Seminars in this subject will focus on the practical methods involved in different approaches to historical scholarship, considering how particular topics may be more suitable to one or another approach, and what changes in a historian's account of a topic depending upon the style of scholarship through which the past is approached.

- social and family history ? how can we locate sources that tell US about ordinary people?
- cultural history ? how can we judge The Importance of films, paintings, novels, plays, newspapers, propaganda pamphlets, posters and magazines of The past?
- conceptual history, Intellectual history and history of political thought ? how can we appreciate what mattered to Past minds when their concepts were different to ours?
- history of science, Technology and medicine ? how can we appreciate what Past scientific thinkers assumed about The world?
- gender history and history of sexuality ? how can we reconstruct The way Past people saw sexual desire and saw themselves as sexed beings?
- Big history and deep history ? what is The largest Possible temporal scale for historians to work with, and what are The advantages/ disadvantages of Big vs. small

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Applied Project	4000 words	60	N	Individual
Log / Workbook	300 words each week	40	N	Individual

Teaching Periods

HUMN 7054 Social Science Research Project

Credit Points 40

Legacy Code 102817

Coordinator Thierno Diallo ([https://directory.westernsydney.edu.au/search/name/Thierno Diallo/](https://directory.westernsydney.edu.au/search/name/Thierno%20Diallo/))

Description This unit requires students to design, plan and manage a research project using existing literature and/or data sets. Students will engage critically and analytically with the literature in the field, and undertake research to evaluate and report on research findings. Under the guidance of an academic supervisor students will develop a research question, conduct a systematic review of literature/write a case study/work on an existing dataset, and write a thesis on a topic related to the social sciences. Through this process, students will gain insight into the various components of the research process. Further, they will demonstrate an ability to identify issues, synthesise salient information, and articulate original ideas to make a practical contribution to the existing body of knowledge relevant to the social sciences.

School Social Sciences

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 40cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects HUMN 7052 - Humanitarian and Development Research Project

Restrictions

Students must have completed 80 credit points in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Argue for the significance of research and their impact on society
2. Systemically and critically analyse literature and information sources that are related to the identified research question / hypothesis
3. Justify a research proposal in relation to its significance in the literature, its anticipated impact and the ethical considerations involved
4. Apply appropriate research methods and evaluation processes to collate and critically analyse/interpret data
5. Compose a scientific research report that synthesises research findings.
6. Effectively communicate/disseminate findings of a research project to a variety of audiences

Subject Content

1. The scientific method: Origins and general philosophical approaches
2. Qualitative research methods (Philosophy of qualitative research, observation, good practices and criteria, qualitative interviewing, qualitative analysis, mixed methods)
3. Quantitative research methods (research design, measurement, sampling)
4. Practice, Ethics and Integrity
5. Research proposal development
6. Project Report
7. Presentation of research findings

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Proposal	3,000 words	30	N	Individual
Presentation	20 minutes	10	N	Individual
Report	12,000 words	60	Y	Individual

HUMN 7055 Social Science Training Placement

Credit Points 40

Legacy Code 102818

Coordinator Thierno Diallo ([https://directory.westernsydney.edu.au/search/name/Thierno Diallo/](https://directory.westernsydney.edu.au/search/name/Thierno%20Diallo/))

Description This unit encompasses a three-month training placement (approximately 420 hours) which is designed to consolidate knowledge and skills in the area of contemporary humanitarian and development aid or in the overlapping arenas of international criminological issues such as trafficking, criminalisation and victimisation or other fields in the social sciences. Students will design, plan, implement and report their findings on a project or projects, during a placement with a domestic or international organisation in the community, the not-for-profit, or government sectors. Students will be required to undertake a specific, focused project or projects relevant to the host organisation's needs, as an opportunity to apply the skills, training and knowledge acquired through coursework in the Master of Humanitarian and Development Studies or the Master of International Criminology programs or other master's programs in social science related disciplines.

School Social Sciences

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 40cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects HUMN 7053 - Humanitarian and Development Training Placement

Restrictions

Students must have completed 80 credit points in the Master of Humanitarian and Development Studies or Master of International Criminology programs.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the relevant literature in a contemporary context in the social sciences.
2. Design a project proposal within an organisational environment.
3. Deploy management skills of planning and implementation for a project in a work setting.
4. Apply critical thinking skills in the production of a coherent and substantiated project report.
5. Communicate the outcomes of the project and placement experience at a professional standard to an academic audience

Subject Content

1. Professional experience in the workplace.
2. Introduction to qualitative research (ethnography, observation, field work, good practices and criteria for qualitative research).
3. Planning, designing and implementing applied projects in a work setting.
4. Project proposal.

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject students must have submitted a Working with Children Check Student Declaration (where relevant to the placement to be undertaken). Refer to the Special Requirements website for more information.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Proposal	3,000 words	20	N	Individual
Professional Placement Performance	2 x Supervision reports	S/U	Y	Individual
Presentation	30 minutes	20	N	Individual
Report	12,000 words	60	Y	Individual

Teaching Periods

HUMN 7056 Grant Proposals and Applications

Credit Points 10

Legacy Code 800226

Coordinator Michael O'Connor ([https://directory.westernsydney.edu.au/search/name/Michael OConnor/](https://directory.westernsydney.edu.au/search/name/Michael%20OConnor/))

Description Early career researchers engage in an exceedingly dynamic and competitive research and academic environment. They are expected to possess skills to successfully develop research projects, identify appropriate funding opportunities and communicate their knowledge by applying for research funding in line with their program of research. In this elective unit students will develop the knowledge and skills required to draft complex grant applications - using a framework that includes research design, hypotheses, research questions, and results - while communicating information in an accurate but

accessible manner. Students will develop and refine their ideas for future research funding based on their knowledge gained across all the GCREDI units as well as their research studies. Students will communicate those ideas in practice through development of grant writing skills relevant to funding opportunities associated with their chosen career paths.

School Graduate Research School

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) HUMN 7038 AND
HUMN 7005 AND
HUMN 7026 AND
HUMN 7037

Restrictions

Students must be enrolled in a Doctoral (HDR) program. Students must be enrolled in program 8111 - Graduate Certificate in Researcher Engagement, Development and Impact.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Plan for research and development within their chosen field.
2. Understand how team member(s) skills/attributes are needed to create a compelling proposal.
3. Develop, articulate and communicate a program of research in an accessible manner.
4. Identify funding schemes and agencies appropriate for the candidate's program of research and career progression.
5. Write a well-articulated grant proposal that meets agency/funding scheme requirements.
6. Self-manage research projects as early career researchers.
7. Reflect on own performance and identify own development needs.
8. Interpret the relationship between discipline area and research and its contribution to broader societal transformations.

Subject Content

1. Articulate research needs/opportunities for a chosen field.
2. Outline a program of research to address the needs/opportunities in a field.
3. Developing an impactful but feasible research proposal with an understanding of how to build an effective and compelling application team.
4. Developing a relevant, comprehensive and realistic research budget.
5. Identifying prospective and suitable funding schemes and agencies for scholarships, fellowships, grants, etc.
6. Exploring key funding elements including assessment criteria, audience and style.
7. Organising a grant proposal in line with the requirements of the funder.
8. Project management for researchers.
9. Creating a compelling research proposal narrative by considering the strategic research initiatives of your institution and relevant stakeholders (e.g., community groups, government, industry, etc.)
10. Approaches for revising and refining grant proposals.
11. Reflecting on research impact and contribution to broader societal transformations.
12. Building and demonstrating resilience as early career researchers.

13. Reflecting on research impact and contribution to broader societal transformations.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Reflection	2 reflective written entries, 500 words each (1,000 words total)	0	Y	Individual
Proposal	1,000 words	0	Y	Individual
Proposal	2,500 words	0	Y	Individual
Reflection	1,000 words	0	Y	Individual
Proposal	6,000 words (1,000 words per student team member)	0	Y	Group
Presentation	30 min (5 min per student team member)	0	Y	Individual
Reflection	1,500 words	0	Y	Individual

HUMN 7057 Thirty-Day Research Placement

Credit Points 10

Legacy Code 800227

Coordinator Anna Denejkina ([https://directory.westernsydney.edu.au/search/name/Anna Denejkina/](https://directory.westernsydney.edu.au/search/name/Anna%20Denejkina/))

Description In this experiential learning unit, Graduate Certificate in Researcher Engagement, Development and Impact (GCREDI) students undertake a 30-day internship placement to experience current research practice, to develop professional networks, and to demonstrate and strengthen the transferable, professional and technical research skills they have developed through the GCREDI course and their HDR candidature. Completion of an internship gives research candidates the opportunity to strengthen their research career options and allows for further development of skills in research, planning, management, strategy, professional communication and leadership. The 30-day internship placement can be undertaken in

an industry, government or non-government organisation, and is self-sourced by the student in consultation with the Unit Coordinator.

School Graduate Research School

Discipline Studies In Human Society

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) HUMN 7038 AND

HUMN 7005 AND

HUMN 7026 AND

HUMN 7037 AND

HUMN 7003 OR

HUMN 7035 OR

CEDS 7002

Restrictions

Internship placement must be agreed between placement site and student; and student and subject Coordinator prior to student enrolling in the subject and commencing the internship placement. Students must be enrolled in a Doctoral (HDR) program and also enrolled in program 8111 - Graduate Certificate in Researcher Engagement, Development and Impact.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate skills required to self-manage research projects as early career researchers.
2. Demonstrate planning and management of time and resources required for the internship.
3. Demonstrate an understanding of areas for improvement and development and recommend future development actions using the Extreme Ownership framework.
4. Reflect on own performance and identify own development needs.
5. Interpret the relationship between discipline area and research and its contribution to broader societal transformations.
6. Report on their research work in a professional environment in line with disciplinary standards.
7. Reflect on own performance and identify own development needs.
8. Report on their research work in a professional environment and in line with disciplinary standards.

Subject Content

All content development and delivery are based on the practical application of the following content to the internship placement:

Pre-internship:

1. Experiential learning theory;
2. Project management in research (Part 1): including completion of a pre-internship checklist;
3. Minimum requirements and expectations for a safe workplace and environment; and
4. Professional practices: Innovation, creativity, ethics and diversity in the workplace
5. UN Sustainable Development Goals

During-internship:

1. Developing professional researcher identity;
2. Reflecting on short and longer-term research career plans;
3. Building research and career networks;
4. Experiential learning in practice; and
5. Collaborative practice: collaboration and teamwork in a research environment using the Extreme Ownership framework

Post-internship:

1. Principles of research engagement and impact in industry, government or non-government sectors;
2. Reflecting on personal and professional development;
3. Reflecting on research impact and contribution to broader societal transformations; and
4. Project management in research (Part 2): including completion of a post-internship debrief

Special Requirements

Legislative pre-requisites

Any Internship placement site requirements must be met prior to commencement of the placement and must be valid for its duration. For example, students' projects may comprise working with vulnerable populations, and may require students to undertake Child Protection course; Police Check, First Aid, etc.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Legacy Code 700205

Coordinator Frank Gutierrez ([https://directory.westernsydney.edu.au/search/name/Frank Gutierrez/](https://directory.westernsydney.edu.au/search/name/Frank+Gutierrez/))

Description This unit is designed to assist students to become successful independent reflective learners. It introduces students to a range of theories and concepts to facilitate the development of practical skills and personal attitudes necessary for success in tertiary study. Emphasis is placed on developing the key competencies of scientific inquiry - collecting, analysing, organising and communicating information as well as solving problems, particularly when related to using mathematical ideas and techniques.

School Western Sydney The College

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 0 Preparatory subject

Restrictions Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify effective study skills and strategies to overcome major challenges of tertiary study.
2. Locate and use information technology systems and educational technologies to support learning and assessment.
3. Demonstrate competency in the use of the following Microsoft Applications & HTML: Word, Excel, PowerPoint, HTML
4. Identify and describe the basic components and concepts of Information Technology.
5. Demonstrate an understanding of essential skills and knowledge required for ICT such as research skills, problem solving skills, analysis skills, communication skills and working in a team.
6. Demonstrate understanding of different career paths in ICT.

Subject Content

Topic 1: Academic skills for success at tertiary level

Topic 2: Microsoft Applications - MS Word, MS Excel, MS Powerpoint

Topic 3: Introduction to HTML

Topic 4: What is ICT? Basic components & concepts of ICT such as main components of IT, computer Networking & internetworking, key security issues of IT, social, ethical and privacy issues relating to computing.

Topic 5: ICT Career paths

Topic 1: Academic skills for success at tertiary level

Topic 2: Microsoft Applications - MS Word, MS Excel, MS Powerpoint

Topic 3: Introduction to HTML

Topic 4: What is ICT? Basic components & concepts of ICT such as main components of IT, computer Networking & internetworking, key security issues of IT, social, ethical and privacy issues relating to computing.

Topic 5: ICT Career paths

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Multiple Choice	20 minutes each	15%	N	Individual
Portfolio	3 Activities	45%	N	Individual
Report	Report 1,500 words	30%	N	Group
Presentation	Presentation: 3-5 minutes	10%	N	Individual

Description The Computer Fundamentals unit aims to develop a solid theoretical foundation to help students prepare for further study in Information and Communications Technology while developing/enhancing students' practical skills in Business Processing Applications. Topics in the unit include the underpinning concepts of Information Technology, Software and Hardware, Computer Networking, Internet, Security of Information Systems, Privacy and Ethics, Use of MS Office applications and HTML.

School Western Sydney The College

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 0 Preparatory subject

Restrictions Students must be enrolled at Western Sydney, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and describe the basic components and concepts of Information Technology.
2. Identify the basic components and protocols of computer networking and internetworking.
3. Explain the key security issues of information technology.
4. Recognise and explain the social, ethical and privacy issues relating to computing.
5. Demonstrate competency in the use of the following Microsoft Applications: Word, Excel, PowerPoint.
6. Create a Basic Web site using HTML.

Subject Content

Theory topics

1. Introduction to underpinning concepts of Information Technology
2. Computer Hardware and Software

3. Data representation and converting number systems
4. Communication Networks
5. The Internet and the World Wide Web
 - a. Security, social, ethical and privacy issues.
- Practical Topics
6. Introduction to the Windows Environment
7. Introduction to MS Word
8. Introduction to MS PowerPoint
9. Introduction to MS Excel
10. Introduction to HTML

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Coordinator Frank Gutierrez ([https://directory.westernsydney.edu.au/search/name/Frank Gutierrez/](https://directory.westernsydney.edu.au/search/name/Frank%20Gutierrez/))

Description This unit is intended to familiarise the University Foundation Studies students with the basic functions of computers and the skills necessary to use the common applications such as Microsoft Word, Microsoft PowerPoint and the Internet. These skills are introduced to students through structured activities that will assist students to complete the research and document preparation requirements of their other units.

School Western Sydney The College

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 5cp

Level Undergraduate Level 0 Preparatory subject

Restrictions Must be enrolled at The College in Foundation program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Start up, logon and shut down a computer successfully;
2. Save and store documents in appropriate formats;

3. Find relevant and useful information online;
4. Use Microsoft Word to create simple documents and reports;
5. Use Microsoft PowerPoint to create effective slide shows;
6. Print documents.

Subject Content

1. Introduction to Computers
 - o How computers work;
 - o Introduction to the operating system
2. Files and Folders
 - o Managing files and folders;
 - o Storing and retrieving files.
3. Introduction to the Internet
 - o Accessing the internet;
 - o Saving files from the internet;
 - o Search engines and guides/categories;
 - o Developing a search strategy, copyright and plagiarism;
 - o Following a WebQuest;
 - o Designing a WebQuest.
4. Introduction to Microsoft Word
 - o Features of a word processor;
 - o Microsoft Word window and menus;
 - o Writing and editing simple documents;
 - o Spell and grammar checkers;
 - o Inserting graphics from clip art, photos and the internet;
 - o Improving the appearance of documents.
5. Introduction to Presentation Software:
 - o Creating a simple slide presentation;
 - o Using PowerPoint templates;
 - o Simple animation effects

Assessment

Restrictions

Permission required for students enrolled in 3562 Bachelor of Science (Advanced Science).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. recognise and describe the function(s) of the fundamental components of any computer system
2. demonstrate an understanding of the principles of operation of computer hardware, software, peripheral devices and the integration of these components into computer systems
3. competently use a range of common applications software packages to complete tasks commonly encountered in educational, work and leisure environments
4. effectively utilise electronic networks to communicate
5. demonstrate the ability to successfully search and retrieve information from online sources
6. critically discuss issues raised by the use of computers in society

Subject Content

1. History, development, application of computers and information systems;
2. Hardware - CPU, input and output devices, storage and file organisation, networks, data communication;
3. Operating environments;
4. Disk and file management;
5. Wordprocessing - creating & formatting documents, document presentation;
6. Spreadsheets - creation, formatting, formulas, functions and charts;
7. Databases - concepts; accessing simple databases;
8. Graphics - drawing packages, graphics in documents;
9. Presentations software;
10. Exporting/importing data between applications;
11. Network applications- email, on-line databases, the Internet;
12. Computers in society - privacy and security issues, ethical computer use, ergonomics.

Assessment

Coordinator Miroslav Filipovic ([https://directory.westernsydney.edu.au/search/name/Miroslav Filipovic/](https://directory.westernsydney.edu.au/search/name/Miroslav%20Filipovic/))

Description This unit introduces students to the hardware and software components of a stand-alone personal computer (PC). Students become familiar with the CPU, memory, secondary storage, IO peripherals and communications devices commonly found in a PC. They learn to assemble and disassemble a PC and to install hardware and software components according to supplier specifications. Students also learn to use and customise the PC operating system to maintain and optimise PC performance.

School Computer, Data & Math Sciences

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Assumed Knowledge

Basic knowledge of personal computers.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify, locate, distinguish, and describe the individual hardware components of a PC and explain their purpose, functions and operations.
2. Explain and discuss the interaction between computer hardware components and devices and systems software.
3. List, explain and effectively use the major functions of a PC operating system to manage processes, programs, files, and devices.
4. Determine user requirements for new hardware components, devices and peripherals.
5. Explain technical specifications for PC hardware components, devices and peripherals and discuss these with suppliers and vendors.
6. Install PC components, devices and peripherals in accordance with installation procedures and operational standards with minimum disruption to clients.
7. Measure PC system performance and efficiency and tune and optimise components to meet operational requirements.
8. Use and extend the functionality of the PC operating system to monitor and manage the effective and secure operation of the PC and its devices.

Subject Content

PC architecture, CPU, Motherboard, bus, memory, disk systems, ports, monitor, video and sound cards, modems, pointers and joysticks. Basics of Windows operating system, file management, process management, device management, utility software.

Technical specifications, manuals and standards, connectivity, portability, performance, capacity.

Hardware suppliers, vendors, ordering procedures.

Device installation: Interrupts, DMA channels, IRQs, procedures, settings, switches, customisation, device conflict resolution.

PC Performance measurement and optimisation.

System files, Windows registry, RegEdit.

System recovery, rescue disks, backup and recovery procedures.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Completion of laboratory tasks.	Eight labs (practicals), three hours each.	20	N	Individual
Two Progressive mid-semester tests	2 hours each	30	N	Individual
One home assignment – Report & Case Study	One week to investigate and complete	10	N	Individual
Final Practical Demonstration	Two hours lab session	40	Y	Individual

Coordinator Omar Mubin ([https://directory.westernsydney.edu.au/search/name/Omar Mubin/](https://directory.westernsydney.edu.au/search/name/Omar%20Mubin/))

Description This unit will provide students with the capacity to create interactive products that can sense environmental stimuli and exhibit an appropriate yet intelligent response. Students will be expected to write script based programs to control hardware circuits connecting various Input/Output peripherals (sensors, actuators). The range of interactive products studied and built by the students will be diverse; ranging from household everyday products to artifacts that can be used in public spaces.

School Eng, Design & Built Env

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) INFO 3003

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Create electronic hardware that recognises input from human and environmental stimuli.
2. Create software to define logic that operates an interactive physical artefact.
3. Create, test and improve a physical prototype that responds to human behaviour or other sensory input.
4. Demonstrate fluency in critical making; through use of literature in tangible interaction and observation of existing products.
5. Combine hardware, software and functional design to create an interactive product that meets a design brief (e.g. for home, office or public contexts).

Subject Content

1. Tangible and Embedded Interaction (TEI)
2. Actuators and Sensors
3. Environmental Awareness and Recognition
4. I/O Programming (using various platforms such as Arduino, Phidgets, etc)
5. Hardware and Software Integration
6. Wearable Technology
7. Contextualising TEI and application areas (music, entertainment, education, socialisation, persuasion, etc)
8. Research Topics in TEI
9. Internet of Things

Assessment

Legacy Code 102700

Coordinator Farnaz Farid ([https://directory.westernsydney.edu.au/search/name/Farnaz Farid/](https://directory.westernsydney.edu.au/search/name/Farnaz%20Farid/))

Description This unit focuses on both the theory and application of cyber crime and cybersecurity. More specifically, it focuses on the intersection between human behaviour, cyber crime, and cyber security with topics ranging from social engineering to organisational security infrastructure. It asks - What outcomes do cyber criminals seek? How can you protect yourself and your business from cyber crime? What methods do cyber criminals typically use to gain their desired outcomes? In this unit, cyber crime and cyber security is covered from both a theory-based and applied understanding of how to reduce the likelihood of or harm caused by cyber crime.

School Social Sciences

Discipline Security Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) INFS 1002

Equivalent Subjects INFO 2001 Cyber Crime and Cyber Safety

Assumed Knowledge

A basic understanding of computer systems and network structures. This knowledge is gained as the student progresses through their first semester in the program with a start-year intake; or from the completion of two semesters in the program in the case of a mid-year intake. A basic understanding of core theories related to social and cognitive psychology is desirable but not essential.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define cyber crime and cyber safety by its related theories, terms and methods of investigation.
2. Compare and contrast cyber criminal practices with standard criminal practices.
3. Describe effective interventions to reduce susceptibility and risk from cyber attacks on an individual or organisation.
4. Evaluate the quality of organisational preparedness for cyber crime and susceptibility to different cyber criminal tools.
5. Develop an approach to identifying and assessing weak points in organisational defences.

Subject Content

Introduction and History of Cyber Crime
 Online Safety ? applied and theoretical perspectives
 Cyber criminals and cyber crime practices
 Vulnerability to cyber crime and social engineering attacks
 Protection from cyber crime and social engineering attacks on individuals and organisations

Assessment

Legacy Code 102704

Coordinator Alana Maurushat ([https://directory.westernsydney.edu.au/search/name/Alana Maurushat/](https://directory.westernsydney.edu.au/search/name/Alana%20Maurushat/))

Description This is a 40 credit point year-long subject taken over two terms (20 credit points in each term). This subject comprises the research pathway of the Bachelor of Cyber Security and Behaviour. Students will undertake a major research project in the field of behavioural cyber security. The specifics of the project will be coordinated between the student and the research supervisor at Western, which is undertaken over two semesters. Students should firstly discuss their proposed research project with the research supervisor, as it may require prior approval by the University's Ethics Committee depending on the research topic chosen. In the first semester, students plan their research, complete a literature review and propose the project plan to a panel of experts. By the end of the second semester students will have completed their thesis by research and will defend that thesis to a panel of experts. As such, students will have contributed to research in the field of cyber security and behaviour which prepares them for further studies towards a Masters or PhD qualification.

School Social Sciences

Discipline Security Science

Student Contribution Band HECS Band 2 20cp

Level Undergraduate Level 2 subject

Restrictions Students must be enrolled in program 1837 - Bachelor of Cyber Security and Behaviour and have successfully completed 140 credit points

Assumed Knowledge

An understanding of experimental design and research.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Formulate a comprehensive proposal for a high level independent research project.

2. Demonstrate an understanding of research methodology through an analysis of empirical data.
3. Construct a reasoned academic argument to demonstrate critical thinking skills in the production of a coherent and substantiated thesis.
4. Defend the findings of the research at a professional standard to an academic audience.

Subject Content

Literature review

Development of a research proposal, including formulating the research question, methodology, research design, collection and analysis methods

Research and writing activities to complete the thesis

Seminar presentation of the proposal, the project, and defence of the thesis.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Literature Review	2,500 words	30	N	Individual
Presentation	30 minutes	15	N	Individual
Thesis	6,000 - 8,000 words	45	Y	Individual
Presentation	60 minutes	10	N	Individual

INFO 2006 Usable Security

Credit Points 10

Legacy Code 102757

Coordinator Farnaz Farid ([https://directory.westernsydney.edu.au/search/name/Farnaz Farid/](https://directory.westernsydney.edu.au/search/name/Farnaz%20Farid/))

Description This unit will cover the human factors of security and privacy, as well as address emerging issues, challenges and regulations which underpin the need for usable security and privacy. After

introducing the fundamental principles of security and privacy, these will be explored while considering how these principles shape the experience of users who are interacting with the designed product. Humans are an essential part of security and privacy, and they also inherently pose significant challenges. Students will be introduced to some of the fundamental security and privacy standards and regulations. They will learn about cognitive and perceptual approaches to usable security as well as how to create systems that are usable and trusted alongside fulfilling the requirements of remaining secure and private. Research topics such as how to design user studies to critically evaluate security, privacy, trust and usability interfaces will be addressed to provide students with an informed view on emerging best practices.

School Social Sciences

Discipline Security Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) BEHV 1025 AND COMP 1005

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the principles of security, privacy and trust as they relate to key policies, standards and regulations.
2. Evaluate key experimental techniques used in perceptual and cognitive science relevant to usable security and privacy.
3. Explain approaches to social engineering, trust and organisational shift to cyber resilience, and location data permissions.
4. Evaluate modern authentication methods in security.
5. Critically analyse contemporary issues related to security and privacy.
6. Create educational and/or training materials aimed to enhance security and privacy.

Subject Content

- Security, privacy and trust principles used in the design, development and assessment of a range of technologies.
 - Security and privacy policies, standards, and regulations.
 - Higher order cognitive principles which include aspects of learning, problem solving and decision making with a focus on trust, usability and user perception.
 - Organisational shift towards a secure culture of cyber resilience through trust, usable security and behavioural economics.
 - Warning and risk design; actions and consequences as both essential and inherently difficult while maintaining security and privacy.
 - Humans as the weakest link in the cybersecurity, and educative/AI approaches and theories to counter this risk.
 - Security authentication methods such as bio-informatics and password systems.
 - Mobile security and privacy - locations and permissions in phone and communication apps.
- Learn people, process and systems for Cyber Incident Response

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Report	1,500 words	40	N	Individual
Simulation	3 days	20	N	Individual
Report	2 pages	20	N	Individual
Critical Review	800 words	20	N	Individual

INFO 2007 Cyber Crime and Social Engineering (Block)

Credit Points 10

Legacy Code 500075

Coordinator Rachel Renwick ([https://directory.westernsydney.edu.au/search/name/Rachel Renwick/](https://directory.westernsydney.edu.au/search/name/Rachel%20Renwick/))

Description This unit focuses on both the theory and application of cyber crime and cybersecurity. More specifically, it focuses on the intersection between human behaviour, cyber crime, and cyber security with topics ranging from social engineering to organisational security infrastructure. It asks - What outcomes do cyber criminals seek? How can you protect yourself and your business from cyber crime? What methods do cyber criminals typically use to gain their desired outcomes? In this unit, cyber crime and cyber security is covered from both a theory-based and applied understanding of how to reduce the likelihood of or harm caused by cyber crime.

Level Undergraduate Level 2 subject

Pre-requisite(s) INFS 1013

Equivalent Subjects INFO 2001 - Cyber Crime and Cyber Safety
INFO 2004 - Cyber Crime and Social Engineering

Restrictions

Students must be enrolled in program 7179 - Undergraduate Certificate in Cybersecurity, Cybercrime and Behaviour.

Assumed Knowledge

A basic understanding of computer systems and network structures. This knowledge is gained as the student progresses through their first Block in the program with a start-year intake; or from the completion of two Blocks in the program in the case of a mid-year intake. A basic understanding of core theories related to social and cognitive psychology is desirable but not essential.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define cyber crime and cyber safety by its related theories, terms and methods of investigation.
2. Compare and contrast cyber criminal practices with standard criminal practices.
3. Describe effective interventions to reduce susceptibility and risk from cyber attacks on an individual or organisation.
4. Evaluate the quality of organisational preparedness for cyber crime and susceptibility to different cyber criminal tools.
5. Develop an approach to identifying and assessing weak points in organisational defences.

Subject Content

Introduction and History of Cyber Crime
Online Safety ? applied and theoretical perspectives
Cyber criminals and cyber crime practices
Vulnerability to cyber crime and social engineering attacks
Protection from cyber crime and social engineering attacks on individuals and organisations

Credit Points 10

Legacy Code 300569

Coordinator Tomas Trescak ([https://directory.westernsydney.edu.au/search/name/Tomas Trescak/](https://directory.westernsydney.edu.au/search/name/Tomas%20Trescak/))

Description This unit aims in particular at, but is not limited to, the implementation and management of security and privacy policies of organisations within the standards and legal framework that is also applicable to the Australian standards.

School Computer, Data & Math Sciences

Discipline Security Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Assumed Knowledge

Students are expected to have general understanding on computer systems; computer fundamentals, databases, and web technologies.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain fundamental theories related to computer security, and apply them to computer systems and organisations.
2. Describe the modern authentication, authorisation and access control mechanisms used in computer systems; and look at a few methods of access operations and ownership issues.
3. Explain basic concepts in encryption and cryptography and describe application of various cryptographic techniques and algorithms in accomplishing security.

4. Examine security issues within various hardware systems, operating systems and application software and present the general causes that lead to system security failures.
5. Analyse the security issues specific to databases, and understand how to protect sensitive information and statistical systems within an organisation.
6. Identify security threats and risks associated with web and related technologies; and the capacity to make corrective and preventative measures against these threats and risks in organisations.
7. Describe the relevant standards and the legal framework related to security and privacy; and implement security and privacy policies in organizations.

Subject Content

- Introduction to fundamentals of computer security;
 - Identification and authentication: System Security, Managing passwords, Online Verification Requirements, PKI, Key establishment, authentication and protocols;
 - Access Control: Access operations, Ownership, Access control structure;
 - Security in hardware and software: Data and Code, Memory management, Race conditions, Java Security, .NET security framework;
 - Operating system security: Windows/Unix security,
 - Cryptography: Symmetric/Asymmetric key Encryption, Digital signature, Hashing, Algorithms;
 - Web security: IP security, SSL/TLS, DNS, Firewalls, cookies, Intrusion, Digital identification techniques, Client-side Digital Certificates, Certification Authorities, Server side security, privacy;
 - database security: SQL security model, statistical database security, integrated security, data privacy.
 - Security policies and legal framework: Organizational policies, standards and legal framework for security and privacy;
1. Describe the complexities of working in the Cyber Security Industry
 2. Identify legal and ethical issues of working in cyber environment
 3. Differentiate between threats, vulnerabilities, and exploits
 4. Identify network architectures and recognise their potential vulnerabilities
 5. Apply reconnaissance methodologies to discover weaknesses in computing environment
 6. Explain the differences between vulnerability management policies and vulnerability management maturity models
 7. Apply concepts of exploiting vulnerabilities to hack into a system using common penetration testing tools and frameworks
 8. Explain the principles of symmetric and asymmetric cryptography, and public key infrastructure
 9. Identify data classification levels and email marking standards associated with the dissemination of sensitive and classified information
 10. Identify data classification levels and email marking standards associated with the dissemination of sensitive and classified information
 11. Identify threats in social networks via Open Source Intelligence (OSINT) Methodologies and demonstrate the capturing of Personally Identifiable Information (PII) using OSINT
 12. Demonstrate usage of website security assessment tools to identify weaknesses and potential web attack vectors
 13. Identify the types of forensic investigations from a cybersecurity perspective, differentiating between software and hardware digital forensic tools
 14. Identify the resources required to navigate the cybersecurity landscape as a potential cybersecurity professional

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	45 minutes (Weekly from Week 2)	40	N	Individual
Quiz	60 minutes	20	N	Individual
Final Exam	2 hours	40	N	Individual

INFO 3002 Ethical Hacking Principles and Practice

Credit Points 10

Legacy Code 301124

Coordinator Weisheng Si ([https://directory.westernsydney.edu.au/search/name/Weisheng Si/](https://directory.westernsydney.edu.au/search/name/Weisheng%20Si/))

Description This unit teaches students ethical hacking principles and skills with the ultimate goal of defence. It covers practical skills in different stages of ethical hacking, including reconnaissance on public information, port and vulnerability scanning, exploitation of vulnerabilities, post exploitation, and writing a comprehensive report to document detected vulnerabilities and proposed solutions. Students will not only practice with major tools in ethical hacking, but also learn the principles of how these tools work and hence how to defend against them.

School Computer, Data & Math Sciences

Discipline Security Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) COMP 2004 OR
COMP 2005 AND
COMP 2020

Assumed Knowledge

Students should have a solid understanding of computer networking (especially with the TCP/IP protocol suite), possess basic programming skills in developing computer applications and web applications, and command basic knowledge and skills in databases and operating systems.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the differences between lawful and unlawful behaviour in conducting ethical hacking
2. Apply reconnaissance knowledge and tools to gather public information about systems and networks
3. Apply port scanning knowledge and tools to detect port status in target computers
4. Apply vulnerability scanning knowledge and tools to detect vulnerabilities in target computers
5. Apply exploitation knowledge and tools to verify and exploit the detected vulnerabilities
6. Apply post exploitation knowledge and tools to evaluate the severity of vulnerabilities
7. Detect and defend against social engineering techniques
8. Apply web penetration testing knowledge and tools to detect vulnerabilities in web applications

9. Compose a comprehensive report that details detected vulnerabilities and proposed solutions

Subject Content

1. Introduction to ethical hacking: concepts, legal requirements, stages, and lab environment
2. Reconnaissance based on public information, and its major tools
3. Port scanning, and its major tools
4. Vulnerability scanning, and its major tools
5. Exploitation of vulnerabilities, and its major tools
6. Post exploitation, and its major tools
7. Social Engineering, and its major tools
8. Web penetration testing, and its major tools
9. Writing a comprehensive report to document detected vulnerabilities and proposed solutions

INFO 3003 Human-Computer Interaction

Credit Points 10

Legacy Code 300570

Coordinator Omar Mubin ([https://directory.westernsydney.edu.au/search/name/Omar Mubin/](https://directory.westernsydney.edu.au/search/name/Omar%20Mubin/))

Description A key component to the discipline of Information Systems is the understanding and the advocacy of the user in the development of IT applications and systems. IT graduates must develop a mind-set that recognizes the importance of users and organisational contexts. They must employ user centered methodologies in the development, evaluation, and deployment of IT applications and systems. This unit examines human-computer interaction in order to develop and evaluate software, websites and information systems that not only look professional but are usable, functional and accessible.

School Computer, Data & Math Sciences

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects INFS 3015 - Software Interface Design

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply cognitive models to the design of application user interfaces.
2. Indicate ways in which users' characteristics (i.e., age, education, cultural differences, disability etc.) require adaptation of a user interface to increase effectiveness.
3. Integrate appropriate user-centred design methodologies into the development of an application or website and recognise advantages and disadvantages of doing so.e.
4. Describe major usability guidelines and standards, for e.g. ISO or Nielsen
5. Develop both low-fidelity and high-fidelity prototypes and produce user interfaces for domain specific applications.
6. Create an appropriate user evaluation plan with carefully chosen subjective and objective measures.

7. Discuss state of the art research issues and novel interaction technologies under the umbrella of HCI.

- Barnum, C. M. (2010). Usability testing essentials: Ready, set...test. Burlington, MA: Elsevier Science

Subject Content

- Understanding The user and The user experience
- interaction styles
- Usability Standards
- user-centred design methods
- development tools and prototyping
- Usability testing: tools and methodologies
- Accessibility and assistive technologies
- Personalisation and trust
- Developing for multiple devices (Computer, PDAs, 3G phones etc)
- human computer interface in industry
- research Initiatives in HCI
- emerging technologies

Legacy Code 300136

Coordinator Chun Ruan ([https://directory.westernsydney.edu.au/search/name/Chun Ruan/](https://directory.westernsydney.edu.au/search/name/Chun%20Ruan/))

Description This unit provides students real-world experience in the area of Information Technology (IT) support. Students are located with industry partners in the Greater Western Sydney region in IT support positions for 10 hours per week over a 12 week period. In addition, students receive instruction and tuition in aspects of professional practice such as code of ethics.

School Computer, Data & Math Sciences

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) INFO 1002 AND
COMP 2013 OR
LGYA 6157

Restrictions Students must be in their final session of study and enrolled in the Bachelor of Information and Communications Technology or Bachelor of Information and Communications Technology (Advanced).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the knowledge and skills learned throughout the course in an effective, efficient, and appropriate manner.
2. Elicit, analyse, and interpret client requirements for general and specific appropriate information technology solutions; design (or assist in the design), implement, test, maintain, and document those solutions.
3. Use and apply team work, empowerment methods, meeting concepts, group techniques, and listening skills to address and resolve problems.
4. Communicate effectively, both in writing and orally, with clients, vendors, colleagues, employees, employers, and other people at all levels of the community and organisations within the community.
5. Explain the technical, economic, legal, ethical, moral, and social implications, constraints, costs and benefits of adopting and

applying particular technological solutions to address personal and corporate objectives.

6. Participate in, and direct if necessary, a project to investigate, identify, specify, implement, test, install, and maintain an information system involving the identification and control of a set of project activities

Subject Content

Twelve weeks work experience (10 hours per week) practicum with a client organisation, providing support in the area of IT support, user support, user training, sales, servicing, documentation support, internet support, etc.

Fortnightly meeting with Western Sydney University supervisor.

Practicum administration and assessment procedures.

Review of concepts of team work and group dynamics.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Legacy Code 300128

Coordinator Yun Bai ([https://directory.westernsydney.edu.au/search/name/Yun Bai/](https://directory.westernsydney.edu.au/search/name/Yun%20Bai/))

Description Information Security is concerned with the protection and privacy of information in computer systems. The focus is primarily on introducing cryptography concept, algorithm and protocol in information security and applying such knowledge in the design and implementation of secure computer and network systems. The unit also addresses conventional and public key encryption, number theory and algebra and their application in public key encryption and signature. Students will learn the application of cryptography algorithm in current computer systems and information security management. This unit also provides students with the practical experience around security programming.

School Computer, Data & Math Sciences

Discipline Security Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MATH 1006 AND
COMP 2009 OR
COMP 2015 OR
COMP 2016

Assumed Knowledge

Basic understanding of data structures, number theory and probability theory. Basic programming skills in C, C++, java, etc.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe fundamentals in computer security and basic knowledge in cryptography;
2. Explain conventional encryption/decryption methods and the concepts of symmetric keys;
3. Design and implement block ciphers and stream ciphers;
4. Explain principles of public key cryptosystems and public key algorithms;
5. Summarize the number theory used in the RSA algorithm, Diffie-Hellman key exchange and digital signatures;
6. Apply authentication functions and hash functions in message authentication;
7. Illustrate Kerberos authentication protocols;
8. Apply security requirements and design in electronic mail systems and in electronic commerce.
9. Explain principles and mechanisms of security management.

Subject Content

Security, cyberattack and countermeasure, cryptography and steganography

Conventional encryption and DES system

Number Theory and algebra, Modular arithmetic and Euclid's algorithm

Public key encryption and RSA algorithm

Digital signature and authentication protocols

Key distribution and management

Security protocols and various applications in current computer systems

Information Security management

Assessment

Legacy Code 300143

Coordinator Hon Cheung ([https://directory.westernsydney.edu.au/search/name/Hon Cheung/](https://directory.westernsydney.edu.au/search/name/Hon%20Cheung/))

Description This unit is concerned with the protection of information transferred over computer networks. It includes discussion of techniques for securing data transported over local and wide area networks. At the conclusion of the unit students will have a good understanding of the practical aspects of securing a computer network against internal and external attacks.

School Computer, Data & Math Sciences

Discipline Security Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) COMP 2007 OR
COMP 2004 OR
COMP 2005

Assumed Knowledge

Good understanding of the principles of information security, and computer networks and internets.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify security threats in LAN and WAN environments;
2. Identify current network security protocols and where they should be implemented;
3. Explain how popular operating systems handle secure communications;
4. Analyse and describe the security services provided by internetworking protocols;
5. Explain the purpose and basic configuration requirements of an internet firewall;
6. Describe the major components needed for secure electronic commerce;
7. Describe techniques for detecting and mitigating security threats to a networked system.

Coordinator Heidi Bjering ([https://directory.westernsydney.edu.au/search/name/Heidi Bjering/](https://directory.westernsydney.edu.au/search/name/Heidi%20Bjering/))

Description This is a final year unit that builds on foundation and intermediate computing units to prepare students for professional experience. The unit covers the content in three modules as 1) Ethics and Professional Code of Conduct, 2) Project Management, and 3) Legal, Social, Environmental issues, Quality Assurance and IT Compliance. The content covered in these three modules are carefully

designed to fill in the gaps in knowledge that is not so far covered in previous units in preparing students for the challenging projects units and professional working life ahead. This unit is a pre-requisite to the capstone project, covered in Professional Experience Project unit.

School Computer, Data & Math Sciences

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 5983 - Professional Preparation and Project Management

Restrictions Successful completion of 140 credit points.

Assumed Knowledge

Understanding of systems analysis and design.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe ethics and professional code of conduct associated with the professions related to computing and Information & communications technologies (ICT)
2. Communicate in a professional manner for IT projects among team members and with outside parties.
3. Plan, schedule and manage ongoing project activities as a group and an individual.
4. Carry out cost benefit analysis of software related projects
5. Manage team dynamics that involves working with people of varying skill levels, from different work/life experiences and diverse cultural backgrounds
6. Articulate the concepts related to security, privacy and freedom of information as it relates to electronic data
7. Explain legal, social and environmental issues in relation to computing and ICT
8. Describe the importance of quality assurance and techniques used in verifying quality of software development projects
9. Articulate the core concepts of IT compliance in order to develop a plan that addresses IT control elements.
10. Recognise indigenous culture and safety issues in proposed system designs

Subject Content

- Module 1 ICT Professional Code of Ethics and Code of Practice with special reference to the Australian Computer Society's professional code.

- professional communication and writing and Presenting reports
- types of ICT applications, their impact on society and indigenous cultures and The relevance of ethics in ICT.

- Module 2 Role of a project manager, skills required to manage a project and the importance of communications in all its forms

- Preparing A Project proposal, making A business case and managing stakeholders

- creating A work breakdown structure, Estimating time and costs, Preparing schedules using Standard tools and techniques used in The industry

- Monitoring and managing quality, risks and Continuous process improvement

- teamwork and leadership

- personal Project management

- Module 3 Legal aspects of ICT copyright, privacy, freedom of information, intellectual property, 'white collar' crime, property damage, fraud, theft, bad advice, incompetence, law of contract, trade practices.
- legal Issues and It Regulatory compliance
- Usability and quality assurance of It applications
- social and indigenous Issues and considerations in ICT

Assessment

INFO 3011 Social Computing

Credit Points 10

Legacy Code 300961

Coordinator Simi Kamini Bajaj ([https://directory.westernsydney.edu.au/search/name/Simi Kamini Bajaj/](https://directory.westernsydney.edu.au/search/name/Simi%20Kamini%20Bajaj/))

Description Rapid growth of computational devices connected to the internet such as mobile phones, tablets, personal computers have made us into a digitally connected society. This has enabled us to develop a new computing paradigm: Social Computing to enhance ways we can fulfil a range of primary and secondary human needs. Already many new businesses have evolved making use of these possibilities surpassing the number of users in corresponding conventional businesses such as retail, transportation and hotel chains. In this unit you will learn the fundamental concepts of Social Computing, how Social Computing is evolving, explore interaction models of social networks, analyse a few reported cases that relate to social computing in detail to understand the impact on society and businesses, and explore ways to enhance a range of livelihood activities and future possibilities. This unit will also cover underpinning technologies related to social computing such as Web 2.0, knowledge management and related security and privacy issues.

School Computer, Data & Math Sciences

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 160 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the impact of Social Computing taking examples from our daily life.
2. Describe characteristics of Social Computing and explain these characteristics using examples.
3. Describe the factors and technologies that enabled wide spread use of social computing.
4. Analyse a specific scenario related to lack of timely information leading to unsatisfactory outcomes and develop a solution based on a Social Computing paradigm to transform these scenarios.
5. Explain the rapid evolution of Social Computing using theories relevant to technology diffusion.
6. Synthesise the future impact on Social Computing on individuals, organisations and the society as a whole.

Subject Content

1. Social Computing, its evolution and broader impact
2. The essential characteristics of Social Computing and how these relate to human needs
3. Review of technologies that enabled the Social Computing paradigm
4. Broader review of how Social Computing is impacting our daily activities
5. Explore ways to enhance livelihood activities using social computing
6. Review of technology diffusion patterns that are applicable to Social Computing
7. Security and privacy issues in Social Computing
8. Future of Social Computing

Legacy Code 102702

Coordinator Alana Maurushat ([https://directory.westernsydney.edu.au/search/name/Alana Maurushat/](https://directory.westernsydney.edu.au/search/name/Alana%20Maurushat/))

Description In 2022, this unit replaced by Unit 102904 - Cyber Security and Behaviour Industry Placement. This unit is the initial placement for the work integrated learning embedded in the Bachelor of Cyber Security and Behaviour degree. There are three options: 1. WSU-brokered industry placement on a competitive basis; 2. an approved placement at the student's place of work, or via the student's networks and contacts; 3. an industry project report based on industry-generated case studies and problems. In addition, workshops will be conducted throughout the semester to aid in your learning and to support your professional development during this placement or project. Contact the unit coordinator well in advance to elect your own industry placement (such as your current employer). Only options 2 and 3 are available to WSU Online students.

School Social Sciences

Discipline Security Science

Student Contribution Band HECS Band 2 20cp

Level Undergraduate Level 3 subject

Restrictions Students must be enrolled in program 1837 - Bachelor of Cyber Security and Behaviour and have successfully completed 140 credit points.

Assumed Knowledge

A basic understanding of computer systems, architecture, infrastructure, internet protocols and networking protocols.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate employment skills for a professional career development.
2. Apply problem solving skills, developed through ethical behaviour to identify potential areas for improvement in the workplace.
3. Evaluate and report on professional development.
4. Identify methods for improving organization wide problems and propose solutions.

Subject Content

Industry placement or industry project for the development of employment skills towards a professional career in cyber security. The application of problem solving skills in a real-world environment or real-world problems, through the identification of the potential for improvement and the implementation of solutions.

Opportunity for professional development in the workplace or related industry project.

INFO 3014 Digital Investigations and Forensics

Credit Points 10

Legacy Code 102701

Coordinator Abubakar Bello ([https://directory.westernsydney.edu.au/search/name/Abubakar Bello/](https://directory.westernsydney.edu.au/search/name/Abubakar%20Bello/))

Description This unit focuses on the concepts, theories, and practice of digital investigations and forensics. More specifically, it focuses on using a detailed hands-on approach to the use of computer technology in investigating and demonstrating that particular digital media contains incriminating evidence. With topics ranging from data acquisition, file systems examination, social media, email and network investigations, mobile and cloud forensics, a working knowledge of how to approach digital investigations and utilise various forensic tools to collect, analyse and present digital evidence will be gained. In this unit, digital investigations and forensics is covered from both a theory-based and applied understanding of how to recover admissible legal evidence after an incident, or proactively as a key defence to reduce the likelihood of cyber attacks.

School Social Sciences

Discipline Security Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) INFS 1002 AND INFO 2001 OR INFO 2004

Assumed Knowledge

A basic understanding of computer systems, architecture, infrastructure, internet protocols and networking protocols. A basic understanding of core theories related to social and cognitive psychology is desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the process of digital investigations and forensics on digital media.
2. Design a proactive digital investigation process to detect and prevent exposure to cyber attacks in organisations.
3. Identify and recover key evidence from digital media using a variety of forensic tools.

4. Conduct and manage digital investigations and forensics involving digital media
5. Demonstrate an understanding of the ethical principles and practice for digital forensic investigators.
6. Present clear evidence and conclusions of a digital investigation in report form.
7. Define the methods, theories, and terms related to digital investigations and forensics.

Subject Content

Fundamentals of digital investigations and forensics
 Processing attack and incident scenes
 Data acquisition, analysis, and validation
 Network, mobile and cloud forensics
 Email and social media forensic investigations
 Current digital forensics tools
 Digital evidence and report writing for high-tech investigations
 Ethical issues for digital investigations and forensics

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	10 x 10 MCQ ea	10	N	Individual
Report	2,000 words	30	N	Group
Practical	10 lab projects	20	N	Individual
Final Exam	2 hours	40	N	Individual

INFO 3015 Internet of Things and Smart Environments

Credit Points 10

Legacy Code 301436

Coordinator Seyed Shahrestani ([https://directory.westernsydney.edu.au/search/name/Seyed Shahrestani/](https://directory.westernsydney.edu.au/search/name/Seyed%20Shahrestani/))

Description This unit covers the essential components and the dominant and emerging applications of the Internet of Things (IoT) and smart environments. These include the functions of sensors, actuators, and relevant communication networks in collecting, analysing, and acting on smart environment data. The role of machine learning in developing smart environment solutions, such as smart cities, smart transportation, smart healthcare, and other leading applications, are also discussed. The unit additionally covers critical IoT cybersecurity and privacy issues and examines approaches for addressing them. It presents the relevant principles and current practices and explores the trends in IoT and smart environments.

School Computer, Data & Math Sciences

Discipline Networks and Communications

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) COMP 2004

Assumed Knowledge

The students should be familiar with the fundamentals of communication networks.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain IoT technologies and its major applications
2. Break down the main components of the IoT, including sensors, actuators, and communication networks
3. Critique the utilisation of the IoT for developing smart cities, smart transportation, self-driving cars, smart aged care and healthcare, and other major smart solutions
4. Analyse the significant IoT cybersecurity threats and privacy concerns and propose solutions to address them
5. Apply creative skills to plan institution or expansion of the IoT and its smart applications
6. Demonstrate capabilities for independent learning of evolving concepts in IoT and smart environments and for clearly communicating those concepts

Subject Content

1. Overview of the Internet of Things and smart applications
2. IoT enabling technologies

3. IoT key components: sensors, actuators, and communication networks
4. Smart environments
5. IoT-related protocols and standards
6. IoT cybersecurity and privacy
7. Dominant and emerging smart applications
8. Machine learning for IoT data analysis and security
9. Trends in IoT and smart environments

Assessment

Credit Points 10

Legacy Code 301196

Coordinator Vernon Asuncion ([https://directory.westernsydney.edu.au/search/name/Vernon Asuncion/](https://directory.westernsydney.edu.au/search/name/Vernon%20Asuncion/))

Description This unit introduces the most fundamental techniques of artificial intelligence (AI), including knowledge representation, searching, machine learning and intelligent agents. Students will learn the basic theories and algorithms that are essential in the design and development of intelligent systems. The unit will focus on two typical AI applications: game playing and e-trading. Students will have the chance of using existing multiagent system platforms to design and develop intelligent software for game playing and automated trading in e-markets.

School Computer, Data & Math Sciences

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 5875 Intelligent Agents LGYA 5991 Automated Negotiation and e-Trading INFO 7006 Intelligent Agents for eMarkets

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

This subject requires basic skills in programming with either JAVA or C++ as the programming language.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the background and principles of typical artificial intelligence techniques;
2. Describe the algorithms and their applications of typical artificial intelligence techniques;
3. Describe the architectures and models of intelligent agents and robots;
4. Explain the general economic model of electronic markets;
5. Design and implement computer game players and trading agents based on provided system development environment.

Subject Content

Problem solving techniques

Knowledge representation and reasoning techniques

Machine learning techniques

Intelligent agents and multiagent systems

Advanced Topic 1: Special intelligence and general intelligence

Advanced Topic 2: Intelligent agents for game playing

Advanced Topic 3: Robot programming

Advanced Topic 4: Agent-mediated e-Markets

Advanced Topic 5: Intelligent agents for e-trading

Case study

Assessment

INFO 7003 Advanced Topics in User System Interaction

Credit Points 10

Legacy Code 301045

Coordinator Omar Mubin ([https://directory.westernsydney.edu.au/search/name/Omar Mubin/](https://directory.westernsydney.edu.au/search/name/Omar%20Mubin/))

Description The domain of User System Interaction or also known as Human Computer Interaction (HCI) dictates that IT graduates must be able to develop and evaluate interfaces that not only look professional but are usable, functional and accessible. This post graduate unit also examines HCI as a field of research and discusses novel areas of research in the area. Students in this unit will be required to complete a research project alongside a literature review document both of which comprise of content that is of a standard of being able to be considered for publication and/or presentation in a HCI conference or journal.

School Computer, Data & Math Sciences

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects INFO 3003 - Human-Computer Interaction INFO 3004 - Human-Computer Interaction (Advanced)

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply cognitive and user models to the design of application user interfaces.
2. Describe ways in which users' characteristics (i.e., age, education, cultural differences, disability etc.) require adaptation of a user interface to increase effectiveness.
3. Integrate appropriate user-centred design methodologies into the development of an application, website or emerging technology (such as mobile and wearable devices)
4. Describe and use the major usability guidelines and standards.
5. Develop low-fidelity prototypes, and high-fidelity prototypes.
6. Develop user interfaces for domain specific applications.

7. Create an appropriate user evaluation plan with carefully chosen subjective and objective measures.
8. Discuss state of the art research issues and novel interaction technologies under the umbrella of HCI by means of presenting discourse through a literature review paper.

Subject Content

Understanding the user and the user experience
 Interaction styles
 Usability standards
 User-centred design methods
 Development tools and prototyping
 Matching interface elements to user requirements
 Usability testing: tools and methodologies
 Accessibility and assistive technologies
 Rich media
 Localization, globalization
 Developing for multiple devices (Computer, PDAs, 3G phones etc)
 Human Computer Interface In Industry
 Emerging technologies
 Research initiatives in HCI
 Research skills (literature review, collecting and analysing data, writing a research report)
 Novel Interaction Techniques
 Multimodal Interaction
 Mobile HCI

Assessment

Student Contribution Band

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) For students enrolled in 3698 Master of Information and Communications Technology (Advanced) or 3699 Master of Information and Communications Technology - ENGR 7017 Professional Practice in Communication
 For students enrolled in 3765 Master of Artificial Intelligence - COMP 7020 Artificial Intelligence Ethics and Organisations

Restrictions

Students must be enrolled in 3698 Master of Information and Communications Technology (Advanced), 3699 Master of Information and Communications Technology or 3765 Master of Artificial Intelligence.

Assumed Knowledge

A broad background knowledge in ICT discipline (i.e. equivalent to that obtained after completing two-three years of ICT/Computing).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Relate academic course material to workplace conditions
2. Develop experience in various aspects of ICT industry such as planning, organising and managing ICT projects as well as adapting to workplace culture in Australia or globally)

3. Develop appropriate workplace skills, work habits and professional attitudes by working with professionals
4. Communicate effectively in a variety of forms to diverse audiences
5. Work in a team environment

Subject Content

A 120 hrs full time or part-time equivalent of industrial training in the ICT industry performing following tasks:

1. Find details of assigned workplace including relevant work practices and procedures
2. Follow relevant work practices and procedures
3. Perform appropriate workplace tasks as directed
4. Seek feedback on assigned tasks from appropriate person
5. Document evidence of activities carried as required

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Participation	A daily kept diary with the employer's evaluation at the end of each week	S/U	Y	Individual
Log/ Workbook	A 2-3 pages report detailing the tasks and responsibility undertaken by the student	S/U	Y	Individual
Professional Placement Performance	A standard form (approx. 1 page) is provided for Employer to fill in and submit to the subject coordinator as a confidential report.	S/U	Y	Individual

Description This unit is designed to provide students with an opportunity to learn and apply the knowledge, values and skills of consultancy, project management, and research by undertaking an IT project. The unit covers preparing and presenting project proposals in various ICT areas, project management, time management, communication skills, and the evolving legal, ethical, and social responsibilities of IT professionals. Students will work in teams under the supervision of a staff member, to plan and investigate their project.

School Computer, Data & Math Sciences

Discipline Other Information Technology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Understanding of systems analysis and design principles.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop business cases and proposals for various IT projects
2. Demonstrate understanding of issues in IT project management

3. Demonstrate competence in project management, researching, planning, carrying out and evaluating an IT project
4. Work with people, in a small project team, managing their own time
5. Write, produce and present review reports of their progress
6. Demonstrate professional commitment and understanding of legal, ethical and social issues
7. Demonstrate communication skills using different and new media

Subject Content

Developing business cases for IT projects
 Developing project proposals
 Challenges and failures in IT project managements
 Project management
 Recent project management methodologies
 Developing consultancy and research skills
 Presentation skills and inter-personal skills

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Legacy Code 301125

Coordinator Yi Zhou ([https://directory.westernsydney.edu.au/search/name/Yi Zhou/](https://directory.westernsydney.edu.au/search/name/Yi%20Zhou/))

Description This is a 80 credit point year-long subject taken over two terms (40 credit points in each term). This subject provides an opportunity for masters students to carry out a comprehensive investigation and practical work on a cutting edge research topic in the area of Information and Communication Technologies. Students are encouraged to select topics they envisage to be of value to their future careers. Students will undertake individual research-intensive project-based study under the guidance of an academic supervisory panel.

School Computer, Data & Math Sciences

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 40cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) ENGR 7017 AND
 ENGR 7018 AND
 HUMN 4009 AND
 HUMN 4010

Restrictions

Students must be enrolled in the Master of Information and Communications Technology (Research).

Assumed Knowledge

Prior knowledge deemed appropriate by the project supervisor.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Further critically review and analyse literature in relevant area to identify important research problems.
2. Develop a successful research plan and methodology to tackle identified research problems.
3. Conduct effective research activities to carry out the research plan.
4. Exemplify advanced academic analytical and written skills in the final thesis.
5. Communicate ideas and plans at a professional level to academic audiences.

Subject Content

All students enrolled in this subject will be supervised by an academic supervisor or a supervisory panel to undertake a yearlong independent ICT related research project, proposed in the subject 800169 - Research Design 2. Under supervision, each student needs to further critically review and appraise current literature, and conduct research activities to carry out the research plan. At the end, all students need to write a master thesis for the undertaken research and present their major research findings. Students are highly encouraged to publish peer-reviewed papers from outcome of their research.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Legacy Code 301068

Coordinator Ante Prodan ([https://directory.westernsydney.edu.au/search/name/Ante Prodan/](https://directory.westernsydney.edu.au/search/name/Ante%20Prodan/))

Description With organisations increasingly dependent on their information systems, there is a greater need to ensure that the underlying network infrastructure being used by these systems is secure. Western Sydney University is a leading Cisco Academy and this

Cisco Certified Networking Associate (CCNA) Security module will give students a foundation to prepare for the Certified Information Systems Security Professional (CISSP) qualification. This online unit will provide the knowledge, understanding and practical experience to manage secure communication across a large-scale internetwork using Cisco equipment. Students will be expected to undertake individual research to contextualise their Cisco study in the broader security management environment.

School Computer, Data & Math Sciences**Discipline** Security Science**Student Contribution Band** HECS Band 2 20cp**Level** Postgraduate Coursework Level 7 subject**Pre-requisite(s)** COMP 7001 AND COMP 7010**Restrictions**

Students must be enrolled in the online program Master of Advanced Networking or any other postgraduate Western Sydney University program where this subject can be taken as an unspecified elective and where there are sufficient credit points available in the study program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify network security threats.
2. Explain techniques for evaluating and managing information security risks.
3. Implement the techniques for designing and implementing network security using available security infrastructure and devices.
4. Analyse the theory behind - and techniques for implementing - access control, authentication, authorisation and accounting.
5. Design secure network architectures.
6. Implement firewall and intrusion prevention technologies.
7. Use cryptography and virtual private networks to ensure secure transmission of information.
8. Outline the importance of physical and environmental security to have a holistic understanding of network security challenges.
9. Integrate knowledge and skills from various sources into a coherent whole, making the appropriate abstractions.
10. Critically evaluate and reflect upon your own work.
11. Solve problems using network modelling tools and real equipment.
12. Interpret complex issues both systematically and creatively, making informed judgements in the absence of complete data.
13. Integrate knowledge and skills from various sources into a coherent whole, making the appropriate abstractions.
14. Solve problems and apply solutions independently to professional or equivalent level tasks/projects/functions.
15. Work with others to refine ideas, leading to an improved understanding of key concepts within the computing systems context.
16. Build and maintain advanced networks using Cisco equipment.
17. Advocate the appropriate use of advanced security technologies.
18. Prepare to gain industry-recognised certification.

Subject Content

1. Security threats and risk management
2. Security architecture and design
3. Security implementation

4. Cryptography
5. Security management

Description This unit is a continuation of the unit Research Project A and is a problem based project unit. Students are expected to conduct individual studies under supervision by academic staff and deliver the final outcomes/findings on the research topics that are proposed in Research Project A. Students will employ the identified methodologies to carry out the research plans and fulfil the research objectives with the scope defined in the Research Project A. Each individual student is required to produce an oral presentation and a final written report. In this unit, students will acquire research related problem solving skills. Note that students enrolled in the course Master of Project Management (only) must seek permission to enrol in this unit.

INFO 7012 Strategy for Technological Innovation

Credit Points 20

Legacy Code 301053

Coordinator Ante Prodan ([https://directory.westernsydney.edu.au/search/name/Ante Prodan/](https://directory.westernsydney.edu.au/search/name/Ante%20Prodan/))

Description This online unit introduces a range of perspectives on the strategy formation process, recognising that there is no one universal process to fit all needs. A significant part of the teaching centres on an overview of strategic management. This is then placed into the context of technological innovation through six teaching blocks, each block providing a different perspective on the strategy formation process.

School Computer, Data & Math Sciences

Discipline Other Information Technology

Student Contribution Band HECS Band 2 20cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in the online program Master of Computing or any other postgraduate Western Sydney University program where this subject can be taken as an unspecified elective and where there are sufficient credit points available in the study program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the different perspectives of strategy and strategic management and a range of theoretical, conceptual and applied material relevant to their study and application across a variety of organisational, sectoral or industrial settings relevant to technological innovation and management.
2. Discuss the relationship between, and the significance of the various perspectives on strategy for technological innovation and management.
3. Analyse a range of contextual and temporal variables that condition and shape the practice of strategy for technological innovation and management.
4. Evaluate the contested nature of the various perspectives and the theories, approaches and methodologies (e.g. tools and techniques) that inform and underpin them.
5. Interpret a range of contemporary and/or pervasive issues (which may change over time), relevant to a students organisation, sector or industry, or the subject, field or discipline a student has studied and integrate this into their work as example/case study material.
6. Critically analyse and evaluate conceptual, theoretical and applied approaches relevant to strategy and technological innovation, and/or TM and strategic management, with particular reference to

the organisational, sectoral or industrial setting appropriate to a student's location and/or interests.

7. Critically analyse and evaluate current research and scholarship in the field of strategy and technological innovation, and/or TM and strategic management more generally, with particular emphasis on a student's chosen organisational, sectoral or industrial setting.
8. Apply knowledge and understanding of strategy/strategic management to technological innovation and management through independent learning and reflection on practice and experience.
9. Effectively communicate knowledge, ideas and conclusions about strategy, strategic management and technological innovation and management with particular reference to the organisational, sectoral or industrial context of most relevance to them.
10. Reflect on their performance, identify their learning needs and develop appropriate learning strategies.
11. Design and apply research and the skills required for analysing, and communicating, potentially complex findings and conclusions.
12. Implement a professional and ethical approach to any investigative/research work.

Subject Content

Perspectives on strategy - Dimensions of innovation
 Planning for strategic position - Dynamic interaction
 Learning - Planning and analysis
 Culture - Culture and strategic options
 Power and politics - Shaping strategy and innovation
 Environment - Choice of and constraints on innovation
 Configurations - Understanding configurations and change

INFO 7013 Web Engineering

Credit Points 10

Legacy Code 300443

Coordinator Athula Ginige ([https://directory.westernsydney.edu.au/search/name/Athula Ginige/](https://directory.westernsydney.edu.au/search/name/Athula%20Ginige/))

Description Today organizations extensively rely on web based information systems to market, sell, manage customer relations, and for most of the internal operations. Users are increasingly using mobile devices to interact with this information. Due to rapidly changing

business environment these systems need to be designed in a way to accommodate the frequent changes. New technologies and frameworks have been developed to support development of large, complex, mobile based, maintainable and evolutionary web systems. In this unit students will study some of these technologies, design methods and frameworks that can be successfully used to engineer such web systems. They will get hands on experience by developing such a system.

School Computer, Data & Math Sciences

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 5881 - Web Application Development

Restrictions

Students must be enrolled in a postgraduate program offered by the School of Computer, Data and mathematical Sciences.

Assumed Knowledge

Ability to develop simple static web sites. Knowledge about server-side and browser-side scripting.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the types of Web based systems and develop conceptual models to meet the specific information needs and/or to support a set of business processes.
2. Select a suitable development process based on needs and constraints.
3. Develop a suitable architecture for the Web System within the constraints, policies and guidelines.
4. Model and design various components as per the architecture.
5. Develop user interfaces based on usability guidelines.
6. Select appropriate technologies and standards to implement these components.
7. Create a project plan to develop the system.
8. Implement and test the critical components of the Web System.
9. Demonstrate the ability to work in a team environment in relation to Web development projects.

Subject Content

- Overview of web Engineering
- types of web systems and characteristics
- conceptual modeling of web systems
- design of user Interfaces and user interaction Models
- web technologies and Standards
- web system architectures
- design methodologies
- web development processes

INFO 7014 Advanced Topics in Cybersecurity

Credit Points 10

Legacy Code 301236

Coordinator Seyed Shahrestani ([https://directory.westernsydney.edu.au/search/name/Seyed Shahrestani/](https://directory.westernsydney.edu.au/search/name/Seyed%20Shahrestani/))

Description This unit focuses on the advanced features of Cybersecurity, contemporary views on security, and the solutions that aim to protect the emerging services and technologies. The emphasis is on the development of student skills to enable them to do proficient research and development works and studies in the cybersecurity discipline. On successful completion of this unit, students will be equipped with an in-depth understanding of relevant issues, attacks

on massively interconnected systems, and the evolving approaches to improve the reliability of advanced services.

School Computer, Data & Math Sciences

Discipline Security Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

The students should be familiar with the fundamentals of computer networking and security. It is advisable that the students must have either taken appropriate subjects in these areas (e.g., 300695 Network Technologies and 300696 Systems and Network Security) or have equivalent knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the important concepts applicable to the emerging cybersecurity-related approaches and technologies.
2. Analyse the vital cybersecurity issues in modern applications and services.
3. Explain the contemporary issues in security and reliability of modern massively interconnected systems.
4. Evaluate the performance of the emerging cybersecurity solutions and the related technologies.
5. Demonstrate proficiency with key research and development issues in the fields of cybercrime and cybersecurity.

Subject Content

Cybersecurity: Context and Background
 Contemporary Issues in Cybersecurity
 Trust and Behavior Analysis
 Securing Massively Interconnected Systems
 Advanced System Cybersecurity and Reliability
 Cybersecurity Research, Resources, and Citation
 Methodologies for Research in Advanced Cybersecurity

Coordinator Jim Basilakis ([https://directory.westernsydney.edu.au/search/name/Jim Basilakis/](https://directory.westernsydney.edu.au/search/name/Jim%20Basilakis/))

Description This unit covers the current approaches, technologies, and applied practices pertinent to cybersecurity and helps the student to understand important related protocols and standards. It describes the features needed for the mitigation of cyber vulnerabilities for improving the reliability of the underlying systems, privacy preservation, and achieving protections against cybercrime and internet fraud. It also examines the basics of ethical hacking, network assurance, cyber risk management, and incident analysis. The unit discusses the trends in applied cybersecurity and introduces some of the relevant current key research issues and features of the field.

INFO 7016 Postgraduate Project A

Credit Points 10

Legacy Code 301384

Coordinator Jianhua Yang ([https://directory.westernsydney.edu.au/search/name/Jianhua Yang/](https://directory.westernsydney.edu.au/search/name/Jianhua%20Yang/))

Description This is a project-based unit for the Master studies in Computers, Data and Mathematical Sciences. The purpose of this unit is to develop research skills and learn how to manage a research project. Students will engage in research investigation and practical work on a topic in a field of current research interest that is of value to the candidate's professional and intellectual development. Students are expected to actively pursue their interest in an individual research area and undertake self-studies under guidance of a project supervisor. Students will identify research topics in consultation with supervisors, carry out a literature review, define research objectives, establish research methodology, and prepare a research plan. Eventually each student is required to produce a research report with preliminary findings.

School Computer, Data & Math Sciences

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects ENGR 7014 - Master Project 1

Restrictions

Students must be enrolled in a postgraduate program and have successfully completed 60 credit points of postgraduate subjects.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the relevant literature to identify potential research problems in the fields of ICT, DS, AI, and Mathematics.
2. Generate research questions and hypothesis based on the literature review and the changing landscape.
3. Justify the research proposal in relation to its significance in literature and its anticipated impact based on computational thinking, big-data thinking, and/or mathematical thinking.
4. Construct a plan and methodology to conduct research on an identified question/issue/problem.
5. Articulate research aims and findings in professional, formal and informal formats and contexts.
6. Apply self-management skills in planning and executing research within computing contexts.
7. Demonstrate research ethics in synthesising complex information from a range of sources and referencing appropriately.

Subject Content

There are no formal lecture sessions for this subject. The subject content covers typical activities in carrying out a research project. The subject content may also be recommended by the subject coordinator/project supervisor for a specific research project.

- Questioning: develop research question(s) or hypotheses. The end result of the students' initial reading should be well-defined research question(s). The research question(s) will help the students to focus on the scope of their work.

- Problem identification: identify A Problem in A relevant field, such as information Communications and Technology, data science, Artificial Intelligence, information Governance, at A general or fundamental, technical or Regulatory or Philosophical level that needs investigation. It is important that The students examine The assumptions that underlies

INFS 1002 Information Systems in Context

Credit Points 10

Legacy Code 300573

Coordinator Ana Hol ([https://directory.westernsydney.edu.au/search/name/Ana Hol/](https://directory.westernsydney.edu.au/search/name/Ana%20Hol/))

Description This unit aims to give students the ability to recognise and explain business information systems with regard to type, function, purpose, and the frameworks within which these systems are used. Topics in this unit include computing fundamentals; computer hardware and software; computers and society; use of business application packages - spreadsheets, word processing, database, graphics; organisational information systems; information systems development and acquisition; data and knowledge management; electronic commerce, internets, extranets; networking; enterprise-wide information systems; the internet and information systems security; privacy, ethics and computer crime.

School Computer, Data & Math Sciences

Discipline Systems Analysis and Design

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects INFS 1003 Information Systems in Context (WSTC)

Incompatible Subjects INFS 1004 Introduction to Information Systems

Assumed Knowledge

2 Unit Mathematics and 2 Unit English (General).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and explain an information system with regards to its type, functionality, role and impact;
2. Recognise and explain the role of management, information system professionals and end users when developing and implementing information systems in a business environment;
3. Discuss the implications of contemporary issues effecting business information systems;
4. Identify and explain the structure and business uses of data, information and knowledge banks;

5. Apply the knowledge of common business application packages to present information at a professional level;
6. Summarise, analyse and present data collected through research.
7. Recognise and identify an information system with regards to its type, functionality, role and impact;

Subject Content

Key Issues in Information Systems (IS), Applications of IS in Business: Fundamentals of IS, General Systems Theory, why businesses need IS, IS for business operations and competitive advantage, Changes in the business world.

Information Basics: Data representation and Information management, Data-banks, Technology (Hardware, Software and Communications Technology) as it pertains to effective management of information, the Internet, Intranets and Extranets in business management.

Using and Developing IS: Developing business solutions through effective management of information, Managerial decision support through IS, Focus on end-user needs in business IS, Strategic IS Planning, Business Process Redesign, Management of implementation of IS within business.

Business Challenges in Management of business globalisation, Security, Privacy and Ethics in business practices.

Practical Skills embedded to portfolio activities that will enhance and support students searching skills, the ability to write and critically analyse and effectively present findings using the MS packages (Word, Excel, and PowerPoint).

- key Issues in information systems (is), applications of is in business: fundamentals of is, general systems theory, why businesses need is, is for business Operations and competitive advantage, changes in The business world.

INFS 1006 Systems Analysis and Design

Credit Points 10

Legacy Code 300585

Coordinator Simi Kamini Bajaj ([https://directory.westernsydney.edu.au/search/name/Simi Kamini Bajaj/](https://directory.westernsydney.edu.au/search/name/Simi%20Kamini%20Bajaj/))

Description This unit introduces the concepts of System Analysis and Design. The study of methodologies and techniques for problem recognition, requirement analysis, process modelling, solution design and data modelling are essential elements of this unit. The Systems Development Life Cycle model is employed as the prime approach to teach the unit, equipping students with the basic skills required for developing models for analysis, design, implementation and solving information systems problems. This unit introduces students to approaches of system development including structured, object oriented and agile. Students are exposed well to system design activities including UI, data, basic system architecture and system processing. The use of drawing tools will be discussed in practical sessions.

School Computer, Data & Math Sciences

Discipline Systems Analysis and Design

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects LGYA 5776 Introduction to Analysis and Design
INFS 1007 Systems Analysis and Design (WSTC)

Assumed Knowledge

Students should have knowledge of the fundamentals of information systems, computer systems, computer applications and information processing.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise the key role of a systems analyst and describe the generic roles and responsibilities of users, developers and managers within the context of business information systems.
2. Recall the fundamental building blocks and architecture of information systems.
3. Describe and apply the various phases of the System Development Life Cycle, including related documentation and appropriate project management approaches.
4. Analyse user and system requirements for the purposes of producing abstract models based on real business problems.
5. Explain the use and application of Computer Aided Software Engineering (CASE) Tools in the creation of systems development artefacts.
6. Explain the issues around information systems governance, consumer and information security and professional ethics in regards to their impact on information systems design and operation.

Subject Content

- introduction to systems and information.

- concepts of systems analysis and design.
- The Systems Development Lifecycle (SDLC).
- Problem Definition, statement and documentation.
- introduction to requirements gathering and analysis using business process, data and object oriented modelling
- implementation issues.
- human computer interaction
- Project management.
- information systems Governance, Consumer and information security and professional ethics
- systems development documentation.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Portfolio	Short answer descriptions + diagrams + workshop participation	30	N	Individual
Quiz	1 hour	20	N	Individual
Final Exam	2 hours	50	N	Individual

INFS 1007 Systems Analysis and Design (WSTC)

Credit Points 10

Legacy Code 700013

Coordinator Buddhima De Silva ([https://directory.westernsydney.edu.au/search/name/Buddhima De Silva/](https://directory.westernsydney.edu.au/search/name/Buddhima%20De%20Silva/))

Description This unit introduces the concepts of System Analysis and Design. The study of methodologies and techniques for problem recognition, requirement analysis, process modelling and/or data modelling are essential elements of this unit. The Systems Development Life Cycle model is employed as the prime approach to teach the unit, providing students with the basic skills required for analysis and design of logical solutions to information systems problems. The use of Computer Aided System Engineering tools will be discussed in practical sessions.

School Computer, Data & Math Sciences

Discipline Systems Analysis and Design

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Pre-requisite(s) Students enrolled in 7067 Diploma in Information and Communications Technology Extended must pass LANG 0002 Academic Communication 2 (WSTC Prep) or LANG 0032 English for Tertiary Study 2 (WSTC Prep) or LANG 0039 Introduction to Academic Communication 2 (WSTC Prep) and must pass INFO 0008 Computer Studies (WSTC Prep) before enrolling in this unit

Students enrolled in 7138 Diploma in Information and Communications Technology Extended-ICT 7139 Diploma in Information and Communications Technology Extended 7140 Diploma in Information and Communications Technology Extended-IS and 7141 Diploma in Information and Communications Technology Extended-HIM must pass LANG 0012 Academic Professional Communication (WSTC Prep) and must pass INFO 0001 Academic Skills for ICT (WSTC Prep) and must pass INFO 0010 Information Technology in Business (WSTC Prep) before enrolling in this unit

Equivalent Subjects LGYA 5776 - Introduction to Analysis and Design
INFS 1006 - System Analysis and Design
INFS 1006 - Systems Analysis and Design

Restrictions Students must be enrolled at Western Sydney University, The College. Students enrolled in Extended Diploma programs must have passed 40 credit points of preparatory subjects in order to enrol in this subject. Students enrolled in the combined Diploma/Bachelor programs listed below must pass all College Preparatory subjects listed in the program structure before progressing to the Year 2 subjects.

Assumed Knowledge

Students should have knowledge of the fundamentals of information systems, computer systems, computer applications and information processing.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise the key role of a systems analyst and describe the generic roles and responsibilities of users, developers and managers within the context of business information systems.
2. Recall the fundamental building blocks and architecture of information systems.
3. Describe and apply the various phases of the System Development Life Cycle, including related documentation and appropriate project management approaches.
4. Analyse user and system requirements for the purpose of producing abstract models based on real business problems.
5. Explain the use and application of Computer Aided Software Engineering (CASE) Tool in the creation of systems development artefacts.
6. Explain the issues around information systems governance, consumer and information security and professional ethics in regards to their impact on information systems design and operation.

Subject Content

1. Introduction to systems and information.
2. Concepts of systems analysis and design.
3. The Systems Development Lifecycle (SDLC).
4. Problem definition, statement and documentation.
5. Introduction to requirements gathering and analysis using business process, data and object oriented modelling.
6. Implementation issues.
7. Human computer interaction.
8. Project Management.
9. Information systems governance, consumer and information security and professional ethics.
10. Systems development documentation.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Portfolio: Progressive individual assessment	A total of 9 hrs mostly during tutorials	30	N	Individual
Intra-Session Exam: Closed book exam	1 hr	20	N	Individual

Final Exam:	2 hrs	50	Y	Individual
Closed book exam				
Report	Approx 2 hours	40	N	Individual

INFS 1013 Information Systems in Context (UG Cert)

Credit Points 10

Legacy Code 500046

Coordinator Maria Dent ([https://directory.westernsydney.edu.au/search/name/Maria Dent/](https://directory.westernsydney.edu.au/search/name/Maria%20Dent/))

Description This unit aims to give students the ability to recognise and explain business information systems with regard to type, function, purpose, and the frameworks within which these systems are used. Topics in this unit include computing fundamentals; computer hardware and software; computers and society; use of business application packages - spreadsheets, word processing, database, graphics; organisational information systems; information systems development and acquisition; data and knowledge management; electronic commerce, internets, extranets; networking; enterprise-wide information systems; the internet and information systems security; privacy, ethics and computer crime.

School Computer, Data & Math Sciences

Discipline Systems Analysis and Design

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects INFS 1002 Information Systems in Context
INFS 1003 Information Systems in Context

Restrictions

Students need to be enrolled in program 7174 - Undergraduate Certificate in ICT or 7179 - Undergraduate Certificate in Cybersecurity, Cybercrime and Behaviour

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise and explain an information system with regards to its type, functionality, role and impact;
2. Recognise and explain the role of management, information system professionals and end users when developing and implementing information systems in a business environment;
3. Discuss the implications of contemporary issues affecting business information systems;
4. Identify and explain the structure and business uses of data, information and knowledge banks.
5. Apply knowledge of common business application packages to present written information at a professional level.
6. Summarise, analyse and present data collected through research.

Subject Content

1. Key Issues in Information Systems, Applications of IS in Business: Fundamentals of IS, General Systems Theory, why businesses need IS, IS for business operations and competitive advantage, Changes in the business world.
2. Information Basics: Data representation and Information management, Databanks, Technology (Hardware, Software and Communications Technology) as it pertains to effective management of information, the Internet, Intranets and Extranets in business management.
3. Using and Developing IS: Developing business solutions through effective management of information, Managerial decision support through IS, focus on end-user needs in business IS, Strategic IS Planning, Business Process Redesign, Management of implementation of IS within business.
4. Business Challenges in Management of business globalisation, Security, Privacy and Ethics in business practices.
5. Practical Skills embedded to portfolio activities that will enhance and support students' searching skills, the ability to write and critically analyse and effectively present findings using the MS package

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Short Answer	1,200 words	40	N	Individual
Portfolio	2 x 600 Words	40	N	Individual
Presentation	5-7 minutes presentation	20	N	Individual

INFS 2001 Database Design and Development

Credit Points 10

Legacy Code 300104

Coordinator Zhuhan Jiang ([https://directory.westernsydney.edu.au/search/name/Zhuhan Jiang/](https://directory.westernsydney.edu.au/search/name/Zhuhan%20Jiang/))

Description The main purpose of this unit is to provide students with an opportunity to gain a basic knowledge of database design and development including data modelling methods, techniques for database design using a set of business rules that are derived from a case study and finally implementation of the database using a commercial relational database management system. Through group work and tutorial practicals, students examine a number of important database concepts such as database administration, concurrency, backup and recovery and security whilst developing their professional communication and team work skills.

School Computer, Data & Math Sciences

Discipline Information Systems, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects INFS 2003 - Database Design and Development (WSTC)

Incompatible Subjects LGYA 4371 - Database Management System for Business Information Systems

Assumed Knowledge

Basic programming skills, including variable declaration, variable assignment, selection statement and loop structure.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe components of a database system, advantages and disadvantages of a database system, roles people play and the historical development of a database system in the context of a Relational Database Management System (RDBMS).
2. Apply basic skills in database modeling, including ER diagrams and normalization in RDBMS.
3. Explain the basic concepts of relational algebra and apply them in queries.
4. Describe the general concepts of transaction management.
5. Identify concepts in database administration.
6. Describe concepts in database security and backup.
7. Define and manipulate data using structured query language (SQL)
8. Design and develop a database for a business application using a commercial database management system

Subject Content

- Introduction to database concepts and ANSI Spark 3 level architecture.
- concepts in data modeling.
- integration of data and data independence.
- Translating A case Study into relational concepts and integrity constraints.
- introduction to relational algebra.
- data modelling: conceptual, logical and physical database design.
- data Definition and manipulation using SQL.
- EER concepts with generalization and specialization.
- Anomalies in databases and data normalization.
- introduction to database security and administration.
- introduction to transaction management, concurrency and locking.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Case Study	maximum 2000 words in no more than 20 pages	15	N	Group

Applied Project	maximum 2000 words (excluding SQL source code) in no more than 20 pages	15	N	Group
Practical	Refer to additional information below for details	20	N	Individual
Final Exam	2 hours	50	Y	Individual

INFS 2004 Introduction to Health Informatics

Credit Points 10

Legacy Code 300566

Coordinator Heidi Bjering ([https://directory.westernsydney.edu.au/search/name/Heidi Bjering/](https://directory.westernsydney.edu.au/search/name/Heidi%20Bjering/))

Description This introductory unit aims to give the student an insight into the key knowledge and skill set required in the emerging domain of Health Informatics. Critical topics include: The Australian healthcare system, health care improvement modelling, health information

systems and management, paper-based v's electronic health records, clinical documentation and data quality, health information management, consumer information security, privacy and ethics, decision support and clinical delivery support systems, healthcare data representation and interchange standards, telehealth and Information Communication technologies (ICT). This will be complemented by practical exercises and assessment support sessions. Through these experiences students will gain an understanding of the application of ICT to the healthcare domain and the skills necessary to play a pivotal role in the design and delivery of healthcare systems and health information management.

