science (Advanced Science).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Solve problems from a multi disciplinary science approach accessing knowledge previously acquired in the course.
2. Acquire and use knowledge of the constraints of research and make project based decisions.
3. Research a problem, critique information and cite the appropriate scientific literature.
4. Develop a prospectus with self reflection and application of feedback from peer assessment.
5. Communicate ideas for a business/venture capital pitch.
6. Work effectively in a team.
7. Engage with researchers in different fields to gain knowledge of the broader research environment.

Subject Content

1. The scientific process in a multi disciplinary setting to identify and address problems
2. Science funding sources, milestones, timelines and budgets

3. Ethics, WHS and intellectual property
4. Introductory marketing, SWOT analysis
5. Development of a prospectus
6. Oral presentations for a range of audiences

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Trial Group Portfolio Submission - This is put together by 4 students and individually assessed. The contribution from each student is clearly indicated and marks attributed to the appropriate individual.	maximum 750 words per student (excluding tables and figures)	20	N	Individual
Final Group Portfolio Submission - This is put together by 4 students and individually assessed. The contribution from each student is clearly indicated and marks attributed to the appropriate individual.	maximum 750 words per student (excluding tables and figures)	50	N	Individual
Oral presentation. Group assessment	15 minutes	20	N	Individual
Reflection	500 words	10	N	Individual

Prescribed Texts

NATS 2004 Anatomy of the Thorax and Abdomen

Credit Points 10

Legacy Code 300894

Coordinator Manisha Dayal ([https://directory.westernsydney.edu.au/search/name/Manisha Dayal/](https://directory.westernsydney.edu.au/search/name/Manisha%20Dayal/))

Description This unit builds on the systems anatomy studied during first year, and explores the regional anatomy of the contents and walls of the human thorax and abdominopelvic cavities. Emphasis is placed on the relationship between structures, and the nexus between form and function. Cadaveric specimens are used in this unit to illustrate the array of normal anatomical variation.

School Science

Discipline Medical Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) NATS 1001

Equivalent Subjects LGYA 5931 - Anatomy of the Thorax and Abdomen
NATS 2003 - Anatomy of the Thorax and Abdomen

Restrictions

Students must be enrolled in program code 3755 Bachelor of Medical Science, 3673 Bachelor of Medical Science, 3657 Bachelor of Medical Science/Bachelor of Information and Communications Technology, or 3682 Bachelor of Medical Science (Advanced), 3733 Bachelor of Medical Science (Forensic Mortuary Practice) or 6002 Diploma in Science/Bachelor of Medical Science

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify structures within and associated with the thoracic, abdominal and pelvic cavities on cadaveric specimens in addition to models and graphic material.
2. Explain the functional anatomy of the thoracic, abdominal and pelvic regions.
3. Analyse and explain functional and spatial relationships between structures in the thoracic, abdominal and pelvic regions.
4. Discuss the embryological development of the intraembryonic coelom, the subsequent major cavities and associated major intraperitoneal and retroperitoneal viscera.
5. Identify and discuss normal anatomical variations of the thoracic, abdominal and pelvic regions.
6. Describe common abnormalities in the thoracic, abdominal and pelvic regions, and explain their anatomical basis and functional consequences.

Subject Content

1. thoracic wall
2. thoracic cavity and viscera
3. abdominal wall
4. abdominal cavity and viscera
5. pelvic wall and floor
6. pelvic cavity and viscera
7. vasculature of thoracic, abdominal and pelvic cavities
8. innervation of thoracic, abdominal and pelvic cavities
9. muscles of the back
10. vertebral column
11. embryological development of major thoracic, abdominal and pelvic viscera

Assessment

NATS 2005 Appendicular Skeleton

Credit Points 10

Legacy Code 300898

Coordinator Manisha Dayal ([https://directory.westernsydney.edu.au/search/name/Manisha Dayal/](https://directory.westernsydney.edu.au/search/name/Manisha%20Dayal/))

Description This musculoskeletal unit builds on the basic anatomy taught during the first year, offering a regional study of the human upper and lower limbs, including their respective girdles. Emphasis is placed on the identification and description of the structures, including the correlation of structure and function. Cadaveric specimens are used to aid the learning of these regions and their three-dimensional aspect, including the anatomical variation found in these regions.

School Science

Discipline Medical Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) NATS 1013 OR NATS 1001

Equivalent Subjects NATS 2029 - The Appendicular Skeleton LGYA 5937 - The Appendicular Skeleton

Incompatible Subjects BIOS 1015 - Functional Anatomy

Restrictions Students must be enrolled in 3673 Bachelor of Medical Science, 3682 Bachelor of Medical Science (Advanced), 3733 Bachelor of Medical Science (Forensic Mortuary Practice) or 6002 Diploma in Science/Bachelor of Medical Science. Students must also have a laboratory coat in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise anatomical structures on cadaveric material, models and other graphic resources to understand the structure of the upper and lower limbs.
2. Explain the functional anatomy of the upper & lower limbs, including their girdles.
3. Discuss the embryological development of the early & final stages of the upper & lower limbs, the process of rotation and the consequences there of.
4. Describe and identify common abnormalities in both the upper & lower limbs as a result of developmental anomalies.
5. Recognize the range of normal anatomical variation within the upper & lower limbs including identification on cadaveric material.

Subject Content

1. Bones of the upper & lower limbs
2. Brachial, lumbar & sacral plexuses
3. Muscles of the shoulder region, arm, forearm & hand
4. Muscles of the gluteal region, thigh, leg & foot
5. Innervations of the upper & lower limbs
6. Vasculature of the upper & lower limbs
7. Embryological development of the upper & lower limbs
8. Surface anatomy of the upper & lower limbs

Assessment

NATS 2006 Approved Industrial Experience

Credit Points 0

Legacy Code 300655

Coordinator Vijay Jayasena (https://directory.westernsydney.edu.au/search/name/Vijay_Jayasena/)

Description This is a "Work Experience" unit, for which no student contribution fee is charged, nor will it consume Student Learning Entitlement (SLE). Students are required to obtain at least ten weeks, vocationally relevant, industrial experience during their course of study. The aim of this is to provide students with opportunities to apply theoretical concepts to real world situations, assisting their personal and professional development. Approved industrial experience aims to provide flexibility for students to pursue areas of interest and to assist in their selection of appropriate elective units in their course and to meet the professional accreditation requirements as maybe required in your key program. Students are required to organise, formalise and validate at least ten weeks of university approved industry experience within an industrial, commercial or government situation during the course of their study.

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

NATS 2008 Clinical Pharmacology

Credit Points 10

Legacy Code 400981

Coordinator Srinivas Nammi ([https://directory.westernsydney.edu.au/search/name/Srinivas Nammi/](https://directory.westernsydney.edu.au/search/name/Srinivas%20Nammi/))

Description This unit explores in depth clinical pharmacology fundamental to the practice of allied health (Physiotherapy, Podiatric Medicine and Paramedicine) and complementary medicine (Traditional Chinese Medicine). General principles of pharmacology, pharmacokinetics and pharmacodynamics will be discussed. Key drug categories affecting the main body systems will be introduced in terms of their mechanisms of action, adverse reactions and clinical applications. In the context of antimicrobial pharmacology, general concepts of microbiology will be introduced offering students an understanding of the causative microorganisms, the complex relationship between host and pathogen, the pharmacological actions of antimicrobial drugs and the principles of infection control.

School Science

Discipline Pharmacology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) NATS 2038

Equivalent Subjects LGYA 7037 - Clinical Pharmacology and Microbiology

Incompatible Subjects NATS 2026 - Pharmacology

Learning Outcomes

On successful completion of this subject, students should be able to:

1. discuss basic pharmacological concepts and ethical and legal requirements of pharmacotherapy in health settings
2. explain the principles of pharmacokinetics and pharmacodynamics
3. describe major types of drugs in each drug category
4. explain the mechanism of actions, adverse reactions and clinical applications of each drug category
5. describe the structure, function, classification, growth of microorganisms and their roles in health and disease

6. explain the principles of immunological response to infections and apply microbiology theory to the infection control
7. explain the principles of drug interactions and toxicity
8. discuss the clinical implications of drug usage and its impact on clinical practice

Subject Content

1. Introduction to pharmacology
 - drug nomenclature and Classification
 - drug formulations and administration
 - drug development, evaluation and safety
 - legal and Ethical Issues relating to pharmacotherapy
2. Pharmacokinetics
 - drug absorption, Distribution, metabolism and Excretion
3. Pharmacodynamics
 - mechanisms of drug action
4. Drug affecting central nervous system
 - drugs used for anxiety and Depression
 - Drugs used for Parkinson's disease
 - Anticonvulsants, antispasmodics and muscle relaxants
 - drugs used for multiple Sclerosis
5. Drugs affecting peripheral nervous system
 - drugs affecting adrenergic transmission
 - drugs affecting cholinergic transmission
 - drugs affecting Neuromuscular transmission
6. Drugs affecting cardiovascular system
 - Thrombolytic and anticoagulant drugs
 - Lipid lowering drugs
 - drugs used in angina
 - Antiarrhythmic drugs
 - Antihypertensive drugs
7. Drugs affecting respiratory system
 - drugs used for Asthma
 - drugs used for COPD and emphysema
 - drug used for Cough
8. Drugs used for diabetes
 - Hypoglycaemic drugs
 - insulin
 - treatment of diabetic neuropathy
9. Drugs affecting gastrointestinal system
 - drugs used for peptic ulcer disease
 - drugs used for Constipation and Diarrhoea
 - drugs used for nausea and Vomiting
10. Drugs affecting urinary system
 - Diuretics
 - drugs for Urinary incontinence
11. Drugs for pain and inflammation
 - Opioids
 - Nonsteroidal Anti-Inflammatory drugs
 - Corticosteroids and antirheumatic drugs
12. Antimicrobial drugs and infection control
 - introduction to microbiology
 - Bacteriology
 - Mycology
 - Virology
 - infection, spread of infection and infection control
 - mechanism of action of antimicrobial chemotherapy
 - antibiotics and synthetic antibacterial drugs
 - Antiviral drugs
13. Drug interactions and toxicity
 - mechanisms of drug toxicity
 - principles of drug interactions
14. Clinical implications of drug usage (including children and the elderly) on clinical practice of physiotherapy, podiatry and TCM

NATS 2010 Crime Scene Investigation

Credit Points 10

Legacy Code 300873

Coordinator Brenden Riley ([https://directory.westernsydney.edu.au/search/name/Brenden Riley/](https://directory.westernsydney.edu.au/search/name/Brenden%20Riley/))

Description A substantial amount of forensic evidence used in the prosecution of criminal cases is initially established at the crime scene. Recognising, detecting, recovering, preserving and recording this evidence forms a critical function within forensic science and criminal investigation. This unit introduces the student to a range of crime scene practices that provides the knowledge and skill to interpret a complex scene with voluminous detail, into a more specifically targeted range of forensic evidence items. This unit will explore aspects of crime scene investigation including; crime scene processes, recognition of evidence, documentation of crime scenes, evidence detection and enhancement, and maintaining evidence integrity. It also introduces professional practices associated with maintaining evidence integrity and continuity.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) NATS 1008 AND NATS 1003

Equivalent Subjects NATS 2011 - Crime Scene Investigation

Incompatible Subjects NATS 2014 - Evidence Crime Scene Management

Restrictions Students must be enrolled in 3589 Bachelor of Science (Forensic Science), 3562 Bachelor of Science (Advanced Science) (Forensic Science) or MT3022 Forensic Science

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe what constitutes the determination of a crime scene.
2. Articulate the concepts of the CSI Effect within the criminal justice system.
3. Apply a range of evidence enhancement and preservation methods.
4. Apply professional practices associated with maintaining evidence integrity and continuity.
5. Conduct a complete forensic examination of a crime scene.
6. Apply a range of field-portable equipment and interpret information provided by these techniques in relation to the crime scene.
7. Report evidence and conclusions from crime scene investigations accurately and correctly in an appropriate format.

Subject Content

1. Crime scene investigation (CSI) principles
2. Scene documentation paradigm involving contemporaneous note taking, sketching and photography
3. Detection, collection and preservation of evidence
4. Documenting identification features in post mortem examinations
5. Application of CSI principles to outdoor scenes
6. Problems that arise from media portrayals of forensic procedures (? eCSI effect?f) within the criminal judicial system
7. Biological evidence
8. Blood reagents and evidence enhancement
9. Presumptive testing of scene evidence, including the use of field-portable equipment

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Case file / folio for one of the crime scenes conducted during the practicals.	Ca. 300 words, written during a 3-hour practical	20	N	Both (Individual & Group)
Quiz	30 questions, 30 2 minutes per question (1 hour in total)		N	Individual
Simulated crime scene	4 hours	50	Y	Individual

NATS 2015 Evidence and Crime Scene Management

Credit Points 10

Legacy Code 300935

Coordinator Robert Ebeyan ([https://directory.westernsydney.edu.au/search/name/Robert Ebeyan/](https://directory.westernsydney.edu.au/search/name/Robert%20Ebeyan/))

Description Evidence and Crime Scene Management is a unit designed to provide students with an understanding and knowledge of critical principles associated with the management of evidence and sites considered as crime scenes. The unit is particularly designed for students wishing to enter professional domains involving; policing, nursing, animal welfare, workplace investigators, health inspectors, WHS officers, fire investigation, council and park rangers, social welfare, environmental protection, fraud and insurance investigation and others where the collection of evidence is a component of professional practice within the discipline. The unit covers topics such as; recognition of various evidence, the recording and documentation of evidence, crime scene or site photography, managing scenes, maintaining evidence integrity, sexual assault evidence, the reporting and presentation of evidence in court and others.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects NATS 2014 - Evidence and Crime Scene Management

Incompatible Subjects NATS 2010 - Crime Scene Investigation

Restrictions Successful completion of 40 credit points. Students enrolled in 3589 Bachelor of Science (Forensic Science) or in MT3022 Forensic Science are not eligible to take this subject as an elective.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify various types of evidence and explain the relevance of each evidence type to forensic investigations.
2. Differentiate identification and elimination evidence.
3. Explain the methods for preservation, documentation and collection of evidence that are utilised by crime scene investigators.
4. Describe how evidence is handled to ensure that evidence integrity and continuity are maintained from the scene to presentation in court.
5. Understand the impact of individual photographic principles on image quality and effectively document a crime scene by implementing this knowledge.

6. Carry out specific techniques in order to enhance latent evidence.
7. Demonstrate a range of communication skills necessary for preparing and presenting evidence in a court environment.
8. Describe the value of ethical conduct in relation to providing evidence to a legal landscape (criminal and civil).

Subject Content

1. What is forensic evidence?
2. Understanding identification and elimination evidence.
3. Defining and establishing a crime scene or accident site.
4. Management of evidence integrity and continuity.
5. Maintaining the integrity of crime scenes and minimising contamination.
6. Methods of preserving, documenting and collecting physical evidence.
7. Photographing crime scenes and other sites.
8. Photographic interpretation and evidence (including the detection of forgeries).
9. Physical evidence found at crime scenes (footwear impressions, tyre impressions, fingerprinting, tool marks etc.).
10. Sexual assault evidence.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

NATS 2019 Forensic and Environmental Analysis

Credit Points 10

Legacy Code 300843

Coordinator Mark Williams ([https://directory.westernsydney.edu.au/search/name/Mark Williams/](https://directory.westernsydney.edu.au/search/name/Mark%20Williams/))

Description This unit extends the student's knowledge and experience of analytical techniques by applying them to forensic investigations and analysis in the environmental and food sciences. It will provide an understanding of the chemical and physical principles underlying the use of instrumentation in chemical analysis. Topics include principles of spectroscopic techniques, separation methods; sample collection and storage; presumptive testing; modern chemical instrumentation for gas and liquid chromatography; atomic spectroscopy; mass spectroscopy; x-ray methods and spectroscopic methods.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) CHEM 1003 OR CHEM 1008

Equivalent Subjects NATS 2018 - Forensic and Environmental Analysis

Incompatible Subjects CHEM 2001 - Analytical Chemistry and CHEM 2002 - Analytical Chemistry 2

Assumed Knowledge

An understanding and competence with basic chemical principles including SI units, chemical symbols, formulas and equations, stoichiometry, the mole concept, equilibria, acids and bases, pH and electrochemistry. Introductory statistics – mean, standard deviation, distributions, linear regression.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a familiarity with a range of instrumental analytical techniques that are relevant to forensic and environmental investigations.
2. Describe the underlying chemical principles of chromatography including the basic theory and practical applications.
3. Show an understanding of instrumental analysis, the factors which govern its application in real-world situations and the limitations and interferences of specific techniques.
4. Explain how presumptive tests are used in forensic and environmental analyses.
5. Discuss the concepts in designing experiments for analysing forensic, environmental and food samples including principles of sampling and sample preparation.
6. Conduct instrumental investigations to determine concentrations of specific analytes relevant to either a forensic or environmental analysis.
7. Perform result analysis of experimental data including error calculation by applying relevant statistics. analyse and graph data and draw appropriate conclusions from data.
8. Record and communicate the results of their investigations demonstrating awareness of the conventions of scientific writing and graphical presentations.

Subject Content

1. Introduction to instrumental analysis - comparison with wet chemical methods

2. Basic principles of chromatography - high performance liquid chromatography, gas chromatography
3. Experimental design, sampling, sampling techniques, sample preparation
4. Atomic spectroscopy - atomic absorption, atomic emission, ICP
5. Spectroscopic techniques - UV/visible, IR spectroscopy
6. Mass spectrometry
7. Statistical methods relevant to linear regression based analytical methods
8. Presumptive testing

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Practical	6 practicals (4 hours in duration), 3 workshops (2 hours in duration)	30	N	Individual
Essay	2,000 words	20	N	Individual
Participation	Weekly	10	N	Individual
Final Exam	2 hours	40	N	Individual

Coordinator Robert Ebeyan ([https://directory.westernsydney.edu.au/search/name/Robert Ebeyan/](https://directory.westernsydney.edu.au/search/name/Robert%20Ebeyan/))

Description Imaging science is a key area within the forensic sciences. This unit explores the application of imaging science and forensic photography practices to detect, preserve, enhance and examine forensic evidence. The unit focuses on optical and digital enhancement methods that provide essential non-destructive methods for evidence preservation and analysis. The unit provides the learner with necessary theoretical concepts of imaging science that underpin the practice of forensic photographic evidence.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) NATS 1008

Equivalent Subjects NATS 2013 - Digital Forensic Photography 2 NATS 2022 - Imaging Science and Photographic Evidence

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Investigate the conceptual relationship between the collection of images, their optical and digital enhancement and the production of data.
2. Evaluate the reliability of image data and how it may be considered in the context of scientific enquiry and the legal justice system.
3. Relate theoretical principles of the behaviour of light and image formation to image analysis.
4. Apply optical and digital imaging methods and theory for the enhancement of scientific evidence.
5. Explain imaging science principles such as photoluminescence, chemiluminescence, absorption, reflection and transmission modes of imaging in the context of forensic evidence.

Subject Content

1. Concepts of photographic evidence within the legal justice system
2. Principles of light and colour
3. Photographic optics and filters
4. Optical enhancement of physical evidence
5. Digital enhancement of photographic evidence
6. Specialised photographic techniques for forensic evidence
7. Evaluation of the photographic image
8. Current developments in research and technology

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	20 minutes	10	N	Individual
Portfolio	Compendium of photographs acquired throughout practicals (up to 35 images)	10	N	Individual
Poster	A digital poster (1,000 words)	25	N	Individual
Reflection	A series of short answer questions based on practical rotations	15	N	Individual
Final Exam	2 hours	40	N	Individual

Credit Points 10

Legacy Code 300931

Coordinator Michelle Ryan ([https://directory.westernsydney.edu.au/search/name/Michelle Ryan/](https://directory.westernsydney.edu.au/search/name/Michelle%20Ryan/))

Description Science and the scientific process of discovery have been successful in offering explanations for the world we live in. Due to scientific advances, we have eradicated some disease, explored the moon and the deepest parts of our oceans and created communication across distances on the planet previously unimaginable. We now face the major challenge of creating a future world which is sustainable for life on Earth. Solving our contemporary complex human and environmental issues to create a sustainable future, however, requires integrative and multidisciplinary research frameworks, an understanding of the relationship between science and society including cultural, social, economic and political and ethical factors. Students will critically examine such perspectives in a series of contemporary 'real-life' case studies such as climate change, medical breakthroughs, biodiversity loss, environmental sustainability and human-animal interactions. They will undertake research into the relationship of science integrated with society, and the uncertainty and bias of evidence in decision making.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects NATS 1011 - Integrated Science AGEN 2001 - Science in Society NATS 2024 - Integrated Science (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the nature of Science, the scientific process and the contemporary issues/mega problems of society and the role of science
2. List and explain the main fallacies used in arguments and distinguish between expert and novice understandings
3. Identify and describe a scientifically controversial topic and logically argue solutions from multiple perspectives (including ethical and social, political) to present a considered opinion
4. Describe the ways in which scientists interact with each other, policy makers, managers and the wider community in contemporary 'real-life' issues
5. Describe the cultural, social, economic and political factors underlying important scientific breakthroughs
6. Critically analyse and communicate a complex contemporary issue integrating scientific ideas and express the findings for a non-scientific audience in the media

Subject Content

1. Nature of science and scientific research including bias, complexity and uncertainty
2. Experts and knowledge ? the role of science in planning and decision making processes
3. Arguments and fallacies
4. Understanding of the contemporary issues/mega problems of society
5. Historical and policy context of science in society
6. Relationships between science and society including cultural, economic, political perspectives
7. Communication of science to the wider community

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Case Study Report	1,500 words	40	N	Individual
Case Study Electronic Presentation	Various dependent on media selected: Video – 5 minutes, Written text (blog/website etc.) - 1000 words, Social media page – 15 posts	30	N	Group
Final exam	2 hours	30	N	Individual

Equivalent Subjects NATS 1011 - Integrated Science 1 AGEN 2001 - Science in Society NATS 2023 - Integrated Science

Restrictions Students must be enrolled at Western Sydney University, The College. Students enrolled in Extended Diplomas must pass 40 credit points from the preparatory subjects listed in the program structure prior to enrolling in this University level subject. Students enrolled in the combined Diploma/Bachelor programs listed below must pass all College Preparatory subjects listed in the program structure before progressing to the Year 2 subjects.

Assumed Knowledge

Oral and written communication skills.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the nature of Science, the scientific process and discuss the role of science in society.
2. Discuss how different disciplines and perspectives integrate to seek sustainable solutions to human and environmental issues.
3. Identify and research a scientifically controversial topic and logically argue solutions from multiple perspectives (including ethical, social and political) to present a considered opinion.
4. Describe the ways in which scientists interact with each other, policy makers, managers and the wider community in contemporary 'real-life' issues.
5. Describe the cultural, social, economic and political factors underlying important scientific breakthroughs.
6. Critically analyse a complex contemporary issue integrating scientific ideas and express the findings for a non-scientific audience in the media.

Subject Content

1. Nature of science and scientific research including bias, complexity and uncertainty.
2. Understanding complexity theory ? e.g. cynefin framework
3. Historical and policy context of science in society
4. Contemporary issues in modern science
5. Integrated and multidisciplinary framework required for sustainable solutions
6. Relationships between science and society including cultural, economic, political perspectives
7. Experts and knowledge ? the role of science in planning and decision making processes
8. Communication of science to the wider community

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	45 minutes	15	N	Individual
Critique	500 – 600 words	20	N	Individual
Scientific Report	800-1000 words	30	N	Individual
Powerpoint presentation or video	10 minutes presentation	35	N	Individual

NATS 2025 Natural Science Research Methods

Credit Points 10

Legacy Code 300932

Coordinator Clarissa House ([https://directory.westernsydney.edu.au/search/name/Clarissa House/](https://directory.westernsydney.edu.au/search/name/Clarissa%20House/))

Description This unit aims to introduce students to the theories and practices underpinning the scientific processes. Students will learn to identify an issue, review the literature to identify gap(s) and formulate a hypothesis or a question to address the gap(s). Students will then explore research methods and designs to safely and ethically conduct an experiment or study to collect data to answer the hypothesis/question. They will also learn to analyse and interpret the data and report on the findings of the research in a written format. The unit is structured so that lectures will provide theoretical expertise and workshops will reinforce student learning with practical experience. This knowledge and skills are essential for stage 3 units and a career in science.

School Science

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects LGYA 5920 - Research Communities and their Environments NATS 2028 - Research Methods LGYA 6151 - Animal Research

Restrictions Successful completion of 60 credit points at Level 1.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify an issue and formulate research aim and research hypothesis or question
2. Gather, critically evaluate and synthesise information from a range of sources
3. Design and conduct an experiment or study to test a hypothesis or answer a research question
4. Identify and address potential risks and ethics relevant to a research project
5. Collect data, conduct simple analysis, present results of the experiment or study, discuss the findings and draw conclusions
6. Report on a research project in the written format

7. Reflect on practices and experiences for personal and professional development

Subject Content

1. Conceptualising a research project:
 - what do You see as A question (theoretical or applied): usually derived from observation in The work place, everyday life, nature, news articles, magazines & journals
 - Background reading to confirm that is A Problem worthy of research: introduce students to different types of literature
 - Skills to learn: library searches; assessing literature through skim reading of publishers, tittles, abstract, headings/sub-headings & captions
2. Locating, reviewing the literature to identify gaps:
 - what is A lit Review, how is It conducted
 - what are gaps and how to identify them (from what is known and unknown)
 - skills to learn: organising own research database, making notes and mind-Mapping to identify themes of what is known, what is not known, and gaps
3. Identifying the aim of the research, formulate hypothesis or research question(s):
 - structure of A Hypothesis/ question(s)
4. Research methods and research designs:
 - data sources (i.e. Surveys, quantitative, quantitative etc.)
 - data collection tools (i.e. sample size, units of replication etc.)
5. Ethical and regulatory frameworks involved in research on humans and animals:
 - Skills to learn: undertaking and documenting risk assessment as appropriate to their proposed research activities; completing an ethical application
6. Managing a project:
 - Skills to learn: use of Gantt chart; recording and protecting data
7. Types of data and basic methods to analyse data:
 - what statistical test is appropriate for The data?
 - what The data tell You in relation to The Hypothesis or questions ? tools to present results (tables, Graphs, stats)
 - what are your conclusions based on The Hypothesis or questions?
 - how do The conclusions relate to current research literature? are they consistent or expand on The literature? are they inconsistent and why?
 - skills to learn: Integrating Numerical evidence to support arguments
8. Academic writing:
 - structure of A research proposal and A research report
 - Reflections for personal and professional development: A framework with guided questions for Reflections

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Legacy Code 300877

Coordinator Maggie Davidson ([https://directory.westernsydney.edu.au/search/name/Maggie Davidson/](https://directory.westernsydney.edu.au/search/name/Maggie%20Davidson/))

Description Toxicology is the study of toxicants or poisonous substances: their nature, effects on the human body, and on human, animal and plant populations. Poisonous substances have been used by humans from antiquity for both beneficial and malevolent purposes and today a vast array of toxic industrial chemicals are produced. Both accidental (workplace and environmental) and intentional (forensic) exposure are covered, in terms of group properties, chronic and acute, toxicity, exposure potential, health impact and intervention

are presented through forensic case studies. Students carry out a toxicology audit of an operation or premises of their choice.

School Science

Discipline Pharmacology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects NATS 2030 - Toxicology

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe groupings of toxic substances based on their chemical or physiological properties, and identify the most important substances within each group.
2. Compare and contrast the chemistry and pathophysiology of selected substances.
3. Describe the issues in workplace exposures to selected toxic substances in workplace, residential and recreational environments.
4. Describe the origin, impact and management of selected toxic substances in the environment and workplace.
5. Interpret forensic poisonings (both personal and environmental) in terms of health outcomes, motives, opportunities, means and forensic detection, using a range of relevant case histories.
6. Discuss case studies and draw conclusions with relevance to current Australian settings and circumstances.
7. Undertake a toxicology audit of a selected operation or activity of interest or importance to the student, including associated substances, identification of those presenting the greatest hazard under pertaining conditions, description of the chemistry and pathophysiology of those substances, and propose targeted recommendations for risk reduction.
8. Write a scientifically-accountable report describing findings in terms of the audit with targeted and well-reasoned recommendations for risk reduction.

Subject Content

1. Essential toxicological concepts
2. Metals and metalloid salts
3. Organic solvents and petroleum distillates
4. Food toxins and pesticides
5. Gases and air pollutants
6. Particulates and fibres
7. Corrosives
8. Carcinogens, mutagens and teratogens (agents of birth defects)
9. Poisons of war and bioterrorism
10. Exposure routes, forensic testing and forensic case studies
11. Professional auditing of toxic substances

Assessment

NATS 2032 Work Integrated Learning in Science

Credit Points 10

Legacy Code 301161

Coordinator Christopher Jones ([https://directory.westernsydney.edu.au/search/name/Christopher Jones/](https://directory.westernsydney.edu.au/search/name/Christopher%20Jones/))

Description This unit will provide second and third year science students with an opportunity to undertake a short work placement within a professional organisation. The placement will allow students to observe and develop professional skills and behaviour and integrate theoretical and practical science knowledge and conventions into a real world setting. During the semester preceding the placement students need to complete three career preparation workshops run by Western Sydney University Careers and attend a Pre-Placement seminar run by the unit coordinator. These will aid students in finding their own placement. Prior to the placement, and in consultation with the unit coordinator and the workplace supervisor, students will develop a Professional Task to accomplish during the placement. The task will enhance their workplace skills and highlight how their science knowledge can be adapted and integrated into a professional career. The unit aims to promote greater engagement with career planning and progression and hence improve job readiness.

School Science

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Restrictions Students must have successfully completed 30 credit points at level 2; must have a GPA > 5; must have completed the three Careers Workshops (http://www.westernsydney.edu.au/careers/home/students_grads/workshops) ? **g**Applying for work: Resume and cover letter writing **h**, **g**Finding Work **h** and **g**Interviewing for Work **h** - in order to generate a career e-portfolio; and must have developed a plan for the Professional Task.

Assumed Knowledge

Prior to entering the subject, the student must have completed three careers workshops (generating a 'career e-portfolio') and have attended a pre-placement workshop. At the workshop the responsibilities, requirements and assessment of the placement will be discussed. Additionally, at the workshop students will be guided on how to prepare their plan for the Professional Task.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain how the work placement has contributed to their career planning and job readiness.
2. Identify how Western Sydney University science graduate attributes are applied to the workplace.
3. Assess workplace culture and etiquette and critically reflect on how they contribute to organisational success.
4. Evaluate workplace organisational and reporting structures and explain the placement's role and responsibilities within the organisation.
5. Critically reflect on how personal attributes contribute to the workplace.
6. Integrate prior scientific learning into a professional role.

Subject Content

1. Work Placement: ~110 hours of supervised work experience
2. Integration of scientific theory with real world applications
3. Workplace organisational structures
4. Professional behaviour and communication
5. Professional roles and opportunities available to science graduates
6. Career planning

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Credit Points 10

Legacy Code 301267

Coordinator Gabriel Perrone (<https://directory.westernsydney.edu.au/search/name/Gabriel Perrone/>)

Description This unit will develop a comprehensive understanding of eukaryotic cellular components, with an emphasis on animal cells. The unit will focus on distinct functions of organelles/cellular structures, the relevant mechanisms involved, and the broader role of such functions in a whole cell context. The unit will encompass a detailed study of cellular components including: the nucleus, ribosomes, the endoplasmic reticulum, the Golgi apparatus, lysosomes, the plasma and organellar membranes, mitochondria, peroxisomes and the cytoskeleton. This unit will also investigate how organellar function is relevant to an appropriately functioning cell, and how cell dysfunction impacts the cell and leads to disease. The unit covers contemporary techniques used to study cells including: cell culture, advanced cell imaging, a range of investigative and analysis techniques, and additional experimental approaches enabling thorough understanding of the incredibly fascinating yet complex nature of cells.

NATS 2035 Human Systems Physiology 2

Credit Points 10

Legacy Code 301270

Coordinator Kayte Jenkin ([https://directory.westernsydney.edu.au/search/name/Kayte Jenkin/](https://directory.westernsydney.edu.au/search/name/Kayte%20Jenkin/))

Description Human Systems Physiology 2 builds upon the core concepts and terminology introduced in Concepts in Physiology and Human Systems Physiology 1, focusing on the function of visceral organs and explore how these organ systems are regulated, integrated, and function within the human body. The focus will be on the lymphatic, immune, digestive, renal and reproductive systems. Students will collect, interpret and analyse data to develop an understanding of the physiological responses of the human body.

School Science

Discipline Medical Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) BIOS 1033

Incompatible Subjects BIOS 1022 - Introduction to Human Biology

Assumed Knowledge

Concepts in physiology topics such as physical and chemical principles of physiology, homeostasis and Human Systems Physiology 1, a subject which will cover the nervous, endocrine, cardiovascular, muscle and respiratory systems. Human Systems Physiology 2 focuses on visceral organ systems, however, knowledge developed in Human Systems Physiology 1 (particularly regarding how the nervous and endocrine systems regulate organ systems) will help students in their understanding of the content covered in Human Systems Physiology 2.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify, describe and explain the functions and controls of the lymphatic, immune, digestive, renal and reproductive systems of the body.
2. Describe how the function of different organ systems of the body integrate in order to maintain homeostasis (with emphasis on visceral organs).
3. Collect, interpret and discuss data from practical and learning workshop classes in order to investigate physiological principles.
4. Communicate effectively by listening, speaking and participating in discussion of physiology.

Subject Content

-Blood and immune systems
-Lymphatic system
-Renal system
-Digestive system
-Reproductive system

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Participation	3 hours	10	N	Individual
Quiz	20 minutes	20	N	Individual
Final Exam	2 hours	45	N	Individual
Report	1,000 words	25	N	Individual

NATS 2036 Immunology

Credit Points 10

Legacy Code 301354

Coordinator Thomas Millar ([https://directory.westernsydney.edu.au/search/name/Thomas Millar/](https://directory.westernsydney.edu.au/search/name/Thomas%20Millar/))

Description From 2020 this unit replaces 300847 - Immunology. This unit aims to provide students with an understanding of the structure and function of the immune system, and particularly highlights common and unique systems that exist across kingdoms and phyla. A foundation is built by examining the organs and cells of the human immune system. The peculiarities associated with the immune systems of marsupials, due to their early developmental stage at birth, will also be examined. Students will also develop laboratory expertise that involves immunological principles, investigative proficiency, and science communication skills, leading to understanding the knowledge base through self-learning and group work.

School Science

Discipline Medical Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) BIOS 2014

Equivalent Subjects LGYA 5863 - Immunology BIOS 2020 - Immunology

Incompatible Subjects LGYA 5857 - Cell Signalling and Molecular Immunology

Restrictions Successful completion of 60 credit points at Level 1 and 20 credit points at Level 2.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and describe the structure and function of lymphatic tissue
2. Describe the processes of adaptive immunity
3. Describe the defensive mechanisms and signal pathways that are relevant to nonspecific immunity
4. Explain the processes from pathogen recognition to immune response
5. Analyse the relationship between the immune defences of different kingdoms and phyla

6. Synthesise the relationships between specific immune defence mechanisms across kingdoms or phyla
7. Conduct laboratory investigations in immunology safely and ethically using appropriate techniques and recording results formally according to the conventions of the discipline
8. Communicate the results of scientific investigations in written and spoken formats
9. Work within a group environment towards a shared goal

Subject Content

Adaptive immunity (restricted to vertebrates)

Haemopoietic tissue, lymphatic organs and lymphoid tissues: anatomy, histology and function

Cells of the immune system, histology, physiology and function

Common mechanistic and molecular systems between plants

invertebrates and vertebrates

Cytokines - interleukins (Interleukin-1?), tumour necrosis factor alpha, tumour growth factor beta

Defensive mechanisms and signal pathways that are relevant to nonspecific immunity

Integuments

Antibacterial peptides and proteins (antimicrobial proteins, lysozyme, phosphatases trypsin cathepsin proteases and mucus)

Overview of pathogen detection and response (pattern recognition receptors such as MAMPS, PAMPS)

Chemical mediators of immunological defence (immunoglobulins, pentraxins, complement, eicosanoids)

Inflammation

Mechanisms for suppression of host defences: e.g. resistance genes (R genes) in plants, leucine-rich repeats (LRR) pathogen recognition specificity domains which occur in plants, insects, jawless vertebrates and mammals

complement (animals): salicylic acid, jasmonic acid or jasmonate, ethylene, reactive oxygen species, and nitric oxide (plants)

Systemic acquired resistance, and adaptive immunity

Teaching Periods

NATS 2037 Pathological Basis of Disease

Credit Points 10

Legacy Code 301356

Coordinator Sindy Kayillo ([https://directory.westernsydney.edu.au/search/name/Sindy Kayillo/](https://directory.westernsydney.edu.au/search/name/Sindy%20Kayillo/))

Description From 2020 this unit replaces 300889 - Pathological Basis of Disease. Pathology is the study of disease. Students will gain an understanding of human pathogenesis, general and systems pathological processes, and the scientific basis of diagnostic and treatment options. The unit also introduces normal human tissue and organ histology, and examines histopathological changes evident in disease states.

School Science

Discipline Medical Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Restrictions Students must be enrolled in 3577 Bachelor of Medical Science, 3657 Bachelor of Medical Science/Bachelor of Information and Communications Technology, 3673 Bachelor of Medical Science,

3682 Bachelor of Medical Science (Advanced), or 3674 Bachelor of Medical Science (Nanotechnology) or 6002 Diploma in Science/ Bachelor of Medical Science Note: Enrolment of students in other programs may be approved by the subject Coordinator for the Summer session, subject to vacancies and meeting equivalent prerequisite knowledge. Please lodge a Rule Waiver request for enrolment.

Assumed Knowledge

Knowledge of cell structure and function of cellular components (consistent with the subject Cell Biology); Knowledge of biochemical pathways and energy production (consistent with the subject Functional Proteins and Genes).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use appropriate scientific terminology in the context of histology and pathology
2. Identify and discuss features of normal and diseased tissue
3. Explain disease aetiology, pathogenesis, progression, associated diagnostics and therapeutic interventions
4. Explain anatomical and physiological consequences of disease
5. Apply problem solving skills to interpret clinical and diagnostic findings
6. Explain scientific basis of diagnostics and therapeutic interventions

Subject Content

1. Intro to pathology & cause of disease
- 1.2 Tissue and Organ Histology
2. Cell and Tissue growth
3. Responses to Injury
 - 3.1 Water homeostasis & oedema
4. Acid-base homeostasis
5. Carcinogenesis & neoplasia
6. Ischaemia, infarction & inflammation
7. Immune responses & hypersensitivities
8. Cardiovascular pathology
9. Immunopathology
10. Respiratory pathology
11. GIT pathology
12. Nervous system pathology
13. Ageing & death

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Intr semester 50 minutes test 1		20	N	Individual
Intr semester 50 minutes test 2		20	N	Individual
Pre-class exercises x 4	approx 2 hours work each	20	N	Individual
Final examination	2 hours	40	N	Individual

Level Undergraduate Level 2 subject

Pre-requisite(s) NATS 2038

Incompatible Subjects BIOS 2028 - Pathological Basis of Disease or NATS 2037 Pathological Basis of Disease

Learning Outcomes

On successful completion of this subject, students should be able to:

1. explain pathophysiological processes underlying disease
2. apply knowledge of pathophysiological concepts to a range of case studies
3. identify and discuss pathophysiological manifestations of disease states
4. apply problem solving skills in the analysis of case studies
5. relate clinical and laboratory diagnostic findings to pathophysiological processes
6. hypothesise likely outcomes of disease processes
7. explain the basis for common therapeutic interventions

Subject Content

1. Cardiovascular System
 - Atherosclerosis and ischaemic heart disease
 - Diseases of endocardium, myocardium and pericardium
 - Heart valves dysfunctions
 - Heart failure
 - Hypertension
 - Diseases of arteries
 - Diseases of veins
 - Circulatory derangements: congestion, hyperaemia, oedema
 - Haemorrhage
 - Shock
2. Respiratory System
 - Obstructive lung disorders: asthma, COPD, bronchiectasis
 - Restrictive lung disorders
 - Cystic fibrosis
 - Common respiratory infections

- Pneumonias
- Tuberculosis
- Pulmonary embolism
- Respiratory failure and oxygen therapy
- Diseases of pleura: pleuritis and pneumothorax
- Lung cancer
- 3. Neurological System
 - Brain trauma
 - Spinal cord injury
 - Seizures
 - Cerebrovascular accident
 - Dementia syndromes
 - Demyelinating CNS diseases
 - Cerebral palsy
 - Degenerative brain diseases
- 4. Musculoskeletal System
 - Inflammatory joint disorders
 - Degenerative joint disorders
 - Metabolic disorders of bones and joints
 - Bone fractures
 - Musculoskeletal injuries
 - Low back pain
 - Disorders of muscles: myasthenia gravis and muscular dystrophies
 - Fibromyalgia

Assessment

NATS 2040 Physical Activity, Nutrition and Health

Credit Points 10

Legacy Code 401411

Coordinator Emma George (https://directory.westernsydney.edu.au/search/name/Emma_George/)

Description From 2020 this unit replaces 400892 - Physical Activity, Nutrition and Health. This unit examines the interdependence between physical activity, nutrition and health and the role of key lifestyle behaviours in improving health outcomes, longevity, and quality of life. Throughout this theoretical and practical unit, students explore personal and socio-cultural health issues, and identify how these health issues can be addressed in a proactive, holistic, and sustainable manner at an individual and population level.

School Health Sciences

Discipline Medical Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects HLTH 1007 - Nutrition Physical Activity Mental Health HLTH 2019 - Physical Activity Nutrition and Health

Restrictions

Students must be enrolled in program 4659 - Bachelor of Health Science (Personal Development, Health and Physical Education), 4742 - Bachelor of Health Science (Health and Physical Education)-Pathway to Teaching (Secondary), 4747 - Bachelor of Health Science (Health and Physical Education) or 6001 Diploma in Health Science/Bachelor of Health Science (Health and Physical Education)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the nature, and justify the choice of Australia's health priorities in relation to nutrition, physical activity and health.
2. Create, discuss and analyse scenarios that illustrate how physical activity and dietary choices are influenced by cultural and social values.
3. Evaluate personal actions and support strategies in response to personal health challenges.
4. Evaluate the nature of the relationship between physical activity, nutrition and health from a socio-cultural perspective.

- Examine and reflect on the social inequities impacting on physical activity, nutrition and health across the lifespan.
- Analyse, evaluate and implement the latest research evidence and guidelines within and between physical activity, nutrition and health.

Subject Content

- Australian national health priorities and policies
- national physical Activity, sedentary behaviour and nutrition guidelines
- promoting lifelong physical Activity and positive health behaviours
- socio-cultural Issues, current research and relationships between physical Activity, nutrition and health
- strategies to promote lifelong healthy attitudes and practices

NATS 2041 Experimental Foods

Credit Points 10

Legacy Code 301455

Coordinator Christine Hutchison ([https://directory.westernsydney.edu.au/search/name/Christine Hutchison/](https://directory.westernsydney.edu.au/search/name/Christine%20Hutchison/))

Description Developing innovative foods requires an understanding of food science and the principles that are applied when experimenting with food ingredients and processes. This unit will enable you to gain the scientific knowledge and methodology skills the food industry employs in the sustainable production of nutritious, healthy and appealing foods. Understanding the physical and chemical properties of, and current process techniques to produce different food types, will enable you to develop attributes required by the world's largest employment sector.

School Science

Discipline Food Science and Biotechnology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Restrictions Must have passed 100 credit points of subjects

Learning Outcomes

On successful completion of this subject, students should be able to:

- Describe the physical and chemical properties of food commodities.
- Articulate the design principles and experimental procedures, related to recipe development.
- Describe the scientific principles and skills applied in development of experimental foods.

Subject Content

- Carbohydrate, Protein and Lipid systems.
- Biological and Chemical leavening.
- Sensory and physical characteristics and quality of experimental foods.
- Principles of sustainable recipe development and experimental food preparation.
- Experimental procedure and recipe development for different consumer communities.

Assessment

NATS 2042 Science Research Methods

Credit Points 10

Legacy Code 301445

Coordinator Clarissa House ([https://directory.westernsydney.edu.au/search/name/Clarissa House/](https://directory.westernsydney.edu.au/search/name/Clarissa%20House/))

Description This subject aims to introduce you to the theories and practices underpinning scientific method. Through the course of the subject, you will develop analytical skills to quantify and interpret agricultural, zoological, and environmental data. You will use real-world issues, formulate an aim and research hypothesis and explore research

methods and designs to conduct an experiment to test the hypothesis. You will also be introduced to the types of biological variables, sources of measurement error, and the relationship between sample size and the conclusions that can be drawn from data; This subject enables you to develop skills in data analysis, interpretation and how to report on the findings of the research. The subject is structured so that lectures will provide theoretical expertise and workshops will reinforce your learning with practical experience preparing you for a career in science.

Restrictions

Successful completion of 60 credit points at Level 1.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify key concepts, principles, and tools for conducting scientific research.
2. Formulate and test a research hypothesis or address a research question in the context of applied science, including agri-food, environmental and zoological enquiries.
3. Collate meaningful data and conduct appropriate analysis by using accepted scientific conventions.
4. Report the research analyses by articulating the link between a research hypothesis and experimental design.
5. Clearly communicate research findings to various professional and non-professional stake holders.

Subject Content

- Introduction to the research process
 - Research aim, hypothesis, and prediction
 - Research methods and research designs
 - Data collection to test predictions
- Data types (i.e. continuous, categorical, ordinal etc.)
- Data collection tools (i.e. sample size, units of replication etc.)
- Data analysis
- What statistical test is appropriate for the data?
- Reporting data consistent with scientific and industry guidelines

NATS 3001 Advanced Immunology

Credit Points 10

Legacy Code 300905

Coordinator Graham Jones ([https://directory.westernsydney.edu.au/search/name/Graham Jones/](https://directory.westernsydney.edu.au/search/name/Graham%20Jones/))

Description The human immune system is a milieu of cells, cytokines, chemokines, growth factors and cell adhesion molecules which form an elaborate molecular communication network through a number of signalling networks and molecules. The relevance of this knowledge for understanding the pathology and specific diseases of the human immune system are emphasised through the unit. This unit also provides an in depth analysis of the molecular mechanisms of cell to cell communication, cell activation, the immunological synapse, transplant rejection (including adoptive transfer experimentation), antigen presentation, B and T cell recruitment and MHC restriction. Medical and diagnostic applications of hybridoma technology, antibody engineering and advances in vaccine development are discussed. The laboratory course will develop technical and interpretative skills in relevant techniques, in particular the ImmunoCAP technology for asthma and allergy diagnosis.

School Science

Discipline Medical Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) BIOS 2014

Equivalent Subjects NATS 3033 - Molecular Biological of the Immune System

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the structures and roles of key molecules in the immune response, including antibodies, complement, B and T cell receptors, MHC molecules and cytokines.
2. Explain the events involved in B and T cell receptor gene rearrangements, the generation of antibody diversity and class switching.
3. Explain the role of MHC genes in generating histocompatibility.
4. Discuss current knowledge about the molecular basis of the immune response, including the roles of cytokines and cell signalling pathways for both humoral and cell-mediated responses.
5. Analyse the roles of the humoral and cell-mediated responses in dealing with different types of infection and explain the interrelationships between these two arms of the immune system.
6. Explain the applications of this knowledge for the production and use of monoclonal antibodies, the engineering of antibodies, and the development of new therapeutics and immunodiagnostic assays.
7. Demonstrate an understanding of advances in vaccine development, including protein and DNA vaccines, and the issues which relate to successful vaccine design.
8. Present, organise and interpret experimental data in concise written English.
9. Explain and apply principles relating to immunological and immunochemical methodologies for the design and conduct of effective diagnostic and research procedures.
10. Access and analyse relevant scientific journal papers.
11. Present a written critique of an assigned topic.
12. Conduct qualitative and quantitative laboratory techniques involving antibodies and understand their applications.

Subject Content

1. Overview of the immune system ? immunoglobulins, cytokines, receptors, CD molecules; cell types and tissues; innate and humoral immunity.
2. Antibodies ? role as adaptor molecules; immunoglobulin structure and properties; immunoglobulin classes ? characteristics and separate roles; immunoglobulin super-gene family.
3. Characteristics of antigen-antibody binding.
4. Complement activation by immune complexes.
5. Structure and role of Fc receptors in phagocytosis of immune complexes.
6. Structure of B-cell receptors.
7. Generation of diversity in B-cell receptors and antibodies - Light and Heavy chain gene rearrangements; class switching of antibodies ? genetic mechanism; affinity maturation of antibodies - mechanism. Relationship to B-cell differentiation. Role of cytokines.
8. B-cell co-receptor structure and signalling mechanism.
9. Major Histocompatibility Complex - Class 1 and 2 MHC, molecules: structure, function, location; MHC genes and alleles; role in histocompatibility.
10. T cell receptor and co-receptor structures and roles; activation and signalling mechanism. Roles of CD4 and CD8.
11. T cell receptor gene rearrangements and their relevance. Self-tolerance.
12. Antigen processing in B-cells - exogenous antigen processing pathway, activation of B cells and presentation to T cells for a humoral response. Endogenous antigen processing pathway, activation of TH and Tc cells, generation of Cytotoxic T Cells and their action. Role of cytokines.
13. Immunotechnologies ? production and applications of monoclonal antibodies vs polyclonal antisera; diagnostic and therapeutic

techniques using antibodies e.g. ELISA, immunotoxins; antibody engineering and its applications.

14. Vaccines ? viral, protein and DNA vaccines; design, development and difficulties e.g. malaria, HIV vaccines.

15. Molecular basis of diseases involving the immune system ? hypersensitive reactions e.g. allergy; autoimmune diseases; cancer and the immune system.

16. Laboratory skills in antibody-based techniques, their applications and interpretation e.g. precipitin-based analyses; ELISA; Western blotting, ImmunoCAP.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Innate Immunity and Infection: the inflammasome	2000 words	40	N	Individual
Monoclonal Antibodies and Immune Therapy	15 minutes	30	N	Group
Critical Analysis "A tale of two vaccines"	2000 words	30	N	Individual

Legacy Code 300891

Coordinator Christopher Gordon ([https://directory.westernsydney.edu.au/search/name/Christopher Gordon/](https://directory.westernsydney.edu.au/search/name/Christopher%20Gordon/))

Description Medicinal Chemistry is an interdisciplinary science that exists at the intersection of chemistry, pharmacology, physiology and human health. Students will explore the multidisciplinary nature and interconnectedness of medicinal chemistry through in-depth study of topics that relate medicinal chemistry to disciplines such as physiology, natural product science, biochemistry and pharmacology. It will also explore the expectations of a professional medicinal chemist.

School Science

Discipline Medical Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) CHEM 1005

Restrictions Successful completion of 40 credit points at Level 2 or 3

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Research and review information including scientific literature on a selected topic in medicinal chemistry
2. Teach a selected topic of medicinal chemistry to peers in a short oral presentation (group)
3. Review and explain a selected topic in medicinal chemistry in a written essay (individual)
4. Explore the professional competencies relevant to a final year medicinal chemistry student
5. Discuss selected areas in medicinal chemistry presented by peers during the oral presentations
6. Evaluate the essays of your peers on selected topics in medicinal chemistry

Subject Content

1. Introduction to advanced medicinal chemistry, drugs and drug targets
2. Enzymes, receptors and nucleic acids as drug targets
3. Drug discovery, design, and development ? Finding a lead and optimising target interactions
4. Elucidating drug-target interactions
5. Selected topics in medicinal chemistry - Antibacterial agents
6. Selected topics in medicinal chemistry - Antiviral agents
7. Selected topics in medicinal chemistry - Anticancer agents

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	30 minutes (10 questions)	10	N	Individual
Intra-session Exam	1.5 hours	10	N	Individual
Presentation	Approx. 20 minutes (group of 3)	15	N	Group
Essay	Approx. 1,500 words	15	N	Individual
Final Exam	2 hours	50	Y	Individual

NATS 3003 Advanced Mortuary Practice

Credit Points 10

Legacy Code 301128

Coordinator Hayley Green (<https://directory.westernsydney.edu.au/search/name/Hayley Green/>)

Description This unit further develops skills in a forensic mortuary practice. Students will undertake a placement within a NSW Forensic and Analytical Science Service (FASS) facility or NSW Organ and Tissue Donation Service. This unit, together with completion of 301127 Mortuary Practice is essential for graduates of this course seeking employment as a forensic technician with FASS.

School Science

Discipline Medical Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) NATS 3036

Co-requisite(s) NATS 3006

Restrictions Students must be enrolled in 3733 BMedSc (Forensic Mortuary Practice).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply principles of safe work practice
2. Evaluate the roles of and relationships between professional groups in forensic mortuary contexts
3. Demonstrate professional behaviours, communication skills and self management
4. Demonstrate competency in forensic mortuary practices
5. Appraise and explain the impact of forensic mortuary practices on disciplines within the organisation (e.g Coroner, Pathologists and Social Work) and community (e.g grieving families)
6. Plan and compose appropriate documentation required as part of daily duties of a forensic mortuary technician
7. Critique specialised postmortem techniques and procedures

Subject Content

- professional attitudes and behaviour
- professional Roles and relationships
- professional communication skills
- Legislative requirements related to practice
- professional ethics
- Safe work practices
- forensic mortuary practice skills
- Reconstructive mortuary techniques

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance ([https://](https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance))

www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Professional Portfolio	2,500 words	30	N	Individual
Professional Placement Performance	30-35 hours per week for 2 weeks (total 60-70 hrs)	S/U	Y	Individual
Case Study Presentation	10 minutes plus 5 min question time	25	N	Individual
Intra-session Exam	Up to 60 minutes	25	N	Individual
Report	1,000 words	20	N	Individual

NATS 3004 Advanced Science Project C

Credit Points 10

Legacy Code 300910

Coordinator Bill Price ([https://directory.westernsydney.edu.au/search/name/Bill Price/](https://directory.westernsydney.edu.au/search/name/Bill%20Price/))

Description This unit advances the students' training in thinking as a research scientist whilst developing practical skills in a particular area of interest. The student undertakes a minor research project under supervision, during which they plan how to answer a research problem, conduct research and present their findings in a research paper format and seminar.

School Science

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) NATS 2002

Equivalent Subjects LGYA 6169 - Advanced Science Research Project C

Restrictions Students must be enrolled in 3562 - Bachelor of Science (Advanced Science), 3682 - Bachelor of Medical Science (Advanced) or 3683 - Bachelor of Natural Science (Advanced).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Access, review, critique and analyse relevant literature on a given research topic.
2. Plan and conduct a research project.
3. Analyse and critique scientific data.
4. Prepare a concise and accurate report in the style appropriate to the project (usually a journal article).
5. Effectively communicate research findings orally as part of a research seminar.
6. Engage with researchers in different fields to gain knowledge of the broader research environment.

Subject Content

Conduct a short research project and present their findings as a written journal article and a research seminar.

Special Requirements

Legislative pre-requisites

Students who opt to enrol in subject are strongly recommended to obtain a Q-Fever vaccination, and Tetanus vaccination/booster. Students who cannot evidence vaccination may be precluded from activities on the Farm, and/or internships with third parties.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Essay	2,000 words max	20	N	Individual
Report	Following instructions for authors of the chosen journal 4,000 words max	50	N	Individual
Presentation	10 min	20	N	Individual
Reflection	500 words	10	N	Individual

NATS 3006 Anatomy of the Head and Neck

Credit Points 10

Legacy Code 300897

Coordinator Manisha Dayal ([https://directory.westernsydney.edu.au/search/name/Manisha Dayal/](https://directory.westernsydney.edu.au/search/name/Manisha%20Dayal/))

Description This unit builds on the systems anatomy taught during the first year, offering a regional study of the human head & neck. Emphasis is placed on the identification and description of the structures, including the correlation of structure and function. Cadaveric specimens are used to aid the learning of these regions and their three-dimensional aspect, including the anatomical variation found in these regions.

School Science

Discipline Medical Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) NATS 1010 OR NATS 1001

Equivalent Subjects LGYA 5930 - Anatomy of the Head and Neck NATS 3005 - Anatomy of the Head and Neck

Restrictions

Students must be enrolled in 3755 Bachelor of Medical Science, 3657 Bachelor of Medical Science (Advanced), 3673 Bachelor of Medical Science, 3682 Bachelor of Medical Science (Advanced) or 6002 Diploma in Science/Bachelor of Medical Science

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify structures within and associated with the head and neck regions on cadaveric specimens in addition to models and graphic resources.
2. Analyse and explain functional and spatial relationships between structures in the head and neck regions.
3. Discuss the embryological development of the head and neck region and relate this to the nerve supply of each of these regions.
4. Identify and discuss normal anatomical variations of the head and neck regions.

5. Describe common abnormalities in the head and neck regions, and explain their anatomical basis and functional consequences.

Subject Content

1. Skull and cervical vertebrae
2. Cranial meninges
3. Peripheral distribution of cranial nerves in the head and neck
4. Face and scalp
5. Eye and orbit
6. Oral cavity
7. Nasal cavity
8. Ear
9. Neck triangles and root of neck
10. Suboccipital triangle
11. Pharynx
12. Larynx
13. Blood supply to the head and neck
14. Embryological development of the head and neck

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Group Assignment: Written component- 10% Scientific Poster- 10% Review- 5% Group Member Peer Review 5%	Up to 1000 words and Scientific Poster	30	N	Group
Intra-Semester Test 1	Up to 45 minutes	15	N	Individual
Intra-Semester Test 2	Up to 45 minutes	15	N	Individual
Final Exam	2 hours	40	N	Individual

NATS 3008 Complex Forensic Studies

Credit Points 10

Legacy Code 300911

Coordinator Val Spikmans ([https://directory.westernsydney.edu.au/search/name/Val Spikmans/](https://directory.westernsydney.edu.au/search/name/Val%20Spikmans/))

Description This is an advanced and integrating capstone unit for students studying forensic science. It incorporates previous science, forensic science and social science units to form a comprehensive examination of the functionality of forensic evidence within the contemporary Australian judicial system. This capstone highlights the needs for an interdisciplinary approach to define and critique forensic science evidence from various perspectives including science, law, criminology, policing and social science. Students are required to use their skills and knowledge with additional independent research and inquiry using a range of set literature. The unit will study a range of contemporary issues including how the judicial system evaluates the reliability of evidence from an admissibility threshold, identification evidence from CCTV, contextual bias with forensic examination, contamination issues with forensic evidence and methods of expressing forensic findings and/or significance.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) NATS 2010 AND
NATS 2019 AND
NATS 1008 AND
NATS 2022 OR
NATS 2021

Equivalent Subjects NATS 3007 - Complex Forensic Case Studies

Restrictions Students must be enrolled in 3589 Bachelor of Science (Forensic Science), 3562 Bachelor of Science (Advanced Science) (Forensic Science), MT3022 Forensic Science, MT3023 Forensic Chemistry or MT3024 Forensic Biology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the interconnections between forensic science and its wider social and legal contexts, both within Australia and Internationally.
2. Apply logical, critical and creative skills to solving a range of problems in a forensic context.
3. Integrate and manage several different classes of forensic evidence within an overall case.
4. Describe and evaluate an understanding of court structure and procedures.
5. Explain and critique the principles of ethical and professional behaviour during a forensic case and describe the potential conflicts of interest that can occur during the collection and analysis of evidence, and its presentation in court.

Subject Content

1. Current issues with forensic evidence.
2. Identification evidence: contemporary issues.

3. Identification from CCTV images.
4. Contamination of forensic evidence.
5. Contextual bias with forensic examinations.
6. Various case studies relevant to unit content.
7. Expressing forensic findings and evidence significance.
8. Daubert ruling.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Participation and Short answer. Group work answering questions on the topic of the workshop.	500 words (x 3 workshops)		N	Group
Report on the different Courts	Report - maximum 2000 words.	25	N	Individual
Quizzes: Four workshop quizzes and three online quizzes – mix of short answer / multiple choice.	20 minutes per quiz (x 7 quizzes)	30	N	Individual
Short Answer: Short-essay questions related to contemporary issues in forensic science	300 words per response (x 4)	25	N	Individual

NATS 3009 Consumer Issues in Nutrition

Credit Points 10

Legacy Code 300928

Coordinator Li Li ([https://directory.westernsydney.edu.au/search/name/Li Li/](https://directory.westernsydney.edu.au/search/name/Li%20Li/))

Description This unit explores current food and nutrition issues. It introduces students to the factors that influence public health nutrition and explores (a) the contribution food systems and food security makes to consumer wellbeing; (b) the changing global marketplace and the impact of globalisation on food security and ecological sustainability; and (c) the complex inter-connections between government policy, globalisation, consumerism and human health. Students will assess nutritional status from available data and explore the role of community food systems. Students will also be introduced to social research methods and plan a social research study to address a nutrition related issue.

