BUSM 3069 Strategic Management

Credit Points 10

Legacy Code 200587

Coordinator Marion Cornish ([https://directory.westernsydney.edu.au/search/name/Marion Cornish/](https://directory.westernsydney.edu.au/search/name/Marion%20Cornish/))

Description This unit explores the nature and essence of strategy and how this is created in various organisational, industry and economic contexts. The complexity of the strategy process, content and context means that there is not one clear position on strategy. The impact of this complexity on managers seeking to develop a strategic thinking capability is examined. The paradoxes and debates in the field of strategy are explored in an effort to understand the concept of sustainable competitive advantage. Students will utilise the theoretical knowledge presented in a dialectical enquiry framework to undertake strategic analysis, and develop a selection of strategic options, for case study scenarios and in a team strategy simulation.

School Business

Discipline Organisation Management

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) BUSM 1038 OR
BUSM 1008 OR
BUSM 1019

Equivalent Subjects LGYC 0040 - Strategic Management

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the impact of key elements of leadership, people and organisational culture in the formulation and implementation of strategy;
2. Apply contrasting theoretical approaches to strategic management;
3. Reflect on the strengths and weaknesses of various approaches to strategic development;
4. Utilise the theoretical knowledge presented to undertake strategic analysis, and develop a selection of strategic planning options, for case study scenarios and a strategy simulation;
5. Formulate strategic planning implementation strategies based on an understanding of sustainable competitive advantage linked to key industry, environmental and organisational constraints.

Subject Content

- strategy process, content and context linked to sustainable competitive advantage
- strategic thinking capability
- strategic formulation and The setting of patterns for action
- strategic change and organisational fit
- The industry context and business level strategy
- organisational context and purpose
- corporate level strategy
- Network level strategy
- strategy in The international context

Assessment

BUSM 3070 Strategic Sport Leadership

Credit Points 10

Legacy Code 200998

Coordinator Dr Michelle O'Shea ([https://directory.westernsydney.edu.au/search/name/Dr Michelle OShea/](https://directory.westernsydney.edu.au/search/name/Dr%20Michelle%20OShea/))

Description In contemporary sport environments, sport practitioners require an in-depth understanding of strategic leadership processes and practices. In order to respond to sport's ongoing professionalisation, globalisation, demographic changes and emerging consumer needs, sport managers and government policy makers require knowledge and skills which will allow them to successfully manage these changes. Students will develop knowledge and skills in areas such as policy development and strategic planning, executive leadership and change management processes and practices. The unit content will be applied across diverse sport environments including high performance sport in not-for profit contexts and community sport with a focus on sport for development. Students will apply their strategic leadership knowledge and skills by formulating a policy or related initiative for a sport agency or organisation.

School Business

Discipline Business and Management, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 4491 - Sport Management Planning and Development
SPRT 3016 - Sport Management Planning and Development

Assumed Knowledge

An introductory level of knowledge in sport management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a comprehension of the range of political, philosophical and economic rationales for government involvement in the development of sport;
2. Critically evaluate and develop sport organisation policy, considering strategic management theories, principles and processes in context;
3. Analyse internal and external ethical, environmental, stakeholder, legislative and technological issues shaping strategic management in sport organisations and policy contexts;
4. Evaluate current sport organisation/agency strategic management processes, practices and policy implementation;
5. Apply strategic management principles in sport organisations and to the development of sport/ development through sport.

Subject Content

- strategic management theories and principles and their implementation/practice in sport organisation/agency and policy contexts
- external and Internal Ethical, environmental, Stakeholder, Legislative and technological Issues that impact on strategic analysis
- planning in A variety of sport Organisations/agencies i.e in The private and public sector
- practical development and implementation of sport strategies in Domestic, international organisational/agency and policy contexts
- business planning and Entrepreneurship in sport

Assessment

BUSM 3071 Technology Management for Competitiveness

Credit Points 10

Legacy Code 200668

Coordinator Hilal Hurriyet ([https://directory.westernsydney.edu.au/search/name/Hilal Hurriyet/](https://directory.westernsydney.edu.au/search/name/Hilal%20Hurriyet/))

Description This contemporary unit provides an understanding of technology management and productivity measurement/improvement concepts aimed to improve the competitiveness of organisations. Students are introduced to a range of tools and techniques to acquire and implement technology and develop productivity improvement programs within global operations and supply chain context. The interaction between technological change and competitiveness (productivity and other performance measurement systems) is also explored. The unit is relevant to managers or technologists with responsibilities for managing technological change

School Business

Discipline Business and Management, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 4405 - Productivity and Technology Management

Assumed Knowledge

An introductory level of knowledge in operations and supply chain management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the fundamental concepts and principles of technology management and productivity and performance management at firm level
2. Analyse the impact of technology and technological change on management, productivity and competitiveness of the firm by the analysis of the case studies.
3. Evaluate current levels of productivity and performance and effectively contribute to the identification/ development and implementation of appropriate enterprise-level performance measurement systems

4. Develop an effective understanding of process of managing technology strategy and global operations simultaneously
5. Identify and apply appropriate approaches/ techniques to solve specific productivity and performance related problems at the firm level.
6. Demonstrate a basic understanding of a variety of quantitative and qualitative techniques and analyse and interpret the results of the analysis to guide and support decision-making process at the firm level

Subject Content

Understanding the environment in which technology is managed
Technology strategy

The creation of core technological competencies
Acquiring new technology through research and development
New technology implementation-
Technology management in service organisations

Teaching Periods

BUSM 3072 Tourism Industry Professional Placement

Credit Points 20

Legacy Code 102385

Coordinator Garth Lean ([https://directory.westernsydney.edu.au/search/name/Garth Lean/](https://directory.westernsydney.edu.au/search/name/Garth%20Lean/))

Description Tourism Industry Professional Placement (TI PP) provides students with understanding and experience of the tourism or related industry workplace. Students work in a voluntary capacity with an industry host to gain work-ready skills and undertake professionally appropriate tasks. Students complete a Professional Placement Proposal and Professional Placement Report.

School Social Sciences

Discipline Tourism Management

Student Contribution Band HECS Band 4 20cp

Level Undergraduate Level 3 subject

Restrictions Students must be enrolled in 1664 Bachelor of Tourism Management or 6030 Diploma in Social Science/Bachelor of Tourism Management, where this is an alternate core subject. Students enrolled in the 1667 Bachelor of Social Science (Heritage and Tourism Major) may include this subject as an elective. Students must have successfully completed 160 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate practical employability skills that can be useful for professional career development;
2. Apply problem-solving skills and plan for situation improvement;
3. Demonstrate capacity to work effectively in team environments;
4. Design and manage a program of professional development;
5. Evaluate and report on a professional development/situation improvement program.

Subject Content

Introduction to work-based learning - pre-placement orientation and planning

Professional development goal-setting and planning
Project and progress management
Professional development evaluation and reporting
Completion of a situation improvement project/task

Assessment

BUSM 3073 Tourism Policy and Planning

Credit Points 10

Legacy Code 101904

Coordinator Garth Lean ([https://directory.westernsydney.edu.au/search/name/Garth Lean/](https://directory.westernsydney.edu.au/search/name/Garth%20Lean/))

Description This unit gives students a general understanding of planning theory as it relates to sustainable tourism policy and practice. Students will apply this knowledge to tourism sites, facilities and activities in Sydney with a major assignment focusing on Sydney Olympic Park. A self-guided field trip enables students to apply and understand various planning techniques, tourism policies, scenario mapping strategies and consider conflict resolution practices. Students will present their ideas by integrating quantitative and qualitative data, both in teams and individually. At the conclusion of this unit students will have the skills to apply planning theory to an analysis of tourism policies, sites, facilities and activities in a global city such as Sydney.

School Social Sciences

Incompatible Subjects LGYB 8930 - Tourism Policy and Planning LGYA 6103 - Recreational Planning towards Sustainable Tourism LGYB 8197 - Sustainable Tourism and Recreational Planning

Restrictions Successful completion of 80 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of planning theory as it relates to sustainable tourism;
2. Analyse various planning techniques, tourism policies, scenario mapping strategies and conflict resolution practices;
3. Work individually and in teams to present their ideas orally and in written forms;
4. Integrate quantitative and qualitative tourism data to formulate policies and procedures; and
5. Apply planning theory to an analysis of tourism policies, sites, facilities and activities.

Subject Content

Understanding tourism policy and planning
 Applying sustainable tourism concepts and indicators to case studies
 Assessing tourism experiences and opportunities using qualitative and quantitative data
 Examining stakeholder conflicts and impact assessments
 Planning for destination management
 Conducting scenario planning
 Conducting site visits and field work
 Preparing professional presentations
 Evaluating planning frameworks

BUSM 3074 Work Employment and the Labour Market

Credit Points 10

Legacy Code 200243

Coordinator Louise Ingersoll ([https://directory.westernsydney.edu.au/search/name/Louise Ingersoll/](https://directory.westernsydney.edu.au/search/name/Louise%20Ingersoll/))

Description This unit provides an in-depth study of the links between work, employment and wider labour market issues. An introductory framework will be provided emphasizing the historical perspectives of work and the key theories and concepts involved in industrial sociology. Current and future issues and trends in work organization and practice and their relationships to society will also be considered. The unit will then examine the relationship between labour markets, employment and government policy in both macro and micro settings. Particular emphasis will be placed upon the interaction of regional labour markets, policies and outcomes for key labour market segments.

School Business

Discipline Business And Management

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) BUSM 1023

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the key concepts in the disciplines of industrial sociology and labour economics;
2. Analyse the relationships between social, economic and political structures and work, particularly as they relate to the Australian workplace and Australian society;
3. Assess the impact of work as it affects distinct groups, the workplace, the labour market and wider society;
4. Evaluate the external and internal influences shaping labour market issues in both macro and regional settings;
5. Identify the strengths and weakness of contemporary education, training and employment strategies on labour market behaviours and outcomes;
6. Evaluate the concepts associated with issues of labour supply and demand.

Subject Content

- The meaning of work
- historical perspectives of work and theories of work
- impact of contemporary work and labour market Trends including work intensification, casualisation, restructuring and environmentalism, unpaid work
- An Overview of The contemporary labour markets in macro and Regional settings
- An Overview of theories of The labour market and their impact upon government policy development
- The Supply and demand for labour ? including and assessment of Factors influencing their dynamics and relationships
- The impact of government education and employment policies on labour market outcomes for key groups

Legacy Code 201043

Coordinator Dorothea Bowyer ([https://directory.westernsydney.edu.au/search/name/Dorothea Bowyer/](https://directory.westernsydney.edu.au/search/name/Dorothea%20Bowyer/))

Description This unit is designed to bring to life the knowledge gained during the students' study whilst applying it practically to diverse business contexts through a work integrated learning research project. The project will build on the comprehensive, coherent and connected knowledge gained in business specialisations to allow the student to explore and develop attributes required to be successful in contributing to outcomes in a business environment. Students will have an opportunity to work under the supervision of an academic on a research project. Assessment of the unit will include a formal research presentation to academics and/or industry. Entry to this unit is on a competitive basis. Contact the unit coordinator for details.

School Business

Discipline Business Management

Student Contribution Band HECS Band 4 20cp

Level Undergraduate Level 3 subject

Restrictions Students must have permission from the subject Coordinator and must have completed a minimum of 160 credit points (or equivalent) prior to undertaking this subject and must have 20 credit points of subjects available, within program allowances, to take this subject. The availability of supervision of projects, a student's ability to meet any special, safety, or identified persons requirements of a project site, the student's academic record and any record of misconduct, will also be considered.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Plan, organise and manage a business-related research project to completion;
2. Identify and use research literature relevant to a specific business issue or project;
3. Select and employ appropriate data collection methods;
4. Synthesise theoretical knowledge and context specific information in relation to a specific business issue or project;

5. Produce an analytical report including recommendations;
6. Present in a formal environment to peers and academics.

Subject Content

Planning and organisational skills
 Time management
 Project management
 Business research
 Report writing
 Presentation skills
 Data collection including field research

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Teaching Periods

BUSM 3079 Travel in the Digital Age

Credit Points 10

Legacy Code 102779

Coordinator Garth Lean ([https://directory.westernsydney.edu.au/search/name/Garth Lean/](https://directory.westernsydney.edu.au/search/name/Garth%20Lean/))

Description This unit explores the ways in which digital technologies are reshaping travel, including travellers' experiences, and planning and management of the travel industry. Students will learn how digital technologies are being utilised, and the opportunities and challenges

these technologies present. The unit will provide opportunities to engage with travel apps, virtual/augmented reality technologies, smart attractions and transport technologies. Students will also learn how to conceptualise and pitch their own digital travel products. Upon completion of the unit, students will be well placed to develop and manage innovative, socially responsible travel and mobility technologies.

School Social Sciences

Discipline Tourism Management

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 80 credit points of study.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate opportunities for the use of digital technologies in travel and tourism;
2. Evaluate potential challenges, threats and social-inequalities created by social technologies;
3. Critically review digital travel and tourism technologies;
4. Ascertain technology gaps in the travel and tourism industries;
5. Devise new travel and tourism technologies;
6. Propose digital technologies to an expert audience.

Subject Content

The digital disruption of tourism and travel;
 Rethinking tourism communities and stakeholders in relation to the digital futures of work and society;
 Opportunities, benefits, challenges and risks of digital technologies in travel and tourism;
 Travel/tourism smartphone applications and their design and development;
 Digitally enhanced attractions and destinations (including digital interpretation, and the use of augmented and virtual reality);
 Digital travel experiences and destinations;
 The future of transport and transit (including autonomous cars/buses/trains/planes, windowless planes, digital airports/hotels); and
 Opportunities for understanding tourist markets with digital technology (including tourist/traveller tracking and ethical/privacy implications).

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
The Opportunities and Challenges of Digital Technologies in Travel	1,500 words	35	N	Individual
Digital Travel App Concept Pitch	15 minutes (500 words equivalent, per person)	25	N	Group

Coordinator Stewart Alford ([https://directory.westernsydney.edu.au/search/name/Stewart Alford/](https://directory.westernsydney.edu.au/search/name/Stewart%20Alford/))

Description This unit identifies complexities associated with health care systems and processes, equipping students with the essential business skills to deal with challenges arising throughout the process of managing health services. A key focus of the unit is in the management of resources as a strategic activity of health organisations, particularly in relation to human resources, as workforce shortages pose a significant challenge to contemporary health management practice.

School Health Sciences

Discipline Public and Health Care Administration

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) BUSM 1037

Equivalent Subjects BUSM 3017 - Health Services Workforce Management

Assumed Knowledge

Foundation knowledge of data management and organisational governance.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret the strategic planning, strategic management and decision-making processes of health organisations;
2. Critically analyse strategic and operational approaches to health planning and resource management in national and local policy planning frameworks for the health and the aged care industry;
3. Apply relevant data analytics to Health Resourcing Data in order to profile the resource and monitor and review performance indicators;
4. Assure skills in resource management, in particular human and financial resources management, including, performance management and development, education and training, workforce redesign, employee relations, workforce consultation, budgeting and financial reporting for the health and aged care industry;

5. Critically interpret the link between performance indicators, performance management, governance and strategic management at Unit/Service/Organisational levels in a variety of contexts such as financial, safety and workforce;
6. Integrate ethical decision making related to marginalised groups and cultures such as Indigenous populations, individuals with a disability and individuals with a lived experience of mental illness in health care policy and innovation areas such as workforce planning, values-based healthcare, clinical redesign and strategic management.

Subject Content

1. Health care systems and processes
2. Strategic planning for quality and performance
3. International and national policy and planning frameworks for the health workforce
4. The Australian health care workforce ? overview, trends and issues
5. Workforce planning and budgeting at organisational level
6. Developing the organisational workforce plan at strategic and operational levels
7. Data Analytics and human resource information systems
8. Productivity of the health workforce
9. Human resources issues in the health, aged and social services sectors
10. Workforce reform, innovation and strategic planning

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Management report including graphic and tabular presentation of computer lab work using payroll or other HRIS data	1,500 words	40	N	Individual
Workforce planning report and budget	1,000 words	25	N	Individual
Case study Report and budget on improving workforce performance	2,000 words	35	N	Individual

BUSM 3081 Business Analytics Project

Credit Points 10

Legacy Code 201091

Coordinator Francine Garlin ([https://directory.westernsydney.edu.au/search/name/Francine Garlin/](https://directory.westernsydney.edu.au/search/name/Francine%20Garlin/))

Description This unit provides students with the experience of applying business analytics skills and knowledge gained throughout the course of their degree in general and from the Business Analytics major in particular. Students will undertake a project in a real-world case setting to transform data to knowledge providing analytical solution to a client-specified problem. In teams, students will develop a project proposal, final report and/or interactive project tool and presentation. Students will gain insight into the profession of business analytics through independent learning and reflective practice.

School Business

Discipline Business and Management, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) BUSM 1042

Restrictions Students must be enrolled in MT2041 Business Analytics and have completed 160 credit points before enrolling in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the organisational context from which information needs arise;
2. Apply business analytic techniques to solve organisational problems in alignment with organisational goals;
3. Justify business analytic options and recommendations using knowledge and skills developed across the major;
4. Communicate concepts and recommendations in different formats suited to the audience;
5. Collaborate with team members in a productive manner supporting diverse viewpoints in relation to business analytics;

6. Identify the contribution of the business analytics profession to achieving organisational goals within the context of ethical and socially responsible practice.

Subject Content

- The focus of this subject is The development of A final report/ interactive tool and client presentation in teams with Regular academic consultation. teams will develop analytical solutions and make strategic recommendations to A client-specified problem. The solution will be assessed by The client organisation for its viability, appropriateness and, where appropriate, cost and return to The organisation. Nominated team members will engage with client Organisations at predetermined times.
- The principles and process of Project management.
- Review of the analysis process: Identification and evaluation of information needs; data acquisition; interpretation, and; strategic recommendation.
- Review key concepts relating to ethics and cyber security
- introduction to client relationship management
- team Roles, professional communication, task allocation, Coordination and control.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Proposal	1000	10	N	Group
Report	4000	40	N	Group
Presentation	20 minutes	10	N	Group
Reflection	2000	40	N	Individual

Teaching Periods

BUSM 4001 Business Analysis Seminars

Credit Points 10

Legacy Code 200896

Coordinator Aila Khan ([https://directory.westernsydney.edu.au/search/name/Aila Khan/](https://directory.westernsydney.edu.au/search/name/Aila%20Khan/))

Description This unit introduces students to exemplary research in selected contemporary issues in business practice and policy. Presented through a series of seminars by leading business academics, selected issues will be examined in terms of the competing definitions of the problem, the methods of analysis to be used to address the problem, components of the problems and relationships to other contemporary issues. As business research is inherently interdisciplinary and involves multiple stakeholders, relevant and competing theoretical perspectives explaining selected issues will be examined. Different methods of investigation and analysis of issues will be evaluated.

School Business

Discipline Business and Management, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 4 subject

Restrictions Students must be enrolled in program 8083 Bachelor of Research Studies/Master of Research.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Synthesise and critically evaluate contemporary business theories and practices
2. Demonstrate an advanced understanding of a range of theoretical approaches in business
3. Describe the inter-disciplinary nature of business research
4. Describe in detail and apply a minimum of two advanced quantitative analysis techniques
5. Communicate advanced knowledge of a research program to a general audience
6. Identify differing stakeholder groups and outline their engagement with contemporary business research
7. Critique academic debates in specific business research areas, outlining the different methods of investigation employed

Subject Content

This subject draws upon the varied discipline expertise of leading School of Business academics to present candidates with an overview of a variety of methods and methodologies employed in business research. Using contemporary research projects as case studies in research practice, candidates will first be introduced to the context in which the research is undertaken. This will be followed by an introduction to the theoretical framework the research is approached from and how this determined the data collection, analysis and interpretation that was undertaken. Methods of analysis that will be featured in this seminar series will include ANOVA, common factor analysis; correlation analysis; forecasting; linear, nonlinear and multiple regression; logit analysis; principal components analysis; structured equation modelling; time series analysis among others.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Presentation	3 minutes, 1 PPT slide	20	N	Individual
Essay	2000 words equivalent	50	N	Individual
Report	4 x 500 words (2000 words)	30	N	Individual

BUSM 4002 Seminal Papers in Business

Credit Points 10

Legacy Code 200898

Coordinator Edward Mariyani-Squire ([https://directory.westernsydney.edu.au/search/name/Edward Mariyani-Squire/](https://directory.westernsydney.edu.au/search/name/Edward%20Mariyani-Squire/))

Description The aim of this unit is to develop skills in applying rigorous analysis and critical assessment to research-debates in business disciplines through an examination of seminal literature in particular business fields which often embrace conflicting theoretical approaches. This will provide candidates with the advanced skills needed to critically analyse debates in a business discipline, while also enabling them to gain more familiarity with theories, issues, and problems in a particular research area. Seminal business papers will be analysed through a balanced and constructive critique of their strengths and weaknesses, providing suggestions for how the work might be extended or improved. From this unit, students will be able to apply the rigorous analytical skills to their own work.

School Business

Discipline Business And Management

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 4 subject

Restrictions Students must be enrolled in program 8083 Bachelor of Research Studies/Master of Research.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Present an overview of the main theories related to their planned research topic from scholarly journals and texts
2. Examine these authors' perspectives on their topic and the arguments that they present
3. Critically analyse the style, structure, and content of the literature and debate and defend their critical analysis
4. Identify and critically analyse the philosophical, theoretical and methodological approaches of the research outlined in the literature
5. Identify and discuss gaps in the literature as it pertains to their research area
6. Employ scholarly conventions used in identifying and accessing information sources, summarising and analysing literature, compiling research reports and articles and in dissertation construction

Subject Content

Seminal debates in business theory will be presented by senior academics from the range of disciplines represented in the School

of Business and by visiting scholars. Each seminar will outline the context of the original research contribution and then describe the ensuing debate, drawing also on contemporary work that is based on the developments of, or has arisen from original research. Each seminar will be followed by a workshop session discussing the presentation. The uniting strand of this subject will be a comparison of the debates from the different business disciplines with emphasis on how this knowledge should shape a critical review of the theories informing the candidate's planned research.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Essay	1,500 words	30	N	Individual
Presentation	20 minutes	20	N	Individual
Critical Review	2,500 words	50	N	Individual

BUSM 7004 Applied Project (Human Resources and Management)

Credit Points 10

Legacy Code 200954

Coordinator Marion Cornish ([https://directory.westernsydney.edu.au/search/name/Marion Cornish/](https://directory.westernsydney.edu.au/search/name/Marion%20Cornish/))

Description Applied Project (Human Resources and Management) is an integrated capstone unit that brings together the skills and understandings HRM and management students have developed during their course of study. The unit encourages HRM and management students to demonstrate their ability to solve multidisciplinary problems in relation to current and future issues that affect the application of human resource and management functions in contemporary workplace and industry contexts. The unit will also allow students to critically evaluate issues critical to these professional domains to determine and assess effective solutions. The topics are determined from year to year by discussions between the individual student, the unit coordinator and the student's chosen supervisor.

BUSM 7007 Business Communication Skills

Credit Points 10

Legacy Code 200817

Coordinator Mark Thomas ([https://directory.westernsydney.edu.au/search/name/Mark Thomas/](https://directory.westernsydney.edu.au/search/name/Mark%20Thomas/))

Description This unit is designed to assist students to enhance their ability to make written and oral reports suitable for presentation to employers and stakeholders in a modern business environment. More specifically, this foundation unit assists students to evaluate academic literature in various business contexts, to communicate effectively as an individual or within groups and to apply ethical practices in different business contexts. These traits can be applied in the workplace and any contemporary business environment.

School Business

Discipline Business And Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Business program or 3693 Master of Engineering. The online offerings for this subject are only available to students enrolled in program 2770 Master of Commerce (Financial Planning), 2793 Master of Financial Planning and 2795 Graduate Certificate in Financial Planning.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Select appropriate sources from the library database;
2. Demonstrate the various types of written communication used in business and the different styles of communication required;
3. Demonstrate critical use of academic literature in business and economics having regard to both explicit and implicit assumptions, the logic of the arguments, and the appropriateness of the conclusions;
4. Effectively work individually or within groups to prepare business communications and essays;
5. Demonstrate knowledge of the pitfalls which can arise in business operations that span different cultures and different countries;
6. Identify cultural issues in academic and business contexts and make recommendations for improving practice.

Subject Content

- differing types of business documents and The appropriate methods of developing and distributing these documents
- Basic library Searches and how to Evaluate information
- how to structure written and other business documents and how to acknowledge sources
- logical reasoning
- common fallacies in reasoning
- Critical analysis and evaluation
- how to effectively work in groups
- implications of Global business
- application of logical reasoning and clear communication to topical business and economics Issues
- application of Ethical practices in academia and business

BUSM 7008 Business Internship

Credit Points 10

Legacy Code 200769

Coordinator Laurel Jackson ([https://directory.westernsydney.edu.au/search/name/Laurel Jackson/](https://directory.westernsydney.edu.au/search/name/Laurel%20Jackson/))

Description The Business Internship is designed for students who want to gain industry experience and further their studies through a 10-week business internship. This Business Internship unit is based on a project style unit which requires students to undertake a research project in their chosen field whilst attending an industry based internship.

School Business

Discipline Business And Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects BUSM 7070 - Masters Project

Restrictions

Students must be enrolled in a postgraduate Business program and must have successfully completed 50% of subjects in their approved program of study. Permission of the Director of Academic Program is required before undertaking this subject.

Assumed Knowledge

Understanding of the business environment and organisational structures, business communications skills, business strategy, as well as substantial knowledge in the major discipline area.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate the links between theory and practical work environments by using appropriate theoretical frameworks to analyse novel workplace situations;
2. Develop your personal and professional communication and presentation skills;
3. Gain an understanding of workplace culture and identify behavioural characteristics necessary for working in a collegial work environment.

Subject Content

Students will work in conjunction with the subject Coordinator and an academic supervisor who is an academic expert in their area of specialisation. All internships must be approved by the subject Coordinator prior to commencing. The internship will involve a literature review, application of theory and techniques, methodological investigation and recommendations. Internships will be industry based and directly relevant to the student's area of interest. Students will meet with their Supervisor regularly throughout the study period and with the subject Coordinator, in a class environment, as defined by the subject guidelines.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

BUSM 7010 Business Operations Management

Credit Points 10

Legacy Code 200782

Coordinator Krishnamurthy Ramanathan ([https://directory.westernsydney.edu.au/search/name/Krishnamurthy Ramanathan/](https://directory.westernsydney.edu.au/search/name/Krishnamurthy%20Ramanathan/))

Description This unit introduces participants to operations management in a range of organisational and industry contexts. Operations management is an important element of business strategy and integral to both service and manufacturing sectors alike. Students will develop an appreciation of the latest trends in operations management and the applications currently adopted in organisations. They will also learn to apply quantitative techniques for analysing problems and providing recommended solutions. This unit provides an excellent foundation for further specialist study in operations management but also works well for students in general business programs.

School Business

Discipline Organisation Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 4461 - Operations Management

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the role of operations management in a range of organisations and institutions.
2. Explain the interaction between operations management and other aspects of an organisation (marketing, finance, human resources etc.).
3. Apply a variety of quantitative techniques to management problems and interpret the results from a manager's perspective.
4. Prepare recommendations for the management of the internal operations of an organisation, based on quantitative analysis, marketing considerations, behavioural and political factors, financial considerations and other relevant factors.
5. Identify and analyse business situations and feel confident making and implementing management decisions on the basis of their analysis.

Subject Content

Process analysis
Operations strategy
Inventory management
Forecasting
Capacity planning
Work and staff scheduling

Teaching Periods

BUSM 7011 Business Operations and Logistics

Credit Points 10

Legacy Code 200838

Coordinator Henry Lau ([https://directory.westernsydney.edu.au/search/name/Henry Lau/](https://directory.westernsydney.edu.au/search/name/Henry%20Lau/))

Description This unit introduces students to operations and logistics management theory and practice. Operations and logistics management is an important element of business strategy and it is integral to both service and manufacturing industries. Students will develop an appreciation of the latest trends in business operations and logistics management and the applications currently adopted in organisations and industries. They will also learn to apply quantitative techniques for formulating/analysing problems and providing recommended solutions. This unit provides an excellent foundation for further specialisation in logistics and supply chain management but also works well for students in general business operations programs.

School Business

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects BUSM 7010 - Business Operations Management

Restrictions

Students must be enrolled in a postgraduate Business program, 3693 Master of Engineering, 3749 Master of Science, 3772 Graduate Diploma in Protected Cropping or 3773 Graduate Certificate in Protected Cropping

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the critical role of operations/logistics management plays in business organisations;
2. Explain the interactions between operations/logistics management and other aspects of a business enterprise with a view of managing competitive priorities and dynamic capabilities for the long term competitiveness;
3. Evaluate the characteristics of various operations and logistics environments and assess their impact on business;
4. Identify and apply a variety of latest quantitative/ qualitative techniques to tackle operations/logistics management problems and interpret the results from a business management perspective;
5. Apply the skills needed to design, develop and improve operations and logistics systems;
6. Identify and analyse business situations and feel confident making and implementing decisions based on quantitative/qualitative analysis, marketing considerations, behavioural, political factors and financial considerations;
7. Analyse the key features of global operations and logistics and discuss the relevance, managerial considerations, advantages and limitations in depth.

Subject Content

- introduction to Operations and Logistics processes analysis
- new Product and service design
- inventory management
- Supply chain management
- Forecasting and demand management
- capacity planning, constrain management and scheduling
- quality management, control and improvement
- Logistics Network design and information system management
- A Balance of manufacturing and service management
- Project management

1. Introduction to operations and logistics processes analysis
2. New product and service design
3. Inventory management
4. Supply chain management
5. Forecasting and demand management
6. Capacity planning, constrain management and scheduling
7. Quality management, control and improvement
8. Logistics network design and information system management
9. A balance of manufacturing and service management
10. Project management

BUSM 7012 Business Project

Credit Points 10

Legacy Code 200829

Coordinator Peter Kavalamthara ([https://directory.westernsydney.edu.au/search/name/Peter Kavalamthara/](https://directory.westernsydney.edu.au/search/name/Peter%20Kavalamthara/))

Description This is a 20 credit point subject over two Quarters, 20 weeks in total, 10 credit points in each Quarter. Business Project equips professionals to address contemporary challenges through research and applying knowledge developed in earlier units of study. This student-centred subject provides close supervision of research and analytical practices to enhance skill development and capacity to engage with problems confronting organisations, taking account of contexts and multiple stakeholders. Students will have scope to focus on issues that are of particular concern to organisations or interest for their careers. As an integrating subject, it demands participants bring together their knowledge and curiosity to develop recommendations in a format that can showcase their achievements. In order to complete this subject, students must have studied this subject over two teaching periods.

School Business

Discipline Business Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Business program or in program 3748 Master of Information Governance. Students in the following program must have successfully completed 60 credit points before undertaking this unit: 2764 Master of Commerce (Human Resource Management). Students in the following programs must have successfully completed 40 credit points before undertaking this unit: 2624 Master of Business (Operations Management) and 2725 Master of Commerce (Property Investment and Development). Students in program 2761 Master of Business Administration must have completed all core subjects plus 40 credit points of major subjects (i.e. a total of 80 credit points) and must obtain permission of the Director of Academic Program.

Assumed Knowledge

Understanding of the business environment and organisational structures, business communications skills, business strategy, as well as substantial knowledge in the major discipline area.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop a project proposal outlining a business plan for an in-depth investigation of a contemporary organisational challenge;
2. Analyse and interpret secondary data gathered from a range of sources, to assist in defining and refining the contemporary issue;
3. Apply theories, concepts and tools to the challenge faced by the organisation or industry;
4. Develop strategies based on the results of analysis of data considering stakeholder objectives and constraints, such as competitive pressures and regulation that demonstrate respect for ethics and diversity;
5. Develop insights into theory, research practice and challenges of leadership by assessing the significance of recommendations relative to the dynamic and complex nature of organisations in uncertain environments.

Subject Content

Students will work in conjunction with the subject Coordinator and an academic supervisor who is an academic expert in their area of specialisation. All projects must be approved by the subject Coordinator prior to commencing. Each project will involve literature survey, application of theory and techniques, methodological investigation and recommendations. Wherever possible projects should be industry based and directly relevant to the student's area of interest. Students will meet with their Supervisor regularly throughout the study period and with the subject Coordinator, in a class environment, as defined by the subject guidelines.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Proposal	1,500 words	30	N	Individual
Report	1,000 words	10	N	Individual
Report	4,000 words and 10 minute presentation	60	N	Individual

BUSM 7013 Business, Society and the Environment

Credit Points 10

Legacy Code 200847

Coordinator Louise Ingersoll ([https://directory.westernsydney.edu.au/search/name/Louise Ingersoll/](https://directory.westernsydney.edu.au/search/name/Louise%20Ingersoll/))

Description Business, Society and the Environment draws on social enquiry and reflection to explore the complex relationships between business and the stakeholders of business, by critically evaluating the social, environmental and political impacts of business decisions and practices. The unit focusses on the challenges and ethical dilemmas emerging from global capitalism, and addresses the significance of government in regulating the impact of business on society and the environment. The unit critically considers the nature of the firm and the role of ideology to justify business decisions.

School Business

Discipline Business And Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Business program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the social and environmental impacts of business practices in national and global contexts;
2. Critically reflect on the connections between individual experience and social and environmental issues;
3. Apply theories and models to analyse the social and environmental dimensions of the interactions between Business and the stakeholders of Business;
4. Identify and critically analyse different ideologies used to justify the perspectives of business, government and society, with attention on social and environmental issues;
5. Critically reflect on and research the social and environmental issues emerging from the reciprocal impacts of business, government and society.

Subject Content

- The business-society-government dynamic
 - The significance of The environment to society and business sustainability
 - sociological and Ethical reasoning for sustainability of business
 - The development of capitalism, globalisation and The impact on The environment
 - ideological Models relevant to The business, society and environmental perspectives
 - The dynamic connections between sustainability, stakeholders and The nature of The firm
 - Stakeholder perspectives on The environment and business
1. The Business-Society-Government dynamic
 2. The significance of the environment to society and business sustainability
 3. Sociological and ethical reasoning for sustainability of business
 4. The development of capitalism, globalisation and the impact on the environment
 5. Ideological models relevant to the business, society and environmental perspectives
 6. The dynamic connections between sustainability, stakeholders and the nature of the firm
 7. Stakeholder perspectives on the environment and business

BUSM 7014 Compliance Management

Credit Points 10

Legacy Code 200776

Coordinator Premaratne Samaranayake ([https://directory.westernsydney.edu.au/search/name/Premaratne Samaranayake/](https://directory.westernsydney.edu.au/search/name/Premaratne%20Samaranayake/))

Description This unit comprises three modules that focus on quality management, risk management, and performance measurement and benchmarking. The quality systems module explores quality management principles, systems, and frameworks, and the role that quality management plays in creating customer value, improving competitiveness and enhancing organisational effectiveness. The risk management module examines the important risks that need to be managed by businesses, especially in a global business setting, and introduces common frameworks that can be used to develop risk management strategies. The performance measurement and benchmarking module elaborates upon the evolution of performance measurement frameworks and introduces approaches that can be used by businesses to assess the status of their business processes and enhance performance through benchmarking. It will draw upon the concepts and theories covered in the quality and risk management modules. All three modules incorporate aspects related to economic, social and environmental responsibility. Students are required to study all three modules.

Equivalent Subjects LGYA 4463 - Management of Quality

Incompatible Subjects BUSM 7074 - Performance Measurement and Benchmarking LGYB 9039 - Risk Management

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the features of compliance management within a business setting;
2. Recommend alternate approaches to ensuring quality, risk, and performance management compliance in organisations;
3. Assess the applicability of various compliance elements in business.
4. Apply economic, social and environmental responsibility decision-making frameworks in the context of compliance management

Subject Content

Module 1 Quality Management:

- quality defined, quality concepts, quality for competitive advantage
- systems thinking, quality philosophies and frameworks
- quality and The Customer
- Deploying important quality management frameworks for process management and Continuous improvement
- creating A quality culture

Module 2 Risk Management:

- introduction to Risk and Risk management
- types of risks and Operational Risk analysis
- Risk identification and managing Risk in Projects, programs and portfolios
- managing Risk in An international business setting
- Risk management frameworks and generic approaches for Risk mitigation and management

Module 3 Performance Measurement

- The principles of performance measurement
- The evolution of performance measurement and The Balanced Scorecard approach
- performance measurement system design and establishing effective measurement systems
- benchmarking and its role in Analysing and interpreting performance measures, types of benchmarking and common approaches for benchmarking
- using benchmarking results to develop performance measures for organisational improvement

BUSM 7019 Corporate Governance and the Global Environment

Credit Points 10

Legacy Code 200795

Coordinator Dominic Mcloughlin ([https://directory.westernsydney.edu.au/search/name/Dominic Mcloughlin/](https://directory.westernsydney.edu.au/search/name/Dominic%20Mcloughlin/))

Description Corporate governance is the set of processes, policies and laws affecting the way a firm is directed, administered or controlled. This unit examines corporate governance systems and how these may contribute to sustainable enterprise. Models of corporate governance are analysed, and decision-making processes are evaluated in various economic and social contexts. The unit also introduces the institutions of the legal system, with particular emphasis on domestic and international corporations law.

School Business

Discipline Business Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 8690 - Governance and Ethics

Incompatible Subjects LAWS 7009 - Commercial Law

Restrictions

Students must be enrolled in 2755 Master of Business Administration, 2762 Executive Master of Business Administration.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse corporate governance models and frameworks linked to responsible, accountable and transparent decision-making in organisations;
2. Evaluate different international models of corporate governance, and appreciate how different socio-political ideologies, corporate structures, legislation, policies and relationships support those models;
3. Argue the links between corporate governance, corporate social responsibility, ethics and sustainability;
4. Articulate understanding of Australian legal institutions, and recommend processes for compliance with corporations law;
5. Analyse corporations law from a comparative, i.e., international perspective, and recommend processes for compliance with international corporations law.

Subject Content

Corporate Governance, social responsibility and sustainability:

- Models of corporate governance, including strategic, monitoring and regulatory characteristics;
- Influence of socio-political ideologies on global corporate governance models;
- Corporate social responsibility and ethics frameworks in the global environment;
- Global economic contexts for sustainability.

Corporate Governance legal systems- Corporations law in Australia:

- International legal systems;
- Comparative Corporations law;
- Corporate governance and compliance;
- Corporate governance and due diligence.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Essay	1,000 words max.	30	N	Individual
Case Study	1,000 words max.	30	N	Individual
Final Exam	2 hours	40	Y	Individual

BUSM 7020 Creating Sustainable Organisations

Credit Points 10

Legacy Code 200853

Coordinator Robert Perey ([https://directory.westernsydney.edu.au/search/name/Robert Perey/](https://directory.westernsydney.edu.au/search/name/Robert%20Perey/))

Description 'Creating Sustainable Organisations' explores new pathways to sustainability and leadership for the 21st Century, encouraging continual reflection and discussion on the nature and implications of current debates on environmental and social issues. It examines different models and strategies designed to balance the need for business growth with responsiveness to social and environmental issues. 'Creating Sustainable Organisations' provides students with the skills to lead in ways that will enable them to be active participants in the solution to the planet's environmental and social problems.

School Business

Discipline Organisation Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 8728 - Creating Sustainable Organisations

Restrictions

Students must be enrolled in a postgraduate Business program or 3693 Master of Engineering.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate knowledge of the meaning and key principles underpinning the notion of sustainability;
2. Explain the benefits and importance of creating sustainable organisations in ways that are appropriate to influence business decision-makers;
3. Make recommendations on processes for the introduction of sustainability in business, organisations, including processes to foster leadership for sustainability;
4. Apply appropriate models and frameworks for sustainability practice and decision-making in organisations;
5. Identify the benefits of sustainability for both business and society and demonstrate that appreciation through reflective analysis.

Subject Content

- what is sustainability?
- The business case for sustainability
- leadership and sustainability
- sustainability Models
- Measuring and Reporting sustainability
- strategic sustainability
- social sustainability
- sustainability and The Global environment
- The future of sustainability

Assessment

BUSM 7021 Credit and Lending Decisions

Credit Points 10

Legacy Code 51166

Coordinator Vivienne Saverimuttu ([https://directory.westernsydney.edu.au/search/name/Vivienne Saverimuttu/](https://directory.westernsydney.edu.au/search/name/Vivienne%20Saverimuttu/))

Description Lending is one of the most important functions of any financial institution. If not managed properly, it can lead to credit quality problems, threatening the existence of the financial institution. This unit aims to provide an analysis of the various lending activities of financial institutions, emphasising the assessment of credit proposals and the management of credit risk.

School Business

Discipline Business And Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Business program.

Assumed Knowledge

51163 Financial Institutions and Markets and/or 51164 Finance / 200426 Corporate Finance.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply constructive lending practices with due consideration of the interactive relationship between different banking activities, structures and risks;
2. Apply knowledge of credit risk assessment principles and processes to conduct proficient credit risk assessment;

3. Analyse lending information to detect different credit risk components and to make reasoned judgements appropriate to the circumstances;
4. Integrate the spectrum of knowledge and information to generate constructive lending solutions.

Subject Content

The principles of lending and lending basics
 Financial statements analysis
 Credit scoring techniques
 Credit risk analysis
 Consumer lending
 Real estate lending
 Security, consumer credit legislation and legal issues
 Corporate lending
 Small business lending
 International lending
 Credit risk measurement and loan portfolio management

Assessment

BUSM 7022 Derivatives

Credit Points 10

Legacy Code 51169

Coordinator Peter Kavalamthara ([https://directory.westernsydney.edu.au/search/name/Peter Kavalamthara/](https://directory.westernsydney.edu.au/search/name/Peter%20Kavalamthara/))

Description This unit provides an introduction to the major classes of derivatives: forwards, futures, swaps and options. These are studied in detail with the objective of elucidating the ways in which these instruments can be used for the purposes of hedging, speculation and arbitrage. In addition to the analysis of derivative usage and market growth, considerable attention is given to the objective of gaining an understanding of the fundamentals of derivative pricing.

School Business

Discipline Business And Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Business program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the operational mechanics of derivatives trading;
2. Analyse the roles of the key participants in derivatives markets;
3. Evaluate the institutional and organisational structure of key derivatives markets;
4. Analyse the theoretical background to derivatives pricing such as cash and carry arbitrage and probability-based models;
5. Explain the history of derivatives markets and risk management generally.

Subject Content

The nature of derivatives
 Mechanics of futures markets
 Hedging strategies
 Using derivatives for risk management
 Determination of forward and futures prices
 Interest rate futures
 Swaps
 Mechanics of options markets
 Properties of stock options
 Trading strategies involving options
 Introduction to option pricing models

BUSM 7023 Developing Business Expertise

Credit Points 10

Legacy Code 200790

Coordinator Laurel Jackson ([https://directory.westernsydney.edu.au/search/name/Laurel Jackson/](https://directory.westernsydney.edu.au/search/name/Laurel%20Jackson/))

Description This unit addresses one of the key internal issues facing business today: understanding and using a range of business information to make strategic decisions. Students will use the knowledge gained from prior units to solve business problems, deal with unique situations or plan and manage changing circumstances. A multi-disciplinary approach to analyse business situations will be applied to enable students to recognise this inter-related nature of business disciplines. A simulated practice in the application of knowledge to complex situations will be applied to provide an experiential learning environment.

School Business

Discipline Business Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 2755 Master of Business Administration, 2757 Graduate Certificate in Business Administration, 2762 Executive Master of Business Administration.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the basic methods of designing and managing internal business processes;
2. Demonstrate independent and interdependent learning in preparation for professional roles in management;
3. Apply aspects of process management to plan and manage changing circumstances;
4. Apply project management skills to achieve organisational objectives;
5. Critically evaluate the importance of introducing and maintaining quality standards from a multi-disciplinary approach.

Subject Content

- process analysis and design
- introduction to Project management
- Understanding Operations, capacity, costs and customers
- implementing and maintaining quality Issues
- business strategy
- value Proposition
- Integrate the relevant theories from prior units studied to identify organisational objectives (business, government, and/or not for profit) within changing circumstances

BUSM 7024 Developing Human Capital and Organisational Capability

Credit Points 10

Legacy Code 200827

Coordinator Nelson D'Souza ([https://directory.westernsydney.edu.au/search/name/Nelson DSouza/](https://directory.westernsydney.edu.au/search/name/Nelson%20DSouza/))

Description The unit equips students to lead human resource development initiatives by developing specialist knowledge and skills. Contemporary human resource development is studied within the context of strategic employment relations, challenges around talent management, the evolution of training and development in firms and in public institutions, and with some consideration of organisational learning. By working through stakeholder differences and labour market segments, students argue as they apply knowledge to different contexts. Through argument and application comes insight into critical perspectives on building human capability, career management and development, and current and future trends in human resource development in a number of countries.

School Business

Discipline Human Resource Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 8882 - Employee Training and Development
LGYA 4896 - Developing Human Capital

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain human resource development and career concepts and discuss the value and impact of human resource development to organisations and economies;
2. Analyse the major characteristics of strategic human resource development and explain the alignment of human resource strategies with business strategies via core people competencies and talent management;
3. Explain challenges and responses to competing perspectives and interests around human resource development in organisations and around public education/training infrastructure;

Subject Content

- human capital and organisational capability ? The strategic role of HRD
- HRD in context ? external Factors shaping organisational priorities and planning
- The HRD lifecycle ? from on-boarding to succession planning
- The contribution of current ideas in Adult and workplace learning to human resource development.
- Analysing, designing and implementing learning and development
- key practice skills in HRD ? partnerships, coaching and mentoring
- Measuring HRD impacts ? evaluation processes and employee engagement and retention Metrics
- targeted HRD Initiatives ? supporting workplace diversity, talent management and leadership development
- The evolution of career management
- Ethical human resource development

BUSM 7025 Diversity, Labour Markets and Workforce Planning

Credit Points 10

Legacy Code 200828

Coordinator Michael Lyons ([https://directory.westernsydney.edu.au/search/name/Michael Lyons/](https://directory.westernsydney.edu.au/search/name/Michael%20Lyons/))

Description Demographic change, economic cycles and labour force participation patterns influence the manner in which HRM functions are conducted. This unit focuses on the way an organisation's external environment impacts on both strategic and workforce maintenance planning. The unit is designed to enable employment relations professionals and managers to plan for organisational sustainability, managing workforce-related risk, and growth. The emphasis on labour markets, workforce diversity and planning allows for accommodation of demographic changes, human capital shortages and economic cycles when planning for labour supply and labour demand requirements. While the aim is to identify gaps between the present and future human capital needs - and implementing solutions so the organisation can accomplish its mission, goals, and objectives - the difficulty of this systematic and proactive process increases with the complexity of an organisation and the longer the time horizon used in the planning.