School Computer, Data & Math Sciences

Discipline Information Systems

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects INFS 2005 - Introduction to Health Informatics (WSTC)

Assumed Knowledge

Familiarity with use of common business software, eg word processing, spreadsheets, database.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the fundamental aspects of the Australian healthcare system and the application of ICT to healthcare
2. Describe the different standards for health data representation and interchange
3. Apply technical skills in healthcare data modelling
4. Explain the current status of health record data capture and storage (paper v's electronic) and the importance of data quality and clinical documentation to patient safety and quality
5. Describe the impact of electronic health records on health informatics and healthcare delivery
6. Summarise the different types of patient administration and health information systems available within various healthcare settings including Hospital, primary care and community/allied health
7. Describe consumer issues and professional governance matters applicable in the Health Informatics domain including data security and privacy
8. Identify opportunities for the use of Telehealth/Telemedicine
9. Describe the domain of health information management, and the foundational concepts associated with disease classification and terminologies
10. Describe the issues associated with indigenous cultural safety relating to health system designs, functionality and use.

Subject Content

1. Introduction to the Australian healthcare system
2. Review of fundamental aspects of Information and communications technologies applicable to healthcare
3. Purpose and use of health information
4. Paper based vs electronic health information
5. Consideration of the impact of Electronic health records and associated issues including privacy, security and usage
6. Types of patient administration and health information systems available within various healthcare settings including Hospital, primary care and community/allied health

7. Introduction of Healthcare data modelling methods and patient journey modelling
8. Consideration of the impact of clinical documentation and data quality on patient safety and quality
9. Review of Australian and International approaches for health data representation and interchange
10. Supporting healthcare information systems including clinical information systems, databases and decision support systems
11. Exploration of theoretical foundations in the application of Telehealth/Telemedicine
12. Consideration of Informatics professional roles and governance and consumer issues in health informatics
13. Exploration of Health informatics in research and evidence-based practice
14. Overview of health information management and its role within a healthcare setting

Assessment

INFS 2005 Introduction to Health Informatics (WSTC)

Credit Points 10

Legacy Code 700258

Coordinator Frank Gutierrez ([https://directory.westernsydney.edu.au/search/name/Frank Gutierrez/](https://directory.westernsydney.edu.au/search/name/Frank%20Gutierrez/))

Description This introductory unit aims to give the student an insight into the key knowledge and skill set required in the emerging domain of Health Informatics. Critical topics include: The Australian healthcare system, health care improvement modelling, health information systems and management, paper-based v's electronic health records, clinical documentation and data quality, health information management, consumer information security, privacy and ethics, decision support and clinical delivery support systems, healthcare data representation and interchange standards, telehealth and ICT technologies. This will be complemented by practical exercises and assessment support sessions. Through these experiences students will gain an understanding of the application of ICT to the healthcare domain and the skills necessary to play a pivotal role in the design and delivery of healthcare systems and health information management.

School Computer, Data & Math Sciences

Discipline Systems Analysis and Design

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects INFS 2004 - Introduction to Health Informatics

Restrictions Students must be enrolled at Western Sydney University, The College. Students enrolled in the Extended Diploma programs must have passed 40 credit points in order to enrol in this subject. Students enrolled in the combined Diploma/Bachelor programs listed below must pass all College Preparatory subjects listed in the program structure before progressing to the Year 2 subjects.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the fundamental aspects of the Australian healthcare system and the application of ICT to healthcare
2. Describe the different standards for health data representation and interchange
3. Apply technical skills in healthcare data modelling
4. Explain the current status of health record data capture and storage (paper v's electronic) and the importance of data quality and clinical documentation to patient safety and quality
5. Describe the impact of electronic health records on health informatics and healthcare delivery
6. Summarise the different types of patient administration and health information systems available within various healthcare settings including Hospital, primary care and community/allied health
7. Describe consumer issues and professional governance matters applicable in the Health Informatics domain including data security and privacy
8. Identify opportunities for the use of Telehealth/Telemedicine
9. Describe the domain of health information management, and the foundational concepts associated with disease classification and terminologies
10. Describe the issues associated with indigenous cultural safety relating to health system designs, functionality and use

Subject Content

1. Introduction to the Australian healthcare system
2. Review of fundamental aspects of Information and communications technologies applicable to healthcare
3. Purpose and use of health information
4. Paper based vs electronic health information
5. Consideration of the impact of Electronic health records and associated issues including privacy, security and usage
6. Types of patient administration and health information systems available within various healthcare settings including Hospital, primary care and community/allied health
7. Introduction of Healthcare data modelling methods and patient journey modelling
8. Consideration of the impact of clinical documentation and data quality on patient safety and quality
9. Review of Australian and International approaches for health data representation and interchange
10. Supporting healthcare information systems including clinical information systems, databases and decision support systems
11. Exploration of theoretical foundations in the application of Telehealth/Telemedicine
12. Consideration of Informatics professional roles and governance and consumer issues in health informatics
13. Exploration of Health informatics in research and evidence-based practice
14. Overview of health information management and its role within a healthcare setting

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Assignment 1 – Research Report Diagrams to be included	6-8 pages 3000 words	30	N	Individual
Assignment 2 – Modelling Diagrams + Submission Predominantly diagrams = 1000-2000 word report. Students are required to make equal contributions to the Group Assignment. (Failure to contribute equally to the group assignment may be reflected in a lower mark than for their team members)	6-8 pages 2000 words	30	N	Group
Final Examination Written short answer test.	2 hrs	40	N	Individual

Teaching Periods

INFS 2006 Object Oriented Analysis

Credit Points 10

Legacy Code 300144

Coordinator Golenur Huq ([https://directory.westernsydney.edu.au/search/name/Golenur Huq/](https://directory.westernsydney.edu.au/search/name/Golenur%20Huq/))

Description The core strength of this unit is to analyse and model business objectives and critical requirements of software systems to be developed using object-oriented (OO) approaches. The system analysis is taken to greater depths within the context of Object Orientation. The Unified Modelling Language version 2.0 (notably use cases, user case diagrams, activity diagrams, class diagrams and sequence diagrams) is used as the modelling standard for creating OO models in the problem space. The unit also covers the rational unified process methodology and applications of design patterns for software development through practical case studies.

School Computer, Data & Math Sciences

Discipline Systems Analysis and Design

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) INFS 1006

Equivalent Subjects MATH 2013 Object Oriented Analysis (WSTC)

Assumed Knowledge

General understanding of what an information system is and how information systems development is undertaken and

- Introductory knowledge about system analysis and design, including
 - basic problem solving experience in computerised information systems
 - ability to derive systems requirements from problem definitions
 - ability to produce system models using process, data, object and network modelling.
- understanding design and implementation issues include, (but may not be limited to), elementary database design, input, output and user interface design and prototyping.
- General knowledge on programming languages
 - Understanding difference between procedure programming and object oriented programming
 - Introductory knowledge of classes and objects and the class construction
 - Introductory knowledge on object orientation, including encapsulation, inheritance.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the theoretical fundamentals underpinning Object Oriented Analysis.
2. Identify Unified Modelling Language (UML) of the Object Management Group (OMG) for analysing software requirements,
3. Outline an object oriented lifecycle and methodology and explain the process of object oriented analysis, especially within the context of iterative and incremental nature of the process,
4. Apply the iterative and adaptable process frame work of RUP in software development.
5. Construct well-documented UML-based artefacts from the early phases of the development process for the case study,
6. Construct the Model of the Problem Space based on the analysis in an industrial CASE tool,
7. Apply team work skills in a small development team, including: distributing the development workload, resolving disputes, running meetings, and taking minutes,
8. Identify and create operational (non-functional) requirements of a system including performance and security,
9. Develop a report based on verbal and written instructions about the performance of software development tasks and associated administrative duties,
10. Illustrate quality assurance, quality control and user-expectations via reports and theoretical explanation.
11. Explore possibilities of applying design patterns in software design.

Subject Content

1. The concepts of Object Orientation including the fundamentals, processes and application of the concepts to practical modelling and object-oriented analysis techniques,
2. Three modelling spaces: Problem, Solution and Background; Roles in Requirement Analysis,

3. Critical Requirement Analysis and Business Evaluation to arrive at high-level requirements and their prioritisation,
4. Package Diagrams and high-level slicing of packages as sub-systems,
5. Four phases of Rational Unified Process: Inception (RUP), Elaboration, Construction and Transition,
6. Documenting Actors and Use Cases,
7. Introduction to Use Case Diagrams, Use Case Notations, Relationships, Analysis & Testing,
8. Activity Diagrams as mechanisms to document the flow of the system/use case,
9. Class Notations and definition of a class including attributes and operations,
10. Documenting Class Diagram and Relationships between various classes such as Association and Inheritance,
11. Documenting Sequence Diagrams and the persistence design with Class and Sequence Diagrams,
12. Major ingredients and creation of State Chart Diagrams,
13. Prototypes and Operational (Non-Functional) Requirements including Performance, Scalability, Security & Volume,
14. Quality assurance, management and testing aspects of a system,
15. Emerging technologies and design,
16. Introduction to Creational, Structural and Behavioural design patterns.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Participation	Ten 2-hour Tut/Lab sessions	20	N	Individual
Applied Project	1 group project, equal score for every member in the group, take 30 - 40 hours for each member to complete his/her own work (group assessment).	30	N	Group
Final Exam	3 hours	50	N	Individual

INFS 2009 Database Design and Development (UG Cert)

Credit Points 10

Legacy Code 500048

Coordinator Jack Isherwood ([https://directory.westernsydney.edu.au/search/name/Jack Isherwood/](https://directory.westernsydney.edu.au/search/name/Jack%20Isherwood/))

Description The main purpose of this unit is to provide students with an opportunity to gain a basic knowledge of database design and development including data modeling methods, techniques for database design using a set of business rules that are derived from a case study and finally implementation of the database using a commercial relational database management system. The unit also examines a number of important database concepts such as database administration, concurrency, backup and recovery and security.

School Computer, Data & Math Sciences

Discipline Database Management

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects INFS 2001 Database Design and Development
INFS 2003 Database Design and Development

Restrictions Students need to be enrolled in 7174 ? Undergraduate certificate of ICT

Assumed Knowledge

Basic programming skills, including variable declaration, variable assignment, selection statement and loop structure.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe components of a database system, advantages and disadvantages of a database system, roles people play and the historical development of a database system in the context of a Relational Database Management System (RDBMS)
2. Apply basic skills in database modelling, including ER diagrams and normalisation in RDBMS
3. Explain the basic concepts of relational algebra and apply them in queries
4. Describe the general concepts of transaction management
5. Identify concepts in database administration
6. Describe concepts in database security and backup
7. Define and manipulate data using structured query language (SQL)
8. Design and develop a database for a business application using a commercial database management system

Subject Content

1. Introduction to database concepts and ANSI Spark 3 level architecture.
2. Concepts in data modelling
3. Integration of data and data independence
4. Translating a case study into relational concepts and integrity constraints
5. Introduction to relational algebra/calculus
6. Data modelling: Conceptual, logical and physical database design
7. Data definition and manipulation using SQL
8. Concepts in generalisation and specialisation
9. Anomalies in databases and data normalisation
10. Database administration
11. Introduction to database security and encryption
12. Introduction to transaction management, concurrency and locking.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

INFS 2010 Work-Integrated Learning in Digital Construction

Credit Points 10

Legacy Code 301428

Coordinator Keivan Bamdad Masouleh ([https://directory.westernsydney.edu.au/search/name/Keivan Bamdad Masouleh/](https://directory.westernsydney.edu.au/search/name/Keivan%20Bamdad%20Masouleh/))

Description The digitalisation of construction industries has grown considerably in the past decade and this unit responds in practical ways by engaging students in project-based learning related to Digital Construction within an industry framework. Students will select a project with an agreed industry partner, which involves simple digital

applications in day-to-day construction such as software applications, information systems, digital solutions, apps and fintechs. This unit contributes towards the skills required for a work-ready graduate and allows the student to plan, undertake and report on a specific aspect of practice in the context of work.

School Eng, Design & Built Env

Discipline Information Systems, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Restrictions Students must be enrolled in 3782 Bachelor of Construction Management Advanced (Honours) AND have applied and selected by a partner organisation before enrolling in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Manage various aspects of a project related to Digital Construction, including planning and implementation, to produce agreed deliverables that align with feedback.
2. Conduct research on the theoretical basis on the selected digital construction project demonstrating ethical, digital and information literacy.
3. Reflect on the learning and professional development achievements related to the selected digital construction project.
4. Apply communication and collaboration skills through the selected digital construction project and the workplace.
5. Integrate technical and digital tools for project management applications.

Subject Content

Students will learn how to manage a project on following simple digital applications in day-to-day construction, along with relevant theoretical knowledge through research:

- ?software applications
- ?information systems
- ?digital solutions/ apps/ fintechs

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

INFS 3001 Activity Based Funding/ Casemix and Data Quality

Credit Points 10

Legacy Code 300954

Coordinator Jim Basilakis ([https://directory.westernsydney.edu.au/search/name/Jim Basilakis/](https://directory.westernsydney.edu.au/search/name/Jim+Basilakis/))

Description This unit will introduce students to Activity Based Funding and Casemix within the Australian healthcare system. It is designed to cover a variety of casemix classification systems for acute, non-admitted, sub-acute and mental health patients. Attention will be given to Diagnosis Related Groups (DRGs) with specific reference to the Australian Refined Diagnosis Related Groups (AR-DRGs) and the relationship to Activity Based Funding and purchasing models. Measuring performance with activity data and clinical costing methods will be explored. Emphasis will be placed on the impact of data quality as a critical component in achieving excellence in clinical costing, casemix and patient safety.

School Computer, Data & Math Sciences

Discipline Systems Analysis and Design

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) PUBH 2004

Assumed Knowledge

Medical terminology and clinical classification.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply casemix classification and grouping systems used in health
2. Explain the current landscape associated with ABF and Purchasing Models including the impact of the NEP, weighting and fee for service
3. Analyse, apply and communicate the relationship between DRGs, administrative/clinical data and episode/casemix funding/ payment/revenue systems, including activity based funding
4. Explain the relationship between casemix classification and clinical costing
5. Analyse audits and quality checks for clinical coding, costing and appropriate DRG allocation
6. Evaluate quality and safety principles and theory for quality and performance management in healthcare
7. Comprehend the impact of data quality as a critical component in achieving excellence in clinical costing, casemix, service quality and improved patient safety

8. Discuss the importance of engaging clinicians in outcome analysis and improved performance

Subject Content

1. Introduction to ABF/Casemix and the Australian healthcare system
2. Purchasing Models (NEP, weighting and fee for service)
3. Measuring performance with activity data and engaging clinicians in outcome analysis
4. Costing Standards
5. Acute care classifications and their casemix application
6. Non admitted patients occasions of service: - Ambulatory care classification - Emergency Department activity classification
7. Sub acute care and Mental Health classification
8. Data Quality and its impact on patient safety and service transformation
9. Managing quality and coding consistency including coding audits
10. Managing ABF systems including data collection
11. Management information system design and development

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Research Report	2500 words	35	N	Individual

INFS 3002 Advanced Clinical Classification

Credit Points 10

Legacy Code 300953

Coordinator Filippa Pretty ([https://directory.westernsydney.edu.au/search/name/Filippa Pretty/](https://directory.westernsydney.edu.au/search/name/Filippa%20Pretty/))

Description In this unit, the student will be introduced to disease notification and registration procedures. Mortality or cause of death coding will also be examined. Concepts of organising health information in a logical way to interface with an electronic information system will be investigated. The design and role of various health classification systems including the World Health Organizations Family of International Classifications (WHO FIC), specifically ICD 11 and casemix classification systems (e.g. AR DRGs, AN SNAP) will also be discussed. The practical component of this unit will focus on the student further developing their classification skills in the more complex areas of clinical coding including endocrine disorders, specifically diabetes mellitus, circulatory diseases and interventions, genitourinary disorders, specifically chronic kidney disease, obstetrics, paediatrics and congenital anomalies and trauma and procedural complications. The ACS will be applied in detail when classifying from complex discharge summaries and full clinical episodes of care. The student will also be exposed to electronic clinical coding tools that can be used in the classification process.

School Computer, Data & Math Sciences

Discipline Systems Analysis and Design

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) PUBH 2004

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the key design principles which underpin the development of effective classification systems;
2. Accurately classify and group complex clinical records and discharge summaries using ICD-10-AM/ACHI/ACS (manually and electronically);
3. Discuss the process of disease registration and notification procedures;
4. Apply the rules associated with mortality coding;
5. Explain the relationship between terminologies and classifications and discuss their application in relation to the electronic health record;
6. Select the appropriate term to apply to the key concepts in classification and explain the process by which concepts from related or disparate classifications can be linked;
7. Analyse critically a variety of classification systems and make judgements about the clinical, management and other settings where they are appropriately applied;

8. Discuss contemporary and emerging issues in data classification at the national and international level.

View timetable (https://classregistration.westernsydney.edu.au/even/timetable/?subject_code=INFS3002_22-SPR_KW_E#subjects)

Subject Content

1. Design principles for classifications
2. The process of disease registration and notification procedures
3. Managing the coding function including the use of coding audits to improve coding quality
4. Terminologies and their relationship to the development and use of clinical languages
5. The significance of mapping between classification systems
6. Casemix classification systems
7. The WHO Family of International Disease Classifications
8. The application of classification systems in health care settings and the relationship with the electronic health record
9. National and international research and implementation directions

The practical component of this subject will focus on the student further developing their classification skills in the more complex areas of coding including: endocrine disorders, specifically diabetes mellitus, circulatory diseases and interventions, obstetrics, neonatal and congenital anomalies, injuries, poisonings, adverse reactions, sequelae and post-procedural complications.

The student will also be exposed to electronic clinical coding and grouping tools than can be used in the classification process

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical Exam	2 hours	40	N	Individual
Group Assignment - Written Report and Presentation	1,000 words plus 15 minute verbal presentation	30	N	Group
Final Test	2 hours & 15 minutes	30	Y	Individual

Prescribed Texts

INFS 3003 Artificial Intelligence

Credit Points 10

Legacy Code 301174

Coordinator Vernon Asuncion ([https://directory.westernsydney.edu.au/search/name/Vernon Asuncion/](https://directory.westernsydney.edu.au/search/name/Vernon%20Asuncion/))

Description This unit provides basic studies in the major areas of artificial intelligence: search, knowledge representation, logic programming, machine learning and knowledge based systems, agent planning and learning. The first part of this unit will focus on the foundation of artificial intelligence: search algorithms and their implementations, game playing, logics and knowledge representation, and inference in reasoning systems. The second part will cover the principles of knowledge based systems (intelligent systems), planning, and machine learning.

School Computer, Data & Math Sciences

Discipline Information Systems

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MATH 1006 AND COMP 2009

Equivalent Subjects LGYA 5740 Artificial Intelligence LGYA 5781 Knowledge Based Systems INFS 3013 Intelligent Systems

Assumed Knowledge

Basic understanding of data structures and algorithms and basic programming skills in Pascal C/C++ or Java etc.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate the major concepts of artificial intelligence and knowledge based systems and their historical context
2. Implement well designed and various search algorithms for problem solving
3. Implement a well designed proper two-person game playing programs for specific tasks
4. Devise first order logics to formalise proper real world domains
5. Apply proper first order inference procedures to solve reasoning problems

6. Analyse the process of agent planning
7. Implement the Decision Tree Learning algorithm

Subject Content

Introduction to Artificial Intelligence and Knowledge Based Systems
 Search I: Solving Problems by Search
 Search II: Informed Search (A* Search)
 Search III: Game Playing
 Reasoning and Logic
 First Order Logic
 Development of Intelligent Systems
 Planning and Acting
 Learning Decision Trees
 Decision Making

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Report	20% each. Each assignment will require about 12 hours work.	40	N	Individual
Practical	5% for each lab practice demonstrator Each practical will require about 4 hours work.	10	N	Individual
Final Exam	2 hours	50	Y	Individual

INFS 3005 Developing Web Applications with XML

Credit Points 10

Legacy Code 300111

Coordinator Rhys Tague ([https://directory.westernsydney.edu.au/search/name/Rhys Tague/](https://directory.westernsydney.edu.au/search/name/Rhys%20Tague/))

Description This third year unit provides a comprehensive coverage of XML, related emerging technologies and their use in web applications. Students will be given opportunities to develop web based information systems which rely upon these technologies. This unit is heavily oriented to practical based work.

School Computer, Data & Math Sciences

Discipline Information Systems, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Assumed Knowledge

300582-Technologies for Web Applications, 300580-Programming Fundamentals.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Create functional and practical client side web applications using XML
2. Create functional and practical Web applications in XML utilising server side scripting
3. Understand and explain the use of XML for document management, web sites and application development/integration
4. Identify and explain how XML and related technologies are currently being applied in the real world
5. Implement the concept of Document Type Definitions
6. Implement the concept of XML Schema
7. Implement transformation of XML documents using CSS, XSLT.
8. Explain the use of Xlink, Xpointer and Xpath to retrieve information from XML documents

Subject Content

- creating markup with XML
- document type Definition (DTD)
- XML schema and namespaces
- formatting XML for output
- XPath
- XSLT
- XLink and XPointer
- XQuery
- XML and document object model (DOM) and simple API for XML (SAX)
- Server side scripting and XML
- XML technologies and applications
- XML and international Standards

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical	4 exercises	20	N	Individual
Applied Project	approximately 25 hours work outside of class time	25	N	Individual
Applied Project	Approximately 25 hrs work outside of class time	25	N	Individual
Final Exam	2 hours	30	N	Individual

INFS 3006 Emerging Trends in Information Systems

Credit Points 10

Legacy Code 300584

Coordinator Ana Hol ([https://directory.westernsydney.edu.au/search/name/Ana Hol/](https://directory.westernsydney.edu.au/search/name/Ana%20Hol/))

Description This unit provides a means for students to self-reflect on their future career and their possible involvement in the field of Information Systems and explore the changing nature of information systems in organisations via one of the following: engagements with local businesses, specifically crafted study tours or focused internships. In this unit students will study the role that emerging technologies play in selection, design and development of information systems. Students will be able to research and assess new technologies while networking and engaging with real life businesses, as well as develop and introduce effective strategies for achieving change and improvement that can be delivered by successfully implementing emerging technologies.

School Computer, Data & Math Sciences

Discipline Information Systems

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) INFS 1002 AND COMP 2020

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Review and analyse current and emerging trends in Information System technologies as well as implementation challenges;
2. Analyse requirements and develop plans for IS applications and integration of systems;
3. Examine the roles and suitability of developing business intelligence and data mining strategies for IS applications;
4. Identify issues related to IS in organisations;
5. Examine and evaluate collaborative IS technologies and applications;
6. Develop a set of skills for applying strategies in future career settings;
7. Review, analyse and summarise current literature in selected topic areas in ICT discipline.

Subject Content

- Current and emerging technologies and implementation challenges;
- Planning for system integration, changes and integrations;
- Factors relating to business intelligence, big data, web mining, and utilisation of sensor technologies;
- Personalisation of IS applications;

- Transforming organisations through IS: business models, measuring effectiveness and strategies;
- Globalisation of the IS business environment;
- Contemporary issues in IS: legal, ethical, social, regulatory, security;
- Emerging trends in eTransformation and eCollaboration;
- job readiness.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Critical Review	2000 words	30	N	Individual
Presentation	15 minute presentation	30	N	Group
Applied Project	3-5 min video and 1A4 PowerPoint Page	40	N	Individual

INFS 3007 Emerging Trends in Information Systems (Advanced)

Credit Points 10

Legacy Code 300942

Coordinator Ana Hol ([https://directory.westernsydney.edu.au/search/name/Ana Hol/](https://directory.westernsydney.edu.au/search/name/Ana%20Hol/))

Description In this subject students explore the changing nature of information systems in organisations. Apart from being encouraged to research and assess new technologies and implement effective strategies for achieving change within organisational information systems, in this advanced subject students will be required to undertake an individual, but closely supervised research project. The project will help stimulate inquiry, strengthen needs for academic research and encourage students to actively participate in new knowledge generation. Furthermore, students in this subject will be

required to present their findings in a form of an academic paper with a possibility of publishing.

School Computer, Data & Math Sciences

Discipline Information Systems

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) INFS 1002 AND COMP 2020

Incompatible Subjects INFS 3006 - Emerging Trends in Information Systems

Restrictions Students must be enrolled in 2801 Bachelor of Information Systems Advanced/Bachelor of Laws; 3688 Bachelor of Information Systems Advanced or 3745 Bachelor of Information Systems Advanced/Bachelor of Business.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Review and analyse current and emerging trends in Information System technologies as well as implementation challenges;
2. Analyse requirements and develop plans for IS applications and integration of systems;
3. Examine the roles and suitability of developing business intelligence and data mining strategies for IS applications;
4. Identify issues related to IS in organisations;
5. Examine and evaluate collaborative IS technologies and applications;
6. Develop a set of skills for applying strategies in future career settings;
7. Review, analyse and summarise current literature in selected topic areas in ICT discipline;
8. Identify research gaps and propose research questions;
9. Conduct the research investigation and develop a research output (ie. framework, model, method, system);

Subject Content

- Current and emerging technologies and implementation challenges;
- Planning for system integration: enterprise resource planning systems, supply chain management systems, customer relationship management systems;
- Factors relating to business intelligence, data and web mining for IS;
- Personalisation of IS applications;
- Transforming organisations through IS: business models, measuring effectiveness and strategies;
- eCollaboration technologies and applications;
- Globalisation of the IS business environment;
- Contemporary issues in IS: legal, ethical, social, regulatory, security;
- Emerging trends in eTransformation and eCollaboration;
- Research strategies, literature review, identification of research gaps and the proposal of research questions;
- Individual project supervision and time management;

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

INFS 3008 Formal Software Engineering

Credit Points 10

Legacy Code 300404

Coordinator Yan Zhang ([https://directory.westernsydney.edu.au/search/name/Yan Zhang/](https://directory.westernsydney.edu.au/search/name/Yan%20Zhang/))

Description This unit is concerned with the design, development and maintenance of computer software systems. The unit focuses on current formal specification and system verification technologies and methodologies. Foundations of model checking such as LTL and CTL, as well as a particular practical model checker SPIN will be thoroughly studied in this unit. The SPIN model checker with programming language PROMELA will be used for all software development and verification practices throughout this unit.

School Computer, Data & Math Sciences

Discipline Information Systems

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MATH 1006 AND COMP 2009

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the general concepts and principles of formal methods for software development and verification.
2. Model concurrent systems using the concepts and formal notions of transition systems and program graphs.
3. Apply Linear Temporal Logic (LTL) and Computation Tree Logic (CTL) to specify the required properties.
4. Perform model checking using SPIN model checker.
5. Formulate PROMELA programs and using SPIN to specify and check the correctness of given software systems and programs.
6. Apply the advanced verification tools to undertake essential formal specification and verification tasks.

Subject Content

Concept and Development of Formal Methods and System Verifications.

Modeling Concurrent Systems.

Linear Time Properties.

Linear Temporal Logic (LTL).

Computation Tree Logic (CTL).

SPIN Model Checker.

PROMELA Programming Language.

INFS 3010 Healthcare Data Environments

Credit Points 10

Legacy Code 300955

Coordinator Heidi Bjering ([https://directory.westernsydney.edu.au/search/name/Heidi Bjering/](https://directory.westernsydney.edu.au/search/name/Heidi%20Bjering/))

Description This unit extends the student's knowledge of Health Informatics by introducing concepts relating to electronic communications within the health industry. It exposes students to a variety of environments used to create, store, transfer and deliver healthcare data. Areas include minimum data sets, data linkage, messaging concepts/standards, terminologies, healthcare evaluation, electronic health records and related standards, security, privacy and trust, medico legal, epidemiology and population health together with TeleHealth/ TeleMedicine approaches, methodologies, tools and techniques.

School Computer, Data & Math Sciences

Discipline Information Systems

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) INFS 2004

Equivalent Subjects INFS 3019 - e-Health

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the use of minimum data sets in LHD (local health district), State and National reporting and the importance of data linkage.
2. Evaluate the impact of Security, Privacy, Trust, Medico-Legal aspects and Ethics related to health data.
3. Analyse messaging concepts and standards and how it affects the interoperability between EMR systems.
4. Interpret the use of clinical terminology and classification systems in health.
5. Characterise the concepts of epidemiology and population health in relation to data capture, analysis and research
6. Evaluate the purpose of healthcare evaluation in relation to accreditation/certification standards.
7. Critically evaluate and articulate purpose of electronic medical record (EMR) systems and functional e-Health applications.

Subject Content

1. Electronic Medical Record (EMR) systems and standards
2. Health data, interoperability and messaging concepts/standards
3. Minimum health data sets and mandatory reporting
4. Clinical terminology and classification systems
5. Data linkage and special data types
6. Consideration of the impact of Security, Privacy and Trust for EMR
7. Medico Legal and Ethics related to health data
8. Exploration and application of approaches, methodologies, tools and techniques to support the design and development of e-Health applications
9. Population health
10. Health data mining and big data
11. Approaches to the evaluation of health care at a national, organisational and individual level with a view to improving the quality of health care through practice guidelines, program evaluation, clinical indicators and consumer satisfaction surveys

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Portfolio	Four entries: 800 - 1,000 words per entry	40	N	Individual
Quiz	Three quizzes: 40 minutes each	30	N	Individual
Report	2,000 words	30	N	Individual

INFS 3011 Healthcare Software and Systems

Credit Points 10

Legacy Code 300956

Coordinator Jim Basilakis ([https://directory.westernsydney.edu.au/search/name/Jim Basilakis/](https://directory.westernsydney.edu.au/search/name/Jim%20Basilakis/))

Description In this unit students will learn the concepts underpinning the services computing paradigm of "bridging the gap between Business Services and IT Services". Services Computing technology includes Web services and serviceoriented architecture (SOA), business consulting methodology and utilities, business process modelling, transformation and integration. Students will learn, through the development of practical examples, how to utilise these technologies within a healthcare context

School Computer, Data & Math Sciences

Discipline Information Systems

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) INFS 2004

Equivalent Subjects INFO 3009 Services Computing in Healthcare

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the purpose and the basic functional and practical elements of Web Services for healthcare applications (including an overview of XML related technologies)
2. Design high level user and technical specification of Web Services for healthcare applications.
3. Identify and articulate areas within healthcare where Web Services can be utilised, and how this might be achieved.
4. Identify and articulate the particular needs of business process modelling, transformation and integration within healthcare.
5. Describe and analyse the operations of specific Web Services in healthcare applications, including Clinical Decision Support and Health Portals
6. Apply highly developed and technically advanced written presentation skills in describing Web Services for healthcare applications.

Subject Content

XML related technologies and Web Services

Integration of applications and information within healthcare (eg Clinical Decision Support)

Service oriented architecture for health applications (eg Health Portals)

Business process modelling, transformation and integration in a healthcare context

INFS 3012 Information Systems Deployment and Management

Credit Points 10

Legacy Code 300572

Coordinator Ana Hol ([https://directory.westernsydney.edu.au/search/name/Ana Hol/](https://directory.westernsydney.edu.au/search/name/Ana%20Hol/))

Description This unit provides a detailed overview of system implementation and deployment stages taking into consideration the steps that are necessary to place a newly developed system into production. In this unit students learn the skills required for accurate requirements gathering, timely and effective system development, and successful implementation that would result in effective system performance. For this to be achieved successfully this unit also addresses the importance of project management skills. The unit also highlights the issues of transition processes after the development phase, the activities required in systems support and maintenance in the system's operational stage.

School Computer, Data & Math Sciences

Discipline Systems Analysis and Design

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) COMP 1005 AND INFS 1006 OR COMP 1005 AND DESN 1021

Equivalent Subjects LGYA 5900 Enterprise Information Management

Assumed Knowledge

A general understanding of various Information Systems in the eBusiness environment - familiarity with information system development processes.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain how system deployment fits within the system development life cycle.
2. Develop a plan for system deployment reflecting the organisational culture and business processes.
3. Evaluate deployment strategies in terms of selecting a suitable one the specific business problem.
4. Apply project management skills and ensure deployment and transitioning schedules are followed.
5. Describe what needs to be considered, so that system users and customers receive appropriate training.
6. Assess possible risks and develop backup plans and strategies.

7. Analyse the change management requirements for implementing and managing a successful system.

8. Critically analyse proposed Information Systems solutions and identify possible improvements.

Subject Content

- system Deployment A Critical aspect of system development life cycle
- Assessing The organisation where system is to be deployed: audience, customers, users, departments
- system implementation: direct, parallel, Phased
- planning for system Deployment: timeline, Schedule, planning
- Assessing The system: testing, Assessing user / company requirements, assuring system performs as required
- Project management skills, Deployment management and transitioning
- user training and documentation
- risks assessment and backup plans and strategies
- change management requirements for implementing and managing successful system

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Self-Assessment	3 minutes (video)	15	N	Individual
Presentation	25 minutes	25	N	Group
Critical Review	150 words (per post)	20	N	Individual
Final Exam	2 hours	40	N	Individual

Coordinator Weisheng Si ([https://directory.westernsydney.edu.au/search/name/Weisheng Si/](https://directory.westernsydney.edu.au/search/name/Weisheng%20Si/))

Description In this unit students further develop their theoretical and practical skills in designing and developing web based information systems using systems analysis, programming, database, human computer interaction and web technologies skills that they have learnt in previous units. Current web development technologies and/or frameworks will be utilised to build a complex web information system in a collaborative web development team. Techniques of porting web systems to mobile platforms will also be explored.

School Computer, Data & Math Sciences

Discipline Computer Science, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) COMP 2020

Equivalent Subjects LGYA 5737 Advanced Web Site Development

Assumed Knowledge

- Fundamental web development skills such as HTML, CSS, Javascript and PHP
- Principles of relational database design and development, practical skills in SQL.
- Principles of systems analysis and design including the specification of end-user requirements and a good knowledge of the SDLC and its application to solving computer system related problems.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design and create dynamic data driven web based information systems incorporating appropriate client and server data validation.
2. Explain and implement techniques of maintaining state in a stateless http environment.
3. Describe and apply essential page design principles to create and manage the overall layout and appearance of web systems using techniques such as templates, master pages, and style sheets.
4. Explain and implement advanced techniques of user interaction with client devices (eg, AJAX).
5. Design and implement an authentication and access control system for web based information systems.
6. Demonstrate necessary technical and theoretical skills and knowledge to work as a member of a project team to successfully develop complex web based information systems.
7. Describe appropriate methods of improving web system performance.
8. Port web based systems to mobile devices.
9. Apply CSS framework to lay out and style website
10. Apply LINQ to construct database queries
11. Apply Entity Framework Core to bind objects with database records
12. Implement both client-side and server-side data validation
13. Implement dynamic webpages with Razor syntax
14. Apply MVC framework to develop web systems
15. Implement user authentication and authorization for web systems
16. Apply collaborative skills to work in a team in developing complex web systems

Subject Content

Presentation and interface design and development

- Client and server-side data validation
- Database connectivity and dynamic page creation
- Authentication and access control
- Maintaining state
- Collaborative Web Development
- Advanced techniques of user interaction with client devices
- Improving Web Systems Performance
- Porting web based systems to mobile devices using current tools and techniques

 1. Cascading Style Sheet (CSS) framework such as Bootstrap
 2. Language Integrated Query (LINQ)
 3. Object to relational database mapping: Entity Framework Core
 4. Client-side and server-side data validation
 5. Razor pages programming
 6. Model-View-Controller (MVC) programming framework: ASP.NET Core
 7. Authentication and authorisation
 8. Collaborative web development

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Practical	50 and 60 hours to complete over a period of 12 weeks	50	N	Individual
Practical	30 to 40 hours to complete over a period of 13 weeks	25	N	Group
Final Exam	1 hour	25	N	Individual

Description This unit teaches state-of-the-art web frameworks for developing complex web systems. This unit utilises the skills of basic web programming, database design, and systems analysis that students have learnt in previous units. Major topics in this unit include Cascading Style Sheet (CSS) framework, Razor pages, Model-View-Controller (MVC) programming, object to relational database mapping, and authentication and authorization. Moreover, this unit trains students' collaborative skills by asking students to build a complex website in a small team. As an advanced unit, deeper topics such as custom data validation and error handling will be discussed.

INFS 7001 Advanced Healthcare Data Environments

Credit Points 10

Legacy Code 301028

Coordinator Heidi Bjering ([https://directory.westernsydney.edu.au/search/name/Heidi Bjering/](https://directory.westernsydney.edu.au/search/name/Heidi%20Bjering/))

Description This unit extends the students knowledge of Health Informatics by introducing concepts relating to electronic communications within the health industry. It exposes students to a variety of environments used to create, store, transfer and deliver healthcare data. Areas include minimum data sets, data linkage, messaging concepts/standards, terminologies, healthcare evaluation, electronic health records and related standards, security, privacy and trust, medico legal, epidemiology and population health together with TeleHealth/TeleMedicine approaches, methodologies, tools and techniques. Advanced skills and knowledge on researching into recent developments in specific sub-topics will be acquired through assessment components in the unit.

School Computer, Data & Math Sciences

Discipline Systems Analysis and Design

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Evaluate the usage of electronic health records in Australian Health System situations, including standards, messaging, terminologies, classification systems and clinical languages, security and privacy, health data linkage and minimum data sets.
- Develop data environments to support functional e-Health applications.
- Explain and the concepts of epidemiology and population health in relation to data capture, analysis and research.
- Analyse the purpose of healthcare evaluation in relation to accreditation/certification standards including evaluation methods and policies and procedures for health information management, to the extent of their typical use in Australian Health System situations.
- Apply new knowledge gained from unit to complex cases arising in the Australian Health System workplace, exercising professional judgement in the context of the new knowledge area.
- Apply research methods consistent with planning, implementation and evaluation of e-Health data solutions to address previously unseen workplace problems in the Australian Health System.
- Evaluate the impact of Security, Privacy, Trust, Medico-Legal aspects and Ethics related to health data.

Subject Content

- Electronic Medical Record (EMR) systems and standards
- Health data, interoperability and messaging concepts/standards
- Minimum health data sets and mandatory reporting
- Clinical terminology and classification systems
- Data linkage and special data types
- Consideration of the impact of Security, Privacy and Trust for EMR
- Medico Legal and Ethics related to health data
- Exploration and application of approaches, methodologies, tools and techniques to support the design and development of e-Health applications
- Population health
- Health data mining and big data
- Approaches to the evaluation of health care at a national, organisational and individual level with a view to improving the quality of health care through practice guidelines, program evaluation, clinical indicators and consumer satisfaction surveys
- Critical evaluation techniques of clinical and population research

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Portfolio	Minimum 1,000 words per each entry	40	N	Individual
Quiz	40 minutes each	30	N	Individual
Report	3,000 words	30	N	Individual

INFS 7002 Advanced Healthcare Software and Systems

Credit Points 10

Legacy Code 301029

Coordinator Jim Basilakis ([https://directory.westernsydney.edu.au/search/name/Jim Basilakis/](https://directory.westernsydney.edu.au/search/name/Jim%20Basilakis/))

Description In this unit students will learn the concepts underpinning the services computing paradigm of "bridging the gap between Business Services and IT Services". Services Computing technology includes Web services and service-oriented architecture (SOA), business consulting methodology and utilities, business process modelling, transformation and integration. Students will learn, through the development of practical examples, how to utilise these technologies within a healthcare context. Advanced knowledge and knowledge of recent developments in specific sub-topics will also be acquired through practical components in the unit.

School Computer, Data & Math Sciences

Discipline Systems Analysis and Design

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Characterise the functional and practical elements of XML-related technologies and Web Services relating to the areas of messaging, workflow and clinical documentation within a healthcare context.
2. Design high-level user and technical specification of Web Services for healthcare applications.
3. Apply highly developed and technically advanced written presentation skills in describing Web Services for healthcare applications.
4. Analyse and integrate ideas from forefront knowledge via readings and scientific literature about best practice integration approaches in existing sharable healthcare system implementations.
5. Analyse the operations of Web services in the context of newer Internet technologies (eg. mobile and Cloud-based) and adapting to the changing business requirements in healthcare.
6. Apply new knowledge gained from unit to complex cases arising in the Australian Health System workplace, exercising professional judgement in the context of the new knowledge area.

Subject Content

1. Use and application of XML-related technologies and Web Services in the healthcare environment (eg. business process modelling, transformation, messaging, document architectures)
2. Best practice approaches for achieving integration of applications and information within healthcare
3. Techniques for achieving adaptable and scalable system architectures responsive to healthcare business requirements
4. Industry and regulatory standards relevant to national and international healthcare system implementations

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Report	5-6 pages (2500-3000)	35	N	Individual

INFS 7003 Advanced Topics in ICT

Credit Points 10

Legacy Code 300694

Coordinator Tomas Trescak ([https://directory.westernsydney.edu.au/search/name/Tomas Trescak/](https://directory.westernsydney.edu.au/search/name/Tomas%20Trescak/))

Description The information and communications technologies are advancing at an ever-increasing rate. The whole world is now interconnected. The World Wide Web community is actively engaged in developing the next generation of the Web. Social networking on the Internet is facilitated by the latest developments such as Facebook, YouTube and MySpace. Artificial Intelligence is increasingly intertwined with the decisions we make every day. Large scale storage technologies are leading to Cloud Computing where data and applications may reside anywhere in the world. Research in how to access meaningful data from the vast amounts on the Web has led to initiatives such as Semantic Web and Linked Data. Mashups mix data from disparate sources to enable users to work more efficiently. Wireless and mobile computing are changing the market place. All of these trends are still in their early stages. To make sense of all these developments, the top echelons of the World Wide Web Consortium are actively engaged in creating a new discipline called Web Science. Advanced Topics in ICT will enable the students to appreciate the scale of new developments and create prototypes of applications in their desired ambit. This unit consists of three Topics selected each semester. Assessment will be by a series of discussion paper assignments here students will show they have met the unit learning outcomes.

School Computer, Data & Math Sciences

Discipline Information Systems, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) ENGR 7017

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain significant major research and development trends in ICT
2. Describe the current "state of the art" in three selected topic areas of Advanced ICT
3. Critically analyse technical publications in three selected topic areas of Advanced ICT
4. Apply knowledge gained during the subject to contextualise new ideas in ICT and discuss them with experts in the field
5. Summarise the impact of the consumer and socio-economic issues in Advanced ICT

Subject Content

Advanced Topics in ICT (ATICT) discusses the latest advances in this area, including the state-of-the-art and cutting edge research results and future trends. Subject content is expected to change over the course of ATICT, due to the rapidly changing ICT industry. Below is a list of possible topics to cover within the unit.

1. Web Technologies
2. Visualisation Technologies
3. Big Data
4. Artificial Intelligence
5. Social Networking
6. Digital Humanities
7. Computational Linguistics
8. Emerging Markets
9. Future Trends

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Report	1000-1500 words (approximately 2-3 pages)	20	N	Individual
Presentation	3 Mins (approximately 2-3 slides)	10	N	Individual
Report	1000-1500 words (approximately 2-3 pages)	20	N	Individual
Presentation	3 Mins (approximately 2-3 slides)	10	N	Individual

Report	1000-1500 words (approximately 2-3 pages)	20	N	Individual
Presentation	3 Mins (approximately 2-3 slides)	10	N	Individual
Report	max 500 words (approximately 2 pages)	10	N	Individual

Prescribed Texts

- No specific textbook is prescribed because of the nature of topics which will change from one year to another. The subject will use research journals, white papers and case studies as well as material available on the Web.

Teaching Periods

INFS 7004 Content Management Systems and Web Analytics

Credit Points 10

Legacy Code 300697

Coordinator Simi Kamini Bajaj ([https://directory.westernsydney.edu.au/search/name/Simi Kamini Bajaj/](https://directory.westernsydney.edu.au/search/name/Simi_Kamini_Bajaj/))

Description Content management systems (CMS) is a collective name for a wide range of web applications used by organisations/institutions/enterprises and social communities in establishing a continuing web presence. They may connect to backend systems and can provide complete web application services. This unit builds on both the conceptual and practical skills/knowledge to develop and utilise CMS's; in their management; in technical, legal, ethical and security issues; and in utilising web analytics to obtain business intelligence of their operation and impact.

School Computer, Data & Math Sciences

Discipline Information Systems

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 5891 Web Site Management and Security

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Web development and HTML basics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Give details of the architecture, functions, operation and characteristics of contemporary Content Management Systems and deploy and deploy a representative CMS;
2. Demonstrate a working knowledge of relevant legal issues: current web-related legislation, copyright, privacy, and intellectual property;
3. Identify privacy concerns and security issues in design, developing and maintaining CMSs including accessibility issues;
4. Demonstrate an understanding of the fundamentals of server protection and control of access to information;
5. Develop management policies for implementation of Web-based services for commercial applications
6. Demonstrate a working knowledge of the various web analytic tools, their application, relevance, scope and limitations and how they can be applied in the business context
7. Demonstrate a working knowledge of community and social networks and the impact of CMSs in society.

Subject Content

- architecture and functions of CMSs, comparison of CMSs and their functionality
- operation, management, policy development and workflow
- security, IP, ethics, Accessibility, Privacy and legal requirements of enterprise systems
- Internationalisation and The user interface
- Deployment and maintenance Issues
- principles, methods, tools and usage of web Analytics
- community CMSs as compared to enterprise CMSs
- developing web applications with CMSs
- future Trends and Developments of CMSs

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz		30	N	Individual
Practical		30	N	Individual
Applied Project	1500 words or equivalent	40	N	Individual

INFS 7006 Software Testing and Automation

Credit Points 10

Legacy Code 300770

Coordinator Simi Kamini Bajaj ([https://directory.westernsydney.edu.au/search/name/Simi Kamini Bajaj/](https://directory.westernsydney.edu.au/search/name/Simi%20Kamini%20Bajaj/))

Description Software Testing and Automation will cover topics in two sections - Fundamentals of Software Testing and Test Automation. Section 1 will enable students to get a good understanding of different types of testing, the entire life cycle of Testing; how to design and prepare Test Cases, Test Data, execute these Test Cases and manage the defects. Students will also learn the importance of exclusive Test Environment for Testing and how to create a Traceability Matrix relating Requirements to Test Cases. Since approaches to testing software have also evolved with rigorous systematic approaches and advanced tools to automate some of the testing tasks. Section 2 will expose students to Test Automation using an automation tool, Object mapping and repository creation, Exception handling, logging and reporting, and Creation and Execution of Automation scripts.

School Computer, Data & Math Sciences

Discipline Information Systems, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Knowledge about: Software Development Life Cycle; Programming knowledge in one of the Object Oriented programming language for e.g. Java, C++; Scripting Language such as Java Script.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design and prepare Test Cases as part of the test preparation phase of testing life cycle
2. Prepare Test Data for the Test Cases
3. Execute Test Cases and Capture Test Evidences as part of test execution phase of testing life cycle
4. Create defect reports, assign severity levels, manage defects and track defects to closure as part of the defect life cycle
5. Create Traceability Matrix (relating Requirements to Test Cases)
6. Demonstrate an understanding of the syntax of automation tool scripting
7. Create test automation scripts using an automation tool
8. Conduct regression testing using the test automation scripts
9. Demonstrate a broader understanding of importance and state-of-the-art of software testing as practiced in the industry

Subject Content

Section I - Fundamentals of Software Testing:

1. Basics of software testing
2. Types of testing
3. Testing life cycle
4. Test Design
5. Defect management life cycle
6. Test Execution
7. Traceability Matrix

Section II - Automation Testing:

1. Overview of test automation tool, Record and Playback
2. Object map and Object repository creation, Verification Points

3. Global & Environment Variables
4. Data Pool Creation & Using External Data Sources
5. Exception Handling
6. Logging & reporting
7. Creation of Test Automation Scripts
8. Execution of Test Automation Scripts

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quizzes and lab work	3 (90 Minutes) quizzes	35	N	Individual

INFS 7007 Systems Analysis and Database Management Systems

Credit Points 10

Legacy Code 300977

Coordinator Aruna Jamdagni ([https://directory.westernsydney.edu.au/search/name/Aruna Jamdagni/](https://directory.westernsydney.edu.au/search/name/Aruna%20Jamdagni/))

Description The main purpose of this unit is to provide students with an opportunity to gain knowledge and experience of developing a business information system in a systematic way. This unit examines the general methodology of systems development life cycle, including different phases and various modeling techniques. The unit specialises in the development of a full systems analysis and design documentation by using system development methodologies, including data analysis and modeling methods. It extensively covers database design techniques where students will use a set of business rules obtained from requirements and use case analysis, and database implementation

using a commercial database management system. At the same time, student learning, intercommunication and collaborative working skills are enhanced by student participation in tutorial presentations and group assignments.

School Computer, Data & Math Sciences

Discipline Information Systems, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. explain the key role of a system analyst and compare the generic roles and responsibilities of users, developers and managers within the context of business information systems
2. apply various phases of System Development Life Cycle (SDLC) to collaborative projects in a business environment.
3. analyse user and system requirements for producing abstract models on business problems.
4. explain essential components of a Relational Database Management System (RDBMS) and the database ANSI/SPARC 3 level architecture.
5. apply and generalise skills in database modeling, including Entity-Relationship Diagram (ERD), normalization and Global Relation Diagram (GRD).
6. develop a database using the SDLC methodology and implement this system in a commercial database management system such as Microsoft SQL.
7. explain the general concepts of database transactions and concurrency control.

Subject Content

Systems analysis design and the Systems Development Life Cycle (SDLC)

Project creation, selection and management

Requirements analysis and use case analysis

Process modeling and Data Flow Diagram (DFD)

Systems architecture, user-interface design and program design

Systems testing, documentation and transition

Database architecture, ANSI/SPARC 3 level architecture

Data modeling, Entity-Relationship modeling and Relational modeling

Anomalies in databases and data normalization.

Entity-Relationship Diagram (ERD) and Global Relation Diagram (GRD)

Introduction to database transaction management, concurrency and locking.

Database implementation and SQL

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	2 hours	35%	Y	Individual
Practical	10 in-class tutorial practical exercises. 1 for each week, lasting 10 weeks. Each exercise to be completed no later than the next class.	30%	Y	Group
Report	presentation: 10 minutes including question time report: maximum 2000 words in no more than 20 pages	35%	Y	Group

Credit Points 10

Legacy Code 300696

Coordinator Hon Cheung ([https://directory.westernsydney.edu.au/search/name/Hon Cheung/](https://directory.westernsydney.edu.au/search/name/Hon%20Cheung/))

Description This unit is concerned with the protection of information in computing systems and when transferred over networks. It addresses techniques for securing networking applications and their security arrangements. Students gain an understanding of the fundamentals of the provision of security in networks and systems, as well as an appreciation of some of the problems that arise in devising practical security solutions.

School Computer, Data & Math Sciences

Discipline Information Systems

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 5882 - Distributed Systems and Network Security

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Basic knowledge of networked and computer systems. Basic understanding of cryptography.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe fundamental concepts of networked system security and security threats.
2. Explain encryption techniques.
3. Analyse and describe common security protocols.
4. Analyse and describe typical authentication protocols and authorization approaches.
5. Explain security issues in networked computer systems.
6. Describe network security in typical networks including LANs and internetworks.
7. Describe security issues and implementation of secure measures on the Internet

Subject Content

Security concepts and terminology
 Security threats
 Cryptography
 Authentication
 Authorization
 Security protocols
 Network security
 Computer security

Assessment

INFS 7009 Web Technologies

Credit Points 10

Legacy Code 300693

Coordinator Zhuhan Jiang ([https://directory.westernsydney.edu.au/search/name/Zhuhan Jiang/](https://directory.westernsydney.edu.au/search/name/Zhuhan%20Jiang/))

Description This unit covers the technologies required for the construction and maintenance of web pages and web sites. It focuses on the web page and site design, markup languages, client-side technologies such as Cascading Style Sheets and Javascript, as well as server-side technologies such as web servers, database connectivity, and server side scripting. It also includes the use of multi-media, security, access rights, and the exploration of some of the latest technological wonders populated on the Internet. This unit is heavily orientated towards practical experience based on amplifying the theoretical concepts.

School Computer, Data & Math Sciences

Discipline Information Systems, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Create individual web sites and demonstrate a working knowledge of HTML, CSS, JavaScript, and simple database interaction

2. Develop and implement prototype server-side and client-side applications, using scripting languages and style sheets
3. Demonstrate the understanding of XHTML, DHTML, XML, AJAX, Web Service, multi-media, and human interaction design principles
4. Adjust the site presentation and performance related to the use of mobile devices
5. Explore the merits and various methods to enable web security, auditing and access control for typical platforms and applications
6. Design and implement prototype web-based information systems for commercial applications
7. Identify and discuss variety of current web technologies, potential issues, and the possible future directions

Subject Content

- Internet and the markup languages: HTML, XHTML, XML and others; HTTP protocol and the client-server model of the web; page and site creation.

- Methods of client interfacing to the web, web page design, current multimedia principles of web page layout and the human interface; Cascading Style Sheets.

- Client-side scripting with JavaScript, making use of client-side scripts, including AJAX or DOM, to enable better user experience and interactivity.

- Common web site security and access control, SSL, encryption, digital certificates, and basic copyright issues.

- Web site organisation, web logging, site statistics, site administration, and content management systems.

- Web servers, and the use of web development libraries or tools.

- Latest trend and features of web technologies.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	50 minutes	20	Y	Individual
Quiz	90 minutes	20	Y	Individual
Practical	8 hours (5-8 linked webpages, depending on the student's own design)	20	Y	Individual
Applied Project	15 hours (10-15 linked webpages, depending on the student's own site design)	40	N	Group

Prescribed Texts

- No specific textbook is prescribed because of the diversity in Web technologies. Also, a tremendous amount of material is available on the Web itself.

Introduction to Podiatry and Clinical Education

Credit Points 10

Legacy Code 400942

Coordinator Stefania Penkala ([https://directory.westernsydney.edu.au/search/name/Stefania Penkala/](https://directory.westernsydney.edu.au/search/name/Stefania%20Penkala/))

Description This is the first unit to introduce Master's entry students to some basic theoretical and practical components related to podiatric practice with an emphasis on clinical competencies in patient communication and management that will be reinforced in the one week clinical placement in either a private practice or public sector setting. In addition, a clinical component will introduce students to skills required to treat basic skin conditions and evaluate the functional anatomy, gait and cursory examination as well as communication skills which are necessary components for the Podiatric Practice clinical units. Furthermore, general clinical treatment techniques will be covered such as chair side devices, strapping and removable pads to more complex skills such as the manufacture of non-cast orthotic devices will be covered.

School Health Sciences

Discipline Podiatry

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Podiatry specific

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the role of podiatrists in health care and understand the legal legislation and registration guidelines for the podiatry profession.
2. Demonstrate the ability to evaluate the aetiology and management of common skin and nail disorders in the health setting.

3. Distinguish relevant skills in assessment of dermatology, vascular, neurological and lower extremity biomechanics and gait analysis within the health environment.
4. Analyse the framework of OH&S, infection control standards and protocols in a clinical setting and in the treatment of the high risk foot and nail surgery procedures.
5. Apply analytical skills encompassing communication and correspondence with patients and allied health professionals (interpersonal, written, and professional presentation).
6. Demonstrate the ability to evaluate and manage common podiatric skills such as identifying and handling of instrumentation within the health environment.
7. Develop manual skills for the application of clinical techniques and apply strapping or pads to the leg and foot within the health environment.
8. Demonstrate a basic understanding of appropriate footwear and demonstrate the need for prescription of non cast orthoses.
9. Demonstrate the ability to apply the above theoretical concepts and practical skills during a one week placement in a private practice or public sector setting.

Subject Content

1. General clinical protocols
 - Policy for the Uniclinic infection control standards and orthoses fabrication work areas (OH&S issues)
 - documentation for patient management at Western Sydney university and learning contracts for external placements
 - professional Issues related to clinical procedures (Internal and external), e.g. Immunisation, criminal checks, senior first aid and Dress Code
2. Cursory physical examination
 - vascular, neurological and dermatological
 - Basic Biomechanical techniques, planes and axes of The Lower extremity and introduction to assessment of gait analysis
 - Basic gait analysis
3. Introduction to functional anatomy
 - Anatomy of The thigh, leg and foot
 - general joint and muscle function assessment
 - introduction to postural types (lordosis, kyphosis) and foot types (normal, pronated and supinated)
4. Documentation
 - legal and professional requirements
 - practical management Issues
 - assessment forms from The UniClinic
 - prescription writing for orthoses
 - correspondence ? letter writing
5. Instrumentation
 - introduction to Basic routine instrument pack
 - introduction to handling instruments
 - Basic nail and Scalpel techniques
6. Manual treatment skills
 - principles for mechanical / Fabrication skills
 - Basic strapping and Padding techniques
 - Basic workshop skills to fabricate non cast orthoses
7. Manual fabrication skills
 - introduction to safety Factors in The workshop
8. External Clinical Placement
 - one full week placement
 - private or public sector
 - observation only

Teaching Periods

JUST 0001 Academic Skills for Criminal and Community Justice (WSTC Prep)

Credit Points 10

Legacy Code 700219

Coordinator Mona Shrestha ([https://directory.westernsydney.edu.au/search/name/Mona Shrestha/](https://directory.westernsydney.edu.au/search/name/Mona%20Shrestha/))

Description This unit introduces students to the essential academic skills required for success in tertiary studies. It employs an explicit pedagogy approach to teach students how to become independent, active, and reflective learners. The unit also includes essential research and writing skills specific to the social sciences and criminal justice.

School Western Sydney The College

Discipline Justice and Law Enforcement, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 0 Preparatory subject

Restrictions Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use both independent and collaborative learning strategies to advance the knowledge of the individual and that of their peers.
2. Communicate effectively through the development of critical reading, listening, speaking and writing skills in context.
3. Locate and use information technology systems and educational technologies to support learning and assessment.
4. Apply problem solving skills and research skills, to make informed decisions.
5. Reflect on learning experiences, in order to assess their own learning styles and ◆elearn how to learn◆f.
6. Demonstrate an understanding of the difference between qualitative and quantitative research, as well as primary and secondary sources, as it applies to the social sciences and criminal justice.

Subject Content

1. Introduction and academic skills
2. Introduction to academic culture
3. Information skills and blended learning
4. Essential skills for Criminal and Community Justice

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Oral presentation	5 minutes	10	N	Individual
Reference test	1 hour	10	N	Individual

Reflective Learning 1,200 words 40 N Individual

Journal: Part 1 – 20% Part 2 – 20%

Research Project:	(a) 500 words article analysis (b) 500 words (week 3 or 4) – 10%	40	N	Both (Individual & Group)
(b) Concept map – 10%				
(c) Group presentation – 10%				
(d) Final submission (Reflective activity) – 10%	(c) 5 mins (d) 1200 words			

Teaching Periods

JUST 0002 Introduction to Australian Law Enforcement (WSTC Prep)

Credit Points 10

Legacy Code 700236

Coordinator Paul Rouillon ([https://directory.westernsydney.edu.au/search/name/Paul Rouillon/](https://directory.westernsydney.edu.au/search/name/Paul%20Rouillon/))

Description This unit provides a broad overview of law enforcement in Australia. It aims to equip students with an understanding of power, law and authority in relation to law enforcement agencies in Australia, as well as an overview of the operations and procedures of those agencies. The unit also provides students with an understanding of what it means to become a law enforcement professional in Australia.

School Western Sydney The College

Discipline Justice and Law Enforcement, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 0 Preparatory subject

Restrictions Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the nature of law enforcement in Australia.
2. Outline the ethics and professionalism expected of Australian law enforcement officers.
3. Identify and explain the various operations and procedures within Australian enforcement agencies.
4. Apply writing, referencing and problem-solving skills commensurate with tertiary studies.
5. Demonstrate research and digital literacy skills.

6. Participate effectively in collaborative learning environments to present information related to Australian law enforcement.

Subject Content

Power and authority
 Legislation relevant to law enforcement
 Who are the Police?
 Private policing
 Government departments
 Disaster and emergency management
 State law enforcement agencies
 National law enforcement agencies
 The impact of law enforcement on local communities
 Becoming a law enforcement professional

JUST 0004 Introduction to the Australian Legal System (WSTC)

Credit Points 10

Legacy Code 900083

Coordinator Bader Unnisa Mehdi ([https://directory.westernsydney.edu.au/search/name/Bader Unnisa Mehdi/](https://directory.westernsydney.edu.au/search/name/Bader%20Unnisa%20Mehdi/))

Description This unit is designed to develop an understanding of the Australian legal system for students whose courses involve law units relevant to their area of study, such as Business, Construction, Policing and Criminology. Students will investigate the role of the Australian legal system in contemporary society, and explore its relevance to their chosen career path through project-based assessments. The unit will also help students develop the language and communication skills necessary for further tertiary study.

School Western Sydney The College

Discipline Legal Studies

JUST 1003 Policing Practices

Credit Points 10

Legacy Code 102314

Coordinator Karl Roberts ([https://directory.westernsydney.edu.au/search/name/Karl Roberts/](https://directory.westernsydney.edu.au/search/name/Karl%20Roberts/))

Description This unit concentrates on the implications for police practice of the legislative framework, and police responsibilities including procedures, practices and methods. The content will focus on police decision-making and discretion, and the meaning and practice of police powers. The approach necessary for working with diverse communities is described and analysed, as are associated communication practices. Concepts examined include the appropriate use of force, the appropriate use of personal information and the characteristics of ethical policing practice. Although the key focus of learning relates to the New South Wales Police Force; examples are also drawn from Australian state and federal policing as well as international policing contexts.

JUST 2013 Mediation

Credit Points 10

Legacy Code 200294

Coordinator Sheralee Gociev ([https://directory.westernsydney.edu.au/search/name/Sheralee Gociev/](https://directory.westernsydney.edu.au/search/name/Sheralee%20Gociev/))

Description This unit will examine the theory and practice of mediation, specifically in the context of the Australian legal system. It builds upon the more general introduction given in the unit Alternative Dispute Resolution (which is a prerequisite for this course). This unit will assume that students have read the textbook for Alternative Dispute Resolution. This unit is experientially based, and students will be expected to participate in discussions, exercises and role-plays. The theory and practice of mediation will be critically considered, as will the social and legal contexts within which mediation is practised. The unit is presented with a multi-disciplinary, analytical and practical approach. Given the very broad range of areas within which mediation can be applied, students will be able to focus on an area or areas of particular personal or professional interest to them (for example, mediation of commercial disputes, mediation under anti-discrimination or family law). This unit is intended to be an introduction to the practice of mediation.

School Law

Discipline Legal Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) LAWS 2001

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate contemporary issues in mediation.
2. Prepare for mediation and document pre-mediation processes.
3. Conduct mediation and evaluate the practical, procedural, ethical and legal issues in the mediation.
4. Reflect on and assess their own capabilities and performance to support their personal and professional development.
5. Write clearly and persuasively, referencing according to the Australian Guide to Legal Citation.

Subject Content

- The concept of mediation.
- The range and diversity of definitions of mediation.
- The mediator: the role of the mediator; different models of the role of the mediator.
- skills and skill development in mediation: The personal and professional qualities and competencies required of A mediator.
- The mediator as A third party facilitator.
- The mediator as neutral: The concepts of neutrality and impartiality in practice.
- The mediation process: approaches to Models of The process.
- aims of mediation: The range of aims which mediation may Seek to achieve.
- risks in mediation: potential dangers and problems in mediation, and appropriate strategies for Addressing them.
- Pre-mediation processes: (1) initial contact with the disputing parties.
- Pre-mediation processes: (2) investigative strategies and the facilitation of information gathering by the parties.
- Pre-mediation processes: (3) interviewing parties prior to mediation.
- Pre-mediation processes: (4) case analysis
- Pre-mediation processes: (5) case evaluation: determining when mediation is appropriate and not appropriate, and what form and style of mediation is appropriate.
- Pre-mediation processes: (6) preparing the parties for mediation.
- agreement to mediate
- Pre-mediation processes: (7) the preparation of preliminary statements of issues and options where appropriate.
- Pre-mediation processes: (8) preparing the mediator for mediation.
- Pre-mediation processes: (9) practical preparations and resources (including the choice of venue, the layout of venue, technical and other resources).
- Pre-mediation processes: (10) planning mediation.
- The mediators relationship with The parties.
- The mediation process: (1) initiating the mediation session: the mediators opening statement and preliminary issues.
- The mediation process: (2) facilitating communication and perception sharing: communication skills and language in mediation.
- The mediation process: (3) opening statements and responses.
- The mediation process: (4) focusing and fractionating.
- The mediation process: (5) identifying areas of agreement and disagreement.
- The mediation process: (6) facilitating issue definition and agenda setting.
- The mediation process: (7) facilitating option generation.
- The mediation process: (8) facilitating option evaluation.
- The mediation process: (9) facilitating costing of options and alternatives.
- The mediation process: (10) caucusing, breaks and adjournments.
- The mediation process: (11) returning from separation.
- The mediation process: (12) facilitating negotiation.
- The mediation process: (13) types and forms of agreement.
- The mediation process: (14) facilitating agreement in principle.
- The mediation process: (15) facilitating agreement in detail.
- The mediation process: (16) reality testing.
- The mediation process: (17) agreement writing.
- The mediation process: (18) termination.

- Post-mediation processes: (1) de-briefing of the parties.
- Post-mediation processes: (2) de-briefing of the mediator.
- Post-mediation processes: (3) evaluation and assessment.
- Post-mediation processes: (4) agreement monitoring, review and revision.
- intervention in The mediation process: when, why and how should The mediator intervene?
- control in mediation: Issues relating to control, power and intervention.
- emotions in mediation
- Variant forms of mediation: (1) Co-mediation: the use of two mediators.
- Variant forms of mediation: (2) Team mediation: the use of more than two mediators.
- Variant forms of mediation: (3) Shuttle mediation: mediation without bringing the parties together.
- Variant forms of mediation: (4) Med-Arb.
- Variant forms of mediation: (5) Facilitated Negotiation.
- Variant forms of mediation: (6) Other variant forms of mediation: conciliation, specialist mediation, therapeutic mediation, mediation through advocates and representatives, telephone and video-conferencing mediation, fast-track mediation, crisis media
- Additional parties in mediation: advocates, representatives and supporters.
- mediation in multi-party disputes.
- mediation in family and relationship disputes
- Factors which may influence The mediation process.
- legal Issues in mediation.
- Ethical issues in mediation: ethical principles for mediation; ethical dilemmas and their resolution; codes of ethics and standards of professional practice.
- evaluation of mediators and mediation.
- Issues and Controversies in mediation

JUST 2020 Criminal Law for Policing

Credit Points 10

Legacy Code 102690

Coordinator John Edwards ([https://directory.westernsydney.edu.au/search/name/John Edwards/](https://directory.westernsydney.edu.au/search/name/John%20Edwards/))

Description Knowledge of the criminal law is useful to state and federal police forces, government and private organisations, military police, private investigators, anti-corruption agencies, and in industries such

as banking and insurance. All have a vested interest in preventing, detecting and investigating breaches of the criminal law through a policy framework. This unit introduces students to the common criminal offences encountered by police officers, with a focus on those investigating breaches of the criminal law rather than those prosecuting or defending. Common elements of Australian (particularly NSW legislation) and international jurisdictions and Commonwealth legislation are covered.

School Social Sciences

Discipline Police Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Incompatible Subjects CULT 2006 - Evidence Investigations and Police Intelligence

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the basic elements of a range of commonly used criminal offences.
2. Apply the basic elements of commonly used criminal offences to scenarios to determine the offence.
3. Distinguish the different sources and jurisdictions of criminal offences.
4. Explain the legal reasoning of the courts in interpreting the criminal statutes.

Subject Content

Common offences of the Crimes Act 40/1900 (NSW)

Common offences of the Drug Misuse & Trafficking Act 25/1985 (NSW)

Selected offences of the Criminal Code Act 1995 (Commonwealth)

General and partial defences to criminal offences

Statutory law and common law offences

JUST 3002 Assessment and Treatment of Offenders

Credit Points 10

Legacy Code 102068

Coordinator Erin Kruger ([https://directory.westernsydney.edu.au/search/name/Erin Kruger/](https://directory.westernsydney.edu.au/search/name/Erin%20Kruger/))

Description This unit will take an authoritative overview and analysis of issues of assessment, and treatment of offenders, in particular those considered to be high-risk offenders. It will take particular account of policy and legislative issues and developments at an international level and address wider issues of risk and the high-risk offender in the context of the risk society. The unit will also question the relationship between the assessment, treatment and management of such offenders, and consider who is appropriate to involve in this process. The unit will take a multi-disciplinary approach to the assessment, treatment and management of violent and sexual offenders in particular, and extend its coverage to include the issue of stalking. Issues around diversity will be considered throughout.

School Social Sciences

Discipline Justice and Law Enforcement, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 160 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate how offenders, in particular 'high-risk' offenders, are assessed in relation to risk posed;
2. Critically assess the associated criminogenic needs of offenders, in particular 'high-risk' offenders;
3. Critically analyse key literature associated with the assessment and treatment of offenders, in particular 'high-risk' offenders.

Subject Content

Introduction to the module and the history of risk assessments and treatment work with offenders

Working with Offenders 1: Violent Offenders - Theories of Aggression and Violence

Working with Offenders 1: Violent Offenders - Nature and Extent of Violent Crimes

Working with Offenders 2: Sex Offenders - Theories of Sexual Offending

Working with Offenders 2: Sex Offenders - Nature and Extent of Sexual Crimes

Working with Offenders 3: Inter-partner Violence and Stalking

Risk Assessment 1: Violent offenders

Risk Assessment 2: Sex offenders

Risk Assessment 3: Inter-partner Violence

Treatment Approaches for violent offenders

Treatment Approaches for sex offenders

Treatment Approaches for Inter-partner violence

JUST 3006 Governance in Policing

Credit Points 10

Legacy Code 102169

Coordinator Toby Miles-Johnson ([https://directory.westernsydney.edu.au/search/name/Toby Miles-Johnson/](https://directory.westernsydney.edu.au/search/name/Toby%20Miles-Johnson/))

Description In this unit students examine the nature and function of governance and accountability processes within policing and the broader private security industry. There is a focus on the commitment by governments to practices at an individual and organisational level that are based on accountability, contestability and continuous improvement. Issues such as human rights, ethics in policing, conflicts of interest, misconduct, and corruption and criminality within policing and related industries, are explored; and relevant explanatory theories are examined. Different models and levels of governance and accountability in Australia are also explored, as are the roles of professional standards units within police forces, external accountability agencies such as police integrity commissions, the ombudsman, and crime and misconduct agencies. These are compared with other approaches worldwide. Throughout the unit extensive use will be made of case studies and problem based learning where students will be invited to propose solutions to real world problems.

School Social Sciences

Discipline Police Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) CULT 3017 AND
CULT 2006 OR
CULT 2016

Restrictions This is a specialist core subject and is restricted to students enrolled in programs 1662/1844 Bachelor of Policing, 1719 Bachelor of Policing Studies - Non NSW Police Pathway, 1734 Bachelor of Policing (Leadership Program) or 6029 Diploma in Social Science (Policing)/Bachelor of Policing.

Assumed Knowledge

Students are required to possess a sound knowledge of key issues in, and mechanisms of, policing practices, as well as legislative functions, as established as foundational knowledge in the policing core subjects over the first two years of study, in order to successfully undertake this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate research evidence and literature on ethics, governance and accountability in policing
2. Evaluate the strengths and weaknesses of governance processes and procedures in real world issues.
3. Articulate the need for governance and governance approaches to policing in Australia and internationally.

Subject Content

1. Ethics in policing
2. Ethical dilemmas in policing
3. Historical developments in governance and accountability
4. Corruption, misconduct, conflicts of interest - explanations and theories
5. Governance and Accountability - theories and practice, structures and mechanisms
6. Australian and international approaches to governance in policing and related industries
7. The impact of governance and accountability on policing practice

Assessment

JUST 3011 Issues in the Criminal Justice System

Credit Points 10

Legacy Code 200701

Coordinator Rossi Kotsis ([https://directory.westernsydney.edu.au/search/name/Rossi Kotsis/](https://directory.westernsydney.edu.au/search/name/Rossi%20Kotsis/))

Description This unit introduces candidates to the criminal justice system through an examination of justifications for punishment and the policy and practice of various criminal justice agencies. Attention is paid to the significance of race, class and gender, and how these variables impact upon justice within the criminal justice system. Where possible, visits to criminal justice agencies and a prison are organised, and practitioners are invited to seminars to enable candidates to gain a more practical understanding of the criminal justice system.

School Law

Discipline Legal Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 2004

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Assess the dynamic nature of criminal justice and criminal procedure and the social, political and legal factors which contribute to this dynamism.
2. Critically analyse the impact of the criminal justice system on different social groups, including Indigenous Peoples.
3. Develop clear, logical and persuasive arguments about issues of criminal law and criminal justice.
4. Propose solutions to contemporary issues in criminal justice.

Subject Content

1. Criminal legal theory
2. Impact of the criminal justice system on social groups
3. Police investigation and discretion
4. Charge negotiation
5. Jurisdictional limits and classification of criminal charges
6. Impact of political and social factors on criminal laws and procedures
7. The jury as a tribunal of fact
8. Victims of crime
9. Sentencing
10. Technology in the criminal justice system

JUST 3012 Policing Leaders Internship

Credit Points 10

Legacy Code 101969

Coordinator Kate Linklater ([https://directory.westernsydney.edu.au/search/name/Kate Linklater/](https://directory.westernsydney.edu.au/search/name/Kate%20Linklater/))

Description The Policing Leaders Internship offers work experience to students enrolled in the Bachelor of Policing (Leadership) and Bachelor of Policing degrees within the School of Social Sciences. Internships can take place in a range of policing organisations such as the NSW Police Force, Police Association of NSW, and other member organisations of the Police Federation of Australia. Internship placements will require students to utilise a range of social science skills obtained throughout the Bachelor of Policing (Leadership) and Bachelor of Policing degree programs. This practical work schedule is supported by a reading program that examines different approaches to the study of policing organisations (their structures, functions and policies) and links these issues to the internship experience. The internship provides work at a host organisation for fourteen full days, totalling 105 hours. Typically, this internship component will be realised

as one day per week for fourteen weeks, however an alternative spread of work may be agreed between the organisation, the student, and the unit coordinator. The unit is only offered in the Spring session of Level 3, and is worth 10 units of credit, which will be recorded as an elective on your degree transcript. There is only one lecture for this unit.

School Social Sciences

Discipline Other Society And Culture

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Co-requisite(s) JUST 3006 AND CULT 3001

Restrictions (1). Students must be enrolled in 1734 Bachelor of Policing (Leadership Program), 1844/1662 Bachelor of Policing or 6029 Diploma in Social Science (Policing)/Bachelor of Policing and have passed 80 credits at Level 1 and 60 credits at Level 2. (2). Students will be required to have achieved a GPA of 5 for all Level 1 and Level 2 core subjects of their degree. Internship placements are limited to 20 and will be prioritised for Bachelor of Policing (Leadership Program) students, for whom this subject is core. Any remaining internships will then be offered to Bachelor of Policing students who meet the two prerequisites. In the case of more than 20 students in 1734 meeting these requirements, students will be allocated based on their GPA ranking.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Appraise the working environments of contemporary policing organisations
- Follow direction from police practitioners to undertake applied tasks
- Critically reflect on the application of their individual ethics and professional practice
- Evaluate the important policy and practice contexts of contemporary policing organisations
- Apply their academic knowledge to the practice contexts of contemporary policing organisations
- Synthesise the research, policy and practice evidence related to a critical issue considered during their placement

Subject Content

- Understanding Management theory within policing practice
- Understanding Organisational theory within policing practice
- To gain practical experience within a relevant policing organisation

Assessment

JUST 3014 Creating Criminal Justice Solutions

Credit Points 10

Legacy Code 102713

Coordinator Toby Miles-Johnson ([https://directory.westernsydney.edu.au/search/name/Toby Miles-Johnson/](https://directory.westernsydney.edu.au/search/name/Toby%20Miles-Johnson/))

Description In this unit, students will consider some of the contemporary issues faced by the criminal justice system and the possible solutions to these real world problems. Using knowledge and skills drawn from their experience and study in their degree, students will be required to explore a critical policing or criminal justice issue and develop potential solutions. The unit aims to develop skills in problem analysis and managing the practical constraints faced by social scientists working in applied criminal justice and policing settings. Students will identify a critical issue (such as policing domestic violence, police engagement with CALD youth, criminal justice responses to cybercrimes), which they will explore individually and in groups throughout the semester. Students will become familiar with and learn to apply the policy/practice development cycle to identify critical issues, survey existing research and practices, develop alternative strategies for resolving the identified problem, and evaluating the expected outcomes.

School Social Sciences

Discipline Justice Administration

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects JUST 3004 - Contemporary Issues in Criminal Justice and Policing

Restrictions Successful completion of 60 credit points at Level 1 and 60 credit points at Level 2. Students must be enrolled in programs 1662/1844 Bachelor of Policing, 1719 Bachelor of Policing Studies - Non NSW Police Pathway, 1709 Bachelor of Criminal and Community Justice, 1713 Bachelor of Criminal and Community Justice/Bachelor of Social Work, 1734 Bachelor of Policing (Leadership Program), 2767 Bachelor of Criminal and Community Justice/Bachelor of Laws, 6025 Diploma in Criminal and Community Justice/Bachelor of Criminal and

Community Justice and 6029 Diploma in Social Science (Policing)/ Bachelor of Policing. Enrolment in the online option of the subject will be limited to students returning to complete their Bachelor of Policing after completing the CSU Associate Degree in Policing Practices. Student enrolment in the subject will be monitored and any students enrolled in the online option who are not in this category will be requested to change their enrolment to an on-campus location.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply problem-solving models to an issue within the field of criminal justice/policing to inform knowledge and understanding of the issue and to facilitate the development of responses to the issue.
2. Critically evaluate a range of academic, policy and other materials relevant to an issue within the criminal justice/policing field.
3. Construct coherent reports summarising the issue, identifying factors relevant to its aetiology and providing adequate suggestions for intervention and evaluation.
4. Demonstrate an understanding of the challenges inherent in developing responses to real world issues.

Subject Content

This is a capstone subject for the Bachelor of Criminal and Community Justice (including double degrees), Bachelor of Policing, Bachelor of Policing Studies and Bachelor of Policing (Leadership) pathways. Students undertake an in-depth analysis of an issue relevant to criminal justice/policing, utilising their knowledge, skills and experience of justice processes, practices and policy. They will use academic, policy and other relevant literatures to develop suggested responses to an issue and propose a method of evaluation for their proposed intervention. Students will be introduced to problem solving models and their application to justice processes and practices, and will apply problem solving techniques to address the issue. They will develop a report based on a series of assessments which include a scoping exercise, a policy briefing paper and an evaluation study proposal. The subject content will vary from year to year as the subject aims to engage students with the critical issues facing the criminal justice system and policing at the time of completing their degrees. In past years, students have considered innovative approaches to policing domestic violence and responding to domestic violence victims? f needs at the time of reporting, strategies for reducing the impact of cybercrime, and programs to enhance the relationships between police and CALD youth. Core research, policy and project management content will be introduced to students by way of online learning. This will include

Public policy and policy making
Research-led practice and evidence-based practice
Problem solving models
Developing policy from research
The nexus between policy and practice
Scoping a research problem
Identifying policy innovations
Evaluating policy and practice innovation

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate comprehensive understanding of the dimensions of executive police leadership.
2. Analyse and reflect on the history and consequences of past executive leadership practice within the NSW Police.
3. Explain the impact of executive leadership capabilities on leadership effectiveness and organisational success.
4. Reflect on effective executive leadership characteristics and styles in policing practice.

Subject Content

1. Executive Leadership principles
2. Dimensions and qualities needed for Executive leadership in policing
3. The historical development of Executive leadership in policing practice
4. The impact of Executive leadership on the organisation and its success

Teaching Periods

JUST 7003 Governance and Accountability in Policing Practice

Credit Points 10

Legacy Code 101893

Coordinator Selda Dagistanli ([https://directory.westernsydney.edu.au/search/name/Selda Dagistanli/](https://directory.westernsydney.edu.au/search/name/Selda%20Dagistanli/))

Description This unit will focus on understanding contemporary corporate governance and accountability within the practice of policing. Core to the content of the unit is the study of the commitment by governments to practices at an individual and organisational level that are based on accountability, contestability and lead to continuous improvement. The role of leadership in shaping and driving the commitment to continuous improvement in service delivery will be considered as well as issues concerning performance measurement, transparent governance, and accountable processes. Best practice policies and systems will be used within the teaching of this unit and examined through a case study teaching approach.

School Social Sciences

Discipline Police Studies

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Eligible students who have completed the Graduate Diploma in Strategic Leadership Program at NSW Police Management and Leadership Centre; or the Graduate Diploma of Executive Leadership (Policing and Emergency Services) at the Australian Institute of Police Management will receive Advanced standing for this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse a policing organisation in terms of performance management and accountability mechanisms.
2. Reflect on the role of accountability and governance in policing organisations.
3. Demonstrate depth of understanding of the importance and advantages of continuous improvement mechanisms to policing practice.
4. Demonstrate an understanding of how to contribute to the governance and accountability of policing agencies.

Subject Content

1. Governance ? theories and practice
2. Accountability ? theories and practice
3. Governance and accountability in police organisations
4. The impact of governance and accountability on policing practice
5. The historical development and current context of performance management in policing practice
6. Continuous improvement in the delivery of policing

Teaching Periods

JUST 7004 Vulnerability and Public Safety

Credit Points 10

Legacy Code 102418

Coordinator Nicole Asquith ([https://directory.westernsydney.edu.au/search/name/Nicole Asquith/](https://directory.westernsydney.edu.au/search/name/Nicole%20Asquith/))

Description This unit explores the concept of vulnerability and its implications for policing and public safety. Vulnerability will be defined and described and the challenges vulnerable populations present for policing and public safety will be discussed.

School Social Sciences

Discipline Police Studies

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) JUST 7001 AND
JUST 7002 AND
JUST 7003 AND
JUST 7005 AND
POLI 7002

Restrictions

Students must be enrolled in 2761 Master of Business Administration and be completing the Policing and Public Safety major.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise different forms of vulnerability and the challenges they pose for policing and public safety
2. Analyse policy applicable to the concept of vulnerability
3. Critically evaluate policy and practice in the policing of vulnerable groups
4. Develop policy and practice guidance applicable to policing or managing vulnerable populations

Subject Content

Defining vulnerability

Vulnerable victims and perpetrators of crime

Police responses to vulnerability

Best practice in policing with vulnerable populations

Policy and practice implications

Prescribed Texts

- Asquith NL, Bartkowiak-Thron I & Roberts, K (eds) Policing Encounters with Vulnerability, forthcoming.

Teaching Periods

JUST 7005 Working with Offending Behaviour: Integrating Theory to Practice

Credit Points 10

Legacy Code 101894

Coordinator Selda Dagistanli ([https://directory.westernsydney.edu.au/search/name/Selda Dagistanli/](https://directory.westernsydney.edu.au/search/name/Selda%20Dagistanli/))

Description The unit begins with an analysis of offending behaviour and criminality through the lens of different theoretical perspectives. The unit will then examine the way in which offenders are assessed for risk and the role criminal justice agencies play in examining risk. The unit will build on this knowledge by considering the range of interventions and treatment programs available to offenders in addressing their behaviour. The unit will conclude by examining the range of criminal justice agencies that play a role in working with offenders, with a particular focus on how this work is done within the community.