School Science

Discipline Food Science and Biotechnology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects NATS 2009 - Consumer Issues in Nutrition

Assumed Knowledge

An understanding of human nutrition and health. Computer literacy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Acquire, analyse and profile demographic data of a select geographic community
2. Document a food mapping exercise of a select community
3. Evaluate the nutritional status of a select geographic community, considering food security, using current research
4. Identify factors that influence the health and wellbeing of individuals and communities including the impact of current food and public health policy and practice on wellbeing from both an individual and community perspective
5. Demonstrate skills in social research planning and design, following completion of a literature review requiring the critical appraisal of current food and nutrition health research
6. Demonstrate competencies in oral and written communication skills including skills in scientific presentations
7. Critique current issues affecting nutritional status across a range of individuals, including indigenous Australians

Subject Content

- contemporary Issues in food, nutrition, health and wellbeing
- Determinants of food security
- social Determinants of health
- environmental Determinants of health
- Obesogenic environments and Nutritional status
- public health nutrition and health promotion policy
- socio-ecological concepts of health, food and nutrition
- The 'McDonaldisation' of society
- globalisation and The impacts on population health
- nutrition Issues within The indigenous community
- community Profiling and Demographic analysis
- food Mapping
- social research methods
- observation/Contextual analysis
- human research ethics

Assessment

Credit Points 10

Legacy Code 300871

Coordinator Christine Hutchison ([https://directory.westernsydney.edu.au/search/name/Christine Hutchison/](https://directory.westernsydney.edu.au/search/name/Christine%20Hutchison/))

Description This unit applies scientific principles to the development, preparation and presentation of food products. Students are encouraged to become autonomous learners through problem-solving activities and experiential techniques. Students integrate and apply knowledge and skills from areas such as chemistry, biology, food science and nutrition to nutritionally focussed food products. Students are encouraged to keep abreast of food trends in the dynamic food industry as well as current nutritional issues within domestic, multicultural and indigenous communities. Students will utilise prior knowledge and skills to address specific nutritional issues and the development of new food products to fit within these boundaries.

School Science

Discipline Food Science and Biotechnology

NATS 3012 Environmental Forensic Investigations

Credit Points 10

Legacy Code 300981

Coordinator Val Spikmans ([https://directory.westernsydney.edu.au/search/name/Val Spikmans/](https://directory.westernsydney.edu.au/search/name/Val%20Spikmans/))

Description This unit examines the forensic processes required to conduct investigations into environmental crime and incidents. The unit extends the student's knowledge and understanding of forensic science concepts to environmental scenarios, including illegal dumping, spills and water pollution incidents. The unit will discuss how scenes are investigated, what methods and techniques are used to analyse environmental samples, and how the results are interpreted and presented in the NSW Land and Environment Court. Factors effecting the collection, analysis and interpretation of evidence, such as weathering, are also discussed, as these are crucial to understand the scenes and to correctly present evidence in court.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) NATS 1008 AND NATS 2019

Equivalent Subjects NATS 2017 - Forensic Analysis of Physical Evidence LGYA 6259 - Forensic Biology

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Determine what is considered evidence in an environmental incident or crime scene.
2. Conduct environmental forensic investigations whilst maintaining evidence integrity and continuity.
3. Describe the quality management procedures necessary to collect and preserve environmental samples from the site of its recovery through to the laboratory and its presentation in court.
4. Explain the concepts of dilution effects, weathering effects and matrix effects and how to take these effects into account when collecting, analysing and interpreting environmental forensic evidence.
5. Apply theoretical and practical knowledge of a range of forensic science procedures and the associated equipment to forensically examine a range of evidence from environmental scenes.
6. Apply concepts of forensic identification and pattern matching to determine the source of evidence collected from an environmental case.
7. Communicate the results correctly in written form using appropriate language style, placing the findings in context of the forensic investigation.
8. Explain the appropriate acts, regulations and the expert witness code of conduct as it relates to the presentation of evidence in the NSW Land and Environmental Court as an expert witness.

Subject Content

1. Explanation of what are environmental forensic investigations and the types of cases commonly encountered.
2. Theories and principles of conducting environmental forensic investigations, including evidence integrity and continuity and sampling protocols.
3. Theoretical and practical knowledge of a range of forensic science procedures and the associated equipment needed to forensically examine a range of evidence related to environmental incidents or crime scenes.
4. Issues of dilution effects, weathering effects and matrix effects for the collection, examination and interpretation of evidence.
5. Concepts of forensic identification and pattern matching for source determination of evidence collected from environmental crime scenes or incidents.
6. The presentation of results in the NSW Land and Environment Court, including the expression of results, appropriate acts and regulations, and the expert witness code of conduct.
7. Quality management procedures necessary to preserve evidence from the site of its recovery through to the laboratory and its presentation in court, including NATA accreditation.
8. Various case studies relevant to the unit content.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

NATS 3015 Field Project 1

Credit Points 10

Legacy Code 300913

Coordinator Nijat Imin ([https://directory.westernsydney.edu.au/search/name/Nijat Imin/](https://directory.westernsydney.edu.au/search/name/Nijat%20Imin/))

Description Unit 300913 Field Project 1 and the associated unit 300914 Field Project 2 are designed as capstone units of study for either the Bachelor of Science or Bachelor of Natural Science degrees. They draw together the skills acquired in previous years of the course and apply them in the context of either a six-month or a year-long research project exploring a real world problem on behalf of an industry, government or community agency client. The student will develop skills in scoping, planning, implementing, reporting on the research project; reflecting on what has been learned in the context of their personal and professional development and how this can be used in future career planning. In this Field Project 1 unit the focus is on developing skills in designing an appropriate research project in collaboration with the industry client, contextualising the problem and appropriate research methods in the academic literature, developing and implementing a pilot study to test the proposed research methods, and reporting the results. Note: Students enrolling in the external offering of this unit must be externally enrolled in either the Bachelor of Science (Environmental Health) or Bachelor of Natural Science (Environment and Health) degrees. All other students enrolling externally will need Unit Coordinator approval.

School Science

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) NATS 2028 OR NATS 2025

Equivalent Subjects NATS 3016 - Field Project 1

Restrictions Students enrolling in the external offering of this subject must be externally enrolled in either the Bachelor of Science (Environmental Health) or Bachelor of Natural Science (Environment and Health) degrees. All other students enrolling externally will need subject Coordinator approval.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design a project to assist the chosen client to improve a situation using academic research skills and resources in an ethical manner.
2. Evaluate chosen methods in a small scale pilot and revise methods in light of this.
3. Develop relationships and rapport with industry and academic professionals including: communicating with a client, maintaining a professional relationship, and effectively responding to feedback from the client and the project supervisor.

4. Problem solve uncertain/unforeseen factors and to negotiate changes and deal with risk.
5. Apply effective time management and reflect on the research process by maintaining a study journal and field notebook.
6. Search, identify, organise, compare and contrast data collected from a variety of sources.
7. Critically reflect on progress with and development of skills for independent study.

Subject Content

1. Design of a field-based research project undertaken for an industry client
 - Identify the nature of the issue/problem the client wishes the student to study ? clearly identifying the research question(s) and developing a plan for tackling the study that is S.M.A.R.T. (Strategic, Manageable, Achievable, Realistic, and Time-constr
 - identify The context of Study in terms of appropriate history, Background literature (secondary data) and write A literature Review
 - identify research methods considered appropriate for The collection of primary (field) data for The Study Methodological options for The Study and justify The choice of these in A draft Progress report on The Progress of designing The study.
 - design A pilot Study that tests The methods for field data collection (including obtaining any necessary human or Animal research ethics clearances for this Study to proceed)
 - conduct A pilot, Reflect on The lessons from this and redesign The methods to be used for The main Study ? including any revisions to ethics approvals required.
 - plan The collection and organisation of (primary) data in The field, and indicate how this data will be analysed, and The results presented to The client.
2. Reporting on progress in development of the study ? meeting appropriate milestones
 - management in The preparation for class Activity, completion of assignments, and T

NATS 3017 Field Project 2

Credit Points 10

Legacy Code 300914

Coordinator Zhonghua Chen ([https://directory.westernsydney.edu.au/search/name/Zhonghua Chen/](https://directory.westernsydney.edu.au/search/name/Zhonghua%20Chen/))

Description Field Project 2 allows the student to extend the research project undertaken as the pilot study in Field Project 1. Note: Students enrolling in the external offering of this unit must be externally enrolled in either the Bachelor of Science (Environmental Health) or Bachelor of Natural Science (Environment and Health) degrees. All other students enrolling externally will need Unit Coordinator approval. Students who completed the Field Project 1 Unit in a previous year (i.e. are not continuing directly into this unit) will need to demonstrate that they have the data from this earlier Unit that can be used to produce an analysis and a report for their original client.

School Science

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) NATS 3015

Equivalent Subjects NATS 3018 - Field Project 2

Restrictions Students enrolling in the external offering of this subject must be externally enrolled in either the Bachelor of Science (Environmental Health) or Bachelor of Natural Science (Environment and Health) degrees. All other students enrolling externally will need subject Coordinator approval. Students who completed the Field Project 1 subject in a previous year (i.e. are not continuing directly into this unit) will need to demonstrate that they have the data from this earlier subject that can be used to produce an analysis and a report for their original client.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Report on the project to the chosen client.
2. Review, revise and reflect on the project management milestones.
3. Present and analyse the results from the field project.
4. Evaluate their own work through application of self- assessment criteria and standards, and provide constructive feedback to others through application of peer-assessment criteria and standards.
5. Critically review the way the study was undertaken, and reflect on lessons learned about themselves in the role of student researcher ? identifying strengths and areas where further work may be needed.
6. Reflect on this study and other work as part of the university course to develop plans and tools for future study, research or employment.

Subject Content

1. Data analysis

2. Report writing
3. Reflection on learning from undertaking a field-based research project for an industry client ? (Project designed in Unit Field Project 1)
4. Personal and professional development ? including development of critical/reflective abilities, the ability to receive and provide objective feedback and constructive criticism, and demonstrate a capacity to learn from such feedback.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Report - Project Results, Conclusion & Recommendation	2,000 words	30	N	Individual
Report - Final Client Report	6,000 – 7,000 words	50	N	Individual
Professional/ Personal Reflection	1,500 words	20	N	Individual

NATS 3020 Food Safety

Credit Points 10

Legacy Code 300859

Coordinator Malik Hussain ([https://directory.westernsydney.edu.au/search/name/Malik Hussain/](https://directory.westernsydney.edu.au/search/name/Malik%20Hussain/))

Description Food safety is rapidly evolving with the emergence of new foodborne diseases, changing disease patterns, evolving approaches to risk analysis and an emerging requirement that food producers, processors, handlers and consumers take shared responsibility for food safety. This unit aims to equip students with the necessary skills to identify, evaluate and control foodborne hazards in order to protect the safety and quality of the food supply and reduce associated risks to human health. Content includes the key elements of food safety and regulation, food contamination, food spoilage agents, foodborne hazards, principles of good hygienic practice and preservation in food production, preparation and distribution.

School Science**Discipline** Food Science and Biotechnology**Student Contribution Band** HECS Band 2 10cp**Level** Undergraduate Level 3 subject**Pre-requisite(s)** BIOS 2016 OR
BIOS 2022**Equivalent Subjects** NATS 3021 - Food Safety**Restrictions** Successful completion of 120 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify food safety hazards and associated risk reduction protocols to ensure safe food production.
2. Explain the major principles of preservation and the effectiveness of different technologies in controlling foodborne hazards.
3. Apply a sound knowledge of Australian Food Standards to the regulation of food safety and food premises inspection.
4. Monitor and evaluate cleaning and sanitation protocols in commercial food premises.
5. Apply HACCP principles to the identification, evaluation, control and monitoring of hazards in food.
6. Plan appropriate foodborne disease surveillance and outbreak investigation procedures.

Subject Content

Microbial contamination of food

Food spoilage

The effects of food characteristics on spoilage patterns

Foodborne hazards

Principles and methods of preservation

The Hazard Analysis and Critical Control Point (HACCP) approach to Food Safety

Good Hygienic Practice

Cleaning, sanitizing and controlling pests in food operations

Food legislation and administration in Australia

Food safety inspection and auditing

Contaminant monitoring

Food labelling, traceability and food recalls

Risk assessment and analysis

Foodborne disease surveillance

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Literature Review	2,000 words	35	N	Individual
Individual Written Report	1,500 words	35	N	Individual

NATS 3023 Forensic Anthropology

Credit Points 10**Legacy Code** 301120**Coordinator** Hayley Green ([https://directory.westernsydney.edu.au/search/name/Hayley Green/](https://directory.westernsydney.edu.au/search/name/Hayley%20Green/))

Description The objectives of this unit are to gain an understanding of the changes to the human body from death to discovery and how we can use the biological variability of humans to assist in the identification of human remains. Students will learn the fundamentals of detection, excavation and identification of human and non-human remains and learn how to prepare their findings for court. Students will be required to apply the knowledge gained during lectures to a practical based excavation, analysis and preparation of a case file.

School Science**Discipline** Forensic Science**Student Contribution Band** HECS Band 2 10cp**Level** Undergraduate Level 3 subject**Pre-requisite(s)** NATS 1008 AND
NATS 1013 OR
NATS 1001 AND
NATS 2010 OR
NATS 2015**Equivalent Subjects** NATS 3025 - Forensic Archaeology NATS 3024 - Forensic Archaeology

Restrictions

Successful completion of 60 credit points at Level 1 and 40 credit points at Level 2.

Assumed Knowledge

Knowledge of the general aspects of contemporaneous note taking, crime scene documentation and crime scene photography.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain how the major processes of decomposition and taphonomic change can affect the outcomes of a forensic investigation.

2. Explain the scientific and ethical role of the forensic archaeologist and forensic anthropologist in the gathering and analysis of forensic evidence in an Australian context.
3. Conduct archaeological investigations safely and ethically in the field using methodologies to obtain valid scientific evidence and explain the significance and relevance of data.
4. Conduct an anthropological investigation of human and non-human skeletal remains and create a biological profile.
5. Communicate findings correctly in written and/ or oral form, accessing the scientific literature to place findings in context.

Subject Content

1. Detection and recovery of human and non-human remains.
2. Analysis of crime scenes using the principles of archaeology to preserve forensically meaningful evidence.
3. Preservation of evidence continuity and integrity from the site of recovery through to the conclusion of all laboratory analyses.
4. Theoretical and practical knowledge of anatomy and forensic anthropology required to distinguish between human and non-human skeletal remains and subsequently produce a biological profile of human skeletal remains.
5. Theoretical knowledge of multidisciplinary approaches to the identification of human skeletal remains.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	30 minutes	10	N	Individual
Practical Exam	40 minutes	25	N	Individual
Report	Part 1 (Groupwork 10%)- Contemporaneous case file notes (2000 words); Part 2 (5%)- Group contribution	15	N	Group
Report	1500 words	10	N	Individual
Final Exam	2 hours	40	N	Individual

NATS 3026 Forensic Biology

Credit Points 10

Legacy Code 401170

Coordinator Alicia Haines ([https://directory.westernsydney.edu.au/search/name/Alicia Haines/](https://directory.westernsydney.edu.au/search/name/Alicia%20Haines/))

Description This unit is designed to extend your knowledge and understanding regarding forensic biology and its relevance to forensic investigations. You will gain experience and understanding regarding the recognition and collection of biologically relevant evidence (including blood, semen and saliva), through to the application of presumptive testing, confirmatory testing, DNA profiling methods and evidence reporting. There is a focus on front-end forensic biology work (item examination, presumptive testing, DNA recovery via swabbing and isolation of biological material) coupled with a theoretical understanding of the scientific principles that underpin current DNA analysis techniques, presumptive tests and DNA profiling results.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) BIOS 2018

Equivalent Subjects NATS 2017 - Forensic Analysis of Physical Evidence BIOS 3017 - Invertebrate Biology

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Summarise the changes to the forensic analysis of biological evidence since the first forensic DNA profile was produced in 1985.
2. Examine a case scenario and determine which DNA marker/s should be used to analyse the biological evidence in order to maximise the useful genetic information obtained from a given sample.
3. Carry out basic experimental procedures relating to the forensic analysis of biological evidence.
4. Critically evaluate raw experimental data to identify issues commonly encountered in forensic biology laboratories and propose strategies to resolve such issues.
5. Interpret electropherogram data generated from the analysis of biological evidence and determine the STR genotype of the donor/s.
6. Calculate population genetic parameters and DNA match statistics under varying hypotheses.
7. Communicate findings and opinions in the manner required of an expert forensic witness.

Subject Content

1. The history of forensic biology and DNA analysis.
2. Search techniques, presumptive tests and confirmatory tests for detecting and identifying biological evidence
3. Issues surrounding DNA contamination and its implications for DNA evidence.
4. Requirements for DNA sampling, collection, transportation, storage and continuity.
5. New and emerging developments in forensic biology including DNA analysis technology, genealogy and phenotyping.
6. Types of DNA markers utilised in forensic DNA analysis and the circumstances where each type might be analysed.
7. DNA profile interpretation and exploration of DNA match statistics.
8. Interpretation of DNA profiles and communication of DNA profile results to the court
9. Special topics in forensic biology e.g. disaster victim identification and the analysis of non-human DNA

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Case Study Written (completed in practicals)	1,000 words	30	N	Group
Report: Written Court report	2,000 words	30	N	Individual
Online quizzes (3 quizzes throughout semester)	1 hour each (20 questions)	40	Y	Individual

NATS 3027 Laboratory Quality Management

Credit Points 10

Legacy Code 300883

Coordinator Sindy Kayillo ([https://directory.westernsydney.edu.au/search/name/Sindy Kayillo/](https://directory.westernsydney.edu.au/search/name/Sindy%20Kayillo/))

Description This capstone unit is directed towards the accreditation of a laboratory for chemical, microbiological or forensic testing, using the standards that are applicable in industry. The unit focuses upon the importance and coordination of good laboratory management, teamwork, calibration, record keeping and laboratory manuals. Groups of students are required to develop, establish and operate a comprehensive Laboratory Quality Management system designed for a specific class of chemical, microbiological or forensic test. The students' technical competence and quality system are then assessed using the guidelines laid down by the National Association of Testing Authorities (NATA).

School Science

Discipline Other Natural And Physical Sciences

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects NATS 3029 - Laboratory Quality Management

Restrictions Successful completion of 60 credit points at Level 1 and 40 credit points at Level 2 in Bachelor of Science, Bachelor of Medical Science or Bachelor of Natural Science.

Assumed Knowledge

A demonstrated understanding of and competence with laboratory techniques in analytical chemistry or microbiology, corresponding to successful completion of a Level 2 Microbiology or Analytical Chemistry subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Describe the nature and importance of a Laboratory Quality Management System, and the operation of ISO/IEC 17025.
- Design and follow a laboratory quality management system for the accomplishment of a specific chemical, forensic or microbiological test.
- Develop quality-management documentation, including sections of a Laboratory Quality Manual, in accordance with ISO/IEC 17025, including policies and procedures.
- Solve operational problems in a laboratory context.
- Explain the importance of method validation, calibration procedures, traceability of results, Quality Assurance and Quality Control.
- Develop appropriate technical skills for working in an accredited chemical, forensic or microbiological testing laboratory.
- Work constructively within a team.
- Learn independently, without direct supervision by academic staff.
- Report on the experience of being assessed by an external accreditation body (NATA).
- Handle chemical substances and/or micro-organisms safely, and critically evaluate the risks associated with laboratory work, in the context of Work, Health and Safety practices and legislation.

Subject Content

- Designing and working within a well-defined organisational structure;
- Developing, establishing and operating a laboratory quality management system designed for a specific class of chemical, microbiological or forensic test;
- Preparing a Laboratory Quality Manual in accordance with ISO/IEC 17025 and the relevant Field Application Documents from the National Association of Testing Authorities (NATA);
- Understanding and following NATA laboratory accreditation guidelines.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Assessment by NATA Assessors	2 hours	40	N	Individual

Student's contribution to the Laboratory Quality Manual	1000-1500 words	10	N	Individual
Student's contribution to the overall practicum	Monitored throughout the semester	30	N	Both (Individual & Group)
Viva voce examination, incorporating an exit interview	30 minutes	10	N	Individual
Peer assessment	2 pages	10	N	Individual

NATS 3030 Medical Microbiology

Credit Points 10

Legacy Code 300826

Coordinator Colin Stack ([https://directory.westernsydney.edu.au/search/name/Colin Stack/](https://directory.westernsydney.edu.au/search/name/Colin%20Stack/))

Description Infectious diseases worldwide are the most common cause of illness. Medical microbiology is subdivided into four areas: virology, bacteriology, mycology (the study of fungi) and parasitology. The rapid evolution of microbes means that this is an area that does not remain static. This unit has a modern approach to the study of the balance between the host, humans, and the very large army of potential invaders. Students will embark on a journey into the world of pathogenic micro-organisms exploring the molecular mechanisms by which these override host defences leading to disease. Infectious diseases of the human body systems as well those of the immunocompromised and infections contracted in the healthcare setting (nosocomial) are discussed. The theory will be supported with laboratory experience representing diagnostic procedures for the identification of infectious agents.

School Science

Discipline Medical Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) BIOS 2022

Equivalent Subjects LGYA 5866 - Medical Microbiology NATS 3031 - Medical Microbiology

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Differentiate the mechanisms of infections caused by true pathogens from those caused by opportunistic pathogens
2. Describe the factors and mechanisms by which the human host is protected from microbial invasion
3. Understand and apply appropriate biochemical and molecular techniques used in the identification of clinical specimens
4. Explain the rationale behind the performance of antimicrobial susceptibility tests
5. Analyse and interpret scientific literature and effectively communicate
6. Associate the various infectious agents that affect special populations with the conditions that predispose these patients to a particular infection

Subject Content

1. Principles and practices of medical microbiology
2. Non-specific and specific (immune system) defence of the human body
3. Principles of the pathogenesis of disease including mechanisms by which microbial agents override the host non-specific and specific defence system to produce disease at the molecular level
4. Diseases of the human body systems and respective aetiological agents
5. Specimen collection techniques for the detection of microbial pathogens
6. Laboratory diagnostic procedures for the isolation, identification and antibiotic sensitivities where applicable of microbial pathogens
7. Molecular techniques and development of new diagnostic capabilities for microbial pathogens
8. Current areas of research interests in medical microbiology

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Report and Presentation	1,500 words plus 5 minute presentation	35	N	Individual
Practical Exam	60 minutes	30	N	Individual
Final Exam	2 hours plus 5 minutes extra for uploading to turinitin	35	N	Individual

Legacy Code 300892

Coordinator Bill Price ([https://directory.westernsydney.edu.au/search/name/Bill Price/](https://directory.westernsydney.edu.au/search/name/Bill%20Price/))

Description Students will undertake a short research project specific to the field of Medical Science. This will involve undertaking a review of the literature and generating appropriate hypotheses that will subsequently be tested and analysed. Findings will be presented orally and as a written manuscript.

School Science

Discipline Medical Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 6140 - Biomolecular Science Project
NATS 3039 Science Research Project

Restrictions Students must be enrolled in 3577 Bachelor of Medical Science, 3673 Bachelor of Medical Science, 3674 Bachelor of Medical Science (Nanotechnology) or 3682 Bachelor of Medical Science (Advanced). Successful completion of 80 credit points at Level 2 or 3. Students must have a GPA of 5.5 or above.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse literature relevant to a specific issue in medical science.
2. Generate hypotheses and plan appropriate methods for testing.
3. Gather and analyse scientific data.
4. Communicate work in appropriate written and oral scientific formats.
5. Justify methodological approach, and interpretation of findings to a scientific audience.

Subject Content

There is no formal content for this subject as the projects undertaken will vary according to the expertise of staff and interests of the students.

Students will choose project topics in consultation with academic staff and with the oversight of the subject Coordinator and Director of Academic Program.

1. Identification of project
2. Literature search and review
3. Development of research aims
4. Preparation of a risk assessment in the appropriate format
5. Conduction of research work
6. Preparation of a research report
7. Presentation of a poster

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Legacy Code 300927

Coordinator Mark Temple ([https://directory.westernsydney.edu.au/search/name/Mark Temple/](https://directory.westernsydney.edu.au/search/name/Mark%20Temple/))

Description Molecular Medicine is an inquiry based capstone unit that integrates core concepts in molecular and cell biology with a focus on cancer as a framework to discuss autoimmune, infectious and genetic diseases. This unit aims to enhance critical thinking for the professional environment and prepares students for future innovations in prevention, management and cure of catastrophic diseases. Current research, diagnosis, treatment and policy issues, related to health and disease states, are placed in the context of real world experiences and changing imperatives.

School Science

Discipline Medical Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) Students are required to pass two units from the following - BIOS 3014 - Genes Genomics and Human Health BIOS 2018 - Genetics BIOS 2026 - Molecular Biology BIOS 2014 - Functional Proteins and Genes BIOS 2021 - Metabolism BIOS 3001 - Advanced Cell Biology

Equivalent Subjects LGYA 6144 - Molecular Basis of Disease LGYA 6012 - Mamalian Molecular Medicine

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the molecular biology of a gene in the context of various monogenic diseases and of various genes in the development of a complex disease
2. Outline the potential of various genetic technologies diagnose and to treat disease
3. Explain the potential of various molecular analyses to diagnose and to treat disease
4. Explain the basis of cancer genetics
5. Demonstrate an ability to search and collate data from internet based health databases
6. Evaluate new developments in functional genomics in relation to their potential to diagnose disease

Subject Content

1. Molecular analyses in the context of diagnosis and treatment of disease
2. New genetic technologies in diagnosis and treatment of disease
3. The nature of cancer as characterised by genetic factors, tumor viruses and cellular oncogenes
4. Control of cell invasion, metastasis and angiogenesis by growth factors, receptors and cytoplasmic signalling and tumor suppressor genes
5. Genomic integrity and multistep tumorigenesis

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

NATS 3035 Molecular Pharmacokinetics

Credit Points 10

Legacy Code 300912

Coordinator Gang Zheng ([https://directory.westernsydney.edu.au/search/name/Gang Zheng/](https://directory.westernsydney.edu.au/search/name/Gang%20Zheng/))

Description Molecular Pharmacokinetics builds on the fundamental chemical kinetic principles learnt in Physical Chemistry and extends them to the study of absorption, distribution, metabolism, and elimination of pharmaceutical drugs in human body. Upon completing this unit, students will gain a firm understanding of why the pharmacokinetic behaviour of a drug can be fully described by two key pharmacokinetic parameters (i.e. clearance and volume of distribution) and why the absorption rate of a drug can be predicted by examining its chemical structural features alone. Students will also gain the capability of designing dosage regimens for simplified pharmacokinetic scenarios and extracting important kinetic information from plasma drug concentration versus time data obtained experimentally.

School Science

Discipline Pharmacology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) CHEM 2010

Equivalent Subjects LGYA 6080 - Molecular Pharmacokinetics

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe mathematically the kinetic and mechanistic aspects of availability and removal of drugs in the body, including under conditions of continuous and periodic dosage.
2. Explain and compare the main forms of metabolic, oxidative and hydrolytic degradation experienced in vivo by the members of each of the major types of drug class.
3. Relate the chemical structure of members of a given major type of drug class to their relative stability to chemical oxidative, hydrolytic and enzymatic degradation in vitro, and to their ease of phase partitioning.

- Describe the transport and the environment experienced in vivo of members of the major types of drug class relevant to their site of action.
- Demonstrate appropriate advanced laboratory skills, for collection of kinetics and physicochemical data of the bioavailability, degradation and removal of drug molecules.

Subject Content

- Kinetics of the bioavailability, degradation and removal of drug molecules.
- Principles of pharmacokinetics of the transport of drugs across membranes of cells and tissues within the body.
- Theory of physicochemical factors affecting the bioavailability of drugs in the body: pH, pKa, permeability, plasma protein binding, dissolution, molecular size and shape, hydrogen bonding, Log P, viscosity, conductivity, mobility, and hydrophobicity.
- Principles of pharmacokinetics and mechanism of metabolism (oxidation, hydrolysis and conjugation), enzymatic degradation and stability within the body of members of the major types of drug: linear and nonlinear elimination, enzymatic, Michaelis-Menten and atypical kinetics.
- Theory of in vitro adsorption of drugs onto proteins: free drug, receptors, agonists and messengers, Langmuir plots.
- Time course concentration of the drugs in the body: from dose to time-course concentration of the drug in the plasma, area under the curve, renal clearance, elimination rates.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical	1200 words for each report	40	N	Individual
Quiz x5 (Online)	15 min each	15	N	Individual
End of Session Quiz (Online)	45 min	10	N	Individual
Final Exam (Online)	2 hours	35	N	Individual

NATS 3037 Neuroanatomy

Credit Points 10

Legacy Code 300754

Coordinator Sam Merlin ([https://directory.westernsydney.edu.au/search/name/Sam Merlin/](https://directory.westernsydney.edu.au/search/name/Sam%20Merlin/))

Description This unit builds on the human anatomy and physiology studied in first and second year, equipping students with detailed knowledge of functional neuroanatomy, with particular emphasis on the central nervous system. Cadaver specimens are used to facilitate

the learning of spatial relationships between structures. The study of neurological function and dysfunction integrates many previously learned scientific principles.

LGYA 5934 AND
NATS 2034

Equivalent Subjects LGYA 5934 - Neuroanatomy LGYA 7786 - Clinical Neurosciences LGYA 7060 - Clinical Neurosciences

Restrictions Successful completion of 80 credit points. Due to space limitations, students must be enrolled in the following programs: 3733 Bachelor of Medical Science (Forensic Mortuary Practice) 3755 Bachelor of Medical Science, 3758 Bachelor of Advanced Medical Science, 4656 Bachelor of Health Science, 4706 Bachelor of Physiotherapy, 4708 Bachelor of Podiatric Medicine, 4709 Bachelor of Podiatric Medicine (Honours), 4711 Bachelor of Occupational Therapy, 4712 Bachelor of Occupational Therapy (Honours), 4733 Bachelor of Physiotherapy (Honours), 6002 Diploma in Science/Bachelor of Medical Science, 6042 Diploma in Science/Bachelor of Medical Science. Note: Enrolment of students in other programs may be approved by the subject Coordinator for the Summer session, subject to vacancies and meeting equivalent prerequisite knowledge. Please lodge a Rule Waiver request for enrolment.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Identify neuroanatomical structures from cadaveric specimens, photographs/diagrams & models, and discuss their functions.
- Identify and discuss histological features of the nervous system.
- Explain the embryological development of the nervous system and analyse the consequences of alterations in development.
- Explain the functional and spatial relationships between structures and analyse the consequences of alterations in these relationships.
- Explain the pathogenesis/pathophysiology, manifestations and treatment of neurological disorders.

Subject Content

Embryological development of the nervous system
Topographical features, internal anatomy, and functions of the cerebrum, cerebellum, brain stem & spinal cord
Relationship of cranial nerves with the brain and cranial cavity
Major nuclei of the brain and associated functions
Nuclei and functions of the diencephalon, basal ganglia & brain stem
Neural histology, signalling & transmission
Major limbic structures functions
Sensory reception and pathways
Motor structures and pathways
Spinal reflexes
Vasculature of the brain and spinal cord
Neurological disorders/dysfunction
Neural basis of pain

Assessment

NATS 3038 Quality Assurance and Food Analysis

Credit Points 10

Legacy Code 300922

Coordinator Rosalie Durham ([https://directory.westernsydney.edu.au/search/name/Rosalie Durham/](https://directory.westernsydney.edu.au/search/name/Rosalie%20Durham/))

Description This unit covers the knowledge and tools required to maintain food quality. Students will develop an awareness of food laws, regulations and codes at the state, national and international

levels. Students will be introduced to elementary toxicology and risk analysis as it applies to the regulation of food additives. The unit also integrates previous studies in HACCP (Hazard Analysis Critical Control Point) to develop deeper understanding of food quality assurance and quality management systems as they are applied to the control and management of the food supply. Students are introduced to the standard methods of analysis of foods as used for nutritional and quality assessment of foods. Practicals include determination of major and minor food components; functionality tests and sensory analysis of foods.

School Science

Discipline Food Science and Biotechnology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) PROC 2001

Equivalent Subjects LGYA 6249 - Quality Assurance and Food Analysis

Incompatible Subjects NATS 2016 - Food Processing and Analysis
NATS 3019 - Food Quality Assurance
LGYA 6092 - Quality Assurance and Food Safety
LGYB 8787 - Food Science and Technology Practicum
32 LGYB 8783 - Food Evaluation

Assumed Knowledge

Students require good understanding of the principles of food preservation and HACCP (Hazard Analysis Critical Control Point).

Learning Outcomes

On successful completion of this subject, students should be able to:

- Describe quality management theories and systems; food laws, regulations and codes at state, national and international levels.
- Use risk analysis methodology to evaluate the safety of a food additive, including gather and collate information from a wide range of sources and critique the information to assess the toxicological safety of a food additive.
- Work effectively in a group on a case study to produce a Quality Manual, integrating quality management theories, food safety regulations, and food process knowledge for the management of safe food.
- Apply quality management statistical tools to monitor the quality of a food process.
- Appraise and select appropriate methods for the chemical, physical and sensory analysis of foods.
- Follow laboratory procedures and protocols to proficiently perform a range of food analysis methods safely and accurately; systematically record experimental data and calculate results of these tests.
- Demonstrate effective communication in a variety of written formats, scientific and professional; use of advanced word and excel skills for large and complex documents.
- Recognise the legal and ethical responsibility, both individual and corporate, to maintain a safe food supply.

Subject Content

- Food laws, regulations and codes at state, national and international levels.
- Elementary toxicology, principles of food safety and risk analysis, and its application to the regulation of food additives in foods.

- Quality Management Systems, including HACCP, ISO22000 and other current food management systems, plus relevant accreditation procedures.
- Statistical tools of quality management for the management of food quality.
- Methods for sensory analysis of foods, including questionnaire design and statistical analysis of sensory data.
- Methods for the chemical analysis of foods, including method selection and tests for moisture, ash, sodium, protein, fat and carbohydrates.
- Construction of nutrition information panels for food labels and food labelling legislation.

Assessment

NATS 3039 Science Research Project

Credit Points 10

Legacy Code 300924

Coordinator Bill Price ([https://directory.westernsydney.edu.au/search/name/Bill Price/](https://directory.westernsydney.edu.au/search/name/Bill%20Price/))

Description Science Research Project is a final-year capstone unit that gives students an introduction to scientific research, while extending their knowledge and practical skills. Each student undertakes a research project supervised by an academic staff member. With the assistance of their supervisor, students will research the literature and define the problem to be studied, carry out a risk assessment, develop the appropriate experimental methods, carry out research on their project, and present a final written report and a poster or oral presentation. This unit offers a challenge to final-year students, and allows innovation by the student with respect to both method and research direction.

Restrictions Students must have successfully completed at least two Level 3 subjects and have a GPA of 5.5 or above. This is an undergraduate project unit; the restrictions above are purposely designed to limit enrolments to a small number of high-performing third year students. Handling large enrolments is not possible in this style of subject.

Assumed Knowledge

This subject is aimed at undergraduates in their final year of undergraduate study who have a good grounding in the Level 2 subjects for the discipline area of their individual project.

Learning Outcomes

On successful completion of this subject, students should be able to:

- access and review research literature relevant to their project area
- develop research aims and design experiments to test these aims
- prepare a risk assessment in the approved UWS format
- conduct experimental and/or computational work and analyse the data
- communicate the research results orally and in writing

Subject Content

- Identification of project
- Literature search and review
- Development of research aims
- Preparation of a risk assessment in the appropriate format
- Experimental and/or computational work
- Preparation of a research report
- Presentation of a poster

Assessment

NATS 3040 Topics in Medical Science

Credit Points 10

Legacy Code 300893

Coordinator Christopher Jones ([https://directory.westernsydney.edu.au/search/name/Christopher Jones/](https://directory.westernsydney.edu.au/search/name/Christopher%20Jones/))

Description This unit builds on the content and concepts developed across multiple discipline areas during the Bachelor of Medical Science, integrating them together into the context of human health and disease. Students will work in groups to undertake an in depth exploration of an issue related to Medical Science. Topics addressed each year will vary, and will include issues currently at the forefront of Medical Science, issues for which there is currently significant scientific debate, and issues in which students have expressed a particular personal interest.

School Science

Discipline Medical Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Restrictions

Students must be enrolled in 3755 Bachelor of Medical Science, 3758 Bachelor of Advanced Medical Science, 3673 Bachelor of Medical Science, 3674 Bachelor of Medical Science (Nanotechnology) or 3682 Bachelor of Medical Science (Advanced) or 6002 Diploma in Science/

Bachelor of Medical Science. Successful completion of 80 credit points at Level 2 or 3.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the multidisciplinary of a selected topic in medical science.
2. Generate an effective teaching session for a selected topic of medical science.
3. Discuss a range of topics in medical science.
4. Evaluate peer teaching sessions.
5. Work cooperatively as part of a group.

Subject Content

Content will vary, and will include issues currently at the forefront of Medical Science, issues for which there is currently significant scientific debate, and issues in which students have expressed a particular personal interest.

NATS 3043 Advanced Science Research Project C

Credit Points 10

Legacy Code 301258

Coordinator Bill Price ([https://directory.westernsydney.edu.au/search/name/Bill Price/](https://directory.westernsydney.edu.au/search/name/Bill%20Price/))

Description This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). This subject provides a unique opportunity for Advanced Science and Advanced Medical Science students to work with and be mentored by academics in diverse areas of science. In this 20 credit point subject, students will complete a small research project aligned with the research activity of the academic and be integrated into the research environment of the School. Students will demonstrate time management skills, project design, data collection, analysis and communication. Students will be required to reflect on their capacity and areas of passion for transitioning into either further education or the workplace. Please note this subject is not timetabled so completion will be subject to approved timelines negotiated with the appropriate academic staff and subject co-ordinator. Students may be required to travel to a different campus or location to undertake this subject.

School Science

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) NATS 2001

Assumed Knowledge

It is assumed that students have completed at least 40 credit points at Level 2 in their area of research. This should be discussed with the research supervisor prior to acceptance into the research team.

Learning Outcomes

1. Access, review and critique relevant literature on a given research topic
2. Plan and conduct a research project
3. Analyse and critique scientific data
4. Prepare a concise and accurate report in the style appropriate to the project (usually a journal article)
5. Effectively communicate research findings orally as part of a research seminar
6. Demonstrate development of graduate level time management skills
7. Participate in the broader research environment either within a team or across teams and reflect on the skill sets required for transition into the workplace or into further education

Subject Content

- Research skill development appropriate for the chosen area
- Regulations and resources limitations in science research
- Project management
- Personal time management
- Data analysis (quantitative, qualitative or both)
- Science and interpersonal communication
- Planning, conducting and communicating research projects

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

NATS 3044 Complex Case Studies in Science

Credit Points 10

Legacy Code 301261

Coordinator Andrew Shalliker ([https://directory.westernsydney.edu.au/search/name/Andrew Shalliker/](https://directory.westernsydney.edu.au/search/name/Andrew%20Shalliker/))

Description Science and the scientific process of discovery have been successful in offering explanations for the world we live in. Even seemingly simple problems can disguise a far greater degree of complexity. Indeed, the more we develop our tools for scientific discovery the greater the degree of complexity that is revealed. Exploring and unravelling the complexity of the world we live in requires integrative and multidisciplinary research frameworks, and it can be complicated further by the relationship between science and society, culturally, socially, economically and politically. In this unit we will begin the life-long journey to develop the enquiring scientific mind by exploring the complexities of seemingly innocuous everyday elements. Students will critically examine such perspectives in a series of contemporary 'real-life' case studies such as foods and food security, medicines and drugs.

School Science

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Restrictions Students must have completed 80 credit points of study before commencing this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate how seemingly simple problems and interactions hide complex information.
2. Analyse the complexity of the problem and develop a process to explore in greater detail the nature of the problem.
3. Apply research tools to pose solutions to the complex problem at hand.
4. Critically evaluate the ways in which scientists from different disciplines can work together to solve complex problems.

Subject Content

1. Nature of science and scientific research including bias, complexity and uncertainty.
2. Experts and knowledge ? the role of science in planning and decision-making processes
3. Understanding of the nature of the problem ? using literature to reveal complexity.
4. Developing skills to explore the nature of the problem ? seeing the unseen.
5. Communication of science peers, including the wider society as applicable.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

NATS 3045 Work Internship for Science Professionals

Credit Points 10

Legacy Code 301259

Coordinator Michelle Ryan ([https://directory.westernsydney.edu.au/search/name/Michelle Ryan/](https://directory.westernsydney.edu.au/search/name/Michelle%20Ryan/))

Description This unit will provide second and third year science students with an opportunity to undertake a short work placement within a professional organisation. The placement will allow students to observe and develop professional skills and behaviour and integrate theoretical and practical science knowledge and conventions into a real world setting. Students will find their own placement but may be aided by the Unit Coordinator. In consultation with the Unit Coordinator and the workplace supervisor, students will develop a Professional Task to accomplish during their placement. The Professional Task will enhance their workplace skills and highlight how their science knowledge can be adapted and integrated into a professional career. The unit will assure that students have job readiness. Students may need to travel to other campuses or locations to complete this unit.

School Science

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects NATS 2032 Work Integrated Learning in Science

Restrictions Student must have completed 100 credit points and a placement agreement must be signed and submitted to the University before week 2 of 2H

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply theory learnt during their course to Industry problems.
2. Communicate the outcomes of their project to both a University and Industry audience.
3. Critically evaluate the contribution of personal attributes to the workplace
4. Show how the work placement has contributed to their job readiness.

Subject Content

Work Placement: 100 hours of supervised work experience which will include the following:

1. Integration of scientific theory with real world applications
2. Professional behaviour
3. Project planning, design and completion
4. Communication of project outcomes via a report and presentation

Special Requirements

Legislative pre-requisites

All students will be required to conduct Risk Assessments for the tasks they have outlined in their Professional Task. Depending on the nature of the organisation in which they are doing their placement there may be special legislative requirements. These will be identified during development of the Professional Task. The placement will not proceed if the student does not have the correct requirements at the time the placement is due to begin.

Assessment

NATS 3046 Advanced Physiology

Credit Points 10

Legacy Code 301355

Coordinator Sabine Piller ([https://directory.westernsydney.edu.au/search/name/Sabine Piller/](https://directory.westernsydney.edu.au/search/name/Sabine%20Piller/))

Description From 2020 this unit replaces 300851 - Advanced Physiology. Physiology is the study of the way in which a living organism and its bodily parts function. This unit will examine integrative aspects of physiological control mechanisms comprising multiple organ systems and mechanisms of adaptation to environmental factors. It will focus on regulatory function of ion channels, neurophysiology, sensory physiology, motor control, metabolism, cardiovascular and respiratory systems. Students will have the opportunity to independently research, in depth, an area of physiology pertinent to their interest.

School Science

Discipline Medical Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) NATS 1010 OR BIOS 2006

Equivalent Subjects BIOS 3016 - Human Physiology LGYA 5938 - Topics in Physiology BIOS 3002 - Advanced Physiology

Assumed Knowledge

Demonstrated sound understanding of physiological systems of the human body.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the major (principle) ion channels present in organisms, and evaluate their functional significance in regulating body function under normal and pathological conditions (e.g. channelopathies).
2. Explain the function of sensory organs, neural encoding, processing and analysis of sensory information, particularly in the context of motor control and perception.
3. Examine how sensorimotor mechanisms are implemented in motor control strategies.
4. Evaluate the interaction between organ systems in achieving optimal regulation of the body function during exercise.
5. Analyse the role of homeostasis in adaptation to a wide range of living conditions, food sources and extreme environments.
6. Create, deliver, and peer evaluate oral presentations competently.

Subject Content

1. Exercise Physiology
2. Exercise Metabolism
3. Electrophysiology, ion channels, channelopathies;
4. Sensory physiology;
5. Motor control mechanisms;
6. Examples of the most recent discoveries and research trends in the field of physiology.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Independent Investigation Topic: Oral presentation with assessed draft submission	Oral presentation: 10 minutes	20	N	Individual
Participation in laboratory practical classes, including completion of post-practical quizzes	Lab Quizzes 15 minutes	15	N	Individual
Midterm open book on-line exam	40 minutes	15	N	Individual
Online Final examination	2 hours	50	N	Individual

NATS 3047 Applied Physiology

Credit Points 10

Legacy Code 401412

Coordinator Shona Papalia ([https://directory.westernsydney.edu.au/search/name/Shona Papalia/](https://directory.westernsydney.edu.au/search/name/Shona%20Papalia/))

Description From 2020 this unit replaces 401146 - Applied Physiology. This unit focuses on the application of exercise physiology in sporting and physically demanding occupation contexts. Concepts covered include: muscular fatigue, soreness & recovery, General Adaptation Syndrome Theory, testing, training and periodisation in an individualised approach to the client. Students will develop skills to appropriately: select, justify perform and evaluate a number of laboratory, field and functional tests; analyse, interpret and communicate test results; prepare, justify, implement and evaluate individualised training and recovery plans (long and short term); incorporate other sport and exercise science sub-disciplines into plans and appropriately adjust plans for environmental challenges.

School Health Sciences

Discipline Medical Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) HLTH 2005 AND
HLTH 2004 AND
BIOS 2012

Equivalent Subjects BIOS 3022 - Sport Physiology BIOS 3003 - Advanced Sport Physiology BIOS 3008 - Applied Physiology

Restrictions

Students must be enrolled in 4658 - Bachelor of Health Science (Sport and Exercise Science).

Assumed Knowledge

The knowledge and skills covered in the pre-requisite subjects. In addition students are expected to have a mathematical ability equal to a passing level in the BOSTES (NSW) numeracy test. See <http://www.boardofstudies.nsw.edu.au/rosa/literacy-and-numeracy-tests.html>. Students whose mathematical ability is not at this level or who have not used such mathematics recently are encouraged to seek assistance early through the Mathematics Educational resource Hub (MESH) <http://www.westernsydney.edu.au/mesh/mesh> (<http://www.westernsydney.edu.au/mesh/mesh/>).

Learning Outcomes

On successful completion of this subject, students should be able to:

- Discuss how a variety of physiological, metabolic, hormonal and neural factors may impact on physical performance in sport and physically challenging occupations
- Design, justify, organise and conduct fitness and functional assessments suitable for individual clients in the sport and physically challenging occupations.
- Interpret, evaluate and report the assessment results to relevant stakeholders including clients, coaches and other professionals working with sport persons and those in physically challenging occupations.
- Apply practical knowledge of over training syndrome and current theories on the physiology of muscular fatigue, acute muscle soreness and delayed onset muscle soreness to optimise health outcomes and performance of individual clients in sport and physically challenging occupations.
- Design, justify, implement, supervise, monitor and evaluate individualised training programs including long term, short term and session plans for sport and physically challenging occupations.

6. Integrate knowledge and skills from other sport and exercise science sub-disciplines into the professional practice of the exercise physiologist working with sports persons and those in physically challenging occupations.
7. Critically evaluate current research literature to ensure an evidence-based approach to practice and continuing professional development.

Subject Content

1. Factors that can limit/determine physical performance in sport and physically challenging occupations
2. Physiological testing of fitness and function
 - a). Roles of testing in sport and physically challenging occupations
 - i. Talent ID, pre-employment, diagnosis, evaluate training, inform training specifics
 - b). Scientific basis for fitness and functional testing
 - c). Identifying important fitness attributes
 - d). Identifying appropriate tests and groups of tests
 - ii. Evidence base for choices
 - iii. Factors influencing the quality and usability of the results
 - Validity, reliability, Objectivity, accuracy and discriminating ability
 - Cohort characteristics: Males Vs Females, Age (children Vs adolescents Vs adults Vs older individuals)
 - norms, criteria
 - nutrition, hydrations, familiarisation, environment
 - e). Testing management and administration
 - i. Legal compliance factors: Consent; Privacy (PIIPA & HRIPA), working with children, risk assessments, SOPs
 - ii. Equipment: calibration; quality assurance
 - iii. Organisation of space, equipment and staff
 - iv. Preplanning of data recording, processing and interpretation for reporting
 - f). Commonly used tests: VO₂max, anaerobic threshold, OBLA, anaerobic exercise capacity; muscular strength, power and endurance; flexibility (ROM); speed; power; general functional movement and functional skill; and other sport/occupation specific tests
 - g). Practical work: Research, learn, design and implement a testing program including organise, conduct, interpret and report the results of physiological and functional tests that can be implemented in the laboratory and field
3. Exercise Training for sport and physically challenging occupations
 - a). Scientific basis of training adaptation ? genomics, proteomics etc
 - b). General Adaption Theory and its application to training and recovery planning
 - c). Current guidelines for developing fitness for optimum performance ? training types and their expected effects on responses and adaptations to exercise and on test results
 - d). Why & how knowledge and skills in psychology, motor control & learning, biomechanics and other sub disciplines can value add to the quality of the exercise physiologists input into training design
 - e). Annual Plans, periodisation, peaking, tapering, detraining. Macro cycles, micro cycles, individual session plans
 - f). Using test results to set training specifics
 - g). Influences of age, experience, gender, environment, nutrition, drugs/medications, hydration
 - h). Monitoring responses to training ? within sessions, over time
 - i). DOMs, Overtraining, returning to training post injury/illness
 - j). Practical work: training program design (all levels), implementation, supervision, record keeping and evaluation
 - k). Participation in and evaluation of testing and training programs
4. Other
 - a). Discipline specific OH&S ? related to practical tasks of the unit
 - b). Communication with peers, academic supervisors, athletes, coaches, parents and others in support teams

Special Requirements

Legislative pre-requisites

Note: First Aid Requirement has been removed for Spring 2021 due to Covid Restrictions.

Prior to enrolling in this subject, students must hold a valid and current First Aid Certificate from a Registered Training Organisation. Use the link to the Special Requirements webpage below for more information. Special requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Competency Assessments: From 5 to 20 Unit Specific Work Health & Safety training and assessment of understanding of training x 3 and Laboratory practical skills x 4	Varied: minutes each	Hurdle	Y	Individual
Literature Review	2,000 words	35	N	Individual
In class tests (MCQs and short answers, calculations) x 2	Up to 1 hour each	30	N	Individual
Professional Task: Designing and justifying Testing & Training Programmes X 4	1 page per plan plus up to 500 words justification for each of the program plans	35	N	Individual

NATS 3048 Food Formulations

Credit Points 10

Legacy Code 301453

Coordinator Christine Hutchison ([https://directory.westernsydney.edu.au/search/name/Christine Hutchison/](https://directory.westernsydney.edu.au/search/name/Christine%20Hutchison/))

Description This unit applies scientific principles to the development, preparation and presentation of food products. You will be encouraged to become autonomous learners through problem-solving activities and experiential techniques. You will integrate and apply knowledge and skills from areas such as chemistry, biology, food science and nutrition to nutritionally focussed food products. You will also be encouraged to keep abreast of food trends in the dynamic food industry as well as current nutritional issues within domestic, multicultural and indigenous communities. Students will utilise prior knowledge and skills to address specific nutritional issues and the development of new food products to fit within these boundaries.

School Science

Discipline Food Science and Biotechnology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects NATS 3011 - Culinary Science LGYA 6198 - Culinary Studies NATS 3010 - Culinary Science

Restrictions Must have passed 100 credit points of subjects

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the principle chemical and physical properties of food components and their interactions during food preparation.
2. Explain the role of food ingredients in different food systems and be able to apply relevant food science principles to create new food products.
3. Demonstrate advanced practical skills in the formulation, preparation and presentation of foods and food products
4. Relate nutritional issues with food preparation principles and practices
5. Demonstrate development of skills in food preparation working with a number of food commodities
6. Perform basic recipe manipulation for specific dietary purposes

Subject Content

1. Nutritive and biophysical properties of carbohydrates, proteins and fats
2. Additives to manipulate food composition, processing and storage.
3. Food ingredient manipulation for sustainable product development.
4. Functional foods for specific dietary requirements.
5. Principles for food formulation, within regulatory and health guidelines.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Applied Project	2,000 words	40	N	Group
Proposal	2x 1000 words	20	N	Group
Critical Review	2,000 words	40	N	Individual

NATS 6001 Introduction to Neuroscience

Credit Points 10

Legacy Code 401471

Coordinator Yossi Buskila ([https://directory.westernsydney.edu.au/search/name/Yossi Buskila/](https://directory.westernsydney.edu.au/search/name/Yossi%20Buskila/))

Description This unit is an introduction to the nervous system with a focus on its role and the function. It provides a strong foundation in modern neuroscience for those wishing to apply the principles of sensory and motor system function with the aim of mimicking human biology via neuromorphic implementations. Students will have access to expertise from a multidisciplinary team, guiding their learning in the areas of cellular, computational, behavioural and biomedical neuroscience. Topics covered in the unit will include introductory biology, structure and function of the nervous system, computational modelling, bio-signal acquisition and signal processing. This subject will be undertaken at Parramatta City - Hassall St campus.

School Medicine

Discipline Medical Science

Student Contribution Band HECS Band 2 10cp

Restrictions Students must be enrolled in 8124 Master of Applied Neuromorphic Engineering

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine key concepts underlying the basic systems and functions of the nervous system
2. Appraise the basic structure of neurons and synapses
3. Interpret the basis of the resting membrane potential, Nernst and Goldman equations
4. Simulate and explain the dynamics of the action potential, neural excitability, synaptic plasticity, integration and facilitation
5. Critically analyse the operation of various elements of the nervous systems at a functional level and in the context of their evolutionary history

Subject Content

- Functional Anatomy of central Nervous system
- ionic basis of resting membrane potential
- action potential & neuronal excitability, The cable theory
- mechanisms of plasticity
- The evolutionary origin of The Nervous systems
- The Visual system
- The auditory system
- The somatosensory system
- Behavioural?neuroscience & neurodegeneration
- Bioamplifiers and filters

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	1-hour x 2 (15% each)	30	N	Individual
Essay	1000 Words	30	N	Individual
Report	1500 Words	40	N	Individual

NATS 7001 Advanced Criminalistics

Credit Points 10

Legacy Code 301151

Coordinator Chris Lennard ([https://directory.westernsydney.edu.au/search/name/Chris Lennard/](https://directory.westernsydney.edu.au/search/name/Chris%20Lennard/))

Description This subject is designed to provide an in-depth knowledge of the following eight evidence categories: glass, textile fibres, paint, fire debris, explosives, firearm discharge residues, illicit drugs, and inks/toners on documents. Each stand-alone module introduces the evidence type and its forensic significance, details the relevant distinguishing and discriminating characteristics for the trace material in question, presents the analytical techniques commonly applied in the criminalistics laboratory, and discusses data interpretation and evidential value. The subject is unique in terms of its coverage of these trace evidence categories from an operational forensic science perspective.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 3741 Master of Forensic Science, 3742 Graduate Diploma in Forensic Science or 3743 Graduate Certificate in Forensic Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe each evidence category in terms of general characteristics and how the material may be encountered in a criminal investigation
2. Appreciate the variations in physical and chemical properties that can be used to characterize samples from each evidence category
3. Recognize the importance of transfer and persistence phenomena for each trace evidence type
4. Understand the range of analytical techniques that can be applied within the criminalistics laboratory and the information generated by each technique
5. Describe recommended evidence collection methods and analytical sequences appropriate for each evidence category
6. Understand the difficulties associated with the interpretation of analytical results for each evidence type and recognize the factors that can impact on relative evidential value

Subject Content

Module 1 Glass
 Module 2 Textile Fibers
 Module 3 Paint
 Module 4 Fire Debris Analysis
 Module 5 Explosives
 Module 6 Firearm Discharge Residues
 Module 7 Illicit Drugs
 Module 8 Paper, Inks and Toners

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

NATS 7002 Biological Agents 1

Credit Points 10

Legacy Code 301154

Coordinator Alicia Haines ([https://directory.westernsydney.edu.au/search/name/Alicia Haines/](https://directory.westernsydney.edu.au/search/name/Alicia%20Haines/))

Description This unit introduces students to the key concepts involved in Biosecurity and Microbial Forensics, with a focus on understanding the types of biological agents that pose potential security risks and the system and practices involved in investigation and management of potential threats.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 3741 Master of Forensic Science, 3742 Graduate Diploma in Forensic Science or 3743 Graduate Certificate in Forensic Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. collate, analyse, evaluate, interpret and present information relating to Biosecurity and Microbial Forensics
2. identify and analyse potential biosecurity threats and to implement and evaluate appropriate microbial forensic techniques for threat resolution, with independent critical and creative thinking
3. respond to potential biosecurity threats with the ability to initiate new ideas, implement effective decisions and cope with uncertainty
4. understand the health, environmental, economic, political, legal and social issues related to biosecurity, with an international perspective

Subject Content

Module 1: Fundamentals and History of Biosecurity

Module 2: Biological Agents

Module 3: Epidemiology and Investigation of Disease Outbreaks

Module 4: Sample Collection and Handling

Module 5: Biological Agent Identification and Characterisation

Module 6: Responses to Biological Threats & Legal Aspects of Biosecurity

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

NATS 7004 Blood Distribution and Spatter

Credit Points 10

Legacy Code 301149

Coordinator Chris Lennard (<https://directory.westernsydney.edu.au/search/name/Chris Lennard/>)

Description This unit will provide an in-depth review of the principles of blood spatter creation, and blood stain interpretation as it pertains to biological evidence. This unit is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this unit is available from the University of Florida.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 3741 Master of Forensic Science, 3742 Graduate Diploma in Forensic Science or 3743 Graduate Certificate in Forensic Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. To understand the function of blood spatter interpretation in crime scene reconstruction
2. To be familiar with the terminology used routinely in blood spatter interpretation
3. To understand the function and structural differences of specified components of the circulatory system
4. To understand the physiological mechanisms initiated when the circulatory system is breached or damaged
5. To know the physical and chemical nature of blood
6. To understand the physical forces that are involved in the flight and droplet dynamics of blood
7. To understand the geometric parameters used to determine the angle of impact of blood
8. To understand the parameters involved in determining directionality of blood spatters
9. To understand the means of determining the point of convergence and the point of origin of blood staining
10. To know the identifying characteristics of different types of bloodstains

11. To understand the importance and methods of crime scene documentation and reconstruction
12. To understand the legal and forensic implications of blood spatter interpretation and the limitations of data interpretation for courtroom testimony

Subject Content

Module 1 Blood stain pattern analysis
 Module 2 Hemodynamics and Blood as a medium
 Module 3 Motion and directionality
 Module 4 Point of convergence and point of origin
 Module 5 Impact spatter blood stains
 Module 6 Characteristic blood patterns
 Module 7 Documentation and crime scene reconstruction
 Module 8 Legal and forensic implications

NATS 7005 Chinese Medicine Specialities 1

Credit Points 10

Legacy Code 400687

Coordinator Xiaoshu Zhu (<https://directory.westernsydney.edu.au/search/name/Xiaoshu Zhu/>)

Description This unit will enable practitioners to extend their understanding of the Traditional Chinese Medicine (TCM) diagnosis and management of a range of gastrointestinal and paediatric disorders. A feature of this unit is the integration of TCM and western medical approaches. Treatment will focus on acupuncture with common patent Chinese herbal medicine treatments included.

School Health Sciences

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse and compare the TCM diagnosis and management (with a focus on acupuncture treatment) with the orthodox diagnosis and management of a range of common gastrointestinal tract (GIT) disorders and paediatric conditions
2. Explain the significance of signs and symptoms associated with GIT disorders and paediatric disorders
3. Interpret a range of western medical diagnostic tests commonly used to investigate disorders of the GIT and paediatric conditions
4. Analyse the integration of TCM and western medicine in the diagnosis and where appropriate, management of GIT disorders and paediatric conditions
5. Analyse practice protocols in TCM compared to orthodox management
6. Analyse the strengths and limitations of acupuncture and Chinese patent medicines in the treatment of particular disorders of the GIT and paediatric disorders
7. Conclude when to refer for medical advice/treatment and outline how to liaise with relevant specialists

Subject Content

1. Western medical diagnosis and treatment of common gastrointestinal tract (GIT) disorders:
 - a. The acute abdomen
 - b. Tests relevant to gastrointestinal and liver conditions - what they are and how to interpret them
 - c. Physiology of the gastrointestinal system
 - d. Diagnostic models relevant to GIT disorders
 - e. The role of acupuncture in the treatment of GIT disorders ? strengths and limitations
 - f. Western medical diagnostic tests commonly used in GIT disorders
 - Visual Examination
 - blood tests
 - Colonoscopy, endoscopy
 - Cystoscopy
 - Stool tests
 - Barium meal
 - g. Integration of TCM and orthodox medicine in diagnosis and management of common GIT disorders including:
 - Abdominal distension
 - Gastroesophageal reflux, dyspepsia
 - Anorectal disorders
 - Diarrhoea
 - Abdominal pain
 - Colitis and IBS
2. Review of relevant TCM research
 - a. Hepatitis
 - Western medical diagnostic tests

- integration of TCM and orthodox medicine in Diagnosis and management
- Review of relevant TCM research
- 3. The Paediatrics
 - a. Concept
 - TCM physiology of The child
 - differences between children and Adult physiology and pathology
 - strengths and limitations of TCM management in these conditions
 - b. Examination of child/infant
 - Otoscope - Diagnosis of otitis, glue ear, differential Diagnosis of viral and bacterial infection
 - Examination of The throat, interpretation of altered body temperature, palpation of The Cervical axillary and inguinal glands
 - temperature ? what It means
 - Stethoscope ? how to listen to The chest, breath sounds and their meaning
 - c. Warning signs in children: the Red Flags and when to refer Orthodox western, integrative medical and TCM perspectives on treatment of common childhood conditions including:
 - Asthma
 - ear infections including otitis
 - Eczema
 - Colic
 - Cold and flu
 - Behavioural disorders
 - d. Latent Pathogenic Factor - Theory and TCM treatment of latent pathogens with reference to common childhood disorders that may include:
 - otitis
 - Behavioural problems
 - e. Accumulation Disorders (AD):
 - theory and its relationship to disorders of The gastrointestinal system
 - treatment of Accumulation disorders
 - f. Patent medicine and TCM Western medication for children
 - TCM perspectives Vaccination: Western perspectives, TCM perspectives

Teaching Periods

NATS 7006 Crime Scene Investigation (PG)

Credit Points 10

Legacy Code 301131

Coordinator Chris Lennard ([https://directory.westernsydney.edu.au/search/name/Chris Lennard/](https://directory.westernsydney.edu.au/search/name/Chris%20Lennard/))

Description A substantial amount of forensic evidence used in the prosecution of criminal cases is initially established at the crime scene. Recognising, detecting, recovering, preserving and recording this evidence forms a critical function within forensic science and criminal investigation. This unit explores the main aspects of crime scene investigation, including: crime scene processes, recognition of evidence, documentation of crime scenes, evidence detection and enhancement, maintaining evidence integrity, and bloodstain pattern analysis. It also covers professional practices associated with evidence handling and case file management.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in the Master of Forensic Science, the Graduate Diploma in Forensic Science, or the Graduate Certificate in Forensic Science.