School Business

Discipline Human Resource Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 8596 - Work and Society LGYA 4899 - Work Society and Labour Markets LGYA 4901 - Workforce Planning

Restrictions

Students must be enrolled in a postgraduate program or program 8083 Bachelor of Research.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe and explain the relationship between labour markets and HRM functions;
2. Analyse the implications of key demographic and economic changes impacting on the labour supply for workforce planning and workplace diversity;
3. Evaluate the merits of workplace diversity strategies to advance organisational and social objectives;
4. Develop workforce plans and HRM strategies that align with organisational goals;
5. Assess developments and innovations in management approaches to workplace diversity and workforce planning.

Subject Content

- labour markets: concepts, dimensions and diversity
- The Australian labour market: Trends, patterns and cycles
- international, Regional and industry labour markets
- labour market Disadvantage: causes and consequences
- labour market and workplace diversity
- workplace diversity strategies: from compliance to Integrating workplace diversity principles with HRM practices
- Workforce planning concepts: Alignment with HRM processes

- Workforce planning contexts: Demography, educational infrastructure and The economy
- strategic Workforce planning: Forecasting and planning labour demand and labour Supply

BUSM 7026 Emerging Leaders

Credit Points 10

Legacy Code 200789

Coordinator Sheree Gregory (<https://directory.westernsydney.edu.au/search/name/Sheree Gregory/>)

Description Developing competitive advantage in a globalised business context demands that leaders recognise the imperative of managing stakeholders during periods of significant and complex organisational strategic change. The focus of 'Emerging Leaders' is the development of skills and knowledge that underpins capacities for successful strategic partnering both within and outside the organisation. Engaging with the research and debates on leadership as they relate to current leadership practice and principles in various international and organisational contexts means these newly emerging leaders will be in a position to lead and ensure the performance of individuals, teams and organisations.

BUSM 7027 Employment Relations Professional Practice

Credit Points 10

Legacy Code 200717

Coordinator Khalida Malik (<https://directory.westernsydney.edu.au/search/name/Khalida Malik/>)

Description Employment Relations Professional Practice concentrates on communicating and performing as employment relations professionals. Students practice the activities undertaken by professionals, such as advocacy and presentation, team work, information and knowledge management, research, analysis and problem solving, and producing reports, policies and analytical essays, with opportunities for feedback. The focus is knowledge of the ER professions, such as the role, function and ethics of human resource managers, industrial officers and the role of professional bodies in Australia and internationally. Support for academic practice will accompany professional activities. The unit is designed for those wanting to build a career in employment relations.

School Business

Discipline Human Resource Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Basic knowledge of human resource management objectives and functions from undergraduate study or work experience; it is recommended that students complete this subject in the same quarter as 200718 Human Resource Management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the kinds of activities and work that they will be expected to perform and ethical and political challenges they will encounter as an employment relations professional in a number of contexts to bring knowledge and study to life through responsible engagement and appreciation of competing stakeholder perspectives;
2. Simulate the behaviours required of employment relations professionals to become a credible activist, such as successful advocacy, negotiation and feedback practices;
3. Apply the Australian Human Resource Institute criteria of professional practice to the areas of professional practice discussed in the subject;

4. Explain the value of working as a team, diagnose problems that can arise, and make recommendations to enhance team performance as progress towards becoming a stakeholder manager and a culture and change agent;
5. Undertake some career planning activities as progress towards developing management knowledge through applied intellectual inquiry in discipline contexts.

Subject Content

1. Characteristics of professional work; role and functions of employment relations professionals
2. Dynamics of teams and groups
3. Working in the technology and information age; HR technology and knowledge management
4. Library and internet research for employment relations professionals
5. Learning for professional practice; feedback and coaching; reflective practice
6. Introduction to negotiation practice
7. Ethics and challenges for employment relations professionals
8. Work health and safety (WHS)
9. Winning your case: writing and speaking persuasively
10. Analysis and problem solving for professional practice
11. Building an employment relations career

Teaching Periods

BUSM 7030 Facilities and Venue Management

Credit Points 10

Legacy Code 200846

Coordinator Colin Sheringham ([https://directory.westernsydney.edu.au/search/name/Colin Sheringham/](https://directory.westernsydney.edu.au/search/name/Colin%20Sheringham/))

Description Increasingly, hospitality-orientated businesses involve large scale or specialist facilities and venues which require ongoing development, maintenance and redevelopment. This unit provides an understanding of key principles involved in the design and redesign of the use of space, drawing on the principles of servicescapes and planning for a customer experience. Consideration is given to the functional, organisational, environmental and aesthetic aspects of facilities and venues, in the context of organisations which need to manage revenue and distribution channels to remain competitive and sustainable.

School Business

Discipline Business And Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Business program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the challenges facing hospitality managers in the development and design of facilities and venues in terms of asset management and financing, environmental sustainability, or risk management;
2. Make recommendations to enhance the hospitality context and the **servicescape** in ways that use assets efficiently, are environmentally sustainable, and/or minimise risk to employees, customers and assets;
3. Identify and discuss aspects of asset management in relation to servicescapes and sustainability;
4. Comprehend and document issues of ownership, management and franchising in hospitality;
5. Detail the relationship between facility and venue design and the customer/guest.

Subject Content

1. Hospitality facilities and venues ? design, maintenance and redesign
2. Servicescapes and leiscapes as areas for the delivery of a hospitality experience
3. Incorporating environmental sustainability into facility and venue design and operations
4. Ownership of facilities and venues
5. The role of the guest within a facility or venue
6. Functions, organisational, environmental and aesthetic elements of design

7. The role of design in generating revenue
8. Distinctions of form and function in facilities and venue design

Prescribed Texts

BUSM 7034 Foundations of Management

Credit Points 10

Legacy Code 200785

Coordinator Louise Kippist ([https://directory.westernsydney.edu.au/search/name/Louise Kippist/](https://directory.westernsydney.edu.au/search/name/Louise%20Kippist/))

Description Developing one's own professional skills, being able to assess and develop the skills of others, and astutely reading the environment, are core to high-achieving executives. Foundations of Management introduces new managers to the fundamentals of management. It takes an holistic view of the elements related to optimal performance of managers, drawing from and reflecting upon participants' experiences. The elements consist of the awareness of ones self as a manager, identifying and developing own management skills required for now and the future needed when working within a dynamic organisational environment. The focus is developing one's own management skills through the application of theory to management practice.

School Business

Discipline Business Management

Student Contribution Band HECS Band 4 10cp

BUSM 7037 Gastronomy and the Food and Beverage Experience

Credit Points 10

Legacy Code 200842

Coordinator Catherine Link ([https://directory.westernsydney.edu.au/search/name/Catherine Link/](https://directory.westernsydney.edu.au/search/name/Catherine%20Link/))

Description This unit focuses on the provision of food and beverage - a fundamental operational component of the majority of hospitality businesses. As consumer understanding of food and beverage increases there is a need for the industry to advance their knowledge

and for businesses to provide offerings which extend beyond the traditional food and beverage frameworks in order to stay competitive. The role of food within society and subsequent commercial implications, including gastronomic tourism, food quality and safety are discussed in this unit.

School Business

Discipline Hospitality Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 4590 - Gastronomy and the Management of the Food Experience

Restrictions

Students must be enrolled in a postgraduate Business program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define gastronomy within a social and cultural context to explain why we eat what we eat;
2. Analyse the economic, socio-cultural, environmental factors that shape gastronomic practice and culinary appreciation in contemporary society;
3. Distinguish trends in foodservice and opportunities in the area of commercial provision of food, including eco-gastronomy, slow food and culinary tourism;
4. Critically analyse the nature of the meal experience and the value of culinary experiences to the hospitality industry;
5. Appraise current gastronomic issues and how these issues will impact on the commercial provision of food in the hospitality industry context.

Subject Content

1. A historical perspective of gastronomy and the role of food in society and culture
2. The development of the modern industrial food system and its implication for the Hospitality industry: the experience economy, culinary tourism
3. The development of the meal as a culinary experience
4. Food as a cultural product: gastronomic tourism, food media, food and cities
5. Five functions model of dining
6. Food and the media ? implications for the industry
7. Implications of food trends on the prepared food retailer

BUSM 7045 Innovation Through Digital Technology

Credit Points 10

Legacy Code 200845

Coordinator Qiuyan Fan ([https://directory.westernsydney.edu.au/search/name/Qiuyan Fan/](https://directory.westernsydney.edu.au/search/name/Qiuyan%20Fan/))

Description Business innovation in the Digital Economy recognises that current economic development and leadership is based on digitisation of the global economy. This unit provides a framework for understanding management issues, business development and technology use and change in the areas of innovation and digital business. The unit introduces students to various digital technologies and applications that companies need to address for creating new business opportunities in the fast changing global business environment. Students will develop an appreciation of digital business as a form of organisational innovation and the importance of innovation in the digital economy. Students will learn to formulate a digital business strategy for an organisation and understand various issues involved in digital business innovation. Students will be exposed to the University's business and technology incubator environment.

School Business

Discipline Business And Management

Student Contribution Band HECS Band 4 10cp

BUSM 7046 Innovation for New Markets

Credit Points 10

Legacy Code 200851

Coordinator Tendai Chikweche ([https://directory.westernsydney.edu.au/search/name/Tendai Chikweche/](https://directory.westernsydney.edu.au/search/name/Tendai%20Chikweche/))

Description Entrepreneurship, innovation and new markets are pertinent activities that have collectively become cornerstones of how firms grow and interact with society. This unit introduces students to issues, principles and frameworks associated with exploring opportunities and challenges that relate to these three activities. Emerging and new markets are examples of markets that represent opportunities and challenges for innovation and entrepreneurial activities. Through selected readings that emphasise key themes and issues, students will be exposed to an understanding of what constitutes entrepreneurship, innovation, new markets and market development, how they are influenced by the ever-changing business environment, an examination of opportunities that emerge as a result of changing technology and consumer expectations taking place in emerging and new markets. Emerging markets have become a key source of innovation in products, services and business processes which calls for an examination as to whether these can be extended to developed markets. The unit provides students with an opportunity for continuous practical experiential learning through collaboration with industry Launch Pad partners.

School Business

Discipline Business And Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Business program or be enrolled in the 3698 Master of Information and Communications Technology (Advanced), 3693 Master of Engineering, 3749 Master of Information and Communications Technology or 3749 Master of Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe and explain the nature and importance of new markets, examining the challenges and opportunities;
2. Develop strategies for managing and exploring the challenges and opportunities posed by new markets such as market entry, market development and managing institutional support mechanisms;
3. Examine and apply the key elements of entrepreneurship and the drivers of value creation in the context of emerging and new markets;
4. Describe and assess how emerging and new markets are associated with global innovation cycles, potential e-business platforms and prospects for open innovation and reverse innovation.

Subject Content

1. New Market Entry and Development

- new market formations and opportunities e.g. Telecommunications revolution
 - mediating Variables for new markets. e.g. legal and Regulatory, economic, political/culture, Intellectual property
 - strategic Issues for new market entry and development. e.g. institutional support Structures

2. Innovation and Entrepreneurship In Emerging Markets and New Markets

- Defining characteristics and scope of emerging markets .i.e. Brazil, Russia, India, China (BRIC), Africa, Latin America, Asia, and the Middle East
 - Entrepreneurship and The drivers of value Creation in emerging markets.eg, role of networks, knowledge and Intellectual property
 - Reverse innovation -emerging markets to advanced markets
 - innovation cycles for emerging and new markets
 - open innovation

BUSM 7047 Innovation, Creativity and Entrepreneurship

Credit Points 10

Legacy Code 200792

Coordinator Hugh Pattinson ([https://directory.westernsydney.edu.au/search/name/Hugh Pattinson/](https://directory.westernsydney.edu.au/search/name/Hugh%20Pattinson/))

Description The aim of this unit is to provide students with the necessary skills to understand, execute and manage entrepreneurial innovation processes in firms/organisations, and be more prepared to succeed within an increasingly complex, global and highly competitive entrepreneurial environment. Firms/organisations of various sizes, including small and medium enterprises (SMEs) that are innovative

and entrepreneurial provide vision, nurture creativity and idea management as part of their everyday activities and in seeking long-term sustainability.

School Business

Discipline Business Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 8997 - Innovation and Entrepreneurship

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Illustrate the importance of innovation and entrepreneurship in an applied enterprise and organisational (firm/organisation) context;
2. Examine management approaches that foster innovativeness and entrepreneurship in a firm/ organisation, both from a large and small (SME) perspective;
3. Engage in the process of identifying entrepreneurial opportunities, particularly those based on innovation;
4. Undertake a feasibility study and develop a new venture plan for the commercialisation of new research ideas, whereby both innovation and entrepreneurship are referred to and adopted as the core aspects of the study;
5. Evaluate the impact of contemporary and emerging themes related to innovation and entrepreneurship, in particular themes that underline the long-term sustainability of a firm/organisation.

Subject Content

The innovation process:

- the mindset of the entrepreneur;
- new venture planning/creation;
- business feasibility planning; and
- emerging Issues that directly and indirectly impact innovation and entrepreneurial processes.

Some of the emerging issues include: the (increasingly) stronger links between entrepreneurship and sustainability in its various forms, such as business/financial, social and environmental; the emergence of new technologies that help support innovation/ entrepreneurship, new business concepts, and changes in legislation.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Essay based on case study	1,000 words max.	30	N	Individual
Proposal "presented to a panel" format	2,000 words equivalent	30	N	Group
Feasibility study	2,000 words	40	N	Individual

Teaching Periods

BUSM 7048 Innovation, Creativity and Foresight

Credit Points 10

Legacy Code 200852

Coordinator Hasnain Zaheer ([https://directory.westernsydney.edu.au/search/name/Hasnain Zaheer/](https://directory.westernsydney.edu.au/search/name/Hasnain%20Zaheer/))

Description Creativity is a systematic, logical process mixing imaginative and creative thinking. Ideation is a process for forming and relating ideas derived through creativity. Innovation seeks to take ideas through invention and entrepreneurial processes to create new economic and social value. Students will be exposed to a variety of brainstorming, creativity and foresight methods and tools, with emphasis on scenario planning methods. Students will be introduced to workshop development, moderation and management approaches and methods. Selected key themes on economic, social, technological, and sustainable development for Australia over the next 10-30 years will be analysed and developed through a scenario planning workshop process, with outputs mapped to business and social innovation and entrepreneurship thinking, and platforms. Students will also be exposed to creativity and foresight methods used by the Western Sydney University Launch Pad Business Technology Incubator.

School Business

Discipline Business and Management, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Business program or be enrolled in the Master of Information and Communications Technology (Advanced), Master of Information and Communications Technology, Master of Research or or Master of Science ? Food Science Specialisation.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe, assess and select appropriate methods, principles and frameworks for creativity, ideation and innovation as individual steps or as a complete cycle;
2. Classify key foresight principles, methods and tools;
3. Develop, commission, and moderate creativity and foresight workshops, with emphasis on scenario planning;
4. Develop outputs from scenario planning workshops on key themes related to key issues including **g**sustainability**h**, economic and business regeneration, smart cities, emerging technologies, and other issues relevant to Australian and regional environmental challenges out to 2030-40.

Subject Content

1. Creativity, ideation and innovation: creating and turning ideas into innovation
2. Creative thinking and ideation philosophies and methods
3. From futures studies to foresight: developing conversations about the future

- foresight philosophy and methods

- Scenario planning approaches and methods

4. Moderating creativity and foresight workshops focused around selected themes for economic, social, technological, and sustainable development out to 2030-40

5. Creativity, ideation and innovation and entrepreneurship sensemaking

- application of creativity and foresight workshop outcomes to innovation, business and social Entrepreneurship mindsets, systems and platforms

BUSM 7050 Integrated Business Experience 1

Credit Points 10

Legacy Code 200831

Coordinator Laurel Jackson ([https://directory.westernsydney.edu.au/search/name/Laurel Jackson/](https://directory.westernsydney.edu.au/search/name/Laurel%20Jackson/))

Description Successful professionals must be able to view issues and problems from multiple perspectives and be able to utilise a range of different skills to make appropriate decisions. This unit introduces this multi-faceted approach to business by taking the knowledge gained in earlier units and of the real-world of business and applying this via case studies. Students will be expected to work independently and in syndicate teams to solve common issues facing businesses and policy makers using critical, integrative and creative thinking. It is recommended that this unit be the final subject within the graduate certificate.

School Business

Discipline Business And Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Business program. Students enrolled in the 2765 Graduate Certificate of Business must have successfully completed 20 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and evaluate issues that impact on the successful management of an organisation;
2. Demonstrate the skills for critical and reflective thinking as part of strategic planning;
3. Apply knowledge from accounting, economic management, human resource management, operations and marketing perspectives to business;
4. Demonstrate the ability to develop practical solutions for contemporary issues facing business;
5. Reflect and review group and individual performance as part of decision making activities.

Subject Content

- introduction to contemporary Organisations and contexts
 - Overview of management decision making and policy making
 - assess and analyse The financial Issues facing Organisations
 - assess and analyse human resource management perspectives and impacts
 - assess and analyse The value of customers and Customer focus
 - assess and analyse The management of Operations
 - undertake and Evaluate competitive assessments
 - understand The environmental context of management, including organisational culture, planning and change.
1. Introduction to contemporary organisations and contexts
 2. Overview of management decision making and policy making

BUSM 7054 International and Global Employment Relations

Credit Points 10

Legacy Code 200720

Coordinator Ben Imbun (https://directory.westernsydney.edu.au/search/name/Ben_Imbun/)

Description This unit is designed to put national-level employment relations into international and global perspectives. Students will be equipped to work in globalised labour markets and to assist organisations in responding effectively to international environments. The nature of globalisation, national systems of employment relations and significant contemporary human resource management issues are explored. The implications of social, cultural, political and economic factors in differing national, international and global contexts for employment relations strategies and practices are examined.

School Business

Discipline Human Resource Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 8593 - International Human Resource Management LGYA 8584 - Themes in International and Comparative Employment Relations

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the nature of key international and global employment relations forces, including national structures and processes and their implications for employment relations
2. Analyse and explain the strategic role of human resource management in dealing effectively with international and global employment relations issues and national systems of employment relations
3. Explain the implications of international and global employment relations issues for the achievement of organisational goals
4. Make meaningful recommendations on how an organisation's employment relations policies and practises can respond to international and global employment relations pressures
5. Develop policies to accommodate different national employment relations systems and laws
6. Develop human resource management policies to address contemporary pressures for reform of employment relations practices

Subject Content

- international and Global business drivers: implications for HRM
- A conceptual framework for Analysing international and Global ER forces, stakeholders and practices
- key functions and objectives of international human resource management
- nature and implications of key Stakeholder interests in The context of international and Global ER
- legal, political, social and cultural Issues impacting upon international IR and HRM
- ILO, EU, NAFTA and other international employment relations regulations
- Comparisons of national systems of employment relations
- key contemporary ER and HRM Issues and pressures for reform at The Global and national levels
- Developing HRM policies and practices to deal with differing national ER structures, standards and pressures
- developing Ethical HRM practices at The Global and international levels
- Contributing to good corporate Governance through effective international HRM policies and practices

BUSM 7055 Internship

Credit Points 10

Legacy Code 200830

Coordinator Laurel Jackson ([https://directory.westernsydney.edu.au/search/name/Laurel Jackson/](https://directory.westernsydney.edu.au/search/name/Laurel%20Jackson/))

Description This is a 20 credit point subject over two Quarters, 20 weeks in total, 10 credit points in each Quarter. Internship is designed for students who want to gain industry experience and further their

studies through a 20-credit point business internship, conducted over two consecutive teaching sessions. This Internship subject is based on a 'project style' subject which requires students to undertake a research project in their chosen field whilst attending an industry-based internship. These highly sought after internships will be filled on a competitive basis.

School Business

Discipline Business Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Business program. The online offerings for this subject are only available to students enrolled in programs 2770 Master of Commerce (Financial Planning) and 2793 Master of Financial Planning. Students in the following programs must have completed 60 credit points before undertaking this unit: 2793 Master of Financial Planning; 2770 Master of Commerce (Financial Planning); 2624 Master of Business (Operations Management) and 2764 Master of Commerce (Human Resource Management). Students in program 2761 Master of Business Administration must have completed all core subjects plus 40 credit points of major subjects (i.e. a total of 80 credit points) and must obtain permission of the Director of Academic Program before undertaking this subject.

Assumed Knowledge

Understanding of the business environment and organisational structures, business communications skills, business strategy, as well as substantial knowledge in the major discipline area.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Investigate a real business issue within a specific organisation/business.
2. Analyse and interpret secondary data gathered from a range of sources, to assist in defining the business issue.
3. Demonstrate the links between theory and practical work environments by using appropriate theoretic frameworks to analyse novel workplace situations.
4. Apply and apprise appropriate skills and knowledge to work productively in a relevant discipline-related business workplace.

Subject Content

The internship must be approved by the subject Coordinator prior to students commencing in it. Each internship will involve a literature survey, application of theory and techniques to an industry based problem, methodological investigation, reporting and recommendations. Internships will be industry-based and directly relevant to the student's area of interest. Students will work in conjunction with the subject Coordinator and an academic supervisor who is an academic expert in their area of specialization. Students will meet with their Supervisor regularly throughout the study period and with the subject Coordinator, in a class environment, as defined by the subject guidelines.

BUSM 7058 Leading Contemporary Organisations

Credit Points 10

Legacy Code 200833

Coordinator Marion Cornish ([https://directory.westernsydney.edu.au/search/name/Marion Cornish/](https://directory.westernsydney.edu.au/search/name/Marion%20Cornish/))

Description This unit explores the processes and challenges encountered by leaders in contemporary organisations, taking into account rapidly changing environments. Through an in-depth appraisal of various leadership theories and concepts, it encourages students to reflect on the key competencies required for effective leadership. It also emphasises the importance of self-knowledge, values and ethics for contemporary leaders. Students will be required to design a leadership development program to address current and future leadership issues.

School Business

Discipline Business And Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Business program or 1850 - Master of Education (Leadership and Management).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the key individual competencies, processes and challenges for effective leadership;
2. Justify the importance of values and ethics in leadership;
3. Apply critical, reflective and creative skills to leadership-related processes;
4. Forecast relevant issues and competencies in leadership for the future;
5. Design a leadership development program to address current and future leadership issues.

Subject Content

- The leadership/management dichotomy
- leadership as A ?eprocess of interaction?f in A social context
- individual and Collective leadership competencies
- leadership for self-knowledge
- leading in changing organisational and industry contexts
- leadership in diverse cultural contexts
- leading in A Global context
- leadership for The future

BUSM 7059 Logistics Processes in Enterprise Resource Planning

Credit Points 10

Legacy Code 200836

Coordinator Premaratne Samaranayake ([https://directory.westernsydney.edu.au/search/name/Premaratne Samaranayake/](https://directory.westernsydney.edu.au/search/name/Premaratne%20Samaranayake/))

Description This unit introduces key logistics processes supported by modern ERP (Enterprise Resource Planning) systems, using an integrated process perspective of the firm. Each process within broader logistics processes provides the basis for executing logistics operations in a range of organisations across manufacturing, service and government sectors. Logistics processes are introduced through key process cycles including manufacturing, planning and control (MPC) in production planning, procurement cycle in purchasing, sales order processing in sales and distribution, and logistics execution. Cross-integration of these process cycles is also illustrated using various integrations among the procurement, fulfilment, production and warehouse management processes. Logistics processes are demonstrated using data, application and technical integration within an ERP system environment.

School Business

Discipline Business And Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Business program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate understanding of key functional areas of logistics processes in manufacturing and service organisations;
2. Explain master data, organisational structures and functions within key functional areas of organisation for effective logistics operations;
3. Perform various planning, control and execution functions within broader logistics processes using an ERP system, based on several planning/execution strategies;
4. Describe how data, application and technical integration works across key functional modules of ERP system, using functional applications and information systems;
5. Apply concepts and principles of logistics processes when implementing re-engineered processes in broader supply chain practices across various industry sectors.

Subject Content

- introduction to business processes
- The procurement process
- The fulfilment process
- sales and Operations planning and demand management processes
- The material planning process
- The production process
- inventory and warehouse management processes
- process integration
- Logistics execution ? selected Topics

1. Introduction to business processes
2. The procurement process
3. The fulfilment process
4. Sales and operations planning and demand management processes
5. The material planning process
6. The production process

7. Inventory and warehouse management processes
8. Process integration
9. Logistics execution ? selected topics

Assessment

BUSM 7060 Management Skills

Credit Points 10

Legacy Code 200768

Coordinator Louise Ingersoll (<https://directory.westernsydney.edu.au/search/name/LouiseIngersoll/>)

Description This unit explores the skills of managers and their effect on organisational leadership. The contemporary organisations in which we work bring together a complex array of relationships and processes that require ongoing development of a broad range of skills for the manager. Management and leadership, and the skills required for both, are not seen as separate in this unit. This unit focuses on building the skills which will best prepare managers and leaders for dynamic and changing organisational environments.

School Business

Discipline Organisation Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically evaluate the theory, research and practice of management and leadership;
2. Appraise the effect self awareness has on management and leadership behaviour;
3. Diagnose and recommend improvements in personal, group and organisational performance, using appropriate theoretical support;
4. Reflect on how various communication requirements and skills act as an integrating human relations tool for management and leadership;
5. Analyse the implications of individual development on leadership and management.

Subject Content

Contemporary management and leadership thinking
 Communication as management and leadership capability
 Creative individual and group problem solving
 Leadership of groups and teams
 Motivation and engagement in organisations
 Change management and leadership

Teaching Periods

BUSM 7061 Managerial Economics

Credit Points 10

Legacy Code 200793

Coordinator Vivienne Saverimuttu (<https://directory.westernsydney.edu.au/search/name/VivienneSaverimuttu/>)

Description This unit introduces students to the application of basic economic concepts to managerial decision-making and their use in a range of business environments. Students will learn how to apply microeconomic tools to common problems facing business managers, such as maximising profit, setting prices, creating efficient incentive structures, and selecting competitive strategies. Case studies are also used to demonstrate the value of microeconomic tools in making business decisions, and to foster the student's application of their learning to their own business environment.

Incompatible Subjects ECON 7001 - Economics (PG)

Restrictions

Students must be enrolled in the following programs: 5502 Graduate Certificate in Business Administration, 2755 Master of Business Administration, 2757 Graduate Certificate in Business Administration, 2762 Executive Master of Business Administration.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Determine basic economic tools that can guide businesses when selecting cost structures, output levels and a specific product mix;
2. Employ economic methods to guide the use of business resources, and to make investment decisions;
3. Examine the current market and industry changes at regional and global levels, and predict possible future developments;
4. Appraise the economic theories of strategy and bargaining, and develop an approach to deal with business uncertainty;
5. Evaluate alternative incentive programs, and determine which is most appropriate for their own business environment.

Subject Content

- managers, Profits, and markets
- demand, Supply and market Equilibrium
- Marginal analysis for Optimal decisions
- Basic estimation techniques
- theory of Consumer behaviour
- Elasticity and demand
- demand estimation and Forecasting
- Estimating and Forecasting industry demand for price-taking Firms
- production and cost in The short Run
- production and cost in The long Run
- production and cost estimation
- Managerial decisions in competitive markets
- Managerial decisions for Firms with market power
- decisions under Risk and uncertainty
- government regulation of business
- The investment decision

BUSM 7071 Negotiation and Conflict Resolution Management

Credit Points 10

Legacy Code 200796

Coordinator Laurel Jackson ([https://directory.westernsydney.edu.au/search/name/Laurel Jackson/](https://directory.westernsydney.edu.au/search/name/Laurel%20Jackson/))

Description Negotiation has become a strategic necessity for many firms wishing to survive and grow in today's increasingly competitive globalised economy. Negotiation and conflict resolution errors can be costly to direct and indirect stakeholders. As such, Negotiation and Conflict Resolution Management will provide theoretical frameworks for students to develop the practical skills needed to manage the negotiation and conflict resolution needs of any organisation. Through the use of role play and simulations, students will be required to analyse corporate data and apply strategies to create a negotiated agreement. It examines negotiation in different contexts including multiparty negotiations. Emphasis is also placed on causes of conflict and how to identify potential indicators, leading to an analysis of the different conflict modes and patterns.

School Business

Discipline Business Management

Student Contribution Band HECS Band 4 10cp

BUSM 7072 New Venture Finance

Credit Points 10

Legacy Code 200849

Coordinator Kamel Taoum ([https://directory.westernsydney.edu.au/search/name/Kamel Taoum/](https://directory.westernsydney.edu.au/search/name/Kamel%20Taoum/))

Description New Venture Finance introduces students to essential theories, frameworks, principles and requirements for understanding and seeking funding for new ventures, with a focus on investor philosophy. A dynamic approach to seeking initial and subsequent funding for developing innovations and entrepreneurship is emphasised in this unit, recognizing that most new ventures are not fully funded as they launch. The unit also explores approaches related to new ventures at the stage at which they are maturing into defined businesses. Students will be introduced to commercialisation and strategies for the development of business plans designed to seek funding and support.

BUSM 7073 One Hundred Days

Credit Points 10

Legacy Code 200797

Coordinator Sheree Gregory ([https://directory.westernsydney.edu.au/search/name/Sheree Gregory/](https://directory.westernsydney.edu.au/search/name/Sheree%20Gregory/))

Description This integrative unit focuses on the first one hundred days of a business executive who has commenced in a new management role. Students will gain insights into the challenges facing managers today and develop the skills in leadership and management expertise that were introduced in earlier units. The premise of this unit is that regardless of their level of experience, all managers undertaking new responsibilities need to understand who the key stakeholders are and what the business' personnel practices, financial objectives and marketing strategies are. Students will be given scenarios covering a range of business environments and are expected to problem solve these using the skills and knowledge learned in previous units.

School Business

Discipline Business Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) BUSM 7023

Restrictions

Students must be enrolled in 2755 Master of Business Administration, 2762 Executive Master of Business Administration.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret how business problems can have different implications depending on the environment in which they occur;
2. Evaluate the role and importance of internal and external stakeholders;
3. Conduct and execute the fundamentals of human resource management in context of the role of a newly appointed manager;
4. Create, manage and apply communication and public relations strategies as a senior manager;
5. Appraise management decision making during times of change and crisis;
6. Critique and assesses the risks and outcomes of poor decision making;
7. Examine the impact of corporate social responsibility and ethical standards on management decision making.

Subject Content

- analysis of different business environments, such as Consumer business ? retail, manufacturing/industrial, financial services, not for profit and government, to meet set goals and objectives
- Understanding The Roles of Internal and external stakeholders
- applying human resource management and industrial relations
- Utilising communication strategies and public relations Issues
- managing change within The context of corporate social responsibility and Ethical practices
- Crisis management identifying poor decision making and implications of this
- Analysis of different business environments, such as consumer business ? retail, manufacturing/industrial, financial services, not for profit and government, to meet set goals and objectives
- Understanding the roles of internal and external stakeholders
- Applying human resource management and industrial relations
- Utilising communication strategies and public relations issues

BUSM 7075 Philosophical Foundations of Business Research

Credit Points 20

Legacy Code 200743

Coordinator Terry Sloan ([https://directory.westernsydney.edu.au/search/name/Terry Sloan/](https://directory.westernsydney.edu.au/search/name/Terry%20Sloan/))

Description This unit aims to develop a deeper understanding of the theoretical traditions in business research, the philosophy of science that informs research and the methodological approaches in business research. We discuss in depth the assumptions behind two major paradigms: The deductive (quantitative) and the inductive (qualitative) paradigms.

School Business

Discipline Business and Management, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 20cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the characteristics of doctoral study and scholarly research;

2. Reflect on, explain and share the philosophical and practical differences of major research paradigms;
3. Critically assess what constitutes a theoretical contribution;
4. Critically assess the different methodological approaches in business research;
5. Demonstrate knowledge and skill to produce their own significant contribution to professional business practice and theory.

Subject Content

Aims, objectives and characteristics of doctoral study;
Philosophy of scholarly research in business
Epistemological and ontological differences of major research paradigms;
Differences in methodological approaches in business research;

Teaching Periods

BUSM 7076 Practice Management for Health Professionals (PG)

Credit Points 10

Legacy Code 400736

Coordinator Diana Messum ([https://directory.westernsydney.edu.au/search/name/Diana Messum/](https://directory.westernsydney.edu.au/search/name/Diana%20Messum/))

Description This unit is aimed to introduce the student to the management issues in establishing and working in a clinical practice. While the unit will cover issues related to health professionals and public sector management, the focus of the unit will be on issues in private practice. The aim of the unit is to introduce the student to a wide range of topics, including an over view of health care funding in Australia, private and public health system, developing a business plan, different business structures, financial management, managing staff and occupational health and safety issues.

School Health Sciences

Discipline Business Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Compare and contrast the global components of the health care system within Australia, with particular emphasis on funding arrangements for private and public sector funding.
2. Identify the key elements of a successful business plan, extrapolating these into a small business in a health care profession.
3. Outline the essential elements in establishing a small business, including business viability and raising capital.
4. Discuss the key issues in financial planning of a small business, with particular emphasis on taxation, insurance and related issues.
5. Manage a budget, with consideration to the income and types of expenditure required.
6. Delineate different business structures and employment arrangements, including partnerships, associates and affiliates.
7. Discuss the issues associated with the employment of staff, including employer and employee obligations.
8. Explore concepts and roles of leadership and management styles.
9. Identify the occupational health and safety issues within a small business and formulate ways in which a practice can be managed according to these guidelines.
10. Formulate methods of monitoring successful practice including the development and implementation of policies and procedures.

Subject Content

1. Overview of the Australian health care system
 - private Vs public sectors
 - funding Models for health care in Australia
 - Medicare
 - health Insurance
2. Setting up a small business
 - Raising capital
 - developing A business plan
 - developing A Marketing plan
 - Risk analysis
 - financial analysis
3. Financial Planning and Evaluation
 - managing budgets
 - capital Expenditure
 - Recurrent expenses
 - taxation and related Issues
 - investment and finance
 - funding, Loans and financial resources
 - investment and capital growth programs
4. Business Structures
 - company, Trusts etc.
 - registering A company
5. Types of employee contracts
 - rights and obligations of employers and employees
 - Workcover and compensation
 - Insurance Issues
 - employee Vs affiliate Vs partner
6. Managing Staff
 - management and competencies
 - management styles and leadership
 - employee relations
 - staff Recruitment and selection
 - staff retention
 - performance management
7. Occupational Health and Safety Issues

BUSM 7077 Preparation for Postgraduate Study in Business

Credit Points 40

Legacy Code 200942

Coordinator Laurel Jackson ([https://directory.westernsydney.edu.au/search/name/Laurel Jackson/](https://directory.westernsydney.edu.au/search/name/Laurel%20Jackson/))

Description Preparation for Postgraduate Study in Business complements and extends your prior learning providing advanced preparation in a range of business areas and a foundation for your further postgraduate business studies. An appreciation of the global economy will provide a framework for exploring people and culture as well as managing people in organisations. You will evaluate organisational performance using diverse data and intelligence and by interpreting financial statements. You will also explore essential aspects of financing enterprises and financial markets. This unit will enable you to develop the professional and academic skills necessary

for ethical conduct in business and in preparation for advanced study in postgraduate business courses.

School Business

Discipline Business And Management

Student Contribution Band HECS Band 4 40cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must have completed the Postgraduate Qualifying Program having demonstrated competency in all 10 learning modules.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Communicate effectively using Business literacy skills that are suited to audience and context;
2. Communicate effectively using verbal skills that are suited to audience and context;
3. Collaborate effectively in teams;
4. Apply contemporary and detailed business knowledge, critical thinking and problem solving in global business contexts;
5. Apply numeracy and information literacy skills to business situations;
6. Identify discipline-appropriate cultural issues and make recommendations for Business practice;
7. Critically analyse managerial decisions in terms of ethical practice and social responsibility.

Subject Content

- written communication for Postgraduate Study
- interpreting financial statements
- people and culture
- The Global economy
- Ethical enterprise practice
- verbal communication for Postgraduate Study
- enterprise Intelligence
- managing people and Organisations
- innovation and creativity
- fundamentals of finance

BUSM 7078 Project Management

Credit Points 10

Legacy Code 51240

Coordinator Dilupa Nakandala ([https://directory.westernsydney.edu.au/search/name/Dilupa Nakandala/](https://directory.westernsydney.edu.au/search/name/Dilupa%20Nakandala/))

Description This unit introduces students to the philosophy, tools and techniques for effectively managing projects in an organisation. Participants will be required to apply lessons learned to real-world situations and cases, developing their professional expertise in project management in ways that are relevant to their careers. Topics include organisational strategy and project selection; project definition and criteria of merit; tools and techniques; team leadership and management; development of project plans; estimation of time and resources; risk analysis and management; scheduling and control; resource allocation; project tracking; project closure and review. Participants will be expected to use MS Project as a project management tool.

School Business

Discipline Business And Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Business program, 3752 Master of Project Management or 3749 Master of Science. Students enrolled in other programs require approval from the Director of Academic Program for their program to enrol in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the role of project management and how projects link to corporate strategic planning and strategic management;
2. Apply knowledge and techniques on project planning;
3. Apply knowledge on project risk assessment and management;
4. Demonstrate knowledge on project progress controlling and monitoring;
5. Demonstrate an understanding of the importance of project completion and closure procedures;
6. Explain and apply the principles of managing project teams and resolving team conflicts.

Subject Content

Project life cycle, selection and initiation
 Organisational strategy and contexts
 Project planning
 Critical path method
 Resource scheduling
 Managing teams and leadership
 Managing risk
 Managing inter-organisational relations and international projects
 Project governance
 Introduction to agile project management
 Project progress and performance measurement
 Project closure and audit
 Determinants of project success and project failure

Legacy Code 200841

Coordinator Mahesh Enjeti ([https://directory.westernsydney.edu.au/search/name/Mahesh Enjeti/](https://directory.westernsydney.edu.au/search/name/Mahesh%20Enjeti/))

Description This unit critically examines strategic management processes in various business, industry and economic contexts. Students actively participate in experiential learning focussing on strategic leadership, visioning, situation analysis, objective setting and evaluation. Students apply current strategy models and theories to solving industry-specific problems and scenarios. The teaching methods are application-oriented using a variety of engaging technologies and media which simulate real-world strategic problem-solving.

School Business

Discipline Business Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Business or Information and Communications Technology program or be enrolled in program 3748 Master of Information Governance, 3772 Graduate Diploma in Protected Cropping or 3773 Graduate Certificate in Protected Cropping

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the impact of the key elements of strategic leadership, ethics and corporate social responsibility in the formation of strategy;
2. Critically reflect on the strengths and weaknesses of various approaches to the strategic management process;
3. Synthesise theoretical knowledge in undertaking strategic analysis;
4. Create strategies using models and theories of sustainable competitive advantage.

Subject Content

- introduction to theoretical approaches to strategic management processes that contribute to competitive advantage
- strategic thinking and analysis
- strategic formation and The setting of patterns for action
- measures of business performance
- The industry context
- business level strategy
- Network level strategy
- growth strategies in A multi-business context

BUSM 7087 Strategic Employment Relations

Credit Points 10

Legacy Code 200722

Coordinator George Lafferty ([https://directory.westernsydney.edu.au/search/name/George Lafferty/](https://directory.westernsydney.edu.au/search/name/George%20Lafferty/))

Description This capstone unit aims for students to acquire the skills, knowledge and understanding of the challenges of managing people strategically in complex and turbulent environments. The unit examines theories on business strategy, strategic management, human resource strategy and industrial relations strategy. The use of knowledge of Human Resource Management and Industrial Relations in strategic analysis and evaluation for transforming the people management function is explained. Management practice is considered through examining ways of acting strategically relative to tendencies for the human resource function to become mired in tactical responses. The tools and techniques for analysing, implementing and evaluating strategy are emphasised.

School Business

Discipline Human Resource Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 8573 - Employment Relations Strategy and Change

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Knowledge of human resource management and industrial relations from studying at least 40 credit points at the postgraduate level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain approaches to theories of organisational strategy and structure through contrasting a range of influential models;
2. Design strategies in relation to stakeholders and context using case examples;
3. Critically analyse various employment relations theories and models that seek to explain the processes of strategy formation;
4. Relate management, union and government policies to the wider strategic concerns of the organisation with special consideration of how strategic decisions are made and implemented;
5. Analyse the development and implementation of employment relations strategy within the environment of business planning and in relation to a specific organisation for organisational transformation;
6. Apply tools for strategy implementation and evaluation.

Subject Content

- strategic management
 - human resource management strategy
 - industrial relations strategy
 - human resource Transformation
 - human resource management, industrial relations and organisational change
 - Practising strategy
 - strategy evaluation: Balance Scorecard, human resource Metrics
1. Strategic Management
 2. Human Resource Management Strategy
 3. Industrial Relations Strategy
 4. Human Resource Transformation

5. Human Resource Management, Industrial Relations and Organisational Change
6. Practising Strategy
7. Strategy Evaluation: Balance Scorecard, Human Resource Metrics

BUSM 7088 Strategic Management

Credit Points 10

Legacy Code 200794

Coordinator Mahesh Enjeti ([https://directory.westernsydney.edu.au/search/name/Mahesh Enjeti/](https://directory.westernsydney.edu.au/search/name/Mahesh%20Enjeti/))

Description Strategic Management integrates business functional knowledge. The practical approach provides opportunities to use a range of strategic analysis tools and to engage in problem-solving (individually and collaboratively). Simulated strategic decision-making that includes data interpretation and generating options requires exercise of communication, research, and information literacy capabilities. This unit will allow MBA graduates to interpret data, generate strategic options and contribute to strategic decision-making in a number of organisational contexts.

School Business

Discipline Business Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects BUSM 7104 - Strategic Analysis and Decision Making

Restrictions

This is an integrated studies subject. Students must have successfully completed 70 credit points. Students must be enrolled in 2755 Master of Business Administration, 2757 Graduate Certificate in Business Administration, 2762 Executive Master of Business Administration.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Outline the development of strategy theory and practice;
2. Practice the skill of situational analysis using the insights gained from applying different theoretical lenses;
3. Apply knowledge from a range of functional disciplines in the interpretation of scenarios and the identification of options thus relating learning from other units in the MBA degree;
4. Develop an appreciation of the dynamic and contested nature of strategic management processes in organisational and industry contexts;
5. Critique the limitations of frequently cited theoretical explanations for organisation success and failure;
6. Analyse contemporary developments and practice in the field of strategy in the form of self-directed research (such as sustainability, governance, risk, ethics and innovation);
7. Critically reflect on strategic management as a process given the iterative and complex relationships between strategy, culture, ethics, structure, resources and environment.

Subject Content

- introduction to strategy
- strategic analysis (case method and tools of analysis)
- Theories of the firm [Industrial Organisation (I/O), Process Perspectives (OS), Resources Based Views (RBV)]
- contemporary Developments including knowledge based views (KBV) and integrated Models
- content of strategy (corporate, business, Network, international)
- contexts of strategy (organisational, international, industry)
- purpose (strategic reasoning, social responsibility, corporate mission and sustainability)
- Introduction to Strategy
- Strategic Analysis (Case Method and tools of analysis)
- Theories of the firm [Industrial Organisation (I/O), Process Perspectives (OS), Resources Based Views (RBV)]
- Contemporary developments including knowledge based views (KBV) and integrated models
- Content of Strategy (Corporate, Business, Network, International)
- Contexts of Strategy (Organisational, International, Industry)
- Purpose (Strategic Reasoning, Social Responsibility, Corporate Mission and Sustainability)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Case analysis report - Individual Case Analysis	1,000 words	30	N	Individual
Report based on case study - Group work presentation	1,500 words plus	30	N	Group
Final Exam	2 hrs	40	Y	Individual

BUSM 7090 Strategic Project Management

Credit Points 10

Legacy Code 301193

Coordinator Robert Osei-Kyei ([https://directory.westernsydney.edu.au/search/name/Robert Osei-Kyei/](https://directory.westernsydney.edu.au/search/name/Robert%20Osei-Kyei/))

Description This unit teaches students the importance of aligning projects with the business strategy. Strategic alignment is a two-way process. Overall business strategy guides project planning, and, in turn, project success drives enterprise strategy. Students understand the bigger-picture goals, how to identify what is being accomplished and why, and how to achieve goals. Other topics include measuring project success and portfolio and program management.

School Eng, Design & Built Env

Discipline Project Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in program 3752 Master of Project Management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate theoretical understanding of organisational strategy and the principles of competitive advantage and align these to project management
2. Analyse a company's mission, goals, and objectives, and develop a plan to ensure that project outcomes reflect an appropriate strategy
3. Evaluate critical success factors, use the principles of project portfolio management (PPM) to evaluate potential projects, and justify the selection of an appropriate portfolio that reflects company goals and objectives

4. Critically evaluate how project success can be quantified and measured, and construct a plan to allocate appropriate resources to the portfolio
5. Critically analyse project management and procurement strategies and critical success factors in the global business environment
6. Communicate effectively as a professional and function as an effective leader or member of a diverse team

Subject Content

Business strategy and its relation to projects
Mission, goals, objectives and processes to bring an organization's intended strategy to reality
Strategic choices and strategic management practices
Methods of aligning projects with strategy
Strategic evaluation and selection of projects to create a well-balanced portfolio
Critical success factors, financial evaluation criteria, and measuring project success
Procurement strategies
Strategic portfolio and program management
Managing projects in global context

Assessment

 Technology transfer
 The role of government
 Technological entrepreneurship
 Technology strategy
 Future challenges

Teaching Periods

BUSM 7092 Supply Chain Management

Credit Points 10

Legacy Code 200329

Coordinator Henry Lau ([https://directory.westernsydney.edu.au/search/name/Henry Lau/](https://directory.westernsydney.edu.au/search/name/Henry%20Lau/))

Description With a rapid increase in global trade and increasing customer expectations, firms are under considerable competitive pressure to find cost-effective and creative ways of delivering value to customers. Since the creation of customer value needs to be viewed

holistically - from raw material movement from suppliers through to transformation in the factory and then on to distributors and customers - the effective management of the supply chain and related business networks is critical to achieving competitive advantage. Through formal lectures, case study discussions, and assignments, this unit provides the foundational knowledge, tools, and techniques needed to participate in the design, implementation, and management of an effective supply chain.

School Business

Discipline Business And Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Business program, the Master of Research, 3752 Master of Project Management, 3693 Master of Engineering or 3749 Master of Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe supply chain and logistics processes and explain the underlying principles that support their effective management;
2. Elaborate on the role and importance of customer relationship management and its importance in developing an effective and efficient supply chain;
3. Identify the various elements of supply chain and logistics management processes and critically evaluate their role and interdependence in effective supply chain management;
4. Interpret, from a strategic perspective, the role and importance of supply chain management in enhancing competitive advantage;
5. Define and evaluate the networks and relationships present within supply chains;
6. Apply important tools and techniques for designing, operating and evaluating the performance of an effective supply chain management system.