School Social Sciences

Discipline Police Studies

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Eligible students who have completed the Graduate Diploma in Strategic Leadership Program at NSW Police Management and Leadership Centre; or the Graduate Diploma of Executive Leadership (Policing and Emergency Services) at the Australian Institute of Police Management will receive Advanced standing for this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding and application of the theoretical frameworks used to understand offending behaviour.
2. Demonstrate a critical understanding of risk assessments practices used with offenders.
3. Identify and analyse offender interventions and treatment programs.
4. Bring critical awareness and understanding to the management of offenders.

Subject Content

1. Theoretical perspectives on offending and the offender.
 - a. Theories of the 'Individual'.
 - b. Theories of the 'Social'.
 - c. Theories of the 'Structural'.
2. Actuarial and Clinical Risk Assessments
3. Offender intervention and program content
4. Management strategies for working with offenders

Teaching Periods

JUST 7006 Clinical Legal Placement

Credit Points 10

Legacy Code 201064

Coordinator Michael Brogan ([https://directory.westernsydney.edu.au/search/name/Michael Brogan/](https://directory.westernsydney.edu.au/search/name/Michael%20Brogan/))

Description Clinical Legal Placement allows students to attend the Parramatta Community Justice Clinic (PCJC) or a community legal centre for ten (10) days. This unit provides students with an invaluable opportunity to use and reflect on their study of law in an interactive, legal service environment and real-life experience. Under the supervision of a legal practitioner students will work on advice, casework, policy or project work, as required by the PCJC or relevant centre. Students will examine the practical application of the law and the interaction of law, facts, policy and ethical issues. Students will be exposed to a system of self-analysis and self-criticism. Students

are required to attend every day, record and reflect on their own experiences, and submit several short papers of various kinds. (Places are limited and enrolment is based on merit with progression status also considered).

School Law

Discipline Legal Studies

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) LAWS 7072 AND
LAWS 7048 AND
LAWS 7047 AND
LAWS 7066

Restrictions

Students must be enrolled in a Postgraduate program. This subject is not available for self-select enrolment. Due to its popularity intake in the subject will be restricted to expressions of interest. GPA and progression in program will be considered. Students must have successfully completed 80 credit points of Juris Doctor core subjects, including the four prerequisite subjects before enrolling in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate law, the legal system and process in a practical context;
2. Provide advice on legal problems in a practical context;
3. Assess ethical issues arising in legal practice and the professional responsibilities of lawyers in promoting justice and service to the community;
4. Critically reflect on professional development experiences and needs for ongoing development.

Subject Content

1. Real legal problems
2. The practical application of law and ethics to facts
3. Obtaining relevant information from clients
4. Client records:
 - making records
 - File note
 - letter of advice
 - other record types retained by The practice
5. Information for clients:
 - legal information sheets
 - other information available in practice

Special Requirements

Legislative pre-requisites

Students will need a criminal record check and consent declaration if working with minors during their placement.

Teaching Periods

JUST 7007 Issues in the Criminal Justice System

Credit Points 10

Legacy Code 201068

Coordinator Rossi Kotsis ([https://directory.westernsydney.edu.au/search/name/Rossi Kotsis/](https://directory.westernsydney.edu.au/search/name/Rossi%20Kotsis/))

Description This unit introduces candidates to the criminal justice system through a critical review of justifications for punishment and the policy and practice of various criminal justice agencies. Attention is paid to the significance of race, class and gender, and how these variables impact upon justice within the criminal justice system. Students will engage with contemporary issues and ongoing debates in criminal justice. Where possible, visits to criminal justice agencies and a prison are organised, and practitioners are invited to seminars to enable candidates to gain a more practical understanding of the criminal justice system.

School Law

Discipline Legal Studies

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically review current approaches to crime and criminal justice;
2. Evaluate the dynamic nature of criminal justice and the social, political and legal factors which contribute to this dynamism;
3. Critically analyse the impact of the criminal justice system on different social groups;
4. Demonstrate advanced oral communication and collaboration skills.

Subject Content

The following topics comprise the list from which each semester's content will be based. However depending on guest speakers and student interest not every topic is necessarily covered.

- themes in criminal justice
- criminal legal theory
- Crime and indigenous Australians
- Crime and statistics
- The jury
- Victims of Crime
- Sentencing
- Prisons and penalty
- Restorative justice
- Victim-offender conferencing
- Terrorism
- history of criminal Law and procedure
- international Crime and tribunals
- Psychology and Crime
- public order
- police practices

Teaching Periods

LANG 0001 Academic Communication 1 (WSTC Prep)

Credit Points 10

Legacy Code 700198

Coordinator Richard Robinson ([https://directory.westernsydney.edu.au/search/name/Richard Robinson/](https://directory.westernsydney.edu.au/search/name/Richard%20Robinson/))

Description This unit is designed to introduce students to academic culture as a culture of critical debate and equip students with the academic literacy skills necessary to perform successfully in this culture. In particular, the unit aims to help students access the conventions of academic English by focussing on attitudes to knowledge, and the ways in which ideas are structured and presented in academic texts and speech. The unit assists students to comprehend academic texts, identify key ideas and concepts, and identify and use the rhetorical moves used in academic texts. It also aims to help students compare and contrast ideas across texts, improve grammatical skills that relate to academic writing, summarise and synthesise information, and understand why, when and how to reference information.

Learning Outcomes

1. Define academic culture and explain the use of evidence to support an argument.
2. Employ effective listening strategies to identify main ideas and supporting evidence.
3. Utilise appropriate reading strategies to comprehend academic texts.
4. Produce writing that successfully summarises and paraphrases the work of others.
5. Demonstrate a command of academic English, including grammar, phrasing, effective sentence structure, spelling and punctuation in a variety of written contexts.
6. Apply the conventions of academic presentations in written and oral formats.
7. Critically reflect on their own learning.

Subject Content

1. Academic culture as a culture of argument
2. Active listening and note-taking skills
3. Reading in an academic culture: the development of ideas
4. Reading in an academic culture: the relative importance of ideas
5. Reading in an academic culture: identifying arguments
6. Writing in an academic culture: academic language skills and grammar
7. Writing in an academic culture: paraphrasing/summarising and synthesising skills

8. Writing in an academic culture: comparing and contrasting ideas across multiple texts
9. Writing in an academic culture: research and referencing
10. Speaking in an academic culture: the structure of presenting ideas
11. Speaking in an academic culture: tutorial/presentation skills

Assessment

Coordinator Eloise Tognetti ([https://directory.westernsydney.edu.au/search/name/Eloise Tognetti/](https://directory.westernsydney.edu.au/search/name/Eloise%20Tognetti/))

Description This unit introduces students to the essential academic skills required for success in tertiary studies. It employs an explicit pedagogy approach to teach students how to become independent, active, and reflective learners. The unit also includes essential research and writing skills specific to the arts.

Coordinator Maria Charalambous ([https://directory.westernsydney.edu.au/search/name/Maria Charalambous/](https://directory.westernsydney.edu.au/search/name/Maria%20Charalambous/))

Description The ability to communicate clearly and persuasively to diverse audiences is a key professional prerequisite. This unit provides students with a preliminary understanding of a range of communication theories and practices necessary for academic work and effective professional communication including presenting in a professional setting. Both professional and societal cultural norms are explored as a contextual basis of the unit. The unit assists in the acquisition of professional skills through authentic and meaningful learning experiences and assessment. The unit assists students to comprehend academic and professional texts, identify key ideas and evidence, and identify and apply certain rhetorical moves which are common in academic communication. It also aims to help students to improve grammatical skills that relate to academic writing, summarise and synthesise information, and understand why, when and how to cite information. In addition, the unit encourages students to develop strategies to maximize their learning and to reflect on their own learning styles.

School Western Sydney The College

Discipline English Language

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 0 Preparatory subject

Restrictions Students must be enrolled in 7138 Diploma in Information and Communications Technology - ICT or 7139 Diploma in Information and Communications Technology or 7140 Diploma in Information and Communications Technology - Information Systems or 7141 Diploma in Information and Communications Technology (Health Information Management) Extended.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Outline a range of factors which affect oral and written communication within professional contexts.
2. Demonstrate an understanding of communication across cultures.
3. Demonstrate an understanding of multiple perspectives on issues relating to digital communication
4. Develop skills to write effectively using a variety of formats, including research and referencing.
5. Collaborate in large and small group environments.
6. Identify evidence to reinforce a position.
7. Understand academic and professional communication skills.
8. Demonstrate analytical thinking skills to develop innovative and well-founded perspectives related to course content.
9. Demonstrate an understanding of multiple perspectives on issues relating to digital communication
10. Outline a range of factors which affect professional oral and written communication within an ICT context.
11. Identify evidence to support a position by selecting valid information strategically.
12. Demonstrate an understanding of academic and professional communication skills.
13. Demonstrate analytical thinking skills to develop innovative and well-founded perspectives related to ICT innovations

Subject Content

1. What Professional Communication is and how it positively impacts the work environment
2. Critical thinking for academic and professional work
3. Introduction to a variety of professional writing skills
4. Group work in a professional setting
5. Public speaking and professional presentation of ideas
6. Cultural Communication in a professional context
7. Academic writing and referencing
1. What Professional Communication is and how it positively impacts the work environment
2. Critical thinking for academic and professional work
3. Introduction to a variety of professional writing skills
4. Public speaking and professional presentation of ideas
5. Cultural Communication in a professional context
6. Academic reading, writing and referencing skills

Coordinator Jackson Howard (<https://directory.westernsydney.edu.au/search/name/Jackson Howard/>)

Description This unit is designed to meet the academic literacy needs of International students completing the Extended Diplomas in Arts, Building Design Management, Business, Communication, Construction Management, Criminal and Community Justice, Design, Engineering, Health Science, ICT, Science, Social Science and Policing. It is designed specifically for International students who have met the IELTS specifications of these courses. The unit will support these students in understanding how to perform successfully within it in terms of academic literacy skills. Specifically, this unit will focus on improving students' listening and reading comprehension skills, writing skills, speaking, vocabulary and grammar. It consists of 2 hours per week of face-to-face instruction in order to provide students with targeted, structured support.

School Western Sydney The College

Coordinator Richard Robinson ([https://directory.westernsydney.edu.au/search/name/Richard Robinson/](https://directory.westernsydney.edu.au/search/name/Richard%20Robinson/))

Description This unit is designed to introduce International students to academic culture as a culture of critical debate and equip them with the academic literacy skills necessary to perform successfully in this culture. In particular, the unit aims to help International students access the conventions of academic English by focussing on attitudes to knowledge, and the ways in which ideas are structured and presented in academic texts and speech. The unit assists students to comprehend academic texts, identify key ideas and concepts, and identify and use the rhetorical moves used in academic texts. It also aims to help students compare and contrast ideas across texts, improve grammatical skills that relate to academic writing, summarise and synthesise information, and understand why, when and how to reference information. In addition, there is a focus on listening and pronunciation skills for International students.

Learning Outcomes

1. Define academic culture and explain the use of evidence to support an argument.
2. Employ effective listening strategies to identify main ideas and supporting evidence.
3. Utilise appropriate reading strategies to comprehend academic texts.
4. Produce writing that successfully summarises and paraphrases the work of others.
5. Demonstrate a command of academic English, including grammar, phrasing, effective sentence structure, spelling and punctuation in a variety of written contexts.
6. Apply the conventions of academic presentations in written and oral formats.
7. Critically reflect on their own learning.

Subject Content

1. Academic culture as a culture of argument
2. Active listening and note-taking skills
3. Reading in an academic culture: the development of ideas
4. Reading in an academic culture: the relative importance of ideas
5. Reading in an academic culture: identifying arguments
6. Writing in an academic culture: academic language skills and grammar
7. Writing in an academic culture: paraphrasing/summarising and synthesising skills
8. Writing in an academic culture: comparing and contrasting ideas across multiple texts

Description In 2022 this subject replaced by LANG 0054 - Professional Communication Skills for Policing and Justice (WSTC Prep). This subject is designed to equip students with the communication skills necessary to succeed in an academic context. In particular, the subject focus' on academic arguments, reasoning and evidence; as well as on register and the ways in which ideas are structured and presented in academic texts and speech. The subject assists students to comprehend academic texts, identify key ideas and evidence, and identify and use certain rhetorical moves which are common in academic communication. It also aims to help students compare and contrast ideas across texts, improve grammatical skills that relate to academic writing, summarise and synthesise information, and understand why, when and how to cite information.

Restrictions Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand modes of academic argument including reasoning and the nature and role of evidence
2. Produce writing that effectively summarises and paraphrases the work of others
3. Employ effective listening strategies to identify main ideas and supporting evidence
4. Communicate information in the appropriate spoken mode according to purpose and audience
5. Demonstrate a command of academic English, including grammar, phrasing, sentence structure, spelling and punctuation in a variety of written and spoken contexts
6. Use appropriate reading strategies to comprehend academic texts
7. Source and cite evidence using the conventions of academic research
8. Produce well structured, logical, coherent and cohesive responses to writing tasks

Subject Content

1. Understanding academic culture as a culture of argument, reasoning and evidence
 2. Listening in an academic context: active listening and note-taking skills
 3. Reading in an academic context: the development of ideas
 4. Reading in an academic context: the relative importance of ideas
 5. Reading in an academic context: identifying arguments
 6. Writing in an academic context: academic language skills and grammar
 7. Writing in an academic context: paraphrasing/summarising and synthesising skills
 8. Writing in an academic context: comparing and contrasting ideas across multiple texts
 9. Writing in an academic context: research and referencing
 10. Speaking in an academic context: the structure of presenting ideas
 11. Speaking in an academic context: tutorial/presentation skills
1. Understanding academic culture as a culture of argument, reasoning and evidence
 2. Listening in an academic context: active listening and note-taking skills
 3. Reading in an academic context: the development of ideas

Description This unit is designed to introduce students to academic culture as a culture of critical debate and equip students with the academic literacy skills necessary to perform successfully in this culture. In particular, the unit aims to help students access the conventions of academic English by focussing on attitudes to knowledge, and the ways in which ideas are structured and presented in academic texts and speech. The unit assists students to comprehend academic texts, identify key ideas and concepts, and identify and use the rhetorical moves used in academic texts. It also aims to help students compare and contrast ideas across texts, improve grammatical skills that relate to academic writing, summarise and synthesise information, and understand why, when and how to reference information.

LANG 0019 Communication Skills for Construction Management (WSTC Prep)
LANG 0012 Academic and Professional Communication (WSTC Prep)

Restrictions Students must be enrolled at Western Sydney University, The College in 7162 Diploma in Engineering Extended.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret, analyse and describe data from graphs, charts and tables and identify and describe trends and differences.

- Demonstrate an understanding of engineering technical terms, abbreviations and acronyms.
- Identify and summarise main ideas and key information from written engineering texts.
- Plan and develop written and oral responses to authentic engineering tasks.
- Recognise language used to signpost main ideas and key information in lectures and record ideas and information using diagrams.
- Deliver a presentation and participate in a seminar using prepared notes.

Subject Content

- Reading authentic and/or related Engineering texts, and understanding main ideas and key information
- Identifying and understanding technical terms and acronyms
- Time management and prioritising in preparation for assessments
- Listening to authentic and/or related engineering lectures
- The importance of referencing and citation in Engineering texts
- Actively engaging in oral discussions and presentations on the relative importance of key ideas identified in Engineering and/or related texts and lectures
- Interpreting data in graphs and charts within the Engineering context
- Contributing to and participating in a seminar
- Reading authentic and/or related Engineering texts, and understanding main ideas and key information
- Identifying and understanding technical terms and acronyms
- Time management and prioritising in preparation for assessments
- Listening to authentic and/or related engineering lectures
- The importance of referencing and citation in Engineering texts
- Actively engaging in oral discussions and presentations on the relative importance of key ideas identified in Engineering and/or related texts and lectures
- Interpreting data in graphs and charts within the Engineering context
- Contributing to and participating in a seminar

Assessment

Coordinator Richard Robinson ([https://directory.westernsydney.edu.au/search/name/Richard Robinson/](https://directory.westernsydney.edu.au/search/name/Richard%20Robinson/))

Description This online unit helps to prepare students who are considering university studies. It develops English skills across the 4 areas of listening, speaking, reading and writing. The unit introduces students to academic English which is needed for success at university. Students will come to understand and practise the different oral and written structures used in tertiary study as well as develop good grammatical knowledge. The unit encourages independent study but provides necessary support throughout.

Coordinator Maria Charalambous ([https://directory.westernsydney.edu.au/search/name/Maria Charalambous/](https://directory.westernsydney.edu.au/search/name/Maria%20Charalambous/))

Description This unit is designed to improve the English proficiency across the four macro skills (reading, writing, speaking and listening) of University Foundation Studies students who wish to progress to university studies. Students need preparation for both understanding the content of Foundation Studies and being able to participate fully in all units. Such preparation includes making clear the way English is used according to purpose, audience and unit. Moreover, students need to develop their confidence and competence in using the language in academic contexts. By raising the language awareness of students, they will be able to transfer the learning skills across the unit areas. The course also seeks to address the particular speaking needs of overseas students.

School Western Sydney The College

Discipline English Language

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 0 Preparatory subject

Restrictions Only students enrolled at The College in Foundation Studies programs can enrol in this unit

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Communicate information in appropriate written mode according to purpose, audience and unit.
2. Understand and make meaning from a variety of written academic text types.
3. Communicate information in appropriate spoken mode according to purpose, audience and unit.
4. Research, interpret, organise and analyse information.
5. Understand and make meaning from a variety of spoken academic text types.
6. Work effectively in large and small group learning environments

Subject Content

1. Listening / note-taking skills
2. Oral presentation skills
3. Speaking skills
4. Academic reading skills
5. Report writing skills

6. Researching for information
7. Academic writing skills
8. Paraphrasing/summarising skills

Legacy Code 900126

Coordinator Gabriela Jakubowicz ([https://directory.westernsydney.edu.au/search/name/Gabriela Jakubowicz/](https://directory.westernsydney.edu.au/search/name/Gabriela%20Jakubowicz/))

Description This unit is designed to introduce students to academic culture as a culture of critical debate and equip students with the academic literacy skills necessary to perform successfully in this culture. In particular, the unit aims to help students access the conventions of academic English by focussing on attitudes to knowledge, and the ways in which ideas are structured and presented in academic texts and speech. The unit assists students to comprehend academic texts, identify key ideas and concepts, and identify and use the rhetorical moves used in academic texts. It also aims to help students compare and contrast ideas across texts, improve grammatical skills that relate to academic writing, summarise and synthesise information, and understand why, when and how to reference information.

School Western Sydney The College

Discipline English Language

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 0 Preparatory subject

Restrictions Students must be enrolled at The College in 9019 - University Foundation Studies Standard ? 2 Terms ? Health Science/ Nursing Stream

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define academic culture and explain the use of evidence to support an argument.
2. Employ effective listening strategies to identify and report main ideas and supporting evidence.
3. Utilise appropriate reading strategies to comprehend academic texts.
4. Produce writing that successfully summarises and paraphrases the work of others.
5. Demonstrate a command of academic English, including grammar, phrasing, effective sentence structure, spelling and punctuation in a variety of written contexts.
6. Apply the conventions of academic presentations in written and oral formats.
7. Critically reflect on their own learning.
8. Reflect on feedback to advance the development of literacy skills.

Subject Content

1. Academic culture as a culture of argument
2. Active listening and note-taking skills
3. Reading in an academic culture: the development of ideas
4. Reading in an academic culture: the relative importance of ideas
5. Reading in an academic culture: identifying arguments
6. Writing in an academic culture: academic language skills and grammar
7. Writing in an academic culture: paraphrasing/summarising and synthesising skills

8. Writing in an academic culture: comparing and contrasting ideas across multiple texts
9. Writing in an academic culture: research and referencing
10. Speaking in an academic culture: the structure of presenting ideas
11. Speaking in an academic culture: tutorial/presentation skills
1. Academic culture as a culture of argument

Credit Points 10

Legacy Code 900678

Coordinator Gabriela Jakubowicz ([https://directory.westernsydney.edu.au/search/name/Gabriela Jakubowicz/](https://directory.westernsydney.edu.au/search/name/Gabriela%20Jakubowicz/))

Description This unit is designed to improve the English language skills of Health Science and Nursing students through dynamic and engaging teaching methodology. The unit further develops foundational skills students possess and introduces critical analysis. The use of authentic genres and writing techniques common in Academic writing in the fields of Health Science and Nursing lead to the improvement of critical literacy skills related to spoken and written genres which are typical in the Health Science and Nursing professions.

Restrictions Students must be enrolled at The College in the programs 9018 University Foundation Studies Standard ? 2 Term, 9019 University Foundation Studies Standard ? 2 Term, 9020 University Foundation Studies Extended ? 3 Term.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an ability to critically read, summarise, analyse, synthesise and make meaning from academic and industry-related texts in Health Science and Nursing
2. Use sophisticated aspects of Academic Writing, including different genres of Academic English
3. Identify and critique a theoretical framework in Health Science and Nursing
4. Cite arguments and evidence using the conventions of academic research
5. Produce a well-structured, logical, coherent and cohesive response to writing tasks using appropriate academic language structures
6. Demonstrate an ability to communicate orally in formal context, including appropriate selection of material, clear organisation and effective presentation.
7. Work effectively in a small group learning environment

Subject Content

1. Academic and professional communication in the fields of Health Science and Nursing
2. Academic writing skills: developing and applying features of academic and professional language
3. Academic reading skills: identifying, highlighting and applying key ideas, arguments and evidence
4. Academic writing skills: utilising various research techniques
5. Academic Integrity: the importance and application of referencing, citation and paraphrasing
6. Academic writing skills: summarising, paraphrasing, synthesising
7. Academic writing skills: the report writing process including the achievement of coherence and cohesion
8. Critical thinking for academic and professional work within the Health Science and Nursing fields
9. Oral Presentation skills: language and presentation techniques for presentations

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Short Answer	300 words	20	N	Individual
Report	400 words	20	N	Individual
Report	1200 words	35	N	Both (Individual & Group)
Viva Voce	Scripted and voiced over power point 4-5 minutes plus 500 words script	25	N	Individual

Coordinator Gabriela Jakubowicz ([https://directory.westernsydney.edu.au/search/name/Gabriela Jakubowicz/](https://directory.westernsydney.edu.au/search/name/Gabriela%20Jakubowicz/))

Description The ability to communicate efficiently and effectively is crucial in all aspects of professional life. This unit is designed to improve the English proficiency of Policing and Criminal and Community Justice students to enable them to achieve academic

success. The unit assists students to comprehend professional texts, identify key ideas and evidence, and identify and apply certain rhetorical moves which are common in academic and professional communication in the fields of Policing and Justice. It also aims to help students to improve grammatical skills that relate to academic writing, summarise information, and understand why, when and how to cite information.

Description This is the second and last introductory unit in the Indonesian Language Specialisation. The unit further develops the basic language and communication skills students acquired in Indonesian 101 through the use of activities designed to practice and reinforce Indonesian language and grammar skills. This unit will also introduce a greater focus on the socio-cultural and linguistic diversity found in Indonesia through online powerpoint lectures and accompanying notes. The unit focuses on four language skills (listening, speaking, reading and writing). Students with a background of study in the language need to obtain advice on their appropriate level of language study. During the first two weeks of class, the lecturer will

monitor the performance of students and advise students who need to transfer to a higher class. Students should consult the Languages Academic Course Advisor or Unit Coordinator if they are unsure of their entry level.

Coordinator Margot Seligmann ([https://directory.westernsydney.edu.au/search/name/Margot Seligmann/](https://directory.westernsydney.edu.au/search/name/Margot%20Seligmann/))

Description This is a core unit for students in the Bachelor of Arts (Interpreting and Translation) course and an elective foundation unit for language key field of study in the BA. It introduces students to the theory and practice of Interpreting. Lectures are held in English for students of all the languages available. The tutorials are language specific in Arabic, Japanese, Mandarin or Spanish. This unit requires native or near-native proficiency in English and one of the languages offered in the unit.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects LGYB 2089 - Interpreting 1 LGYB 2090 - Interpreting 2 LGYB 2851 - Introduction to Interpreting

Assumed Knowledge

Proficiency in English and other language (LOTE) at native or near-native level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. apply the insights of linguistic theories that relate to the practice of interpreting;
2. resolve issues of accuracy and equivalence, including register equivalence and the difficulties and controversies surrounding it;
3. recognise cross-cultural differences that influence and are reflected in the use of language;
4. explain the different roles of the interpreter according to type of interpreting;
5. demonstrate proficiency in dialogue interpreting, chuchotage, consecutive interpreting and sight translation, at an introductory level in different settings;
6. demonstrate effective note-taking skills for dialogue and consecutive interpreting; and
7. identify significant aspects of the interpreting profession in Australia, NAATI qualifications, and ethics of the profession.

Subject Content

1. General overview of the theories of pragmatics and discourse analysis as they relate to interpreting,
2. The meaning of accuracy of interpretation and equivalence at the different levels of the language hierarchy and according to different types of interpreting,
3. The meaning of register, the importance of maintaining the source language register in interpretation and the implications of not maintaining it,
4. The different roles of the interpreter according to the type of interpreting,
5. Introduction to the techniques of dialogue interpreting, chuchotage, consecutive interpreting and sight translation,
6. Practice of the different interpreting techniques in education, housing and welfare settings,
7. Introduction to and practice of note taking skills for liaison and consecutive interpreting,

8. Familiarisation with available dictionaries, thesauruses, and other useful resources and guidance on how to use them effectively in the preparation of interpreting assignments.
9. The Interpreting profession in Australia and its codes of ethics.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Practical	5-10 minutes per student per task	40	N	Individual
Practical Exam	TBA	40	N	Individual
End-of-session Exam	1 hour in class	20	N	Individual

LANG 1014 Introduction to Linguistics

Credit Points 10

Legacy Code 101945

Coordinator Stacey Sherwood ([https://directory.westernsydney.edu.au/search/name/Stacey Sherwood/](https://directory.westernsydney.edu.au/search/name/Stacey%20Sherwood/))

Description Language is an integral component of human experience. This unit is designed to raise students' awareness of the nature, structures and functions of language and language use. Students will gain the conceptual tools to do basic analysis of language at the levels of phonology, morphology, syntax, semantics and pragmatics. By providing a basic understanding and appreciation of language from

different perspectives, the unit establishes points of contact between language, the humanities, and beyond.

School Humanities & Comm Arts

Discipline Linguistics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects LANG 2032 - Linguistics

Learning Outcomes

On successful completion of this subject, students should be able to:

- explain what language is and how it is used
- analyse grammatical aspects of language;
- demonstrate basic knowledge about language acquisition and processing;
- describe and explain how languages differ and change over time;
- apply fundamental concepts and appropriate theoretical knowledge to analyse data and the selected problem set.

Subject Content

- Introduction to language and linguistics: Rationale for studying linguistics; sub-disciplines of linguistics, other linguistics-related disciplines and their objectives;
- Grammatical aspects of language: phonetics, phonology, morphology, syntax, semantics and pragmatics: the meanings of language;
- language and mind: language acquisition and processing.
- language and society: language in use and language change.
- language change over time

Assessment

LANG 1015 Introduction to Literary Studies

Credit Points 10

Legacy Code 101907

Coordinator Helen Koukoutsis ([https://directory.westernsydney.edu.au/search/name/Helen Koukoutsis/](https://directory.westernsydney.edu.au/search/name/Helen%20Koukoutsis/))

Description This unit involves the close reading of literary texts to explore concepts about meaning-making including the use of language, narrative form, and issues of genre. The unit asks questions about the role and function of literature. For example: is literature's purpose to entertain readers, to provide them with emotional release, to represent the world, or to allow people to make meaning from their experience? The primary texts span three genres - fiction, poetry and drama. Students will learn about the different ways in which these literary forms are constructed and the contrasting ways in which they represent reality.

LANG 1017 Introduction to Translation

Credit Points 10

Legacy Code 100195

Coordinator Kenny Wang ([https://directory.westernsydney.edu.au/search/name/Kenny Wang/](https://directory.westernsydney.edu.au/search/name/Kenny%20Wang/))

Description This is a core unit for students in the Bachelor of Arts (Interpreting and Translation) course and an elective foundation unit for language key field of study in the BA. It introduces students to translation theory and practice. Lectures are held in English for students of all languages. The tutorials are language specific in Arabic, Japanese, Mandarin and Spanish. The unit is only available to students with a high level of proficiency (native or near-native level) in one of the languages offered. The languages offered, subject to demand, are: Arabic, Chinese, Japanese, and Spanish.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects LGYB 2096 - Translation 1 LGYB 2097 - Translation 2 LGYB 2850 - Introduction to Translation

Assumed Knowledge

Proficiency in English and other language (LOTE) at native or near-native level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate knowledge of the different theories of translation throughout history, including those advanced by theorists such as Catford, Nida, Newmark, Steiner and others;
2. show familiarity with the different translation approaches such as literal versus free, semantic versus communicative;
3. explain the intricacies of language and the difficulties of achieving cross linguistic equivalence, at the morphemic, lexical, syntactic and textual levels;
4. describe the cross-cultural differences as they influence language;
5. compare different notions of accuracy and equivalence from the syntactic, to the semantic, to the pragmatic dimensions;
6. demonstrate linguistic proficiency by translating a variety of text genres;
7. show familiarity with existing resources for translation including dictionaries, thesauruses, the Internet; and
8. demonstrate the Translation profession in Australia, NAATI qualifications, and ethics of the profession.

Subject Content

1. General overview of translation theories through the ages.
2. Different approaches to translation according to genre and purpose of translation.

3. The hierarchy of language from the lexical to the textual and discourse as well as some typological differences found across languages.
4. Describe the cross cultural differences that influence language use and language choice.
5. The meaning of accuracy and the difficulties of finding cross linguistic and cross cultural equivalence at the different levels of the language hierarchy.
6. The Translation profession in Australia and its codes of ethics.
7. Semantic versus pragmatic equivalence.
8. The application of theory to problem solving and decision making in the process of translation.

LANG 1020 Japanese 101

Credit Points 10

Legacy Code 100085

Coordinator Hiromi Muranaka ([https://directory.westernsydney.edu.au/search/name/Hiromi Muranaka/](https://directory.westernsydney.edu.au/search/name/Hiromi%20Muranaka/))

Description This unit is an introduction to the Japanese language and some related culture. It is intended for beginner students only, who have never studied Japanese. This unit will cover the most basic level of the Japanese language in all four skills: listening, speaking, reading, and writing. The Japanese characters covered in this unit include the

hiragana and katakana. Students with a background of study in the language need to obtain advice on their appropriate level of language study. During the first two weeks of class, the lecturer will monitor the performance of students and advise students who need to transfer to a higher class. Students should consult the Languages Academic Course Advisor or Unit Coordinator if they are unsure of their entry level.

School Humanities & Comm Arts

Discipline Eastern Asian Languages

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. identify important characteristics of the Japanese language;
2. demonstrate basic skills in listening and speaking in Japanese;
3. apply these skills to interact, at a very basic level;
4. recognize and write basic Japanese characters (Hiragana and some Katakana);
5. demonstrate awareness of basic cultural information necessary for speaking the language.

Subject Content

An introduction to important characteristics of the Japanese language; An introduction to some required elements of Japanese culture in relation to speaking the language;

Activities and tasks to develop fundamental grammatical forms at the beginner level;

Activities and tasks aimed at developing listening comprehension, speaking, reading and writing skills at beginner level;

An examination of the grammatical forms and vocabulary studied during the semester.

Inherent Requirements

There are inherent requirements for this subject that you must meet in order to successfully complete this subject. Make sure you read and understand the requirements for your subject online.

LANG 1028 The Sound of Language

Credit Points 10

Legacy Code 102042

Coordinator Stacey Sherwood ([https://directory.westernsydney.edu.au/search/name/Stacey Sherwood/](https://directory.westernsydney.edu.au/search/name/Stacey%20Sherwood/))

Description The richness of information conveyed through spoken language owes its form to the combination and recombination of a small number of sounds. In this unit, students will learn the sounds of the world's languages (phonetics) and the ways in which they are combined to build words (phonology). Examples will be drawn from English, Australian Aboriginal languages, and a diverse range of languages spoken around the world. The unit includes an overview of Australian English phonetics and phonology.

School Humanities & Comm Arts

Discipline Linguistics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Incompatible Subjects LANG 2045 - The Sound of Language

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use the International Phonetic Alphabet to represent language sounds
2. Analyse sound patterns in familiar and unfamiliar languages
3. Read and summarize primary literature in the field of phonology
4. Apply appropriate methods to conduct a small research project on phonological aspects of language.
5. Use the International Phonetic Alphabet to represent language sounds.
6. Analyse sound patterns in familiar and unfamiliar languages, especially in Australian English.
7. Read and summarize primary literature in the field of phonology.
8. Apply appropriate methods to conduct a small research project on phonological aspects of language.

Subject Content

- . The fundamentals of articulatory phonetics including how to produce and transcribe the sounds of the world's languages
 - . A broad sampling of sound patterns in the world's languages including examples from English and Aboriginal languages of Australia
 - . Theoretical framework and analytical tools for describing sound patterns in language
- The fundamentals of articulatory phonetics including how to produce and transcribe the sounds of the world's languages.

A broad sampling of sound patterns in the world's languages emphasising examples from Australian English and Australian Aboriginal and Torres Strait Islander languages. Theoretical framework and analytical tools for describing sound patterns in language.

LANG 1029 Foundations of Academic English

Credit Points 10

Legacy Code 102735

Coordinator Adrian Hale ([https://directory.westernsydney.edu.au/search/name/Adrian Hale/](https://directory.westernsydney.edu.au/search/name/Adrian%20Hale/))

Description Academic English is a particular kind of English that is used in academic writing and other professional contexts. This unit aims to improve students' written communication skills in academic English. The unit content includes English grammar as well as analytical reading and writing in academic English. Students will also learn to identify and to make cogent and sophisticated arguments using various written formats. Student work will be assessed in terms of theoretical and applied knowledge as well as in terms of writing skills.

School Humanities & Comm Arts

Discipline Studies in Human Society, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects HUMN 1002 - Analytical Reading and Writing
HUMN 1003 - Analytical Reading and Writing (WSTC)
LANG 1031 - Foundations of Academic English (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate university-level skills in reading, writing and analytical reasoning.
2. Identify and analyse arguments across different textual genres.
3. Construct formal and structured responses in academic English.
4. Develop practical and theoretical skills in formal grammar.
5. Construct logical arguments.
6. Engage with a range of Englishes, including Aboriginal and Torres Strait Islander varieties of English.
7. Integrate source material into student responses.

Subject Content

The history of the English language.

Vocabulary, lexicon and register in Academic English.

Performance of writing and reading across different academic texts.

Research, structure, argumentation and referencing in formal writing.

The sociolinguistics of grammar, accent and registers in different Englishes.

The semiotics of denotation and connotation in English words.

Formal and applied grammar.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	30 minutes per quiz	20	N	Individual
Quiz	2 hours per quiz	20	N	Individual
Essay	1,500 words in total	30	N	Individual

LANG 1030 Thinking Critically About Texts and Society

Credit Points 10

Legacy Code 102737

Coordinator Charles Barbour ([https://directory.westernsydney.edu.au/search/name/Charles Barbour/](https://directory.westernsydney.edu.au/search/name/Charles%20Barbour/))

Description In this unit students explore the application of texts - including works of literature, philosophy and sociology/cultural studies - to our understanding of contemporary debates and challenges in order to develop critical thinking skills. Developing skills in textual analysis, this unit addresses topical issues and social problems so as to consider enduring questions such as 'What is the human?', 'What is the good life?', 'What is meaning and how do we make it?', and 'What is inequality and what should we do about it?'

Level Undergraduate Level 1 subject

Equivalent Subjects LANG 1026 - Texts and Traditions LANG 1027 - Texts and Traditions (WSTC) LANG 1032 - Thinking Critically about Texts and Society (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Implement high level skills in textual analysis
2. Apply various disciplinary approaches to contemporary political, moral and social issues
3. Recognise and interpret theories of society and social relations
4. Identify and construct sound and cogent arguments
5. Express opinions clearly across different spoken and written genres

Subject Content

Through the analysis of a range of texts, this subject will address one or more of the following contemporary social issues

- Work
- Technology
- Consumption
- Environment

It will do so by considering a variety of critical frames, including a combination of the following

- Australia's first nations people's histories and experiences
- Gender
- Sexuality
- Race
- Class
- Power
- Species

Coordinator Sawsan Amara ([https://directory.westernsydney.edu.au/search/name/Sawsan Amara/](https://directory.westernsydney.edu.au/search/name/Sawsan%20Amara/))

Description This is an intermediate level unit in Arabic intended for two groups of students: (a) students of English speaking backgrounds or other language backgrounds who have achieved a degree of competence in the language at least at the HSC Level; and (b) Arabic language background students whose education has been in English as the medium of instruction in all subjects other than Arabic and who, therefore, have some gaps in their knowledge of Arabic, particularly in situations requiring a more formal language register. The unit is designed to consolidate and advance the acquisition of Modern Standard Arabic for post beginner learners of the language. While consolidating language skills, students will also develop further knowledge of the Arab culture. A range of DELL (Digitally Enhanced Language Learning) activities are utilised as part of the blended learning mode of delivery for this unit. NOTE: Students enrolling in this unit as part of a major or sub major in Arabic must enrol in Arabic 202

at the same time. Students with a background of study in the language may need to take higher level units. During the first two weeks of class, the lecturer will monitor the performance of students and advise students who need to transfer to a higher class. Students should consult the Languages Academic Course Advisor or Unit Coordinator if they are unsure of their appropriate level.

School Humanities & Comm Arts

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects LANG 2052 - Language and Communication Skills 2A Arabic

Assumed Knowledge

100042 - Arabic 102 or equivalent knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. use an intermediate level of Arabic language skills, including listening, speaking, reading and writing;
2. demonstrate knowledge of intermediate Arabic grammatical structures and vocabulary;
3. converse intelligibly in Arabic within a wide range of situations;
4. read and respond to a range of genres and text types;
5. demonstrate understanding of the Arab culture within the context of different Arabic-speaking countries. In particular students will be able to demonstrate a basic knowledge of the physical and human geography of Arabic-speaking countries and of their early political and social development.

Subject Content

- Activities and tasks aimed at developing listening comprehension, speaking, reading and writing skills at post beginner level;
 - Activities and tasks to develop grammatical forms at the post-beginner level;
 - An examination of a variety of oral and written genres and text types;
 - Listening and reading comprehension tasks for each of the different genres and text-types;
 - A study of the physical and human geography of Arab countries with a particular emphasis on the unique characteristics of each country;
- An examination of Arab culture within its political and - social contexts.

Assumed Knowledge

100042 Arabic 102 or equivalent knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate understanding of frequently used Arabic phrases;
2. use basic grammatical structures in the language;

3. read relatively long essays and stories on various topics;
4. use Arabic-English dictionaries efficiently;
5. write short essays on various topics;
6. demonstrate an understanding of modern culture and society in the Arabic speaking world.

Subject Content

- introduction of more complex grammatical Structures at A post-beginner level, such as ordinal numbers, agreement in number, gender and case, verbal nouns, idafa, plural demonstratives, and accusative case.
- Aural comprehension activities in Arabic (e.g. listening to speeches, conference papers, lectures, audio and video tapes, radio and television broadcasts).
- speaking Activities in Arabic in both spontaneous and prepared discussions and short talks.
- Reading of different genres of Arabic texts (e.g. magazine and newspaper articles, reports, essays and short stories).
- Writing in various text genres (e.g. essays, official letters, reports, short stories) and in different styles (e.g. formal and informal).

Description This is an intermediate unit in the Arabic major or sub-major. It provides an extension and consolidation of reading comprehension, and writing skills, as well as lexical enrichment in Modern Standard Arabic, particularly its range of written registers and their linguistic characteristics. The content for reading and writing activities will be selected from newspapers, magazines, short stories and other printed media. NOTE: Students enrolling in this unit as part of a major or sub-major in Arabic must enrol in Arabic 203 at the same time. Students with a background of study in the language may need to take higher level units. During the first two weeks of class, the lecturer will monitor the performance of students and advise students who need to transfer to a higher class. Students should consult the Languages Academic Course Advisor or Unit Coordinator if they are unsure of their appropriate level.

Coordinator Ruying Qi ([https://directory.westernsydney.edu.au/search/name/Ruying Qi/](https://directory.westernsydney.edu.au/search/name/Ruying%20Qi/))

Description This is a post-beginner unit for intermediate level study of modern Chinese (Mandarin) language and its culture, suitable for Post HSC entry or an equivalent level. This unit is designed for students who take it as part of the Chinese major/sub-major or as an elective unit. It will further develop the Pinyin system and the four core skills (listening, speaking, reading and writing), with a particular focus on core vocabulary and fundamental structures, using approximately 500 simplified Chinese characters. Aspects of culture and language acquisition strategies are explored through research projects. Differentiated learning and assessment tasks and multimedia activities are utilised to cater to non-background and quasi-background learners. The unit is not suitable for background speakers (i.e., who have completed formal secondary education where Mandarin Chinese is used as an official language and also the language of instruction at the School). Note: Students enrolling in this unit as part of a major or sub major in Chinese are encouraged to enrol in Chinese 202 at the same time.

School Humanities & Comm Arts

Level Undergraduate Level 2 subject

Equivalent Subjects LANG 2049 - Language and Communication Skills 2A Chinese

Assumed Knowledge

Successful completion of 20 credit points of Chinese Language at Level 1 or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate knowledge of 300 new Chinese characters and compounds;
2. demonstrate understanding of fundamental syntactic structures of the (Mandarin) Chinese language;
3. understand and use a core vocabulary and common expressions to carry out routine tasks, and engage in simple conversations;
4. read and write a range of text types including short messages, postcards, simple notes, and short descriptions;
5. identify key elements of the traditional and contemporary culture and values of the Chinese-speaking people;
6. apply this cultural knowledge to develop links with Chinese speakers and their cultural contexts;
7. apply independent learning strategies to acquire another language.

Subject Content

Activities and tasks aimed at developing listening comprehension, speaking, reading and writing skills at a post beginner level
Activities and tasks to develop grammatical forms at a post-beginner level
An examination of conversational, descriptive and comparative text types at a post-beginner level

Writing notes, letters and expressing opinions using the grammatical structures learned on various topics
An examination of cultural aspects in Chinese-speaking communities
The nature of language acquisition and types of learning strategies.

LANG 2013 Comedy and Tragedy

Credit Points 10

Legacy Code 100900

Coordinator Helen Basides ([https://directory.westernsydney.edu.au/search/name/Helen Basides/](https://directory.westernsydney.edu.au/search/name/Helen%20Basides/))

Description This unit will examine the theory, writing and performance of Western Tragedy and comedy. The generic terms "tragedy" and "comedy" will provide signposts for both historical and theoretically modern approaches to a range of plays. Texts selected from the period

since 1950 may represent comedy and/or tragedy in popular culture, and may have been written for media other than the stage, such as television and film.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects LGYB 4589 - Comedy and Tragedy

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the plays under analysis in an intellectual context established in lectures, seminars and through wider secondary reading.
2. Identify generic conventions of tragedy and of comedy that are employed or subverted in the texts set for study.
3. Explain the relationship of the plays (and other texts set for study) to contemporary and modern genre theory.
4. Conceptualise and generalise historically concerning tragedy and comedy in the periods examined.
5. Produce an individual, carefully considered written and oral discussions on issues relating to the generic/historical study of the set texts.

Subject Content

Debates about the nature, origins, and cultural locus of the genres of comedy and tragedy (Aristotle, Hobbes, Freud, Steiner, Frye, Barber, Bakhtin, Eagleton)

Debates about the "continuity" and/or demise of traditions of comedy and tragedy

Comedy and tragedy in the classical period (5th Century BCE-1st Century AD)

Shakespearean comedy and tragedy in Elizabethan England (Bradley, Frye, Barber, Reiss, Greenblatt, Bloom)

Debates about the "death" of tragedy (Steiner) and the rise of "liberal" tragedy (Williams) in the 19th century

Modern tragedy (Eagleton)

Contemporary television comedy.

Case studies: selected comedies and tragedies from the classical, Shakespearean and "modern" periods.

Legacy Code 100191

Coordinator Mustapha Taibi ([https://directory.westernsydney.edu.au/search/name/Mustapha Taibi/](https://directory.westernsydney.edu.au/search/name/Mustapha%20Taibi/))

Description Community Translation facilitates written communication between public services and community members with low literacy in the official or mainstream language(s) of a given country or region. The unit covers the translation of general awareness material (e.g. healthcare, civic responsibilities, social services, etc.) as well as the translation of official documents. Students develop skills in producing target texts in styles appropriate to specific communities and groups, and to the content and function of the source text. They also develop skills in researching and using appropriate specialist terminology, editing and revising, and producing camera-ready documents. On the basis of these skills, the unit further develops students' ability to reflect upon translation in terms of strategies and appropriateness in relation to the target audience as well as make critical written and oral assessment of relevant translations. Subject to demand, the unit will be available for Arabic, Japanese, Mandarin and Spanish.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions Students need to be bilingual (in the language combinations offered by the School).

Assumed Knowledge

Sufficient proficiency in English plus one other language at native or near-native level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appropriately translate general texts from English into their community language;
2. Demonstrate translation skills following NAATI guidelines (250 words of text in 60 minutes);
3. Analyse and reflect upon their own translations (in terms of translation strategies appropriate to their community) to develop resources for improvement;
4. Apply the insights of Translation Theory to translation critique as well as to their practice of translation; and
5. Demonstrate translation revision skills at a near-professional level of competence.

Subject Content

Development of general translation skills to and from English.

Development of ability to reflect upon students' own translations in terms of translation strategies, and making critical assessment of translations in general.

Translation of community information from English into the other language of texts relating to health, social security, and other government services as well as relevant private sector services.

Translation into English, including extract translation, of personal and official documents such as birth certificate, marriage certificate, driver's licence, and educational qualifications.

Translation into English of texts from community-language newspapers and magazines circulating in Australia.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

LANG 2015 Cultural History of Books and Reading

Credit Points 10

Legacy Code 101967

Coordinator Sara Knox ([https://directory.westernsydney.edu.au/search/name/Sara Knox/](https://directory.westernsydney.edu.au/search/name/Sara%20Knox/))

Description This unit examines the development of the book as a material and cultural object, and the evolution of cultures of reading from codex and clay tablet to digital book and e-Reader. Exploring the historical and technical change taking the book from singular object (painstakingly copied by hand and read by a learned elite) to 'book' as notional object (deliverable 'content', in a range of formats, to readers on demand), this unit focuses on moments of contestation and crisis in reading, writing and print culture: copyright and the role of authorship, censorship, the plundering of libraries, and that most radical proscriptio, book-burning.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a basic understanding of the development of the book as a cultural and material object.
2. Contribute to contemporary debates about the future of the book and of reading.
3. Apply the knowledge gained in the production of an audiobook extract of their own chosen text.
4. Critically evaluate issues of medium and form in relation to reader experience and engagement.

Subject Content

Topics may include:

- . History of the material text: clay tablets to codex
- . History of the material text: from the Gutenberg revolution to the industrialisation of the book
- . Non-textual uses of the book: bookiflage
- . Bibliophiles and collectors
- . Reading the reader: literary representations of reading
- . Reading communities: gender, genre and class
- . Copyright and the cult of the author
- . Censorship
- . The evolution of the library
- . Book-burning and the destruction of libraries
- . Contemporary reading cultures and practices: the reading group
- . The reader as listener: the rise of audiobooks
- . The E-Reader: Person? Or gadget?

Description This is a Level 2 unit in the Indonesian Specialisation. It introduces students to formal and informal registers of Indonesian and exposes them to relatively complex aspects of Indonesian grammar such as affixes. Students will study the use of spoken language mainly through participation in dialogues and discussion. More formal registers will be studied through reading and writing. Communicative settings will include fields such as health, education, and tourism.

School Humanities & Comm Arts

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Assumed Knowledge

102326 Indonesian 102 or introductory level knowledge of basic language skills and general knowledge about ethnic, cultural and linguistic diversity of Indonesia.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use key Indonesian grammatical constructions;
2. Differentiate between formal and informal registers of Indonesian;
3. Demonstrate listening and reading comprehension skills;
4. Communicate orally and in writing using various Indonesian constructions;
5. Demonstrate awareness of some aspects of Indonesian culture and cultural appropriateness;
6. Use the online learning environment for further language study.

Subject Content

- post-beginner Indonesian Grammar and vocabulary
- Affixes in Indonesian
- common expressions in everyday situations
- formal and informal Indonesian registers
- formal and informal communication in different settings (healthcare, education, travel, etc.)

LANG 2023 Interpreting Skills

Credit Points 10

Legacy Code 100193

Coordinator Chong Han ([https://directory.westernsydney.edu.au/search/name/Chong Han/](https://directory.westernsydney.edu.au/search/name/Chong%20Han/))

Description This is a core component of the Bachelor of Arts (Interpreting and Translation) and a pool unit in some postgraduate courses. The unit is aimed at developing essential skills in interpreting and deals with the specialised technical skills necessary for the different modes of interpreting: dialogue, consecutive, simultaneous, and sight translation. Given the large amount of independent practice needed to develop competence in interpreting, it pays special attention to the teaching of techniques for autonomous learning. Lectures are held in English for students of all the languages available. The tutorials are language specific in Arabic, Japanese, Mandarin or Spanish.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions Students need to be bilingual (in the language combinations offered by the School).

Assumed Knowledge

Proficiency in English and their other language (LOTE) at native or near-native level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. distinguish between spoken and written language in terms of content, structure, speed, text type, number of interlocutors, accent, etc;
2. apply knowledge about different speech styles, registers, social dialects and develop skills necessary to accurately render different discourses in the target language;
3. demonstrate an understanding of context-specific interpreting techniques used in dialogue, consecutive, simultaneous interpreting and sight translation;
4. improve listening skills in a variety of contexts such as business, immigration, tourism and motor transport, and develop techniques for autonomous learning of these skills;

5. use the memory skills required for dialogue interpreting and consecutive interpreting;
6. master the note taking skills necessary to accurately interpret in the long consecutive interpreting mode, and develop techniques for autonomous learning of these skills;
7. develop effective public speaking skills, including techniques for autonomous learning of these skills.

Subject Content

- Variables of spoken language; content, speed, text type, number of interlocutors, accent, speaker's gender; techniques for improving listening comprehension;
- Different speech styles, registers and social dialects and interpreting exercises to develop the skill to accurately render such variables in the Target Language;
- Characteristics of dialogue, consecutive, simultaneous interpreting and sight translation; participants and their roles; typical contexts and content and role implications for each mode; differing cognitive demands of each mode.
- Memory and interpreting: exercises and techniques for developing short-term memory.
- Standard systems for note taking; individual adaptation; techniques for note taking practice.
- Public speaking skills; voice work, audience contact, discourse organisation; techniques for autonomous development of public speaking skills.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Portfolio	Continuous assessment	30	N	Individual
Tutorial tasks	Continuous assessment of interpreting skills development in class through practical tutorial exercises.	40	N	Individual
End-of-session exam	30 minutes per student	30	N	Individual

Credit Points 10

Legacy Code 102028

Coordinator Xiangdong Liu ([https://directory.westernsydney.edu.au/search/name/Xiangdong Liu/](https://directory.westernsydney.edu.au/search/name/Xiangdong%20Liu/))

Description This unit is designed as a post-beginner level language and culture unit intended for students who have studied this language to at least HSC level or equivalent. This unit focuses on the development of the grammatical structures and vocabulary in such areas as using polite and plain style of the language, verb conjugation for expressing conjecture, adverbial clauses indicating specific times and places, conditional, etc. The knowledge of kanji is increased to 260 characters. The unit is not suitable for background speakers (i.e., who have completed formal secondary education where Japanese is used as an official language and also the language of instruction at the School). Note: Students enrolling in this unit as part of a major or sub major in Japanese are encouraged to enrol in Japanese 202 at the same time.

School Humanities & Comm Arts

Discipline Eastern Asian Languages

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects LANG 2028 - Language Communication Skills 2A Japanese

Assumed Knowledge

Japanese 102 or knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate understanding of key morphological and syntactic structures of the Japanese language
2. use a broad lexical base and common expressions in a range of socio-cultural contexts and situations involving other learners and native speakers
3. read a range of basic text types and respond appropriately either orally or in writing (approximately 260 kanji characters)
4. write and express ideas in a range of text types including descriptions, narratives, journal entries, using the Japanese they are acquiring
5. aurally comprehend Japanese in a variety of informal and formal contexts and respond appropriately, orally or in writing
6. apply cultural knowledge to develop links with Japanese speakers and their cultural contexts
7. apply independent learning strategies for acquiring another language

Subject Content

. Activities and tasks aimed at developing listening comprehension, speaking, reading and writing skills at Post beginner level

. Activities and tasks to develop grammatical forms at the post beginner level

. An examination of a variety of oral and written genres and text types

. Listening and reading comprehension tasks for each of the different genres and text types

. Grammatical structures and their functions in the following areas: -

Plain form of the language; - Noun modification; - Adverbial clauses

indicating time and place; - Benefactives; - Conditional; - Expressions of

potential and ability; - Describing the present state by using transitive and intransitive verbs.

Inherent Requirements

There are inherent requirements for this subject that you must meet in order to successfully complete this subject. Make sure you read and understand the requirements for your subject online.

LANG 2025 Japanese 202 Speaking and Listening

Credit Points 10

Legacy Code 102029

Coordinator Hiromi Muranaka ([https://directory.westernsydney.edu.au/search/name/Hiromi Muranaka/](https://directory.westernsydney.edu.au/search/name/Hiromi%20Muranaka/))

Description This unit is normally undertaken concurrently with, or after, Japanese 201. It is designed to develop and expand speaking and listening skills based on the grammatical knowledge developed in Japanese 201. The range of communicative transactions is increased so that more sophisticated exchanges are possible, for instance when using polite and plain (i.e. casual) styles of speech, describing one's conjecture, stating an opinion, asking for explanation, etc. Cultural and social understanding of Japanese society is also fostered. The unit is not suitable for background speakers (i.e., who have completed formal secondary education where Japanese is used as an official language and also the language of instruction at the School). Note: Students enrolling in this unit as part of a major or sub major in Japanese are encouraged enrol in Japanese 201 at the same time.

School Humanities & Comm Arts

Discipline Eastern Asian Languages

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects LANG 2028 - Language Communication Skills 2A Japanese

Assumed Knowledge

Japanese 102 or equivalent knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Apply basic strategies in spoken communication in such areas as using formal and casual styles of speech, describing one's conjecture, stating an opinion, confirming the listener's agreement, indicating specific times and spaces, and explaining or asking for an explanation;
- Apply basic grammatical structures and vocabulary to carry out the exchanges stated above.
- Present a speech in Japanese on various topics related to Japan, including its culture and society, students' experience and others.
- Discuss various topics in a group;
- Identify important characteristics of Japanese culture and contemporary Japanese society.

Subject Content

Talking about a range of topics relating to holidays, travelling, sports, food, parties, etc.

Investigating and presenting about Japanese culture.

Making a speech using the plain form (casual speech).

Listening practice of short passages and conversations on various topics.

Presentation and discussion of various topics about Japan.

Asking for and giving directions in Japanese.

LANG 2033 Literature and Decolonisation

Credit Points 10

Legacy Code 102572

Coordinator Ben Etherington ([https://directory.westernsydney.edu.au/search/name/Ben Etherington/](https://directory.westernsydney.edu.au/search/name/Ben%20Etherington/))

Description Do you know why nearly a hundred new nations were founded between 1945 and 1970? Have you ever wondered who Mahatma Gandhi or Ho Chi Minh were? Why would you challenge authority 'non-violently'? How do you write creatively in a language that has been imposed through colonial conquest? These are all questions connected to decolonisation: the explosive process by which the great modern European empires were dissolved and scores of new nations were formed - from Indonesia to Algeria, India to Nigeria, Jamaica to Vietnam. With this process came a surge of creative energy, as formerly colonised peoples set out to produce new ways of writing and thinking. We will read classic anti-colonial politicians like Gandhi and Frantz Fanon and writers from different decolonising regions including India, Africa, South-East Asia, the Caribbean, the Middle East and Australia.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects LANG 3064 - Literatures of Decolonisation

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. critically read and discuss a range of key works of anti-colonial literature including political and literary texts
2. compare literary writing from different regions and consider broader trends and divergences
3. critically read and contrast different kinds of literary writing
4. understand theoretical and historical problems peculiar to the field of postcolonial and world literatures
5. deploy critical approaches best suited to addressing those problems
6. articulate sustained critical argument, whether in essays or tutorial discussions, between literature, history and politics
7. discuss literatures from a range of cultures and language varieties.

Subject Content

The subject is divided into three modules. Each will focus on a region or thematic concern from the period of decolonisation. In each case, political texts will be read alongside literary works. Subjects, themes and questions considered will include:

- The emergence of new literary communities in decolonisation
- The emergence of new literary materials in decolonisation
- Conceptualising decolonisation and postcolonialism
- nation, nationalism and The people
- literature, utopia and revolution
- Anti-colonial polemic
- Gandhi and the 'Gandhism'
- Negritude and pan-Africanism
- language and violence
- new vernacular and creole languages
- white settler literatures and decolonisation
- rhetorical comparison of political and literary texts

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

LANG 2034 Meaning in Language

Credit Points 10

Legacy Code 102489

Coordinator Kenny Wang (<https://directory.westernsydney.edu.au/search/name/Kenny Wang/>)

Description This unit introduces students to how meaning is constructed in language. It gives an overview of context-free meaning (semantics) and context-dependent meaning (pragmatics). Students will learn how we can encode and access meaning in communication and how this can be studied scientifically. This unit builds on and expands knowledge and methods developed in other linguistics units, especially Structure of Language and Pragmatics. It further connects to more advanced units, in particular Historical Linguistics, Second Language Acquisition, Bilingualism, Sociolinguistics and Discourse Analysis.

School Humanities & Comm Arts

Discipline Linguistics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) LANG 1014

Equivalent Subjects LANG 2038 - Pragmatics

Assumed Knowledge

Knowledge of introductory linguistic terminology, specifically in morphology and syntax.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate knowledge of the key concepts of semantics and pragmatics and explain this knowledge to others;
2. analyse, discuss and reflect on significant knowledge in semantics and pragmatics;
3. apply theoretical knowledge to the analysis of data;
4. explain the principles and relevance of research in semantics and pragmatics; and
5. apply the acquired knowledge and skills in professional practice (translation, interpreting, education, business, etc.)

Subject Content

Concepts of meaning
 Lexical semantics
 Formal semantics
 Pragmatics

LANG 2035 Methods of Reading

Credit Points 10

Legacy Code 101909

Coordinator Lorraine Sim (<https://directory.westernsydney.edu.au/search/name/Lorraine Sim/>)

Description This unit aims to build the skills of reading, interpretation and theoretical and contextual analysis that are critical to the study of literary texts, skills that define scholarship in the discipline of English. Focusing on a sustained and careful study of a small number of literary texts the unit provides an in-depth exploration of technical approaches to close reading, cultural and historical contexts for the production and reception of the texts, and different theoretical approaches to their interpretation. The selected primary texts (one novel, one play and a selection of poems) will span two or three literary/historical periods.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify different modes of literary/theoretical interpretation
2. Apply different modes of literary/theoretical interpretation to a work of literature
3. Articulate the formal attributes of literary texts
4. Demonstrate competence in the methods and practices of reading that are key to the discipline.

Subject Content

The primary texts for this subject may change from one year of offer to the next, so the subject content as set out below attempts to capture the structure and coverage necessary to provision of the outcomes.

. Why so many ways to read? The values, benefits, and pleasures of different approaches to interpretation.

. Why does genre matter? Consideration of how the formal attributes of texts shape interpretation.

. Reception studies: the work and its readers across time

Alignment of a small number of primary texts in relation to key

theoretical concepts, such as:

- . The author,
- . The uncanny,
- . Text and world,
- . Narrative,
- . Ghosts,
- . Sexual difference,
- . Desire,
- . Racial difference,
- . Pleasure,
- . History.

LANG 2036 Modern Australian Poetry and Poetics

Credit Points 10

Legacy Code 101978

Coordinator Kate Fagan ([https://directory.westernsydney.edu.au/search/name/Kate Fagan/](https://directory.westernsydney.edu.au/search/name/Kate%20Fagan/))

Description This unit examines Australian poetries of the 20th and 21st centuries in context of parallel events in international poetry. It looks at histories and definitions of poetic 'innovation' and asks how Australian poetry has dealt with different waves of modernism. It studies dialogues between local and international avant-gardes, and surveys new poetic genres emerging in online environments. The unit aims to enrich students' critical understanding of poetry and poetics, and where relevant, to enhance their own creative writing practice. Topics addressed include poetic tradition and counter-tradition; form and experiment; colonialism, exile and belonging; literary communities; critical histories; digital and e-poetries.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects LGYB 0215 - Poetry and Poetics LGYA 0927 - Poetry and Poetics

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of modern and contemporary Australian poetries and poetics
2. Analyse links between Australian poetries and those of other countries
3. Critically engage with a range of poems and poetic texts
4. Apply key theoretical perspectives relevant to modern and contemporary poetry and poetics

Subject Content

Content will draw from, or elaborate upon, a number of the following topics:

- Histories of innovation in Australian poetry of the 20th and 21st centuries

- Ecology, colonialism, place and 'landscape' in Australian poetry, including the poetics of Indigenous resistance
- Imagism in Anglo-American modernist poetries and its expression in Australian poetries
- International avant-gardes of the 20th century including French symbolism, futurism, objectivism, Latin American surrealisms, the New York School and Language Poetry
- Australian avant-garde movements and retreats including The Jindyworobak movement, Angry Penguins and The Ern Malley hoax
- Histories of poetry criticism and the transformation of the modernist critical 'enterprise'
- Literary and cultural histories of the 20th century
- The politics of poetic form
- New romanticism, postmodernism and the Generation of '68
- Urban Australian identities, migrant poetics and Collective publishing ventures
- Australian poetries in the early 21st century including digital poetics, online sampling, poetry blogs, e-poetries and poetry apps

Assessment

Teaching Periods

LANG 2037 Pragmatics

Credit Points 10

Legacy Code 102490

Coordinator Chong Han ([https://directory.westernsydney.edu.au/search/name/Chong Han/](https://directory.westernsydney.edu.au/search/name/Chong%20Han/))

Description This is an optional unit of the Linguistics Major which introduces students to pragmatics, the study of language use in context. It combines theoretical elements with practical applications through examples, exercises and authentic data analysis, which enable students to understand the significance of this field of linguistics to language professions, such as interpreting and translation and language teaching.

School Humanities & Comm Arts

Discipline Language And Literature

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) LANG 1014

Equivalent Subjects LGYA 1435 - English Semantics and Pragmatics

Incompatible Subjects LANG 2038 - Pragmatics

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate general knowledge of different theories of pragmatics.
2. apply data collection skills to conduct research in pragmatics
3. apply the acquired knowledge and skills to analyse spoken and written data from the perspective of pragmatics
4. demonstrate awareness of the connection between pragmatic sensitivity and linguistic choices in intracultural and intercultural communication
5. apply the acquired knowledge and skills in professional practice (translation, interpreting, education, business, etc.)

Subject Content

- The theoretical foundations for the study of pragmatics, including speech act theory, relevance theory, metapragmatic awareness, Grice's theory of conversational implicature and cooperative principles.
- data collection and analysis skills necessary for research in pragmatics, e.g. using corpus data, collecting observational data, using TV data and internet resources, etc.
- pragmatics in specific discourse domains.
- pragmatic issues in communication across time: The change of language and meaning over time.

Teaching Periods

LANG 2039 Sexual/Textual Politics in Victorian Women's Writing

Credit Points 10

Legacy Code 101964

Coordinator Anne Jamison ([https://directory.westernsydney.edu.au/search/name/Anne Jamison/](https://directory.westernsydney.edu.au/search/name/Anne%20Jamison/))

Description This unit will set Victorian women's writing in its historical, intellectual, publishing and cultural contexts, with particular emphasis on the multiple genres of writing within which women engaged in the nineteenth century. Using a broad range of short fiction, this unit will investigate topics such as gender and sexuality, colonialism and empire, and race and identity. It will also explore texts from across Australia, Britain, North America and Ireland and ask students to consider how these texts are still relevant to contemporary society and intellectual thinking.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the intellectual and historical contexts that inform a range of nineteenth-century women's texts.
2. Analyse a range of nineteenth-century women's texts and make connections between them.

- Summarise and evaluate literary-critical arguments.
- Work effectively with other students on team tasks.
- Give effective oral presentations supported by digital-visual presentation tools.
- Work independently to organise, plan and deliver a critically-informed research essay.

Subject Content

British, Irish, North American and Australian nineteenth-century women's short fiction published during the nineteenth century. The intellectual, cultural, critical and publishing contexts of nineteenth-century women's short fiction

The intersections of gender, race and sexuality in women's nineteenth-century short fiction.

The uncertainties of home, colonialism and empire in women's short fiction in the nineteenth century

Representations of the changing social role of women in the nineteenth century.

The relevance of women's nineteenth-century writing to contemporary society and intellectual thinking, as well as an examination of literature as a socialising force.

The multiple genres of women's short fiction in the nineteenth-century, e.g. sensation fiction, the gothic, didactic fiction

Women's subversive engagement with key public debates of the period via the short story format

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Short Answer: Close reading	750 words	30	N	Individual
Group Presentation	10 - 12 minutes	25	N	Group
Research essay	2,000 words	45	N	Individual

Prescribed Texts

- The subject's prescribed primary texts vary from year to year subject to availability and the expertise of the teaching team, but they are consistently drawn from British, Irish, Australian and North American women's short fiction published during the nineteenth century. The current selection for the subject comprises:
- Maria Edgeworth, "The Limerick Gloves" (1804) Mary Shelley's "The Mortal Immortal" (1833) Elizabeth Gaskell's "The Grey Woman" (1863) Tasma's "Monsieur Caloche" (1878) Charlotte Perkins Gilman's "The Yellow Wallpaper" (1892)
- All prescribed readings for the subject are made available to students through the Subject Reader.

Teaching Periods

LANG 2040 Spanish 201

Credit Points 10

Legacy Code 102032

Coordinator Maria Isabel Pena ([https://directory.westernsydney.edu.au/search/name/Maria Isabel Pena/](https://directory.westernsydney.edu.au/search/name/Maria%20Isabel%20Pena/))

Description This is post-beginner unit suitable for Post Beginners HSC entry or equivalent, within the Spanish programme, designed for students who take it as a major, sub-major or elective. Within the Spanish major or sub major set, it is normally taken concurrently with Spanish 202. The unit will further develop all language skills, listening, speaking, reading and writing with particular focus on a core vocabulary and fundamental structures. Cultural and social understanding is also fostered through research projects on specific cultural or social aspects that are of interest to students. A range of DELL (Digitally Enhanced Language Learning) activities are utilised for this unit. NOTE: Students enrolling in this unit as part of a major or sub major in Spanish must enrol in Spanish 202 at the same time.

School Humanities & Comm Arts

Discipline Southern European Languages

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects LANG 2029 - Language and Communication Skills 2A Spanish

Assumed Knowledge

Spanish 102 or equivalent knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Demonstrate knowledge of key morphological and syntactic structures of the Spanish language;
- Use a broad lexical base and common expressions in a range of socio-cultural contexts and situations involving other learners and native speakers;
- read a range of basic text types and respond appropriately either orally or in writing
- express ideas in writing in a range of text types including descriptions, narratives, reports, journal entries, recipes, informal correspondence, short summaries;
- demonstrate comprehension of spoken Spanish in a variety of informal and formal contexts and respond appropriately-- orally or in writing;
- identify key elements of the traditional and contemporary culture and values of the Spanish-speaking people
- apply independent learning strategies for acquiring another language.

Subject Content

- Activities and tasks aimed at developing listening comprehension, speaking, reading and writing skills at post beginner level
- Activities and tasks to develop grammatical forms at the post-beginner level
- An examination of a variety of oral and written genres and text types
- Listening and reading comprehension tasks for each of the different genres and text-types;
- A study of the geography of the Spanish-speaking countries with a particular emphasis on regional characteristics;
- An examination of cultural themes.

LANG 2041 Structure of Language

Credit Points 10

Legacy Code 101948

Coordinator Stacey Sherwood ([https://directory.westernsydney.edu.au/search/name/Stacey Sherwood/](https://directory.westernsydney.edu.au/search/name/Stacey%20Sherwood/))

Description This unit aims to equip students with knowledge about the structural aspects of language. Students will learn to describe, analyse and reflect on the structure and meaning of linguistic elements from word to sentence level. Using examples from different languages, including Australian Indigenous languages and other languages spoken in Australia, this unit will provide students with an understanding of how structure and meaning are connected, how they link up with other areas of linguistics, and how research in this field is relevant to the linguistic ecology of Australia.

School Humanities & Comm Arts

Discipline Language And Literature

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Co-requisite(s) LANG 1014 AND LANG 1028

Equivalent Subjects LANG 2046 - The Structure of English

Restrictions Successful completion of 40 credit points.

Assumed Knowledge

Basic knowledge of linguistics, phonetics and phonology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate knowledge of the key concepts of morphology and syntax, and explain this knowledge to others
2. analyse, discuss and reflect on significant knowledge in morphology and syntax
3. apply theoretical knowledge to the analysis of data
4. explain the principles and relevance of research in morphology and syntax

Subject Content

- Morphology: inflection and derivation
- Syntax
- Semantics
- theoretical Models of Grammar (Morphology, Syntax and Semantics) and their application to data analysis

Assessment

LANG 2044 The Gothic

Credit Points 10

Legacy Code 102507

Coordinator Helen Basides ([https://directory.westernsydney.edu.au/search/name/Helen Basides/](https://directory.westernsydney.edu.au/search/name/Helen%20Basides/))

Description This unit examines the emergence and development of Gothic literature in English. It studies the rise of Gothic fiction in the late-eighteenth century, and the evolution of Gothic genres in the nineteenth and twentieth centuries. Students will examine key works of Gothic poetry and narrative fiction - such as vampire narratives - in order to consider the social, political and intellectual contexts for Gothic literature. The unit considers how Gothic forms negotiate cultural anxieties, such as those involving race, gender, sexuality, religion, scientific development and class. Set texts from the twentieth century onwards may include works from television, theatre and film.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine generic conventions of the Gothic that are employed or subverted in the texts set for study.
2. Explain the ways in which the Gothic is situated within particular historical, social, cultural, political and scientific contexts.
3. Demonstrate an understanding of the relationship between gender and genre, especially with respect to the female Gothic.
4. Evaluate different critical approaches to the Gothic in relation to the set literary texts on the subject.

5. Produce independently researched, critically engaged written discussions on topics relating to the generic and historical study of the set texts.

Subject Content

- The emergence of The Gothic in Late-eighteenth century in England and its development in The Nineteenth and twentieth centuries, in literatures of prose and verse.
- Terror Gothic and horror Gothic
- The female Gothic and The intersections of gender and genre
- Gothic fiction?fs exploration and Negotiation of cultural anxieties, including around race, gender, sexuality, religion, scientific development and class
- theoretical considerations of Gothic literature
- contemporary Gothic forms

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Short Answer Task	900–1,000 words	30	N	Individual
Annotated Bibliography	800 words	25	N	Individual
Essay	1,500 words	45	N	Individual

Teaching Periods

LANG 2047 Translation Technologies

Credit Points 10

Legacy Code 101302

Coordinator Anita Byrnes ([https://directory.westernsydney.edu.au/search/name/Anita Byrnes/](https://directory.westernsydney.edu.au/search/name/Anita%20Byrnes/))

Description This unit aims to equip students with the theoretical and practical knowledge needed to effectively apply information and communication technologies to translation and other language related tasks. It focuses on translation memory and terminology management systems, and on the workflow involved in the handling of multilingual content. Emphasis is also put on uses of the Internet as a resource tool, and to the principles of controlled language for text to be processed by machine translation (MT). Tutorials will be conducted in a computer lab where students will familiarize themselves with leading computer-assisted translation (CAT) software applications.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects LGYA 0191 - Translation Skills

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply computer-aided translation (CAT) and related concepts and examine their place in the broad area of translation studies.
2. Examine in depth the fields of translation memory (TM) and terminology management, showing the skills required to compare applications and make informed judgments.
3. Describe the workings of one of the leading TM software packages and develop transferable troubleshooting strategies.
4. Explore the possibilities and limitations of machine translation (MT) by looking at the relevant literature and by analysing the outcome of some of the freely available engines on the internet.
5. Consolidate your expertise in internet mining, in particular for parallel corpora, terminological data and subject matter information.
6. Outline the workflows involved in multilingual content management, and explore the big-picture concepts of globalisation, internationalisation and localisation.

Subject Content

1. Overview of the principles of language engineering, and computer-assisted translation.
2. Basic 'generalist' computing skills of particular relevance to translators, in particular those related to data digitalisation, exchange and protection.
3. Desktop TM: components, workflow, and useful troubleshooting strategies.
4. Server TM: open standards for database content exchange, interface with multilingual content management.
5. Capabilities and limitations of MT engines.
6. The principles and practice of writing in controlled language for TM and MT.
7. Internet mining for parallel corpus, terminology data and specific subject matter.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

LANG 2048 Working Grammar

Credit Points 10

Legacy Code 102414

Coordinator David McInnes ([https://directory.westernsydney.edu.au/search/name/David McInnes/](https://directory.westernsydney.edu.au/search/name/David%20McInnes/))

Description How does grammar work? And how do languages function in different social contexts? This unit introduces students to a functional analysis of the English language, and relates the structure of English to its use in cultural and social contexts. It offers students of literature and training teachers an introduction to theories and forms of analysis that support much English language education in Australia. The functional model of language is used in a range of fields - including teaching in schools and universities, teaching ESL/EFL, and broader language research. Students will apply the functional analysis of English to a range of spoken and written texts from diverse literary, social and cultural contexts. This will help to provide grammatical skills and work-readiness, especially for students training to be professional teachers.

School Humanities & Comm Arts

Discipline English Language

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate their understanding of how language relates to the cultural and social contexts in which it is used
2. Identify how texts are structured to achieve a range of social purposes
3. Identify the features of functional grammar at clause, sentence and text levels
4. Analyse grammatical structures and patterns in texts
5. Provide interpretations of texts patterns through their relationship to forms of social and cultural meaning in literary and other texts

Subject Content

- Models of text and context including genre, context of situation including field, tenor and mode
- Analyses of The Grammar of The English clause for documenting Three kinds of meaning - Ideational, interpersonal and textual
- The analysis of clause level Structures for: Transitivity, Nominal groups, mood, modality and appraisal, theme/Rheme and given/new
- Interpretive frameworks for language features and patterns

Teaching Periods

LANG 2050 Medieval and Early Modern Literature

Credit Points 10

Legacy Code 102626

Coordinator Anthony Uhlmann ([https://directory.westernsydney.edu.au/search/name/Anthony Uhlmann/](https://directory.westernsydney.edu.au/search/name/Anthony%20Uhlmann/))

Description While films and books related to the fantastic and supernatural (like Game of Thrones, Lord of the Rings and Harry Potter) are extremely popular, it is sometimes forgotten that these works draw heavily on historical literary forms and works that engaged directly with the cultures from which they emerged. This unit will look at examples of literature from the Medieval and Early Modern periods (between 1000 and 1800) and the social and cultural worlds they both represented and supported. It will ask how these works still inform how we understand and represent things today.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse a range of pre-twentieth century texts from various historical and/or cultural contexts.
2. Demonstrate a familiarity with key literary genres (for example epic poetry, pre-novelistic prose narrative, allegory, satire and the novel).
3. Compare and critique interrelations between literary texts and their historical and cultural contexts.
4. Interpret the effects of cultural, social, and technological change on literary production.
5. Recall and analyse information gathered from lectures and set written texts.
6. Discuss and apply ideas related to the major themes and content of the subject.

Subject Content

- The epic poem and its transformations.
- Medieval allegory.
- Prose romance.
- The rise of realism.
- Prose satire.
- The novel.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

LANG 2051 Writing and Reading Sci-Fi and Fantasy

Credit Points 10

Legacy Code 102772

Coordinator Sara Knox ([https://directory.westernsydney.edu.au/search/name/Sara Knox/](https://directory.westernsydney.edu.au/search/name/Sara%20Knox/))

Description This unit covers the basic creative writing techniques for 'worldbuilding' in the genres of science fiction and fantasy. Through guided reading and writing you'll explore what happens when ordinary human predicaments are deepened and complicated when represented as happening in a world not our own: one with different physical laws, belief systems, technologies and cultural practices. In a workshoping environment, you will build outward from a 'story-bud' about an alternative or alien world to explore the logic of that world and its implications for the creation of believable characters, setting, action and - overall - the development of a successful story.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Incompatible Subjects LANG 3090 - Writing and Reading Sci Fi and Fantasy

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Assumed Knowledge

Good standard of written English expression.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the characteristics of science fiction and fantasy fiction.
2. Apply the techniques of world-building to flesh out story ideas.
3. Effectively utilise face-to-face and online workshop environments for the brainstorming of ideas and the troubleshooting of work in progress.
4. Critically assess works of published Science Fiction and Fantasy to identify the logic of world-building.

5. Demonstrate competence in writing coherent and credible fantasy or science fiction.

6. Identify the qualities of effective writing; and

7. Demonstrate those qualities in their own writing.

Subject Content

The history of fantasy and science fiction as literature and popular fiction.

Race, religion and gender: re-working power in genre fiction.

Genre reading for writing technique.

The story-bud: graft from an existing stock or invent something wholly new?

Consequential logic and the rules of invention: 'if this is so, then what...'

Cosmologies: world-building beliefs.

On creating non-human characters.

Science and Physics: how much do you need to know?

Future technologies and savage worlds: what kind of detail do I need?

Writing the credible incredible setting.

Alternative histories: when time gets out of hand.

Under the shadow of Harry Potter: can I do magic?

Zombies and Vampires: can the undead live on the page?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Reflection: Online journal (reading responses on aspects of world-building and genre technique in the set texts)	3 x 300 words approximately	25	N	Individual
Applied Project: First draft of project	1,500 words approximately	35	N	Individual
Applied Project: Final draft of project	2,000 words approximately	40	N	Individual

LANG 2054 Japanese 204: Speaking and Listening

Credit Points 10

Legacy Code 102804

Coordinator Hiromi Muranaka ([https://directory.westernsydney.edu.au/search/name/Hiromi Muranaka/](https://directory.westernsydney.edu.au/search/name/Hiromi%20Muranaka/))

Description This unit is undertaken concurrently with, or after, Japanese 203. It is designed to further develop and expand speaking and listening skills on the basis of grammatical structure introduced in Japanese 203 and increase the range of communicative transactions developed in Japanese 202 so that more sophisticated exchanges are possible when stating a plan or intention, making a suggestion, offering advice, indicating the degree of certainty, describing a change in state, indicating causes, using the passive and the imperative, etc. This unit will also present further aspects of contemporary Japanese culture and society. The unit is not suitable for background speakers (i.e., who have completed formal secondary education where Japanese is used as an official language and also the language of instruction at the School).
NOTE: Students enrolling in this unit as part of a major or sub major in Japanese are encouraged to enrol in Japanese 203 at the same time.

School Humanities & Comm Arts

Discipline Eastern Asian Languages

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects LANG 2031 - Language Communication Skills 2B
Japanese LANG 2027 - Japanese 204

Assumed Knowledge

Japanese 201 and 202 or equivalent knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Carry out conversation in such areas as stating a plan or intention, making a suggestion in the plain form, offering advice, indicating degree of certainty, describing a change in state, indicating causes, using the passive and the imperative.
2. Conduct a small research project and present the finding in oral and written Japanese on such topics as Japanese culture, customs and cross-cultural communication between Japan and Australia.
3. Use basic grammatical structures and vocabulary to carry out the exchanges stated above.
4. Demonstrate understanding of Japanese linguistic, pragmatic and cultural considerations when using Japanese.

Subject Content

Conversation needed for basic situations such as work, shopping, asking for information or explanations, what to say in troublesome situations.

Aspects of contemporary Japanese culture and society.

How to conduct and present a small research project on Japanese culture and society.

Listening practice of substantial passages and conversation.

Discourse pragmatics in Japanese oral interaction.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

LANG 2055 English Text

Credit Points 10

Legacy Code 102812

Coordinator David McInnes ([https://directory.westernsydney.edu.au/search/name/David McInnes/](https://directory.westernsydney.edu.au/search/name/David%20McInnes/))

Description The English Language is always used in context. The contexts in which we use English require us to use the language in specific ways. This unit introduces students to the analysis of English texts in context. Students will learn how to analyse text structure and purpose, and they will learn how to analyse the systems of the English language as they are used to facilitate context specific and context appropriate communication. Working between models of social contexts and the language level systems of English, students will develop a greater level of skill in using English for exposition, explanation, reporting, recounting and narrating.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Outline the relationship between text and context using functional models of context.
2. Describe the function, structure and features of key English text types/genres including recount, report, exposition, explanation and narrative
3. Outline the contextual dimensions of real-world texts used/produced across a range of contexts using the ideas of field, tenor and mode.
4. Analyse the use of English systems and structures to account for language use in context at lexicogrammatical and discourse levels.

Subject Content

1. Functional models of language, context and text.
2. Generic analysis of texts types including reports, recounts, narratives, explanations and expositions.

- Models of context of situation including Field, Tenor and Mode.
- Language analysis and text descriptions articulated to text structure, purpose and contextual variables including lexicogrammatical systems of transitivity, mood and theme and discourse level systems of thematic progression, hierarchies of periodicity and grammatical metaphor.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Discourse Analysis	3 x analysis tasks (20% each) 40 minutes each	60	N	Individual
Short Answer	2 x writing tasks (20% each) 500 words each	40	N	Individual

LANG 3001 19th Century American Literature

Credit Points 10

Legacy Code 101796

Coordinator Christopher Peterson ([https://directory.westernsydney.edu.au/search/name/Christopher Peterson/](https://directory.westernsydney.edu.au/search/name/Christopher%20Peterson/))

Description This unit focuses on literature from the American Renaissance through to the end of the Civil War. Issues to be examined will include some of the following: the construction of a national literature, the ideology of American Exceptionalism, the tension between the religious and the secular, and the clash between freedom and slavery. Texts may include fiction, poetry and drama.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

- analyse a broad range of American fiction, poetry, and drama.
- recognize how the legacy of Puritanism informs 19th century American literature and culture.
- discuss the conflicting ideologies of freedom and slavery in American literature.
- identify generic characteristics of American literature, such as the romance, the gothic, the novel, and the short story.
- gain knowledge of the intersection of the concepts of race, sexuality, gender, and class.
- develop advanced skills in writing and argument.

Subject Content

- The American Renaissance
- Transcendentalism
- The Legacy of Puritanism
- Romantic Individualism
- The emergence of American fiction
- The rise of The American Gothic
- Cult of Sentiment
- democracy and Slavery

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

LANG 3012 Arabic 303: Advanced Writing Skills

Credit Points 10

Legacy Code 100049

Coordinator Nawal Sami ([https://directory.westernsydney.edu.au/search/name/Nawal Sami/](https://directory.westernsydney.edu.au/search/name/Nawal%20Sami/))

Description This unit is aimed at those who have successfully finished 100044 - Arabic 202, or have an advanced speaking and writing proficiency in Modern Standard Arabic. It is one of the obligatory units for students intending to graduate with Arabic as a major or sub-major. It seeks to develop the writing skills to prepare students to make professional use of the language, and it is particularly recommended for those who wish to involve themselves in areas such as language teaching and translation. Students will be introduced to a full range of text types and language purposes. They will be guided to analyse, interpret and evaluate passages provided, and will be encouraged to extend their ability by experimenting with a variety of writing styles.