Assumed Knowledge

Knowledge of general science as obtained via an undergraduate science degree (with completion of chemistry and biology subjects highly recommended).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the general approach to crime scene examination.
2. Appreciate the range of evidence types that may be present at a crime scene and describe appropriate search, recovery and preservation methods for each evidence type.
3. Articulate the requirements of good crime scene photography and case file management practices.
4. Understand the importance of professional practices associated with maintaining evidence integrity and continuity.
5. Report evidence and conclusions from crime scene investigations accurately and in an appropriate format.

Subject Content

1. Crime Scene Principles
2. Role of the Crime Scene Examiner
3. Crime Scene Photography
4. Fingerprints and DNA Evidence
5. General Physical Evidence
6. Bloodstain Pattern Analysis
7. Specialised Scene Examinations
8. Case File Management and Report Writing

Teaching Periods

NATS 7007 Drug Biotransformation and Molecular Mechanisms of Toxicity

Credit Points 10

Legacy Code 301139

Coordinator Chris Lennard ([https://directory.westernsydney.edu.au/search/name/Chris Lennard/](https://directory.westernsydney.edu.au/search/name/Chris%20Lennard/))

Description This unit provides a strong conceptual foundation of enzymology and mechanisms of drug biotransformation pathways. As a foundation for learning we will provide examples of drugs and other xenobiotics that exhibit toxicity related to biotransformation. This unit is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this unit is available from the University of Florida.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) NATS 7030

Restrictions

Students must be enrolled in 3741 Master of Forensic Science, 3742 Graduate Diploma in Forensic Science or 3743 Graduate Certificate in Forensic Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Predict from the structure of a xenobiotic, the structures of its probable metabolites including intermediates and final products
2. Predict the enzymes (including isozymes where known) likely to be involved in the biotransformation of a xenobiotic and its primary metabolites
3. Understand and correctly use the terminology of the field
4. Understand and be able to predict the effects of prototype inducers of xenobiotic biotransformation on enzymes present in liver and other organs
5. Understand and be able to predict the effects of prototype inhibitors of various xenobiotic biotransformation reactions
6. Understand the role of route of administration on the fate of a xenobiotic or the action of a modulator of xenobiotic transformation
7. Understand the roles of transporter proteins in directing uptake and efflux of xenobiotics and their metabolites
8. Understand the basis for interaction between reactive metabolites and cellular macromolecules, and be able to predict the potentially reactive metabolites of a particular xenobiotic
9. Comfortably navigate the WWW and know how to locate and use web based resources for their interest and further education
10. Use web based tools for communication and for the education of themselves and others

Subject Content

Module 1 Overview of Xenobiotic Metabolism

Module 2 Cytochrome P450

Module 3 Flavin Monooxygenase and Other Oxidative Enzymes

Module 4 Ester/Amide Hydrolysis

Module 5 Epoxide Hydrolases

Module 6 Glucuronosyltransferases and Glucosyltransferase

Module 7 Sulfotransferases

Module 8 Glutathione S-transferases

Module 9 Other Phase II Reactions

Module 10 Transport of Xenobiotics and Their Metabolites

Module 11 Metabolism and Toxicity General Concepts

Module 12 Metabolic Activation of Drugs

Module 13 Metabolic Activation of Industrial Chemicals

Module 14 Metabolic Activation of Pyrolysis Products

Module 15 Metabolic Activation of Natural Products

Assessment

NATS 7008 Environmental Forensics 1

Credit Points 10

Legacy Code 301152

Coordinator Val Spikmans (<https://directory.westernsydney.edu.au/search/name/Val Spikmans/>)

Description The unit is designed for professionals working in environmental regulatory authorities and laboratories at the federal, state or local level. This includes but is not limited to police jurisdictions, environmental protection agencies (EPAs), coastguards, park rangers, customs and quarantine officials. It is designed to give the environment law enforcement officer a background in the principles of contaminant analysis and transport in the environment with the ultimate aim of determining liability for pollution. The syllabus includes the main modes of contaminant transport in air, water and land, as well as an in-depth look at hydrocarbon fingerprinting.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 3741 Master of Forensic Science, 3742 Graduate Diploma in Forensic Science or 3743 Graduate Certificate in Forensic Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Communicate their knowledge, ideas and opinions in environmental forensics in appropriate written forms
2. Identify and analyse the main features of problems related to environmental forensics
3. Describe environmental systems and their forensic relevance with an international perspective
4. Describe and calculate the partitioning and speciation of chemicals in the environment
5. Interpret, analyse and evaluate contaminant transport models

Subject Content

1. Introduction
2. Toxicity
3. Identification of hydrocarbons
4. Fate of chemicals - partitioning
5. Fate of chemicals - biotransformations
6. Environmental transport models
7. Groundwater transport models
8. Atmospheric dispersion models

Assessment

NATS 7009 Environmental Forensics 2

Credit Points 10

Legacy Code 301153

Coordinator Chris Lennard (<https://directory.westernsydney.edu.au/search/name/Chris Lennard/>)

Description The unit is designed for professionals working in environmental regulatory authorities and laboratories at the federal, state or local level. This includes but is not limited to police jurisdictions, environmental protection agencies (EPAs), coastguards, park rangers, customs and quarantine officials. The unit consists of four case studies drawn from real-world scenarios. The skills and knowledge gained from Environmental Forensics 1 will be used to produce environmental forensic reports related to the case studies. The assessment is problem-based.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) NATS 7008

Restrictions

Students must be enrolled in 3741 Master of Forensic Science, 3742 Graduate Diploma in Forensic Science or 3743 Graduate Certificate in Forensic Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. To identify problems and analyse the main features of environmental forensic case studies.

Subject Content

Design of a uranium mine environmental monitoring program (Supervising Scientist of the Australian Government Department of the Environment and Heritage)

Assessment of a maritime oil spill event (Australian Maritime Safety Authority)

Use of spreadsheet-based plume modelling software to model groundwater contamination (US EPA, US Air Force)

Assessment of the processes acting on the distribution and concentration of a dissolved phase hydrocarbon plume (BP Australia)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Teaching Periods

NATS 7011 Experimental Design and Analysis PG A

Credit Points 20

Legacy Code 401266

Coordinator Bill Price ([https://directory.westernsydney.edu.au/search/name/Bill Price/](https://directory.westernsydney.edu.au/search/name/Bill%20Price/))

Description Experimental Design and Analysis can be taken independently or in combination in Autumn (Experimental Design and Analysis PG A) and/or Spring (Experimental Design and Analysis PG B) semesters. Working closely with their assigned supervisor(s), students in the health, medical, biomedical and natural sciences will enhance their expertise in experimental methodologies and knowledge of advanced discipline-specific concepts in the first year of the Masters of Research. Completion of one these two units will allow students to demonstrate theoretical and practical skills directly relevant to their proposed research project. Completion of both units will allow students to build upon initial results, and to gain experience in additional methodologies and experimental techniques. These units will also complement the Master of Research core units Research Design 1 and 2, providing a foundation for students to formulate their research question and thesis proposal.

School Science

NATS 7013 Explosives

Credit Points 10

Legacy Code 301156

Coordinator Chris Lennard ([https://directory.westernsydney.edu.au/search/name/Chris Lennard/](https://directory.westernsydney.edu.au/search/name/Chris%20Lennard/))

Description The unit provides information on the range of explosive compounds that may be encountered in incidents involving national security. It also covers improvised explosive devices, security screening applications, bomb scene management, and the forensic recovery and analysis of explosive residues. The unit concludes with case studies designed to illustrate the concepts covered in the preceding modules.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 3741 Master of Forensic Science, 3742 Graduate Diploma in Forensic Science or 3743 Graduate Certificate in Forensic Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

- gather, analyse, evaluate, interpret and present information relevant to the criminal use of explosives in a systematic and insightful way

- detect and identify potential explosive threats and use reflective practice and independent critical thinking to determine the appropriate tools and procedures to implement for rapid and effective solutions
- apply foresight, initiative and leadership skills to implement effective decisions and cope with novel situations, both independently and collaboratively

Subject Content

- Explosive compounds and mixtures
- Organic explosives
- Peroxide-based explosives
- Improvised explosive devices
- Screening technologies
- Forensic analysis of explosives
- Bomb scene management
- Case study - Bali bombings 2002

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

NATS 7014 Fingerprint Detection and Identification

Credit Points 10

Legacy Code 301132

Coordinator Chris Lennard ([https://directory.westernsydney.edu.au/search/name/Chris Lennard/](https://directory.westernsydney.edu.au/search/name/Chris%20Lennard/))

Description This unit aims to provide the student with a detailed understanding of the scientific methodologies applied to the detection, enhancement and identification of fingerprint evidence in a forensic context. The detection methods presented cover all of the current optical, physical and chemical techniques, as well as an insight into new approaches that are likely to have an impact over the next decade. The generally-accepted ACE-V methodology for fingerprint identification is discussed, together with the application of Bayesian statistics that has gained momentum as a preferred assessment method for this form of forensic evidence.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in the Master of Forensic Science, the Graduate Diploma in Forensic Science, or the Graduate Certificate in Forensic Science

Assumed Knowledge

Knowledge of general science as obtained via an undergraduate science degree (with completion of chemistry and biology subjects highly recommended).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Synthesise and evaluate information related to the origin and formation of friction ridge skin and the processes that lead to the deposition of fingerprints as potential forensic evidence.
2. Have an advanced appreciation of the range of fingerprint detection and enhancement methods that can be applied to the recovery of fingerprint evidence from a range of different surfaces.
3. Demonstrate expert judgement when formulating a fingerprint detection sequence for application on a particular substrate.
4. Apply fingerprint identification methodologies related to ACE-V and understand the role that Bayesian statistics can play as an interpretation and reporting tool.
5. Critically assess the contemporary issues related to the operational exploitation of fingerprint evidence.
6. Describe the origin and formation of friction ridge skin and the process that leads to the deposition of fingerprints as potential forensic evidence.
7. Appreciate the range of fingerprint detection and enhancement methods that can be applied to the recovery of fingerprint evidence from a range of different surfaces.
8. Articulate the recommended fingerprint detection sequences depending on the substrate type.
9. Acknowledge the contemporary issues related to the operational exploitation of fingerprint evidence.

Subject Content

1. Friction Ridge Skin and Fingerprint Evidence
2. Light Theory and Optical Detection Methods
3. Fingerprint Detection on Non-Porous Surfaces
4. Fingerprint Detection on Porous Surfaces
5. Fingerprint Detection on Miscellaneous Substrates
6. Novel Approaches to Fingerprint Detection
7. Fingerprint Identification Process
8. Issues Related to the Exploitation of Fingerprints and Fingermarks

NATS 7015 Food Evaluation

Credit Points 10

Legacy Code 301181

Coordinator Sunil Panchal (<https://directory.westernsydney.edu.au/search/name/Sunil Panchal/>)

Description This unit aims to provide students with the knowledge and skills required to evaluate food quality and safety. Students are introduced to contemporary methods of analysis of foods as used for nutritional, quality and safety assessment. Practical work includes determination of major and minor food components; physical and functionality tests; sensory assessment and microbiological analysis of foods.

School Science

Discipline Food Science and Biotechnology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Bachelor of Science majoring in science; such as biological sciences, chemistry, microbiology, nutrition, medical, forensic, animal science, zoology or pharmacology sciences.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appraise and select most suitable methods to determine food composition and where necessary to adapt the procedure to suit a particular food system.
2. Apply the theories of sensory evaluation to design and perform appropriate tests to assess the sensory properties of food.
3. Evaluate the theories for physical and functional assessment of foods and apply appropriate tests to evaluate the physical properties of food.
4. Apply microbiological risk assessment theories to determine appropriate microbiological testing procedures to characterise the microbial quality and safety of foods.
5. Design and perform experiments to assess food quality and safety.
6. Demonstrate practical skills to proficiently carry out selected methods accurately and reliably.
7. Systematically record experimental data and use statistical methods to summarise and assist interpretation of data, and communicate findings using the conventions of scientific writing.

Subject Content

1. Food composition, including the macro- and micro-nutrients; chemistry and nutritional properties of a variety of foods.
2. General principles of food analysis, application of a range of methods including using modern instrumentation to determine food composition.
3. Quantitative food assessment, food microstructure and rheology, physical assessments of food quality.
4. Theories and practices of sensory evaluation of food.
5. Factors affecting growth and survival of microorganisms in food, including food spoilage microorganisms and microorganisms of public health significance.
6. Methods for microbial examination of foods, microbiological standards and specifications.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

NATS 7016 Food Preservation and Packaging Technologies

Credit Points 10

Legacy Code 301180

Coordinator Vijay Jayasena (https://directory.westernsydney.edu.au/search/name/Vijay_Jayasena/)

Description The objective of this unit is to provide students with an understanding of food preservation and food packaging technologies. Contemporary physical and chemical food preservation technologies will be examined, including chilling, freezing, thermal processing, fermentation, dehydration, chemical agents and novel non-thermal techniques. The chemical, physical, functional and nutritional properties of food commodities will also be examined, providing a scientific context for food quality, safety and nutrition. Students will study packaging materials science to be able to select the most appropriate packaging solutions for a range of food applications.

School Science

Discipline Food Science and Biotechnology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Bachelor of Science majoring in science; such as biological sciences, chemistry, microbiology, nutrition, medical, forensic, animal science, zoology or pharmacology sciences.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the chemical, physical, functional and nutritional properties of the food commodities and how they determine food quality, safety and nutrition.
2. Apply current and emerging food preservation technologies to protect food quality and safety.
3. Identify integrated behaviour of food systems, chemical interactions between food components, and changes induced as a result of food processing.
4. Analyse spoilage symptoms and identify possible causes of food spoilage in fresh, minimally processed and processed foods.
5. Select and justify suitable packaging solutions for a range of food applications.
6. Critically evaluate literature in a chosen area of interest and design a research proposal, including objectives, justification, research plan, and methodology.
7. Apply principles of food preservation to lab scale production of processed food and evaluate variation in processing parameters or product formulation on product properties.
8. Systematically record experimental data and use statistical methods to summarise and assist interpretation of data.
9. Communicate effectively to a range of scientific and professional audiences via written reports and discussions.

Subject Content

1. Food Commodities (fruits, vegetables, cereals, meat and dairy), composition, production and processing.
2. Food preservation theories relating to chilling, freezing, thermal processing, fermentation, dehydration, and chemical agents.
3. Current and emerging food processing technologies including novel non-thermal techniques.
4. Causes and prevention of food spoilage, shelf life kinetics and food packaging requirements.
5. Food packaging materials and applications.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

NATS 7017 Food Product Design

Credit Points 10

Legacy Code 301183

Coordinator Christine Hutchison ([https://directory.westernsydney.edu.au/search/name/Christine Hutchison/](https://directory.westernsydney.edu.au/search/name/Christine%20Hutchison/))

Description This unit introduces students to theories and practices underpinning new product development, including idea generation, market research and product lifecycles. Students will apply emerging technologies, new ingredients and other innovative concepts relating to food preservation and food evaluation to research and develop new food products. Students will work on formulation design, assessment of ingredient and additive functions, effects of processing, optimization of quality and acceptability of foods. They will assess product packaging and storage stability, along with developing a food safety plan. They will also produce a final product specification and labelling requirements compliant with current food regulations.

School Science

Discipline Food Science and Biotechnology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) NATS 7016 AND NATS 7015

Co-requisite(s) NATS 7018

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Integrate and apply key theoretical and practical principles and techniques underpinning a food product development process.
2. Design, conduct and analyse consumer surveys.
3. Apply experimental design techniques in product design, optimisation and product formulation.
4. Formulate new food products; manipulate food ingredients and additives to ensure effective development of product, addressing the product design brief and consumer marketing requirements.
5. Analyse the product for physical, chemical, microbiological and sensory attributes.
6. Apply the skills of critical analysis in the evaluation of scientific and technical data.
7. Develop a food safety plan for the new product and ensure it complies with current food regulations.
8. Communicate the results of the development process using a range of modes and formats, including reports and Power Point presentations.

Subject Content

1. Purpose of new product development, product life cycles, triggers for new products.
2. Theories and techniques applied in new product development, such as Quality Function.
3. Deployment, the Stage-Gate? process, and Experimental design in product development.
4. New product ideation, development of concept statements or product design briefs, market and consumer requirements, new product requirements, limitations.
5. Consumer survey design and analysis.
6. Ingredient selection: carbohydrates, proteins, fats, additives.

7. Food formulation design and ingredient interactions.
8. Product performance evaluation - scale up and production issues.
9. Shelf life determination.
10. Food regulation requirements for new products.
11. Practical work directed at creating a new food product, including consumer survey, formulation, scale-up, food safety and packaging requirements, chemical, microbiological and sensory assessment.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	5 x 15 minutes	10	N	Individual
Literature Review	1,500 words	25	N	Individual
Presentation Report	20 minutes 5,000 words	15 40	N N	Group Group
Log/Workbook	Weekly Log	10	N	Individual

NATS 7018 Food Quality Management

Credit Points 10

Legacy Code 301182

Coordinator Malik Hussain ([https://directory.westernsydney.edu.au/search/name/Malik Hussain/](https://directory.westernsydney.edu.au/search/name/Malik%20Hussain/))

Description This unit introduces students to food quality management principles and their application in ensuring product quality and safety. Students will learn to develop, evaluate and audit food safety programs based on Hazard Analysis and Critical Control Point and total quality management systems. Students will also examine statistical process control, food laws, regulations and codes at the state, national and international levels, as well as the application of scientific risk assessment to the development of food regulations.

School Science

Discipline Food Science and Biotechnology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) NATS 7016

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret and apply regulations, guidelines and codes of practice relevant to the food quality management processes and procedures.
2. Apply the principles of Hazard Analysis Critical Control Point to develop a HACCP plan for a food process, identifying critical control points and prerequisite programs to ensure the safety of a food process.
3. Integrate quality management theories, food safety regulations, and food process knowledge to develop a Quality Manual for the management of safe food.
4. Apply quality management statistical tools to monitor the quality of a food process.
5. Critique and apply risk assessment methodology to evaluate safety as it is applied in the development of food regulations.
6. Apply food regulations and trade practises law to critique food labelling.
7. Communicate effectively to scientific and professional audiences.
8. Critically evaluate the interaction between ethics and law for the responsibility, both individual and corporate, to maintain a safe food supply.

Subject Content

1. Principles of food regulations; frameworks and codes at the state, national and international levels.
2. Food safety principles including good manufacturing practices, sanitation and Hazard Analysis Critical Control Point (HACCP).
3. Quality management systems, theory, application and auditing.
4. Quality management statistical tools for monitoring and controlling food quality.
5. Elementary toxicology, principles of food safety and risk assessment, and its role in development of food regulations.
6. Food labelling, including national and international labelling regulations, trade practices law, and allergen labelling programs.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	2 x 30 minutes	20	N	Individual
Case Study	2,000 words	30	N	Individual
Critical Review	1,800 words	20	N	Individual
Technical Document	4,000 words (2,000 words per student)	30	N	Group

NATS 7019 Forensic Analysis of DNA

Credit Points 10

Legacy Code 301148

Coordinator Chris Lennard ([https://directory.westernsydney.edu.au/search/name/Chris Lennard/](https://directory.westernsydney.edu.au/search/name/Chris%20Lennard/))

Description This unit will introduce students to the identification and evaluation of biological evidence in criminal matters using DNA technologies, including the methods routinely used for the isolation of DNA from cells and techniques applied to DNA quantitation, electrophoretic separation, sequence determination, as well as data interpretation, analysis and reporting. This unit is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this unit is available from the University of Florida.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 3741 Master of Forensic Science, 3742 Graduate Diploma in Forensic Science or 3743 Graduate Certificate in Forensic Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. To understand the methods routinely used in DNA isolation, preparation and amplification
2. To know the methods available for DNA quantitation and their advantages and disadvantages
3. To be familiar with the range of historical and current DNA markers used in forensic analysis
4. To know the limitations of contaminated and mixed samples and the optimum means for their analysis

5. To understand the principles of DNA separation techniques including slab gel and capillary electrophoresis
6. To know the processes of hybridization and DNA visualization techniques and their advantages and disadvantages
7. To understand the processes for data interpretation and the statistical evaluation processes associated with identity and paternity testing
8. To understand the legal and forensic implications of DNA fingerprinting for purposes of court room testimony

Subject Content

Module 1 DNA Introduction
 Module 2 Quality Assurance and Performance Optimization
 Module 3 DNA Isolation
 Module 4 Assessment of Extracted DNA and Amplification
 Module 5 Introduction to Data Collection and Interpretation
 Module 6 Significance of a Match and Calculating Statistics
 Module 7 Evaluation and Triage of DNA Samples
 Module 8 Paternity and Identification

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

NATS 7020 Forensic Anthropology (PG)

Credit Points 10

Legacy Code 301147

Coordinator Chris Lennard (<https://directory.westernsydney.edu.au/search/name/Chris Lennard/>)

Description This unit will provide an introduction to the basic knowledge needed to perform some of the forensic anthropologist's tasks, especially anatomy and human osteology. Due to the impossibility of teaching a laboratory class, we will substitute the hands-on experience by a carefully selected set of pictures and material in order to familiarize you with the practice of the discipline. This unit is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this unit is available from the University of Florida.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 3741 Master of Forensic Science, 3742 Graduate Diploma in Forensic Science or 3743 Graduate Certificate in Forensic Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Have acquired basic knowledge and theoretical principles on osteology and anatomy
2. Be able to distinguish the difference between human and non-human material
3. Have gained basic knowledge on each bone of the human skeleton
4. Have learned the basic methods of human remains recovery and laboratory processes
5. Understand when and how a forensic anthropologist becomes involved in the legal system, mass disaster-related work and human right violation cases

Subject Content

Module 1 Introduction
 Module 2 Basic Bone Biology
 Module 3 Human vs. Non human
 Module 4 Human Osteology: The Skull and Teeth
 Module 5 Human Osteology: The Thorax, Vertebral Column and Pelvis
 Module 6 Human Osteology: The Arm and Hand
 Module 7 Human Osteology: The Leg and Foot
 Module 8 Field and Laboratory Work
 Module 9 Forensic Anthropology and Mass Fatality
 Module 10 Forensic Anthropology and Human Rights

NATS 7022 Forensic Genetics

Credit Points 10

Legacy Code 301144

Coordinator Chris Lennard (<https://directory.westernsydney.edu.au/search/name/Chris Lennard/>)

Description The unit is designed to introduce genetics so that even if you haven't studied it before you will develop an understanding that will inform your practice in work. The context of this unit is forensic science but rather than jump straight into forensic DNA analysis this is a foundation unit, designed to give a framework of human molecular genetics. We will also look at some of the important issues in genetics including genome mapping and the role of gene dysfunction in disease. The first module is an overview and it is very important that you use the assignment time to check out some websites that will be very useful later on. This unit is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this unit is available from the University of Florida.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 3741 Master of Forensic Science, 3742 Graduate Diploma in Forensic Science or 3743 Graduate Certificate in Forensic Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand the basic structure of genes and chromosomes
2. Understand the basic principles of inheritance
3. Understand genotype and phenotype
4. Understand the rationale behind the human genome sequencing project
5. Understand how genes work and what happens when they don't
6. Understand polymorphism and its value in defining uniqueness
7. Understand the underlying principles behind DNA profiling
8. Explore the role of genes in diseases, including cancer

Subject Content

Module 1 Introduction to Forensic Genetics

Module 2 The Basic Principles of Inheritance

Module 3 Linkage and Crossing Over

Module 4 The Molecular Structure of Chromosomes and DNA Replication

Module 5 Making Genes Work

Module 6 The Human Genome Project

Module 7 Human Population Genetics

Module 8 DNA Profiling and Forensic Investigation

Module 9 Interpretation and Applications of Forensic DNA Analysis

Module 10 Mutation and DNA Repair

Module 11 Genes in Cancer

Module 12 Genetic Disorders

NATS 7023 Forensic Immunology

Credit Points 10

Legacy Code 301146

Coordinator Chris Lennard (<https://directory.westernsydney.edu.au/search/name/Chris Lennard/>)

Description This unit will introduce students to the principles of immunology, immunological techniques, and their application to forensic analyses. This unit is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this unit is available from the University of Florida.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 3741 Master of Forensic Science, 3742 Graduate Diploma in Forensic Science or 3743 Graduate Certificate in Forensic Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. To understand the cellular basis of immunity, including innate and adaptive immunity
2. To understand the principles of antibody-antigen interactions
3. To know the functional and structural properties of antibodies
4. To know to the details of the immune system for capturing and displaying antigens to lymphocytes
5. To know the details of cell-mediated immune responses and the effector mechanisms of cell mediated immunity
6. To know the details of the humoral immune response
7. To understand the process resulting in antibody diversity
8. To understand the processes of complement mediated reactions
9. To understand the processes of hypersensitivity
10. To know examples of diseases caused by defective immune responses, congenital and acquired immunodeficiencies
11. To know the principles and processes of Immunology and serology laboratory methods

Subject Content

Module 1 The Basics of Immunology

Module 2 Antibodies

Module 3 Antigen Capture, Presentation and Recognition

Module 4 Cell Mediated and Humoral Immune Responses

Module 5 Diversity, Assembly, Switching and Maturation

Module 6 Complement System, Activation and Regulation

Module 7 Immune Response Disorders

Module 8 Immunology and Serology Laboratory Methods

NATS 7024 Forensic Medicine I

Credit Points 10

Legacy Code 301133

Coordinator Chris Lennard (<https://directory.westernsydney.edu.au/search/name/Chris Lennard/>)

Description This unit covers the basic elements of forensic medicine and focuses on the role of the forensic pathologist in the investigation of crime and death. Although much of forensic medicine, based as it is on observations made at a post-mortem examination, relies on the principles of morbid anatomy as discovered in earlier centuries, more recent techniques are also presented. This unit is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this unit is available from the University of Florida.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 3741 Master of Forensic Science, 3742 Graduate Diploma in Forensic Science or 3743 Graduate Certificate in Forensic Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand the basic scientific, medical, ethical and legal principles that are relevant to the practice of forensic medicine.
2. Understand the essential techniques and methods used by forensic doctors and be able to discuss their validity, effectiveness and applicability within a professional setting.
3. Develop a sensitive awareness of how forensic medicine relates to bereaved relatives and other immediate contacts of a deceased person or victim of crime.
4. Develop and maintain the highest standards of professional integrity in all matters relating to the practice of forensic medicine and in the pursuit of justice.
5. Work towards improving the quality of forensic provision within his or her local medicolegal and criminal justice system.
6. Seek to initiate collaborative relationships with academics and other practitioners in order to contribute to research in the discipline.
7. Communicate sensitive information to other professional colleagues and, where necessary, be able to present evidence within a legal setting effectively and with accuracy and precision.

Subject Content

Module 1 Death

Module 2 Medicolegal Investigation of Death

Module 3 Sudden Natural Death in Adults

Module 4 The Autopsy

Module 5 Post-Mortem Interval

Module 6 Identification of the Dead

Module 7 Wounds of Medicolegal Importance I

Module 8 Wounds of Medicolegal Importance II

Module 9 Thermal Injury and Fire Deaths

Module 10 Suicide

Module 11 Head and Neck Injury

Module 12 Drowning by Immersion

Module 13 Asphyxia Related Deaths

Module 14 Case Study

NATS 7025 Forensic Medicine II

Credit Points 10

Legacy Code 301134

Coordinator Chris Lennard (<https://directory.westernsydney.edu.au/search/name/Chris Lennard/>)

Description This unit gives knowledge and understanding of relevant medical concepts, techniques and methods in order that the candidate has sufficient competence to interpret human diseases, conditions and behavior in a forensic setting. An understanding of the organizational structures involved in the practice of forensic medicine both locally and internationally, increase in the candidate's awareness of how forensic medicine relates to the wider context of society and how it contributes towards improving that society. This unit is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this unit is available from the University of Florida.

Legacy Code 301129

Coordinator Chris Lennard ([https://directory.westernsydney.edu.au/search/name/Chris Lennard/](https://directory.westernsydney.edu.au/search/name/Chris%20Lennard/))

Description This unit provides the basic framework and methodology required for planning and executing forensic research. The unit encompasses the scientific methods, practical tools and organizational skills important for implementing independent and original forensic research at an international level.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in the Master of Forensic Science, the Graduate Diploma in Forensic Science, or the Graduate Certificate in Forensic Science.

Assumed Knowledge

Knowledge of general science as obtained via an undergraduate science degree (with completion of chemistry and biology subjects highly recommended).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand research project management responsibilities with respect to health and safety and research ethics on a local and global level.
2. Appreciate scientific methods underpinning forensic research.
3. Effectively review research literature, formulate hypotheses and design scientific experiments.
4. Critically analyse and interpret experimental research data.
5. Apply critical and lateral thinking skills to independent forensic research.
6. Effectively communicate and transfer forensic research knowledge using skills developed for report writing and presentation.

Subject Content

1. Scientific Research Methods
2. Research Project Management
3. Undertaking a Literature Review
4. Experimental Methods for Hypothesis Testing
5. Experimental Design
6. Data Collection
7. Basic Statistical Methods and Data Presentation
8. Report Writing and Scientific Publications
9. Conference Presentations

Assessment

NATS 7027 Forensic Research 2

Credit Points 10

Legacy Code 301130

Coordinator Chris Lennard (<https://directory.westernsydney.edu.au/search/name/Chris Lennard/>)

Description This unit builds on the knowledge gained in the prerequisite unit Forensic Research 1 and further develops skills to enable the independent and confident planning, design and execution of an original forensic research project chosen by the student. The skills and tools acquired in Forensic Research 1 will help facilitate effective communication of research project findings through scientific report writing and presentation in formats appropriate for international journal publication and conferences.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) NATS 7026

Restrictions

Students must be enrolled in the Master of Forensic Science, the Graduate Diploma in Forensic Science, or the Graduate Certificate in Forensic Science

Assumed Knowledge

Knowledge of research methodology as per the learning outcomes of the prerequisite subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Plan and implement a forensic research study using methods, skills and tools learned and developed in the prerequisite unit.
2. Apply appropriate statistical methods to analyse experimental datasets and interpret results in the context of current literature.

3. Apply critical and lateral thinking skills to independent forensic research.
4. Effectively communicate and transfer forensic research knowledge using skills developed for report writing and presentation.
5. Independently and confidently execute original forensic research, with understanding and respect for management and research responsibilities.

Subject Content

Plan and conduct a 12-week research project (120 hours) in a chosen area of forensic science using the framework and methodologies provided in the prerequisite subject Forensic Research 1.

NATS 7028 Forensic Toxicology I

Credit Points 10

Legacy Code 301136

Coordinator Chris Lennard (<https://directory.westernsydney.edu.au/search/name/Chris Lennard/>)

Description This course has been developed to introduce students to the concepts, procedures, processes and terminology routinely encountered in the execution of applied forensic toxicological analyses. Our objective is to educate students in the theoretical aspects of drug and analytical chemistry applied to forensic toxicology. This unit is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this unit is available from the University of Florida.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 3741 Master of Forensic Science, 3742 Graduate Diploma in Forensic Science or 3743 Graduate Certificate in Forensic Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Be able to comfortably navigate the WWW and know how to locate and use web based resources for their interests and further education
2. Understand the procedures and principles involved in the preparation and analyses of drug and toxicology samples, including sample handling, note taking and storage

- Understand the principles and theory of drug extraction procedures such as liquid-liquid extraction, solid phase extraction and the rationale behind screening, preliminary and confirmatory drug testing
- Be familiar with common preliminary tests and understand the chemistry and theory of testing procedures which include thin layer chromatography, microcrystal tests and spot tests
- Be familiar with common analytical techniques and their working mechanisms, including the chemistry and principles of confirmatory drug testing, the basic science of drug ionization, the elutropic series, normal and reverse phase chromatography, immunoassay techniques, infrared spectroscopy and Gas chromatography/mass spectroscopy
- Be familiar with the testing procedures for the identification of common drugs of abuse
- Understand the importance of, and the procedures involved in, quality assurance and quality control in drug testing and have a conceptual understanding of accuracy and precision, standard curves, reproducibility, limit of detection, linearity and stability
- Be able to develop an analysis procedure for a given drug and to present findings in a report format
- Be able to apply the presented concepts and procedures in the execution and completion of a virtual case study
- Be able to use web based tools for communication and for the education of themselves and others

Subject Content

Module 1 Sample Preparation and Presumptive Tests
 Module 2 Sample Extraction and Thin Layer Chromatography
 Module 3 Immunoassays
 Module 4 Spectrophotometry in Forensic Chemistry
 Module 5 Chromatography in Forensic Chemistry
 Module 6 Method Development and Quality Control
 Module 7 Forensic Identification of Drugs

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

NATS 7029 Forensic Toxicology II

Credit Points 10

Legacy Code 301137

Coordinator Chris Lennard (<https://directory.westernsydney.edu.au/search/name/Chris Lennard/>)

Description This unit will expand on concepts encountered in Forensic Toxicology I, providing in-depth knowledge of pharmacology and toxicology as it pertains to commonly encountered abused and toxic substances. This unit is unique in offering modules in doping control, expert testimony and human performance and postmortem toxicology. This unit is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this unit is available from the University of Florida.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) NATS 7028

Restrictions

Students must be enrolled in 3741 Master of Forensic Science, 3742 Graduate Diploma in Forensic Science or 3743 Graduate Certificate in Forensic Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Be able to comfortably navigate the WWW and know how to locate and use web based resources for their interest and further education
- Understand basic pharmacokinetic parameters such as absorption, distribution, metabolism and elimination (ADME)
- Understand the pharmacology and basic metabolites of the presented illicit drug substances
- Understand the chemical, pharmacological, pharmacokinetic, toxic properties and effects of alcohol and the procedures of quantitative analyses for blood alcohol
- Understand the effects of drugs and alcohol on driving impairment
- Understand the ADME, pharmacology and toxicity of a number of metals commonly encountered in forensic toxicology
- Understand the process of acquisition, preparation, analysis of tissues, bodily fluids and postmortem samples such as liver, vitreous humor, urine, bile and blood
- Understand the pharmacology, testing procedures and regulations concerning commonly abused drugs used in athletics for the enhancement of human performance
- Understand the basic regulations of doping control within the horse and dog racing industry and associated sample acquisition and analyses
- Understand the basic regulations associated with drug testing in the workplace and the acquisition of samples such as blood, urine and hair

11. Understand the basic principles of expert testimony and the role of the expert witness in forensic toxicology
12. Be able to apply the presented concepts and procedures in the execution and completion of a virtual case study
13. Use web based tools for communication and for the education of themselves and others

Subject Content

Module 1 Pharmacokinetics and Drug Action
 Module 2 Drug Classifications and Pharmacology
 Module 3 Alcohol and Volatiles
 Module 4 Metals
 Module 5 Post Mortem Forensic Toxicology
 Module 6 Doping Control
 Module 7 Human Performance Toxicology
 Module 8 Expert Testimony

NATS 7030 General Toxicology

Credit Points 10

Legacy Code 301135

Coordinator Chris Lennard ([https://directory.westernsydney.edu.au/search/name/Chris Lennard/](https://directory.westernsydney.edu.au/search/name/Chris%20Lennard/))

Description This unit, which is primarily book-based, is structured to comprehensively provide the student with the fundamental concepts of toxicology as they relate to specific organ and tissue systems. We aim to supplement this information with online study guides, detailed module objectives and critical thinking exercises. The objective of this unit is to familiarize students with the procedures for using WWW resources for communication and educational purposes and to introduce students to the principles, concepts and terminology utilized in the field of toxicology. This unit is taught by the University of Florida

as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this unit is available from the University of Florida.

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 3741 Master of Forensic Science, 3742 Graduate Diploma in Forensic Science or 3743 Graduate Certificate in Forensic Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand the general principles of toxicology
2. Understand the scientific principles of absorption, distribution and metabolism
3. Understand the principles and concepts of mutagenesis and chemical carcinogenicity
4. Understand the principles and concepts related to reproductive and developmental toxicology
5. Understand the principles of Immunotoxicology, including the biology of the immune response, types of immune reactions and disorders, clinical and laboratory tests used in detecting immunotoxicity and knowledge of specific chemicals that adversely affect the immune system
6. Understand the principles and concepts of neurotoxicity; have knowledge of agents that affect neuronal and synaptic transmission and appropriate neurotoxicity evaluation methods
7. Understand the anatomy and physiology of the lungs, liver, and kidneys, and the mechanisms of related organ toxicity, as well as evaluation methods of organ damage by toxic agents
8. Understand the principles and concepts behind chemically-induced toxicity of the blood
9. Understand the basic principles of risk assessment applications
10. Be able to use internet resources for communication and education purposes

Subject Content

Module 1 Principles of Toxicology
 Module 2 Xenobiotic Absorption, Distribution, Metabolism, and Elimination
 Module 3 Toxicokinetics
 Module 4 Toxicity of the Hematopoietic System
 Module 5 Hepatotoxicity
 Module 6 Nephrotoxicity
 Module 7 Neurotoxicity
 Module 8 Dermatotoxicity
 Module 9 Pulmonotoxicity
 Module 10 Immunotoxicity
 Module 11 Reproductive and Developmental Toxicity
 Module 12 Mutagenesis and Genetic Toxicology
 Module 13 Chemical Carcinogenesis
 Module 14 Epidemiological Issues
 Module 15 Human Health Risk Assessment

Student Contribution Band

Restrictions

Students must be enrolled in the online programs Master of Science or any other postgraduate program where this subject can be taken an unspecified elective and where there are sufficient credit points available in the study program.

Learning Outcomes

On successful completion of this subject, students should be able to:

- demonstrate a systematic understanding, knowledge and critical awareness of a current aspect of science, much of which is at, or informed by, the forefront of your field of study
- acquire a comprehensive understanding of techniques applicable to your advanced scholarship in your chosen areas of study
- critically evaluate current research and advanced scholarship in your field of study
- evaluate methodologies and develop critiques and propose alternative hypotheses, where appropriate

- discuss complex issues both systematically and creatively and make sound judgments in the absence of complete data
- make decisions in complex and unpredictable situations
- justify originality of thought in the application of knowledge
- communicate information and conclusions to specialist and non-specialist audiences
- develop relevant new skills to a high level
- demonstrate self-direction and originality in tackling and solving problems
- act autonomously in planning and implementing tasks at a professional level
- use ICT to locate information and to communicate with the University
- advance their knowledge and understanding in their chosen discipline
- demonstrate initiative and exercise personal responsibility
- demonstrate independent learning ability required for continuing professional development

Subject Content

Proposal development
Plans and audit
Critical Reading
Organising and planning the writing up of your report

Teaching Periods

NATS 7033 MSc Research Project

Credit Points 20

Legacy Code 401156

Coordinator Mark Williams ([https://directory.westernsydney.edu.au/search/name/Mark Williams/](https://directory.westernsydney.edu.au/search/name/Mark%20Williams/))

Description Science Research Project is a capstone unit that gives students the opportunity to conduct scientific research, while extending their knowledge and practical skills. Each student undertakes a research project supervised by an academic staff member which has as its central focus the scientific analysis and resolution of a complex problem. The research project is conducted in an area of relevance to professional discipline, and students can choose from a range of approved research designs. Students must undertake a review of the relevant literature, formulation of a research question, design of an appropriate method, collection and analysis of data, interpretation of findings, the production of a research report and presentation of these findings.

School Science

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 20cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Student must be enrolled in postgraduate program, have completed 60 credit points at Level 7, and have a GPA of 5.0 or above.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Propose and investigate a topic area relevant to a scientific discipline
2. Critique peer-reviewed literature pertinent to the proposed topic and identify gaps in knowledge
3. Develop research aims and design and conduct experiments within a project framework to test these aims
4. Analyse the data from these experiments and formulate conclusions
5. Justify the results and conclusions of the project by oral and written communication
6. Devise possible areas of inquiry for future research or development

Subject Content

Project-based learning relevant to individual professional goals and available expertise within industry, academia or other relevant body
 Critical literature appraisal on topics relevant to the student's project
 Experimental design and Project management skills
 Analysis of data, using appropriate statistical methods where required
 Report writing in the scientific format of a thesis
 Critical evaluation of data to judge its significance and develop conclusions from these results
 Development of poster for presentation of results and conclusions of research project

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Professional Task	WSU formatted document	S/U	Y	Individual
Proposal	500 words	10	N	Individual
Report	6000 Words	50	N	Individual
Poster	1,000 words or equivalent	20	N	Individual
Practical	100 hours	20	N	Individual

NATS 7034 Managing for Sustainability

Credit Points 20

Legacy Code 401155

Coordinator Mark Williams ([https://directory.westernsydney.edu.au/search/name/Mark Williams/](https://directory.westernsydney.edu.au/search/name/Mark%20Williams/))

Description This online unit is concerned with delivering and supporting sustainability management. Students will develop a multi-disciplinary perspective on resources, sustainability and health and safety management which will incorporate strategy, policy, data collection and knowledge management. It will introduce students to a systemic approach for studying organisational operations and methods for quantifying and optimising resource use and energy use while using tools to reduce environmental, societal and financial risk. Students will also learn how to improve the efficiency and effectiveness with which organisations can incorporate sustainability issues and to identify future trends and drivers for change in this area.

School Science

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 20cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in the online programs Master of Science or any other postgraduate program where this subject can be taken as an unspecified credit and where there are sufficient credit points available in the study program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain key ideas of sustainability and managing for sustainability, and the key theoretical debates relating to the discipline.
2. Discuss the concept of resources and key issues relating to the uncertainties surrounding them.
3. Evaluate the methods for assessing the economics of environmental impacts and sustainability auditing.
4. Apply the following sustainability assessment tools: environmental impact assessment, strategic safety, health and environmental impact assessment, life-cycle assessment, multi-criteria decision analysis.
5. Discuss key ideas and theoretical debates relating to management of knowledge and communication, and environmental management systems in managing for sustainability.
6. Explain the structure and content of environmental management systems.
7. Synthesise and critically assess the issues associated with managing for sustainability, particularly as this relates to the utilisation of energy and raw materials in an international context.
8. Critically assess and synthesise data and evidence from a range of sources and apply these within a suitable context.
9. Select appropriate environmental assessment tools and analyse results obtained to assist in environmental decision-making.
10. Interpret the findings of environmental audits aimed at reducing the environmental impact of an organisation.

11. Distinguish between and critically examine knowledge management and communication methods in the context of managing for sustainability.
12. Work with quantitative information in the assessment and presentation of environmental decision-making situations.
13. Communicate the results of a sustainability assessment, in written form and to lay as well as technical audiences.
14. Seek out and interpret relevant information from appropriate sources and integrate the knowledge and skills derived into a coherent product.
15. Provide expertise in environmental decision-making and implementation of strategy, corporate social responsibility and disclosure when developing an EMS across an organisation.
16. Use appropriate frameworks to investigate and analyse sustainability issues.
17. Identify and actively engage with key stakeholders.

Subject Content

- what are resources?
- sustainability and sustainable development
- resource management
- resource planning
- Risk, management and assessment of environmental impact
- sustainability of Organisations
- environmental policies
- health and safety Issues and auditing
- drivers of change
- strategy Overview
- economic assessment and financial assessment techniques
- resource use: water, energy and materials efficiency
- life cycle assessment
- emergency planning
- data, information and knowledge management
- communicating for sustainability and for stakeholders
- The future and future planning

Teaching Periods

NATS 7035 Medicinal Chemistry of Drugs of Abuse

Credit Points 10

Legacy Code 301140

Coordinator Chris Lennard (<https://directory.westernsydney.edu.au/search/name/Chris Lennard/>)

Description This unit will address the fundamental concepts and principles involved in the examination of biological evidence and the practices of serology as they relate to crime scene and forensic investigation. This unit is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this unit is available from the University of Florida.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 3741 Master of Forensic Science, 3742 Graduate Diploma in Forensic Science or 3743 Graduate Certificate in Forensic Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. To understand the structure of the US controlled substances act and the definitions of each drug classification
2. To understand the models of addiction and the observations on which they are based
3. To understand the pharmacological and abuse profiles of the CNS depressants, barbiturates and benzodiazepines
4. To understand the pharmacological and abuse profiles of the CNS depressant, alcohol
5. To understand the pharmacological and abuse profiles of the opioid drugs
6. To understand the pharmacological and abuse profiles of the hallucinogens
7. To understand the pharmacological and abuse profiles of the cannabinoids
8. To understand the pharmacological and abuse profiles of the CNS stimulants, cocaine and the amphetamines
9. To understand the pharmacological and abuse profiles of inhalants

Subject Content

Module 1 Drug Classes and Controlled Substances Act

Module 2 Drug Dependence and Addiction

Module 3 CNS Depressants

Module 4 Alcohol

Module 5 Opioids

Module 6 Cannabinoids

Module 7 Hallucinogens

Module 8 CNS Stimulants

Module 9 CNS Volatile Substances

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 3741 Master of Forensic Science, 3742 Graduate Diploma in Forensic Science or 3743 Graduate Certificate in Forensic Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand the biochemical reactions involved in the production of natural medicinal products
2. Understand the effects of external factors on the production of secondary metabolites
3. Be familiar with naturally occurring biologically active compounds such as alkaloids and glycosides
4. Be familiar with the isolation and structural elucidation of plant derived compounds
5. Understand the abuse potential, recognition and analysis of drugs of abuse of natural origin
6. Be familiar with the chemistry and pharmacology of herbal remedies. Problems associated with their lack of standardization and potential drug interactions

Subject Content

Module 1 Biosynthesis of Natural Products
 Module 2 Production Ecology of Secondary Metabolites
 Module 3 Alkaloids
 Module 4 Glycosides
 Module 5 Naturally Occurring Drugs of Abuse
 Module 6 Herbal Remedies
 Module 7 Analysis for Natural Products

NATS 7040 Research Skills in Science

Credit Points 20

Legacy Code 401154

Coordinator Mark Williams (<https://directory.westernsydney.edu.au/search/name/Mark Williams/>)

Description This unit builds on undergraduate level science to develop a strong appreciation of postgraduate research skills. It will develop knowledge and understanding of techniques and skills applicable to postgraduate scientific study and research methodologies and critical awareness of literature. It will support you in understanding and evaluating current research. You will use technology to develop your information literacy skills, to communicate and to collaborate with others. You will also learn to act autonomously in planning and implementing work at a professional level. You will recognise how skills are continually developed through experience and can be transferred to other situations.

School Science

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 20cp

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding and knowledge of research methodologies.
2. Demonstrate an understanding of techniques and skills applicable to scientific study.
3. Critically evaluate current research.
4. Evaluate research methodologies, to develop critiques, and to propose alternative hypotheses.
5. Communicate information and conclusions to specialist and non-specialist audiences.
6. Effectively present scientific and technical information.
7. Demonstrate self-direction in tackling and solving problems.
8. Plan and implement tasks at a professional level.
9. Use ICT to develop and enhance information literacy.
10. Use ICT in the effective and logical handling and analysis of data.
11. Use ICT to communicate and collaborate with other students.
12. Reflect on skills development and on the acquisition of knowledge and understanding.
13. Explain their awareness of health and safety and ethical issues.

Subject Content

- information literacy skills
- scientific investigation and experimental design
- Analysing scientific data and interpreting results
- presentation skills
- Risk assessment
- developing scientific Projects
- professional skills

Equivalent Subjects LGYB 8292 - Masters research project LGYB 9563 - Research Project 811 LGYB 9568 - Research Project 821 LGYB 9570 - Research Project 831 LGYB 9572 - Research Project - Science LGYB 9574 - Research Project 841 LGYA 6231 - Science Research Project PG

Restrictions

Enrolment in this subject by non-Master of Science or Master of Health Science students requires permission from the Director, Academic Program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Utilise their knowledge of contemporary issues relevant to their study major in order to identify a suitable topic for further investigation.
2. Prepare an appropriate research proposal for the investigation of research issues/problems appropriate to their study major (including an ethics review application, if applicable).
3. Review and critique current literature relating to their study topic.
4. Collect and analyse research data in their relevant area of specialisation.
5. Discuss their research findings.
6. Appropriately communicate their research plans, findings and recommendations by means of an oral presentation and a written report.

Subject Content

Knowledge and practice in applied research, specifically in relation to:

- literature Review
- research design
- Ethical conduct of research
- data collection
- data analysis
- research report writing
- dissemination of results

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Research Proposal including Research Ethics	3,500 words	15	N	Individual
Final Seminar	45 minutes	20	N	Individual
Research Project Report	Approximately 65,000 words (depending on specialisation area)	65	N	Individual

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYB 8291 - Special Issues In Sustainable Development LGYB 8470 - Special Issues In Environmental Management LGYC 0924 - Special Issues In Science Technology LGYB 9581 - Personal Study M

Restrictions

Director of Academic Program/Program Advisor permission is needed for students to be accepted into this subject as it is resource intensive of staff time. Only academically capable students with an identified need for in-depth study in an area not currently covered by existing subjects will be accepted. Acceptance in the subject will be subject to appropriate supervision being available.

Assumed Knowledge

Individual projects or learning programs will assume background skills and knowledge that are appropriate to a coursework Masters student. Permission of the Head of program will be required for students to enroll in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Extensive and well-organised knowledge of the topic area at a level that is at least equivalent to a comparable coursework Masters unit.
2. An ability to identify and locate appropriate literature for the project, and to read widely within that area.
3. An improved ability to study independently within the overall framework of a supervised undergraduate project.
4. An understanding of how the student's project and learning outcomes relate to their overall academic program.
5. (Where appropriate to the project) enhanced laboratory skills and experience in collecting and analysing scientific data.

Subject Content

Projects or other learning programs will be negotiated between individual students and their project supervisors, subject to approval by the Head of Program, who has responsibility for ensuring appropriate academic standards and workloads across the unit. The level of difficulty and workload are expected to be comparable to other coursework Masters units.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Written assessment 1	4000 words	40	N	Individual
Written assessment 2	4000 words	40	N	Individual
Seminar Presentation	30 minutes	20	N	Individual

Coordinator Morwenna Kirwan ([https://directory.westernsydney.edu.au/search/name/Morwenna Kirwan/](https://directory.westernsydney.edu.au/search/name/Morwenna%20Kirwan/))

Description This preparatory online unit introduces students to the strategic, business and operational aspects of the life science industry. The unit equips students to understand the challenges and conventional wisdom within this industry with a particular focus on research and innovation. Students will learn techniques to develop coherent and credible alternative future scenarios including an understanding of strategic option development, and strategic resource allocation. Students will also acquire research, analytical and critical judgement skills enabling them to deal with important issues such as finance, uncertainty and risk.

School Science

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 20cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in the online programs Master of Science or any other postgraduate program where this subject can be taken as an unspecified elective and where there are sufficient credit points available in the study program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the nature, origins and limitations of current structures, business models and strategic assumptions within the life science and healthcare industries.
2. Discuss the role of stakeholders in building and delivering healthcare products.
3. Interpret the creation of value through a deeper comprehension of strategy, complexity, risk and uncertainty.
4. Think analytically, critically and independently; summarise arguments and evaluate them succinctly.
5. Solve problems and make decisions through appropriate method selection, decision-making processes, techniques and modelling.
6. Demonstrate originality of thought in applying knowledge.
7. Identify information and data sources through consistent selection; critically read and abstract meaning from these sources; and demonstrate knowledge formation developed in this process.
8. Demonstrate numerical and quantitative skills, including business modelling and triangulation with qualitative research skills.
9. Demonstrate effective use of information and communications technologies (ICTs) in the research, problem-solving and scenario-building process.
10. Communicate effectively through different media, whether oral or written in order to influence decision making in personal and professional contexts.
11. Develop personal effectiveness: improve self-awareness, self-management and time management.
12. Reflect upon learning and maintain a learning journal.
13. Use ICT to communicate with the University, the module team, your tutor and other students.
14. Recognise ethical challenges and manage them within organisational values and situations.
15. Conduct research into business and management within the life science and healthcare industries and their contingent environments.
16. Engage with and adopt reflective learning from practice and experience.

Subject Content

Shape of the industry
Strategic analyses
Information literacy skills
Strategic choices and implementation
Finance basics
Scientific uncertainty and risk

Teaching Periods

NATS 7047 Synthetic Medicinal Chemistry

Credit Points 10

Legacy Code 301142

Coordinator Chris Lennard (<https://directory.westernsydney.edu.au/search/name/Chris Lennard/>)

Description This unit has been developed to introduce students to the chemical principles and procedures surrounding the synthesis of commonly encountered licit and illicit chemical substances, and to introduce you to the processes involved in the forensic analysis of clandestine drug laboratories. This unit is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this unit is available from the University of Florida.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 3741 Master of Forensic Science, 3742 Graduate Diploma in Forensic Science or 3743 Graduate Certificate in Forensic Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Be able to comfortably navigate the WWW and know how to locate and use web based resources for their interests and further education
2. Be able to recognize chemical functional groups and to know their chemical and physical characteristics
3. To understand the basic chemical reactions involved in illicit drug synthesis
4. To understand the processes involved in the synthesis of amphetamine, methamphetamine and MDMA
5. To understand the processes involved in the synthesis PCP
6. To understand the processes involved in the synthesis of opiates and Fentanyl
7. To understand the processes involved in the synthesis of cocaine and crack
8. To understand the processes involved in the synthesis of LSD
9. To be familiar with the steps taken in the forensic investigation of clandestine drug laboratories

Subject Content

Module 1 Functional Groups

Module 2 Reactions Involved in Illicit Drug Synthesis I

Module 3 Reactions Involved in Illicit Drug Synthesis II

Module 4 Amphetamines, Methamphetamine and MDMA

Module 5 Phencyclidine

Module 6 Opiates

Module 7 Cocaine

Module 8 LSD

Module 9 Clandestine Laboratories

NATS 7048 Toxic Substances

Credit Points 10

Legacy Code 301138

Coordinator Chris Lennard (<https://directory.westernsydney.edu.au/search/name/Chris Lennard/>)

Description This unit, which is primarily book-based, will comprehensively provide the student with the fundamental concepts of toxicology as they relate to specific organ and tissue systems. We aim to supplement this information with online study guides, detailed module objectives and critical thinking exercises using online journal articles. The objective of this unit is to familiarize students with many of the most important toxic substances, their toxic effects, and ways to treat poisoned patients. Several example toxicants are presented and discussed in detail. There are literally tens of thousands of chemicals in commerce, and nature offers even greater numbers of chemicals to which individuals are exposed. According to the basic tenets of toxicology, any of these substances in sufficient doses is toxic, although some clearly are of greater health concern than others. The objective of this unit is to provide the student with information on the toxic properties of selected chemicals to illustrate principles regarding mechanisms of toxicity, the array of signs and symptoms associated with intoxication, approaches to clinical assessment of poisoning, and methods of treatment. Examples have been selected from several chemical classes and include agents that may be encountered occupationally, environmentally, in medicine, or in the context of substance abuse. This unit is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this unit is available from the University of Florida.

Pre-requisite(s) NATS 7030

Restrictions

Students must be enrolled in 3741 Master of Forensic Science, 3742 Graduate Diploma in Forensic Science or 3743 Graduate Certificate in Forensic Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Comfortably navigate the WWW and know how to locate and use web-based resources for their interest and further education
2. Understand the nature of acute, chronic, immediate and delayed symptoms of poisoning from drugs and chemicals
3. Understand the mechanisms by which the example drugs and chemicals produce toxic effects
4. Understand the use of laboratory tests to assist in the diagnosis and management of poisoned patients
5. Understand the circumstances in which individuals are typically poisoned with these agents
6. Understand the general approach to the treatment of chemical intoxication
7. Understand specific treatments available for the example toxicants and the mechanisms by which these treatments are effective
8. Use web based tools for communication and for the education of themselves and others

Subject Content

Module 1 Principles of Managing the Poisoned Patient

Module 2 Carbon Monoxide

Module 3 Cyanide and Hydrogen Sulfide

Module 4 Acetaminophen

Module 5 Salicylates

Module 6 Opioids

Module 7 Cocaine

NATS 7049 Toxicology of Chemical Weapons

Credit Points 10

Legacy Code 301150

Coordinator Chris Lennard (<https://directory.westernsydney.edu.au/search/name/Chris Lennard/>)

Description This unit is structured to comprehensively provide the student with the fundamental toxicologically relevant concepts of weapons that can be used to create mass casualties. These weapons are often called weapons of mass destruction, a term that is closely related to but not synonymous with mass-casualty weapons (a technically more appropriate term). This unit will focus on chemical agents and toxins as the toxicologically relevant mass-casualty weapons. Each of the eight modules in the unit will consist of specific objectives, one or more illustrative cases, a list of the primary references that the student will be expected to acquaint himself or herself with, a brief introduction, a section of teaching material and study tips, and assignments designed to stimulate critical thinking. The general objectives of this unit are to familiarize the student with the toxicological concepts applicable to chemical and toxin weapons of mass destruction; to provide useful references for study, discussion, and reference; and to provide experience in critical thinking about the clinical toxicology of these agents. This unit is taught by the University of Florida as part of a collaborative venture between the University of Florida and Western Sydney University. Note: Further information on this unit is available from the University of Florida.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 3741 Master of Forensic Science, 3742 Graduate Diploma in Forensic Science or 3743 Graduate Certificate in Forensic Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

- List several definitions of weapons of mass destruction (WMD)
- Explain how WMD relates to mass-casualty weapons (MCW), NBC, and CBRNE
- Be able to define toxin, toxicant, toxic industrial chemical (TIC), LD50, and LCt50
- Explain what subsets of WMD are relevant to clinical toxicology
- Discuss the risks of chemical and radiological/nuclear terrorism
- Review the applicability to chemical, radiation, and nuclear mass casualties of ASBESTOS, POISON, TOXICANT, or a similar version of the agent-environment-host approach to a systematic clinical assessment of mass-casualty event from these kinds of agents
- Explain what is meant by the ABCDDs of mass-casualty care
- Explain what NATO codes are
- Differentiate between WMDs with local effects on the respiratory tract and those with systemic effects
- Understand the differences and similarities of the pharmacokinetics and pharmacodynamics of WMDs with local and systemic effects
- Summarize the management of central- and peripheral-compartment damage to the respiratory tract
- Summarize the pathophysiology, clinical presentation, and management of WMDs
- List the three major vesicants used as chemical-warfare agents
- List the differential diagnosis of miosis (pinpoint pupils) in a poisoned patient
- Define incapacitating, incapacitating agents, disability, and nonlethal
- List the features of the anticholinergic toxidrome
- Define 'riot-control agent' and be able to list the important riot-control agents
- Define opioid, opiate, and opioid toxidrome
- List three separate ways (in addition to the CDC categories) of classifying toxins
- Explain the differences between a chemical and a biological warfare agent

Subject Content

Module 1 Introduction
 Module 2 Chem I: Inhaled Toxicants with Local Effects on the Respiratory Tract
 Module 3 Chem II: Blood Agents
 Module 4 Chem III: Vesicants
 Module 5 Chem IV: Anticholinesterases
 Module 6 Chem V: Incapacitating Agents I: Anticholinergic Agents
 Module 7 Chem VI: Anticholinergic Agents II: Riot-control Agents and Opioids
 Module 8 Toxins

Legacy Code 401164

Coordinator Bill Price ([https://directory.westernsydney.edu.au/search/name/Bill Price/](https://directory.westernsydney.edu.au/search/name/Bill%20Price/))

Description This unit is an elective unit as part of the Master of Research and provides training in essential skills for research students in the health, medical, biomedical and natural sciences. Students will select two modules that will provide experience in advanced techniques and methodologies directly relevant to a specific area of research. It is expected that this unit, together with the unit Experimental Design and Analysis, will provide students in the health, medical, biomedical and natural sciences with a solid foundation before commencing the research project in the second year of the Master of Research degree.

School Science

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

An active researcher on the graduate supervisory register is required to supervise students.

Assumed Knowledge

Students will have completed an undergraduate degree in a related discipline area.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Recall key principles of the operation and data acquisition associated with specific laboratory equipment OR recall key principles of the theory and practice of a research method
- Evaluate the quality of data produced using a specific piece of laboratory equipment or research methodology
- Describe how techniques and/or methodologies from both modules can be combined to investigate a research question

Subject Content

- Advanced practical training for a specific research methodology or topic
- Theory and application of a specific research methodology or topic
- Interdisciplinary research: understanding how the combination of these techniques contributes to a research project

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical assessment	1000 words (for each module)	60	Y	Individual
Online assessment	1 hour (for each module)	20	Y	Individual
Oral presentation	15 minutes (1 presentation in final week of semester)	20	Y	Individual

Legacy Code 800215

Coordinator Elizabeth Conroy ([https://directory.westernsydney.edu.au/search/name/Elizabeth Conroy/](https://directory.westernsydney.edu.au/search/name/Elizabeth%20Conroy/))

Description This unit will teach students practical knowledge and skills for conducting research with marginalised populations and on sensitive health topics. Students will learn ethical, methodological, and practical considerations in applied qualitative and mixed method research. Upon completion of the unit students will be able to develop a theoretically coherent qualitative or mixed method research protocol and justify their decision making at every stage of the research process. The skills developed in this unit will enable students to adapt research methods to ensure the integrity of the research process with marginalised populations and sensitive health topics.