Subject Content

21st century supply chains and logistics management
 Customer relationship management
 Procurement and manufacturing
 Integrated operations planning
 Inventory management
 Transportation, warehousing and packaging
 Global supply chains
 Network design and operations analysis
 Collaboration and performance management
 Risk and sustainability

BUSM 7098 Tourism Management

Credit Points 10

Legacy Code 200839

Coordinator Daniela Spanjaard (<https://directory.westernsydney.edu.au/search/name/Daniela-Spanjaard/>)

Description This unit considers concepts of tourism management and explores the structure of tourism from a systems approach across an Australian and international context. Consideration is given to the tourist motivation to explore why tourism is undertaken, ranging from the traditional to special interest. The objectives and benefits/risks are considered from each stakeholder's perspective where stakeholders may include relevant government organisations, tour operations, consumers, and service providers throughout the Tourism Supply Chain. Planning of the tourist experience is also explored to provide an improved understanding and management of tourists

School Business

Discipline Tourism Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Business program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically examine the tourist experience;
2. Analyse tourism as a system and its impact on regions within which it exists;
3. Develop a sustainable tourist experience which considers the various tourist stakeholders;
4. Evaluate and analyse a tourism supply chain;
5. Define and critique the latest in tourism trends.

Subject Content

1. History of tourism and tourism management within society
2. Trends in tourism including sustainable business practices, and special interest tourism
3. Stakeholder considerations as a consequence of tourism
4. Exploring the components of the tourism supply chain
5. Planning tourism experiences and understanding the tourist motivation
6. Social, business and environmental factors driving the tourism industry internationally, nationally and locally
7. Tourism as a partially industrialised system
8. Trends in tourism
9. Tourism as a system

BUSM 7101 Workplace Management Dynamics

Credit Points 10

Legacy Code 200725

Coordinator Ben Imbun ([https://directory.westernsydney.edu.au/search/name/Ben Imbun/](https://directory.westernsydney.edu.au/search/name/Ben%20Imbun/))

Description Workplace interactions are dynamic, fluid and responsive to changing economic, social, political and technological circumstances. Adopting a critical approach, the focus is on the concerns of managers and workers in their day-to-day interactions. Participants will explore the impact of organisational and socio-economic change on organisation stakeholders with emphasis on the impact of the new forms of work and technology, economic developments, workforce diversity, and cross-cultural communication. Dynamics equips business students with the ability to analyse and address a changing business environment, appropriate for careers in Australia and internationally.

School Business

Discipline Human Resource Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 4617 - Dynamics of Workplace Management LGYA 8768 - Managing Diversity

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Assess the extent to which organisations are driven by external pressures (such as competition, globalisation, economic transformation, and demography) relative to managers' capacity for strategic choice;
2. Describe developments in workplace management and employment relations associated with new forms of work and technology, workforce diversity, and developments arising from globalisation in Australia and internat

Subject Content

1. Changing context of work (economic, socio-political, globalisation)
2. Emerging business developments; responses to increasing competition (product, labour, and capital markets)
3. Changing organisation of work (skills, knowledge, technology)
4. Organisational culture, climate and change management
5. Managing and negotiating change
6. The challenge and opportunity of diversity
7. Communication, cooperation and conflict in the workplace
8. Diversity and cross-culture management

1. Changing context of work (economic, socio-political, globalisation)
2. Emerging business developments; responses to increasing competition (product, labour, and capital markets)
3. Changing organisation of work (skills, knowledge, technology)

BUSM 7105 Business Analytics in Practice

Credit Points 10

Legacy Code 201019

Coordinator Premaratne Samaranayake (<https://directory.westernsydney.edu.au/search/name/PremaratneSamaranayake/>)

Description This unit will explore and analyse ideas and concepts related to business intelligence and advanced analytics in business and broader economic contexts. The ability to identify, gather, extract, and analyse data is vital to organisations. Business analytics uses a variety of software applications to transform such data into useful information that can then be used for constructive decision making, improving operational effectiveness and efficiencies and identifying new business opportunities.

School Business

Discipline Business and Management, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects MKTG 7002 - Applied Marketing Solutions

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify which business problems require decision support from business analytics.

2. Determine reliability and validity of data and the business analytics methods used to address a business problem.
3. Recommend decision support systems while taking privacy, security and cultural issues into consideration.
4. Critically evaluate the tools and techniques used in developing business projections and performance reports.

Subject Content

1. Overview of business intelligence, analytics and decision support systems, focussing on broader functional applications.
2. Business intelligence, business reporting and business performance management.
3. Descriptive analytics.
4. Prescriptive analytics.
5. Introduction to advanced analytics techniques.
6. Business intelligence and analytics tools.
7. Data mining, text mining and web data analysis
8. Future directions for business analytics.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

BUSM 7106 Ethics and Professionalism in Financial Services

Credit Points 10

Legacy Code 201037

Coordinator Sharon Taylor ([https://directory.westernsydney.edu.au/search/name/Sharon Taylor/](https://directory.westernsydney.edu.au/search/name/Sharon%20Taylor/))

Description This unit will address the ways in which ethics play a pivotal role in professional behaviour. The process of professionalism is an integral part of management and is responsible for effective decision making. This unit considers the challenges in the financial services environment that require strong ethical values and professional judgement. Ethical decision making is a fundamental requirement of good business practice. This unit will consider the importance of ethics, the FASEA Code of Ethics, how to apply different ethical frameworks for decision making and the meaning of being a professional in financial services. This unit is available as a standalone bridging unit which is accredited by the Financial Adviser Standards and Ethics Authority (FASEA) having met the FASEA curriculum and standards requirements.

School Business

Discipline Business And Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program or students who have practical experience working in the financial planning industry and are currently registered on the national Financial Adviser Register (FAR) may take this subject as a non-award stand-alone subject in order to meet new education requirements as outlined by the Financial Adviser Standards and Ethics Authority (FASEA).

Assumed Knowledge

Students are expected to have practical experience working in the financial planning industry and be on the Financial Adviser Register.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of ethics, ethical behaviour and the importance of a code of ethics;
2. Critically review a variety of ethical frameworks and the ways in which they are used to apply professional standards;
3. Evaluate the fundamental principles of professional conduct and their role in a code of professional ethics;
4. Apply ethical frameworks to solve dilemmas that are encountered by advisers;
5. Demonstrate an understanding of professionalism and best practice;
6. Identify the importance of a financial adviser's duty to act in the best interest of the client;
7. Discuss the need for due diligence and the maintenance and storage of appropriate client records.

Subject Content

- Ethical frameworks
- Ethical decision making
- Judgment and Ethical behaviour
- trust, professional practice and The meaning of professional misconduct
- best practices including Due diligence, reflection avoiding Conflicts of interest
- codes of professional ethics - e.g. FASEA Code of ethics and its application
- professional independence and client centred ?gbest interest?h
- ethics in A corporate environment

BUSM 7109 Environmental Management: A Business Perspective

Credit Points 10

Legacy Code 201081

Coordinator Yi-Chen Lan ([https://directory.westernsydney.edu.au/search/name/Yi-Chen Lan/](https://directory.westernsydney.edu.au/search/name/Yi-Chen%20Lan/))

Description In this project oriented unit, students apply environmental management concepts within a business context. Students explore a range of practices and strategies to a sustainable business operation, learning why environmental sustainability is the world's most challenging and complex issue. As part of group work projects, students investigate methods and tools to analyse environmental management practices, determine environmental risks, and develop associated mitigation strategies. Additionally environmental

management systems and relevant international standards are used to evaluate business environmental performance in real-world cases and emerging environmental management initiatives, such as the circular economy, natural capital accounting, and environmental and social profit and loss.

School Business

Discipline Business And Management

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

A basic understanding of core competencies of a business operation and literature review skills is desirable.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate current environmental challenges impacting business operations along with the methodologies and tools that may be effective in addressing these challenges to provide business competitive advantage.
2. Design appropriate environmental management, risk management and mitigation strategies for enterprises that highlight effective methods to minimise environmental impacts.
3. Apply systems & strategic thinking in addressing enterprise financial profit and loss scenarios and integrating the concept of the circular economy.
4. Collaborate with others on a real work project justifying analyses and recommendations.
5. Present a compelling business case in a range of formats to diverse audiences that demonstrates critical thinking, scholarship and integrity.

Subject Content

1. Overview and the current situation in environmental management
2. Challenges and opportunities of environmental management (UN sustainable development goals 2030)
3. Environmental Strategies, Theories, and Practices
4. Environmental management tools
5. Business environmental accounting
6. Green supply chain management
7. Life cycle assessment and carbon footprint labelling
8. Circular economy
9. Moving forward: natural capital accounting, environmental and social profit & loss, and ESG

Coordinator Lorraine Sim ([https://directory.westernsydney.edu.au/search/name/Lorraine Sim/](https://directory.westernsydney.edu.au/search/name/Lorraine%20Sim/))

Description This unit aims to introduce students to important works of literature from the earlier part of the 20th century. Throughout the course we will be concentrating on literature but will make reference to other art forms (in particular the visual arts) to provide the intellectual context necessary to understanding the ideas of the period. There will be a close study of a small number of important novels or works of poetry from the period, with a close consideration of techniques of writing and the way these techniques contribute to an understanding of the themes in the works.

School Humanities & Comm Arts

Discipline Creative Arts, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate an understanding of Modernism and place it in intellectual, historical and artistic contexts;
2. demonstrate an understanding of certain key concepts and techniques important to the period; and
3. evaluate the importance of Modernist ideas and works in contemporary literature.

Subject Content

Nineteenth century influence on early 20th century practice: symbolism, realism

Ideas of artistic production

The impact of the visual arts on literature

Modernist Poetry

Modernist fiction: stream of consciousness

Modernist fiction: experimentation and tradition

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

CART 7004 Art Therapy: Approaches and Applications

Credit Points 20

Legacy Code 102354

Coordinator Patricia Parish ([https://directory.westernsydney.edu.au/search/name/Patricia Parish/](https://directory.westernsydney.edu.au/search/name/Patricia%20Parish/))

Description This unit introduces the spectrum and variety of contemporary art therapy approaches, as they are taken up with and regarded by diverse participants in a range of community and clinical contexts. Students will critically consider how art therapy is applied and adapted to assist people with particular problems and categories of distress. The emergence and problematisation of clinical populations and client groups will be examined, with a view to developing an art therapy practice informed by critical psychological and social perspectives. An experiential component will provide practical experience in exploring art therapy processes and techniques by working in group situations led by experienced art therapists.

Student Contribution Band HECS Band 2 20cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) CART 7005

Equivalent Subjects CART 7003 - Art Therapy Application to Client Groups

Restrictions

Students must be enrolled in 4595 Master of Art Therapy or 1770 Master of Social Science (Studies in Art Therapy)

Assumed Knowledge

Foundations of art therapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply understanding of the spectrum of contemporary art therapy theories and practices;

2. Appropriately adapt art therapy for diverse issues and clients in a variety of practice contexts;
3. Conduct immanent critique of art therapy professional practice, with particular regard to the positioning of clients and feedback from communities of concern such as client advocacy groups;
4. Develop observational, reflexive and facilitation skills needed to practice art therapy in a group context;
5. Reflect constructively on the art therapist's use of the self and art within the therapeutic relationship.

Subject Content

Consideration of a range of contemporary art therapy approaches, in relation to a variety of presenting issues, the diversity of clients, and the range of contexts for practice

Critical analysis of the relationships between theory & practice in a range of contemporary art therapy approaches

Critical psychological and sociological perspectives upon art therapy practice

Client perspectives on experiences of art therapy

Exploration of different art therapy processes and techniques in a group experiential learning context

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
A1 Proposal and Annotated Bibliography	500 words	10	N	Individual
A2 Literature Review	2,500 words	40	N	Individual
A3 ETG Reflection	3,000 words	50	Y	Individual

CART 7005 Art Therapy: Histories, Theories, Groups

Credit Points 20

Legacy Code 101303

Coordinator Patricia Parish ([https://directory.westernsydney.edu.au/search/name/Patricia Parish/](https://directory.westernsydney.edu.au/search/name/Patricia%20Parish/))

Description This unit explores theories and practical experiences relevant to art therapy. Consideration is given to the major theoretical frameworks of art therapy, its historical development and group processes. There is a major experiential component which provides practical experience in exploring the process of art therapy by working in a group situation led by an experienced art therapist/s. The process will be explored and examined in relation to the self, to the self as artist and to therapeutic practice.

Student Contribution Band HECS Band 2 20cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 7428 - Art Therapy Theory and Practice 1
LGYA 9676 - Art Therapy Theory and Practice 2

Restrictions

Students must be enrolled in 4595 Master of Art Therapy or 4617 Master of Social Science. Refer to the subject Outline for attendance requirements for experiential group sessions.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the histories and practices of art therapy and its development as a profession, with particular critical attention to the postcolonial Australian context.
2. Describe and compare the major theoretical frameworks of art therapy.
3. Explore and analyse the connections between theory and practice in art therapy
4. Practice art making skills and techniques and reflectively analyse the centrality of, and demonstrate an understanding of their significance within art therapy.
5. Show awareness of the self in one's own art making and reflectively analyse the centrality of this to the practice of art psychotherapy.
6. Recognise and investigate the processes in art therapy in groups.
7. Practice and reflect on interpersonal sensitivity and self-awareness in the experiential training group.

Subject Content

1. Historical overview of the development of art Therapy in Australia, Europe & North America
2. The history of art therapy and its relationship to psychiatry, education and the visual arts
3. Analysis of art therapy in a postcolonial context
4. Consideration of art therapy as clinical practice
5. The relationship between theory and practice
6. Exploration of the relationship between art practice & art therapy
7. Exploration of art therapy group process
8. Art making practice within a group experiential learning context

Credit Points 20

Legacy Code 102376

Coordinator Sally Macarthur ([https://directory.westernsydney.edu.au/search/name/Sally Macarthur/](https://directory.westernsydney.edu.au/search/name/Sally%20Macarthur/))

Description Research in communication arts utilises a range of investigative procedures appropriate to the theory and practice of each creative arts discipline. This unit will introduce fundamental research languages, methods, and outcomes relevant to the creative arts disciplines, and encourage students to develop approaches best suited to their theory and practice. Students will write and defend a research proposal and paper for a research program: the unit will enable students to apply a rigorous research framework to their work. Students will engage with a range of significant and critical texts which address the broad implications of practices and theories in creative arts disciplines.

School Humanities & Comm Arts

Discipline Creative Arts, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 20cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 1827 Master of Arts (Creative Arts) or the Master of Research.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe and evaluate social, cultural and theoretical contexts for creative and analytic work.
2. Develop and apply appropriate writing skills for research papers.
3. Develop and demonstrate appropriate analytic and research skills through collegial discussion.
4. Develop and demonstrate skills in self-directed, arts-based research, and independent thinking.
5. Identify the relationship between creativity and theoretical work.
6. Critique the creative models used in creative arts practice.

Subject Content

Approaches to creative practice and research
Theories of culture and communication
Visibility and knowledge
Novelty and mimicry
Interfaces and affect
Contemporary aesthetics

Assessment

Legacy Code 102527

Coordinator Joy Paton ([https://directory.westernsydney.edu.au/search/name/Joy Paton/](https://directory.westernsydney.edu.au/search/name/Joy%20Paton/))

Description This unit introduces art therapy students to an understanding of art psychotherapy theory through the lens of contemporary art and the translation of foundational psychotherapy knowledge and skills into art therapy practice. This unit builds on the micro skills of counselling and psychotherapy learned in Counselling Skills for the Allied Professions, through the scaffolded introduction and practice of art therapy clinical skills during intensive group work supported by staff. The unit also offers an opportunity for students to demonstrate their emerging understandings of art therapy by producing and exhibiting an artwork on a chosen aspect of the relationship between art and psychotherapy.

Incompatible Subjects WELF 7010 - Foundations of Psychotherapy and Counselling 2
CART 7011 - Integrating Arts and Therapy

Restrictions

Students must be enrolled in 4595 Master of Art Therapy.

Assumed Knowledge

Concurrent or previous study of foundational subjects in counselling and art therapy.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Practice beginning skills in art therapy effectively with a range of client groups and issues.
2. Demonstrate art therapy skills in practice sessions in ways that will enhance the therapeutic relationship and the progress of therapy
3. Reflect constructively on their art therapy practice from multiple positions
4. Analyse significant critical connections between the theoretical frameworks of contemporary art and art psychotherapy
5. Analyse the significance of studio art practice for the practicing art therapist
6. Curate own or client artwork around a therapeutic issue or theme

Subject Content

1. In-class practice of art therapy clinical skills to address a range of client issues.
2. Reflection on the experience of art therapy practice from the positions of trainee practitioner, participant and observer, including close analysis of video recordings of practice sessions.
3. Exploration of the connections and tensions between the theories and practices of art psychotherapy and those of contemporary art.
4. Planning, documenting progress toward and exhibiting an artwork that researches an aspect of the relationship between art and psychotherapy.
5. Critical consideration of the role of the exhibition in art therapy, including the intersections of art therapy with arts-based mental health recovery and the 'arts in health' movement.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

CART 7013 Masters Project

Credit Points 40

Legacy Code 102255

Coordinator Kate Fagan ([https://directory.westernsydney.edu.au/search/name/Kate Fagan/](https://directory.westernsydney.edu.au/search/name/Kate%20Fagan/))

Description The Masters Project is the culmination of the Master of Arts in Literature and Creative Writing. Students will build up to being able to complete a long written project. For many students this will be a creative project (creative writing, or related media including music). This involves both the creative work (normally 11,000 words) along with an 'exegesis' that offers a critical overview of the ideas within it (4,000 words). Other students might choose to write a long critical essay in literary studies (15,000 words). There is no class work; rather, students work individually with a supervisor with significant expertise in the area in researching and writing their Project.

School Humanities & Comm Arts

Discipline Creative Arts, Not Elsewhere Classified.

CART 7014 Research Methods in the Creative Arts

Credit Points 20

Legacy Code 102375

Coordinator Clare Maclean ([https://directory.westernsydney.edu.au/search/name/Clare Maclean/](https://directory.westernsydney.edu.au/search/name/Clare%20Maclean/))

Description This unit investigates conceptual and theoretical models used in Creative Arts Research. It introduces students to a variety

of important methodologies, including empiricism, experimentation, practice-based research, performativity-as-method, and narrative inquiry. It will also focus on writing as a creative praxis that has an important relationship to all the creative arts. Methodologies will be explored through the analysis of various theoretical and conceptual models that are applied in and produced through creative work. The unit will include a variety of strategies for analysing and documenting creative work, including observation, participation, reflection and representation. It will also examine the divisions between theory and practice, asking whether theory is in itself a practice that empiricism describes. It will look at the conditions under which creative arts research is produced, exploring its meanings, effects and affects.

School Humanities & Comm Arts

Discipline Creative Arts, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 20cp

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Successful completion of undergraduate degree and formal acceptance into the Master of Arts (Creative Arts).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify conceptual and theoretical models used in creative arts practice research
2. Evaluate creative arts practice as research
3. Formulate a practice of writing which describes creative arts research
4. Interpret the objects of art in creative arts research.
5. Explain the methods used by practitioners, theorists and empiricists in creative arts research.

Subject Content

Students will work on topics that include:

- experimental aesthetics and speculative ontologies
- collaborative arts practices
- writing and creative practice
- visual analysis
- critical and ontological design
- empiricism
- Intercultural research
- perspectives in digital arts research
- Understanding the visual
- performativity-as-method
- practice-led research
- Improvisation and research
- The multi-modal thesis
- Multi-disciplinary arts practices

Assessment

CART 7020 Writing and Form

Credit Points 10

Legacy Code 102500

Coordinator Christopher Conti ([https://directory.westernsydney.edu.au/search/name/Christopher Conti/](https://directory.westernsydney.edu.au/search/name/Christopher%20Conti/))

Description While narrative belongs to all human discourse, the modern study of its form developed its basic concepts in the study of narrative fiction. This unit focuses on major approaches to narrative fiction and theories of the novel. A key area of inquiry is the literary evolution of narrative techniques and concepts since the modernist experiments in representing consciousness and time. Each week we look at a key element of narrative form and the historical factors behind its development. This critical and historical perspective is complemented by a practical focus on the processes of narrative form uncovered in close reading of selected texts and various writing exercises. Students will discover the historical significance behind key developments in the contemporary novel and prose art and ways those developments might inform their own creative work. The dual focus of the unit equips students with the tools for critical writing and creative writing.

CEDS 3001 Bridging the Gap: Re-engaging Indigenous Learners

Credit Points 10

Legacy Code 101756

Coordinator Madison Shakespeare (<https://directory.westernsydney.edu.au/search/name/Madison Shakespeare/>)

Description This unit is available to all undergraduate students who have open electives. Bridging the Gap: Re-engaging Indigenous Australian Learners will provide students with knowledge and skills to develop teaching strategies that will bridge the education gaps existing for many Indigenous Australian (Indigenous) learners. Students will gain knowledge of quality teaching frameworks to engage all learners and in particular Indigenous learners. The unit will also increase students' awareness of the complexities of the cultural inter-relationships between many Indigenous and non-Indigenous learners. The unit focuses on empowering students to effectively teach: Indigenous Australians; Indigenous studies in consultation with Indigenous communities; and assess as well as evaluate resources for use in teaching Indigenous studies.

School Humanities & Comm Arts

Discipline Education Studies

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects TEAC 1019 - Issues in Aboriginal Education

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. identify teaching strategies that will assist Indigenous Australian learners to improve their overall educational attainments;
2. use appropriate teaching and learning pedagogy and methodologies to engage Indigenous students;
3. interpret and explain the cultural differences between Indigenous and non-Indigenous learners;
4. explain the importance of teaching Indigenous Australian Studies and perspectives;
5. assess and evaluate resources and pedagogy for use in teaching Indigenous Australian Studies

Subject Content

- what are The historical and Critical education Issues for indigenous Australian learners
- indigenous Australian studies
- Critical education for indigenous Australians
- Indigenous Education Policy ? National; State; Indigenous Education Reports
- Pedagogical issues ? Indigenous perspectives in curriculum and building on what students bring to the education experience; differing models and strategies
- Teaching and learning methodologies / strategies to engage indigenous Australians
- communication ? both-ways / cross cultural communication, Integrating The Teaching of culture and The socio cultural aspects of Teaching
- Motivational strategies
- Assessing and Evaluating learning resources / materials for design / development of appropriate curriculum materials
- cross cultural partnerships for teachers and learners
- Educating The child ? Educating The whole community
- social inclusion for socially transformative Teaching - international comparative studies

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Presentation	1,200 words	30	N	Individual
Report	1,200 words (for the written part) and 10 minutes presentation (per student)	30	N	Individual
Essay	2,000 words	40	N	Individual

CEDS 7001 Education Policy, Practice and Global Knowledge Co-construction

Credit Points 10

Legacy Code 102160

Coordinator Michael Singh ([https://directory.westernsydney.edu.au/search/name/Michael Singh/](https://directory.westernsydney.edu.au/search/name/Michael%20Singh/))

Description From 2020 students should note that core subjects are now taught in semesters rather than half yearly sessions. This subject explores the relationship between education and knowledge through reference to questions about the links between education policy practices and global knowledge production. The conceptual framework which provides the focus for this subject explores the dynamic, cyclical relations between the following: conditions of possibility for linking education policy practices and global knowledge production; contexts of negotiation/distance that affect this relationship; the modes of reception and rejection of the impact of linking of the two, and the mechanisms of connection that make this possible. These core concepts provide a focus for exploring questions about the relationship between 'education policy practices' and 'global knowledge production' in students' everyday work-life.

School Education

Discipline Education Studies

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically review concepts that explain what students know and do through their everyday professional practice that links 'education policy practices' and 'global knowledge production'.
2. Evaluate core and contributory concepts that address questions concerning the relationship between 'education policy practices' and 'global knowledge production'.
3. Investigate through active-learning and research, understandings and actions that relate education and knowledge, policy and production.

Subject Content

1. Overarching concepts: education policy practice and global knowledge construction
2. Core concepts: conditions of (im)possibility; contexts of negotiation/distance; modes of reception/rejection; mechanisms of (dis)connection
3. Contributory concepts: receptive leaders ; knowledge brokers; shared knowledge interests; reduced perception of distance; bridging perceived distance; connected histories; disciplinary boundaries; institutional boundaries; structural hierarchies; intellectual dependency/captive minds; rejection of difference; acknowledgement; positive affirmation; critical, creative and productive adaptation; mobility, person-to-person encounters, knowledge networks; shared communicational language; multilingual frame of reference

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Report: An evidence-driven analysis of key conceptual tools	2,500	50	N	Individual
Essay: A critique of concepts relating to education and knowledge production	2,500	50	N	Individual

CEDS 7002 So, You Want to Be an Academic?

Credit Points 10

Legacy Code 800210

Coordinator Anna Denejkina ([https://directory.westernsydney.edu.au/search/name/Anna Denejkina/](https://directory.westernsydney.edu.au/search/name/Anna%20Denejkina/))

Description The knowledge labour market is tightening as more academics compete for the limited number of permanent and temporary positions available globally. Early career researchers must quickly adapt to established systems, increased workloads and sometimes stressful and changing work environments. They may be concerned about job security. The purpose of this unit is to introduce students to the world of academia, to assist them in developing the knowledge and skills required to thrive as early career researchers, and to establish networks that they can leverage in order to gain employment and be successful in their careers. Through an innovative model built on online activities and workshops, students will develop an understanding of the nature of academic work in Australia and around the world in the 21st century. Each student will partner with a mentor to develop time, project and people management skills, as well as mapping out networks to pursue near to and upon completion of the student's Doctoral (HDR) candidature.

Discipline Education Studies

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) HUMN 7038 AND
HUMN 7005 AND
HUMN 7026 AND
HUMN 7037

Restrictions

Students must be enrolled in a Doctoral (HDR) program and 8111 - Graduate Certificate in Researcher Engagement, Development and Impact.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Plan for research and development as early career researchers;
2. Develop short and longer-term mentoring plans;
3. Explain their philosophy linking teaching and learning in higher education, with reference to academic literature;
4. Identify and apply for appropriate employment opportunities within academia;
5. Demonstrate skills required to self-manage research projects as early career researchers;
6. Reflect on own performance and identify own development needs.

Subject Content

- Identifying and developing mentoring relationships
- Developing a post-doctoral research plan
- Identifying employment opportunities within academia
- The role of the modern professional academic
- Project management in academia
- Time management and work life balance
- Teaching and learning in higher education
- Collaboration and teamwork in academia

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

CEDS 7003 Research Methods in Education

Credit Points 10

Legacy Code 102824

Coordinator Nathan Berger ([https://directory.westernsydney.edu.au/search/name/Nathan Berger/](https://directory.westernsydney.edu.au/search/name/Nathan%20Berger/))

Description Research Methods in Education provides students with an introduction to educational research methods and data analysis. It enables students to develop their understanding of how research evidence can be used to improve educational practice and policy, and the challenges associated with the use of research evidence in education. The unit will develop students' knowledge and skills to design research instruments and analyse research data. This unit is designed to provide students with foundational research skills for their application to research and professional projects.

School Education

Discipline Education Studies

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Must be enrolled in 1726 Master of Education (Leadership), 1888 Master of Education (Leadership & Management), 1720 Master of Inclusive Education, 1723 Master of Education (Social Ecology), 1847 Master of Education (STEM)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the role of research evidence in improving practice and policy in educational contexts.
2. Appraise theoretical paradigms and their influence on research design and methods.
3. Explain how a range of research designs (qualitative, quantitative and/ or mixed methods) can be applied to address educational research questions.
4. Explore qualitative and quantitative approaches to analyse educational data.
5. Explore the design of research instruments that are used to collect data in an educational context.
6. Evaluate the ethical frameworks impacting on research in education.

Subject Content

- how can research evidence be used to improve educational practice and policy?
- how are theoretical paradigms related to research design and methods?
- what are The characteristics of different research designs, and how can they be enacted in educational contexts?
- how can research data be collected and analysed?
- what are The Ethical Issues that need to be considered when conducting research in educational contexts?

Assessment

CHEM 0001 Chemistry (WSTC Prep)

Credit Points 10

Legacy Code 700043

Coordinator Phillip Newman (<https://directory.westernsydney.edu.au/search/name/Phillip Newman/>)

Description This unit is a platform to introduce Chemistry to students. It introduces students to the basic concepts required to satisfy the needs of most first year university science units in both skill and content areas. It is intended that students will gain a greater understanding of the theoretical concepts covered in the unit by completing the practical component of the unit. Students will also be introduced to professional pathways in science.

School Western Sydney The College

Discipline Chemical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 0 Preparatory subject

Equivalent Subjects CHEM 0002 - Chemistry (UWSC)

Restrictions Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and describe professional pathways in science.
2. Use the periodic table to make predictions about the physical and chemical properties of elements and the compounds they form.
3. Use equations to calculate relative quantities of reactants and products.
4. Describe the factors that influence the type and rate of chemical reactions.
5. Apply simple stoichiometric relationships.
6. Gather and analyse first and second hand data from scientific investigations and draw conclusions. This can be demonstrated by second hand data analysis in the intra session exams and final exam and by gathering first hand data in the practicals and writing up the practical reports.
7. Use appropriate terminology and reporting styles to communicate information and understanding

Subject Content

1. Introduction to the science learning community.
2. Professional pathways in science and the importance of a knowledge of the key concepts in chemistry and the development of practical skills to all Science majors.
3. Redox ? Electron transfer, oxidation states, half-equations, balanced redox equations, reduction potentials.
4. Periodic Table ? Arrangement of elements, electronic configuration, physical and chemical properties, groups 1,2,7 and 8, metals/non-metals, solids, liquids and gasses, trends in periodic properties.
5. Chemical Bonding - forces between molecules.
6. Chemical Reactions ? Why substances react, the rate of reaction, chemical equations.
7. Quantities in Chemical Reactions ? Reacting quantities, the mole concept, and solids, gasses and solutions.
8. Acids and Bases ? properties and reactions of acids, pH, volumetric analysis, Lowry-Bronsted theory, weak acids and bases.
9. Equilibrium ? Dynamic equilibrium, equilibrium constant ? position and effect of temperature, K_a , pH and K .

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

CHEM 1003 Essential Chemistry 1

Credit Points 10

Legacy Code 300800

Coordinator Janice Aldrich-Wright ([https://directory.westernsydney.edu.au/search/name/Janice Aldrich-Wright/](https://directory.westernsydney.edu.au/search/name/Janice%20Aldrich-Wright/))

Description This unit provides an introduction to some of the essential knowledge, concepts and skills of chemistry, to serve the needs of students majoring in chemistry and those requiring a working knowledge of chemistry. Observable chemical facts and phenomena including structure, dynamics, and energetics, are explained in terms of current mathematical and visual models and further developed in Essential Chemistry 2. Evidence for chemical understanding is provided using IR spectroscopy, mass spectrometry, and computer molecular modelling. Laboratory skills relate theory to practice through the development of practical skills required to determine the concentration of an analyte using volumetric and spectrophotometric analysis.

School Science

Discipline Organic Chemistry

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects CHEM 1001 - Chemistry 1 CHEM 1011 - Principles of Chemistry CHEM 1004 Essential Chemistry 1

Assumed Knowledge

HSC Chemistry (2 unit) or HSC Multi-strand Science (3 or 4 unit) or equivalent. General Mathematics bands 5 and 6 or Mathematics band 4 or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Explain chemistry concepts accurately, clearly, and concisely, using an appropriate combination of everyday language with correct spelling and grammar; specialist chemical terms and notation; mathematics (equations, graphs); molecular-level representations; and labelled diagrams
- Demonstrate competence in the manipulative laboratory skills and deductive skills involved in volumetric, spectrophotometric, and qualitative analysis
- Calculate quantities using mathematical formulas, and expressing them with the appropriate number of significant figures, and in some cases, uncertainty
- Describe an atom's chemical personality by relating its position in the Periodic Table to its electron configuration, and ratio of effective nuclear charge Z_{eff} , to average distance r of the valence electrons from the nucleus
- Predict the physical properties of a substance based on its classification as a metal, ionic compound, molecular substance, or network substance and the types of intra- and intermolecular bonding involved.
- Explain how IR spectra and data from mass spectrometry provide experimental evidence for the composition, connectivity (which atoms are bonded together), and formula for a compound.
- Identify a reaction as an example of a Lewis acid-base reaction (complexation or proton exchange) or a redox reaction (electron exchange), identify the donors and acceptors, express the extent of reaction quantitatively in terms of the reaction quotient, Q , and predict the direction of reaction from the difference between Q and t

Subject Content

Atomic structure and periodicity

Pure substances - physical properties, structure and bonding
Lewis acid-base reactions (dissolving, precipitation, complexation, proton exchange) and redox reactions in aqueous systems

Introduction to chemical thermodynamics

Structure, shape and bonding within and between molecules

Colligative properties of solutions

Chemical systems at equilibrium, and open living systems

Chemical speciation and buffering in aqueous solution as a result of competitive equilibria

Stoichiometric concepts in volumetric and spectrophotometric analysis

Coordinator Phillip Newman ([https://directory.westernsydney.edu.au/search/name/Phillip Newman/](https://directory.westernsydney.edu.au/search/name/Phillip%20Newman/))

Description This unit provides an introduction to some of the essential knowledge, concepts and skills of chemistry, to serve the needs of students majoring in chemistry and those requiring a working knowledge of chemistry. Observable chemical facts and phenomena including structure, dynamics, and energetics, are explained in terms of current mathematical and visual models and further developed in Essential Chemistry 2. Evidence for chemical understanding is provided using IR spectroscopy, mass spectrometry, and computer molecular modelling. Laboratory skills relate theory to practice through the development of practical skills required to determine the concentration of an analyte using volumetric and spectrophotometric analysis.

School Science

Discipline Organic Chemistry

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects CHEM 1001 - Chemistry 1 CHEM 1003 - Essential Chemistry 1 CHEM 1011 - Principles of Chemistry LGYB 0460 - Chemistry 1 (UWSC)

Restrictions Students must be enrolled at Western Sydney University, The College. Students enrolled in Extended Diplomas must pass 40 credit points from the preparatory subjects listed in the program structure prior to enrolling in this University level subject. Students enrolled in the combined Diploma/Bachelor programs listed below must pass all College Preparatory subjects listed in the program structure before progressing to the Year 2 subjects.

Assumed Knowledge

HSC Chemistry (2 unit) or HSC Multi-strand Science (3 or 4 unit) or equivalent. General Mathematics bands 5 and 6 or Mathematics band 4 or equivalent. WSTC Prep chemistry.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain chemistry concepts accurately, clearly, and concisely, using an appropriate combination of everyday language with correct spelling and grammar; specialist chemical terms and notation; mathematics (equations, graphs); molecular-level representations; and labelled diagrams.
2. Demonstrate competence in the manipulative laboratory skills and deductive skills involved in volumetric, spectrophotometric, and qualitative analysis.
3. Calculate quantities using mathematical formulas, and expressing them with the appropriate number of significant figures, and in some cases, uncertainty.
4. Describe an atom's chemical \diamond epersonality \diamond f by relating its position in the Periodic Table to its electron configuration, and ratio

of effective nuclear charge Z_{eff} , to average distance r of the valence electrons from the nucleus.

5. Predict the physical properties of a substance based on its classification as a metal, ionic compound, molecular substance, or network substance and the types of intra- and intermolecular bonding involved.
6. Explain how IR spectra and data from mass spectrometry provide experimental evidence for the composition, connectivity (which atoms are bonded together), and formula for a compound.
7. Identify a reaction as an example of a Lewis acid-base reaction (complexation or proton exchange) or a redox reaction (electron exchange), identify the donors and acceptors, express the extent of reaction quantitatively in terms of the reaction quotient, Q , and predict the direction of reaction from the difference between Q and the

Subject Content

1. Atomic structure and periodicity.
2. Pure substances - physical properties, structure and bonding.
3. Lewis acid-base reactions (dissolving, precipitation, complexation, proton exchange) and redox reactions in aqueous systems.
4. Introduction to chemical thermodynamics.
5. Structure, shape and bonding within and between molecules.
6. Colligative properties of solutions.
7. Chemical systems at equilibrium, and open 'living' systems.
8. Chemical speciation and buffering in aqueous solution as a result of competitive equilibria.
9. Stoichiometric concepts in volumetric and spectrophotometric analysis.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Practical Log/Workbook	3 hours/week x 5 weeks	20	Y	Individual
Intra-session Exams x 5	30 minutes x 5	20	N	Individual
Intra-session Exam (Mid-term)	1.5 hours	20	N	Individual
Final Exam	2 hours	40	Y	Individual

Coordinator Mark Williams ([https://directory.westernsydney.edu.au/search/name/Mark Williams/](https://directory.westernsydney.edu.au/search/name/Mark%20Williams/))

Description This unit introduces an investigation of the reactivity of covalent molecules, in particular, of carbon-based compounds. Focusing on introductory chemical dynamics and thermodynamics, students will develop an in-depth understanding of the structure, nomenclature and reactivity of the principal organic functional groups, extending their basic principles of chemistry. They will also understand how molecules are synthesised and the ways they react being important in the function and role of chemistry in biological systems in our domestic and industrial worlds.

School Science

Equivalent Subjects CHEM 1002 - Chemistry 2 CHEM 1010 - Medicinal Chemistry CHEM 1006 - Essential Chemistry 2 (WSTC)

Incompatible Subjects LGYB 6352 - Biological Chemistry 12D

Assumed Knowledge

An understanding and competence with basic chemical principles including SI units, chemical symbols, formulas and equations, nomenclature, stoichiometry, the mole concept, bonding, molecular shape and polarity, states and properties of matter, thermodynamics, equilibria, acids and bases, pH and electrochemistry. General Mathematics bands 5 and 6 or Mathematics band 4 or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the structure and function relationship between organic molecules and their physical and chemical properties
2. Recognise and predict the product of the following organic reactions: a) Elimination reaction of alcohols and alkyl halides, b) Addition reactions of alkenes, alkynes, aldehydes and ketones, c) Substitution reactions of alcohols, alkyl halides and carboxylic acid derivatives, d) Redox reactions of alcohols, aldehydes, ketones, carboxylic acids and esters
3. Use experimental data to find the rate law and propose a mechanism for a chemical reaction
4. Explain the basic thermodynamic principles that govern chemical systems
5. Demonstrate competence in the manipulative laboratory skills and deductive skills involved in organic synthesis, thermodynamics and reaction kinetics
6. Record the results of their investigations demonstrating awareness of the conventions of scientific writing and graphical presentations
7. Apply and transfer chemical principles to other contexts such as biological systems

Subject Content

Introduction to Chemical Dynamics: reactions kinetics - 1st order chemical reactions; rate law and mechanisms of reaction
Introduction to Chemical Thermodynamics; Spontaneity of reaction; Entropy; Enthalpy; Hess's Law
Organic chemistry: structure of principal organic functional groups, nomenclature, physical properties and structure; reaction types - addition, substitution, elimination, redox
Scientific method(s)

Setup and performance of a chemical synthesis, including setup and conducting a reflux, and distillation, use of separating funnel and recrystallisation, measurement of melting point, refractive index
Measurement, graphing and analysis of data

Coordinator Richard Thomas ([https://directory.westernsydney.edu.au/search/name/Richard Thomas/](https://directory.westernsydney.edu.au/search/name/Richard%20Thomas/))

Description The chemical sciences underpin our understanding in the environmental, forensic, health, medical, biological and physical sciences. This unit familiarises students with the fundamental principles of chemistry and how chemistry shapes the world around us. Students will be introduced to the concepts of atomic structure, the reactivity of substances, the Periodic Table, stoichiometry, and will learn about the structure and reactivity of substances and mixtures in different chemical environments, and exposed to different forms of electromagnetic radiation. Students will explore real world problems and apply the fundamental principles of chemistry to better understand how we may shape our own future.

Level Undergraduate Level 1 subject

Equivalent Subjects CHEM 1007 - Introductory Chemistry CHEM 1009 - Introductory Chemistry (WSTC)

Restrictions

NOTE: Only External students can enrol in a composite offering for this subject.

Assumed Knowledge

General Mathematics or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify key principles and concepts of general, inorganic, physical and electro chemistry.
2. Apply key principles and concepts of chemistry to identify, explain and examine the relationships between micro and macro chemical processes and observations in a number of scientific disciplines.
3. Conduct experiments and examine results to illustrate selected key principles and concepts of chemistry.
4. Safely handle and dispose chemical substances in lab environments.
5. Collaborate effectively in groups on experiments.
6. Communicate chemistry and chemical experiments to a range of audiences using scientific language, chemistry symbols, three - dimensional structures of compounds and conventions of general chemical nomenclature correctly.

Subject Content

1. Acquisition of Knowledge: demonstrating a knowledge of, and applying the principles and concepts of chemistry
2. Applications of knowledge: recognising that chemistry plays an essential role in society and underpins many industrial, technological and medical advances. Understanding and being able to articulate aspects of the place and importance of chemistry in the local and global community
3. Communication: presenting information, articulating arguments and conclusions, in a variety of modes, to diverse audiences, and for a range of purposes
4. Skills and applications of skills: synthesising and evaluating information from a range of sources, including traditional and emerging information technologies and methods; conducting experiments to illustrate key principles and concepts; incorporating qualitative and quantitative evidence into scientifically defensible arguments
5. Personal and Professional attributes: recognising the creative endeavour involved in acquiring knowledge, and the testable and contestable nature of the principles of chemistry; Demonstrating a capacity for self-directed learning; working collaboratively in teams.

On successful completion of this subject, students should be able to:

1. Explain how analysis is both qualitative and quantitative.
2. Explain the importance of the correct use of analytical tools in quantitative analysis.
3. Apply appropriate numerical skills and use spreadsheets in order to improve the analysis of chemical information, to present the data in a table, graph etc. appropriate for scientific literature.
4. Perform experimental tasks on volumetric methods of analysis with attention to Occupational Health and Safety and risk assessments and to undertake the appropriate calculations to determine content.
5. Perform gravimetric methods of analysis and appropriate calculations to determine the concentration of chemical species present in a sample.
6. Explain the principles of separation and spectroscopic processes and its applications in the field of analytical chemistry.

Subject Content

1. An introduction to the objectives of analysis in analytical chemistry.
2. Sampling techniques, sample handling and preparation.
3. Understanding spreadsheet functions and screen interfaces of data analysis programs
4. Volumetric analysis and solution preparation including stoichiometric calculations.
5. Gravimetric methods of analysis and stoichiometric calculations
6. Separations, including HPLC, GC and CE.
7. Spectroscopy, including IR, UV, AAS and AES.
8. Challenges in the analysis of real samples

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical	3 hours	30	Y	Individual
Intra-session Exam	50 minutes	20	N	Individual
Final Exam	2 hours	50	N	Individual

CHEM 2006 Inorganic Chemistry

Credit Points 10

Legacy Code 300899

Coordinator Feng Li ([https://directory.westernsydney.edu.au/search/name/Feng Li/](https://directory.westernsydney.edu.au/search/name/Feng%20Li/))

Description This unit introduces students to a thorough study of coordination chemistry (discussing complexes, ligands, structure, isomerism, stability, reaction mechanisms, oxidation states, elements in the first transition series, coordination chemistry in biological systems). The unit then moves on to areas of fundamental inorganic chemistry, including bonding, and solid state chemistry. Advanced Modules cover the following topics: spectroscopy in coordination complexes, physiology and inorganic chemistry, and medicinal inorganic chemistry. This unit also introduces many of the laboratory techniques and equipment that are used in synthetic procedures in coordination chemistry.

School Science

Discipline Inorganic Chemistry

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) CHEM 1003 OR CHEM 1008

Incompatible Subjects CHEM 2007 - Inorganic Chemistry 2 CHEM 2004 - Coordination Chemistry

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the properties and features of coordination compounds (coordination number and geometry; types of ligands; isomerism in coordination compounds; nomenclature; variable oxidation states; nomenclature; spectroscopy) and apply these concepts to other coordination complexes.
2. Differentiate the varied roles of metals in biochemical systems.
3. Recognise the strengths and weaknesses of various bonding theories in coordination chemistry and apply them appropriately (ligand field theory, molecular orbital theory, valence bond theory).
4. Apply a knowledge of solvent properties and evaluate their effect on chemical systems.

- Describe the structures and properties of ionic and non-ionic solids.
- Apply the fundamental principles of inorganic chemistry to advanced areas through the Advanced Modules.
- Research the literature of coordination chemistry and relate this to experimental results within an experimental Report.
- Demonstrate laboratory techniques and conduct experiments in the coordination chemistry laboratory, acquire experimental data, analyse and communicate in written format as result sheets or reports(s).
- Identify, interpret and comply with safety requirements in relation to the use of chemical reagents and laboratory equipment.

Subject Content

- Structure and Isomerism in Inorganic Chemistry
 - Structures of inorganic and coordination compounds; coordination number and geometry; types of ligands; isomerism in coordination compounds; nomenclature.
- Properties of Coordination Complexes
 - Variable oxidation states; formation of complexes in solution; the chelate effect; hard and soft acids and bases; the first transition series.
- Bonding in Inorganic Chemistry
 - Introduction to bonding in inorganic and coordination complexes; ligand field theory; magnetic properties; electronic spectra; ligand field stabilisation energy; molecular orbital theory.
- Bioinorganic Chemistry
 - Introduction to bioinorganic chemistry; heme in hemoglobin, myoglobin and cytochromes; zinc enzymes; iron-sulfur proteins; bioinorganic chemistry of molybdenum; model compounds.
- Solvent Properties
 - Comparison between water and non-aqueous solvents; concepts of acid-base behaviour.
- Inorganic Solids
 - The structure of ionic solids; lattice energy calculations; the Born-Haber cycle; imperfection and conductivity in ionic solids; the structure of non-ionic solids.
- Advanced Modules - Several Advanced Module topics will be used to review and analyse the principles covered in the six topics, and their applications in various areas of science.
 - Spectroscopic Characterisation of Coordination Complexes - Characterisation using electronic spectra; infrared spectra; nuclear magnetic resonance spectra.
 - Medicinal Inorganic Chemistry - Anti-cancer drugs; chelate therapy; diagnostic and therapeutic radiopharmaceuticals, medical imaging and coordination chemistry

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical	Report - approximately six pages long, including calculations and diagrams.	30	N	Individual

Quiz	20 minutes each	20	N	Individual
Final Exam	2 hours	50	N	Individual

CHEM 2008 Organic Chemistry

Credit Points 10

Legacy Code 300876

Coordinator Christopher Gordon ([https://directory.westernsydney.edu.au/search/name/Christopher Gordon/](https://directory.westernsydney.edu.au/search/name/Christopher%20Gordon/))

Description Organic molecules are at the heart of the chemistry of life and industry. This unit builds on the fundamental chemical principles, exploring reaction mechanisms and the concept of reactivity and stereo- and regio-selectivity of many of the central reactions that form the basis of living processes, modern research, and contemporary industrial transformations. The unit contains a problem-based module on the application of spectroscopic methods to organic structure elucidation, focusing on spectroscopic data and a practical section on organic synthesis. The unit will focus on complex organic molecules including biologically relevant molecules, and examples from chemical industries, medicinal and pharmaceutical industries.