School Humanities & Comm Arts

Discipline Southwest Asian and North African Languages

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Assumed Knowledge

Assumed knowledge: Arabic 204 or equivalent knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate advanced reading skills in a variety of Modern Standard Arabic genres;
2. write a coherent argument, discussion or explanation in Modern Standard Arabic;
3. write effectively according to audience, purpose and content;
4. demonstrate written work of a high level of grammatical accuracy and extensive knowledge of vocabulary;
5. analyse text in Arabic identifying meaning and how it is conveyed;
6. respond to texts personally, critically and sensitively, evaluating linguistic and cultural features;
7. apply techniques for autonomous learning of Modern Standard Arabic language skills.

Subject Content

- analysis of general features common to all text types: language, structure, setting, imagery, tone and mood
- Overview of style in writing: identification and practice with different styles of writing.
- Examination of A selection of contemporary texts in non literary written genres: transactions, procedures, reports, expositions, etc.
- analysis, interpretation and evaluation of samples of major text types: academic, scientific, legal, medical, commercial, literary.
- Creation of original text in different text types: report, diary, procedural writing, newspaper Reporting, reviewing, letter writing.
- Rewriting of A given text for A different audience or purpose.

Description This is an advanced Arabic unit for students undertaking a major in Arabic or the Bachelor of Arts (Interpreting & Translation) (Arabic stream). As a companion unit of Arabic 303 (Advanced Writing Skills), it aims at preparing students to make a professional use of the language, in this case by placing particular emphasis on oral skills, and it is also specially recommended for those wishing to pursue careers in areas such as language teaching, interpreting and translation. Students will be introduced to a full range of oral text types and language purposes. They will be guided to analyse, interpret and evaluate examples of oral discourse, and be encouraged to develop effective public speaking skills.

School Humanities & Comm Arts

Discipline Southwest Asian and North African Languages

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Assumed Knowledge

Arabic 304: Arabic Advanced Speaking.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Improve listening skills in a variety of genres and develop techniques for autonomous learning of those skills;
2. Master the note-taking skills necessary to accurately develop an argument or respond orally to one;
3. Demonstrate high level of grammatical accuracy and extensive knowledge of vocabulary when speaking;
4. Demonstrate breadth and depth in the treatment of relevant ideas and information;
5. Produce speech suited to a given audience, purpose and/or content, and to manipulate language to meet the requirements of the task with flair and originality;
6. Demonstrate effective public speaking skills, including techniques for autonomous learning of these skills;
7. Analyse oral production in Arabic, identifying its linguistic and contextual features.

Subject Content

- Variables of spoken language; content, speed, text type, number of interlocutors, accent, speaker's gender, techniques for improving listening comprehension.
- Aural comprehension practice in Arabic by listening to visiting speakers, audio and video tapes, radio and television broadcasts.
- Extensive practice with formal and informal registers, extempore and prepared speech, and group discussion.
- Analysis of a selection of contemporary oral texts: speeches, radio interviews, public affairs programs, lawyers court addresses, judge's sentences, etc.
- Rewording of A given text for A different audience or purpose.
- Standard systems of note-taking, individual adaptation; techniques for note-taking practice;
- Public speaking skills: voice work, audience contact, discourse organisation; techniques for autonomous development of public speaking skills.

Coordinator Eva Melhem ([https://directory.westernsydney.edu.au/search/name/Eva Melhem/](https://directory.westernsydney.edu.au/search/name/Eva%20Melhem/))

Description This unit aims to give students an understanding of the phonological, morpho-syntactic, semantic and pragmatic changes that have occurred to the Arabic language both spoken and written in the last century. Particular attention will be paid to the different dialects spoken in some of the Arab countries and their relation to Modern Standard Arabic. A special study will be made of the Australian Arabic used by migrant communities.

School Humanities & Comm Arts

Discipline Southwest Asian and North African Languages

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Assumed Knowledge

Assumed knowledge Arabic 204 or equivalent knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand the phonological, morphosyntactic and lexical variations and changes undergone by the Arabic language in the last decade.
2. Recognise the differences across spoken varieties of Arabic.
3. Understand the difference between classical Arabic and Modern Standard Arabic and the factors that lead to the evolution of the language.
4. Explore the problems of users of Arabic in Australia and other migrant countries.
5. Gain an understanding of the extent and status of Arabic in the world.
6. understand the phonological, morphosyntactic and lexical variations and changes undergone by the Arabic language in the last decade;
7. recognise the differences across spoken varieties of Arabic;
8. understand the difference between classical Arabic and Modern Standard Arabic and the factors that lead to the evolution of the language;
9. explore the problems of users of Arabic in Australia and other migrant countries;
10. gain an understanding of the extent and status of Arabic in the world .

Subject Content

The origin, history and spread of the Arabic language in Arab and non-Arab countries.

Phonological, morphosyntactic and lexical variations and changes undergone by the Arabic language in the last century.

The main dialects of Arabic, their structural characteristics, their status and relevance and their relation to Modern Standard Arabic.

Language Policy & the extent and status of Arabic in Australia and in the world.

Code switching and language mixing among speakers of Arabic in Australia and their implications on language development in bilingual Arabic-speaking children.

Arabic language use in social media.

- The origin, history and spread of The Arabic language in Arab and non-Arab countries.

- Phonological, morphological, syntactic and lexical variation of The language.

- Arabic pragmatics: terms of politeness, forms of address, speech acts.

- The main dialects of Arabic, their structural characteristics, their status and relevance and their relation to The Standard.

- Code switching and language mixing among speakers of Arabic in Australia and The implications of this to language development in bilingual Arabic-speaking children.

- The extent and status of Arabic in Australia and in The world.

LANG 3016 Bilingualism and Biculturalism

Credit Points 10

Legacy Code 101449

Coordinator Ruying Qi ([https://directory.westernsydney.edu.au/search/name/Ruying Qi/](https://directory.westernsydney.edu.au/search/name/Ruying%20Qi/))

Description Bilingualism and biculturalism are important aspects of life in Australia: many Australian residents are, were, or could be, bilingual and/or bicultural. This unit aims to give students an understanding and appreciation of the most important facets and manifestations of bilingualism and biculturalism, in the linguistic, cognitive, personal, societal and educational spheres, particularly with regard to the Australian context. It also aims to show students how this unit relates to broader studies in education, humanities, linguistics, and social sciences.

School Humanities & Comm Arts

Discipline Linguistics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYB 2371 - Bilingualism and Biculturalism

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate knowledge about raising children bilingually and biculturally.
2. identify and explain language choice, language maintenance and language shift in multilingual societies as well as code-switching and language mixing in bilingual speakers.
3. identify relationships between bilingualism and cognitive development.
4. evaluate the effectiveness of bilingual education programs and aspects of cross-cultural and/or inter-cultural communication.
5. demonstrate understanding of the complex issues and different dimensions of individual and social bilingualism.
6. critically analyse a range of attitudes toward bilingualism and their relationships with multi-identity.

Subject Content

1. A short overview and introduction to the main concepts of bilingualism and biculturalism.
2. The concept of biculturalism; languages in contact - language maintenance, shift and change; language attitudes; multi-identity.
3. The nature of language interaction and codeswitching, e.g. language choice.
4. Bilingualism and cognitive development.
5. Bilingual language acquisition; raising children bilingually and biculturally.
6. Bilingual education in Australia and overseas; bilingual programs.
7. Bilingualism and aspects of cross-cultural, intercultural communication.

Assessment

LANG 3018 Children's Literature: Image and Text

Credit Points 10

Legacy Code 101626

Coordinator Nicola Burke ([https://directory.westernsydney.edu.au/search/name/Nicola Burke/](https://directory.westernsydney.edu.au/search/name/Nicola%20Burke/))

Description This unit focuses on the interrelationships between image and text in children's literature. The unit examines both picture books and other image-based children's texts, including electronic texts and graphic novels. The unit will examine children's texts as cultural artefacts, theories of visual literacy and how image and text combine to create meaning. Students will have the opportunity to create their own picture book for their final project.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify children's texts as cultural artefacts produced in and through discourse that arise in particular social, historical contexts
2. Employ the concept of 'visual literacy' to explore how children/young people read and understand 'visual' texts
3. Identify and engage in key debates around children, childhood and children's literature
4. Compare and evaluate different perspectives for analysing how images and text combine to create meaning
5. Undertake close critical analysis of the visual aspects of children's texts and of the relationships between images and written text
6. Apply the knowledge gained in the subject to design their own picture books

Subject Content

Children, childhood and children's literature

The changing role of the visual in children's literature

History of the use of images in children's texts

The social, cultural and political contexts of children's literature

Ideology and the image

Theories of visual literacy and research on how children read images

The interrelationship of images and text in children's literature

Perspectives and approaches for studying the visual aspects of children's literature

Contemporary visual texts - e.g. picture books, electronic texts, graphic novels, multimodal texts

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Analysis task	1,000 words	45	N	Individual
Final picture book project - scaffolded tasks	2,000 words	55	N	Individual

LANG 3019 Children's and Young Adult Fiction

Credit Points 10

Legacy Code 102205

Coordinator Nicola Burke ([https://directory.westernsydney.edu.au/search/name/Nicola Burke/](https://directory.westernsydney.edu.au/search/name/Nicola%20Burke/))

Description This unit explores a wide range of fictional texts created for children, teenagers and young adults from folktales, fairytales and myths to contemporary examples. It focuses on the relationship between young people, the texts created for them and the cultures in which these texts are produced and read. The unit will examine a variety of genres and themes, for example, the experience of childhood as constructed by adult authors of children's texts; post-colonial children's literature; the emergence and development of distinctly Australian children's texts; the development of young adult; literature;

the impact of new technologies on children's literature; and role of art in children's literature.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LANG 3017 - Children's Literature

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically describe the history, features and contemporary understandings of children's literature and young adult fiction.
2. Explain how young people's texts are cultural artefacts produced in and through discourse that arise in particular social, historical contexts
3. Undertake critical analysis of young people's texts from a variety of genres.
4. Identify and engage in key debates and issues around children's literature and young adult fiction.
5. Explain how young people's texts are cultural artefacts produced in and through discourse that arise in particular social, historical contexts.

Subject Content

1. What is children's literature and young adult fiction? The discourses that construct children's and young adult fiction will be examined, including educational and societal assumptions about the nature of childhood/adulthood/adolescence and what young people's fiction is, or should be.
2. The social, cultural and political contexts of children's and young adult fiction will be examined, including post-colonial children's literature, the emergence and development of distinctly Australian children's texts, issues of gender, identity, race and ethnicity.
3. Genres and themes in young people's fiction: the variety of texts for young people and the practises and assumptions that shape them.
4. History of children's literature, including folktales, fairy tales and myths.
5. Role of the visual in children's literature and young adult fiction.
6. Bridging the worlds of childhood and adulthood: the development of "young adult" or teenage/adolescent fiction.
7. Young people's fiction and popular culture.
8. Young people's fiction and new technologies.

LANG 3022 Chinese 303: Twentieth-Century Chinese Literature

Credit Points 10

Legacy Code 100064

Coordinator Ruying Qi (https://directory.westernsydney.edu.au/search/name/Ruying_Qi/)

Description This unit introduces students to modern and contemporary Chinese literature in the Chinese language. It includes a brief overview of Twentieth-century Chinese literature, and exposes students to a variety of literary genres. Students are expected to work individually and in groups in order to analyse, evaluate and critique these works, whose social and cultural context is integral to understanding them. This process will not only increase students' understanding and

appreciation of Twentieth-century Chinese literature, but it will also develop their critical thinking skills.

School Humanities & Comm Arts

Discipline Eastern Asian Languages

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Assumed Knowledge

Chinese 204 or equivalent knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

- demonstrate basic knowledge of twentieth-century Chinese literature and prominent writers and poets of that period;
- analyse and evaluate texts of various Chinese literary genres in their social and cultural context;
- appreciate and interpret the use of language in literary aesthetics;
- enhance their literary appreciation skills and their critical thinking skills;
- utilize their critical understanding of Chinese literature and its tradition;
- further develop the necessary skills to write literary criticism in Chinese.

Subject Content

An overview of twentieth-century Chinese literature;

A study of selected works from prominent modern writers such as Lu Xun, Ba Jin, Lao She, Cao Yu, Qian Zhongshu, Ding Ling;

A study of selected works from prominent contemporary writers such as Wang Meng, Zhang Xianliang, Liang Xiaosheng;

A study of selected works from prominent contemporary poets such as Bei Dao, Gu Cheng, Shu Ting;

A study of selected works from prominent contemporary Hong Kong, Taiwan and overseas writers such as Jin Yong, Qiong Yao.

LANG 3025 Chinese 306: Traditional Chinese Thought

Credit Points 10

Legacy Code 100510

Coordinator Ruying Qi ([https://directory.westernsydney.edu.au/search/name/Ruying Qi/](https://directory.westernsydney.edu.au/search/name/Ruying%20Qi/))

Description This unit is a thematic unit in the BA Key Program Languages and the BA Interpreting and Translation. It is part of the Chinese major or sub-major and can also be taken as an elective. It introduces students to Chinese thought and way of life - the Confucian-Daoist tradition. Students will explore how China's ancient wisdom shapes its long resilient civilization and how it helps the nation maintain its cultural identity while it exerts an international influence on today's world. Students will read selected works of prominent Chinese thinkers in the original or English versions. This unit will be conducted in Chinese and English.

School Humanities & Comm Arts

Discipline Eastern Asian Languages

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Assumed Knowledge

Chinese 202 or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. gain an appreciation of the resilience and resourcefulness of China's ancient wisdom and of its historical development.
2. gain an insight into the interplay between philosophical thought, religion, society, government, culture and life to meet challenges and opportunities of a historical change.
3. have a deepened understanding of the true qualities and strengths of Chinese cultural traditions.
4. enhance their appreciation of the continuing relevance of traditional Chinese thought to contemporary Chinese society.
5. further develop their ability to appreciate classical Chinese texts.
6. develop their reflective, comparative and critical-thinking skills and ability to use such skills to analyse Chinese cultural or social issues through research, presentation and proposal/essay writing.
7. be enriched by the treasures of the past and participate in conversations concerning the present and future directions in Chinese culture, thought and philosophy.

Subject Content

- An overview of aspects of China's ancient wisdom and its historical development;

- Topics such as Philosophical thought, religion, education, government, management, strategy, health and life that have been important in history as well as in contemporary times in The Eastern and Western World serving as unifying themes.

- Critical analysis of China's influence across regions of Asia and comparative analysis of perspectives of the Eastern and Western values if applicable being brought to bear on the themes.

- An analysis and Understanding of complex social and cultural Issues in their historical, economic and political contexts.
 - A series of guided readings, discussions, presentations and research on the nature and capacity of China's ancient wisdom and its application to today's world.

LANG 3026 Chinese 307: The Cultural Context of China

Credit Points 10

Legacy Code 100067

Coordinator Lijiang Zhao (https://directory.westernsydney.edu.au/search/name/Lijiang_Zhao/)

Description This unit provides a brief overview of Chinese culture and examines the cultural interchanges of which it has been a part throughout history. Students will analyse the effects of these cultural contacts, both positive and negative. They will also evaluate and critique relevant cultural issues, from a comparative perspective. This process will increase students' understanding of the cultural identity of China, and it will also enable them to appreciate the importance of outside cultural influences, thereby reinforcing an open and mature attitude towards multiculturalism. The unit will be conducted in Chinese.

School Humanities & Comm Arts

Discipline Eastern Asian Languages

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Assumed Knowledge

Chinese 204 or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate understanding of the essence of Chinese traditional culture and Chinese cultural identity;
2. identify the cultural exchanges that have taken place between Chinese and other peoples;
3. explain the impact of Chinese culture on other cultures and its continuing relevance to the contemporary world;
4. demonstrate an understanding of how other cultures have affected Chinese culture, up to the present;
5. assess cultural contact situations with an open and mature attitude towards multiculturalism;

6. apply sound analytical and critical thinking skills while dealing with cultural issues.

Subject Content

The essence of traditional Chinese culture and Chinese cultural identity;
 The impact of Chinese culture on other cultures: great inventions, the explorers Zhang Qian and Zheng He, and overseas students;
 The impact of other cultures on Chinese culture: Buddhism, Marco Polo, the Christian missionaries, the Opium War;
 Chinese culture and Chinese people through Western eyes;
 Western culture and Westerners through Chinese eyes;
 Chinese subcultures in Taiwan, Hong Kong and overseas;
 A brief history of Chinese migration to Australia.

Inherent Requirements

There are inherent requirements for this subject that you must meet in order to successfully complete this subject. Make sure you read and understand the requirements for your subject online.

Inherent Requirements (https://www.westernsydney.edu.au/ir/inherent_requirements/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Presentation	10-15 minutes (including discussion)	30	N	Individual
Essay	1500-2000 words	30	N	Individual
In-class exam	2 hours	40	N	Individual

Prescribed Texts

- A Subject Reader prepared by the school. Students to supply Chinese newspapers and magazines.

Teaching Periods

LANG 3027 Creative Non-Fiction

Credit Points 10

Legacy Code 100856

Coordinator Sara Knox (https://directory.westernsydney.edu.au/search/name/Sara_Knox/)

Description This unit provides students with an advanced understanding of the issues, processes and practical questions involved in the writing of creative non-fiction. It is intended that students will gain both enhanced theoretical knowledge of writing practices and, through workshop participation and practical exercises, develop both their own writing skills and the ability to critique the writing of others on the basis of sound understanding of the characteristics of the genre.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYB 6564 - Texts and Techniques

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Assumed Knowledge

A good standard of written expression.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the characteristics of genre in the categories of creative non-fiction studied;
2. Demonstrate their understanding of those characteristics in their own writing;
3. Analyse technical and aesthetic relationship of non-fiction to fiction;
4. Demonstrate the etiquette of editorial advice;
5. Practice the techniques of self-editing;
6. Demonstrate their own authorial voice across a range of autobiographical narrative genres.

Subject Content

Autobiographical narrative forms

The personal essay

The literary essay

The conceptual essay

Biography: writing the lives of others

Meta-fictional, experimental and hybrid fictions

Documentary fictions

Reportage

Prescribed Texts

- A Subject Reader of primary sources compiled by the subject coordinator

Teaching Periods

LANG 3028 Crime Fiction

Credit Points 10

Legacy Code 102315

Coordinator Matt Mcguire ([https://directory.westernsydney.edu.au/search/name/Matt Mcguire/](https://directory.westernsydney.edu.au/search/name/Matt%20Mcguire/))

Description This unit will introduce students to a variety of texts drawn from the history of crime fiction; including the classic detective story, the Golden Age mystery, US 'Hard Boiled' fiction, the police procedural, and the literary crime novel. Students will develop their knowledge of theories of genre, specifically its formation and evolution, and its implications for the process of making meaning. They will learn about the changing place of crime fiction within the English literary canon, exploring the genre's relationship to questions of artistic value, the distinction between high and low culture, and the differences between literary and popular fiction.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. analyse a variety of texts drawn from the history of crime fiction
2. identify the formal and thematic elements within various sub-genres of crime fiction
3. employ genre theory to interpret individual texts and to situate them within the broader history of crime fiction
4. locate crime fiction within a series of arguments about the nature of high and low art, and within the critical approaches to the history of the genre.

Subject Content

Content may vary between semesters, but it will draw from, or elaborate on, the following pool of topics:

- The Classic detective story
- The Golden Age Crime novel
- the US 'hard boiled' tradition
- The police procedural
- contemporary Crime fiction
- genre theory
- theories of High and low art
- Critical history of Crime fiction

Teaching Periods

LANG 3029 Culture, Discourse and Meaning

Credit Points 10

Legacy Code 102185

Coordinator David McInnes ([https://directory.westernsydney.edu.au/search/name/David McInnes/](https://directory.westernsydney.edu.au/search/name/David%20McInnes/))

Description In Culture, Discourse and Meaning students explore our culture by looking closely at how we make and share meaning. You look at how power operates by supporting and promoting some ideas and ways of life but not others. In Culture, Discourse and Meaning you also consider how students might change our culture. In your work in the unit, you will develop analytical, interpretive, and critical skills for culture analysis. Through project-based work, students will develop the capacity to analyse and critique the production and operations of power and consider changes in cultural practice.

School Humanities & Comm Arts

Discipline Linguistics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Incompatible Subjects COMM 2045 - Critical Discourse Analysis

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain how language use reproduces and has the potential to change culture
2. Analyse and interpret texts on their social contexts using language-focused analyses
3. Prepare a research-based report on a project investigating the formation and distribution of discursive formations through cultural practice.

Subject Content

- language, culture, discourse
- genres and social practices
- identity and cultural politics
- Intertextuality and recontextualisation
- Tools for Discourse analysis - models of text in context; the language of representation; the language of interaction and negotiation; modes and modalities of language use

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Discourse analysis (x2) (30% each)	500 words each	60	N	Individual
Research Report	1,500 words	40	N	Individual

Prescribed Texts

Teaching Periods

LANG 3030 Discourse Analysis

Credit Points 10

Legacy Code 101946

Coordinator Adrian Hale ([https://directory.westernsydney.edu.au/search/name/Adrian Hale/](https://directory.westernsydney.edu.au/search/name/Adrian%20Hale/))

Description This unit explores language at the discourse level, introducing different linguistic approaches used in the analysis of discourse. It provides a general overview of major theoretical frameworks and current issues in discourse analysis. It examines authentic spoken and written examples, and demonstrates how discourse analysis is relevant to other disciplines such as media and communication, education, cultural and gender studies, and so on.

School Humanities & Comm Arts

Discipline Linguistics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LANG 1014

Equivalent Subjects LANG 3085 - Text and Discourse in English

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate general knowledge of different theories and analytic tools of discourse analysis
2. demonstrate awareness of the ways speakers and writers use language according to the situation and communication goals
3. select discourse analytic approaches
4. apply discourse analytic approaches in their own research.

Subject Content

- An Overview of traditions of discourse analysis, e.g. conversation analysis, The ethnography of communication, pragmatics, genre analysis and Critical discourse analysis
- An Overview of key readings in The field, e.g. writings of Foucault, Bakhtin, Fairclough, Kress and van Leeuwen, Cameron, van Dijk
- An introduction to approaches that address technologically mediated and multimodal discourse.
- applications of discourse analytic approaches in research: e.g. discourse in educational settings, discourse across cultures, discourse and gender, discourse and identity, discourse and conflict.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

LANG 3031 Discovering language: Everything you've ever wanted to know but never asked

Credit Points 10

Legacy Code 102625

Coordinator Mark Antoniou ([https://directory.westernsydney.edu.au/search/name/Mark Antoniou/](https://directory.westernsydney.edu.au/search/name/Mark%20Antoniou/))

Description Why can any child learn any language? How come there are so many languages on this planet? What is the most difficult language? What happens to us if we speak more than one language? There are plenty more questions about language that we all have and this unit is all about asking and finding out about language in an engaging way. Students will learn how to ask questions about language and what

research can tell us in answering them. The unit will equip students with the tools to investigate many aspects of language as a defining feature of humans.

School Humanities & Comm Arts

Discipline Linguistics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LANG 1014

Equivalent Subjects LANG 3070 - Research Methods in Linguistics

Restrictions

Successful completion of 60 credit points of study including LANG 1014 - Introduction to Linguistics plus 20 credit points from subjects in the Linguistics major.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and analyse the parts of advanced research articles.
2. Demonstrate understanding of research methods used in the field of Language and Linguistics, including qualitative and quantitative approaches.
3. Identify, discuss and select appropriate research topics in the student's area of interest.
4. Demonstrate understanding of the basic steps to conducting research.
5. Use basic research methods for designing and analysing linguistic data.
6. Apply basic descriptive and inferential statistical concepts and techniques.
7. Write a research proposal.

Subject Content

Fundamental knowledge on how to read research articles: Identifying the basic parts of an article, reporting and critically assessing its content.

Identification of research-worthy and/or controversial topics.

Basic qualitative and quantitative tools to analyse linguistic data.

Step-by-step guidance on how to write a research proposal, including a summary, a research question, the motivation for the study through a literature review, methodology, analysis and predicted results.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Annotated Bibliography	1,000 words	30	N	Individual
Case Study	2,000 words	40	N	Individual
Quizzes	1,500 words in total	30	N	Individual

Teaching Periods

LANG 3033 Film and Drama

Credit Points 10

Legacy Code 100866

Coordinator Anthony Uhlmann ([https://directory.westernsydney.edu.au/search/name/Anthony Uhlmann/](https://directory.westernsydney.edu.au/search/name/Anthony%20Uhlmann/))

Description This unit offers a survey of one or more of the following: drama, drama on film and film drama. It will examine key concepts in cinema theory, dramatic form and film production. Comparison may be made between theatre texts and film adaptations related to the work of specific dramatists; or drama texts may be considered in themselves (often with the screening of filmed versions of these dramas). Alternatively, film itself will be considered as a distinct dramatic form whose contours will be traced in relation to the work of important directors. Viewing films will form an integral part of this unit and students will be expected to attend screenings of films as well as a lecture and tutorial.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the different theoretical and historical developments in the field of cinema
2. Employ visual literacy in the discussion of cinema
3. Discern and evaluate key technical concepts belonging to dramatic forms
4. Identify the work of a particular playwright or filmmaker and in relation to methods of critical analysis
5. Illustrate rhetorical skills

Subject Content

- introduction to key elements of film production

- introduction to key elements of dramatic form

- comparison of film form and theatre form

- cinema, film and theatre theory

- film and theatre history

- detailed Examination of The work of A dramatist or dramatists and/or A filmmaker or filmmakers

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Tutorial Discussion and leadership plus tutorial essay	Tutorial (10 min length); leadership plus tutorial essay (500 words)	20	N	Individual
Written Exercise	2,000 words	40	N	Individual
Take Home Exam	1,500 words	40	N	Individual

Prescribed Texts

- A book of primary readings prepared by the subject coordinator.

Pre-requisite(s) LANG 1014

Co-requisite(s) LANG 1028 AND LANG 2041

Equivalent Subjects LANG 2018 - History of the English Language

Restrictions Successful completion of 60 credit points including the pre-requisite subject listed above.

Assumed Knowledge

Knowledge of fundamental linguistic terminology, introductory level linguistics; preferably phonetics/phonology and structure of language.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate knowledge of the key concepts in historical linguistics, and explain this knowledge to others;
2. make connections between the topics in this subject and their significance within the discipline of historical linguistics, especially in relation to the linguistic ecology of Australia;

3. apply theoretical knowledge to the analysis of data;
4. explain the value and principles of research in historical linguistics.

Subject Content

- types, mechanisms and causes of language change
- theory and Models of language change
- investigative methodology of historical linguistics
- what language can tell US about history, especially The habitat and Ecology of languages in Australia

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

LANG 3045 Intercultural Communication

Credit Points 10

Legacy Code 101950

Coordinator Mustapha Taibi ([https://directory.westernsydney.edu.au/search/name/Mustapha Taibi/](https://directory.westernsydney.edu.au/search/name/Mustapha%20Taibi/))

Description This unit aims to develop the communicative competence of students in intercultural contexts and raise their awareness of issues in the use of languages. It helps the students understand hidden socio-cultural dimensions and equips them with the knowledge and skills necessary for intercultural communication. It also prepares them to critically analyse linguistic and cultural differences around them, appreciate linguistic and cultural diversity, and integrate the unit contents into their future careers. The impact of intercultural communication is highlighted in a range of real-life sectors, such as second language teaching and learning, translation and interpreting services, international business, tourism, community services, and organisational communication. Lectures will be delivered in English and depending on demand, language-specific tutorials will be delivered in Arabic, Chinese, Indonesian and Japanese as well as English.

School Humanities & Comm Arts

Discipline Linguistics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LANG 3046 - Intercultural Pragmatics

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the connection between language and culture;
2. demonstrate awareness of linguistic and cultural factors that contribute to (un)successful intercultural communication;
3. examine cross-linguistic and cross-cultural differences in verbal and nonverbal communication;

4. use linguistic tools to analyse authentic spoken and written discourses from an intercultural perspective;
5. analyse linguistic and cultural diversities by examining cultural differences;
6. identify effective cross-communicative strategies in various contexts;
7. discuss and apply intercultural communication knowledge and skills to professions (e.g. translation and interpreting services, multicultural education, international business, tourism, community services, etc.).

Subject Content

- relationships between language and culture
- Differences in language use (e.g. lexical equivalence and gap) and culture (e.g. self-orientation vs. other-orientation)
- cross-cultural variability (e.g. Individualism vs. collectivism)
- cross-cultural relationship management (e.g. horizontal vs. vertical)
- face Issues and face-work across cultures
- culture-specific manifestations in spoken (e.g. politeness and impoliteness) and written discourses (e.g. techniques and genres)
- speech acts across cultures (e.g. requests and apologies)
- Hidden dimensions across cultures (e.g. low-contact vs. High-contact)
- cross-cultural communication challenges and strategies (e.g. stereotyping, miscommunication and pragmatic failure)
- Cross-cultural sensitivities (e.g. cultural practices and values, address terms, taboos and solidarity-focused or power-focused communication)

Coordinator Christopher Conti ([https://directory.westernsydney.edu.au/search/name/Christopher Conti/](https://directory.westernsydney.edu.au/search/name/Christopher%20Conti/))

Description The focus of this online unit is the language of literature and the craft of writing. The unit explores the rhetorical or figurative dimension of language across literary and non-literary texts. Students analyse a range of short texts - mostly passages from novels and poems - with an eye to the formal basis of their effects. Through recorded lecture pods and online exercises, students are introduced to the basic tools of stylistic analysis, including narrative analysis, metaphorical analysis and critical discourse analysis.

School Humanities & Comm Arts

Discipline Linguistics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the linguistics basis of literary effects or "style"
2. analyse the rhetorical character of "ordinary" language and text, including the key tropes metaphor, metonymy and irony;
3. apply a range of analytical tools to literary and non-literary texts;

4. implement textual, interpretive and narrative analyses that have applications across discursive and disciplinary boundaries.

Subject Content

Introduction: Literature and literariness - Defamiliarisation - Foregrounding

Module 1: Language as system - Word choices - Collocation

Module 2: Grammar, syntax and function - Transitivity 1: Clauses and agents - Transitivity 2: Patterns

Module 3: Metaphor and metonymy - Tenor and vehicle - Cognitive metaphor theory

Module 4: Language, rhetoric and power - Text and context - Critical discourse analysis

Module 5: Narrative - Focalisation and free indirect discourse - Mind style

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Online quizzes	1,000 words in total	20	N	Individual
Transitivity analysis	1,000-1,500 words	30	N	Individual
Final essay	2,000 words	50	N	Individual

Prescribed Texts

- No prescribed textbook. Short texts for analysis will be drawn from a range of sources, including subjects in the BA English Major, and provided in PDF form (mostly poems and short stories).

Coordinator Xiangdong Liu ([https://directory.westernsydney.edu.au/search/name/Xiangdong Liu/](https://directory.westernsydney.edu.au/search/name/Xiangdong%20Liu/))

Description This is a Level 3 unit within the Japanese major program, intended for students who have successfully completed Japanese 202 or have acquired equivalent knowledge. It enhances students' comprehension of and ability to use new grammatical structures, expressions, interaction strategies and Kanji characters. In addition to improving the four primary language skills and ability needed for working in Japan or with Japanese people, this unit aims to advance students' knowledge of the modern Japan through the recommended texts and class discussions. Note: This unit is not suitable for native speakers.

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 1583 - Languages and Grammatical Concepts 3A Japanese

Assumed Knowledge

Japanese 203 and 204 or equivalent knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. understand and use advanced grammatical patterns of Japanese;
2. identify the differences between structural and lexical options in Japanese and utilise them appropriately according to context;
3. communicate in spoken and written Japanese in a manner which is linguistically as well as culturally appropriate;
4. read and write approximately 500 Kanji characters;
5. demonstrate knowledge of the honorific system of the Japanese language and related cultural aspects of the Japanese society.

Subject Content

Introduction to Japanese honorific and related cultural aspects of Modern Japan

Introduction to verb forms used in honorific forms (e.g. causative and passive forms of verb)

Aural comprehension practice in Japanese by listening to authentic language

Speaking practice in Japanese using the most suitable expressions in given settings

Practice in reading a variety of Japanese materials, and exercises on material read

Practice in various forms and styles of writing in Japanese

Reading and writing of Kanji characters

Vocabulary extension exercises incorporated into points above.

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 0082 - Japanese 304 Discourse in Japanese

Assumed Knowledge

Japanese 203 and Japanese 204 or equivalent knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate knowledge of a range of Japanese discourse styles;
2. analyse Japanese discourse from viewpoints such as identity, gender, politeness and level of formality;
3. explain the discourse functions of ellipsis and euphemism;
4. identify main functions of Japanese discourse particles and some other discourse markers;
5. apply their knowledge about Japanese discourse to produce the most appropriate utterances in a given situation including formal and informal talk with a friend or colleague, dealing with a customer, speaking at a job interview, etc.

Subject Content

Basic discourse styles of the Japanese language;
Major discourse markers and their functions;
Ellipsis and euphemism in Japanese spoken discourse;
Formal and informal expressions in different settings including small talk, telephone conversation, presentation, and interview;
Use of honorific expressions to reflect different levels of politeness and social distance;
Gender differences among Japanese speakers in terms of language use.

Coordinator Hiromi Muranaka ([https://directory.westernsydney.edu.au/search/name/Hiromi Muranaka/](https://directory.westernsydney.edu.au/search/name/Hiromi%20Muranaka/))

Description This unit aims to reinforce the Japanese language in all four skills: speaking, listening, reading and writing, via the medium of Japanese popular culture, e.g. manga, anime, Japanese drama and/or J-pop, by exploring and analysing culturally and linguistically specific issues of the language, e.g. address terms and taking turns. Students will explore natural Japanese text and speech in both casual and formal styles at an advanced level, as well as increase their knowledge and understanding of Japanese popular culture.

School Humanities & Comm Arts

Discipline Southeast Asian Languages

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Assumed Knowledge

Japanese 203 and 204 or equivalent knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Communicate in Japanese in a more natural fashion in a variety of situations.
2. Demonstrate skills in reading and comprehending authentic Japanese materials.
3. Identify linguistic varieties (e.g. based on gender, status and age) in the Japanese language.
4. Demonstrate an understanding of non-verbal communication patterns found in the Japanese culture and society.

Subject Content

- use of Japanese popular culture materials such as drama, animation, J-pop and manga to enhance Grammar and discourse in Japanese, both in spoken and written media.

- language tasks to promote fluency in all four language skills.

- Analysis of specific issues in Japanese language (e.g. address forms, characteristics of casual/formal speech, male/female speech, politeness, onomatopoeia).

- comprehension of non-verbal cultural Issues related to Japanese society through Japanese popular culture materials found in gesture, facial expressions and choice of Topics, etc.

Coordinator Zouhir Gabsi ([https://directory.westernsydney.edu.au/search/name/Zouhir Gabsi/](https://directory.westernsydney.edu.au/search/name/Zouhir%20Gabsi/))

Description This is an advanced Level 3 language and linguistics unit for students of modern Arabic. Lectures for the grammatical concepts component are held in English for students of all languages while other activities are language-specific. The aim of the unit is twofold. On the one hand it aims, to develop a practical and theoretical understanding of the ways in which major concepts used in everyday speech and writing are mapped and organized in the lexicon and the grammar of human languages, and how these forms develop in learners and

users. On the other hand, it aims to develop advanced comprehension and production skills in Arabic language, including higher stages optional structures, through critical examination of contemporary and historical text and discourse samples from a variety of registers. An understanding of contemporary Arab culture and society is also fostered through comparative research projects on specific cultural, social and/or linguistic, aspects that are of interest to students. A range of CALL (Computer Assisted Language Learning) activities are utilised for this unit.

Student Contribution Band HECS Band 1 20cp

Level Undergraduate Level 3 subject

Incompatible Subjects LANG 3010 - Arabic 301 LGYA 1259 - Languages 303 Grammatical Concepts Across Languages

Assumed Knowledge

Successful completion of 40 credit points of Arabic Language at Level 2.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. gained an understanding of languages families, main linguistic typologies and the collocation of Arabic within the Semitic languages family;
2. acquired an understanding of key concepts and terminology in the study of lexical categories and sentence structure in the world languages with a specific focus on Arabic;
3. developed ways for identifying those lexico-grammatical concepts through corpus analysis in Arabic compared to English and other languages;
4. identified and learned to describe key areas of interface between pragmatically motivated language use and language structure reflecting on texts from different historical periods and critically using their own bilingual and/or multilingual experience;
5. gained an appreciation of cross linguistic development and particular difficulties in learning other languages with specific focus on learning Arabic; and
6. attained an advanced level of lexico-grammatical ability in productive skills and in reading comprehension

Subject Content

The cross-linguistic and typological component includes:

- An introduction to Basic concepts in identifying language families and typologies
 - identifying and discussing major grammatical concepts, Categories and terms across languages at lexical level including verb, noun, person, number, tense and modality
 - identifying and discussing major grammatical concepts in reference to syntactic structure across languages with reference to canonical or default mappings
 - pragmatic and Semantic contribution to syntactic choices. e.g. politeness and probability, Topic and focus and their contribution to special Mapping on linguistic structure, such as question formation, passives, emphatic constructions
 - Developmental Issues and difficulties in The acquisition and/or translation of those Structures across languages
- Grammatical structures and their functions in the following areas:

- Review of advanced aspects of Arabic grammar e.g. Nominal and Verbal Sentences; negating and expressing tense; reported speech; nominative, genitive and accusative cases and their applications
- Study and analysis of some exemplary texts: Classical, modern Standard Arabic and dialects
- Practice in applying grammatical aspects in writing to produce comprehensive and grammatically correct text across diverse genres;
- Searches of internet sites and other original sources for retrieval of relevant corpus data (diachronic and synchronic, written as well as, where Possible, spoken discourse) for processing, analysis and use. written and spoken materials may include short stories, Biographies, anthologies, children stories, articles from newspapers and magazines, plays or film excerpts, news and interviews

Prescribed Texts

- A collection of language and culture-specific reading materials, notes and exercises will be developed and made available including online material.

LANG 3060 Legal Interpreting (UG)

Credit Points 10

Legacy Code 100196

Coordinator Kenny Wang ([https://directory.westernsydney.edu.au/search/name/Kenny Wang/](https://directory.westernsydney.edu.au/search/name/Kenny%20Wang/))

Description Legal interpreting is a highly complex process that requires specialised training in interpreting techniques, litigation tactics, legal language and the legal system. This unit is a compulsory unit for students in the BA (Interpreting and Translation) course. It can also be offered to practising interpreters who wish to improve and perfect their knowledge and skills in legal interpreting. It aims to provide students with the theoretical background and the opportunity to develop the interpreting skills necessary to operate at the NAATI professional level as a court interpreter. Lectures are held in English for students of all languages. The tutorials are language specific in Arabic, Japanese, Mandarin and Spanish.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LANG 1017

Assumed Knowledge

Bilingual competence in English and one of the languages offered by the School for the interpreting and translation programs.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. interpret accurately in-person in court hearing situations in the consecutive mode
2. interpret accurately over the phone or via video-link in legal settings
3. interpret simultaneously in a court setting in the whispering mode
4. interpret in a triangular situation in a legal conference in the dialogue mode

5. demonstrate essential knowledge of the Australian legal system and awareness of cross cultural and cross linguistic differences and their relevance in the context of court interpreting
6. use essential legal vocabulary
7. sight translate court documents
8. demonstrate understanding of the complexity of the language of the courtroom, including question tactics and the importance of testimony style.

Subject Content

1. Theory and practice of dialogue interpreting in the legal setting.
2. Theory and practice of consecutive interpreting in the legal setting.
3. Theory and practice of sight translation of legal documents.
4. Theory and practice of simultaneous whispering interpreting in the courtroom.
5. Theory and practice of telephone and video-link interpreting in the legal setting.
6. Essential background concepts and vocabulary of the Australian legal system.
7. The language and strategic use of courtroom questions and their significance to interpreting.
8. The language of courtroom testimony and its significance to interpreting.
9. Essential concepts concerned with cross cultural and cross linguistic communication.
10. Ethical considerations and the role of the court interpreter.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Presentation	5 minutes each 10 minutes presentation plus, 5 minutes questions	40	N	Individual
Quiz	15 minutes each; 1 hour	20	N	Individual
Viva Voce	30-40 minutes	40	N	Individual

LANG 3061 Literary Animals

Credit Points 10

Legacy Code 101724

Coordinator Christopher Peterson ([https://directory.westernsydney.edu.au/search/name/Christopher Peterson/](https://directory.westernsydney.edu.au/search/name/Christopher%20Peterson/))

Description This unit explores a selection of literary works that invite us to examine the tenuous border separating the "human" from the "non-human." Readings will allow students to learn how literary texts employ various formal techniques (allegory, anthropomorphism, etc.) that call into question the conventional opposition between human and animal. Particular attention will be given to the intersection of animality, race, gender, and sexuality. Readings may include one or more national literatures, such as American or Australian literature.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. develop knowledge of the human/animal distinction in literature.
2. gain the ability to identify and analyse formal techniques (allegory, anthropomorphism, etc.) that literary texts employ to explore the human/animal distinction.
3. develop knowledge of the historical contexts from which literary and cultural texts emerge.
4. explore how the concepts of animality, race, gender, and sexuality intersect.
5. develop advanced skills in writing and argument.

Subject Content

-Philosophical perspectives on animals: consideration of John Berger's claim that animals have disappeared from modern life; Cartesian notion that animals are machines and therefore lack language and reason; Bentham's assertion that animal suffering is un

-Ethics and politics of carnivorousism: Elizabeth Costello's claim that humans and animals are essentially the same; the limits of sympathy for nonhumans.

-Allegorical animals: consideration of Steve Baker's assertion that literary animals are not transparent allegories about humans; anthropomorphism and anthropophobia.

-Intersection of animality with race, gender, and sexuality: how and why social and cultural minorities become associated with animals; investigation into how the opposition between human and animal conditions the bestialization of minorities.

-Emergence of the "posthumanities"; what does it mean to be posthuman? Can humans fully leave their humanity behind? What are the implications of the posthuman for the discourse of human rights?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Tutorial Paper: Tutorial Discussion Leader	1,000 words	25	N	Individual

Short Written Assignment	1,500 words (4-5 pages)	35	N	Individual
Take-Home Examination	1,500 words (5-6 pages)	40	N	Individual

Teaching Periods

LANG 3062 Literature and Philosophy

Credit Points 10

Legacy Code 100875

Coordinator Charles Barbour ([https://directory.westernsydney.edu.au/search/name/Charles Barbour/](https://directory.westernsydney.edu.au/search/name/Charles%20Barbour/))

Description This unit will examine ways in which literature and philosophy interact. It will consider the ways in which literature and philosophy offer important and different ways of thinking. And it will consider the differences between literature and philosophy. Literature will be understood to involve thinking through sensations, while philosophy will be understood to involve thinking through concepts. The unit will examine examples of interaction between literary texts and philosophical texts, considering how literary effects can inhabit philosophical texts and philosophical ideas can permeate literary texts. The unit will consider frequently occurring themes within both literature and philosophy, such as ethics (ways of living and acting).

School Humanities & Comm Arts

Discipline Philosophy

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate grounded theory for the way in which literature may generate ideas through emotions and sensations and the way philosophy generates ideas through concepts;
2. demonstrate an understanding of how philosophical thought differs from other kinds of thinking (science and art);
3. recognise the shared themes of philosophy and literature;
4. identify the ways in which philosophy offers important ways of thinking;
5. demonstrate how a knowledge of literature and philosophy might interact and to recognise the distinctions as well as the points of contact between literary and philosophical texts;
6. understand the ways in which literature and philosophy effect ways of thinking (outside their field); and
7. demonstrate knowledge of the effect of literature on language.

Subject Content

- introduction to theories of art and literature (aesthetics)
- introduction to understandings of thought processes (cognition)
- Discussion of A particular process of interaction between philosophy and literature (whether organised in relation to historical context or The tracing of A shared problematic)
- Examination of The different signs and their outcomes belonging to literature and philosophy

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Essay	1,000 words	35	N	Individual
Essay	2,000 words	50	N	Individual
Portfolio		15	N	Individual

Prescribed Texts

- A book of primary readings will be prepared by the subject coordinator.

LANG 3065 Medical Interpreting (UG)

Credit Points 10

Legacy Code 100197

Coordinator Eva Melhem ([https://directory.westernsydney.edu.au/search/name/Eva Melhem/](https://directory.westernsydney.edu.au/search/name/Eva%20Melhem/))

Description This unit aims to develop students' skills in interpreting at the professional level (formerly NAATI Level 3) through the modes of dialogue interpreting, consecutive interpreting, simultaneous interpreting, and sight translation in the domain of health services. Lectures are held in English for students of all languages. The tutorials are language specific in Arabic, Japanese, Mandarin and Spanish.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Assumed Knowledge

Bilingual competence in English and one of the languages offered by the School for the interpreting and translation programs.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. interpret a dialogue with segments of up to 60 words in length, in simulated triangular medical situations;
2. interpret accurately over the phone or via video-link in medical/health settings;
3. sight-translate documents such as medical papers, consent forms, information sheets, into both languages;
4. interpret consecutively into both languages, passages of up to 300 words in length;
5. interpret simultaneously into both languages, medical conference material as well as doctor's consultations with mental health patients
6. acquire an understanding of doctor-patient communication in the Australian context

7. apply essential knowledge of medical language, its history and etymology, and use the vocabulary relating to advanced medical matters;
8. explain the ethical and cultural considerations of Health Care Interpreters;
9. apply knowledge of the Australian medical system and of the medical system in the country/ies where the student's other language is spoken;
10. demonstrate the skills to recognise prefixes, suffixes and root words, identify their meanings and build words, and identify words used with pathological conditions.

Subject Content

The history and main features of medical language
 Theory and practice of simultaneous interpreting in medical settings
 Theory and practice of dialogue interpreting in medical settings
 Theory and practice of consecutive interpreting in medical settings
 Theory and practice of telephone and video-link interpreting in medical/health settings
 Theory and practice of sight translation of medical documents
 Basic concepts and vocabulary relating to advanced medical matters
 Knowledge relating to working as a Health Care Interpreter
 Knowledge relating to the role and ethics of a Health Care Interpreter
 Knowledge relating to the Health Care systems of Australia
 Medical Terminology: prefixes, suffixes, and root words

Assessment

LANG 3066 Postcolonial Literatures: Partition, Dependence and Exile

Credit Points 10

Legacy Code 102434

Coordinator Ben Etherington ([https://directory.westernsydney.edu.au/search/name/Ben Etherington/](https://directory.westernsydney.edu.au/search/name/Ben%20Etherington/))

Description This unit introduces the postcolonial literatures that emerged in the wake of decolonisation in the second half of the twentieth century. We will read literary works from across the

postcolonial world, including from the Middle East, South and South-East Asia, Africa, the Caribbean and Australia, and look at the way in which writers contended simultaneously with the legacy of the colonial system and major historical crises that emerged in the wake of its collapse. We will trace the emergence of the postcolonial reality as writers registered the impact of partition, separatism, persistent dependency, and the large-scale movements of people to the first world, whether as migrants or refugees. Alongside the literature, we will read major works of postcolonial theory: one of the most influential intellectual movements in recent history.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Assumed Knowledge

A basic knowledge of literary forms, techniques, and styles (as acquired in core subjects for the English major) is desirable as the subject focuses on specific aspects of literary writing.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. critically read a range of key postcolonial literary and theoretical works;
2. compare literary writing from different regions and perceive broader trends and divergences between them;
3. critically read and contrast different modes of literary writing;
4. identify theoretical and historical problems peculiar to the field of postcolonial literature, and deploy critical approaches best suited to addressing those problems;
5. articulate sustained critical arguments, whether in essays or tutorial discussions, focused by a reflective understanding of the relationship between literature, history and politics;
6. identify and understand the impact of postcolonialism on the contemporary world

Subject Content

Postcolonialism was arguably the most vital cultural movement of the second half of the twentieth century, catalysing fundamental shifts in literary cultures, thinking across humanities disciplines and public discourse writ large. Students will encounter literary works and ideas that have shaped the world around them, and will be able to bring these ideas to bear on their studies in any number of other areas. The subject will encompass the following concerns:

1. Postcolonial partition and separatism, and their impact on literary practice;
2. Neo-colonialism and neo-imperialism, and their impact on literary practice;
3. Postcolonial displacement, migration, exile and their impact on literary practice;
4. The work of Edward Said and other major postcolonial theorists;
5. 'Orientalism' and the question of representation and power;
6. Postcolonial feminism;
7. The historical reasons for the confluence of postcolonial and post-structural theory;
8. Dependency and world-systems theories and their implications for literary interpretation;
9. Subaltern theory and its implications for literary interpretation;

10.Theories of diaspora, exile and refuge and their implications for literary interpretation;
 11.Postcolonial writers and works from South and South-East Asia, Africa, the Caribbean, the Middle East and Australia.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

LANG 3068 Race in Literature

Credit Points 10

Legacy Code 101650

Coordinator Christopher Peterson ([https://directory.westernsydney.edu.au/search/name/Christopher Peterson/](https://directory.westernsydney.edu.au/search/name/Christopher%20Peterson/))

Description This unit explores a selection of modern literary works that focus on the question of "race." Readings will allow students to learn how notions of race have shifted over time, giving particular attention to how mixed-race people challenge dyadic conceptions of racial difference. Readings may include one or more national literatures, such as American or Australian literature.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

- critically discuss the representation of race in literature;
- analyse critically the interaction between literary texts and shifting definitions of race in a culture.;
- identify the historical contexts from which literary and cultural texts emerge;
- demonstrate the intersection of the concepts of race, sexuality and gender; and
- demonstrate advanced capacities in oral and written argument.

Subject Content

The national literature or literatures studied in this subject will vary from year to year depending on the subject coordinator's area of expertise. Topics to be studied will address some of the following topics:

- 19th century white authors and race: exploration of how their literary production reflects their views on slavery; race and animality
- 20th century black authors and race
- the problem of racial "authenticity"; investigation of how people of mixed-race identity problematize the black/white division; legal prohibitions on miscegenation.
- "Nativism" and "Primitivism" in the 1920s: exploration of how race relates to gender and sexuality; the Jew as racial other.
- black/white conceptions of beauty; consideration of Cheng's notion of "racial melancholia."

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

LANG 3069 Contemporary Irish Writing

Credit Points 10

Legacy Code 102078

Coordinator Anne Jamison ([https://directory.westernsydney.edu.au/search/name/Anne Jamison/](https://directory.westernsydney.edu.au/search/name/Anne%20Jamison/))

Description 'Contemporary Irish Writing' is a level 3 subject within the English and Creative Writing Majors/Minors. This subject examines a range of contemporary Irish writing across several different genres. It will provide an opportunity for students to read and study in detail a variety of texts that explore Irish consciousness in light of the social, cultural and political transformations of contemporary Irish society. Students will be asked to consider the ways in which these texts interrogate Irishness and identity, as well as issues of gender, sexuality, race and the environment in rural and urban Ireland.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Explain a range of contemporary Irish texts in their intellectual, historical and critical contexts.
- Discuss critical approaches to the study of a range of authors and the connections between them.
- Critically analyse texts and other critical readings.
- Appraise the formal and aesthetic dimensions of contemporary Irish literature.
- Recognise and formally analyse, in context, different genres of writing.
- Organise, plan and deliver a critically-informed literary essay.

Subject Content

1. Contemporary Irish writing.
2. Literary and cultural representations of gender, sexuality, race and the environment in contemporary Irish writing.
3. Irishness and Irish identity; personal and national self-definition in Ireland; Irish consciousness.
4. Contemporary social and political contexts within which recent Irish writing has been published.
5. Irish literary traditions and new directions in contemporary Irish writing.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Presentation	5-10 minutes	20	N	Individual
Essay	1000 words	35	N	Individual
Essay	1800 words	45	N	Individual

Prescribed Texts

The subject's set texts may vary from year to year depending on availability but selections will always be made from a variety of contemporary Irish writing across multiple genres (poetry, fiction, drama).

Teaching Periods

LANG 3071 Second Language Acquisition

Credit Points 10

Legacy Code 101451

Coordinator Kenny Wang ([https://directory.westernsydney.edu.au/search/name/Kenny Wang/](https://directory.westernsydney.edu.au/search/name/Kenny%20Wang/))

Description This unit is designed for students who are interested in understanding how a second language is learned. It examines learning in both natural or classroom contexts as well as language development in child and adult learners. Students are introduced to current theories of Second Language Acquisition, as well as current research and its applications to the classroom or the translation process. Students will conduct a small research project to become familiar with the process of learning a second language and some basic research notions and techniques.

School Humanities & Comm Arts

Discipline Linguistics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYB 1999 - Second Language Acquisition

Learning Outcomes

On successful completion of this subject, students should be able to:

1. appreciate the widespread importance of the Second Language Acquisition in Australia and its relevance both to the teaching and

learning of English as second language for non English background children and adults as well as overseas students (ESL);

2. demonstrate their understanding of the relevance of the teaching and learning of any language other than English (LOTE);
3. demonstrate an understanding of the development of the field and theories of Second Language Acquisition (SLA);
4. recognise developmental sequences in the acquisition of a second language with particular reference to English as a Second Language;
5. demonstrate their understanding of the variation and the role of individual differences and environmental factors in SLA;
6. conduct an SLA research project including elicitation, recording and analysis of interlanguage data;
7. apply their knowledge of the implications of SLA findings for language assessment and language instruction.

Subject Content

The relevance of Second Language Acquisition (SLA) to understanding learners in Australian and international contexts;

Key terms in SLA and central issues from observation of learners' behaviour;

Historical and theoretical developments in the SLA field: from Behaviourism and Contrastive Analysis to Current theories and Models of SLA;

Focus on one current theory: Processability Theory and its research methodology;

L1-L2 Transfer;

Language assessment and syllabus construction in L2: the Teachability Hypothesis and current developments.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	A combination of short quizzes, exercises conducted mainly over the first half of the semester requiring a total of 1.5-2 hrs of tutorial time.	30	N	Individual

Quiz	One short test on subject content, mainly multiple choice, held about mid semester, requiring about 45 minutes.	30	N	Individual
Report	2000 words	40	N	Individual

LANG 3072 Short Fiction in the Americas

Credit Points 10

Legacy Code 101791

Coordinator Chris Andrews ([https://directory.westernsydney.edu.au/search/name/Chris Andrews/](https://directory.westernsydney.edu.au/search/name/Chris%20Andrews/))

Description This unit surveys short fiction written in the Americas in English, French, Spanish and Portuguese during the twentieth century. It examines the history of short fictional genres, theories of their functioning, and the ways in which they register and transmit the various national and regional cultures of the Americas. The unit allows students majoring in Spanish to undertake language-specific assessment tasks (reading original texts in Spanish and writing their essay in Spanish) while other students read the texts and complete their assessment tasks in English.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate the key elements and features of a series of representative works of short fiction from the Americas.
2. Develop an original, closely-argued response to a question about short fiction couched in theoretical or historical terms.
3. Explain the role of the press and particular prestigious magazines in shaping American short fiction in the twentieth century.
4. Identify and describe genres of short fiction from the 'micro-story' to the novella, giving an account of their conventions.
5. Understand the mechanisms by which narrative tension is maintained in short fiction.
6. Analyze the ways in which short fiction constructs and undoes selves.

Subject Content

Short fiction in the twentieth century:

- The limits of short fiction: how short can it be? where does the novel begin?
 - writers, publishers, editors, readers: The periodical press and The short story
 - theories of short fiction from The Russian Formalists to Guillermo Martinez
 - short fiction and narrative selves
 - gender, race and culture in The short story
- The texts will be drawn from the following national and regional literatures:
- Argentina
 - Brazil
 - Mexico
 - The French-speaking Caribbean
 - USA
 - Canada

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Credit Points 10

Legacy Code 101450

Coordinator Rachel Hendery ([https://directory.westernsydney.edu.au/search/name/Rachel Hendery/](https://directory.westernsydney.edu.au/search/name/Rachel%20Hendery/))

Description This unit is designed to develop students' interest in language and society and give them an understanding and appreciation of variation in language (accents, dialects) and language change, language planning, as well as the interdependent relationship between

language learning, communicative competence and cultural practices, both in the Australian context and also in a more global context. It also aims to show students how this unit fits in with other language and linguistics-related disciplines, e.g. Linguistics, Bilingualism and Biculturalism, Second Language Acquisition.

School Humanities & Comm Arts

Discipline Linguistics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LANG 1023 - Sociolinguistics

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Reflect and discuss language variation in its complex social context.
2. Investigate variation in language empirically.
3. Evaluate the significance of language variation and multilingualism with a particular focus on Australia.
4. Apply principles and approaches to sociolinguistics in the contexts of language policy and planning, communication and education.

Subject Content

- Overview of The field of sociolinguistics and its connections to other fields of linguistics and other disciplines.
- Dimension of variation in language: social, stylistic and regional.
- language variation in Australia.
- language variation and its relation to language change.
- Multilingualism and language variation.
- language variation and society, including education.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Participation: Tutorial Exercises	1,000 words	30	N	Individual
Quiz: Final Test Online	60 minutes	40	N	Individual
Applied Project: Final Group Project	1,000 words	30	N	Group

Teaching Periods

LANG 3074 Spanish 301

Credit Points 10

Legacy Code 101953

Coordinator Ignacio Garcia (<https://directory.westernsydney.edu.au/search/name/Ignacio Garcia/>)

Description This unit is a Level 3 component of the Spanish major. It is intended for students who have already acquired a high intermediate level of proficiency and who wish to consolidate and improve this

proficiency. It enhances students' knowledge and comprehension of Spanish grammar, and develops their ability to apply such grammatical knowledge in their spoken and written language.

School Humanities & Comm Arts

Discipline Southern European Languages

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 1585 - Language and Grammatical Concepts 3A Spanish

Assumed Knowledge

All level 2 Spanish subjects or equivalent knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an advanced level of receptive and active lexical skills
2. Identify and apply strategies to overcome oral/aural difficulties and achieve communication in Spanish.
3. Demonstrate understanding of the rules of Spanish grammar
4. Apply this grammatical knowledge to monitoring their own written production
5. Process and summarise text materials in Spanish written by native speakers for native speakers
6. Compose correctly written texts in Spanish which can address a variety of situations
7. Demonstrate aural comprehension and oral production skills in Spanish at a level that enables them to engage in meaningful conversation with native speakers

Subject Content

- . A systematic review of all aspects of Spanish morphology
- . Aural comprehension practice in Spanish by listening to authentic language
- . Speaking practice in Spanish in spontaneous and prepared discussions as well as short talks on a variety of topics
- . Practice in reading a variety of Spanish materials and exercises on material read
- . Practice in various forms of writing in Spanish
- . Vocabulary extension exercises incorporated into points above

LANG 3076 Spanish 303: Advanced Writing Skills

Credit Points 10

Legacy Code 100153

Coordinator Ignacio Garcia (<https://directory.westernsydney.edu.au/search/name/Ignacio Garcia/>)

Description This unit aims to develop the writing skills to prepare them to make professional use of the language. It is particularly

recommended for those who wish to involve themselves in areas such as language teaching and translation. Students will be introduced to a full range of text types and language purposes. They will be guided to analyse, interpret and evaluate passages provided, and will be encouraged to extend their ability by experimenting with a variety of writing styles.

School Humanities & Comm Arts

Discipline Southern European Languages

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. improve reading skills in a variety of genres and develop techniques for autonomous learning of those skills;
2. learn to develop a written, coherent argument, discussion or explanation in Spanish;
3. be able to write effectively according to audience, purpose and content;
4. demonstrate in their written work a high level of grammatical accuracy and extensive knowledge of vocabulary;
5. be able to analyse texts in Spanish identifying meaning and how it is conveyed;
6. be able to analyse different text types and identify the different styles used in each genre;
7. be able to respond to such texts personally, critically and sensitively, evaluating its linguistic and cultural features;
8. develop habits of lifelong language learning.

Subject Content

- analysis of general features common to all text types: language, structure, setting, imagery, tone and mood, register, etc.
- Overview of writing styles: identification and practice with different styles of writing.
- Examination of A selection of contemporary texts in non-literary written genres: transactions, procedures, reports, expositions, business correspondence, legal texts, technical texts etc.
- analysis, interpretation and evaluation of samples of major text types: academic, scientific, legal, medical, commercial, literary.
- Creation of original texts in different text types: report, diary, procedural writing, newspaper Reporting, reviewing, letter writing.
- Rewriting of given texts for A different audience or purpose.
- Study of the nature of language acquisition, especially at advanced levels; techniques for developing habits oflifelong language learning.

LANG 3077 Spanish 304: Advanced Speaking Skills

Credit Points 10

Legacy Code 100154

Coordinator Ignacio Garcia (<https://directory.westernsydney.edu.au/search/name/Ignacio Garcia/>)

Description As a companion unit to Spanish 303: Advanced Writing Skills, this unit aims to prepare students to make professional use of the language, in this case by placing particular emphasis on oral skills. It is also specially recommended for those wishing to pursue careers

in areas such as language teaching and translation. Students will be introduced to a full range of oral text types and language purposes. They will be guided to analyse, interpret and evaluate examples of oral discourse, and encouraged to develop effective public speaking skills.

School Humanities & Comm Arts

Discipline Southern European Languages

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. improve listening skills in a variety of genres and develop techniques for autonomous learning of those skills;
2. master the notetaking skills necessary to accurately develop an argument or respond orally to one;
3. demonstrate high level of grammatical accuracy and extensive knowledge of vocabulary when speaking;
4. demonstrate breadth and depth in the treatment of relevant ideas and information;
5. be able to produce speech suited to a given audience, purpose and/or content, and to manipulate language to meet the requirements of the task with flair and originality;
6. develop aspects of effective public speaking skills, including techniques for the autonomous learning of those skills;
7. be able to analyse oral production in Spanish, identifying its linguistic and contextual features;
8. be able to respond to an argument personally, critically and sensitively;
9. develop habits of lifelong language learning.

Subject Content

- Variables of spoken language; content, speed, text type, number of interlocutors, accent, speaker's gender; techniques for improving listening comprehension.
- Aural comprehension practice in Spanish by listening to visiting speakers, audio and video tapes, radio and television broadcasts.
- Extensive practice with formal and informal registers, extempore and prepared speech, and group discussion.
- Analysis of a selection of contemporary oral texts: parliamentary speeches, radio interviews, public affairs programs, lawyers court addresses, judges' sentences, etc.
- Rewording of A given text for A different audience or purpose.
- Standard systems for notetaking; individual adaptation; techniques for notetaking practice.
- Public speaking skills: voice work, audience contact, discourse organization; techniques for autonomous development of public speaking skills.
- The nature of language acquisition, especially at advanced levels; techniques for developing habits of lifelong language learning.

Teaching Periods

LANG 3078 Spanish 305: Contemporary Literature

Credit Points 10

Legacy Code 100155

Coordinator Ignacio Garcia (<https://directory.westernsydney.edu.au/search/name/Ignacio Garcia/>)

Description This is a compulsory unit for students of the BA (Interpreting and Translation) (Spanish), and one of the optional units for students with advanced language skills in Spanish enrolled in the BA. It aims to introduce students to the study of contemporary Hispanic literary works so that they may acquire an appreciation of contemporary Latin American and Spanish literature and an understanding of the historical, political and social contexts in which that literature developed. Emphasis will be placed on the writer's role as an interpreter and critic of society.

School Humanities & Comm Arts

Discipline Southern European Languages

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. gain an understanding of the history of modern literature in Spanish;
2. improve their comprehension skills through reading a wide variety of Spanish texts, including regional and social variants, and specific registers;
3. understand some of the main events which shaped the character of Hispanic writing in the 20th Century;
4. gain insights into writers' attempts to interpret society (e.g. problems, trends, controversies);
5. acquire the vocabulary necessary to be able to discuss and write about the content and structure of these texts, as well as their historical and cultural context.

Subject Content

An overview of the history of literature in Spanish in the 20th Century. Some significant events which had an impact on Hispanic literature: the Spanish-American War, the Spanish Civil War, the Cuban Revolution. Examination of a selection of representative contemporary novels from Spain and Latin America.

Specific themes and leitmotifs developed by contemporary authors, e.g. passivity, waiting, guilt, love, uncertainty about identity.

The development of writing skills using genres such as reviews and essays.

Teaching Periods

LANG 3079 Spanish 306: Contemporary History

Credit Points 10

Legacy Code 100156

Coordinator Ignacio Garcia (<https://directory.westernsydney.edu.au/search/name/Ignacio Garcia/>)

Description This unit aims to introduce students to the history of Spain and Latin America in the Twentieth century to enable them to understand the historical background to present-day events, and to identify the major contemporary policy issues in these regions of the world.

School Humanities & Comm Arts

Discipline Southern European Languages

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Students will:
2. gain an understanding on some of the main events which shaped the character of the Hispanic world in the 20th Century;
3. gain an understanding of the basic economic, political, and cultural infrastructures of the Hispanic world and how they interact.;
4. learn to distinguish the regional differences within the Hispanic world;
5. develop critical thinking skills relevant to the multidisciplinary nature of the subject;
6. acquire the vocabulary necessary to be able to discuss and write about the historical and cultural context.

Subject Content

An overview of the history of Spain and Latin America since 1898.

A detailed study of some events which had a major impact: the Spanish American War, the Spanish Civil War, the Cuban Revolution, the Latin American military regimes.

A study of the end of the Cold War period and its impact in Central America and in the rest of the Hispanic world.

An examination of major present day policy issues in Spain and Latin America.

Teaching Periods

LANG 3080 Spanish 307: Classical Literature

Credit Points 10

Legacy Code 100157

Coordinator Ignacio Garcia (<https://directory.westernsydney.edu.au/search/name/Ignacio Garcia/>)

Description This unit provides an introduction to the social and cultural history of Spain of the Sixteenth and Seventeenth centuries, and to the principal literary monuments of this period. The unit is based on the study of selected representative texts and appropriate background readings.

School Humanities & Comm Arts

Discipline Southern European Languages

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. become familiar with main historical events during the Habsbourg monarchy;
2. delve into the culture of the Renaissance and the Baroque periods in Spain;
3. improve their reading skills through the reading of works of the major Golden Age poets and prose and play writers;

4. learn to analyse some of the great masterpieces of literature during this period;

5. acquire the vocabulary necessary to be able to discuss and write about the message, structure, historical and cultural context of these texts.

Subject Content

- general introduction to The history of The Iberian Peninsula during The XVI and XVII centuries.

- general introduction to The culture of The Renaissance and Baroque periods.

- An Overview of The history of literature of The Golden Age period.

- Examination of A selection of representative poems, novels and plays from this period.

Teaching Periods

LANG 3081 Spanish 308: Spanish Sociolinguistics

Credit Points 10

Legacy Code 100158

Coordinator Ignacio Garcia (<https://directory.westernsydney.edu.au/search/name/Ignacio Garcia/>)

Description This unit aims to give students an understanding of the phonological, morpho-syntactic, semantic and pragmatic changes in the Spanish language as spoken and written at the start of its second millennium. Particular attention will be paid to the dialectal geography of the Hispanic world, and to the problems faced by the language today, with particular reference to its 'Spanglish' version in emigre communities in the United States and Australia, and to information technology.

School Humanities & Comm Arts

Discipline Southern European Languages

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. understand the phonological, morphosyntactic and lexical variations and changes undergone by the Spanish language in the last decades;
2. recognise differences across regional varieties in terms of politeness, forms of address and speech acts;
3. have an overview of the dialectal geography of Spain, and of the problems encountered in the areas in which the language shares official status with other Spanish languages;
4. learn about the dialectal geography of Spanish America, the characteristics of the principles dialect groups, and the influences of migrant and indigenous languages;
5. explore the problems faced by Spanish today, especially when entering into contact with English as manifested in the 'Spanglish' versions of the language in the subjected States and in Australia;
6. gain an understanding of the extent and status of Spanish in the world, and of issues of standardisation.

Subject Content

- The Spanish language at the beginning of the 21st century: phonological, morphological, syntactic and lexical variation and change.
- Spanish pragmatics: terms of politeness, forms of address, speech acts.
- Peninsular Spanish: The main dialect groups. language policies regarding bilingualism in Catalonia, The Basque Country and Galicia.
- American Spanish. The main dialect groups and their structural characteristics. The impact of indigenous languages and of migrant communities.
- The phenomenon of 'Spanglish'; code switching and language function; 'diglossia' in emigre communities; problems in information technology.
- The extent and status of Spanish in The world.
- Issues of standardisation: The use of The language in The media and by The administration, The use of non-sexist language.

Teaching Periods

LANG 3082 Special Study in Languages and Linguistics

Credit Points 10

Legacy Code 100201

Coordinator Kenny Wang ([https://directory.westernsydney.edu.au/search/name/Kenny Wang/](https://directory.westernsydney.edu.au/search/name/Kenny%20Wang/))

Description This Level 3 Languages and Linguistics unit is, primarily, a self-study unit designed to cater for a special area of interest in languages and linguistics not otherwise covered in the units on offer in the languages program or in the BA (Interpreting and Translation) and/or where the student may otherwise find it difficult to complete his or her program of study. Once the topic chosen by the student is approved by the Unit Coordinator a supervisor is nominated and an individually-tailored learning contract, including appropriate language-specific and/or linguistics readings and tasks, is drawn up in collaboration with the supervisor and is submitted to the Unit Coordinator for approval. This approval process should happen, ideally, at least one week prior to the beginning of the teaching semester.

School Humanities & Comm Arts

Discipline Linguistics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Permission from the subject Coordinator or Academic program Advisor is required. A Rule Waiver is required to enrol in this subject.

Assumed Knowledge

Level 3 Languages and Linguistics subjects or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of a selected topic in humanities, languages, linguistics, literature, translation or language education.
2. Develop, negotiate and plan for the implementation and evaluation of a small-scale research project.

3. Demonstrate basic research skills such as writing a literature review, basic research methodology and critical evaluation of research.
4. Apply independent research skills to achieve further personal development.

Subject Content

Content will vary according to the topic chosen for study. Where appropriate, workshops and/or seminars introducing approaches to research will be conducted.

Inherent Requirements

There are inherent requirements for this subject that you must meet in order to successfully complete this subject. Make sure you read and understand the requirements for your subject online.

Inherent Requirements (https://www.westernsydney.edu.au/ir/inherent_requirements/)

Credit Points 10

Legacy Code 100198

Coordinator Kenny Wang ([https://directory.westernsydney.edu.au/search/name/Kenny Wang/](https://directory.westernsydney.edu.au/search/name/Kenny%20Wang/))

Description This unit explores the functional, discursive, rhetorical, syntactic, semantic and lexical features of texts in the following

specialised fields: tourism, news media, legal texts, technical & scientific materials. Knowledge of the functions and textual features of specialised texts will provide a basis for translating these specialised texts from and into English. Students will analyse the texts in both languages, and discuss ways in which the texts are to be translated. The unit will be available, depending on sufficient demand, for Arabic, Japanese, Mandarin and Spanish.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Students must be bilingual in the language combinations offered by the School

Assumed Knowledge

Proficiency in English and one other language (LOTE) at native or near-native level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. identify and analyse the functional, discursive, rhetorical, syntactic, semantic and lexical features of English texts in the specialised fields of tourism, law, journalism and science and technology;
2. identify and analyse the functional, discursive, rhetorical, syntactic, semantic and lexical features of LOTE texts in the specialised fields of tourism, law, journalism and science and technology; and
3. deploy translation strategies appropriate to the specific text types.

Subject Content

1. Development of general translation skills to and from English
2. Introduction of different specialised genres.
3. Translation of texts to and from English from specialised fields such as information booklets at museums, news articles of various types, prescriptive and non-prescriptive legal texts, technical manuals.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

LANG 3084 Text Analysis for Translation (UG)

Credit Points 10

Legacy Code 102523

Coordinator Chong Han ([https://directory.westernsydney.edu.au/search/name/Chong Han/](https://directory.westernsydney.edu.au/search/name/Chong%20Han/))

Description The unit provides support for students in the BA (Interpreting and Translation) program to develop their analysis skills of the texts they will confront in their translation work. It is a bilingual unit, that is texts in both English and the respective Language Other Than English will be analysed to reveal the structures of meaning and linguistic and contextual features of the texts. It encourages close readings of source texts, understanding where extra-textual knowledge is relevant, and identifying essential meaning components underlying surface linguistic features.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Students must be enrolled in 1519 Bachelor of Arts (Interpreting and Translation) or 1692 Bachelor of Arts (Interpreting and Translation) Dean ♦fs Scholars.

Assumed Knowledge

Practice in translation and learning of translation strategies at Level 1 and 2 of the BA (Interpreting and Translation), or equivalent knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate understanding of theories of text analysis;
2. Identify linguistic and textual structures of English and LOTE passages;
3. Conduct textual analysis of English and LOTE passages;
4. Apply text analysis techniques to translation tasks; and
5. Evaluate and critique the quality of their own translations.

Subject Content

Theories of text analysis as they relate to the translation task.

Identifying different types of source texts

Conducting comparative and contrastive analysis of English and LOTE
Identifying of intra-linguistic factors in source texts in both English and LOTE

Identifying where extra-textual knowledge is required for full comprehension of source texts

Defining translation problems in source texts

Evaluating translation quality

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Translation exercises	150 words x 2 (1 x English + 1 x LOTE)	30	N	Individual
Reflective reports	500 words x 2	30	N	Individual
Text analysis exercises	2 Text analysis exercises (each exercise has both English and LOTE tasks)	40	N	Individual

Prescribed Texts

LANG 3086 The Novel

Credit Points 10

Legacy Code 100893

Coordinator Jason Tuckwell ([https://directory.westernsydney.edu.au/search/name/Jason Tuckwell/](https://directory.westernsydney.edu.au/search/name/Jason%20Tuckwell/))

Description This unit explores the status and success of the novel as the dominant modern literary form. It examines aspects of the history and development of the novel from the seventeenth century up to the present, along with a range of novelistic texts from one or a number of literary traditions: from classic British and/or American texts to contemporary postcolonial fiction; from the search for the mythical "great Australian novel" to famous and not-so-famous works in languages other than English.

School Humanities & Comm Arts

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Read and critically examine a range of novelistic texts from one or a number of cultural traditions.
2. Demonstrate an understanding of a number of fictional modes eg.. modernist, post-modernist.

3. Describe and evaluate a range of narrative techniques and features - e.g. point of view, narrative time, plot versus story, characterisation, dialogue, structure.
4. Demonstrate an understanding of changes that have taken place in novelistic forms over a period of time, thereby showing also their understanding of literary genre.
5. Describe the relationships between the novel and other literary and narrative forms.

Subject Content

- . The origins of the novel in earlier genres such as the poetic epic, the prose romance, and Menippean satire.
- . The relationship between novelistic writing and journalism, from Defoe to the present.
- . The epistolary novel, from Richardson to the present.
- . The historical novel, from Scott to the present.
- . Romanticism and the novel.
- . Modernism and the novel.
- . Postmodernism and the novel
- . Focus study of a national tradition; for example, the American novel, the Australian novel, the English novel, the Irish novel, the Scottish novel, etc.
- . Novels in languages other than English: French, German, Spanish, Russian, Indonesian, Japanese, etc. - to be studied in translation.
- . The novel and high culture: F.R. Leavis and "The Great Tradition".
- . "Genre" fiction - such as sci-fi, fantasy, thriller, romance, gothic - and popular culture.
- . The adaptation of novels into film and television.

LANG 3087 Women's Writing

Credit Points 10

Legacy Code 102374

Coordinator Helen Koukoutsis ([https://directory.westernsydney.edu.au/search/name/Helen Koukoutsis/](https://directory.westernsydney.edu.au/search/name/Helen%20Koukoutsis/))

Description This unit focuses on the study of women's writing from a broad social and cultural context. While the women writers will change from offering to offering, the content will remain centred on feminist theory and discourses of race, ethnicity, class and gender. The unit will draw on a variety of genres including drama, fiction, poetry, essay and short story. Students will explore women's concerns about motherhood, marriage, violence and domesticity; cultural identity, vocation and the body as (sexual) object. They will also explore women's experiences of madness and victimisation; segregation and alienation; power/lessness and the public sphere.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate knowledge and appreciation of women's writing from across various social and cultural contexts, including the U.S., Europe, Asia and Australia
2. Identify and analyse the generic features and thematic concerns of women's literature
3. Critically assess the extent to which race, ethnicity, class and gender factor into women's creative spaces and practices

4. Apply feminist literary criticism to a reading of the subject's primary texts
5. Conduct independent scholarly research to build on primary knowledge of women's literature
6. Prepare and write well-analysed critical literary essays.

Subject Content

- Women's writing from Australia, New Zealand, U.S., South America, Britain, Europe and Asia
- The changing Roles of women from specific Histories and contexts
- Feminist theory and literary criticism
- Women's rights and social movements
- Migration, diaspora and women's identity
- Critical discourses of race, ethnicity, class and gender
- Women's concerns about motherhood, marriage, violence and domesticity; cultural identity, vocation and the body as (sexual) object
- Women's experiences of madness and victimisation, segregation and alienation, power/lessness and the public sphere

Assessment

LANG 3089 World Literature in Translation

Credit Points 10

Legacy Code 101669

Coordinator Chris Andrews (<https://directory.westernsydney.edu.au/search/name/Chris Andrews/>)

Description This unit examines representative works of world literature written in languages other than English in order to address a range of literary and cultural issues, including the role of translation in crosscultural communication.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate the key elements and features of a series of important works of world literature;
2. Produce an original, closely-argued interpretation of a literary work;
3. Examine how the methods of translating literature vary across cultures and historical periods;
4. Explore the differences between literature and other kinds of discourse, asking: Are there literary universals?
5. Investigate the impact of translated works of literature on the cultures that receive them;
6. Identify the differences between the ideas of "world literature" that have developed in different cultures.

Subject Content

- The reading, interpretation and Discussion of A series of important works from World literature in translation
- The Study of cases of literary transfer: cases in which plots, characters, forms and concepts, as well as works, have been transferred from one linguistic culture to another, and how they have affected The cultures that have received them
- Critical reflection on how "world literature" is constructed differently in different cultures

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Recorded presentation on one of the texts	5 minutes	25	N	Individual

Four short answer tests on the texts and the content of the lectures (10 minutes each)	40 minutes	25	N	Individual
Comparative essay	2,000 words	50	N	Individual

Prescribed Texts

- Shushaku Endo, *The Sea and Poison*, translated by Michael Gallagher, New York: New Directions, 1992.
- Gustave Flaubert, *Madame Bovary* (Penguin Classics Deluxe Edition, Translated by Lydia Davis; Harmondsworth; Penguin, 2011.
- Roberto Bolaño, *Distant star*, Translated by Chris Andrews, London; Harvill, 2004.
- Assia Djebar, *Women of Algiers in their Apartment*, Translated by Marjolijn de Jager. Charlottesville; University Press of Virginia, 1992.

Teaching Periods

LANG 3091 Writing and Society

Credit Points 10

Legacy Code 101670

Coordinator Jacinta Van Den Berg (<https://directory.westernsydney.edu.au/search/name/Jacinta Van Den Berg/>)

Description This unit explores the social dimensions of literature, both generally, by considering the role played by tradition, authorship, genre and style in the literary exploration of values, and in specific terms, through a close examination of works which have had an important social impact in their time, including those in translation, from a range of contemporary literatures. The lecturers are members of the Writing and Society Research Group, many of whom are practising authors.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. understand the social impact of literary works;
2. understand the formal and theoretical issues involved the literary representation and exploration of social values;
3. analyse ways in which literary texts from different cultures portray the values of those cultures; and
4. appreciate the way literature works when viewed from the different points of view of authors and readers.

Subject Content

Tradition and the Australian writer
The literary imagination and the sense of place
Writing, racism and social prejudice

Solitude, self-exile and the provincial author
 Migration, settlement and community
 Social surfaces, psychological depths
 Feminism and fictocriticism
 Indigenous storytelling and its influences
 Neo-realism and contemporary satire
 Politics and poetic form

Credit Points 10

Legacy Code 102765

Coordinator Christopher Conti ([https://directory.westernsydney.edu.au/search/name/Christopher Conti/](https://directory.westernsydney.edu.au/search/name/Christopher%20Conti/))

Description This unit explores the value of literature by examining its competing uses in a range of historical contexts down to and including our own. Literature's potent combination of pleasure and instruction embraces conflicting personal, ethical, political, social, and ideological uses even as it resists them. The unit brings a comparative focus to bear on texts from diverse historical and cultural settings as a way of reflecting on and rediscovering the value of literature in the digital age. Students will also explore the function of criticism to educate the individual sensibility and shape the cultures of public life. Primary texts include poems, narrative fiction, essays, and may include drama, film, and other audiovisual material.

 COMM 1005 OR
 LANG 1015 OR
 LANG 1016 OR
 LANG 2035

Equivalent Subjects LANG 3032 - English Literature After 1830

Restrictions

Students are required to have completed two of the three level 1 & 2 English core subjects.
 Successful completion of 60 credit points in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate an understanding of literature as a form of writing and as a way of reading;
2. assess the value of literature across the range of its contested uses;
3. critically evaluate ongoing debates around the literary canon and the public value of literature;
4. evaluate literary texts and their interpretations as a means of cultural intervention as well as of cultural analysis;
5. articulate the distinction between literature's context of production and its context of reception as related but separate frames of interpretation;
6. identify the roles that literature and literary criticism have in cultivating the cognitive and affective potential for social and political change.

Subject Content

Content in this subject will include, but is not limited to, the following

1. debates about how literary texts have been used in order to effect, or resist, social, political, moral, economic, artistic and ethical change, and how language, form and genre are integral in comprehending the way texts pursue their ends;
2. debates about the degree to which literature is, or can be, an effective or viable medium of change;
3. consideration of the ways in which literature has been used as a vehicle for the understanding of self, society and other;
4. debates about literary value, including critical considerations of the canon and canonicity, literature's political capacities (or incapacities), and the role of literature in the digital era;
5. examination of literary texts for their uses in social, moral, and political discourse and for their usefulness or resistance to these uses.

Legacy Code 102773

Coordinator Anna Nettheim ([https://directory.westernsydney.edu.au/search/name/Anna Nettheim/](https://directory.westernsydney.edu.au/search/name/Anna%20Nettheim/))

Description This is an advanced (Level 3) unit in the Indonesian Specialisation. It focuses on the Indonesian language styles and vocabulary appropriate for academic purposes. Students will learn formal language through reading authentic materials, engaging in open discussion, and writing on topics related to Indonesian culture, language, and other historic and current issues in an academic manner. Students will develop their formal writing skills in Indonesian and will learn how to discuss academic subjects in a formal style. They will begin to develop their ability to translate Indonesian and English texts in a formal manner. They will also develop intercultural awareness by comparing and contrasting academic styles and contexts in Australia and Indonesia.

School Humanities & Comm Arts

Discipline Southeast Asian Languages

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LANG 3039 - Indonesian 301 Indonesian for Academic Purposes

Assumed Knowledge

Successful completion of Indonesian 202 or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Communicate in Indonesian orally and in writing using all major sentence constructions.
2. Identify and use appropriate formal styles for effective oral and written communication.