School Graduate Research School

Discipline Medical Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Students will need basic knowledge of research design/approaches e.g. 800166 'Research Design 1: Theories of Enquiry' or 401076 'Introduction to Epidemiology' or 401080 'Research Protocol Design and Practice' or similar.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate knowledge of ethical considerations in working with marginalised populations and sensitive health topics

2. Demonstrate knowledge of mixed method or qualitative research design
3. Critically appraise the development of study materials
4. Critically appraise recruitment procedures and protocols
5. Demonstrate ways to involve the community throughout the research process
6. Demonstrate engagement in reflexivity throughout all stages of the research protocol

Subject Content

The unit will include regular semester workshops (6 x 4 hour). The workshops will cover:

- Epistemology (critical realism, pragmatism) and reflexivity in research
- Ethical considerations in working with marginalised populations and sensitive health topics
- Choosing a design for your research question: Applied mixed method and qualitative designs
- Recruitment strategies for hard-to-reach populations
- Quantitative survey methods appropriate for different populations and topics
- Qualitative interviewing techniques using visual methods
- Approaches to data analysis
- Bringing it all together: Community engagement and dissemination

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

NATS 7053 MSc Research Project (extended)

Credit Points 20

Legacy Code 301372

Coordinator Mark Williams ([https://directory.westernsydney.edu.au/search/name/Mark Williams/](https://directory.westernsydney.edu.au/search/name/Mark%20Williams/))

Description This unit extends the research project undertaken in 401156 MSc Research Project into a substantial piece of research

work. This unit provides a further opportunity for students to demonstrate that they can consolidate the knowledge acquired through their course of study, understand how existing evidence/information relates to research topics, and how their own work adds to this body of knowledge. The finding of the project will be presented in a thesis and in an oral presentation. On completion of the MSc with this unit, the student should have sufficient research project work to qualify for entry into a PhD program.

School Science

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 20cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) NATS 7033

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique peer-reviewed literature from the student's discipline and evaluate the strengths and weakness of this work.
2. Design and conduct experiments within a project framework to test project aims.
3. Analyse the data from experiments and formulate conclusions.
4. Justify results and conclusions using oral and written communication.
5. Devise possible areas of inquiry for future research or development.

Subject Content

1. Critical literature appraisal on a selected paper from literature.
2. Experimental design and Project management skills.
3. Analysis of data, using appropriate statistical methods where required.
4. Report writing in the scientific format of a thesis.
5. Critical evaluation of data to judge its significance and develop conclusions from these results.
6. Development of an oral talk for presentation of results and conclusions of research project.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Coordinator Mark Williams ([https://directory.westernsydney.edu.au/search/name/Mark Williams/](https://directory.westernsydney.edu.au/search/name/Mark%20Williams/))

Description This unit is designed to allow high achieving students to comprehensively explore a relevant topic of interest to them, either through a minor supervised research project or an investigation of an issue directly related to their chosen discipline or a work internship in your chosen discipline. This unit's flexible delivery offers a unique experience specific to each project and student. Students in this unit will develop extensive skills through project-based learning essential for employment and/or higher degree studies.

School Science

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Student must have permission from subject Coordinator to enrol in the subject. Students be enrolled in a postgraduate science degree and must have a GPA of 5.0 or above.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Propose and investigate a topic area relevant to professional practice.
2. Critique peer-reviewed literature pertinent to the proposed topic and identify gaps in knowledge.
3. Design and implement a relevant professional project or a minor research project or industry based project.
4. Justify the results and conclusions of the project by oral and written communication.
5. Devise possible areas of inquiry for future research or development.

Subject Content

The design of this subject is flexible so that it can respond to the special needs of the student and their topic chosen for exploration. The learning activities and resources required will be individually negotiated between the student and their project supervisor. subject content will include:

1. Project-based learning relevant to individual professional goals and available expertise within industry, academia or other relevant body.
2. Critical literature appraisal on topics relevant to the student's project.
3. Experimental design and Project management skills.
4. Analysis of data, using appropriate statistical methods where required.
5. Critical evaluation of data to judge its significance and develop conclusions from these results.
6. Report writing in the form of a scoping paper or research paper or industry project report.
7. Development of poster for presentation of results and conclusions of research project.

Assessment

Legacy Code 301371

Coordinator Mark Williams ([https://directory.westernsydney.edu.au/search/name/Mark Williams/](https://directory.westernsydney.edu.au/search/name/Mark%20Williams/))

Description Essential to a career in any branch of science is the ability to design the experiments of a project and manage this project to an outcome. This unit provides an introduction to the general theory of experiment design. The unit reviews the role of randomisation and replication in experiment design, considers the design techniques of constancy, blocking, and presents a number of experimental designs. This unit also covers the tools and techniques for effectively managing projects. Topics include development of project plans; estimation of time and resources; risk analysis and management; scheduling and control; resource allocation; project tracking; project closure and review.

School Science

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Devise a series of experiments to address project or research objectives, including selection of an appropriate study design, data source or data collection plan, and a strategy for analysis.
2. Critically assess results and propose further series of experiments.
3. Appraise how project management concepts provide improvements in strategic planning and management of projects.
4. Apply knowledge and techniques to project planning, risk assessment and project management.
5. Evaluate procedures for monitoring, controlling, and completing projects.

Subject Content

1. Making research decisions. Reviewing the literature, forming research questions and hypotheses, operationalising constructs, choosing variables.
2. Experimental/research design: planning a research project: Experimental and quasi-experimental designs, between and within-subjects experimental designs.
3. Interpretation of results, analysis strategy, experiment re-design.
4. Project life cycle, selection and initiation, project planning.
5. Resource scheduling, budgeting.
6. Evaluating and managing risk.
7. Project progress and performance measurement, closure and audit.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	6 x 20 min	30	N	Individual
Portfolio	3,500 words	40	N	Individual
Portfolio	2,500 words	30	N	Individual

NATS 7056 Clinical Research in Health Science

Credit Points 10

Legacy Code 800225

Coordinator Jerome Sarris ([https://directory.westernsydney.edu.au/search/name/Jerome Sarris/](https://directory.westernsydney.edu.au/search/name/Jerome%20Sarris/))

Description This unit will teach students practical knowledge and skills for conducting clinical research within the field of Health Science. Students will learn ethical, methodological and practical considerations in applied quantitative and mixed- method research

within the framework of a human clinical trial. Upon completion of the unit students will have an understanding of basic human clinical trial design, novel clinical trial designs, specialisation within various study fields. They will also have consideration of stakeholders and translational importance, trial governance, regulations and the Therapeutic Goods Administration (TGA), intellectual property, commercialisation, recruitment, and advertising and marketing. Finally, they will understand the importance of translational impact via publications and the media, and be able to synthesise trial data via knowing how to conduct systematic reviews and meta-analyses.

School Graduate Research School

Discipline Natural and Physical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a post-graduate program, Masters by Research, PhD or 8083 Bachelor of Research Studies

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply ethical, regulatory, and governance considerations in conducting clinical trials
2. Utilise quantitative or mixed method trial designs (basic and novel)
3. Critically appraise recruitment procedures and protocols
4. Analyse and understand commercialisation options and understand IP considerations
5. Formulate ways to involve the community throughout the research process and enhance translational research impact of the research (especially via media involvement)
6. Utilise appropriate methods to conduct a systematic review or meta-analysis

Subject Content

- Overview of human clinical trial research (for natural products, integrative modalities, and pharmaceutical medicines [including IP/commercialisation considerations])
- Development of Bench-to-Beside research models (including drug development process and clinical trial phases)
- Ethical considerations in working with humans and specialised populations (e.g. medical conditions, children, mental illness, marginalised communities) and with specialised interventions (e.g. natural products or pharmaceuticals)
- Choosing a design for your research question: Key clinical trial design considerations (with a focus on maximising future translational impact)
- Novel human clinical trial designs (and Sample size calculations)
- Developing clinical trial protocols and case-report forms
- Data Monitoring and Management
- Recruitment and marketing strategies for hard-to-reach populations
- Specialisation within various study fields (differing interventions and medical fields)
- Consideration of stakeholders and translational importance (E&I)
- Trial governance, regulations and the TGA, Pharmaceutical Good Manufacturing Practice, Good Clinical Practice
- Having translational impact: media, and community engagement and dissemination
- How to conduct Systematic Reviews and Meta-analyses (using Comprehensive Meta-analysis program)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Four Quizzes	40 questions in total (4 spread across the semester)	40 (1 mark per correct answer)	Y	Individual
Presentation	10 minutes	30	Y	Individual
Applied Project	20-30 pages	30	Y	Individual

Teaching Periods

NATS 7057 Research Preparation in Post Graduate Studies

Credit Points 10

Legacy Code 301387

Coordinator Rodrigo Neves Calheiros ([https://directory.westernsydney.edu.au/search/name/Rodrigo Neves Calheiros/](https://directory.westernsydney.edu.au/search/name/Rodrigo%20Neves%20Calheiros/))

Description Life is research! This unit introduces students to the nature of research and why it is essential to today's way of living. What are the current and big questions in research? How to prepare for conducting a research in various areas? What are the differences between study, investigation and research? In this unit, the main emphasis will be on different types of modern research and their methods/methodologies with special emphasis on Science, Technology, Engineering & Mathematics (STEM). This unit will also encompass various advanced tools that support research, its writing styles, publication channels and research ethics. Key elements of good research design are also introduced as well as the concepts of intellectual property and commercialisation.

School Computer, Data & Math Sciences

Discipline Other Natural And Physical Sciences

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects ENGR 7018 - Research Preparation in Post Graduate Studies

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe essential characteristics of a STEM research project and identify whether a given scenario constitutes a research project or not
2. Formulate a research question or hypothesis from a given problem, select a suitable research methodology and explain the main steps in that methodology
3. Describe various ICT tools available to support research activities; especially to support activities associated with literature review and be able to effectively use these tools

- Describe various types of publications associated with research, typical structure of such documents and current approaches to assess quality of such documents
- Write a critical review of literature in a given area including STEM
- Describe quantitative and qualitative research methods that can be used to support different research approaches in STEM disciplines
- Demonstrate an awareness of ethics-related documents one needs to know as a researcher (such as the Australian Code for the Responsible Conduct of Research) and be able to explain the role of, and reason for, all of these ethics guidelines
- Express research related contents through presentation and report writing

Subject Content

- What is Research
- Types of research projects and outcomes
- How to conduct a Research project
- Essential Tools to Support Research
- Research writing styles and publication channels
- Literature Review
- Research Methodologies and methods
- Ethics

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	As per module	S/U	Y	Individual
Literature Review	1,500 – 2,000 words	30	N	Individual
Presentation	15 minutes	30	N	Individual
Proposal	1,500 – 2,000 words	40	N	Individual

NATS 7058 Forensic Analysis of DNA 2

Credit Points 10

Legacy Code 301434

Coordinator Chris Lennard ([https://directory.westernsydney.edu.au/search/name/Chris Lennard/](https://directory.westernsydney.edu.au/search/name/Chris%20Lennard/))

Description Forensic Analysis of DNA 2 is a continuation of 301148 Forensic Analysis of DNA where students learn about the methods routinely used for the isolation of DNA from cells and techniques applied to DNA quantitation and electrophoretic separation, as well as data analysis, interpretation and reporting. In DNA 2, students learn how to interpret DNA data to include mixture deconvolution and the statistics that apply to DNA matches/inclusions. Modules also guide the student through the basis of Y-STR and Kinship testing statistical applications. Students will also learn the report writing, review and testimony skills required of a DNA analyst. This unit is taught by the University of Florida as part of a collaborative venture with Western Sydney University. (Note: This unit description is as provided by the University of Florida; see: <https://forensicscience.ufl.edu/programs/courses/forensic-analysis-of-dna-2/>)

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) NATS 7019

Restrictions

Must be enrolled in 3741 Master of Forensic Science, 3742 Graduate Diploma in Forensic Science or 3743 Graduate Certificate in Forensic Science.

Assumed Knowledge

A basic understanding of undergraduate-level chemistry and biology is assumed as well as good general knowledge regarding the forensic analysis of DNA as provided by the pre-requisite subject (301148 Forensic Analysis of DNA), for example.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Understand the basic steps of data analysis
- Differentiate artefacts from alleles
- Understand what DNA data looks like in and out of the optimal range
- Understand how to differentiate single source samples from mixtures
- Understand the steps taken to deconvolute mixtures

6. Understand the use of assumptions in mixture interpretation
7. Understand the significance of a match
8. Calculate random match probability and likelihood ratios
9. Understand when Y-STR analysis is to be utilised
10. Calculate Y-STR statistics for matches
11. Understand kinship testing scenarios
12. Calculate a Paternity Index
13. Understand common requirements and content of laboratory reports
14. Understand the purpose of the review process in DNA casework
15. Understand the basis and limitations of expert testimony

Subject Content

1. DNA Data Analysis
2. Autosomal STR Interpretation
3. Mixture Deconvolution 1
4. Mixture Deconvolution 2
5. Significance of a match and calculating statistics
6. Y-STR testing
7. Kinship Testing
8. Report Writing, Review and Testimony

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Final Exam	Not specified	100	N	Individual

NATS 7059 Forensic Digital Imaging

Credit Points 10

Legacy Code 301442

Coordinator Chris Lennard (<https://directory.westernsydney.edu.au/search/name/Chris Lennard/>)

Description This online unit is designed to provide an in-depth knowledge of scientific and forensic imaging. Forensic digital imaging serves important functions within forensic science for the purpose of scene and item documentation, detection and enhancement of forensic evidence, and as a means of communicating forensic observations and interpretations. The unit includes modules covering the following areas: physics of light, colour and optics; forensic photographic lighting techniques; image recording systems; image processing; and principles of forensic photography and imaging. This unit is taught by the University of Lausanne, Switzerland, as part of a collaborative venture between Western Sydney University and the University of Lausanne.

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Must be enrolled in 3741 Master of Forensic Science, 3742 Graduate Diploma in Forensic Science or 3743 Graduate Certificate in Forensic Science.

Assumed Knowledge

Good general science knowledge (including physics and mathematics).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the fundamentals of light, colour and optics
2. Discuss the basis behind photography, digital imaging and image processing
3. Understand the handling and adjustment of cameras and lenses
4. Select and use appropriate image processing tools
5. Choose and implement forensic lighting techniques
6. Explain advanced techniques in forensic photography and image processing
7. Identify solutions for real-world forensic photography problems
8. Discuss the principles of scientific photography applied to forensic science
9. Employ non-destructive digital image workflows and follow recommended operating procedures from image capture through

to final output, ensuring that physical and judicial integrity of photographic evidence is preserved

Subject Content

1. Physics of light, colour and optics
2. Lenses and lens aberrations
3. Photographic sensors and filters
4. Photographic lighting techniques
5. Image recording systems
6. Digital image processing
7. Image processing workflows
8. Scientific and forensic photography and imaging

NOAW 0004 Academic Integrity Module

Credit Points 0

Legacy Code 900306

Coordinator Linda Parker ([https://directory.westernsydney.edu.au/search/name/Linda Parker/](https://directory.westernsydney.edu.au/search/name/Linda%20Parker/))

Description The Academic Integrity Module (AIM) introduces students to the importance of studying with integrity at Western and the value of integrity in professional life. Students completing the AIM commit to the values of Western's Student Honour Code, developed in partnership with students. The AIM outlines requirements and expectations regarding ethical academic behaviour including use and acknowledgement of sources and presenting your own work in assessments. It also introduces key academic integrity concepts in the Student Misconduct Rule that all students need to be aware of, including academic misconduct, plagiarism, contract cheating and collusion. Students who complete the AIM feel more confident in approaching their studies with integrity and identifying potential risks to their academic integrity. Satisfactory completion of the AIM is mandatory for all commencing students. Once completed, students will be able to register for subsequent teaching sessions.

NURS 1001 Approaches to Professional Nursing Practice

Credit Points 10

Legacy Code 401007

Coordinator Rebekah Carter ([https://directory.westernsydney.edu.au/search/name/Rebekah Carter/](https://directory.westernsydney.edu.au/search/name/Rebekah%20Carter/))

Description Approaches to Professional Nursing Practice explores the nature and professional context of nursing. The roles and functions of the nurse and their relationship to others are considered in terms of expected competence, responsibilities, accountabilities, and scope of practice. Students will gain an understanding of information enabled care, which is central to modern practice.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Incompatible Subjects NURS 1002 - Becoming a Nurse NURS 1008 - Knowing Nursing

Restrictions

Students must be enrolled in 4691 Bachelor of Nursing or 4780 Bachelor of Nursing – WSU Online or 4693 Bachelor of Nursing (Advanced) or 4692 Bachelor of Nursing (Graduate Entry)

Assumed Knowledge

Foundational knowledge of primary health care, professional communication and nursing skills.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the principles of and processes for supporting evidence-based practice
2. Conduct the techniques to conduct literature searches from a wide range of sources to support safe and appropriate nursing care
3. Explain professional responsibility and accountability when adhering to digital health legislation, policy, ethics, and professional conduct
4. Describe the responsibilities of the registered nurse related to scope of practice, delegation, and the supervision framework
5. Explain a lifelong learning approach for continuing professional development of self and others, including ongoing resilience and self-reflexivity in a professional context
6. Explain the role of registered nurses to ensure accessibility, reliability, privacy, security, and timeliness of data within healthcare environments

Subject Content

1. The discipline of nursing, perceptions of nursing and professional identity
2. Nursing roles, functions and required competencies
3. Professional responsibility and accountability when adhering to digital health legislation, policy, ethics, and professional conduct.
4. Boundaries of practice
5. Open Disclosure
6. Nursing and Midwifery Board of Australia (NMBA) decision-making framework (DMF) – nursing
7. Ethical and legal nursing practice
8. Collaborative health care and nursing practice
9. Evidence-based practice including literature searching, describing different sources of evidence and accessing different evidence to inform and improve patient care
10. Lifelong learning approach for continuing professional development of self and others, including ongoing resilience and self-reflexivity in a professional context.
11. Scope of practice, delegation, and the supervision frameworks
12. National Safety and Quality Health Service Standards

Special Requirements

Essential equipment

Access to an internet enabled device is essential in order to be able to: access course materials; to participate in discussion groups; and to access additional resources provided by the lecturer during the session. See http://www.westernsydney.edu.au/currentstudents/current_students/services_and_facilities/uwsonline_student_support (https://www.westernsydney.edu.au/currentstudents/current_students/services_and_facilities/uwsonline_student_support/) for further information.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Short Answer	800 words	30	N	Individual
Quiz	30 minutes	30	N	Individual
Portfolio	1200 words	40	N	Individual

NURS 1004 Bioscience for Midwifery

Credit Points 10

Legacy Code 401031

Coordinator Athena Sheehan ([https://directory.westernsydney.edu.au/search/name/Athena Sheehan/](https://directory.westernsydney.edu.au/search/name/Athena%20Sheehan/))

Description This unit extends knowledge gained in Bioscience I and introduces midwifery students to concepts associated with early human development, labour, birth and postpartum changes. Physiological changes in the newborn at birth are identified together with growth and development to six weeks of age. The unit includes an introduction to principles of pharmacology and pharmacological agents that may be used as a supportive resource during pregnancy and birth. In addition to this, the unit also explores the impact of microorganisms on maternal and newborn health and the body's natural defenses in maintaining health.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Pre-requisite(s) BIOS 1010

Co-requisite(s) NURS 1010 AND NURS 1013

Restrictions Students must be enrolled in 4684 Bachelor of Midwifery.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the male and female reproductive systems including the menstrual and ovarian cycles

2. Describe fertilisation, development of the embryo and fetal growth and development in relation to gestational age.
3. Explicate the development and functions of the placenta
4. Describe breast development and lactation
5. Identify principles of pharmacology, pharmacokinetics Describe the physiology of pregnancy, labour, birth and the puerperium
6. Discuss the physiology and perception of pain and pain control
7. Describe changes in neonatal physiology and adaptation to extra-uterine life.
8. Discuss the role of microorganisms in health breakdown within the community and in health care facilities and its relevance to professional midwifery practice.
9. Describe the role of the immune system, and the body's defence mechanisms in maintaining health.
10. Explain the principles of pharmacology

Subject Content

1. Physiology of pregnancy
 - Anatomy of The uterus, cervix, pelvis and Pelvic floor
 - protection of The Pelvic floor during Pregnancy
 - physical adaptation to Pregnancy
 - signs and Symptoms of Pregnancy
 - breast development
 - routine antenatal Screening and tests including confirmation of Pregnancy
 - fetal Anatomy and physiology
 - fetal growth and development
 - hormonal effects on The Maternal body
2. Labour
 - initiation and maintenance of labour
 - mechanism of labour
 - Progress of labour
 - physiology of pain, perception of pain and pain control (non Pharmacological)
 - birth process
3. Postnatal woman
 - Maternal physiology
 - Wound healing
4. Newborn
 - neonatal physiological changes and adaptation to extra-uterine life
 - temperature control in The newborn
 - growth and development
5. Microbiology
 - fundamental microbiology
 - host-microbe interactions
 - The immune system
 - infection control
 - The body's defence mechanisms
 - The microbiome and epigenetics
6. Introduction to the principles of pharmacology and common drugs used during childbirth
 - principles of pharmacokinetics and pharmacodynamics
 - quality use of medicines
 - common medication groups
 - Legislation related to medication administration and responsibilities of health professionals
 - common medications used during normal Pregnancy, labour An birth and in The Postnatal period
 - non-Pharmacological and complementary therapies

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
On-line Quiz	30 min	10	N	Individual
Case Study	1,200 words	40	N	Individual

NURS 1005 Foundations for Nursing Practice

Credit Points 10

Legacy Code 401029

Coordinator Gift Mutsonziwa ([https://directory.westernsydney.edu.au/search/name/Gift Mutsonziwa/](https://directory.westernsydney.edu.au/search/name/Gift%20Mutsonziwa/))

Description This unit is conducted in an intensive study mode that is offered to students with a previous degree in biological or behavioural science or who are registered nurses with registration from overseas. The unit provides foundational and core learning activities to support student transition into second year units of the Bachelor of Nursing (Graduate Entry).

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Restrictions Students must be enrolled in 4692 - Bachelor of Nursing (Graduate Entry).

Assumed Knowledge

Knowledge of human Bioscience, Arts (Social Sciences) or a three year post-secondary school, registered nurse qualification from overseas.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify how Primary Health Care (PHC) principles relate to the social determinants of health
2. Perform a holistic health assessment of individuals across the lifespan utilising effective communication skills
3. Apply ethical and legal frameworks when carrying out simulated patient centred care
4. Apply problem-solving skills and clinical skill competency check lists to ensure accurate development of nursing skills

5. Collaborate with peers to determine factors that affect the health and wellbeing of individuals
6. Understand the roles and functions of the nurse and their relationship to others in terms of competence, responsibilities, accountabilities and scope of practice
7. Critically reflect on performance of self and others to identify future learning goals and strategies
8. Apply principles of Work Health and Safety (WH&S) in the simulated clinical environment

Subject Content

1. Contexts of nursing
2. Principles of Primary Health Care (PHC) - Clients, families and community groups to promote and maintain health and well-being
3. Family focused care
4. Discuss the Integrated Care Model and engagement with intraprofessional and interprofessional learning for collaborative practice
5. Working in multi-disciplinary teams
6. Understanding the relationship to professional and academic life
7. Reading and understanding evidence based research literature
 - communication and literacy skills for Nursing
 - communication with Aboriginal and Torres Strait Islander people
 - communication with people from diverse communities
8. Introduction to cultural sensitivity, safety and competence
9. Holistic assessment of health and wellness across the lifespan
10. Promote the activities of daily living
11. Application of WH&S - standard precautions, transmission-based precautions, manual handling and transfers
12. Numeracy diagnostic assessment and medication administration
13. Application of legal-ethical principles
14. Introduction to end of life care
15. Peer reflection and evaluation
- A. Bioscience:
 1. To inform nursing practice, the following body systems are reviewed: the integument, cardiovascular, respiratory, digestive, musculoskeletal, nervous, endocrine, reproductive and urinary systems
 2. Human Genome basics
 3. Inheritance patterns - cancer genetics & testing
 4. For each system, the concepts addressed are
 - fundamentals of Anatomy and physiology
 - levels of organisation
 - growth and development across The lifespan
 - homeostasis and health
 - relationship to Activities of Living
 - relationship to national health priorities
 5. Injury prevention and control
 6. The ageing process through to end of life
 7. Introduction to pathophysiology
 - cause, pathogenesis, Symptoms, course, prognosis, prevention of disease
 - relevance for Nursing
 8. Introduction to pharmacology for nurses
 - pharmacokinetics and pharmacodynamics
 9. Microbiology and infections - relevance for nursing
 - common pathological organisms
 - sources of infection and modes of transmission
 - infection control in A health care setting
 10. Immune Processes
 - immune system breakdown and role of The Nurse
 - Vaccination and Immunisation
 - The Inflammatory process
 11. Wound healing
- B. Behavioural Science:
 1. Sense of self

- transactional analysis/Humanism/Maslow
 - social Structures and their interactions
 - Conflict
2. Human development
 - holistic Overview of human development - physical, moral, social and cognitive
 - human relationships
 - attachment theory
 3. Predictable/Normative life transitions across the lifespan
 - theories of life development (Eriksons theory)
 - loss/grief and other transitions
 4. Unpredictable/Non-normative life transitions
 - change: transition and adaptation
 - Defense and coping mechanisms
 - Wellness to illness
 - unexpected loss
 - C. Law and Ethics:
 1. Legal Principles
 - Overview of The impact of Law and legal principles on The role and work of The registered Nurse
 - Civil and criminal as It applies to Nursing
 - The law and nursing practice including: medication administration; operating technology and monitoring and assessing patient progress
 - professional communication and documentation
 2. Ethical Principles
 - Defining ethics and Ethical Nursing practice
 - Ethical theories and principles
 - Bioethics including: euthanasia, abortion, STEM cell research
 - Ethical Issues confronting Nurses in Australia
 - Ethical decision making
 3. Codes of Practice for Nurses
 - Defining codes of practice for Nurses in Australia
 - Code of ethics for Nurses in Australia
 - Code of professional conduct for Nurses in Australia
 - boundaries of professional practice
 - registered Nurse Standards for practice
 4. Case studies: Applying theory to practice
 - identifying The relationship between Law and ethics in practice
 - identifying Ethical principles in A variety of case studies
 - identifying legal principles in A variety of case studies
 - Nursing actions when legal and Ethical principles have been breached
 - Core Practice Skills:
 1. Exhibit effective written and verbal communication
 - ISBAR and clinical handover
 2. Perform holistic health assessment: gathering personal data including social, cultural, physical, emotional, spiritual and environmental factors
 3. Perform blood pressure, temperature, pulse, respiration, oxygen saturation, height; weight; centile; urine analysis assessment and reporting
 4. Assess level of consciousness
 5. Skin assessment and maintaining skin integrity
 6. Use outcomes of holistic health assessment to support and maintain capacity to perform activities of living
 7. Assess oral health
 8. Promote comfort measures inclusive of bed making
 9. Hand hygiene
 10. Undertake documentation within legal frameworks
 11. Aseptic technique and simple wound management
 12. Medication administration - Administration of medications within the legal frameworks, Performs accurate drug calculations
 13. Introduction to nursing responsibilities and practices when providing care for dying people and their families in home, aged care or hospital settings
 14. Identifying the person at risk - Falls assessment, Pressure injury, Venous thromboembolism

15. Routine Diagnostic Procedures - Basic ECG, Spirometry (Peak flows), Blood Glucose Testing, Mini Mental Health Assessment, Drug and Alcohol Assessment

16. National Safety and Quality Health Service Standards
- Preventing and controlling healthcare associated infections
- medication safety
- patient identif

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Virtual WH&S Online Modules	30 minutes	S/ U	Y	Individual
Online Medication Calculation Safety Exam	Part A - Online Numeracy Modules Part B - Medication Calculation Safety Exam - 30 mins	S/ U	Y	Individual
Clinical Skills Logbook		S/ U	Y	Individual
Clinical Skills Mastery		S/ U	Y	Individual
Mandatory 100% Class attendance required in seminar, tutorial and CPU classes		S/ U	Y	Individual
Online Engagement Weekly Activities		10	N	Individual
Professional Communication Case Study Essay	1,000 words	40	N	Individual
Final Exam - online	1 hour	50	N	Individual

Teaching Periods

NURS 1006 Human Relationships and Life Transitions

Credit Points 10

Legacy Code 401005

Coordinator Rebecca O'Reilly ([https://directory.westernsydney.edu.au/search/name/Rebecca O'Reilly/](https://directory.westernsydney.edu.au/search/name/Rebecca%20O'Reilly/))

Description This unit enables students to develop an understanding of human relationships and life transitions, and introduces concepts that inform nursing and midwifery practice. The unit explores frameworks

that support an understanding of the psychological, social, cognitive and moral components of human development throughout the lifespan, the development of self, and normative (expected) and non-normative (deviation from the expected) life transitions in the context of people realising their health potential.

School Nursing & Midwifery

Discipline Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Restrictions Students must be enrolled in 4691 Bachelor of Nursing or 4693 Bachelor of Nursing (Advanced) or 4780 Bachelor of Nursing - WSU Online or 4684 Bachelor of Midwifery. Students must be enrolled in 4780 to enrol in WSU Online Campus subjects. Unitrack students may study this subject as a miscellaneous subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the components of human development including psychological, social, cognitive and moral components of human development throughout the lifespan from pre-birth to older age.
2. Explain the factors that contribute to the development of a sense of self including shaping of social identity, self-concept and the development of self-esteem.
3. Explain the nature of human relationships across the lifespan, social attachments and the influence of culture on human development.
4. Describe a range of life transitions: a. Normative b. Non-normative
5. Identify coping strategies used to manage life transitions in each stage of the lifespan
6. Explain the relevance of human relationship and life transition concepts to nursing and midwifery practice

Subject Content

1. Human development
2. Holistic overview of human development - social, psychological, cognitive, moral and cultural aspects
3. Sense of self
4. Understanding self concept and social identity
5. Social influences in developing a sense of self
6. The development of self-esteem
7. Human relationships throughout the lifespan
8. Establishing and maintaining relationships
9. Attachment and bonding
10. Normative life transitions throughout the lifespan
11. Introduction to theories of human development, including theoretical frameworks, normative and non-normative transitions and response to major life transitions throughout the lifespan
12. Cultural differences in acknowledging and dealing with implications for predictable life transitions
13. Non-normative life transitions across the lifespan
14. Human development: individual differences, making adjustments and adaptations
15. Ego defence and coping mechanisms
16. Cultural differences in acknowledging and dealing with unpredictable and unanticipated life transitions with a focus on Aboriginal and Torres Strait Islander peoples
17. Understanding the spectrum of wellness to illness throughout the lifespan ? coping with stress and trauma

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Online Quiz	60 minutes	30	N	Individual
Presentation	15 Minutes	30	N	Group
Final Exam - Online	1 hour/50 MCQ's	40	N	Individual

NURS 1009 Midwifery Knowledge 1

Credit Points 10

Legacy Code 401030

Coordinator Hazel Keedle ([https://directory.westernsydney.edu.au/search/name/Hazel Keedle/](https://directory.westernsydney.edu.au/search/name/Hazel%20Keedle/))

Description This unit introduces students to the meaning of birth in society and the historical and social contexts of midwifery, from its early beginnings, to its current professional standing. The philosophy of midwifery and the role of the midwife within a continuity of care framework will be explored with a particular focus on the provision of care in the antenatal period. This will include approaches for working

in partnership with women and their families. Students will investigate, identify and access scientific information and research in order to develop academic literacy at a beginning level. They will identify the principles of communication and explore educational resources for childbirth.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Co-requisite(s) NURS 1023 AND NURS 1012

Restrictions Students must be enrolled in 4684 Bachelor of Midwifery.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Discuss the philosophy of midwifery and the historical development of midwifery as a profession and how Primary Health Care (PHC) principles relate to the provision of midwifery care.
- Describe the role of the midwife in the provision of safe woman centred midwifery care during pregnancy, and identify the resources available to women during pregnancy, labour and birth.
- Describe the history and culture of Aboriginal and Torres Strait Islander people and their traditions around birth and identify culturally safe maternity care practices and resources in urban, rural and remote settings.
- Explain Cultural Sensitivity, Cultural Safety and Cultural Competence and appreciate the impact of culture on the meaning of birth for yourself and others.
- Apply sound written and verbal communication skills and identify midwifery and health care abbreviations and terminology.
- Explain the concepts of lifelong learning, reflection and critical thinking, as they relate to midwifery practice.
- Identify midwifery standards and guidelines and describe the principles of informed consent and confidentiality.

Subject Content

- Historical Context of Childbirth:
 - Aboriginal and Torres Strait Islander peoples history of birthing throughout The ages and contemporary Issues
 - birth in other cultures
 - birth as A celebration of womens power and intuitive knowledge
 - womens rights, Advocacy and empowerment
 - medicalisation of childbirth
- Development of Midwifery as a profession:
 - students and Societies perceptions of Midwifery/birth
 - philosophy of Midwifery and role of The midwife
 - Global and national Standards and perspectives (ACMI, international Confederation of Midwives, World health organization)
 - The midwife as A primary health care worker
 - Midwifery partnership and Continuity of Midwifery care
- Preparation for Professional and Academic Life:
 - Language and literacy for professional and academic life;
 - professional language of Midwifery
 - Midwifery and health care abbreviations and terminology
 - introduction to Evidence Based Practice Midwifery
 - Accessing scientific information
 - writing and referencing styles
 - commence A professional portfolio
 - Learning and the relationship to professional and academic life;
 - being A learner
 - lifelong learning

- learning styles
 - reflection
 - Critical thinking
4. Principles of Communication, Confidentiality and Consent:
- A. Principles of communication;
- therapeutic use of self
 - introduction to cultural Sensitivity / safety / competence / interpreters
 - recognising impact of personal values and beliefs
- B. Confidentiality;
- Confidentiality and Privacy Issues
 - student/woman/midwife
 - social networking sites
- C. An introduction to informed consent and documentation;
- Legal requirements of documentation
 - legal and ethical dimensions of informed consent
5. Midwife's Role in Pregnancy:
- A. Options for maternity care including models of care;
- B. Primary health care approach to antenatal care;
- woman centred care
 - partnership in care
 - Continuity of Midwifery care
- C. the framework for quality maternal and newborn care (QMNC)
6. Pregnancy care:

Assessment

NURS 1010 Midwifery Knowledge 2

Credit Points 10

Legacy Code 401032

Coordinator Renae Coleman ([https://directory.westernsydney.edu.au/search/name/Renae Coleman/](https://directory.westernsydney.edu.au/search/name/Renae%20Coleman/))

Description This unit introduces students to midwifery knowledge for childbirth within a woman centred partnership model. It provides the theoretical foundations to equip students in understanding the role of the midwife during late pregnancy, labour and birth and the initial care of the newborn. The educational, psychological and social needs of

women are explored and integrated with learning from the Bioscience for Midwifery unit. The unit briefly introduces students to midwifery care related to the immediate postnatal and newborn period including lactation and breastfeeding.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Pre-requisite(s) NURS 1009 AND NURS 1012

Co-requisite(s) NURS 1004 AND NURS 1013

Restrictions Students must be enrolled in the 4684 Bachelor of Midwifery.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the role of the midwife in the provision of woman centred midwifery care during late pregnancy, labour and birth and the immediate post-birth period.
2. Relate anatomy and physiology of pregnancy, labour and birth to the care of a woman.
3. Describe the parameters of normal in relation to maternal and fetal wellbeing during labour, birth and the post-partum period
4. Discuss how to facilitate normal physiological labour and birth and support the breastfeeding woman.
5. Discuss the roles of family members and support persons during labour and birth.
6. Identify strategies to facilitate culturally safe care for the woman, her partner and her family during labour and the immediate post-birth period
7. Identify strategies for providing culturally safe maternity care to Aboriginal and Torres Strait Islander women and their communities, in urban, rural and remote settings.
8. Describe the role of the midwife in the initial care and assessment of the infant at birth

Subject Content

1. Antenatal Care
 - Caring for A woman postdates
 - Individual and group-based education and preparation for birth and parenting; Groups with different needs (Adolescents, CALD women, Fathers, Aboriginal and Torres Strait Islander Women)
 - complementary medicine and alternative approaches to support for labour and birth
 - promoting normal birth
 - Normal birth Policies /Guidelines; Place of birth, Role of the birth support person / fathers, family and significant others, The impact of support on birth outcomes, Supporting the support person
2. Labour
 - Continuing The partnership and Continuity of care
 - Assessing labour - phone/Home/hospital
 - identify culturally Safe labour and birth care
 - Working in partnership with Aboriginal and Torres Strait Islander women and women from other culturally diverse groups
 - facilitating normal physiological labour
 - positions for labour
 - reducing perineal Trauma
 - legal requirements of documentation in labour

- professional communication and listening effectively
3. Options for Pain Relief in Labour and Birth
- facilitating normal birth
 - preparation for birth
 - positions for birth
 - Welcoming The newborn
 - Maternal/infant interactions
 - Understanding The APGAR score
 - Actioning The plan for birthing The placenta (physiological and active)
4. Care Following Birth
- Maternal and newborn assessment and observations
 - inspection of The placenta with The woman/family
 - cultural practices around The placenta
 - The evidence for skin to skin and The nine instinctive stages
 - The initial breastfeed Maternal / infant attachment
 - The family - cultural celebrations, support siblings, grandparents, family dynamics

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Group Presentation, consisting of a) Presentation (20%) and b) Individually written summary (20%)	a) 15 minutes, and b) 750 words	40	N	Group
Resource Folder: Development and Reflection	5-10 resources, 500 words	10	N	Individual
Essay	1500 words	50	N	Individual

NURS 1012 Midwifery Professional Practice 1

Credit Points 10

Legacy Code 401219

Coordinator Lisa Cutajar ([https://directory.westernsydney.edu.au/search/name/Lisa Cutajar/](https://directory.westernsydney.edu.au/search/name/Lisa%20Cutajar/))

Description In this unit students will learn the necessary midwifery skills for the provision of woman-centred antenatal care. In a simulated practice environment students will gain practical skills to provide midwifery care to the woman and her supportive others during pregnancy. This unit will also focus on preparing students for clinical placement. The importance of work health and safety and effective communication and documentation will be reinforced. This unit will include recruitment of women for the continuity of care experience.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Co-requisite(s) NURS 1009

Equivalent Subjects NURS 1007 Introduction to Midwifery Practice Experience

Restrictions Students must be enrolled in 4684 Bachelor of Midwifery.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the role of the midwife during pregnancy using a primary health care framework
2. Utilise knowledge of PHC frameworks to support the collection of a comprehensive initial health assessment
3. Practice within legal, ethical and professional frameworks that are pertinent to midwifery
4. Perform beginning midwifery skills accurately and respond appropriately
5. Utilise communication skills to enhance the development of partnerships and professional relationships
6. Reflect upon performance of self and others
7. Apply the principles of Work Health and Safety (WHS) and relevant policies in practice
8. Display professional behaviour and develop competence in a simulated or antenatal environment

Subject Content

1. Introduction and orientation to Midwifery Practice Units
 - introduction to The clinical practice unit
 - introduction to professional skills book
 - introduction to Bachelor of Midwifery professional practice portfolio
 - Midwifery Continuity of care case notes
 - Midwifery Log of practice experience
 - Midwifery clinical summaries
 - Bachelor of Midwifery course Handbook
 - Department of health requirements for clinical placements
2. Midwifery as Primary Health Care
 - promoting health and well-being
 - comprehensive assessment of health and wellbeing
 - introduction to informed consent and Advocacy
 - legal and Ethical principles
3. Role of the Midwifery Student
 - professional behaviour
 - documentation and Confidentiality
 - resolving Issues in practice (Dealing with challenging people, managing feedback, clinical assessments, Conflict Resolution)
 - recognising impact of personal values and beliefs
 - reflective practice
 - work health and safety
 - Standard precautions

- protective isolation
 - manual handling and Transfers
 - bullying
 - injury prevention and infection control
 - Receiving feedback on practice from women and Midwives
 - support for students - university and hospital based support for students
4. Communication Skills for working in Partnership
- therapeutic use of self
 - skills to communicate effectively with The woman, her family and others during antenatal care
 - Building rapport
 - intercultural communication
 - use of An interpreter
5. Core skills
- comprehensive health assessments: gathering personal data including social, cultural, physical, emotional, spiritual and environmental Factors
 - Baseline observations - blood pressure, temperature, pulse, respiration, height; weight; BMI calculation; urinalysis assessment and reporting
 - Abdominal Examination during Pregnancy
 - Calculating expected Date of birth
 - Auscultating fetal heart rate - Pinards and Doppler
 - undertaking documentation within legal frameworks
 - Understanding The NSW health ?eBetween The Flags?f DETECT program including ISBAR and A-g assessment
 - Numeracy practice and diagnostic assessment
 - reflection on practice

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

NURS 1013 Midwifery Professional Practice 2

Credit Points 10

Legacy Code 401220

Coordinator Kye Porritt (https://directory.westernsydney.edu.au/search/name/Kye_Porritt/)

Description In this unit students will develop skills for the provision of midwifery care across the birthing continuum. The primary focus of this unit will be the acquisition of skills for supporting women during normal pregnancy and birth. Students will apply knowledge gained from Midwifery Knowledge 1 and 2 in simulated practice environments and will gain a comprehensive understanding of the practical aspects of midwifery care for women experiencing normal labour and birth. Students will gain practical experience in designated clinical areas and will follow women through pregnancy, birth and the postnatal period in a continuity of care experience.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Pre-requisite(s) NURS 1012 AND NURS 1009

Co-requisite(s) NURS 1010

Equivalent Subjects NURS 1011 Midwifery Practice Experience 1

Restrictions Students must be enrolled in 4684 Bachelor of Midwifery.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Communicate with women, and colleagues, in an open and respectful way.
2. Assess pregnancy history and its application to labour and birth.
3. Assess, monitor and provide safe midwifery care to the woman during normal labour and birth.
4. Explain the mechanism of birth in a variety of positions.
5. Discuss the benefits of physiological labour and birth.
6. Provide safe midwifery care and management for physiological and active third stage of labour.
7. Provide safe post-birth care and management of the woman including breastfeeding support.
8. Perform an examination of the newborn including initial assessment of newborn adjustment to extra uterine life.
9. Fulfil professional midwifery practice requirements including continuity of care.
10. Demonstrate principles of safe medication administration.

Subject Content

1. Communication:
 - Attentive listening
 - open communication
 - Working in partnership
 - woman-centred approach

2. Midwifery Practice Requirements:

- documentation
 - adherence to policy and procedure guidelines
 - principles of informed consent
 - Confidentiality
 - Privacy
 - medication calculations
3. Professional Midwifery Practice:
 - A. Assessment and monitoring of early labour:
 - collecting A Pregnancy and labour onset history
 - reviewing antenatal history and Screening to assess Maternal and fetal wellbeing
 - performing An Abdominal Examination in labour
 - Assessing uterine contraction and pattern
 - Assessing fetal wellbeing in labour
 - collecting Maternal observations
 - Assessing Maternal needs and plans
 - Assessing hydration/ elimination
 - B. Assessment and monitoring of labour progress:
 - Maternal cues
 - fetal position and descent
 - contraction pattern
 - vaginal loss
 - hydration and nutrition
 - Assessing Maternal Comfort
 - Assessing The need for vaginal Examination
 - documentation - partogram, and Progress notes
 - Escalation procedure for deviations from normal
 - C. Skills for promoting physiological labour and birth:
 - Rationale for upright positions and movement
 - use of massage and complementary therapies
 - The use of heat
 - The use of water/water birth
 - The use of Nitrous Oxide
 - D. Skills for supporting Birth:
 - preparation for birth
 - sterile/Clean technique
 - Midwives role in supporting The birthing woman (including waterbirth)
 - mechanism of birth in A variety of positions
 - physiological and active third stage
 - Assessing perineal Trauma
 - Examination of The placenta
 - collection of cord blood
 - E. Skills for supporting newborns:
 - Immediate care of The newborn
 - APGAR scoring
 - Initiating skin to skin
 - supporting The first breast feed
 4. Introduction to post-birth care:
 - A. Maternal post birth assessment including:
 - emotional wellbeing
 - Comfort measures
 - vital signs
 - assessment of vaginal loss and uterine involution
 - assessment of pain and discomfort
 - elimination
 - nutrition
 - procedure for dispensing of oral medication
 - B. Initial newborn assessment including:
 - identification
 - initial measurements
 - head to toe Examination
 - routine Vit K supplementation
 - Hep b Immunisation
 5. Medication Administration:

- medication Calculation
- Safe administration procedures
- using MIMS
- legal requirements for medication administration- consent/ documentation
- Five rights of medication administration
- Accepted medication abbreviations

NURS 1017 Primary Health Care in Action

Credit Points 10

Legacy Code 401001

Coordinator Neeta Reddy ([https://directory.westernsydney.edu.au/search/name/Neeta Reddy/](https://directory.westernsydney.edu.au/search/name/Neeta%20Reddy/))

Description This unit introduces nursing and midwifery students to Primary Health Care (PHC) as a social model of health and a World Health Organization (WHO) strategy for achieving just and humane health care. The unit explores the impact and relevance of PHC as a framework for organising an Australian health care system that decreases health inequities and optimises the health of all people. Students will examine the dimensions of PHC that assist in establishing collaborative partnerships in which people are supported to take responsibility for their health, including members of culturally diverse groups.

School Nursing & Midwifery

Discipline Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Restrictions

Students must be enrolled in 4691 Bachelor of Nursing or 4693 Bachelor of Nursing (Advanced) or 4780 Bachelor of Nursing - WSU Online or 4684 Bachelor of Midwifery.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the principles and practices of primary health care including health promotion, prevention and screening, early intervention, treatment, and management
2. Identify regional, national, and global health priority areas in primary health care to inform evidence based practice.
3. Explain factors that affect, or potentially affect, the health and wellbeing of people and populations to determine priorities for action and/or for referral
4. Analyse issues that impact culturally safe health care for and with Aboriginal and Torres Strait Islander people in urban, rural, and remote community settings
5. Discuss strategies that promote health literacy and community support to optimise health-related decisions
6. Communicate health promotion information that is appropriate to the person's level of health literacy

Subject Content

1. Concept of health and wellbeing and primary health care (PHC), health literacy
2. Role of nurses and midwives in PHC - Integrated Care Model
3. Contemporary issues in Aboriginal and Torres Strait Islander people
4. Culture and diversity in primary health care - refugee, migrant LGBTQIA
5. Primary health care principles in context
6. Health promotion and The Ottawa Charter
7. Global health issues - SDGs and sustainability

8. Primary health care through the lifespan

Legacy Code 401000

Coordinator Jane Medved ([https://directory.westernsydney.edu.au/search/name/Jane Medved/](https://directory.westernsydney.edu.au/search/name/Jane%20Medved/))

Description Professional Practice Experience 1 focuses on the development of the role and clinical skills of the registered nurse when promoting, maintaining, and supporting a person's health and wellbeing across the lifespan. Students will be able to develop the foundational clinical skills in a simulated clinical environment to enable the further development of more complex skills in a health care setting.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Co-requisite(s) NURS 1022 AND NURS 1023

Restrictions

Students must be enrolled in 4691 Bachelor of Nursing or 4780 Bachelor of Nursing - WSU Online. or 4693 Bachelor of Nursing (Advanced)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the principles of safe medication administration in nursing practice.
2. Document assessments and nursing care plans in accordance with relevant policies, guidelines, standards, regulations, and legislation requirements.
3. Perform assessments that are holistic as well as culturally appropriate, and are respectful of a person's dignity, culture, values, beliefs, and rights, within a simulated learning environment.
4. Recognise the role and skills of nursing in promoting, maintaining, and supporting a person's health across the lifespan.
5. Practise in accordance with legislation, regulations, policies, guidelines and other relevant standards or requirements in nursing.

Subject Content

1. Principles of nursing frameworks
2. Holistic Assessment and wellness across the lifespan
3. Activities of Daily Living (ADL)
4. National Health Priority Areas: Injury prevention and control
5. Application of legal-ethical principles
6. WH&S standard precautions
7. Protective isolation
8. Manual handling and transfers
9. Working in multi-disciplinary teams
10. NMBA decision-making framework (DMF) – nursing
11. Principles of accessing best available evidence, for safe, quality practice

NURS 1021 Professional Practice Experience 2

Credit Points 10

Legacy Code 401004

Coordinator Katherine Cooper ([https://directory.westernsydney.edu.au/search/name/Katherine Cooper/](https://directory.westernsydney.edu.au/search/name/Katherine%20Cooper/))

Description Professional Practice Experience 2 focuses on the development of the role and clinical skills of the registered nurse

when promoting, maintaining, and supporting person centred care. A simulated professional task will assist with the development of essential clinical communications and a professional experience placement to evaluate clinical skills development. The unit includes 80 hours of Professional Experience Placement.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Pre-requisite(s) NURS 1020 - Professional Practice Experience 1 (PPE1)

Co-requisite(s) NURS 1024 - Bioscience 2

Restrictions

Students must be enrolled in 4691 Bachelor of Nursing or 4780 Bachelor of Nursing - WSU Online or 4693 Bachelor of Nursing (Advanced)

Assumed Knowledge

Prior knowledge would include the role and clinical skills of the registered nurse when promoting, maintaining, and supporting a person's health and wellbeing across the lifespan, including foundational clinical skills for safe nursing practice.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the principles of safe medication administration in clinical scenarios within a simulated and clinical learning environment.
2. Accurately and timely document assessments and nursing care plans.
3. Appraise principles and best practice of intraprofessional and interprofessional communication in nursing.
4. Use assessment data and best available evidence to inform a person centred care plan across the lifespan.
5. Perform safe medication administration, with a focus of non-parenteral medications, promoting, maintaining, and supporting person centred care in a simulated and clinical learning environment.
6. Practise in accordance with legislation, regulations, policies, guidelines and other relevant standards or requirements in nursing.

Subject Content

1. Normal health changes across the lifespan
2. National Health Priorities: Injury, prevention and control: Obesity
3. Nursing Assessment
4. Low acuity/temporary health variations
5. Introduction to the care of the dying person and family
6. Numeracy for medication calculations
7. Working in multi-disciplinary teams
8. Health assessment related to an Aboriginal and Torres Strait Islander - obesity case history
9. Clinical Practicum

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance ([https://](https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance)

www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/

Essential equipment

Access to an internet enabled device is essential in order to be able to: access course materials; to participate in discussion groups; and to access additional resources provided by the lecturer during the session. See http://www.westernsydney.edu.au/currentstudents/current_students/services_and_facilities/uwsonline_student_support (https://www.westernsydney.edu.au/currentstudents/current_students/services_and_facilities/uwsonline_student_support/) for further information.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Professional Task	30 minutes	S/U	Y	Individual
Professional Task	10 minutes	S/U	Y	Individual
Practical Exam	25 minutes	S/U	Y	Individual
Participation	All teaching weeks	S/U	Y	Individual
Professional Placement Performance - Professional Experience Placement	80 hours	S/U	Y	Individual

NURS 1022 Becoming a Professional Nurse

Credit Points 10

Legacy Code 401448

Coordinator Suza Trajkovski ([https://directory.westernsydney.edu.au/search/name/Suza Trajkovski/](https://directory.westernsydney.edu.au/search/name/Suza%20Trajkovski/))

Description Becoming a Professional Nurse or Midwife facilitates a students understanding of becoming a health care professional. Students are introduced to cultural sensitivity, safety, and competence to facilitate appropriate intercultural communication within the context of contemporary healthcare. The role of the registered nurse or midwife is explored, with students gaining an understanding of accountability, responsibility, therapeutic and professional relationships, and their capability for practice.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Co-requisite(s) NURS 1020 - Professional Practice Experience 1

Equivalent Subjects NURS 1018 - Professional Communication
NURS 1019 - Professional Communication in Nursing

Restrictions

Students must be enrolled in 4691 Bachelor of Nursing or 4780 Bachelor of Nursing - WSU Online or 4693 Bachelor of Nursing (Advanced)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the role of a registered nurse or registered midwife and their professional responsibilities
2. Identify communication strategies that are effective and respectful of a person's dignity, culture, values, beliefs, and rights
3. Describe an understanding of one's own culture and how that influences and shapes one's worldview with reference to healthcare

Subject Content

1. Nursing philosophy and values
2. Professionalism, codes of practice and safety standards
3. Language and literacy for professional and academic life
4. Introduction to cultural sensitivity, safety, and competence
5. Using reflection to inform academic and professional development
6. Professional Identity
7. Introduction to reading research literature for evidence based practice
8. Introduction to critical thinking frameworks and their use in professional practice
9. Emotional Intelligence

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

NURS 1023 Bioscience 1

Credit Points 10

Legacy Code 401469

Coordinator Anna Maceri ([https://directory.westernsydney.edu.au/search/name/Anna Maceri/](https://directory.westernsydney.edu.au/search/name/Anna%20Maceri/))

Description Bioscience 1 introduces the core concepts and terminology related to the structure, function and homeostasis of the human body. Students begin to describe the relationships between the Australian National Health Priority areas and performances of activities of living and healthy lifestyle practices.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects BIOS 1010 - Bioscience 1

Restrictions

Students must be enrolled in 4691 Bachelor of Nursing, 4780 Bachelor of Nursing - WSU Online or 4684 Bachelor of Midwifery or 4693 Bachelor of Nursing (Advanced). Unitrack students may study this unit as a miscellaneous unit.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define anatomy and physiology of the human body across the lifespan
2. Identify appropriate terminology to biological concepts and mechanisms
3. Describe the physiological healthy body systems and homeostasis
4. Explain the impact of lifestyle practices that improve people's health literacy with relevance to nursing and midwifery practice
5. Analyse biological concepts of health conditions related to Australian National Health Priority areas

Subject Content

1. Anatomical terminology
2. Body organisation and cavities
3. Cell structure and function
4. Human genomic basics and cell cycle
5. Tissue types (structure, function, and location)
6. Principles of homeostasis
7. For each body system (integumentary, cardiovascular, respiratory, musculoskeletal, digestive, nervous, endocrine, reproductive and urinary) address:
 - a. fundamentals of anatomy and physiology
 - b. changes across the life span
 - c. maintenance of homeostasis and health
 - d. relationship to healthy lifestyle practices
 - e. relationship to National Health Priorities

Special Requirements

NURS 1024 Bioscience 2

Credit Points 10

Legacy Code 401470

Coordinator Elisha Stein ([https://directory.westernsydney.edu.au/search/name/Elisha Stein/](https://directory.westernsydney.edu.au/search/name/Elisha%20Stein/))

Description Bioscience 2 introduces the concepts associated with alterations in health across the lifespan. It will introduce pathophysiology, pharmacology, immunology, and microbiology related to health breakdown due to injury or disease. This unit specifically examines impact of microorganisms on the health of people and the body's natural defences when dealing with infections and injuries and its significance to person centred care.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Co-requisite(s) NURS 1023 Bioscience 1

Equivalent Subjects BIOS 1011 - Bioscience 2

Restrictions

Students must be enrolled in 4691 Bachelor of Nursing or 4780 Bachelor of Nursing – WSU Online or 4693 Bachelor of Nursing (Advanced). Unitrack students may study this unit as a miscellaneous unit.

Assumed Knowledge

Students should have an understanding of the core concepts and terminology related to the structure, function and homeostasis of the human body.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the role of the immune system in the maintenance of health
2. Define the role of microorganisms associated with health breakdown within communities and healthcare settings
3. Explain pharmacological principles associated with commonly prescribed drugs during health breakdown across the lifespan
4. Describe infection control and prevention strategies when providing safe patient centred care
5. Explain physiological concepts underlying the body's responses to health breakdown due to injury or disease

Subject Content

1. Innate defences:

- 1st and 2nd lines of defences
- The inflammatory process, wound healing, blood clotting

2. Introduction to pharmacology for nurses

- formulations and methods/routes of administration of drugs,
- rights of medications,
- medication errors,
- pharmacokinetics,
- pharmacodynamics
- half-life and therapeutic index,

- Basics of protein synthesis and its relationship to antimicrobial action
- anti-microbial stewardship.

3. Introduction to Microbiology and Infection Control

- Major types of microorganisms and their importance
- Common pathological organisms and their general structures
- Replication of bacteria and viruses
- HAI and risk factors
- Sources of infection and modes of transmission
- Nursing interventions in infection control

4. Immune system 1 – Lymphatic system.

5. Immune system 2 - Adaptive defences.

- 3rd line of defences
- Development of immunity
- Vaccinations (active and passive immunity acquired naturally and artificially)
- Breakdown of the immune system

6. Introduction to pathophysiology

- Aetiology – pathogenesis – course of a disease - structural changes – functional changes – signs/symptoms - clinical course - prognosis.
- Appropriate interventions ranging from prevention, diagnosis, detection of structural changes, functional changes, treatment/ management (nursing and pharmacological), prognosis.

7. Introduction to genetics.

- Mitosis, meiosis
- Patterns of inheritance

Assessment

NURS 1025 Person-centred Care Across the Lifespan

Credit Points 10

Legacy Code 401453

Coordinator Diana Jefferies ([https://directory.westernsydney.edu.au/search/name/Diana Jefferies/](https://directory.westernsydney.edu.au/search/name/Diana%20Jefferies/))

Description This subject introduces the concept of person-centred care as an approach that is respectful of, and responsive to, the preferences, needs and values of individual people throughout the lifespan. Students develop an understanding of human relationships and life transitions, including concepts that inform nursing and midwifery practice. The subject explores frameworks that support an understanding of the psychological, social, cognitive and moral components of human development including mental health and care of the older person.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Co-requisite(s) NURS 1017 - Primary Health Care in Action

Equivalent Subjects NURS 1006 - Human Relationships and Life Transitions

Restrictions

Students must be enrolled in 4691 Bachelor of Nursing, 4780 Bachelor of Nursing – WSU Online or 4684 Bachelor of Midwifery studies or 4693 Bachelor of Nursing (Advanced)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain theoretical concepts of human development related to person centred care
2. Describe the principles of person-centred care with reference to respect, emotional support, physical comfort, care coordination, and access to care
3. Explain how person-centred care impacts patient safety and wellbeing
4. Explain how to provide holistic person-centred care that considers the person's diversity, previous experiences, and life history
5. Identify regional, national, and global health priorities, including mental health and care of the older person, to inform evidence-based practice
6. Recognise that people are the experts in the experience of their life, and in partnership with the person include them in decisions and plans related to their healthcare

Subject Content

1. Theories of human development across the lifespan, person centred care and the domains of health
2. Overview of physical and mental health and its potential to impact self-concept, self-identity, and self-esteem.
3. The importance of cultural and social diversity with particular reference to Aboriginal and Torres Strait Islander people
4. Identifying normative and non-normative events, and social disability theory, across the lifespan and its impact on person-centred care
5. Principles of person-centred care; care coordination; and implementing the family partnership model across the lifespan
6. Infancy and childhood with introduction to attachment theory and the child-parent relationship.
7. The bridge between adolescence and young adulthood, including approaches to physical and mental healthcare.
8. Middle age adulthood, with specific consideration of social and political identity, menopause, mental health, and male suicide.
9. Older age adulthood, including consideration of the role of grandparents, the impact of ageism and nurses and midwife's role addressing elder abuse.

NURS 2001 Aboriginal and Torres Strait Islander Health

Credit Points 10

Legacy Code 401206

Coordinator Liz Flannery ([https://directory.westernsydney.edu.au/search/name/Liz Flannery/](https://directory.westernsydney.edu.au/search/name/Liz%20Flannery/))

Description In Autumn 2022 this unit will be replaced by unit 401454 - Indigenous Australian Health, Wellness and Culture. This unit will specifically enable nursing and midwifery students to investigate, discuss and develop an understanding of Aboriginal and Torres Strait Islander health, health statistics, historical and present day issues associated with poor health outcomes in Aboriginal and Torres Strait Islander people. In addition, the general concepts of cultural safety and health and illness, will be explored in terms of Aboriginal and Torres Strait Islander populations. Further, the unit promotes the development of critical knowledge essential for students to understand their own values, beliefs, biases, and perceptions to become culturally sensitive and appropriately adaptable when meeting the health needs of Aboriginal and Torres Strait Islander People. A case study approach will provide the framework for students to explore and reflect on the impact of the different attitudes, institutional policies and value systems relating to the health of Aboriginal and Torres Strait Islander people in Australia.

NURS 2004 Complex Care 1

Credit Points 10

Legacy Code 401036

Coordinator Leanne Luck ([https://directory.westernsydney.edu.au/search/name/Leanne Luck/](https://directory.westernsydney.edu.au/search/name/Leanne%20Luck/))

Description This unit introduces students to complexities in health that emerge during pregnancy, labour, birth and the postnatal period which require additional care when the health of the mother and/or neonate may be compromised. This module also focuses on the midwifery care of the sick neonate.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) NURS 2022 AND NURS 2025

Co-requisite(s) NURS 2026

Restrictions Students must be enrolled in 4684 Bachelor of Midwifery.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise biological and physiological complications that may emerge during pregnancy, labour and birth, and during the postpartum period or post surgical period for the woman.
2. Identify, discuss and act on abnormal laboratory test results; antenatal screening investigations; and maternal and fetal assessment for growth and wellbeing.
3. Discuss the assessment, planning and implementation of specific midwifery care for women and neonates with complexities.
4. Justify the midwife's role in the education and referral of the woman and her family in the ongoing care and safety of newborns with complex needs, and support services available using a Primary Health Care framework.
5. Explain the medications used in complex maternal and neonatal care.