School Science

Discipline Organic Chemistry

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) CHEM 1005

Equivalent Subjects BIOS 2039 - Molecules of Life Synthesis and Reactivity CHEM 2009 - Organic Chemistry

Learning Outcomes

On successful completion of this subject, students should be able to:

- Demonstrate how the bonding and electronic structure in organic molecules relates to some of the calculated physical and chemical properties
- Recognise and predict the product of organic reactions outlined in the subject content based on theoretical concepts and examples of sustainable practical approaches by industry
- Integrate scientific knowledge on the mechanism, regio- and stereo-specific organic reactions with experimental outcomes across the discipline to analyse and solve problems

- Predict the mechanism involved in addition, elimination, and substitution reactions, based on the factors of kinetics and thermodynamics which influence these pathways
- Analyse qualitatively and quantitatively the spectroscopic data (Infrared, UV and ¹H Nuclear Magnetic Resonance (NMR) spectroscopy), particularly in the elucidation of organic structures
- Describe enolate chemistry and its involvement in biochemical pathways like Citric Acid cycle
- Conduct basic chemical investigations on synthetic techniques for organic compounds, individually and/or a member of a team, quantitative analysis of yield, determination of product purity using scientific instrumentation, identifying accuracy and reliability, carrying out risk assessments and conforming to safe laboratory practices
- Communicate experimental data correctly in a Lab Report and/or record of the results of their investigations demonstrating analysis of data, awareness of the conventions of scientific writing with chemical mechanisms

Subject Content

- Reactivity of organic compounds as a function of chemical structure, particularly electron distribution
- Mechanisms of major organic reaction types including
 - Addition reactions of alkenes, alkynes, aldehydes and ketones
 - Substitution reactions of alcohols, alkyl halides and carboxylic acid derivatives
 - elimination reaction of alcohols and alkyl halides
 - Aromatic compounds and its resonance stability and effect on electrophilic Substitution reactions
 - Redox reactions of alcohols, aldehydes, ketones, carboxylic acids and esters
- Stereochemistry of organic molecules: enantiomers and diastereomers and reactions including
 - Addition reactions (Halogenation, hydrogenation, hydrohalogenation)
 - SN1 and SN2 reactions
 - E1 and E2 reactions
 - electrophilic Aromatic substitutions
- Factors involved in substitution, addition, elimination and redox reactions of the major functional groups
- Aromatic compounds, its resonance stability and the effect on electrophilic aromatic substitution reactions
- Selection of specific reagents and manipulation of functional groups in controlled synthesis of important organic compounds
- Structure elucidation of organic molecules using spectroscopy - UV, IR, ¹H NMR
 - Infrared (IR) spectroscopy will be used to identify The bond vibrations in common Functional groups, conjugation via UV spectroscopy and Basic concept of Nuclear Magnetic resonance (NMR) spectroscopy, structure elucidation using Chemical shifts and spin coupling.
- Introduction to enolate chemistry and its involvement in biochemical pathways like Citric acid cycle

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical	100 words and chemical structures per Practical (x6); 200 words (x2) and chemical structures and mechanisms	30	Y	Individual
Report	Mostly chemical structures and Part 2 - up to 1,000 words	15	N	Individual
Intra-session Exam	1.5 hours	15	Y	Individual
Final Exam	2 hours	40	Y	Individual

CHEM 2010 Physical Chemistry

Credit Points 10

Legacy Code 300849

Coordinator Abhishek Gupta ([https://directory.westernsydney.edu.au/search/name/Abhishek Gupta/](https://directory.westernsydney.edu.au/search/name/Abhishek%20Gupta/))

Description Physical Chemistry describes the fundamentals of energy changes in chemical systems (thermodynamics), the rates and mechanisms of chemical reactions (kinetics), and electrochemistry and/or ion and electron transport. These concepts will be applied to a range of chemical and/or biochemical processes. A major focus of the unit will be to develop the ability to study quantitative chemical/biochemical problems, and develop useful physical chemistry experimental and data-analysis skills.

School Science

Discipline Chemical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) CHEM 1003 OR
CHEM 1008 AND
CHEM 1005

Equivalent Subjects LGYB 6359 - Chemistry 2 LGYB 9672 - Physical Chemistry 2 CHEM 2011 - Physical Chemistry 2 LGYA 6135 - Bimolecular Dynamics

Assumed Knowledge

This subject requires a knowledge of introductory concepts in differential and integral calculus.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the First Law of thermodynamics to a system and its surroundings.
2. Explain the Second Law of thermodynamics and relate it to the physical meaning of entropy of a system.
3. Gather data, synthesise and calculate changes in state functions such as enthalpy, entropy, and Gibbs free energy.
4. Relate thermodynamic quantities to the potential of an electrochemical cell.
5. Determine rate laws from kinetic data and relate these to mechanisms and the determination of theoretical rate equations.
6. Conduct basic chemistry experiments, individually or as a member of a team, showing familiarity with scientific instrumentation, identifying accuracy and reliability, and carrying out risk assessments.
7. Analyse and communicate experimental data correctly in a Lab Report and/or record of the results of investigations, using the conventions of scientific writing.

Subject Content

1. The First Law of Thermodynamics and transfer of energy as work and/or heat due to some simple physical and biological processes
2. The difference between thermodynamically reversible and irreversible processes
3. Heat capacities, and the relationships between heat and enthalpy change
4. The Second Law of Thermodynamics, its applications, and the calculation of entropy of the system, and surroundings
5. Calculation of Gibbs free energy and their effect on (1) the direction of chemical change; (2) the equilibrium constant of a chemical reaction; and (3) the reversible potential of an electrochemical cell and/or ion transport across a biological membrane
6. Calculation of equilibrium constants using thermodynamic quantities, with applications to a range of chemical/biological processes, and how chemical equilibria are affected by changed reaction conditions and/or inter- and intramolecular interactions
7. Use of van't Hoff plots for calculating enthalpy and entropy changes
8. The relationship between thermodynamic quantities and the equilibrium potential of an electrochemical cell, and/or ion and electron transport in biological systems (for example, ion channels and ion pumps)
9. Thermodynamic nonideality and its modelling using activities and activity coefficients
10. Rate equations, reaction orders and rate constants and determination of simple rate laws from experimental kinetic data using integrated rate equations and initial rate methods

11. The relationships between reaction mechanisms and rate equations, and the effects of temperature on reaction rates
12. Use of the steady-state and pre-equilibrium approximations in a range of kinetic calculations; and/or enzyme catalysis and inhibition as illustrated by Michaelis-Menten model
13. Laboratory skills and techniques in

Assessment

CHEM 3001 Advanced Analytical Chemistry

Credit Points 10

Legacy Code 300925

Coordinator Andrew Shalliker ([https://directory.westernsydney.edu.au/search/name/Andrew Shalliker/](https://directory.westernsydney.edu.au/search/name/Andrew%20Shalliker/))

Description This unit builds on Analytical Chemistry 2 and focuses more on instrumental analysis, isolation and cleanup techniques and aspects of quality control and quality assurance in an analytical laboratory and in manufacturing are discussed. The instrumental methods covered include atomic spectroscopy (for example, atomic absorption and emission, x-ray fluorescence), molecular spectroscopy (for example, UV-Vis, IR, fluorometry, mass spectrometry), chromatography, electrochemistry, thermal methods and automated methods. The theory of the instrumental methods, their construction, operation and applications are covered. The theory and application of isolation and cleanup techniques in inorganic and organic residue analysis are given.

School Science

Discipline Chemical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) CHEM 2001

Equivalent Subjects CHEM 3006 - Analytical Chemistry 3 CHEM 3002 - Advanced Chemical Analysis

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the role of analytical chemistry, classification of quantitative analytical methods, measurement of mass and volume, laboratory safety, laboratory notebook keeping, and the application of concentration units.
2. Explain the theory, instrumentation and application of: Atomic spectroscopy ? examples may be selected from flame and non flame atomic absorption spectroscopy, inductively coupled plasma (ICP) optical emission spectroscopy, ICP-mass spectroscopy, arc/spark emission spectroscopy, x-ray fluorescence. Molecular spectroscopy ? examples selected from UV-Vis spectroscopy, IR spectroscopy, molecular fluorescence. Potentiometric and coulometric methods - examples may be selected from voltametry and polarography, ion selective electrodes and biosensors. Overview of automatic instruments and instrumentation, flow injection analysis.
3. Explain the theory, instrumentation and application of chromatographic analysis focusing on liquid and gas chromatography. Other branches of chromatography may also be discussed.
4. Explain the theory, instrumentation and application of thermal methods which may include examples from: Thermogravimetric methods, differential thermal analysis, differential scanning calorimetry, thermometric titrations.
5. Demonstrate understanding and explain selected topics covered from: the analysis of air, gases, water, soil, geological materials, ceramics, biological materials, metals and alloys, forensic toxicology and pesticide residues.
6. Explain the application of quality assurance and good manufacturing practice in industry and quality control in a registered laboratory. Application of analytical method development and validation as part of quality control. Implications of some analytical results reported.

Subject Content

1. Fundamental Aspects of Analytical Chemistry
- role of analytical Chemistry, Classification of quantitative analytical methods, measurement of Mass and volume, laboratory safety, laboratory notebook, Revision of concentration units.
2. Spectrochemical Analysis
3. Chromatographic Analysis
- theory, instrumentation and application of chromatographic analysis focusing on liquid and gas chromatography. other branches of chromatography may also be discussed.
4. Automated Methods of Analysis
- Overview of automatic instruments and instrumentation, flow injection analysis.
5. Specialised Methods of Analysis
- A more detailed Discussion of Topics which may be selected from The analysis of Air, gases, water, soil, geological materials, ceramics, Biological materials, metals and alloys, forensic toxicology and pesticide residues.
6. Aspects of Quality Assurance
- application of quality assurance and good manufacturing practice in industry and quality control in A registered laboratory. application of analytical method development and validation as part of quality control.

Assessment

CHEM 3003 Advanced Inorganic Chemistry

Credit Points 10

Legacy Code 300907

Coordinator Feng Li ([https://directory.westernsydney.edu.au/search/name/Feng Li/](https://directory.westernsydney.edu.au/search/name/Feng%20Li/))

Description Building on the foundations laid in Inorganic Chemistry, this unit focuses on structure and bonding in inorganic chemistry, and the stereochemistry of coordination complexes. Spectroscopic and magnetic properties of inorganic compounds are evaluated as a consequence of structure and bonding, and an introduction to X-ray methods for structure determination is given. Kinetics and mechanism of inorganic reactions are examined, and the area of bioinorganic chemistry is developed. Unique structures and reactions of organotransition metal chemistry are explored. Advanced Modules cover aqueous chemistry of cations and oxyanions, inorganic materials, molecular orbital theory in coordination complexes, group theory; lanthanides and actinides.

School Science

Discipline Inorganic Chemistry

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) CHEM 2004 OR
CHEM 2007 OR
CHEM 2006

Equivalent Subjects LGYB 9729 - Inorganic Chemistry 3 CHEM 3011 - Inorganic Chemistry 3 LGYA 6134 - Advanced Inorganic Chemistry

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically contrast the bonding theories in coordination complexes (valence bond theory, ligand field theory, molecular orbital theory) and assess their strengths

- Apply an understanding of kinetics and mechanism to reactions of coordination complexes
- Contrast the various functions of metals in bioinorganic chemistry through a study of selected elements
- Analyse the impact of stereochemistry of the varied roles of metals in inorganic compounds
- Describe the structure and bonding of organo-transition metal complexes and apply this to their role in homogeneous catalytic cycles
- Apply the fundamental principles of inorganic chemistry to advanced areas through the Advanced Modules
- Research the literature of inorganic chemistry, including chemical databases such as SciFinder
- Demonstrate laboratory techniques and conduct advanced experiments, integrating theory with practice, in the inorganic chemistry laboratory
- Identify, critique and apply safety requirements in relation to the use of chemical reagents and laboratory equipment

Subject Content

- Structure and Bonding in Inorganic Chemistry
 - The nature of structure and bonding in Coordination and organometallic complexes.
- Stereochemistry
 - The range of stereochemistries adopted by Coordination and organometallic complexes.
- Kinetics, Mechanism and Redox
 - The use of kinetic measurements and other methods in deducing inorganic reaction mechanisms; the mechanism of substitution reactions in complex molecules; the way in which redox reactions may occur.
- Bioinorganic Chemistry
 - The role of transition metals and other main group elements in Biological systems.
- Characterisation of Inorganic Compounds
 - The use of spectroscopic, Magnetic and X-ray methods in characterising inorganic compounds.
- Organotransition Metal Chemistry
 - introduction to organotransition metal Chemistry, homogeneous organotransition metal catalysis, introduction to heterogeneous organotransition metal catalysis
- Students also select one of Advanced Module A or Advanced Module B.
 - Advanced Module A
 - Aqueous Chemistry of Cations and Metallic Oxyanions
 - Lewis acid behaviour of metal ions and the structures of hydrolysed species in solution; speciation
 - Inorganic Materials Chemistry
 - The Synthesis, structure and properties of A range of advanced inorganic materials
 - Advanced Module B
 - Molecular Orbital Theory in Coordination Complexes
 - Introduction to Group Theory; the application of MO Theory to coordination complexes
 - Lanthanides and Actinides
 - Structures with high coordination numbers; chemistry of the lanthanides and actinides; applications of lanthanides and actinides

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

CHEM 3004 Advanced Organic Chemistry

Credit Points 10

Legacy Code 300906

Coordinator Kamali Kannangara ([https://directory.westernsydney.edu.au/search/name/Kamali Kannangara/](https://directory.westernsydney.edu.au/search/name/Kamali%20Kannangara/))

Description This unit builds on the reactions learnt in the unit Organic Chemistry, extending the range of C-C bond forming reactions to include the most significant in modern synthesis. In the second stage students learn to develop multistep synthetic strategies to produce target molecules using their level 2 organic chemistry and the reactions above. Structural analysis by mass spectroscopy and more advanced NMR techniques is also investigated. The students use this chemistry in a lab course designed to highlight a number of these concepts (including the synthesis of 2 pharmaceutical compounds and a team experiment) and to extend their range of practical skills.

School Science

Discipline Organic Chemistry

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) CHEM 2008

Equivalent Subjects LGYA 6141 - Drug Design and Synthesis CHEM 3013 - Organic Chemistry 3

Learning Outcomes

On successful completion of this subject, students should be able to:

- Apply relevant knowledge to major carbon-carbon bond forming reactions in organic chemistry

- Analyse information on a range of chemical reactions and the reagents, solvent and conditions to predict the structure of reaction major product and by-products
- Analyse and apply scientific knowledge to solve problems on the mechanism, regio- and stereo-specific organic reactions with experimental outcomes across the discipline
- Explain reactions of simple heterocyclic systems
- Analyse and interpret qualitatively and quantitatively the spectroscopic data (Infrared, UV and ^1H , ^{13}C Nuclear Magnetic Resonance (NMR) spectroscopy and mass spectral data) to elucidate the organic molecular structures
- Successfully plan and conduct basic chemical investigations on synthetic techniques for organic compounds carrying out the risk assessments and conforming to safe laboratory practices, either individually or a member of a team
- Generate a formal Lab report and/or record of the experimental data, by interpreting data with an awareness of the conventions of scientific writing with chemical mechanisms, critiquing the methodology, accuracy and reliability of data and proposing strategies to improve

Assignment No 1 - The total Organic Synthesis Reactions and Mechanisms	Up to 100 words and chemical structures	5	N	Individual
Assignment No 2 - Organic Molecule Structure Elucidation Using Spectroscopy	1 hour, an individual assignment under supervision during week 11, to be scheduled during the lecture time	10	N	Individual
Mid-Semester Exam	1 hour	15	Y	Individual
Final Exam	2 hours	40	Y	Individual

CHEM 3005 Advanced Physical Chemistry

Credit Points 10

Legacy Code 300926

Coordinator Allan Torres ([https://directory.westernsydney.edu.au/search/name/Allan Torres/](https://directory.westernsydney.edu.au/search/name/Allan%20Torres/))

Description Advanced Physical Chemistry builds on the fundamental principals of energy changes in systems (thermodynamics), and the rates and mechanisms of reactions (kinetics) learnt in Physical Chemistry and extends this so that students gain an understanding of polymer and surface chemistries. This unit also will strengthen student's problem solving skills in quantitative chemical analysis, develop experimental techniques and advanced data-analysis skills.

School Science

Discipline Chemical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) CHEM 2010

Equivalent Subjects CHEM 3015 - Physical Chemistry 3

Subject Content

- Nucleophilic C-C bond forming reactions
- C-C bond formation via palladium coupling and ring closing metathesis
- C-C bond formation via orbital symmetry controlled reactions
- Introductory heterocyclic chemistry
- Spectroscopy (IR, UV, Mass & ^1H and ^{13}C NMR)
- Synthetic design
- Total organic synthesis

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Practical Component	300 words in total for the lab report (10%); Lab report on multi-step synthesis up to 1,000 words including chemical structures (15%); A 3-minute oral presentation of a single PPT slide relevant to organic synthesis (5%).	30	Y	Individual

Assumed Knowledge

An understanding of and competence with the basic principles of physical chemistry including states and properties of matter, thermodynamics, chemical equilibria, kinetics and electrochemistry.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate enhanced laboratory skills, with a particular emphasis on occupational health and safety, risk assessments and the careful and systematic collection of numerical data.
2. Analyse numerical problems in physical chemistry, including the use of precision estimates.
3. Demonstrate the use of mathematical models for a range of applications in physical chemistry.
4. Apply the theory of synthetic, mechanistic, thermodynamic, kinetic and material properties to polymer and surface chemistries in research and industry.
5. Apply the theory of physical chemistry to practical applications in other disciplines or subdisciplines; for example, analytical, industrial and environmental chemistry, geochemistry, nanotechnology, biochemistry.

Subject Content

1. Principles of colloidal systems including classification, preparation, purification, and characterization, electric double layer, zeta-potential and stabilization.
2. Principles of surface thermodynamics: surface tension, contact angles, capillary condensation and rise, Gibbs surface free energy, and surface excess, micelle formation, thermodynamic behaviour of bubbles, droplets, and crystallites.
3. Interfacial properties: adhesion, and spreading, adsorption (chemisorption and physisorption) models for adsorption.
4. Surface characterization by AFM, STM, nanomanipulation.
5. Applications of surface chemistry in industry and the environment.
6. Theory of polymer nomenclature, three dimensional structure, molecular weight and distributions.
7. Stepwise polymerisation: mechanism, kinetics, control of molecular weight distribution.
8. Chain polymerisation: free radical, ionic and coordination mechanisms and kinetics.
9. Control of molecular weight distributions.
10. Chain copolymerisation: copolymerisation kinetics, production of random, alternating, block and graft copolymers.
11. Polymerisation processes and processing.
12. Polymer characterization: GPC, DSC, FTIR, NMR.
13. Introduction to Quantum Chemistry

Assessment

Credit Points 10

Legacy Code 300890

Coordinator Bill Price ([https://directory.westernsydney.edu.au/search/name/Bill Price/](https://directory.westernsydney.edu.au/search/name/Bill%20Price/))

Description This unit replaces 300414 - Biodevices from Autumn 2014. The unit will investigate nature's nanomachines; lipids, DNA and proteins. The students will learn how only a few basic building blocks can self-assemble into more complex structures, which in turn self-assemble into more complex hierarchical structures from which one can build biodevices. These fascinating self-organising supramolecular structures generally involve some kind of non-covalent binding. Particular emphasis is placed on the underlying principles that govern the functioning of such machines and some coverage of the modelling of such processes using techniques such as statistical thermodynamics is given. Biological computing is also covered.

School Science

Discipline Chemical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 6025 - Biodevices

Restrictions Successful completion of 60 credit points at Level 1 or 2.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explicate many of the biodevices provided by Nature
2. Summarise the various biomolecules that biodevices are constituted from.
3. Understand self-organisation and supramolecular structures in nature.
4. Interpret and model some of the underlying processes that control biodevices using statistical thermodynamics and the lattice model.
5. Describe and explain biological computing.

Subject Content

1. Nature's nanomachines.
2. Understanding of structure and functions of lipid, DNA and proteins with respect to biodevices.
3. Supramolecular chemistry and how it translates to everyday concepts.
4. How does nature form self-organising supramolecular structures?
5. How ion channels work.
6. Applications of ion channels as biological sensors.
7. How to make a biological computer and its advantages over silicon-based super computers.

8. The future of biodevices and their limitations.
9. What thermodynamics and modelling can tell us with regard to the design of biodevices.

Teaching Periods

CHEM 3010 Forensic Chemistry

Credit Points 10

Legacy Code 300868

Coordinator Brenden Riley (<https://directory.westernsydney.edu.au/search/name/Brenden Riley/>)

Description This unit extends the student's knowledge and understanding of chemical topics that are relevant to forensic investigations, and provides a deeper understanding of the underlying chemical and physical principles. Topics are taught in the context of the correct principles and procedures for collecting and conserving evidence, and the safe handling of chemical substances. Topics include an extended range of modern chemical instrumentation; the chemistry and analysis of various classes of drugs; clandestine drug laboratories; fire, arson and accelerants; explosions and explosives; and various forms of trace evidence (including textile fibres, glass and paint).

School Science

Discipline Forensic Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) NATS 2019 OR CHEM 2001

Equivalent Subjects CHEM 3009 - Forensic Chemistry

Assumed Knowledge

Knowledge of general and analytical chemistry equivalent to satisfactory completion of Chemistry 1, Chemistry 2, Essentials of Chemistry 1, Essentials of Chemistry 2 and a second year analytical chemistry subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply advanced knowledge of a range of chemical topics that are relevant to forensic investigations, and give evidence of an understanding of the underlying chemical and physical principles.
2. Use modern chemical instrumentation for analysing forensic samples, and explain the underlying chemistry and physical principles of the analytical methods.
3. Collect and analyse chemical data, demonstrating appropriate laboratory skills, and incorporating relevant Quality Assurance and Work Health and Safety principles.
4. Handle chemical substances safely, and critically evaluate the risks associated with forensic casework, in the context of Work Health and Safety practices and legislation.
5. Write scientific laboratory reports and critically evaluate the relevance of forensic chemistry to professional forensic practice.

6. Understand the role of a forensic chemist in the investigation of criminal and terrorist incidents.

Subject Content

- advanced instrumental methods for Analysing forensic samples.
- applications of Chemical instrumentation in real-time policing.
- Chemistry and analysis of illicit drugs.
- trace evidence such as textile fibres, glass and paint.
- Fire, arson and accelerants.
- Explosions and explosives.
- application of forensic Chemistry for The investigation of criminal and terrorist incidents.
- principles and practice of work health and safety and quality assurance in The recovery and analysis of Chemical residues.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Case Study	No set length	30	N	Group
Report	2,000 words	30	N	Individual
Quiz	Assessment 1 (10%) Assessment 2 (15%) Assessment 3 (15%) 1 hours for each assessment	40	Y	Individual

CHEM 3012 Nanochemistry

Credit Points 10

Legacy Code 300895

Coordinator Robert Kaziro (<https://directory.westernsydney.edu.au/search/name/Robert Kaziro/>)

Description The unit covers basic theory of surface chemistry, latest technologies of surface depositions and industrial and commercial applications of nanomaterials and nanopowders. Upon successful completion, the students will achieve an in-depth understanding of techniques of preparation of nanomaterials and nanopowders that includes plasma arching, chemical vapour deposition, electrodeposition, sol-gel synthesis, ball milling and the use of natural particles. Technical aspects of process control on the microstructure and properties of coatings will be discussed. Case studies of applications of nanopowders and nanomaterials such as

biomedical implants, insulators, high power magnets, molecular sieves, supercomputers, jet engines and other industrial applications will be pursued.

School Science

Discipline Chemical Sciences, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) CHEM 1003

Equivalent Subjects LGYA 6162 - Nanochemistry LGYA 6030 - Nanopowders and Nanomaterials

Assumed Knowledge

An understanding of the content of the subjects Nanotechnology 1 and Nanotechnology 2 or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the theory of surface chemistry, latest technologies of surface depositions and industrial and commercial applications of nanomaterials and nanopowders.
2. Explain the techniques of preparation of nanomaterials and nanopowders that includes plasma arching, chemical vapour deposition, electrodeposition, sol-gel synthesis, ball milling and the use of natural particles.
3. Conduct case studies of applications of nanopowders and nanomaterials such as biomedical implants, insulators, high power magnets, molecular sieves, supercomputers, jet engines and other industrial applications.
4. Synthesize nanoparticles by electrodeposition of gold and/or zinc oxide nanoparticles and analyse products by atomic force microscope.

Subject Content

1. Basics of nanomaterials and nanopowders and their attributes and characteristics
2. Theory of surface and bulk and characteristics of nanomaterials and nanopowders
3. Different techniques of preparation, their advantages and disadvantages
4. Biomimetic processes for nanomaterials and nanopowders
5. Feasibility of development of synthetic nanomaterials and nanopowders and their uses

Teaching Periods

CHEM 3014 Pharmacological Chemistry

Credit Points 10

Legacy Code 300920

Coordinator Krishant Deo ([https://directory.westernsydney.edu.au/search/name/Krishant Deo/](https://directory.westernsydney.edu.au/search/name/Krishant%20Deo/))

Description This unit is aimed at undergraduates with grounding in chemistry and biochemistry who have an interest in a career related to medicinal chemistry. Because it concerns the manner in which foreign molecules can interact with the body's mechanisms it is of direct relevance not only to the pharmaceutical industry but also to the food, agricultural, cosmetic (etc) industries. It conveys the fascination of designing chemical structures for particular uses within biological systems and which overlap the disciplines of chemistry, biochemistry, cell biology and pharmacology. Emphasis is placed upon design of the chemical structure itself rather than an investigation of the specific chemical structure of its site of action in the body. This is reflected in the laboratory work which traces the historical development of drug design, essentially through a process of a series of inorganic syntheses, relevant to a range of common drugs.

School Science

Discipline Pharmacology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 5935 - Pharmacological Chemistry

Assumed Knowledge

This subject is aimed at undergraduates with a grounding in chemistry and biochemistry.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Obtain an understanding of the classification of drugs by chemical structure, by pharmacological effect, by target, and by site of action
2. Identify the type of physicochemical and chemical forces that govern the interaction of a drug with its target
3. Obtain an understanding of the stereochemical and conformational requirements of drug-target interactions
4. Obtain an appreciation of the design of drug analogues based upon knowledge of targets and drug structure using quantitative structure-activity relationships (QSAR) methodologies
5. Relate modern methods used to synthesise, purify and analyse drugs in the drug design process and demonstrate this by undertaking experiments which explore structure and biological response
6. Synthesise, characterise, and measure the biological activity of a that compound
7. Research and present lecture and written report on an assigned major group of drugs
8. Record the results of and the outcomes of their laboratory investigations demonstrating awareness of the conventions of scientific writing and graphical presentations to produce a formatted manuscript

Subject Content

1. Introduction to Pharmacological chemistry laboratory to patient
2. Peptide and Protein Structure
3. Nucleic acids
4. An Overview of the Major Drug Classes
5. Enzymes
6. Drug Action at Receptors
7. Introduction to Structure-Activity Relationships
8. Quantitative Structure-Activity Relationships (QSAR)
9. Student topic seminars on major group(s) of drugs: that may include Non Steroidal Anti-Inflammatory Agents, Steroidal Anti-Inflammatory Agents, Adrenocortical Steroids, Local Anaesthetics,

General Anaesthetics, Androgens/Anabolic Steroids, Estrogens and Progestins, Cardiovascular Vasodilators, Hypoglycemic Agents, Anti-Depressants, Narcotic Analgesics, Hypnotics/Minor Tranquillizers, Antihistamines, Prostaglandins, Antimicrobial agents such as Penicillin, Tetracycline and Streptomycin, Anticoagulants, Antimalarial Agents, Anticancer Drugs, Antiviral agents, Radio Therapy

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Laboratory Experiments and Reports		30	N	Individual
Assignment and Presentation of Assigned Topic	15 pages, in Times New Roman font, 12 point and 1.5 spaced (including figures and references)	45	N	Individual
Final Bespoke Assessment/ Exam	over weekend	25	N	Individual

CIVL 1001 Surveying for Engineers

Credit Points 10

Legacy Code 300738

Coordinator Won Hee Kang ([https://directory.westernsydney.edu.au/search/name/Won Hee Kang/](https://directory.westernsydney.edu.au/search/name/Won%20Hee%20Kang/))

Description This is a core unit which provides students with basic skills that are required to carry-out Surveying. After the completion of this unit, students will be able to carry-out required preliminary surveying for most of the civil and construction engineering projects. This unit will also serve as a foundation for most of the units that follow in the course.

School Eng, Design & Built Env

Discipline Civil Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Pre-requisite(s) MATH 1016

Equivalent Subjects CIVL 1002 - Surveying for Engineering CIVL 1003 - Surveying for Engineers (WSTC AssocD)

Assumed Knowledge

Students need a good knowledge of Geometry and Trigonometry.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the terminology, instruments, datum, maps and coordinate systems; operate, record and reduce observations made using current industry standard surveying equipment.
2. Develop contour and building site maps.

3. Operate, record and adjust angular observations made with current industry standard surveying equipment; use a tape to measure slope distances and to reduce linear observations to the horizontal; to adjust a combination of these angular and linear observations to provide coordinates of the traverse points used.
4. Estimate errors in engineering surveying and apply necessary adjustments.
5. Compute cross-sectional areas and volumes for channels and embankments; prepare mass-haul diagrams
6. Prepare diagrams and compute parameters for the setting out the centrelines of roads or railways where horizontal circular and transition curves are to be placed, or where a vertical curve is to be placed.
7. Describe the relationship between global positioning system (GPS), spatial information systems (SIS) and surveying
8. Work cooperatively in a team to complete field work, data reduction and analysis and report writing.

Subject Content

1. Errors and accuracies to desired tolerances.
2. Levelling traverses and height datums.
3. Angle and distance traversing, including closures and adjustment of errors in closed traverses.
4. Feature surveys, including coordinate systems and map projections.
5. Computations of cross-sectional areas and basic volumes for cuttings or embankments for roads or railways.
6. Calculation and presentation of mass-haul diagrams.
7. The design and setting out parameters for the centrelines of horizontal/circular, transition and vertical curves for roads and railways.
8. Accuracies required for the building set-out and equipment tolerances.
9. Introduction to Geographic/Spatial Information Systems (GIS/SIS) including satellite positioning sources (GNSS) and their use in many Engineering contexts.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	N/A	10	N	Individual
Report	Five reports (6% each), each report about 10 pages long	30	N	Group
Final Exam	2 hours (closed book)	60	N	Individual

CIVL 1003 Surveying for Engineers (WSTC AssocD)

Credit Points 10

Legacy Code 700120

Coordinator Abbas Ranjbar ([https://directory.westernsydney.edu.au/search/name/Abbas Ranjbar/](https://directory.westernsydney.edu.au/search/name/Abbas%20Ranjbar/))

Description This unit provides students with basic skills that are required to carry out surveying. After the completion of this unit, students will be able to carry out required preliminary surveying for most of the civil and construction engineering projects. Offerings of alternate units are dependent on there being sufficient student enrolment numbers. If enrolments are low, the College may cancel delivery of the alternate unit.

School Eng, Design & Built Env

Discipline Civil Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects CIVL 1001 - Surveying for Engineers

Restrictions Students must be enrolled in 7022 Associate Degree in Engineering

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the terminology, instruments, datum, maps and coordinate systems; operate, record and reduce observations made using current industry standard surveying equipment.
2. Develop contour and building site maps.
3. Operate, record and adjust angular observations made with current industry standard surveying equipment; use a tape to measure slope distances and to reduce linear observations to the horizontal; to adjust a combination of these angular and linear observations to provide coordinates of the traverse points used.
4. Estimate errors in engineering surveying and apply necessary adjustments.
5. Compute cross-sectional areas and volumes for channels and embankments; prepare mass-haul diagrams.
6. Prepare diagrams and compute parameters for the setting out of the centrelines of roads or railways where horizontal circular and

transition curves are to be placed or where a vertical curve is to be placed.

7. Describe the relationship between global positioning system (GPS), spatial information systems (SIS) and surveying.
8. Work cooperatively in a team to complete field work, data reduction and analysis and for report writing.

Subject Content

1. Errors and accuracies to millimetre tolerances
2. Levelling traverses and height datums
3. Angle and distance traversing, including closures and adjustment of errors in closed traverses
4. Feature surveys, including coordinate systems and map projections
5. Computations of cross-sectional areas and basic volumes for cuttings or embankments for roads or railways
6. Calculation and presentation of mass-haul diagrams
7. The design and setting out parameters for the centrelines of horizontal circular and transition curves and for vertical curves for roads and railways
8. Accuracies required for the building set-out and equipment tolerances
9. Introduction to Geographic/Spatial Information Systems (GIS/SIS) including satellite positioning sources (GNSS) and their use in many engineering contexts

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical and Reports	20 pages (team) 6 hours	20	N	Group
Online Quizzes	5 x 20minutes =100 minutes	30	N	Individual
End of session exam (in parts): Part 1: written – problem solving/short answer Part 2: Viva Voce	Part 1: 2 hours + 30 min for online submission Part 2: 20 minutes per student	50	Y	Individual

CIVL 2002 Environmental Engineering

Credit Points 10

Legacy Code 300737

Coordinator Mariam Darestani (<https://directory.westernsydney.edu.au/search/name/Mariam Darestani/>)

Description This unit teaches the fundamental theory and methods required for a civil engineer to solve environmental issues they would face in their professional life.

School Eng, Design & Built Env

Discipline Civil Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects CIVL 4006 - Environmental Engineering

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply basic principles of ecology and environmental processes to achieve sustainable water quantity and quality management;
2. Apply appropriate drinking water and wastewater treatment techniques;
3. Examine basic air and noise pollution control techniques;
4. Apply solid and hazardous waste management techniques in urban and rural environments;
5. Explain climate change issues and its implication to civil and environmental engineering projects;
6. Apply environmental impact assessment and life cycle assessment methods for simple civil and environmental engineering problems.
7. Explain legislative requirements and ethical issues related to civil and environmental engineering projects.

Subject Content

1. General principal of ecologically sustainable development , Climate change and Environmental issues
2. Drinking water treatment
3. Wastewater treatment
4. Water quality management
5. Solid and hazardous waste collection and disposal
6. Environmental impact assessment and life cycle assessment
7. Air and noise pollution
8. Climate change issues related to civil and environmental engineering
9. Water chemistry
10. Emerging water and water treatment and desalination technologies

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

CIVL 2003 Fluid Mechanics

Credit Points 10

Legacy Code 300762

Coordinator Ataur Rahman (<https://directory.westernsydney.edu.au/search/name/Ataur Rahman/>)

Description This unit provides a basic understanding of fluid mechanics principles. Fluid mechanics is the study of the properties and movements of fluids, and key to understanding many of our engineering systems involving fluids, such as power generation, lubrication, irrigation and navigation. While the main focus is on incompressible fluids, effects of compressible fluids are also discussed. The theories learned in classes are reinforced in laboratory

sessions. Students analyse fluid systems and apply principles in designing basic pipes and open-channels.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) MATH 1016 AND

ENGR 1011 OR

ENGR 1028

Equivalent Subjects CIVL 2015 - Water Engineering CIVL 2004 - Fluid Mechanics (WSTC Assoc Deg)

Assumed Knowledge

200238 - Mathematics for Engineers 2.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply concepts of statics, kinematics and dynamics of fluids to solve fluid related engineering problems
2. Estimate flow through basic pipes and open channels
3. Analyse and design basic pipes and open-channels

Subject Content

Fluid properties

Fluid statics

Fluid kinematics

Types of flow

Continuity, momentum and energy principles

Dimensional analysis

Flow measurements, such as using plate orifices, venturi meters, semi-venturi meters

Surface resistance

Form resistance

Basic pipe flow

Basic open channel flow principles

CIVL 2007 Introduction to Structural Engineering

Credit Points 10

Legacy Code 300733

Coordinator Won Hee Kang ([https://directory.westernsydney.edu.au/search/name/Won Hee Kang/](https://directory.westernsydney.edu.au/search/name/Won%20Hee%20Kang/))

Description This unit covers the basic concepts in analysing and designing simple structural members. It consists of the fundamentals of structural analysis, concrete structures and steel structures

School Eng, Design & Built Env

Discipline Civil Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) MECH 2003

Equivalent Subjects CIVL 2006 - Introduction to Structural Engineering
 CIVL 2008 - Introduction to Structural Engineering (WSTC Assoc Deg)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the reactions and internal forces in statically determinate structures under a variety of loading conditions.
2. Determine the influence lines for statically determinate beams.
3. Determine the deflections of statically determinate beams, trusses and frames.
4. Use force methods to analyse statically indeterminate beams.
5. Recognize the effect of material properties on the behaviour of simple steel and concrete structures.
6. Apply structural analysis in the design process.
7. Identify what the appropriate materials are used, and design simple steel and reinforced concrete flexural elements.

Subject Content

Analysis of statically determinate beams and frames.

Analysis of statically determinate trusses.

Influence lines for beams and trusses.

Deflections of trusses, beams and frames.

Force method for statically indeterminate structures.

Determination of dead and live loads on steel and concrete structures.

Determination of sizes for simple steel beams under load.

Determination of dimensions and reinforcement for reinforced concrete beams under load.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

CIVL 2012 Soil Mechanics

Credit Points 10

Legacy Code 300985

Coordinator Pan Hu ([https://directory.westernsydney.edu.au/search/name/Pan Hu/](https://directory.westernsydney.edu.au/search/name/Pan%20Hu/))

Description This is an introductory unit covering the use of soil, and the water in it, as an engineering material. It will provide students with a basic understanding of the physical and mechanical properties of soils, simple soil testing methods to characterise soil strength and deformation behaviour, and how to apply basic techniques to assess the hydro-mechanical response of soils subjected to loading.

School Eng, Design & Built Env

Discipline Civil Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) MATH 1016

Equivalent Subjects CIVL 2011 - Soil Engineering CIVL 2013 - Soil Mechanics (WSTC AssocD)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the concepts of soil mechanics
2. Apply soil mechanics concepts to soil engineering problems
3. Analyse the response of soil and the water in it when subjected to loading
4. Apply basic laboratory tests to measure the engineering properties of soils
5. Solve simple design problems in soil engineering

Subject Content

soil formation
 clay mineralogy
 soil classification
 soil compaction
 effective stress in soils
 flow of water in soils
 flow nets and the engineering effects of water movements
 consolidation and settlement
 stress increases in soils
 shear strength in soils
 lateral stresses in soils

Level Undergraduate Level 2 subject

Pre-requisite(s) MATH 1017

Equivalent Subjects CIVL 2011 - Soil Engineering CIVL 2012 - Soil Mechanics

Restrictions Students must be enrolled at Western Sydney University, The College in 7022 Associate Degree in Engineering

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the concepts of soil mechanics
2. Apply soil mechanics concepts to soil engineering problems

- Analyse the response of soil and the water in it when subjected to loading
- Apply basic laboratory tests to measure the engineering properties of soils
- Solve simple design problems in soil engineering

Subject Content

- Soil formation
- Clay mineralogy
- Soil classification
- Soil compaction
- Effective stress in soils
- Flow of water in soils
- Flow nets and the engineering effects of water movements
- Consolidation and settlement
- Stress increases in soils
- Shear strength in soils
- Lateral stresses in soils

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	30 minutes each	15	N	Individual
Practical	Equivalent to 1,500 words each	15	N	Both (Individual & Group)
Intra-session Exam	1 hour	20	N	Individual
Final Exam	2 hours	50	N	Individual

CIVL 2016 Civil and Substructure

Credit Points 10

Legacy Code 301220

Coordinator Mark Crowley ([https://directory.westernsydney.edu.au/search/name/Mark Crowley/](https://directory.westernsydney.edu.au/search/name/Mark%20Crowley/))

Description This unit provides an overview of civil construction and associated sub-structure works comprising footings, pilings and slabs and the high costs associated with these elements. Through site surveys, site assessments and design proposals students will apply their developing understanding of bulk excavation, site drainage, service mains (electricity, gas, water, sewerage, data), roads and retaining walls to real world examples. Students will also examine public infrastructure such as ports, tunnels, bridges and highways to deepen their knowledge base. Additionally, in order to further

understand the high costs involved in sub structure works, students will learn to identify problems faced on sites including rock, chemically-aggressive soils and water-logged sites.

School Eng, Design & Built Env

Discipline Construction Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

- Undertake preliminary surveys of a project site
- Conduct assessments of site conditions relating to foundation condition, gradient and drainage
- Design the road pavement requirements, site drainage and services installation for a proposed building project
- Select appropriate footing and substructure systems for different construction sites

Subject Content

- Properties of rock and soil
- Site establishment (construction sheds and storage, signage, hoardings and barricades, traffic control)
- Understanding the principles of subdivision siteworks (surveying, bulk excavation and fill, site drainage and stormwater detention, retaining walls)
- Road construction
- Service mains (stormwater, potable & grey water, sewerage, electricity, gas & data)
- Conventional sub-structures (shallow footings, slabs, piling)
- Specialised sub-structures (basements, tunnels, marine and riverine sub-structures)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	60 minutes each (in 3 separate weeks)	45	N	Individual
Applied Project	2,000 words (for the group with designated individual components)	55	N	Both (Individual & Group)

CIVL 2017 Sustainable Construction Materials

Credit Points 10

Legacy Code 301399

Coordinator Alan Todhunter ([https://directory.westernsydney.edu.au/search/name/Alan Todhunter/](https://directory.westernsydney.edu.au/search/name/Alan%20Todhunter/))

Description This unit focusses on the suitability for purpose (performance, durability, sustainability and standards and regulatory compliance) of building and construction materials. Students investigate the physical properties and behaviour of various timbers, metals, concretes, polymers, new materials and composite systems, and their durability within Australia's diverse environments. Students also consider sustainable and eco-friendly construction materials in life-cycle assessment of construction systems and materials selection at the design stage.

School Eng, Design & Built Env

Discipline Structural Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Incompatible Subjects CIVL 2009 - Material Science in Construction

Assumed Knowledge

Content covered in Residential Building.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Characterise properties of different building materials and their application in building construction.
2. Analyse how and why materials degrade in the built environment.
3. Assess the environmental impacts associated with materials selection for construction.
4. Assess the suitability of materials in building components used in buildings.
5. Apply Australian standards and regulations relating to eco-friendly and durable buildings.

Subject Content

1. Properties of construction materials.
2. Application of various materials in construction.
3. Durability of construction materials and components.
4. Sustainable and eco-friendly construction materials.
5. Selection of materials in construction.
6. Life-cycle assessment of construction systems.
7. Compliance with Australian standards and regulations.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Report	1200 words	30%	N	Individual

CIVL 2018 Water Supply Systems Design

Credit Points 10

Legacy Code 301424

Coordinator Dharma Hagare ([https://directory.westernsydney.edu.au/search/name/Dharma Hagare/](https://directory.westernsydney.edu.au/search/name/Dharma%20Hagare/))

Description In this unit students will examine the quality of water and the standards to be met for the supply of water that is fit for its intended use. The design of treatment processes to meet these standards as well as principles underlying the hydraulic design of the treatment systems are examined in the context of both urban and remote rural communities. Students will also explore alternative supply systems and their merits and demerits, including economic viability, in order to gain design and analysis skills with respect to various water supply systems.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) CIVL 2002 OR ENGR 1050 AND CIVL 2003

Co-requisite(s) CIVL 3011

Equivalent Subjects CIVL 4014 Water and Wastewater Treatment

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse alternate sources of water that can be used to supply water for its intended use.
2. Design unit processes and their sequence to produce water that is fit for its intended use for both urban and remote rural communities.
3. Design associated infrastructure for supplying water for its intended use.
4. Evaluate the sustainability of reuse, recycle and disposal options for the waste generated from treatment processes.
5. Demonstrate communication and collaboration skills in working with others in an ethical and respectful manner to produce professional analyses and reports in designing and evaluating sustainable water supply systems.

Subject Content

1. Sources of water and its quality
2. Fit for the purpose water quality guidelines/ standards
3. Alternative sources of water including, surface water, groundwater, stormwater and recycled water.
4. Conventional Water Treatment Processes
5. Transmission and distribution of water
6. Advanced water treatment processes
7. Impact of changing climate on water sources and water availability
8. Reuse/ recycle/ disposal of water treatment plant sludge/ waste.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Tutorial submissions	In-class submissions	20	N	Individual
Project Report	5000 words including figures, tables and pictures	25	N	Group
Practical Report	1000 words including tables, figures and pictures	5	N	Group
Final Exam	3 hours	50	N	Individual

Teaching Periods

CIVL 3002 Concrete Structures (UG)

Credit Points 10

Legacy Code 300736

Coordinator Ee Loon Tan ([https://directory.westernsydney.edu.au/search/name/Ee Loon Tan/](https://directory.westernsydney.edu.au/search/name/Ee%20Loon%20Tan/))

Description This unit covers the basic elements of structural behaviour and design with reinforced and pre-stressed concrete. Students will learn to analyse the section capacity of reinforced concrete beams, slabs, and columns, and design simple suspended structures. The unit places a strong emphasis on the process of structural design.

School Eng, Design & Built Env

Discipline Civil Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) CIVL 2007

Co-requisite(s) CIVL 3014

Equivalent Subjects CIVL 3001 - Concrete Structures (UG)

Assumed Knowledge

Knowledge of engineering mechanics and statics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the properties of fresh and hardened concrete
2. Apply limit state design concepts to concrete elements and whole structures
3. Determine design actions for and analyse concrete structures to obtain internal design action effects
4. Design concrete elements based on evaluated design action effects
5. Apply relevant Australian Standards for concrete structures and loading in the designing of concrete structural elements
6. Analyse and interpret the behaviour of concrete structural elements subjected to appropriate design loads

Subject Content

Materials, the design process, Standards

Beams: flexural strength analysis, flexural behaviour, shear, deflections and cracking.

Basic pre-stressed design.

Columns: ultimate strength, slenderness effects.

Slabs: simplified design, simple analysis for deflections.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

CIVL 3003 Construction Planning

Credit Points 10

Legacy Code 300728

Coordinator Yingbin Feng ([https://directory.westernsydney.edu.au/search/name/Yingbin Feng/](https://directory.westernsydney.edu.au/search/name/Yingbin%20Feng/))

Description This unit is intended to provide students with the ability to organise the resources required for a major construction project; to plan the sequence and timing of construction operations; and to assess the risk inherent in achieving a construction schedule.