3. Use and interpret original Indonesian texts to better understand Indonesian society and communicate effectively at a high level about a range of topics.
4. Compare and contrast academic writing in English and Indonesian and identify cultural differences.
5. Undertake basic independent research in Indonesian.
6. Undertake simple translation tasks.

Subject Content

Grammar

- yang phrases in academic Indonesian
- Object-focus constructions
- Figures of speech
- suffix ?i
- Forming nouns through affixation

Readings

- Asal Usul Jakarta
- Bahasa Indonesia dalam Masyarakat
- Wayang Kulit
- Wisata Kuliner di Indonesia
- Wajib Belajar di Indonesia

During this subject students will undertake regular conversation practice, listening practice and writing practice relevant to each topic using both the subject materials and contemporary native language materials sourced online. Students will also undertake some translation practice using the readings and other related materials.

Assessment

On successful completion of this subject, students should be able to:

1. demonstrate a good understanding of subtitling and captioning;
2. explain constraints that govern subtitling and captioning and corresponding rules in subtitling and captioning;
3. demonstrate creative and intelligent condensing principles and strategies in subtitling and the principle of verbatim in captioning;
4. demonstrate understanding of domesticating and foreignising theories and their applications in subtitling;
5. explain the intricacies and difficulties of achieving cross-lingual and cross-cultural communications;
6. demonstrate a high level of language proficiency in a variety of text genres.

Subject Content

Presentation of specific nature of subtitling and captioning as audiovisual translation, including the governing constraints and principles
Introduction of linguistic and cultural dimensions to subtitling and captioning
Introduction of relevant translation theories and their application
Practical strategies in subtitling and captioning

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Presentation	5 minutes	20	N	Individual
Case Study Report	1000-1500 words	50	N	Individual
Intra-language subtitling	Part of English script from a TV program in word document	30	N	Individual

LANG 7005 Bilingualism and Education

Credit Points 10

Legacy Code 102525

Coordinator Ruying Qi ([https://directory.westernsydney.edu.au/search/name/Ruying Qi/](https://directory.westernsydney.edu.au/search/name/Ruying%20Qi/))

Description Bilingualism and Biculturalism are important aspects of life in Australia. Throughout much of the world, bi-multilingualism is the norm for both children and adults. This unit aims to give students an understanding and appreciation of the most important facets and manifestations of bi-multilingualism and bi-multiculturalism, in the linguistic, cognitive, personal, societal and educational spheres. It also aims to show students how this unit relates to broader studies in education, humanities, linguistics, and social sciences. This unit equips students with current research theories and methods in working effectively in early childhood and primary education, language teaching and other workplaces in bi-multilingual and bi-multicultural contexts.

School Humanities & Comm Arts

Discipline Linguistics

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate knowledge about raising children bilingually and biculturally;
2. explain language choice, language maintenance and language shift in multilingual societies as well as code-switching and language mixing in bilingual speaker;
3. identify relationships between bilingualism and cognitive development;
4. evaluate the effectiveness of bilingual education programs and aspects of cross-cultural and/or inter-cultural communication;
5. demonstrate understanding of the complex issues and different dimensions of individual and social bilingualism;
6. critically analyse a range of attitudes toward bilingualism and their relationships with multi-identity;

7. apply current research in bilingualism to teaching and professional contexts.

Subject Content

Main concepts of bi-multilingualism and bi-multiculturalism.

Language in contact - language maintenance, shift and change; language attitudes; multi-identity.

The nature of language interaction and code-switching, e.g. language choice.

Bilingualism and cognitive development.

Bilingual language acquisition; raising children bilingually and biculturally.

Bilingual education in Australia and overseas; bilingual programs.

Bilingualism and communication.

Bilingual children and families: Multiliteracies

Assessment

LANG 7006 Business Interpreting

Credit Points 10

Legacy Code 101868

Coordinator Eva Melhem ([https://directory.westernsydney.edu.au/search/name/Eva Melhem/](https://directory.westernsydney.edu.au/search/name/Eva%20Melhem/))

Description The unit builds student skills in different settings of business interpreting, from formal business meetings to on-site work in production units to business social activities. Interpreting skills are

honed through practice utilising live, media and internet input. The unit also examines the complexity of the interpreter's role and the interrelationship between business ethics and interpreting ethics when interpreters function as members of a business team.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) LANG 7020

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Students should have at least an intermediate level of specialised technical skills necessary for the different modes of interpreting: dialogue, consecutive, simultaneous, and sight translation, before attempting this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Interpret with confidence in a variety of business settings
- Understand, critically analyse and replicate business discourse patterns and business terminology
- Explain and build into their practice the role demands and role limits of interpreters in diverse business settings
- Identify appropriate behaviour in business settings including dress, observance of formalities, and awareness of site-specific requirements such as safety procedures
- Appraise the non-interpreting functions affecting the interpreter in the context of business team needs and team priorities
- Sight translate with confidence texts related to business settings

Subject Content

- Descriptions and analysis of representative business settings where interpreters are engaged
- interpreting and sight translation practice in business settings including formal greetings and introductions, meeting procedures, site visit formalities and negotiations
- The pragmatics and etiquette of business interpreting in The context of cultural differences and intercultural communication
- business terminology in finance, trade, contracts and Negotiation
- Examination of Roles and Ethical challenges for interpreters in business settings
- interpreters as members of business Negotiation teams
- Building interpreting teams and teamwork in business interpreting
- The interpreter as A small business

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Portfolio	2,500 words	40	N	Individual
Participation	varies - during class time	10	N	Individual
Short Answer	1 hour	10	N	Individual
Viva Voce	Per student: 1 10 minute interpreted business dialogues as individuals or members of teams; 2 X 200 word texts for sight translation activities.	40	N	Individual

Prescribed Texts

LANG 7007 Community and Social Services Translation (PG)

Credit Points 10

Legacy Code 101845

Coordinator Mustapha Taibi ([https://directory.westernsydney.edu.au/search/name/Mustapha Taibi/](https://directory.westernsydney.edu.au/search/name/Mustapha%20Taibi/))

Description This unit aims to develop skills in Community Translation (also known as Public Service Translation), which focuses on facilitating written communication between public services and community members who do not have a good command of mainstream language(s). The aim of the unit is for students to develop skills in producing target texts in styles appropriate to specific groups and communities, and to the content and function of the source text. The unit also aims to develop skills in researching and using appropriate specialist terminology, editing and revising, and producing camera-ready documents. On the basis of these skills, the unit is to further develop students' ability to reflect upon translation in terms of strategies and appropriateness in relation to the target audience as well as make critical written and oral assessment of relevant translations. The unit will be available, depending on sufficient demand, for Arabic, Japanese, Mandarin, Spanish, Korean, Persian and Vietnamese.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYB 3387 - Community Translation LGYA 0966 - Community Translation PG

Restrictions

Students must be bilingual in the language combinations offered by the School. Students must be enrolled in a postgraduate program.

Assumed Knowledge

Sufficient proficiency in English plus one other language at native or near-native level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Effectively translate texts relevant to their specific communities and audiences;
2. Translate 250 words of texts in 60 minutes (based on NAATI marking guidelines) into and from English;
3. Analyse and reflect upon their own translations in terms of translation strategies appropriate to specific groups and communities to develop their own resources for improvement;
4. Apply the insights of Translation Theory to translation critique as well as to their practice of Community Translation; and
5. Demonstrate translation and revision skills at a near-professional level of competence.

Subject Content

1. Development of general translation skills to and from English.
2. Development of ability to reflect upon students' own translations in terms of translation strategies, and make critical assessment of translations in general.
3. Translation of community information from English into the LOTE of texts relating to health, social security, and other government services as well as relevant private sector services.
4. Translation into English, including extract translation, of personal and official documents such as birth certificate, marriage certificate, driver's licence, and educational qualifications.
5. Translation into English of texts from community-language newspapers and magazines circulating in Australia.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Professional Task	250 words each or equivalent	30	N	Individual
Essay	1000-1500 words	30	N	Individual
Final Exam	250 words each text, 2 hours	40	N	Individual

LANG 7008 Conference Interpreting

Credit Points 10

Legacy Code 102167

Coordinator Margot Seligmann ([https://directory.westernsydney.edu.au/search/name/Margot Seligmann/](https://directory.westernsydney.edu.au/search/name/Margot%20Seligmann/))

Description Conference Interpreting is a highly complex activity which requires a high level of bilingualism, expertise in a variety of interpreting skills and knowledge of specialised discourse and contextual issues that relate to international fora. This unit aims to introduce students to the theory and practice of Conference Interpreting. The theoretical concepts that underpin Interpreting will be taught and become the basis for all practical work.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYB 3386 - Conference Interpreting LGYA 0965 - Conference Interpreting LGYA 1423 - Conference Interpreting 1

Restrictions

Students must be enrolled in 1780 Master of Arts Translation and Interpreting Studies, 1602 Graduate Certificate in Interpreting and Translation, 1777 Master of Interpreting and Translation or, if a non award student, must be a practicing Interpreter.

Assumed Knowledge

Bilingual competence.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate knowledge of different theories that can be applied to the practice of conference interpreting
2. explain the latest research into conference interpreting and its applications to the practice
3. use public speaking skills relevant to the work of conference interpreters
4. demonstrate knowledge of the history, role and structures of international fora such as the UN, NATO, WHO and their committees
5. use essential vocabulary relating to international conferences

6. demonstrate practical knowledge about conference interpreting equipment, working conditions, professional associations, preparation for assignments and team work

7. apply basic conference interpreting skills

Subject Content

The language of speeches, reports, debates, financial statements
A range of oral texts in topics commonly discussed at international conferences

The skills and techniques necessary to interpret in simulated conference situations in the consecutive mode

The skills and techniques necessary to sight translate conference documents accurately

The skills and techniques necessary to interpret in a simulated conference situation in the simultaneous mode

Theories of conference interpreting

Prepare for a professional conference interpreting assignment

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Oral Presentation	10-15 minutes/ approximately 1,000 word equivalent	20	N	Individual
Continuous Assessment	Practical in-class exercises	20	N	Individual
Portfolio and Report	500 word report plus conference preparation portfolio	30	N	Individual

LANG 7009 Contexts of TESOL

Credit Points 10

Legacy Code 102335

Coordinator E'Taf Alkhlaifat ([https://directory.westernsydney.edu.au/search/name/ETaf Alkhlaifat/](https://directory.westernsydney.edu.au/search/name/ETaf%20Alkhlaifat/))

Description This unit introduces students to the field of TESOL and to some of the historical, socio-cultural and academic contexts which influence it - adult education, linguistics, intercultural and migration

factors, bilingualism studies and new technologies. It provides students with some insight into the key issues in these fields which impact on the teaching and learning of English as a second/foreign language.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects TEAC 7021 - Contexts of TESOL

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the influences of various branches of linguistics on English language teaching and learning
2. Apply knowledge of contemporary approaches to adult education to the field of adult language teaching and learning in local and international contexts
3. Evaluate policies and programs associated with migration and employment in Australia
4. Critique the politics of English and English language teaching in the current local and global contexts
5. Evaluate pedagogical and linguistic influences on approaches to English language and teaching and learning.

Subject Content

- linguistics and TESOL

Language and culture-linguistic relativity, sociolinguistics-language variation, register and dialect, creoles and pidgins, language groups, bilingualism, first and second language acquisition theory, aspects of theories of language in use - pragmatics, discourse analysis, systemic functional grammar, translation and interpreting, and intercultural education

- Adult learning

Theories of adult learning, factors affecting adult learners, learning styles, strategies and preferences, motivation, learner-centredness and self-directed learning, experiential learning, diversity and the notion of the 'other'

- Global contexts of TESOL

A brief history of the English language, English as an international language, English as a foreign language, lingua franca and the politics of English, cultural diversity and the imperialist view of English, the spread of English and growth of world Englishes, language planning and policy, and the roles and 'future' of English

- local contexts of TESOL

Migration and English language education in Australia - Australian citizenship test, Understanding major adult ESL programs including English Language Intensive Courses for Overseas Students (ELICOS), Adult Migrant English Program, Skills for Employment and Education, English for Specific Purposes, General English Program, teaching and learning basic ESL skills, internationalisation of education and English language teaching industry in Australia

- TESOL methodologies

Overview of approaches to English language teaching, issues in the post-methods era - communicative language teaching, addressing the grammar gap, content-based, text-based, and task-based language teaching and learning

- technologies

Applications of various technologies in TESOL, Computer Assisted Language Learning (CALL) (e.g. using iPad, Internet) and new media (e.g. blogs) in ESL/EFL teaching and learning, distance learning, form-focused instruction enhanced by technology, digital storytelling, video games and multimedia projects.

Assessment

LANG 7010 Critical Literature Review

Credit Points 20

Legacy Code 200744

Coordinator Terry Sloan (<https://directory.westernsydney.edu.au/search/name/Terry Sloan/>)

Description The aim of this unit is to develop skills in applying rigorous analysis and critical assessment to research-based literature in general, through an examination of literature in a particular field. This unit is intended to provide candidates with the basic skills needed to do critical analysis of literature while also enabling them to gain more familiarity with theories, issues, and problems in a particular research area. Literature will be analysed through a balanced and constructive critique of its strengths and weaknesses, providing suggestions for how the work might have been improved.

School Business

Discipline Language And Literature

Student Contribution Band HECS Band 1 20cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 8710 - Critical Literature Review

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Present an overview of literature sources about their selected topic from scholarly journals and texts.
2. Examine authors' perspectives on their topic and the arguments that they present.
3. Critically analyse the style, structure, and content of the literature.
4. Critically analyse the philosophical, theoretical and methodological approaches of the research outlined in the literature.
5. Employ scholarly conventions used in summarising and analysing literature, compiling research reports and articles and in dissertation construction.
6. Develop clear questions and propositions as guides for research investigations.

Subject Content

- The first content strand runs vertically: The subject content, formed by The subject matter of The research literature found in The readings.
- The second content strand runs horizontally: The research content, formed by knowledge and Understanding from The philosophy and methodology of The social sciences.
- The analysis methodology is A process approach that The course takes to The subject and content, through The techniques of analysis and critique of The literature.

Teaching Periods

LANG 7011 Formal and Functional Grammar

Credit Points 10

Legacy Code 102621

Coordinator David McInnes ([https://directory.westernsydney.edu.au/search/name/David McInnes/](https://directory.westernsydney.edu.au/search/name/David%20McInnes/))

Description This unit invites students to study the grammar of English from two related perspectives, formal grammar and functional grammar. The unit provides students with skills in the use of grammar in application to the analysis of a diverse range of texts. Students will develop an understanding of the structures and the functions of English across contexts. This skilled application will enhance their capacities as teachers of English, understanding how English varies in its use and allowing them to support their own students' skilled use of English across contexts.

School Humanities & Comm Arts

Discipline Linguistics

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LANG 7012 - Functional Grammar LANG 7013 - Functional Grammar

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a working use of formal grammatical analyses of word structure and word classes, lexical semantics, phrasal structures, clausal and sentence structures in English.
2. Demonstrate a working use the ideas of register and genre in application to the analysis of spoken and written language, and experiential and textual analyses of clauses in English.
3. Apply grammatical analysis to texts and consider the pedagogical implications and uses of what the analysis reveals.

Subject Content

1. Comparative introduction to formal and functional approaches to English Grammar.
2. Formal grammatical analysis including, word structure and word classes, lexical semantics, phrasal structures, clause and sentence structures.
3. Functional grammatical analysis including register and genre, spoken and written language experiential and textual analysis of clauses.
4. Pedagogical applications and uses of grammatical analyses including an exploration of a range of text types.

LANG 7014 Gender and Genre

Credit Points 10

Legacy Code 102602

Coordinator Helen Basides ([https://directory.westernsydney.edu.au/search/name/Helen Basides/](https://directory.westernsydney.edu.au/search/name/Helen%20Basides/))

Description This unit considers the intersection of gender and genre in various narrative forms. Through a variety of texts that may include

polemic, conduct literature, plays, novels, poetry and film, students will examine the construction of masculinity and femininity within various genres, and consider the ways in which genres themselves may be gendered. Beginning in the seventeenth century, the unit also considers the strategies that women writers, in particular, have used to participate in literary production by adopting and adapting particular generic conventions. A consideration of the ways in which gender and genre may be connected also allows students to consider questions of literary production and circulation, literary value and reputation.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the connection between gender and genre in various narrative modes.
2. Analyse the construction of masculinity and femininity in various genres.
3. Evaluate ideas about the ways in which genres might be gendered.
4. Identify and analyse the ways in which writers have responded to assumptions about the gendered nature of particular narrative forms, authorship and readership.
5. Identify and analyse the ways in which writers, particularly women writers, have adopted and adapted generic conventions in order to reflect their experiences.
6. Explain and analyse the relationship between gender, literary production, literary circulation and reputation.

Subject Content

Debates about the connections between genre and gender.

Representations of masculinity and femininity in various narrative forms.

Women's writing and the woman writer, from the seventeenth century onwards.

Considerations of gender as they relate to: theme, character, voice and form.

Women's place in literary production.

The ideal reader, especially in discourses about the rise of the novel.

Fictional and non-fictional forms.

Examination of different text types: polemic, conduct literature, plays, novels, poetry, short story, essay, and film.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Presentation: Seminar Presentation and Leadership		15	N	Individual

Essay: Research Essay	3,000 words	55	N	Individual

Teaching Periods

LANG 7015 Intercultural Communication (PG)

Credit Points 10

Legacy Code 102338

Coordinator Mustapha Taibi ([https://directory.westernsydney.edu.au/search/name/Mustapha Taibi/](https://directory.westernsydney.edu.au/search/name/Mustapha%20Taibi/))

Description This unit aims to develop the students' communicative competence in intercultural contexts, raise their awareness of issues in language use and socio-cultural dimensions, and equip them with the knowledge and skills necessary for intercultural communication. It also prepares students to critically analyse linguistic and cultural differences around them, appreciate linguistic and cultural diversity, and integrate the unit contents into their future careers (e.g. further studies or employment). It highlights the impact of intercultural communication in a range of real-life sectors, such as second language teaching and learning, translation and interpreting services, international business, tourism, community services, and organisational communication.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify links between language and culture
2. Demonstrate awareness of linguistic and cultural factors that contribute to (un)successful intercultural communication
3. Examine cross-linguistic and cross-cultural differences in verbal and nonverbal communication
4. Conduct linguistic analysis of authentic spoken and written discourses from an intercultural perspective
5. Analyse linguistic and cultural diversities critically by examining linguistic and cultural differences
6. Identify effective cross-communicative strategies in various contexts
7. Demonstrate intercultural competence to discuss and apply intercultural communication knowledge and skills to professions (e.g. ESL/EFL teaching, translation and interpreting services, multicultural education, international business, tourism, social services, etc.)

8. Develop appropriate intercultural attitudes towards different languages and cultures

Subject Content

- intercultural adaptation model
- relationships between language and culture
- Differences in language use (e.g. lexical non-equivalence and gaps) and culture (e.g. self-orientation vs other-orientation)
- cross-cultural variability (e.g. Individualism Vs collectivism)
- intercultural relationship management (e.g. horizontal Vs vertical)
- face Issues and face-work across cultures
- intercultural nonverbal communication competence
- Culture-specific manifestations in spoken (e.g. politeness vs impoliteness) and written discourses (e.g. linear vs non-linear)
- speech acts across cultures (e.g. requests and apologies)
- Hidden dimensions across cultures (e.g. low-contact vs high-contact)
- intercultural communication challenges and strategies (e.g. stereotyping, miscommunication and pragmatic failure)
- Intercultural sensitivities (e.g. cultural practices and values, address terms, taboos and solidarity-focused or power-focused communication)
- intercultural communication research Topics, methods, and tools.

Assessment

LANG 7016 Interpreting Skills (PG)

Credit Points 10

Legacy Code 102015

Coordinator Chong Han ([https://directory.westernsydney.edu.au/search/name/Chong Han/](https://directory.westernsydney.edu.au/search/name/Chong%20Han/))

Description This is a pool unit in some postgraduate interpreting and translation courses. The unit is aimed at developing essential skills in interpreting and deals with the specialised technical skills necessary for the different modes of interpreting: dialogue, consecutive, simultaneous, and sight translation. Given the large amount of independent practice needed to develop competence in interpreting, it pays special attention to the teaching of techniques for autonomous learning. Lectures are held in English for students of all the languages available. The tutorials are language specific in Arabic, Japanese, Mandarin or Spanish.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate understanding of interpreting theories and their relevance to research and practice;
2. apply knowledge about different speech styles, registers and social dialects to accurately render different discourses in the target language;
3. demonstrate an understanding of context-specific interpreting techniques used in dialogue, consecutive, simultaneous interpreting and sight translation;
4. apply listening skills and techniques in a variety of settings such as business, immigration, tourism and motor transport, and develop techniques for autonomous learning of these skills;
5. use the memory skills required for dialogue interpreting and consecutive interpreting;
6. use note taking skills effectively to interpret accurately in the long consecutive interpreting mode,
7. demonstrate effective public speaking skills, including techniques for autonomous learning of these skills.

Subject Content

- . Variables of spoken language; content, speed, text type, number of interlocutors, accent, speaker's gender; techniques for improving listening comprehension.
- . Cognitive processes behind interpreting
- . Different speech styles, registers and social dialects and interpreting exercises to develop the skill to accurately render such variables in the Target Language.
- . Characteristics of dialogue, consecutive, simultaneous interpreting and sight translation; participants and their roles; typical contexts

and content and role implications for each mode; differing cognitive demands of each mode.

- . Memory and interpreting: exercises and techniques for developing short-term memory
- . Standard systems for note taking; individual adaptation; techniques for note taking practice
- . Public speaking skills; voice work, audience contact, discourse organisation; techniques for autonomous development of public speaking skills.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Research Portfolio	3000 words	30	N	Individual
Tutorial class performance	Continuous assessment of interpreting skills development in class through practical tutorial exercises.	40	N	Individual
Final viva interpreting examination	30 mins per student	30	N	Individual

LANG 7017 Interpreting and Translation Professional Practicum (PG)

Credit Points 10

Legacy Code A7456

Coordinator Uldis Ozolins ([https://directory.westernsydney.edu.au/search/name/Uldis Ozolins/](https://directory.westernsydney.edu.au/search/name/Uldis%20Ozolins/))

Description This subject is a capstone subject for the relevant Interpreting and Translation award, aimed at assisting students in their transition from interpreting and translation trainees to successful professional interpreters and translators. It provides students with the opportunity to participate in practical aspects of the Interpreting and/or Translation professions and related fields, as well as to undertake supervised practice in the workplace. Students will complete the practical work relevant to their field of specialisation; i.e., Interpreting,

Translation or both. Together with LANG 7030 Preparation for NAATI Certification (PG) it helps students prepare for the NAATI Certification test to be undertaken when they finish their program.

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

In order to do the professional practice, students need to have demonstrated a minimum ability to interpret and/or translate, as they will be dealing with real life situations.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply interpreting and/or translation-specific skills and knowledge to the workplace
2. Identify the characteristics and structures of different interpreting and translation settings
3. Articulate and operate with the complexities of professional translation and interpreting

Subject Content

1. Placement at an appropriate industry venue.
2. Court attendance and observation.
3. Group interpreting and translation practice within a simulated industry environment.
4. Self-directed program involving the development of interpreting and translation skills.
5. Submission of an observation journal.

Special Requirements

Legislative pre-requisites

Students enrolled in 1775 Graduate Diploma in Interpreting ONLY: To be eligible to enrol in a subject and attend a health-related placement in your program, students must meet Western Sydney University program requirements AND Special Legislative Requirements to be assessed in their first year of study against the following

1. National Criminal History Check: Students must have a current (expiring 3 years from date of issue) check valid for their entire program. A valid National Criminal history check must be an Australia wide check, include the student's full name matching their Student ID card and date of birth and not have any offences listed. If a student has

a criminal history identified on their check, they must provide a Clinical Placement Authority Card (CPAC) or conditional letter from the NSW HealthShare Employment Screening and Review Subject

https://www.health.nsw.gov.au/careers/student_clearance/Documents/appendix-10-student-application.pdf

International students must additionally have a translated International Police Check or statutory declaration.

Contact your School for further details. Resources are also available on the Placement Hub website

www.westernsydney.edu.au/compliancehub (https://www.westernsydney.edu.au/placements_hub/placements_hub/student_compliance/)

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.

- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYB 2089 - Interpreting 1 LGYB 2090 - Interpreting 2 LGYB 2851 - Introduction to Interpreting

Incompatible Subjects LANG 7019 - Interpreting and Translation Theory

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Proficiency in English and other language (LOTE) at native or near-native level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate understanding of linguistic and interpreting theories and apply them to interpreting practice and research;
2. resolve issues of accuracy and equivalence, including register equivalence and the difficulties and controversies surrounding it;
3. recognise cross-cultural differences that influence and are reflected in the use of language;
4. explain the different roles of the interpreter according to type of interpreting;
5. demonstrate proficiency in dialogue interpreting, chuchotage, consecutive interpreting and sight translation at an introductory level in different settings.
6. demonstrate effective note-taking skills for dialogue and consecutive interpreting; and
7. identify significant aspects of the interpreting profession in Australia, NAATI qualifications, and ethics of the profession.

Subject Content

1. General overview of the theories of pragmatics and discourse analysis as they relate to interpreting,
2. The meaning of accuracy of interpretation and equivalence at the different levels of the language hierarchy and according to different types of interpreting,
3. The meaning of register, the importance of maintaining the source language register in interpretation and the implications of not maintaining it,
4. The different roles of the interpreter according to the type of interpreting,
5. Introduction to the techniques of dialogue interpreting, chuchotage, consecutive interpreting and sight translation,
6. Practice of the different interpreting techniques in education, housing and welfare settings,
7. Introduction to and practice of note taking skills for liaison and consecutive interpreting,
8. Familiarisation with available dictionaries, thesauruses, and other useful resources and guidance on how to use them effectively in the preparation of interpreting assignments,
9. The Interpreting profession in Australia and its codes of ethics.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Practical	5-10 minutes per student per task	35	N	Individual

LANG 7021 Introduction to Translation PG

Credit Points 10

Legacy Code 101696

Coordinator Kenny Wang ([https://directory.westernsydney.edu.au/search/name/Kenny Wang/](https://directory.westernsydney.edu.au/search/name/Kenny%20Wang/))

Description This is a core unit for students in postgraduate coursework programs in Interpreting and Translation. It introduces students to the theory and practice of Translation. Lectures are held in English for students of all languages. The tutorials are language specific in Arabic, Japanese, Mandarin, Spanish, Korean and Vietnamese.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LANG 7018 - Interpreting and Translation Skills

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Proficiency in English and other language (LOTE) at native or near-native level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate advanced knowledge of theories of translation including those advanced by Catford, Nida, Newmark and Steiner;
2. differentiate between translation approaches such as literal versus free, semantic versus communicative;
3. demonstrate understanding of the difficulties of achieving cross-linguistic equivalence at the morphemic, lexical, syntactic and textual levels;
4. demonstrate advanced critical understanding of cross-cultural differences as they influence language;
5. analyse the different notions of accuracy and equivalence from a syntactic, semantic and pragmatic perspective;
6. apply advanced level linguistic proficiency in translating a variety of text genres; and
7. demonstrate advanced knowledge of the Translation profession in Australia, NAATI qualifications, and ethics of the profession.

Subject Content

- general Overview of translation theories
- translation approaches that Respond to genre and purpose
- language hierarchy from The lexical to The textual and discourse including typological difference found across languages
- cross-cultural differences that influence language use and language choice
- challenges of accuracy and find cross-linguistic and cross-cultural equivalence at The difference levels of language hierarchy
- The translation profession in Australia and its codes of ethics
- Semantic versus pragmatic equivalence
- The application of theory to Problem solving and decision making in The process of translation

Assessment

LANG 7022 Investigating Second Language Acquisition

Credit Points 10

Legacy Code 100919

Coordinator Stacey Sherwood ([https://directory.westernsydney.edu.au/search/name/Stacey Sherwood/](https://directory.westernsydney.edu.au/search/name/Stacey%20Sherwood/))

Description This unit is intended for Linguistics Honours students as well as TESOL and Interpreting and Translation Postgraduate students aiming to provide a focused theoretical and research framework in the area of second language acquisition (SLA) from a psycholinguistic viewpoint. This unit widens the theoretical and methodological basis of students intending to undertake further studies and/or research in the Linguistics and SLA area and also serves the TESOL and languages teachers interested in applying SLA-based knowledge to language learning, pedagogy and classroom research.

School Humanities & Comm Arts

Discipline Language and Literature, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYB 3375 - Investigating Second Language Acquisition

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Knowledge of a LOTE and/or some Linguistics and/or some language teaching experience.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Provide an overview of the recent history of second language acquisition as shaped by early studies based on contrastive analysis, error analysis and the concept of interlanguage.
2. Critically appraise current studies, theoretical models and methodologies adopted in the investigation of second language acquisition.
3. Identify individual and social factors purported to have a role in the successful acquisition of a second language in both natural and classroom settings.
4. Demonstrate the developmental and variational dimensions of language acquisition as envisaged, for instance, by Processability Theory and apply this knowledge to profiling of learner language.
5. Critically appraise the "Teachability Hypothesis" and current L2 pedagogy including communicative language teaching and 'focus on form'.
6. Design and conduct a small-scale project in

Subject Content

- Overview of The historical development of language acquisition as A field of Study including interlanguage studies and findings.
- Overview of main theories and explanatory frameworks used to account for second language acquisition, including current frameworks such as Universal Grammar and Processability Theory.
- The question of linguistic environment and individual Factors including key characteristics of natural and Instructional settings for second language acquisition.
- key Developmental and variational features in second language learners including The learning of discourse-pragmatic functions.
- Possible effects of instruction and The Teachability Hypothesis.
- Methodological and technical Issues in second language acquisition research
- Profiling and corpus analysis as an empirical basis for research and language assessment;
- elements of computer-aided language analysis.

Assessment

LANG 7023 Language and Linguistics Research Methods

Credit Points 10

Legacy Code 101854

Coordinator Dariush Izadi ([https://directory.westernsydney.edu.au/search/name/Dariush Izadi/](https://directory.westernsydney.edu.au/search/name/Dariush%20Izadi/))

Description This unit aims to help postgraduate students acquire the knowledge and skills to design and carry out a research project in the field of Languages and Linguistics (i.e. Contrastive Linguistics, Sociolinguistics, Language-in-Education Planning, First and Second Language Acquisition, Interpreting and Translation, Discourse Analysis and Descriptive Linguistics). It includes theoretical and practical work in specific areas of research in Languages and Linguistics.

School Humanities & Comm Arts

Discipline Linguistics

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LANG 7024 - Language and Linguistics Research Methods

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. undertake the basic steps to conducting research;
2. examine the main research methodologies, analytical techniques, and research and writing strategies relevant to the field of languages and linguistics;
3. read critically and review research papers in the field of languages and linguistics;
4. employ, where applicable, basic techniques in descriptive and inferential statistics; and
5. produce a design for a research project, and conduct a small research project.

Subject Content

Familiarity with and understanding of UWS Ethics in Postgraduate Research (Principles of Ethical Conduct, Approval Process of Research Involving Human Participants, etc.)

Research models used in the field of Language and Linguistics, including qualitative and quantitative approaches

Critical reading and comments of a representative sample of research papers in the field of Languages and Linguistics

Basic descriptive statistical concepts and techniques

Basic inferential statistical concepts and techniques

Data collection and analysis in the field of Language and Linguistics

Transcription of oral data

An appreciation of, and the ability to use, the prescribed academic register of English appropriate to research

Assessment

Credit Points 10

Legacy Code 101297

Coordinator Kenny Wang ([https://directory.westernsydney.edu.au/search/name/Kenny Wang/](https://directory.westernsydney.edu.au/search/name/Kenny%20Wang/))

Description This unit provides the opportunity for students in postgraduate Interpreting and Translation and Research Studies programs to undertake an independent research project. The topics for the projects are related to their needs and interests in areas such as languages, linguistics, translation and interpreting studies or teaching related issues.

School Humanities & Comm Arts

Discipline Language And Literature

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 0749 - TESOL Dissertation LGYA 0754 - TESOL Internship LGYB 3439 - Languages and Linguistics Dissertation

Restrictions

Students must be enrolled in program 1640 Master of Arts Translation and Interpreting Studies, 1687 Master of Arts (Research Studies)/ PhD, 2724 Graduate Certificate in Research Studies, 1777 Master of Interpreting and Translation or 1780 Master of Arts Interpreting and Translation Studies.

Assumed Knowledge

The student should be familiar with research design and procedures, as taught in subjects such as 101854 Language and Linguistics Research methods or be concurrently undertaking a research method subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop and present a research project proposal;
2. Demonstrate understanding of the leading research in their chosen field of investigation;
3. Put forward an hypothesis or set of testable propositions;
4. Collect and analyse suitable data to test the hypothesis;
5. Draw inferences about the importance of the findings.
6. Students undertaking a research project will be able to collect and analyse suitable data to test the hypothesis.
7. Students undertaking a research project will be able to draw inferences about the importance of the findings.

Subject Content

The Internship requires:

1. Observation of classes in a range of different English language teaching settings;
 2. A service learning component where student participates in many aspects of the work in TESOL organisations eg undertakes team-teaching or works as teachers aid;
 3. Optional supervised TESOL practice teaching or its equivalent.
- The content of this subject will vary according to the field and topic of the special project.

Content will be dictated by the individual project topic and design, and undertaken under the guidance and supervision of a full time member of staff with the appropriate academic background.

Assessment

LANG 7026 Legal Interpreting

Credit Points 10

Legacy Code 100916

Coordinator Kenny Wang ([https://directory.westernsydney.edu.au/search/name/Kenny Wang/](https://directory.westernsydney.edu.au/search/name/Kenny%20Wang/))

Description Legal interpreting is a highly complex process that requires specialised training in interpreting techniques, litigation tactics, legal language and the legal system. This unit is a compulsory unit for students in key postgraduate courses in Interpreting and Translation course. It can also be offered to practising interpreters who wish to improve and perfect their knowledge and skills in legal interpreting. It aims to provide students with the theoretical background and the opportunity to develop the interpreting skills necessary to operate at the NAATI professional level as a court interpreter. Lectures are held in English for students of all languages. The tutorials are language specific in Arabic, Japanese, Mandarin, Spanish, Korean and Vietnamese.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYB 3384 - Legal Interpreting

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Bilingual competence in English and one of the languages offered by the School for the interpreting and translation programs.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. interpret accurately in simulated court hearing situations in the consecutive mode
2. interpret accurately over the phone or via video-link in legal settings
3. sight translate court documents and interpret simultaneously in a simulated court situation in the whispering mode and in a simulated triangular situation in a legal conference in the dialogue mode.
4. demonstrate essential background knowledge of the Australian legal system.
5. understand and use essential legal vocabulary.
6. demonstrate full awareness of cross cultural and cross linguistic differences and their relevance in the context of court interpreting.
7. demonstrate understanding of the complexity of the courtroom language, including question tactics and the importance of testimony style.
8. integrate theory into practice.

Subject Content

1. Theory and practice of dialogue interpreting in the legal setting.
2. Theory and practice of consecutive interpreting in the legal setting.
3. Theory and practice of sight translation of legal documents.
4. Theory and practice of simultaneous whispering interpreting in the courtroom.
5. Theory and practice of telephone and video-link interpreting in the legal setting.
6. Essential background concepts and vocabulary of the Australian legal system.
7. The language and strategic use of courtroom questions and their significance to interpreting.
8. The language of courtroom testimony and its significance to interpreting.
9. Essential concepts concerned with cross cultural and cross linguistic communication.

LANG 7027 Literary Theory

Credit Points 10

Legacy Code 102581

Coordinator James Gourley ([https://directory.westernsydney.edu.au/search/name/James Gourley/](https://directory.westernsydney.edu.au/search/name/James%20Gourley/))

Description This unit examines a range of theoretical approaches to literature, the majority of which have proliferated since the beginning of the 20th century. These may include: structuralism, poststructuralism, feminism, postcolonialism, psychoanalysis and posthumanism. In presenting this 'contemporary' mode of engaging with literary texts, 'Literary Theory' asks how we might theorise our approach to reading, and how individual texts allow us to theorise the literary in general.

School Humanities & Comm Arts

Discipline Literature

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine a range of literary theoretical texts from one or a number of disciplinary approaches;
2. Demonstrate an understanding of literary theory and its relation to reading and the category of the literary;
3. Apply literary theoretical principles to literary texts.

Subject Content

Content will draw from, or elaborate upon, a selection of the following topics:

Formalism
Structuralism
Post-structuralism
Feminism
Psychoanalysis
Postcolonialism
Posthumanism

Coordinator Vera Xu ([https://directory.westernsydney.edu.au/search/name/Vera Xu/](https://directory.westernsydney.edu.au/search/name/Vera%20Xu/))

Description This unit aims to develop in students an appreciation of different literary genres in English and in their other language (LOTE) with an emphasis on stylistic and cultural issues to provide a basis for literary translation. The unit will cover literary translation theory and introduce relevant strategies to be applied in practice. The class will be non-language specific, but students will be expected to work from and into their language other than English.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYB 3388 - Literary Translation

Restrictions

Students must be bilingual in the language combinations offered by the school. Students must be enrolled in a postgraduate program.

Assumed Knowledge

Proficiency in English and one other language (LOTE) at native or near-native level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. develop an analytical frame for different literary genres in English and in their LOTE as well as appreciate the stylistic and cultural issues involved
2. interpret and exemplify major issues in literary translation theory; and
3. apply the relevant literary translation strategies in practical translation tasks.

Subject Content

1. Presentation of different literary genres including poetry, fiction, drama, film scripts.
2. Introduction of literary translation theory.
3. Application of relevant literary translation strategies.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Presentation	5 minutes	30	N	Individual
Essay	Translation up to 1500 words and essay up to 1500 words	50	N	Individual
Final Exam	1 hour	20	N	Individual

LANG 7029 Medical Interpreting (PG)

Credit Points 10

Legacy Code 100922

Coordinator Eva Melhem ([https://directory.westernsydney.edu.au/search/name/Eva Melhem/](https://directory.westernsydney.edu.au/search/name/Eva%20Melhem/))

Description This unit aims to develop students' skills and knowledge in interpreting at the Professional level (formerly NAATI Level 3) through the modes of dialogue interpreting, consecutive interpreting, simultaneous interpreting and sight translation in the domain of health services. Lectures are held in English for students of all languages. The tutorials are language specific in Arabic, Japanese, Mandarin, Spanish, Korean and Vietnamese.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYB 3385 - Medical Interpreting

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Bilingual competence in English and one of the languages offered by the School for the interpreting and translation programs.

Learning Outcomes

On successful completion of this subject, students should be able to:

- interpret a dialogue with segments of up to 60 words in length, in simulated triangular medical situations
- interpret accurately over the phone or via video-link in medical/health settings
- sight-translate documents such as medical papers, consent forms, information sheets, into both languages
- interpret consecutively into both languages, passages of up to 300 words in length
- interpret simultaneously into both languages, medical conference material as well as doctor's consultations with mental health patients
- acquire an understanding of doctor-patient communication in the Australian context
- apply essential knowledge of medical language, its history and etymology, and use the vocabulary relating to advanced medical matters
- explain the ethical and cultural considerations of Health Care Interpreters
- apply knowledge of the Australian medical system and of the medical system in the country/ies where the student's other language is spoken
- demonstrate the skills to recognise prefixes, suffixes and root words, identify their meanings and build words, and identify words used with pathological conditions.

Subject Content

- Theory and practice of dialogue interpreting in medical settings.
- Theory and practice of consecutive interpreting in medical settings.
- Theory and practice of sight translation of medical documents.
- Theory and practice of simultaneous interpreting in medical settings.
- Theory and practice of telephone and video-link interpreting in medical/health settings.
- The history and main features of medical language.
- Basic concepts and vocabulary relating to advanced medical matters.
- Knowledge relating to working as a Health Care Interpreter.
- Knowledge relating to the role and ethics of a Health Care Interpreter.
- Knowledge relating to the Health Care systems of Australia.
- Medical Terminology: prefixes, suffixes, and root words

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Professional tasks: Two vocabulary tests 2 x in-class interpreting assess	TBA	40	N	Individual
Peer Review - Analysis of interpreting speech	1500-2000 words	20	N	Individual

Intra-session examination 30 – 40 minutes
 Viva interpreting examination, including the four modes of interpreting examination

LANG 7030 Preparation for NAATI Certification (PG)

Credit Points 10

Legacy Code 102562

Coordinator Kenny Wang ([https://directory.westernsydney.edu.au/search/name/Kenny Wang/](https://directory.westernsydney.edu.au/search/name/Kenny%20Wang/))

Description This is a compulsory unit in the Master of Interpreting and Translation, Master of Translation and TESOL, Graduate Diploma in Translation and Graduate Diploma in Interpreting courses. It aims to provide practice and constructive feedback to students preparing to sit the external NAATI certification examinations.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) LANG 7017

Equivalent Subjects LANG 7001 - Accreditation Studies

Restrictions

Students must be enrolled in 1777 Master of Interpreting and Translation, 1776 Graduate Diploma in Translation, 1775 Graduate Diploma in Interpreting or 1816 Master of Translation and TESOL. Students in the following programs must have successfully completed 40 credit points: 1816 Master of Translation and TESOL, 1775 Graduate Diploma in Interpreting, 1776 Graduate Diploma in Translation. Students in program 1777 Master of Interpreting and Translation must have successfully completed 120 credit points.

Assumed Knowledge

Proficiency in English and one other language (LOTE) at native or near-native level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate understanding of the format, standards and requirement of NAATI certification examinations.
2. Apply the translation and/or interpreting techniques necessary to sit the certification examinations.
3. Produce accurate and idiomatic translations and/or interpreting.
4. Critique interpreting and translation quality through implementing principles of translation/interpreting quality assessment.

Subject Content

Dialogue, consecutive and simultaneous interpreting in simulated settings such as medical consultations, public meetings, courtrooms. Simulated dialogue interpreting over the telephone.

Sight translation of written texts (190-210 words in length).

Translation to and from English of 250-word passages in a variety of formal genres under timed conditions.

Revise translations.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Final Exam	3.5 hours, 3.5 hours, 1.5 hours	100	N	Individual

Prescribed Texts

- There is no set text. All tutorial materials are available on vUWS and should be downloaded and printed out for use in tutorials. The interpreting practice tests and trial exams are available on vUWS.

LANG 7031 Second Language Assessment and Testing

Credit Points 10

Legacy Code 101824

Coordinator Julie Lim ([https://directory.westernsydney.edu.au/search/name/Julie Lim/](https://directory.westernsydney.edu.au/search/name/Julie%20Lim/))

Description This unit introduces students to fields of language assessment and testing in TESOL. It provides students with some insight into the key language components for assessment, assessment design and development. It also equips students with updated knowledge about different assessment approaches which impact on the teaching and learning of English as a second or other language in local and global contexts.

School Humanities & Comm Arts

Discipline Language And Literature

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) TEAC 7140

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Knowledge of Language teaching methodology and curriculum development.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate understanding of key terms in language assessment and testing
2. Identify and discuss various issues in language skills assessment and testing
3. Use different and appropriate techniques and methods in language assessment and testing
4. Design and develop valid and reliable language skills tests
5. Demonstrate understanding of language assessment feedback and improve testing methods
6. Apply language assessment and skills testing in specific educational contexts

Subject Content

Purposes of language assessment and testing
 Properties of language assessment (validity and reliability)
 Current second language proficiency assessment and issues
 Methods for language assessment and skills testing with reference to learner profiling and curriculum design
 Language assessment and test design and development with consideration of diverse education systems
 Language assessment feedback and analysis for improving teaching and learning outcomes

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Essay	1,000 - 1,500 words	30	N	Individual
Essay	2,500-3,000 words	50	N	Individual
Quiz	60 minutes	20	N	Individual

LANG 7032 Specialised Translation (PG)

Credit Points 10

Legacy Code 100917

Coordinator Kenny Wang ([https://directory.westernsydney.edu.au/search/name/Kenny Wang/](https://directory.westernsydney.edu.au/search/name/Kenny%20Wang/))

Description This unit explores the functional, discursive, rhetorical, syntactic, semantic and lexical features of texts in the following specialised fields: tourism, news media, legal texts, technical & scientific materials. Knowledge of the functions and textual features of specialised texts will provide a basis for translating these specialised texts from and into English. Students will analyse the texts in both languages, and discuss ways in which the texts are to be translated. The unit will be available, depending on sufficient demand, for Arabic, Japanese, Mandarin and Spanish.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYB 3389 - Specialised Translation

Restrictions

Students must be enrolled in a postgraduate program. Students need to be bilingual in the language combinations offered by the School.

Assumed Knowledge

Sufficient proficiency in English plus one other language. This is a language-specific subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. identify and analyse the functional, discursive, rhetorical, syntactic, semantic and lexical features of English texts in the specialised fields of tourism, law, journalism and science and technology;
2. identify and analyse the functional, discursive, rhetorical, syntactic, semantic and lexical features of LOTE texts in the specialised fields of tourism, law, journalism and science and technology; and
3. deploy translation strategies appropriate to the specific text types.

Subject Content

1. Development of general translation skills to and from English
2. Introduction of different specialised genres.

3. Translation of texts to and from English from specialised fields such as information booklets at museums, news articles of various types, prescriptive and non-prescriptive legal texts, technical manuals.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Oral presentation	15 minutes	30	N	Individual
Four reflective journal entries	200 words each	20	N	Individual
Essay	Translate a specialised text of 600 words in length, then write a 1200 words essay on the translation process with reference to linguistics and/or translation theory	50	N	Individual

LANG 7033 TESOL Internship

Credit Points 20

Legacy Code 101698

Coordinator Ping Yang ([https://directory.westernsydney.edu.au/search/name/Ping Yang/](https://directory.westernsydney.edu.au/search/name/Ping%20Yang/))

Description This is a professional practice unit which consists of an internship in an English language teaching organisation for students of TESOL. It involves participation in the various aspects of the work of the teaching organisation, including a supervised English language teaching practice component for local students. Assessment items facilitate students' self-reflection on their teaching practice and critical evaluation of teaching methods and needs assessment in practice.

School Humanities & Comm Arts

Discipline Language And Literature

Student Contribution Band HECS Band 1 20cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) TEAC 7140

Incompatible Subjects LGYA 0754 - TESOL Internship

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Knowledge of TESOL field and methodology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. identify through observation various TESOL approaches in different teaching situations;
2. demonstrate an understanding of successful TESOL teaching through observation of teaching and consultation with experienced teachers regarding their practice;
3. adapt for use a variety of TESOL teaching materials and resources;
4. plan, deliver and evaluate TESOL teaching and learning activities; and
5. demonstrate understanding of important non-teaching elements in language teaching and learning settings such as planning, teacher collaboration, reflection of teaching materials design.

Subject Content

The internship builds on the knowledge and skills students gain in TESOL Methodology and Curricula by situating it in differing TESOL settings such as ELICOS, AMEP, English for Specific Purposes. The main components of the internship are:

- observation of classes in A range of different English language Teaching settings, consultation with Teaching staff, team- Teaching, and Teaching of small withdrawal groups as appropriate in English language Teaching Organisations, and participation in all aspects of work in these organisations.
- Examination of commercial and teacher- produced Teaching resources and materials, including computer assisted language learning resources, current curriculum approaches, and language assessment materials in The range of TESOL settings.
- Supervised practice Teaching for local students in The centre in which they are undertaking their internship or through An English language centre. Practicum may be undertaken in The partner universities overseas depending on funding and placement availability.
- Teaching practice which does not require formal supervision for external students.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Portfolio	2,000 words	30	N	Individual
Report	3,000 words	40	N	Individual

Professional Placement Performance 20 hrs class observation; 20 hrs of service learning of a mixed range of teaching tasks; 10 hrs supervised and 10 hrs unsupervised teaching practise.

LANG 7034 TESOL Project

Credit Points 40

Legacy Code 102337

Coordinator Adrian Hale ([https://directory.westernsydney.edu.au/search/name/Adrian Hale/](https://directory.westernsydney.edu.au/search/name/Adrian%20Hale/))

Description This unit is the final component in the Master of Arts in TESOL course. Equipped with knowledge and research skills developed in previous course components, students undertake independent and guided research activities and propose pedagogical solutions to specific TESOL classroom situations. Students will demonstrate the practical application of this research by undertaking a TESOL project which culminates in a 12,000-15,000 word research report or teaching proposal. Students have the opportunity to research specific TESOL interests in depth. These include, but are not limited to, generic Applied Linguistics, Task-Based Language Teaching, English as a Foreign Language (EFL), Second Language Acquisition, Second or Other Language Maintenance, English for Academic Purposes (EAP), or discrete elements of Pedagogy.

LANG 7023 AND
TEAC 7076 AND

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Knowledge gained in 10 previous subjects in the Master of Arts in TESOL.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Critically read and review research literature in the field of their research
- Compile a literature review of the field of their research
- Apply independent research skills
- Analyse, compile and evaluate findings
- Prepare and present a research report
- Select and implement relevant research methods in a practical teaching project.

Subject Content

This will vary according to the field of practice and topic of research. All students will prepare a proposal and a final research-based report.

Assessment

LANG 7035 Text Analysis for Translation (PG)

Credit Points 10

Legacy Code 102524

Coordinator Chong Han ([https://directory.westernsydney.edu.au/search/name/Chong Han/](https://directory.westernsydney.edu.au/search/name/Chong%20Han/))

Description The unit provides support for students in the postgraduate Interpreting and Translation programs to develop their analysis skills of the texts they will confront in their translation work. It is a bilingual unit, that is texts in both English and the respective Language Other Than English (i.e. Spanish, Chinese, Arabic, Japanese, Vietnamese, Korean) will be analysed to reveal the structures of meaning and linguistic and contextual features of the texts. It encourages close readings of source texts, understanding where extra-textual knowledge is relevant, and identifying essential meaning components underlying surface linguistic features.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1777 Master of Interpreting and Translation or 1780 Master of Arts Translation and Interpreting Studies

Assumed Knowledge

Practice in translation and learning of translation strategies at introductory level subjects of Master of Interpreting and Translation, or equivalent knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate understanding of linguistic and textual structures of English and LOTE passages;
2. Identify differences and similarities between English and LOTE;
3. Conduct textual analysis of English and LOTE passages;
4. Apply text analysis techniques to translation tasks; and
5. Evaluate and critique the quality of their own translations and the translations done by their peers.

Subject Content

Theories of text analysis as they relate to the translation task.
Identifying different types of source texts
Conducting comparative and contrastive analysis of English and LOTE

Identifying of intra-linguistic factors in source texts in both English and LOTE

Identifying where extra-textual knowledge is required for full comprehension of source texts

Defining translation problems in source texts

Evaluating translation quality

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Translation/Quiz/Short Answer	2 Text analysis exercises (each exercise include both English and LOTE tasks)	30	N	Individual
Translation/Quiz/Short Answer	150 words x 2 (1 x English + 1 x LOTE)	20	N	Individual
Peer review	1 x English + 1 x LOTE	20	N	Individual
Translation/Quiz/Short Answer	150 words x 2 (1 x English + 1 x LOTE)	30	N	Individual

LANG 7036 Translation Technologies (PG)

Credit Points 10

Legacy Code 101750

Coordinator Anita Byrnes ([https://directory.westernsydney.edu.au/search/name/Anita Byrnes/](https://directory.westernsydney.edu.au/search/name/Anita%20Byrnes/))

Description This unit aims to equip students with the theoretical and practical knowledge needed to effectively apply information and communication technologies to translation and other language related tasks. It focuses on translation memory and terminology management systems, and on the workflow involved in the handling of multilingual content. Emphasis is also put on uses of the Internet as a resource tool, and to the principles of controlled language for text to be processed

by machine translation (MT). Tutorials will be conducted in a computer lab where students will familiarize themselves with leading computer-assisted translation (CAT) software applications.

School Humanities & Comm Arts

Discipline Translating and Interpreting

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine in some depth the fields of translation memory (TM) and terminology management, showing the skills required to compare applications and make informed judgments.
2. Describe the workings of one of the leading TM software packages and develop transferable troubleshooting strategies.
3. Explore the possibilities and limitations of machine translation (MT) by looking at the relevant literature and by analysing the outcome of some of the freely available engines on the internet.
4. Apply the principles of controlled language to the writing of source text to be processed by TM or MT.
5. Consolidate your expertise in internet mining, in particular for parallel corpora, terminological data and subject matter information.
6. Outline the workflows involved in multilingual content management, and explore the big-picture concepts of globalisation, internationalisation and localisation.

Subject Content

1. Overview of the principles of language engineering, and computer-assisted translation
2. Basic 'generalist' computing skills of particular relevance to translators, in particular those related to data digitalisation, exchange and protection
3. Desktop TM: components, workflow, and useful troubleshooting strategies
4. Server TM: open standards for database content exchange, interface with multilingual content management
5. Capabilities and limitations of MT engines
6. The principles and practice of writing in controlled language for TM and MT
7. Internet mining for parallel corpus, terminology data and specific subject matter

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

LAWS 1001 Enterprise Law

Credit Points 10

Legacy Code 200909

Coordinator Pamela Devery ([https://directory.westernsydney.edu.au/search/name/Pamela Devery/](https://directory.westernsydney.edu.au/search/name/Pamela%20Devery/))

Description This is an introductory law unit designed to introduce the fundamentals of law in a commercial context. The unit introduces students to the basic principles of law and the legal system as well as examining some of the major areas of law that impact on commercial dealings. This unit examines the legal system, the way law is made and the main areas of law relevant to starting and running a business including contracts, negligence and consumer protection.

School Law

Discipline Business and Commercial Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects LGYA 9864 - Introduction to Legal Principles LAWS 1004 - Introduction to Business Law LAWS 1005 - Introduction to Business Law (UWSC) LGYB 0472 - Introduction to Business Law (Creative Industries) LAWS 1002 - Enterprise Law (UWSC)

Restrictions

This subject is not to be taken as part of a Bachelor of Laws program attempt. External offerings are only available to students enrolled in a Property Major and to students enrolled in WSU Online Bachelor of Business. UEH offerings are only available to students enrolled in the Bachelor of Business or Bachelor of Business and Commerce, attending offshore on-campus, at the University of Economics, Ho Chi Minh City.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the features of the Australian legal system that apply to commercial enterprises, including the impact on Indigenous peoples.
2. Explain fundamental legal concepts and principles relevant to commercial enterprises.

- Identify legal issues and strategies to respond to practical commercial problems.
- Formulate written analysis of practical commercial problems.

Subject Content

- Australian Legal Systems.
- Business Structures - partnerships, sole traders, trusts and companies.
- Negligence including negligent misstatement
- Contracts (formation, validity, terms, rights and remedies)
- Australian Consumer Law and Competition Law

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	2 (Best 2 out of 3) x 30 minutes	10	N	Individual
Case Study	850 words	25	N	Group
Case Study	500 words	15	N	Individual
Final Exam	2 hours	50	N	Individual

LAWS 1003 Fundamentals of Australian Law

Credit Points 10

Legacy Code 200977

Coordinator Sandy Noakes ([https://directory.westernsydney.edu.au/search/name/Sandy Noakes/](https://directory.westernsydney.edu.au/search/name/Sandy%20Noakes/))

Description This unit provides students with the fundamental legal skills required to succeed in the study and practice of law. Students will be introduced to the Australian legal system, legal study skills, academic integrity, how law is made, how cases and statute interact, the Australian court hierarchies, case analysis skills, statutory interpretation skills, an introduction to the role of legal professionals in Australia.

School Law

Discipline Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects LAWS 1006 - Introduction to Law LAWS 1007 - Introduction to Law (WSTC)

Incompatible Subjects LAWS 1001 - Enterprise Law LAWS 1002 - Enterprise Law (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate knowledge of the basis of the Australian law and legal system, including common law institutions and their roles, and the role of legal professionals.
2. Apply basic logical and legal reasoning to legal scenarios.
3. Discuss the principles of academic integrity as they apply to University and professional practice;
4. Apply the doctrine of precedent and the rules of statutory interpretation to basic legal problems.
5. Communicate effectively in writing for lay and expert readers.

Subject Content

Legal study skills
Academic Integrity
How law is made
How cases and statute interact
Court hierarchies
Case analysis skills
Statutory interpretation skills
Introduction to the role of legal professionals in Australia

LAWS 1007 Introduction to Law (WSTC)

Credit Points 10

Legacy Code 700157

Coordinator Bader Unnisa Mehdi ([https://directory.westernsydney.edu.au/search/name/Bader Unnisa Mehdi/](https://directory.westernsydney.edu.au/search/name/Bader%20Unnisa%20Mehdi/))

Description This unit introduces students to the Australian legal system. It considers the historical and legal factors which influenced

its development and the key institutions and processes which have resulted. It considers the impact of Australian law and legal system on Indigenous Australians and their laws. The unit introduces students to legal method: legal reasoning and statutory interpretation. Students will also develop academic literacies, including study management, writing and referencing in a legal context.

LAWS 1009 Legal Analysis and Critique

Credit Points 10

Legacy Code 200978

Coordinator Catherine Renshaw ([https://directory.westernsydney.edu.au/search/name/Catherine Renshaw/](https://directory.westernsydney.edu.au/search/name/Catherine%20Renshaw/))

Description The unit exposes students to the contexts that affect how law is made, some of the institutional limitations on law and justice and the impact of globalisation on law. It introduces theories about the nature and function of law in historical, political, social, economic, cultural, ethical and international contexts. The connection between race, gender, culture and law is examined within the context of the Australian legal tradition, legal history, and the impact of the Australian legal system on Australian First Peoples. The unit introduces students to the processes of critical evaluation of arguments, legal communication and logical and critical problem solving involving statutory interpretation and precedent.

School Law

Discipline Law, Not Elsewhere Classified.

Level Undergraduate Level 1 subject

Co-requisite(s) LAWS 1003 OR
LAWS 1006 OR
LAWS 1006

Equivalent Subjects LAWS 1008 - Law Foundation

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe how law in Australia developed, including English legal history, reception of English law, independence and the impact of these developments on Australian First Peoples;
2. Use basic skills in critical evaluation of arguments, including empirical claims on causation and fact, in a manner that deepens understanding of ethics and its application in law, learning and in the profession;
3. Describe and apply theories about the nature and function of law in local and global contemporary contexts and from different perspectives, including society, politics, economics, culture, gender and race
4. Use basic logical and critical skills to develop solutions to problems involving statutory interpretation and the application of precedent, and analyse the consequences from different perspectives;
5. Apply legal research skills in relation to primary and secondary sources in order to support legal analysis and critique;
6. Articulate legal thought effectively and persuasively in written formats for lay and expert audiences.

Subject Content

The Australian legal tradition
 English legal history
 Doctrine of reception and repugnancy
 Australian constitutional independence
 The impact of the Australian legal system on Australian First Peoples
 Critical evaluation of arguments
 The nature of function of law
 Legal formalism and the rule of law
 Gender, race, culture and the law
 Law and globalisation
 Law in an economic context
 Legal communication
 Case analysis and statutory interpretation

LAWS 2001 Alternative Dispute Resolution

Credit Points 10

Legacy Code 200811

Coordinator June Wang ([https://directory.westernsydney.edu.au/search/name/June Wang/](https://directory.westernsydney.edu.au/search/name/June%20Wang/))

Description Alternative Dispute Resolution (ADR) processes are no longer 'alternative' but a major part of the contemporary justice system. Modern legal practice requires lawyers to negotiate settlements on behalf of clients and advise clients how to resolve disputes without litigation. Non-adversarial processes offer many benefits to parties, professionals and the community. This unit will introduce you to the theory and practice of alternative dispute resolution processes and provide you with the opportunity to develop key ADR practice.

LAWS 2003 Contracts

Credit Points 10

Legacy Code 200011

Coordinator Souheir Edelbi ([https://directory.westernsydney.edu.au/search/name/Souheir Edelbi/](https://directory.westernsydney.edu.au/search/name/Souheir%20Edelbi/))

Description Contracts covers the formation of contracts, the requirement of writing, privity of contract, contractual terms and their interpretation, breach of contract, discharge of contractual obligations and elements vitiating its formation such as misrepresentation, misleading and deceptive conduct, mistake, undue influence, unconscionability, duress and discharge. Statutory developments are also considered such as the Contracts Review Act 1980 (NSW) and the Australian Consumer Law, as are the historic and theoretical aspects of the development of the law of contract.

School Law

Discipline Law, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Co-requisite(s) LAWS 1006 OR LAWS 1003

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply contract law concepts and principles to answer legal problems.
2. Critically analyse the main theoretical perspectives and assumptions underpinning contract law.
3. Reflect upon the role and significance of contracts from diverse perspectives including race, gender and disability.
4. Apply communication and collaboration strategies to work effectively with others.
5. Develop logical, reasoned, and persuasive arguments in oral and written formats using a range of primary and secondary sources.

Subject Content

1. Theories of Contract.
2. Formation of Contracts.
3. Formalities.
4. Capacity.
5. Privity of Contract.
6. Contractual Terms.

7. Breach of Contract.
8. Vitiating Elements.
9. Statutory developments.
10. Discharge of contract.

LAWS 2004 Criminal Law

Credit Points 10

Legacy Code 200010

Coordinator Meda Couzens ([https://directory.westernsydney.edu.au/search/name/Meda Couzens/](https://directory.westernsydney.edu.au/search/name/Meda%20Couzens/))

Description This unit introduces students to the basic principles of criminal law and criminal responsibility and the criminal justice process as located in its broader social and political context, including the impact of the criminal justice system on Indigenous Australians. Students will engage in collaborative class learning with a particular focus on legal problem solving and participate in a mock bail application.

School Law

Discipline Criminal Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Co-requisite(s) LAWS 1006 OR LAWS 1003

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain legislation, legal principles and policy relevant to Australian criminal law;
2. Analyse criminal law problems through application of statutory interpretation methods and relevant case law;
3. Develop clear, logical and persuasive legal arguments, orally and in writing;
4. Examine the impact of the criminal justice system on Aboriginal and Torres Strait Islander peoples.

Subject Content

1. Introduction to criminal justice
2. Principles of criminal responsibility ? capacity, actus reus and mens rea, temporal coincidence, burdens and standards of proof
3. Summary offences ? i.e. offensive language and conduct/anti-social behaviour
4. Murder/Manslaughter
5. Defences ? necessity, duress, self-defence, mental state of person
6. Assault
7. Property offences
8. Drug offences
9. Domestic Violence
10. Aboriginal and Torres Strait Islander Peoples and the criminal justice system

LAWS 2005 Financial Services Law

Credit Points 10

Legacy Code 200271

Coordinator William Higgs ([https://directory.westernsydney.edu.au/search/name/William Higgs/](https://directory.westernsydney.edu.au/search/name/William%20Higgs/))

Description Financial services is one of the fastest growing sectors of the Australian economy. This is an essential unit to understand legal, compliance and regulatory issues relating to the financial services sector in Australia. Students will be introduced to the licensing requirements for entering the financial services sector and the obligations for marketing and offering financial products and financial services to retail and wholesale clients. Students are then introduced to the main techniques of financial services regulation: disclosure, licensing, prohibitions or insider trading and market manipulation, self-regulation and powers of investigation and enforcement.

School Law

Discipline Business and Commercial Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) LAWS 3045 OR LAWS 2010

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Communicate effectively, persuasively and appropriately in legal context.
2. Demonstrate an understanding of the basic principles of financial services law.
3. Apply the student's understanding of financial services law concepts to analysing and solving practical problems.
4. Appraise some of the criticisms of current financial services law in the different contexts.

Subject Content

Theories of regulation

Financial services regulatory history

Instruments and agencies

Financial Products

Fundraising

Managed Investment Schemes

Retail and wholesale clients

Australian Financial Services Licence

Financial Services Regulation

General conduct and obligations of financial services licensees and market licensees

Insider Trading

Market Manipulation

Continuous disclosure

Regulation of derivatives

Market Misconduct

ASIC's powers and remedies: criminal, civil penalties and enforceable undertakings

Compliance issues

Plaintiff's remedies

LAWS 2010 Law of Business Organisations

Credit Points 10

Legacy Code 200183

Coordinator Sam Hossain ([https://directory.westernsydney.edu.au/search/name/Sam Hossain/](https://directory.westernsydney.edu.au/search/name/Sam%20Hossain/))

Description This unit deals with legal issues concerning the creation and control of companies and compares this structure with other forms of business organisations, such as joint venture, partnership, trusts and sole traders. This unit will provide students with an appreciation of partnership, and companies and a practical operation of a scheme of corporate regulation in the Australian federal system.

School Law

Discipline Business and Commercial Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) LAWS 1004 OR LAWS 1001

Restrictions Students enrolled in 2502 Bachelor of Laws (Non graduate entry) are required to seek permission from their program Advisor prior to enrolling in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise the various forms of business organisations.
2. Explain the concept and principles of partnerships and trusts, including the liabilities of partners under contract, tort, and criminal law, and the duties and liabilities of trustees..
3. Describe the practical operation of a scheme of corporate regulation in the Australian federal system.
4. Apply company law concepts and principles to analysing and solving key contemporary legal issues concerning the creation and control of companies.

Subject Content

Various forms of business organisations

Partnerships

Registration of a company, pre-registration activities

Dealings with outsiders and liability

Internal management rules, management of a company - board of directors and general meeting

Duties of directors and consequences of breach of directors duty

Shareholder remedies

Capital and fundraising

Record keeping, disclosures and audit

External administration - receivership, administration and winding up.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

LAWS 2012 Regulatory Risk and Compliance

Credit Points 10

Legacy Code 200928

Coordinator Margaret Hyland ([https://directory.westernsydney.edu.au/search/name/Margaret Hyland/](https://directory.westernsydney.edu.au/search/name/Margaret%20Hyland/))

Description This unit aims to provide business students with the foundations for identifying, establishing and developing an organisation's regulatory risk and compliance framework. To achieve this, the unit will analyse current theory, international best practices, as well as key commercial law obligations, which Australian businesses are expected to comply with.

School Law

Discipline Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) LAWS 1004 OR LAWS 1001

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate the relationship between legal risk, risk management, an effective compliance framework and good governance.

2. Demonstrate an understanding of the various legal compliance and risk management standards.
3. Apply an understanding of the key elements of establishing an effective compliance programme and risk management system for Australian businesses.

Subject Content

1. The relationship and links between good corporate governance and legal compliance, as well as risk management.
2. Integrating risk management within an organisation's legal compliance framework.
3. The foundation for developing an effective legal compliance framework.
4. An overview of the key legal compliance obligations in financial services law, company law, competition and consumer law, privacy law, and tax law.

Prescribed Texts

Teaching Periods

LAWS 2013 Torts Law

Credit Points 10

Legacy Code 200008

Coordinator Sonia Allan ([https://directory.westernsydney.edu.au/search/name/Sonia Allan/](https://directory.westernsydney.edu.au/search/name/Sonia%20Allan/))

Description The unit introduces students to the legal principles and policy of a variety of torts, defences and remedies. The unit also introduces students to the generic legal skills of case reading and analysis and note taking, statutory interpretation and legal problem solving, as well as placing the law in the wider political and social context.

School Law

Discipline Legal Practice

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Co-requisite(s) LAWS 1006 OR LAWS 1003

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the key principles of Australian torts law prescribed by accrediting authorities.
2. Explain the relationship between common law, legislation and policy in a torts context
3. Apply principles and processes of legal reasoning including case analysis and statutory interpretation to analyse and resolve torts legal problems.
4. Develop clear, concise and persuasive arguments to write answers to legal problems

Subject Content

Comparative role of tort law, criminal law, contract law and no-fault compensation schemes

Intentional torts

Negligence

Defences

Remedies in tort actions

Concurrent liability

LAWS 2014 Bioethics

Credit Points 10

Legacy Code 201044

Coordinator Patrick Foong ([https://directory.westernsydney.edu.au/search/name/Patrick Foong/](https://directory.westernsydney.edu.au/search/name/Patrick%20Foong/))

Description This subject covers the ethical and legal issues associated with medical practice and research, including issues raised by new developments in biotechnology. Topics covered include the following: the nature of moral thinking, issues of life and death, experimentation and research involving human subjects, genetic technology, new reproductive technologies, consent and confidentiality.

School Law

Discipline Law, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) LAWS 2013 AND LAWS 1009

Equivalent Subjects JUST 2002 - Bioethics

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically apply major ethical theories and concepts to biomedical issues and problems.
2. Engage in critical, interdisciplinary analysis of the causes, consequences and problems of contemporary patterns of health and illness and biomedical research.
3. Examine ethical and legal issues raised by recent developments in biotechnology.
4. Apply relevant ethical and legal ideas to practical bioethical problem situations and biomedical law reform.

Subject Content

1. Introduction to bioethics law
2. Medical and health ethics and law
3. Health and medical research
4. Biotechnology: Cloning and stem cell research
5. Genetic technology
6. Assisted reproductive technology (ART)
7. Consent, confidentiality and privacy
8. Surrogacy
9. Euthanasia

LAWS 3001 Advanced Family Law

Credit Points 10

Legacy Code 200629

Coordinator Kimberly Buttriss ([https://directory.westernsydney.edu.au/search/name/Kimberly Buttriss/](https://directory.westernsydney.edu.au/search/name/Kimberly%20Buttriss/))

Description This unit provides a practical framework around complex family law matters and builds upon the skills obtained in 200633 Family Law. This unit provides the students with the opportunity to obtain practical skills in taking instructions from clients, drafting orders, making urgent applications, children's matters including complex family dynamics, child dispute services, Family Reports, Magellan matters, drafting documents, Relocation Cases, Hague Convention Cases and Contravention Proceedings, Property Matters including assets and values, financial disclosure, conciliation conferences, contributions, expert evidence, spousal maintenance and enforcement proceedings, as well child support and running undefended hearings.

School Law

Discipline Family Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 3023

Equivalent Subjects LGYB 8510 - Advanced Family Law

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Obtain client instructions and prepare documents to commence and run proceedings in relation to both property and children's matters.
2. Draft appropriate Family Law Orders.
3. Prepare the client and their case for expert evidence and final hearings.
4. Provide both written and oral submissions in relation to complex family law issues.
5. Prepare and run a Hearing demonstrating competent advocacy skills.

Subject Content

1. Interviewing Clients - Obtaining Client Instructions
2. Drafting Family Law Orders and Court Documents
3. Drafting and Running Urgent Applications
4. Providing Advice to Clients Regarding Complex Family Law Children's Matters
5. Magellan Matters
6. Family Reports
7. Relocation Cases
8. Hague Convention Cases
9. Contravention
10. Pre-Action Procedures (Property)
11. Contributions - s79 and s75(2)
12. Conciliation Conferences
13. Asset Values and Expert Evidence
14. Enforcement Proceedings
15. Child Support

16. Undefended Hearings

Assessment

LAWS 3002 Advanced Torts and Civil Wrongs

Credit Points 10

Legacy Code 200650

Coordinator Tim Paine ([https://directory.westernsydney.edu.au/search/name/Tim Paine/](https://directory.westernsydney.edu.au/search/name/Tim%20Paine/))

Description Advanced Torts and Civil Wrongs examines in detail the basic principles and current issues in selected areas of torts law and civil liability.

School Law

Discipline Law, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 2013

Equivalent Subjects LGYB 8513 - Advanced Torts and Civil Wrongs

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Construct and critically evaluate arguments by reference to appropriate evidence, authority and alternative perspectives.
2. Apply understanding of tortious concepts to analysing and solving practical problems, theoretical legal issues and contemporary debates.
3. Construct and present a critical and persuasive oral argument for law reform based upon a contemporary tortious issue.
4. Write effectively and appropriately, displaying clear and logical structure and using accurate grammar and punctuation.
5. Use quality, current and relevant information from primary and secondary sources.
6. Ethically and accurately reference (using the Australian Guide to Legal Citation) legal information from a range of primary and secondary sources.

Subject Content

1. Strict liability and the tort of breach of statutory duty.
2. Intentional economic torts including deceit, intimidation and civil conspiracy.
3. Abuse of process torts including malicious prosecution and misfeasance in a public office.
4. Policy consideration and critiques underpinning the duty of care in negligence with specific focus on government agencies, police, parents and children and schools.
5. Actions for stress-related mental harm outside the Civil Liability Act.

6. Section 3B(1)(a) of the Civil Liability Act and the meaning of “an intentional act that is done ... with intent to cause injury or death or that is sexual assault or other sexual misconduct

LAWS 3003 Advocacy

Credit Points 10

Legacy Code 200646

Coordinator David Collier ([https://directory.westernsydney.edu.au/search/name/David Collier/](https://directory.westernsydney.edu.au/search/name/David%20Collier/))

Description This unit imparts basic courtroom trial skills giving practice in applying substantive law, practice, procedure and evidence in a simulated courtroom. It also explores both professional and ethical issues involved in the courtroom. There is a limit on enrolment in this unit because of the teaching method adopted.

School Law

Discipline Law, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Co-requisite(s) LAWS 4004

Equivalent Subjects LGYB 0403 - Advocacy

Restrictions Successful completion of 80 credit points of Bachelor of Laws core subjects. Enrolment in the subject is by invitation only following a call for expressions of interest and a merit selection process. Classes are kept small due to the practical nature of the subject.

Assumed Knowledge

Good communication skills; including the ability to construct a coherent argument and write in a manner that is grammatically correct.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a clear understanding of: legal professional ethics; proper legal professional practice; and correct legal professional behaviour.
2. Demonstrate the essential requirements of good advocacy in general, and in particular and differing contexts: eg. the difference between conducting bail pending hearing and conducting an appeal in an appellate court.
3. Take up any case and analyse it succinctly, logically and accurately: the relevant facts; the relevant legal principles; and the intelligent application of the principles to the facts.
4. Present the oral distillation of a case analysis in a polite, polished and persuasive fashion.
5. Think quickly and adapt flexibly according to changing circumstances while engaged in presenting an oral argument.
6. Be aware of any relevant aspect of legal professional ethics and be at once able to mould any desired submission so as to accord strictly with that ethical aspect.
7. Present written submissions and analyses in a logically structured and grammatically correct manner.
8. Demonstrate a ready understanding and an intelligent acceptance of the nature of advocacy skills.

Subject Content

1. Introduction to Advocacy
2. Interlocutory Advocacy: Civil
3. Interlocutory Advocacy: Criminal
4. Some Special Types of Criminal Advocacy
5. Trial Advocacy: Opening and Examination in Chief
6. Trial Advocacy: Cross-examination
7. Appellate Advocacy

Assessment

LAWS 3004 Anti-Discrimination Law

Credit Points 10

Legacy Code 200654

Coordinator Luke Maroney ([https://directory.westernsydney.edu.au/search/name/Luke Maroney/](https://directory.westernsydney.edu.au/search/name/Luke%20Maroney/))

Description This unit provides students with a practical understanding of Australian anti-discrimination and equality law, including relevant state and federal legislation, and significant cases. It encourages the development of critical perspectives on the operation and effectiveness of existing regulatory responses to discrimination. Starting with a conceptual and historical overview, this unit considers the key grounds/attributes, types of conduct, and activities (areas of public life) that are protected under current Australian anti-discrimination law. Relevant defences, exceptions and exemptions are also considered, along with procedural requirements for bringing a discrimination complaint, remedies and costs.

School Law

Discipline Business and Commercial Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 2008

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and analyse legislation and case law relevant to discrimination law and practice.
2. Apply law to factual scenarios to provide advice about strengths and weaknesses of actions and defences, likely outcomes of litigation and the merits of litigating.
3. Write effectively, displaying clear and logical structure.
4. Ethically and accurately reference legal information from a range of primary and secondary sources using the Australian Guide to Legal Citation.
5. Construct arguments by reference to appropriate evidence, authority and alternative perspectives.

Subject Content

Introduction
 Historical Context
 Definition of Discrimination
 Grounds or Attributes
 Areas of Unlawful Discriminatory Activity
 General Exemptions
 Harassment
 Incitement
 Racial, Homosexual and HIV or AIDS Vilification
 Victimisation
 Advertisements
 Machinery, Procedure and Remedies

LAWS 3005 Australian Competition Law

Credit Points 10

Legacy Code 200905

Coordinator Adrian Coorey ([https://directory.westernsydney.edu.au/search/name/Adrian Coorey/](https://directory.westernsydney.edu.au/search/name/Adrian%20Coorey/))

Description This unit examines the main competition law provisions of the Competition and Consumer Act 2010 (Cth). Specifically, it examines the key concepts and economic principles that form the basis of competition law, the relevant case law, the available statutory remedies, and enforcement powers of the Australian Competition and Consumer Commission. This unit will provide students with an in-depth understanding of the theoretical basis of competition law as well as a practical understanding of how the competition provisions (including restrictive trade practices and cartel provisions) are applied.

School Law

Discipline Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 2003

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of Australian competition law, policy and related public and private remedies.

2. Demonstrate an understanding of the enforcement powers of the Australian Competition and Consumer Commission.
3. Apply Australian competition law definitions and concepts to analysing and solving practical problems and theoretical legal issues.
4. Demonstrate a critical appreciation of current and proposed legislative amendments relevant to Australian competition law.
5. Accurately and ethically reference (using the Australian Guide to Legal Citation) legal information from a range of primary and secondary sources.
6. Use a range of legal research tools to locate and interrogate primary and secondary legal information.

Subject Content

1. Development of competition law and application of the Competition and Consumer Act 2010 (Cth).
2. Market definition.
3. Market power and substantial lessening of competition.
4. Cartels.
5. Anti-competitive contracts.
6. Misuse of market power.
7. Exclusive dealings.
8. Resale price maintenance.
9. Mergers and acquisitions.
10. Authorisation and notification.
11. Private remedies.
12. Public remedies.
13. Role of the ACCC, enforcement policies and procedures.
14. ACCC investigative powers.

LAWS 3011 Comparative Law: Legal Systems of the World

Credit Points 10

Legacy Code 200529

Coordinator Liesel Spencer ([https://directory.westernsydney.edu.au/search/name/Liesel Spencer/](https://directory.westernsydney.edu.au/search/name/Liesel%20Spencer/))

Description The unit introduces students to the different legal systems of the world: the common law and civil law traditions, indigenous legal systems, religion-based legal systems and legal systems in Asia. It aims to provide an understanding of how they have developed in particular legal and cultural contexts. It also examines and evaluates the impact of the introduction of western legal systems in non-western countries. We will study the systems of both at the general level and in relation to specific laws, such as family law, torts and contracts, dispute resolution and procedure. The unit is also concerned with the nature and function of comparative law as a discipline. Students will be encouraged to undertake individual research and to evaluate legal information derived from a variety of different sources and perspectives.

School Law

Discipline International Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 2013 AND

LAWS 4015 AND

LAWS 2004 AND

LAWS 2003

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the general structure of selected legal systems, their historical and cultural context, and selected laws within those systems
2. Compare and contrast selected legal systems and laws with the common law system and Australian laws
3. Explain the nature and function of comparative law as a discipline
4. Produce critical arguments about selected legal systems and about comparative law as a tool for gaining knowledge
5. Demonstrate high-level communication and research skills
6. Explain the general structure of selected legal systems, their historical and cultural context and selected laws within those systems

Subject Content

1. Introduction: why study comparative law?
2. Comparative methods
3. Perspectives on different systems of law and cultural values
4. A comparative review of the common law system and the civil law system
5. Indigenous legal systems, including those of Aboriginal and Torres Strait Islander peoples
6. Legal systems based on religion: Islamic Law
7. Legal systems in Asia
8. Legal Transplants
9. Legal pluralism
4. Review of the common law
5. The Civil Law system
6. Indigenous legal systems, including those of Aboriginal and Torres Strait Islander peoples
7. Legal systems based on religion: eg Hindu law, Jewish law and Islamic Law
8. Asian legal systems: China and Japan
9. Transplanting legal systems
10. Legal pluralism

LAWS 3013 Conflict of Laws

Credit Points 10

Legacy Code 200656

Coordinator Timothy Mcgrath ([https://directory.westernsydney.edu.au/search/name/Timothy Mcgrath/](https://directory.westernsydney.edu.au/search/name/Timothy%20Mcgrath/))

Description Conflict of Laws (also known as Private International Law) is about resolving legal questions involving more than one jurisdiction. Conflict of Laws issues may arise between the Australian States and Territories or between nations. The globalisation of economic activity, and ease and affordability of travel and telecommunications have contributed to the recent dramatic increase of trans-national dimensions in personal and commercial litigation. This unit provides an introduction to the sources of conflict of laws, the international jurisdiction of domestic courts, the recognition and enforcement of foreign judgements and decrees, and the problem of choice of law as it arises in various situations.

School Law

Discipline International Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 2013 AND

LAWS 2003 AND

LAWS 3082

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and discuss key substantive issues in conflict of laws including: the private dimensions of international law and forum issues that domestic courts face.
2. Compare key aspects of the way in which Australian courts approach conflict of laws situations with procedures in other jurisdictions;
3. Identify and discuss the complexities of enforcement of judgments;
4. Critically examine the issues presented in the readings;
5. Analyse problems concerning conflict of laws, develop options, including applying legal principles, to resolve the problems;
6. Research an issue concerning conflict of law and present your analysis in a logically argued clearly written, well structured, appropriately referenced paper.

Subject Content

- introduction
- Jurisdiction
- choice of Law
- Discretionary non-Exercise of choice
- limits on Jurisdiction

- aspects of trans-national Litigation
- enforcement of foreign judgements
- Defences to enforcement of foreign judgements
- choice of Law-substance and procedure
- Conflict of laws within Australia-constitutional dimensions of choice of Law
- Conflict of laws within Australia-Federal and cross-vested Jurisdiction
- particular applications: choice of Law in Contract, Tort, property Law, family Law

LAWS 3014 Corporate Governance

Credit Points 10

Legacy Code 200657

Coordinator John Juriansz ([https://directory.westernsydney.edu.au/search/name/John Juriansz/](https://directory.westernsydney.edu.au/search/name/John%20Juriansz/))

Description Through an interdisciplinary approach, this unit explores the place and role of the modern for profit business corporation in advanced and emerging capitalist economies. It examines the public and private role of public and private companies (and their equivalent in non-common law jurisdictions), their external and internal orientation, and issues relating to their accountability, responsibility, and transparency.

School Law

Discipline Business and Commercial Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 3045 OR LAWS 2010

Equivalent Subjects LAWS 3026 - Governance

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically examine the theory underlying governance in general and corporate governance in particular, and the relationship between responsibility, accountability and transparency in the context of the term business ethics.