Subject Content

1. Complexities that may emerge during pregnancy, labour and /or birth
 - Complications in the first 20 weeks of pregnancy (such as ectopic pregnancy, abortion, hyperemesis)
 - hypertensive disorders of Pregnancy
 - Maternal infections/sepsis
 - diabetes in Pregnancy
 - haemorrhage - antenatal, intrapartum and postpartum
 - Pre-term labour and birth, premature rupture of Membranes
 - Disordered uterine action
 - Induction/augmentation
 - Malpresentations - face/brow presentations/transverse lie
 - multiple Pregnancy
 - Maternal obesity
2. Maternal complexities in the postnatal and post surgical period
 - Postnatal Complications such as perineal Trauma, Urinary retention, infections, mastitis, breast abscess
 - managing care of The post surgical complex woman eg hysterectomy
3. Vulnerable newborns and their care
 - premature newborns
 - neonatal Jaundice
 - Respiratory distress
 - neonatal infection
 - Hypothermia

- Kangaroo care
- 4. Breastfeeding challenges for women with vulnerable newborns
 - multiple births/premature infants
 - A newborn in A special care unit/separation
- 5. Pharmacology for complex conditions
 - describe The pharmacokinetics and pharmacodynamics of medications used in complex Maternal and neonatal conditions
 - describe The effect of medications on The fetus, The neonate and breastmilk

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Case Study	2000 words	50	N	Individual
Final Exam: End of session closed book examination consisting of MCQ, Short answer questions	2 hours	50	N	Individual

NURS 2008 Graduate Entry Practice Experience

Credit Points 10

Legacy Code 401218

Coordinator Toni Azzopardi ([https://directory.westernsydney.edu.au/search/name/Toni Azzopardi/](https://directory.westernsydney.edu.au/search/name/Toni%20Azzopardi/))

Description This unit provides the student with an opportunity to consolidate their clinical skills development in an Australian health care facility, and contributes to the minimum professional practice experience placement requirement.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) NURS 1005

Co-requisite(s) NURS 2028

Equivalent Subjects NURS 2030 Professional Practice Experience A

Restrictions Students must be enrolled in 4692 Bachelor of Nursing (Graduate Entry).

Assumed Knowledge

Foundational professional practice nursing skills and knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Engage in clinical decision making and problem-solving that promotes safe professional nursing care for individuals across the life span.
2. Develop an understanding of ethical and legal frameworks to provide safe professional nursing care.
3. Develop effective communication skills.
4. Utilise an evidence-based approach to assessment, planning, implementation and evaluation of nursing care.
5. Reflect on performance of self to identify future learning goals and strategies.
6. Apply the principles of Work Health and Safety (WH&S) in the clinical environment.

Subject Content

1. Identification of pre-clinical placement objectives and preparation for professional practice experience.
2. Clinical placement.
3. Critical reflection of practicum experience and achievement of clinical placement objectives.
4. Identification of personal learning goals and strategies for improvement in professional nursing practice.

Special Requirements

Legislative pre-requisites

On-campus Students

To be eligible to enrol in a unit and attend a health-related placement in your course, students must meet Western Sydney University course requirements **and** Special Legislative Requirements to be assessed in their first year of study against the following:

1. National Criminal History Check: Students must have a current (expiring 3 years from date of issue) check valid for their entire program. A valid National Criminal history check must be an Australia wide check, include the student's full name matching their Student ID card and date of birth and not have any offences listed. If a student has a criminal history identified on their check, they must provide a Clinical Placement Authority Card (CPAC) or conditional letter from the NSW HealthShare Employment Screening and Review Unit https://www.health.nsw.gov.au/careers/student_clearance/Documents/appendix-10-student-application.pdf International students must additionally have a translated International Police Check or statutory declaration.
2. A NSW Working with Children Check (WWCC) clearance letter issued under the category of volunteer valid for their entire program.
3. A current approved first aid certificate valid for their entire program. Approved provider courses can be found at <http://training.gov.au> (<http://training.gov.au/>).

4. A completed vaccination/immunisation card with all serology results containing expiry dates and currency must be maintained by the student to ensure compliance for their entire course.

5. NSW Undertaking/Declaration form.

6. Completed any additional health forms required (such as NSW Health Code of Conduct, Health Student Undertaking/Declaration and Tuberculosis (TB) Assessment Tool).

7. Relevant Local Health District specific documentation as requested.

Contact your School for further details. Resources are also available on the Placement Hub (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/) website.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Professional Placement Performance: Clinical Practicum, 100% mandatory attendance	80 hours	S/U	Y	Individual
Learning Contract: Workshop A: online modules, Pre-Clinical personal learning objectives	2x modules 20 minutes each, 500 words	S/U	Y	Individual
Reflection: Workshop B: Online modules, Post-clinical personal reflection on clinical skills	2x modules 20 minutes each, 500 words	S/U	Y	Individual

NURS 2010 Health Variations 1 - Perioperative

Credit Points 10

Legacy Code 401207

Coordinator Bronwyn Smith ([https://directory.westernsydney.edu.au/search/name/Bronwyn Smith/](https://directory.westernsydney.edu.au/search/name/Bronwyn%20Smith/))

Description In Autumn 2022 this unit will be replaced by unit 401455 - Health Variations 1 - Introduction to Alterations in Health. This unit provides the theoretical background knowledge for Professional Practice 3. It introduces the student to the fundamental principles of perioperative nursing care in supporting clients undergoing surgical interventions incorporating the related pathophysiology and pharmacology. In particular, nursing care of surgical interventions relating to the gastrointestinal, musculoskeletal and reproductive systems, and injury prevention and controls will be the focus of case history reviews. The National Health Priority Areas of Injury Prevention and Control, Arthritis and Musculoskeletal conditions and Cancer Control will be addressed.

NURS 2013 Health Variations 2 - Chronic Illness and Disability

Credit Points 10

Legacy Code 401209

Coordinator Anne Marks ([https://directory.westernsydney.edu.au/search/name/Anne Marks/](https://directory.westernsydney.edu.au/search/name/Anne%20Marks/))

Description This unit will be replaced from Spring 2022 by 401444 Health Variations 2 - Chronic Conditions and Disability. This unit explores the concepts of chronicity, disability, habilitation and rehabilitation in relation to chronic conditions, functional and intellectual disabilities and their implications for nursing practice. The relevance of the International Classification of Functioning, Disability and Health (ICF) to primary health care is the core philosophy of the unit. National Health Priority case studies drawn from across the lifespan will provide a focus for exploring pathophysiology, pharmacological interventions and nursing care related to chronic conditions of the endocrine, neurological and respiratory body systems. In addition, the nursing role in supporting those with physical and intellectual disability will be examined.

School Nursing & Midwifery

Discipline Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects NURS 2011 Health Variations 2

Restrictions Students must be enrolled in 4691 Bachelor of Nursing or 4692 Bachelor of Nursing Graduate Entry program or 4780 Bachelor of Nursing - WSU Online. Students must be enrolled in 4780 to enrol in WSU Online Campus subjects.

Assumed Knowledge

Primary health care, foundational knowledge of human biological sciences including human body systems, basic concepts in pharmacology and pathophysiology and the National Health Priorities and the relationship to nursing practice.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the causes, pathophysiology, clinical manifestations and diagnostic procedures for common chronic illnesses related to the endocrine, neurological and respiratory body systems.
2. Examine safe, appropriate and responsive quality nursing practices related to the administration of pharmacological interventions for chronic conditions affecting the endocrine, neurological and respiratory body systems.
3. Develop evidence-based rationales for safe, person-centred nursing practice to people with chronic illness and disability.
4. Apply critical thinking frameworks to analyse the impact of chronic illness and disability on the individual, family, caregivers and the health care system, and develop a plan for nursing practice.
5. Demonstrate an understanding of the principles of habilitation, rehabilitation, chronicity and disability and the implications for nursing practice.

Subject Content

1. Concepts and principles of care related to chronic illness, disability and co-morbidity
2. The International Classification of Functioning, Disability and Health (ICF) and the relationship to primary health care
3. National Disability Insurance Scheme (NDIS)
4. Knowledge and application of the following concepts to inform professional nursing practice related to chronic conditions and disability affecting the endocrine, neurological and respiratory body systems:
 - Genetic disorders
 - pathophysiology
 - Pharmacology
 - diagnostic procedures
 - Nursing management
5. Principles of habilitation and rehabilitation
6. Indicative Case Histories:
 - disability - Intellectual disability
 - Endocrine - diabetes mellitus, thyroid disorders
 - neurological - Epilepsy, cerebral palsy, Parkinson's disease, multiple Sclerosis, dementia ? Issues of habilitation and rehabilitation
 - Respiratory? aged person with chronic illness- chronic obstructive pulmonary disease

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Online Quiz - 20 multiple choice questions	30 minutes	10	N	Individual

NURS 2014 Health Variations 2 Advanced - Chronic Illness and Disability

Credit Points 10

Legacy Code 401215

Coordinator Kate O'Reilly ([https://directory.westernsydney.edu.au/search/name/Kate O'Reilly/](https://directory.westernsydney.edu.au/search/name/Kate%20O'Reilly/))

Description This unit encourages critical analysis to explore the concepts of chronicity, disability, habilitation and rehabilitation in relation to chronic conditions, functional and intellectual disabilities and their implications for nursing practice. National Health Priority Case Studies drawn from across the lifespan will provide a focus for exploring pathophysiology, pharmacological interventions and nursing care related to chronic conditions of the endocrine, neurological and respiratory body systems. In addition, a problem-solving nursing approach will be developed for supporting those with physical and intellectual disability.

School Nursing & Midwifery

Discipline Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects NURS 2012 Health Variations 2 (Advanced)

Restrictions Students must be enrolled in 4693 Bachelor of Nursing (Advanced).

Assumed Knowledge

Primary health care, foundational knowledge of human biological sciences including human body systems, basic concepts in

pharmacology and pathophysiology and the National Health Priorities and the relationship to nursing practice.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the causes, pathogenesis, clinical manifestations and diagnostic procedures for common chronic illnesses related to the endocrine, neurological and respiratory body systems.
2. Appraise safe, appropriate and responsive quality nursing practices related to the administration of pharmacological interventions for chronic conditions affecting the endocrine, neurological and respiratory body systems.
3. Explain evidence-based rationales and problem-solve nursing strategies used to manage chronic illness.
4. Critically discuss the impact of chronic illness on the individual, family, caregivers and health care system.
5. Critique the principles of habilitation, rehabilitation, chronicity and disability and implications for nursing practice.
6. Access and evaluate data relevant to provision of effective nursing management of people across the lifespan who are experiencing chronic illness or disability.
7. Understand the principles and practices of Primary Health Care in their application to the provision of health care of people experiencing chronic illness and/or disability.

Subject Content

1. Concepts of chronic illness, disability and co-morbidity
2. The International Classification of Functioning, Disability and Health (ICF) and the relationship to primary health care
3. Knowledge and application of the following concepts to inform professional nursing practice related to chronic conditions and disability affecting the endocrine, neurological and respiratory body systems:
 - a. Pathophysiology
 - b. Pharmacology
 - c. Diagnostic procedures
 - d. Nursing management
4. Principles of care related to chronicity and disability
5. Principles and practices of Primary Health Care related to chronicity and disability
6. Communication principles related to chronicity and disability
7. Principles of habilitation and rehabilitation
8. Advanced academic and professional presentation development
9. Indicative Case Histories
 - disability ? Intellectual disability
 - Endocrine ? diabetes mellitus, thyroid disorders
 - neurological ? Epilepsy, cerebral palsy, Parkinson's disease, multiple Sclerosis, dementia
 - Respiratory ? chronic obstructive pulmonary disease

Assessment

NURS 2016 Health Variations 3 - Acute Exacerbations of Chronic Conditions

Credit Points 10

Legacy Code 401210

Coordinator Asiye Kopan ([https://directory.westernsydney.edu.au/search/name/Asiye Kopan/](https://directory.westernsydney.edu.au/search/name/Asiye%20Kopan/))

Description Health Variations 3 - Acute Exacerbations of Chronic Conditions utilises an evidence base to develop an understanding of pathophysiology, pharmacological interventions, and nursing care for people who experience acute exacerbations of chronic conditions.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Co-requisite(s) NURS 2037 - Health Variations 1 - Introduction to Alterations in Health

Restrictions

Students must be enrolled in 4691 Bachelor of Nursing or 4780 Bachelor of Nursing – WSU Online or 4693 Bachelor of Nursing (Advanced) or 4692 Bachelor of Nursing (Graduate Entry)

Assumed Knowledge

Primary health care, foundational knowledge of human biological sciences including human body systems, basic concepts in pharmacology and pathophysiology and the National Health Priorities and the relationship to nursing practice.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the causes, pathogenesis, clinical manifestations, and diagnostic procedures concerning acute exacerbations of chronic conditions.
2. Develop an understanding of the National Safety and Quality Care framework and the implications for nursing practice in relation to caring for people who experience an acute exacerbation of a chronic condition.
3. Justify the selection and prioritisation of nursing strategies to provide safe effective and evidence based nursing care for people who experience an acute exacerbation of a chronic condition.
4. Assess appropriate, safe, effective, and evidence-based treatments for people who experience an acute exacerbation of a chronic condition.

Subject Content

- Knowledge and application of the following concepts to inform professional nursing practice related to acute exacerbations of chronic conditions affecting the cardiovascular, renal, musculoskeletal, and respiratory systems.
 - a. Pathophysiology & Clinical Manifestations
 - b. Pharmacology
 - c. Diagnosis
 - Evidence-based management including prioritisation of nursing actions by accessing and analysing the best available evidence, that includes research findings, for safe, quality practice
 - Alterations to the cardiovascular system, Introduction to alterations in the cardiovascular system
 - Alterations to Renal System
 - Alterations to the Haematological System

- Alterations to the Pulmonary system, oxygen use in adults in acute care (ACI), nursing management of acute respiratory failure
- Application of the National and Safety and Quality Health Service Standards
- Comprehensive Care Standard minimising patient harm (incorporates pressure injuries, delirium, nutrition & hydration, and minimising restraint)
- Preventing & Controlling Infection

NURS 2018 Legal and Ethical Issues in Midwifery

Credit Points 10

Legacy Code 401037

Coordinator Carole Doyle ([https://directory.westernsydney.edu.au/search/name/Carole Doyle/](https://directory.westernsydney.edu.au/search/name/Carole%20Doyle/))

Description This unit explores responsibilities related to the nature and professional context of midwifery. It focuses on developing students understanding of legal and ethical issues and the midwives obligation to work within ethical and legal frameworks for safe practice. The legal and ethical roles and functions of the midwife and their relationship to others are considered in terms of expected standard, responsibilities, accountabilities and scope of practice within the regulatory framework. It will provide an opportunity for students to explore and discuss ethical issues related to midwifery, reproductive and maternal health.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions Students must be enrolled in 4684 Bachelor of Midwifery.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the discipline of midwifery and the context of professional practice within the relevant legal and ethical frameworks.
2. Describe the expected standards of practice for the midwife.
3. Discuss the legal and ethical responsibilities of the midwife.
4. Discuss ethical and legal issues related to reproduction and the practice of midwifery.
5. Explain the legal requirements and ethical considerations around collaborative health care relationships between midwives and others.
6. Critically reflect and discuss the professional, media and public image of midwifery.

Subject Content

1. Legislation Governing Professional Practice
 - Health Practitioner Regulation National Law Act 2009
 - Health Care Complaints Act 1993
 - Children and Young Persons (Care and Protection) Act 1998 No 157
 - child protection responsibilities including Keep them Safe policy guidelines
 - The coroners court
 - Legal requirements for: Termination of pregnancy -1st and 2nd trimester, Miscarriage /Stillbirths /Neonatal deaths, Sudden Infant Death Syndrome (SIDS), Maternal deaths
2. Regulatory Framework
 - Australian health practitioner regulation agency
 - Australian Nursing and Midwifery Council
 - midwife Standards for practice
 - international Code of ethics for Midwives
 - Code of conduct for Midwives in Australia
 - Midwifery practice decision flow chart.
3. Professional Framework
 - Australian College of Midwives; National Midwifery Guidelines for Consultation and Referral, Role of the consumer
4. Discipline of Midwifery
 - Roles, functions and competencies; boundaries of practice, legal issues, philosophical underpinnings of ethics, ethical issues, collaborative health care and midwifery practice, public image of midwifery, critical reflection.
 - Ethical issues in Midwifery; introduction to ethics (what is ethics how does it differ from law), philosophical underpinnings of ethics, human rights/ rights to and in healthcare, ethical issues related to reproduction, whistleblowing, conscientious obj
5. Using Research to Inform Practice
 - research ethics

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Coordinator Elaine Burns ([https://directory.westernsydney.edu.au/search/name/Elaine Burns/](https://directory.westernsydney.edu.au/search/name/Elaine%20Burns/))

Description This unit provides students with the midwifery knowledge related to the postnatal period. It will focus on maternal postnatal and newborn care including infant feeding, bonding and attachment. Breastfeeding is a core maternity indicator and is a focus for improving public health. Midwifery skills and knowledge to assist women in the preparation, initiation and establishment of breastfeeding will be examined as well as the historical and social contexts of infant feeding and challenges that this and other problems may pose for women. The midwives role in supporting women who are breastfeeding is addressed including the need to offer consistent evidence-based information.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) NURS 1010

Co-requisite(s) NURS 2025

Restrictions Students must be enrolled in 4684 Bachelor of Midwifery.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the role of the midwife in the provision of care to the woman, her baby and family during the first four to six postnatal weeks using a Primary Health Care framework.
2. Discuss the role of the midwife in supporting the transition to parenthood including social, emotional and mental health.
3. Analyse the basic needs and assessment of the newborn including nutritional requirements and growth and development during their first six weeks of life.
4. Describe the evidence for breastfeeding and the role of the midwife in supporting the woman to breastfeed.
5. Discuss the role of the midwife in supporting women who are experiencing challenges breastfeeding and women who are not breastfeeding.
6. Critically analyse the historical and social contexts of infant feeding and reflect on the challenges that this and other problems pose for women and midwives.
7. Discuss the history and current programme of immunisation for infants and options for informed choices.
8. Examine cultural practices related to the postpartum period.

Subject Content

1. Midwifery care and the Postnatal Well Woman
 - Understanding The transition to parenthood for both mothers and fathers
 - supporting The social, emotional and mental health needs of The mother transitioning to motherhood
 - Postnatal care in A primary health care framework
 - cultural practices in The Postnatal period
 - Sociocultural history of breastfeeding
 - supporting women who are breastfeeding
 - Benefits of breastfeeding
 - Nutritional requirements for breastfeeding
 - communication around infant feeding
 - common challenges related to breastfeeding
 - supporting women experiencing challenges including expressing breastmilk
 - supporting women who are not breastfeeding
 - common medications used in The Postnatal period especially in relation to breastfeeding
 - newborn growth and development and Nutritional requirements
 - newborn Screening tests eg SWISH NBST
 - newborn needs including Maternal/infant attachment
 - Fertility and family planning
 - Immunisation program and informed decision making
 - providing culturally Safe maternity care for Aboriginal and Torres Strait Islander women in Urban, rural and Remote settings
 - Working in partnership and concluding The professional relationship
 - family adaptation support services and networks including transition of care to child and family health services
 - Safe sleeping
 - current controversial Topics in The Postnatal period

Assessment

NURS 2025 Midwifery Professional Practice 3

Credit Points 10

Legacy Code 401221

Coordinator Kye Porritt ([https://directory.westernsydney.edu.au/search/name/Kye Porritt/](https://directory.westernsydney.edu.au/search/name/Kye%20Porritt/))

Description In this unit students will learn the necessary midwifery skills for the provision of woman centred post birth care. In a simulated practice environment students will gain practical skills to provide midwifery care to both the woman and her baby up until six weeks postpartum. The importance of effective communication and documentation will also be reinforced. This unit will also include blocks of practical experience in designated clinical areas and the provision of continuity of care.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) NURS 1013 AND NURS 1004

Co-requisite(s) NURS 2022

Equivalent Subjects NURS 2023 Midwifery Practice Experience 3

Restrictions Students must be enrolled in 4684 Bachelor of Midwifery.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Provide evidence based woman centred care during the postnatal period including routine postnatal screening tests and correct documentation.
2. Communicate infant feeding support appropriately.
3. Undertake postnatal assessments of well women including planning and performing a discharge.
4. Undertake comprehensive assessments and provide safe care of the newborn and document the findings.
5. Discuss a variety of options for optimal breastfeeding positioning and attachment, and for supporting women experiencing difficulties with breastfeeding.

6. Perform and demonstrate to others the safe preparation of, and feeding of, artificial formula.
7. Demonstrate principles of safe medication administration and perform IM and SC injections.
8. Manage and monitor the use of IV infusions.
9. Provide appropriate postoperative care in the maternity context.
10. Fulfil professional midwifery practice requirements including continuity of care.

Subject Content

1. Appropriate communication
 - woman led
 - Attentive listening
 - open ended questioning
 - suggestions and options
 - strengths based feedback
 - Communications skills for completing The professional Midwifery relationship
2. Professional practice requirements
 - documentation in accordance with professional and Legislative requirements
 - policy and procedure guidelines
 - informed consent
 - Privacy Issues
 - Confidentiality
 - infection control
 - medication calculations
3. Midwifery Practice (Postbirth)
 - A. Day 0-6 Maternal postnatal assessment
 - using open and respectful communication
 - provide An opportunity for The woman to discuss her birth experience
 - Assess; the womans emotional needs, comfort, involution, blood loss, wound integrity (if applicable), nutritional intake and hydration, elimination, breasts and breastfeeding, infant feeding support needs, including safe preparation of formula when nec
 - care of The woman Pre and post operatively
 - pressure bandages/ removal of sutures/staples
 - Urinary catheterisation
 - promote and support hygiene needs
 - Administer Intramuscular and subcutaneous injections
 - blood glucose testing
 - commencement and maintenance of IV therapy
 - fluid Balance
 - include and involve The womans significant others
 - B. Day 0-6 newborn postnatal assessment
 - using open respectful communication with The family assess newborn: colour- Jaundice, temperature, respirations, heart rate and heart sounds, saturations, hydration, elimination, sleep/wake cycle
 - C. Collection of Newborn screening test
 - blood glucose Monitoring in The neonate
 - IMI and SC injections for newborns, including Calculation of dose
 - D. Week 1-6 Postnatal assessment mother and infant
 - All of the above plus; maternal adjustment, infant growth and weight gain, infant developmental milestones, parental concerns
4. Education, discharge and referral
 - Safe infant care- bathing, nappy changing, SIDs information
 - breastfeeding challenges- eg. nipple pain, The use of nipple shields and/ or breastmilk expression (as appropriate)
 - concerns about infant growth
 - infant settling and sleeping
 - information regarding formal and informal support options (community, peer and health professional options)
 - Discharge Assessment - Woman; comprehensive physical assessment, assessment of ongoing support needs, evidence based

information regarding contraceptive options, consideration of domestic violence screening tool, perinatal mental health

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

Credit Points 10

Legacy Code 401222

Coordinator Michelle Eveleigh ([https://directory.westernsydney.edu.au/search/name/Michelle Eveleigh/](https://directory.westernsydney.edu.au/search/name/Michelle%20Eveleigh/))

Description In this unit students will develop the necessary skills to provide midwifery care to women and neonates with complex health needs. In lab based simulation environments students will gain confidence in providing midwifery care following the detection

of deviations from normal. Students will gain practical experience in designated clinical areas and will follow women through pregnancy, birth and the postnatal period in a continuity of care experience.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) NURS 2025 AND NURS 2022

Co-requisite(s) NURS 2004

Equivalent Subjects NURS 2024 Midwifery Practice Experience 3

Restrictions Students must be enrolled in 4684 Bachelor of Midwifery.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Communicate effectively with women who have complex health needs.
2. Recognise and respond appropriately to variations in maternal or infant vital signs.
3. Use and interpret cardiocographs (CTG♦fs).
4. Identify, assess and provide safe care for a woman experiencing a complex pregnancy, labour and birth or puerperium.
5. Recognise and respond to abnormal pathology.
6. Fulfil professional midwifery practice requirements including continuity of care.
7. Identify, assess and provide safe care for a baby with complex needs.
8. Identify medications used in complex maternal and neonatal care and safely administer IV medications .

Subject Content

1. Communication
 - communication skills for Working with women who have complex health needs and who require Additional procedures
 - documentation requirements
 - adherence to policy and Legislation
 - Escalation procedure following The detection of deviations from normal
2. Professional practice requirements
 - documentation in accordance with professional and Legislative requirements
 - policy and procedure guidelines
 - informed consent
 - Privacy Issues
 - Confidentiality
 - infection control
 - medication calculations
 - Competency development
3. Midwifery skills for complex pregnancy and birth
 - diabetes management
 - Oxygen therapy and care of The woman following surgery
 - haemodynamics (revision of A-G assessment)
 - Oxygen saturation Monitoring
 - appropriate use of automated mechanical blood pressure Monitoring
 - interpretation of laboratory findings
 - preparation for surgery
4. Labour and birth
 - Abdominal palpation for multiple Pregnancy

- procedure for insertion of and use of prostaglandins and mechanical ripening
 - procedure for The titration of IVI insulin
 - Administer IV medications
 - assessment of meconium staining
 - care of The woman having Epidural pain Relief (including removal of Epidural catheter)
 - management of haemorrhage ? antepartum, intrapartum and postpartum
 - fetal Monitoring in Pregnancy and labour
 - appropriate interpretation of normal and abnormal CTG
 - labour and birth for multiple pregnancies
 - mechanisms of birth for Malpresentations
 - management of A woman having A seizure
 - use of narcotics in labour
5. Newborn
- Receiving The newborn at caesarean section
 - saturation Monitoring
 - observation of newborns following birth Trauma
 - care of The Baby Receiving Oxygen therapy
 - care of The unwell Baby
 - insertion of A nasogastric tube
 - care of A Baby Receiving phototherapy
 - NAS observation

Assumed Knowledge

Foundational knowledge of primary health care, professional communication, roles and responsibilities of registered nurse and human biological and behavioural sciences.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the principles of safe medication administration in clinical scenarios in a simulated and clinical learning environment
2. Maintain accurate, comprehensive, and timely documentation of assessments and nursing care plans
3. Communicate effectively within interprofessional teams in a clinical scenario
4. Use a range of assessment techniques to systematically collect relevant and accurate information and data to inform practice
5. Perform safe medication administration, with a focus of non-parenteral and parenteral medications, for people who are experiencing acute but usually resolvable conditions in a simulated and clinical learning environment
6. Practise in accordance with legislation, regulations, policies, guidelines and other relevant standards or requirements in nursing

Subject Content

1. Principles of nursing frameworks
2. The experience of pain and pain management during the perioperative period
3. Assessment, admission procedures and the Nursing History
4. Accesses and analyses the best available evidence, for safe, quality practice
5. Recognising and Responding to Variations in Health Status Bowel Cancer, Fractures, Crohn's disease
6. Ulcerative colitis, Breast cancer
7. Perioperative and post-operative care
8. Fluid Balance & Fluid replacement

9. Numeracy – medication calculations
10. Working in multi-disciplinary teams
11. Health informatics and health technology – electronic charting
12. Application of legal-ethical principles
13. Family focused care
14. Clinical Practicum

Restrictions

Students must be enrolled in 4691 Bachelor of Nursing, 4780 Bachelor of Nursing - WSU Online . or 4693 Bachelor of Nursing (Advanced) or 4692 Bachelor of Nursing (Graduate Entry)

Assumed Knowledge

Foundational knowledge of primary health care, professional communication, roles and responsibilities of the registered nurse, perioperative nursing, and human biological and behavioural sciences.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the principles of safe medication administration in complex clinical scenarios in a simulated and clinical learning environment.
2. Evaluate nursing care plans by monitoring progress towards the expected goals and health outcomes.
3. Plan and negotiate how practice will be evaluated and the time frame of engagement
4. Utilise an evidence-based approach to assessment, planning, implementation, and evaluation of nursing care in a simulated and clinical learning environment.
5. Perform safe medication administration, with a focus of non-parenteral and parenteral medications, for people experiencing an acute exacerbation of a chronic condition or illness in a simulated and clinical learning environment.
6. Practise in accordance with legislation, regulations, policies, guidelines and other relevant standards or requirements in nursing.

Subject Content

1. Preventing and Controlling Healthcare Associated Infections
2. Medication Safety
3. Patient Identification and Procedure Matching
4. Clinical Handover (include ISBAR communication tool)
5. Blood and Blood Products
6. Preventing and managing pressure injuries
7. Preventing falls and harm from falls
8. Assessment, admission procedures and the nursing history
9. Documentation - progress, incidents, escalation, patient safety checklist
10. Recognising and Responding to Variations in Health Status (A to G assessment)
11. Recognising abnormal pathology results
12. Nursing care and management
13. Working in multi-disciplinary teams
14. Clinical practicum
15. Accesses and analyses the best available evidence, that includes research findings, for safe, quality practice

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance ([https://](https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance)

www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/

Essential equipment

Access to an internet enabled device is essential in order to be able to: access course materials; to participate in discussion groups; and to access additional resources provided by the lecturer during the session. See http://www.westernsydney.edu.au/currentstudents/current_students/services_and_facilities/uwsonline_student_support (http://www.westernsydney.edu.au/currentstudents/current_students/services_and_facilities/uwsonline_student_support/) for further information.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Professional Task	30 mins	S/U	Y	Individual
Professional Task	10 mins	S/U	Y	Individual
Practical Exam	25 mins	S/U	Y	Individual
Participation	All teaching weeks	S/U	Y	Individual
Professional Placement Performance	160 hours	S/U	Y	Individual

NURS 2031 Promoting Mental Health and Wellbeing 1

Credit Points 10

Legacy Code 401013

Coordinator Diana Jefferies ([https://directory.westernsydney.edu.au/search/name/Diana Jefferies/](https://directory.westernsydney.edu.au/search/name/Diana%20Jefferies/))

Description This unit introduces students to the care of individuals with mental health concerns and/or illness. The national mental health policies provide a framework to focus on a range of determinants and consequences of mental health and illness in Australia. The principles of stress vulnerability and recovery will be introduced. The unit will offer an introduction for students to caring for individuals with depression, anxiety and substance use, and their families/significant others. The concepts of therapeutic use of self and reflection when engaging with people with mental health needs will be introduced. Students will develop their knowledge of mental health assessment, risk assessment and risk management across the lifespan. Self-care strategies in everyday collaborative nursing and midwifery practice will be considered.

School Nursing & Midwifery

Discipline Mental Health Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects NURS 2021 - Mental Health Nursing 1

Restrictions Students must be enrolled in 4691 Bachelor of Nursing, 4693 Bachelor of Nursing (Advanced), 4692 Bachelor of Nursing (Graduate Entry) or 4684 Bachelor of Midwifery or 4780 Bachelor of Nursing - WSU Online. Students must be enrolled in 4780 to enrol in WSU Online Campus subjects.

Assumed Knowledge

Primary health care, professional communication, foundational concepts in human behavioural science and their application to nursing or midwifery practice, roles and responsibilities of registered nurse or midwife.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply primary health care principles in the promotion of mental health & wellbeing in diverse settings.
2. Distinguish the mental health priorities in relation to meeting the needs of individuals and their families/significant others in the community.
3. Relate the principles of stress, mental health assessment, risk assessment and management in promoting mental health and wellbeing.
4. Explain the principles and skills of therapeutic communication and interventions related to caring for people experiencing alterations in thought, behaviour, and mood.
5. Apply ethico-legal implications in relation to the care of people with mental health concerns and/or illnesses
6. Develop an understanding of the lived experiences and recovery for individuals with mental health concerns and/or illnesses.

Subject Content

1. Primary health care approach to promoting mental health and wellbeing across the lifespan for individuals and their families/significant others
2. Using therapeutic communication skills and therapeutic use of self to promote support, hope and recovery
3. An introduction to the theoretical framework of a stress vulnerability model
4. An introduction to problem-solving principles related to the application of mental health assessment, risk assessment, harm minimisation and risk management for individuals and others
5. Trauma informed care
6. Trauma informed care
 - family focused care
 - psychosocial interventions
 - psychopharmacology
 - Electroconvulsive therapy (ECT)
7. Introduction to ethical and legal considerations related to the care of individuals with mental health concerns and/or illnesses
8. Case study ? Aged person with dementia and agitation
9. Case study - Aboriginal and Torres Strait Islander person with substance use/misuse issues
10. Case study - related to perinatal mental health

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Video Assessment	10 minutes	40	N	Individual
Participation Tasks	30 minutes	10	N	Individual
Final Exam - Online	1 hour	50	N	Individual

Prescribed Texts

Teaching Periods

NURS 2034 Research for Nursing (Advanced)

Credit Points 10

Legacy Code 401214

Coordinator Rebecca O'Reilly ([https://directory.westernsydney.edu.au/search/name/Rebecca O'Reilly/](https://directory.westernsydney.edu.au/search/name/Rebecca%20O'Reilly/))

Description This unit introduces students to the major research paradigms, research principles, concepts that inform critical analysis of literature, the basis of evidence based practice and oral presentation skills.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects NURS 2032 Research Principles for Nursing (Advanced)

Restrictions Students must be enrolled in 4693 Bachelor of Nursing (Advanced).

Assumed Knowledge

Professional communication skills and well developed academic literacy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the ways of knowing and the relationship to nursing knowledge and practice.
2. Discuss the major research paradigms, principles, concepts and processes that inform nursing knowledge and practice.
3. Evaluate the ethical considerations that must be incorporated by nurse researchers.

- Analyse and evaluate literature that may then be utilised as a basis for evidence-based nursing practice.
- Discuss how research findings are translated into nursing practice.

Subject Content

- Ways of knowing and their relationship to nursing knowledge and practice
- Major paradigms that inform the research process in nursing.
- Quantitative research processes and issues for nurses.
- Qualitative research processes and issues for nurses.
- Mixed methods research processes and issues for nurses.
- Ethical considerations for nursing research.
- Critical analysis and evaluation as the basis for utilisation of research in nursing practice.
- Advanced scholarship and professional presentation development

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Critical Review	2000 words	50	N	Individual
Quiz	Part A: Weekly Participation Task: 7 days (20%) Part B: 30 Multiple Choice questions: 60 minutes (10%)	30	N	Individual
Presentation	10 mins	20	N	Individual
Learning Contract	Minimum 8 hours	S/U	Y	Individual

NURS 2036 Evidence-Based Practice for Nursing and Midwifery

Credit Points 10

Legacy Code 401449

Coordinator Jann Foster ([https://directory.westernsydney.edu.au/search/name/Jann Foster/](https://directory.westernsydney.edu.au/search/name/Jann%20Foster/))

Description Evidence-Based Practice for Nursing and Midwifery is designed to develop students' knowledge in accessing and making judgements to translate the best available evidence, which includes the most current, valid, and available research findings into practice. General concepts associated with evidence-based health care are explored including conducting literature searches from a wide range of sources, reviewing and appraising research and other evidence, using and translating research into practice.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects NURS 2033 - Research Principles for Nursing and Midwifery NURS 2035 - Research for Nursing and Midwifery

Restrictions

Students must be enrolled in 4691 Bachelor of Nursing, 4780 Bachelor of Nursing – WSU Online or 4684 Bachelor of Midwifery. or 4693 Bachelor of Nursing (Advanced) or 4692 Bachelor of Nursing (Graduate Entry),

Assumed Knowledge

Professional communication and the roles and responsibilities of registered nurse or midwife.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the major research paradigms, principles and concepts that inform nursing and midwifery knowledge and practice.
2. Conduct literature searches from a wide range of sources to support safe and appropriate nursing and midwifery care
3. Evaluate research and other evidence to support evidence-based decision making for practice
4. Discuss the processes of translating research and other evidence into practice including identifying emerging trends in contemporary best practice evaluates information to support
5. Explain strategies on how to contribute to quality improvement and relevant research as a health care professional

Subject Content

1. Research approaches, methods, and designs (Quantitative and Qualitative)
2. Ethical considerations related to nursing and midwifery research.
3. Identify different research literature sources
4. Levels of evidence
5. Appraising the research
6. Synthesizing and appraising the evidence - Systematic reviews
7. Translation of evidence into practice

8. Clinical practice guideline, policies, models of care
9. Sustainable impact
10. Process of implementation of evidence for maintaining sustainable

Assessment

NURS 2037 Health Variations 1 - Introduction to Alterations in Health

Credit Points 10

Legacy Code 401455

Coordinator Bronwyn Smith ([https://directory.westernsydney.edu.au/search/name/Bronwyn Smith/](https://directory.westernsydney.edu.au/search/name/Bronwyn%20Smith/))

Description Health Variations 1 utilises an evidence base to develop an understanding of pathophysiology, pharmacological interventions, and nursing care of people across the lifespan who are experiencing acute but usually resolvable alterations in health. A particular focus of this unit are the Australian National Health Priority Areas.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) NURS 1023 - Bioscience 1
NURS 1024 - Bioscience 2

Equivalent Subjects NURS 2010 - Health Variations 1 - Perioperative

Restrictions

Must be enrolled in 4691 Bachelor of Nursing or 4780 Bachelor of Nursing – WSU Online or 4693 Bachelor of Nursing (Advanced) or 4692 Bachelor of Nursing (Graduate Entry)

Assumed Knowledge

Primary health care, foundational knowledge of human biological sciences including human body systems, immunity, wound healing, infection control, basic concepts in pharmacology and pathophysiology and the relationship to nursing practice.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise and respond appropriately to physiological changes associated with alterations in health of people across the lifespan.
2. Utilise evidence to support decision making for safe, person-centred care.

3. Explain the role of the nurse when caring for a person during the perioperative period.
4. Justify the selection and prioritisation of nursing care with a person experiencing an alteration in health.
5. Explain safe and effective use of pharmacological and non-pharmacological interventions with a person experiencing an alteration in health.
6. Discuss the Australian National Health Priority Areas as they relate to person centred care.

Subject Content

1. Pathophysiology and pharmacology related to:
 - a. gastrointestinal,
 - b. musculoskeletal
 - c. reproductive systems
 - d. injury prevention and control
2. National Safety and Health Priority areas:
 - a. Injury Prevention and Control
 - b. Arthritis and Musculoskeletal Conditions
 - c. Cancer Control
3. Principles of nursing care related to:
 - a. NMBA Registered Nurse standards for practice
 - b. Best Practice Guidelines
 - c. Hospital policies and procedures
 - d. Diversity, culture, inclusion, and cultural safety for all people
 - e. Accesses and analyses the best available evidence, that includes research findings, for safe, quality practice
4. Factors influencing nursing care in the pre and post-operative period:
 - a. Deterioration
 - b. Complications
 - c. Signs and symptoms
5. National Safety and Quality Health Service Standards related to perioperative nursing care
6. Pharmacology in the pre and postoperative period:
 - a. Analgesics
 - b. Antibiotics
 - c. Anti-inflammatory agents
 - d. Specific condition related treatments
7. Non-pharmacological comfort measures

Special Requirements

NURS 2038 Health Variations 2 - Chronic Conditions and Disability

Credit Points 10

Legacy Code 401444

Coordinator Anne Marks ([https://directory.westernsydney.edu.au/search/name/Anne Marks/](https://directory.westernsydney.edu.au/search/name/Anne%20Marks/))

Description Health Variations 2 - Chronic Conditions and Disability utilises an evidence base to develop an understanding of pathophysiology, pharmacological interventions, and nursing care for people across the lifespan who experience chronic conditions and disability.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Co-requisite(s) NURS 2037 - Health Variations 1 - Introduction to Alterations in Health

Equivalent Subjects NURS 2013 - Health Variations 2 - Chronic Illness and Disability

Restrictions

Students must be enrolled in 4691 Bachelor of Nursing or 4780 Bachelor of Nursing – WSU Online. or 4693 Bachelor of Nursing (Advanced) or 4692 Bachelor of Nursing (Graduate Entry)

Assumed Knowledge

Primary health care, foundational knowledge of human biological sciences including human body systems, basic concepts in pharmacology and pathophysiology and the National Health Priorities and the relationship to nursing practice

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the causes, pathophysiology, clinical manifestations, and diagnostic procedures related to common chronic conditions
2. Identify the National Safety and Quality Care framework to plan appropriate, safe, effective, and evidence-based treatments when caring for people with common chronic conditions or persons with a disability.
3. Access and analyse the best available evidence, that includes research findings, related to common chronic conditions.
4. Describe strategies that promote a shared decision-making process in collaboration with carers, families, and people with common chronic conditions or disability
5. Develop evidence-based rationales for safe, person-centred care of people with chronic conditions or persons with a disability.

Subject Content

1. Knowledge and application of the following concepts to inform professional nursing practice related to chronic conditions and disability affecting the endocrine, neurological and respiratory body systems:

- a. Cause: Risk factors
- b. Clinical manifestations

- c. Diagnosis
- d. Pathophysiology
- e. Treatment: Pharmacological and non-pharmacological
- f. Nursing role and responsibilities: evidenced based practice by accessing and analysing the best available evidence, that includes research findings, for safe, quality practice

2. Concepts and principles of care related to chronicity and disability

- a. Rehabilitation and habilitation
- b. Person-centred care
- c. Shared decision-making

Special Requirements

Essential equipment

Essential Equipment: Access to an internet enabled device is essential in order to be able to: access course materials; to participate in discussion groups; and to access additional resources provided by the lecturer during the session. NURS 2039 Indigenous Australian Health, Wellness and Culture

Credit Points 10

Legacy Code 401454

Coordinator Liz Flannery ([https://directory.westernsydney.edu.au/search/name/Liz Flannery/](https://directory.westernsydney.edu.au/search/name/Liz%20Flannery/))

Description Indigenous Australian Health, Wellness and Culture unit will specifically enable nursing and midwifery students to investigate, discuss and develop an understanding of Aboriginal and Torres Strait Islander health, health statistics, historical and present-day issues associated with poor health outcomes in Aboriginal and Torres Strait Islander people. The concepts of cultural safety, health and illness will be discussed in terms of Aboriginal and Torres Strait Islander people. Students will explore and reflect on the impact of the different attitudes, institutional policies and value systems relating to the health of Aboriginal and Torres Strait Islander people in Australia.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects NURS 2001 - Aboriginal and Torres Strait Islander Health

Restrictions Students must be enrolled in 4691 - Bachelor of Nursing, 4780 - Bachelor of Nursing ? WSU Online or 4684 - Bachelor of Midwifery.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify Aboriginal health as not just physical wellbeing of an individual but refers to the social, emotional, and cultural wellbeing of the whole community
2. Identify the role of family and community that underpin the health of Aboriginal and Torres Strait Islander peoples
3. Reflect on how colonisation has impacted the contemporary health situation of Aboriginal and Torres Strait Islander peoples
4. Compare current demographic, health indicators and statistical trends for Aboriginal and Torres Strait Islander peoples with non-Indigenous peoples in Australia

- Critique strategies to deliver culturally safe health care to Aboriginal and Torres Strait Islander clients from a strengths-based approach
- Appraise the role of nurses and/or midwives in achieving culturally safe health care for and with Aboriginal and Torres Strait Islander people

Subject Content

Examine the culture of nursing and midwifery, along with the broader health system, in terms of their impact on Aboriginal and Torres Strait Islander health service experiences.

Describe the historical development of Aboriginal and Torres Strait Islander community-controlled health services and health sector initiatives.

Analyse the contemporary role of Aboriginal and Torres Strait Islander health professionals, organisations, and communities in delivering culturally safe health care to Aboriginal and Torres Strait Islander clients from a strengths-based approach.

1. Meaning of health and illness

- values, belief systems, attitudes, bias, cultural safety, and practices in The care of Aboriginal and Torres Strait Islander communities

- definitions of culture from The perspectives of Aboriginal and Torres Strait Islander people

- health and status of Aboriginal and Torres Strait Islander people

2. Social determinants of health in Aboriginal and Torres Strait Islander communities

- cultural isolation

- Poverty

- discrimination ? social and institutional

- historical events and health care policies - relate The impact It has had on Aboriginal and Torres Strait Islander peoples

3. Health care policies and service provision ? Bridging the gap

4. Ethical care in Aboriginal and Torres Strait Islander populations

- Models, theories, and cultural care

- NMBA Standards for registered Nurse practice

5. Relate the importance of culturally appropriate care and service provision for Aboriginal and Torres Strait Islander People

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	30 minutes each x 2	20	N	Individual
Reflection	1000 words	35	N	Individual
Portfolio	1000 words	45	N	Individual

Teaching Periods

NURS 2040 Pharmacology in Nursing

Credit Points 10

Legacy Code 401450

Coordinator Jacqueline Rojo ([https://directory.westernsydney.edu.au/search/name/Jacqueline Rojo/](https://directory.westernsydney.edu.au/search/name/Jacqueline%20Rojo/))

Description It is imperative that registered nurses have a solid understanding of pharmacology. This subject introduces principles and core concepts of pharmacology with a distinct emphasis on safe

medication administration in nursing. Students will acquire knowledge of pharmacokinetics and pharmacodynamics and systematically develop an understanding of actions and reactions of commonly prescribed drugs to individual people across the lifespan. Electronic medication management systems, patient education and engagement in medication management are addressed in this subject.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Co-requisite(s) NURS 2036

Restrictions

Students must be enrolled in 4691 Bachelor of Nursing, 4692 Bachelor of Nursing (Graduate Entry), 4780 Bachelor of Nursing - WSU Online.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Identify the principles and core concepts of pharmacokinetics and pharmacodynamics
- Describe the mechanisms of actions and reactions of commonly prescribed drugs to individual people across the lifespan
- Appraise up-to-date evidence, best practice guidelines and recommended evidence for drug therapies
- Apply knowledge of state and territory legislation and health service policies for medication prescription, storage, use and administration
- Reflect on safe administration of medication

Subject Content

1. Principles of pharmacology

a. Pharmacokinetics

b. Pharmacodynamics

c. Variability of drug action and reactions to people across lifespan

d. Individual differences

2. Commonly prescribed drugs

a. Anti-infective and anti-allergic agents (antimicrobials, antivirals, antiparasitics, antifungals, and vaccines; anti-histamines and immunosuppressants)

b. Analgesics (opioids, non-opioids and non-steroidal anti-inflammatory drugs)

c. Drugs for gastrointestinal disorders (anti-emetics, laxatives, anti-diarrhoeal agents, vitamin supplements)

d. Drugs for cardiovascular disorders (anti-hypertensives, anti-angina drugs, lipid-lowering agents, anticoagulants, antiplatelets, thrombolytics, drugs for heart failure and antidysrhythmic agents)

e. Drugs for respiratory disorders (drugs for rhinitis, asthma and chronic obstructive pulmonary disease)

f. Drugs modifying endocrine system (birth control pills, anti-diabetic agents, drugs for thyroid disorders)

g. Anxiolytics and hypnotics

3. Nursing considerations for quality use and administration of medicines

a. Psycho-socio-cultural aspects of pharmacotherapeutics

b. Medication safety and reporting medication incidents including adverse drug reactions, medication errors and near misses

c. Interprofessional and intraprofessional communication related to safe medication management and practices

d. Electronic medication management systems

- e. Medication adherence including legislative and organisational requirements for storage, use and administration
- f. Patient education and engagement in medication management

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	30 minutes x 2	30	N	Individual
Portfolio	1000 words or equivalent	30	N	Individual
Viva Voce	20 minutes	40	Y	Individual

NURS 2041 Promoting Mental Health and Wellbeing

Credit Points 10

Legacy Code 401451

Coordinator Aileen Pamonag Lane ([https://directory.westernsydney.edu.au/search/name/Aileen Pamonag Lane/](https://directory.westernsydney.edu.au/search/name/Aileen%20Pamonag%20Lane/))

Description Promoting Mental Health and Wellbeing develops mental health nursing knowledge and skill needs of the nursing workforce across a range of service delivery settings. It explores contemporary models of care such as recovery-oriented practice, trauma-informed care, and social determinants approach. Students will plan evidence-based initiatives that promote mental health, prevent and intervene early in illness, facilitate recovery, and promote wellbeing.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) NURS 1025 - Person-centred Care Across the Lifespan

Restrictions

Students must be enrolled in 4691 Bachelor of Nursing, 4780 Bachelor of Nursing - WSU Online or 4693 Bachelor of Nursing (Advanced) or 4692 Bachelor of Nursing (Graduate Entry)

Assumed Knowledge

Primary health care, professional communication, foundational concepts in human behavioural science and their application to nursing or midwifery practice, roles and responsibilities of registered nurse or midwife.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate appropriate knowledge, skills, and attitudes in mental health nursing
2. Identify the rights of mental health consumers to live free from discrimination and social exclusion

- Describe professional therapeutic relationships with mental health consumers, carers, and significant others using empathic and compassionate language
- Describe how to support the rights of mental health consumers to lead their treatment and recovery process, and the rights of carers and significant others with the consumers consent, to collaborate in the treatment and recovery process
- Plan evidence-based initiatives that promote mental health, prevent, and intervene early in illness, facilitate recovery, and promote wellbeing
- Explain how to facilitate the recovery of mental health consumers by focussing on strengths and wellbeing

Subject Content

- An introduction to anxiety disorders, depression, suicide, schizophrenia, bipolar disorder, substance use based on Recovery Principles and Trauma Informed Care
- An introduction to mental health assessment, including comprehensive assessment of mental health consumers, carers and families, risk and strength assessments, triage, and diagnostic categories
- Psycho-social concerns would be reflected in person-centred / Recovery model and the importance of having a conversation about what is happening in their lives currently. The focus is on a holistic approach.
- An introduction to psychopharmacology
- Effect of stigma and myths around mental illness
- Lived experience of mental health consumers and carers, consumer, and carer partnership in recovery.
- Positive images about people with mental illness, promoting positive messages
- Explore ethical application of the MH Act, 2007 including least restrictive care
- Building professional therapeutic relationship with mental health consumers, carers, and families using empathetic communication skills
- Contemporary models of care such as recovery-oriented practice and trauma-informed care
- Effect of cultural/ spiritual and social factors (including Domestic Violence) in mental illness on individuals, families, and communities, including CALD-use of interpreters
- Mental health promotion and early intervention strategies
- Discussion of strength approach to Recovery
- Aboriginal and Torres Strait Islander social and emotional wellbeing
- An introduction to mental health and vulnerable populations
- An introduction to physical assessment in mental health
- Accesses and analyses the best available evidence, that includes research findings, for safe, quality practice

Special Requirements

Essential equipment

Access to an internet enabled device is essential in order to be able to: access course materials; to participate in discussion groups; and to access additional resources provided by the lecturer during the session. NURS 3001 Being a Professional Nurse (Advanced)

Credit Points 10

Legacy Code 401027

Coordinator Gladis Kabil ([https://directory.westernsydney.edu.au/search/name/Gladis Kabil/](https://directory.westernsydney.edu.au/search/name/Gladis%20Kabil/))

Description This unit explores the process of transition from student to professional practitioner. Students undertaking the BN Advanced course will gain a critical understanding of the congruence between the provision of health care and professional regulatory frameworks. The role of the graduate nurse will be explored through a detailed examination of case studies that apply relevant nursing theory to professional practice. This unit will build capacity in students to meet their professional responsibilities as new graduate practitioners in nursing. Students will also have the opportunity to discuss career planning and set priorities for ongoing professional development.

School Nursing & Midwifery

Discipline Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Co-requisite(s) NURS 3033

Restrictions Students must be enrolled in 4693 Bachelor of Nursing (Advanced).

Assumed Knowledge

Primary health care principles; professional communication; roles and responsibilities of the Registered Nurse; ethical and legal frameworks for practice, critical thinking and problem-solving skills.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the theoretical perspectives that inform transition to graduate practice.
2. Apply the relevant professional regulatory frameworks in relation to competent professional practice.
3. Apply lifelong learning approaches to continuing professional development.
4. Synthesise relevant information from diverse sources to maintain evidence of professional currency.
5. Critically evaluate readiness for practice through self-review, critical self-reflection, group discussion and peer feedback.
6. Critically evaluate personal goals for career development in the health care system and identify potential professional mentoring opportunities.

7. Critically reflect within a professional portfolio in relation to regulatory requirements.

8. Evaluate processes relevant to WH&S issues to provide safe, quality care within the scope of practice.

Subject Content

1. Transition to graduate practice - theoretical perspectives

- Novice to expert
- transition to graduate practice: stages and experiences
- The role of The Nursing profession in influencing better health outcomes for people, and partnering with other health professionals to optimise decision making about care

- participation in collaborative practice and Building professional relationships with health professionals within The scope of practice and personal and professional boundaries

2. Regulatory Frameworks

a. Australian Health Practitioner Regulation Agency (AHPRA)

b. Nursing and Midwifery Board of Australia (NMBA)

- Standards for practice
- codes of ethics and professional conduct
- Critical thinking and decision making framework
- professional boundaries
- professional practice guidelines

c. Legislation and policy governing professional practice

- Health Practitioner Regulation National Law Act 2009

- Health Care Complaints Act 1993

- Clinical Governance and Health Administration Act 1982

3. Professional Development

a. Formal requirements for registration

- Continuing professional development Registration Standard

b. Professional and Industrial bodies

- Nursing and Midwifery Board of Australia

- Australian Nursing and Midwifery Federation

- international Council of Nurses

- Australian College of Nursing

- NSW Nurses and Midwives Association

- Numerous Specialty Colleges

4. Maintaining Currency

- Accessing health informatics and health Technology

- Accessing, Analysing and using The best available evidence

- professional portfolios

- self and group reflection, Review and feedback

5. Career Development

- career options

- career planning

- mentoring opportunities

6. Advanced academic and scholarship development

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Critical incident reflection paper: professional practice context	1,000 words	35	N	Individual

Critical analysis essay related to being a professional nurse	1,500 words	40	N	Individual
Professional Portfolio self-assessment	750 words	25	N	Individual

NURS 3002 Being a Professional Nurse or Midwife

Credit Points 10

Legacy Code 401021

Coordinator Paula Sanchez ([https://directory.westernsydney.edu.au/search/name/Paula Sanchez/](https://directory.westernsydney.edu.au/search/name/Paula%20Sanchez/))

Description Being a Professional Nurse or Midwife explores the process of transition from student to a registered health care professional. Students analyse their role as a registered nurse or registered midwife, reflecting on accountability, responsibility, therapeutic and professional relationships, and their capability for practice. This unit will build capacity in students to meet their professional responsibilities

as capable practitioners in nursing or midwifery and will have an opportunity to demonstrate job readiness skills in preparation for new graduate employment opportunities.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) NURS 1022 - Becoming a Professional Nurse

Co-requisite(s) NURS 3039 Professional Experience Placement

Restrictions

Students must be enrolled in 4691 Bachelor of Nursing, 4780 Bachelor of Nursing – WSU Online or 4684 Bachelor of Midwifery or 4693 Bachelor of Nursing (Advanced) or 4692 Bachelor of Nursing (Graduate Entry) courses and must have passed 80 credit points at Level 1 and 60 credit points at Level 2.

Assumed Knowledge

Professional communication, roles and responsibilities of the Registered Nurse and the Midwife, ethical and legal frameworks for practice, behavioural and social sciences, critical frameworks.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Demonstrate job readiness skills in preparation for graduate employment
- Promote the integral role of nursing or midwifery practice and the profession
- Critically analyse professional accountability for decisions, actions, behaviours, and responsibilities inherent in the role of nursing or midwifery
- Reflect on one's professional responsibilities adhering to digital health legislation, policy, ethics, and professional conduct
- Adopt a lifelong learning approach for continuing professional development of self and others with reference to resilience and self-reflexivity in a professional context

Subject Content

- Transition to graduate practice – theoretical perspectives
 - Novice to expert
 - Transition to graduate practice: stages and experiences
 - The role of the profession in influencing better health outcomes for people, and partnering with other health professionals to optimise decision making that supports person-centred care
 - Participation in collaborative practice and building professional relationships with health professionals within the scope of practice and personal and professional boundaries
- Regulatory Frameworks
 - Australian Health Practitioner Regulation Agency (AHPRA)
 - Nursing and Midwifery Board of Australia (NMBA)
 - Standards for practice
 - Code of Conduct
 - ICN Registered Nurse Code of Ethics
 - ICM Midwife Code of Ethics
 - Decision making frameworks
 - Professional boundaries

- Legislation and policy governing professional practice
- Health Practitioner Regulation National Law Act 2009
- Health Care Complaints Act 1993
- Clinical Governance and Health Administration Act 1982

3. Professional Development

- Formal requirements for registration
- Continuing professional development registration standards
- Maintaining Currency
- Accessing health informatics and health technology
- Accessing, analysing, and using the best available evidence
- Self-reflection, review, and feedback

4. Career Development

- Professional portfolios
- Career options
- Career planning
- Mentoring opportunities
- Leading others

NURS 3003 Clinical Leadership and Professional Relationships

Credit Points 10

Legacy Code 401213

Coordinator Leone Pike ([https://directory.westernsydney.edu.au/search/name/Leone Pike/](https://directory.westernsydney.edu.au/search/name/Leone%20Pike/))

Description The unit explores fundamental concepts and issues related to leadership in nursing and midwifery. The unit focuses on exploration of contemporary innovative approaches to leadership that may contribute to nursing and midwifery standards, person and woman

centred practice, critical reflection and critical thinking in dynamic healthcare contexts.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects NURS 3019 Leadership in Graduate Practice NURS 3021 Leadership in Nursing and Midwifery

Restrictions Students must be enrolled in 4691 Bachelor of Nursing, 4692 Bachelor of Nursing (Graduate Entry) or 4684 Bachelor of Midwifery or 4780 Bachelor of Nursing - WSU Online. Students must be enrolled in 4780 to enrol in WSU Online Campus subjects.

Assumed Knowledge

Professional communication, roles and responsibilities of the Registered Nurse and the Midwife, ethical and legal frameworks for practice, behavioural and social sciences, critical frameworks.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique contemporary clinical leadership approaches in nursing and midwifery practice.
2. Differentiate between leadership and management in relation to clinical nursing or midwifery practice.
3. Appraise facilitators and barriers to effective clinical leadership in the provision of optimal person and woman-centred care at different levels of experience in nursing and midwifery practice.
4. Evaluate strategies for change and innovation processes in contemporary primary healthcare contexts.
5. Apply strategies required for effective building, motivating and leading of collaborative healthcare teams in clinical practice.

Subject Content

1. Contemporary, emerging and innovative approaches to leadership in healthcare contexts
2. Leading and enhancing person and women-centred care
3. Emotional and spiritual intelligence and leadership
4. Reflection, self-assessment, feedback and critical thinking in relation to leadership
5. Participation, delegation, advocacy and empowerment for leaders in the health care sector
6. Leaders as change agents
7. Leading in a changing environment
8. Building, motivating and leading collaborative teams
9. Communication, conflict resolution and negotiation
10. Quality improvement methodologies

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Participation activities: 6 tasks, best 4 marks included in final marks	30 minutes each activity	20	N	Individual
Essay: Critical reflection Scenario-Based Essay	1,500 words	50	N	Individual
Presentation: Group Work (Team Presentation)	15 minutes	30	N	Group

Teaching Periods

NURS 3004 Clinical Leadership in Nursing (Advanced)

Credit Points 10

Legacy Code 401217

Coordinator Antoinette Cotton (<https://directory.westernsydney.edu.au/search/name/Antoinette+Cotton/>)

Description This unit explores fundamental and advanced concepts and issues related to leadership in nursing to enable the advanced student to reflect on future leadership aspirations. The unit focuses on exploration of contemporary, emerging and innovative approaches to leadership that contribute to nursing standards, person-centred practice, evidence-based leadership, critical reflection and critical thinking in dynamic healthcare contexts.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects NURS 3020 Leadership in Nursing (Advanced)

Restrictions Students must be enrolled in 4693 Bachelor of Nursing (Advanced).

Assumed Knowledge

Professional communication, roles and responsibilities of the Registered Nurse, ethical and legal frameworks for practice, behavioural and social sciences, critical thinking and problem-solving skills.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate contemporary, emerging and innovative clinical leadership approaches in nursing practice.
2. Differentiate between leadership and management in relation to clinical nursing practice.
3. Critically discuss the importance of leadership development and clinical leadership styles for nursing practice.

4. Appraise professional and organisational factors that facilitate or inhibit effective leadership in healthcare.
5. Critically evaluate effective leadership in provision of optimal person-centred care in clinical nursing practice.
6. Critically appraise leading and managing change and innovations in contemporary healthcare contexts.
7. Assess the value of self reflection, self assessment, critical thinking and feedback for effective clinical leadership in nursing contexts including the new graduate context.
8. Critically discuss effective building, motivating and leading of collaborative healthcare teams.

Subject Content

1. Contemporary, emerging and innovative approaches to leadership in healthcare contexts
2. Leading and enhancing person-centred care
3. Emotional and spiritual intelligence and leadership
4. Reflection, self-assessment, feedback and critical thinking in relation to clinical leadership
5. Participation, delegation, advocacy and empowerment for leaders in the health care sector
6. Leaders as change agents
7. Leading in a changing clinical environment
8. Building, motivating and leading collaborative healthcare teams
9. Communication, conflict resolution and negotiation
10. Advanced scholarship and leadership development skills
11. Quality improvement methodologies

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Critical discussion paper	1500 words	50	N	Individual
Professional leadership activity (negotiated): Part A Presentation and Abstract	20 minutes 200 words	20	N	Individual
Professional leadership activity (negotiated): Part B Reflective Report	1000 words	30	N	Individual
Participation presentations 1 day Seminar	Four - 3 hour 1 day Seminar	S/U	Y	Individual

NURS 3005 Collaborative Care

Credit Points 10

Legacy Code 401040

Coordinator Hazel Keedle ([https://directory.westernsydney.edu.au/search/name/Hazel Keedle/](https://directory.westernsydney.edu.au/search/name/Hazel+Keedle/))

Description The Australian College of Midwives and the National Health and Medical Research Council (NHMRC) provide guidelines to assist midwives to recognise when to refer or consult with other midwives or health care practitioners, as well as collaborative care arrangements. This unit provides students with the knowledge to collaborate with all health professionals. This includes assessing procedures for managing obstetric emergencies; transferring women or newborns; assessing referral pathways; and caring for bereaved families.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) NURS 2004 AND NURS 2026

Co-requisite(s) NURS 3006 AND NURS 3030 AND NURS 3036

Restrictions Students must be enrolled in 4684 Bachelor of Midwifery.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify emerging and escalating situations that may require referral or additional care and discuss the referral processes and requirements
2. Analyse and discuss transfer policies and procedures for women and newborns; the various methods of transfer; and the implications for women and their families.
3. Describe the role of the midwife as part of a collaborative team in transferring and receiving women and /or newborns to or from another health centre or hospital..
4. Critically analyse collaborative practices within a multidisciplinary team.
5. Reflect on the role of the midwife and other health professionals in providing multidisciplinary care in complex and emergency situations
6. Critique a hospital policy or guideline in relation to complex care episodes
7. Examine communication skills for collaborative practices and cultural considerations for women, babies and families.