School Eng, Design & Built Env

Discipline Construction Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) BLDG 1005 OR
GEOM 2001 OR
BLDG 2002

Equivalent Subjects BLDG 3005 - Construction Planning

Assumed Knowledge

A basic understanding of the construction process of residential and commercial buildings and estimating principles.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Plan a project using basic principles of logic planning
2. Apply the concepts of **critical path** and **float**
3. Calculate resources, determine resource constraints on construction operations, and develop solutions that will minimise the impact of these constraints
4. Assess the probability of achieving a project completion date

5. Use a generic computer programme such as MS Project, to develop and graphically represent construction logic

Subject Content

Bar/Gantt Charts

Critical Path Method - Arrow diagrams

Critical Path Method - Precedence diagrams

Overlapping network models

Resources management - limits, resource aggregation and levelling

Project control

Scheduling using MS Project

Chain scheduling, multiple activity and line of balance

Work study

Risk and scheduling

Program evaluation and review technique (PERT)

Assessment

CIVL 3004 Construction Technology 3 (Concrete Construction)

Credit Points 10

Legacy Code 200502

Coordinator Md Kamrul Hassan ([https://directory.westernsydney.edu.au/search/name/Md Kamrul Hassan/](https://directory.westernsydney.edu.au/search/name/Md%20Kamrul%20Hassan/))

Description The aim of this unit is to introduce students to the concept of structures, loads and the effect of loads on structures in relation to concrete construction. Students will have an in-depth understanding of concrete as a construction material. It covers the construction technology aspects of concrete structural components and systems, including beams, columns, slabs and frames. Emphasis will be given to formwork design and construction. Students will be introduced to the relevant Australian Standards for concrete construction. The unit also

aims at developing students' ability to deal professionally with other building professionals, including architects and structural engineers.

School Eng, Design & Built Env

Discipline Building Construction Management

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Assumed Knowledge

Awareness of standard construction systems for residential and commercial construction.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and define the different loads that a concrete structure carries.
2. Recognise and explain the different effects and actions caused by loads on concrete structures.
3. Identify and evaluate the different structural systems available for use in concrete construction.
4. Perform simple load evaluation for basic loading situations, including dead and live loads.
5. Determine the structural behaviour of simple concrete elements through analysis and design.
6. Explain how to design and construct form work for concrete construction.
7. Explain how to manage broader issues related to concrete construction including site safety and material handling.
8. Comply with Australian Standards relevant to concrete construction.

Subject Content

Dead load and live loads in concrete construction;
Load calculation, loading codes;
Properties of concrete;
Concrete handling and pour;
Steel reinforcement;
Basic components and their behaviour in concrete construction;
Components of concrete formwork;
Formwork design, falsework and site safety;
Concrete frames and methods and sequence of construction;
Pre-stressed concrete;
AS3600 Concrete Structures Code;
Innovative concrete construction;

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Lab Quiz	3 x 1hr lab quizzes	25	N	Individual
Assignment 1 - individual	5000 Word	5	N	Individual
Assignment 1 - Group	5000 Word	25	N	Group

Final Exam	2 hr vUWS based and non-proctored	45	N	Individual
------------	-----------------------------------	----	---	------------

Teaching Periods

CIVL 3005 Construction Technology 4 (Steel Construction)

Credit Points 10

Legacy Code 200470

Coordinator John Zhang ([https://directory.westernsydney.edu.au/search/name/John Zhang/](https://directory.westernsydney.edu.au/search/name/John%20Zhang/))

Description This unit deals with the construction of structural steelwork. Students will gain a better understanding of mechanical properties of steel. It covers various components in structural steelwork, and their behaviour under loads. Students will also be introduced to various frame systems in multi-story and high-rise construction and relevant Australian Standards for steel construction. Emphasis will be given to safe erection and assembly of structural steelwork. Due consideration will be given to the requirements of Workcover in relation to site safety and material handling. An introduction will also be given for Steel-concrete composite construction.

School Eng, Design & Built Env

Discipline Structural Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Assumed Knowledge

Students undertaking this subject should have prior knowledge of construction techniques associated with residential and non-residential building and a basic understanding of structural systems.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe various structural systems in the context of steel framework
2. Explain what the structural properties of steel are and how they affect steel construction
3. Analyse and explain the different effects and actions caused by loads on various structural steelwork
4. Recount the sequence of construction in a typical portal frame building and the issues related to site safety and site management;
5. Summarise the various methods of connection in steel structures
6. Analyse construction sequences of typical steel-concrete composite construction
7. Converse, with confidence, with other building professionals including structural engineers at a professional level in the role of a construction manager
8. Apply Australian Standards related to structures and construction, in particular, loading code and steel construction

Subject Content

Introduction to steel structures, failures and the consequences
Steel as a structural material
Fire issues in steel construction

Loads and their effect on steel structures
 Structural analysis and design,
 AS4100 Steel Structures
 Steel sections and Tension members
 Beams
 Beam-Columns Column Buckling
 Self-arranged site visit
 Connection type and details
 Frames and their analysis
 Frame: Case study
 Detailing and fabrication
 Safe erection of steel frame
 Composite and innovation and Overview

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Project Assignment - Steel Construction	5,000 words approximately	30	N	Group
Online quizzes (3 x 10%)	30 minutes (per Quiz)	30	N	Individual
Final online exam-non- proctored	2 hours online exam via vUWS	40	N	Individual

Credit Points 10

Legacy Code 301001

Coordinator Samantha Liyanapathirana (<https://directory.westernsydney.edu.au/search/name/SamanthikaLiyanapathirana/>)

Description This unit will present the application of principles of soil mechanics to the solution of foundation and geotechnical problems including the evaluation of allowable bearing capacity of shallow and pile foundations, the stability of earth retaining structures and the stability of slopes.

School Eng, Design & Built Env

Discipline Geotechnical Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) CIVL 3014 AND
 CIVL 2012 OR
 CIVL 2011

Equivalent Subjects CIVL 3008 - Foundation Engineering

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply soil mechanics principles to analyse foundation problems
2. Apply a systematic engineering approach to designing foundations
3. Interpret soil properties and soil test data for use in foundation analysis and design
4. Apply engineering software as a tool in foundation analysis and design
5. Interpret and apply Australian Standards when designing foundations
6. Prepare a geotechnical design report on a foundation design problem

Subject Content

1. Site investigation
2. Design of earth retaining structures
3. Shallow foundations
4. Slope stability
5. Deep foundations

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

CIVL 3010 Highway Infrastructure

Credit Points 10

Legacy Code 300988

Coordinator Chin Leo ([https://directory.westernsydney.edu.au/search/name/Chin Leo/](https://directory.westernsydney.edu.au/search/name/Chin%20Leo/))

Description This unit focuses on two key aspects of highway infrastructure design, namely, the bridge superstructure design and the foundation soil preparation prior to construction of the highway pavement. It aims to provide students with specialised knowledge in bridge loading and structural design, methods to deal with soft and weak grounds, and building of earth embankments to support the highway pavement. These aspects will be discussed in relation to Australian design codes.

School Eng, Design & Built Env

Discipline Transport Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) CIVL 2007 AND CIVL 2012

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply soil and structural mechanics principles in highway infrastructure design
2. Interpret soil properties and soil test data for use in geotechnical analysis and design
3. Apply engineering software as a tool for use in geotechnical analysis and design
4. Interpret and apply Australian Standards when designing highway infrastructures
5. Analyse and propose cost effective design highway infrastructures

Subject Content

Bridge Superstructure Module

1. Types of bridges
2. Bridge substructures and superstructures
3. Bridge loading and design loads
4. Design of superstructures

Highway Embankment and Foundation Module

1. Soft soil remediation
2. Soil stabilisation and improvement
3. Earth fills and retaining structures

Assessment

CIVL 3011 Hydraulics

Credit Points 10

Legacy Code 300765

Coordinator Kejun Dong ([https://directory.westernsydney.edu.au/search/name/Kejun Dong/](https://directory.westernsydney.edu.au/search/name/Kejun%20Dong/))

Description The unit covers the principles of open channel hydraulics, pipe hydraulics and culvert hydraulics. Specific topics in open channel hydraulics include uniform flow, resistance equations, specific energy principle, flow types, gradually varied flow and rapidly varied flow. The purpose is to enable design of efficient open channels to meet engineering requirements. In addition, principles of pipe and culvert hydraulics are introduced, enabling analysis and design of pipe networks and culverts.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) CIVL 2003

Equivalent Subjects CIVL 2015 - Water Engineering CIVL 2014 - Water Engineering

Assumed Knowledge

Mathematical knowledge equivalent to the content within 200238 Mathematics for Engineers 2.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. analyse existing channels using hydraulic principles
2. apply basic hydraulic principles to design open channels of different configurations
3. critically analyse existing small hydraulic structures
4. design appropriate hydraulic structures to control and measure flow through open channels

5. analyse and design pipe networks using pressurised flow principles
6. evaluate the adequacy of existing culverts
7. design appropriate culverts using culvert hydraulic principles

Subject Content

Open channel hydraulics: Basic principles - continuity, momentum and energy principles

Open channel hydraulics: Channel design - use of uniform flow principles

Open channel hydraulics: Best hydraulic sections

Open channel hydraulics: Specific energy principle

Open channel hydraulics: Rapidly varied flow - hydraulic jump

Open channel hydraulics: Gradually varied flow - water surface profiles

Open channel hydraulics: Flow measurements - weirs, spillways, gates and flumes

Pipe hydraulics: Laminar and turbulent flow in pipes

Pipe hydraulics: Major and minor losses in pipes

Pipe hydraulics: Pipes in series

Pipe hydraulics: Pipes in parallel

Pipe hydraulics: Pipe network analysis

Pipe hydraulics: Turbomachinery - pumps and pump selection

Culvert hydraulics: Basic principles - gravity and pressurised flows

Culvert hydraulics: Culvert flow classification

Culvert hydraulics: Design of culverts

CIVL 3012 Steel Structures

Credit Points 10

Legacy Code 300730

Coordinator Fidelis Mashiri ([https://directory.westernsydney.edu.au/search/name/Fidelis Mashiri/](https://directory.westernsydney.edu.au/search/name/Fidelis%20Mashiri/))

Description This unit covers the basic behaviour of steel members and structures, the appropriate methods to analyse them and the design criteria and methods used to proportion them.

School Eng, Design & Built Env

Discipline Structural Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) CIVL 2007

Co-requisite(s) CIVL 3014

Equivalent Subjects CIVL 3013 - Steel Structures

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise different steel grades
2. Apply limit state design concepts to structural steel elements
3. Determine design actions for and analyse steel structures to obtain internal design action effects
4. Design structural steel elements based on evaluated design action effects
5. Apply relevant Australian Standards for steel structures and loading in the designing of structural steel elements
6. Analyse and interpret the behaviour of structural steel elements subjected to a variety of design loads
7. Use engineering software to determine internal design action effects
8. Work effectively as a team member to analyse and report on a structural steel design problem

Subject Content

Plastic Analysis

Biaxial Bending

Shear and bearing beam webs

Bolted and Welded Connections

Frames

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Applied Project	Approximately 20 pages design report	30	N	Group
Professional Task	Exam type questions and 2 hour Mid Semester exam quizzes	20	N	Individual
Final Exam	2 hours	50	N	Individual

CIVL 3014 Structural Analysis

Credit Points 10

Legacy Code 300732

Coordinator Haiping Zhu ([https://directory.westernsydney.edu.au/search/name/Haiping Zhu/](https://directory.westernsydney.edu.au/search/name/Haiping%20Zhu/))

Description This unit introduces students to the aspects of structural analysis of trusses, beams and frames. It covers the first-order elastic analysis of statically determinate and indeterminate structures. This course aims to teach students to master basic skills in structural analysis as well as skills in using computer software to analyse complex structures.

School Eng, Design & Built Env

Discipline Structural Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) CIVL 2007

Equivalent Subjects CIVL 3015 - Structural Analysis

Learning Outcomes

On successful completion of this subject, students should be able to:

1. analyse statically indeterminate structures using force and displacement methods (including slope deflection and moment distribution methods)
2. analyse trusses, beams and frames to obtain internal forces and displacements using the matrix method
3. operate current structural analysis software packages

Subject Content

Slope-deflection method for beam and frame analysis

Moment distribution method for beam and frame analysis

Matrix method for truss analysis

Matrix method for beam analysis

Matrix method for frame analysis

Introduction to second-order analysis of structures

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	30 mins for tutorial quiz and 50 mins for practical quiz	30	N	Individual

CIVL 3016 Building Superstructure

Credit Points 10

Legacy Code 301221

Coordinator Brendan Kirkland ([https://directory.westernsydney.edu.au/search/name/Brendan Kirkland/](https://directory.westernsydney.edu.au/search/name/Brendan%20Kirkland/))

Description The aim of this unit is to provide students with an understanding of the factors that contribute to the design and construction of a building superstructure. Students will be introduced to relevant Australian Standards for common construction materials and practices. The unit also aims to develop the ability of construction students to communicate professionally with other building professionals including structural engineers. Emphasis will be given to the strength, behaviour and failure of structural members, connections and frames.

School Eng, Design & Built Env

Discipline Structural Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Assumed Knowledge

Basic knowledge of building construction both residential and non-residential.

Assessment

CIVL 3018 Hydrogeology

Credit Points 10

Legacy Code 301397

Coordinator Ataur Rahman ([https://directory.westernsydney.edu.au/search/name/Ataur Rahman/](https://directory.westernsydney.edu.au/search/name/Ataur%20Rahman/))

Description This unit covers principles of hydrogeology. It contains concepts related to occurrence of groundwater, groundwater movement, groundwater hydraulics, water wells, quality of groundwater, groundwater modelling and groundwater management. The objectives of this unit are to enable students to learn the concept of groundwater and apply the learnt concepts in solving groundwater problems in engineering practice.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) CIVL 2003

Equivalent Subjects EART 3004 - Hydrogeology

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply fundamental knowledge of groundwater movement, groundwater hydraulics and water wells to solve hydrogeological problems
2. Apply groundwater quality modelling techniques
3. Evaluate groundwater pollution and management problems
4. Analyse groundwater modelling and exploration techniques
5. Evaluate current Australian codes and software to solve groundwater problems
6. Critically evaluate current literature to benchmark recent problems and developments in groundwater engineering practice
7. Design sustainable groundwater engineering projects

Subject Content

1. Occurrence of groundwater
2. Groundwater movement
3. Groundwater and well hydraulics
4. Water wells
5. Groundwater levels and environmental influences
6. Quality of groundwater
7. Pollution of groundwater
8. Management of groundwater
9. Groundwater modelling
10. Groundwater investigation

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

CIVL 3019 Wastewater Systems Design

Credit Points 10

Legacy Code 301426

Coordinator Sathaa Arumugam Sathasivan ([https://directory.westernsydney.edu.au/search/name/Sathaa Arumugam Sathasivan/](https://directory.westernsydney.edu.au/search/name/Sathaa%20Arumugam%20Sathasivan/))

Description Providing clean water and sanitation is one of the United Nations Sustainable Development Goals. Students will gain knowledge and skills in designing and proposing modifications to current wastewater and sanitation practices. Students will examine

conventional processes and explore how they should be modified to address emerging issues (contaminants, climate variability) and how the potential of wastewater as a resource can be realised. Students will also identify various ways smart technologies can be adopted in addressing the challenges facing wastewater disposal/resource recovery.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) CIVL 2003 AND
CIVL 2002 OR
ENGR 1050 OR
PROC 1006

Equivalent Subjects CIVL 4014 - Water and Wastewater Treatment

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Assess risk from key waterborne pathogens and propose engineering control.
2. Demonstrate the ability to set up mass balance equation for different scenario.
3. Design conventional wastewater treatment processes.
4. Measure water quality variation in a pilot/full-scale wastewater system and explain how processes could be modified, to achieve a desired outcome.
5. Assess the risks of wastewater effluent disposal to water bodies including that from climate change/extreme events.
6. Evaluate the environmental impact of wastewater collection, treatment and disposal methods and propose solution in line with Circular Economy concept.
7. Design resource recovery options and explain emerging wastewater treatment options.

Subject Content

1. Water quality parameters relevant for wastewater
2. Wastewater microbiology and epidemiology
3. Wastewater collection systems
4. Modelling wastewater treatment processes
5. Wastewater and sludge treatment processes
6. Resource recovery

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Report	1500 words	10	N	Individual
Report	1500 words	10	N	Individual
Report and presentation	2000-3000 words and 15 minutes	30	N	Both (Individual & Group)
Final Exam	2 hours	50	Y	Individual

Teaching Periods

CIVL 3020 Sustainable Waste Engineering

Credit Points 10

Legacy Code 301422

Coordinator Dharma Hagare ([https://directory.westernsydney.edu.au/search/name/Dharma Hagare/](https://directory.westernsydney.edu.au/search/name/Dharma%20Hagare/))

Description Sustainable waste management is an important consideration for any student who is training to become an engineer, as waste is produced in all engineering fields. In this unit students will identify and characterise sources of solid and hazardous waste generated in the community. The application of circular economy and zero waste principles are examined alongside real-world case studies to focus on sustainable management of waste incorporating minimisation, recycle, recovery and disposable options.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects CIVL 4011 Waste Management

Restrictions Successful completion of 120 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse classification, transportation, storage and disposal of solid and hazardous waste.
2. Apply risk assessment principles to manage hazardous waste in a sustainable way.
3. Design landfill sites for both urban and rural areas using sound engineering principles.
4. Use life cycle analysis to determine appropriate options for waste disposal, and recovery and recycling of materials.
5. Determine appropriate circular economy and zero waste approaches to minimise waste generation.
6. Demonstrate communication and collaboration skills in working with others in an ethical and respectful manner to produce professional analyses and reports in sustainable waste engineering.

Subject Content

1. Solid and hazardous waste classification, transportation and processing.
2. Treatment, reuse/ recovery and disposal options for solid and hazardous waste.
3. Risk assessment and management as applied to hazardous waste.
4. Landfill site location and design, and its sustainable management.
5. Contaminant transport and accumulation.
6. Application of life cycle analysis for evaluating waste disposal options, and recovery and recycling of materials.
7. Circular economy and its application in waste management.
8. Zero waste opportunities and technologies.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Tutorial submissions	In-class submissions	20	N	Individual
Project Report	5000 words including figures, tables and pictures	25	N	Individual
Practical Report	1000 words including tables, figures and pictures	5	N	Individual
Final Exam	3 hours	50	N	Individual

Teaching Periods

CIVL 4001 Applied Mechanics

Credit Points 10

Legacy Code 300986

Coordinator Baolin Wang ([https://directory.westernsydney.edu.au/search/name/Baolin Wang/](https://directory.westernsydney.edu.au/search/name/Baolin%20Wang/))

Description Applied mechanics deals with the mechanical responses of structural components under various loading and support conditions. This unit will introduce the theoretical foundations and solution methods for the stability and dynamic responses of beams, columns and plates and their associated applications in engineering practices.

School Eng, Design & Built Env

Discipline Structural Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) CIVL 3014

Assumed Knowledge

Student should have prior knowledge of strain, stress and deflection analysis of simple structures.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the buckling and vibration behaviours of structural components;
2. Derive the governing equations for the buckling and vibration of structural components;
3. Solve the governing equations analytically for buckling and vibration of beams, columns and plates;
4. Solve the governing equations numerically for buckling and vibration of beams, columns and plates;
5. Apply the buckling and vibration analysis to solve practical engineering problems.

Subject Content

1. Introduction to the buckling behaviour of structures; Governing equations for the buckling of columns;

2. Analytical solutions for simple column buckling cases;
3. Applications of buckling analysis of columns in structural design;
4. Introduction to the vibration behaviour of structures; Governing equations for the free vibration of beams;
5. Analytical solutions for simple beam free vibration cases;
6. Applications of vibration analysis of beams in engineering practices;
7. Introduction to the thin plate theory; Governing equations for the buckling of plates;
8. Analytical solutions for simple plate buckling cases;
9. Governing equations for the vibration of plates; analytical solutions for simple plate vibration cases;
10. Applications of buckling and vibration analysis of plates in engineering practices;
11. Numerical methods for buckling and vibration analysis of structures;
12. Analysis of complex buckling and vibration cases for beams, columns and plates by numerical methods.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

CIVL 4002 Composite Structures

Credit Points 10

Legacy Code 300987

Coordinator Fidelis Mashiri ([https://directory.westernsydney.edu.au/search/name/Fidelis Mashiri/](https://directory.westernsydney.edu.au/search/name/Fidelis%20Mashiri/))

Description This unit builds on knowledge gained in steel and concrete structures, especially the design of structural members using either steel or concrete. Students will learn the design of composite beams, floors, columns and connections based on Australian and International standards as well as mechanics of materials.

School Eng, Design & Built Env

Discipline Structural Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) CIVL 3012 AND CIVL 3002

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and discuss various structural systems used in composite construction
2. Apply limit state design concepts to composite structural elements and structures
3. Analyse and determine design loads for composite structures
4. Design composite structural elements based on service loads

Subject Content

1. Composite Beams
2. Composite Floors
3. Composite Columns
4. Composite Connections

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Assignments (Solutions to Exam Type Questions; Total of 4 to cover each content topic; Each worth 5%; Each topic covers ULOs 1-4)	20 Pages (in total)	20	N	Individual
Mid-Semester Exam	2 Hours	20	N	Individual
Final Examination	2 Hours	60	N	Individual

Teaching Periods

CIVL 4003 Construction Technology 5 (Envelope)

Credit Points 10

Legacy Code 200471

Coordinator Mohammad Reza Razavi ([https://directory.westernsydney.edu.au/search/name/Mohammad Reza Razavi/](https://directory.westernsydney.edu.au/search/name/Mohammad%20Reza%20Razavi/))

Description After undertaking this unit, you should understand the way internal spaces are designed and constructed to optimise thermal, visual and acoustic comfort and for energy efficiency.

School Eng, Design & Built Env

Discipline Building Services Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Co-requisite(s) Students in 2607 Bachelor of Construction Management must enrol in BLDG 4012 Industry Based Learning before enrolling in this unit

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Relate people's sight, hearing and thermal comfort to the lighting, acoustics and thermal control of buildings.
2. Evaluate how heat is transmitted through and stored within the building envelope.
3. Explain the construction methods used for thermal insulation and thermal storage in a building.
4. Analyse how wind, rain and condensation is excluded from a building envelope.
5. Determine the basic parameters of lighting using practical measurements and mathematical models.
6. Synthesise artificial lighting strategies in simple room configurations.
7. Relate how the intensity and movement of the sun affects daylighting and apply strategies to improve the natural lighting of buildings.

8. Describe the characteristics of sound in a structure and in the air.
9. Determine sound transmission by practical measurements and mathematical calculations.
10. Develop construction techniques to improve the acoustic resistance of partitions.
11. Explain how noise and reverberation can be attenuated within a building.
12. Evaluate a building in terms of energy efficient design.
13. Investigate the relationship between built form and climate.
14. Actively contribute to team research and communication project.

Subject Content

Fundamentals of Vision
 Artificial Light
 Daylight
 Thermal Comfort
 Steady State Heat Flow
 Periodic Heat Flow
 Fire Resistance
 Fundamentals of Human Hearing
 Noise Control
 Room Acoustics
 Effect of Climate on Buildings & Weatherproofing

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

CIVL 4004 Construction Technology 6 (Services)

Credit Points 10

Legacy Code 300725

Coordinator Baolin Wang ([https://directory.westernsydney.edu.au/search/name/Baolin Wang/](https://directory.westernsydney.edu.au/search/name/Baolin%20Wang/))

Description To provide students with a vehicle to develop knowledge and skills needed to comprehend the design of services in major buildings, and in so doing engender a life-long interpretation of the intricacies of physical installation and their critical sequence in the construction process.

School Eng, Design & Built Env

Discipline Building Services Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Equivalent Subjects LGYB 5400 Construction Technology 6 (Services)

Restrictions Students must be enrolled in Bachelor of Construction Management, Bachelor of Engineering, Bachelor of Engineering Advanced (Honours), Bachelor of Building Design Management, Bachelor of Engineering (Honours) or Diploma in Building Design Management/Bachelor of Building Design Management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret and apply pragmatic decision making as it applies to the role of a construction professional in the design, installation and management of major building services
2. Differentiate between the concept of building services coordination and building services integration

Subject Content

This subject provides students with an introduction to design, installation and management of these services:

1. Mechanical (heating, ventilation and air conditioning)
2. Electrical (transformation, reticulation and safety devices)
3. Hydraulic (water supply, storage and distribution, sanitary plumbing and fittings)
4. Active fire systems (sprinklers and detectors)
5. Communication and security systems
6. Vertical transportation services (elevators and escalators)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

CIVL 4005 Construction in Practice 3

Credit Points 10

Legacy Code 200484

Coordinator John Smolders ([https://directory.westernsydney.edu.au/search/name/John Smolders/](https://directory.westernsydney.edu.au/search/name/John%20Smolders/))

Description This unit enables students to integrate and develop knowledge gained earlier in the course allowing them to simulate industry practice. Students are given a brief to undertake large and complex construction projects (eg. high rise buildings, airport construction, or sports stadium construction). They then take account of regulatory control, financial limitations, and stakeholder impacts whilst managing a team and being flexible and responsive to changing demands.

School Eng, Design & Built Env

Discipline Construction Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Co-requisite(s) Students in 2607 Bachelor of Construction Management must enrol in BLDG 4012 Industry Based Learning before enrolling in this unit

Equivalent Subjects LGYB 5402 - Building in Practice 3

Restrictions Successful completion of 200 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate the acquisition and synthesis of a wide range of skills and knowledge from their previous years of study in the undertaking of a complex building project, including (but not limited to): a. feasibility studies and site utilisation b. Impact assessment issues c. analysis of market influences with regard to leasing/sale of buildings d. planning and building control legislation including heritage requirements and conservation issues e. cost & contract planning f. project management and contract administration g. the role of consultants and other members of the construction team h. specification writing, and i. tendering procedures

2. Plan, manage and report on a complex team-based construction project,
3. Reflect upon their team performance.

Subject Content

- feasibility studies and site utilisation,
- impact assessment Issues
- analysis of market influences with regard to leasing/sale of buildings,
- planning and Building control Legislation including heritage requirements and conservation Issues
- cost & contract planning,
- project management and contract administration,
- The role of consultants and other members of The construction team
- specification writing, and
- tendering procedures

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Two seminar presentations	Not specified	40	N	Group
Final Report	5000 words	30	N	Group
Reflective diary	2000 words	30	N	Individual

Teaching Periods

CIVL 4008 Pile Foundations

Credit Points 10

Legacy Code 300990

Coordinator Samantha Liyanapathirana ([https://directory.westernsydney.edu.au/search/name/Samanthika Liyanapathirana/](https://directory.westernsydney.edu.au/search/name/Samanthika%20Liyanapathirana/))

Description This unit covers analysis and design criteria for pile foundations subjected to axial, lateral and dynamic loading based on the Australian Standards. Computer software necessary to carry out analysis and design will be introduced. Also field testing methods available for pile integrity testing will be discussed.

School Eng, Design & Built Env

Discipline Geotechnical Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) CIVL 3007 OR CIVL 3008

Learning Outcomes

On successful completion of this subject, students should be able to:

1. evaluate settlement and bearing capacity of single piles and pile groups
2. compute the lateral load carrying capacity of piles
3. design piled raft foundations

- interpret and apply Australian standards for design of deep foundations
- explain the different pile integrity testing methods and their suitability for different conditions

Subject Content

- Single piles and pile groups subjected to vertical loads
- Laterally loaded piles
- Piled raft foundations
- Application of Australian standards in design of pile foundations
- Design of piles subjected to dynamic loading
- Pile integrity testing

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	1 hour	20	N	Individual

CIVL 4009 Timber Structures (UG)

Credit Points 10

Legacy Code 300739

Coordinator Fidelis Mashiri (<https://directory.westernsydney.edu.au/search/name/FidelisMashiri/>)

Description Students learn about the engineering properties of timber and assess it as a construction material. Design methods based on structural mechanics are covered including the design of members and connections.

School Eng, Design & Built Env

Discipline Civil Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) CIVL 2007

Co-requisite(s) CIVL 3014

Equivalent Subjects LGYB 1031 - Timber Structures (UG)

Learning Outcomes

On successful completion of this subject, students should be able to:

- Identify the properties of timber that influence its strength as a construction material.
- Apply limit state design concepts for timber elements and whole structures
- Determine design loads and analyse timber structures to evaluate internal design action effects
- Design timber elements based on evaluated design action effects

Subject Content

Characteristics, grading and use of timber for structural design
 Design of tension members
 Design of Compression members
 Design of members in flexure
 Design of members under combined action
 Design of connections

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

CIVL 4010 Transportation Engineering

Credit Points 10

Legacy Code 300982

Coordinator Dharma Hagare ([https://directory.westernsydney.edu.au/search/name/Dharma Hagare/](https://directory.westernsydney.edu.au/search/name/Dharma%20Hagare/))

Description This unit provides students with the course material that will assist them with the execution of Civil Engineering Construction and Urban Development / Town Planning projects. The unit mainly focuses on the planning, design and construction of transportation facilities for urban and rural areas. Students will have an opportunity to implement the skills learnt using a case of a subdivision development.

School Eng, Design & Built Env

Discipline Transport Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) CIVL 1001 AND ENGR 2016 AND EART 4001

Incompatible Subjects CIVL 2005 - Infrastructure Engineering

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply principles involved in the design, construction and maintenance of both small and large transportation networks comprising of both roadways and railway tracks.
2. Analyse and design transportation hubs and intersections for allowing efficient traffic flow.
3. Analyse sustainable transport systems and facilities for both rural and urban areas.
4. Apply available design tools and guidelines for transportation network design.
5. Create and contribute to productive and efficient teams for designing and evaluating efficient transportation systems.

Subject Content

1. Transportation planning and major networks design.

2. Traffic theory and intersections design.
3. Road network design for residential area.
4. Estimation of design traffic loads.
5. Design of carriageways, pavements and associated drainage facilities.
6. Application of design principles for the design of a subdivision.
7. Design and maintenance of railway tracks.
8. Sustainability of transportation systems and facilities, and their evaluation.
9. Use of relevant design and drawing software.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Tutorial and quiz participation.	Weekly	10	N	Individual
Major Project (2 reports)	15,000 words equivalent for the entire group of 4 members. The report will include drawings, calculation sheets, tables and figures. Actual write-up can be about 25%.	30	N	Group
Final exam	3 hours	60	N	Individual

Teaching Periods

CIVL 4011 Waste Management

Credit Points 10

Legacy Code 300994

Coordinator Dharma Hagare ([https://directory.westernsydney.edu.au/search/name/Dharma Hagare/](https://directory.westernsydney.edu.au/search/name/Dharma%20Hagare/))

Description Sustainable waste management, to reduce climate impact, is an important consideration for any student who is getting trained as an engineer. In this unit students will identify and characterise sources of atmospheric, solid and hazardous waste generated from the community. Students will then focus on sustainable management of waste incorporating minimisation, recycle, recovery and disposable options as well as greenhouse gases and their impact on climate change.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) CIVL 2002

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the major atmospheric pollutants and the technologies available for their control.
2. Examine the drivers for climate change and discuss their impact at global level.
3. Classify the solid and hazardous waste produced and analyse its transportation and disposal options.
4. Apply risk assessment principles to manage hazardous waste in a sustainable way.
5. Use sound engineering principles to locate and design landfill sites for both urban and rural areas.
6. Assess waste disposal options, and recovery and recycling of materials in terms of triple bottom line objectives.

Subject Content

1. Solid and hazardous waste classification, transportation and processing.
2. Treatment, reuse/ recovery and disposal options for solid and hazardous waste.
3. Risk assessment and management as applied to hazardous waste.
4. Landfill site location and design, and its sustainable management.
5. Contaminant transport and accumulation.
6. Waste disposal options and recovery and recycling of materials, and their assessment against triple bottom line criteria.
7. Atmospheric pollutants and their control.
8. Climate change and its mitigation.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Participation	1 hour per quiz	15	N	Individual

CIVL 4012 Water Resource Engineering

Credit Points 10

Legacy Code 300993

Coordinator Surendra Shrestha ([https://directory.westernsydney.edu.au/search/name/Surendra Shrestha/](https://directory.westernsydney.edu.au/search/name/Surendra%20Shrestha/))

Description This unit introduces optimisation theories applicable to water resources projects. The unit applies different optimisation models to select the best option available. Engineering economic theories specifically applicable to water resources projects are also discussed.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) CIVL 3011

Learning Outcomes

On successful completion of this subject, students should be able to:

1. differentiate between linear and non-linear programming principles
2. formulate water resources problems using linear, non-linear and dynamic programming techniques
3. employ appropriate optimisation techniques to water resource development projects
4. propose the best water resources project alternative among the available options
5. apply engineering economic principles to water resources projects
6. develop a decision support system as a team

Subject Content

1. Linear Programming
2. Non-linear Programming
3. Dynamic Programming
4. Water Resources Economics
5. Water Allocation Models

CIVL 4017 Surface Water Hydrology

Credit Points 10

Legacy Code 301329

Coordinator Utsab Katwal ([https://directory.westernsydney.edu.au/search/name/Utsab Katwal/](https://directory.westernsydney.edu.au/search/name/Utsab%20Katwal/))

Description Surface water hydrology covers the principles of hydrology as it pertains to surface water component of the hydrologic cycle. The principal focus is on the relationship between rainfall and surface runoff. The extent of flooding resulting from storm events will be evaluated through floodplain delineation process. Successful completion of this unit provides the competencies required to propose sustainable engineering solutions to potential adverse impacts of land-use changes. This unit builds on the hydraulic concepts acquired from the units completed earlier.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) CIVL 3011

Equivalent Subjects CIVL 4007 - Hydrology EART 4001 - Surface Water Hydrology

Assumed Knowledge

Students need working knowledge of spreadsheet software, for example Microsoft Excel.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify all components of the hydrologic cycle
2. Perform hydrologic analysis of catchments
3. Design retention and detention basins incorporating appropriate hydraulic structures and evaluate their effectiveness
4. Apply statistical techniques to forecast future hydrologic events

5. Formulate and execute surface water hydrology software packages to simulate catchment response
6. Delineate extent of flooding using appropriate hydraulic software packages
7. Propose sustainable solutions to address adverse impacts of land development
8. Effectively work in a team environment

Subject Content

Hydrologic principles
Hydrologic analysis
Frequency analysis
Flood routing
Hydrologic simulation models
Urban hydrology
Floodplain hydraulics
Design applications in hydrology

CIVL 4018 Building Design Project 1 (Honours)

Credit Points 20

Legacy Code 301101

Coordinator Mary Hardie ([https://directory.westernsydney.edu.au/search/name/Mary Hardie/](https://directory.westernsydney.edu.au/search/name/Mary%20Hardie/))

Description In this unit, students who have a record of superior performance in the Building Design Management program, will source a suitable design project at their own initiative, to complete as a capstone work which illustrates the skills they have developed throughout their study program. The project will contain a high level of complexity exceeding that of previous building designs produced in the program. Both the complexity level and the number of design constraints will distinguish the project undertaken for this unit from the non-honours stream unit. Diverse stakeholder input on the project's impact will be gathered and assessed. The design solution generated will show mastery of complex design problems which integrate technical knowledge with economic and social responsibility. Superior skill in resolving design conflicts will be demonstrated.

School Eng, Design & Built Env

Discipline Construction Engineering

Student Contribution Band HECS Band 2 20cp

Level Undergraduate Level 4 subject

Pre-requisite(s) BLDG 3001

Incompatible Subjects BLDG 4001 Building Design Project 1

Restrictions Students must be enrolled in 3727 Bachelor of Building Design Management.

Assumed Knowledge

Students should be familiar with the content from the first three years of the Building Design Management degree, including expertise in CAD, iterative design process and construction technology.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Generate a design brief for a building project with sufficient detail to make a preliminary judgement on project feasibility.

2. Analyse the site conditions and construct a performance specification for a building design to a professional standard.
3. Make the case for particular design decisions which have the effect of limiting some design choices.
4. Reflect on feedback relating to the proposed sketch design and make responsive changes to demonstrate resolution of stakeholder conflicts.
5. Illustrate the building design through a fully rendered 3D CAD model which is of professional standard and can be understood by members of the general public.
6. Argue persuasively for a design solution that you have generated.

Subject Content

Planning approval requirements
Complex and high-rise building projects
Buildings incorporating multiple usages
Design under constrained conditions
Multiple stakeholder interest groups
Conflict resolution

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Report	1,500 words	20	N	Individual
Applied Project	3D CAD model and 500 word explanation	30	N	Individual
Applied Project	3D CAD model and 2D drawings	40	N	Individual

CIVL 4019 Building Design Project 2 (Honours)

Credit Points 20

Legacy Code 301102

Coordinator Mary Hardie ([https://directory.westernsydney.edu.au/search/name/Mary Hardie/](https://directory.westernsydney.edu.au/search/name/Mary%20Hardie/))

Description In this unit, students who have a record of superior performance in the program will continue to develop the design solution they created in Building Design Project 1 (Honours) into a fully resolved CAD model suitable for costing, scheduling and contracting. Construction Certificate documentation of professional standard will be generated. Both the complexity level and the number of design constraints will distinguish the project undertaken for this unit from the non-honours stream unit. Diverse stakeholder input on the projects impact will be gathered and assessed. Complex constraints relating to buildability and efficient project delivery will be resolved. Strict budgetary constraints will be imposed and students will be expected to demonstrate a capacity to use lateral thinking and generate creative solutions in response to problematic situations which arise during project delivery but which were unknown at project commencement.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Select the appropriate construction systems for the building project.
2. Specify materials, finishes and performance standards expected in the completed building.
3. Resolve the details of footings/floor/wall and floor/roof junctions and illustrate these with detail drawings to a professional standard.
4. Construct a fully detailed 3D CAD model with sufficient information for accurate pricing and technical assessment.
5. Illustrate and present their design management choices in 2D views drawn from a 3D CAD model of professional standard.
6. Resolve budgetary conflicts, construction safety issues and environmental impacts of construction using innovative design management solutions.
7. Reflect on feedback relating to a building design and argue persuasively for a design solution that you have generated.

Subject Content

Construction Certificate approval
Complex and high-rise development
Complex services integration and clash detection
Proactive response to stakeholder feedback
Conflict resolution

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Specification of a critical trade section for the project	2000 words	20	N	Individual
Detailed drawings of critical construction junctions	3D CAD model and large scale 2D drawings	30	N	Individual
Fully developed building design suitable for Construction Certificate Application	3D CAD model and 2D drawings	40	N	Individual
Reflective Report	1000 words	10	N	Individual

Teaching Periods

CIVL 4020 Construction Research Project

Credit Points 20

Legacy Code 301223

Coordinator Peng Zhang ([https://directory.westernsydney.edu.au/search/name/Peng Zhang/](https://directory.westernsydney.edu.au/search/name/Peng%20Zhang/))

Description In this unit students will undertake practical research into identified technical, managerial or economic problems in the construction industry. Groups of up to four students will collectively undertake these industry based research projects and produce an individual final report plus another tangible outcome as agreed at the project proposal stage. A wide range of indicative practical projects will be available to assist and direct the research effort.

CIVL 7001 Advanced Applied Mechanics

Credit Points 10

Legacy Code 301010

Coordinator Baolin Wang ([https://directory.westernsydney.edu.au/search/name/Baolin Wang/](https://directory.westernsydney.edu.au/search/name/Baolin%20Wang/))

Description Applied mechanics deals with the mechanical responses of structural components under various loading and support conditions. This unit will introduce the theory of elasticity and study the bending, buckling and vibration behaviours of beams, plates and shells and their associated applications in engineering practices.

School Eng, Design & Built Env

Discipline Structural Engineering

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Assumed Knowledge

Students should have prior knowledge of strain, stress and deflection analysis of simple structures as well as knowledge of energy principle for structural analysis.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the bending, buckling and vibration behaviours of structural components;
2. Derive the governing equations for the bending, buckling and vibration of structural components;
3. Solve the governing equations for simple bending, buckling and vibration cases of beams, plates and shells;
4. Use finite element package to solve the governing equations numerically for complex cases;
5. Apply the buckling and vibration analysis to solve practical engineering problems.

Subject Content

1. Introduction to theory of elasticity; bending of beams;

2. Introduction to buckling of structures; analytical solutions for simple column buckling cases;
3. Introduction to vibration of structures; analytical solutions for simple beam free vibration cases;
4. Introduction to thin plate theory; Governing equations for the bending, buckling and vibration of plates;
5. Analytical solutions for simple plate bending, buckling and vibration cases;
6. Analysis of buckling and vibration of composite plates;
7. Introduction to thin shell theories;
8. Analytical solutions for simple shell bending, buckling and vibration cases;
9. Introduction to numerical methods for bending, buckling and vibration analysis of structures;
10. Applications of numerical methods to solve complex buckling and vibration cases for beams, columns and plates.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
2 x 1-hour in-class quiz (20% each)	1 hour each	40	N	Individual
Final exam (short answers)	2 hours	55	N	Individual
10 x tute assessment (0.5% each) (in-class)	2 pages each	5	N	Individual

CIVL 7002 Advanced Composite Structures

Credit Points 10

Legacy Code 301008

Coordinator Fidelis Mashiri ([https://directory.westernsydney.edu.au/search/name/Fidelis Mashiri/](https://directory.westernsydney.edu.au/search/name/Fidelis%20Mashiri/))

Description This unit enables students to gain an in-depth knowledge into composite structures based on Australian Standards and International Standards. Recent advances in the design of composite beams, slabs, columns and connections will be introduced.

School Eng, Design & Built Env

Discipline Civil Engineering

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Classify various structural systems used in composite construction including recent developments
2. Apply limit state design concepts to composite structural elements and structures
3. Analyse and determine design loads for composite structures
4. Design composite structural elements based on service loads

Subject Content

1. Composite Beams
2. Composite Floors
3. Composite Columns
4. Composite Connections

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Assignments: 10 pages per Coursework assignment, total of 2, each worth 10%.	20	N	Individual	
Mid-Semester Exam	2hrs	20	N	Individual
Final Examination (Long Answers)	2hrs	60	N	Individual

Teaching Periods

CIVL 7003 Advanced Geotechnical Engineering

Credit Points 10

Legacy Code 300604

Coordinator Samantha Liyanapathirana ([https://directory.westernsydney.edu.au/search/name/Samanthika Liyanapathirana/](https://directory.westernsydney.edu.au/search/name/Samanthika%20Liyanapathirana/))

Description This unit will provide an overview of soil mechanics concepts required for the solution of practical geotechnical engineering problems. Students will be taught soil and foundation analysis including design techniques. The topics will cover shallow foundations, pile foundations, the stability of earth retaining structures, excavations, soft soils, groundwater flow and stability of slopes. Practical engineering cases will be emphasized.

School Eng, Design & Built Env

Discipline Geotechnical Engineering

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 6113 - Foundation Engineering (PG)

Restrictions

Students must be enrolled in a postgraduate program

Assumed Knowledge

Fundamental knowledge of soil mechanics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply soil mechanics principles to analyse foundation problems
2. Apply a systematic engineering approach to designing foundations
3. Interpret soil properties and soil test data for use in foundation analysis and design
4. Apply engineering software as a tool in foundation analysis and design
5. Interpret and apply Australian Standards when designing foundations

Subject Content

Introduction to foundation engineering
Site investigations
Shallow foundation design
Mat foundations
Lateral earth pressure
Retaining structures
Slope stability
Soft soils

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Major Project 1	Equivalent 25 pages	30	N	Group
Major Project 2	Equivalent 25 pages	30	N	Individual
Final Exam	2 hours	40	N	Individual

Teaching Periods

CIVL 7004 Advanced Highway Infrastructure

Credit Points 10

Legacy Code 301011

Coordinator Chin Leo ([https://directory.westernsydney.edu.au/search/name/Chin Leo/](https://directory.westernsydney.edu.au/search/name/Chin%20Leo/))

Description This unit teaches pavement design and ground engineering design as part of construction of the highway. The aim is to provide students with advanced knowledge in designing pavement structures and ground improvement techniques to deal with soft and weak grounds for construction of highway and highway embankments. These aspects will be taught in relation to Australian practices.

School Eng, Design & Built Env

Discipline Construction Engineering

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Soil mechanics at undergraduate level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply principles of mechanics in pavement design.
2. Analyse soil principles for ground engineering and embankment design.
3. Evaluate soil properties and soil test data in geotechnical analysis and design.
4. Design highway infrastructures integrating relevant engineering principles using engineering software and Australian practices.
5. Collaborate with people from diverse backgrounds, both specialist and non-specialist, to achieve objectives of tasks.
6. Communicate analyses and recommendations in a formal report using appropriate technical and diagrammatic specifications.
7. Demonstrate ethical professional practice in all activities of the subject.

Subject Content

Pavement Design Module:

1. Asphalt mix design
2. Flexible pavement design
3. Rigid pavement design

Highway Embankment and ground improvement Module:

1. Soft soil remediation
2. Ground improvement techniques
3. Earth fills and retaining structures

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Participation	2 hours	10	N	Individual
Applied Project	25 pages (major report) and 15 pages (minor report)	50	N	Group

Numerical 1 hour (per 40 N Individual
Problem quiz)

CIVL 7005 Advanced Numerical Methods in Engineering

Credit Points 10

Legacy Code 301024

Coordinator Chin Leo ([https://directory.westernsydney.edu.au/search/name/Chin Leo/](https://directory.westernsydney.edu.au/search/name/Chin%20Leo/))

Description The finite element method is an essential tool for the analysis and design of machine parts and civil engineering structures. The objective of this unit is to introduce the principles of finite element method and the applications of one, two and three dimensional elements in solving various engineering problems.

School Eng, Design & Built Env

Discipline Structural Engineering

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Assumed Knowledge

Students should have prior knowledge of strain, stress and deflection analysis of simple structures as well as knowledge of energy principle for structural analysis.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the principles of finite element theory to analyse the mechanical behaviours of 1D, 2D and 3D structural components;
2. Formulate finite element algebraic equations for elasticity;
3. Determine the element stiffness matrices for 1D, 2D and 3D elements;
4. Evaluate the workings and limitations of commercial finite element packages;
5. Solve practical engineering problems by using finite element method.

Subject Content

1. Constitutive stress-strain relationships in elasticity;
2. Strain-displacement relationship;
3. Potential energy in elastic body;
4. Principle of minimum potential energy;

5. Finite element method for 1D analysis;
6. Shape functions;
7. 2D plane stress analysis including triangular elements, quadrilateral elements;
8. Finite elements for plates and shells;
9. 3D solid elements;
10. Constraints and pressure loadings;
11. Stress and strain results.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
2 x 1-hour In-Class Quiz (20% each)	1 hour each	40	N	Individual

CIVL 7006 Advanced Structural Analysis

Credit Points 10

Legacy Code 300594

Coordinator Haiping Zhu ([https://directory.westernsydney.edu.au/search/name/Haiping Zhu/](https://directory.westernsydney.edu.au/search/name/Haiping%20Zhu/))

Description This unit will introduce students at postgraduate level to structural analysis of trusses, beams, frames and plates. It covers the slope deflection method and matrix method for analysis of beams, trusses and frames, and the bending and buckling analysis of beams and plates under various loading conditions. The theories learned in classes will be reinforced in practical sessions by using computer software packages.