2. Discuss the relationship between law, self regulation such as industry standards and associations codes of conduct, and the disciplining effect of the marketplace
3. Identify and examine the role and powers of the corporate and market regulators and their enacting legislation in the Australian corporate jurisdiction and marketplace.
4. Recognise the structure and relationship between the board of directors, managers, shareholders, employees and other constituencies.
5. Identify and apply the compliance requirements under the laws governing the conduct of the affairs of the corporation including the shareholder meeting, and the functions of the audit, risk management, and remuneration committees.
6. Identify the governance of multinational corporations and the legal framework regulating multi jurisdiction corporations.
7. Identify, evaluate, and prioritise legal issues, the impact of foreign regulatory systems and their interaction with one another to systematically apply the relevant law.
8. Locate, organise, analyse, evaluate and apply legal and non legal materials to develop and substantiate legal advice, and/or argument.
9. Communicate clearly, persuasively and accurately; orally and in writing

Subject Content

1. The economic theory of the firm
2. The legal theory of the Corporation: Australian, US, UK approaches compared to the German and Japanese models
3. The role of Audit, Risk Management and Remuneration committees
4. The role of Institutional shareholders, and Institutional shareholder committees
5. The impact of codes of corporate governance and ethical conduct
6. Markets (Australia, US, UK) versus Managed (Germany and Japan) governance
7. Stakeholders and shareholders, and the political economy of Corporations law
8. Aspects of finance, management, and control

LAWS 3015 Cyber Law and Justice

Credit Points 10

Legacy Code 201018

Coordinator David Tait ([https://directory.westernsydney.edu.au/search/name/David Tait/](https://directory.westernsydney.edu.au/search/name/David%20Tait/))

Description The world is being transformed by digital technologies. The same technologies that make life more comfortable for some can unleash violence and destruction for others. Cyber war and cyber terrorism offer new risks for the international community. Bullying, identity theft and bank fraud, on a more local level, are given a new life in the cyber world. Cyber technologies also provide enhanced opportunities for detecting and apprehending criminals, resolving disputes and modernising justice processes. New social spaces are opened up (social media networks, the 'dark web'), and new identities made possible (online grooming profile, avatars). How does the law keep up with the emergence of new crimes and technology-enhanced versions of old ones, and how do the cultural worlds of hackers, crackers and trackers work? The subject examines how justice processes and spaces, as well as criminal networks and strategies, are being reimaged to take advantage of the new technologies.

School Law

Discipline Law, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 2008

Incompatible Subjects HUMN 3030 - Cyber Justice (UG)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the legal nature of cybercrime (including cyber terrorism and cyber war) including its techniques, targets and impact.
2. Critically investigate the way cyber technologies are used in policing and courts to transform justice processes and respond to cybercrime.
3. Assess primary and secondary legal resources related to cybercrime, law and social justice.
4. Develop research ideas in a peer-supported learning environment.
5. Communicate arguments related to cyber law and justice logically and clearly in oral and written form.
6. Use digital technologies relevant to cyber law and justice.

Subject Content

Cybercrime: new and enhanced crimes of the digital age
 Cyberjustice: the transformation of justice by digital technologies
 Cyber war and cyber terrorism.
 Cyber bullying and stalking.
 Privacy and surveillance
 On-line and virtual justice

LAWS 3022 Family Dispute Resolution

Credit Points 10

Legacy Code 200772

Coordinator Brett Mcgrath ([https://directory.westernsydney.edu.au/search/name/Brett Mcgrath/](https://directory.westernsydney.edu.au/search/name/Brett%20Mcgrath/))

Description This subject develops mediation skills and understanding of family dispute resolution. It builds on LAWS 3023 (200633) Family Law to deepen student knowledge of and capacity to assist separated parents to resolve disputes about their children and property. Particular attention is given to processes concerning children and processes to assist families who present with highly complex family dynamics, including the presence of family violence. This subject develops students' skills to recognise and understand the drivers of conflict for separating couples, and how to conduct family dispute resolution in both the court and non-court context.

School Law

Discipline Family Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 3023

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Conduct assessment of clients with family relationship issues to assess their suitability for family dispute resolution processes
2. Analyse the impact of family domestic violence on families and children and take appropriate measures to ensure the safety of family members who are subjected to violence
3. Manage casework in a family law context
4. Apply the Family Law Act and other relevant legislation and principles to assist clients with post separation problems
5. Conduct family dispute resolution and outcomes that promote the best interests of the children
6. Reflect on development of professional competence in family dispute resolution
7. Critically evaluate family dispute resolution

Subject Content

1. Introduction and Family Dispute Resolution - the context
2. Approaches to Family Mediation & Role of the Mediator
3. Issues for Separating Couples and Parents & Children
4. Understanding Family & Domestic Violence
5. Children's Voice
6. Issues for Couples: New and Established Relationships
7. Mediating Property & Financial Issues
8. Mediating other family disputes
9. Practice Considerations: the process
10. Additional practice considerations
11. Principles of Practice
12. Language of Mediation – Language & Culture

13. Reflective Practice in Family Law dispute resolution

LAWS 3023 Family Law

Credit Points 10

Legacy Code 200633

Coordinator Brett Mcgrath ([https://directory.westernsydney.edu.au/search/name/Brett Mcgrath/](https://directory.westernsydney.edu.au/search/name/Brett%20Mcgrath/))

Description This unit aims to graduate students who will become reflective, ethical and effective family lawyers and/or family dispute resolution practitioners. This unit adopts a range of perspectives to critically evaluate developments in theory, laws, policies and practices concerned with the legal regulation of intimate relationships, particularly after separation. Family law balances the competing rights, obligations and interests of partners, children and others following separation, often in the context of complex family dynamics. In addition to having a sound grasp of family law, family lawyers must also appreciate the social, political, psychological and economic contexts that influence separating families.

LAWS 3024 Foundations of Chinese Law

Credit Points 10

Legacy Code 200759

Coordinator June Wang ([https://directory.westernsydney.edu.au/search/name/June Wang/](https://directory.westernsydney.edu.au/search/name/June%20Wang/))

Description An LLB alternate unit, Foundations of Chinese Law is taught intensively at a selected Chinese university. The unit introduces students to the basic structure of the Chinese legal system, its laws and the legal culture. Through seminars and field trips to Chinese courts and law firms, the unit aims to develop your understanding of how the Chinese legal system has developed in its political and cultural contexts. It covers the Chinese legal systems at the general level and in relation to specific law, such as contracts, foreign investment law, dispute resolution and procedure.

School Law

Discipline Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 2003

Restrictions The subject is available to students by invitation only. Students must attend all the classes and activities (both online and face-to-face) via the Online Global Learning experience organised by the School of Law. (Dates for session of offer will be made available to students through the School of Law's regular communication channels).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the general structure of the Chinese legal system and institutions.
2. Critically examine the history of legal reform in China in its cultural context.
3. Describe and evaluate selected laws and dispute resolution procedures in China.

Subject Content

1. Chinese legal system and legal institutions;
2. China's opening Up policy and law reform;
3. The Constitution and Administrative Law;
4. Chinese Foreign Trade and Investment Law;
5. Commercial Law in China;
6. Legal Education, Legal Service and Judicial System in China;
7. Chinese legal Culture and Dispute Resolution

Special Requirements

Legislative pre-requisites

Relevant visa for China.

LAWS 3025 Foundations of Indian Law

Credit Points 10

Legacy Code 200983

Coordinator Alpana Roy ([https://directory.westernsydney.edu.au/search/name/Alpana Roy/](https://directory.westernsydney.edu.au/search/name/Alpana%20Roy/))

Description An LLB alternate unit, Foundations of Indian Law is taught intensively at a selected Indian university. The unit introduces students to the basic structure of the Indian legal system, its laws and the legal culture. Through seminars and field trips to Indian courts and law firms, the unit aims to develop your understanding of how the Indian legal system has developed in its political and cultural contexts. It covers the Indian legal systems at the general level and in relation to specific law, such as contracts, foreign investment law, dispute resolution and procedure.

School Law

Discipline Law, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 1006 OR LAWS 1003 AND LAWS 2003

Restrictions The subject is not available for self-enrolment. Intake in the subject will be restricted to expressions of interest. GPA and progression in program will be considered. Pre-requisites must be met. The subject is not considered appropriate for non-LLB students by virtue of its nature. Students must be able to travel to India for a specified period of 2-2.5 weeks (Dates for session of offer will be made available to students through the School of Law's regular communication channels).

Learning Outcomes

On successful completion of this subject, students should be able to:

- Demonstrate an understanding of the general structure of the Indian legal system and institutions;
- Critically examine the history of legal reform in India in its cultural context;
- Describe and evaluate selected laws and dispute resolution procedures in India;
- Apply an understanding of the Indian legal system to analysing contemporary Indian legal issues.

Subject Content

- The Indian legal system and legal institutions: historical and cultural contexts
- sources of Law in India
- The Indian Judicial system
- constitutional Law in India
- Indian Civil Law
- common Law in India
- Customary Law in India
- Muslim Law in India
- international Law in India
- Indian commercial laws and regulations: including foreign investment and trade laws in India
- Dispute Resolution systems in India
- Indian legal scholarship and The legal education system in India
- The legal profession and professional legal practice and ethics in India

Special Requirements

Legislative pre-requisites

Relevant visa for India.

Teaching Periods

LAWS 3027 Human Rights Law

Credit Points 10**Legacy Code** 200635

Coordinator Robert Mezyk ([https://directory.westernsydney.edu.au/search/name/Robert Mezyk/](https://directory.westernsydney.edu.au/search/name/Robert%20Mezyk/))

Description This Unit examines the theory and practice of international human rights law through the framework of specific, current human rights issues. The Unit examines the moral and political justification for human rights; the foundations and historical development of key human rights instruments and institutions; the domestic, regional and global organisations that contribute to the promotion and protection of human rights; and challenges to realising human rights in different economic, cultural and religious contexts. Through a focus on contemporary issues and debates (which might include for example, the scope of the right to privacy; the effectiveness of measures to prevent genocide; the vulnerability of women and children in conflict situations) the Unit encourages a critical examination of the interconnectedness of rights and the way international human rights law is deployed to expand (or constrain) possibilities for social change and justice. The unit integrates the experience of the teachers as active human rights practitioners and academics in a range of institutions such as with National Human Rights Institutions, Human Rights NGOs, and United Nations bodies to interrogate the range of ways in which human rights can be used to advance the equality and dignity of humanity.

School Law**Discipline** Business and Commercial Law**Student Contribution Band** HECS Band 4 10cp**Level** Undergraduate Level 3 subject

Pre-requisite(s) LAWS 1003 OR
LAWS 1006

Restrictions

Students must have completed 80 credit points of study in Law subjects.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Conduct research into human rights issues, including location of reported cases, treaties, government and civil society reports and academic commentary;
2. Evaluate and apply knowledge of domestic and international human rights law to a range of practical situations;
3. Explain the interrelated nature of human rights challenges across a range of issue areas;
4. Communicate appropriately and effectively, both orally and in writing, critical judgements on the merits of a range of human rights arguments in legal and academic texts;
5. Develop arguments based in human rights analysis to support social change and justice.

Subject Content

1. Historical and philosophical foundations of human rights
2. Challenges to traditional conceptions of human rights
3. International human rights norms and institutions
4. Regional human rights systems
5. Human rights protection at the national level
6. The human rights treaty monitoring system
7. Case studies of human rights interventions on specific issues, which might include: asylum seekers; indigenous peoples; human trafficking; children's rights; rights of women; peace and security
8. Case studies of human rights interventions in specific countries, which might include Australia, New Zealand, Afghanistan, South Sudan, Timor Leste, Myanmar, Russia

LAWS 3028 Human Rights and the Asia Pacific

Credit Points 10

Legacy Code 200908

Coordinator Catherine Renshaw ([https://directory.westernsydney.edu.au/search/name/Catherine Renshaw/](https://directory.westernsydney.edu.au/search/name/Catherine%20Renshaw/))

Description This unit examines the place of regional human rights systems in the global architecture of human rights. Concepts of universalism, relativism and the 'Asian values' debate are examined. The record of human rights treaty ratification and compliance in Asia and the Pacific is examined within the context of the international treaty system as well as the ASEAN regional human rights regime. The development and implementation of international and domestic human rights protections in criminal law, constitutional law and institutional construction are examined across the region. The role of civil society, non-governmental organisations and networks, and middle powers in impacting the politics, law and institutions of human rights protections across the Asia-Pacific region is examined.

School Law

Discipline Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 1006 OR LAWS 1003

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of how human rights are protected at the domestic, regional and international levels in the countries of Asia and the Pacific.
2. Integrate knowledge from a range of disciplines to evaluate how different philosophical, religious and cultural traditions in Asia and the Pacific relate to the international law of human rights.
3. Critically evaluate the effectiveness of different mechanisms and institutions for the protection and promotion of human rights in Asia and the Pacific.
4. Develop and present coherent arguments about complex human rights issues.
5. Possess a highly developed ability to communicate analysis effectively in a variety of appropriate scholarly and professional formats.
6. Ethically and accurately reference (using the Australian Guide to Legal Citation) legal information from a range of domestic and international primary and secondary sources.

Subject Content

- The place of Regional human rights systems in The Global architecture of human rights
- Universalism, relativism and the "Asian values" debate
- Asia and The Pacific in The international system (human rights Treaty ratification record, compliance)
- ASEANs new Regional human rights regime (The Commission, The Declaration)
- The Pacific: sub-Regional human rights Developments
- Asia and international criminal Law: The arc of justice from Tokyo to Phnom Penh
- implementation of human rights at The state level in Asia and The Pacific: constitutional protection of rights
- implementation of human rights at The state level in Asia and The Pacific: national human rights institutions in Asia
- Regional behemoths and their different approaches to rights: India and China
- promotion and protection of human rights in Communist States: focus on Vietnam
- human rights under Military dictatorships: Myanmar (Southeast Asia) Fiji (The Pacific) North Korea (North Asia)
- The role of Civil society and non-governmental organisation and their networks in The Asia Pacific
- Australia and new Zealand: middle powers and The politics of human rights persuasion

LAWS 3030 Information and Data Governance Law and Regulation

Credit Points 10

Legacy Code 200955

Coordinator Thillagavathy Rajaretnam ([https://directory.westernsydney.edu.au/search/name/Thillagavathy Rajaretnam/](https://directory.westernsydney.edu.au/search/name/Thillagavathy%20Rajaretnam/))

Description This unit examines the operation of information technology for online data collection, information privacy and data governance laws and regulation. The unit focuses on the right to privacy, the protection of individuals with regard to the processing of personal data and the free movement of such data and the legal framework for information protection. The framework for information privacy and data governance is established by both international and domestic law and regulation. The unit introduces the basic legal framework for information privacy protection and governance under the European Union's Commission, the OECD Guidelines for the Protection of Privacy and Trans-Border Flows of Personal data and under the Australian Privacy protection framework. The unit compares the information governance policy and framework in the European Union and the United States with that in Australia.

School Law

Discipline Law, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 2003

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise the legal issues that arise from the use of information technologies in cyberspace;
2. Apply the basic international and national legal framework, the policy to information privacy and data governance laws and regulation to related legal issues for law reform;
3. Use critical thinking and research to resolve related legal issues in oral and/or written forms.

Subject Content

- theoretical approaches to information and data Governance Law
- information and data Governance legal frameworks in The European union
- OECD guidelines for The protection of Privacy and trans-border flows of personal data
- Australian Privacy protection and information Governance framework
- impact of international and national laws and regulation on Privacy and data Governance policies
- challenges for regulators in providing adequate and effective protection information and data Governance laws and regulation in cyberspace

LAWS 3035 International Moot Court

Credit Points 10

Legacy Code 200663

Coordinator Steven Freeland ([https://directory.westernsydney.edu.au/search/name/Steven Freeland/](https://directory.westernsydney.edu.au/search/name/Steven%20Freeland/))

Description This unit aims to train those students selected to represent the School of Law, Western Sydney University, in international law Mooting Competitions in litigation and advocacy before international courts. Depending on the circumstances at the time, the possible competitions will be one or more of the following: Jessup International Law Court Competition; Jean Pictet International Humanitarian Law Competition; Manfred Lachs Space Law Moot Competition; Stetson International Environmental Law Competition. Other alternate competitions may be chosen in the future. For several of the competitions, the majority of the work will be conducted over the summer months and students will be required to undertake that they will devote sufficient time during that period to properly undertake all required tasks. Students will be provided with a grounding in issues including jurisdiction, admissibility, interim measures, principles of state responsibility and remedies. The course will focus on the International Court of Justice. The course will also have a practical component aimed at enhancing the advocacy skills of participants and applying the theory to the practical aspects of the conduct of international advocacy. Students will be involved in the preparation and presentation of a hypothetical case before the ICJ and will be given the opportunity to develop their advocacy skills, including the preparation of written submissions and delivery of oral submissions, in a non-competitive context.

School Law

Discipline Law, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 80 credit points of law subjects

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate a basic understanding of the sources of public international law, and apply them to specific factual scenarios
2. engage in critical discussion of relevant legal and advocacy considerations arising from specific moot problems and present oral arguments persuasively
3. demonstrate clear research and analytical skills in relation to complex factual problems involving issues of international law
4. produce draft written memorials which demonstrates clear, well structured, appropriately referenced, critical and original analysis and arguments

5. understand the court etiquette, rules of procedure and evidence and requirements regarding an oral presentation to the International Court of Justice
6. develop and refine their oral presentation skills to the level required for international moot court competitions

Subject Content

- oral presentation skills
- research skills
- written memorial skills
- Understanding The Rules of The international court of justice

Coordinator John Juriansz ([https://directory.westernsydney.edu.au/search/name/John Juriansz/](https://directory.westernsydney.edu.au/search/name/John%20Juriansz/))

Description This unit examines the legal regime governing the international exchange of goods, services and capital. The focus of the unit will be the WTO and the GATT, GATS, and TRIPS agreements with attention given to the interaction of trade and investment issues, and the interplay of law, politics and diplomacy in regulating these issues. Topics include: the international legal framework for international trade and investment, structural and transactional aspects of international trade and investment, dispute settlement, bilateral and multilateral trade agreements, the impact of national and foreign trade policies on world trading activities, the role and interest of Australia as a trading nation, and trade as a political issue.

School Law

Discipline International Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 3045

Assumed Knowledge

The subject being an advanced year alternate subject draws upon all of the core subjects learnt in a typical Law degree program and the skills learnt from exposure to other disciplines.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate comprehensive knowledge of the field and explain, identify and critically evaluate the key concepts, policies and issues on defined topics.
2. Apply an understanding of the relevant legal concepts and aspects of policy analysis to analysing and solving practical problems and theoretical legal issues in a clear, logical and effective way.

Subject Content

International Law and International Economic Relations (Historical and contemporary)

The Legal structure of the WTO

GATT, GATS, TRIPS, and TRIMS

Dispute Settlement under the WTO

Tariffs Quotas, and Non tariff Barriers

Non discrimination and the Most favoured nation clause

The National Treatment clause

Bilateral and Multilateral Free Trade agreements

Escape Clauses, safeguards and adjustment policies

The regulation of Dumping (injury analysis, subsidies and

Countervailing duties)

Developing countries and the WTO system

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

Coordinator Margaret Hyland ([https://directory.westernsydney.edu.au/search/name/Margaret Hyland/](https://directory.westernsydney.edu.au/search/name/Margaret%20Hyland/))

Description This unit will examine the law, principles and practice governing international business transactions, including such issues as foreign investment law, the UN Convention on Contracts for the International Sale of Goods (CISG), the means of cross-border payments in international business and international banking and

finance, and international anti-corruption regulations. The unit will also examine the enforcement of international business agreements, including alternative dispute resolution in an international context.

School Law

Discipline International Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 1004 OR LAWS 1001

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate the similarities and differences between domestic and international business transactions.
2. Critically evaluate and apply an understanding of domestic and international law relating to enforcement of international business agreements.
3. Apply an understanding of the role of the major international bodies which assist in the enforcement of international transactions.
4. Critically evaluate and apply an understanding of the wider context of international commercial transactions in a digital age.

Subject Content

- An overview of what constitutes 'international business transactions'.
- foreign investment Law and regulation in Australia and major trading partners such as China, India and Japan.
- UN Convention on contracts for The international sale of goods (CISG)
- The role and effect of The World trade organisation
- The role of The Multinational banks in cross-border payments and The major payment clearing houses.
- The Law and principles relating to The enforcement of international business agreements.
- Australian and international (such OECD) regulations relating to corruption.
- alternative Dispute Resolution of international commercial disputes.

LAWS 3039 Islam, International Law and Human Rights

Credit Points 10

Legacy Code 200956

Coordinator Maria Bhatti ([https://directory.westernsydney.edu.au/search/name/Maria Bhatti/](https://directory.westernsydney.edu.au/search/name/Maria%20Bhatti/))

Description This unit explores the intersection between Islamic law, international law and human rights. The unit begins with providing a theoretical framework introducing international law and human rights from a secular and Islamic perspective, providing an overview of how classical and contemporary Muslim scholars engage with the human rights discourse. The second part of the unit will discuss human rights from the perspective of nation states, examining the legal framework (in the context of Islamic and secular law) of key nation states, as well as that of some international organisations (including the Organisation of Islamic Cooperation and the Arab

League). Students will examine whether there is an ideal governance framework to protect human rights and discuss core international human rights treaties including Islamic Human Rights instruments (i.e. the Universal Islamic Declaration of Human Rights, the Cairo Declaration on Human Rights in Islam and the Arab Charter on Human Rights). Students will discuss specific human rights issues including Islam and gender, Islam and freedom of expression, Islam and freedom of religion and Islamic criminal law. When examining these topics, students will be encouraged to engage with various interpretations of Islamic law, as well as critically examine the human rights framework.

School Law

Discipline International Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 2008

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the intersection between Islamic law, international law and human rights and its applications in contemporary times;
2. Examine human rights from the perspective of nation states, focusing on the legal framework (in the context of Islamic and secular law) of key nation states, as well as that of some international organisations;
3. Propose solutions to specific human rights issues, including Islam and gender, Islam and freedom of expression, Islam and freedom of religion and Islamic criminal law, to protect human rights;
4. Construct principled and ethical argument and perspectives in addressing issues relevant to Islamic law, international law and human rights, both orally and in writing

Subject Content

1. Basic principles of Islamic law, its different schools of thought and tools of interpretation
2. History and framework of international law
3. Human rights and human rights schemes
4. Comparison of Islamic human right schemes with international human rights
5. Intersections between Islam, democracy and the nation-state
6. The interactions between secularism and Islam
7. The role and rights of women under Islamic law
8. The rights and limitations of freedom of expression under Islamic law
9. The right to freedom of religion under Islamic law
10. The principles of Islamic criminal law and the extent to which it applies in contemporary times

LAWS 3040 Islamic Law in a Changing World

Credit Points 10

Legacy Code 101465

Coordinator Jan Ali ([https://directory.westernsydney.edu.au/search/name/Jan Ali/](https://directory.westernsydney.edu.au/search/name/Jan+Ali/))

Description This unit introduces students to Islamic legal theory, its sources and principles, and its application by different schools and scholars to derive religious verdicts. Students will study efforts to 'streamline' Islamic law through a number of Sunni and Shiite schools, various conceptions of shari'ah, and modern attempts at law reform through dynamic scholarship and ijihad (independent judgment). Upon completion, students should be able to explain developments in Islamic legal thought within their socio-historical contexts, and identify key debates among Muslim scholars. Using current case studies, students will also study Islamic law issues affecting Muslims today, especially Muslim minorities.

School Humanities & Comm Arts

Discipline Law, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) HUMN 1047 OR LANG 2017

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of historical and theoretical methods of research relevant to Islamic law
2. Critically assess the developments in Islamic legal thought and their socio-historical contexts
3. Demonstrate an analytical appreciation of key debates about Islamic law.

Subject Content

Introduction to Islamic Law in a Changing World

The Islamic conception of justice
 Shariah and Fiqh: Conception and definitions
 Sources I: Revealed (Quran and Prophetic Traditions)
 Sources II: Non-revealed (Ijtihad)
 Evolution and Development
 Major schools of legal thought (Madhahib)
 Goals, Purpose, and Objectives (Maqasid)
 Rights, Democracy, State, and Shariah
 Crime and Punishment (Hudud)
 International law in Islam (Siyar)
 Islamic Law and Muslim Minorities
 Contemporary implementation and reform

LAWS 3042 Jurisprudence

Credit Points 10

Legacy Code 200649

Coordinator Bradley Gooding ([https://directory.westernsydney.edu.au/search/name/Bradley Gooding/](https://directory.westernsydney.edu.au/search/name/Bradley%20Gooding/))

Description This unit engages students in the critical analysis of modern law through reflection on the major traditions and contemporary practices of legal theory. The Unit encourages students to examine and question key legal concepts that inform the law, such as power, morality and truth. Students will interpret, analyse, justify and critique issues and ideas using tools of critical reflection drawn from texts in legal philosophy, ancient to modern. In this way, they will develop tools that allow them to understand and uncover the foundational ideas and assumptions on which we base our view of the

law and its consequences, leaving students well-placed to embark upon systematic inquiries in legal reform and further studies in legal theory.

School Law

Discipline Law, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 1006 OR
 LAWS 1003 AND
 LAWS 1008 OR
 LAWS 1009

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate theoretical perspectives on the conceptualisation of law and its institutions.
2. Critique constructs of legal philosophy regarding the nature and role of law and legislation.
3. Use the tools of jurisprudential legal theory to cultivate theoretical appreciations, and expressive critiques, of concepts of law as they manifest in practical and academic discourses.
4. Propose solutions to problems in the philosophy of law through the interpretation, justification and critique of theoretical propositions.

Subject Content

- The Relationship of Law to Morality, Politics, and Justice
- The Autonomy of Legal Thought and the Professionalization of Legal Service
- The History of Jurisprudence
- The Positivism versus Natural Law Dichotomy, and its Evolution in Contemporary Jurisprudence
- The Role of Interpretation in Legal Reasoning and Adjudication
- Contemporary Challenges to the Ideology of the Anglophone Legal Tradition
- An Introduction to Postmodern Critiques of Western Law and Liberalism
- The Premises and Functions of Critical Feminist Theory and Critical Race Theory
- Global Challenges to Legal Thought, such as Legal Pluralism and Movements Towards Ecologicality
- Case Studies in the Transformation of Fundamental Legal Concepts (Rights, Jurisdiction, the Liberal Individual)

LAWS 3043 Land Transactions Law

Credit Points 10

Legacy Code 200021

Coordinator Geoffrey Shelton ([https://directory.westernsydney.edu.au/search/name/Geoffrey Shelton/](https://directory.westernsydney.edu.au/search/name/Geoffrey%20Shelton/))

Description This unit gives students an in-depth treatment of various aspects of the law relating to the transfer of land and interests in land. Transactions dealing with land are examined from both a commercial and residential perspective. These matters form an integral part of the practice of law and are approached from a practical perspective. Topics include the standard agreement for sale of land, the law and practice relating to different title systems, mortgages, leases, easements and covenants.

School Law

Discipline Legal Practice

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 3082

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Distinguish the various systems of land title.
2. Analyse what constitutes a defect in title, the likely causes of a defect in title, and distinguish latent and patent defects in title.
3. Identify and apply (a). major legislative provisions contained in the Conveyancing Act, 1919 (NSW), the Real Property Act, 1900 (NSW) and other relevant enactments covered in the subject of study, (b). associated adjectival case law, and (c). the rights and obligations contained in the standard agreement for sale of land in New South Wales.
4. Apply the rights and obligations found in statute law, case law, and the standard agreement for sale of land to conveyancing/property law problems.
5. Distinguish various forms of security interests over land in New South Wales, including in particular various types of mortgage.
6. Analyse the various restrictions placed on users of land by way of easements and restrictive covenants.
7. Identify and apply relevant statutory and common law relevant to the various forms of leasehold interests in land.
8. Compare and assess the various remedies available with respect to the enforcement of the terms and conditions contained in the standard contract of sale including with respect to the impact of federal and state trade practices legislation.
9. Communicate clearly and logically
10. Draft in accordance with instructions relevant, well structured documents, in precise language.

Subject Content

- transfer of land and interests in land by Contract or otherwise
- various title systems
- Mortgages and other Securities over land
- Easements, covenants and other restrictions over The use of land
- Leasehold interests in land

LAWS 3047 Law of International Organisations

Credit Points 10

Legacy Code 200803

Coordinator John Juriansz ([https://directory.westernsydney.edu.au/search/name/John Juriansz/](https://directory.westernsydney.edu.au/search/name/John%20Juriansz/))

Description This unit examines the structure and functions of the world's major transnational organisations. The unit extends students' understanding provided by Public International Law by examining the reality of international action and cooperation. Given that the European Union is the most highly evolved transnational organisation in the world today, the course will be centred around this organisation, while comparing it with other major international organisations such as the

UN, the WTO and regional transnational organisations such as the African Union and the Organisation of American States. The Brexit process currently taking place in the EU will be analysed as a disruption to the trend of transnationalism.

School Law

Discipline International Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 2008

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the legal concepts and principles relating to international organisations;
2. Analyse the legal procedures and principles relevant to the management and operation of key international institutions;
3. Use legal information relevant to the study of international organisations;
4. Apply relevant legal concepts and aspects of policy analysis to analyse and solve practical problems and theoretical legal issues relating to international organisations.

Subject Content

- The international organisation in international Law
- The Internal Law of international Organisations The European union
- one or more of The following Regional Organisations or regimes The African union, ASEAN, organization of American States
- one or more of The following subject-specific Organisations: international labour organization, organisation for economic co-operation and development, The World trade organization, subject-specific organs of The United nations

LAWS 3049 Media Law

Credit Points 10

Legacy Code 200661

Coordinator Sarah Hook ([https://directory.westernsydney.edu.au/search/name/Sarah Hook/](https://directory.westernsydney.edu.au/search/name/Sarah%20Hook/))

Description This unit examines various aspects of the laws that regulate the media. The central content of the Unit consists of defamation, contempt, privacy and surveillance and a selection of other laws impacting upon this industry. Throughout the unit we will also explore two key themes. The first is whether, as a question of policy, current legal restrictions to media freedom appropriately balance the protection of free speech with various other interests, including protection of reputation, personal privacy and the effective administration of justice. The second theme asks whether media laws that were developed to regulate traditional mass-media organisations apply to individuals who publish their own content online, particularly via social media, and, if so, whether this application is appropriately balanced. Analysis of the application of existing media law principles to a range of new technologies will be featured throughout the unit.

School Law

Discipline Law, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 2013 AND LAWS 2008

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Accurately explain the principles, statutes, case law and selected policy aspects in each of the main areas of study, being defamation, contempt, privacy and prohibited publications
2. Analyse the impact of new technologies on traditional concepts of media law and policy
3. Demonstrate enhanced legal writing and reasoning skills, effective research strategies and an appreciation of current issues in media law
4. Apply media law concepts covered in the subject to analysing and solving practical problems
5. Use oral persuasion and legal reasoning skills as well as drafting skills for court documents and courtroom etiquette.

LAWS 3050 Medical Law

Credit Points 10

Legacy Code 200856

Coordinator Timothy Bowen ([https://directory.westernsydney.edu.au/search/name/Timothy Bowen/](https://directory.westernsydney.edu.au/search/name/Timothy%20Bowen/))

Description This unit aims to provide knowledge and understanding of Australian medical law, including some cutting edge legal and policy issues that arise in this field. Medical law is an exceptionally vibrant and challenging field, underpinned by the rapid pace of scientific and social developments that generate new issues for medicine and for the law. Many of the more challenging issues for the law are at the core of policy - birth and reproduction, choice and responsibility, life and death.

LAWS 3052 Mental Health Law

Credit Points 10

Legacy Code 200982

Coordinator Liesel Spencer ([https://directory.westernsydney.edu.au/search/name/Liesel Spencer/](https://directory.westernsydney.edu.au/search/name/Liesel%20Spencer/))

Description This unit is designed to give students an introduction to the interface between the disciplines of psychiatry and law. It examines how the empirical research and theories of psychiatry intersect with the application of legal principles and practices. As a result of successfully completing this unit, students should be able to translate personal and social issues concerning the study of mental illness and mental health into the practice of mental health law and critically evaluate different perspectives and contemporary debates about mental illness and mental health.

School Law

Discipline Law, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 2013 AND LAWS 2004

Restrictions Students must have completed 80 credit points of law subjects before enrolling in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define key terminology and identify legal, social, and human rights issues relevant to mental illness and mental health
2. Identify the key features of international human rights documents relevant to people who have mental health issues and discuss the extent to which human rights law has influenced domestic law and policy
3. Critically reflect upon Australian national policy, provisions within several NSW statutes and the common law as applicable to mental illness and mental health in a variety of contexts.
4. Explain and critique the operation and purpose of the Mental Health Tribunal (NSW) and other Courts and Tribunals regarding matters relevant to people with mental health conditions
5. Evaluate the role the law may play in preventing mental illness and promoting mental health
6. Present clear logical solutions to mental health legal problem questions
7. Examine and apply mental health law to solve problems related to mental health matters;
8. Analyse Mental Health Review Tribunal procedure;
9. Use legal research and analytical skills to present clear and logical solutions to mental health legal problems;

10. Analyse the language of psychiatric and psychological diagnosis as relevant to legal evidence presented before the Mental Health Review Tribunal.

Subject Content

1. Introduction to key concepts relevant to mental health and illness
2. Examination of legal, social and human rights issues raised for people with mental illness
3. Introduction to relevant international law
4. Introduction to Commonwealth policies, guidelines, plans, and strategies
5. Introduction to mental health related legislation
6. Role of health practitioners and key stakeholders in merits review and judicial review processes
7. Role of legal practitioners and key stakeholders in merits review and judicial review processes
8. Law, practice and procedure, and review mechanisms in NSW relevant to forensic patients
9. Law and justice in mental health case studies
10. Law reform ? public health and human rights approaches to prevention of illness, health promotion, treatment, and care
 - Introduction to Mental Health Act 2007 (NSW)
 - Psychiatrist and Psychologist expert testimony in court and tribunal
 - legal status of An involuntary patient in A mental health facility
 - legal rights of A mentally ill patient before A tribunal
 - Jurisdiction of The mental health tribunal ? Civil
 - authority: includes The making involuntary patient order, financial management order, community treatment orders, electro convulsive therapy and appeal rights
 - The role of An advocate before The tribunal: includes reading all reports, research on least alternative form of care criteria and reading previous MHRT decisions to provide The best outcome for The client
 - to cross examine The treating team on The psychiatric evidence including medication prescribed as to whether there is A better form of care available for The client
 - to explain, in simple words to The client, The process involved and Possible outcomes of The hearing
 - Jurisdiction of The tribunal with respect to forensic patients in The criminal justice system
 - Explaining the pathway and review of forensic patients pursuant to the Mental Health (Forensic Provisions) Act 1990
 - authority includes making Continued Detention in A forensic hospital, conditional and unconditional discharge
 - to explain A client?fs appeal rights from The tribunal to The Supreme court
 - The role of NSW Civil and administrative tribunal with respect to guardianship, financial management and capacity Issues
 - The supervision of A client?fs finance by The office of trustee and guardian
 - legal rights to vary and revoke A financial management order before The NSW Civil and administrative tribunal
 - mental Harm Litigation: post-Traumatic stress Disorder in Law
 - Judicial scepticism in mental Harm Litigation in The District and Supreme court for compensation
 - Detention Centres: mental illness; observance of basic human rights

LAWS 3053 Moot Court

Credit Points 10

Legacy Code 200773

Coordinator Manuel Ventura ([https://directory.westernsydney.edu.au/search/name/Manuel Ventura/](https://directory.westernsydney.edu.au/search/name/Manuel%20Ventura/))

Description This unit aims to train students in mooting conducted before an appellate court or tribunal. Students will be provided with a grounding in issues including jurisdiction, admissibility, and remedies. The unit will focus on one or more areas of domestic substantive law and will include a research component. The unit will also have a practical component aimed at enhancing the advocacy skills of participants and applying the theory to the practical aspects of the conduct of appellate advocacy. Students will be involved in the preparation and presentation of a hypothetical case before an appellate court or tribunal and will be given the opportunity to develop their advocacy skills, including the preparation of written submissions and delivery of oral submissions, in a non-competitive context. Undertaking this unit would be useful for students seeking to participate in one or more law mooting competitions, representing Western Sydney University such as the Sir Harry Gibbs Constitutional Law Moot, Sir John Peden Contracts Moot, Shine Lawyers Torts Moot, AAT Moot, and the Law Council of Australia Family Law Moot.

Legacy Code 200702

Coordinator Liesel Spencer ([https://directory.westernsydney.edu.au/search/name/Liesel Spencer/](https://directory.westernsydney.edu.au/search/name/Liesel%20Spencer/))

Description This unit considers various legal issues related to population health. This area of law is relatively new and continually developing and expanding. This unit is primarily concerned with how law has and should respond to various health dilemmas at the population level. These include State protection of the community from death (for example requiring road users to wear a seatbelt or helmet) and disease including both communicable disease (for example immunisation, quarantine and managing disease outbreaks) and non-communicable disease (for example smoking, alcohol, obesity, diabetes and cardiovascular disease). This unit also considers frameworks for evaluating whether public health laws are justifiable regulation, taking into account the balance between public good and the autonomy of individuals.

School Law

Discipline Business and Commercial Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 1006 OR LAWS 1003 OR LAWS 1006

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically examine and evaluate the legal regime relating to public health.
2. Contribute to meaningful discussion about law's role in current public health concerns.
3. Analyse the rights concerns inherent in regulation for the health of the public.

4. Analyse in depth two of the particular topic areas covered in the subject.
5. Communicate effectively, orally and in writing.

Subject Content

State responses to population health problems including death, and disease outbreaks both communicable and non-communicable
Public health law as regulation of health risks at the population level
Evaluation of public health regulation including the balance between public good and individual freedoms

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Legacy Code 200653

Coordinator Manuel Ventura ([https://directory.westernsydney.edu.au/search/name/Manuel Ventura/](https://directory.westernsydney.edu.au/search/name/Manuel%20Ventura/))

Description This unit lays the foundation for an understanding of the international system of law, how it works and its relationship with domestic Australian law. It will challenge students to critically analyse the system and suggest ways in which the rules and principles can and should develop in the future in order to accommodate the changing needs and values of the international community of nations. It also represents the foundation for students to move on to the study of other International Law units offered by the School of Law.

School Law

Discipline International Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 2008

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a comprehensive grasp of the fundamental norms of public international law, including the provisions of the subjected Nations Charter, Statute of the International Court of Justice, and Vienna Convention on the Law of Treaties, as well as significant customary international law principles and jurisprudence of relevant international Courts.
2. Critically evaluate the principal institutions of the international legal system and explain their procedures at the international level and the principle 'sources' of law that they apply in resolving disputes.
3. Describe the major differences between international and national law.
4. Assess the major challenges/weaknesses/effectiveness to/of public international law.
5. Apply principles of public international law to contemporary issues and in problem solving.
6. Research develop, refine and produce written essays that demonstrate clear, well structured, appropriately referenced, critical analysis and arguments about salient points of international law.

Subject Content

- Welcome and introduction
- The nature and development of international Law
- The structure of The international legal system
- The sources of international Law
- The Law of Treaties
- international Law and Municipal Law
- personality, Statehood and Recognition
- title to territory
- state Jurisdiction
- Immunity from Jurisdiction
- state responsibility
- legal regulation of The use of Force by States
- specific areas of international Law (time permitting)
- Peaceful Settlement of international disputes (time permitting)

LAWS 3066 Revenue Law Industry Placement

Credit Points 10

Legacy Code 201007

Coordinator Elen Seymour ([https://directory.westernsydney.edu.au/search/name/Elen Seymour/](https://directory.westernsydney.edu.au/search/name/Elen%20Seymour/))

Description This work integrated learning unit builds upon the knowledge base of 200019 Revenue Law to provide industry experience for later year Law students. Students who have successfully completed 200019 Revenue Law with a Credit or above result will be eligible to apply for this industry experience. The placement will consist of a full time four week placement at the Australian Tax Office or other suitable workplace approved by the School of Law. Students will work in various practice areas with an emphasis on technical legal issues and will be supervised by senior staff members. The unit will provide students with practical and real-life work experience and will provide students with an appreciation of the professional responsibilities essential for 21st century legal practitioners.

School Law

Discipline Taxation Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 4008

Restrictions Students must have completed 200019 Revenue Law at credit level or above. Enrolment in the subject is by invitation only following a call for expressions of interest and a merit selection based on a 500 word submission outlining the student's interest in the placement and his or her Grade Point Average in the program. Selection will broadly reflect the diversity of applicants. Applicants must also meet any workplace requirements.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the operation of taxation law in practical contexts;
2. Solve taxation law problems for clients in practical contexts;
3. Communicate relevant information about contemporary legal taxation issues to clients and peers;
4. Reflect on the students' learning and professional development needs;
5. Perform legal writing tasks and critical thinking tasks within a practical legal and taxation context.

Subject Content

This subject consists of the following legal practical experience and academic assessments:

- orientation for work placement in industry
- 4 weeks' work placement in industry
- Zoom discussion session (all students, end of week 2)
- assessments

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Legacy Code 200900

Coordinator William Higgs ([https://directory.westernsydney.edu.au/search/name/William Higgs/](https://directory.westernsydney.edu.au/search/name/William%20Higgs/))

Description This unit provides students with the requisite skills to provide comprehensive financial advice, particularly within the context of an individual being able to choose a superannuation fund or create a self-managed superannuation fund (SMSF). The unit will provide students with an understanding of the implications of self-managed superannuation funds and the use of the trust structure, which are essential components for professionals in this area.

School Law

Discipline Business and Commercial Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) FINC 3014 OR LAWS 3018

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop communication skills through reading and writing in diverse contexts.
2. Develop information literacy through accessing, evaluating and using relevant information.
3. Integrate theoretical and practical knowledge to analyse and solve complex and novel problems.
4. Demonstrate understanding of the value of ethical conduct as a professional in work and in civic life.

Subject Content

Introduction to self-managed funds
 Compliance issues
 Investment requirements
 Taxation and superannuation
 Making payments
 Transfer of assets
 Preservation rules
 Estate planning issues
 Financial planning strategies
 Taxation, audit and compliance
 Lump sum benefits
 Advantages/disadvantages of trusts

Assessment

LAWS 3068 Space Law - Commercial Aspects

Credit Points 10

Legacy Code 200652

Coordinator Steven Freeland ([https://directory.westernsydney.edu.au/search/name/Steven Freeland/](https://directory.westernsydney.edu.au/search/name/Steven%20Freeland/))

Description This unit examines the underlying legal principles that regulate the use, exploration and exploitation of space, and how International Law can and should be applied to the many different State and private commercial uses of outer space. It examines the existing international legal regime - the five United Nations Space Treaties and key Declarations of Principles related to space activities - as well as a number of domestic regulatory systems, including the Australian legal regime. The unit also concentrates on the (many) uses and proposed uses of space for which the legal framework may not be particularly well suited.

School Law

Discipline Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 2008

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand the historical evolution of the existing legal regime regulating the use and exploration of space.
2. Engage in critical discussion of specific problems arising from the readings and present oral arguments persuasively.
3. Develop, refine and produce a research paper which demonstrates clear, well structured, appropriately referenced, critical and original analysis and arguments.
4. Analyse and examine the details of the five international treaties and the various United Nations Principles which regulate certain activities in space.
5. Understand the Australian legal framework regarding space activities.
6. Critically consider the problems and ambiguities within the existing legal regime.
7. Determine and analyse the legal issues raised by new uses of space for which the existing legal regime is ill-suited.
8. Assess ways in which these unanswered legal issues should be addressed.

Subject Content

- what is The legal Definition of space?
- why do we need A legal regime for space?
- The role of UNCOPUOS (United Nations Committee on Peaceful Uses of Outer Space).
- space Law and Air Law compared.
- The Space Treaties: Outer Space Treaty 1967; Rescue Agreement 1968; Liability Convention 1972; Registration Convention 1975; Moon Agreement 1979.
- United Nations Principles: Direct Broadcasting Principles 1982; Remote Sensing Principles 1986; Nuclear Power Principles 1992.
- Intergovernmental Organisations ? INTELSAT, INMARSAT, ITU, ESA.
- Telecommunications and The Geostationary Orbit.
- national regulation of launching activities.
- Space Activities Act 1998 (Cth).
- environment of space and The Problem of space Debris.
- The international space Station and space Tourism.
- Traffic control Issues and Coordination with The regulation of Air Travel.
- The Commercialisation and privatisation of Outer Space.
- financing and Insurance aspects of space activities.
- Exploitation of space Resources.
- The needs of developing countries.
- Military uses of Outer Space.
- Resolution of disputes in relation to Activities in Outer Space.
- future legal regulation of space Activities ? what needs to be done?

LAWS 3069 State Taxes and GST

Credit Points 10

Legacy Code 200266

Coordinator James Paterson ([https://directory.westernsydney.edu.au/search/name/James Paterson/](https://directory.westernsydney.edu.au/search/name/James%20Paterson/))

Description This unit examines the Commonwealth statutory regime to the Goods and Services Tax and the NSW statutory regimes relating to Payroll Tax, Land Tax and Stamp Duty. It provides the framework to critically assess proposals for reform of these taxes.

School Law

Discipline Taxation Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 1004

Restrictions Students enrolled in 2502 Bachelor of Laws (Non graduate entry) must obtain permission to enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the key elements of the States Taxes and GST systems
2. Recognise the economic, social justice and ethical considerations involved in the formulation of State Taxes and Federal indirect taxation law and policy.
3. Analyse and discuss selected aspects of: GST Law, such as the concepts of registration, supply and acquisition, classification, reporting, thresholds and special rules
4. Analyse and discuss selected aspects of NSW State Taxes, such as payroll tax, land tax and duties and how these relate to similar tax regimes in other Australian States.
5. Apply their knowledge of State Taxes and GST Law obligations and potential liabilities by analysing and solving practical problems.
6. Write and express effectively and concisely, displaying clear and logical structure and using accurate citation, grammar and punctuation,
7. Communicate and respond in a professional context in relation to States Taxes and GST law, by explaining the law.
8. Consider and hypothesise upon the application State Taxes and GST law in relation to a given set of facts.

Subject Content

How GST works

Special rules applying to individual circumstances in relation to GST

Administration and anti-avoidance issues in relation to GST

Planning for GST

General liability in relation to payroll tax

Payroll tax and group employers

Practical aspects of payroll tax

Land tax and general liability

Special matters in relation to land tax

Assessment of stamp duty

Consequences of non stamping

Conveyances and transfers in relation to stamp duty

Stamp duty and interests in land owning companies and trusts

Loan securities and stamp duty

LAWS 3071 Wills and Succession

Credit Points 10

Legacy Code 200641

Coordinator Stephen Janes ([https://directory.westernsydney.edu.au/search/name/Stephen Janes/](https://directory.westernsydney.edu.au/search/name/Stephen%20Janes/))

Description Wills and Succession is that body of law that deals with the devolution of property upon death. The unit encompasses inter alia the law relating to intestacy, the making of a valid will, the administration of the estate and what is known as testator's family maintenance. This unit is of particular importance to those students who intend to practice either as a solicitor or barrister as Wills and Succession forms a significant part of private practice.

School Law

Discipline Legal Practice

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 3082

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Achieve a sound understanding of the major doctrines relevant in the area of Succession Law and the particular contexts in which they are of potential application.

2. Critically access the scope of operation and complex interaction of legal doctrines which operate in the area of Succession Law.
3. Understand the jurisdiction of the probate court and the types of application for probate and grants of administration which might be made.
4. Understand the practical procedures involved in obtaining grants of various sorts.
5. Understand the principles relevant to the construction of a will and how the court of construction performs this task.
6. Develop an understanding of the roles of executors and administrators, the nature of their rights and duties.
7. Understand the rights of beneficiaries, devisees, legatees, and next of kin in respect of deceased estates.
8. Understand the law and principles for the valid making of a will and a codicil.
9. Understand miscellaneous relevant doctrines such as revival, revocation, capacity, undue influence, and so on.
10. Understand the administration of solvent and insolvent estates.
11. Understand proceedings for passing of accounts and completion of administration.

Subject Content

- Death
- Intestate succession
- family provision
- The nature of A will
- formal requirements
- capacity
- Revocation, Republication and Revival
- Obliterations, Interlineations and Alterations
- construction-general
- construction-specific
- Grants of representation
- administration and Distribution of The Estate

LAWS 3072 Work Health and Safety Law

Credit Points 10

Legacy Code 200799

Coordinator Jonathan Adamopoulos ([https://directory.westernsydney.edu.au/search/name/Jonathan Adamopoulos/](https://directory.westernsydney.edu.au/search/name/Jonathan%20Adamopoulos/))

Description This unit examines the different means in which the law protects workplace safety in Australia. The primary focus will be on the work health and safety regulatory framework and its underlying policy. The arbitrary nature of standard setting in the early systems of safety regulation is compared with later legislative models. The workings of these legislative strategies are illustrated by a series of selected issues relating to contemporary health risks in workplaces. Students will also examine issues surrounding enforcement and compliance and corporate governance in the safety context. Other topics include workers compensation and employment law.

School Law

Discipline Business and Commercial Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 2013

Equivalent Subjects LGYB 0395 - Occupational Health and Safety Law LAWS 3054 Occupational Health and Safety Law

Learning Outcomes

On successful completion of this subject, students should be able to:

1. explain the regulatory framework of work health and safety (WHS) in Australia;
2. distinguish between the various means in which the law ensures workplace safety;
3. explain the duties of employers, employees, directors and managers and identify the availability of defences in the event of a breach;
4. consider WHS issues in a commercial context and provide clear and accurate legal advice to clients;
5. explain the relationship between workplace safety and terms of employment;
6. explain the consequences of contravening WHS duties and distinguish various penalty options;
7. critically evaluate the effectiveness of WHS regulation in Australia from different employers' and employees' perspectives.

Subject Content

- Contextual Background and historical development of WHS Law
- workplace safety and The common Law

- workplace safety and employment Law
- duties of employers to employees and other persons in The workplace
- Other statutory duties under the Work Health and Safety Act 2011 (NSW)
- The Commonwealth WHS Scheme
- Defences
- Obligations under the Work Health and Safety Regulation 2011 (NSW)
- workplace consultation and codes of practice
- enforcement
- Penalties and Remedies
- Workers' compensation and rehabilitation

Assessment

LAWS 3073 Elder Law Industry Placement

Credit Points 10

Legacy Code 201020

Coordinator Elen Seymour ([https://directory.westernsydney.edu.au/search/name/Elen Seymour/](https://directory.westernsydney.edu.au/search/name/Elen%20Seymour/))

Description This elective work integrated learning unit builds on the knowledge base of 200632 Elder Law to provide work experience for later year Law students. Students who have successfully completed 200632 Elder Law will be eligible to apply for this industry experience. The placement will consist of a full time ten day placement at selected industry workplaces with supervision by experienced legal practitioners. The unit will provide students with real-life work experiences in the legal issues associated with the practice of elder law and with an appreciation of the professional responsibilities essential for a 21st Century legal practitioner.

School Law**Discipline** Law, Not Elsewhere Classified.**Student Contribution Band** HECS Band 4 10cp**Level** Undergraduate Level 3 subject**Pre-requisite(s)** LAWS 3016

Restrictions Places in this subject are limited. Students will be selected based on the following: 1. Submission of a 500 word statement of interest in seeking to undertake the unit; and 2. Completion of a satisfactory joint interview process with the subject Coordinator and representative of Industry Partner. Note: the School of Law will manually enrol a list of approved students following an Expression of Interest process.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the operation of Elder Law in practical contexts.
2. Propose solutions to Elder Law related client problems and issues in practical contexts.
3. Perform legal writing tasks within a practical legal and Elder Law context
4. Reflect on professional development experiences and needs.

Subject Content

1. Elder law in practical contexts.
 2. Elder law related client problems, issues and solutions.
 3. Practical legal writing tasks in the Elder law operational context.
 4. Researching practical issues and solutions
 5. Professional development: reflection on experiences and needs.
- Students will undertake a ten-day placement in an Elder Law industry practice during which students will be engaged in the evaluation and production of Elder Law legal service tasks that may include the preparation of an application to the Guardianship Division of the New South Wales Civil and Administrative Tribunal (NCAT) for a financial management order, guardianship orders or reviews of powers of attorney within a practical legal and Elder Law context.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

LAWS 3074 Judicial Internship

Credit Points 10**Legacy Code** 201028**Coordinator** Anna Cody ([https://directory.westernsydney.edu.au/search/name/Anna Cody/](https://directory.westernsydney.edu.au/search/name/Anna%20Cody/))

Description This unit provides an internship opportunity for later year law students. Students will spend twelve days throughout the semester at selected courts and tribunals under the supervision of magistrates, judges or tribunal members. The unit will provide students with an opportunity to observe the courts and tribunals first hand, to be mentored by a judicial officer, to engage in practical assistance to the relevant court or tribunal, and to appreciate the professional responsibilities essential for a 21st Century legal practitioner and judicial officer. Entry is competitive and will include a written application and interview. The unit includes a class schedule with the requirement of regular reflection in order to learn deeply from the experience and teach students how to engage in ongoing lifelong learning.

School Law**Discipline** Law, Not Elsewhere Classified.**Student Contribution Band** HECS Band 4 10cp**Level** Undergraduate Level 3 subject**Pre-requisite(s)** LAWS 2015 AND LAWS 2004 AND LAWS 1008 OR LAWS 1009

Restrictions Places in this subject are limited. Students will be selected on merit based on the following: Submission of an expression of interest, including relevant documents, in seeking to undertake the subject (either submitted to an external body or to the subject coordinator); and completion of a satisfactory joint interview process with the subject coordinator and/or a representative of a professional body, court or tribunal.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Reflect on the professional and judicial ethical issues and protocols of courts and tribunals.
2. Examine the operation of a court or tribunal.
3. Perform legal tasks within a practical legal and judicial context.
4. Research professional legal and judicial ethical and practical issues that arise in professional practice.
5. Reflect on their future role as a lawyer.
6. Discuss internship experiences with peers and supervisors.
7. Critique the practice of law as practised in a lower level court or tribunal

Subject Content

1. Professional and judicial ethics;
 2. Court and Tribunal operational protocols;
 3. Paralegal tasks within practical and judicial contexts; and
 4. Issues in professional practice.
 5. Issues in legal system and law practice
- Students will undertake a twelve-day attendance (internship) in a court or tribunal during which students will be mentored by a judicial officer and have an opportunity to develop a deeper understanding

of the practice and procedure of the court or tribunal as well as the functioning of law within a lower tier court of tribunal.

Special Requirements

Legislative pre-requisites

Students must have completed a Student Undertaking Form and have applied for a National Police Certificate.

Assessment

LAWS 3075 Law's Self-Understanding

Credit Points 10

Legacy Code 201027

Coordinator Bradley Gooding ([https://directory.westernsydney.edu.au/search/name/Bradley Gooding/](https://directory.westernsydney.edu.au/search/name/Bradley%20Gooding/))

Description This unit of study explores the central organising ideas for our present understanding of law. What do these ideas amount to? What, according to these ideas, is significant about us from the legal standpoint? Can the proponents of these ideas deal with their critics? What are the similarities and differences between the legal subject and other ways of thinking about ourselves, such as from a moral or political standpoint? How should we understand the connections between these three separate realms? What is the character of the legal sphere in comparison with these other spheres? What is the character of legal, moral and political reasoning?

School Law

Discipline Law, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 1008 OR
LAWS 1009 AND
LAWS 2008

Incompatible Subjects LAWS 3042 - Jurisprudence

Assumed Knowledge

A basic familiarity with legal reasoning and the 'separation of powers' context in which they judiciary operates, and a basic understanding of the precepts of contemporary Western liberal political culture.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the key concepts which theoretically constitute our contemporary appreciation of the Australian legal system and its functions, to better understand their interaction in rivalrous theorizing about law, morality, and politics.
2. Develop the metatheoretical grounding appropriate for examining and critiquing relevant conceptualizations as they are applied in professional legal and political practice.
3. Integrate conceptual toolsets for pursuing responsible, defensible professional practices with the broader perspectives afforded by increased theoretization.
4. Utilise critical reasoning skills to analyse philosophical/normative legal texts, and participate constructively in the critical discourses which permeate legal thought, both from internal and external perspectives.
5. Apply professional (legal) research and communication skills in the construction and expression of critical perspectives on legal practice.

Subject Content

Module 1. Law and Practical Reasoning

- Critical Thinking and Reflective Equilibrium
- Hart on Human Nature and the Separation of Law and Morality

Module 2. Law and Adjudication

- Dworkin and Interpretation as Integration
- Objectivity, Interpretation and Opinion
- The Internal and External Perspectives in Legal Consciousness

Module 3. Law and the Subject

- The Role of the Legal Subject in Legal Reasoning
- Law and Literature

- Tropes, Cases, and Paradigms: Reasoning by Analogy

Module 4. Legal Methods

- Formalism vs Realism
- Originalism and Literalism in Common Law Constitutionalism
- Applied Methods in Statutory Interpretation

Module 5. The Role of Reasonableness in Law

- Practical Reasoning and Reasonable Disagreement
- The Reasonable in Judicial Reasoning

- The Reasonable in Statutory Interpretation

Module 6. Law and Critical Theory

- The Critique of Rights-Discourse
- Paradox and Other Critical Challenges for Legal Functionality
- Feminism and the Law

Module 7. Course Summary

Assessment

Level Undergraduate Level 3 subject

Restrictions

Successful completion of 60 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine new risks, obligations and ethical issues for the courts and practitioners arising from the use of technology in the delivery of justice and legal services.
2. Assess how emerging technologies are changing, challenging and enabling the way that lawyers work.
3. Critically analyse the way that disruptive technologies challenge regulators across global jurisdictions.
4. Use communication skills required by new and emerging technological platforms.

Subject Content

1. Digital literacy & Ethics
 - Law and Technology: lawyers as advocates for vulnerable populations in A World disrupted by Technology
 - Paperless Workflows and information security
 - information Governance and Privacy in A Big data World
 - Forensics & data collection
2. Virtual and Distributed Courts
 - virtual Courts

- online Dispute Resolution
 - case management systems
3. Legal Technology and Practice
 - coding for lawyers
 - Technology assisted Review (TAR)
 - legal research, Discovery, document and data management
 - financial and Regulatory technologies
 4. Human Rights and Technology
 5. Regulatory Landscape of Innovation and Technology: FinTech and RegTech
 6. The Regulation of Blockchain, Smart Contracts and Cryptocurrency

Assessment

LAWS 3077 Legal Internship

Credit Points 10

Legacy Code 201080

Coordinator Jennifer Whelan ([https://directory.westernsydney.edu.au/search/name/Jennifer Whelan/](https://directory.westernsydney.edu.au/search/name/Jennifer%20Whelan/))

Description This unit provides an internship opportunity for later year law students in host organisations (including NGOs and public interest organisations, community legal centres, government departments, corporations, barristers' chambers or private law firms). Internships provide students with invaluable access to opportunities to understand the law in context, to apply their formal learning about legal principles, to develop essential professional skills and to gain exposure to different career pathways. Students who successfully complete orientation requirements will spend twelve days throughout the semester at a host organisation. This will usually be done on a one-day (7 hours) per week basis. An intern's duties will generally consist of a combination of substantive tasks relating to law, policy and practice. Depending on the host organisation, these may include a combination

of research, preparing background materials, briefing papers or research reports, liaising with other organisations, assisting in the provision of legal assistance and advice, observing interviews with clients, conferences with Counsel or in court proceedings, undertaking project and advocacy work, preparing/ giving presentations and assisting with administrative and editing work. The School will seek expressions of interest for the number of placements available with the School's partner host organisations each semester. Students are also able to arrange their own internships at organisations that are not currently host organisations, subject to the approval of the Clinical Director and the agreement of the host organisation to complete the attendance and assessment requirements of the unit.

School Law

Discipline Legal Practice

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) LAWS 2015 AND
LAWS 2004 AND
LAWS 2013 AND
LAWS 2003 AND
LAWS 1009

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the nature, function and principles of Australian law in a specific legal practice context.
2. Effectively apply the principles and processes of legal reasoning.
3. Perform tasks within a practical legal context.
4. Apply the law to solve legal, professional and ethical legal issues that arise in legal practice.
5. Critically reflect on the values, ethical standards and conduct that underpin professional responsibility in legal practice.

Subject Content

12 days of practicum learning exposing interns to the internal workings of legal practice.

Ethical client- centred practice.

Reflective legal practice.

Professional communication and interpersonal skills for the client-centred lawyer.

Critical analysis of the operation of the law, policy and the legal system.

Special Requirements

Legislative pre-requisites

Depending on the host organisation, students may be required to obtain a Working With Children or Criminal Record Check. This will be advised by the relevant host organisation.

LAWS 3078 Legal, Economic and Social Transformation in Taiwan

Credit Points 10

Legacy Code 201089

Coordinator Grace Borsellino ([https://directory.westernsydney.edu.au/search/name/Grace Borsellino/](https://directory.westernsydney.edu.au/search/name/Grace%20Borsellino/))

Description This unit introduces students to the foundational structures of Taiwan's legal system, its economy, and its socio-legal culture and practices. Students will participate in an exchange experience and will be intensively taught at selected Taiwanese university partners. Through engagement with Taiwanese academics, legal professionals (both in Australia at pre-departure programs and in Taiwan through engagements with leading Taiwanese law firms, courts and economic organisations), students will develop commercially relevant knowledge and contemporary practical legal skills to develop as global citizens. Students will examine diverse content areas including Taiwan's Constitutional Court, leading human rights cases, intellectual property protections, the Taiwanese electoral system, and Taiwan's innovative approaches to corporate social responsibility, big data analytics, and new technologies. Where travel to Taiwan is not possible, the unit will be offered online with the program of study to be offered 3-hours a week over a semester and supported online by university and industry partners in Taiwan. Where travel is possible, this online program will be supplemented by a week-long excursion to Taiwan. Interested students should contact the Unit Coordinator to confirm expected costs to the student (e.g. airfare, accommodation, meals, et cetera) and travel dates and requirements.

School Law

Discipline Law, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Students must have successfully completed 80 credit points of law subjects.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the foundational features and structures of Taiwan's legal system, its economy, and its socio-legal culture and practices.
2. Reflect on key contemporary legal issues arising in political, economic, and social contexts in which the Taiwanese legal system operates.
3. Communicate principled and ethical arguments and perspectives that address issues relevant to the legal, economic and social transformation of Taiwan.

Subject Content

1. Taiwanese Law and Legal System.
2. Corporate Governance and Corporate Social Responsibility in Taiwan.
3. Democratic Development in Taiwan and its Electoral System.
4. Big Data and New Technology in Taiwan.
5. Taiwanese Business, Regulatory, and Taxation System.
6. Taiwanese Indigenous history.
7. Introduction to Taiwanese languages.
8. Excursions to Taiwanese law firms, courts, stock exchange and other cultural destinations.

Teaching Periods

LAWS 4002 Advanced Constitutional Law

Credit Points 10

Legacy Code 200755

Coordinator Elizabeth Handsley (https://directory.westernsydney.edu.au/search/name/Elizabeth_Handsley/)

Description This unit builds upon the compulsory unit Constitutional Law, and provides a deeper and broader understanding of Australian constitutional law. It examines the constitutional aspects of Australian parliamentary democracy and citizenship, the constitutional powers of the Commonwealth Executive Government, constitutional issues relating to the raising and spending of government revenues and the complexities of the relationship between the Commonwealth and State as independent polities. The unit also examines the limited way in

which the Australian Constitution operates to protect particular rights, liberties and freedoms.

School Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) LAWS 4015

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an advanced understanding of, and ability to apply, techniques of constitutional interpretation and reasoning.
2. Apply an understanding of constitutional law concepts to analysing and solving practical problems.
3. Critically evaluate how the Australian Constitution can be said to protect rights, liberties and freedoms.
4. Develop and present coherent legal arguments about complex constitutional issues.
5. Write effectively and appropriately, displaying clear and logical structure and using accurate grammar and punctuation.
6. Ethically and accurately reference (using the Australian Guide to Legal Citation) legal information from a range of primary and secondary sources.

Subject Content

1. Federal Parliament.
2. The High Court.
3. Detention.
4. Appropriation and Grants.
5. Taxation and Excise.
6. Intergovernmental Immunities.
7. Immigration and Aliens Powers.
8. Freedom of Interstate Trade.
9. Rights of Out of State Residents.
10. Acquisition of Property on Just Terms.
11. Freedom of Religion.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Take-Home Assessment	3000 words	50	N	Individual
(A) Group Report (20%) and (B) Group Presentation (10%)	Group Report 2,000 words and Group Presentation 20 min	30	N	Group

LAWS 4004 Criminal Procedure and Evidence

Credit Points 10

Legacy Code 200015

Coordinator Francine Feld ([https://directory.westernsydney.edu.au/search/name/Francine Feld/](https://directory.westernsydney.edu.au/search/name/Francine%20Feld/))

Description The unit is designed to provide an understanding of the law, the theoretical underpinnings and the underlying policy issues, in the areas of evidence and criminal procedure.

School Law

Discipline Criminal Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) LAWS 2004

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain selected theories and rationales underlying the policy and processes of criminal procedure and evidence.
2. Interpret, analyse and apply the statutory and common law rules of evidence and criminal procedure as they operate in a practical context in New South Wales.
3. Understand the circumstances and needs of Aboriginal and Torres Strait Islander peoples in criminal courts, procedures and processes.

Subject Content

1. The nature of the adversarial trial in the criminal context
2. Alternative rationales underlying the Uniform Evidence Acts and the common law
3. Forms of evidence
4. Theories of proof and relevance
5. Standards and burden of proof
6. Rules of exclusion including, hearsay, opinion, admissions, tendency and coincidence, character, credibility, identification evidence
7. Privileges
8. Rules and principles of questioning witnesses and tendering documents
9. Judicial warnings, comment and directions
10. Mandatory and discretionary exclusions and the limitations on evidence
11. Prosecutorial and defence ethics
12. The law governing procedure before a criminal trial including arrest
13. The needs of Aboriginal and Torres Strait Islander peoples in criminal courts, procedure and processes

LAWS 4006 International Climate Law

Credit Points 10

Legacy Code 200800

Coordinator John Juriansz ([https://directory.westernsydney.edu.au/search/name/John Juriansz/](https://directory.westernsydney.edu.au/search/name/John%20Juriansz/))

Description This course is about international climate law examining both the current international legal frameworks and discussion of future scenarios. It will explore the legal, political and scientific challenges in addressing and responding to climate change. It will illustrate how international climate law interacts with national law including private sector involvement but its principal focus is not on domestic law regimes. Various market and non-market mechanisms will be examined including emission trading systems, carbon taxes, new technologies and renewable energy targets.

School Law

Discipline International Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) LAWS 2008

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the fundamental concepts and principles of climate law.
2. Critically evaluate the global legal frameworks underpinning climate law and demonstrate an understanding of key international initiatives and their implementation.
3. Apply the concepts and principles of international climate law to issues involving mitigation and adaptation.
4. Undertake independent research and analysis to produce a written essay that demonstrates an understanding of international climate law in a defined context that is clear, analytical, appropriately structured and referenced.

Subject Content

1. The Role of Law in Responding to Climate Change
2. The Science and Economics of Climate Change
3. The International Climate Change Framework
4. UNFCCC and the Kyoto Protocol - Flexibility Mechanisms - Compliance - Post Copenhagen and Paris Conference of Parties
5. Australia's Legislative Response to Climate change - emissions trading - carbon taxes - renewable energy targets - energy efficiency schemes
6. Climate Law in Developed and Developing Countries - common but differentiated responsibilities
7. Mitigation and Adaptation

LAWS 4007 International Environmental Law

Credit Points 10

Legacy Code 200801

Coordinator Beatriz Garcia De Oliveira ([https://directory.westernsydney.edu.au/search/name/Beatriz Garcia De Oliveira/](https://directory.westernsydney.edu.au/search/name/Beatriz%20Garcia%20De%20Oliveira/))

Description This course provides a general introduction to international environmental law and policy. We will begin by exploring the economic, political, and legal concepts relevant to international environmental treaty regimes. We will then apply these concepts to concrete regimes designed to deal with specific international environmental problems, such as ozone depletion, transboundary air pollution, freshwater resources, marine pollution, world heritage, human rights, biodiversity and habitat loss. The course focuses principally on the dynamic of treaties, negotiations, and state and non-state actors in the international arena. Comparative approaches to national implementation, on selected issues, will also be covered.

School Law

Discipline International Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) LAWS 2008

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a grasp of the fundamental concepts and principles of International Environmental Law.
2. Critically evaluate the principal institutions and operation of the international legal system and demonstrate an understanding of the key actors, sources of law and dispute resolution processes.
3. Apply concepts and principles of International Environmental Law to contemporary environmental issues and to problem solving.
4. Undertake independent research and analysis to produce a written essay that demonstrates an understanding of application of International Environmental Law in a defined context that is clear, analytical, appropriately structured and referenced.

Subject Content

1. Development of International Environmental Law
2. Treaty Regimes
3. Oceans and Seas
4. Freshwater Resources
5. Biodiversity and Wildlife Conservation
6. Human Rights and Environment
7. World Heritage

Assessment

LAWS 4008 Revenue Law

Credit Points 10

Legacy Code 200019

Coordinator Elen Seymour ([https://directory.westernsydney.edu.au/search/name/Elen Seymour/](https://directory.westernsydney.edu.au/search/name/Elen%20Seymour/))

Description Revenue Law introduces you to the underlying principles of the Australian taxation system, with a particular focus on Commonwealth taxes. The unit of study is essential for all students intending to embark on a career in tax, law, business, commerce or the public sector. The unit covers the system of taxation; provides a critical analysis of the fundamental concepts of income and capital; and examines the key topics of taxation of remuneration, allowable deductions; taxation of entities, tax avoidance and aspects of tax administration.

School Law

Discipline Business and Commercial Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) LAWS 2008

Incompatible Subjects LAWS 3070 - Taxation Law

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the key elements of the Australian income tax system
2. Analyse selected aspects of revenue law, such as the concepts of income and capital, the concepts of capital gains, allowable deductions and taxation of business entities.
3. Apply legislation, cases and rulings to analysing and solving practical problems, examining theoretical legal issues and performing tax calculations.
4. Use a range of research tools to locate and evaluate the quality, currency and relevance of legal information.

Subject Content

Introduction to the Australian taxation system

Taxation of Remuneration

Assessable Income: Income from Business

Assessable Income: Capital Gains Tax

Allowable Deductions: General Deductions

Allowable Deductions: Specific Deductions

Entities: Taxation of Partnership Income

Entities: Taxation of Trust Income

Entities: taxation of companies

Tax Administration

Tax Avoidance

LAWS 4009 Transactional Law

Credit Points 10

Legacy Code 200758

Coordinator William Higgs ([https://directory.westernsydney.edu.au/search/name/William Higgs/](https://directory.westernsydney.edu.au/search/name/William%20Higgs/))

Description This subject is designed to equip students for professional practice by providing them with an understanding of what it means (and takes) to be and think like a transactional lawyer in practice and how to 'add value to the deal' and think like a deal lawyer. Students will also be introduced to a range of structured financing transactions including lending arrangements, securitisation (RMBS, CMBS and CDOs), straight vanilla bonds, convertible bonds, covered bonds, asset based financing, managed investment schemes and swaps and derivatives (ISDA). Students will then be introduced to the legal building blocks of those transactions, including the law relating to representations and warranties, covenants, guarantees, subordination, set-off, commingling, trusts, security interests and insolvency. Students will work in teams to analyse and dissect a range of structured financing transactions. Real-life examples from international and domestic practice are discussed.

School Law

Discipline Law

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) LAWS 3045

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Communicate effectively, persuasively and appropriately through reading and writing.
2. Demonstrate an understanding of the responsibilities and ethical obligations of transactional lawyers.
3. Demonstrate and apply an understanding of the legal elements and commercial characteristics of key structured finance transactions to analysing and solving practical problems.
4. Demonstrate and apply an understanding of the legal elements and commercial characteristics of key structured financing transactions by dissecting and analysing transaction and legal structures for a range of structured finance transactions.

Subject Content

1. Transactional Practice
2. Structured Finance Transactions (including lending arrangements, securitisation, straight vanilla bonds, convertible bonds, covered bonds, master trusts, asset based financing, managed investment schemes, swaps and derivatives)
3. Representations and Warranties
4. Covenants
5. Guarantees
6. Transfer of Assets and Recharacterisation
7. Subordination
8. Set-off
9. Commingling
10. Declarations of Trust and Advanced Trust Issues
11. Security Interests (including the PPSA)

12. Insolvency

LAWS 4010 Designing Law Apps for Access to Justice

Credit Points 10

Legacy Code 201040

Coordinator John Juriansz ([https://directory.westernsydney.edu.au/search/name/John Juriansz/](https://directory.westernsydney.edu.au/search/name/John%20Juriansz/))

Description This unit will teach students how to design and build an application using expert system software. This unit will provide students with a clinical legal experience by providing access to a community based client to ascertain their needs and undertake collaborative work to provide a solution that requires applied legal research, teamwork, innovative and creative design thinking, and the capacity to manage a project. This unit will teach students how to identify, design and build appropriate legal information systems for use in generating legal documents from precedents and assisting users to navigate solutions to legal problems. Students will be exposed to a variety of automated legal tasks and various legal and practical issues associated with their use, including issues of professional regulation. This will include guest lectures from those working on legal expert systems and related technologies. After learning the necessary skills, students will work in small groups to design and build a legal information system. This unit does not require students to have any pre-existing skills or experience in expert systems or computer programming. Instead, the unit itself includes instruction on how to use an expert system software.

School Law

Discipline Law, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 4 subject

Restrictions Successful completion of 120 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appraise the limitations and implications of automated legal services in enhancing community access to legal information and services.
2. Collaborate with community partners to obtain instructions, isolate legal problems, and design creative and innovative solutions.
3. Design and build a basic automated legal information system to solve a real world problem.
4. Work constructively as a member of a self-managed team on an extended automated legal service project.
5. Present the automated legal solution clearly and persuasively. .

Subject Content

- Working with community partners
- Overview of legal service applications
- how to build and use A legal application

- principles of programming ? including precision, modularity, efficiency, maintainability, scalability, provability, user engagement, effectiveness, testing, debugging
- design thinking for The new future: case-by-case analysis, aggregated data, data visualization, insights
- teamwork and Project collaboration
- work-based Project management
- Presenting Project solutions to clients

LAWS 4011 Law Honours Dissertation

Credit Points 20

Legacy Code 200700

Coordinator Azadeh Dastyari ([https://directory.westernsydney.edu.au/search/name/Azadeh Dastyari/](https://directory.westernsydney.edu.au/search/name/Azadeh%20Dastyari/))

Description This subject comprises the continued research and writing of a research dissertation of between 8,000 and 12,000 words on an

approved topic in law that was developed in unit LAWS 4016 Legal Research and Methodology with an approved research proposal and supervisor. The subject is only open to students who have successfully completed LAWS 4016 Legal Research and Methodology and are enrolled in a Bachelor of Laws (Honours) program. The subject provides an opportunity for law students to further develop and refine their legal research and writing skills and to explore and analyse a legal topic chosen in consultation with the School of Law Honours Coordinator, in order to produce a high-quality piece of academic work. This subject can only be commenced in Spring Session.

School Law

Discipline Law, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 20cp

Level Undergraduate Level 4 subject

Pre-requisite(s) LAWS 4016 Legal Research and Methodology

Restrictions

This subject is only available to students enrolled in Bachelor of Laws (Honours) programs:

- 2828 Bachelor of Laws (Graduate Entry) (Honours)
- 2829 Bachelor of Laws (Non graduate entry) (Honours)
- 2830 Bachelor of Arts/Bachelor of Laws (Honours)
- 2831 Bachelor of Social Science/Bachelor of Laws (Honours)
- 2832 Bachelor of Science/Bachelor of Laws (Honours)
- 2833 Bachelor of Communication/Bachelor of Laws (Honours)
- 2834 Bachelor of International Studies/Bachelor of Laws (Honours)
- 2835 Bachelor of Criminology/Bachelor of Laws (Honours)
- 2836 Bachelor of Criminal and Community Justice/Bachelor of Laws (Honours)
- 2837 Bachelor of Information and Communications Technology/Bachelor of Laws (Honours)
- 2838 Bachelor of Construction Management Studies/Bachelor of Laws (Honours)
- 2839 Bachelor of Accounting/Bachelor of Laws (Honours)
- 2840 Bachelor of Business/Bachelor of Laws (Honours)
- 2841 Bachelor of Information Systems/Bachelor of Laws (Honours)
- 2842 Bachelor of Information Systems Advanced/Bachelor of Laws (Honours)
- 2844 Bachelor of Arts (Psychology)/Bachelor of Laws (Honours)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Undertake a research project addressing a particular legal theoretical and/or practical issue
2. Execute self-regulation and autonomy in conducting legal research
3. Present research project outcomes
4. Submit a written thesis that is clear, logically structured, and includes appropriate citation and attribution

Subject Content

1. Legal Research
2. Legal theories and appropriate methodology
3. Writing your draft thesis
4. Final Thesis presentation and preparation

Special Requirements

Legislative pre-requisites

Special requirements will depend on research topic and will be assessed on a case by case basis.

Assessment

LAWS 7001 Advanced Clinical Legal Placement

Credit Points 40

Legacy Code 201006

Coordinator Jennifer Whelan ([https://directory.westernsydney.edu.au/search/name/Jennifer Whelan/](https://directory.westernsydney.edu.au/search/name/Jennifer%20Whelan/))

Description This 40 credit point unit consists of twenty days of clinical work within a legal practice environment. Students are mentored by experienced legal practitioners to develop and apply knowledge and skills in legal practice. Students are responsible for organising their placements with legal services or practices working in areas of interest to the student and the proposed placement must be approved by the School of Law. Students are required to perform professional tasks in the legal service or practice setting and to undertake self-directed study including completing a self-directed research report on a work-related project and workplace reflections. These together with a Professional Performance Report from their workplace supervisor/mentor, will comprise assessment for the unit on a satisfactory/unsatisfactory basis. Students are supported in this through the provision of supporting materials. Advanced Clinical Legal Placement may be undertaken in any study period and may, by agreement, be organised in ways which suit the workplace supervisor/mentor and the student and as agreed with the Unit Coordinator. This may include, for example, undertaking the 20 day clinical work placement as a four week block or distributed over the session parallel to their program of study.

School Law

Discipline Business and Commercial Law

Student Contribution Band HECS Band 4 40cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 2824 Master of Laws in the Master of Laws (Law Graduate) - 120cp pathway. Students must have a Bachelor of Laws or Juris Doctor degree, or equivalent to be eligible to complete Advanced Clinical Legal Placement.

Assumed Knowledge

Bachelor of Laws degree or Juris Doctorate or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Reflect on own learning and professional development needs.
2. Design and complete a research project based on issues emerging from the real-time practice.
3. Communicate relevant information about legal issues to legal and non-legal audiences.
4. Perform legal assistance services in a practical context

Subject Content

This subject consist of the following legal and project practical experiences:

- 20 days work placement in a legal service or practice setting
- performance of professional tasks in The everyday legal service or practice setting
- self- directed research report.
- reflective practice (online resources)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

LAWS 7006 Australian Legal System and Common Law

Credit Points 10

Legacy Code 200981

Coordinator June Wang ([https://directory.westernsydney.edu.au/search/name/June Wang/](https://directory.westernsydney.edu.au/search/name/June%20Wang/))

Description The Australian Legal System and Common Law introduces students, from non-common law jurisdictions, to the Australian legal system and the common law tradition. The unit aims to develop the understanding of how the Australian legal system has developed in its historical and cultural contexts, and its impact on Australia's First Peoples. It also covers the Australian laws in specific areas, such as contracts, torts, trusts and dispute resolution. This unit includes field trips to various Australian courts and legal institutions. Students are encouraged to undertake individual research to evaluate and compare legal institutions and laws in Australia and their home jurisdictions.

School Law

Discipline Law, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

This subject is not available for self-enrolment. Admission to the subject is by invitation only to students of postgraduate programs of the School of Law who hold a Bachelor of Laws degree, or equivalent, from a non-common law jurisdiction.

Assumed Knowledge

Undergraduate law degree or equivalent from a non-common law jurisdiction.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the structure and key features of the Australian legal system including its impact on Aboriginal and Torres Strait Islanders People;
2. Examine the historical and cultural context of Australian law and its common law tradition;
3. Apply theoretical and practical knowledge of selected areas of Australian law to critically analyse and solve complex legal problems;
4. Undertake individual research to evaluate and compare Australian legal institutions and laws with those of the students' home jurisdictions.

Subject Content

The subject examines the Australian legal system at the general and theoretic level, and in relation to specific laws, such as torts, contracts, administrative law, equity and trust, dispute resolution and procedure. The subject is also concerned with the tradition and characteristics of the common law and the development of the Australian legal system. Students will be encouraged to undertake individual research and to evaluate and compare legal institutions and laws from a variety of different sources and perspectives. The areas of law covered in the subject include:

- The Australian Constitution and legal system
- court system and lawyers in Australia
- statutory interpretation
- Contract Law
- Tort Law
- administrative Law
- equity and Trusts
- property Law
- Competition Law

Assessment

Equivalent Subjects LGYA 8939 - Company Law (PG)

Restrictions

Students must be enrolled in a postgraduate Business program or in program 3748 Master of Information Governance. Students wishing

to take this subject as an elective need approval from the Academic program Advisor.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise the basic principles of company law.
2. Describe the practical operation of a scheme of corporate regulation in the Australian federal system.
3. Recognise how the statutory regime of corporate regulation intersects with common law and equitable developments.
4. Appraise some of the criticisms of current corporate law in the wider context, for example globalisation, and also be familiar with public policy issues in this area.
5. Apply his or her understanding of company law concepts to analysing and solving practical problems.

Subject Content

1. Various forms of business organisations.
2. Company as a form of business organisation - evolution, types, sources of law, regulatory framework.
3. Registration of a company, pre-registration activities.
4. Dealings with outsiders and liability.
5. Internal management rules, management of a company - Board of Directors and general meeting.
6. Duties of Directors and consequences of breach of duty.
7. Shareholder remedies.
8. Capital and fundraising.
9. Record keeping, disclosures and audit.
10. External administration - receivership, administration and winding up.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Short Answer	72 Hours	30	N	Individual
Quiz	30 minutes each (marked online, each worth 5 marks, the best 4/5 will count)	20	N	Individual
Final Exam	2 hours	50	N	Individual

LAWS 7011 Contemporary Issues in Taxation

Credit Points 10

Legacy Code 200872

Coordinator Tenille Buttigieg ([https://directory.westernsydney.edu.au/search/name/Tenille Buttigieg/](https://directory.westernsydney.edu.au/search/name/Tenille%20Buttigieg/))

Description This unit is designed to increase student knowledge of the Australian taxation law, including capital gains provisions in the income tax legislation. Students will learn how to apply the professional guidelines for tax agents and offer practical advice to clients about their responsibilities and obligations under the law. For example, advice scenarios and potential outcomes with respect to tax evasion and/or avoidance behaviour by clients, incapacity planning contexts, wealth transfer and small business concessions. Student actions and advice will be supported, tested and challenged through a range of case studies, hypothetical client contexts and simulated online examples.

School Law

Discipline Taxation Law

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) LAWS 7031

Restrictions

Students must be enrolled in 2671/2770 Master of Commerce (Financial Planning), 2690 Graduate Certificate in Commerce (Financial Planning), 2793 Master of Financial Planning, 2794 Graduate Diploma in Financial Planning, 2807 Master of Stockbroking and Financial Advising or 2824 Master of Laws.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Write advice, demonstrating the relevance of taxation law in complex problem scenarios, effectively and appropriately, displaying clear and logical structure.
2. Apply knowledge of taxation law to analyse and solve complex practical problems and recommend appropriate courses of action.