Subject Content

1. Referral from Primary Care
 - Reasons for referral (Australian College of Midwives guidelines)
 - Issues associated with referral
2. Hospital Transfers of Women and Newborns
 - transfer policies and procedures
 - Transportation (air/ambulance)
 - Receiving women and newborns
 - maternity service Issues and women's choices if She lives in An isolated area
 - needs of The sick woman /newborn and The impact on significant others
 - neonatal emergency transport service
 - NSW Tiered hospitals
 - NSW Pregnancy and newborn services Network
 - transfer from Home to hospital
3. Models of collaborative care
 - Communication skills and negotiated practice and collabora

NURS 3006 Complex Care 2

Credit Points 10

Legacy Code 401039

Coordinator Leanne Luck ([https://directory.westernsydney.edu.au/search/name/Leanne Luck/](https://directory.westernsydney.edu.au/search/name/Leanne%20Luck/))

Description This unit continues to explore the complex issues surrounding childbirth with a particular emphasis on those women who have pre-existing conditions. Dilemmas and challenges that surround infertility, medical conditions and previous surgical conditions as well as environmental issues that may impact on pregnancy and or birth, are examined. In addition, the unit includes the implications and management for the care of the associated neonate.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) NURS 2004 AND NURS 2026

Co-requisite(s) NURS 3030 AND NURS 3005 AND NURS 3036

Restrictions Students must be enrolled in 4684 Bachelor of Midwifery.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe environmental issues that impact on fertility and fetal development
2. Explain assisted reproductive technologies (ART) and the support required for women receiving ART
3. Describe pre-existing physiological, medical and surgical conditions that may impact on pregnancy, labour or birth outcomes.
4. Critically analyse and discuss the midwife's role when caring for w

Subject Content

1. Environmental issues
 - Effects of exposure to harmful agents on fetal development (eg drugs, radiation, environmental chemicals and pathogens) on fetal development)
 - causes of congenital abnormalities
 - physiological effects of alcohol and other drugs used by The woman during Pregnancy
 - The impact of illicit drugs and alcohol on The neonate
2. Infertility
 - assisting The woman and her family in relation to Infertility
 - assisted Reproductive technologies
3. Caring for women with existing medical and/or gynaecological conditions that may impact on pregnancy and or birth
 - cardiac abnormalities
 - renal disorders
 - uterine abnormalities
 - thyroid dysfunction
 - cancer
 - Termination of pregnancy - 2nd trimester
4. Caring for the woman with previous surgical conditions or special needs that may impact on pregnancy and or birth

- female Genital mutilation
- breast surgery (implants, reduction)
- Other surgery
- women with disabilities
- blood dyscrasias
- 5. Working with obstetric emergencies
 - Shoulder dystocia
 - cord prolapse
 - uterine inversion
 - uterine rupture
 - Shock
 - Amniotic fluid Embolism (anaphylactoid syndrome of Pregnancy)
 - Maternal resuscitation
 - neonatal resuscitation
- 6. Working in partnership with women in complex situations
 - communication skills to work effectively with women and families with complex physiological needs
 - separation of mother and newborn
 - support services available to parents
- 7. Neonates with complex needs
 - neonatal Abstinence syndrome
 - fetal alcohol syndrome
 - Scalp pH/lactate and interpretation of findings
 - Acyanotic heart disease
 - CDH Babies
 - withdrawal of care in The nursery

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

NURS 3007 Contemporary Issues in Child and Adolescent Health

Credit Points 10

Legacy Code 401196

Coordinator Peter Lewis ([https://directory.westernsydney.edu.au/search/name/Peter Lewis/](https://directory.westernsydney.edu.au/search/name/Peter%20Lewis/))

Description This unit begins with a brief examination of socio-cultural theories of childhood and adolescence as a background for the critical analysis of current debates about the health and wellbeing of children and adolescents. Case studies will be used to explore

contestable topics in child and youth health from an interdisciplinary perspective. The unit will address issues of child protection and parental responsibility in the mainstream community, Aboriginal and Torres Strait Islanders, and refugee health care settings. Knowledge gained in this unit will assist beginning practitioners in a variety of disciplines to take informed positions on topics relevant to child and adolescent health.

School Nursing & Midwifery

Discipline Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss current socio-cultural meanings of childhood and adolescence.
2. Discuss the influence of context and culture on child and adolescent health.
3. Discuss and critically analyse why some public health initiatives are contestable.
4. Formulate and justify a personal position on current contestable topics in child and adolescent health.
5. Critically reflect on ethico-legal implications of public health policy as applied to children and adolescents.
6. Critically discuss how interagency collaboration is necessary for the effective promotion of child and adolescent health.

Subject Content

Module 1 - Models of Child and Adolescent Development

1. Introduction to basic conceptualisations of childhood and adolescence

- Continuous Vs Discontinuous development
- Tabula Rasa Vs Noble Savage
- nature Vs nurture

2. Biopsychosocial Models of child and adolescent development

- physical growth
- cognitive and psychological growth

3. Models of Social and Moral Development

- Vygotskys Sociocultural theory
- Bronfenbrenners ecological systems theory
- Kohlbergs theory of moral development

4. Socio-cultural contextualisation of childhood and adolescence

- historical and evolving definitions of childhood and Adolescence
- childhood and adolescence in different socio-cultural contexts; modern Western democracy, Islamic states, majority world
- how variations shape The approach to Caring for children and adolescents

Module 2 - Public Health from the Global to the Local

5. Principles of public health policy and their application to children and adolescents

- historical development of public health
- The purpose of public health policy
- major achievements of public health
- critiques of public health
- some useful public health frameworks for thinking about child and adolescent health

Module 3 - Caring for marginalised children and adolescents

6. Social Justice

- mandatory Detention and its impact on The family unit

- Caring for The health of children and adolescents during and after their Detention
- Caring for The Australian Born offspring of Adult detainees
- 7. Equity of Access
 - child and adolescent health in rural and Remote Aboriginal and Torres Strait Islander populations
 - child and adolescent health in Urban Aboriginal and Torres Strait Islander populations
 - intervention in Aboriginal and Torres Strait Islander communities and its impact on child and adolescent health
- 8. Intra session Break
- 9. Protecting Children and Adolescents in Institutional Care
 - The Royal Commission into institutional responses to child sexual Abuse
- Module 4 - Balancing public good with personal choice
- 10. What to do with those who disagree with the "experts"
 - The qualified success of population

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Asynchronous discussion board participation	1 post of 100 – 300 words per module throughout semester (A minimum total of 4 posts throughout semester)	15	N	Individual
Critical reflection	1,500 words	50	N	Individual
Abstract and online presentation	300 words and 10 minutes	35	N	Individual

Teaching Periods

NURS 3014 Health Variations 4 (Advanced) - Acute Life Threatening Conditions

Credit Points 10

Legacy Code 401216

Coordinator Sharon Jacobs ([https://directory.westernsydney.edu.au/search/name/Sharon Jacobs/](https://directory.westernsydney.edu.au/search/name/Sharon%20Jacobs/))

Description This unit develops a student's knowledge, critical thinking and problem-solving skills related to the pathophysiology, pharmacology and nursing care for people who experience an acute life-threatening and/or traumatic condition that may involve multiple systems failure. National Health Priority case histories used in the unit will focus on cardiovascular disease, and injury prevention and control. The unit will also consider habilitation and rehabilitation of people who have experienced acute life-threatening or traumatic complex health issues. Workshops will be used to provide the student with the necessary advanced assessment, clinical problem-solving skills

and simulation experiences to recognise the deteriorating patient with potential life-threatening conditions and intervene with reporting, monitoring and initiation of treatment skills.

School Nursing & Midwifery

Discipline Critical Care Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Students must be enrolled in 4693 Bachelor of Nursing (Advanced).

Assumed Knowledge

Primary health care, knowledge of human biological sciences including human body systems, concepts in pharmacology and pathophysiology and the National Health Priorities and the relationship to nursing practice.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate in-depth understanding of pathophysiological processes that are related to acute life-threatening and/or traumatic condition and its implications for professional nursing practice
2. Appraise specific diagnostic procedures associated with acute life threatening and/or traumatic complex health conditions
3. Critically evaluate pharmacological agents and their safe effective application in professional nursing practice when caring for people with acute life threatening and/or traumatic complex health conditions
4. Justify strategies used to provide safe effective evidence based nursing care for individuals and their families who experience an acute life-threatening event or traumatic complex health condition
5. Critically discuss the principles of habilitation and rehabilitation as they relate to individuals who experience an acute life-threatening or traumatic complex health issues

Subject Content

1. Knowledge and application of the following to inform professional nursing practice related to acute life-threatening and/or traumatic complex health conditions utilising both critical thinking and problem-solving skills:
 - a. National Safety and Quality Health Service Standards
 - b. Advanced Health Assessment skills
 - primary and secondary survey for Trauma injury management
 - c. Pathophysiology
 - d. Pharmacology
 - e. Diagnostic procedures
 - f. Nursing management
 - The deteriorating patient
 - sudden unexpected Death
 - g. Habilitation and rehabilitation principles
 - h. Advanced assessment and professional communication skills
2. Indicative Case Histories
 - cardiovascular ? Acute Myocardial infarction, cardiac Revascularisation, cardiac surgery
 - injury prevention and control ? Trauma, Shock (neurological, pelvis, Abdominal, Burns)
 - multi-systems failure ? organ donation
 - Anaphylaxis ? Airway management

Assessment

NURS 3015 Health Variations 4 - Acute Life Threatening Conditions

Credit Points 10

Legacy Code 401211

Coordinator Gladis Kabil ([https://directory.westernsydney.edu.au/search/name/Gladis Kabil/](https://directory.westernsydney.edu.au/search/name/Gladis%20Kabil/))

Description Health Variations 4 - Acute Life-Threatening Conditions utilises an evidence base to develop an understanding of the pathophysiology, pharmacological interventions, and nursing care for people across the lifespan who experience acute life-threatening conditions. An important area of focus is detecting and recognising acute deterioration and escalating care.

School Nursing & Midwifery

Discipline Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) NURS 2016 - Health Variations 3 - Acute Exacerbations of Chronic Conditions

Restrictions

Must be enrolled in 4691 Bachelor of Nursing or 4780 Bachelor of Nursing – WSU Online or 4693 Bachelor of Nursing (Advanced) or 4692 Bachelor of Nursing (Graduate Entry)

Assumed Knowledge

Primary health care, foundational knowledge of human biological sciences including human body systems, basic concepts in pharmacology and pathophysiology and the National Health Priorities and the relationship to nursing practice.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the causes, pathogenesis, clinical manifestations, and diagnostic procedures concerning acute life-threatening conditions.
2. Apply the National Safety and Quality Health Service Standards to justify the selection and prioritisation of nursing strategies to provide safe effective evidence-based nursing care for people who experience an acute life-threatening condition.
3. Assess appropriate, safe, effective, and evidence-based treatments for people who experience an acute life-threatening condition.
4. Collaborate effectively when detecting and recognising acute deterioration, and escalating care.

Subject Content

1. Knowledge and application of the following concepts to inform professional nursing practice related to acute life-threatening and/or traumatic complex health conditions utilising both critical thinking and problem-solving skills.
2. Discuss the importance of the National Safety and Quality Health Service Standards
3. Accesses and analyses the best available evidence, that includes research findings, for safe, quality practice
4. Recognition of deteriorating patient using DETECT framework
5. Management of the deteriorating patient
6. Primary and secondary survey for trauma injury management including burns
7. Sudden unexpected death
8. Ethico-legal responsibilities
9. Pathophysiology
10. Pharmacology
11. Diagnostic procedures
12. Management of acute life-threatening conditions
13. Nursing management

Special Requirements

Essential equipment

Access to an internet enabled device is essential in order to be able to: access course materials; to participate in discussion groups; and to access additional resources provided by the lecturer during the

session. See http://www.westernsydney.edu.au/currentstudents/current_students/services_and_facilities/uwsonline_student_support (http://www.westernsydney.edu.au/currentstudents/current_students/services_and_facilities/uwsonline_student_support/) for further information.

NURS 3017 Health Variations 5 - Palliative and End of Life Care

Credit Points 10

Legacy Code 401212

Coordinator Lauren Metcalfe ([https://directory.westernsydney.edu.au/search/name/Lauren Metcalfe/](https://directory.westernsydney.edu.au/search/name/Lauren%20Metcalfe/))

Description Health Variations 5 - Palliative and End of Life Care focuses on the palliative approach as a model of care, exploring the benefits of this approach when supporting dying individuals with any life limiting illness. Students will also acquire the capabilities to develop self-care strategies to manage their own grief, loss and stress associated with working in a palliative setting.

School Nursing & Midwifery

Discipline Palliative Care Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects NURS 3016 Health Variations 5

Restrictions

Students must be enrolled in 4691 Bachelor of Nursing or 4780 Bachelor of Nursing - WSU Online or 4693 - Bachelor of Nursing (Advanced) or 4692 Bachelor of Nursing (Graduate Entry)

Assumed Knowledge

Primary health care, foundational knowledge of human biological sciences including human body systems, basic concepts in pharmacology and pathophysiology and the National Health Priorities and the relationship to nursing practice.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the palliative care principals when assessing, planning, and supporting the holistic physical, psychological, cultural, social, and spiritual needs of a person with life limiting conditions across the lifespan

- Examine the delivery of comprehensive person-centred care across a variety of settings utilising the multidisciplinary team to provide coordinated care for palliative people, their families and carers.
- Evaluate strategies to support palliative people, families and carers in their role in palliative and end of life care provision including, loss and grief support services
- Adapt to a dynamic and constantly changing healthcare environment when facilitating collaborative and ethical decision making about the provision of palliative nursing care and support advanced care planning
- Communicate effectively when interacting with a palliative person, their family and carers, in a palliative care context

Subject Content

- A palliative approach, general and specialist palliative care. Who requires palliative care?
- Models and Domains of palliative care.
- Accesses and analyses the best available evidence, that includes research findings, for safe, quality practice
- Ethical principles of palliative nursing; autonomy, beneficence,
- Legal aspects of palliative care nursing; Advanced care planning, substitute decision maker (Case Study).
- Communication – effective communication (paraphrase, validate etc), difficult conversations (communicating to people under stress, communicating with people in pain) and caring for families.
- Palliative care settings – How setting effect care, expectations & experience of family/patient.
- Interdisciplinary teams in palliative care
- Cultural considerations in palliative care
- Death, dying and grief responses.
- Managing pain effectively (pain assessment with people who may have limited communication, & palliative care for children)
- Symptom Management: Case study
- Compassion fatigue, burnout, and resilience

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

NURS 3022 Maintaining Clinical Currency

Credit Points 10

Legacy Code 400768

Coordinator Fiona McDermid ([https://directory.westernsydney.edu.au/search/name/Fiona McDermid/](https://directory.westernsydney.edu.au/search/name/Fiona%20McDermid/))

Description This unit provides students with the opportunity to review: the pathophysiological aspects of health breakdown in individuals; the knowledge of pharmacological processes within nursing practice; and, to demonstrate competency in skills essential to the nursing

management of individuals with various types of health breakdown. In addition students will complete a four-week negotiated clinical practicum prior to graduate employment.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) NURS 3033

Restrictions Restricted to students who have met all program requirements and who have not completed a clinical placement in the final eight months of study in the Bachelor of Nursing degree.

Assumed Knowledge

An understanding of the nature of health, principles and mechanisms involved in body function, principles of safe nursing practice including safe administration of medications and components of effective interpersonal communication.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply knowledge of human bioscience and lifestyle factors to the pathophysiological changes associated with acute and chronic disorders.
2. Perform nursing activities associated with individuals in a variety of health care settings.
3. Use safe technique with regard to the administration of therapeutic substances by a variety of routes and recognise the professional and legal responsibilities associated with this nursing function.
4. Apply legal principles and ethical frameworks associated with the provision of holistic nursing care for an individual.
5. Recognise the need for a seamless transition of care between settings when planning discharge for individuals and families.
6. Demonstrative effective written and verbal communication skills, with an appropriate use of medical terminology when conveying the care of individuals, families and groups.
7. Define and discuss the processes underpinning illness states and relevant implications for professional nursing practice.

Subject Content

1. Health/illness as related to pathophysiological needs and conditions
2. Risk factors associated with acute and chronic pathophysiological conditions related to integration, metabolism, nutrition, support and elimination
3. Nursing care/management of individuals experiencing acute/chronic pathophysiological conditions including pain management strategies
4. Pharmacokinetics and pharmacodynamics and implications for nursing care
5. Principles and administration of therapeutic substances ? oral, rectal, topical, subcutaneous, intradermal, intramuscular routes
6. Intravenous therapy ? principles, calculation, flow rates, priming the line, care of site
7. Legal and ethical principles and frameworks to support nursing practice
8. 160 hours negotiated clinical practicum

Special Requirements

Legislative pre-requisites

First Aid Certificate. Students will need to have completed the NSW Health Special Requirements for clinical practicum attendance. At present these include: 1. A National Police Certificate or a Criminal record clearance card (if issued before 1st June 2010); 2. A completed vaccination card with serology results attached; 3. Four forms completed and taken to every placement (with a copy): a. Working with Children Student Declaration, b. Code of Conduct, c. Form 2: TB Assessment Form, d. Form 3: Student Undertaking/Declaration form; 4. International students need to take an additional form: A statutory declaration signed by a Justice of the Peace.

Teaching Periods

NURS 3023 Maternal and Infant Health Care

Credit Points 10

Legacy Code 401237

Coordinator Rakime Elmir ([https://directory.westernsydney.edu.au/search/name/Rakime Elmir/](https://directory.westernsydney.edu.au/search/name/Rakime%20Elmir/))

Description Maternal and Infant Health care introduces students from Nursing, Health Sciences and other disciplines to the key physiological, social and emotional issues around pregnancy, labour and birth and early parenthood. It also examines the Australian maternity care system and model of care. Content covered in the unit will include; foetal development, normal physiological labour and birth, health promoting behaviours and development of parenting confidence. Importance will also be placed on the role of social support, infant feeding practices and communication and newborn care. Models of care and the impact of the media on shaping parenting ideas and practices will be covered.

School Nursing & Midwifery

Discipline Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Students must have completed at least 120 credit points in a nursing or health related degree. This subject is not available to students in the Bachelor of Midwifery.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify social determinants of health and other factors (role of communities and significant others) that may impact on outcomes for mothers, their infants and families
2. Describe normal physiological labour and birth processes and foetal and newborn growth and development.
3. Identify deviations from normal and common obstetric interventions that interfere with normal labour and birth
4. Critically reflect on a range of childbearing and childrearing practices through a perspective of cultural competency
5. Critically analyse a range of infant feeding practices
6. Explore how pregnancy, birth and infant feeding are represented in the media and the impact on expectant and new parents.
7. Compare and contrast maternity models of care in an Australian context, with a particular focus on collaboration among health professionals and communities.

Subject Content

Conception and hormonal influences on preconception health

Normal pregnancy, labour and birth

- foetal growth and development

Deviations from normal

- some Complications, common obstetric interventions, grief and loss

Newborn growth and development

Role of health professionals working in a multidisciplinary team

- Midwives, Nurses, child and family health Nurses, doctors

Maternal and paternal self-care / postpartum practices

- cultural influences

- social Determinants of health and Factors impacting on Maternal and infant outcomes

Infant feeding practices

- breastfeeding, formula feeding

Media representations of pregnancy, birth and infant feeding

Maternity models of care in Australia

- Continuity Models of care ? Midwifery Models of care

- private obstetrician led care

- general practitioner shared care

Assessment

Online quiz	30 mins	25	N	Individual
Case study	1,500 words	50	N	Individual

Teaching Periods

NURS 3025 Midwifery Practice - Global Maternal Health

Credit Points 10

Legacy Code 401226

Coordinator Elisha Stein ([https://directory.westernsydney.edu.au/search/name/Elisha Stein/](https://directory.westernsydney.edu.au/search/name/Elisha%20Stein/))

Description This unit will provide students with an opportunity to explore the full scope of midwifery practice from a global perspective. Students will gain an understanding of the role midwifery plays within the broader context of women's health both in Australia and globally. It will provide an opportunity for students to experience an alternative midwifery model. Students will undertake a three week practice placement. The practice placement can be located locally, nationally or internationally. The purpose of this placement is for students to consider the role of midwifery and its impact on improving women's health in a range of settings. It will support the development of skills in assessing the need and rationale for the provision of midwifery services in different environments and settings.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) NURS 3030 AND NURS 2004

Equivalent Subjects NURS 3026 Midwifery Practice - Models of Care

Restrictions Students must be enrolled in 4684 Bachelor of Midwifery.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically discuss human rights issues and their relationship to sexual, reproductive, maternal and newborn health care globally
2. Reflect and critically discuss the diversity of maternity care provision nationally and internationally and the potential role information technology can play
3. Identify and critically discuss global strategies for improving women's and children's health
4. Reflect and critically discuss the role midwifery can play in improving sexual, reproductive, maternal and newborn health care globally
5. Communicate effectively through verbal presentations, academic written work, and in professional settings

Subject Content

1. Review the social determinants of health impact on sexual, reproductive, maternal and newborn health care
 2. Reproductive, maternal and newborn health indicators in Australia and Globally
 3. Impact of gender on health
 4. Human rights in childbirth
 5. The rise in human trafficking of women and girls
 6. The full scope of midwifery practice within a global context
 7. The role of the midwife in health education and promotion
 8. Maternity care delivery by different health-care professionals and non-health care professionals
 9. The use of innovative information technology and electronic resources
 10. Factors influencing the type or model of midwifery care and the organisation of maternity care (eg. environmental, cultural, demographic, consumer demand)
 11. The role of the midwife in crisis situations (e.g. natural disasters, war)
 - infant feeding in emergency situations e.g floods, earthquakes refugees
 - Midwifery care in emergency situations refugees, women's health and Midwifery
 12. Contraceptive care in the global context- the role of the midwife
 13. Culturally safe midwifery care
 14. Placement requirements for the planned experience
 15. Safety and security in placements
 16. Disparities in maternal health in Globally and in Australia
 17. Practice Placement Experiences
- In this subject student midwives will complete a placement experience of 96 hours. This will be an opportunity where possible, for students to experience an alternate model of midwifery to that they are currently experiencing. Students will explore and critically reflect on their placement and where appropriate provide midwifery care under supervision.
- Potential Practice Placements; Rural Midwifery Service, Midwifery Continuity of Care Models, Aboriginal maternity service, Culturally specific maternity services, Outreach maternity service, Justice Health services, Overseas placem

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance ([https://](https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance))

www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Critical Review: Critical analysis of your placement that focuses on strategies for improving women's and children's health	500 words	20	N	Individual
Essay: Essay related to a global issue that impacts negatively or positively on maternal health	1,500 words	50	N	Individual
Group presentation on Midwifery Care in another Country: Part A: Poster (15%) Part B: Presentation to the full student group (15%)	Part A: Minimum A2 size Poster Part B: 20 minute presentation	30	N	Group
Professional Placement Performance: Clinical placement 100% attendance and Australian Midwifery Standards Assessment Tool	100% attendance	S/U	Y	Individual

NURS 3030 Midwifery Professional Practice 5

Credit Points 10

Legacy Code 401223

Coordinator Michelle Eveleigh (<https://directory.westernsydney.edu.au/search/name/Michelle+Eveleigh/>)

Description In this unit students will further develop midwifery skills for the management of complications and emergency situations. In simulated practice environments students will gain the skills necessary to work collaboratively with interdisciplinary colleagues. Students will gain practical experience in designated clinical areas and will follow women through pregnancy, birth and the postnatal period in a continuity of care experience.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) NURS 2026

Co-requisite(s) NURS 3006 AND
NURS 3005 AND
NURS 3036

Equivalent Subjects NURS 3028 Midwifery Practice Experience 5

Restrictions Students must be enrolled in 4684 Bachelor of Midwifery.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Communicate effectively with women and colleagues, including during emergencies.
2. Explain and demonstrate the mechanism of birth for malpresentations.
3. Recognise, plan and implement midwifery care throughout the continuum of care for a woman, in relation to risk factors, non-life threatening and life threatening complications and needs.
4. Recognise, plan and implement midwifery care for the fetus and newborn, in relation to risk factors, non-life threatening and life threatening complications and needs.
5. Demonstrate knowledge and clinical skills in performing maternal and newborn resuscitation as per relevant guidelines.
6. Demonstrate knowledge of applied pharmacology and initiate, supply and administer in accordance with legislation and common law.
7. Fulfill professional midwifery practice requirements including continuity of care.

Subject Content

1. Professional practice requirements
 - a. Documentation in accordance with professional and legislative requirements.
 - b. Policy and procedure guidelines for managing emerging and escalating emergency situations
 - c. Informed consent

- d. Privacy issues
 - e. Confidentiality
 - f. Infection Control
 - g. Medication calculations
 - h. Preparing mother and or baby after maternal, fetal or neonatal death
2. Competency development
 - a. venepuncture
 - b. IV cannulation
 - c. performing an episiotomy
 - d. Amniotomy
 - f. Application of Fetal Scalp Electrode
 - g. Assisting with the collection of Scalp PH and interpretation of findings
 - h. Prolonged second stage management and assisting with an instrumental birth
 - i. management of a snapped cord
 - j. Review and practice IV medications
 3. Communication skills
 - Communication skills for working with families in complex situations
 - Attentive listening
 - exploration of areas of concern
 - goal setting
 - b. Communication skills for working in collaboration
 - effective communication with colleagues, women and their families
 - Midwives role/ students role
 - consultation and referral
 - emergency situations
 - enacting The national Midwifery guidelines for consultation and referral
 4. Simulated Practice Skills
 - a. Application of Fetal Scalp Electrode
 - b. Management of postpartum haemorrhage
 - c. Management of obstetric shock
 - d. Management of shoulder dystocia
 - e. Management of cord prolapse
 - f. Management of a woman having a seizure
 - g. Management of a breech birth
 - h. Maternal resuscitation
 - i. CPR pregnant or postpartum woman
 - j. Neonatal resuscitation

Legacy Code 401016

Coordinator Miranda Daly ([https://directory.westernsydney.edu.au/search/name/Miranda Daly/](https://directory.westernsydney.edu.au/search/name/Miranda%20Daly/))

Description Professional Practice Experience 5 focuses on the development of the role and clinical skills of the registered nurse when assessing and caring for people across the lifespan who are experiencing acute life-threatening illness and life limiting illness. A simulated professional task will assist with the development of essential clinical communications and a professional experience placement to evaluate clinical skills development. The unit includes 160 hours of Professional Experience Placement.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) NURS 2029

Co-requisite(s) NURS 3015

Restrictions

Students must be enrolled in 4691 Bachelor of Nursing or 4780 Bachelor of Nursing - WSU Online or 4693 Bachelor of Nursing (Advanced) or 4692 Bachelor of Nursing (Graduate Entry)

Assumed Knowledge

Foundational knowledge of primary health care, professional communication, roles and responsibilities of the registered nurse, perioperative nursing, and human biological and behavioural sciences.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate safe medication administration in complex clinical scenarios in a simulated and clinical learning environment
2. Revise nursing care plans based on the best available evidence and assessment data
3. Document and communicate the revised plan to achieve improved health outcomes
4. Provide comprehensive safe, quality nursing practice to achieve agreed goals and outcomes that are responsive to the care of people across the lifespan in a simulated and clinical learning environment
5. Utilise an evidence-based approach to assessment, planning and prioritisation of nursing care
6. Perform safe medication administration, with a focus of non-parenteral and parenteral medications, for people who are experiencing acute life-threatening illness or end of life conditions, in a simulated and clinical learning environment
7. Practise in accordance with legislation, regulations, policies, guidelines and other relevant standards or requirements in nursing.
8. Evaluate how Primary Health Care (PHC) principles relate to the social determinants of health in the care of individuals with health variations; Holistic Assessment, National Health Priority Areas
9. Engage in safe professional nursing care when assessing and managing a deteriorating patient
10. Demonstrate effective communication skills in clinical practice and simulated environments when providing care for individuals across the life span
11. Appraise ethical and legal frameworks in the provision of safe, competent nursing care
12. Utilise a critical thinking framework to reflect on performance of self and others to identify future learning goals and strategies

13. Apply the principles of Work Health and Safety (WH&S) in clinical practice

Subject Content

1. National Health Priority case histories relating to life threatening or life limiting complex care
2. Provision of safe, evidence-based nursing care by
3. Accessing and analysing the best available evidence, that includes research findings, for safe, quality practice
4. Effective communication in a multidisciplinary approach to care
5. National Safety and Quality Health Services Standards
6. Preventing and Controlling Healthcare Associated Infections
7. Medication Safety
8. Patient Identification and Procedure Matching
9. Clinical Handover
10. Recognising and responding to clinical deterioration in acute healthcare
11. Grief associated with sudden unexpected death
12. Ethical and legal responsibilities
13. Working in multi-disciplinary teams
14. Clinical Practicum

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements

- Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance)

Assessment

NURS 3033 Professional Practice Experience 6

Credit Points 10

Legacy Code 401020

Coordinator Sharon Jacobs ([https://directory.westernsydney.edu.au/search/name/Sharon Jacobs/](https://directory.westernsydney.edu.au/search/name/Sharon%20Jacobs/))

Description This unit will be replaced from Spring 2022 by 401452 Professional Experience Placement. This unit provides a unique opportunity to consolidate and extend the students skill base in preparation for graduate practice. Students will gain an understanding

of the congruence between the provision of health care and professional regulatory frameworks in dynamic healthcare contexts. The role of the graduate nurse will be explored through critical reflection and critical thinking of case studies that reflect person-centered practice. The unit includes 240 hours of clinical placement.

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) Pre-requisites for 4691 and 4693 NURS 1020 Professional Practice Experience 1 NURS 1021 Professional Practice Experience 2 NURS 2028 Professional Practice Experience 3 and NURS 2029 Professional Practice Experience 4 Pre-requisites for 4692 NURS 2028 Professional Practice Experience 3 NURS 2029 Professional Practice Experience 4 NURS 1005 Foundations for Nursing Practice and NURS 2008 Graduate Entry Practice Experience

Co-requisite(s) NURS 3032

Restrictions Students must be enrolled in 4691 Bachelor of Nursing, 4693 Bachelor of Nursing (Advanced) or 4692 Bachelor of Nursing Graduate Entry or 4780 Bachelor of Nursing - WSU Online. Students must be enrolled in 4780 to enrol in WSU Online Campus subjects.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Incorporate evidence based practice and critical thinking frameworks to appraise Primary Health Care (PHC) principles in relation to holistic patient health care: Holistic Assessment, National Health Priority Areas
2. Formulate holistic health care management, in collaboration with peers, based on critical thinking and clinical judgement
3. Apply effective communication and problem-solving skills essential for the provision of safe evidence based nursing practice in the care of individuals within a multidisciplinary team
4. Analyse the relevant professional ethical and legal frameworks and discuss their relationship to competent professional practice
5. Critically reflect on performance of self and others to identify future learning goals and strategies incorporating evidence based practice
6. Support the principles of WH&S in clinical practice and simulated environments

Subject Content

1. Transition to graduate practice
2. Working in multi-disciplinary teams
3. Clinical practicum
4. Consolidate and review Core Practice Skills, including Hand Hygiene
5. Recognising variations in health status
 - ECG
 - BGL
 - vital signs
 - work of breathing
6. Risk assessment ? falls, pressure injury, venous thromboembolism (VT)
 - Oxygenation
 - Medication therapy (delivery devices, MDI?fs, Anginine, Anti-hypertensives)
7. Prioritising care
 - recognising The deteriorating patient
 - primary su

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

NURS 3034 Promoting Mental Health and Wellbeing 2

Credit Points 10

Legacy Code 401017

Coordinator Gihane Endrawes ([https://directory.westernsydney.edu.au/search/name/Gihane Endrawes/](https://directory.westernsydney.edu.au/search/name/Gihane%20Endrawes/))

Description This unit builds on the foundations of mental health and wellbeing established in earlier units. The relationship between stress and vulnerability will be explored within the context of the psychotic disorders schizophrenia and bipolar affective disorder. Students will gain an understanding of how the principles of recovery, introduced in an earlier unit, are applied to caring for people with schizophrenia and bipolar affective disorder. Altered mood, perception, and thinking will be explored and evidence-based assessment tools and biological and psychosocial interventions introduced for facilitating recovery towards mental health and wellbeing.

School Nursing & Midwifery

Discipline Mental Health Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Co-requisite(s) NURS 2031

Equivalent Subjects NURS 3024 Mental Health Nursing

Restrictions Students must be enrolled in 4691 Bachelor of Nursing or 4692 Bachelor of Nursing Graduate Entry or 4780 Bachelor of Nursing - WSU Online. Students must be enrolled in 4780 to enrol in WSU Online Campus subjects.

Assumed Knowledge

Knowledge related to primary health care, professional communication, behavioural and social sciences, and nursing practice; foundational principles of mental health and wellbeing.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply understanding of the stress-vulnerability model to case scenarios of vulnerable people experiencing schizophrenia and bipolar affective disorder
2. Distinguish between therapeutic and non-therapeutic communication skills in providing care to someone experiencing schizophrenia or bipolar affective disorder
3. Apply the concept of recovery in mental health in relation to the scope of nursing practice
4. Identify indicators of altered mood, perception, and thinking with someone experiencing schizophrenia or bipolar affective disorder
5. Construct a care plan based on individualised needs of people experiencing schizophrenia or bipolar affective disorder
6. Compare and contrast a range of evidence-based biological (including psychopharmacological) and psychosocial interventions for working with people who experience altered mood, perception, and thinking
7. Apply ethico-legal concepts in provision of care for people experiencing schizophrenia or bipolar affective disorder

Subject Content

1. The stress-vulnerability model and its application to mental health promotion and practice
2. Nursing models of care and their application to mental health promotion and practice
3. Effective therapeutic communication for promoting mental health and well-being
4. Mental health assessment in the context of schizophrenia and bipolar affective disorder
 - evidence based assessment tools - Ministry of health, mental health clinical documentation guidelines
5. Interventions for people who experience schizophrenia and bipolar affective disorder
 - a. Biological interventions
 - application of principles from The neurosciences and psychopharmacology for The provision of Safe and effective management with psychopharmacological agents
 - physical health Monitoring
 - b. Psychosocial interventions - an introduction to
 - social skills training
 - strategies for promoting inclusion
 - strategies for early intervention and relapse prevention
 - family focused care - Working with families and informal carers
 - community psychiatric supportive treatment (CPST)
 - Behavioural strategies
 - complementary therapies
6. Legal and ethical issues related to mental health practice
7. Mental health and wellbeing as it relates to
 - people with schizophrenia and bipolar Affective Disorder
 - carers/family/friends
 - services
 - cultural Sensitivity/safety/competence

Assessment

NURS 3035 Promoting Mental Health and Wellbeing 2 (Advanced)

Credit Points 10

Legacy Code 401025

Coordinator Sue Willis ([https://directory.westernsydney.edu.au/search/name/Sue Willis/](https://directory.westernsydney.edu.au/search/name/Sue%20Willis/))

Description This unit will expand further the concepts of mental health and wellbeing established in Promoting Mental Health and Wellbeing 1. The relationship between stress and vulnerability will be critically analysed within the context of the psychotic disorders such as schizophrenia and bipolar affective disorder. Altered mood, perception, and thinking will be explored and evidence-based assessment tools and biological and psychosocial interventions introduced for facilitating recovery towards mental health and wellbeing.

School Nursing & Midwifery

Discipline Mental Health Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Co-requisite(s) NURS 2031

Restrictions Students must be enrolled in 4693 Bachelor of Nursing (Advanced).

Assumed Knowledge

Knowledge related to primary health care, professional communication, behavioural and social sciences, and nursing practice, foundational principles of mental health and wellbeing.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply an in-depth understanding of the stress-vulnerability model to people experiencing schizophrenia and bipolar affective disorder

2. Critically analyse the relationship between ambient and life event stressors and mental health and wellbeing
3. Apply effective therapeutic communication that promotes recovery for persons experiencing schizophrenia or bipolar affective disorder
4. Identify and critically analyse indicators of altered mood, perception, and thinking in person experiencing schizophrenia or bipolar affective disorder
5. Construct an individualised plan of care based on a critical analysis of protective factors for mental health and wellbeing
6. Critique a range of evidence-based biological (including psychopharmacological) and psychosocial interventions for working with people who experience altered mood, perception, and thinking
7. Appraise ethical and legal implications in relation to the promotion of mental health and wellbeing with the person experiencing schizophrenia or bipolar affective disorder

Subject Content

1. The stress-vulnerability model and its application to mental health promotion and practice
2. Person-centred care and problem-solving skills to develop mental health promotion and practice
3. Effective therapeutic communication for promoting recovery in mental health practice
4. Altered mood, perception, and thinking in the context of schizophrenia and bipolar affective disorder as part of the mental state examination component of a mental health assessment
5. Mental health assessment and documentation - Ministry of Health, Mental Health Clinical Documentation Module Guidelines
6. Utilising evidence based practices to facilitate problem-solving and formulating interventions for working with people who experience altered mood, perception, and thinking in the context of schizophrenia and bipolar affective disorder
7. Biological interventions:
 - application of principles from The neurosciences and psychopharmacology for The provision of Safe and effective treatment with psychopharmacological agents
 - understand dopamine pathway related efficacy and side effect profiles
 - medication management strategies to promote Consumer concordance
 - physical health Monitoring and role of mental health Nurse with Addressing metabolic Disorder
8. Psychosocial interventions:
 - social skills training
 - strategies for promoting inclusion
 - strategies for early intervention and relapse prevention
 - family focussed care - Working with families and informal carers
 - community psychiatric supportive treatment (CPST)
 - cognitive-Behavioural strategies
9. Legal and ethical issues related to mental health practice
10. Mental health and wellbeing issues as it relates to people with schizophrenia and bipolar affective disorder
 - carers/family/friends
 - services
 - cultural Sensitivity/safety/competence
11. Case histories highlighting altered mood, perception, and thinking, specifically related to schizophrenia or bipolar affective disorder

NURS 3036 Psychosocial Issues in the Perinatal Period

Credit Points 10

Legacy Code 401225

Coordinator Rebecca O'Reilly ([https://directory.westernsydney.edu.au/search/name/Rebecca O'Reilly/](https://directory.westernsydney.edu.au/search/name/Rebecca%20OReilly/))

Description In this unit students will gain knowledge of the psychosocial risk and protective factors that influence outcomes for women and their babies. Students will explore issues related to perinatal mental health. This will include antenatal and postnatal depression and anxiety, substance misuse, domestic violence and the midwife's role in supporting women and their families in perinatal grief and loss situations. Through interactive discussions and role play students will strengthen their skills in psychosocial assessment and working in partnership with women and families to explore concerns, facilitate behaviour change in individual and group-based learning contexts and identify effective early intervention strategies and referral pathways.

School Nursing & Midwifery

Discipline Midwifery**Student Contribution Band** HECS Band 1 10cp**Level** Undergraduate Level 3 subject**Pre-requisite(s)** NURS 2004**Co-requisite(s)** NURS 3006 AND
NURS 3030 AND
NURS 3005**Equivalent Subjects** NURS 3027 Midwifery Practice – Teaching and Learning**Restrictions** Students must be enrolled in 4684 Bachelor of Midwifery

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply a socioecological health care model to determine risk and protective factors that influence outcomes for a woman, her children and family
2. Explain the impact of perinatal depression and anxiety on the woman, her infant and family and the potential consequences for the mother-infant relationship
3. Evaluate the impact of domestic/family violence and parental substance misuse on the health and wellbeing of women, infants and families
4. Discuss the role of the midwife in managing grief and loss situations for the woman, and her family
5. Discuss the assessment, planning and implementation of specific midwifery care for women and their neonates with complex psychosocial needs
6. Evaluate appropriate early intervention and referral pathways for women experiencing complex psychosocial issues including individual and group based learning and support
7. Critically analyse and discuss adult learning principles and communication skills required by midwives to work in partnership with women, promote health improvement and facilitate behaviour change in complex situations

Subject Content

1. Socio-ecological model
2. Psychological and social risk factors that influence outcomes for the woman, newborn and family
3. Family support and other protective factors that influence outcomes for the woman, newborn and family
4. Perinatal mental health (depression and anxiety)
 - signs and Symptoms of Perinatal mood disorders
 - using The EPDS
 - treatment & management
 - strategies to support families
5. Grief and loss
 - supporting women and their families
6. Birth interventions and birth trauma
7. stillbirth /neonatal death, SIDS
8. maternal grief / family grief
9. Domestic violence and substance misuse
 - Defining DV and its associated Factors
 - substance misuse (alcohol and other drugs)
 - early intervention strategies and programs
 - impact on parenting and childhood outcomes
 - child protection
10. Psychosocial risk assessment and depression screening

11. Cultural issues including experiences of Aboriginal and Torres Strait Islander families and women and families from migrant and refugee backgrounds

12. Midwives role in supporting women with complex psychosocial needs

- Models of care and referral pathways

- Working in partnership with women and families in the perinatal period including: a) Skills needed to explore to gain a clear understanding of a woman's concerns or situation; recognising skills and qualities needed in a midwife to work in partnership;

13. Self Care

- clinical supervision and reflective practice

NURS 3037 Risk Mitigation and Ethics for Australian Health Professionals

Credit Points 10**Legacy Code** 401240**Coordinator** Joan Lynch ([https://directory.westernsydney.edu.au/search/name/Joan Lynch/](https://directory.westernsydney.edu.au/search/name/Joan%20Lynch/))**Description** This unit will provide a comprehensive understanding of the ethical standards required by health care professionals when providing patient care with a focus on risk minimisation for patients. Recently litigated cases will be used as case studies to explore ethical dilemmas that health professionals can expect to arise over the course of their professional careers. Knowledge gained will greatly assist health professionals to deliver safe and ethical health care to their patients. Only health professionals regulated in Australia whose professional bodies have designated codes of conduct, codes of professional practice and / or codes of ethics will be utilised in this unit.**School** Nursing & Midwifery**Discipline** Nursing**Student Contribution Band** HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Students must have successfully completed 160 credit points of an undergraduate degree in nursing, midwifery, medicine or a health related degree.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the ethical standards of each Australian health professional.
2. Analyse the role of ethical codes of conduct for Australian health professionals.
3. Critically reflect on the ethical role of Australian health professionals in selected case studies based on recently litigated cases.
4. Formulate evidence-based strategies in managing ethical dilemmas in the provision of health care in Australia.
5. Critically reflect on the impact of ethical dilemmas on the Australian health professional, the individual, family and caregivers.
6. Differentiate between ethical and legal responsibilities of Australian health professionals.

Subject Content

- historical sources of Ethical codes of conduct for health professionals in Australia.
- current sources of Ethical codes of conduct for health professionals in Australia.
- role of Ethical codes for health professionals in Minimising Risk for patients, families and caregivers.
- case Law and professional body decisions on breaches of Ethical codes of conduct.
- Ethical dilemmas Utilising The relevant Ethical codes of conduct.
- evidence based strategies when managing Ethical dilemmas in healthcare.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz - online	20 mins	20	Y	Individual

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/ws_u_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.

- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Essential equipment

Students must wear the School of Nursing and Midwifery clinical uniform, including correct fully enclosed ALL black shoes [that meet WHS requirements - Shoes must be low heeled, fully enclosed, non-slip soles (Reeboks, joggers, sandals, sneakers, gym shoes, sandals, slippers, ballet shoes, etc. are NOT acceptable.)] to all CPU classes and the clinical placement.

The uniform can be purchased from the retail store on campus.

Access to an internet enabled device is essential in order to be able to: access course materials; to participate in discussion groups; and to access additional resources provided by the lecturer during the session. See http://www.westernsydney.edu.au/currentstudents/current_students/services_and_facilities/uwsonline_student_support (https://www.westernsydney.edu.au/currentstudents/current_students/services_and_facilities/uwsonline_student_support/) for further information.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

NURS 4001 Methods and Methodologies in Midwifery Research

Credit Points 10

Legacy Code 401439

Coordinator Antoinette Cotton ([https://directory.westernsydney.edu.au/search/name/Antoinette Cotton/](https://directory.westernsydney.edu.au/search/name/Antoinette%20Cotton/))

Description This unit will broaden and deepen students understanding of research methodologies and methods and develop research skills in order to apply these to a specific Bachelor of Midwifery (Honours) research project.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 4 subject

Restrictions Students must be enrolled in Bachelor of Midwifery (Honours).

Assumed Knowledge

A basic knowledge of research methods at undergraduate level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate midwifery research methodologies
2. Develop a coherent research proposal and plan
3. Evaluate specific data collection method(s) and analyses
4. Identify and devise strategies to ensure rigour/validity/reliability of a planned study
5. Identify potential ethical dilemmas and devise strategies to mitigate risk

Subject Content

Midwifery Research methodologies and research design

Data collection method(s) and analysis

Planning to ensure Rigour/Validity and Reliability

Use of ethical principles in the conduct of research

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Proposal	2,500 words	60	N	Individual
Essay	1,500 words	40	N	Individual

NURS 4002 Midwifery Honours Thesis (Part-Time)

Credit Points 20

Legacy Code 401443

Coordinator Antoinette Cotton ([https://directory.westernsydney.edu.au/search/name/Antoinette Cotton/](https://directory.westernsydney.edu.au/search/name/Antoinette%20Cotton/))

Description Research is a necessary undertaking toward the continued development of midwifery science and practice. The aim of this unit is to both broaden and deepen Bachelor of Midwifery (Honours) students' understanding of research methods and the application of knowledge and skills to conceptualise, design and conduct a research project.

The unit provides an opportunity for students, under the guidance of their supervisors to plan and implement a research project related to midwifery which results in the production of a written thesis of between 15,000 to 20,000 words in length, which demonstrates proficiency in the execution of the study and ability to effectively communicate results and conclusions.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 60cp

Level Undergraduate Level 4 subject

Restrictions Students must be enrolled in Bachelor of Midwifery (Honours).

Assumed Knowledge

A basic knowledge of research methods at undergraduate level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Investigate a midwifery related issue or problem in depth through a review of the literature
2. Identify a researchable question related to a midwifery issue or problem
3. Develop a research proposal
4. Obtain formal approvals for research, e.g. ethical approval, where required
5. Perform data collection and data analysis relevant to the research proposal
6. Contribute to discussions about the research process with professional colleagues
7. Produce a thesis of the prescribed length and format which demonstrates proficiency in the execution of the study and ability to effectively communicate results and conclusions

Subject Content

Students are required to engage in scholarly work consistent with the expectation of an Honours program.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

NURS 4003 Midwifery Honours Thesis A (Full-time)

Credit Points 20

Legacy Code 401441

Coordinator Antoinette Cotton ([https://directory.westernsydney.edu.au/search/name/Antoinette Cotton/](https://directory.westernsydney.edu.au/search/name/Antoinette%20Cotton/))

Description Research is a necessary undertaking toward the continued development of midwifery science and practice. Midwifery Thesis is comprised of Midwifery Thesis A (20 credit points) which is a continuing unit to Midwifery Thesis B (40 Credit points) in which the completed Midwifery Thesis is due to be submitted for examination. In the Midwifery Thesis A unit, in consultation with their academic supervisors, the student will select a topic, conduct a literature review, design and implement a research study, and report the findings and their implications. The unit provides an opportunity for students, under the guidance of their supervisors to propose, plan and implement a research project related to midwifery, and work towards planning, developing and producing a written thesis due to be completed in the Midwifery Thesis B unit.

NURS 4005 Midwifery Research

Credit Points 10

Legacy Code 401438

Coordinator Rebecca O'Reilly ([https://directory.westernsydney.edu.au/search/name/Rebecca O'Reilly/](https://directory.westernsydney.edu.au/search/name/Rebecca%20Reilly/))

Description Research is a necessary undertaking toward the continued development of midwifery science and practice. The aim of this unit is to both broaden and deepen Bachelor of Midwifery (Honours) students' understanding of various research methods and to extend their ability to discuss, appraise and critique the work of others. An awareness of available methodologies will prepare students to participate in their own research.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 4 subject

Restrictions Students must be enrolled in Bachelor of Midwifery (Honours)

Assumed Knowledge

A basic knowledge of research methods at undergraduate level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Undertake advanced and complex electronic searches of databases
2. Critically appraise research articles, reports and grey literature
3. Analyse and synthesise the literature relevant to a chosen area of research
4. Apply critical reflection, reasoning and judgement to the literature in the field
5. Effectively communicate, with confidence and knowledge, literature on a chosen area/topic

Subject Content

Overview of the research process and the scholarly review of literature
Articulation of the relationship between research, the midwifery profession, clinical practice and evidence-based care and/or interventions

Critical appraisal, analysis and synthesis of research reports and the literature

Application of critical judgement, reasoning and independent thought in writing/presenting a scholarly review of pertinent literature associated with a defined topic

Effective communication of research

Assessment

Coordinator Rebecca O'Reilly ([https://directory.westernsydney.edu.au/search/name/Rebecca O'Reilly/](https://directory.westernsydney.edu.au/search/name/Rebecca%20O'Reilly/))

Description Research is a necessary undertaking toward the continued development of nursing science and practice. The aim of this unit is to both broaden and deepen Bachelor of Nursing (Honours) students' understanding of research methods and to extend their ability to discuss, appraise the work of others and participate in their own research.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 4 subject

Incompatible Subjects LGYA 7109 - Applied Nursing Research

Restrictions Students must be enrolled in the Bachelor of Nursing (Honours).

Assumed Knowledge

A basic knowledge of research methods at undergraduate level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Undertake advanced and complex electronic searches of databases
2. Critically appraise research articles, reports and literature
3. Analyse and synthesise the literature relevant to a chosen area of research
4. Complete a succinct literature review of the student's chosen area/topic and report findings that reflects critical judgement, reasoning and independent thought
5. Effectively communicate, with confidence and knowledge, literature on a chosen area/topic

Subject Content

- Overview of The research process and The Scholarly Review of literature
- articulation of The relationship between research, The Nursing profession, clinical practice and evidence based care and/or interventions
- Critical appraisal, analysis and Synthesis of research reports and The literature
- application of Critical judgement, reasoning and independent thought in writing/Presenting A Scholarly Review of pertinent literature associated with A defined Topic
- effective communication of research

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Critical Review	2000-2500 words	55	N	Individual
Critical Review	1000-1500 words	35	N	Individual
Presentation	15 minute presentation	10	N	Individual

NURS 7001 Advanced Clinical Practice in Mental Health Nursing

Credit Points 10

Legacy Code 401202

Coordinator Greg Clark ([https://directory.westernsydney.edu.au/search/name/Greg Clark/](https://directory.westernsydney.edu.au/search/name/Greg%20Clark/))

Description This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). Students are required to demonstrate the capacity to work autonomously in a mental health setting and be able to utilise supervision to support achievement of unit

learning outcomes. Students undertake at least 300 hours supervised advanced clinical practice in assessment, treatment planning and provision of care for clients in a mental health setting. Clinical practice supervision and support is provided by a Primary Supervisor/Mentor/ Assessor and a multidisciplinary clinical support network who will review the student's work in respect of working at an advanced level of clinical practice towards the attainment of a Nurse Practitioner qualification. A clinical assessment peer review panel will be convened at the end of the session to assess the student's knowledge, clinical decision-making, understanding of therapeutic interventions including pharmacological and non-pharmacological agents, as well as their capacity to meet all requirements of the Nurse Practitioner Standards for Practice.

School Nursing & Midwifery

Discipline Mental Health Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) NURS 7006 AND
NURS 7005 AND
NURS 7041

Equivalent Subjects NURS 7046 Advanced Mental Health Nursing Clinical Practice 1 NURS 7047 Advanced Mental Health Nursing Clinical Practice 2

Restrictions

Students must be enrolled in 4745 Master of Mental Health Nursing (Nurse Practitioner) program. It is a requirement that students are working in mental health services at an advanced practice level, must nominate a Primary Mentor and must nominate a clinical panel.

Assumed Knowledge

This is an advanced level clinical nursing subject. Students are expected to be working in situations where they can demonstrate this level of practice. They will have advanced skills in mental health nursing assessment, clinical decision-making and treatment planning; knowledge of mental disorders and illnesses; human response to mental illness; the development of relationships with people with mental illness and their families; and a range of treatments for mental illness.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate and demonstrate a capacity for clinical decision making throughout the therapeutic case management of clients with complex mental health problems
2. Critically evaluate and demonstrate ongoing assessment of health status and health risk and the use of associated pharmacological and non-pharmacological agents
3. Apply and critically evaluate the value of appropriate psychotherapeutic, psychoeducational and health promoting interventions
4. Provide and evaluate collaboration with clients' significant others
5. Evaluate the utilisation of the skills of other team members/health professionals/other agencies and assess educational imperatives
6. Critically discuss the importance of cultural issues in the treatment of mental health problems and disorders
7. Critically discuss the professional, legal and ethical parameters of relationships and treatment in mental health settings
8. Critically evaluate the value of teamwork and leadership
9. Critically evaluate documentation of client assessment and treatment programs
10. Utilise supervision and evaluate the value of the supervision process
11. Demonstrate the capacity for leadership in policy analysis

Subject Content

Advanced skill development related to autonomous, assessment, early intervention, treatment planning and care provision in mental health settings for clients across the lifespan presenting with a range of mental health problems and disorders in a variety of clinical and cultural contexts.

Clinical decision-making that reflects the capability to triage, problem-solve and manage time effectively.

Establishment and use of client outcome measurement to reflect individual difference.

Ethical and legal parameters of decision-making in mental health. Identification and use of resources for consultation and referral (eg, CALD, women's services) including recourse to national and international research and information technology.

Clinical supervision relationships: identification of process, uti

NURS 7002 Advanced practice: Infant and Child feeding and Nutrition

Credit Points 10

Legacy Code 400834

Coordinator Cathy Dickson ([https://directory.westernsydney.edu.au/search/name/Cathy Dickson/](https://directory.westernsydney.edu.au/search/name/Cathy%20Dickson/))

Description This unit provides students with advanced theoretical knowledge around infant and young child feeding. The course is predominantly theoretical although students will also be expected to gain practical skills including developing the capacity to undertake comprehensive breastfeeding assessments and assessment of nutritional status in children 0 to 5 years of age. Topics covered include management of complex breastfeeding problems and skills to support women who have unexpected birth outcomes with breastfeeding; the impact of acute and chronic infant and childhood illness on nutritional status and feeding; evidence based strategies and approaches to facilitate good nutritional practices including breastfeeding among disadvantaged and vulnerable populations and working effectively in multidisciplinary teams and with peer or volunteer support groups to promote and support healthy infant and young child feeding practices. There is 120 hours of theoretical content of which approximately 90 hours is directly related to breastfeeding and human lactation. The role of the lactation consultant and legal and ethical issue are addressed for those who wish to work towards this qualification in the future.

School Nursing & Midwifery

Discipline Mothercraft Nursing and Family and Child Health Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be a Registered Nurse, Registered Midwife or health professional due to public safety issues.

Assumed Knowledge

Basics of breastfeeding including techniques for positioning and attachment and common breastfeeding problems; socio-cultural and political context of infant feeding; normal newborn behaviour, infant-parent attachment, factors that influence the transition to parenthood and parenting styles; skills required to critically appraise research literature and high level communication skills and capacity to work in partnership with families.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Perform a comprehensive breastfeeding assessment, including the use of tools such as PROBIT and prepare infant and child feeding plans in partnership with women and families
2. Manage complex breastfeeding problems including the use of breastfeeding aids
3. Critically evaluate the impact of medications on breastfeeding including breastfeeding in the context of substance misuse
4. Demonstrate skills to effectively support breastfeeding women who have an unexpected birth experience or outcome - particularly among groups with lower socioeconomic status

5. Demonstrate knowledge of acute and chronic diseases in infants and children that affect nutritional status and feeding such as cystic fibrosis, cleft palate, Downs syndrome
6. Demonstrate knowledge and skills to implement and sustain the BFHI at the local level including development of infant feeding policies and guidelines
7. Discuss and critically analyse the role of the lactation consultant and multidisciplinary teams with peer or volunteer support groups to promote and support healthy infant and young child feeding practices including legal implications and ethical practice
8. Apply communication and other technologies effectively in personal and professional learning
9. Demonstrate highly developed skills as a self-reliant learner and work effectively in groups and teams

Subject Content

Module 1

- breastfeeding assessment
- PROBIT tool
- Acute and chronic diseases / abnormalities in children and impact on feeding
- evidence based practice to inform management of complex breastfeeding problems and Nutritional Issues in toddlers

Module 2

- implementing and Evaluating strategies and approaches to support breastfeeding and healthy nutrition in young children
- implementing and sustaining BFHI
- management of malnutrition and anaemia in young children

Module 3

- The role of Lactation consultants
- legal and Ethical implications in practice
- Working effectively with other professionals such as speech therapists and with lay / peer supporters
- Continuing professional development, portfolio development, clinical supervision

Prescribed Texts

- There is no essential textbook.

Teaching Periods

NURS 7003 Applied Clinical Practice using Simulation

Credit Points 10

Legacy Code 401204

Coordinator Sharon Jacobs ([https://directory.westernsydney.edu.au/search/name/Sharon Jacobs/](https://directory.westernsydney.edu.au/search/name/Sharon%20Jacobs/))

Description Components of skilled nursing practice in acute and critical care settings include clinical reasoning, accountability and patient advocacy. In this unit students will identify a complex case study from their current practice world as the basis for their assessment. This unit utilises clinical simulation and a case study approach to enable students to develop their clinical expertise in their individual workplace. Students will be required to participate in clinical simulation workshops which will be utilised to develop and enhance clinical nursing skills in acute or critical care settings.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate or non-award program.

Assumed Knowledge

A fundamental understanding in the areas of patient assessment skills, pathophysiology and pharmacology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply diagnostic and clinical reasoning skills
2. Critically analyse treatment management plans using evidence-based practice
3. Develop a patient management plan for patients experiencing complex health problems
4. Synthesise key points and principles of the simulation design in the context of patient care
5. Perform a simulated learning task in the delivery of patient care in a specialty practice area
6. Reflect on their practice and their ability to conduct a simulation scenario.

Subject Content

Applying knowledge through clinical reasoning

Advanced assessment skills

Applying evidence-based principles in clinical settings

Frameworks and processes for developing and delivering simulation scenarios

Critical reflection processes

The debriefing process

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

NURS 7004 Applied Research in Health Care

Credit Points 10

Legacy Code 401167

Coordinator Sheree Smith ([https://directory.westernsydney.edu.au/search/name/Sheree Smith/](https://directory.westernsydney.edu.au/search/name/Sheree%20Smith/))

Description Research is a necessary undertaking toward the continued development of nursing, midwifery and health science and practice. This unit prepares students for undertaking or participating in research in the clinical setting. It also seeks to prepare students to consider higher degree research opportunities. Students will explore the various theoretical underpinnings of research as well as develop a clear understanding of various research designs, data collection methods, sampling techniques and data analysis.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 7109 - Applied Nursing Research

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand the theoretical underpinnings of research methodology
2. Conduct a critical literature review to define a gap in knowledge that requires investigation
3. Develop a research question and study aim
4. Select an appropriate research methodology to investigate a clinical problem
5. Plan data collection that will provide answers to a research question, are congruent with the methodology chosen, and will collect appropriate data
6. Identify ethical issues related to human research
7. Select appropriate analysis techniques for various types of data
8. Identify methods of disseminating research findings

Subject Content

Philosophical underpinnings of research

The research process
 Sampling strategies
 Quantitative research designs
 Types of qualitative research
 Mixed methods research
 Ethical considerations
 Data collection strategies
 Qualitative data analysis
 Overview of statistical analysis
 Interpretation of study findings

Teaching Periods

NURS 7005 Assessment for Advanced Practice Mental Health Nurses

Credit Points 10

Legacy Code 400228

Coordinator Greg Clark ([https://directory.westernsydney.edu.au/search/name/Greg Clark/](https://directory.westernsydney.edu.au/search/name/Greg%20Clark/))

Description This unit examines assessment and treatment planning practices for advanced practice nurses. Components of the unit include advanced assessment skills, diagnostic decision making, judicious ordering, reading and interpretation of pathology and radiology tests, triaging and prioritisation, pharmacology, intervention and referral skills. These skills will be addressed in a range of assessment and decision-making situations, to include assessment across the lifespan and recognizing deviation from the norm. Nurses working at an advanced practice level are expected to be able to autonomously undertake comprehensive mental health assessments, and to apply clinical judgement to decision making and treatment planning.

School Nursing & Midwifery

Discipline Mental Health Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in program 4745, Master of Nurse Practitioner (Mental Health). Students in 4745 must be working in mental health services at an advanced practice level and must nominate a primary supervisor / mentor / assessor and a clinical support group.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate and apply the knowledge and skills required for comprehensive and holistic clinical assessment of clients, including physical and psychological assessment from across the lifespan presenting with mental health problems and disorders.
2. Select and apply a variety of interview techniques in order to complete autonomous, comprehensive, mental health (including emotional, cultural, social and spiritual perspectives) and physical assessments.
3. Critically analyse and apply problem solving skills in a range of assessment and decision-making situations taking into account differential diagnoses and complex clinical decision making imperatives.
4. Critically evaluate the utilisation of diagnostic tests and their interpretation for the assessment and treatment of clients across the lifespan with mental health problems and disorders.
5. Critically analyse the ethical, legal, collaborative and prioritisation dimensions of decision-making processes in mental health assessment and treatment.
6. Critically discuss the role of client, family, significant others and community in mental health assessment and treatment planning processes.
7. Critically discuss treatment options including pharmacology and the skills required for judicious use of medication.