School Eng, Design & Built Env

Discipline Civil Engineering

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 5845 - Linear and Nonlinear Analysis of Structures LGYA 5976 - Advanced Structural Engineering LGYA 5837 - Numerical and Finite Element Methods

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Students must have knowledge in engineering mathematics, engineering mechanics at intermediate level and structural analysis at fundamental level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. improve the skills to analyse beams and frames using the slope deflection method
2. enhance the ability to use the matrix method to analyse complex structures
3. analyse bending and buckling of beams and plates
4. use software packages to analyse structures

Subject Content

Slope deflection method for beams and frames
Matrix method for statically indeterminate structures
Bending of beams and plates
Buckling of beams and plates

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Final Exam	2 hours	55	N	Individual

CIVL 7007 Advanced Timber Structures

Credit Points 10

Legacy Code 301009

Coordinator Fidelis Mashiri ([https://directory.westernsydney.edu.au/search/name/Fidelis Mashiri/](https://directory.westernsydney.edu.au/search/name/Fidelis%20Mashiri/))

Description This unit enables students to gain an in-depth knowledge into timber structures based on Australian Standards. Design of timber beams, floors, columns and connections will be introduced with a focus on the use of plywood, round timbers, glue-laminated timber and structural laminated veneer lumber.

School Eng, Design & Built Env

Discipline Civil Engineering

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret the properties of sawn timber and manufactured wood products that influence their strength as a construction materials.
2. Apply limit state design concepts for timber elements and whole structures
3. Determine design loads and analyse timber structures to evaluate internal design action effects
4. Design timber elements based on evaluated design action effects

Subject Content

1. Characteristics, grading and use of timber for structural design
2. Design of tension members
3. Design of Compression members
4. Design of members in flexure
5. Design of members under combined action
6. Design of connections

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

CIVL 7008 Advanced Waste Management

Credit Points 10

Legacy Code 301017

Coordinator Dharma Hagare ([https://directory.westernsydney.edu.au/search/name/Dharma Hagare/](https://directory.westernsydney.edu.au/search/name/Dharma%20Hagare/))

Description This unit covers sources, identification and characterisation of solid and hazardous waste generated from the community. Sustainable management of waste incorporating minimisation, recycle, recovery and disposable options is discussed. Also, atmospheric pollutants and their control, greenhouse gases and their impact on climate change are examined.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the technologies available for controlling the major atmospheric pollutants.
2. Systematically evaluate the drivers for climate change and discuss their impact at global level.
3. Classify the solid and hazardous waste produced and analyse its transportation and disposal options.
4. Apply risk assessment principles to manage hazardous waste in a sustainable way.
5. Apply advanced tools such as, life cycle analysis, to locate and design landfill sites for both urban and rural areas.
6. Assess waste disposal options, and recovery and recycling of materials in terms of triple bottom line objectives.

Subject Content

1. Solid and hazardous waste classification, transportation and processing.
2. Treatment and disposal options for solid and hazardous waste.
3. Risk assessment and management as applied to hazardous waste.
4. Landfill site location and design, and its sustainable management.
5. Contaminant transport and accumulation.
6. Waste disposal options and recovery and recycling of materials, and their assessment against triple bottom line criteria.
7. Atmospheric pollutants and their control.
8. Climate change and its mitigation.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Participation	1 hour per quiz	15	N	Individual
Report	4,000 words including tables, figures and pictures	30	N	Individual
Report	2,000 words including figures, tables and pictures	5	N	Group
Final Exam	3 hours	50	N	Individual

CIVL 7009 Advanced Water Engineering

Credit Points 10

Legacy Code 300595

Coordinator Surendra Shrestha ([https://directory.westernsydney.edu.au/search/name/Surendra Shrestha/](https://directory.westernsydney.edu.au/search/name/Surendra%20Shrestha/))

Description This unit introduces advanced principles of engineering hydrology as it pertains to the surface water component of the hydrologic cycle. Students are exposed to floodplain analysis techniques. The focus is on practical engineering solutions to issues originating from catchment development. Students are exposed to commonly used hydraulic and hydrologic software packages to delineate flooded areas resulting from such developments.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects CIVL 4007 Hydrology EART 4001 Surface Water Hydrology

Restrictions

This is a specialised subject in a specialist discipline in Master of Engineering program. Students must be enrolled in a postgraduate engineering program undertaking a Civil Engineering major or in the Master of Research.

Assumed Knowledge

Exposure to basic hydraulics and engineering hydrologic principles.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Simulate catchment response using hydrologic principles
2. Verify catchment response using commonly used hydraulic and hydrologic software packages
3. Design on-site detention structures to meet regulatory requirements
4. Identify areas flooded from storms of specified frequencies and durations
5. Communicate effectively with peers and wider professional communities

Subject Content

1. Components of a hydrologic cycle
2. Rainfall-runoff relationships
3. On-site detention systems
4. Commonly used hydraulic & hydrologic software packages

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

CIVL 7011 Building Engineering

Credit Points 10

Legacy Code 300713

Coordinator Brendan Kirkland ([https://directory.westernsydney.edu.au/search/name/Brendan Kirkland/](https://directory.westernsydney.edu.au/search/name/Brendan%20Kirkland/))

Description The aim of this unit is to provide students with an understanding of the factors that contribute to decisions in building design in respect of compliance with building regulations and standards. Topics include soil classification for construction, footing systems, loadings and their evaluation, structural materials and systems, structural behaviour and strength, and failure and rectification.

School Eng, Design & Built Env

Discipline Building Services Engineering

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects CUVL5001 - Building Engineering
LGYB 8310 - Building Engineering

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. describe the underlying concepts of building engineering
2. explain the soil classification and its implication on footing systems
3. discuss loading and structural behaviour of various structural members and perform simple performance evaluation
4. carry out rudimentary review of designs for NCCA compliance
5. assess existing structures in terms of the acceptability of their performance.
6. apply various codes of practice related to structural engineering in assessing a design solution.

Subject Content

1. Structural design actions: dead and live load, wind effect
2. Load combinations and Limit State Design
3. Soil classification and footing systems
4. Structural engineering concepts
5. Behaviour of structural materials
6. Reinforced concrete members and prestressed concrete
7. Structural timber members and connections
8. Structural steel members: beams, columns and tension members
9. Steel connections, frames and composite members

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Description This unit describes the various types and application of building services and fire safety systems. It introduces appropriate standards for building fire service system design and the methods of applying recommendations of fire engineering assessments with respect to building services and fire safety systems.

School Eng, Design & Built Env

Discipline Building Services Engineering

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYC 0661 - Building Fire Services

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Building surveying, fire safety engineering and related disciplines.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. explain the operation of building fire services
2. identify and apply the relevant standards for building fire services
3. describe the relationship between fire brigade intervention and fire safety design
4. assess the adequacy of building fire safety system designs

Subject Content

Building Fire Safety Systems

Smoke Hazard Management

Automatic Fire Detection

Fire Hydrants

Hose Reels and Extinguishers

Fire Sprinklers

Special Hazard Extinguishment

Warning, communication signage and lighting

Emergency Planning and Response

Environment in which Fire Brigade Intervention Model operates

The Fire Brigade Intervention Model

Fire Brigade Operations

Fire System Reliability

Fire awareness

Hazard reduction & performance based designs and servicing, maintenance and certification.

CIVL 7013 Deep Foundations

Credit Points 10

Legacy Code 301015

Coordinator Samanthika Liyanapathirana ([https://directory.westernsydney.edu.au/search/name/Samanthika Liyanapathirana/](https://directory.westernsydney.edu.au/search/name/Samanthika+Liyanapathirana/))

Description This unit covers advanced analysis and design criteria for deep foundations. Both statically and dynamically loaded deep foundations are covered including the site investigation methods and field testing methods adopted in practice for determining integrity and load carrying capacity. Appropriate computer software will be introduced to carry out the deep foundation design according to the Australian Standards.

School Eng, Design & Built Env

Discipline Geotechnical Engineering

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design piled raft foundations
2. Interpret and apply Australian standards for design of deep foundations
3. Identify pile load and integrity testing methods suitable for different conditions
4. Describe site investigation methods appropriate for different site conditions
5. Evaluate settlement, lateral deformation and load carrying capacity of deep foundations

Subject Content

1. Site investigation
2. Analysis and design of deep foundations subjected to axial and lateral loading, according to Australian Standards.
3. Piled raft foundations
4. Design of deep foundations for seismically active regions
5. Pile load and integrity testing methods for Deep foundations

CIVL 7014 Sustainable Systems

Credit Points 10

Legacy Code 301003

Coordinator Sathaa Arumugam Sathasivan ([https://directory.westernsydney.edu.au/search/name/Sathaa Arumugam Sathasivan/](https://directory.westernsydney.edu.au/search/name/Sathaa+Arumugam+Sathasivan/))

Description This unit teaches students the essential tools available to achieve environmental sustainability in various engineering/construction/industrial design professional settings. The focus of the unit is on the application of the tools and exploration of Australian regulatory and sustainable development practices.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Successfully select the tools available for achieving sustainable development.
2. Demonstrate via the chosen project the basic social, cultural, environmental, and global considerations required for sustainable development.
3. Perform Life Cycle Assessment using GaBi for a chosen project.
4. Perform Environmental/Social/Economic Impact Assessment for a chosen project.
5. Analyse energy efficiency and suggest possible improvements.
6. Apply various Australian environmental regulations.

Subject Content

1. Introduction to sustainable development.
2. Introduction to medium related environmental problems.
3. Material and energy flow in the environment and processes.
4. Ecosystems, Ecology.
5. Social aspects of environment and Environmental ethics.
6. Past policies and consequences on technological innovations and challenges they posed & Concept of sustainability.
7. Tools applied in achieving sustainability and case studies;

(1) Technical tools:

- a. Environmental Impact Assessment
- b. Cleaner Production
- c. Life Cycle Assessment
- d. Industrial Ecology
- e. Energy efficiency
- f. Social Impact Assessment
- g. Cumulative Impact Assessment

(2) Non-technical tools:

- Regulatory, economic, and policy tools

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Report	2,000 to 3,000 words	35	N	Individual
Report	2,000 to 3,000 words	35	N	Individual

CIVL 7015 Water Resources Systems Analysis

Credit Points 10

Legacy Code 301012

Coordinator Surendra Shrestha ([https://directory.westernsydney.edu.au/search/name/Surendra Shrestha/](https://directory.westernsydney.edu.au/search/name/Surendra%20Shrestha/))

Description Water resources projects are large infrastructure projects requiring huge capital expenditure. In addition, multiple options are usually available to meet the project goals but at different costs and under varying constraints. This unit presents the application of optimisation techniques to select the best project from a list of competing projects. Applications of these techniques to optimally allocate available water resources are discussed. These are presented within the context of maximising the return of investment.

School Eng, Design & Built Env

Discipline Water and Sanitary Engineering

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate Engineering program undertaking a Civil Engineering major.

Assumed Knowledge

Discounting techniques, time value of money, equivalence analysis, present worth analysis, annual worth analysis, benefit-cost analysis, net benefit analysis, rate of return. Fluid properties, hydrostatics, open channel flow analysis, pipe network analysis, analysis and design of hydraulic structures, exposure to surface water hydrology and its components, water quality analysis.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. formulate and solve optimisation problems with specific application to water resources projects

- use linear and non-linear programming techniques in the decision making process (water resources projects)
- propose the best water resource project alternative from among various available options
- develop and implement decision support systems in selection of available water resources
- select and apply the most appropriate model from among commonly available water allocation models
- communicate effectively with peers and wider professional communities

Subject Content

- Linear Programming principles
- Non-linear Programming techniques
- Engineering Economic theory
- Water Allocation Models
- Commonly used optimisation packages

CMPL 1001 Traditional Chinese Medicine 1

Credit Points 10

Legacy Code 400346

Coordinator Xiaoshu Zhu ([https://directory.westernsydney.edu.au/search/name/Xiaoshu Zhu/](https://directory.westernsydney.edu.au/search/name/Xiaoshu%20Zhu/))

Description This unit provides a comprehensive introduction to traditional Chinese medicine (TCM). Students are introduced to basic TCM theory, and the physiological principles of the diagnostic system that forms the basis of TCM practice. The history and philosophy of Chinese medicine is introduced and discussed in the light of contemporary clinical practice.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the philosophical context of TCM in preparation for future clinical practice;
2. Compare the main differences between traditional Chinese medical science and contemporary Western medical science;
3. Explain the professional practice of TCM within the context of health care in Australia, and the development of the profession internationally;
4. Describe physiological functions and attributes of the fundamental concepts including yin/yang, wu xing, vital substances, and bodily organs (zang-fu) and their interrelationships in TCM;
5. Determine the principles of aetiology and pathogenesis in TCM, including the causes of disease;
6. Discuss the interrelationship of the causes of disease, the mechanisms by which they disrupt health and the relationship of lifestyle patterns to health and prevention of disease;
7. Summarise the historical development of TCM.

Subject Content

1. Introduction to TCM:
 - The Definition of TCM
 - contemporary TCM practice (methods, clinical scope, integration)
 - The main distinguishing features of TCM philosophy and theoretical principles
 - difficulties in the study of TCM for contemporary Western students; contemporary TCM terminology in English, TCM concepts that do not exist in Western culture, TCM wholistic paradigm vs. WSM analytical approach
 - An historical context
2. Basic TCM theory:
 - yin/yang theory
 - wu xing theory and The concordances
3. TCM physiology:
 - Physiology of the internal organs (zang-fu)
 - Origins, actions and functions of Qi, blood, body fluids, jing and shen
 - introduction to channels (Jingluo)
 - food and fluid metabolism
4. Aetiology & pathogenesis in TCM:
 - TCM view of disease
 - health and disease concepts and definitions
 - etiology & pathogenesis of disease in TCM
 - The causes of disease in Traditional Chinese medicine
 - The relationship between The body and pathogenic Factors

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Essay	1,500 words	50	N	Individual
Final Exam	2 hours	50	N	Individual

CMPL 1002 Traditional Chinese Medicine 2

Credit Points 10

Legacy Code 400348

Coordinator Xiaoshu Zhu ([https://directory.westernsydney.edu.au/search/name/Xiaoshu Zhu/](https://directory.westernsydney.edu.au/search/name/Xiaoshu%20Zhu/))

Description This unit provides learning experiences that enable students to expand upon their understanding of TCM philosophy and principles, with particular reference to developing diagnostic skills in TCM. Students acquire basic skills in case history taking, interpretation of relevant signs and symptoms, arriving at a TCM diagnosis, and devising suitable treatment strategies.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Pre-requisite(s) CMPL 1001

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Command knowledge of the physiological functions and attributes of the Zang-fu organs and their interrelationships
2. Articulate a critical understanding of the four methods of TCM diagnosis, including pulse, tongue and abdominal diagnosis
3. Complete case studies from interrogation and collection of clinical data through to basic diagnosis and treatment principles
4. Differentiate the eight principal patterns of classification of disease
5. Analyse clinical cases with the eight principal patterns of classification and four methods of diagnosis

Subject Content

1. The four methods of diagnosis in TCM:
 - Inspection (including inspection of the tongue & other key features)

- inquiry (including The ten Traditional questions, Additional questions for women, modern approaches)
 - listening & smelling
 - palpation (including palpation of The radial pulse and abdomen)
2. The eight principal patterns of classification of disease.
 3. Clinical cases and the development of differential diagnosis using the eight principals.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Written Assignment	1500 words	40	N	Individual

CMPL 2002 Channels and Points 1

Credit Points 10

Legacy Code 400874

Coordinator Shengxi (George) Zhang ([https://directory.westernsydney.edu.au/search/name/Shengxi \(George\) Zhang/](https://directory.westernsydney.edu.au/search/name/Shengxi%20Zhang/))

Description Acupuncture is one of the principal therapeutic interventions in Traditional Chinese Medicine (TCM). This unit introduces students to acupuncture theory and practice, and provides opportunity to develop practical skills. It covers the theory of channels and points, channel pathway, point location and indications of the conception and governor vessels, and the first 6 channels in the meridian cycle. This unit also expands upon the student's understanding of TCM theory and practice principles. This unit includes mandatory clinical placement

School Health Sciences

Discipline Acupuncture

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) CMPL 1002

Co-requisite(s) CMPL 2006

Equivalent Subjects LGYA 7238 - Acupuncture 1

Restrictions Students must be enrolled in 4660 Bachelor of Health Science-Master of Traditional Chinese Medicine or 4710 Bachelor of Traditional Chinese Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Differentiate between the distribution and local anatomy of the channels covered in this unit;
2. Point out and explain the location, functions and indications of commonly used points on the channels, and of the extra points.
3. Distinguish high-risk related acupuncture points and apply appropriate needling strategies.

Subject Content

1. The channel system
 - Classification and nomenclature of The channels
 - yin yang relationships within The channel system
 - general functions of The channels
 - general principles of Qi flow and channel Distribution
 - The external and Internal pathways of The twelve Regular channels
 - theory, pathways, points and Connecting points of The eight extra channels
 - pathways of The divergent, luo, and musculo-tendino channels
2. Acupuncture points
 - general introduction
 - classes of points
 - methods of locating points
 - nomenclature of The points
 - therapeutic properties of The points (functions and Indications)
3. Specific point categories
 - wu Shu points
 - Yuan points
 - luo points
 - Xi points
 - back Shu points
 - front mu points
 - Confluent points
 - influential points
 - Crossing points
 - Lower He points
4. Surface anatomical features in relation to acupuncture points
 - a. Anatomical position and movement
 - b. Anatomy and clinical assessment including visual and palpation examination association with acupuncture points
 - head
 - Neck
 - Thorax
 - abdomen and pelvis
 - back
 - Upper limb
 - Lower limb
5. Locations, functions, indications and application (needling/moxibustion methods and precautions/contraindications) of the points of:
 - Governing Vessel (Dumai)
 - Conception Vessel (Renmai)
 - Lung Channel of Hand Taiyin
 - Large Intestine Channel of Hand Yangming
 - Stomach Channel of Foot Yangming
 - Spleen Channel of Foot Taiyin

- Heart Channel of Hand Shaoyin
 - Small Intestine Channel of Hand Taiyang
- Note: surface anatomy relevant to identifying individual acupuncture point location covered in this subject and relevant safe administration of needling will be covered.

6. Clinical skills

- Point location and application of The main acupuncture points
- identification of High-Risk related acupuncture points
- Sterilisation procedures & maintaining asepsis
- occupational health and safety procedures
- acupuncture contraindications and adverse reactions
- clinical accidents and their management
- introduction to filiform needling, correct direction and length
- codes and guidelines required by The Chinese medicine Board of Australia, including Code of conduct, infection prevention and control guidelines for acupuncture practice
- needling practice

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement. Students must also hold a valid and current First Aid Certificate from a Registered Training Organisation. Refer to the Special Requirements website for more information.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Assessment

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) CMPL 1002

Co-requisite(s) CMPL 2006

Equivalent Subjects LGYA 7239 - Chinese Herbal Medicine 1

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the basic traditional Chinese herbal medicine theory and practice;
2. Analyse the properties, functions and contraindications of each of the major individual herbs in the six herb categories.
3. Evaluate the interactions of herbs including synergism and antagonisms in the context of Chinese medicine theory.
4. Differentiate the range of commonly used Chinese herbs in each category.

Subject Content

1. Introduction to Chinese materia medica
2. Herbal properties
 - four natures
 - Five flavours
 - four tendencies
 - Attributive meridians
 - combination of The herbs
 - contraindications of The herbs
3. Naming and classification of Chinese herbs
4. Individual herbs (including commonly used combinations)
 - herbs for relieving The exterior
 - herbs for clearing heat
 - herbs for removing dampness
 - herbs for regulating Qi
 - herbs for moving blood
 - Tonifying herbs

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement. Students must also hold a valid and current First Aid Certificate from a Registered Training Organisation. Refer to the Special Requirements website for more information.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical	40 mins	25	N	Individual
Essay	1,500 words	25	N	Individual
Final Exam	2 hours	50	N	Individual

Professional Placement	online simulated	S/U	Y	Individual
Performance	clinical discussions

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) CMPL 1002 AND CMPL 2004

Equivalent Subjects LGYA 7240 - Chinese Herbal Medicine 2

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply basic herbal theory and practice;
2. Identify the major individual herbs in each of the twelve herb categories utilising visual recognition, tasting, smelling and hand examination;
3. Describe the major individual herbs in each of the twelve herb categories, in terms of properties, functions and contraindications;
4. Explain known herb interactions for the herbs in each category;
5. Apply the concept of synergy in Chinese herbal medicine, specifically in reference to the herbs covered in this unit;

6. Compare and contrast the range of commonly used Chinese herbs in each of the twelve categories.

Subject Content

1. Individual herbs (including commonly used combinations):

- herbs for warming The interior
 - Astringent herbs
 - herbs for dispelling Wind-dampness
 - phlegm resolving, antitussive & antiasthmatic herbs
 - herbs for relieving food stagnation
 - herbs for purgation
 - herbs for arresting bleeding
 - herbs for calming The shen
 - herbs for extinguishing The liver Wind
 - Aromatic substances for Opening The orifices
 - herbs for expelling parasites
 - herbs for external application
2. Introduction to herbal pharmacognosy
 - Plant physiology, Morphology and taxonomy
 - major Chemical groups of Plant constituents

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement. Students must also hold a valid and current First Aid Certificate from a Registered Training Organisation. Refer to the Special Requirements website for more information.

CMPL 2006 Traditional Chinese Medicine 3

Credit Points 10

Legacy Code 400352

Coordinator Xiaoshu Zhu ([https://directory.westernsydney.edu.au/search/name/Xiaoshu Zhu/](https://directory.westernsydney.edu.au/search/name/Xiaoshu%20Zhu/))

Description This unit enables students to develop a sound understanding of causes of disease in TCM with a particular focus on TCM disease pattern differentiation. Students will be able to identify the clinical manifestations relating to specific patterns and develop the appropriate TCM treatment principles. This is complemented by the reinforcement of skills in case history taking and TCM diagnostics.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) CMPL 1002

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Differentiate TCM disease patterns according to the zang-fu organs; Qi, Blood and body fluid; and the aetiology;
2. Critically apply knowledge of the progression of disease through the body;
3. Compare and contrast the principles of aetiology and pathogenesis in TCM, including exogenous and endogenous causes of disease, the interrelationship of these causes, the mechanisms by which they disrupt health and the relationship of lifestyle patterns to health and prevention of disease;
4. Articulate the treatment principles in TCM.

Subject Content

1. TCM pathophysiology:
 - organ (zang fu) pathophysiology
 - Qi, blood, body fluid pathophysiology
 - channel pathophysiology
 - latent diseases
2. Pattern differentiation in TCM:
 - according to pathogen (heat, damp, dry, Cold, Wind, phlegm, food and blood stasis)
 - according to The zang fu organs
 - according to Qi, blood and body fluid
 - Symptoms as A result of Conflict between pathogenic and antipathogenic Qi
 - root and Symptoms (ben and biao)
 - Disease progression and the transformation of disease states (six divisions, four stages, 3 levels (jiao))

3. Treatment principles in TCM

Assessment

CMPL 3001 Acupuncture Techniques

Credit Points 10

Legacy Code 400873

Coordinator Shengxi (George) Zhang ([https://directory.westernsydney.edu.au/search/name/Shengxi \(George\) Zhang/](https://directory.westernsydney.edu.au/search/name/Shengxi%20Zhang/))

Description This unit consolidates and extends students' knowledge of acupuncture theory and practice, and provides further opportunity to develop practical skills. Students are introduced to the theory of point combinations and the development of acupuncture prescriptions and treatment plans. Practical sessions include obtaining Qi (De Qi), promoting Qi techniques, tonifying and reducing needling techniques, moxibustion, cupping, Gua Sha, Tuina, intradermal/cutaneous needling, scalp acupuncture, auricular acupuncture, wrist/ankle acupuncture, electroacupuncture and laser acupuncture. This unit also expands upon the student's understanding of the theory and practice principles of traditional Chinese medicine.

School Health Sciences

Discipline Acupuncture

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) CMPL 2003 AND CMPL 2006

Equivalent Subjects CMPL 2001 - Acupuncture 2

Restrictions Students must be enrolled in 4660 Bachelor of Health Science-Master of Traditional Chinese Medicine or 4710 Bachelor of Traditional Chinese Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Formulate acupuncture prescriptions for specific indications.
2. Competently apply knowledge and safe practice of manipulation techniques of acupuncture, moxibustion, cupping and related other techniques/adjunct therapies.

Subject Content

1. Basic therapeutics of acupuncture
 - introduction to acupuncture techniques
 - managing shen and retaining Qi
2. Practical skills of acupuncture
 - Qi sensation
 - Safe insertion of filiform needles to different directions and depths with relevance to function (including needling difficult points, different gauges and lengths, Connecting points)
 - Basic needle manipulations
 - Reinforcing and reducing methods
3. Moxibustion, cupping and Gua Sha
 - functions and Indications of moxibustion, cupping and Gua Sha
 - contraindications and cautions of moxibustion, cupping and Gua Sha
 - management of accidents Resulting from moxibustion, cupping and Gua Sha
 - clinical skills for practicing moxibustion, cupping and Gua Sha
4. Acupuncture prescription
 - principles of Point selection and combination
 - methods of Point selection and combination
5. Intradermal/cutaneous needling and bloodletting
6. Scalp acupuncture
7. Auricular acupuncture
8. Wrist/ankle acupuncture
9. Electroacupuncture
10. Laser acupuncture
11. Introduction to Tuina

Special Requirements

CMPL 3002 Chinese Medicinal Formulas

Credit Points 10

Legacy Code 400878

Coordinator Yu-Ting Sun ([https://directory.westernsydney.edu.au/search/name/Yu-Ting Sun/](https://directory.westernsydney.edu.au/search/name/Yu-Ting%20Sun/))

Description Herbal medicine is the principal therapeutic intervention in Traditional Chinese Medicine (TCM). This unit follows from Chinese Materia Medica 1 & 2, and begins the study of major Chinese herbal formulas, which form the basis for clinical prescribing in Chinese herbal medicine. The focus of this unit is to compare and contrast the main formulas in specified categories, and to analyse the specific actions of the herbs that make up the formula. Students will be required to formulate, assemble and prepare complex prescriptions. This unit expands upon the student's knowledge of the Chinese Materia Medica, as well as the understanding of TCM theory and practice principles.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) CMPL 2006 AND CMPL 2005

Equivalent Subjects LGYA 7240 - Chinese Herbal Medicine 3

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the construction of Chinese herbal formulas;
2. Articulate herb interactions and apply this knowledge in the construction of formulas;
3. Compare and contrast the main formulas in the categories covered, including the herbs that make up the formula, their action and indications for usage of the formula;
4. Formulate and modify herbal prescriptions to suit individual clinical presentations.

Subject Content

1. Introduction to Chinese herbal formulas
 - therapeutic methods and herbal formulas
 - composition of herbal formula
 - action to take in The event of An unexpected reaction
2. Major herbal formulas

- exterior dispersing formulas
- heat clearing formulas
- Laxative and purgative formulas
- Dryness dispelling formulas
- Wind eliminating formulas
- dampness dispelling formulas
- phlegm dispelling formulas
- food stagnation reducing formulas
- Qi regulating formulas
- blood regulating formulas
- Tonifying formulas
- interior warming formulas
- Astringent formulas
- shen calming formulas
- Harmonizing formulas

Pre-requisite(s) CMPL 2006

Co-requisite(s) CMPL 3001 AND CMPL 3002

Restrictions Students must be enrolled in 4660 Bachelor of Health Science-Master of Traditional Chinese Medicine or 4710 Bachelor of Traditional Chinese Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Conduct basic aspects of clinic and patient management
2. Conduct Chinese medicine consultations and maintain case records according to
3. Formulate Chinese medicine diagnoses and treatment plans in a clinical setting
4. Apply acupuncture theories and techniques in the treatment of commonly seen conditions
5. Explain Chinese medicine diagnosis and treatments to patient in lay terms
6. Prepare herbal decoction
7. Dispense raw, granule, patent Chinese herbal medication according to accreditation standards
8. Apply reflective practice to support clinical learning.

Subject Content

1. Basic clinical management and facilitation
 - managing patients and patient records
 - assisting in equipment used in treatment
 - room preparation
2. Conducting a Chinese medicine consultation and forming diagnosis and treatment
3. Explaining Chinese medicine to the patient
4. Preparing of herbal decoctions
5. Dispensing Chinese medicinal prescriptions, labelling and recording requirements, administration advice and precautions
6. Acupuncture prescription formulation for common conditions

CMPL 3004 Traditional Chinese Medicine Practice 2

Credit Points 10

Legacy Code 400356

Coordinator Yu-Ting Sun (<https://directory.westernsydney.edu.au/search/name/Yu-Ting-Sun/>)

Description This unit focuses on the application of the skills and knowledge of TCM within a clinical setting. The unit provides the opportunity to expand students' knowledge base of the theory Chinese medicine through the work integrated experiential learning. Specifically, the unit covers TCM diagnosis, the application of Acupuncture techniques and the implementation of Chinese herbal medicine treatments. The unit also covers basic Chinese language including Pin Yin and Romanisation to enable students to apply TCM terminology as part of clinical practice. Under supervision, students have the opportunity to consult with clients/patients, perform basic acupuncture, and undertaken herbal prescription. Students will also undertake basic herbal processing and preparation of medicinal herbs.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) CMPL 3003

Restrictions Students must be enrolled in 4660 Bachelor of Health Science-Master of Traditional Chinese Medicine or 4710 Bachelor of Traditional Chinese Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Participate in all basic aspects of clinic and patient management;
2. Engage in patient management in a clinical context;
3. Apply the practice of specific acupuncture techniques;
4. Employ the basic herbal processing, prescribing and dispensing skills;
5. Assist in the formulation of herbal and acupuncture prescriptions.
6. Execute foundation skills in the use of the Pin Yin system and simple Chinese characters used in the practice of Chinese medicine.

Subject Content

1. Practice of acupuncture techniques introduced in TCM Practice 1 and classical techniques including:

- Cooling The night sky
 - Fire on The mountain
 - Waving The dragon's tail
2. Basic preparation of medical substances and formulae
3. Processing of crude herbs
4. Practice of Chinese language in Chinese medicine practice
- Pin yin system of Romanisation
 - simple Chinese characters used in practice
5. Clinical management and facilitation of practice:
- managing equipment
 - Assessing A patient, gathering clinical information and clinical decision-making (assistance)
 - consulting patients and providing treatment (assistance)

CMPL 4001 Block Clinical Practicum

Credit Points 10

Legacy Code 401104

Coordinator Xiaoshu Zhu ([https://directory.westernsydney.edu.au/search/name/Xiaoshu Zhu/](https://directory.westernsydney.edu.au/search/name/Xiaoshu%20Zhu/))

Description This unit provides the student with intensive, supervised clinical practice experience. Arrangements are usually made for students to complete this stage in China. Due to the travel restriction as a result of COVID-19 pandemic, this unit in 2020 is wholly offered in Australia. The unit represents the final clinical practicum stage with an opportunity in developing clinical skills. Students will be expected to demonstrate competence in handling patients in a clinical context, and manage their integrated care using Traditional Chinese Medicine.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Incompatible Subjects CMPL 7002 - Block Clinical Practicum (PG) AND LGYA 7257 - Block Clinical Practicum

Restrictions Students must be enrolled in a Traditional Chinese Medicine program.

Assumed Knowledge

It is assumed the student will have a thorough knowledge of TCM theory, acupuncture and Chinese herbal medicine and have completed all (or close to all) clinical hours under supervision. As a core competency in registered TCM practice this is not a suitable subject for other health disciplines.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Synthesise knowledge and competency in the practice of all TCM clinical areas;

2. Demonstrate competence in the design and formulation of care of patients in a clinical context;
3. Correctly diagnose, prescribe and administer treatment;
4. Examine issues related to the care of patients in a multidisciplinary environment;
5. Understand the importance of culture and diversity in professional settings.

Subject Content

The following skills should be mastered in a high turnover clinical environment (preferably in a Chinese hospital environment):

- detailed Examination of patients, including, Analysing investigative reports
 - advanced techniques of acupuncture
 - advanced Chinese herb prescription writing
 - intensive pulse and tongue Diagnosis
- Competently managing the integration of Chinese and Western medicine

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

1. Find your existing National Police Check or apply for one
2. Gather documentary evidence of your vaccination history
3. Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
4. Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

CMPL 4002 Chinese Internal Medicine 1

Credit Points 10

Legacy Code 401098

Coordinator Yu-Ting Sun ([https://directory.westernsydney.edu.au/search/name/Yu-Ting Sun/](https://directory.westernsydney.edu.au/search/name/Yu-Ting%20Sun/))

Description The study of internal medicine forms the basis of clinical practice in Traditional Chinese Medicine (TCM). This unit begins to bridge the gap between theory and practice. It enables the health professional to analyse, diagnose and treat common internal diseases with both acupuncture and herbal medicine and using a TCM approach. The focus of this unit is on the analysis of major presenting symptoms.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) CMPL 2006 AND
CMPL 3001 AND
CMPL 3002

Incompatible Subjects 700918 - Chinese Internal Medicine 1 (PG) LGYA 7251 - Chinese Internal Medicine 1

Restrictions Students must be enrolled in program 4710 - Bachelor of Traditional Chinese Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse and explain the connections between the causes and pathophysiological mechanisms of common internal diseases with their clinical manifestations.
2. Employ the skills of inspection, auscultation and olfaction, interrogation and palpation in to accurately diagnose specific internal diseases.
3. Analyse the signs and symptoms of common internal medicine diseases to arrive at a TCM differential diagnosis.
4. Design treatment principles and write prescriptions (acupuncture and herbs) for common diseases of internal medicine.
5. Practice protocols in TCM compared to orthodox management.

Subject Content

1. Diseases and syndromes of the Lung system (TCM)
 - common Cold & influenza
 - Cough (bronchitis, bronchiectasis)
 - Dyspnea syndrome (asthmatic bronchitis, asthmatic emphysema)
 - Lung abscess (pneumonia, pulmonary abscess)
 - Lung atony (pulmonary fibrosis, atelectasis)
2. Diseases and syndromes of Spleen system (TCM)

- Hiccup (some diseases with phrenospasm)
 - Vomiting (gastritis, pylorospasm)
 - Dysphagia (esophagitis, cardiospasm)
 - Stomach-ache (gastritis, peptic ulcer)
 - Abdominal pain (intestinal spasm, dyspepsia)
 - Diarrhoea (enteritis, irritable bowel syndrome)
 - Dysenteric disease (dysentery, ulcerative Colitis)
 - Constipation (some diseases with Constipation)
3. Diseases and syndromes of Heart system (TCM)
- chest Blockage syndrome (coronary heart disease, myocarditis)
 - Palpitation (arrhythmia, cardiac decompensation)
 - Insomnia (neurosis, anaemia, cerebral arteriosclerosis)
 - Manic psychosis (active phase of schizophrenia, Manic phase of bipolar Disorder)
 - Depressive psychosis (Depressive phase of schizophrenia, Depressive phase of bipolar Disorder)
 - Depression syndrome (neurosis, major Depression)
 - Epilepsy
 - Syncope (fainting Due to emotional stress, vagal stimulation, A sudden change in environmental temperature or body position)
4. Review of acupuncture points, prescriptions, individual herbs and formulas relevant to the above topics.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Final Exam	2 hours	40	N	Individual
Case Study	2,000 words	30	N	Individual

CMPL 4003 Chinese Internal Medicine 2

Credit Points 10

Legacy Code 401102

Coordinator Xiaoshu Zhu ([https://directory.westernsydney.edu.au/search/name/Xiaoshu Zhu/](https://directory.westernsydney.edu.au/search/name/Xiaoshu%20Zhu/))

Description This unit builds on Chinese Medicine 1 and extends the student's ability to analyse, diagnose and treat common and difficult diseases in internal medicine with both acupuncture and herbal medicine and using a TCM approach. Students will develop an understanding of the causes and pathophysiological mechanisms of a wide range of diseases.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) CMPL 2006 AND

CMPL 3001 AND

CMPL 3002

Incompatible Subjects CMPL 7004 - Chinese Internal Medicine 2 (PG) AND LGYA 7251 - Chinese Internal Medicine 2

Restrictions Students must be enrolled in program 4710 - Bachelor of Traditional Chinese Medicine or continuing program 4660 Bachelor of Chinese Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the causes, pathophysiological mechanisms and clinical manifestations of Liver, Kidney, Blood and Body Fluid and Haemorrhagic diseases and syndromes.
2. Conduct a clinical examination including inspection, auscultation and olfaction, interrogation, and palpation in order to arrive at accurate diagnoses of specific diseases.
3. Analyse symptoms and signs, and apply pattern differentiation to arrive at a TCM diagnosis.
4. Design and prescribe appropriate treatment, including acupuncture and/or herbs and/or dietary/lifestyle change, for a range of common diseases covered in this Unit.
5. Analyse and examine practice protocols in TCM compared to orthodox medicine correspondence to Liver, Kidney, Blood and Body Fluid and Haemorrhagic diseases and syndromes.

Subject Content

1. Diseases and syndromes of Liver system (TCM)
 - Dizziness (Meniere's disease, cerebral arteriosclerosis, hypertensive encephalopathy, anaemia)
 - Hypochondriac pain (disorders of The liver and gallbladder, intercostal neuralgia)
 - Jaundice (hepatitis, hepatocirrhosis, pancreatitis, cholecystitis)
 - Abdominal distension (ascites, tumours of The Abdominal cavity, tuberculous peritonitis)
2. Diseases and syndromes of Kidney system (TCM)
 - Stranguria syndrome (Urinary tract infections, Urinary stones, prostatitis, chyluria)
 - Oliguria and anuria (contraction of bladder sphincter, prostatic hyperplasia, kidney failure)
 - Seminal emission (neurasthenia, prostatitis, Seminal vesiculitis)
 - Impotence (sexual disorders, sexual neurasthenia)
 - Oedema (cardiogenic Oedema, renalgenic Oedema, hypoproteinemia, severe anaemia)
3. Diseases and syndromes of Qi, Blood and Body Fluid (TCM)
 - Endogenous fever (Functional low fever, hematopathy, desmosis, endocrinopathy, some chronic infectious diseases)
 - Sweating syndrome (vegetative nerves Functional disturbance, tuberculosis, rheumatic fever, hyperthyroidism)
 - Wasting and thirsting syndrome (diabetes mellitus, diabetes insipidus)
 - stagnation and Accumulation (Abdominal tumours, enlargement of The liver and spleen, Functional gastrointestinal disturbances)
 - Deficient debility (various chronic and consumptive diseases)
4. Blood, Body Fluid and Hemorrhagic diseases and syndromes (TCM)
 - Epistaxis (rhinitis, influenza, nasal carcinoma)
 - Hemoptysis (bronchiectasis, bronchitis, pneumonia, Lung cancer)
 - Hematemesis (haemorrhage of Upper Digestive tract, esophagitis)

- Hemafecia (peptic ulcer, hepatocirrhosis, Stomach cancer, colon cancer)
- Hematuria (nephritis, renal tuberculosis, Urinary cancer, some cases of Urinary stones and infection)
- Review of acupuncture points, prescriptions, individual herbs and formulas relevant to The above topics.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

CMPL 4004 Classical Texts in Chinese Medicine

Credit Points 10

Legacy Code 401100

Coordinator Shengxi (George) Zhang ([https://directory.westernsydney.edu.au/search/name/Shengxi \(George\) Zhang/](https://directory.westernsydney.edu.au/search/name/Shengxi%20Zhang/))

Description This unit provides further learning experiences that enable the students to explore the original theories on physiology, pathology, diagnosis, differentiation and treatment of diseases through select periods of Chinese history. Many theoretical concepts, diagnostic systems and therapeutic methods of Traditional Chinese Medicine (TCM) are still in current usage, and will be covered through the study of important classical texts and academic schools of TCM thought. This unit expands upon the student's understanding of TCM theories and practice principles through studies of the classical literature.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) CMPL 2006 AND CMPL 3002

Incompatible Subjects CMPL 7006 - Classical Texts in Chinese Medicine (PG)

Restrictions Students must be enrolled in program 4710 - Bachelor of Traditional Chinese Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the academic thoughts and achievements of the major schools and classical texts that helped form the basis of contemporary TCM practice.
2. Analyse the approaches to the pathogenesis, development, differentiation and treatment of the Cold-injured Diseases, Warm Diseases and chronic diseases covered in the classical texts used in this unit.
3. Define the strategy and methodology employed in the Shang Han Lun and Wenbing Xue texts.

Subject Content

1. Introduction to the key classical texts in TCM including Huang Di Nei Jing (Inner Classic of Yellow Emperor), Nanjing (The Classic on Difficulties), Shang Han Za Bing Lun (Treatise on Cold-injured and Miscellaneous Diseases) and Wen Bing Xue (The Study of Warm Diseases).
2. Introduction to the historical development and the characteristics of the major academic schools of TCM.
3. Theoretical overview of Shang Han Lun (Treatise on Cold-injured and Miscellaneous Diseases) and Wen Bing Xue (The Study of Warm Diseases) including diagnostic differentiation and treatment principles.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

Restrictions Students must be enrolled in 4710 - Bachelor of Traditional Chinese Medicine

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the unique features of women's physiology and pathology in relation to the pathogenesis and diagnosis of gynaecological diseases.
2. Explain the causes and patho

Subject Content

1. Introduction to Orthopaedics (including Traumatology & Rheumatology)
 - physical Examination
 - principles of treatment and therapies
 - methods of management
2. Injury of muscle, tendon and bone
 - Stiff Neck/Cervical soft tissue sprain
 - Cervical spondylopathy
 - scapulohumeral peri-arthritis
 - carpal tunnel syndrome
 - Acute lumbar muscle sprain
 - prolapse of lumbar intervertebral disc
 - Sciatica
 - post surgical management, scar treatment
3. Sport medicine
 - injury treatment and management (injuries to ligaments, tendons, muscle and bone ? knee, elbow, shoulder, wrist, thigh, calf, ankle, Neck, low back)
 - performance enhancement
4. Introduction to gynaecology
 - special features of women's physiology (TCM & WM)
 - aetiology, Diagnosis and therapeutic methods
 - A synopsis of gynaecological pathology
5. Disorders of menstruation
 - early menstruation
 - delayed menstruation
 - irregular menstruation
 - amenorrhoea
 - abnormal Functional uterine bleeding
 - premenstrual syndrome
 - menopausal syndrome
6. Disorders of the female genitalia
 - abno

Restrictions Students must be enrolled in 4710 Bachelor of Traditional Chinese Medicine or continuing program 4660 Bachelor of Health Science-Master of Traditional Chinese Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the causes and pathophysiological mechanisms of a range of common paediatric, dermatological, ENT and eye diseases by

- demonstrating an understanding of the significance of clinical manifestations
- Identify the relevant characteristics of children

Subject Content

A). Paediatrics

1. General Introduction

- physiology and pathophysiology of children
- feeding and health care
- Basic skills of Examination of children
- diagnostic and treatment principles in pediatrics
- acupuncture in pediatrics
- Chinese herbal medicine in pediatrics

2. Lung System Disorders

- common Cold
- Cough
- Asthma in children

3. Spleen System Disorders

- Infantile Diarrhoea
- Abdominal pain
- Anorexia
- food Stagnancy

4. Kidney System Disorders

- Acute nephritis
- Nephritic syndrome
- Enuresis

5. Infectious Diseases

- Measles
- Rubella
- Varicella (chickenpox)
- Mumps
- Pertussis (Whooping Cough)

6. Miscellaneous Diseases

- attention Deficit Disorder (add)
- Sweating syndrome

B). Dermatology

- aetiology and pathogenesis of Dermatoses
- key points of differentiation for The skin Lesions
- external applications with Chinese herbs and acupuncture

2. Viral Dermatitis

- Herpes zoster (She Chuan Chuang)
- common Wart (Xun Chang You)
- Flat Wart (Bian Ping You)
- Genital Wart (Jian Rui Shi You)

3. Fungal and other Infectious Dermatitis

- Tinea capitis (Tou Xuan)
- Tinea Corporis (Ti Xuan)
- Tinea Manuum (Shou Xuan)
- Tinea pedis (Zu Xuan)
- Tinea Unguium (Jia Xuan)
- Impetigo (Nong Pao Chuang)
- Scabies (Jie Chuang)

4. Allergic Dermatitis

- Eczema (Shi Chuang)
- Urticaria (Hives) (yin Zhen)
- contact dermatitis

5. Disorders of Sebaceous Glands and Hair Follicles

- Acne (Fen Ci)
- Seborrhic dermatitis (Bai Xie Feng)
- Alopecia Areata (You Feng)

6. Other Dermatitis

- Neurodermatitis (Niu Pi Xuan)
- Psoriasis (Bai Bi)
- Vitiligo (Bai Dian Feng)
- systemic Lupus Erythematosus (SLE) (Hong Hu Die Chuang)

C). ENT & Eyes

- rhinitis (allergic, chronic)
- sinusitis
- tinnitus and deafness
- suppurative otitis media (Acute and chronic)
- pharyngitis & laryngitis
- tonsillitis
- conjunctivitis (Acute, chronic, spring)
- hordeolum
- Review of herbal formulas, individual herbs, and acupuncture points as they are covered in The above

Restrictions Students must be enrolled in 4660 Bachelor of Health Science-Master of Traditional Chinese Medicine or 4710 Bachelor of Traditional Chinese Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop effective plans of patient management in terms of improving patient engagement, provision of health preservation and enhancement advice, and employing inter/intra-professional practice.
2. Critically reflect on own performance in the clinic with regard to specific skills relating to Chinese medicine practice.
3. Formulate and provide relevant advice in regard to preserving and enhancing health and wellbeing in clinical settings.

Subject Content

1. Establishing practitioner identity
 - reflective practice
 - introduction to inter/intra-professional practice ? providing The best patient care
2. Advanced patient communication and management
 - engaging The patient in their own healing
3. Managing difficult patients Health Preservation and Enhancement
 - managing A Balanced lifestyle
 - TCM mind-body health and Exercise
 - physical Exercise
 - Chinese medicine diet therapy
 - Balanced diet and nutrition

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement. Students must also hold a valid and current First Aid Certificate from a Registered Training Organisation. Refer to the Special Requirements website for more information.

Coordinator Shengxi (George) Zhang ([https://directory.westernsydney.edu.au/search/name/Shengxi \(George\) Zhang/](https://directory.westernsydney.edu.au/search/name/Shengxi%20Zhang/))

Description This unit represents a continuation of the clinical practicum and development of clinical skills. Students will integrate theoretical knowledge, practical and research skills, learnt in previous units, into clinical practice, including in: case investigation; diagnosis; formulation of treatment strategies; and the delivery of treatments to patients. Students will learn to act ethically in professional contexts. Students are expected to demonstrate professional competence in handling patients in a clinical context, critically evaluating complex cases, diagnosing, devising and managing the patients using TCM therapies.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) CMPL 4007

Incompatible Subjects CMPL 7024 - TCM Practice 4 (PG) AND LGYA 7255 - TCM Practice 4

Restrictions Students must be enrolled in 4660 Bachelor of Health Science-Master of Traditional Chinese Medicine or 4710 Bachelor of Traditional Chinese Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate complex clinical cases and competently design and formulate care of patients in a clinical context.
2. Analyse issues related to complex cases and the care of patients in a multidisciplinary environment;
3. Form and execute a range of competencies within specialty TCM areas;
4. Justify the principles of the professional code of ethics and act accordingly.
5. Evaluate the key elements in developing a small business such as a private Chinese medicine clinic.