Subject Content

- Ethical and professional responsibilities of tax agents including obligations under the Tax Agent Services Act 2009 and the Tax Agent Services Regulations 2009.
- Tax avoidance versus Tax evasion
- Anti-Tax avoidance provisions, both specific and general. alienation of personal services income
- The key aspects of taxes that extend The ordinary income Tax base and relevant taxation obligations
- capital Gains Tax and concessions, including small business concessions
- taxation of estates / wealth transfer/ Marriage breakdown
- Incapacity planning: capital Gains Tax
- taxation in financial planning
- effects of taxation on particular financial products
- effects of taxation on financial strategies of individuals and entities

Assessment

LAWS 7013 Global Governance and Sustainability

Credit Points 10

Legacy Code 200903

Coordinator John Juriansz ([https://directory.westernsydney.edu.au/search/name/John Juriansz/](https://directory.westernsydney.edu.au/search/name/John%20Juriansz/))

Description This unit examines how the globalisation of financial markets, relaxation of investment restrictions and liberalisation of the goods and services markets have impacted on the traditional role played by the State and by international organisations on the one hand, and in the increase in power and influence of multinational corporations (State owned or otherwise), private foundations and private interest groups on the other. Examined in this context is the retreat of the State in its role as a regulator of activity and an increase in reliance on private enterprise to provide services as well as the infrastructure needs to the community, in some countries defence and ancillary needs, as well as the adoption of extra judicial dispute settlement processes in resolving disputes between its nationals and non-nationals. These developments have seen the emergence of a wide array of non-governmental actors as providers, arbiters, and countervailing forces providing voice. All of these developments raise issues of accountability, responsibility, transparency, as well as legitimacy.

School Law

Discipline Law

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) LAWS 7027

Restrictions

Students must be enrolled in 2824 Master of Laws, 2784 or 2810 Master of Laws (International Governance).

Assumed Knowledge

Completed a law degree (Bachelor of Laws or Juris Doctor) or equivalent in any jurisdiction.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of recent developments in governance from more than one international legal jurisdiction.
2. Recognise and apply the requirements of professional standards and ethical conduct relevant to the legal and business communities both domestically and internationally.
3. Apply legal principles and skills associated with established [legal and philosophical frameworks] to investigating [and solving] complex legal problems.
4. Justify and interpret theoretical propositions, theoretical methodologies and professional decision making processes within an ethical and values-based context.
5. Critically analyse relevant global governance theory within the context of contemporary legal practice, drawing support from a range of legal and non-legal sources.
6. Integrate theoretical and practical knowledge to critically analyse and solve complex practice oriented legal problems.

Subject Content

1. Traditional Institutions following World War II, including the UN, IMF, IBRD, WTO
2. Impact of Globalisation, including Free Trade, WTO, FTAs
3. The power and impact of Financial Institutions and extra judicial resolution of trade and investment disputes

4. The role of State power in the face of globalisation
5. Varieties of capitalism and their impact
6. Socialism with Chinese characteristics: Free markets and strong central political control
7. Emergence of social, political, and economic institutions
8. Local and global culture in the midst of globalisation
9. Addressing some current concerns, such as money laundering and tax avoidance (profit shifting, tax havens and avoidance legislation)
10. The international financial system after the Global Financial Crisis
11. Democracy, Free markets, and One-party Rule: Social, economic, and political outcomes
12. The end of History: Convergence, Divergence, and the competition for ideas

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
1. Class presentation	20 minutes	20	N	Individual
2. Research assignment, including a literature review for dissertation.	5,000 words	80	N	Individual

Teaching Periods

LAWS 7014 Human Rights in Practice and Theory

Credit Points 10

Legacy Code 200953

Coordinator Catherine Renshaw ([https://directory.westernsydney.edu.au/search/name/Catherine Renshaw/](https://directory.westernsydney.edu.au/search/name/Catherine%20Renshaw/))

Description This unit examines the place of regional human rights systems in the global architecture of human rights. Concepts of universalism, relativism and the 'Asian values' debate are examined. The record of human rights treaty ratification and compliance in Asia and the Pacific is examined within the context of the international treaty system as well as the ASEAN regional human rights regime. The development and implementation of international and domestic human rights protections in criminal law, constitutional law and institutional construction are examined across the region.

School Law

Discipline Business and Commercial Law

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 2824 Master of Laws, 2784 or 2810 Master of Laws (International Governance), 8083 Bachelor of Research Studies, 8084 Master of Research - HC or 8085 Master of Research - LC.

Assumed Knowledge

Knowledge such as is gained through completion of a law degree (Bachelor of Laws or Juris Doctor) or equivalent in any jurisdiction.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate mastery of theoretical knowledge of how human rights are protected at the domestic, regional and international levels in the countries of Asia and the Pacific.
2. Demonstrate an advanced and integrated understanding from a range of disciplines to evaluate how different philosophical, religious and cultural traditions in Asia and the Pacific relate to the international law of human rights.
3. Demonstrate mastery of knowledge to critically evaluate and analyse the effectiveness of different mechanisms and institutions for the protection and promotion of human rights in Asia and the Pacific.
4. Integrate theoretical and practical knowledge to develop and present coherent arguments about complex human rights issues.
5. Demonstrate a highly developed ability to communicate analysis effectively in a variety of appropriate scholarly and professional formats.
6. Ethically and accurately reference (using the Australian Guide to Legal Citation) legal information from a range of domestic and international primary and secondary sources.

Subject Content

1. The global architecture of human rights.
2. Universalism, relativism and the "Asian values" debate.
3. Regional human rights systems in the global order.
4. Human rights and international criminal law: the arc of justice from Tokyo to Phnom Penh.
5. Implementation of international human rights at the state level.
6. National Human Rights Institutions - Protectors or Pretenders?
7. Protection of Human Rights in Communist states: China and Vietnam.
8. Human rights under military dictatorships: Myanmar (Southeast Asia) Fiji (the Pacific) North Korea (North Asia).
9. The role of civil society in the promotion and protection of human rights.
10. Australia and New Zealand: Middle Powers and the politics of human rights persuasion.

Teaching Periods

LAWS 7015 Information and Data Governance Law and Policy

Credit Points 10**Legacy Code** 200958

Coordinator Thillagavathy Rajaretnam (<https://directory.westernsydney.edu.au/search/name/ThillagavathyRajaretnam/>)

Description This unit focuses on the right to privacy and examines the legal framework for information privacy protection and data governance that are established by both international and domestic law and regulation. This unit introduces students to the theoretical approaches to information privacy and data governance law and policy. In particular, the unit focuses on the European Union Directives and Regulation; the OECD Guidelines for the Protection of Privacy and Trans Border Flows of Personal data and the impact of international laws and regulation on information privacy and data governance regulation and policy in Australia. The unit explores some of the challenges in providing effective information privacy protection and data governance in cyberspace as existing laws adapt to new and advanced information technological developments and their use.

School Law**Discipline** Law, Not Elsewhere Classified.**Student Contribution Band** HECS Band 4 10cp**Level** Postgraduate Coursework Level 7 subject**Restrictions**

Students must be enrolled in 2824 Master of Laws, 2810 Master of Laws (International Governance), 2826 Juris Doctor, 3748/3779 Master of Information Governance, 3775 Graduate Diploma in Information Governance, 3774 Graduate Certificate in Information Governance, 3698 Master of Information and Communication Technology (Advanced) or 3699 Master of Information and Communication Technology. Admission is by invitation only.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the legal issues that arise from the use of information technologies in cyberspace;
2. Critically analyse the current international and national legal framework and policy for information privacy and data governance laws and regulation to related legal issues;
3. Effectively use critical thinking and research to resolve legal issues related to information and data governance in oral and/or written forms.

Subject Content

- introduction to international and national approaches to, and policies in, Privacy protection and data Governance
- information and data Governance legal frameworks in The European union and in Australia
- The impact of international and national laws and regulation on Privacy and data Governance policies

- The challenges for international and national regulators and data collectors in providing adequate and effective information protection and data Governance laws and regulation in cyberspace

LAWS 7016 International Banking and Finance Law

Credit Points 10**Legacy Code** 200948

Coordinator John Juriansz (<https://directory.westernsydney.edu.au/search/name/JohnJuriansz/>)

Description This unit is set in the background of the aftermath of the Global Financial Crisis of 2008. It examines the role of financial institutions, financial instruments, financial regulators, and national and international regulatory efforts in a borderless world. Topics covered include: international banking and capital markets, infrastructure of financial markets including the payment and clearance system, derivative instruments (SWAPS, futures, and Options), Asset securitisation, Mutual and Hedge Funds, secured credit, syndicated loans and project financing, and the role of Central Banks and the Bank for International Settlements and the capital adequacy requirements.

School Law**Discipline** Law**Student Contribution Band** HECS Band 4 10cp**Level** Postgraduate Coursework Level 7 subject**Restrictions**

Students must be enrolled in program 8083 Bachelor of Research Studies, 8084 Master of Research - HC, 8085 Master of Research - LC or a postgraduate program from the School of Law. Students enrolled in other programs must obtain permission to enrol in this subject.

Assumed Knowledge

Students must have completed a law degree (Bachelor of Laws or Juris Doctor) or equivalent in any jurisdiction, including specific knowledge of Contracts Law, Corporations Law, Commercial Law and Property Law.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate comprehensive knowledge of the field and explain, identify and critically evaluate the key concepts, policies and issues on defined topics.
2. Apply an understanding of the relevant legal concepts and aspects of policy analysis to analyse and solve practical problems and theoretical legal issues in a clear, logical and effective way.
3. Write policy based position papers on issues relating to banking and finance, and bank and financial services regulation.

Subject Content

1. Infrastructure of Financial Markets.
2. A study of financial markets: US, EU, China and Japan.
3. Bank Capital Adequacy requirements.
4. Payment systems and alternatives.
5. Financial instruments: Derivatives, Futures and Options, SWAPS, Asset securitisation.
6. Mutual and Hedge Funds.
7. Syndicated loans, project financing, and emerging markets debt.
8. Alternative Payment and Settlement Systems.

LAWS 7017 International Climate Change Law

Credit Points 10

Legacy Code 200949

Coordinator John Juriansz ([https://directory.westernsydney.edu.au/search/name/John Juriansz/](https://directory.westernsydney.edu.au/search/name/John%20Juriansz/))

Description This unit examines the current international legal frameworks and discussion of future climate change scenarios. It

will explore the legal, political and scientific challenges in addressing and responding to climate change. It will illustrate how international climate change law interacts with national law, including private sector involvement, but its principal focus is not on domestic law regimes. Market and non-market mechanisms such as emission trading systems, carbon taxes, new technologies and renewable energy targets will be examined.

School Law

Discipline Law, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) LAWS 7027

Restrictions

Students must be enrolled in 2824 Master of Laws, 2784 or 2810 Master of Laws (International Governance), 8083 Bachelor of Research Studies, 8084 Master of Research - HC or 8085 Master of Research - LC.

Assumed Knowledge

Students must have completed law degree (Bachelor of Laws or Juris Doctor) or equivalent in any jurisdiction.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate mastery of knowledge to critically evaluate the global legal frameworks underpinning climate change law and demonstrate an understanding of key international climate change initiatives and their implementation.
2. Demonstrate mastery of knowledge to apply the concepts and principles of international climate change law to issues involving mitigation and adaptation.
3. Integrate theoretical and practical knowledge to undertake independent research and analysis to produce a written essay demonstrating an understanding of international climate law in a defined context that is clear, analytical, appropriately structured and referenced.

Subject Content

1. The role of law in responding to climate change.
2. The science and economics of climate change.
3. The International Climate Change Framework.
4. UNFCCC and the Kyoto Protocol - Flexibility Mechanisms - Compliance - Post Copenhagen and Paris Conference of Parties.
5. Australia's legislative response to climate change - emissions trading - carbon taxes - renewable energy targets.
6. Climate Law in developed and developing countries - common but differentiated responsibilities.
7. Mitigation and Adaptation.

Teaching Periods

LAWS 7018 International Corporate Governance

Credit Points 10

Legacy Code 200902

Coordinator John Juriansz ([https://directory.westernsydney.edu.au/search/name/John Juriansz/](https://directory.westernsydney.edu.au/search/name/John%20Juriansz/))

Description The unit studies the evolution and transformation of the concept of corporate governance over the last five decades. Its focus is on the role of the large modern corporation in its economic and social setting, and it will in this context examine the challenges of ensuring the economic efficiency of the corporation while being responsive to the needs of the social environment it operates in. Examined will be issues of accountability, responsibility, and transparency of the corporation and its managers, to its investors, employees, consumers and society generally, the role of corporate social responsibility, enlightened shareholder value, and the notion of Accountable Capitalism. Also examined will be the role and responsibility of institutional investors, block holders, and other arbitrageurs of corporate control. While the primary focus of the study will be on the Australian, UK, and US models, comparisons will also be made with the German, Japanese, and Chinese systems of corporate governance.

School Law

Discipline Law

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) LAWS 7027

Restrictions

Students must be enrolled in 2824 Master of Laws, 2784 or 2810 Master of Laws (International Governance).

Assumed Knowledge

Completed a law degree (Bachelor of Laws or Juris Doctor) or equivalent in any jurisdiction.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse domestic and international laws with respect to corporate governance.

2. Interpret and communicate knowledge to present a coherent and sustained argument in relation to an issue of contemporary corporate governance.
3. Critically evaluate theoretical and practical corporate governance issues to solve complex legal problems using legal and non-legal sources.
4. Analyse and evaluate contemporary issues affecting the governance of the modern corporation in a globalised financial market and regulatory system.

Subject Content

1. The economic theory of the firm: Australian, US and UK approaches compared and contrasted with the German and Japanese models.
2. The legal theory of the firm: Australian, US, UK approaches compared to the German and Japanese models.
3. The received legal theory of the firm.
4. The role of Audit, Risk Management and Remuneration committees.
5. The role of Institutional shareholders and Institutional shareholder committees.
6. The impact of codes of corporate governance and ethical conduct.
7. Markets (Australia, US and UK) versus Managed (German and Japanese) governance.
8. Stakeholders and shareholders and the political economy of corporations law.
9. The struggle for control and dominance of the modern corporation within and outside of the board in the context of the globalised financial market.
10. Global financial markets and regulatory system.

LAWS 7019 International Criminal Law and Justice

Credit Points 10

Legacy Code 200962

Coordinator Manuel Ventura ([https://directory.westernsydney.edu.au/search/name/Manuel Ventura/](https://directory.westernsydney.edu.au/search/name/Manuel%20Ventura/))

Description This unit analyses the state of international criminal law and its place in the modern international legal system in light of important recent developments. It discusses why a State's national criminal laws should accord with international developments. It focuses on substantive and procedural law and examines relevant international legal concepts, general principles of international criminal law, and how international criminal tribunals function. It considers particular international crimes, participation in such crimes, defences, and important recent cases such as those of Augusto Pinochet and Slobodan Milosevic.

School Law

Discipline International Law

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 8083 Bachelor of Research Studies/ Master of Research, 8084/8085 Master of Research, 2824 Master of Laws, 2784 or 2810 Master of Laws (International Governance) or 2826 Juris Doctor.

Assumed Knowledge

Bachelor of Laws or equivalent qualification.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate fundamental principles of international criminal law, including an understanding of the issues involved in the regulation of international crimes;
2. Critically analyse and evaluate the principal institutions of the international criminal legal system;
3. Analyse and evaluate the major differences between international and national law in dealing with acts that constitute international crimes;
4. Assess the major challenges to, weaknesses and effectiveness of, the international criminal law and the international criminal legal system;
5. Apply principles of international criminal law and justice to contemporary issues by problem solving.

Subject Content

- evolution and structure of international criminal Law and legal system
- sources of international criminal Law and justice
- fundamental principles of international criminal Law and justice
- Substantive Crimes
- establishment of international criminal tribunals
- International Tribunals: the Nuremberg and Tokyo Trials, the United Nations ad hoc Tribunals (Former Yugoslavia/Rwanda), other International(ised) Tribunals
- The international criminal court, Jurisdiction and procedural Issues
- international v national Jurisdiction
- Immunity from Jurisdiction
- Punishment under international criminal Law and The function and role of Truth Commissions

LAWS 7020 International Environmental Law and Policy

Credit Points 10

Legacy Code 200907

Coordinator Beatriz Garcia De Oliveira ([https://directory.westernsydney.edu.au/search/name/Beatriz Garcia De Oliveira/](https://directory.westernsydney.edu.au/search/name/Beatriz%20Garcia%20De%20Oliveira/))

Description This unit provides an overview of international environmental law and policy. It investigates legal and policy measures for managing and protecting the environment in a sustainable manner. The unit will begin by exploring the economic, political, and legal concepts relevant to international environmental legal regimes. It will then apply these concepts to concrete regimes designed to deal with specific international environmental problems, such as climate change, ozone depletion, air pollution, hazardous waste, freshwater resources, marine pollution, world heritage, human rights, biodiversity and habitat loss. The unit focuses principally on the dynamic of treaties, negotiations, and state and non-state actors in the international arena. Special attention will be given to 21st Century environmental problems. Appropriateness of the present environmental legal regimes and challenges for the future will also be mooted in the unit.

School Law

Discipline International Law

Student Contribution Band HECS Band 4 10cp

LAWS 7021 International Governance Dissertation

Credit Points 10

Legacy Code 200904

Coordinator Azadeh Dastyari ([https://directory.westernsydney.edu.au/search/name/Azadeh Dastyari/](https://directory.westernsydney.edu.au/search/name/Azadeh%20Dastyari/))

Description This unit comprises the preparation of a research dissertation, of between 6,000 to 8,000 words, on a novel and/or in-depth study related to International Governance. The unit provides an opportunity for Master of Laws students to further develop and refine their legal research and writing skills and to explore and analyse a legal topic of international governance. It also requires the student to undertake a literature review, submission of a research proposal, upon acceptance of which the dissertation is written under supervision. The dissertation should be of sufficient quality for acceptance for publication in the online Journal of International Governance, hosted by WSU School of Law.

School Law

Discipline Law

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) LAWS 7027

Co-requisite(s) LAWS 7018 AND LAWS 7013

Restrictions

Students must be enrolled in 2824 Master of Laws, 2784 Master of Laws (International Governance) or 2810 Master of Laws (International Governance).

Assumed Knowledge

Completed a law degree (Bachelor of Laws or Juris Doctor) or equivalent in any jurisdiction.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of domestic and international laws in respect to corporate governance.
2. Demonstrate an understanding of recent developments in governance from more than one international legal jurisdiction.
3. Interpret and communicate knowledge to present a coherent and sustained argument to their area of specialty, the legal profession and broader society.
4. Use cognitive, technical and legal skills to investigate complex legal problems and apply established concepts and theories to different bodies of knowledge.
5. Demonstrate mastery of knowledge to critically reflect and analyse relevant theory within the legal profession from a broad range of legal and non-legal sources.
6. Demonstrate creativity and initiative to new situations in professional practice and for further learning in different jurisdictions (different legal systems).
7. Integrate theoretical and practical knowledge to critically analyse and solve complex legal problems, which can be inter-disciplinary in professional practice.
8. Demonstrate a high level of awareness of practices that lead to autonomy and accountability as a public or private lawyer working for government, NGO, or corporation or private practice.

Subject Content

1. Selection of a specific topic of study on international governance, as agreed by the subject coordinator, the student and the supervisor.
2. A unique problem, involving a literature review, appropriate methodology and submission to potentially change the law or frameworks of international governance, in respect of a particular jurisdiction.
3. Preparation for publication. The dissertation, of between 6,000 and 8,000 words should be publishable in the online Journal of International Governance, hosted by the WSU, School of Law.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

LAWS 7022 International Human Rights Law

Credit Points 10

Legacy Code 200961

Coordinator Robert Mezyk ([https://directory.westernsydney.edu.au/search/name/Robert Mezyk/](https://directory.westernsydney.edu.au/search/name/Robert%20Mezyk/))

Description This unit examines the foundations of the concept of human rights under international law, how international law became concerned with the rights of individuals and the development of international measures for the protection of human rights. It examines the extent of compromise of international human rights where sovereignty, cultural relativism and political resistance preclude comprehensive incorporation of some fundamental human rights principles in domestic law. Instruments such as The Charter of the United Nations, The Universal Declaration of Human Rights, The International Covenant on Civil and Political Rights and International Covenant on Economic, Social and Cultural Rights are also examined.

School Law

Discipline International Law

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in programs 8083 Bachelor of Research Studies/Master of Research, 8084/8085 Master of Research, 2810 Master of Laws (International Governance), 2824 Master of Laws or 2826 Juris Doctor.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the fundamental norms of international human rights law, including the provisions of the principal human rights instruments and important jurisprudence of relevant human rights bodies;
2. Evaluate the principal human rights-related institutions;
3. Explain the effectiveness of their procedures at the international level for the protection and promotion of human rights;
4. Critically analyse and assess the major (non-legal) challenges to international human rights law;
5. Apply human rights principles in negotiations and problem solving.

Subject Content

1. Historical and philosophical foundations of human rights
2. Challenges to traditional conceptions of human rights
3. International human rights norms and institutions
4. Regional human rights systems
5. Human rights protection at the national level
6. The human rights treaty monitoring system
7. Case studies of human rights interventions on specific issues, which might include: asylum seekers; indigenous peoples; human trafficking; children's rights; rights of women; peace and security
8. Case studies of human rights interventions in specific countries, which might include Australia, New Zealand, Afghanistan, South Sudan, Timor Leste, Myanmar, Russia

LAWS 7025 International Law of Ocean Governance

Credit Points 10

Legacy Code 200951

Coordinator Robin Bowley ([https://directory.westernsydney.edu.au/search/name/Robin Bowley/](https://directory.westernsydney.edu.au/search/name/Robin%20Bowley/))

Description This unit examines the rules regulating the principle uses of the world's oceans. It explores the historical development and sources of contemporary law of the sea and the adoption of the 1982 Convention on the Law of the Sea (UNCLOS). Legal regimes of various maritime zones including territorial sea and contiguous zone, continental shelf, the exclusive economic zone and the high seas will be studied. Various sources of marine pollution, fisheries, marine scientific research, maritime spatial planning, maritime safety and security, mining of deep sea beds and dispute settlement will also be explored in this unit.

School Law

Discipline International Law

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 2824 Master of Laws, 2784 or 2810 Master of Laws (International Governance), 8083 Bachelor of Research Studies, 8084 Master of Research - HC or 8085 Master of Research - LC.

Assumed Knowledge

Knowledge of law as contained in a law degree (Bachelor of Laws or Juris Doctor) or equivalent in any jurisdiction, including specific knowledge of Contracts Law, Corporations Law, Commercial Law and Property Law.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate mastery of theoretical knowledge of the relevant international law and policy affecting the oceans and to reflect critically on theory and professional practice.
2. Demonstrate an advanced and integrated understanding of various maritime zones in terms of oceans governance and the present status of the law of the sea.
3. Evaluate complex ideas and concepts at an abstract level to apply knowledge and understanding in making an assessment of where the law of the sea can be expected to develop in the future.
4. Integrate theoretical and practical knowledge to critically analyse practical fact situations, locate and apply the relevant legal norms to them.

Subject Content

1. The evolution of Oceanic Law.
2. Importance of Sustainable Ocean Governance.
3. Baselines and Regimes of Internal Waters.
4. The Territorial Sea and Contiguous Zone.
5. Special Passage Regimes: International Straits and Archipelagos.
6. The Exclusive Economic Zone and High Seas.
7. The Continental Shelf: Principles of Maritime Delimitation.
8. Marine Pollution.
9. Fisheries.
10. Marine Scientific Research.
11. Maritime Spatial Planning System.
12. Maritime Safety and Security.
13. Mining of Deep Sea Beds and Common Heritage of Mankind.
14. Dispute Settlement.

LAWS 7026 International Space Law - Commercial Aspects

Credit Points 10

Legacy Code 200963

Coordinator Steven Freeland ([https://directory.westernsydney.edu.au/search/name/Steven Freeland/](https://directory.westernsydney.edu.au/search/name/Steven%20Freeland/))

Description This unit examines the underlying legal principles that regulate the use, exploration and exploitation of space, and how International Law can and should be applied to the many different State and private commercial uses of outer space. It examines the existing international legal regime - the five United Nations Space Treaties and key Declarations of Principles related to space activities - as well as a number of domestic regulatory systems, including the Australian legal regime. The unit also concentrates on the (many) uses and proposed uses of space for which the legal framework may not be particularly well suited.

School Law

Discipline International Law

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LAWS 3068 - Space Law – Commercial Aspects

Restrictions

Students must be enrolled in 2824 Master of Laws, 2784 or 2810 Master of Laws (International Governance), 3735 Master of Data Science, 3699 Master of Information and Communications Technology, 3698 Master of Information and Communications Technology (Advanced) or Masters of Research programs 8083, 8084 or 8085.

Assumed Knowledge

Completed a law degree (Bachelor of Laws or Juris Doctor) or equivalent in any jurisdiction or have a broad understanding of both Australian and International Law. It is recommended that students without a legal qualification should review supplementary materials provided within the Learning Guide providing a summary of the Australian and International Law frameworks.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Assess key elements of the Australian legal framework as they relate to space law.
2. Examine the evolution of the legal regime regulating the use and exploration of space.
3. Analyse the international treaties and United Nations Principles which regulate space activities.

4. Critically examine problems within the existing legal regime relating to the use of space to persuasively present oral arguments.

Subject Content

- legal Definition of space and The need for A legal regime for space
- The role of UNCOPUOS (United nations Committee on Peaceful uses of Outer space)
- Differentiating space Law and Air Law
- The space Treaties and The United nations principles
- Telecommunications and The Geostationary Orbit
- national regulation of launching Activities
- The space environment and The Problem of space debris
- space tourism and Traffic control Issues and Coordination with The regulation of Air travel

LAWS 7031 Principles of Taxation

Credit Points 10

Legacy Code 200869

Coordinator John Azzi ([https://directory.westernsydney.edu.au/search/name/John Azzi/](https://directory.westernsydney.edu.au/search/name/John%20Azzi/))

Description This unit provides an overview of the Australian taxation system as it affects the financial planning environment. Many financial planning decisions have a tax impact. Further, some financial products and much financial advice derive at least some of their value from their taxation consequences. Key topics covered include aspects of tax administration, tax planning concepts, the constitutional basis of taxation, assessable income concepts, international tax issues, the taxation of capital, allowable deductions and offsets, and taxation of such entities as partnerships, trusts, companies and shareholders. The course will also address other FBT taxes that impact the financial advice environment including the FBT and the GST.

School Law**Discipline** Taxation Law**Student Contribution Band** HECS Band 4 10cp**Level** Postgraduate Coursework Level 7 subject**Equivalent Subjects** LAWS 7032 - Revenue Law LGYB 3546 - Taxation Planning and Implications**Restrictions**

Students must be enrolled in a postgraduate Business program. Students wishing to take this subject as an elective need approval from the Academic program Advisor. Students in the 2689 Master of Professional Accounting, 2691 Master of Accountancy, 2793 Master of Financial Planning and 2794 Graduate Diploma in Financial Planning programs must have successfully completed 200432 Commercial Law (or equivalent unit) before undertaking this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and explain the key elements of the Australian Income Tax System and the key revenue law principles.
2. Apply the relevance of tax law information in decided taxation cases, effectively and appropriately, displaying clear understanding of how the case law and legislation are applied in solving tax law problems.
3. Apply their understanding of revenue law concepts to analysing and solving practical problems.

Subject Content

1. Aspects of tax administration
2. The Australian Taxation System
3. Concepts of Income
4. Capital Gain Tax
5. Allowable Deductions
6. Taxation of Partnerships and Trusts
7. Taxation of Companies and Shareholders
8. Tax Offsets and Rebates

Legacy Code 200980

Coordinator Sarah Hook ([https://directory.westernsydney.edu.au/search/name/Sarah Hook/](https://directory.westernsydney.edu.au/search/name/Sarah%20Hook/))

Description This subject provides an introduction and overview of the legal principles of intellectual property law in Australia. Students will consider the nature of intellectual property, the legal framework which contains it, and the ways in which it can be protected. The modules will cover the four major intellectual property regimes of trademarks, copyright, designs, and patents as well as issues relating to traditional knowledge of Aboriginal and Torres Strait Islander Peoples. Students will research the theoretical underpinnings of Intellectual Property Rights and whether they are fit for purpose in contemporary society.

LAWS 7035 International Criminology Project

Credit Points 20

Legacy Code 102689

Coordinator Stephen Tomsen ([https://directory.westernsydney.edu.au/search/name/Stephen Tomsen/](https://directory.westernsydney.edu.au/search/name/Stephen%20Tomsen/))

Description Students enrolled in this unit will complete an original research project with a focus on a topic area of key interest from their studies in International Criminology, and in such fields as human rights, transnational crime, violence, terrorism, international criminal justice and global law enforcement. Topics will be negotiated and agreed between individual students and the unit coordinating staff, and will allow students to plan, undertake and report on a specific aspect of practice in the context of the field.

School Social Sciences

Discipline Criminology

Student Contribution Band HECS Band 4 20cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must have successfully completed 40 credit points in the Master of International Criminology.

Assumed Knowledge

As this is a capstone subject, an understanding of core concepts within the field of Criminology, such as human rights, transnational crime, violence, terrorism, international criminal justice or global law enforcement is desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate engagement in a sustained program of critical reading in their chosen area to refine a key topic of interest in International Criminology;
2. Critically evaluate the issues presented in relevant scholarship and topic materials to connect theory, research and practice;
3. Synthesise existing research and develop an argument to communicate findings of significance of the chosen topic within International Criminology.

Subject Content

- investigation of A chosen key Study Topic in international Criminology, in such fields as human rights, transnational Crime, violence, Terrorism, international criminal justice and Global Law enforcement.

- development of A Study proposal, derived from Critical analysis of relevant scholarship and A literature Review of existing bodies of work in relation to The chosen key Study topic.

- preparation and presentation of A final research report on The chosen key Study Topic in The context of international Criminology that addresses An area of need and contributes to existing scholarship.

- students will be required to plan, undertake and report on A specific aspect of international Criminology through self-directed learning. this will be facilitated by ongoing, Regular contact and Discussion of work with The lecturer, and demonstrated by The Incorporation of lecturer feedback and comments into written work.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Proposal	2000 words	20	N	Individual
Literature Review	2000 words	20	N	Individual

LAWS 7036 Migration Practice and Theory 1

Credit Points 10

Legacy Code 201031

Coordinator Jason Donnelly ([https://directory.westernsydney.edu.au/search/name/Jason Donnelly/](https://directory.westernsydney.edu.au/search/name/Jason%20Donnelly/))

Description This unit focuses on practical aspects of migration practice as a registered migration agent in Australia. The unit covers the practical role of migration agents in professional practice, the fundamental function of the Office of the Migration Agents Registration Authority (OMARA), the registration process involving migration agents, and provides a close analysis of the Code of Conduct. The unit provides a close examination of various aspects of running a migration agent business, including fees, client accounts, record keeping and the appointment and termination of services. The unit also provides an overview of the complaints and disciplinary regime involving registered migration agents.

LAWS 7037 Migration Practice and Theory 2

Credit Points 20

Legacy Code 201030

Coordinator Jason Donnelly ([https://directory.westernsydney.edu.au/search/name/Jason Donnelly/](https://directory.westernsydney.edu.au/search/name/Jason%20Donnelly/))

Description This unit focuses on the practical processes involved in migration practice as a registered migration agent in Australia. The unit covers topics such as the interview consulting process with clients, the regime for lodging valid visa applications (including the methods of lodgement and preparation procedures) and Freedom of Information requests and practical aspects of communicating with the Department. This unit also provides students with the opportunity to undertake a capstone practical placement program with a registered migration agent business in Australia. NOTE: All students must attend a mandatory onsite intensive two-day weekend workshop to address practical aspects reflected in the Occupational Competency Standards of the Department of Home Affairs. Students may also undertake a five day capstone practical placement program to gain professional experience in the migration agent industry in Australia.

LAWS 7036

Incompatible Subjects LGYA 4914 - Migration Law in Practice

Restrictions

Students must be enrolled in 2819 Graduate Diploma in Australian Migration Law.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Conduct the interview consulting process between a migration agent and prospective client and migration agent and client.
2. Conduct visa application tasks including preparing, reviewing and lodging visa applications.
3. Solve migration law problems for clients in practical contexts.
4. Interact with statutory instrumentalities to process regulatory migration requirements.
5. Communicate relevant information about migration legal issues to legal and non-legal audiences.

Subject Content

This subject is a capstone Work Integrated Learning (WIL) subject with a WIL placement or a Professional Project option. The subject include scenario based activities/placement activities which incorporate migration practice oriented tasks such as preparing visa applications, drafting ministerial intervention applications and undertaking a service/costs agreement. As a capstone unit, it will draw on the skills and

knowledge students have developed throughout the Graduate Diploma in Australian Migration Law program.

Unit content includes:

1. The interview consulting process;
2. Lodging applications;
3. Government Information (Public Access) Act 2009 (GIPA Act) applications;
4. Visa application preparation, review and lodgement;
5. Communication with statutory instrumentalities;
6. Interviewing and consultation in a migration law context.

Special Requirements

Legislative pre-requisites

Students are prohibited from working with children as part of their Professional Placement.

LAWS 7039 International Criminal Justice

Credit Points 10

Legacy Code 102688

Coordinator Stephen Tomsen ([https://directory.westernsydney.edu.au/search/name/Stephen Tomsen/](https://directory.westernsydney.edu.au/search/name/Stephen%20Tomsen/))

Description This unit gives a detailed overview of the origins, development and contemporary debates about principles and institutions of international criminal law and justice, including the global circulation of ideas about human rights, war crimes, genocide and other "crimes against humanity" and the activity of the International Criminal Court (ICC). It will draw out the strengths of these developments, as well as their limits in addressing the needs of victims and the attainment of social justice. Furthermore, the unit will focus on Australia's often contradictory position in these changes and its own response to issues of global human rights and justice.

School Social Sciences

Discipline Criminal Law

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in program 1862 Master of International Criminology and must have successfully completed 40 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the fundamental principles in the core topics of human rights, war crimes, genocide and other crimes against humanity in International Criminal Law and Justice.
2. Assess the major challenges, weaknesses and effectiveness of the institutions of international criminal law and the international criminal legal system through critical evaluation.
3. Demonstrate an understanding of contemporary debates surrounding International Criminal Law and Justice from a global human rights perspective through the development of arguments grounded in current research.

Subject Content

The origins and contemporary development of International Criminal Law (1940s - Nuremberg trials and principles, United Nations Charter, Universal Declaration of Human Rights and Convention on the Prevention and Punishment of the Crime of Genocide); Enactment of the Rome Statute (1998) and establishment of the ICC (Hague); Ad hoc International Tribunals; War Crimes, Genocide, Crimes against Humanity, and other Crimes (Torture, Aggression); Key trials and their outcomes; Understanding and frameworks of Global Human Rights; Australia and International Criminal Law and Justice (civil conflicts, military intervention and refugees).

Assessment

LAWS 7040 Financial Advice (Regulatory and Legal Obligations)

Credit Points 10

Legacy Code 201041

Coordinator William Higgs ([https://directory.westernsydney.edu.au/search/name/William Higgs/](https://directory.westernsydney.edu.au/search/name/William%20Higgs/))

Description This unit examines the regulation of provision of financial advice within the Australian financial services sector - including the regulatory and legal obligations relating to financial advice that arise under Chapter 7 ("Financial Services and Markets") of the Corporations

Act 2001 (Cth) and the reporting and notification requirements under the Anti-Money Laundering and Counter-Terrorism Financing Act 2006 (Cth) (AML/CTF Act) and the Anti-Money Laundering and Counter-Terrorism Financing Rules (AML/CTF Rules). The main object of Chapter 7 is to promote: confident and informed decision making by consumers of financial products and services while facilitating efficiency, flexibility and innovation in the provision of those products and services; fairness, honesty and professionalism by those who provide financial services; fair, orderly and transparent markets for financial products; and the reduction of systemic risk and the provision of fair and effective services by clearing and settlement facilities. Businesses that are required to comply with the AML/CTF Act are also required to comply with the Privacy Act 1988 (Cth) when handling personal information collected for the purposes of compliance with their AML/CTF Act obligations. The unit examines the role of the Australian Transaction Reports and Analysis Centre (AUSTRAC) which is the Australian Government agency responsible for ensuring compliance with the AML/CTF Act. The unit critically evaluates the reasons for regulation in the context of contemporary and evolving events which affect the financial services sector including the overarching Australian Privacy Principles (APPs) set out by the Privacy Act 1988 (Cth). The unit also examines the Tax Agent Services Act 2009 (Cth) (TASA) requirements for tax (financial) advisors and the role of the Tax Practitioners Board (TPB) in enforcing the requirements under TASA. The unit examines the professional and ethical obligations in providing financial advice and the consequences of failing to comply with these obligations with a particular focus upon the critical importance of professional ethical conduct, the consequences understanding the need to put the clients interest first, the importance of identifying and resolving conflict of interest, and the need to identify and avoid instances of professional misconduct and unsatisfactory conduct. This unit is available as a standalone bridging unit which is accredited by the Financial Adviser Standards and Ethics Authority (FASEA) having met the FASEA curriculum and standards requirements.

School Law

Discipline Business and Commercial Law

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students are expected to be on the Financial Adviser Register before enrolling in this subject.

Assumed Knowledge

Students are expected to have practical experience working in the financial planning industry and be on the Financial Adviser Register.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine how the Australian legal and regulatory compliance requirements frame the provision of financial advice and the financial services sector.
2. Critically evaluate the policy rationale behind the regulation of the provision of financial advice within the Australian financial services sector.
3. Apply relevant regulatory provisions to case studies.
4. Critically appraise professional and ethical obligations, and the consequences of failing to comply with these obligations, in providing financial advice.

Subject Content

- Overview of current financial services environment and purpose of regulation
- Obligations arising under Chapter 7 (?gFinancial Services and Markets?h) of the Corporations Act 2001 (Cth)
- introduction to Australian Regulatory framework of financial advice and advisors and regula

LAWS 7041 Administrative Law

Credit Points 10

Legacy Code 201056

Coordinator Michael Head ([https://directory.westernsydney.edu.au/search/name/Michael Head/](https://directory.westernsydney.edu.au/search/name/Michael%20Head/))

Description This unit examines the legal principles regulating the exercise of power by the executive arm of government in its various manifestations; ministers, government departments and officials, regulatory bodies, tribunals, inferior courts and local councils. This is examined in the context of Australian constitutional arrangements and it is taught in the context of constitutional themes and principles that underpin the law in this area. The exercise of power examined includes decision making, the exercise of discretion, delegated legislation and the decision making procedure of the major administrative tribunals. The focus is on the principles of judicial review developed by the courts, standing and remedies. There is also an examination of major non-judicial avenues of review by the major tribunals such as the

Commonwealth Administrative Appeals Tribunal, and the Ombudsman. The unit will also examine Freedom of Information legislation.

LAWS 7042 Advanced Legal Negotiation

Credit Points 10

Legacy Code 201062

Coordinator John Juriansz ([https://directory.westernsydney.edu.au/search/name/John Juriansz/](https://directory.westernsydney.edu.au/search/name/John%20Juriansz/))

Description This unit examines how conflict arises and engages students to apply the main theories related to conflict and its resolution within diverse practical environments. Students will analyse and synthesis negotiation theories, skill-sets and studies, and will evaluate their respective usefulness as future legal professionals. Students will develop a value-laden negotiation toolbox and will grow in confidence in negotiations within a broad array of environments essential to the legal profession. Students will examine written scholarship, engage in negotiation simulations involving role- scenarios, case hypotheticals, experimental games, and will become intricately involved in other negotiation-related scenarios. Classes will include presentation of conceptual and strategic theories, simulations and role-playing scenarios applying these theories, and de-briefing of the theoretical and practical components of legal negotiation.

School Law

Discipline Law, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) LAWS 7044

Restrictions

Students must be enrolled in program 2826 Juris Doctor.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply competitive and collaborative negotiation skill-sets most appropriate to the particular dispute as future legal professionals;
2. Develop an advanced understanding of the nature of disputes, including ethical, cultural, and economic factors of disputes, in one or more legal jurisdictions;
3. Demonstrate a critical awareness of the emotional and psychological encouragements and barriers to consensus building as well as those involving rational choice theory;
4. Critically analyse the main theories of influence, sway, and negotiation and their application in the field of law and other related fields;
5. Work effectively as a team member to resolve dispute resolution challenges as future legal professionals.

Subject Content

- elements of negotiations
- Positional Bargaining and interest-based Bargaining
- power and weakness
- nature of disputes - The Ethical, cultural and economic dimensions
- Consensus - The emotional and psychological encouragements and barriers
- Core tasks in reaching agreement: information exchange, solution-seeking, concession management
- ways to manage A Negotiation
- tactics: people and processes
- deal design: value and substance
- Setup: scope and sequence
- common barriers to agreement
- Game theory
- Bargaining strategies
- Distributive Negotiation
- personality and persuasion
- Seven elements of effective negotiations: relationship, communication, interests, options, alternatives, legitimacy, commitment
- best alternative to negotiated agreement (BATNA)
- Coalitions
- Multiparty negotiations
- strategic management and Resolution of deadlocked negotiations

LAWS 7044 Alternative Dispute Resolution

Credit Points 10

Legacy Code 201052

Coordinator Beatriz Garcia De Oliveira ([https://directory.westernsydney.edu.au/search/name/Beatriz Garcia De Oliveira/](https://directory.westernsydney.edu.au/search/name/Beatriz%20Garcia%20De%20Oliveira/))

Description Alternative Dispute Resolution (ADR) processes are no longer 'alternative' but a major part of the contemporary justice system. Modern legal practice requires lawyers to negotiate settlements on behalf of clients and advise clients how to resolve disputes without litigation. Non-adversarial processes offer many benefits to parties, professionals and the community. This unit introduces students to the theory and practices of alternative dispute resolution processes and provide students with the opportunity to develop key ADR practice. Students will employ cultural awareness and appropriate communication strategies required for professional practice in dispute resolution, particularly in relation to Aboriginal and Torres Strait Islander peoples.

School Law

Discipline Legal Practice

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) LAWS 7056 Fundamentals of Australian Law

Incompatible Subjects LAWS 2001 Alternative Dispute Resolution

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate principles, theoretical models and key processes in Australian dispute resolution systems;
2. Propose appropriate and effective processes for attempting dispute resolution;
3. Employ cultural awareness and appropriate communication strategies required for professional practice in dispute resolution, particularly in relation to Aboriginal and Torres Strait Islander peoples;
4. Reflect on ethical and legal issues surrounding dispute resolution models and practice to enhance personal and professional development.

Subject Content

- introduction to The course & Understanding Dispute Resolution
- shaping Australia Dispute Resolution
- Negotiation
- mediation
- Conciliation
- expert determination & Arbitration

LAWS 7045 Civil Procedure and Arbitration

Credit Points 10

Legacy Code 201061

Coordinator Patrick Foong ([https://directory.westernsydney.edu.au/search/name/Patrick Foong/](https://directory.westernsydney.edu.au/search/name/Patrick%20Foong/))

Description This unit provides a comprehensive analysis of the practical and theoretical issues encountered in Australian civil procedure. It examines the major roles and practices governing court supervised processes which are involved in superior court litigation as well as key aspects of arbitration. This unit will include a selection from the following or similar topics: characteristics of an adversarial system, case management procedure, the rules of pleadings, jurisdiction and joinder, service, discovery and Interrogatories, means of gathering evidence at pre-trial including subpoenas and notice to produce, judgment and appeals, enforcement and costs, and arbitration.

School Law

Discipline Legal Practice

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) LAWS 7056 Fundamentals of Australian Law AND LAWS 7061 Legal Analysis and Critique

Incompatible Subjects LAWS 4013 Civil Procedure and Arbitration

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the legal principles and processes of Australian civil litigation, with a particular focus on the law in New South Wales to resolve legal problems;
2. Analyse the legal principles and processes of arbitration to resolve legal problems;
3. Present and defend a legal argument on civil procedure and arbitration in a coherent and effective manner;
4. Create a legal document relevant to civil procedure suited to audience and context;
5. Assess the ethical and legal ethical issues surrounding Dispute Resolution models and practice.

Subject Content

- characteristics of An adversarial system
- case management procedure
- The Rules of pleadings and joinder

- Jurisdiction
- service
- Discovery and Interrogatories
- means of gathering evidence at Pre-Trial including subpoenas and notice to produce
- Judgment and appeals
- enforcement and costs
- Arbitration

LAWS 7046 Constitutional Law

Credit Points 10

Legacy Code 201058

Coordinator Azadeh Dastyari ([https://directory.westernsydney.edu.au/search/name/Azadeh Dastyari/](https://directory.westernsydney.edu.au/search/name/Azadeh%20Dastyari/))

Description Constitutional Law introduces the legal rules and doctrines governing State and Commonwealth Constitutional systems in Australia. Topics covered include: State and Commonwealth Constitutions; legislative powers of the Commonwealth and State governments; Executive; the separation of powers doctrine; the legal relations between State and Commonwealth laws; Constitutional freedoms and restrictions on Commonwealth legislative powers.

School Law

Discipline Constitutional Law

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) LAWS 7057 Government and Public Law

Incompatible Subjects LAWS 4015 Constitutional Law

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the rules, doctrines and conventions that govern the Commonwealth and State constitutional systems in Australia;
2. Construct solutions to legal problems that demonstrate deep comprehension of Constitutional Law;
3. Assess techniques of constitutional interpretation and reasoning;
4. Present persuasive and appropriately substantiated constitutional arguments;
5. Ethically and accurately reference (using the Australian Guide to Legal Citation) legal information from a range of primary and secondary sources.

Subject Content

- introduction to Australian constitutional Law
- state Legislative powers
- constitutional Amendment
- separation of Judicial power
- The Executive
- constitutional interpretation
- Characterisation
- trade and commerce and Incidental powers
- Corporations power
- external affairs power
- Inconsistency between Commonwealth and state laws
- freedom of political communication

LAWS 7048 Criminal Law

Credit Points 10

Legacy Code 201047

Coordinator Meda Couzens ([https://directory.westernsydney.edu.au/search/name/Meda Couzens/](https://directory.westernsydney.edu.au/search/name/Meda%20Couzens/))

Description This unit examines the principles and aims of criminal law and criminal procedure. Students will engage with the definition, elements and application of crimes in the context of fatal and non-fatal offences against the person, the major sexual offences, property offences, and relevant defences. Students will analyse the elements of offences and apply the principles of statutory interpretation of offence provisions. Concepts of criminal responsibility and strict liability, the roles of principal agencies in the criminal justice system, and the central elements of the criminal process and sentencing are examined. Students will be introduced to the institutional arrangements of criminal procedure and their respective legislative and policy rationales. Students will engage with contemporary and historical considerations of criminal law, criminal responsibility and the impact of the criminal justice process in a broad social, political and economic context with a particular focus on issues including domestic violence and the impact of the criminal justice system on Aboriginal and Torres Strait Islander peoples. Students will be engaged with a range of practice-oriented exercises including Bail Applications.

School Law

Discipline Criminal Law

Student Contribution Band HECS Band 4 10cp

LAWS 7049 Criminal Procedure and Evidence

Credit Points 10

Legacy Code 201059

Coordinator Francine Feld ([https://directory.westernsydney.edu.au/search/name/Francine Feld/](https://directory.westernsydney.edu.au/search/name/Francine%20Feld/))

Description The unit is designed to provide an understanding of the law, the theoretical underpinnings and the underlying policy issues, in the areas of evidence and criminal procedure. This unit deals with principles and stages of civil and criminal procedure in order to comply with the formal requirements for admission to legal practice, themes and theories of procedural law, identification and interpretation of the key legislative provisions and key stakeholders, and techniques of statutory interpretation including comprehension of the interpretation of statute through case law and academic commentary. It is expected that the students will be able to solve hypothetical problem questions through the application of procedural legislation and precedent.

School Law

Discipline Criminal Law

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) LAWS 7048 Criminal Law

Incompatible Subjects LAWS 4004 Criminal Procedure and Evidence

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate theories and rationales underlying the policy and processes of criminal procedure and evidence;
2. Critique the statutory and common law rules of evidence and criminal procedure as they operate in a practical context in New South Wales;
3. Assess the circumstances and needs of Aboriginal and Torres Strait Islander peoples in criminal courts, procedures and processes;
4. Construct solutions to legal problems that indicate a deep comprehension and critical application of procedural legislation and precedent;
5. Reflect on the roles and professional responsibilities of legal practitioners in the administration of justice to exercise ethical judgment when undertaking scholarly and legal tasks;
6. Assess factual, evidentiary and policy issues to construct reasoned, justifiable and logical legal and scholarly arguments.

Subject Content

- The nature of The adversarial Trial in The criminal context
- alternative rationales underlying The uniform evidence acts and The common Law
- forms of evidence
- theories of proof and relevance
- Standards and Burden of proof
- Rules of exclusion including, hearsay, opinion, admissions, tendency and coincidence, character, credibility, identification evidence

- Privileges
- Rules and principles of questioning witnesses and tendering documents
- Judicial warnings, comment and directions
- mandatory and Discretionary exclusions and The limitations on evidence
- Prosecutorial and defence ethics
- The Law governing procedure before A criminal Trial including arrest
- The needs of Aboriginal and Torres Strait Islander peoples in criminal Courts, procedure and processes

Assessment

LAWS 7050 Designing Law Apps for Access to Justice

Credit Points 10

Legacy Code 201065

Coordinator John Juriansz ([https://directory.westernsydney.edu.au/search/name/John Juriansz/](https://directory.westernsydney.edu.au/search/name/John%20Juriansz/))

Description This unit will teach students how to design and build an application using expert system software. This unit will provide students with a clinical legal experience by providing access to a community based client to ascertain their needs and undertake collaborative work to provide a solution that requires applied legal research, teamwork, innovative and creative design thinking, and the capacity to manage a project. This unit will teach students how to identify, design and build appropriate legal information systems for use in generating legal documents from precedents and assisting users to navigate solutions to legal problems. Students will be exposed to a variety of automated legal tasks and various legal and practical issues associated with their use, including issues of professional regulation. This will include guest lectures from those working on legal expert systems and related technologies. After learning the necessary skills, students will work in small groups to design and build a legal information system. This unit does not require students to have any pre-existing skills or experience in expert systems or computer programming. Instead, the unit itself includes instruction on how to use an expert system software.

School Law

Discipline Law, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program. Admission is by invitation only. Enrolment numbers are strictly limited and will be subject to competitive entry so as to ensure enrolment is limited to the best performing cohort. Students must have completed at least 80 credit points of 2826 Juris Doctor core subjects to be considered for admission into this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically assess the limitations and implications of automated legal services in enhancing community access to legal information and services;
2. Collaborate with community partners to obtain instructions, isolate legal problems, and design creative and innovative solutions;
3. Design and build a basic automated legal information system to solve a real world problem;
4. Work constructively as a member of a self-managed team on an extended automated legal service project;
5. Present the automated legal solution clearly and persuasively;
6. Critically reflect on the complex impact of technology in providing legal services within community contexts.

Subject Content

- Working with community partners
- Overview of legal service applications
- how to build and use A legal application
- principles of programming ? including precision, modularity, efficiency, maintainability, scalability, provability, user engagement, effectiveness, testing, debugging
- design thinking for The new future: case-by-case analysis, aggregated data, data visualization, insights
- teamwork and Project collaboration
- work-based Project management
- Presenting Project solutions to clients

LAWS 7051 Elder Law

Credit Points 10

Legacy Code 201066

Coordinator Richard Mccullagh ([https://directory.westernsydney.edu.au/search/name/Richard Mccullagh/](https://directory.westernsydney.edu.au/search/name/Richard%20Mccullagh/))

Description Whilst Elder Law has been an acknowledged speciality for many years in countries such as Canada and the United States of America, it is only in the last two decades that it has gained recognition in Australia. This unit examines law, theories and issues relevant to an ageing community. The legal issues are examined in a broad social, cultural and ethical context. Issues of legal capacity relevant not only to the law of contracts but also to medical treatment and end of life decisions are considered. Similarly, the law relating to areas of special importance to the elder community such as age discrimination, pensions, retirement villages, wills and estate planning are also discussed.

School Law

Discipline Law, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate the legal, policy, moral and practical issues concerning Substitute Decision Making for older people;
2. Analyse the legal, policy, moral and practical issues that may concern older people in relation to discrimination, abuse, accommodation and retirement finances and estate planning;
3. Provide advice in relation to elderly community interests and disputes;
4. Display clear and logical arguments in responses addressing legal issues relating to ageing community;
5. Assess ethical issues arising in Elderly law practice and the professional responsibilities of lawyers in promoting justice and service to the community.

Subject Content

- Policymaking and The older person
- Legislation affecting older persons
- role of The guardianship division of NCAT
- role of The NSW trustee and guardian
- role of The public guardian
- Substitute decision making
- Elder Abuse
- discrimination
- Accommodation Issues
- Medico-legal Issues associated with aging
- Privacy and Confidentiality
- Grandparenting
- financial Issues
- multicultural Issues associated with ageing
- making or not making A will
- family provision

LAWS 7052 Elder Law Industry Placement

Credit Points 10

Legacy Code 201067

Coordinator Elen Seymour ([https://directory.westernsydney.edu.au/search/name/Elen Seymour/](https://directory.westernsydney.edu.au/search/name/Elen%20Seymour/))

Description This unit builds on the knowledge base of Elder Law (Juris Doctor) to provide work experience for Juris Doctor Law students. Our industry partners provide the opportunities for students to apply their knowledge and skill to work in various practice areas, with an emphasis on Elder Law related issues. This unit is designed to allow students to gain valuable experience in ethical and professional responsibility, in a workplace, while undertaking academic assessment. Students will also improve their legal and research skills which will assist them in the transition from university to the workplace. The placement will consist of a full time ten- day placement at selected industry workplaces with supervision by experienced legal practitioners. The unit will provide students with real-life work experiences in the legal issues associated with the practice of elder law and with an appreciation of the professional responsibilities essential for a 21st Century legal practitioner.

School Law

Discipline Law, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

LAWS 7057 Government and Public Law

Credit Points 10

Legacy Code 201053

Coordinator Shreeya Smith ([https://directory.westernsydney.edu.au/search/name/Shreeya Smith/](https://directory.westernsydney.edu.au/search/name/Shreeya%20Smith/))

Description Government and Public Law is designed to provide an overview of government and public law in Australia and a foundation for the later study of Administrative Law and Constitutional Law. It introduces students to the principles and structures that underpin constitutional and administrative law in Australia. The unit has four key focus areas: Public Law in Australia, How Government Works, Government Accountability and Integrity, and Individuals and Government. Students will collaborate in problem/case-based learning and engage with online learning materials to develop knowledge and skills in legal research and communication enabling them to address critical contemporary public law challenges.

LAWS 7059 Judicial Internship

Credit Points 10

Legacy Code 201069

Coordinator Michael Brogan ([https://directory.westernsydney.edu.au/search/name/Michael Brogan/](https://directory.westernsydney.edu.au/search/name/Michael%20Brogan/))

Description This unit provides an internship opportunity for later year law students. Students will spend twelve days throughout the semester at selected courts and tribunals under the supervision of magistrates, judges or tribunal members. The unit will provide students with an opportunity to observe the courts and tribunals first hand, to be mentored by a judicial officer, to engage in practical assistance to the relevant court or tribunal, and to appreciate the professional responsibilities essential for a 21st Century legal practitioner and judicial officer. The unit will assist students in advancing their legal and research skills and deepen their experience of the social, practical and ethical complexities encountered by the legal profession. The unit will also assist students in their transition from university to the profession. Entry is competitive and will include a written application and interview.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) LAWS 7066 AND
LAWS 7048 AND
LAWS 7072 AND
LAWS 7061 AND
LAWS 7047

Restrictions

Students must be enrolled in a postgraduate program. Permission required. Places in this subject are limited. Students will be selected on merit based on the following: 1. Submission of an expression of interest, including relevant documents, in seeking to undertake the subject (either submitted to an external body or to the subject coordinator); and 2. Completion of a satisfactory joint interview process with the subject coordinator and/or a representative of a professional body, court or tribunal.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically reflect on the limitations of the law, professional and judicial ethical issues and the protocols of courts and tribunals;
2. Examine the operation of a court or tribunal;
3. Perform legal tasks within a practical legal and judicial context;
4. Research professional legal and judicial ethical and practical issues that arise in professional practice;
5. Reflect on professional development experiences and needs;

- Evaluate approaches to problem solving in policy or legal practice professional settings.

Subject Content

- professional and Judicial ethics
 - court and tribunal Operational protocols
 - Paralegal tasks within practical and Judicial contexts
 - Issues in professional practice
 - legal theory, policy and reform
- Students will undertake a twelve-day attendance (internship) in a court or tribunal during which students will be mentored by a judicial officer and have an opportunity to develop a deeper understanding of the practice and procedure of the court or tribunal.

LAWS 7061 Legal Analysis and Critique

Credit Points 10

Legacy Code 201050

Coordinator Catherine Renshaw ([https://directory.westernsydney.edu.au/search/name/Catherine Renshaw/](https://directory.westernsydney.edu.au/search/name/Catherine%20Renshaw/))

Description This unit introduces students to the processes of critical evaluation of arguments, legal communication and logical and critical problem solving involving statutory interpretation and precedent. Students will have the opportunity to explore how law is made, some of the institutional limitations on law and justice, and the impact of globalisation on law. It introduces theories about the nature and function of law in historical, political, social, economic, cultural, ethical and international contexts. The connection between race, gender, culture and law is examined within the context of the Australian legal tradition, legal history, and the impact of the Australian legal system on Aboriginal and Torres Strait Islander Peoples. Students will use logical and critical skills to develop solutions to problems involving statutory interpretation and the application of precedent; and articulate legal thought effectively and persuasively in written formats for lay and expert audiences.

School Law

Discipline Law, Not Elsewhere Classified.

Coordinator John Juriansz ([https://directory.westernsydney.edu.au/search/name/John Juriansz/](https://directory.westernsydney.edu.au/search/name/John%20Juriansz/))

Description This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). This subject provides students with a capstone research experience in relation to a supervised legal dissertation. Students develop and refine legal research and writing skills by analysing a legal topic chosen in consultation with an academic supervisor. This subject includes training in research methodology and requires the student to undertake a literature review, to develop a research proposal, to present on the proposal and finished work, and to submit a dissertation. This year long subject can only be commenced in Autumn semester and lasts the equivalent of two consecutive semesters. The research project areas will principally focus upon those areas identified by the School of Law in its Research Strategy.

School Law

LAWS 7066 Professional Responsibility and Legal Ethics

Credit Points 10

Legacy Code 201049

Coordinator Michael Brogan ([https://directory.westernsydney.edu.au/search/name/Michael Brogan/](https://directory.westernsydney.edu.au/search/name/Michael%20Brogan/))

Description This unit provides students with the opportunity to critically reflect on the legal, statutory and ethical principles and standards that underpin the professional obligations of legal practitioners. Students will also analyse ethical issues that commonly occur in professional legal practice in contemporary multicultural Australia, particularly with Aboriginal and Torres Strait Islander peoples. It deals with the professional, legal and ethical responsibilities legal practitioners owe to the law, the courts, their clients and to fellow practitioners, as well as the state and society at large. Students will be able to explain and evaluate the law and practice of legal practitioners, by reference to key topics, such as: professionalism; legal ethics; the history, structure and regulation of the legal profession; and the interpersonal, psychological and cultural factors affecting lawyering. In addition students will be able to demonstrate the process of ethical decision making by selecting and using ethical decision making tools in a legal context and develop their own ethical framework by exploring the relationship between personal and professional attitudes and values; and by reflecting on their own performance.

Discipline Legal Practice

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) LAWS 7056 Fundamentals of Australian Law

Incompatible Subjects LAWS 2015 Professional Responsibility and Legal Ethics

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Reflect on the legal, statutory and ethical principles and standards that underpin the professional obligations of legal practitioners;
2. Analyse ethical issues that commonly occur in professional legal practice in contemporary multicultural Australia, particularly with Aboriginal and Torres Strait Islander peoples;
3. Develop appropriate strategies to avoid legal and ethical risks in professional legal practice;
4. Propose arguments to support or counter propositions for reform in legal ethics;
5. Develop their own ethical framework by exploring the relationship between personal and professional attitudes and values and by reflecting on their own performance.

Subject Content

- The legal profession: Issues, ethics and lawyering
- professional communication (including cultural Understanding)
- duty to The Law, Courts and Fellow practitioners
- duty to clients (including Basic principles of trust accounting)
- Admission, professional misconduct and discipline
- Psychology and Ethical decision making

Assessment

Coordinator Ludmilla Robinson ([https://directory.westernsydney.edu.au/search/name/Ludmilla Robinson/](https://directory.westernsydney.edu.au/search/name/Ludmilla%20Robinson/))

Description This unit examines the nature, goals and structure of private law remedies, and is organised around the remedial goals of compensation, perfection, vindication, disgorgement, restitution, and punishment. Both judicial and non-judicial remedies in Australian private law are examined including the principles of the major common law, equitable, restitutionary, and statutory remedies available to wronged parties in a variety of circumstances. Emphasis is on the analysis of practical and theoretical advantages and disadvantages of various remedies. The unit explores how and why different remedial goals are accorded differing priority and are given effect in different ways across different areas of private law thereby deepening the student's understanding of remedies and the nature of each of these substantive fields of private law. The content of this unit elucidates the principles relating to the assessment of all forms of damages under common law and statute as well as the judicial approaches to the grant of injunctions and other non-monetary relief.

Pre-requisite(s) LAWS 7053 Equity Trusts

Incompatible Subjects LAWS 4014 Remedies

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically reflect on common law, equitable, restitutionary, and statutory remedial concepts and their application and effectiveness in contemporary legal practice.
2. Analyse and solve practical problems and theoretical legal issues independently in order to demonstrate a detailed understanding of the suitability of remedies in various practical situations.

3. Collaborate effectively and persuasively on complex legal principles, theories and frameworks governing the award of private law remedies across Australian and overseas jurisdictions.
4. Communicate persuasively and effectively complex knowledge and ideas to expert and non-expert legal audience.
5. Evaluate the impact on Australia's culturally diverse society of the dominant culture's private law remedies.

Subject Content

1. The Nature of Remedies
2. Self-Help Remedies
3. General Principles of Compensation
4. Compensation in Equity
5. Gain-based Awards – Disgorgement and accounting for profits
6. Restitution (the measure of Restitution, Rescission, Unjust Enrichment)
7. Contested Categories
8. Punishment in Private Law (Exemplary Damages)
9. Proprietary Relief
10. Specific Relief – General Principles and Specific Performance
11. Injunctions
12. Declaratory Relief
13. Enforcement
14. Vindicatory damages and Damage in Substitution of Rights
15. Tracing
16. Delivery Up, Cancellation and Rectification
17. Statutory Remedies
18. Defensive Equities

Coordinator Elen Seymour ([https://directory.westernsydney.edu.au/search/name/Elen Seymour/](https://directory.westernsydney.edu.au/search/name/Elen%20Seymour/))

Description This unit examines the legal basis for the Australian taxation system and its application. It will cover taxation of income from personal exertion, business and property, as well as the taxation of fringe benefits provided in the context of employment and the goods and services tax (popularly known as the GST). Lectures and tutorials cover the constitutional basis of taxation, income tax assessment and the concepts of income tax, allowable deductions, other federal and state taxes, taxation of business associations (partnerships, companies, trusts and primary producers), taxation accounting, administration and practice, taxation planning and avoidance.

School Law

Discipline Taxation Law

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) LAWS 7058 AND LAWS 7056

Restrictions

Students must be enrolled in 2826 Juris Doctor.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the key elements of the Australian Income Tax System and the Goods and Services Tax System.
2. Examine the relevance of tax law information in a decided taxation case, effectively and appropriately, how the case law and legislation are applied in solving tax law problems.
3. Apply their understanding of revenue law concepts to analysing and solving practical problems.
4. Use a range of research tools to locate and evaluate the quality, currency and relevance of legal information.

Subject Content

Introduction to Income Tax Law
 Residence and Source
 Income from Labour
 Fringe Benefits Tax
 Income from Business
 Income from Property
 Compensation principle
 Capital Gains Tax
 Allowable Deductions
 Allowable Deductions Specific Provisions
 Capital Allowances
 Tax Accounting

LAWS 7070 Revenue Law Industry Placement

Credit Points 10

Legacy Code 201072

Coordinator Elen Seymour ([https://directory.westernsydney.edu.au/search/name/Elen Seymour/](https://directory.westernsydney.edu.au/search/name/Elen%20Seymour/))

Description This work integrated learning unit builds upon the knowledge base of 201071 Revenue Law (Juris Doctor) to provide industry experience for later year 2826 Juris Doctor students. Students who have successfully completed 201071 Revenue Law (Juris Doctor) with a Credit or above result will be eligible to apply for this industry experience. This unit is designed to allow students to gain valuable experience in ethical and professional responsibility in a workplace, while undertaking academic assessment. Students will also improve their legal and research skills which will assist them in the transition from university to the workplace. The placement will consist of a full time four-week placement at the Australian Tax Office or other suitable workplace approved by the School of Law. Students will work in various practice areas with an emphasis on technical legal issues and will be supervised by senior staff members.

School Law

Discipline Taxation Law

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) LAWS 7069

Restrictions

Students must have completed 201071 Revenue Law (Juris Doctor) at credit level or above. Enrolment in the subject is by invitation only following a call for expressions of interest and a merit selection based on a 500-word submission outlining the student's interest in the placement and his or her Grade Point Average in the program. Selection will broadly reflect the diversity of applicants. Applicants must also meet any workplace requirements. Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the operation of taxation law in practical contexts;
2. Propose solutions to taxation law problems for clients in practical contexts;

3. Communicate relevant information about contemporary legal taxation issues to clients and peers;
4. Critically reflect on the students' learning and professional development needs;
5. Perform legal writing tasks and critical thinking tasks within a practical legal and taxation context.

Subject Content

- practical legal problems derived from legal practice
- practical application of Law to facts
- Ethical considerations of legal practice
- client interviewing, legal instructions and information gathering
- professional client management: record keeping, File notes, letters of advice, and other legal professional management systems
- information for clients including legal information sheets and other information available in practice

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) Students must have successfully completed 80 credit points of 2826 Juris Doctor core units to enrol in this unit

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine new risks, obligations and ethical issues for the courts and practitioners arising from the use of technology in the delivery of justice and legal services;
2. Critically analyse the ways in which emerging technologies are changing, challenging and enabling the way that lawyers and legal systems work;
3. Critically analyse the way that disruptive technologies challenge regulators across global jurisdictions;
4. Use communication skills required by new and emerging technological platforms;
5. Reflect on issues and strategies to personally maintain currency in digital literacies and their innovative application.

Subject Content

1. Digital literacy & Ethics
 - Law and Technology: lawyers as advocates for vulnerable populations in A World disrupted by Technology
 - Paperless Workflows and information security
 - information Governance and Privacy in A Big data World
 - Forensics & data collection
 - professional strategies for maintaining currency and Innovative practice
2. Virtual and Distributed Courts
 - virtual Courts
 - online Dispute Resolution
 - case management systems
3. Legal Technology and Practice
 - coding for lawyers
 - Technology assisted Review (TAR)
 - legal research, Discovery, document and data management
 - financial and Regulatory technologies
4. Human Rights and Technology

MANU 2001 Design and Manufacturing

Credit Points 10

Legacy Code 301340

Coordinator Leigh Sheppard ([https://directory.westernsydney.edu.au/search/name/Leigh Sheppard/](https://directory.westernsydney.edu.au/search/name/Leigh%20Sheppard/))

Description This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This unit introduces basic aspects of design and manufacturing, process selection, manufacturing processes, material selection based on material properties and the use of computers in the design process. A project selected allows students to work individually and in a team environment to achieve the final objective which is a workable product. As part of the project, students are asked to develop a product from a page of functional requirements by developing a concept sketch, material selection, detail engineering drawings, process plan and finally making the product in a workshop. At the end of the semester, the products are tested.

MANU 3003 Creative Digital: Robots and Avatars

Credit Points 10

Legacy Code 301307

Coordinator Mauricio Novoa ([https://directory.westernsydney.edu.au/search/name/Mauricio Novoa/](https://directory.westernsydney.edu.au/search/name/Mauricio%20Novoa/))

Description This is a project-based learning unit that assists students to creatively synthesise skills learned in previous units. Students are introduced to current problem solving in professional practice that negotiates between physical and digital components to form smart artefacts. That relation is represented with the development of an interactive robot and its digital mirror counterpart as its avatar. The unit also assists in the preparation of a professional portfolio show piece for job applications in the industry. Learning by experimentation, the unit links traditional skillsets including software and 3D printing with new forms of design, from engineering narratives to digital creativity within augmented and virtual environments.

School Eng, Design & Built Env

Discipline Manufacturing Engineering And Technology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects MANU 3001 - Graphics 5 Creative Computing

Assumed Knowledge

Understanding of 3D CAD and basic programming is desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Create a project brief that challenges the normal or typical uses of an object.
2. Design and implement techniques for linking components in the virtual (avatar) and real worlds (robot).
3. Develop design solutions using an empathic human-centred approach.
4. Identify and use appropriate range of modalities of communication between user, real world and virtual world for the project.

Subject Content

1. Augmented and Virtual Reality
2. Digital simulation of products and environments
3. Implementing Tangible Interaction between physical and virtual environments by manipulating physical artefacts (robot) that interact with 2D and 3D world objects (avatar, scenario)
4. Use of parametric and polygon CAD software together with cross-platform game engines
5. Visual analytics

Description This unit consists of two modules. The first module has been designed to provide a revision of basic mathematical concepts and methods that apply to business situations. They include basic mathematical operations, percentages, equations, index numbers, logarithms, direct and inverse variation, and graphs. The second module has been designed to provide students with the necessary skills for making practical financial decisions. The concepts taught include simple interest, compound interest, annuities and their applications as they apply in a business environment.

School Western Sydney The College

Discipline Mathematics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 0 Preparatory subject

Equivalent Subjects MATH 0007 - Mathematics 1

Restrictions Students must be enrolled in a Foundation program at The College.

Assumed Knowledge

Mathematics Year 10 or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Solve problems involving basic mathematical operations, equations and formulae.
2. Model mathematical problems using appropriate graphs.
3. Apply simple and compound interest concepts and annuities to real-life business problems.
4. Demonstrate an understanding of how the concept of the time value of money can be applied to investments.
5. Demonstrate an understanding and an ability to apply a variety of fundamental mathematical concepts to solve familiar and unfamiliar problems.
6. Interpret and communicate mathematical ideas in a clear and effective manner, using appropriate notation.
7. 1. Solve problems involving basic mathematical operations, equations and formulae.
8. 2. Model mathematical problems using appropriate graphs.
9. 3. Apply simple and compound interest concepts and annuities to real-life business problems.
10. 4. Demonstrate an understanding of how the concept of the time value of money can be applied to investments.
11. 5. Demonstrate an understanding and an ability to apply a variety of fundamental mathematical concepts to solve familiar and unfamiliar problems.
12. 6. Interpret and communicate mathematical ideas in a clear and effective manner, using appropriate notation.

Subject Content

Module 1 - Basic mathematics

1. Basic mathematical operations on whole numbers, decimals and fractions
2. Percentages, ratios and rates
3. Linear equations
4. Simultaneous linear equations (elimination and the substitution method)
5. Substitution into formulae, rearranging formulae
6. Quadratic equations
7. Index numbers
8. Logarithms
9. Functions and their graphs (linear, quadratic, exponential, logarithmic)
10. Direct and inverse variation

Module 2 - Financial Mathematics

11. Simple interest (interest amount, length of time, interest rate, principal and maturity value, applications, time lines and equations of value)
12. Compound interest (maturity value, principal, interest amount, interest rate, length of time, effective and nominal rates, time lines and equations of value, multiple interest rates)
13. Annuities (ordinary annuities and annuities due, accumulated value, present value, size of annuity, rate per interest period, deferred annuities, perpetuities, general annuities)
14. Applications (loans- affordability, repayment schedules, loan outstanding; investment decisions using NPV and IRR)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Intra-session Exam 1	1 hr	10	N	Individual
Intra-session Exam 2	1 hr	25	N	Individual
Applied Project		25	N	Individual
End of session Test	3 hrs	40	N	Individual

Description This unit has been designed to enhance students' numeracy skills and their understanding of basic mathematical concepts taught in high school mathematics. The topics include arithmetic and algebra, elementary functions, and basic geometry and trigonometry. The unit will prepare students and help them follow more advanced topics in Mathematics 2, Mathematics for Engineers Preliminary and Mathematics for Engineers 1, as well as various other Engineering and ICT units.

School Western Sydney The College

Discipline Mathematics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 0 Preparatory subject

Restrictions Students must be enrolled at Western Sydney University, The College.

Assumed Knowledge

Mathematics Year 10 equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Perform operations and solve simple problems involving whole numbers, decimals, fractions and surds.
2. Apply algebraic rules and techniques to solve simple equations and manipulate formulas
3. Demonstrate conceptual understanding of a function, the domain and range, function graph, and the inverse function, and apply it to model and analyse relationships between quantities.
4. Relate functions (linear and quadratic) and the corresponding equations and apply the relationship to analyse engineering applications.
5. Apply the basic trigonometric ratios and Pythagoras's theorem to solve problems involving triangles.
6. Calculate areas and volumes.

Subject Content

1. Arithmetic (numbers, operations with numbers including whole numbers, fractions, decimal and percentages, properties of real numbers). Measurements and units, estimates, scientific notation and rounding, uncertainties.

2. Algebra (algebraic rules and techniques, equations and identities, working with formulas).
3. Functions (definition and notation, domain and range, graphs, the inverse function).
4. Linear and Quadratics functions and equations; linear systems of 2 equations.
5. Basic Geometry and Trigonometry (angles, triangles, Pythagoras's theorem, trigonometric ratios).
6. Areas and Volumes.
 1. Arithmetic (numbers, operations with numbers including whole numbers, fractions, decimal and percentages, properties of real numbers). Measurements and units, estimates,

Equivalent Subjects MATH 0009 - Mathematics 2 (UWSC)

Restrictions Students must be enrolled at Western Sydney University, The College.

Assumed Knowledge

Mathematics year 10 equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Select and apply a variety of algebraic techniques to solve equations and problems.
2. Solve geometric and trigonometric problems that involve two and three dimensional objects.
3. Use the concept of a function and the relationship between dependent and independent variables to solve a variety of problems both algebraically and graphically.
4. Use algebra to solve geometrical problems in Cartesian and polar coordinate systems.
5. Apply a variety of strategies to find mathematical models for problems involving exponential and logarithmic functions.
6. Demonstrate an ability to solve problems by identifying interrelationships between ideas from different areas of mathematics.
7. Interpret and communicate mathematical ideas in a clear and effective manner, using logical arguments and appropriate notation.

Subject Content

1. Basic arithmetic operations (with whole numbers, fractions and decimals, index numbers, units and measurements)

2. Basic algebra (terminology, simplifying algebraic expressions, expanding and factorising, working with algebraic fractions, solving linear and quadratic equations, substituting into formulae and changing the subject, simultaneous equations)
3. Functions (terminology and notation, domain and range, graphs of functions, composite functions, inverse functions, elementary functions (linear, quadratics, exponential and logarithmic.))
4. Geometry (angles, triangles, rectangles, circles, Pythagoras Theorem, areas and volumes)
5. Trigonometry (basic trigonometric ratios, exact ratios, complementary angles, angles of any magnitude, sine and cosine rule, trigonometric functions and their graphs)
6. Coordinate geometry (Cartesian coordinate system, distance between two points, equation of a straight line, gradient of a line, distance of a point from a line, loci, equation of a circle, polar coordinates, Pythagoras Theorem in 3D)

1. Basic arithmetic operations (with whole numbers, fractions and decimals, index numbers, units and measurements)

Pre-requisite(s) MATH 0008

Equivalent Subjects MATH 0011 - Mathematics 3 (UWSC)

Restrictions Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the main concepts of arithmetic and geometric series to solve problems.
2. Manipulate algebraic expressions involving trigonometric identities.
3. Choose and apply appropriate techniques of differential and integral calculus to solve a variety of problems, including real-life problems.
4. Solve problems involving inverse trigonometric functions including those involving derivatives and integrals.
5. Demonstrate an understanding of the basic concepts of vectors and perform basic operations on vectors and matrices.
6. Demonstrate an ability to solve problems by identifying interrelationships between ideas from different areas of mathematics.
7. Communicate abstract mathematical ideas and relationships using appropriate notation and logical arguments.

Subject Content

1. Series (arithmetic and geometric progressions, limiting sum of infinite series)
2. Trigonometry (revision of basic identities, sum and difference of two angles, double angles, and in terms of)
3. Differentiation (gradient of a curve; differentiation from first principles; differentiating powers of x ; differentiating trigonometric, exponential and logarithmic functions; rules of differentiation: sums and differences of functions, product rule, quotient rule, chain rule)
4. Applications of differentiation (determining stationary points and their nature; inflection points, curve sketching, problem solving)
5. Integration (indefinite and definite integrals, rules of integration, area under and between curves, volumes of solids of revolution)
6. Inverse trigonometric functions (and , derivatives and integrals involving inverse trigonometric functions)
7. Vectors (scalars and vectors, addition and subtraction of vectors, problem solving)
8. Matrices (terminology, basic operations on matrices, determinants of 2×2 and 3×3 matrices)

MATH 0017 Mathematics for Health Science (WSTC)

Credit Points 10

Legacy Code 900088

Coordinator Michael CASEY ([https://directory.westernsydney.edu.au/search/name/Michael CASEY/](https://directory.westernsydney.edu.au/search/name/Michael%20CASEY/))

Description This subject is designed to prepare students for further study at university level in the areas of Health Science and in particular, Nursing. Undergraduate study in Health Science places a particular emphasis on mathematical skills in the workplace and this subject provides a basis for developing those skills. The subject places equal emphasis on both theoretical and practical application of mathematical techniques as would apply in practice in the health environment.

School Western Sydney The College

Discipline Mathematical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 0 Preparatory subject

Equivalent Subjects None

Restrictions

Only students enrolled at The College in Foundation Studies programs can enrol in this subject.

Assumed Knowledge

Year 10 Mathematics or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of basic mathematical concepts (basic mathematical operations, fraction, percentages, ratios and measurements).
2. Apply different mathematical techniques to solve problems related to oral medication, with and without technological assistance.
3. Apply different mathematical techniques to solve problems related to parental and paediatric medicine, with and without technological assistance.
4. Apply different mathematical techniques to solve problems related in the areas of volume and rates, with and without technological assistance.
5. Interpret, analyse, and solve health-related problems in relation to specific patient case studies.

Subject Content

Module 1: Basic Mathematics

1. Basic mathematical operations with whole numbers, decimals and fractions.

2. Ratios and rates.

3. Percentages.

4. Metric system.

5. Graphs and data.

Module 2: Mathematical Calculations in Health Care

6. Oral Medication ? Dosage: tablets and mixtures.

7. IV Fluid Management ? rate of flow, drop factor, burettes, pumps.

8. Injections ? types, mixing solutions, calculating dosage.

9. Paediatrics ? determine body surface area, dosage by body weight, verifying safe dosages by comparison with recommendations.

10. Volumes/Rates ? calculating complex volumes using the metric system, oral, parenteral and intravenous medications.

Module 1: Basic Mathematics

1. Basic mathematical operations with whole numbers, decimals and fractions.

2. Ratios and rates.

3. Percentages.

4. Metric system.

5. Graphs and data.

Module 2: Mathematical Calculations in Health Care

6. Oral Medication ? Dosage: tablets and mixtures.

7. IV Fluid Management ? rate of flow, drop factor, burettes, pumps.

8. Injections ? types, mixing solutions, calculating dosage.

9. Paediatrics ? determine body surface area, dosage by body weight, verifying safe dosages by comparison with recommendations.

10. Volumes/Rates ? calculating complex volumes using the metric system, oral, parenteral and intravenous medications.

Coordinator Michael CASEY ([https://directory.westernsydney.edu.au/search/name/Michael CASEY/](https://directory.westernsydney.edu.au/search/name/Michael%20CASEY/))

Description This unit has been designed to develop the students' mathematical literacy and mathematical thinking necessary for further education, work and everyday life. The unit aims to build on existing skills, develop skills in new areas and encourage students' confidence in their own ability by applying mathematical concepts to a series of real life problems.

School Western Sydney The College

Discipline Mathematics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 0 Preparatory subject

Equivalent Subjects MATH 0002 - Foundations of Mathematics (WSTC)

Restrictions Students must be enrolled in University Foundation Studies Extended 3 Term program

Assumed Knowledge

Year 9 Mathematics or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding and proficiency in using the mathematical language and terminology presented in the subject.
2. Translate real life problems into mathematical language.
3. Select and apply a variety of problem solving strategies and techniques to solve familiar and unfamiliar real life problems.
4. Use appropriate techniques to assess validity of solutions and interpret results.

Subject Content

1. Problem solving
2. The Real Number System
3. Basic Arithmetic
4. Basic Algebra
5. Tables and Graphs
6. Measurements and Geometry
7. Trigonometry
8. Basic probability

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Intra-session Exam 1	1 hour	10	N	Individual
Intra-session Exam 2	1 hour	25	N	Individual
Intra-session Exam 3	1 hour	25	N	Individual

Coordinator Robert Paluzzano ([https://directory.westernsydney.edu.au/search/name/Robert Paluzzano/](https://directory.westernsydney.edu.au/search/name/Robert%20Paluzzano/))

Description This unit is designed to assist students to become competent in the fields of mathematics and basic physical science. It reinforces the mathematical skills in the areas of basic arithmetic, algebra, geometry and trigonometry. The unit introduces the study of forces, work and energy and selected applications of these concepts. Emphasis is placed on developing the key competencies of scientific methods to provide the necessary introduction for Building Design and Construction Technology.

School Western Sydney The College

Discipline Mathematics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 0 Preparatory subject

Restrictions Students must be enrolled at Western Sydney University The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply appropriate arithmetic and algebraic techniques to solve problems.
2. Solve problems involving simple linear equations, and quadratic equations using the formula and where relevant, apply the SI units appropriately.
3. Solve geometric and trigonometric problems that involve two and three dimensional objects.
4. Demonstrate a basic knowledge and understanding of the relationship between force, work, and energy and power.
5. Solve problems involving these as they relate to such quantities as distance, mass and velocity.
6. Identify and discuss the key issues related to the relationship between building design and acoustics.
7. Explain the thermal properties of selected materials used in construction.
8. Interpret and communicate ideas in a clear and effective manner, using logical arguments, appropriate notation and correct units of measurement.

Subject Content

1. Arithmetic processes
 - a) Working with whole numbers
 - b) Working with fractions, decimals and percentages
 - c) Working with index numbers
2. Algebra
 - a) Terminology
 - b) Working with algebraic expressions
3. Solving equations
 - a) SI units and measurement
 - b) Linear equations
 - c) Quadratic equations using the quadratic formula
4. Geometry
 - a) Angles
 - b) Area, volume and surface area of common objects
5. Trigonometry
 - a) Right angled triangle
 - b) Sine and Cosine rules
6. Forces, Work and Energy
 - a) Force = Mass x Acceleration
 - b) Forces in equilibrium
 - c) Work = Force x distance
 - d) Work = Change in(?E) Energy
 - e) Kinetic Energy
 - f) Gravitational Potential Energy
7. Sound waves and acoustics
8. The Thermal properties of materials

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Numerical Problem Solving and Reflection	Tutorial activities completed during class time and submitted and assessed twice during the term.	(10% each) 20	N	Individual
Short answer Presentation	1 hour	20	N	Individual
Short answer	3 minutes	10	N	Individual
Short answer	1 hour	20	N	Individual
End-of-session Exam	2 hrs and 20 mins	30	N	Individual

Teaching Periods

MATH 0028 Statistics for Academic Purposes (WSTC Prep)

Credit Points 5

Legacy Code 700045

Coordinator Michael CASEY ([https://directory.westernsydney.edu.au/search/name/Michael CASEY/](https://directory.westernsydney.edu.au/search/name/Michael%20CASEY/))

Description Understanding, creating and working with statistics are fundamental skill requirements in many areas and career pathways within the arts, business, science and the humanities disciplines. This unit will provide students with a comprehensive overview of statistics in order to prepare them for success in first year university units of study where they will further develop their skills. Through both individual and group tasks students will use statistics to organize and display data as well as draw valid inferences, based on data, by using appropriate statistical tools.