Subject Content

Holistic and comprehensive assessment across the lifespan

Mental health assessment

Early intervention

Physical health assessment and diagnostic investigations and interpretation

Cultural and Indigenous awareness in assessment

Consumer, family and carer involvement in assessment

Trauma history assessment

Clinical decision-making and holistic treatment planning and ordering of diagnostic tests

Holistic assessment, differential diagnosis and treatment planning for:

- psychosis
- mood disorders
- dual Diagnosis (substance Abuse and mental illness)
- Borderline personality Disorder
- anxiety disorders
- adjustment Disorder
- conditions that mimic Brain disorders
- other disorders as appropriate to individual student learning needs

Clinical supervision

Recovery and assessment

Assessment

NURS 7006 Biological Considerations in Mental Health and Mental Illness for Advanced Practice

Credit Points 10

Legacy Code 400957

Coordinator Gihane Endrawes ([https://directory.westernsydney.edu.au/search/name/Gihane Endrawes/](https://directory.westernsydney.edu.au/search/name/Gihane%20Endrawes/))

Description This subject examines neuroanatomy and neurophysiology as they apply to altered thought, mood, perception and behaviour associated with mental illness and knowledge of physical health problems commonly associated with psychiatric treatment and/or mental illness, their identification, management and treatment.

School Nursing & Midwifery

Discipline Mental Health Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) -

Restrictions

Students must be enrolled in program 4720 Graduate Diploma in Mental Health Nursing, 4719 Master of Mental Health Nursing, 4745 Master of Nurse Practitioner (Mental Health) or 4746 Graduate Diploma in Nursing Leadership (Mental Health) (exit only) to register in this subject.

Assumed Knowledge

Students are expected to have a working knowledge of mental health assessment and treatment procedures, including basic pharmacological principles and knowledge of drugs used for mental illnesses and disorders.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically examine and apply the knowledge of neuroanatomy and neurobiology as it applies to altered thought, mood, perception and behaviour associated with mental illness.
2. Critically examine a range of physical health problems and risk factors commonly associated with psychiatric treatment and/or mental illness.

3. Apply integrated knowledge and critically explore the interactions between physical health problems and mental illness.
4. Critique evidence-based treatments and management strategies for physical health problems in people who experience mental illness.
5. Critically analyse how biological comorbidities can be applied to advanced mental health nursing practice.

Subject Content

Module 1. Introduction and Neurobiology

- Introduction to subject and basic pathophysiology.
- Homeostasis and cellular function
- Neuroanatomy and physiology associated with mental illness as it applies to altered thought, mood, perception and behaviour
- Neurobiology of mental illness

Module 2. Factors Affecting Health

- Nutrition and Diet
- Sleep
- Stress and chronic disease

Module 3. Specific Health Conditions

- Endocrine disorders
- Obesity and diabetes
- Cardiac disorders and metabolic syndrome

Module 4. Assessment and Interventions

- Identification, treatment and management of physical health problems commonly associated with psychiatric treatment and/or mental illness
- Cardiometabolic syndrome
- Cardiac disorders
- Respiratory disorders
- Endocrine disorders
- Nutritional disorders including eating disorders and obesity
- Diabetes

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

NURS 7007 Bioscience for Midwifery Practice

Credit Points 10

Legacy Code 401088

Coordinator Fiona Arundell ([https://directory.westernsydney.edu.au/search/name/Fiona Arundell/](https://directory.westernsydney.edu.au/search/name/Fiona%20Arundell/))

Description This unit provides students with an understanding of the biological and physiological aspects of human reproduction including the menstrual cycle, fertilisation and embryology, pregnancy, labour, birth and the early postnatal weeks. Emphasis will be placed on normal maternal anatomy and physiology of pregnancy, labour and birth and the postnatal period. It will include fetal growth and development, adaptation of the newborn and growth and development to six weeks of age.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4697 Graduate Diploma in Midwifery and can only be undertaken by a registered nurse employed in a participating NSW Health Local Health District facility in the position of a midwifery student.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and describe the normal biological and physiological processes related to pregnancy, labour and birth, and the postnatal period
2. Describe growth and development of the fetus and relate it to stages of pregnancy
3. Describe physiological changes that occur at birth and growth and development of the newborn to six weeks of age

Subject Content

1. Pregnancy; human reproduction, anatomy and physiology related to pregnancy, labour and birth, fetal growth and development
2. Labour and birth; initiation and maintenance and progress of labour, birth process (fetal position and descent, contraction patterns, mechanism of labour and birth in a variety of positions)
3. Postnatal; maternal physiological changes, physiology of the newborn at birth, newborn growth and development to six weeks

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

NURS 7009 Child and Family Health Practice: Supporting Growth and Development

Credit Points 10

Legacy Code 400972

Coordinator Christine Taylor ([https://directory.westernsydney.edu.au/search/name/Christine Taylor/](https://directory.westernsydney.edu.au/search/name/Christine%20Taylor/))

Description This subject provides the student with knowledge of the theories of child development and the foundational knowledge and skills to be applied in the screening, surveillance and promotion of health and well-being of young children and families. This includes current immunisation schedules and use of evidence-based developmental screening tools. Content will focus on the normal physical, social and emotional growth and development of young children (0-5 years). The importance of the early years in brain development including infant-parent attachment will be linked to an exploration of child behaviour, sleep and settling, play and safety issues. The child and family health nurses' role in supporting families experiencing infant sleep and settling difficulties and behaviour problems will be addressed. The knowledge gained in this unit will be consolidated through virtual clinical placement.

School Nursing & Midwifery

Discipline Mothercraft Nursing and Family and Child Health Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4713 Master of Child and Family Health (Karitane), 4714 Graduate Diploma in Child and Family Health (Karitane) or 4715 Graduate Certificate in Child and Family Health (Karitane).

Assumed Knowledge

Students require basic knowledge of infant and child health at an undergraduate level, augmented with clinical experience as a general Registered Nurse or Registered Midwife.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse and incorporate the theories of child development (physical, cognitive social and emotional), and maternal-infant and parental-infant attachment, as applied to child and family health practice.
2. Apply age appropriate developmental tools to undertake a complete physical assessment of any child aged 0 to 5 years using evidence-based developmental screening tools and interpret the outcomes of the physical assessment using clinical judgement based of child development and range of expected 'norms'.
3. Utilise evidence-based developmental screening tools to support clinical decision making and practice in relation to common well child concerns for parents.
4. Critically discuss the interaction of child, family and community factors that influence child development (physical, cognitive social and emotional), including the importance of play to global child development.
5. Analyse and synthesise contemporary issues related to the need for immunisation and apply the current immunisation protocol in practice.
6. Consider and relate knowledge to the provision of a safe environment for children others and staff.
7. Synthesise current evidence to develop flexible individualised clinical management plans based on best practice principles to meet the unique needs of each family.
8. Apply communication and other technologies effectively in personal and professional learning.
9. Prioritise and select appropriate skills as a self-reliant learner to effectively work in groups and teams.

Subject Content

Module 1: Child Growth and development

- Pregnancy - foetal growth and development
- social and emotional development
- language and communication
- cognitive development
- Gross motor development
- foundational theories and principles of child development. including infant-parent attachment
- The Importance of play in child development

Module 2: Assessment and screening for growth and development

- appropriate tools for child growth and development assessment
- clinical skills for child growth and development assessment
- clinical knowledge and skills to support families experiencing infant/child sleep and settling difficulties
- common well child concerns for parents
- childhood behaviour
- childhood Immunisation as A protective health measure

Assessment

NURS 7010 Child and Family Health: Professional Practice and Frameworks

Credit Points 10

Legacy Code 400971

Coordinator Rachel Gregory-Wilson ([https://directory.westernsydney.edu.au/search/name/Rachel Gregory-Wilson/](https://directory.westernsydney.edu.au/search/name/Rachel%20Gregory-Wilson/))

Description Child and family health is a diverse speciality area with child and family health professionals required to work autonomously across a variety of clinical settings. This unit will focus on the scope and standards of practice of Child and family health practise exploring; historical beginnings and current models of care, appropriate legal & ethical issues and government policies and initiatives that influence practice. Informed by the principles of Primary Health Care, the student will gain skills in supporting families and children within the context of a strengths based partnership model. Health promotion, public health, health surveillance and cultural competence are introduced in this unit. The various strategies for the appropriate support of child and family health professionals will be addressed. In this unit emphasis is also placed on critical thinking and the development of scholarly writing.

School Nursing & Midwifery

Discipline Mothercraft Nursing and Family and Child Health Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects NURS 7063 - Child Family Health Nursing Professional Practice and Frameworks

Restrictions

Students must be enrolled in 4682 Master of Child and Family Health (Karitane), 4713 Master of Child and Family Health (Karitane), 4714 Graduate Diploma in Child and Family Health (Karitane) or 4715 Graduate Certificate in Child and Family Health (Karitane).

Assumed Knowledge

An understanding of professional frameworks and competencies for the Registered Nurse or Registered Midwife at a undergraduate level, augmented with clinical experience at a general Registered Nurse or Registered Midwife level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically discuss the autonomous role of the child and family health professional, and models of care, related to the health and wellbeing of children and families
2. Analyse the development of the role of the child and family health professional in relation to the dynamic nature of the family in society
3. Develop a sound knowledge of the scope of practice, accompanying standards, and legal and ethical principles that guide child and family health practice
4. Identify and discuss the implications of various health policies on child and family health practice
5. Evaluate the principles of a strengths based partnership approach when working with children and families
6. Examine the importance of cultural competence, including self ? reflection, when practicing within a multicultural context and with Aboriginal and Torres Strait Islander communities
7. Explain the need for clinical supervision and its role in professional development as a means to advance professional knowledge, interests and effectiveness and to support nurses working with complex presenting issues
8. Apply communication and other technologies effectively in personal and professional learning
9. Prioritise and select appropriate skills as a self- reliant learner to effectively work in groups and teams

Subject Content

Module 1

- historical development of child & family health
- Models of care for children and families
- health promotion, surveillance and Screening
- The principles of A strengths based partnership approach

Module 2

- legal and Ethical Issues
- cultural competence and cultural safety
- occupational health and safety
- health policy and its influence on The role of The child and family health professional

Module 3

- The concept of autonomous practice
- scope of practice, practice Standards and competencies
- The professional portfolio
- clinical supervision

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Essay	2,000 words	50	N	Individual
Essay	2,000 words	50	N	Individual
Participation	Max 250 words each	S/U	Y	Individual

NURS 7011 Childbirth in the Australian Context

Credit Points 20

Legacy Code 401089

Coordinator Leanne Luck ([https://directory.westernsydney.edu.au/search/name/Leanne Luck/](https://directory.westernsydney.edu.au/search/name/Leanne%20Luck/))

Description This unit provides students with the knowledge to work, using a primary health care approach, with women and their families during childbirth including the transition to parenthood. Emphasis will be placed on the biological, psychosocial and cultural aspects of the pregnancy, birth and the postnatal period and understanding of the role of the midwife in maintaining a woman and family focus within a continuity of care model. The neonatal period will also be examined. Childbirth in our culturally diverse maternity health system will be explored, investigated, analysed and discussed with a specific focus on Aboriginal and Torres Strait Islander peoples. This will include the history of Aboriginal and Torres Strait Islander peoples and how events in history have impacted on their health and birthing practices. Experiences of women from other countries and cultures will be examined.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 20cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4697 Graduate Diploma in Midwifery and be a registered nurse employed in a participating NSW Health Local Health District facility in the position of a midwifery student.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse and explain the role of the midwife, within a continuity of care framework, in the provision of care to a woman

- and her family including knowledge of the legal and ethical issues related to the woman and her newborn/s
2. Apply knowledge of the biological, physiological, psychological and social needs of women pre-conceptually, during pregnancy, labour and birth and the postnatal period to facilitate an optimal experience for the woman including transition to parenthood;
 3. Critically analyse the impact of birth on a woman's sense of self and her emotional, psychological, social and cultural needs and those of her newborn and her family
 4. Apply knowledge of the principles of adult learning, primary health care and public health policy to facilitate opportunities for health promotion with the woman, her family and community particularly relating to Aboriginal and Torres Strait Islander women
 5. Critically evaluate the socio-cultural, economic, political and personal context of infant feeding decisions in Australia
 6. Critically analyse historical events that have impacted on the life and c

Subject Content

1. Midwives Working with Women

- primary health care approach to Pre-conceptual health, conception and pregnancy.
- partnership in care/Continuity of Midwifery care and Midwifery led antenatal care
- Midwifery care to support The individual needs of women in labour and birth
- Facilitating normal birth
- Addressing cultural needs
- Transitions of care

2. Midwifery Care - Pregnancy

- role of The midwife
- assessment and Screening during Pregnancy
- Pharmacological substances commonly used in Midwifery practice
- Working with women and their families
- psychosocial and emotional needs during Pregnancy, labour and birth
- health promotion and skills in facilitating Adult learning opportunities for women in Pregnancy including nutrition, oral health care, physical Activity, Pelvic floor health
- options for childbirth education and preparation for birth and parenting
- Addressing The cultural needs of Aboriginal and Torres Strait Islander women and women from CALD backgrounds

3. Midwifery Care - Labour

- Midwives role in Assessing and Monitoring labour and birth
- Promoting physiological labour and birth; Rationale for upright positions and movement, Physiology of pain, perception of pain and pain control theories, Midwifery care for comfort eg massage, complementary therapies, heat and water, Nitrous Oxide, ster
- Supporting Birth Discussions; Preparation for birth, Midwives role in supporting the birthing woman (including waterbirth), Physiological and active third stage, Examination of the placenta.
- Midwives role in care of the newborn; Newborn pharmacology, Nutritional requirements, Initiating skin to skin, Supporting the first breast feed.

4. Midwifery Care - Postnatal

- The Midwives role in Postnatal care
- Working with women and their families post birth
- partner inclusive practice
- physiological, psychosocial and emotional changes and needs
- options Postnatal education and preparation for parenting
- newborn care and Immunisation

5. Cultural Awareness

- historical events that impact on Aboriginal and Torres Strait Islanders peoples
- traditions around birth and mothering

- women's experiences of childbirth
 - Aboriginal and Torres Strait Islander people and bridging The gap?
 - Working in partnership
 - cultural Factors effecting birth outcomes
6. Infant feeding decisions in Australia
- politics of breastfeeding
 - who Code for The Marketing of breast milk substitutes
 - Baby Friendly health initiative in Australia
 - supporting women in their feeding decision

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Essay - Development of an antenatal education session	1,500 words	30	N	Individual
Presentation - Expanding on a topic that is part of the unit content	10 minute class presentation	20	N	Individual
End of session closed book examination: MCQ & short answer	2 hours	50	Y	Individual

Teaching Periods

NURS 7012 Clinical Practice: Infant and Child Nutrition and Feeding

Credit Points 10

Legacy Code 400830

Coordinator Christine Taylor ([https://directory.westernsydney.edu.au/search/name/Christine Taylor/](https://directory.westernsydney.edu.au/search/name/Christine%20Taylor/))

Description This unit focuses on infant feeding including breast feeding as a significant social and cultural process not just an issue of physiology and nutrition. The theoretical component of this unit will focus on the age-appropriate nutrition of infants and young children linked to developmental stages and the role the child and family health professional in supporting families manage associated issues. All areas of early nutrition will be covered including breastfeeding, use of breast-milk substitutes, introduction of solids and toddler nutrition.

The knowledge gained in this unit will be consolidated through virtual clinical placement.

School Nursing & Midwifery

Discipline Mothercraft Nursing and Family and Child Health Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4713 Master of Child and Family Health (Karitane), 4714 Graduate Diploma in Child and Family Health (Karitane) or 4715 Graduate Certificate in Child and Family Health (Karitane).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain and apply evidenced based knowledge of the nutritional requirements for lactation, and for normal growth and development of infants and young children.
2. Reflect and critically evaluate context of breastfeeding, formula feeding, weaning and infant feeding in Australia and possible outcomes for children.
3. Discuss the value of breastfeeding and breast milk with pregnant and new mothers, fathers and families to support the initiation of breastfeeding including breast feeding difficulties and appropriate management.
4. Critically evaluate the use of breast milk substitutes and demonstrate knowledge of the WHO code for the marketing of breast milk substitutes.
5. Utilise the socioecological approach to undertake a holistic assessment of nutritional needs of the family.
6. In partnership with parents, apply knowledge of child development to support healthy eating patterns and nutritional requirements in infancy and early childhood.
7. Demonstrate highly developed skills as a self-reliant learner and effectively work in groups and teams.

Subject Content

1. Module 1: Socio-cultural context of infant and child nutrition and feeding

- The social cultural and political and economic Factors that influence breastfeeding and feeding young children and families
- women's experiences of breastfeeding and infant feeding decisions
- Nutritional needs of pregnant women and women who are lactating

2. Module 2: Breastfeeding and infant feeding decisions

- Anatomy of The

NURS 7013 Clinical Supervision in Health Care

Credit Points 10

Legacy Code 401139

Coordinator Robyn Bowcock ([https://directory.westernsydney.edu.au/search/name/Robyn Bowcock/](https://directory.westernsydney.edu.au/search/name/Robyn%20Bowcock/))

Description This subject aims to provide students with foundational knowledge related to clinical supervision. Clinical supervision is a supportive formal process which enables health care professionals to develop and improve practice, thus potentially improving outcomes for services and service users. Students will be able to differentiate between Clinical Supervision and other Clinical Support options. Students will explore various models and theories which underpin clinical supervision, and the principles of effective supervision, including legal, ethical and professional considerations. Students will be encouraged to develop skills in self-awareness and reflective practice and to apply these skills to enhance professional growth and outcomes for service users.

School Nursing & Midwifery

Discipline Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse models of Clinical Supervision.
2. Assess/Examine the differences between Clinical Supervision and other clinical support options.
3. Appraise the significance of ethical and legal principles, professional codes and standards to the practice of Clinical Supervision.
4. Critically analyse the role of Clinical Supervision in personal, professional and organisational development and the subsequent outcomes for people receiving health care.
5. Critically reflect on practice issues to demonstrate capacity for self-awareness and clinical problem-solving skills.

Subject Content

Module 1

Introduction to clinical supervision

Differentiating clinical supervision from other forms of clinical support

Module 2

Theoretical underpinnings

Models of clinical supervision

Practical approaches to the implementation of clinical supervision

Module 3

Principles of effective clinical supervision

Ethical considerations in clinical supervision

Legal issues in clinical supervision

Professional responsibilities in clinical supervision

Module 4

Understanding the nature of relationships

Developing skills for self-awareness and reflection

Reflective practice, modifying responses, and clinical problem solving

Assessment

Credit Points 10

Legacy Code 400974

Coordinator Linda Gregory ([https://directory.westernsydney.edu.au/search/name/Linda Gregory/](https://directory.westernsydney.edu.au/search/name/Linda%20Gregory/))

Description This subject prepares nurse educators, clinical facilitators and clinicians for their role as a clinical teacher. Students will identify learner needs to create, plan and implement evidence based teaching interventions and evaluation strategies. Theoretically informed teaching and learning frameworks will be drawn upon in the subject to enable students to develop their knowledge and skills as a clinical teacher in their workplace. The subject utilises an authentic assessment approach to enable students to develop expertise with clinical teaching, student learning and program evaluation.

School Nursing & Midwifery

Discipline Nursing, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the advantages and disadvantages for teaching and learning in the clinical practice workplace environment.
2. Apply an integrated understanding of clinical teaching and supervision frameworks when creating learner centred experiences.
3. Appraise the strategies and use of resources involved with planning, preparation and implementation of a clinical teaching session.
4. Justify the use of emerging technologies and their application to teaching and learning in the clinical setting.
5. Critically reflect on feedback from learners and own performance with clinical teaching to gain insight into the quality of teaching and learning experienced by participants.
6. Adapts changes to the clinical teaching plan based on feedback from learners and own critical reflections.
7. Justify different approaches taken to clinical teaching /program evaluation and when each should be used.

Subject Content

1. Clinical teaching & learning contexts.
2. The clinical workplace as a learning environment
3. Teaching and learning strategies to facilitate learning
4. Applying learner centred approaches to clinical teaching
5. Lesson planning, implementation and evaluation
6. Emerging technologies in teaching and learning and their application
7. Workplace assessments strategies.
8. Critical reflection processes
9. The Role of Simulation Pedagogies in Clinical Teaching and Learning

NURS 7016 Collaborative Inquiry for Primary Health Care Action

Credit Points 10

Legacy Code 400839

Coordinator Cannas Kwok ([https://directory.westernsydney.edu.au/search/name/Cannas Kwok/](https://directory.westernsydney.edu.au/search/name/Cannas%20Kwok/))

Description This unit provides the opportunity for students to apply the principles of primary health care in a proposal to address an issue of primary health care concern in their workplace or community. The student will gain comprehensive knowledge of the process of action research, participatory action research and cooperative inquiry. Each student will have the opportunity to write a proposal using a collaborative inquiry approach that involves planning a genuine partnership to examine and make changes to improve an identified issue in the student's specific area of work / practice.

School Nursing & Midwifery

Discipline Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Distinguish between action research, participatory action research and co-operative inquiry.
2. Critically discuss collaborative aspects of inquiry in the context of primary health care.
3. Identify issues that are suitable for collaborative inquiry.
4. Write a background to an inquiry that reflects knowledge of the field.
5. Embed the principles of primary health care into the inquiry process to effect genuine change.
6. Plan strategies to manage ethical issues in a collaborative inquiry.
7. Plan a collaborative inquiry using a systematic approach.
8. Critique the plan of a collaborative inquiry project.

Subject Content

Module 1 - Action research, participatory action research and co-operative inquiry

- Overview
- action research process
- Participatory action research process
- comparison of ideologies of action research and Participatory action research
- co-operative inquiry process
- Embedding The principles of primary health care in The collaborative research process

Module 2 - Ethical considerations for researching in partnerships

- Ethical Issues in The research process
- specific Ethical considerations for sensitive collaborative research approaches

Module 3 - Proposal framework using participatory action research / co-operative inquiry

- proposal frameworks for Projects using Participatory action research and cooperative inquiry approaches
- application of frameworks to Projects

Module 4 - Planning the inquiry

- identification of The fundamentals of primary health care relevant to The proposed inquiry
- application of An appropriate structured framework for The proposed inquiry
- Initiating of An inquiry group
- research plan including procedures to address rigour
- Facilitators and barriers to collaborative inquiry
- critique of Planned proposal

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Proposal - Introduction to inquiry	2,000 words	40	N	Individual
Proposal - Plan of inquiry	3,000 words	60	N	Individual

Prescribed Texts

- There is no essential textbook.

Teaching Periods

NURS 7017 Complex Care

Credit Points 10

Legacy Code 401091

Coordinator Leanne Luck ([https://directory.westernsydney.edu.au/search/name/Leanne Luck/](https://directory.westernsydney.edu.au/search/name/Leanne%20Luck/))

Description This unit provides students with knowledge of complex conditions that may arise during pregnancy, labour, birth and the postnatal period for the woman or her newborn/s. Emphasis will be placed on the biological and physiological aspects of these conditions. In addition, issues surrounding infertility and reproductive technologies available to women will be explored. The unit also integrates physiological, psychosocial and cultural aspects relating to a woman experiencing a complex pregnancy, labour, birth or post birth period. The role of the midwife in maintaining partnerships with women even when childbearing experiences are complex will be discussed and critically analysed. In addition this unit includes critical analysis of ethical aspects affecting midwifery and maternity care.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) NURS 7011 AND NURS 7034

Co-requisite(s) NURS 7035

Restrictions

Students must be enrolled in 4697 Graduate Diploma in Midwifery and be a registered nurse employed in a participating NSW Health Local Health District facility in the position of a midwifery student.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss infertility and explain reproductive technologies
2. Apply knowledge of the normal biological, physiological, and psychological and social processes of pregnancy, labour, birth, the postnatal period to identify and explain deviations from normal; ensure early consultation or referral, including relevant details to appropriate members of the health care team
3. Identify risk factors and instigate measures to minimise adverse outcomes for women or newborns
4. Critically analyse care for a woman experiencing an unanticipated pregnancy outcome
5. Demonstrate appropriate application of knowledge around social determinants of health particularly in regard to marginalised women and those with perinatal mental health needs
6. Critically discuss seminal and current theories related to attachment, infant mental health and perinatal mental health and the implications for practice
7. Critically evaluate midwifery care to reduce morbidity and mortality rates for women with an emphasis on Aboriginal and Torres Strait Islander women and CALD women
8. Critically reflect and discuss legal and ethical aspects and responsibilities of the midwife which affect midwifery and/or maternity care including collaborative health care relationships between midwives and others in complex situations

Subject Content

1. Infertility
 - assisting The woman and her family in relation to Infertility
 - assisted Reproductive technologies
2. Maternal complexities during pregnancy, labour and birth
 - Complications in the first 20 weeks of pregnancy (such as ectopic pregnancy, threatened miscarriage, hyperemesis)
 - hypertensive disorders of Pregnancy
 - Hepatic disorders
 - Rhesus disease
 - Maternal infections
 - diabetes
 - haemorrhage - antenatal, intrapartum and postpartum
 - Gestational growth - small / Large for Gestational Age
 - Pre-term labour and birth
 - severe pain in labour
3. Maternal complexities in the postnatal period; Postnatal complications such as perineal trauma, urinary retention, infections, mastitis, breast abscess
4. Caring for the newborn in complex situations; Premature infants, Neonatal jaundice, Respiratory distress, Neonatal infections
5. Supporting women with complex conditions and social and emotional issues
 - Pharmacology for complex conditions
 - Domestic violence and its associated Factors
 - substance misuse (alcohol and other drugs)
 - impact on parenting and infant / child outcomes
 - Working with women who are experiencing DV and other complex family situations
 - social and emotional needs of refuge and migrant women

6. Working in partnership with women with complex pregnancies
- assessment and Monitoring of physical and emotional health and social well being
 - psychosocial assessment and referral
 - communication skills to work effectively with women and families in need
7. Women with previous surgical conditions that may impact on pregnancy and birth
- surgery eg Classical caesarean sections, organ transplants
 - female Genital mutilation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Critical Analysis of a Case Scenario. Students will be presented with a case scenario relating to complex childbirth.	2,500 words	50	N	Individual
End of session closed book examination consisting of MCQ and short answer questions.	2 hours	50	Y	Individual

NURS 7018 Contemporary Professional Practice in Mental Health Nursing

Credit Points 10

Legacy Code 400220

Coordinator Gihane Endrawes ([https://directory.westernsydney.edu.au/search/name/Gihane Endrawes/](https://directory.westernsydney.edu.au/search/name/Gihane%20Endrawes/))

Description Professional practice in Mental Health Nursing is continually evolving to meet changing social, political and legal requirements related to mental health issues. These requirements include changes in social and political understandings of mental illness and the rights and responsibilities of consumers, carers and providers. There has also been increased emphasis on health

promotion, prevention and education in population specific contexts (eg, aged care, child and family, adolescent mental health, alcohol and other drugs services). Mental Health Nurses thus face challenges to develop practice that is congruent with the context of these changing requirements. This unit aims to provide a basis of inquiry into contemporary practice(s) from which the nurse can build an ongoing understanding and appreciation of changing influences.

School Nursing & Midwifery

Discipline Mental Health Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

This course is restricted to students enrolled in 4719 Master of Mental Health Nursing, 4720 Graduate Diploma in Mental Health Nursing, 4721 Graduate Certificate in Mental Health Nursing, 4734 Graduate Diploma in Mental Health Nursing (exit only), 4673 Master of Mental Health Nursing (Nurse Practitioner)

Assumed Knowledge

Students are required to be registered nurses with basic knowledge of mental health, mental illness and assessment processes augmented with experience in mental health settings.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appraise scholarly evidence and contemporary practice in the area of mental health nursing
2. Critically reflect on the influences upon contemporary mental health nursing practice
3. Conceptualise the ways that mental health nursing can meet the challenges of contemporary practice
4. Succinctly articulate and effectively communicate an action plan for future practice improvement
5. Critically evaluate the broader social and cultural impact of contemporary mental health practice
6. Critically investigate the nature and relevance of national mental health policy to service development, implementation, contemporary nursing practice and health outcomes for clients within mental health contexts

Subject Content

1. The Socio Political Contexts of Mental Health Care
 - National and State agendas and policies: Standards, National Action Plans, strategies (priorities, inter-sectoral approach, mainstreaming, special needs groups)
 - protocols that include: Confidentiality / suicide
 - social influences (Feminism, socialism, consumerism, economic change)
 - indigenous Issues in mental health care
 - cultural awareness, safety and competence
2. Contemporary Philosophical Constructions in Mental Health
 - mental health care provision across The lifespan
 - prevention , intervention and person-centred care
 - collaboration / partnerships with Consumers, carers, care providers and inter-sectoral agencies to promote optimum outcomes
3. Mental Health Nursing Practice Issues
 - professional practice and competencies
 - Nurse identity in multidisciplinary and person-centred contexts

- inclusion of quality practice (ie: clinical indicators) to provide A framework for care provision
- professional practice and improvement: Organisations, credentialling, clinical Roles, career options
- supervision, mentorship and preceptorship
- research in mental health Nursing

4. Power and Ethics

- legal Issues: police, mental health acts, Privacy acts
- professional Issues: therapeutic relationships, power, personal / professional boundaries
- Ethical concerns encountered within mental health Nursing practice: diverse spiritual beliefs, risks associated with marginalised groups, Domestic violence
- Nursing Code of professional conduct and Code of ethics

Assessment

NURS 7019 Cultural and Social Diversity in Health Care

Credit Points 10

Legacy Code 401082

Coordinator Lisa Wong ([https://directory.westernsydney.edu.au/search/name/Lisa Wong/](https://directory.westernsydney.edu.au/search/name/Lisa%20Wong/))

Description This subject encourages students to investigate and discuss the concepts of health and illness in the context of cultural and social diversity. The subject promotes the attainment of critical knowledge and core principles necessary for students to become holistic, culturally and socially sensitive and appropriately adaptable when meeting the health needs of Aboriginal and Torres Strait Islander people, other marginalised and vulnerable groups including refugees and those from LGBTI community, and people from culturally and linguistically diverse (CALD) backgrounds. A multicultural approach provides a framework for students to explore the impact of different

attitude and value systems relating to the health of peoples in Australia.

School Nursing & Midwifery

Discipline Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique the social determinants of health among culturally and socially diverse communities
2. Critically reflect on own values and attitudes when working in culturally and socially diverse communities
3. Apply integrated knowledge of culture, ethnicity and diversity into the provision of health care for a multicultural society
4. Differentiate health related risk factors for people from diverse cultural groups
5. Critique the impact of past events, and health care policies on the health of Australia's culturally diverse communities, particularly on Aboriginal and Torres Strait Islander People

Subject Content

1. Understanding culturally and socially diverse communities

- Critical reflection
- Attitudes and values
- Culture and diversity
- Social determinants of health

2. Impact of Culture, diversity and health

- Risk factors within and across cultural groups
- Health status of Aboriginal and Torres Strait Islander People
- Health status of different cultural groups including refugees and asylum seekers, LGBTI and culturally and linguistically diverse (CALD) community

3. Culture and diversity in health care

- Health care policies and service provision
- Primary health care action in relation to social determinants of health
- Close the gap - Indigenous health campaign

4. Culturally sensitive and appropriate health care for

- Aboriginal and Torres Strait Islander People
- Refugees and asylum seeker
- LGBTI
- Culturally and linguistically diverse (CALD) community

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Viva Voce	15 minutes	50	N	Individual
Essay	2,000 words	50	N	Individual

NURS 7020 Essentials in Vascular Access

Credit Points 10

Legacy Code 401241

Coordinator Evan Alexandrou ([https://directory.westernsydney.edu.au/search/name/Evan Alexandrou/](https://directory.westernsydney.edu.au/search/name/Evan%20Alexandrou/))

Description Vascular access devices (VADs) are utilised in health care settings across the world. Nurses, junior medical officers and paramedics are typically at the forefront of having to gain peripheral venous access. Many important aspects of vascular access are taught in isolation which are typically brief and provide surface learning rather than good theoretical understanding that underpin sound clinical skill and safe practice required for inserting and managing VADs. This unit focuses on developing knowledge, competency and skills to safely insert peripheral VADs and manage most acute and chronic devices through access to online material, facilitated simulated workshops and practical application in the workplace with a nominated clinical mentor approved by the school.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program and practising as a registered nurse, paramedic or medical officer in a health care setting (and show evidence) or currently practicing as a registered nurse, paramedic or medical officer in a health care setting (and show evidence).

Assumed Knowledge

Undergraduate-level knowledge of human anatomy and physiology, especially the vascular system.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define the concepts underpinning vessel health and preservation and relate them to clinical assessment.
2. Synthesise aspects of clinical assessment to choose the most appropriate device related to patient condition and duration of treatment.
3. Articulate and apply current evidence within an interdisciplinary environment when caring for patients requiring intravenous therapy.
4. Demonstrate proficiency in core procedural aspects for the insertion and management of vascular access devices.
5. Identify and respond to vascular access device sites at risk of failure or infection through appropriate strategies.

Subject Content

1. Introduction to Vascular Access
2. Vascular Anatomy and Physiology
3. Vessel Health and Preservation
4. Intravenous Therapy
5. Types of Vascular Access Devices
6. Peripheral cannulation, venepuncture and blood sampling (Traditional Pathway)
7. Strategies to reduce catheter associated bloodstream infection (CABSI)
8. Care and Management of Vascular Access Devices
9. Promoting best practice in vascular access
10. Techniques for difficult venous access
11. Ultrasound Guided Venepuncture and Cannulation (Ultrasound Pathway)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Log Book: Supervised practice by clinical mentor. Five (5) supervised attempts of each of the following: Venepuncture, Cannulation, Accessing Devices, Flushing Devices, Dressing changes	Semester long	S/U	Y	Individual
Critical Review: Critical analysis of instructional video (applying best practice)	2,000 words	60	N	Individual
Reflection: Critical Reflection related to vascular access practice.	1,500 words	40	N	Individual
Practical: Attendance at all workshops & successful completion of clinical tasks	Semester long	S/U	Y	Individual

Prescribed Texts

Teaching Periods

NURS 7021 Essentials of Best Practice in Midwifery

Credit Points 10

Legacy Code 401092

Coordinator Hazel Keedle ([https://directory.westernsydney.edu.au/search/name/Hazel Keedle/](https://directory.westernsydney.edu.au/search/name/Hazel%20Keedle/))

Description This unit provides students with the opportunity to critically evaluate and apply evidence-based approaches to midwifery practice. The unit addresses the value of evidence-based midwifery practice, overviews the contribution of different research approaches to midwifery knowledge development and assists students to develop skills to locate and critique sources of evidence including systematic reviews, meta-analysis, meta-synthesis, integrative reviews, and clinical guidelines. Students are encouraged to become critical consumers of evidence relevant to midwifery practice and to appreciate the process of research design, practice development and practice change.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4775 Graduate Diploma in Midwifery and be a registered nurse employed in a participating NSW Health Local Health District or private maternity facility in the position of a midwifery student.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the value and application of evidence based midwifery practice
2. Undertake a literature search to identify key sources of evidence for a focused area of midwifery practice
3. Critique sources of evidence for midwifery practice (i.e. systematic reviews, meta-analysis, meta-synthesis, integrative reviews)
4. Plan and implement strategies to provide women with evidence based information that meets their individual needs
5. Understand the research process through the development of a research proposal

Subject Content

1. Evidence-based Midwifery Practice;
 - evidence based healthcare and Midwifery practice
 - Searching for sources of evidence in Midwifery practice
 - hierarchy of evidence
 - Steps used in The development of evidence-based practice Protocol for Midwifery practice
 - limitations of evidence based health care in Midwifery practice
2. Implementing Evidence in Midwifery Practice;
 - approaches for implementing evidence into Midwifery practice
 - development and implementation of guidelines/protocols
 - Critical appraisal of clinical guidelines
 - Working with women and evidence
 - evaluation
3. Critiquing Sources of Evidence for Practice;
 - Overview approaches to research - methodologies and methods
 - Critical appraisal skills - what to Look for in published research
 - Critical appraisal of quantitative and Qualitative research
4. Undertaking a research proposal
 - Overview of research proposal processes
 - Understanding of Formulating A research question
 - research design
 - methods of Presenting research proposals

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Literature review	2,000 words	50	N	Individual
Proposal	750 words	30	N	Individual
Research Poster	Minimum A2 size poster	20	N	Individual

NURS 7022 Ethics in Health Research

Credit Points 10

Legacy Code 400975

Coordinator Evan Atlantis ([https://directory.westernsydney.edu.au/search/name/Evan Atlantis/](https://directory.westernsydney.edu.au/search/name/Evan%20Atlantis/))

Description This unit equips students to explore ethical issues impacting on the conduct of research in the health setting. Students will critically explore ethical issues and their implications in health research, understand the process of gaining Human Research Ethics Approval for research, gain practical experience of developing an ethically sound research plan and application for human ethics approval.

School Nursing & Midwifery

Discipline Nursing, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Identify ethical issues in health research related to dealing with human participants.
- Describe ethical issues related to research conduct.

- Demonstrate knowledge of the process for gaining approval to conduct research with human subjects.
- Plan research demonstrating ethical conduct.
- Develop an application for human ethics approval.
- Demonstrate highly developed skills as a self-reliant learner to effectively communicate in groups and teams.

Subject Content

Human ethical issues - confidentiality, beneficence, veracity, non-maleficence

Ethics in dealing with human participants

Ethics in research conduct

Strategies for dealing with ethical issues in human research

Approval for research involving humans

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Assessment 1: Critical response to ethics scenario	2,000 words	50	N	Individual
Assessment 2: Development of an application for human ethics approval	2,250 words	50	N	Individual
Assessment 3: Asynchronous discussion board participation	250 words each	S/U	Y	Individual

Prescribed Texts

NURS 7023 Evidence Based Health Care

Credit Points 10

Legacy Code 401168

Coordinator Cannas Kwok ([https://directory.westernsydney.edu.au/search/name/Cannas Kwok/](https://directory.westernsydney.edu.au/search/name/Cannas%20Kwok/))

Description This unit is designed to develop students' knowledge of the principles and processes necessary for evidence-based clinical practice. General concepts associated with evidence-based health care are explored. In addition, students are assisted to formulate focused clinical questions and conduct a comprehensive literature search for research evidence that may assist in answering such questions. Issues

and techniques involved in the rigorous appraisal of research reports are addressed. The importance of clinical significance when making clinical judgements about the implementation of research findings are also explored. All assessments in this unit are mandatory.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects NURS 7024 Evidence Based Nursing

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

A basic knowledge of research methods at undergraduate level plus basic nursing knowledge and clinical nursing experience.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appreciate the principles and processes of evidence-based practice and its implication to health care practice.
2. Critically discuss barriers and facilitators to implementing evidence based practice in the clinical setting.
3. Formulate a clinical research question and conduct a relevant comprehensive literature search on a clinical question.
4. Apply critical appraisal techniques to a range of research methodologies.
5. Critically appraise research for its application to practice.

Subject Content

1. Introduction to the principles and processes of evidence-based practice (EBP)
 - advantages of EBP
 - use of EBP among health care professionals
 - obstacles to The implementation of EBP
 - ways of implementing EBP
 - resources available
2. Formulating a question and finding the evidence
 - strategies for Formulating A question
 - outcomes for EBP
 - Searching for The evidence
3. Appraising quantitative research evidence
 - research design and levels of evidence
 - judging The quality of quantitative research
 - analysis of Study results
4. Appraising qualitative evidence
 - differences in quality requirements
 - criteria for appraising The value of Qualitative research
5. Appraising mixed method research
 - mixed research designs
 - criteria for appraising mixed methods research
6. Process of conducting systematic reviews and meta-analyses
 - appraising systematic reviews
7. Putting research evidence into a clinical context

Assessment

NURS 7025 Health Promotion and the Nurse

Credit Points 10

Legacy Code 400210

Coordinator Laynie Hall Pullin ([https://directory.westernsydney.edu.au/search/name/Laynie Hall Pullin/](https://directory.westernsydney.edu.au/search/name/Laynie%20Hall%20Pullin/))

Description The challenge for nursing in terms of health promotion is to acknowledge the complex interrelatedness between a person's social and economic situation, their sense of power and control over their life and their physical, emotional and spiritual well-being. Health and well-being are determined by the totality of a person's life circumstances, their inherent traits, and their environmental and social conditions. This subject uses a social health perspective, underpinned by a Primary Health Care philosophy, to examine evidence-based health promotion strategies that can be implemented in the context of nursing practice within a variety of clinical and community health settings.

School Nursing & Midwifery

Discipline Nursing, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the socio-political influences and Social Determinants of Health which underpin health promotion planning for populations.
2. Evaluate the implications of international, national, and state policy in determining health promotion planning in Australia, including initiatives designed for Aboriginal and Torres Strait Islander peoples.
3. Critique health promotion initiatives implemented for populations and groups, both nationally and internationally.
4. Create measurable short and long-term objectives to address health revealed in a community needs analysis to design planning and evaluation strategies for health promotion.
5. Critically appraise the implications of using health promotion in nursing within a range of clinical and community settings.
6. Formulate a health promotion project proposal related to a specialty area of nursing practice in any clinical or community setting.

Subject Content

1. The social perspective of health in relation to planning for health promotion.
2. Evaluating the influence of Social Determinants of Health in planning health promotion for populations and groups.
3. Health promotion using a Primary Health Care philosophy and framework.
4. The influence of International, National and State policy in determining directions for health promotion.

5. Issues of power and decision-making in health promotion priorities within community and clinical settings.
6. Effects of the World Health Organization policies within the Australian context
7. National and State government health promotion policies and programs designed to improve the health of the population.
8. Critiquing contemporary health education strategies.
9. Analysing components of a community needs analysis and searching for evidence of population health.
10. Planning measurable short and long-term objectives for health promotion.
11. The planning of health promotion using logic models.
12. Formulating process, impact and outcome evaluations using qualitative and quantitative strategies.
13. The relevance and application of health promotion in clinical and community nursing practice.
14. Evaluating the role of the Registered Nurse in designing and implementing health promotion for populations and groups.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

NURS 7026 Healthy Families and Communities

Credit Points 10

Legacy Code 400831

Coordinator Rachel Gregory-Wilson ([https://directory.westernsydney.edu.au/search/name/Rachel Gregory-Wilson/](https://directory.westernsydney.edu.au/search/name/Rachel%20Gregory-Wilson/))

Description This subject explores the diversity and complexity of families and communities by examining differing cultural and social values, beliefs and practices relating to family structure, functioning and parenting practices. Students will be encouraged to reflect on their own cultural values and beliefs and how these influence practice when working with children and families. The subject will provide an introduction to community needs, assessment and principles of community development. Focusing on contemporary issues, content includes transition to parenthood, father inclusive practice, parenting children with disabilities, the changing role of grandparents and carers in Australian society and how neighbourhood and communities influence outcomes for children. This subject will provide students with foundational knowledge in identifying and supporting families with vulnerabilities and fostering resilience. Child protection issues will be addressed.

School Nursing & Midwifery

Discipline Mothercraft Nursing and Family and Child Health Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Knowledge of Primary Health Care and families in Australian society at an undergraduate level, augmented with clinical experience at a general Registered Nurse or Registered Midwife level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the characteristics and diversity of families in Australia and contributing factors such as key social movements (Neoliberalism, feminism, reconciliation and migration).
2. Analyse the key influences on family structure and functioning including neighbourhood and community resources and Govt policies using a sociolo-ecological model.
3. Critically discuss the impact of contemporary state and federal government policies on family health and wellbeing.
4. Identify the key components of a community needs assessment and related community development.
5. Integrate local community and web based resources to support families.
6. Critically discuss the factors that impact on outcomes for child and family health & well being in the transition to parenthood.
7. Demonstrate understanding including factors of vulnerability and resilience of the child and family health.
8. Apply communication and other technologies effectively in personal and professional learning.
9. Demonstrate highly developed skills as a self-reliant learner to effectively in groups and teams.

Subject Content

- 1- Historical perspective on social movements and social change shaping Australian Society through the lens of the ecological systems theory
- 2- Early years research on the social and health policy and government agenda for early childhood health and education, nationally and globally.
- 3- Media and social influences on family life and child wellbeing.
- 4- Identifying and understanding the needs of vulnerable child and family populations in Australia
- 5- The role of child and family health professionals working with diversity

- 6- Role of Child and family health professionals in Community Capacity Building
- 7- What is good enough parenting
- 8- Culturally diverse communities
- 9- The primary health care approach
- 10- Developing community resources and support services for parents.
- 11- Group facilitation
- 12- Working in teams
- 13- Revision
- 14- Father inclusive practices
- 15- Cultural diversity and parenting practices

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

NURS 7027 Infant Mental Health

Credit Points 10

Legacy Code 400835

Coordinator Stacy Blythe ([https://directory.westernsydney.edu.au/search/name/Stacy Blythe/](https://directory.westernsydney.edu.au/search/name/Stacy%20Blythe/))

Description This unit will provide an overview of the issues that impact on infant mental health. Theoretical frameworks influencing the study of infant-parent relationships will be discussed. Nursing management strategies relating to infant mental health disorders and the promotion of positive parent-child relationships will be examined.

School Nursing & Midwifery

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 7114 - Introduction to Infant Mental Health - Child and Family Health Nursing

Assumed Knowledge

Fundamental concepts of infant and child physical and mental health at undergraduate degree level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically appraise theoretical frameworks influencing studies of infant mental health and the attachment framework
2. Evaluate the main factors that can influence infant mental health and emotional development
3. Discuss the importance of positive parent child relationships and successful attachment as a predictor of a child's later social development
4. Distinguish the characteristics of mental health disorders in infancy and formulate nursing interventions
5. Explain the nature and scope of early intervention strategies in disordered parent infant attachments
6. Reflect on their new working understanding of attachment theory and relevant application to nursing practice
7. Apply communication and other technologies effectively in personal and professional learning
8. Demonstrate highly developed skills as a self-reliant learner to effectively work in groups and teams

Subject Content

Module 1 Understanding Infant Mental Health (IMH)

- infant development - Models and risks to development
- Defining mental health disorders in Infancy
- emotional development

Module 2 Attachment Theory

- attachment - Defining and Debunking myths
- patterns and Classification of attachment (secure, insecure, disorganized)
- attachment framework - disorders and interventions

Module 3 Implementing IMH and Attachment Theory in Practice

- The parent-infant relationship - observation, assessment and rating Scales
- applying theoretical Models in practice
- implications for child and family health Nursing practice

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Essay: Integrating 'infant mental health' theory and practice with current or projected nursing role.	2,000 words	50	N	Individual

Report: Observation of parent infant dyad using a Infant Mental Health framework and discussion of appropriate nursing interventions to support the family.	2,000 words	50	N	Individual
---	-------------	----	---	------------

Asynchronous Discussion Board Participation 3 Threads	Max 250 words each	S/U	N	Individual
---	--------------------	-----	---	------------

Prescribed Texts

- There is no essential textbook.

NURS 7028 Leadership in Clinical Practice

Credit Points 10

Legacy Code 400235

Coordinator Kate O'Reilly ([https://directory.westernsydney.edu.au/search/name/Kate O'Reilly/](https://directory.westernsydney.edu.au/search/name/Kate%20O'Reilly/))

Description We are all confronted with the challenge of leadership, regardless of nursing or other healthcare speciality, role, or status. Encompassed within leadership is knowledge of self, relevant theories, skills, and political awareness which are developed through higher education. By developing leadership skills and knowledge we can influence better outcomes for our patients/clients and create more positive working environments. In the unit, Leadership in Clinical Practice, nursing and other healthcare leadership arising from expert clinical practice is explored as a general notion rather than as one arising from any particular clinical speciality. Content includes theories, concepts and styles of leadership, the development of leadership potential, motivation, coaching, and mentorship, concepts of power, authority and empowerment and discussion of contemporary leadership issues. Assignments provide students with the opportunity to apply new knowledge about leadership to their practice, whether they be in management, education, or clinical roles.

School Nursing & Midwifery

Discipline Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) Prerequisite for students in 4691 and 4780 - NURS 3032

Prerequisite for students in 4685 - NURS 7075

Equivalent Subjects NURS 3003 Clinical Leadership and Professional Relationships

Restrictions

Students must be enrolled in a postgraduate program: 4722, 4723, 4724, 4735, 4745, 4746, 4749, 3752, 3760, 4698, 4700, 4756, 4757 or 4691 Bachelor of Nursing or 4780 Bachelor of Nursing – WSU Online or 4785 Master of Nursing Practice (Preregistration) or 4693 Bachelor of Nursing (Advanced) or 4692 Bachelor of Nursing (Graduate Entry) or 4684 Bachelor of Midwifery

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically discuss theories of leadership and leadership styles.
2. Critically reflect and apply principles of leadership theory to the development of effective leadership behaviours in clinical nursing and other health discipline practice.
3. Analyse and discuss leadership behaviours which influence organisational culture and change.
4. Critically discuss the concepts of power, authority, empowerment, and ethics from a clinical leadership perspective.
5. Critically analyse the importance of contemporary nursing and other health discipline leadership issues from a local, national, and international perspective and discuss the implications for the future of the profession.

Subject Content

Module 1 - Concepts of Leadership in Clinical Practice

- concepts, theories and styles of leadership
- Defining leadership and management
- A critique of leadership theories

Module 2 - Developing Leadership Potential

- emotional Intelligence
- enhancing communication, Negotiation and Conflict Resolution skills
- concepts of power, authority and empowerment
- exploring Issues of Ethical leadership

Module 3 - Effective Leadership Behaviours in Clinical Practice

- Understanding organisational culture
- leading and managing change
- developing and leading teams
- Motivating, coaching and mentoring in leaders-follower relationships

Module 4 - Contemporary Leadership Issues

- politics and Nursing - influencing policy development
- evidence-based practice
- clinical Governance/shared Governance and patient-centred approached to practice
- leading quality, safety and service improvement

Special Requirements

Essential equipment

Access to an internet enabled device is essential in order to be able to: access course materials; to participate in discussion groups; and to access additional resources provided by the lecturer during the session. NURS 7029 Mental Health Assessment and Application

Credit Points 10

Legacy Code 400217

Coordinator Tracy Stanbrook ([https://directory.westernsydney.edu.au/search/name/Tracy Stanbrook/](https://directory.westernsydney.edu.au/search/name/Tracy%20Stanbrook/))

Description Mental health assessment is a dynamic and ongoing part of nursing role with vast potential to empower people we work with. While medical doctors often use assessment to develop an explanation by way of diagnosis for client's presenting problems, nurses can use mental health assessment to focus on client perceptions and expectations related to their illness, hospitalisation, and care. This subject introduces a range of theories and strategies for exploring different approaches to mental health assessment and application of gathered information in clinical practice. Students will critically analyse recovery-oriented mental health assessment and have the opportunity to analyse influences of cultural diversity, legal, ethical and professional implications of mental health assessment and documentation. Collaborating with clients, family and others in decision-making processes and taking a strengths-based approach towards mental health assessment is emphasised.

School Nursing & Midwifery

Discipline Mental Health Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) Prerequisite for students in 4691 4780 - NURS 3032 Professional Practice Experience 5
Prerequisite for students in 4785 - NURS 7075 Nursing Practice 3

Restrictions

Students must be enrolled in 4654 Graduate Diploma in Nursing (Mental Health), or
4719 Master of Mental Health Nursing, or
4720 Graduate Diploma in Mental Health Nursing or
4721 Graduate Certificate in Mental Health Nursing, or
4785 Master of Nursing Practice (Preregistration), or
4780 Bachelor of Nursing (WSU Online), or
4691 Bachelor of Nursing or
4693 Bachelor of Nursing (Advanced) or
4692 Bachelor of Nursing (Graduate Entry) or
4684 Bachelor of Midwifery

Assumed Knowledge

Students must have some basic knowledge of mental health, mental illness, and assessment processes from previous subjects or workforce experiences.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse mental health assessment and models of care within a therapeutic recovery framework
2. Examine and analyse the influences of cultural diversity for mental health assessment
3. Critically analyse legal, ethical and professional implications of mental health assessment and documentation including the aspects of mental health recovery
4. Conduct a comprehensive mental health nursing assessment with related documentation to provide holistic consumer centred care.
5. Collaborate with the client, family and others to develop professional therapeutic relationships for decision-making processes

Subject Content

1. Overview of Mental Health Nursing Assessment
2. Principles of Assessment
 - meaning, process and mechanics of assessment
 - The assessment interview: principles
 - dynamics of The interview
 - observation of behaviour
 - The history and pathways to effective planning
3. Specific Interview Techniques
 - collaboration in assessment
 - strengths model of assessment
 - culture and assessment
 - mental state Examination
 - The family in assessment
 - assessment of relationships problems
 - assessment of The environment
 - exploring psychosis
 - Risk of violence
 - Victimisation
 - substance Abuse
 - neurological Examination
 - needs assessment
 - assessment of mood (including Risk of suicide)
 - assessment of personality Disorder
 - assessment of anxiety
4. Documentation
 - moral and Ethical Issues
 - The whole person
5. Documentation of assessment and care plan

NURS 7030 Mental Health Nursing Practice 1

Credit Points 10

Legacy Code 400218

Coordinator Diana Jefferies ([https://directory.westernsydney.edu.au/search/name/Diana Jefferies/](https://directory.westernsydney.edu.au/search/name/Diana%20Jefferies/))

Description This subject will assist the student to develop a comprehensive understanding of the nurse-client relationship in mental health nursing, presenting this relationship in its multiple contexts, (e.g., the interpersonal, cultural and socio-political), in order to appreciate factors influencing this relationship and the way it might be 'lived out' in practice. The subject assists students to understand: (1) the nurse-client relationship and its development; (2) the nature of the relationship between the client and nurse; (3) how skilled nurses use this relationship to assist their clients; and (4) how the type of relationship the nurse develops with the client frequently determines the quality of work they do together.

School Nursing & Midwifery

Discipline Mental Health Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in the Graduate Diploma in Nursing (Mental Health), 4719 Master of Mental Health Nursing, 4720 Graduate Diploma in Mental Health Nursing or 4721 Graduate Certificate in Mental Health Nursing.

Assumed Knowledge

Students are required to be registered nurses with basic knowledge of mental health, mental illness, and assessment processes, augmented with experience in mental health settings.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically discuss how the theoretical perspectives of the therapeutic relationship can inform nursing practice.
2. Evaluate how current models of care such as Recovery Orientated Care and Trauma Informed Care improve consumer outcomes.
3. Critique ideas about the structure, function and process of the therapeutic relationship, such as boundaries, milieu and collaborative care.
4. Evaluate outcomes emerging from skilled nursing practice that improve health outcomes that result from the therapeutic relationship.
5. Investigate processes for changing practices in clinical settings in accordance with current models of care to improve health outcomes for consumers.

Subject Content

1. The context of Mental Health Nursing
 - i. Mental Health Care reform
 - ii. Consumers perspectives
 - iii. Contemporary Mental Health Nursing Practice: Recovery Orientated Care, Trauma Informed Care and Safewards
2. Introducing the nurse-client relationship: What is it, how is it conceptualised, its history and attributes
3. Challenges to conceptualisations of the nurse-client relationship,
4. Personal characteristics and self awareness in therapeutic nurse-client relationships
5. The skills of the nurse-client relationship:
6. The nurse-client relationship in practice settings
7. Limitations and boundaries in the construction of nurse-client relationship
8. Clinical supervision and the nurse client relationship
9. The 'therapeutic milieu' and the therapeutic environment: therapeutic communities
10. Barriers to the nurse-client relationship: personal, contextual and socio-political

Assessment

NURS 7031 Mental Health Nursing Practice 2

Credit Points 10

Legacy Code 400219

Coordinator Robyn Bowcock ([https://directory.westernsydney.edu.au/search/name/Robyn Bowcock/](https://directory.westernsydney.edu.au/search/name/Robyn%20Bowcock/))

Description This subject is designed to challenge the student to consider evidence-based practice in mental health nursing. Nurses are required to be accountable for their clinical practice and to be able to argue the evidence for specific nursing interventions. Students undertake critical analysis of evidence-based practice in mental health nursing as a concept, a means of accountability, as a means of defining nursing knowledge. Students will apply evidence-based practice concepts to specific psychiatric disorders and problems.

School Nursing & Midwifery

Discipline Mental Health Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4654 Graduate Diploma Nursing (Mental Health), 4719 Master of Mental Health Nursing, 4720 Graduate Diploma in Mental Health Nursing or 4721 Graduate Certificate in Mental Health Nursing.

Assumed Knowledge

Students must be registered nurses with a basic knowledge of mental health, mental illness, and assessment processes, augmented with experience in mental health settings.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique the foundation of nursing knowledge in mental health and its relationship to evidence-based practice.
2. Critically analyse the evidence for nursing practice in specific disorders and problems: psychosis, depression, self-harm, suicidal

behaviour, agitation, fear and related behaviours, personality disorders (focus on borderline personality disorder), anxiety disorders and eating disorders.

3. Evaluate the role of the nurse in implementing recovery principles and trauma-informed care to offer optimal person-centred care in the mental health context.

4. Critically reflect on the role of family, significant others, and community to improve the collaborative care process.

Subject Content

1. Evidenced based practice (EBP) and mental health nursing
2. Barriers and limitations to EBP in mental health nursing
3. Determining the effectiveness of clinical practice in mental health nursing
4. Constructing mental health nursing knowledge
5. Analysis of nursing interventions with persons experiencing
 - Psychosis
 - Depression
 - Self-harm & suicidal behaviour
 - Agitation, fear and related behaviours
 - Personality Disorders (focus on Borderline Personality disorder)
 - Anxiety disorders
 - Eating disorders

NURS 7032 Mental Health for Communities

Credit Points 10

Legacy Code 400773

Coordinator Gillian Murphy ([https://directory.westernsydney.edu.au/search/name/Gillian Murphy/](https://directory.westernsydney.edu.au/search/name/Gillian%20Murphy/))

Description Evolving diversity and changes within societies mean that what are understood as adaptive and maladaptive lifestyles, behaviours and attitudes towards mental illness and traditional healing approaches will vary greatly. This unit presents an outline of the themes and topics central to discussions of mental health and illness within a community. It examines the influences of stereotype and stigma, environment, culture, adaptive ability and support systems for psychological well-being while considering approaches which focus on and promote resilience, attachment, a sense of belonging and empowerment. Contemporary mental health and illness issues relating to selected vulnerable groups will be explored.

School Nursing & Midwifery

Discipline Mental Health Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled 4673 Master of Mental Health Nursing (Nurse Practitioner), 4654 Graduate Diploma in Nursing (Mental Health), 4719 Master of Mental Health Nursing, 4720 Graduate Diploma in Mental Health Nursing or 4735 Master of Nursing (Professional Studies).

Assumed Knowledge

Students are expected to have knowledge and understanding of mental health / mental health concerns and be able to relate it to clinical nursing practice for individuals and their families.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appraise the complexity of the mental health-mental illness continuum
2. Critically analyse the influences of environment, culture, support systems and adaptive ability on community mental health issues
3. Investigate a range of approaches and their application in mental health promotion
4. Synthesise the risk factors for maintaining psychological well-being in vulnerable populations
5. Critically analyse the extent to which selected issues related to mental health status impact across the lifespan
6. Design and communicate nursing interventions based on the consumer's needs and experiences

Subject Content

1. Conceptual overview of mental health and mental illness
 - difficulties with definitions
 - myths and misconceptions
2. Community perspectives on mental health
 - influences of environment, culture, adaptive ability, support systems
 - community responses, e.g. stigma, discrimination, affirmative action

3. Approaches to promoting resilience, attachment, empowerment and a sense of belonging for consumers, carers and groups
 4. Mental health perspectives in vulnerable groups, e.g. children and adolescents, aged, immigrants
- Selected issues related to maintaining psychological well-being, e.g. violence and bullying, substance misuse/abuse, depression and suicide

Assessment

NURS 7034 Midwifery Practice 1

Credit Points 10

Legacy Code 401090

Coordinator Beth Peck ([https://directory.westernsydney.edu.au/search/name/Beth Peck/](https://directory.westernsydney.edu.au/search/name/Beth%20Peck/))

Description In this unit students will develop skills for the provision of midwifery care across the childbirth continuum through working with women in a continuity of care model and also practice experience in designated maternity practice areas. Using a woman-centred, primary health care model, students will commence recruitment and follow 10 women throughout their pregnancy, labour, birth and for up to six weeks post birth; and under supervision will provide midwifery care to these women. The unit commences with a one week intensive workshop, to expose the students to an elementary level of understanding and application of midwifery care in the antenatal clinic, antenatal ward, birth unit, postnatal ward and special care nursery in preparation for their employment. Concepts introduced during this intensive week will

be covered with more complexity during future subsequent weekly workshops.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) NURS 7011

Restrictions

Students must be enrolled in 4697 Graduate Diploma in Midwifery and be a registered nurse employed in a participating NSW Health Local Health District facility in the position of a midwifery student.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Communicate effectively with women, and colleagues, in an open and respectful way;
2. Undertake screening, assessment and care of women during pregnancy, labour and birth and the postnatal period;
3. Relate anatomy and physiology of pregnancy, labour, birth and the postnatal period to the care of a woman and her newborn/s;
4. Conduct assessment and care of the neonate;
5. Demonstrate safe Midwifery standard of practice and capacity to critically reflect on the professional requirements for midwifery practice.