Subject Content

- Advanced skills in all aspects of clinical management and practice appropriate to TCM practice including:
 - intra/inter-professional referrals
 - Working in multi-disciplinary environment
 - occupational health and safety matters
 - Ethical Marketing and promotion
 - Enhanced advance needle techniques including comprehensive manipulations and various types of acupuncture including dental acupuncture, acupuncture analgesia
- Comprehensive clinical skills related to acupuncture and Chinese herbal practice, including identifying and analysing clinical information, diagnosis, formation of treatment plans, performance of interventions and follow-up.
- Professional ethics and privacy management in health ethics
- Introduction to small business development

Special Requirements

Legislative pre-requisites

Special Requirements - NSW Health Legislative Prerequisites

Student Compliance Information for all Health-Related Placements

Prior to enrolling in this subject, students must have submitted a Student Undertaking Form and undertake to apply for a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Use the link to the Special Requirements webpage below for more information.

To be eligible to enrol in this subject and complete any required health-related placements or experiences, students must meet Western Sydney University program requirements as well as any special, legislated, or policy-mandated requirements.

Western Program Requirements

Visit the Special Requirements webpage for details about your program.

Special Requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Mandatory NSW Health student placement policy requirements

To be able to undertake placement in any NSW Health facility you must be assessed as compliant with NSW Health student placement policy in the first year of your program, regardless of when you expect to go on your first placement. Access and read the NSW Student Compliance Information Booklet.

NSW Student Compliance Information Booklet (https://issuu.com/uwspublications/docs/wsu_student_compliance_booklet_2020_v6/)

Please ensure that you

- Find your existing National Police Check or apply for one
- Gather documentary evidence of your vaccination history
- Print and complete all relevant NSW Health forms relevant to the campus you are enrolled at or online enrolment requirements
- Follow booklet instructions on how to have your compliance documents assessed by NSW health staff.

International students have additional requirements; the link to the booklet will inform you of these requirements.

School Requirements

Contact your School for further details regarding your School's requirements, if any, such as

- If you live outside of NSW or Australia and need to meet your state, territory or country's compliance requirements
- If you need to meet different state, territory or country compliance requirements.
- NSW Working with Children Check (WWCC) or other state equivalent, valid for your entire program.
- Current approved first aid certificate valid for your entire program - approved program providers can be found at the Government Training website
- <http://training.gov.au> (<http://training.gov.au/>)
- Other non-health related requirements.

Student Compliance Resources are also available on the Placements Hub web page (NSW students only)

https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance (https://www.westernsydney.edu.au/learning_futures/home/placements_hub/placements_hub/student_compliance/)

Legacy Code 400918

Coordinator Henry Liang ([https://directory.westernsydney.edu.au/search/name/Henry Liang/](https://directory.westernsydney.edu.au/search/name/Henry%20Liang/))

Description The study of internal medicine forms the basis of clinical practice in traditional Chinese medicine. This unit begins to bridge the gap between theory and practice. It enables the health professional to analyse, diagnose and treat common internal diseases with both acupuncture and herbal medicine and using a TCM approach. The focus of this unit is on the analysis of major presenting symptoms.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 7246 - Chinese Internal Medicine

Assumed Knowledge

Traditional Chinese Medicine 3, Acupuncture Techniques, Chinese Medicinal Formulas.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply an understanding of causes and pathophysiological mechanisms of common internal diseases, by demonstrating an understanding of the significance of clinical manifestations.
2. Apply relevant skills of inspection, auscultation and olfaction, interrogation, and palpation in order to arrive at accurate diagnoses of specific internal diseases.
3. Analyse symptoms and signs, and apply pattern differentiation to arrive at a TCM differential diagnosis.
4. Design treatment principles, and write prescriptions (acupuncture and herbs) for common diseases of internal medicine. This is inclusive of required dietary or lifestyle changes.
5. Analyse and critically examine practice protocols in TCM compared to orthodox management.

Subject Content

1. Diseases and syndromes of the Lung system (TCM)
 - common Cold & influenza
 - Cough (bronchitis, bronchiectasis)
 - Dyspnea syndrome (asthmatic bronchitis, asthmatic emphysema)
 - Lung abscess (pneumonia, pulmonary abscess)
 - Lung atony (pulmonary fibrosis, atelectasis)
2. Diseases and syndromes of Spleen system (TCM)
 - Hiccup (some diseases with phrenospasm)
 - Vomiting (gastritis, pylorospasm)
 - Dysphagia (esophagitis, cardiospasm)
 - Stomach-ache (gastritis, peptic ulcer)
 - Abdominal pain (intestinal spasm, dyspepsia)
 - Diarrhoea (enteritis, irritable bowel syndrome)
 - Dysenteric disease (dysentery, ulcerative Colitis)
 - Constipation (some diseases with Constipation)
3. Diseases and syndromes of Heart system (TCM)
 - chest Blockage syndrome (coronary heart disease, myocarditis)
 - Palpitation (arrhythmia, cardiac decompensation)
 - Insomnia (neurosis, anaemia, cerebral arteriosclerosis)
 - Manic psychosis (active phase of schizophrenia, Manic phase of bipolar Disorder)
 - Depressive psychosis (Depressive phase of schizophrenia, Depressive phase of bipolar Disorder)
 - Depression syndrome (neurosis, major Depression)
 - Epilepsy (Epilepsy)
 - Syncope (fainting Due to emotional stress, vagal stimulation, A sudden change in environmental temperature or body position)
4. Review of acupuncture points, prescriptions, individual herbs and formulas relevant to the above topics.

- Maclean, W., & Lyttleton, J. (2010). The Clinical Handbook of Internal Medicine, Volume 3: Qi Blood Fluid Channels. Sydney: University of Western Sydney.
- Maclean, W., & Lyttleton, J. (2000). The Clinical Handbook of Internal Medicine, Volume 1: The Treatment of Disease with

Traditional Chinese Medicine - Lung, Kidney, Liver, Heart. Sydney: University of Western Sydney

Teaching Periods

CMPL 7004 Chinese Internal Medicine 2 (PG)

Credit Points 10

Legacy Code 400922

Coordinator Xiaoshu Zhu ([https://directory.westernsydney.edu.au/search/name/Xiaoshu Zhu/](https://directory.westernsydney.edu.au/search/name/Xiaoshu%20Zhu/))

Description This unit builds on Chinese Medicine 1 and extends the students ability to analyse, diagnose and treat common and difficult diseases in internal medicine with both acupuncture and herbal medicine and using a Traditional Chinese Medicine approach. Students will develop an understanding of the causes and pathophysiological mechanisms of a wide range of diseases.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 7251 - Chinese Internal Medicine 2

Assumed Knowledge

Traditional Chinese Medicine 3, Acupuncture Techniques, Chinese Medicinal Formulas.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the causes, pathophysiological mechanisms and clinical manifestations of common diseases, covered in this unit
2. Conduct a clinical examination including inspections, auscultation and olfaction, interrogation, and palpation in order to arrive at accurate diagnoses of specific diseases
3. Analyse symptoms and signs, and apply pattern differentiation to arrive at a TCM diagnosis
4. Design treatment principles, and write prescriptions (acupuncture and herbs) for common diseases of internal medicine. This is inclusive of required dietary or lifestyle changes
5. Analyse and critically examine practice protocols in TCM compared to orthodox management

Subject Content

1. Diseases and syndromes of Liver system (TCM)
 - Dizziness (Meniere's disease, cerebral arteriosclerosis, hypertensive encephalopathy, anaemia)
 - Hypochondriac pain (disorders of The liver and gallbladder, intercostal neuralgia)
 - Jaundice (hepatitis, hepatocirrhosis, pancreatitis, cholecystitis)
 - Abdominal distension (ascites, tumours of The Abdominal cavity, tuberculous peritonitis)
2. Diseases and syndromes of Kidney system (TCM)
 - Stranguria syndrome (Urinary tract infections, Urinary stones, prostatitis, chyluria)
 - Oliguria and anuria (contraction of bladder sphincter, prostatic hyperplasia, kidney failure)

- Seminal emission (neurasthenia, prostatitis, Seminal vesiculitis)
 - Impotence (sexual disorders, sexual neurasthenia)
 - Oedema (cardiogenic Oedema, renalgenic Oedema, hypoproteinemia, severe anaemia)
3. Diseases and syndromes of Qi, Blood and Body Fluid (TCM)
- Endogenous fever (Functional low fever, hematopathy, desmosis, endocrinopathy, some chronic infectious diseases)
 - Sweating syndrome (vegetative nerves Functional disturbance, tuberculosis, rheumatic fever, hyperthyroidism)
 - Wasting and thirsting syndrome (diabetes mellitus, diabetes insipidus)
 - stagnation and Accumulation (Abdominal tumours, enlargement of The liver and spleen, Functional gastrointestinal disturbances)
 - Deficient debility (various chronic and consumptive diseases)
4. Hemorrhagic diseases and syndromes (TCM)
- Epistaxis (rhinitis, influenza, nasal carcinoma)
 - Hemoptysis (bronchiectasis, bronchitis, pneumonia, Lung cancer)
 - Hematemesis (haemorrhage of Upper Digestive tract, esophagitis)
 - Hemaecia (peptic ulcer, hepatocirrhosis, Stomach cancer, colon cancer)
 - Hematuria (nephritis, renal tuberculosis, Urinary cancer, some cases of Urinary stones and infection)
5. Review of acupuncture points, prescriptions, individual herbs and formulas relevant to the above topics.

Teaching Periods

CMPL 7005 Chronic and Complex Disorders in Chinese Medicine

Credit Points 10

Legacy Code 401137

Coordinator Shengxi (George) Zhang ([https://directory.westernsydney.edu.au/search/name/Shengxi \(George\) Zhang/](https://directory.westernsydney.edu.au/search/name/Shengxi%20(George)Zhang/))

Description This unit will enable practitioners to extend their clinical reasoning skills to chronic and complex conditions seen in contemporary Chinese Medicine clinical practice. The unit will analyse specific cases and conditions which present a range of complex and contradictory signs and symptoms making diagnosis and treatment challenging. Senior practitioners of both acupuncture and Chinese herbal medicine will present their own clinical experience and assist students to understand their diagnostic and treatment processes.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects NATS 7005 - Chinese Medicine Specialties AND CMPL 7011 - Dermatology in Chinese Medicine

Restrictions

Students must be enrolled in 4716 Master of Chinese Medicine (or Master of Health Science (Traditional Chinese Medicine) and/or Master of Health Science (Acupuncture))

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the clinical reasoning processes central to Chinese medicine practice.

2. Evaluate the uses and relative efficacy of different TCM theories used to guide Chinese medicine diagnosis in practice.
3. Apply the use of different treatment strategies/principles for approaching complex cases.
4. Apply Chinese medicine clinical reasoning to a range of complex disorders.
5. Assess the strengths and weaknesses of Chinese medicine practice and research in relation to complex and chronic disorders.
6. Able to construct acupuncture and herbal prescriptions to apply in modern clinical conditions.

Subject Content

1. Introduction to clinical reasoning
2. Examination of 'complex cases' from Chinese Medicine (CM) history
3. Case histories drawn from actual contemporary practice which focus on:
 - The impact of pharmaceutical drugs on The body
 - long term Progression of disease
 - multiple diseases coexisting
 - The role of biomedical investigative tests to assist CM Diagnosis
 - interaction of biomedical & CM treatments
4. Cases drawn from a range of specialties:
 - Dermatology
 - gastrointestinal disease
 - Autoimmune disease
 - Paediatrics
 - liver disease
 - Respiratory illness
 - cardiovascular disease

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Case study	2,000 words	35	N	Individual
Essay	2,500 words	35	N	Individual
Online participation		10	N	Individual
Class tests	20 minutes on each workshop	20	N	Individual

Teaching Periods

CMPL 7006 Classical Texts in Chinese Medicine (PG)

Credit Points 10

Legacy Code 400969

Coordinator Henry Liang ([https://directory.westernsydney.edu.au/search/name/Henry Liang/](https://directory.westernsydney.edu.au/search/name/Henry%20Liang/))

Description This unit provides further learning experiences that enable the students to explore the original theories on physiology, pathology, diagnosis, differentiation and treatment of diseases through select periods of Chinese history. Many theoretical concepts, diagnostic systems and therapeutic methods of Traditional Chinese Medicine

(TCM) are still in current usage, and will be covered through the study of important classical texts and academic schools of TCM thought. This unit expands upon the students understanding of TCM theories and practice principles through studies of the classical literature.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 7244 - Classical Texts in Chinese Medicine

Assumed Knowledge

Traditional Chinese Medicine 3, Chinese Medicinal Formulas.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain and critically evaluate the academic thoughts and achievements of the major schools and classical texts that helped form the basis of contemporary TCM practice.
2. Analyse the approaches to the pathogenesis, development, differentiation and treatment of the Cold-injured Diseases, Warm Diseases and chronic diseases covered in the classical texts used in this unit.
3. Develop a working knowledge of the Shang Han Lun and Wenbing Xue texts.

Subject Content

1. Introduction to the key classical texts in TCM
 - Huangdi Neijing (Inner Canon of Yellow Emperor)
 - Nan jing (The Classic on difficulties)
 - Shennong Bencao jing (Shennong's Canon of Materia Medica)
 - Shanghan Zabing Lun (Treatise on Cold-injured and Miscellaneous Diseases)
 - Wenbing Xue (The science of warm diseases)
2. Introduction to the major academic schools in TCM
 - school of Cold-cool therapy (Hejian)
 - school of eliminating Pathogens (Dongxie)
 - school of Internal injury (Yishui)
 - school of yin Nourishing therapy (Danxi)
 - school of spleen-Stomach
 - school of warming-Reinforcing therapy
3. Shang Han Lun
 - introduction to Cold-injured diseases
 - differentiation and treatment of Taiyang, Yangming, Shaoyang, Taiyin, Shaoyin and Jueyin diseases
4. Wen Bing Xue
 - introduction to warm diseases
 - differentiation and treatment of warm diseases according to Wei-Qi-Ying-Xue, and San-jiao diagnostic systems

Teaching Periods

CMPL 7007 Clinical Application of Classical Chinese Herbal Medicine

Credit Points 10

Legacy Code 401130

Coordinator Shengxi (George) Zhang ([https://directory.westernsydney.edu.au/search/name/Shengxi \(George\) Zhang/](https://directory.westernsydney.edu.au/search/name/Shengxi%20(George)Zhang/))

Description This unit presents the origin, development and features of classical Chinese herbal medicine (Jing Fang), and reveals their pharmacological and clinical outcomes based on the latest clinical observation and research. This unit will appeal to practitioners seeking to extend and deepen their knowledge and clinical skills with Chinese herbs and to students embarking on research in this area. The classical texts contain deep insights on Chinese herbs and formulae for a range of conditions. Selective herbal formulae from the Treatise on Cold Pathogenic Diseases (Shanghan Lun) and the Synopsis of Golden Chamber (Jingui Yaolue) are explored in depth to demonstrate the clinical applications.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4716 Master of Chinese Medicine or 4675 Master of Health Science (Traditional Chinese Medicine) and/or 4678 Master of Health Science (Acupuncture).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the origin and development of classic Chinese herbal medicine (CCHM)
2. Critically analyse the principal features and strategic approaches of CCHM
3. Demonstrate comprehensive skills in applying commonly-used CCHM in contemporary practice
4. Relate the pharmacology and toxicology of CCHM to its clinical outcomes
5. Identify and critically evaluate the strengths and limitations of CCHM

Subject Content

1. Origin and development of Classics of Chinese medicine
 - a. Treatise on Cold Pathogenic Diseases (Shanghan Lun)
 - b. Synopsis of Golden Chamber (Jingui Yaolue)
 - c. Major academic schools of Chinese medicine
2. Feature and methodology of Classic Chinese herbal medicine (CCHM)
 - a. The herbal formula design and strategy
 - b. CCHM and pattern diagnosis
 - c. CCHM modifications
 - d. Dosage and administration of CCHM
3. Review of pharmacological and toxicological research of CCHM
4. Clinical applications of the selected formulae from the Classics
 - a. The exterior expelling formulae
 - b. Heat clearing formulae
 - c. Purgative formulae
 - d. Harmonising formulae
 - e. Qi and blood moving formulae
 - f. Damp and phlegm eliminating formulae
 - g. Internal warming formulae
 - h. Tonic formulae
 - i. Others

5. Strengths and limitations of CCHM

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Essay	2,000 words	30	N	Individual
Essay	2,500 words	30	N	Individual
Peer Review	Minimum of 6 online posts with substantial content to fellow students in relation to online discussion topics	20	N	Individual
Short Answer	20 minutes at each workshop	20	N	Individual

Teaching Periods

CMPL 7008 Clinical Applications of Classical Acupuncture

Credit Points 10

Legacy Code 401131

Coordinator Shengxi (George) Zhang ([https://directory.westernsydney.edu.au/search/name/Shengxi \(George\) Zhang/](https://directory.westernsydney.edu.au/search/name/Shengxi%20(George)Zhang/))

Description This unit presents the origin, development and features of classical acupuncture and reveals the clinical outcomes based on the latest clinical observation and research. This unit will appeal to practitioners seeking to extend and deepen their knowledge and clinical skills with traditional acupuncture and to practitioners embarking on research in this area. Ancient acupuncture theories and techniques will be taught with a focus on their application to contemporary practice based on latest research and on the different theoretical approaches in the design of acupuncture point prescriptions.

School Health Sciences**Discipline** Acupuncture**Student Contribution Band** HECS Band 2 10cp**Level** Postgraduate Coursework Level 7 subject**Equivalent Subjects** CMPL 7001 - Advanced Acupuncture**Restrictions**

Students must be enrolled in 4716 Master of Chinese Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the development of acupuncture practice as documented in TCM classical texts
2. Discuss the uses and relative efficacy of different TCM theories used to guide acupuncture practice
3. Analyse the use of different ancient points compared with common points in the treatment of various diseases
4. Demonstrate ancient acupuncture techniques including qi flow methods, Yang Ji Zhou (12 techniques), Green dragon wags its tail

Subject Content

1. Examination of source texts for acupuncture theories and techniques
2. Advanced/ancient acupuncture techniques and their uses, such as Qi flow methods, Green dragon wags its tail, Scarlet phoenix meets the source, Green turtle searches for the point, White tiger shakes its head, Yang Ji Zhou (12 techniques)
3. Channel and point palpation techniques
4. Timing in acupuncture ? zi wu liu zhu
5. Application of eight extraordinary vessels
6. Application of Luo, divergent and sinew channels
7. Application of the 5 transport/shu points
8. Strategies in designing acupuncture prescriptions
9. The connection of current acupuncture theories and techniques to classical theories
10. The developing evidence base for traditional theories and techniques

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

Coordinator Shengxi (George) Zhang ([https://directory.westernsydney.edu.au/search/name/Shengxi \(George\) Zhang/](https://directory.westernsydney.edu.au/search/name/Shengxi%20(George)Zhang/))

Description This unit is focused on the clinical application of Chinese herbal medicine (CHM) and acupuncture in the management of cancer. Today, cancer is one of the leading causes of death and disease burden. Survival rates for many types of cancer have improved in recent years and long-term survival challenges accepted practices in cancer care and management. This unit explores application of Chinese medicine to the management of cancer, through the ancient wisdom in the classic literature recourses and contemporary clinical practice and research. The unit addresses the commonly used strategies, approaches and roles of Chinese medicine at different stages of cancer as well as the use of Chinese medicine as a supplementary therapy for common types of cancer.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4716 Master of Chinese Medicine (or 4675 Master of Health Science (Traditional Chinese Medicine) and/or 4678 Master of Health Science (Acupuncture)).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the concept, aetiology and pathogenesis of cancer.
2. Describe basic assessments of cancer and compare an contrast conventional treatments and commonly-used interventions for cancer management using acupuncture and Chinese herbal medicine
3. Critically analyse the theory and practice of CM for relieving symptoms induced by cancer treatment
4. Critically analyse the theory and practice of CM as supportive care for common cancers
5. Identify and critically evaluate the strengths and limitations of CM for cancer

Subject Content

1. Overview of oncology
 - a. Introduction to cancer: concept, causes and classification
 - b. Cancer assessments: grade, staging and cancer markers
 - c. Conventional treatment for cancer
 - surgery
 - Radiotherapy
 - chemotherapy
 - other therapies
2. Overview of CM in relation to cancer
 - a. Historical perspective
 - b. Aetiology and pathogenesis in CM
 - c. Diagnostic approaches in CM

- d. Major research progress of CM for cancer
3. Strategies and principles of CHM and acupuncture management for cancer
 - a. Timing of engagement and relevant approaches
 - b. Treatment principles
 - c. Commonly-used CHM for cancer
 - d. Commonly-used acupuncture for cancer
 - e. Potential anticancer mechanisms of CHM
 - f. Cautions and safety
 4. CM for relieving induced signs and symptoms associated with conventional therapies
 - a. Digestive symptoms
 - b. Bone marrow suppression
 - c. Fatigue
 - d. Hot flashes
 - e. Mucositis
 - f. Others
 5. CM as supportive care for common cancers
 - a. Breast cancer
 - b. Prostate cancer
 - c. Colorectal cancer
 - d. Lung cancer
 - e. Melanoma
 - f. Lymphoma
 - g. Leukaemia
 6. Strengths and limitations of acupuncture and Chinese herbal medicine (CHM)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Completion of 1 case study that requires analysis of de-identified real case and demonstrates the integration of CM knowledge and western medical knowledge in terms of diagnostic information and treatment strategy	2,000 words	30	N	Individual
Completion of a written assignment on a selected contribution of CM in cancer treatment	2,500 words	30	N	Individual

Analysis of clinical cases through vUWS	Minimum of 6 online posts with substantial content to fellow students in relation to online discussion topics	20	N	Individual
In class test	15 minutes of each workshop	20	N	Individual

Teaching Periods

CMPL 7010 Clinical Placement

Credit Points 20

Legacy Code 401133

Coordinator Xiaoshu Zhu ([https://directory.westernsydney.edu.au/search/name/Xiaoshu Zhu/](https://directory.westernsydney.edu.au/search/name/Xiaoshu%20Zhu/))

Description This unit provides four weeks of full-time (or part-time equivalent) clinical placement with a choice of clinical training in the defined specialty areas (women's health, musculoskeletal health, mental and neurological disorders, oncology, or chronic and complex diseases). The clinical placement is with experienced specialist practitioners provided in conjunction with the Beijing University of Chinese Medicine in China or by an approved alternative arrangement with the student and limited by available opportunities.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 20cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) CMPL 7025 OR
CMPL 7016 OR
CMPL 7009 OR
CMPL 7005

Restrictions

Students must be enrolled in 4716 Master of Chinese Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Synthesise knowledge and competency in the practice of specialty TCM clinical areas;

2. Demonstrate competence in the design and formulation of care of patients in a specialist clinical context;
3. Correctly diagnose, prescribe and administer treatment;
4. Critically examine issues related to the care of patients in a multidisciplinary environment
5. Employ recognised standards of culture and diversity in professional settings

Subject Content

Clinical experience of 4 weeks full-time (or part-time equivalent) with a choice of clinical training in the defined specialty areas (women's health, musculoskeletal health, mental and neurological disorders, oncology in Chinese Medicine, or chronic and complex diseases) with experienced specialist practitioners provided in conjunction with the Beijing University of Chinese Medicine within China or an alternative by arrangement with the student and limited by available opportunities in high turnover specialist clinical settings.

Special Requirements

Legislative pre-requisites

Prior to enrolling in this subject, students must have a National Police Check, which is required to be submitted before placement, and a Working with Children Check Student Declaration. Students must also hold a valid and current First Aid Certificate from a Registered Training Organisation. Use the link to the Special Requirements webpage below for more information.

Special requirements (https://www.westernsydney.edu.au/currentstudents/current_students/enrolment/special_requirements/)

Assessment

CMPL 7011 Dermatology in Chinese Medicine 1

Credit Points 10

Legacy Code 400572

Coordinator Xiaoshu Zhu ([https://directory.westernsydney.edu.au/search/name/Xiaoshu Zhu/](https://directory.westernsydney.edu.au/search/name/Xiaoshu%20Zhu/))

Description This unit along with Dermatology in Chinese Medicine 2 will enable practitioners to develop an in-depth understanding of Traditional Chinese Medicine (TCM) diagnosis and management of a wide range of skin diseases using acupuncture and Chinese herbal medicine. This unit includes orthodox medical diagnosis and management of common skin disorders and the integration of this with TCM theory, diagnosis and management. Dermatology in Chinese Medicine 1 and 2 together provide a strong specialist clinical focus on the management of skin disorders with Chinese medicine.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in Master of Health Science (Traditional Chinese Medicine) or Master of Health Science (Acupuncture).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse and compare the TCM diagnosis and management with the orthodox diagnosis and management of a range of common skin disorders including dermatoses caused by viruses, bacteria and fungi, inflammatory dermatoses, physically induced dermatoses, acne, rosacea and psoriasis
2. Identify the clinical manifestations of a range of skin disorders and describe the significance of these
3. Apply the appropriate TCM management of a range of skin diseases including lifestyle and dietary advice, and write individualised prescriptions for acupuncture and/or internal and externally applied herbal formulae
4. Explain the potential adverse effects of a range of western pharmaceuticals used to treat skin disorders, their potential interactions with Chinese herbs and the implications of treatment of skin disorders with Chinese herbal medicine for patients concurrently using western pharmaceutical treatment
5. Evaluate and conclude when special caution or contraindication needs to be considered in treatment of skin disorders with

acupuncture and Chinese herbal medicine (specific disorders, particular patients, concurrent Western medication)

6. Explain the mode of action of externally applied Chinese herbal medicines and their indications and method of application and prepare prescriptions for externally applied herbal formulae in a variety of forms including powders, washes, tinctures, pastes, ointments, plasters
7. Analyse the evidence for the efficacy of treatment of skin disorders with acupuncture and Chinese herbal medicine
8. Explain requirements for storing, labelling and dispensing of external herbal medicines

Subject Content

Clinical manifestations, TCM diagnosis and management (including dietary and lifestyle advice, herbal medicine and/or acupuncture prescription) and orthodox diagnosis and management of:

1. Dermatoses caused by viruses
 - Verruca vulgaris and Verruca plana
 - Condyloma acuminata
 - Herpes simplex
 - Herpes zoster
2. Dermatoses caused by bacteria
 - Folliculitis
 - Erysipelas
 - Impetigo
3. Dermatoses caused by fungi
 - Tinea pedis/capitis/corporalis
 - Candida albicans
4. Inflammatory dermatoses
 - Eczema
 - contact dermatitis
5. Scaly skin diseases
 - Psoriasis
6. Acne
7. Rosacea
8. Integrating TCM and Western medicine in diagnosis and management of skin disorders
 - potential adverse reaction to TCM treatment
 - potential interaction between Western pharmaceuticals and herbal medicines
 - special cautions/contraindications in The TCM treatment of skin disorders
 - relative efficacy of treatment of skin disorders with acupuncture and Chinese herbal medicine
9. Evidence base of TCM in dermatology
10. Externally applied Chinese herbal medicines
 - mode of action
 - Indications
 - application
 - preparation methods and mode application
 - written and verbal instructions
 - storage, dispensing and labelling of herbal medicines

Teaching Periods

CMPL 7012 Evidence Based Practice in Chinese Medicine

Credit Points 10

Legacy Code 401129

Coordinator Isabella Leung ([https://directory.westernsydney.edu.au/search/name/Isabella Leung/](https://directory.westernsydney.edu.au/search/name/Isabella%20Leung/))

Description This unit will introduce and develop the concepts and principles of evidence-based practice as applied to Traditional Chinese Medicine (TCM) and explore specific aspects of research development. Furthermore, this unit will focus on the clinical applications of such research-based evidence and highlight integrative methods combining TCM and biomedical diagnostics and disease management. Students will gain an understanding of the complexities, practicality, and applied methodologies used in research to establish the validity and reliability of TCM theories, diagnostics and interventional techniques in addition to the appropriateness of various outcome measures for research and clinical practice. This unit will provide students with a practical skillset designed to facilitate location, evaluation, integration, and application of scientific research evidence in clinical practice whilst also preparing students for development of research proposals in subsequent units such as Research Protocol Design & Practice.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects CMPL 7013 - Evidence Based Practice in Chinese Medicine 1 CMPL 7014 - Evidence Based Practice in Chinese Medicine 2

Restrictions

Students must be enrolled in 4716 - Master of Chinese Medicine, 4675 - Master of Health Science (Traditional Chinese Medicine) or 4678 - Master of Health Science (Acupuncture)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Integrate knowledge from both biomedicine and TCM in the diagnosis and treatment of different diseases.
2. Describe the attempts and uses of modern technology and scientific research methods to establish the validity and/or reliability of TCM theory, diagnosis and treatments.
3. Identify research designs and data analysis techniques that can be used in TCM research.
4. Analyse the complexities associated with the application of scientific research methods to TCM.
5. Identify and select outcome measures that can be used in TCM research and clinical practice.
6. Outline a research proposal that is suitable for submission for university ethics approval committee.
7. Outline key issues in developing an evidence base for TCM.
8. Identify key issues in applying TCM evidence to clinical practice.

Subject Content

1. The historical and contemporary evidence bases of TCM and their influence on TCM practice.
2. Integration of biomedicine (including diagnostics and disease management) and TCM.
3. Epidemiological research methods applied to TCM.
4. Quantitative and qualitative research methods in TCM research.
 - Overview of Critical Appraisal.
 - Overview of Basic biostatistics
 - application in TCM clinical practice.
5. Relevant computer skills.
 - database searching.
 - Compiling literature database.

6. Integrating and prioritising clinical information in TCM.
7. Progression and current state of TCM Research.
 - Theory.
 - diagnostic techniques.
 - experimental/laboratory.
 - clinical intervention.
8. Outcome measures for use in TCM research and clinical practice.
9. Future directions of TCM research.
 - emergence of new paradigms in relation to TCM research
 - Developments in TCM research methodology and techniques
 - integration of technological advancements into TCM research
10. Guidelines for preparation of a research proposal adequate for ethics submission.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

CMPL 7013 Evidence Based Practice in Chinese Medicine 1

Credit Points 10

Legacy Code 400567

Coordinator Alan Yeung ([https://directory.westernsydney.edu.au/search/name/Alan Yeung/](https://directory.westernsydney.edu.au/search/name/Alan%20Yeung/))

Description This unit will provide the student with the opportunity to develop the skills necessary to search, understand and critically appraise scientific literature related to Chinese medicine. Basic research methods will be introduced sufficient to support the student through this unit. This unit will introduce and develop concepts and principles of evidence-based practice applied to Chinese medicine and explore specific research developments in Chinese medicine.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Equivalent to undergraduate training in Traditional Chinese Medicine or acupuncture.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically appraise Western and Chinese medicine research in terms of appropriateness and validity of research methodology used and conclusions reached
2. Conduct relevant literature searches on Chinese medicine
3. Describe formalised systems of critical appraisal (eg. CASP, Mc Master)
4. Describe different types and levels of research and their application in Chinese medicine and western medicine
5. Interpret basic biostatistics used in scientific research
6. Describe the complexities and limitations of the application of scientific research methodology to Chinese medicine
7. Describe the evidence-base of acupuncture and Chinese herbal medicine in the treatment of a variety of disorders
8. Implement change management strategies to incorporate evidence-based practice (i.e. into clinical practice)

Subject Content

1. Foundations of clinical research
2. Concepts of measurement (validity, reliability)
3. Designs in clinical research
4. Basic data analysis in clinical research
5. Relevant computer skills
 - database Searching
 - Compiling A literature database
6. Evidence-based practice
 - how to become ?evidence-based?f
 - The 5-step EBP process
 - writing A focussed clinical question prior to doing A search
 - levels of evidence
 - RCTs: The gold Standard
 - other levels and types of evidence, their strengths, biases and limitations, including Qualitative research
 - systematic reviews
 - skills required for EBP
 - Searching: sites and sources of evidence: Cochrane, DARE
 - Critical appraisal: checklists to formalise appraisal process (CASP, McMaster)
 - change management and strategies to help implement EBP
 - Ethical and professional responsibilities in TCM

Teaching Periods

CMPL 7014 Evidence Based Practice in Chinese Medicine 2

Credit Points 10

Legacy Code 400568

Coordinator Suzanne Grant ([https://directory.westernsydney.edu.au/search/name/Suzanne Grant/](https://directory.westernsydney.edu.au/search/name/Suzanne%20Grant/))

Description This unit will focus on the integration of Traditional Chinese Medicine (TCM) and Western medicine in the diagnosis and management of disease. A significant focus of this unit will be on

the interpretation and integration of medical diagnostic tests with TCM diagnosis, and will include an examination of the research that attempts to validate TCM theory and diagnostic techniques. Students will learn how to integrate and prioritise clinical information and undertake the development of a research proposal.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Equivalent to undergraduate training in Traditional Chinese Medicine or acupuncture.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret and integrate information from specific western laboratory tests in terms of Chinese medicine diagnostic categories (syndromes).
2. Analyse from a TCM perspective side effects of Western pharmaceuticals.
3. Integrate knowledge from both western medicine and TCM in the diagnosis and treatment of different diseases.
4. Describe the attempts and uses of modern technology and scientific research methods to establish the validity and/or reliability of TCM theory, diagnosis and treatments.
5. Identify research designs and data analysis techniques that can be used in TCM research.
6. Understand and demonstrate the complexities associated with the application of scientific research methods to TCM.
7. Identify and select outcome measures that can be used in TCM research and clinical practice.
8. Prepare a research proposal that is suitable for submission to a university ethics approval committee.

Subject Content

- interpretation and integration of medical diagnostic pathology reports and TCM Diagnosis including: liver function test, hormone levels, full blood Count, blood rheology and urine analysis.
- analysis of side effects of pharmaceutical drugs in relation to TCM diagnostic categories.
- integration of Western medicine (including diagnostics) and TCM.
- TCM differential Diagnosis of common modern diseases.
- Epidemiological research methods.
- Integrating and prioritising clinical information.
- reliability & validation studies of TCM diagnostic techniques and Theory.
- outcome measures for use in research and practice.
- developing guidelines for TCM practice.
- how to prepare A research proposal adequate for ethics submission.

Teaching Periods

CMPL 7015 Mental and Neurological Disorders and Chinese Medicine

Credit Points 10

Legacy Code 401135

Coordinator Yu-Ting Sun ([https://directory.westernsydney.edu.au/search/name/Yu-Ting Sun/](https://directory.westernsydney.edu.au/search/name/Yu-Ting%20Sun/))

Description This unit will enable practitioners to extend their understanding of Chinese Medicine management of a range of mental health conditions and neurological disorders. The clinical focus is on the Chinese Medicine diagnosis and management of these disorders and integration with the orthodox biomedical approaches to disorders that are common in the community. Chinese Medicine treatment will focus on acupuncture and Chinese herbal medicine treatments. Students will learn to apply Chinese Medicine's unique understanding and contribution to the rehabilitation of those who have suffered from disabling psychological/psychiatric and neurological diseases.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects NATS 7036 - Mental Health in Chinese Medicine
NATS 7038 - Neurological Disorders in Chinese Medicine

Restrictions

Students must be enrolled in 4716 Master of Chinese Medicine, 4717 Graduate Diploma of Chinese Medicine, 4675 Masters of Health Science (Traditional Chinese Medicine), or 4678 Master of Health Science (Acupuncture)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate the strengths and weaknesses of Chinese medicine practice approaches to mental health and neurological disorders
2. Evaluate the application and relative efficacy of different TCM theories used to guide Chinese medicine diagnosis and practice for mental health and neurological disorders
3. Apply the use of different acupuncture and herbal strategies for approaching mental health & neurological cases
4. Analyse the evidence and research from Chinese medicine practice in relation to mental health and neurological disorders
5. Formulate acupuncture and herbal prescriptions for application in mental health and neurological conditions

Subject Content

1. Chinese Medicine understandings of mental health and neurological disorders
2. Strengths and limitations of acupuncture, Chinese herbal medicine and other TCM treatments for mental health and neurological conditions
3. Psychiatric and psychological: approaches to mental health conditions and the place of Chinese medicine interventions in this field
4. Neurological assessments
5. Effects and side effects of common western medications used to treat neurological and mental health conditions
6. Classical TCM thinking about psychology and emotions: the concept of Shen and role of the Heart and other zang-fu organs, blood and qi
7. Chinese medicine and biomedical/ psychological nosology, epidemiology, aetiology, diagnosis and management of common mental health & neurological conditions:
 - Depression: mild Depression, clinical Depression, Bi-polar Depression
 - anxiety
 - mood disorders, including attention Deficit hyperactivity Disorder (ADHD) and post-Traumatic stress Disorder (PTSD)

- drug and alcohol dependence
- sleep disorders
- dementia
- peripheral facial Paralysis (Bell's palsy)
- Headache and migraine
- Epilepsy
- Cerebrovascular accidents and post-Stroke sequelae
- Trigeminal neuralgia
- Meniere's disease
- Parkinson's disease
- motor Neuron disease
- multiple Sclerosis

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
In-class test and demonstration	20 minutes	15	N	Individual
Completion of 1 case study	2000 words	35	N	Individual
Completion of a written assignment	2000 words	35	N	Individual
Participate online through vUWS in critical discussion and appraisal of fellow students written assignment through vUWS	Minimum of 6 online posts with substantial content to fellow students in relation to online discussion topics	15	N	Individual

Teaching Periods

CMPL 7016 Musculoskeletal Health in Chinese Medicine

Credit Points 10

Legacy Code 401134

Coordinator Shengxi (George) Zhang ([https://directory.westernsydney.edu.au/search/name/Shengxi \(George\) Zhang/](https://directory.westernsydney.edu.au/search/name/Shengxi%20Zhang/))

Description This unit will enable practitioners to develop an in-depth understanding of the diagnosis and management of musculoskeletal conditions with acupuncture and Chinese herbal medicine. This unit presents a systematic approach to the assessment of musculoskeletal disorders using Traditional Chinese Medicine (TCM), the application of specific medical tests and includes a focus on common musculoskeletal disorders, sports injuries and rehabilitation. Musculoskeletal Health in Chinese Medicine provides a strong

specialist clinical focus on the management of musculoskeletal health disorders with acupuncture and Chinese herbal medicine.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects CMPL 7017 - Musculoskeletal Health in Chinese Medicine 1 CMPL 7018 - Musculoskeletal Health in Chinese Medicine 2

Restrictions

Students must be enrolled in 4716 Master of Chinese Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate the stages of injury in terms of TCM understanding of pathogenesis, diagnosis and corresponding TCM treatment principles
2. Apply a range of diagnostic skills and critically review the value of these in the assessment of common musculoskeletal disorders
3. Analyse signs and symptoms and apply TCM pattern differentiation to diagnose musculoskeletal disorders according to TCM theory, and assess their efficacy in practice
4. Formulate treatment principles and apply various therapeutic techniques including rehabilitation exercises for a range of musculoskeletal disorders and assess their efficacy in practice
5. Critically analyse and integrate TCM diagnosis and management protocols and orthodox diagnosis management
6. Evaluate the strengths and limitations of Chinese medicine treatment of certain musculoskeletal disorders
7. Explore appropriate liaison mechanisms with biomedicine practitioners and other allied health professionals

Subject Content

1. Overview and extension to foundation teaching on TCM in relation to musculoskeletal disorders
2. Physical examination and biomedical diagnostic tests
3. TCM analysis and therapeutic techniques including acupuncture, Chinese herbal medicine, and rehabilitation exercises
 - a. Sports injury: diagnosis and TCM management (excluding dislocations)
 - b. Clinical orthopaedic and neurological syndromes:
 - i. Syndromes of the lumbar spine (including biomechanical dysfunction, disc pathology, chronic back pain, coccydynia)
 - ii. Syndromes of the thoracic spine (including biomechanical dysfunction, Scheuermann's disease, ankylosing spondylitis, costochondritis)
 - iii. Syndromes of the cervical spine (including acute torticollis, chronic neck pain, cervicogenic headache, myofascial trigger points, biomechanical dysfunction, acute cervical disc lesion)
 - iv. Muscle syndromes (including piriformis syndrome)
 - v. Syndromes of the

Assessment

CMPL 7019 Pharmacology of Chinese Medicines

Credit Points 10

Legacy Code 400569

Coordinator Dilip Ghosh ([https://directory.westernsydney.edu.au/search/name/Dilip Ghosh/](https://directory.westernsydney.edu.au/search/name/Dilip%20Ghosh/))

Description This unit will introduce the student to the pharmacology and toxicology of Chinese herbal medicine. The unit will cover the pharmacological principles of Chinese herbal medicines and identify basic active constituents that contribute to the actions of Chinese herbal medicines. This unit will also introduce safety and toxicology of herbal medicines including mechanisms and measurement of toxicity, known potential adverse reactions of commonly used Chinese herbs, known potential interactions with Western pharmaceuticals and management of adverse events.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Equivalent to undergraduate training in Traditional Chinese Medicine.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the principles and mechanisms of pharmacokinetics, pharmacodynamics and the pharmacological actions of Chinese herbs and key constituents
2. Critically analyse the relationship between classes of drugs, Traditional Chinese Medicine (TCM) theories and classification of Chinese herbs
3. Describe how toxicity of herbal medicine is understood, mechanisms of toxicity, and how toxicity is tested for and measured; and explain the toxicity (including toxic components), dosage ranges, specific preparation requirements, cautions and

contraindications associated with a variety of Chinese herbs and herbal medicinal formulae

4. Identify known potential adverse reactions to specific Chinese herbs and known potential interactions between specific Chinese herbs and Western pharmaceuticals
5. Justify Chinese herbal medicine prescribing considerations that need to be taken into account for patients taking western pharmaceuticals
6. Explain the management of adverse reactions
7. Prepare a report on an adverse event according to the adverse event reporting protocol used in western medicine

Subject Content

1. Principles of drug disposition
 - absorption
 - Distribution
 - metabolism
 - Excretion
2. Principles of pharmacokinetics
3. Principles of pharmacodynamics: mechanisms of drug action
4. Mechanisms of drug interactions
 - Pharmacokinetic interactions
 - Pharmacodynamic drug interactions
5. Classes of pharmaceutical drugs
6. Pharmacological actions of classes of Chinese herbs and commonly used herbs
7. Relationship between classes of drugs, TCM theories and classification of herbs
8. Chinese herbal medicine toxicity and adverse reactions
9. Concept of toxicity
10. Mechanisms of toxicity
11. Toxicity testing and measurement
12. Toxic Chinese herbs and components: identification, dosage, specific preparation requirements, cautions/contraindications
13. Known potential adverse reactions to specific Chinese herbs
14. Concurrent use of Chinese herbs and western pharmaceuticals: prescribing considerations, known potential interactions
15. Management and reporting of adverse reactions

Teaching Periods

CMPL 7020 Research Project and Thesis

Credit Points 30

Legacy Code 401138

Coordinator Xiaoshu Zhu ([https://directory.westernsydney.edu.au/search/name/Xiaoshu Zhu/](https://directory.westernsydney.edu.au/search/name/Xiaoshu%20Zhu/))

Description This is a 60 credit point year-long subject taken over two terms (30 credit points in each term). This subject requires students to complete a substantial piece of independent research in Chinese Medicine including research planning, study design, data collection, analysis and interpretation. Dissertation projects are developed in consultation with staff who possess similar research interests and relevant research experience. Students may wish to submit their work for examination in a form suitable for publication in the peer-reviewed literature (with supplementary material as appropriate).

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 30cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) CMPL 7012 AND
PUBH 7016 OR
HLTH 7008

Co-requisite(s) AGEN 7005

Restrictions

Students must be enrolled in a postgraduate program and have a GPA of 5.0 or greater. Students transferring from the current teaching-out program 4675 Master of Health Science (Traditional Chinese Medicine) and 4678 Master of Health Science (Acupuncture) may be eligible to entry into the subject with 401080 Research Protocol Design and Practice as corequisite subject to individual assessments.