Level Undergraduate Level 0 Preparatory subject

Equivalent Subjects MATH 0029 - Statistics for Academic Purposes (UWSC)

Restrictions Students must be enrolled at Western Sydney University, The College.

Assumed Knowledge

Year 10 Mathematics or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the statistical terminology and use the correct notation.
2. Collect, organise and display data.
3. Calculate descriptive characteristics and describe data sets.
4. Calculate and describe the relationship between two variables and use simple linear regression to predict or estimate values.

- Calculate probabilities.
- Apply appropriate statistical methods to analyse data and make inferences.
- Use computer software to display and analyse data.

Subject Content

- Statistical terminology and methods of collecting data.
- Organising and displaying data.
- Measures of central tendency, variation and spread.
- Correlation and simple linear regression.
- Probability.
- Binomial distribution.
- Normal distribution.
- Sampling distribution.
- Estimation.
- Hypothesis testing.

Assessment

MATH 1001 Analysis of Change

Credit Points 10

Legacy Code 300830

Coordinator Shatha Aziz ([https://directory.westernsydney.edu.au/search/name/Shatha Aziz/](https://directory.westernsydney.edu.au/search/name/Shatha%20Aziz/))

Description This Level 1 unit introduces students to the mathematical modelling techniques that are used to formulate and solve problems in the physical and biological sciences. To use these techniques successfully, students must develop the ability to formulate a problem mathematically and then be able to use the appropriate knowledge to test conclusions by analytical and numerical means. These skills will be emphasized as each technique is introduced. Apart from some introductory work on logarithms and exponentials (essential concepts in the sciences), the main techniques developed involve aspects of differential calculus, culminating in the use of differential equations to model real phenomena in the sciences.

Equivalent Subjects MATH 1011 - Fundamentals of Mathematics LGYB 0484 - Analysis of Change (WSTC)

Incompatible Subjects MATH 1014 - Mathematics 1A

Restrictions Students may complete the three subjects Quantitative Thinking, Analysis of Change and Maths 1A in the following order: 300831 Quantitative Thinking, 300830 Analysis of Change, 300672 Mathematics 1A. This means that students may complete 300831 before attempting 300830, but not after. 300830 and 300831 may be attempted before 300672, but not after. Students may not enrol in 300831 and 300830 or 300831 and 300672 or 300830 and 300672 in the same teaching session. Students enrolled in the Bachelor of Engineering (Honours), Bachelor of Engineering or Bachelor of Engineering Science may not enrol in any of the subjects 300830, 300831 or 300672.

Assumed Knowledge

General Mathematics background achieved at bands 5 or 6, or Mathematics, achieved at band 4, or equivalent or 300831 Quantitative Thinking.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define, graph and manipulate exponential, logarithmic and trigonometric functions.
2. Apply correctly the techniques of differential calculus to solve biological and chemical- based problems
3. Apply correctly algebraic techniques and manipulate basic limits.
4. Communicate mathematical ideas using standard practices

Subject Content

Exponential and Logarithmic functions

Differential Calculus

Limits

Rules of differentiation

Applications of differentiation

Basic Integration

Trigonometry

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Numerical Problem Solving	30 minutes each	50	N	Individual
Final Exam	2 hours	50	Y	Individual

MATH 1003 Biometry

Credit Points 10

Legacy Code 200263

Coordinator Preethi Kottegoda ([https://directory.westernsydney.edu.au/search/name/Preethi Kottegoda/](https://directory.westernsydney.edu.au/search/name/Preethi%20Kottegoda/))

Description Biometry introduces students to various statistical techniques necessary in scientific endeavours. Presentation of the content will emphasize the correct principles and procedures for collecting and analysing scientific data, using a hands-on approach. Topics include effective methods of gathering data, statistical principles of designing experiments, error analysis, describing different sets of data, probability distributions, statistical inference, non-parametric methods, simple linear regression and analysis of categorical data.

Equivalent Subjects MATH 1032 - Statistics for Science MATH 1028 - Statistical Decision Making MATH 1030 - Statistics for Business ECON 1006 - Introduction to Economic Methods MATH 1004 - Biometry (WSTC) MATH 1029 - Statistical Decision Making (WSTC) 30123 - Management Analytics

Incompatible Subjects MATH 1025 - Quantitative Techniques

Assumed Knowledge

HSC Mathematics or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. apply the basic principles of statistical design incorporating error analysis
2. design a simple scientific experiment, and then carry out and analyse the data obtained
3. estimate population means using confidence intervals
4. test hypotheses about population means using parametric techniques and find appropriate sample sizes for experiments
5. use regression and correlation techniques to describe relationships between variables
6. use the chi-square test for goodness of fit and test for independence to analyse categorical type data
7. develop statistical computing skills as part of a 'tool-kit' for solving statistical problems. (R-commander)

Subject Content

1. Overview - What is Statistical Thinking? And what role does it play in Scientific Research.
2. Gathering Data - Types of data and dealing with measurements
3. Statistical Principles of Design - understanding randomness; types of sampling including observational studies, experiments, blocking and stratification, and levels of replication; sampling concerns.
4. Describing Sets of Data - Qualitative data; graphical methods for describing quantitative data; numerical measures of central tendency and variability; dealing with errors; error bars
5. Basic probability concepts; enough to understand p-values, confidence intervals and independence. Normal distribution and methods for assessing normality; use of transformations to meet assumptions; sampling distributions; the Central Limit Theorem.
6. Estimation with Confidence Intervals: Single sample - Large and small sample confidence intervals for a population mean; determining the sample size.
7. Tests of Hypothesis: Single sample - Elements of a statistical test; type I and type II errors; large and small sample test of hypothesis about a population mean; p-values.
8. Comparing Population Means: Estimation and Hypothesis testing - Comparing two population means: independent sampling and paired difference sampling; comparing three or more population means: one-way and two-way ANOVA;
9. Simple Linear Regression and Correlation - Least squares approach; assessing the usefulness of the model; using the model for estimation and prediction; the coefficients of correlation and determination.
10. Analysis of Categorical Data - Test for independence and 'Goodness-of-fit' test.

Coordinator Leanne Rylands ([https://directory.westernsydney.edu.au/search/name/Leanne Rylands/](https://directory.westernsydney.edu.au/search/name/Leanne%20Rylands/))

Description Discrete Mathematics introduces set theory, symbolic logic, graph theory and some counting techniques. The unit develops mathematical thinking and builds problem solving skills. It provides a solid foundation for further study in mathematics or computing.

School Computer, Data & Math Sciences

Discipline Mathematical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects LGYB 0448 - Discrete Mathematics (UWSC)

Incompatible Subjects MATH 2004 - Discrete Structures and Complexity

Assumed Knowledge

HSC Mathematics or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Decide the truth of logical statements involving connectives, and simplify logical expressions using the laws of logic and truth tables
2. Give simple proofs by induction and contradiction;
3. Define and recognise primes, factorise small integers, use the Euclidean algorithm, and do calculations with modular arithmetic;
4. Perform simple operations on sets, find Cartesian products of sets, and use Venn diagrams to illustrate relationships between sets;
5. Solve basic problems in counting and probability;
6. Recognize a function, decide whether a given function is one-to-one or onto, and perform elementary manipulations with functions;
7. Describe simple and directed graphs, use concepts such as "path", and find minimal spanning trees

Subject Content

1. Sets: definitions, subsets, equality, operations, properties, empty set.
2. Counting and probability: Introduction, permutations and combinations, counting rules.
3. Functions: one-to-one, onto, inverse functions, composition.
4. Logic: logical connectives, equivalence, conditional statements, contrapositive, converse, valid arguments, predicates, quantifiers.

5. Number theory and mathematical proof: division, direct proof, counter-examples, division into cases, proof by contradiction and contraposition.
6. Induction and recursion: examples, sequences, sigma and product notation.
7. Graphs and trees: paths, circuits, isomorphisms of graphs, definitions, spanning trees, Kruskal's algorithm.

Coordinator Abbas Ranjbar ([https://directory.westernsydney.edu.au/search/name/Abbas Ranjbar/](https://directory.westernsydney.edu.au/search/name/Abbas%20Ranjbar/))

Description This unit serves as an introduction to the key mathematics and physics concepts required to study engineering at a tertiary level. This unit has two major components, physics and mathematics. The physics component includes physical quantities, scalars and vectors, kinematics and dynamics. The mathematics component includes basic arithmetic and algebra, trigonometry, coordinate geometry, relations and functions and introduction to differentiation.

School Eng, Design & Built Env

Discipline Mathematics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Restrictions Students must be enrolled in 7022 Associate Degree in Engineering

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use graphical methods to analyse data using the scientific method;
2. Identify the characteristics of uniform motion and predict variables of motion based on past or current conditions;
3. Identify the characteristics of uniformly accelerated motion and predict variables of motion based on past or current conditions;
4. Use the concepts of kinematics to analyse two-dimensional projectile motion;
5. Use Newtonian dynamics to quantitatively analyse objects in equilibrium;
6. Use Newtonian dynamics to quantitatively analyse objects experiencing uniformly accelerated motion;
7. Use the concepts of work and conservation of energy to explain the behaviour of different systems;
8. Choose and apply appropriate arithmetic, algebraic and graphical techniques to solve problems;
9. Solve theoretical and real life problems using trigonometry;
10. Use algebra to solve geometrical problems in the Cartesian coordinate system;
11. Use the concept of a function and the relationship between dependent and independent variables to solve a variety of problems both algebraically and graphically;
12. Use introductory calculus concepts to solve problems involving rates of change;
13. Demonstrate an ability to solve problems by identifying interrelationships between ideas from different areas of mathematics;
14. Interpret and communicate mathematical ideas in a clear and effective manner, using logical arguments and appropriate notation.

Subject Content

1. Physics
 - a. Mechanics ? Physical Quantities - Units and their relationships
 - b. Mechanics ? Scalars and Vectors - Addition and subtraction
 - c. Mechanics ? Kinematics
 - Motion in a straight line
 - Motion in two dimensions
 - Graphing motion
 - Relative motion
 - d. Mechanics ? Dynamics
 - Newton's Law of Motion
 - Momentum and Imp

MATH 1012 Management Analytics

Credit Points 10

Legacy Code 301123

Coordinator Neil Hopkins ([https://directory.westernsydney.edu.au/search/name/Neil Hopkins/](https://directory.westernsydney.edu.au/search/name/Neil%20Hopkins/))

Description Management Analytics provides students with introductory knowledge and skills in identifying, analysing and interpreting data relevant to Business, Human Resources and Management. In order to develop evidence-based decision-making skills, students will learn how to work with data. Students will organise and summarise data, present data visually and design surveys for new data collection and use. Students will develop skills in understanding decision-making

models and forecasting as a means of improving business processes and HR, management and business metrics.

Assumed Knowledge

HSC maths (2 unit desirable) or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise the importance of communicating with data in Business, Management and Human Resource contexts
2. Demonstrate knowledge of evidence-based decision-making techniques in business, human resources and management
3. Organise and summarise numerical data
4. Manipulate, analyse and graph data using Excel
5. Employ appropriate statistical methods and techniques in given situations.
6. Understand the basics of forecasting in Business, Human Resource and Management contexts.
7. Design survey tools for data collection and analysis.

Subject Content

1. Foundations of management analytics
 - data presentation
 - Analytics on spreadsheets
 - collecting data - survey design
2. Descriptive analytics
 - Descriptive statistical measures
 - probability distributions
3. Predictive analytics
 - estimation and Hypothesis testing
 - survey analysis
 - simple linear regression analysis
4. Making decisions and decision analysis

Coordinator Charles Zworestine ([https://directory.westernsydney.edu.au/search/name/Charles Zworestine/](https://directory.westernsydney.edu.au/search/name/Charles%20Zworestine/))

Description This Level 1 unit provides a solid foundation in the theory and applications of differential calculus, as well as some introductory work on complex numbers. It is the first of two units developing aspects of calculus.

School Computer, Data & Math Sciences

Discipline Mathematics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects LGYA 4423 Concepts of Mathematics

Incompatible Subjects LGYA 4295 Mathematics for Business
MATH 1016 Mathematics for Engineers 1

Restrictions Students may complete the three subjects Quantitative Thinking, Analysis of Change and Maths 1A in the following order: 300831 Quantitative Thinking, 300830 Analysis of Change, 300672 Mathematics 1A. This means that students may complete 300831 before attempting 300830, but not after. 300830 and 300831 may be attempted before 300672, but not after. Students may not enrol in 300831 and 300830 or 300831 and 300672 or 300830 and 300672 in the same teaching session. Students enrolled in the Bachelor of Engineering (Honours), Bachelor of Engineering or Bachelor of Engineering Science may not enrol in any of the subjects 300830, 300831 or 300672.

Assumed Knowledge

Mathematics achieved at Bands 5-6, or knowledge equivalent to 300830 Analysis of Change.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define i and operate with complex numbers.
2. Define and manipulate the following functions: exponential, trigonometric, hyperbolic, logarithmic, inverse trig and inverse hyperbolic.
3. Find limits of functions and determine if a function is continuous or differentiable.
4. Find the derivatives of functions.
5. Apply correctly techniques of differential calculus to problems involving optimization, curve sketching and rates of change.
6. Calculate basic integrals.

Subject Content

- Functions and Inverse Functions: Functions and their Graphs; Trigonometric, Exponential, and Hyperbolic Functions; Inverse Functions; Logarithmic Functions; Inverse Trigonometric and Hyperbolic Functions.
- Complex Numbers: Definition; Basic Operations; Argand Diagram; Polar Form; Euler's Formula; De Moivre's Theorem; Powers and Roots.
- Limits and Continuity: Limit of a Function; Limit Laws; One-Sided Limits; Limits at Infinity; The Sandwich Theorem; Vertical and Horizontal Asymptotes; Intermediate Value Theorem.

- Differentiation: Definition of the Derivative; Differentiability implies Continuity; Derivatives of Polynomials and Exponential Functions; Product and Quotient Rules; Chain Rule; Implicit Differentiation; Derivatives of Trigonometric and Hyperbolic Functions
 - Applications of Derivatives: Maximum and Minimum Values; Extreme Value Theorem; Roll's Theorem and the Mean Value Theorem; Monotonic Functions and the First Derivative Test; Concavity and Curve Sketching; Applied Optimization; Indeterminate Forms and L'Hôpital's Rule
 - Integration: Antiderivatives; Indefinite and Definite Integrals; Connection between the Definite and Indefinite Integrals.

Assessment

Coordinator Alexander Lee ([https://directory.westernsydney.edu.au/search/name/Alexander Lee/](https://directory.westernsydney.edu.au/search/name/Alexander%20Lee/))

Description This Level 1 unit provides a solid foundation in the theory and applications of integral calculus, as well as some introductory work on linear algebra and infinite sequences and series. It is the second of two units developing aspects of calculus.

School Computer, Data & Math Sciences

Discipline Mathematics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Pre-requisite(s) MATH 1014

Equivalent Subjects LGYA 4423 - Concepts of Mathematics

Incompatible Subjects LGYA 4295 - Mathematics for Business
MATH 1016 - Mathematics for Engineers 1

Restrictions This subject is not available to students enrolled in the Bachelor of Engineering (Honours), Bachelor of Engineering or Bachelor of Engineering Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Do calculations with matrices and determinants and use row reduction to solve systems of equations.
- State the definition of the definite integral and apply the Fundamental Theorem of Calculus.
- Use the various techniques of integration to evaluate a range of integrals.
- Apply correctly techniques of integral calculus to problems involving some of the following: areas, volumes, work, blood flow, cardiac output, consumer surplus, hydrostatic force.
- Use the various tests to determine if a series converges and find Taylor and Maclaurin series for functions.
- Find the dot and cross product of vectors and the equations of lines and planes.

Subject Content

- Matrices and Determinants: Operations on matrices; Systems of Linear Equations; Row Reduction (Gaussian and Gauss-Jordan Elimination); Properties of Determinants; Cramer's Rule; Inverse of a Matrix (by Row Reduction and the Adjoint Method).
- Vectors: Dot product and cross product; equations of lines and planes.
- Integration: Riemann Sums; Definition of the Definite Integral; Fundamental Theorem of Calculus; Indefinite Integrals; Integration by Substitution; The Logarithm Defined as an Integral.
- Techniques of Integration: Integration by Parts; Trigonometric Integrals; Trigonometric Substitutions; Method of Partial Fractions; Improper Integrals.
- Applications of Integration: Areas and Volumes; Average Value of a Function; Separable Differential Equations; Exponential Growth and Decay; and Topics from: Volumes using cylindrical shells, Work, Arc Length, Area of a Surface of Revolution, Hydrostat
- Infinite Sequences and Series: Definitions; Integral Test and Estimates of Sums; Comparison Tests; Alternating Series; Absolute Convergence; Ratio and Root Tests; Power Series; Taylor and Maclaurin Series; Applications of Taylor Polynomials.

Coordinator Charles Zworestine ([https://directory.westernsydney.edu.au/search/name/Charles Zworestine/](https://directory.westernsydney.edu.au/search/name/Charles%20Zworestine/))

Description This unit is the first of two mathematics units to be completed by all students enrolled in an engineering degree during their first year of study. The content covers a number of topics that underpin the later-stage engineering mathematics units. The subject matter includes: differential and integral calculus of a single variable, complex numbers, aspects of matrix algebra, vectors, and some elementary statistics and probability theory. The aim of this unit is to introduce a number of key mathematical concepts needed in the study of Engineering, and to provide a solid foundation for the follow-on unit Mathematics for Engineers 2.

School Computer, Data & Math Sciences

Discipline Mathematics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Pre-requisite(s) Students enrolled in 3740 Bachelor of Engineering (Honours) or 3689 Bachelor of Engineering must have passed MATH 1021 Mathematics for Engineers Preliminary otherwise permission is required

Equivalent Subjects MATH 1007 Engineering Mathematics 1 LGYA 4425 Mathematical Methods A LGYA 4426 Mathematical Methods B MATH 1018 Mathematics for Engineers 1 (WSTC) MATH 1017 Mathematics for Engineers 1 (WSTC Assoc Deg)

Incompatible Subjects LGYA 4295 Mathematics for Business LGYA 4423 Concepts of Mathematics MATH 1014 Mathematics 1A MATH 1015 Mathematics 1B

Assumed Knowledge

HSC Mathematics achieved at Band 5 or 6. This is the minimum requirement.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Find solutions to problems involving logarithmic, exponential, inverse trigonometric, hyperbolic and inverse hyperbolic functions.
2. Apply correctly the techniques of both differential and integral calculus to solve problems that may involve transcendental functions.
3. Solve problems involving matrices and determinants.
4. Perform operations on vectors, both in 2-D and 3-D.
5. Define i and operate with complex numbers.
6. Define a random variable and find its probability distribution and calculate probabilities based on the Binomial distribution, the Poisson distribution and the Normal distribution.
7. Appreciate the relevance of mathematics in an engineering context.
8. Communicate mathematical ideas using common conventions.

Subject Content

1. Functions and Inverse Functions: Revision - inverse functions, logs, exponentials; trig and inverse trig functions; hyperbolic and inverse hyperbolic functions.
2. Differential Calculus: Revision- limits; continuity; definition of the first derivative, differentiation rules; implicit differentiation including inverse trig functions and inverse hyperbolic functions.
3. Applications of Differential Calculus: L'Hopital's Rule; properties of curves; differentials; related rates.
4. Matrix Algebra: Determinants; matrices; solution of simultaneous equations using matrices and determinants; Gaussian elimination; eigenvalues and eigenvectors.
5. Vectors: definition; basic operations; dot product; cross product; angle between two vectors; equations of lines and planes.
6. Complex Numbers: Basic operations; polar coordinates; Euler's formula; powers and roots of complex numbers.
7. Integration: Indefinite/definite integrals, standard integrals.
8. Techniques of Integration: Method of substitution; method of partial fractions; integration by parts, reduction formula; trig functions; inverse trig and inverse hyperbolic functions; completing the square.
9. Applications of Integration: Revision - areas and volumes; length of curves; mass and moments; power series.
10. Descriptive statistics: Revision - Measures of central tendency and dispersion, mean, mode, median, standard deviation, variance.
11. Random Variables and Probability Distributions: Random variables, discrete random variable distributions, the binomial distribution, the Poisson distribution; definition of a continuous random variable, probability distribution of a continuous random variable, and the Normal distribution.

Credit Points 10

Legacy Code 200238

Coordinator Wei Xing Zheng ([https://directory.westernsydney.edu.au/search/name/Wei Xing Zheng/](https://directory.westernsydney.edu.au/search/name/Wei%20Xing%20Zheng/))

Description This unit is the second of two mathematics units to be completed by students enrolled in an Engineering degree during their first year of study. The content covers a number of topics that build on the calculus knowledge from Mathematics for Engineers 1. The subject matter includes: ordinary differential equations, Laplace transforms and multi-variable calculus.

School Computer, Data & Math Sciences

Discipline Mathematics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Pre-requisite(s) MATH 1016

Equivalent Subjects LGYB 0454 Mathematics for Engineers 2 (WSTC)
MATH 1020 Mathematics for Engineers 2 (WSTC Assoc Deg)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise and solve various types of first and second order differential equations and some higher order ordinary differential equations
2. Set up a linear 2D system of differential equations and investigate its solution and the nature of its critical points
3. Apply Laplace transforms in solving problems
4. Use multivariable calculus techniques competently
5. Evaluate multiple (double and triple) integrals.

Subject Content

First Order Ordinary Differential Equations - Separable and linear equations and applications.

Second Order Linear ODEs- both homogeneous and non homogeneous with constant coefficients and applications, Euler Cauchy and Power series solutions.

Higher Order ODEs - homogeneous and non homogeneous with constant coefficients and Euler-Cauchy.

2D linear constant coefficient homogeneous systems, phase plane, critical points and criteria for critical points.

Laplace Transforms and solving ODEs using Laplace transforms.

Level curves and sketching regions in space

Limits and continuity of functions of two variables

Partial differentiation

Chain rule

Gradient vectors and directional derivatives

Equations of normal lines and tangent planes

Maxima, minima and saddle points

Lagrange multipliers

Double integrals in rectangular and polar coordinates and applications

Triple integrals in rectangular, cylindrical and spherical coordinates and applications.

1. First Order Ordinary Differential Equations - Separable and linear equations and applications.

2. Second Order Linear ODEs- both homogeneous and non homogeneous with constant coefficients and applications, Euler Cauchy and Power series solutions.

3. Higher Order ODEs - homogeneous and non homogeneous with constant coefficients and Euler-Cauchy.

4. 2D linear constant coefficient homogeneous systems, phase plane, critical points and criteria for critical points.

5. Laplace Transforms and solving ODEs using Laplace transforms.

6. Level curves and sketching regions in space

7. Limits and continuity of functions of two variables

8. Partial differentiation

9. Chain rule

10. Gradient vectors and directional derivatives

11. Equations of normal lines and tangent planes

12. Maxima, minima and saddle points

13. Lagrange multipliers

14. Double integrals in rectangular and polar coordinates and applications

15. Triple integrals in rectangular, cylindrical and spherical coordinates and applications

MATH 1020 Mathematics for Engineers 2 (WSTC AssocD)

Credit Points 10

Legacy Code 700102

Coordinator Zdenka Misanovic ([https://directory.westernsydney.edu.au/search/name/Zdenka Misanovic/](https://directory.westernsydney.edu.au/search/name/Zdenka%20Misanovic/))

Description The content of this unit covers a number of topics that build on the student's calculus knowledge from Mathematics for Engineers 1. The subject matter includes: ordinary differential equations, Laplace transforms and multi-variable calculus. Offerings of alternate units are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate unit.

School Eng, Design & Built Env

Discipline Mathematics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Pre-requisite(s) MATH 1017

Equivalent Subjects MATH 1019 - Mathematics for Engineers 2 LGYB 0454 - Mathematics for Engineers 2 (WSTC)

Restrictions Students must be enrolled at Western Sydney University, The College in 7022 Associate Degree in Engineering

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise and solve various types of first and second order differential equations and some higher order ordinary differential equations.
2. Set up a linear 2D system of differential equations and investigate its solution and the nature of its critical points.
3. Apply Laplace transforms in solving problems.
4. Use multivariable calculus techniques competently.
5. Evaluate multiple (double and triple) integrals.
6. Use mathematical reasoning to solve problems and communicate mathematical ideas using standard practices.

Subject Content

1. First Order Ordinary Differential Equations (O.D.E.) ? separable and linear equations and applicat

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
5 Online quizzes. Each minutes quiz is worth 3%	Approx. 30	15	N	Individual
Intra-session exam	90 minutes	25	N	Individual

4 Online quizzes each quiz is worth 5%

Approx 30 minutes	20	N	Individual
End of Session exam (in parts). Part 1 Written Numerical Problem Solving Part 2: Viva Voce	Part 1: 2 hours +30 minutes for submission (20%) Part 2: Viva Voce 20 minutes per student (20%)	40	Y Individual

MATH 1021 Mathematics for Engineers Preliminary

Credit Points 10

Legacy Code 300743

Coordinator Donald Shearman ([https://directory.westernsydney.edu.au/search/name/Donald Shearman/](https://directory.westernsydney.edu.au/search/name/Donald%20Shearman/))

Description This unit is specifically designed for students enrolling in the Bachelor of Engineering (Honours) and Bachelor of Engineering Science degree courses, who do not have a mathematical background in differential and integral calculus. The content of the unit consists of topics in arithmetic and algebra, trigonometry and trigonometric functions, logarithmic and exponential functions, differential and integral calculus.

School Computer, Data & Math Sciences

Discipline Mathematics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects MATH 1023 - Mathematics for Engineers Preliminary (WSTC) MATH 1022 - Mathematics for Engineers Preliminary (WSTC Assoc Deg)

Incompatible Subjects LGYA 4425 - Mathematical Methods A MATH 1011 - Fundamentals of Mathematics MATH 1016 - Mathematics for Engineers 1 MATH 1018 - Mathematics for Engineers 1 (WSTC)

Restrictions All students entering the Bachelor of Engineering (Honours) and Bachelor of Engineering Science will be enrolled in this subject. Students from the Bachelor of Engineering (Honours) program who have sufficient background knowledge in mathematics may attempt a readiness test to allow them to move directly to Mathematics for Engineers 1 if they pass this test.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Perform arithmetic operations and manipulate algebraic symbols as required in solving mathematical problems set in an engineering context
2. Solve mathematical problems using trigonometry, logarithmic and exponential functions
3. Apply correctly the techniques of both differential and integral calculus to solve problems that may involve transcendental functions.
4. Communicate mathematical ideas using standard practices

Subject Content

1. Arithmetic and Algebra: Rational and irrational numbers, indices, manipulation of algebraic expressions, factorisation, linear equations and quadratic expressions, simultaneous equations.
2. Relations and Functions: Domain and range, linear functions, quadratic functions, roots of quadratic equations
3. Logarithmic and Exponential Functions: Definition and properties of exponentials, graphing exponentials, differentiation and integration of exponentials, exponential growth and decay. Definition and properties of logarithms, graphing logarithms, differentiation and integration of logarithms.
4. Trigonometry: Trigonometric ratios, exact ratios, Sine and Cosine rules, reciprocal ratios, angles of any magnitude
5. Trigonometric Functions: Radian measure, graphing, properties of functions, differentiation, integration
6. Further Trigonometric Functions: Applied trigonometry, sums and differences of angles, equation solving, general solutions to trigonometric equations.
7. Inverse Functions and Inverse Trigonometric Functions: $y = \log_a x$ and $y = a^x$ as inverse functions, inverse trigonometric functions, differentiation and integration of inverse functions.
8. Differentiation: Limits and continuity - the derivative from first principles; differentiation formulae; implicit differentiation, tangents and normals to curves, stationary points, higher order derivatives, curve sketching, problems involving maxima and minima, differentiation of trigonometric functions, logarithmic and exponential functions, and inverse trigonometric functions
9. Integration: Primitive functions, definite integrals, areas between curves; integration of trigonometric functions, logarithmic and exponential functions, and inverse trigonometric functions.
8. Differentiation: Limits and continuity; the derivative from first principles; differentiation formulae; implicit differentiation, tangents and normals to curves, stationary points, higher order derivatives, curve sketching, problems involving maxima and minima, differentiation of trigonometric functions, logarithmic and exponential functions, and inverse trigonometric functions
9. Integration: Primitive functions, definite integrals, areas between curves; integration of trigonometric functions, logarithmic and exponential functions, and inverse trigonometric functions

MATH 1026 Quantitative Thinking

Credit Points 10

Legacy Code 300831

Coordinator Patrick O'Doherty ([https://directory.westernsydney.edu.au/search/name/Patrick ODoherty/](https://directory.westernsydney.edu.au/search/name/Patrick%20ODoherty/))

Description This level 1 unit develops the quantitative skills that underpin many fields of study in the sciences. The content covered includes basic algebra, functions, graphs, equations, linear and quadratic, introductory probability and descriptive statistics. These mathematical/statistical concepts will be revised and developed using scientific concepts such as molarity and dilution, optical density, population growth, and predator-prey models. In all aspects of this unit, students will be developing and using critical thinking skills to solve mathematical/statistical problems set in a scientific context.

School Computer, Data & Math Sciences

Discipline Mathematics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects MATH 1011 - Fundamentals of Mathematics
MATH 1027 Quantitative Thinking (WSTC)

Restrictions Students may complete the three subjects Quantitative Thinking, Analysis of Change and Mathematics 1A in the following order: 300831 Quantitative Thinking, 300830 Analysis of Change, 300672 Mathematics 1A. This means that students may complete 300831 before attempting 300830, but not after. 300830 and 300831 may be attempted before 300672, but not after. Students may not enrol in 300831 and 300830 or 300831 and 300672 or 300830 and 300672 in the same teaching session. Students enrolled in the Bachelor of Engineering (Honours), Bachelor of Engineering or Bachelor of Engineering Science may not enrol in any of the subjects 300830, 300831 or 300672.

Assumed Knowledge

Basic competence in algebraic manipulation and some familiarity with elementary probability and statistical concepts.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Manipulate algebraic and numeric expressions.
2. Recognise and draw graphs representing linear, quadratic, logarithmic and exponential functions.
3. Solve linear equations, and quadratic equations.
4. Use modelling techniques to represent basic biological systems.
5. Describe data in both numerical and graphical forms.
6. Communicate mathematical and statistical ideas using standard practices.
7. Employ critical thinking skills to solve mathematical and statistical problems set in a scientific context.

Subject Content

- Critical Thinking Skills: Problem-solving strategies; Inductive and Deductive reasoning.
- Numeracy and Calculation: Fractions; Index rules; SI units; Scientific notation; Rounding and estimation; Significant figures; Accuracy and precision; Using a calculator.
- Basic Algebra Review: Substitution in formulae; Rearranging formulae; Proportional reasoning.
- Interpretation: functions; graphs - linear, parabola, logarithmic, exponential; linear equations, quadratic equations.
- Uncertainty and Probability: introductory probability; basic statistics; Descriptive statistics; Random variables and probability distributions; the Normal distribution; treatment and assessment of errors; introductory hypothesis testing; introductory I

MATH 1029 Statistical Decision Making (WSTC)

Credit Points 10

Legacy Code 700041

Coordinator Michael CASEY ([https://directory.westernsydney.edu.au/search/name/Michael CASEY/](https://directory.westernsydney.edu.au/search/name/Michael%20CASEY/))

Description Statistical Decision Making introduces students to various statistical techniques supporting the study of computing and science. Presentation of the content will emphasise the correct principles and procedures for collecting and analysing scientific data, using information and communication technologies. Topics include

describing different sets of data, probability distributions, statistical inference and simple linear regression and correlation.

School Computer, Data & Math Sciences

MATH 1030 Statistics for Business

Credit Points 10

Legacy Code 200032

Coordinator Neil Hopkins ([https://directory.westernsydney.edu.au/search/name/Neil Hopkins/](https://directory.westernsydney.edu.au/search/name/Neil%20Hopkins/))

Description Statistics for Business introduces the basic concepts and techniques of statistics that are particularly relevant to problem solving in business. It also provides a sound base for more advanced study in statistics and forecasting in subsequent sessions. Topics include: presentation of data; descriptive statistics; the role of uncertainty in business decision making; hypothesis testing; and basic forecasting.

Assumed Knowledge

HSC Mathematics/Mathematics Extension 1 is desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. organise and summarise data numerically
2. recognize the foundation behind inferential statistics
3. identify the underlying assumptions associated with each statistical technique and interpret the results
4. formulate economic and financial hypotheses into statistically testable forms
5. manipulate, analyse and graph data using Excel
6. employ the appropriate statistical methods and techniques in given situations

Subject Content

Data presentation and descriptive statistics

Elementary probability

Random variables and probability distributions

Normal distributions and sampling distributions

Parameter estimation and hypothesis testing - single population

Parameter estimation and hypothesis testing - two populations

Simple linear regression analysis and correlation

Analysis of categorical data

Coordinator Stephen Weissenhofer ([https://directory.westernsydney.edu.au/search/name/Stephen Weissenhofer/](https://directory.westernsydney.edu.au/search/name/Stephen%20Weissenhofer/))

Description This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This unit provides foundational knowledge in key mathematical concepts which are essential for other mathematics units in engineering degrees. The subject matter includes: differential and integral calculus of a single variable, complex numbers, aspects of matrix algebra, vectors, and some elementary statistics and probability theory. In applying maths concepts to problems, students develop analytical thinking and problem solving skills, as well as communication skills to present clear and logical arguments. Students are encouraged to be independent and reflective learners in completing tutorial problems and online assessments.

Legacy Code 301337

Coordinator Stephen Weissenhofer ([https://directory.westernsydney.edu.au/search/name/Stephen Weissenhofer/](https://directory.westernsydney.edu.au/search/name/Stephen%20Weissenhofer/))

Description This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This unit covers a number of topics that build on calculus knowledge from Mathematics for Engineers 1 (Advanced). Calculus is essential for engineering as it involves studying how things change over small intervals of time and allows for modelling such changes. Topics include ordinary differential equations, Laplace transforms and multi-variable calculus. In applying mathematical concepts to problems, students develop analytical thinking and problem solving skills, as well as communication skills to present clear and logical arguments. Students are encouraged to be independent and reflective learners in completing tutorial problems and online assessments.

Level Undergraduate Level 2 subject

Pre-requisite(s) MATH 1015

Equivalent Subjects LGYA 3785 - Advanced Calculus LGYA 3865 - Mathematics 4 LGYB 9666 - Mathematics 21

Incompatible Subjects MATH 1019 - Mathematics for Engineers 2

Restrictions Students enrolled in Bachelor of Engineering, Bachelor of Engineering (Honours) or Bachelor of Engineering Science may not enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. tackle and solve calculus problems in the multi-variable context
2. apply multi-variable calculus to practical situations
3. perform vector operations and apply to solving geometric problems
4. recognise continuous multi-variable functions
5. calculate limits of multi-variable functions
6. compute directional derivatives, partial derivatives, and gradients
7. find and classify critical points of differentiable multi-variable real valued functions
8. perform multi-variable integration and apply various techniques such as change of variables
9. apply integration to calculating arc lengths, surface areas, and volumes
10. recognise vector fields such as conservative vector fields
11. apply Fundamental Theorem and Green's Theorem to calculating line integrals and/or double integrals

Subject Content

multi-variable differential calculus: functions of several variables and their graphs
 continuity, limits, directional derivatives, partial derivatives and vector-valued functions
 chain rule, level sets, gradient, extreme values, Lagrange multiplier methods
 multivariable integral calculus: multiple integration and iterated integrals, change of order
 curvilinear coordinate systems
 properties of vectors and vector fields
 vector differentiation
 gradient, divergence and curl of a vector
 line, surface and volume integrals
 Green's theorem in the plane
 theorems of Gauss and Stokes

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Report	10 hours	30	N	Individual
Intra-session Exam	1 hour	20	N	Individual
Final Exam	2 hours	50	N	Individual

MATH 2003 Differential Equations

Credit Points 10

Legacy Code 200030

Coordinator Alexander Lee ([https://directory.westernsydney.edu.au/search/name/Alexander Lee/](https://directory.westernsydney.edu.au/search/name/Alexander%20Lee/))

Description Differential equations arise naturally both in abstract mathematics and in the study of many phenomena. This subject provides the theory of ordinary differential equations and an introduction to partial differential equations together with methods of solution. Examples are drawn from a wide range of biological, chemical, physical and economic applications.

School Computer, Data & Math Sciences

Discipline Mathematics

Student Contribution Band HECS Band 1 10cp

Pre-requisite(s) MATH1015 - Mathematics 1B

Incompatible Subjects MATH 1019 - Mathematics for Engineers 2

Restrictions

Students enrolled in Bachelor of Engineering, Bachelor of Engineering (Honours) or Bachelor of Engineering Science may not enrol in this subject.

Assumed Knowledge

None

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Classify and solve various types of first order ordinary differential equations
2. Classify and solve various types of second order ordinary differential equations
3. Apply Laplace transforms to solve problems including second order ordinary differential equations
4. Classify and solve various types of basic partial differential equations.

Subject Content

- Review of first order differential equations
- homogeneous linear second order equations
- reducible second order equations
- linear second order equations with constant coefficients
- differential operators
- method of undetermined coefficients
- variation of parameters
- equations with variable coefficients
- power series solutions
- Laplace transforms
- simple partial differential equations and separation of Variables, eg diffusion, wave and Laplace equations
- application of Fourier series to partial differential equations

MATH 2004 Discrete Structures and Complexity

Credit Points 10

Legacy Code 300699

Coordinator Volker Gebhardt ([https://directory.westernsydney.edu.au/search/name/Volker Gebhardt/](https://directory.westernsydney.edu.au/search/name/Volker%20Gebhardt/))

Description The fact that computers work at all in the way they do is due to the formal mathematical structure that is used in their design. The same holds for establishing important matters such as the reliability of our computer networks. This unit presents, in their computing context, a range of mathematical concepts that are essential for understanding a number of topics concerning computers: the ways they work, they ways they interact, and the ways we interact with them.

School Computer, Data & Math Sciences

Discipline Mathematics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) MATH 1028

Incompatible Subjects MATH 1006 - Discrete Mathematics

Restrictions Students must be enrolled in 3639 Bachelor of Information and Communications Technology or the following double degrees 3654, 3655, 3656, 3657, 3661

Assumed Knowledge

Basic programming such as that in 300580 - Programming Fundamentals.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Appreciate some of the roles that mathematics plays in computing;
2. Recognise a function, decide whether a given function is one-to-one or onto, and perform elementary manipulations with functions;
3. Decide the truth of logical statements involving connectives, and simplify logical expressions using the laws of logic and truth tables;
4. Describe the connections between basic set operations and logic connectives;
5. Describe simple and directed graphs, use concepts such as "path", and find minimal spanning trees
6. Understand the differences between logarithmic, linear, quadratic and exponential algorithms and perform basic complexity analysis on algorithms such as simple sorting algorithms.
7. Appreciate the relevance of the content to computing.

Subject Content

The content of the subject is driven by several computing questions, broken down into modules. Each module consists of an issue in computing that requires certain mathematics to address. The modules, and the mathematics they address, are:

Module 1: Functions, what is and isn't a function, one-to-one and onto functions, representing functions.

Module 2: The way computers "think": logic, and how this relates to sets.

Module 3: Networks and their structure: graphs, spanning trees and matrices.

Module 4: Algorithm efficiency: the analysis of some simple algorithms. Comparisons of various algorithms, why complexity is important. Revision of relevant counting material.

Teaching Periods

MATH 2006 Experimental Design and Analysis

Credit Points 10

Legacy Code 100013

Coordinator Michael Tyler ([https://directory.westernsydney.edu.au/search/name/Michael Tyler/](https://directory.westernsydney.edu.au/search/name/Michael%20Tyler/))

Description This unit is driven by the scientific method with a focus on experimental design and related data analysis. Research design and methodology and ethical issues, statistical concepts and techniques, computer analysis of data, and communicating research findings are all features of this unit, which build on the content in its prerequisite.

School Psychology

Discipline Statistics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) For students NOT enrolled in programs 1630 Graduate Diploma in Psychological Studies 1796 Graduate Diploma in Psychology and 1837 Bachelor of Cyber Security and Behaviour - BEHV 1016

Restrictions

Note that only students enrolled at WSU Online may register in the WSU Online subjects offered at that location.

This pre-requisite will not apply to students enrolled in courses 1630 Graduate Diploma in Psychological Studies, 1796 Graduate Diploma in Psychology and 1837 Bachelor of Cyber Security and Behaviour.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Express understanding of the scientific method, and an appreciation of its role in developing psychological knowledge.
2. Demonstrate knowledge of experimental ethics and experimental research methodology and apply this methodology to experimental data.
3. Contrast basic experimental statistical techniques with emphasis on computerised analysis methods (SPSS).
4. Appraise the relationship between experimental design, collected data and the appropriate statistical technique.

Subject Content

Psychology as science. The role of research in psychology. Making research and ethical decisions. Reviewing the literature, forming research questions and hypotheses, operationalising constructs, choosing variables. Experimental and quasi-experimental designs. Between and within-subjects experimental designs. Reporting experimental results. The publication manual of the APA.

Statistical concepts: Variance, the normal distribution, levels of measurement, descriptive and inferential statistics.

Descriptive statistics: Frequencies, graphical presentation, measures of central tendency, measures of variability, percentiles, z-scores.

Inferential statistics: Populations and samples, sampling distributions, standard error, confidence intervals, significance, alpha, power.

Parametric versus non-parametric statistics, assumptions.

The t-tests, analysis of variance (ANOVA) and their non-parametric equivalents.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Report	1,000 words	30	N	Individual
Portfolio	1 weekly exercise (= 500 words)	15	N	Individual
Quiz	30 questions	15	N	Individual
Final Exam	1 hour	40	N	Individual

Introduction to Data Science

Credit Points 10

Legacy Code 301033

Coordinator Liwan Liyanage ([https://directory.westernsydney.edu.au/search/name/Liwan Liyanage/](https://directory.westernsydney.edu.au/search/name/Liwan+Liyanage/))

Description Analysis of data is essential for scientific investigation, modelling processes and predicting future events. Data Science is the investigation of the tools required that allow us to perform this modelling and prediction. The increase in accessible data over the past few decades has promoted the use of Data Science, making it a desired skill in many professions. In this unit we further investigate the methods of regression, clustering and classification that form the basis of a data scientist's toolbox.

MATH 2010 Linear Algebra

Credit Points 10

Legacy Code 200027

Coordinator Shatha Aziz ([https://directory.westernsydney.edu.au/search/name/Shatha Aziz/](https://directory.westernsydney.edu.au/search/name/Shatha+Aziz/))

Description The objective of this unit is to present the main fundamentals of linear algebra and includes such topics as solving systems of linear equations, matrix algebra, determinants, eigenvalues and eigenvectors, Euclidean vector spaces, general vector spaces, inner product spaces and linear transformations.

School Computer, Data & Math Sciences

Discipline Mathematics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Assumed Knowledge

Solving systems of equations with two and three unknowns, basic matrix operations, including multiplication.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Implement Gaussian elimination to solve systems of linear equations.
2. Use and apply vector operations such as the dot product, and concepts such as orthogonality, span, and linear dependence of vectors.
3. Use matrix operations, including matrix multiplication, matrix inversion and LU factorisation.
4. Use and apply concepts related to vector spaces, subspaces and the connection between dimension, linear independence, spanning sets, and basis.
5. Use and apply concepts related to basic linear transformations of the plane, general linear transformations, and the basic notion of kernel.
6. Evaluate determinants using a range of techniques.
7. Be able to compute the eigenvalues and eigenvectors of a linear transformation.
8. Use the concept of orthogonality and orthogonal matrices, including orthogonal projections and the Gram-Schmidt process.

Subject Content

Linear Equations: Introduction to Linear Systems, Gaussian Elimination, applications.

Matrices: matrix operations and rules of arithmetic, elementary matrices, inverses and their calculation, applications.

Determinants: Determinant function, properties, cofactor expansion, Cramer's rule.

Eigenvalues and Eigenvectors: eigenvalues and eigenvectors, diagonalization, applications.

Euclidean Vector Spaces: Vectors in 2 and 3 space, geometric and algebraic interpretation, norms, dot product, cross product, lines and planes. Generalization to Euclidean n-Space, linear transformations between Euclidean vector spaces.

General Vector Spaces: Real vector spaces, subspaces, and concepts of span, linear independence, basis, and dimension.

Inner Product Spaces: Inner product, Cauchy-Schwarz inequality, angle between vectors, orthogonality, Gram-Schmidt Process, least squares, singular value decomposition.

General Linear Transformations: matrix and linear transformations, kernel and range, matrix of linear transformations.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Participation	Weekly Problem Sets, 3 hours in length	6	N	Individual
Numerical Problem Solving	50-minute closed book test	22	N	Individual
Numerical Problem Solving	50-minute closed book test	22	N	Individual
Final Exam	Three-hour closed book examination	50	N	Individual

MATH 2011 Making Sense of Data

Credit Points 10

Legacy Code 301032

Coordinator Neil Hopkins ([https://directory.westernsydney.edu.au/search/name/Neil Hopkins/](https://directory.westernsydney.edu.au/search/name/Neil%20Hopkins/))

Description The unit builds on the basic statistical concepts introduced in first year, and also prepares students for broader application of statistics for those majoring in science or business. Topics include hypothesis testing; analysis of categorical data; analysis of variance; non-parametric methods; re-sampling (cross validation/bootstrapping); Introduction to visual data analysis; simple Multivariate statistics and sampling and design.

School Computer, Data & Math Sciences

Discipline Statistics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) MATH 1028 OR
MATH 1003 OR
MATH 1030

Assumed Knowledge

Basic Statistics.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Apply the fundamentals of statistical hypothesis testing;
- Use analysis of variance methods to solve practical problems;
- Utilize re-sampling methods to analyse data (cross validation / bootstrapping);
- Employ statistical analysis of data using simple multivariate statistics;
- Introduce the area of visual data analysis;
- Implement the above statistical methods using R.

Subject Content

- Hypothesis Testing
- Sampling and Design
- Nonparametric Methods
- Simple Multivariate Statistics
- Re-Sampling
- Introduction to visual data analysis

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Mid semester Test	60 minutes (Including upload time)	20	N	Individual

Computing Test on R	60 minutes (including upload time)	20	N	Individual
Group Assignment (incl. Presentation)	To consist of 5 or so pages of text and computer output, equivalent to approx. 2000 words as a poster presentation	20	N	Group
Final Examination	2 hours	40	N	Individual

MATH 2012 Mathematics for Engineers 3

Credit Points 10

Legacy Code 200242

Coordinator Volker Gebhardt ([https://directory.westernsydney.edu.au/search/name/Volker Gebhardt/](https://directory.westernsydney.edu.au/search/name/Volker%20Gebhardt/))

Description Students enrolled in Bachelor of Engineering who are yet to successfully complete 200242 Mathematics for Engineers 3, are to seek advice from Dr Jamal Rizk to enable them to complete the course. This unit is a core unit in the Computer, Electrical, or Telecommunications key programmes of the Bachelor of Engineering course. It builds on the first two mathematics units in that course and provides mathematical tools and techniques needed for the above key programmes. The unit covers topics from advanced calculus including vector calculus, complex analysis, Fourier series, heat and wave equations, Fourier integrals and transforms; discrete mathematics including logic and set theory; random variables and random processes including mean, correlation and covariance functions, ergodicity, ensemble averages, and Gaussian processes.

School Computer, Data & Math Sciences

Discipline Mathematics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) MATH 1008 OR MATH 1019

Equivalent Subjects MATH 2005 - Engineering Mathematics 3

Restrictions This subject is designed to meet the requirements of students enrolled in an engineering degree. There are other mathematics subjects more suitable for students from other disciplines.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. decide the truth of logical statements involving connectives, and simplify logical expressions using the laws of logic and truth tables; find and use normal forms of Boolean expressions, and simplify a digital circuit using Boolean expressions;
2. perform simple operations on sets, find Cartesian products of sets, use Venn diagrams to illustrate relationships between sets, and solve simple counting problems;
3. calculate mean, variance and related statistical descriptors of random variables and random processes;
4. recognise stationary and ergodic processes, and the significance of these;
5. solve problems in vector calculus, including the calculation of line integrals and surface integrals;
6. solve problems involving complex functions and evaluate a complex integral;
7. calculate the Fourier representation for a given function and apply it to the solution of heat and wave equations;

Subject Content

Discrete Mathematics: Logic; set theory; counting.

Random Variables: Notion of a random variable; statistical descriptors such as mean and variance of a random variable.

Random Processes: Notion of a random process; stationary random processes; description of the random process in terms of mean, correlation and covariance functions; ergodicity; ensemble averages; Gaussian processes.

Vector Calculus: Parametric representation of curves in 3D; line integrals; work; circulation; flux; conservative fields; Green's theorem in the plane; surface integrals; Stokes' theorem; divergence theorem.

Complex Analysis: Functions; limits; differentiation; analytic functions; Cauchy-Riemann equations; line integrals in the complex plane; Cauchy integral theorem and Cauchy integral formula.

Fourier Analysis: Fourier Series; Fourier Integrals; Fourier Transforms. Partial Differential Equations: Basic concepts; wave, heat and Laplace equations.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	2 x 15 minutes, each 7.5%	15	N	Not Known

Intra-session Exam	55 minutes	30	N	Not Known
Final Exam	2 hours	50	N	Not Known

MATH 2013 Object Oriented Analysis (WSTC)

Credit Points 10

Legacy Code 700039

Coordinator Buddhima De Silva ([https://directory.westernsydney.edu.au/search/name/Buddhima De Silva/](https://directory.westernsydney.edu.au/search/name/Buddhima%20De%20Silva/))

Description The core strength of this unit is to analyse and model business objectives and critical requirements of software systems to be developed using object-oriented (OO) approaches. The system analysis is taken to greater depths within the context of object orientation. The Unified Modelling Language version 2.0 (notably use cases, activity diagrams, class diagrams and sequence diagrams) is used as a modelling standard for creating OO models in the problem space. The unit also covers the rational unified process methodology and applications of design patterns for software development through practical case studies.

School Computer, Data & Math Sciences

Discipline Systems Analysis and Design

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) Students enrolled in 7004 Diploma in Information and Communications Technology Fast Track 7005 Diploma in Information and Communications Technology 7067 Diploma in Information and Communications Technology Extended 7134 Diploma in Information and Communications Technology Extended – ICT 7138 Diploma in Information and Communications Technology Extended - ICT 7139 Diploma in Information and Communications Technology Extended 7140 Diploma in Information and Communications Technology Extended - Information Systems 7163 Diploma in Information and Communications Technology 6035 Diploma Bachelor of Information and Communications Technology 6036 Diploma in Information and Communications Technology Bachelor of Information Systems 6039 Diploma Bachelor of Information and Communications Technology and 6040 Diploma in Information and Communications Technology Bachelor of Information Systems must pass INFS 1007 Systems Analysis and Design before enrolling in this unit

Equivalent Subjects INFS 2006 Object Oriented Analysis

Restrictions Students must be enrolled at Western Sydney University, The College. Students enrolled in Extended Diploma programs must have passed 40 credit points of preparatory subjects in order to enrol in this subject. Students enrolled in the combined Diploma/Bachelor programs listed below must pass all College Preparatory subjects listed in the program structure before progressing to the Year 2 subjects.

Assumed Knowledge

General understanding of what an information system is and how information systems development is undertaken and Introductory knowledge about system analysis and design, including
- basic problem solving experience in computerised information systems

- ability to derive systems requirements from problem definitions
- ability to produce system models using process, data, object and network modelling.
- understanding design and implementation issues include, (but may not be limited to), elementary database design, input, output and user interface design and prototyping.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the theoretical fundamentals underpinning Object Oriented Analysis.
2. Identify Unified Modelling Language (UML) of the Object Management Group (OGM) for analysing software requirements,
3. Outline an object oriented lifecycle and explain the process of object oriented analysis, especially within the context of iterative and incremental nature of the process,
4. Apply the iterative and adaptable process frame work of RUP in software development
5. Construct well-documented UML-based artefacts from the early phases of the development process for the case study,
6. Construct the Model of the Problem Space based on the analysis in an industrial CASE tool,
7. Apply team work skills in a small development team, including: distributing the development workload, resolving disputes, running meetings, and taking minutes,
8. Identify and create operational (non functional) requirements of a system including performance and security,
9. Develop a report based on verbal and written instructions about the performance of software development tasks and associated administrative duties,
10. Illustrate quality assurance, quality control and user-expectations via reports and theoretical explanation.
11. Explore possibilities of applying design patterns in software design.

Subject Content

1. The concepts of Object Orientation including the fundamentals, processes and application of the concepts to practical modelling and object-oriented analysis techniques,
2. Three modelling spaces: Problem, Solution and Background; Roles in Requirement Analysis,
3. Critical Requirement Analysis and Business Evaluation to arrive at high-level requirements and their prioritisation,
4. Package Diagrams and high-level slicing of packages as sub-systems,
5. Four phases of Rational Unified Process (RUP): Inception, Elaboration, Construction and Transition
6. Documenting Actors and Use Cases,
7. Introduction to Use Case Diagrams, Use Case Notations, Relationships, Analysis & Testing,
8. Activity Diagrams as mechanisms to document the flow of the system/use case,
9. Class Notations and definition of a class including attributes and operations,
10. Documenting Class Diagram and Relationships between various classes such as Association and Inheritance,
11. Documenting Sequence Diagrams and the persistence design with Class and Sequence Diagrams,
12. Major Ingredients and Creation of State Chart Diagrams,
13. Prototypes and Operational (Non-Functional) Requirements including Performance, Scalability, Security & Volume,
14. Quality assurance, management and testing aspects of a system,
15. Emerging technologies and design.

16. Introduction to Creational, Structural and Behavioural design patterns.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Participation	10 marked sessions x 1.0% each Approx. 2 hours each	10	N	Individual
Quiz	90 mins	15	N	Individual

MATH 2014 Visual Analytics

Credit Points 10

Legacy Code 301109

Coordinator Zhonglin Qu ([https://directory.westernsydney.edu.au/search/name/Zhonglin Qu/](https://directory.westernsydney.edu.au/search/name/Zhonglin%20Qu/))

Description This unit introduces the fundamentals and technologies of visual analytics to understand big data. It covers major concepts of information visualisation, human computer perception and methods for visual data analysis. Students will learn knowledge and skills for identifying suitable visual analytics techniques, methods and tools for handling various data sets and applications. The unit provides students with opportunities to explore novel research in visual analytics and visualisation.

School Computer, Data & Math Sciences

Discipline Statistics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Assumed Knowledge

Familiarity with computer software programs, such as Microsoft Office.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Practical: Tutorial Labs -10 marked sessions (2% each)	2 hours for each session	20	N	Individual
Applied Project: (Individual) The students are required to develop an effective visualisation for relational data using existing tools or software	20-25 hours	30	N	Individual
Applied Project: (Group) The students are required to develop an effective visual analytics work for multi-dimensional data using existing tools or software.	20-25 hours	30	N	Group
Intra-session Exam: Closed book, multiple choice	1 hour	20	N	Individual

Teaching Periods

MATH 3001 Abstract Algebra

Credit Points 10

Legacy Code 200193

Coordinator Roozbeh Hazrat ([https://directory.westernsydney.edu.au/search/name/Roozbeh Hazrat/](https://directory.westernsydney.edu.au/search/name/Roozbeh%20Hazrat/))

Description This unit develops algebraic thought to a high level. The abstract concepts involved in the main topics (group theory and number theory) have many applications in science and technology, and the unit includes an application to cryptography.

School Computer, Data & Math Sciences

Discipline Mathematical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MATH 1006

Equivalent Subjects LGYA 3893 - Advanced Algebra LGYA 3789 - Algebra 3

Learning Outcomes

On successful completion of this subject, students should be able to:

1. recognise, describe and manipulate the basic structures in abstract algebra and number theory; namely, groups, rings and integral domains
2. explain the links between these structures and the symmetries of natural objects
3. apply concepts from group theory and number theory to real life situations, such as RSA cryptography
4. demonstrate proficiency in both spoken and written mathematical communications, particularly constructing and communicating proofs

Subject Content

1. Number Theory - Divisibility, Euclid's algorithm - Prime numbers - Fundamental Theorem of Arithmetic - Theorems of Fermat and Euler - Congruences - Modular arithmetic - Applications to Cryptography: the RSA cryptosystem

2. Ring Theory - Abstract rings and concrete examples - Integral domains and fields - Rings of polynomials - Polynomial congruences and quotients - Fundamental Theorem of Algebra

3. Group Theory - Abstract groups - Subgroups - Direct products - Isomorphism - Permutations, the Symmetric group - Rubik's cube - Cayley's Theorem - Group of units of a ring - Cosets, Lagrange's Theorem, Quotient groups

Number Theory - Divisibility, Euclid's algorithm - Prime numbers - Fundamental Theorem of Arithmetic - Theorems of Fermat and Euler - Congruences - Modular arithmetic - Applications to Cryptography: the RSA cryptosystem

MATH 3003 Analysis

Credit Points 10

Legacy Code 200023

Coordinator Rehez Ahlip ([https://directory.westernsydney.edu.au/search/name/Rehez Ahlip/](https://directory.westernsydney.edu.au/search/name/Rehez%20Ahlip/))

Description Analysis provides the theoretical basis of real and complex numbers, including differentiation and integration. Topics include: field axioms and completeness, sequences, series, convergence, compactness, continuity, differentiability, integrability, and related theorems in both the real and complex number systems.

School Computer, Data & Math Sciences

Discipline Mathematics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MATH 2001

Equivalent Subjects LGYA 3794 - Advanced Mathematical Topics

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the difference between pointwise and uniform convergence
2. Test for convergence sequences and uniform convergence of series of functions on a given interval
3. Apply interchange theorems for uniformly convergent sequences and series
4. Explain the definition of the Riemann integral
5. Calculate upper and lower sums and integrals of simple functions
6. Prove and apply theorems concerning classes of integrable functions and integrability of sums and products
7. Find limits of sequences via the use of Riemann sums
8. Test for differentiability of a function of a complex variable using the Cauchy-Riemann equations
9. Explain what is meant by an analytic function
10. Apply the Cauchy-Riemann equations to harmonic functions
11. Parametrize a path and then to evaluate some complex integrals directly
12. Evaluate complex integrals by using results such as the Cauchy integral formulae and residue theorem

13. Work out Taylor and Laurent series for some of the simpler functions

Subject Content

- field axioms
- completeness
- limits
- compactness
- cauchy sequences
- uniform Continuity
- uniform convergence
- Continuity
- differentiability
- Rolle's theorem and mvt
- Riemann integral
- differentiation of complex functions
- cauchy-Riemann equations
- analytic functions
- contour integrals
- Cauchy's theorem
- Taylor and Laurent series
- residues
- evaluation of certain real integrals

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

MATH 3004 Discovery Project

Credit Points 10

Legacy Code 301111

Coordinator Rosalind Wang ([https://directory.westernsydney.edu.au/search/name/Rosalind Wang/](https://directory.westernsydney.edu.au/search/name/Rosalind%20Wang/))

Description In this unit students will gain experience in applying data science skills and using knowledge gained during their bachelor's course of their primary discipline. Students will carry out a real life project transforming data to knowledge under the supervision of an academic mentor. Students will develop a knowledge discovery project proposal and carry out a literature review highlighting the current status of the problem. Assisted by a mentor they will apply the data science skills learned through-out the degree and produce a final discovery project report and/or interactive project tool and give an oral presentation.

MATH 3005 Environmental Informatics

Credit Points 10

Legacy Code 301035

Coordinator Than Pe ([https://directory.westernsydney.edu.au/search/name/Than Pe/](https://directory.westernsydney.edu.au/search/name/Than%20Pe/))

Description Today, the environment is becoming more and more in the public eye. Methods of environmental monitoring and data analysis are an important source of information for science, business and government regulation. This unit aims to give students a good

introduction to environmental informatics and the analysis of spatio-temporal data.

School Computer, Data & Math Sciences

Discipline Statistics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MATH 1028 OR

MATH 1003 OR

MATH 1030

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design an environmental sampling program
2. Use and interpret control charts
3. Estimate and interpret Tolerance and Prediction Intervals
4. Use statistical software to conduct time series analyses
5. Use statistical software to analyse spatial data

Subject Content

1. Environmental Sampling
2. Prediction and Tolerance Intervals
3. Control Charts
4. Time Series - Trend and Autocorrelation
5. Autoregressive and Moving Average Process
6. Models for Spatial Data
7. Modelling Spatial Correlation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Weekly Test (Best 8 from 10)	15 mins for each of 10 weeks	24	N	Individual
Quizzes	3 quizzes of 30 minutes each	12	N	Individual
Computer based Assignment - Data Analysis task	To consist of 10 or so pages of text and computer output, equivalent to approx. 2000 words	14	N	Group
Lab based exam	One exam of 2 hours	50	N	Individual

MATH 3006 Mathematical Modelling

Credit Points 10

Legacy Code 200022

Coordinator Stephen Weissenhofer ([https://directory.westernsydney.edu.au/search/name/Stephen Weissenhofer/](https://directory.westernsydney.edu.au/search/name/Stephen%20Weissenhofer/))

Description Mathematical Modelling is about solving real world problems. The real world is a complicated place which we often need or want to understand better. One way to do this is to set up a mathematical model which we hope can provide insights, predictions and a greater understanding of a complex system. Selected real-world problems are approximated by mathematical models that are amenable to being written in terms of linear and non-linear equations or differential equations. Once equations are solved emphasis is placed on interpreting solutions, modifying models as required and using models for prediction.

School Computer, Data & Math Sciences

Discipline Statistics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MATH 2003

Assumed Knowledge

Matrix algebra and how to find eigenvalues and eigenvectors.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. formulate equations (both differential and non-differential) which describe selected common physical situations,
2. solve such equations analytically, where appropriate
3. apply computer packages to solve such equations
4. interpret the effects of altering parameters involved in a modelling situation
5. identify limitations of mathematical models proposed
6. evaluate the effectiveness of a model.

Subject Content

1. The modelling process
2. Modelling using proportionality and geometric similarity
3. Modelling discrete dynamical systems:

- modelling change with difference equations
 - approximating change with difference equations
 - solving difference equations
4. Modelling continuous dynamical systems:
- first and second order ordinary differential equations
 - higher order linear ordinary differential equations
 - systems of ordinary differential equations - nonlinear ordinary differential equations
5. Applications will be drawn from areas of biology, chemistry, physics, social sciences and economics.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Class Test 1: Covers weeks 1 to 6 of lecture material on the modelling process, modelling with difference equations, geometric similarity, and fitting models to data. Interpreting solutions and identifying limitations, suggesting improvements.	50 minutes	20	N	Individual
Class Test 2: Covers weeks 7 – 13 of the lecture material on modelling with differential equations, applied to arms race, population growth, managing prescription drug dosages, predator-prey models or other situations.	50 minutes	20	N	Individual
Final exam	3 hours	60	N	Individual

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Written project outline	12 - 15 pages	10	N	Both (Individual & Group)
Presentation of project outline (possibly by video-conferencing)	10 minutes	10	N	Both (Individual & Group)
Written project report	20 - 40 pages	45	N	Both (Individual & Group)
Presentation of project report (possibly by video-conferencing)	20 minutes	25	N	Both (Individual & Group)
Supervisor's assessment of the student's self-directed project work		10	N	Individual

Teaching Periods

MATH 3011 Probabilistic Models and Inference

Credit Points 10

Legacy Code 301250

Coordinator Oliver Obst (<https://directory.westernsydney.edu.au/search/name/Oliver Obst/>)

Description The unit provides students with an understanding of probabilistic models and inference. It covers model-based approaches for complex systems - from constructing these models to applying information to models. The models, which can be created manually and obtained by learning from data, will also be useful to make decisions under uncertainty. A variety of models and techniques will be discussed; examples include Monte Carlo Methods, Decision Theory, Bayesian networks, Markov networks, and the use of information theory.

School Computer, Data & Math Sciences

Discipline Statistics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Assumed Knowledge

Probability, Linear Algebra, Basic Programming.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Manually construct probabilistic models for specific data.
2. Automatically construct probabilistic models by learning from data.
3. Use the models to make decisions under uncertainty.
4. Accurately represent a probabilistic model using a graphical representation.

Subject Content

Network representation and graphical models

Probabilistic models and entropy

Inference in graphical models

Learning graphical models

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Teaching Periods

MATH 3012 Combinatorics

Credit Points 10

Legacy Code 301378

Coordinator Leanne Rylands ([https://directory.westernsydney.edu.au/search/name/Leanne Rylands/](https://directory.westernsydney.edu.au/search/name/Leanne%20Rylands/))

Description This unit builds upon the knowledge acquired in the prerequisite unit Discrete Mathematics and helps students to develop understanding and mathematical maturity. The unit covers more sophisticated counting techniques, additional concepts in graph theory, and it introduces coding theory. Many applications of these concepts are included, and some combinatorial algorithms are studied. The applications and techniques presented in the unit are used to model systems such as transport networks and social networks, and they have relevance for communication, computing, probability, statistics, and science, and for many everyday problems such as scheduling.

School Computer, Data & Math Sciences

Discipline Mathematics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MATH 1006 AND MATH 1015

Assumed Knowledge

Logic, proof techniques, counting techniques, graph theory, matrices.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply a variety of techniques to solve counting problems, including the calculation of various probabilities.
2. Apply concepts and algorithms from graph theory to solve problems.
3. Evaluate the use of coding theory for error detection and error correction.
4. Formulate proofs involving counting, graph theory and coding theory.
5. Communicate mathematical arguments effectively in written format.

Subject Content

- Revision of mathematical proof
- Counting techniques, including generating functions
- Applications of counting, including probability
- Graph theory and graph algorithms
- Applications of graph theory
- Introduction to coding theory and applications

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Numerical Problem Solving	1 40 minutes	15	N	Individual
Numerical Problem Solving	45 minutes	20	N	Individual
Numerical Problem Solving	45 minutes	20	N	Individual

Teaching Periods

MATH 3013 Fields and Equations

Credit Points 10

Legacy Code 301377

Coordinator Roozbeh Hazrat ([https://directory.westernsydney.edu.au/search/name/Roozbeh Hazrat/](https://directory.westernsydney.edu.au/search/name/Roozbeh%20Hazrat/))

Description This unit develops abstract algebraic thought to a higher level. The abstract concepts introduced in the unit, ring theory, field theory and algebraic equations, have many applications in science and technology. The theory of algebraic equations is the study of solutions of polynomial equations. Although the problem originates in explicit manipulations of polynomials, the modern (and far more powerful) treatment is in terms of field extensions. The unit is an introduction to ring theory and field theory; it includes applications to cryptography (RSA) and geometry (proving that it is impossible to trisect an arbitrary angle using only a straightedge and compass).

School Computer, Data & Math Sciences

Discipline Mathematics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MATH 3015

Assumed Knowledge

Basic notions in algebra, such as equivalence relations, groups, homomorphisms and isomorphisms.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply fundamental structures in abstract algebra and number theory: rings, integral domains, and fields.
2. Examine practical applications, such as RSA cryptography, based on abstract concepts from ring theory and number theory.
3. Formulate proofs involving rings, integral domains, and fields.
4. Communicate mathematical arguments effectively in both spoken and written format.

Subject Content

- Introduction to rings
- Ideals and factor rings
- Ring homomorphisms, ring isomorphisms, and related theorems
- Rings of integers and their congruences
- Polynomial rings and factorization of polynomials
- Fields and solutions to equations
- Extension of fields
- Application: RSA cryptography
- Application: Ruler and compass, 2000 years of impossible constructions

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	20 minutes	10	N	Individual
Quiz	20 minutes	10	N	Individual
Essay	3-6 pages	20	N	Individual
Presentation	15 minutes	10	N	Individual
Final Exam	2 hours	50	N	Individual

Teaching Periods

MATH 3014 Financial Mathematics

Credit Points 10

Legacy Code 301380

Coordinator Rehez Ahlip ([https://directory.westernsydney.edu.au/search/name/Rehez Ahlip/](https://directory.westernsydney.edu.au/search/name/Rehez%20Ahlip/))

Description This unit is an introduction to stochastic calculus and relevant simulation techniques applied to modern finance and the mathematical modelling of financial markets. The core topics developed in the unit are the Ito stochastic integral, Ito's formula, and basic stochastic differential equations, as well as computer simulation techniques with emphasis on Monte Carlo simulations. Some mathematical background is assumed, but the unit will cover any necessary material that is not contained in prerequisites units.

School Computer, Data & Math Sciences

Discipline Mathematics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MATH 1014 AND

MATH 1015 AND

MATH 2010 AND

MATH 2003

Assumed Knowledge

Calculus, Riemann integration, QR factorisation and generalised inverses of matrices, first and second order differential equations.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the concept of No Arbitrage and its consequences.
2. Apply the binomial model to price options on non-dividend stock (using computer software such as MATLAB or R), for instance by employing Monte Carlo techniques and control variates.
3. Apply key definitions and results on martingales and stochastic calculus to financial modelling.
4. Explain the solution to the Black-Scholes equation for European Call and Put Options, using the general solution of the initial value problem.
5. Deduce the bond pricing equation from the yield curve.

Subject Content

- Basic option theory
- Binomial model for stock options applied to derivatives
- Asset price random walk
- Monte Carlo simulation
- The Black-Scholes model
- Partial differential equations
- Black-Scholes formulae
- Variations on the Black-Scholes model
- Martingales
- Numerical methods
- Binomial approach to option pricing
- Put-Call parity

Teaching Periods

MATH 3015 Groups and Symmetry

Credit Points 10

Legacy Code 301376

Coordinator Roozbeh Hazrat ([https://directory.westernsydney.edu.au/search/name/Roozbeh Hazrat/](https://directory.westernsydney.edu.au/search/name/Roozbeh%20Hazrat/))

Description This unit develops abstract algebraic thinking to a higher level. The abstract concepts introduced in the unit, the theory of groups and abstract symmetry, have many applications in science and technology. Symmetry plays a role in many different contexts: in crystals, in visual arts, in music and in architecture, to name a few. Analysing and exploiting the symmetries of a particular problem often

is the first step towards finding a practical solution to the problem. Group theory is the study of symmetry. This unit develops the language of groups and techniques to understand the structure of groups.

School Computer, Data & Math Sciences

Discipline Mathematics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MATH 1006

Equivalent Subjects MATH 3001 Abstract Algebra

Assumed Knowledge

Logic, proof techniques: direct proof, proof by division into cases, proof by contradiction, proof by induction.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply fundamental structures in abstract algebra: groups, subgroups, and permutation groups.
2. Apply concepts from group theory to the study of the symmetry of objects, such as polygons.
3. Formulate proofs involving groups, subgroups, and permutation groups.
4. Communicate mathematical arguments effectively in both spoken and written format.

Subject Content

- Sets and equivalence relations
- Introduction to groups
- Examples of groups and basic properties of groups
- Finite groups and subgroups
- Cyclic groups
- Permutation groups
- Cosets and Lagrange's Theorem
- Normal subgroups and factor groups
- Group homomorphisms and group isomorphisms
- Cayley graphs of groups
- Applications of groups

Teaching Periods

MATH 3016 Mathematics Project

Credit Points 10

Legacy Code 301379

Coordinator Andrew Francis (<https://directory.westernsydney.edu.au/search/name/Andrew Francis/>)

Description In this unit, students can deepen or apply knowledge gained during their course and practise verbal and written presentation skills. Students will carry out a project under the supervision of an academic staff member. Assisted by their supervisor, students will define the problem to be studied and then acquire, develop and apply the appropriate theory or methodology. They will prepare a final report presenting theoretical results or methodology, an analysis and a discussion followed by an appropriate conclusion, as well as a literature review or a list of references as appropriate. Students will also give a talk on their project.

School Computer, Data & Math Sciences

Discipline Mathematics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) Students not enrolled in 3778 must have successfully completed 30 credit points of Level 2 mathematics/statistics units from the following list

MATH 2010 Linear Algebra
MATH 2001 Advanced Calculus
MATH 2003 Differential Equations
MATH 2011 Making Sense of Data
MATH 2009 Introduction to Data Science
COMP 2023 Mathematical Programming

Students not enrolled in 3778 must also have successfully completed 30 credit points of Level 3 mathematics/statistics units from the following list

MATH 3006 Mathematical Modelling
MATH 3003 Analysis
MATH 3001 Abstract Algebra
COMP 3020 Social Web Analytics
MATH 3007 Predictive Modelling
MATH 3005 Environmental Informatics
MATH 3015 Groups and Symmetry
MATH 3013 Fields and Equations
MATH 3012 Combinatorics
MATH 3014 Financial Mathematics

Equivalent Subjects MATH 3008 Quantitative Project

Restrictions Students enrolled in program 3778 Bachelor of Mathematics must have completed 200 credit points before enrolling into the subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Plan and develop an investigative project.
2. Locate, identify and use information relevant to the problem being studied.
3. Undertake self-directed study relevant to the problem being investigated.
4. Undertake a theoretical and/or analytical investigation.
5. Develop a comprehensive research report in a logical, concise and professional manner.
6. Verbally present a project and its results to an audience.

Subject Content

There is no formal content definition for this subject, as the projects offered will vary according to the expertise and interests of academic staff and the research interests of students. Students will choose individual project topics in consultation with the unit coordinator and the supervising staff member.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Proposal	12-15 pages	10	N	Not Known
Presentation	10 minutes	10	N	Not Known
Report	20-40 pages	45	N	Not Known

Presentation	20 minutes	25	N	Not Known
Participation	n/a	10	N	Individual

MATH 4001 Mathematics Honours Thesis

Credit Points 20

Legacy Code 200413

Coordinator Stephen Weissenhofer (<https://directory.westernsydney.edu.au/search/name/Stephen Weissenhofer/>)

Description This is a 40 credit point year-long subject taken over two terms (20 credit points in each term). The aim of this subject is to further develop the student's research and problem solving skills. The student is required to implement the research plan, complete a substantive piece of research in the field of Mathematics/Statistics, and to communicate the results of that work to an interested and technically literate audience. All projects will therefore contain at least two broad areas of assessment: the substantive work itself, and the oral and written communication of the work to others. All assessment

components submitted in both of these areas are expected to be of a high professional standard. Students will present their research in the thesis. The thesis topic and structure will vary according to the area of interest of the student and the expertise of the supervisor. Throughout this subject regular planned consultations between the student and supervisor will occur. Students are expected to work to a schedule devised in consultation with their supervisor. The schedule will include set dates for the presentation of draft chapters for review by the supervisor.

School Computer, Data & Math Sciences

Discipline Mathematical Sciences

Student Contribution Band HECS Band 1 20cp

Level Undergraduate Level 4 subject

Restrictions Students must have a grade point average greater than 5 unless a case can be made.

Assumed Knowledge

To effectively research in the area of Mathematics/Statistics, an understanding and knowledge equivalent to an undergraduate Bachelor of Science (Mathematics) degree or major in Mathematics/Statistics is required.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. understanding of the fundamentals of pertinent theories and ability to apply these to a novel problem/situation;
2. evidence of original thought in the design and development of the research strategy
3. demonstrate superior communication skills and due care and attention to the requirements of academic writing and reporting of independent research;
4. facility in scholarly argument appropriate to the project, the discipline and to an Honours level
5. demonstrate an understanding of, and adherence to, the ethical and social implications of Mathematics/Statistics research and enquiry

Subject Content

The content is flexible depending on the nature of the research project

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Thesis	8,000 - 12,000 words	100	N	Individual

Teaching Periods

MATH 7001 Advanced Mathematical Investigations

Credit Points 20

Legacy Code 301176

Coordinator Paul Hurley ([https://directory.westernsydney.edu.au/search/name/Paul Hurley/](https://directory.westernsydney.edu.au/search/name/Paul%20Hurley/))

Description Advanced Mathematical Investigations is an integral part of the Master of Research for students planning a future in mathematical and/or statistical research. Students will carry out extensive investigations under the supervision of an academic staff member that will allow the development of skills, knowledge and a way of thinking that will assist in the learning of mathematics and/or statistics needed for research in their chosen field of mathematics. They will also develop their written and oral communication skills, culminating in a paper which will be written as though it is to be submitted to a mathematics/statistics journal for publication (including following the journal's requirements for presentation) and an oral presentation of the style expected at a mathematics/statistics conference.

School Computer, Data & Math Sciences

Discipline Mathematics

Student Contribution Band HECS Band 1 20cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 8086 Master of Research.

Assumed Knowledge

Undergraduate level of knowledge in mathematics or statistics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Plan and develop an investigative project.
2. Locate, identify and use information relevant to the problem being studied.
3. Write an extensive literature review.
4. Undertake self-directed study relevant to the problem being investigated.
5. Undertake a theoretical and/or analytical investigation.
6. Write and produce a comprehensive research report in a logical, concise and professional manner.
7. Present a project and its results to an audience in a talk.
8. Prepare results of research for submission to a mathematics or statistics journal for publication.

Subject Content

How to write in a professional manner in mathematics.

Employing LaTeX to write reports/papers and give presentations in mathematics.

Expert knowledge on history/background of chosen field of mathematical research.

Current areas of interest/study and/or open problems in chosen field of mathematical research.

How to write and submit work for publication to a journal in mathematics or statistics.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

MATH 7002 Advanced Statistical Methods

Credit Points 10

Legacy Code 301115

Coordinator Paul Hurley ([https://directory.westernsydney.edu.au/search/name/Paul Hurley/](https://directory.westernsydney.edu.au/search/name/Paul%20Hurley/))

Description There has been a significant trend away from simple statistical models for complex and Big Data. Advanced Statistical Methods is a technical unit that looks at computer intensive statistical techniques for modelling complex data. Students will learn about methods including Density Estimation, the Expectation-Maximisation (EM) algorithm, Bayesian, Markovian and Hidden Markov Models, enabling them to apply sophisticated statistical tools in a Data Science setting.

School Computer, Data & Math Sciences

Discipline Statistics

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) MATH 7012 AND MATH 7016

Co-requisite(s) COMP 7006

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the axioms of probability and the principle of maximum likelihood.
2. Use density estimation to model continuous data.
3. Apply the EM algorithm (Expectation-Maximisation Algorithm) to maximise complex likelihood functions.
4. Evaluate models using computational techniques
5. Analyse data using Bayesian statistical models and MCMC (Markov-Chain Monte Carlo)

Subject Content

1. Review of Probability Theory and Likelihood
2. Density Estimation
3. Maximum Likelihood and EM algorithm
4. Jack-knife, Bootstrap and Cross-validation
5. Introduction to Bayesian Methods
6. Markovian and Hidden Markov Models

Assessment

MATH 7003 Applied Business Statistics

Credit Points 10

Legacy Code 300962

Coordinator Kenan Matawie ([https://directory.westernsydney.edu.au/search/name/Kenan Matawie/](https://directory.westernsydney.edu.au/search/name/Kenan%20Matawie/))

Description This unit introduces the basic statistical concepts and techniques for descriptive and inferential data analysis. It will aid and improve business decision-making, especially when faced with uncertain outcomes.

School Computer, Data & Math Sciences

Discipline Statistics

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Mathematics to the HSC level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Organise, tabulate, present, summarise and graph data appropriately;
2. Apply probability to solve business decision making problems;
3. Define and distinguish between discrete and continuous probability distributions;
4. Estimate population means and proportions using confidence intervals;
5. Test hypotheses about population means and proportions;
6. Understand and apply correlation and linear regression to describe and analyse relationships between variables;
7. Use the Chi-square test for goodness of fit and test for independence to analyse categorical type data;
8. Use the necessary computing skills required in Excel to solve and analyse statistical data.

Subject Content

Data type and collection, graphical and tabular techniques
 Numerical descriptive measures, and basic Probability
 Discrete and continuous probability distributions
 Sampling distribution
 Statistical inferences - hypothesis testing
 Correlation and Linear regression analysis
 Statistical inferences -estimation
 Analysis of Categorical data
 Index Numbers

Assessment

MATH 7005 Approximation Theory

Credit Points 20

Legacy Code 301060

Coordinator Ante Prodan ([https://directory.westernsydney.edu.au/search/name/Ante Prodan/](https://directory.westernsydney.edu.au/search/name/Ante%20Prodan/))

Description Approximation theory is concerned with approximating functions of a given class using functions from another, usually more elementary, class. The efficient solution of such problems is of great importance for computing, and this online unit will provide a general introduction to the mathematical theory behind many approximation methods in common use.

MATH 7009 Mathematical Proof and Reasoning

Credit Points 10

Legacy Code 301177

Coordinator Stephen Weissenhofer ([https://directory.westernsydney.edu.au/search/name/Stephen Weissenhofer/](https://directory.westernsydney.edu.au/search/name/Stephen%20Weissenhofer/))

Description Proving and getting a new proposition by careful reasoning from given propositions, is the essence of mathematics. Proof is what makes mathematics special and eternal. This unit looks at the different methods of proof and reasoning that can be employed to verify that statements are true or not. Students will consider propositions and theorems from various areas of mathematics and look at classic, interesting and sometimes novel ways these can be proved. Successful students taking this unit will not only be able to follow and determine if a proof is correct, but become proficient at mathematical reasoning.

School Computer, Data & Math Sciences

Discipline Mathematical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Undergraduate level of knowledge in mathematics or statistics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse mathematical arguments and determine whether or not they are sound.
2. Make concise rational arguments to prove true statements.
3. Be able to construct counter examples to disprove false statements.
4. Recognise standard types of statements and know the type of argument that is required to prove them.
5. Correctly utilise different types of proof; for example, direct, contradiction and induction.
6. Apply proof techniques to different areas of mathematics; for example, geometry, number theory and other relevant areas.

Subject Content

Logic, valid arguments and common invalid arguments.
The structure of mathematical proofs.
Direct proof and counter-example.
Proof by cases.
Indirect proof, contradiction and contrapositive.
Existence and Uniqueness proofs.
Mathematical Induction proofs.

Assessment

MATH 7011 Predictive Analytics

Credit Points 10

Legacy Code 301117

Coordinator Rosalind Wang ([https://directory.westernsydney.edu.au/search/name/Rosalind Wang/](https://directory.westernsydney.edu.au/search/name/Rosalind%20Wang/))

Description The information age has allowed business and science to take advantage of the vast amount of available data for predicting outcomes and estimating trends, to make informed decisions. Machine learning is the process of allowing a computer to learn from data, which at its heart is used in making these important decisions. This unit provides students with the knowledge and practice required to implement and effectively use these predictive models such as Neural Networks and Support Vector Machines, and provides opportunity for students to investigate state-of-the-art. Students will use the Python programming language throughout this unit.

School Computer, Data & Math Sciences

Discipline Computer Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) MATH 7016

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Multiple linear regression models;
2. Linear models, and generalised linear models;
3. Simple Machine Learning techniques, Support vector Machines and Regression Trees;
4. Create appropriate models using selection procedures in various scenarios;
5. Use Computer software (R) to analyse data including model building, model selection and outcome prediction.

Subject Content

1. Gradient Descent
2. Regularisation and Feature selection
3. Neural Networks
4. Support Vector Machines
5. Naive Bayes
6. Machine Learning applications
7. Semi-supervised learning

Assessment