Subject Content

1. Introduction to Midwifery Practice 1
 - a). Introduction to Midwifery Practice Portfolio
 - Midwifery Continuity of care notes
 - Reflections on practice
 - Midwifery Log of practice experience
 - Midwifery standards for practice
 - b). Course Handbook
2. Communication
 - respectful communication
 - Midwifery language for Working with women
 - Midwifery terms and acronyms
3. Midwifery Care
 - antenatal history collection
 - Screening, assessment and Monitoring of Maternal well-being during Pregnancy, labour, birth and during The post birth period
 - assessment and Monitoring of fetal welfare in Pregnancy, labour and birth
 - assessment and Monitoring of The neonate
 - Escalation procedure for deviations from normal
 - initiation and support of breastfeeding - An introduction to The specific needs of women with complex pregnancies
 - skills to communicate effectively with The woman, her family and others during The childbearing process
 - apply legal and Ethical aspects associated with Pregnancy, labour and birth e.g. documentation and consent
 - Postnatal assessment and discharge assessment - newborn
4. Midwifery Skills
 - communication skills for Working in partnership
 - skills of reflecting on practice
 - Booking visit and history collection
 - Maternal assessment during pregnancy (Calculation of EDB, Abdominal examination, Fetal Heart Rate Auscultation (Pinards, Doppler)

- collection of A labour onset history and assessment during labour, documentation - partogram, and Progress notes
- application and interpretation of CTG (antenatal and labour normal and abnormal parameters)
- vaginal Examination
- use of Nitrous Oxide, heat, water in labour
- mechanism of birth
- birthing on land and in water
- physiological and active third stage
- APGAR assessment, and initial newborn Examination including weight and measurements
- assessment of The woman post birth
- breastfeeding support
- preparation of breastmilk Substitute
- newborn blood Screening, Intramuscular and subcutaneous injections and blood glucose level testing.
- Receiving the baby at LSCS,
- Postnatal assessment and discharge assessment - Maternal
- Examination of The newborn

Assessment

Coordinator Lisa Cutajar ([https://directory.westernsydney.edu.au/search/name/Lisa Cutajar/](https://directory.westernsydney.edu.au/search/name/Lisa%20Cutajar/))

Description During this unit students will continue to gain practical experience in designated clinical areas and follow their 10 women throughout pregnancy, labour, birth and the postnatal period in a continuity of care model. They will strengthen their skills in undertaking psychosocial assessment, effectively engaging women in services, facilitating groups and working in collaboration with other professionals to support women. In addition, they will work with women with complex health issues. This unit provides students with the knowledge to collaborate with all health professionals and includes assessing procedures for managing obstetric emergencies; transferring women or newborns with complex health issues; and assessing referral pathways.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) NURS 7011 AND NURS 7034

Co-requisite(s) NURS 7017

Restrictions

Students must be enrolled in 4697 Graduate Diploma in Midwifery and be a registered nurse employed in a participating NSW Health Local Health District facility in the position of a midwifery student.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate competence in complex midwifery skills and care for women with complex needs
2. Demonstrate competence in the assessment and care of women with complex needs during pregnancy, labour and birth and the postnatal period;
3. Demonstrate competence in the assessment and care of the sick neonate
4. Identify and appropriately manage emerging and escalating situations that may require referral or additional care including the referral processes and collaborative care arrangements
5. Identify emergency situations related to childbirth and the role of the midwife and other health professionals in providing emergency care
6. Implement appropriate midwifery management during emergency situations
7. Demonstrate safe Midwifery standard of practice and capacity to critically reflect on the professional requirements for midwifery practice.

Subject Content

1. Introduction to Midwifery Practice 2

- Midwifery Practice Portfolio; Midwifery Continuity of Care Case Notes and reflections, Midwifery Log of Practice Experience, Midwife standards for practice
- 2. Communication
 - respectful communication
 - Midwifery language for Working with women
 - Midwifery terms and acronyms
- 3. Skills
 - care of The woman having Epidural pain Relief
 - Amniotomy and application of fetal Scalp Electrode
 - Episiotomy, assessment of The perineum following birth and perineal repair
 - third stage Complications
 - Receiving The Baby at LSCS
 - neonatal resuscitation
 - care of The unwell Baby, insertion of A nasogastric tube, care of The Baby Receiving phototherapy
 - Venepuncture / Intravenous cannulation
 - mechanism of birth/procedure for Malpresentations and malpositions
 - care of The woman and/or Baby following Death
 - FONT / K2Ms
- 4. Escalating complexities
 - Warning flags
 - Midwifery actions
 - Midwives responses
 - communication documentation
- 5. Skills for managing emerging and escalating emergency situations
 - communication skills for complex and emergency situations
 - Obstetric emergencies; postpartum haemorrhage / disseminated intravascular coagulation (DIC), maternal seizures / Eclamptic fit, Cord presentation / prolapse, Obstetric shock (amniotic fluid embolism, Ruptured uterus / Uterine inversion)
 - shoulder dystocia
 - Maternal resuscitation

Legacy Code 401094

Coordinator Fiona Arundell ([https://directory.westernsydney.edu.au/search/name/Fiona Arundell/](https://directory.westernsydney.edu.au/search/name/Fiona%20Arundell/))

Description In this unit students will consolidate their knowledge and midwifery skills in preparation for their role as a midwife. They will continue to practice in designated clinical areas and follow through their 10 continuity of care experiences. Students will have completed a professional portfolio and reflected on how they can identify and plan for personal professional development and leadership as midwives, including the professional development needs of others. Students will be assessed across the seven midwife standards for practice.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 20cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) NURS 7035

Restrictions

Students must be enrolled in 4697 Graduate Diploma in Midwifery and be a registered nurse employed in a participating NSW Health Local Health District facility in the position of a midwifery student.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically discuss the components and relevance of continuing professional development;
2. Critically evaluate readiness for practice through self and group reflection;
3. Develop skills for critical self-reflection through individual and group processes;
4. Critically discuss the potential for career development in the health care system;
5. Critically reflect on working in partnership;
6. Demonstrate safe Midwifery standard of practice and capacity to critically reflect on the professional requirements for midwifery practice.

Subject Content

1. Maintaining Currency
 - Midwifery portfolios
 - self and group Critical reflection
 - professional development
2. Career Development

- career options
 - career planning
3. Professional Midwifery
 - portfolio development
 - partnership training
 4. Midwifery standards for practice
 - Promotes health and wellbeing through evidence-based Midwifery practice
 - Engages in professional relationships and respectful partnerships
 - demonstrates The capability and accountability for Midwifery practice
 - Undertakes comprehensive assessments
 - develops A plan for Midwifery practice
 - provides safety and quality in Midwifery practice
 - Evaluates outcomes to improve Midwifery practice

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
100% Attendance and Workshop Reflections		S/U	Y	Individual
Professional Placement Performance: AMSAT x 1		S/U	Y	Individual
Completion of Midwifery Portfolio		S/U	Y	Individual

Coordinator Athena Sheehan ([https://directory.westernsydney.edu.au/search/name/Athena Sheehan/](https://directory.westernsydney.edu.au/search/name/Athena%20Sheehan/))

Description This unit introduces students to the profession of midwifery. It explores: the meaning of birth; the historical and social contexts of birth; and the role of the midwife through the continuum, from early beginnings to its current legal and professional standing. Within a legal and ethical framework, the Australian College of Midwives (ACM) philosophy and role of the midwife will be explored.

Students will also be required to discuss and critically analyse current models of midwifery care.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4697 Graduate Diploma in Midwifery and be a registered nurse employed in a participating NSW Health Local Health District facility in the position of a midwifery student.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate their own personal beliefs around birth;
2. Explore and analyse childbirth within different cultures and within different time periods;
3. Discuss the development of midwifery as a profession and the ACM philosophy of role of the midwife;
4. Explore and analyse the social, political and cultural context of birth in Australia and its impact;
5. Critique the history of midwifery and the contemporary organisation of healthcare in Australia on the provision of maternity care.
6. Identify the legal and professional standards which guide midwifery regulation and practice.
7. Discuss models of midwifery care

Subject Content

1. Childbirth
 - birth in other cultures and other centuries
 - midwives in history
 - from home to hospital
2. The Social, Political and Cultural Context of Birth in Australia
 - history and politics of midwifery in Australia
 - the Australian health care system and its influence on the design and delivery of maternity services
 - maternity services: policy, organisation and culture
 - Social Determinants of Health
 - Australian National Health Priorities
 - Aboriginal and Torres Strait Islander peoples health needs and services
 - social and cultural context/factors that impact on the health and well-being of families in Australia
 - public image of midwives and birth
3. Development of Midwifery as a Profession
 - students own beliefs and perceptions of birth and midwifery
 - global standards of midwifery (International Confederation of Midwives)
 - Australian College of Midwives philosophy and role of the midwife
4. Models of Midwifery Care
 - Continuity of Care
 - Private Midwifery
 - Team Midwifery
 - Caseload
 - Centering Pregnancy
 - Shared care
5. Legislation Governing Professional Practice
 - Health Practitioner Regulation National Law Act 2009
 - Health Care Complaints Act 1993
 - Children and Young Persons (Care and Protection) Act 1998 No 157

- Child Protection responsibilities including Keep Them Safe policy guidelines

6. Regulatory and Professional Framework

- Australian Health Practitioner Regulation Agency
- Australian Nursing and Midwifery Accreditation Council, roles, functions, competencies and boundaries of practice
 - o Midwife standards for practice
 - o The ICM code of ethics for midwives
 - o Code of conduct for Midwives
 - o Midwifery practice decision flow chart
 - o National Midwifery Guidelines for Consultation and Referral
- Australian College of Midwives

Credit Points 10

Legacy Code 400832

Coordinator Kim Psaila ([https://directory.westernsydney.edu.au/search/name/Kim Psaila/](https://directory.westernsydney.edu.au/search/name/Kim%20Psaila/))

Description Health services across Australia have demonstrated commitment to the roll-out of Family Partnership Training to all health professionals who support families with young children. This unit will provide an overview of the Family Partnership Model. Participants will examine the theoretical framework underlying the model which emphasises the need for highly skilled professional communication to develop supportive and effective relationships with families. Students will participate in 5 interactive webinars to embed the fundamental concepts and skills associated with the model. Facilitating groups for parents is a key skill of the child and family health professional. In this unit participants will also study how adults learn, and the key skills in understanding and promoting the group process. Working

in partnership extends to other professional and agencies, enabling students to develop skills in professional collaboration.

School Nursing & Midwifery

Discipline Mothercraft Nursing and Family and Child Health Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appraise and implement strategies based on the helping process.
2. Critically discuss the difference between the expert led model and the partnership model in relation to practice.
3. Analyse the interactive processes between the parent and the helper.
4. Judge the characteristics of an effective partnership between helpers and families and the inherent qualities and skills required by the helper.
5. Identify and apply the key qualities and skills for effective communication with children and families to enable effective teaching for wellbeing.
6. Analyse group process and dynamics and use principles of adult learning and group facilitation to promote effectiveness.
7. Synthesise the characteristics of working effectively in multidisciplinary teams and apply strategies to facilitate interagency collaboration promoting positive outcomes for families.
8. Apply communication and other technologies effectively in personal and professional learning.
9. Prioritise and select appropriate skills as a self-reliant learner to effectively work in groups and teams.

Subject Content

Module 1 Family Partnership Model

- education for empowerment and health of families
- principles of effective health Teaching
- learner characteristics - The difference between children and adults
- needs of parents and The outcome of helping
- process of helping parents
- The parent helper relationship
- conducting A first meeting
- helper qualities and skills
- exploring The Problem
- exploring The notion of personal construing
- helping parents change challenging skills
- Problem solving

Module 2 Group Processes

- Understanding The behaviour of people in groups
- communication in groups
- influence and Balance in groups
- Conflict Resolution within A group
- Measuring group effectiveness

Module 3 Team work

- Characteristics of effective collaboration
- Working in teams
- being A team leader

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Essay - Family Partnership Model	2,000 words	50	N	Individual
Report - Observation and Critical Evaluation of Group Process	1,750 words	40	N	Individual
Completion of a minimum of 10 weeks online learning activities	Minimum of 10 weeks online learning activities	10	Y	Individual

NURS 7040 Perspectives on Nursing

Credit Points 10

Legacy Code 400774

Coordinator Antoinette Cotton ([https://directory.westernsydney.edu.au/search/name/Antoinette Cotton/](https://directory.westernsydney.edu.au/search/name/Antoinette%20Cotton/))

Description This subject addresses the origins and development of nursing knowledge. A major focus is the development and progress of the discipline of nursing. It includes an in-depth exploration of the history and philosophy of nursing science, including epistemology and strategies for theory generation in nursing. The impact of borrowed perspectives on research, theory and practice in the discipline of nursing is also explored. In addition, the subject addresses the development of theoretical perspectives in nursing including areas of controversy in the discipline. Numerous perspectives on the relationship between nursing theory, research and practice are considered. A major emphasis in the subject is development of knowledge and understanding of the link between nursing theory, research, practice and related issues.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 7149 - Nursing Knowledge Concepts Models and Theories

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appraise major perspectives in nursing and their impacts on the development and application of nursing theories and conceptual models
2. Synthesize the applicability and importance of nursing theories for nursing science, practice and research.
3. Critically evaluate major approaches to concept development, concept analysis and concept clarification
4. Critically evaluate concepts applicable to own area and level of nursing practice using concept analysis methods
5. Critically reflect on espoused and personal-theory-in-use in nursing practice in general and the application of one's own nursing practice in particular

NURS 7041 Psychopharmacology for Advanced Practice Mental Health Nurses

Credit Points 10

Legacy Code 400858

Coordinator Greg Clark ([https://directory.westernsydney.edu.au/search/name/Greg Clark/](https://directory.westernsydney.edu.au/search/name/Greg+Clark/))

Description This unit examines pharmacological principles including functional neuroanatomy review, pharmacokinetic principles, pharmacodynamic principles, and neuropharmacology. Students examine a number of psychotropic drugs: antipsychotic, mood stabilisers, complementary medicines, drugs of abuse/misuse, antidepressant, anxiolytic and hypnotic drugs in relation to targeted symptoms, titration, side-effects, and monitoring of clients from across the lifespan. Decision-making in psychopharmacology is explored. The importance of appropriate collaborative processes between the nurse practitioner, clients across the lifespan and their families in medication management is addressed.

School Nursing & Midwifery

Discipline Mental Health Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4719 Master of Mental Health Nursing or 4745 Master of Nurse Practitioner (Mental Health). Students in 4745 must be working in in mental health services at an advanced practice level and must nominate a primary supervisor / mentor / assessor and a clinical support group.

Assumed Knowledge

Students are expected to have a working knowledge of mental health assessment and treatment procedures, including basic pharmacological principles and knowledge of drugs used for mental illnesses and disorders.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically discuss all relevant treatment options for mental illnesses and disorders including but not limited to pharmacology, and the skills required for judicious use of treatments.
2. Evaluate and apply the knowledge and skills required for judicious ordering of pharmacological treatments, taking into account the possibility of co-morbidities, dual diagnoses and associated drug interactions as well as differential diagnoses.
3. Critically analyse the ethical, legal, collaborative and prioritisation dimensions of decision-making processes in relation to the monitoring, titration and prescribing of medication for clients across the lifespan.
4. Critically evaluate the appropriateness of collaborative processes between the nurse practitioner, clients across the lifespan, their family, and significant others in the context of medication management.
5. Critically discuss pharmacokinetic and pharmacodynamic principles and their impact on the prescribing of medication.

Subject Content

- Pharmacology across The lifespan
- Pharmacological principles including Functional neuroanatomy, Pharmacokinetic principles, Pharmacodynamic principles, and neuropharmacology.
- Psychotropic drugs: antipsychotic, antidepressant, mood stabilisers, complementary medicines, drugs of Abuse, anxiolytic and hypnotic drugs in relation to targeted Symptoms, titration, side-effects, poly pharmacy interactions, drug related emergencies, and monitoring.
- decision-making in psychopharmacology.
- medication, collaboration with Consumers and families, and medication management.
- quality use of medications.
- Critical analysis of The application of Pharmacological principles within A Nursing framework.
- ANMC competencies for The Nurse practitioner

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

NURS 7042 Research Project in Health Care

Credit Points 10

Legacy Code 401084

Coordinator Evan Atlantis ([https://directory.westernsydney.edu.au/search/name/Evan Atlantis/](https://directory.westernsydney.edu.au/search/name/Evan%20Atlantis/))

Description This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). This subject will assist in the further development and maintenance of research culture in health care, and thus enhance the implementation of evidence-based practice. This subject is designed to assist students in applying their research knowledge and skills and provides them with the opportunity to undertake an independent research project and write a dissertation.

It is recommended that students interested in undertaking this subject first complete Applied Research in Health Care (NURS 7004) and Ethics in Health Research (NURS 7022) where the dissertation topic will be identified and students will be allocated a supervisor.

School Nursing & Midwifery

Discipline Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) Students in the Master of Child Family Health (Karitane) Master of Nursing or Master of Mental Health Nursing must complete NURS 7004 Applied Research in Health Care AND NURS 7022 Ethics in Health Research before enrolling in this unit

Students in the Master of Primary Health Care must pass NURS 7022 Ethics in Health Research before enrolling in this unit

Restrictions

Students must be enrolled in a postgraduate program and have successfully completed 60 credit points at Level 7.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically reflect on, evaluate and synthesise information from previous research
2. Create a critical, coherent and succinct argument that justifies the need for the proposed research
3. Plan and ethically conduct an independent research project
4. Generate further knowledge related to a specific program of research
5. Produce a written dissertation of publishable standard

Subject Content

Module 1

- Searching The literature
- writing A literature Review

Module 2

- enhancing Scholarly writing
- disseminating research findings

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

NURS 7043 Scholarship for Practice Change in Health Care

Credit Points 10

Legacy Code 401085

Coordinator Sheree Smith ([https://directory.westernsydney.edu.au/search/name/Sheree Smith/](https://directory.westernsydney.edu.au/search/name/Sheree%20Smith/))

Description The transformation of practice in healthcare is facilitated when information about creative and innovative practice change and development is documented, disseminated and critiqued through professional channels such as peer reviewed journals, conference papers, discussion papers or project reports. In this unit students will be provided with an opportunity to produce a scholarly piece of work that will disseminate information about transforming practice and improving patient care. The unit aims to enhance scholarly communication skills, provide a vehicle for demonstrating leadership by informing the health professions of innovative solutions for practice change.

School Nursing & Midwifery

Discipline Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects NURS 7044 - Transforming Nursing Practice

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify an area for practice change in a health care setting/service
2. Analyse key aspects of an area for practice change
3. Generate recommendations/solutions for practice change
4. Demonstrate skills of critical thinking, synthesis of information and coherent, succinct scholarly writing.

Subject Content

Module 1

- preparation of An outline for practice change
- key aspects of Scholarly writing
- types of Scholarly outputs

Module 2

- Searching The literature
- Analysing and synthesising The literature
- Critical reading for Critical writing

Module 3

- Constructing A report
- Preparing A Discussion paper
- writing An abstract and Executive summaries
- Preparing A conference paper for presentation

Assessment

NURS 7045 Writing for Publication

Credit Points 10

Legacy Code 401086

Coordinator Sheree Smith ([https://directory.westernsydney.edu.au/search/name/Sheree Smith/](https://directory.westernsydney.edu.au/search/name/Sheree%20Smith/))

Description This unit is about writing for publication in the scholarly health and welfare literature. Students will investigate: the range of publications available and the media through which they are delivered; the process of publishing, the key people involved and their roles; the means by which quality is assured in the publishing process and the ways publications are rated for quality and impact; and the influence of social networking media on publishing. Specifically, the influence of online publishing will be investigated. Students will also gain experience of writing for publication under the guidance of an experienced editor and colleagues from the publishing industry. The unit is also available as an elective to all Postgraduate students in the University.

School Nursing & Midwifery

Discipline Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. describe the steps in the publication process
2. demonstrate how to write quickly and how to improve their writing for publication.
3. explain the purpose of the quality assurance steps in the publication process

- debate the merits of different peer review systems and the issues around open access to publications.
- establish and maintain a credible social networking site and use existing sites
- demonstrate an understanding of the role of publication metrics in evaluating journals and academics

Subject Content

The range of healthcare publications: from professional magazines to scholarly journals

The delivery of healthcare publications: from hardcopy to online only and combinations.

Who pays for publication, what are the challenges to the traditional publishing houses and how are they responding?

Open access versus closed access to publications ? why is everything not freely available?

Quality assurance in publication: peer review systems, similarity detection, editing, copyright and correspondence.

How the scientific healthcare community and the publishing industry use social networking media: weblogs, Twitter & Facebook.

Publication metrics: journals and individuals; impact factors and h-indices

What does writing an article involve: getting started, keeping going and getting finished

The publication process: from submission to publication; who does what?

Assessment

NURS 7048 Aboriginal and Torres Strait Islander Maternal and Newborn Health

Credit Points 10

Legacy Code 401349

Coordinator Renae Coleman ([https://directory.westernsydney.edu.au/search/name/Renae Coleman/](https://directory.westernsydney.edu.au/search/name/Renae%20Coleman/))

Description This unit will specifically enable students to investigate, discuss and develop an understanding of Aboriginal and Torres Strait Islander peoples' sense of identity, culture, and health. Health statistics, as well as historical and contemporary practice issues will be identified. In addition, the unit will explore strategies that have been implemented to address inequities in health outcomes for Aboriginal and Torres Strait Islander families. Further, the unit promotes the development of critical knowledge essential for students to understand their own values, beliefs, biases, and perceptions to become culturally

sensitive and appropriately adaptable when meeting the health needs of Aboriginal and Torres Strait Islander women and families.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4775 Graduate Diploma in Midwifery.

Assumed Knowledge

Foundation knowledge related to primary health care and Aboriginal and Torres Strait Islander Health and primary health care, during Bachelor of Nursing or Registered Nurse educational programs.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Describe the impact of historical events and government policies on the health and wellbeing of Aboriginal and Torres Strait Islander peoples
- Recognise and appreciate the health-related risk factors and outcomes for Aboriginal and Torres Strait Islander mothers and babies
- Explain sense of identity, spiritual connection to country and traditional practices and describe how these can be incorporated into practice.
- Identify effective strategies for health promotion and health maintenance for Aboriginal and Torres Strait Islander families
- Explain the importance of cultural safety and culturally appropriate care and service provision for Aboriginal and Torres Strait Islander peoples
- Apply critical reflection on own values and attitudes towards cultural safety and the provision of health care for Aboriginal and Torres Strait Islander families

Subject Content

- Meaning of health and illness
 - Values, belief systems, attitudes, bias, cultural safety and practices in the care of Aboriginal and Torres Strait Islander families
 - Definitions of culture from the perspectives of Aboriginal and Torres Strait Islander people
 - Health status of Aboriginal and Torres Strait Islander mothers and babies
- Social determinants of health in Aboriginal and Torres Strait Islander families
 - Historical events and health care policies - relate the impact it has had on Aboriginal and Torres Strait Islander maternal and infant health
 - Cultural isolation, Poverty, Discrimination ? social and institutional
- Health care policies and service provision
 - Closing the gap
- Ethical care in Aboriginal and Torres Strait Islander populations
 - Birthing on Country
 - Models, theories and cultural care
 - Working in partnership
 - NMBA Midwife standards for practice
- Culturally appropriate care and service provision for Aboriginal and Torres Strait families

NURS 7049 Care of People with Tuberculosis (TB)

Credit Points 10

Legacy Code 401376

Coordinator Linda Gregory ([https://directory.westernsydney.edu.au/search/name/Linda Gregory/](https://directory.westernsydney.edu.au/search/name/Linda%20Gregory/))

Description This unit examines the care of individuals with Tuberculosis (TB), from initial diagnosis through treatment phases of the disease. Students will explore the role of case management in the care of patients with TB, including strategies to enhance the effectiveness of case managers. Drug resistant TB will be a focus of the unit, especially in relation to its prevention, and the safe management and treatment of patients with different types of drug resistance. Strategies for facilitating community participation in health care will be provided and students will have the tools to develop a community-based health education program focusing on TB. Case studies drawn from across the lifespan and different populations will provide a focus for exploring the pathophysiology of Tuberculosis, diagnostic options, modes of transmission and the pharmacological and non-pharmacological treatment options available.

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appraise goals and principles of case management
2. Apply an understanding of how case management can be used in the care of patients with Tuberculosis (TB) and contacts
3. Scrutinise the predictors and clinical signs of drug resistant TB

4. Critically review and apply strategies to prevent the development of drug resistant TB
5. Formulate concepts of community participation in health care
6. Create a community-based health promotion program focusing on TB

Subject Content

Case management principles
 Role of case manager
 Effective interviewing skills
 Patient centred care
 Adherence behaviour
 Infection prevention and Tuberculosis case management
 Safe management and treatment of contacts of patients with Tuberculosis (Directly Observed Treatment - DOT)
 Preventing drug resistant Tuberculosis
 Models of care for the delivery of tuberculosis prevention
 Health education strategies
 Safe management and treatment of contacts of Tuberculosis

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	40 minutes	20	N	Individual
Case Study	2,000 words	40	N	Individual
Presentation	1,000 words	40	N	Individual

NURS 7050 Clinical Management of Tuberculosis (TB)

Credit Points 10

Legacy Code 401377

Coordinator Linda Gregory ([https://directory.westernsydney.edu.au/search/name/Linda Gregory/](https://directory.westernsydney.edu.au/search/name/Linda%20Gregory/))

Description This unit examines the clinical management of Tuberculosis, particularly in relation to cause, prevalence, transmission, diagnosis, treatment and prevention of the disease. Students will be introduced to the different diagnostic tests used in the management of the disease in both adults and children. Case studies drawn from across the lifespan and different populations will provide a focus for exploring the pathophysiology of Tuberculosis, diagnostic options, modes of transmission and the pharmacological and non-pharmacological treatment options available.

School Nursing & Midwifery

Discipline Nursing, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the pathogenesis and transmission of Tuberculosis
2. Outline and assess the prevalence of Tuberculosis globally
3. Scrutinise the predictors for latent tuberculosis infection and limitations of screening tests
4. Appraise methods for Tuberculosis diagnosis
5. Critically analyse the treatment options for the clinical management of Tuberculosis
6. Apply an understanding of Directly Observed Treatment (DOT) of Tuberculosis
7. Critique strategies for the diagnosis and management of Tuberculosis in special populations

Subject Content

Epidemiology of tuberculosis
 Pathogenesis and transmission of tuberculosis
 Latent tuberculosis infection
 Diagnosis of tuberculosis
 Principles of specimen collection for the diagnosis of tuberculosis
 Drug resistant tuberculosis
 Treatment and medication management for people with tuberculosis
 Disease containment and prevention strategies
 Approach to management of tuberculosis in special populations
 (Pregnancy, childhood, substance use, immune suppressive conditions)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

NURS 7051 Complex Midwifery Care

Credit Points 10

Legacy Code 401350

Coordinator Leanne Luck ([https://directory.westernsydney.edu.au/search/name/Leanne Luck/](https://directory.westernsydney.edu.au/search/name/Leanne%20Luck/))

Description This unit provides students with knowledge of complex conditions that may arise during pregnancy, labour, birth and the postnatal period for the woman or her newborn/s. Emphasis will be placed on the biological and physiological aspects of these conditions. In addition, issues surrounding infertility and reproductive technologies, and contemporary issues that impact women, such as pre-existing medical conditions and mental health, will be explored. The unit integrates physiological, psychosocial and cultural aspects relating to a woman experiencing a complex pregnancy, labour, birth or post birth period. The role of the midwife in maintaining partnerships with women, even when childbearing experiences are complex, will be discussed and critically analysed. Students will also critically analyse key ethical and legal aspects affecting midwifery and maternity care.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) NURS 7053 AND NURS 7054

Co-requisite(s) NURS 7052

Equivalent Subjects NURS 7017 Complex Care

Restrictions

Students must be enrolled in 4775 Graduate Diploma in Midwifery and be a registered nurse employed in a participating NSW Health Local Health District facility or a private hospital in the position of a midwifery student.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically reflect on and discuss legal and ethical aspects and responsibilities of the midwife which affect midwifery and/or maternity care including collaborative health care relationships between midwives and others in complex situations including choices around infertility and reproductive technologies
2. Apply knowledge of the normal biological, physiological, psychological and social processes of pregnancy, labour, birth, the postnatal period and the newborn to identify and explain deviations from normal to ensure early consultation or referral to appropriate members of the health care team
3. Explore and identify risk factors and instigate measures to minimise adverse outcomes for women with pre-existing conditions and their newborns
4. Critically analyse care for a woman experiencing an unanticipated pregnancy outcome
5. Demonstrate appropriate application of knowledge around social determinants of health particularly in regard to marginalised women and those with perinatal mental health needs
6. Critically discuss seminal and current theories related to attachment and perinatal mental health and the implications for practice
7. Critically evaluate midwifery care to reduce morbidity and mortality rates for women with an emphasis on Aboriginal and Torres Strait Islander women and Culturally and Linguistically diverse (CALD) women

Subject Content

1. Infertility

- a. Assisting the woman and her family in relation to infertility
- b. Assisted reproductive technologies
2. Maternal complexities during pregnancy, labour and birth
 - a. Complications in the first 20 weeks of pregnancy (including miscarriages, ectopic pregnancy, hyperemesis and termination of pregnancy for fetal abnormalities)
 - b. Hypertensive disorders across the perinatal period
 - c. Maternal infections and infectious diseases e.g. TORCH, GBS, Hep B, HIV
 - d. Type 1, Type 2 and gestational diabetes
 - e. Cholestasis of pregnancy
 - f. Antiphospholipid syndrome
 - g. Gestational growth issues
 - h. Pre-term labour and birth
3. Maternal complexities in the postnatal period
 - a. Postnatal complications e.g. urinary retention, haematoma, infections (other infections)
 - b. Perineal trauma
4. Caring for the newborn in complex situations
 - a. Premature infants
 - b. Neonatal jaundice
5. Supporting women with complex conditions and social and emotional issues
 - a. Pharmacology for complex conditions
 - b. Domestic violence (DV) and multidisciplinary consultation and care
 - c. Substance misuse (Alcohol and other drugs) and its impact on parenting and infant / child outcomes
 - d. Working with women who are experiencing DV and other complex family situations
 - e. Social and emotional needs of refugee and migrant women
6. Working in partnership with women with complex pregnancies
 - a. Assessment and monitoring of physical and emotional health and social well being
 - b. Psychiatric disorders, psychosocial assessment and referral
 - c. Perinatal grief and loss
 - d. Communication skills required to work effectively with women and families in need
7. Women with previous medical and surgical conditions that may impact on pregnancy and birth
 - a. Pre-existing medical conditions e.g. cardiac, respiratory, endocrine, neurological, autoimmune diseases, thyroid disease, gynaecological issues, neoplasia
 - b. Impacts of obesity across the perinatal period
 - c. Female genital mutilation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

NURS 7052 Complex Midwifery Practice

Credit Points 10

Legacy Code 401351

Coordinator Fiona Arundell ([https://directory.westernsydney.edu.au/search/name/Fiona Arundell/](https://directory.westernsydney.edu.au/search/name/Fiona%20Arundell/))

Description This unit provides students with the knowledge to collaborate with all health professionals and includes developing clinical skills; assessing procedures for managing obstetric emergencies; undertaking simulations of obstetric emergencies; transferring women or newborns with complex health issues; and assessing referral pathways. Students will continue to gain practical experience in designated clinical areas and follow their 10 women throughout pregnancy, labour, birth and the postnatal period in a continuity of care model. They will strengthen their skills in undertaking psychosocial assessment, effectively engaging women in services, facilitating groups and working in collaboration with other professionals to support women.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) NURS 7053 AND NURS 7054

Co-requisite(s) NURS 7051

Equivalent Subjects NURS 7035 Midwifery practice 2

Restrictions

Students must be enrolled in 4775 Graduate Diploma in Midwifery and be a registered nurse employed in a participating NSW Health Local Health District or private maternity facility in the position of a midwifery student.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate midwifery skills for the assessment and care for women with complex needs
2. Discuss the rationale for the assessment and care of women with complex needs during pregnancy, labour and birth and the postnatal period
3. Demonstrate midwifery skills for the assessment and care of the sick neonate
4. Identify and appropriately manage emerging and escalating situations that may require referral or additional care including the referral processes and collaborative care

5. Identify emergency situations related to childbirth and the role of the midwife and other health professionals in providing emergency care
6. Implement appropriate midwifery management during emergency situations
7. Demonstrate safe Midwifery standards of practice and capacity to critically reflect on the professional requirements for midwifery practice

Subject Content

1. Introduction to Complex Midwifery Practice
 - Midwifery Practice Portfolio: Midwifery Continuity of Care Case Notes and reflections, Midwifery Log of Practice Experience, Midwife standards for practice
2. Communication
 - Respectful communication
 - Midwifery language for working with women
 - Midwifery terms and acronyms
3. Skills
 - Care of the woman having Epidural pain relief
 - Amniotomy and application of Foetal Scalp Electrode
 - Episiotomy, assessment of the perineum following birth and perineal repair
 - Venepuncture / Intravenous cannulation
 - Care of the woman having labour induction/augmentation
 - Supporting birth process for malpresentations and malpositions
 - Receiving the baby at LSCS
 - Care of a baby receiving oxygen
 - Insertion of a nasogastric tube
 - Care of the baby receiving phototherapy
 - Care of the woman and/or baby following death
 - k2ms
4. Escalating complexities
 - Warning flags
 - Midwifery actions
 - Midwives responses
 - Communication
 - Documentation
5. Skills for managing emerging and escalating emergency situations
 - Communication skills for complex and emergency situations
 - Obstetric emergencies: Antepartum haemorrhage; postpartum haemorrhage and third stage complications (inverted uterus, retained placenta); maternal seizures / Eclamptic fit; Cord presentation / prolapse; Amniotic fluid embolism; Ruptured uterus; Shoulder dystocia
 - Care of the critically ill woman (antenatal, labour/birth and postnatal)
 - Care of the unwell newborn
 - Maternal resuscitation
 - Neonatal resuscitation

NURS 7053 Foundations of Antenatal and Birth Care

Credit Points 10

Legacy Code 401347

Coordinator Leanne Luck ([https://directory.westernsydney.edu.au/search/name/Leanne Luck/](https://directory.westernsydney.edu.au/search/name/Leanne%20Luck/))

Description This unit provides students with an understanding of the biological and physiological aspects of human reproduction, pregnancy, labour and birth. Emphasis will be placed on the normal maternal anatomy and physiology of pregnancy, labour and birth and applications of skills in the Clinical Practice Unit. Students will apply a primary health care approach to working with women and their families during pregnancy and childbirth. Students will consider psychosocial and cultural aspects of pregnancy, birth and breastfeeding, and the role of the midwife in maintaining a woman and family focus within a continuity-of-care model. Childbirth in our culturally diverse maternity health system will be explored, analysed and discussed. The experiences of Aboriginal and Torres Strait Islander women across health services will also be examined. Concepts introduced during the intensive week will be covered in greater complexity across the semester.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) NURS 7054

Restrictions

Students must be enrolled in 4775 Graduate Diploma in Midwifery.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and describe the normal anatomical and physiological changes and processes related to growth and development of the fetus and relate this to stages of pregnancy, labour and birth.
2. Explain and undertake screening, assessment and care of women during pregnancy, labour and birth.
3. Apply knowledge of the biological, physiological, psychological and social needs of women pre-conceptually, during pregnancy, labour and birth to facilitate an optimal experience for the woman.
4. Critically analyse and explain the role of the midwife, within a continuity of care framework, in the provision of care to a woman and her family including knowledge of the legal and ethical issues related to the woman.
5. Critically analyse the impact of birth on a woman's sense of self and her emotional, psychological, social and cultural needs and her family.
6. Apply knowledge of the principles of adult learning, primary health care and public health policy to facilitate opportunities for health promotion with the woman, her family and community, particularly relating to culturally safe practices for Aboriginal and Torres Strait

NURS 7054 Foundations of Postnatal and Newborn Care

Credit Points 10

Legacy Code 401348

Coordinator Elisha Stein ([https://directory.westernsydney.edu.au/search/name/Elisha Stein/](https://directory.westernsydney.edu.au/search/name/Elisha%20Stein/))

Description This unit is centred on using a primary health, with continuity of- care approach to the care of women and their families during transition to parenthood. Students will investigate the biological, physiological and psychosocial aspects of the postnatal period and the midwife's role at this time. Culturally diverse practices, including those of Aboriginal and Torres Strait Islander peoples and women from other countries and cultures will be explored. Students develop midwifery skills working with women in a continuity-of- care model and gain experience in maternity practice areas. The unit commences with a one-week intensive workshop exposing students to an elementary level of understanding and application of midwifery care in a maternity setting in preparation for employment. Postnatal care concepts introduced during this intensive practice week will be covered in more detail during subsequent weeks.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) NURS 7053

Restrictions

Students must be enrolled in 4775 Graduate Diploma in Midwifery.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and describe the normal biological and physiological processes related to the postnatal period

Subject Content

History of Midwifery

1. Midwifery as a Profession

- The ICM Definition of A midwife
- The philosophy of Midwifery
- woman centred care/The midwife woman relationship
- The practice of Midwifery: what makes A good midwife
- The language of Midwifery
- professional Midwifery Organisations ACM/ICM
- Registration requirements for practicing Midwifery in Australia

2. A Global Perspective of Midwifery

- primary healthcare and Midwifery
- social Determinants of health affecting maternity care
- The framework for quality Maternal and newborn care
- Midwifery The Universal pathway of health: The Importance of Midwifery care
- human rights in childbirth

3. Childbirth in Australia

- The Australian healthcare system and maternity care
- towards normal birth policy (currently under Review)
- The First 2000 days Framework
- why does normal physiological birth matter (including The human Biome)
- The role of The midwife as protector of normal physiological birth
- The birth space
- Continuity of Midwifery care as The gold Standard of care

4. Cultural and Personal beliefs around childbirth

- personal beliefs
- cultural beliefs and practices
- Fear and Risk around childbirth
- birthing outside The system

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Intra-session Exam	1 hour	20	Y	Individual

2. Describe physiological changes that occur at birth and growth and development of the newborn to six weeks of age
3. Apply evidence-based knowledge of the biological, physiological, psychological and social needs of women during the postnatal period to facilitate an optimal experience for the woman including transition to parenthood
4. Undertake screening, assessment and care of women and newborn during the postnatal period
5. Critically analyse and explain the role of the midwife, within a continuity of care framework, in the provision of postnatal care to a woman and her family including knowledge of the legal and ethical issues related to the woman and her newborns
6. Apply knowledge of the principles of adult learning, primary health care and public health policy to facilitate postnatal opportunities for health promotion with the woman, her family and community particularly relating to Aboriginal and Torres Strait Islander women
7. Critically evaluate the socio-cultural, economic, political and personal context of infant feeding decisions in Australia
8. Implement and evaluate strategies for providing culturally safe practice for Aboriginal and Torres Strait Islander and Culturally and Linguistically diverse (CALD) women and their families
9. Demonstrate safe Midwifery standards of practice and capacity to critically reflect on the professional requirements for midwifery practice

Subject Content

1. Intensive week skills workshop
 - introduction to Postnatal care
 - introduction to newborn assessment
 - introduction to supporting breastfeeding
 - communication
 - i. Respectful communication
 - ii. Midwifery language for working with women
 - iii. Midwifery terms and acronyms
 - resilience and Preparing to commence role as Midwifery student
 - orientation to library and databases
 - introduction to Midwifery practice portfolio
 - i. Midwifery log of practice experience
 - ii. Midwifery continuity of care notes
 - iii. Midwife standards for practice and Australian Midwifery Standards Assessment Tool (AMSAT)
 - iv. Professional practice experience guide
2. Postnatal physiology
 - Maternal physiological changes
 - physiology of The newborn at birth
 - newborn growth and development to six weeks
3. Midwifery Care (Postnatal)
 - The midwives role in Postnatal care
 - Working with women and their families post birth
 - partner inclusive practice
 - physiological, psychological, social and emotional changes and needs
 - Perinatal mental health, social and emotional awareness
 - options for Postnatal education and preparation for parenting
 - newborn care and Immunisation
 - Escalation procedure for deviations from normal
 - Nutritional requirements of The newborn
 - initiation and support of breastfeeding
 - Pharmacology, Maternal and newborn
 - An introduction to The specific needs of women with complex pregnancies
 - apply legal and Ethical aspects associated with Pregnancy, labour and birth e.g. documentation and consent
4. Infant feeding decisions in Australia
 - politics of breastfeeding
 - who Code for The Marketing of breast milk substitutes

- Baby Friendly health initiative in Australia
 - supporting women in their feeding decision
5. Midwifery Skills - Postnatal
 - communication skills for Working in partnership
 - skills of reflecting on practice
 - APGAR assessment, and initial newborn Examination including weight and measurements
 - assessment of The woman post birth
 - breastfeeding support
 - preparation of breastmilk Substitute
 - newborn blood Screening, Intramuscular and subcutaneous injections and blood glucose level testing.
 - Receiving The Baby at LSCS
 - Postnatal assessment and discharge assessment (Maternal)
 - Postnatal assessment and discharge assessment (newborn)
 6. Cultural Awareness
 - traditions around The Postnatal period and mothering
 - Aboriginal and Torres Strait Islander people and Postnatal care that considers (closing The gap)
 - Working in partnership
 - cultural Factors effecting Postnatal care
 7. Health Informatics

Special Requirements

Legislative pre-requisites

NURS 7055 Perinatal, Infant and Child Mental Health

Credit Points 10

Legacy Code 401375

Coordinator Rachel Gregory-Wilson ([https://directory.westernsydney.edu.au/search/name/Rachel Gregory-Wilson/](https://directory.westernsydney.edu.au/search/name/Rachel%20Gregory-Wilson/))

Description This unit enables students to explore the complex issues related to Perinatal, Infant and Child mental health including: the importance of the parent infant relationship to maternal and infant mental health, antenatal and postnatal depression and anxiety, substance misuse and domestic violence. Through examination of these complex issues, students will gain knowledge of the risk and protective factors that influence outcomes for infants, children and families. Strategies to promote emotional wellbeing, positive parent-child relationships and social support for these families is an essential learning component supported by the concepts of targeted and specialist intervention, and early intervention. The knowledge gained in this unit will be consolidated through virtual clinical placement.

School Nursing & Midwifery

Discipline Mothercraft Nursing and Family and Child Health Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4713 Master of Child and Family Health (Karitane), 4714 Graduate Diploma in Child and Family Health (Karitane) or 4715 Graduate Certificate in Child and Family Health (Karitane).

Assumed Knowledge

Fundamental concepts of mental health at undergraduate degree level. An understanding of professional frameworks and competencies for the Registered Nurse or Registered Midwife at a undergraduate level, augment experience at a general Registered Nurse or Registered Midwife level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the importance of positive parent child relationships on emotional development as a predictor of child development.
2. Determine risk and protective factors that influence global outcomes for children and their families including intergenerational issues using a socioecological model
3. Recognise the risk factors and signs of anxiety and depression in childhood
4. Explain the impact of perinatal depression and anxiety on the infant-parent relationship and analyse the management and treatment of perinatal mood disorders
5. Evaluate the impact of domestic/family violence on the health and wellbeing of women, children and families and identify strategies to support families
6. Analyse how parental substance misuse impacts parenting capacity and family life
7. Based on best available evidence, discuss early prevention and intervention strategies and programs that promote the health and wellbeing of children

8. Prioritise and select appropriate skills as a self-reliant learner to effectively work in groups and teams

Subject Content

1. Parent - infant relationship and introduction to attachment theory
2. Emotional development
3. Transition to parenthood and parenting styles
4. Psychosocial assessment
5. Perinatal Mental Disorder (PMD) management
6. Risk and protective factors affecting mental wellbeing
7. Interventions to support families

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

NURS 7056 Preparation for Midwifery Practice

Credit Points 10

Legacy Code 401352

Coordinator Fiona Arundell ([https://directory.westernsydney.edu.au/search/name/Fiona Arundell/](https://directory.westernsydney.edu.au/search/name/Fiona%20Arundell/))

Description In this unit, students will consolidate their knowledge and midwifery skills in preparation for their role as a midwife. They will continue to practice in designated clinical areas and follow through their 10 continuity of care experiences. Students will complete the professional portfolio and reflect on how they can identify and plan for personal professional development and leadership as midwives, including the professional development needs of others. Students will be assessed across the midwife standards for practice. In addition, students will have the opportunity to examine leadership development and styles within the midwifery profession. Students are encouraged to consider their role in future midwifery leadership.

School Nursing & Midwifery

Discipline Midwifery**Student Contribution Band** HECS Band 1 10cp**Level** Postgraduate Coursework Level 7 subject**Pre-requisite(s)** NURS 7052**Incompatible Subjects** NURS 7036 Midwifery Practice 3**Restrictions**

Students must be enrolled in 4775 Graduate Diploma in Midwifery and be a registered nurse employed in a participating NSW Health Local Health District or private maternity facility in the position of a midwifery student.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically discuss the components and relevance of continuing professional development
2. Develop skills for critical self-reflection through individual and group processes
3. Critically discuss the potential for career development in the health care system
4. Demonstrate a safe standard of Midwifery practice and capacity to critically reflect on the professional requirements for midwifery practice
5. Discuss differences between leadership and management in relation to midwifery as a profession
6. Discuss and critically reflect on the importance of leadership development and leadership styles for midwifery as a profession

Subject Content

Maintaining Currency

- Midwifery Portfolios
- Self and group critical reflection
- Professional development

Career Development

- Career options
- Career planning

Leadership

- Leadership and management
- Leaders as change agents
- Reflection and critical thinking in relation to leadership
- Leading in a changing environment
- Building, motivating and leading collaborative teams

Midwife standards for practice

- Promotes health and wellbeing through evidence-based midwifery practice
- Engages in professional relationships and respectful partnerships
- Demonstrates the capability and accountability for midwifery practice
- Undertakes comprehensive assessments
- Develops a plan for midwifery practice
- Provides safety and quality in midwifery practice
- Evaluates outcomes to improve midwifery practice

Special Requirements

Legislative pre-requisites

Legislative requirements would have been attended to by employing NSW Health Local Health District or private maternity facility.

NURS 7057 Professional Foundations of Midwifery

Credit Points 10

Legacy Code 401374

Coordinator Athena Sheehan ([https://directory.westernsydney.edu.au/search/name/Athena Sheehan/](https://directory.westernsydney.edu.au/search/name/Athena%20Sheehan/))

Description This unit will introduce students to the profession of midwifery from a philosophical, historical, global, and Australian perspective. It will highlight the important role Midwifery plays in the provision of cost effective, high quality care to both women and newborns globally. It will focus on policies and practices that promote respectful and collaborative woman centred care and the value of continuity of midwifery care to achieving these goals. Students will be required to reflect on beliefs around childbirth including their own personal beliefs.

School Nursing & Midwifery

Discipline Midwifery

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects NURS 7037 Midwifery as a Profession

Restrictions

Students must be enrolled in 4775 Graduate Diploma in Midwifery and be a registered nurse employed in a participating NSW Health Local Health District facility or Private Hospital in the position of a midwifery student.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the history and philosophy of midwifery
2. Analyse the role midwives play in optimising women's health in Australia and Globally
3. Appraise different beliefs and practices around childbirth
4. Apply the language of midwifery
5. Discuss contemporary issues related to childbirth in Australia

Subject Content

History of Midwifery

Midwifery as a Profession

- The ICM Definition of a Midwife
- The Philosophy of midwifery
- Woman centred care/the midwife woman relationship
- The Practice of Midwifery: what makes a good midwife
- The Language of Midwifery
- Professional Midwifery organisations ACM/ICM
- Registration requirements for practicing Midwifery in Australia

A Global Perspective of Midwifery

- Primary healthcare and midwifery
- Social determinants of health affecting maternity care
- The framework for quality maternal and newborn care
- Midwifery the universal pathway of health: The importance of Midwifery care

- Human rights in childbirth

Childbirth in Australia

- The Australian healthcare system and maternity care
- Towards Normal Birth Policy (currently under review)
- The First 2000 days Framework
- Why does normal physiological birth matter ? (including the human Biome)
- The role of the midwife as protector of normal physiological birth
- The birth space

- Continuity of Midwifery care as the Gold Standard of care

Cultural and Personal beliefs around childbirth

- Personal beliefs
- Cultural beliefs and practices
- Fear and Risk around childbirth
- Birthing outside the system

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Reflection x 2	800 words each	50	N	Individual
Essay	1,500 words	50	N	Individual

NURS 7058 Public Health Management of Tuberculosis (TB)

Credit Points 10

Legacy Code 401378

Coordinator Linda Gregory ([https://directory.westernsydney.edu.au/search/name/Linda Gregory/](https://directory.westernsydney.edu.au/search/name/Linda%20Gregory/))

Description This unit examines the ways in which Tuberculosis (TB) is managed from a public health perspective. Students will be introduced to the essential components of a TB Program, particularly focusing on preventing transmission of TB and promoting the health of individuals and communities affected by TB. Learning materials in the unit will be provided to enable students to undertake a Tuberculosis contact investigation, including risk assessment of transmission and management of contacts. Case studies will be utilised to facilitate students' development of effective patient and community education programs.

School Nursing & Midwifery

Discipline Nursing, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply an understanding of the components of a Tuberculosis (TB) program
2. Critically analyse the information needed to undertake a Tuberculosis (TB) contact investigation
3. Assess and recommend strategies to minimise the transmission of Tuberculosis (TB) in a community
4. Verify and select key messages for Tuberculosis (TB) management
5. Design effective strategies for patient and community education on Tuberculosis (TB)

Subject Content

- Tuberculosis Program (TB) components
- Contact investigation priorities and processes
- Risk assessment for TB transmission
- Components of a contact/patient interview
- Infection prevention, hierarchy of controls
- Promoting infection control in a TB program
- Stigma reduction strategies
- Health education strategies

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

NURS 7059 Ageing in Place: Wellbeing and Sustainability

Credit Points 10

Legacy Code 401417

Coordinator Jed Montayre ([https://directory.westernsydney.edu.au/search/name/Jed Montayre/](https://directory.westernsydney.edu.au/search/name/Jed%20Montayre/))

Description This subject addresses a multi-faceted perspectives of healthy and successful ageing. A major focus is to raise awareness about creating an age-friendly community which facilitates older age groups, including those from culturally diverse backgrounds, and Aboriginal and Torres Straits Islander peoples, to be actively involved in all community activities to stay connected to people and place that are important to them. The multiple perspectives of ageing in place integrates biomedical, physical environment/design, legal, ethical, policy, service provision and social contexts of ageing. Knowledge and skills acquired in this subject are useful for planners, managers and health care providers for those working with aged communities. The subject covers evidence-based approaches affecting physical environment, personal characteristics and psychosocial mechanisms that facilitate older people to age successfully.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) Prerequisite for students in 4785 - NURS 7075 Nursing Practice 3

Prerequisite for students in 4691 and 4780 - NURS 3032 - Professional Practice Experience 5

Restrictions

Students must be enrolled in a postgraduate program or 4691 Bachelor of Nursing or 4780 Bachelor of Nursing – WSU Online or

4785 Master of Nursing Practice (Preregistration) or 4693 Bachelor of Nursing (Advanced) or 4692 Bachelor of Nursing (Graduate Entry)

Assumed Knowledge

Knowledge related to social sciences, biosciences and nursing across the lifespan

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the diversity within the aged communities and their unique attributes and needs.
2. Articulate and apply current evidence from a multidisciplinary perspective enabling older people to maintain independence, autonomy, and connection to social support, including friends and family.
3. Analyse the needs of aged communities from culturally and linguistically diverse backgrounds living in Australia and those of Aboriginal and Torres Straits Islander peoples.
4. Evaluate processes and propose strategies to be considered in designing age-friendly communities, including reform agendas and policies that promote age-friendliness.

Subject Content

- Who is the older person?
- Ageing in Place: A concept analysis
- Person-centred approach
- Age-friendly framework: A multi-faceted approach
- Multidisciplinary perspectives based on the eight domains within three clusters: a) Social environment (social participation, respect and social inclusion, civic participation and employment); b) Community and health support (communication and information, community support and health services); and c) Built environment (outdoor spaces and buildings, transportation, and housing)
- Aged communities: Culturally and linguistically diverse backgrounds, and Aboriginal and Torres Straits Islander peoples
- Ageism: Barriers to ageing in place

Special Requirements

Essential equipment

Access to an internet enabled device is essential in order to be able to: access course materials; to participate in discussion groups; and to access additional resources provided by the lecturer during the session. See http://www.westernsydney.edu.au/currentstudents/current_students/services_and_facilities/uwonline_student_support (https://www.westernsydney.edu.au/currentstudents/current_students/services_and_facilities/uwonline_student_support/) for further information.

Assessment

NURS 7060 Optimising Contribution of Older People

Credit Points 10

Legacy Code 401418

Coordinator Jed Montayre ([https://directory.westernsydney.edu.au/search/name/Jed Montayre/](https://directory.westernsydney.edu.au/search/name/Jed%20Montayre/))

Description This subject addresses issues related gerontocracy (a society whereby elders have power and influence), versus ageism (age-related prejudice or discrimination based on a person's age). Stages of ageing and risk will also be covered, including ethical issues related to the aged communities and the aged care sector. Importantly, this subject will address strategies that need consideration to optimise integration of aged communities, including: active adult retirement communities, poverty safety net and governmental policies, housing, the use of technology, strategies to slow and reverse age-related decline including emerging developments. Issues related to optimising

self-determination and 'dignity of risk' among aged communities will also be covered.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically reflect on the emergence of gerontocracy and ageism in societies, applying these concepts to Indigenous peoples and culturally and linguistically diverse communities
2. Analyse the antecedents of ageing stereotypes and stigma; strategies to challenge current mindset that hinders the inclusiveness of aged communities
3. Critically reflect and discuss the range of factors related to ageing and risk
4. Critique selected current legislations, and ethical issues related to the aged care sector
5. Articulate and apply current evidence that impact on optimising integration of aged communities

Subject Content

Gerontocracy and ageism ? structure of eldership among Indigenous peoples, filial piety, familial obligations and elder orphans, including those in culturally and linguistically diverse communities

Third and fourth stages of ageing

Ageing and risk: Physical decline; retirement and precarity; increasing lifespan, and compression of morbidity; poverty; social isolation; perception of unsafety; burden of care-giving; neglect, exploitation and abuse

Ethical issues in aged communities, including the aged care sector.

Solicit stakeholder input on issues related to: (e.g. flexible retirement, training and retaining of employees in later life, volunteer opportunities, independent living, housing in urban and rural environments)

Optimising integration of aged communities: a) active adult retirement communities; b) poverty safety net and governmental policies; c) technology enhancement in the digital age; d) slowing and reversing age-related decline, including emerging developments; e) optimising self-determination, including ?edignity of risk?f

NURS 7061 Professional Focus: Age-Friendly Future

Credit Points 10

Legacy Code 401420

Coordinator Jed Montayre ([https://directory.westernsydney.edu.au/search/name/Jed Montayre/](https://directory.westernsydney.edu.au/search/name/Jed%20Montayre/))

Description Accepting and embracing the ageing population as assets and not a burden is important towards enabling older people to continue living in security and to fully participate in society. For this to occur, the future of work, design and social spaces need to be responsive to the needs of ageing populations. This unit offers students with the opportunity to assess and reflect on the domains of age-friendliness in alignment with World Health Organisation (WHO) Age-friendly framework relevant to their interest, or their work practice settings. The WHO age-friendly domains, inputs from older people, carers of older people and service providers, are elements to be considered in this proposed quality improvement project.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Successful completion of 40 credit points and students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically reflect on, evaluate and synthesise principal elements of project management.
2. Create a critical, coherent and succinct argument that justifies the need for the proposed quality improvement project related to age-friendliness.
3. Design a quality improvement project utilising the age-friendly domains focussing on issues influencing health, wellbeing of older people as well as the enablers for sustainable environments.
4. Develop a representational work articulating the domains of age-friendliness observed in the communities.
5. Develop a written proposal of acceptable and professional standard.

Subject Content

Promoting Age-friendly Futures
WHO Age-friendly framework
Domains of Age-friendliness
Assessment (Based on City of Melville Toolkit)
Creating a Community Profile

Consultation (Older People, Carers of Older People and Service Providers)

Age-friendly initiatives in Australia

Writing a Quality Improvement Project Proposal

Assessment

NURS 7062 Project Management in Healthcare

Credit Points 10

Legacy Code 401419

Coordinator Jed Montayre ([https://directory.westernsydney.edu.au/search/name/Jed Montayre/](https://directory.westernsydney.edu.au/search/name/Jed%20Montayre/))

Description Project management knowledge and skills are vital in the healthcare professional work environment. Using scenarios, students will explore their topic of interest, applying principal project management concepts, and integrate these into project planning. Students will learn how to appraise existing projects using a review framework, and identify the key steps within a project life cycle, starting from the conception stage to creating a project implementation plan.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appraise project management concepts and apply these to explore topics relevant to professional interest in healthcare.
2. Critically evaluate and review reports related to healthcare, projects or initiatives using project quality tools and framework.
3. Propose solutions towards professional and practice issues identified within healthcare organisations using effective project management strategies.
4. Communicate and engage with key stakeholders about proposed solutions based on healthcare organisation's quality indicators.
5. Critically reflect on learning acquired and professional development attained in this unit.

Subject Content

Project Life Cycle
Project Management and the Healthcare Environment
Decision-Making Tools for Choosing A Project

Principles and Steps for Strategic Planning with particular emphasis on healthcare

Essential Project Management Components

Skills required in Project Management: technical skills, people management skills

Change and Risks in Healthcare Organisations

Project Quality Indicators and Pre-requisites of Quality

Quality Management Tools

Project Review Tools and Framework

Assessment

Teaching Periods

NURS 7064 Clinical Teaching and Workplace Learning for Competent Practice

Credit Points 10

Legacy Code 401437

Coordinator Linda Gregory ([https://directory.westernsydney.edu.au/search/name/Linda Gregory/](https://directory.westernsydney.edu.au/search/name/Linda%20Gregory/))

Description This subject prepares educators and clinicians for their role in clinical education by examining educational theory and its relevance and application to teaching and learning in the clinical workplace. Students will identify and operationalise key priorities for learning and teaching in their organisation and address these by providing appropriate and relevant teaching and learning experiences that build the capacity of colleagues (this can also be extended to include patient and family education). The subject also explores the principles and challenges that are associated with the assessment of competence and the strategies that can be utilised to further develop the knowledge and skills of the clinical educator in the professional practice environment.

School Nursing & Midwifery

Discipline Nursing, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 7676 - Clinical Teaching and Professional Development NURS 7014 - Clinical Teaching and Professional Development

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critique the role of clinical teaching and workplace learning and the role that this has for building workforce capacity.
2. Apply educational theory to construct meaningful clinical workplace learning experiences.
3. Critically analyse the impact of clinical teaching and learning on patient outcomes.
4. Compare and contrast the principles and challenges associated with competency assessment in nursing and midwifery.
5. Appraise the principles of performance development and apply when creating a performance development plan.
6. Critically reflect on and evaluate their own performance as an assessor during and after conducting competency assessments.

Subject Content

Building workforce capacity and the impact of this for better patient outcomes

Teaching in the clinical setting/ opportunities for learning

Education and workplace learning theories (psychological, sociological and postmodern)

Workplaces as learning environments /learning through the demands of practice

Interprofessional education: Learning about, from and with others

The clinical learning curriculum

Patient and family/carer education

The roles of the clinical educator, legislative frameworks and standards/ scope of practice

Principles of competency assessment and attainment

Performance development strategies and evaluation

Assessment

NURS 7065 Capstone Experience in Health Care

Credit Points 20

Legacy Code 401440

Coordinator Sheeja Perumbil Pathrose ([https://](https://directory.westernsydney.edu.au/search/name/Sheeja%20Perumbil%20Pathrose/)

[directory.westernsydney.edu.au/search/name/Sheeja Perumbil Pathrose/](https://directory.westernsydney.edu.au/search/name/Sheeja%20Perumbil%20Pathrose/))

Description This unit offers a range of options for students to integrate, extend and reflect on the professional knowledge and skills gained through their master's level studies. It will provide a framework within which students can explore professionally relevant situations. Students will have the opportunity to nominate, plan and execute a capstone experience relevant to their professional interests. In doing so, students will develop a professional portfolio or e-portfolio that will incorporate the work undertaken during the degree studies and extend to include a critical reflection of their graduate capacity and professional development.

School Nursing & Midwifery

Discipline Nursing

Student Contribution Band HECS Band 1 20cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects NURS 7008 - Capstone Experience in Health Care

Restrictions

Successful completion of 40 credit points at level 7 and students must be enrolled in a postgraduate program at Western Sydney University.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design a project plan on a self-selected professional topic based on relevant scholarly evidence and project data
2. Effectively present and disseminate information in the format of a professional presentation
3. Conduct a review of peer presentations using professional standards
4. Critically reflect on the responsibility for one's own learning through the development of graduate capabilities
5. Produce an integrative professional portfolio

Subject Content

Project planning

Models and frameworks of critical reflection in practice

Developing a professional portfolio

Presentation skills

Report writing

NURS 7066 Acute Exacerbations of Chronic Conditions

Credit Points 10

Legacy Code 401446

Coordinator Stephen McNally ([https://directory.westernsydney.edu.au/search/name/Stephen McNally/](https://directory.westernsydney.edu.au/search/name/Stephen%20McNally/))

Description Acute Exacerbations of Chronic Conditions utilises an evidence-based approach to develop an understanding of pathophysiology, pharmacological interventions, and nursing care for patients who experience acute exacerbations of chronic conditions.

School Nursing & Midwifery

Discipline General Nursing

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) NURS 7071 - Introduction to alterations in health

Restrictions

Students must be enrolled in program 4785 - Master of Nursing Practice (Preregistration).

Assumed Knowledge

Primary health care, foundational knowledge of human biological sciences including human body systems, basic concepts in pharmacology and pathophysiology and the National Health Priorities and the relationship to nursing practice.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the causes, pathogenesis, clinical manifestations, and diagnostic procedures related to acute exacerbations of chronic conditions.
2. Critically analyse the implications and reflect on nursing practice across the lifespan when providing person-centred care for those experiencing an acute exacerbation of a chronic condition.
3. Incorporate the Safety and Quality Health Service Standards to justify the selection and prioritisation of nursing strategies to provide safe effective evidence-based nursing care for a person experiencing an acute exacerbation of a chronic condition.
4. Evaluate appropriate, safe, effective, and evidence-based treatments for a person experiencing an acute exacerbation of a chronic condition

Subject Content