Assumed Knowledge

It is assumed that the student would have completed core (or foundational) subjects associated with their Masters program, ideally in relevant research design and practice related disciplines.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop a research proposal in consultation with SSH supervisor(s)
2. Conduct research independently under the direction of SSH supervisor(s)
3. Complete research to an expected disciplinary standard
4. Develop skills in presenting scientific reports

Subject Content

Research proposal development related to Chinese Medicine in consultation with SSH supervisor(s)
Data collection, collation, and analysis
Interpretation and dissemination of research findings

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

Coordinator Xiaoshu Zhu ([https://directory.westernsydney.edu.au/search/name/Xiaoshu Zhu/](https://directory.westernsydney.edu.au/search/name/Xiaoshu%20Zhu/))

Description This unit provides learning experiences that enable the health professional to analyse, diagnose and treat common gynaecological diseases and musculoskeletal conditions using a TCM approach with acupuncture and Chinese herbal medicine. Students will develop a good understanding of the causes and pathophysiological mechanisms of common gynaecological diseases and musculoskeletal conditions.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Co-requisite(s) CMPL 7003

Incompatible Subjects LGYA 7248 - Specialities in Traditional Chinese Medicine

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the unique features of women's physiology and pathology in relation to the pathogenesis and diagnosis of gynaecological diseases.
2. Explain the causes and patho-physiological mechanisms of common gynaecological

Subject Content

1. Introduction to Orthopaedics (including Traumatology & Rheumatology)

- physical Examination
 - principles of treatment and therapies
 - methods of management
2. Injury of muscle, tendon and bone
- Stiff Neck/Cervical soft tissue sprain
 - Cervical spondylopathy
 - scapulohumeral peri-arthritis
 - carpal tunnel syndrome
 - Acute lumbar muscle sprain
 - prolapse of lumbar intervertebral disc
 - Sciatica
 - post surgical management, scar treatment
3. Sport medicine

- injury treatment and management (injuries to ligaments, tendons, muscle and bone ? knee, elbow, shoulder, wrist, thigh, calf, ankle, Neck, low back)

- performance enhancement

4. Introduction to gynaecology

- special features of women's physiology (TCM & WM)

- aetiology, Diagnosis and therapeutic methods

- A synopsis of gynaecological pathology

5. Disorders of menstruation

- early menstruation

- delayed menstruation

- irregular menstruation

- amenorrhoea

- abnormal Functional uterine bleeding

- premenstrual syndrome

- menopausal syndrome

6. Disorders of the female genitalia

- abnormal vaginal discharge

- breast lumps: Fibrocystic diseases, fibroadenoma, nodules, mastitis

7. Di

Coordinator Amy Tan ([https://directory.westernsydney.edu.au/search/name/Amy Tan/](https://directory.westernsydney.edu.au/search/name/Amy%20Tan/))

Description The specialties of pediatrics, dermatology, ear, nose, throat (ENT) and eye diseases, are important divisions of TCM activity. This unit enables students to develop an understanding of the aetiology and pathophysiology of common paediatric, dermatological, ENT and eye disorders, and to analyze, diagnose and treat these conditions using acupuncture and Chinese herbal medicine.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) CMPL 7003

Incompatible Subjects LGYA 7259 - Specialities in Traditional Chinese Medicine 2

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the causes and pathophysiological mechanisms of a range of common paediatric, dermatological, ENT and eye diseases, by demonstrating an understanding of the significance of clinical manifestations
2. Evaluate the relevance of characteristics of children's age, normal growth and development fo

Subject Content

1. Paediatrics

a). General Introduction

- physiology and pathophysiology of children

- feeding and health care

- Basic skills of Examination of children
- diagnostic and treatment principles in pediatrics
- acupuncture in pediatrics
- Chinese herbal medicine in pediatrics
- b). Lung System Disorders
 - common Cold
 - Cough
 - Asthma in children
- c). Spleen System Disorders
 - Infantile Diarrhoea
 - Abdominal pain
 - Anorexia
 - food Stagnancy
- d). Kidney System Disorders
 - Acute nephritis
 - Nephritic syndrome
 - Enuresis
- e). Infectious Diseases
 - Measles
 - Rubella
 - Varicella (chickenpox)
 - Mumps
 - Pertussis (Whooping Cough)
- f). Miscellaneous Diseases
 - attention Deficit Disorder (add)
 - Sweating syndrome
- 2. Dermatology
 - aetiology and pathogenesis of Dermatoses
 - key points of differentiation for The skin Lesions
 - external applications with Chinese herbs and acupuncture
 - b). Viral Dermatitis
 - Herpes zoster (She Chuan Chuang)
 - common Wart (Xun Chang You)
 - Flat Wart (Bian Ping You)
 - Genital Wart (Jian Rui Shi You)
 - c). Fungal and other Infectious Dermatitis
 - Tinea capitis (Tou Xuan)
 - Tinea Corporis (Ti Xuan)
 - Tinea Manuum (Shou Xuan)
 - Tinea pedis (Zu Xuan)
 - Tinea Unguium (Jia Xuan)
 - Impetigo (Nong Pao Chuang)
 - Scabies (Jie Chuang)
 - d). Allergic Dermatitis
 - Eczema (Shi Chuang)
 - Urticaria (Hives) (yin Zhen)
 - contact dermatitis
 - e). Disorders of Sebaceous Glands and Hair Follicles
 - Acne (Fen Ci)
 - Seborrhic dermatitis (Bai Xie Feng)
 - Alopecia Areata (You Feng)
 - f). Other Dermatitis
 - Neurodermatitis (Niu Pi Xuan)
 - Psoriasis (Bai Bi)
 - Vitiligo (Bai Dian Feng)
 - systemic Lupus Erythematosus (SLE) (Hong Hu Die Chuang)
- 3. ENT & Eyes
 - rhinitis (allergic, chronic)
 - sinusitis
 - tinnitus and deafness
 - suppurative otitis media (Acute and chronic)
 - pharyngitis & laryngitis
 - tonsillitis
 - conjunctivitis (Acute, chronic, spring)
 - hordeolum

4. Review of herbal formulas, individual herbs, and acupuncture points as they are covered in the above topics

Coordinator Xiaoshu Zhu ([https://directory.westernsydney.edu.au/search/name/Xiaoshu Zhu/](https://directory.westernsydney.edu.au/search/name/Xiaoshu%20Zhu/))

Description This unit represents a continuation of the clinical practicum and development of clinical skills. Students will also be able to apply their knowledge of professional theory, practice, research and evaluation skills to the investigation of Traditional Chinese Medicine (TCM) problems. Students will be expected to demonstrate competence in handling patients in a clinical context, synthesise knowledge from their studies of specialities in TCM and critically examine the practical aspects of acupuncture and Chinese herbal medicine research. Students will also learn basic knowledge of health preservation and enhancement including lifestyle, diet and physical exercise.

School Health Sciences

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 7249 - Traditional Chinese Medicine Practice (Research Project)

Assumed Knowledge

It is assumed the students will have a thorough knowledge of TCM theory, acupuncture and Chinese herbal medicine as a foundation for this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Competently manage patients in a clinical context;
2. Apply concepts and skills covered so far in Chinese Internal Medicine 1 and Specialities in TCM 1 in a clinical context;
3. Critically examine practical aspects of acupuncture and Chinese herbal medicine research;
4. Practice preserving and enhancing health and wellbeing by implementing knowledge and skills in prescribing lifestyle, diet and physical exercise modifications.

Subject Content

1. All aspects of clinical management and practice appropriate to the private practice of TCM in Australia:
 - appointment taking
 - case history taking and evaluation
 - Diagnosis, treatment Principle and prescriptions
 - patient management and liaison
 - treatment ? acupuncture, Chinese herbs, moxa and cupping
 - account management
 - intra/inter-professional referrals

2. Satisfactory competence in all skills related to acupuncture and Chinese herbal practice, including diagnosis, formation of treatment plans, performance of interventions and follow-up
3. Synthesis of practical aspects of acupuncture and Chinese herbal medicine research, including critical review and analysis of clinical trials and relevant experimental research
4. Health Preservation and Enhancement
 - health preservation
 - methods of health preservation
 - Cultivation of mind
 - dietary regulation
 - Balance between work & rest
 - physical Exercise
 - Chinese medicine dietary therapy
 - Dietetic treatment for common disorders
 - Dietetic materials
 - Cereals
 - Fruit
 - vegetables
 - Nuts
 - Condiments
 - Meats
 - Fish
 - commonly used herbs

Special Requirements

Legislative pre-requisites

First Aid Certificate.

Discipline Traditional Chinese Medicine

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 7255 - Traditional Chinese Medicine Practice 4

Assumed Knowledge

Traditional Chinese Medicine 3 (PG).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Competently manage all aspects of TCM clinical practice;
2. Design and formulate the care of patients in a clinical context;
3. Critically examine issues related to complex cases and the care of patients in a multidisciplinary environment;
4. Synthesise knowledge and demonstrate competence in the practice of a range of the specialty TCM areas;
5. Articulate and apply a high standard of professional ethics.

Subject Content

1. Practice of acupuncture and related techniques including:
 - appointment taking
 - case history taking and evaluation
 - Diagnosis, treatment Principle and prescriptions
 - patient management and liaison
 - treatment ? acupuncture, Chinese herbs, and associated techniques
 - account management
 - intra/inter-professional referrals
 - Working in A multidisciplinary environment
 - Ethical Marketing and promotion
2. Satisfactory competence in all skills related to acupuncture and Chinese herbal practice, including diagnosis, formation of treatment plans, performance of interventions and follow-up.
3. Professional ethics and privacy management in health

Incompatible Subjects CMPL 7026 - Women's Health in Chinese Medicine 1 AND CMPL 7027 - Women's Health in Chinese Medicine 2

Restrictions

Students must be enrolled in 4716 Master of Chinese Medicine (or Master of Health Science (Traditional Chinese Medicine) and/or Master of Health Science (Acupuncture)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe symptoms and signs of and diagnose a range of specific gynaecological and obstetric diseases and syndromes
2. Be familiar with the range of medical diagnostic tests commonly used in western medicine investigations of gynaecological and obstetric disorders
3. Apply skills in application of integrating TCM and orthodox medicine in the diagnosis and where appropriate, management of gynaecological and obstetric disorders
4. Analyse and critically examine practice protocols in TCM compared to orthodox management
5. Articulate the strengths and limitations of acupuncture and Chinese herbal medicine in the treatment of particular gynaecological and obstetric diseases
6. Articulate when to refer for medical advice/treatment and indicate appropriate liaison with gynaecologists, obstetricians and other relevant medical personnel

Subject Content

1. Signs & symptoms of gynaecology
2. Signs & symptoms of obstetrics
3. Strengths & limitations of TCM management in gynaecology & obstetrics
4. Referring to Western medicine practitioners: who, when, how, why
5. Commonly used western medical diagnostic tests - hormone tests, laparoscopy, ultrasound, and sperm tests relevant to women?fs conditions
6. Integration of TCM and orthodox medicine in diagnosis and management of specific gynaecological and obstetric disorders including:
 - menstrual-related disorders
 - menopausal disorders
 - breast disorders
 - obstetric-related conditions and applications - Prenatal support, birth assistance, Postnatal care
 - Infertility (both female and Male Infertility)
7. Impact of lifestyle and social role on women?fs health

Equivalent Subjects CMPL 7026 - Women's Health in Chinese Medicine 1

Assumed Knowledge

Assumed knowledge equivalent to undergraduate training in Traditional Chinese Medicine. Students must have completed a minimum of two years training in raw Chinese herbal medicine prescribing as part of their overall undergraduate training.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse symptoms and signs and diagnose the disease and syndrome for a range of specific gynaecological and obstetric diseases
2. Understand the significance of signs and symptoms specific to gynaecology and obstetrics
3. Interpret the range of medical diagnostic tests commonly used in western medicine investigation of gynaecological and obstetric disorders
4. Integrate TCM and orthodox medicine in the diagnosis and where appropriate, management of gynaecological and obstetric disorders
5. Analyse and critically examine practice protocols in acupuncture compared to orthodox management
6. Articulate the strengths and limitations of acupuncture in the treatment of particular gynaecological and obstetric diseases
7. Articulate when to refer for medical advice/treatment and how to liaise with gynaecologists, obstetricians and other relevant medical personnel

Subject Content

1. Signs & symptoms in gynaecology
2. Signs & symptoms in obstetrics
3. Strengths & limitations of TCM management in gynaecology & obstetrics
4. Referring to Western medicine practitioners: who, when, how, why
5. Commonly used western medical diagnostic tests
 - hormone tests
 - Laparoscopy
 - Ultrasound
 - Sperm tests
6. Integration of TCM and orthodox medicine in diagnosis and management (with an emphasis on acupuncture treatment) of specific gynaecological and obstetric disorders including:
 - i) Menstrual-related disorders
 - Disordered menstrual cycle
 - Dysmenorrhoea
 - signs & Symptoms associated with menstruation, esp. PMS
 - ii) Menopausal disorders
 - iii) Breast disorders
 - iv) Pelvic disorders & discharges
 - v) Obstetric-related disorders
 - Infertility
 - Morning sickness
 - Prenatal acupuncture
 - birth assistance
 - Postnatal acupuncture
7. Impact of lifestyle and social role on women's health

Assumed Knowledge

Assumed knowledge equivalent to undergraduate training in Traditional Chinese Medicine. Students must have completed a minimum of two years training in raw Chinese herbal medicine prescribing as part of their overall undergraduate training.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse symptoms and signs and diagnose the disease and syndrome for a range of complex gynaecological and obstetric diseases, including infertility
2. Interpret the range of medical diagnostic tests commonly used in western medicine investigation of complex gynaecological and obstetric disorders and infertility
3. Integrate TCM and orthodox medicine in the diagnosis and where appropriate, management of complex gynaecological and obstetric disorders and fertility
4. Analyse and critically examine practice protocols in TCM compared to orthodox management
5. Articulate the strengths and limitations of Chinese herbal medicine in the treatment of complex gynaecological and obstetric diseases

Subject Content

Integration of TCM and orthodox medicine in diagnosis and management (with an emphasis on Chinese herbal treatment) of complex gynaecological and obstetric disorders including:

1. Menstrual-related disorders
 - Disordered menstrual cycle
 - Dysmenorrhoea
 - signs & Symptoms associated with menstruation
 - dysfunctional uterine bleeding
 - Endometriosis/adenomyosis
2. Menopausal disorders
3. Breast disorders
 - Fibrocystic breast disease
 - breast cancer
4. Pelvic disorders & discharges
 - Inflammatory conditions
 - Ovarian cysts
 - Polycystic ovaries
 - uterine fibroids
 - Cervical dysplasia
 - Pelvic Inflammatory disease
 - Leukorrhoea
 - Thrush
5. Infertility
 - commonly used Western medical diagnostic tests
 - Western medical management of Infertility
 - female Factors
 - Male Factors
 - Diagnosis & treatment
 - TCM role in art
6. Obstetric-related disorders
 - Threatened miscarriage
 - Intrauterine growth retardation
 - Pregnancy-induced hypertension
 - Incomplete abortion
 - Postnatal Depression
 - Lactation disorders
7. Fu Ke Classic literature
8. Strengths & limitations of TCM management in gynaecology & obstetrics
9. Referring to Western medicine practitioners: who, when, how, why

COMM 0002 Academic Skills for Communication (WSTC Prep)

Credit Points 10

Legacy Code 700218

Coordinator Chantal Rozairo ([https://directory.westernsydney.edu.au/search/name/Chantal Rozairo/](https://directory.westernsydney.edu.au/search/name/Chantal%20Rozairo/))

Description This unit introduces students to the essential academic skills required for success in tertiary studies. It employs an explicit pedagogy approach to teach students how to become independent, active, and reflective learners. The unit also includes essential research and writing skills specific to the Communication Arts.

School Western Sydney The College

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 0 Preparatory subject

Restrictions Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use both independent and collaborative learning strategies to advance the knowledge of the individual and that of their peers.
2. Communicate effectively through the development of critical reading, listening, speaking and writing skills in context.
3. Locate and use information technology systems and educational technologies to support learning and assessment.
4. Apply critical thinking, and use problem solving skills and research skills, to make informed decisions.
5. Apply the process of reflection to learning experiences, in order to assess their own learning styles and learn how to learn.
6. Demonstrate an understanding of the difference between qualitative and quantitative research, as well as primary and secondary sources, as it applies to the communication arts.

Subject Content

1. Introduction to tertiary study
2. Advanced tertiary skills
3. Information skills and blended learning
4. Essential skills for the arts, social sciences and humanities

Coordinator Chantal Rozairo ([https://directory.westernsydney.edu.au/search/name/Chantal Rozairo/](https://directory.westernsydney.edu.au/search/name/Chantal%20Rozairo/))

Description Communication and Media introduces students to key terminology, concepts and debates in the fields of Communication and Media Studies. The unit looks at the role of communication in a variety of private, professional and public contexts, developing students' ability to identify, evaluate and adopt effective communication practices. Students will also be introduced to the basic critical vocabulary and tools necessary to analyse media discourse and advertising.

School Western Sydney The College

Discipline Communication And Media Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 0 Preparatory subject

Equivalent Subjects COMM 0005 - Communication and Media (UWSC)

Restrictions Students must be enrolled at Western Sydney University The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the components of communicative acts, private as well as public.
2. Accurately apply key terminology in the Media and Communication Studies.
3. Discuss the impact of globalisation and technological development on communication and media.
4. Analyse the impact of media representations and advertising on the individual, as well as on broader social, political, and cultural processes.
5. Critically assess media content in terms of balance, accuracy and agenda.
6. Demonstrate an understanding of the implications of media ownership and editorial control in the production of media texts.
7. Discuss the concept of censorship.

Subject Content

Legacy Code 900026

Coordinator Ben Fletcher ([https://directory.westernsydney.edu.au/search/name/Ben Fletcher/](https://directory.westernsydney.edu.au/search/name/Ben%20Fletcher/))

Description The globalisation or interdependence caused by changes in economies and communications along with the influence of new forms of communication and mass media has led to the introduction of media and communications courses in secondary and tertiary education programs. This unit is one which will not only attempt to structure student interest in general communication principles, media, and information technology but also enhance their vocational, interpersonal and academic potential. It is designed to be an introduction to media and communication studies at university.

Credit Points 10

Legacy Code 700192

Coordinator Chantal Rozairo ([https://directory.westernsydney.edu.au/search/name/Chantal Rozairo/](https://directory.westernsydney.edu.au/search/name/Chantal%20Rozairo/))

Description This unit assists students to develop skills in reading and textual analysis. It introduces students to the basic principles of reader response theory and general strategies to improve reading resilience. Textual analysis skills are built through engagement with a diverse range of texts on a variety of themes, which are relevant both to the contemporary world and to later studies at both the Foundation and University level. By the end of this unit, students will be able to read, discuss, analyse and write about texts in ways appropriate to academic levels of study.

School Western Sydney The College

Discipline Written Communication

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 0 Preparatory subject

Equivalent Subjects COMM 0012 - Texts and Communication (UWSC)

Restrictions Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain why reading is important.
2. Demonstrate resilience in reading.

- Describe and apply strategies to overcome obstacles in reading.
- Demonstrate an ability to read for information.
- Analyse texts for a multitude of meanings.
- Communicate ideas in appropriate academic form.
- Situate texts in their cultural and social context.

Subject Content

- What are texts, and how do they construct the world?
- The importance of reading, and strategies to build reading resilience.
- The evolution of texts, and their relationship to social change.
- Reader response theory and its meaning for students.
- The relationship between texts, knowledge and power.
- Strategies for contextualising, interpreting and analysing a variety of text types in relation to a number of themes that set up later learning (e.g., ?efreedom?f, ?esexuality?f and ?emorality?f).

COMM 0015 Communication Practices (WSTC Prep)

Credit Points 10

Legacy Code 700324

Coordinator Chantal Rozairo ([https://directory.westernsydney.edu.au/search/name/Chantal Rozairo/](https://directory.westernsydney.edu.au/search/name/Chantal%20Rozairo/))

Description What does it mean to be a communication professional in the digital age? In this unit students will explore the various study and career options available to them in communication industries. They will engage with a range of skills and practices to boost their success in later units and to start thinking and working like a communication professional. Engaging in a case study of an Australian media professional and developing a professional profile of their own ensures that students can identify and develop their own strengths relevant to their communication journey.

School Western Sydney The College

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 0 Preparatory subject

Restrictions Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Communicate ideas and information in a style appropriate to an academic setting.
2. Demonstrate an understanding of study and career pathways in communication industries.
3. Identify and use tools to create a personal brand related to professional practice.
4. Use visual communication software to articulate a creative concept.

Subject Content

- Introduction to study skills and how to succeed at university.
- Building research skills.
- Practical skills in Adobe Suites and inDesign.
- Presentation skills using digital software.
- Practice with story boarding for narration purposes.
- Building awareness of the career and education pathways within the communication and media industries.
- Creating a personal brand.
- Introduction to design concepts in relation to communication practice.

Assessment

Legacy Code 100641

Coordinator Anne Jamison ([https://directory.westernsydney.edu.au/search/name/Anne Jamison/](https://directory.westernsydney.edu.au/search/name/Anne%20Jamison/))

Description Why do we read books? Reading literary texts is crucial to our ways of understanding the world and ourselves. In this unit students learn that reading resilience, close reading skills and the ability to identify specific literary techniques are foundational to studying literature. Students will read a range of Australian texts including fiction, poetry, short stories, drama and criticism. They will analyse how meanings in those texts are shaped by diverse cultural and international contexts. This unit builds reading capacity while engaging students in key debates about literature today: what it means, how it works, and why it matters.

School Humanities & Comm Arts

Discipline Journalism

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects LGYB 0130 - Approaches to Text COMM 1005 - Approaches to Text (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse literary texts to identify and interpret a range of key literary techniques.
2. Apply techniques in academic and critical writing, and respond to feedback to improve writing skills.
3. Summarise and evaluate critical arguments.
4. Work effectively with other students on team tasks.
5. Give effective oral presentations supported by digital-visual presentation tools.
6. Discuss ways in which different cultural and international contexts influence the reading and writing of Australian literary texts.

Subject Content

Students will

- 1) read and analyse a range of literary texts with the purpose of becoming both more resilient and more careful readers.
- 2) develop the ability to identify and interpret key literary devices.
- 3) read a range of Australian texts - prose, poetry and drama - including works by Indigenous Australian authors.
- 4) analyse ways in which different cultural contexts influence the reading and writing of Australian literary texts.

COMM 1007 Communication in Health

Credit Points 10

Legacy Code 400732

Coordinator Elizabeth Atteya ([https://directory.westernsydney.edu.au/search/name/Elizabeth Atteya/](https://directory.westernsydney.edu.au/search/name/Elizabeth%20Atteya/))

Description Good communication within the health care setting is associated with improved health outcomes. This unit introduces students to foundation knowledge and skills required for effective communication with various stakeholders in varied and complex health situations. The unit is skills-based and uses case studies to create scenarios to which students learn to respond. There is a focus on the client interview and various questioning techniques designed to facilitate a therapeutic relationship as a means of developing rapport and trust. Strategies to promote communication within, between and across health professional disciplines, teams and government agencies is also explored. Written forms of documentation as well as communication skills required to communicate health information to clients, groups and the wider community are also presented. The unit uses a 'student capital' framework to facilitate reflection on current communication skills and those required for success at university and in future practice.

School Health Sciences

Discipline Verbal Communication

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects LGYA 7034 - Communication for the Helping Professions COMM 1008 - Communication in Health (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Reflect on their personal attitudes, beliefs and values on communication
2. Demonstrate essential verbal and non-verbal communication skills in the interaction with individual clients, patients, significant others, colleagues, managers and other health stakeholders
3. Describe strategies to adapt communication processes to meet the varying health literacy or special needs of clients, their family and significant others
4. Describe teamwork skills relevant to working in health care settings
5. Describe higher level communication techniques which are useful in complex situations
6. Review and critique written forms of communication
7. Critically analyse and evaluate the characteristics of health professional relationships with clients, colleagues, and the wider community
8. Reflect on their personal attitudes, beliefs, values, on communication

9. Apply essential verbal and written communication skills in the interaction with individual clients, patients, significant others, colleagues and other health stakeholders
10. Analyse and apply strategies to adapt communication processes to meet the varying health literacy or special needs of clients, family and significant others
11. Employ team work skills relevant to working in health care settings.

Subject Content

1. Student Capital framework to promote reflection on communication capacity needs
 2. Theoretical frameworks and processes for effective communication
 3. Communicating with various stakeholders ? the client, family and carers, professional colleagues, health care team, managers and agencies
 4. Modes of communication in health
 5. Developing sound relationships using empathy, rapport and active listening
 6. Verbal and non-verbal communication techniques
 7. Interview skills and motivational interviewing
 8. Communication in difficult situations ? conflict, aggression, assertiveness, sad news
 9. Documentation and presentations in the health
 10. Influential communication and advocacy
 11. Professional communication using social media
 12. Working with people who have different communication needs
 13. Protocols in using interpreters
1. Theoretical frameworks and processes in effective communication
 2. Skills for effective communication with clients, colleagues and the community
 3. Self-awareness in professional communication
 4. The nature of effective helping as a health care professional
 5. Communicating in teams
 6. Working with people who have different communication needs
 7. Professional written and presentation communication skills

COMM 1008 Communication in Health (WSTC)

Credit Points 10

Legacy Code 700062

Coordinator Charlise Bennett ([https://directory.westernsydney.edu.au/search/name/Charlise Bennett/](https://directory.westernsydney.edu.au/search/name/Charlise%20Bennett/))

Description Communication is integral to professional relationships, whether working individually with a client, educating community members on health matters, or working with other professionals as part of a multidisciplinary team. This unit aims to develop communication skills in preparation for work within the health professions across these areas. Communication skills will include those needed to form therapeutic relationships with individual clients and groups, as well as those required to communicate health information to clients, groups and the wider community. Students will develop skills to establish appropriate working relationships with professional colleagues.

Restrictions

Students must be enrolled at Western Sydney University, The College. Students enrolled in Extended Diplomas must pass 40 credit points from the preparatory subjects listed in the program structure prior to enrolling in this University level subject. Students enrolled in Integrated combined courses must have passed or be enrolled in the preparatory units in their course in order to enrol in this unit.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse and evaluate the characteristics of health professional relationships with clients, colleagues, and the wider community.
2. Reflect on the impact of personal attitudes, beliefs and values on communication.
3. Apply essential verbal and written communication skills in the interaction with individual clients, patients, significant others, colleagues and other health stakeholders.
4. Analyse and apply strategies to adapt communication processes to meet the varying health literacy or special needs of clients, family and significant others.
5. Employ teamwork skills relevant to working in health care settings.

Subject Content

- Theoretical frameworks and processes in effective communication
- Skills for effective communication with clients, colleagues and the community
- Self-awareness in professional communication
- The nature of effective helping as a health care professional
- Communicating in teams

- Working with people who have different communication needs
- Professional written and presentation communication skills.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
E-Portfolio	A: 300 words B:1,500 words	40	N	Individual
Presentation	300 words	30	N	Individual
Viva voce	2-3 minutes per person	30	N	Group

COMM 1009 Creative Writing: Practical Skills and Knowledge

Credit Points 10

Legacy Code 102437

Coordinator Felicity Castagna ([https://directory.westernsydney.edu.au/search/name/Felicity Castagna/](https://directory.westernsydney.edu.au/search/name/Felicity%20Castagna/))

Description This is the second of two Level 1 foundation units in the Creative Writing Major. The unit focuses on developing students into writers by giving them the practical skills and theoretical knowledge needed to become published writers. Students will develop a body of original creative work while reflecting critically upon writing practice. The unit is built around participation in writing workshops, which emphasise improving your work via practical feedback from tutors and peers. Themes covered include writing the personal, writing about place, experimentation, specificity, originality, voice and starting a career in writing. No previous creative writing experience is necessary.

School Humanities & Comm Arts

Discipline Written Communication

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Understand writing forms and identify those concepts most important to the kinds of writing they would like to produce;
2. Write short creative works (or series of works) using a range of techniques, styles and/or forms;
3. Use drafting and editing processes to write more effective creative works;
4. Write and read critically about key creative writing concepts;
5. Recognise ways in which different cultural contexts can shape and influence creative writing;
6. Understand and make use of the benefits of workshopping their writing.

Subject Content

Students will be required to work with the kinds of practical and theoretical knowledge essential to developing effective creative writing, working towards publication. Students will begin to work more intensively in a workshop mode, which involves sharing the work developed through exercises and assignments with the group, to better understand how effectively their writing manages to engage with and communicate with an audience. The workshops will be overseen by a team experienced published writers and focus on the contexts of the contemporary publishing industry. subject material may include:

- Writing the personal;
- Writing about place;
- Making best use of techniques, including experimental techniques;
- Understanding the forms of writing and ways they can affect or speak to readers;
- Developing a specific understanding of your themes, and working out how to say what you want to say;
- Understanding voice and originality;
- Developing an ability to read works critically and apply these critiques to an understanding of how to write well;
- Reading, writing and re-writing for publication.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

COMM 1010 Creative Writing: The Imaginative Life

Credit Points 10

Legacy Code 102436

Coordinator Tegan Daylight ([https://directory.westernsydney.edu.au/search/name/Tegan Daylight/](https://directory.westernsydney.edu.au/search/name/Tegan%20Daylight/))

Description What is an imaginative life, and how do we bring it into the practice of creative writing? This is the first of two Level 1 foundation units in the Creative Writing Major, in which students can find the right place to begin their own writing journey. They will learn how storytelling in all its forms shapes our imaginative life, and begin to acquire practical skills to develop their writing. The unit involves two-hour workshops taught by experienced and widely published writers from the Writing and Society Research Centre and the school of HCA. No previous creative writing experience is necessary.

School Humanities & Comm Arts

Discipline Written Communication

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate and use key techniques of creative writing;
2. Write short creative works (or series of works) using a range of techniques, styles and/or forms;
3. Use drafting and editing processes to write more effective creative works;
4. Write and read critically about key creative writing concepts;
5. Recognise ways in which different cultural contexts can shape and influence creative writing.

Subject Content

Students will be introduced to a range of creative writing materials, concepts and techniques. These will be studied via examples of writing drawn from diverse cultural and historical contexts. They will be put into practice by students via a series of guided writing exercises overseen by experienced creative writing practitioners and critics.

1. Writing as a mode of imaginative thinking and creative response;
2. How to get started as a writer and how to keep going;
3. Applying storytelling as a mode of 'knowing' the world;
4. Key tools of effective creative writing - including sentences, description, plot and form, scene construction, point of view, drama and dialogue (where appropriate);
5. Developing a more effective approach to creative writing - including using drafting and editing processes to write more effectively and sharing work with others;

6. Exploring links between reading and writing, critical thinking and writing practice;
7. Key debates in contemporary creative writing and literary practice, including in the critical literature.

COMM 1011 Data, Mediation and Power (WSTC)

Credit Points 10

Legacy Code 700269

Coordinator Chantal Rozairo ([https://directory.westernsydney.edu.au/search/name/Chantal Rozairo/](https://directory.westernsydney.edu.au/search/name/Chantal%20Rozairo/))

Description Data, Mediation and Power investigates the operation of power in contemporary digital media cultures and economy. The unit examines the primary role played by data in determining how we live in the world. This includes how we interact with the world, its people and digital artefacts, in terms of communication and meaning. The unit focuses on technologies of control and governance related to algorithmic architectures and data economies. Who benefits from data and mediation and what are the limits and possibilities of data? Ultimately, this kind of critical analysis invites us to think about what constitutes a just, democratic society and what constitutes an ethical media life.

School Humanities & Comm Arts

Discipline Communication And Media Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Co-requisite(s) Students enrolled in the combined Diploma/Bachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year Two units

Equivalent Subjects COMM 1023 - Mediated Mobilities COMM 1012 - Data Mediation and Power

Restrictions Students must be enrolled at Western Sydney University, The College. Students enrolled in extended diplomas must pass 40 credit points from the preparatory subjects listed in the program structure prior to enrolling in this University level subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify how data both mediates and governs society and daily life in ways often connected to commercial interests.
2. Understand the ways in which data informs the production of meaning (eg assessment of performance, analysis of texts, policy making informed by demographic modelling).
3. Develop a critical capacity with regard to the limits and possibilities of data and its relation to the operation of power.

Subject Content

1. Identify and critique the key features of network cultures, including an historical overview of the miniaturisation of technology.
2. Examination of cultural contexts and mobile media and assessment of the interrelation between mobile media, privacy and public culture.
3. Overview of policy and the impact upon the availability of mobile media commodities and access to content (eg the rise of 'national webs'?).
4. Assessment of the impact of network cultures as emergent institutional forms that challenge more traditional, modern institutional forms (state, firm, union, university).
5. Critical investigation of concepts of freedom and the extent to which mobile media facilitate and/or restrict forms of social and cultural mobility.
6. Identification of the limits of mobility, media and geo-cultural settings.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

COMM 1015 Foundations of Media Arts and Production

Credit Points 10

Legacy Code 101927

Coordinator Maryella Hatfield ([https://directory.westernsydney.edu.au/search/name/Maryella Hatfield/](https://directory.westernsydney.edu.au/search/name/Maryella%20Hatfield/))

Description In 2021, this unit replaced by unit 102825 - Introduction to Screen Media. This unit explores creative and independent media arts practices across moving image, audio and participatory forms, and introduces students to fundamental principles of sound and screen production. The unit maps theoretical and practical connections between the creation and study of images and sound across media formats through an integrated theory/practice programme focused on the processes through which media artefacts are created. Students learn how to analyse and critically evaluate screen media and also to plan and make simple short works of their own. It introduces students to relevant media arts histories and contexts (with a focus on cinema)

in addition to a range of technologies, media practices and production techniques.

School Humanities & Comm Arts

Discipline Communication And Media Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects LGYB 0161 - Image Sound Text COMM 1028 - Screen Media COMM 1039 - Introduction to Screen Media COMM 1016 - Foundations of Media Arts and Production (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an awareness of the processes and practices of screen media arts production and the interdisciplinary and multi-platform nature of screen media arts production
2. Apply creative strategies and technical skills of screen media production in an environment that link them to theories and histories of screen media
3. Demonstrate an ability to critically review a screen media work
4. Make a simple screen media work in small groups work using accessible mobile and online tools
5. Adequately assess the risk involved in professional production projects.

Subject Content

- Visual language and Creative camera coverage. this Topic will introduce mise-en-scene: how A scene is staged for The camera. It will include explorations into camera angles, shot sizes, camera movement, focus, depth of field, speed, lighting, colour, subjective and objective camera, composition and production design. students will learn how to Create storyboards and Create shot lists.

- editing in screen media Production. this Topic will explore The role of editing in screen media Production. It will analyse The strategies of editing from The Two Schools of editing: Continuity editing and Montage.

- sound in screen media Production. this Topic will explore The relationship between sound and screen media. It would explore how sound is recorded and mixed. It will analyse different components of sound in screen media such as atmospheric sounds and music.

- screen media narrative structure, genres and diverse production models. this Topic will explore A range of contexts for screen narrative structure, genres and production Models, comparing and contrasting Hollywood Models with World cinema movements and examples. It will reference how screen media has been critically analysed via theory & post-theory approaches.

- introduction to Documentary. this Topic will introduce The history and diverse contexts of Documentary film and television Production. It will consider online, interactive and transmedia Models in Documentary and non-fiction screen media. It will consider production case studies and The processes of developing A Project from concept through stages of production to finished work.

- Australian screen media: history and industry frameworks. this Topic will introduce Australian screen history and provide An introduction to Australian film & television industry frameworks. It will explore The short film form and its significant role within screen production history more generally as well as its role in The career development of key Australian film-makers.

- Innovative storytelling for the screen, past present and future.

This topic will explore a range of forms including animation; history, contexts, diverse origins and subject matter. It will explore larger themes such as the political image through innov

COMM 1021 Media Cultures and Industries (WSTC)

Credit Points 10

Legacy Code 700180

Coordinator Chantal Rozairo ([https://directory.westernsydney.edu.au/search/name/Chantal Rozairo/](https://directory.westernsydney.edu.au/search/name/Chantal%20Rozairo/))

Description This subject introduces students to the concept of media in terms of how it has changed, how it works and its impact on our lives and society. It builds the necessary foundation for further theoretical and practical study and understanding of the media in future years. Its approach brings practice-based research together with experiential learning and theoretical reflection. At the conclusion of

this unit students will be able to demonstrate a fundamental critical understanding of the media. In addition, students will have developed their digital literacy through the creation of digital creative works.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects COMM 1020 - Media Cultures and Industries
COMM 1002 - Approaches to Communication
COMM 1003 - Approaches to Communication (WSTC)

Restrictions

Students must be enrolled at Western Sydney University, The College. Students enrolled in Extended Diplomas must pass 40 credit points from the preparatory subjects listed in the program structure prior to enrolling in this University level subject.

Students enrolled in Integrated programs must have passed or be enrolled in the preparatory subjects listed in the program structure prior to enrolling in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain what media is, using examples and academic ideas
2. Make arguments about the impact of media on life
3. Demonstrate media literacy through the creation of their own media content

Subject Content

1. Content that defines the media, in terms of its historical development/evolution.
2. Intellectual arguments about the impact of media on life (in terms, for example, of race, gender and industry).
3. Content that develops foundational digital media literacy skills (applications include the production of mobile video, photography and online content).
4. Content that teaches and demonstrates critical reflection skills.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Short Answer	1000 words (total)	35	N	Individual
Professional Task	1200 words	40	N	Individual
Peer Review	800 words	25	N	Individual

COMM 1036 Introduction to the Creative Industries

Credit Points 10

Legacy Code 102836

Coordinator Rachel Morley ([https://directory.westernsydney.edu.au/search/name/Rachel Morley/](https://directory.westernsydney.edu.au/search/name/Rachel%20Morley/))

Description Careers in the Creative Industries are on the rise. They're innovation-led, mobile, global and adaptable. In the short-term success can be a matter of luck but a long-term career requires tactics, talent, and savvy business acumen. In this hands-on unit we'll introduce you to some of the key opportunities in the Creative Industries in fields as diverse as Communication, Media, Music, Design, Writing and associated aspects of Intellectual Property Law and Entrepreneurship. We'll look at the Creative Industries from historical and contemporary perspectives, and hear from industry contributors working in the field right now. You'll be introduced to 'future of work' skillsets, including entrepreneurship, leadership, collaboration and communication capabilities, and you'll learn how to situate your own creative knowledge within them. Available to students from all disciplines, this unit will suit you if you're passionate about taking your creative career to the next level.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

COMM 1037 Digital Narrative

Credit Points 10

Legacy Code 102827

Coordinator Wendy Chandler ([https://directory.westernsydney.edu.au/search/name/Wendy Chandler/](https://directory.westernsydney.edu.au/search/name/Wendy%20Chandler/))

Description Effective storytelling is at the heart of engaging content. In this unit, you'll learn the basic principles of fictional, narrative storytelling used in screen media. Following on from Screen Media Fundamentals, you'll learn more advanced principles of screen media production, including genre, visual storytelling, camera coverage, lighting, visual style, editing, sound design and performance. You'll also develop an awareness of key narrative concepts such as narrative form, structure, conflict and basic scriptwriting techniques. You'll plan and create a short narrative screen media work, which will demonstrate your enhanced storytelling and production skills.

School Humanities & Comm Arts

Discipline Audio Visual Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Pre-requisite(s) COMM 1041

Incompatible Subjects COMM 2036 - Screen and Sound Practices 2

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Express the key concepts of fictional, narrative storytelling.
2. Establish a sound understanding of the aesthetics and narrative strategies of the short film format.
3. Write a compelling short fiction script in a standard industry format.
4. Showcase effective knowledge and technical skills in camera, sound recording, editing and sound design.
5. Identify the key crew roles in producing a short film: Director, Producer, Cinematographer, Sound Designer, Production Designer, Editor, Writer.

6. Plan and produce a short screen media work.
7. Integrate theoretical and practical knowledge in the analysis and content creation and reflective creative practice.
8. Assess the risk involved in professional production projects.

Subject Content

Concepts and practices in fictional narrative storytelling.
 Scriptwriting techniques and conventions.
 Advanced production techniques in camera, lighting, editing and sound design.
 Directing camera coverage and performance.
 Short narrative screen media production.
 Online content production and publishing.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	5 multiple choice quizzes (10 questions per quiz)	10	N	Individual
Proposal	1,500 words equivalent	30	N	Individual
Applied Project	Less than 2 minutes	40	N	Individual
Reflection	500 words or equivalent.	20	N	Individual

COMM 1043 Communication in Health (UG Cert)

Credit Points 10

Legacy Code 500055

Coordinator Maria Dent ([https://directory.westernsydney.edu.au/search/name/Maria Dent/](https://directory.westernsydney.edu.au/search/name/Maria%20Dent/))

Description Communication is integral to professional relationships, whether working individually with a client, educating community members on health matters, or working with other professionals as

part of a multidisciplinary team. This unit aims to develop written and verbal communication skills in preparation for work within the health professions across these areas. Communication skills will include those needed to form therapeutic relationships with individual clients and groups, as well as those required to communicate health information to clients, groups and the wider community. Students will develop skills to establish appropriate working relationships with professional colleagues.

Discipline Verbal Communication

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects LGYA 7034 Communication for the Helping Professions COMM 1008 Communication in Health COMM 1007 Communication in Health

Restrictions Students need to be enrolled in one of the following programs: 7171 Undergraduate Certificate in Public Health Support, 7172 Undergraduate Certificate in Health Services Management, 7173 Undergraduate Certificate in Aged Care Support, 7176 Undergraduate Certificate in Disability Care Support

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse and evaluate the characteristics of health professional relationships with clients, colleagues, and the wider community.
2. Reflect on the impact of personal attitudes, beliefs and values on communication.
3. Apply essential verbal and written communication skills in the interaction with individual clients, patients, significant others, colleagues and other health stakeholders.
4. Analyse and apply strategies to adapt communication processes to meet the varying health literacy or special needs of clients, family and significant others.
5. Employ teamwork skills relevant to working in health care settings.

Subject Content

1. Theoretical frameworks and processes in effective communication
2. Skills for effective communication with clients, colleagues and the community
3. Self-awareness in professional communication
4. The nature of effective helping as a health care professional
5. Communicating in teams
6. Working with people who have different communication needs
7. Professional written and presentation communication skills.

Assessment

COMM 2001 Account and Client Management

Credit Points 10

Legacy Code 101941

Coordinator Kristen Marshall ([https://directory.westernsydney.edu.au/search/name/Kristen Marshall/](https://directory.westernsydney.edu.au/search/name/Kristen%20Marshall/))

Description Effectively managing a client or an 'account' requires a special combination of skills. In this subject, you'll learn the basic principles of account management and how to nurture and foster an environment of trust, respect and partnership. Working on an applied project, you'll explore best practice in 'hard skills': understanding clients' objectives, developing a strategy, managing a project, preparing and holding effective meetings, writing WIPs (work in progress) and contact reports, and working toward specific financial/success metrics. Just as important to your success in client-facing roles are 'soft skills'. You'll learn how to be more proactive, overcome procrastination, manage 'challenging' personalities, develop a network, adapt to cross-

cultural differences, and present well. Both hard and soft skills are critical to the success of your project, your role as client liaison, and importantly, your career.

School Humanities & Comm Arts

Discipline Communication And Media Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) -

Equivalent Subjects COMM 2044 - Writing for the Professions

Restrictions

Successful completion of 80 credit points in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse and discuss liaison strategies and collaborative approaches taken with key stakeholders.
2. Articulate the impact of their role and actions on clients' financial returns.
3. Demonstrate flexibility, empathy and adaptability in a rapidly evolving work environment.
4. Apply the blend of skills and knowledge necessary to effectively manage client-based projects.

Subject Content

Through a weekly lecture and tutorial, students will become familiar with issues and approaches in client liaison, and different approaches to optimizing outcomes. Tutorials are largely concerned with role play, critical evaluations, and classroom discussion. The following are explored:

1. Proactive management of clients and other stakeholders
2. Understanding clients' business objectives, and the marketplace
3. Success metrics
4. Client presentations/meetings
5. Best practice communication with different stakeholder groups
6. Strategies in optimising relationships
7. Financial implications of actions

Assessment

COMM 2009 Cinema and Censorship

Credit Points 10

Legacy Code 102192

Coordinator Alex Ling ([https://directory.westernsydney.edu.au/search/name/Alex Ling/](https://directory.westernsydney.edu.au/search/name/Alex%20Ling/))

Description Censorship of the arts has long been a contentious issue. This unit examines the cultural contexts and debates surrounding censorship, as well as the institutions, policies, and people that figure prominently in the history of cinema censorship. Censorship discourses reveal shifts in how 'national morality' is constructed, and often display cultural anxieties about changing meanings of gender, sexuality, race, and class. This unit offers an historical survey of film censorship from the 1890s to today, utilising various theoretical approaches (feminist theory, critical race theory, queer theory, and cultural theory), with an emphasis on topics such as obscenity, pornography, violence, and blasphemy.

School Humanities & Comm Arts

Discipline Audio Visual Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the historical, cultural and theoretical context of censorship as well as its purpose and function;
2. Appreciate changes and developments in censorship throughout the history of cinema;
3. Demonstrate skills in research and critical reading in the fields of cinema studies and visual culture more broadly;
4. Analyse and critically evaluate a range of texts important to the study of film and culture.

Subject Content

Module 1: Hollywood and the Motion Picture Production Code

Specific topics may include:

- Pre-code Hollywood cinema;
- Joseph Breen and the Motion Picture Production Code;
- From the MPPC to the MPAA;
- cinema and The culture Wars.

Module 2: Censorship in Australia

- History of the Australian Classificatory Board;
- Government v. Industry-regulated censorship;
- Refused Classification (RC) films;
- indigenous cinema and censorship.

Module 3: The Global Context

- Specific topics may include:
- Queer and alternative cinemas;
- The BBFC and the 'Video Nasty' debate;
- Political censorship in Indian cinema;
- Religious censorship in Iranian cinema;
- film Festival and Torrent culture.

Prescribed Texts

- A Subject Reader prepared by the subject coordinator. Further reading resources will be made available on vUWS.

Teaching Periods

COMM 2011 Communication Strategies

Credit Points 10

Legacy Code 102056

Coordinator Kristen Marshall ([https://directory.westernsydney.edu.au/search/name/Kristen Marshall/](https://directory.westernsydney.edu.au/search/name/Kristen%20Marshall/))

Description Communication Strategies is a dynamic practice-oriented unit designed to teach students how to interrogate and analyse real clients' products/services, issues and opportunities, markets and audiences, in order to develop effective communication strategies. Through discussion topics and project-based work, students will learn how to design and implement a holistic communications strategy that is relevant for a particular client.

School Humanities & Comm Arts

Discipline Communication And Media Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects MKTG 2009 - Public Relations Tactics COMM 2007 - Advertising Strategy LGYA 1172 - Public Relations Strategy

Restrictions Successful completion of 80 credit points at Level 1.

Assumed Knowledge

Knowledge gained from Year 1 introductory subjects in Public Relations (PR) or Advertising, competent literacy skills, basic computer skills.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the importance of strategy in successful communications, and the range of approaches and methodologies used in campaigns
2. Undertake relevant research to develop and leverage strategies for campaigns
3. Consolidate research findings into a strategic presentation and document
4. Develop a brief/pitch with potential to inspire successful campaigns
5. Outline characteristics of a range of mediums and be able to identify relevant alternative communication strategies
6. Establish criteria for evaluation of campaigns.

Subject Content

Through a weekly lecture and tutorial, students will become familiar with principles behind communication strategies and different approaches to developing such strategies.

- strategic planning
- strategy and tactics
- strategic use of research
- media and message strategies
- Integrating evaluation into The strategic plan

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	15 multiple choice questions x 5	30	N	Individual
Report	10 minutes summary and 1,000 word presentation	40	N	Group
Case Study	1,000 words	30	N	Individual

COMM 2014 Editing and Publishing

Credit Points 10

Legacy Code 102435

Coordinator Felicity Castagna ([https://directory.westernsydney.edu.au/search/name/Felicity Castagna/](https://directory.westernsydney.edu.au/search/name/Felicity%20Castagna/))

Description What makes a good editor? How do editing and publishing work in Australia and the wider market? This unit provides an introduction to basic skills required when editing texts for publication, and a survey of key issues confronting literary publishing in Australia. Skills in editing and an understanding of Australian publishing are valuable assets for students of creative writing. They are also relevant to industry-based work in a range of related fields such as advertising, public relations and journalism. This unit will focus on three areas: the practice of editing, modes of publishing, and the economics of writing and publishing.

School Humanities & Comm Arts

Discipline Written Communication

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Assumed Knowledge

Students will be expected to have undergraduate first year level reading and writing skills.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply key concepts and techniques of editing for publication? such as using drafting and editing to improve the quality of written works;

2. Understand the roles and responsibilities of the literary editor;
3. Compare and analyse different modes, genres and processes of publication;
4. Develop a critical understanding of the economics of writing and publishing, and how these operate in diverse reading environments;
5. Recognise and understand changing relationships between authors, publishers and readers;
6. Recognise ways in which different cultural contexts can shape and influence the publishing process.

Subject Content

1. An overview of Australian literary publishing
2. Literary trends, issues and controversies
3. The writer as change maker and literary activist
4. Introduction to three kinds of publishing – commercial, literary and digital
5. The writer and popular culture
6. Economics of writing and publishing
7. The writer in the age of social media
8. Some examples of the relationship between writer and publisher
9. The role of literary magazines, festivals and collectives

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical: Editing Task	500 words	20	N	Individual
Essay	1,000 words	30	N	Individual
End-of-session exam: Take home exam	1,500 words (2 x 750 word short answers)	50	N	Individual

COMM 2015 Events Management

Credit Points 10

Legacy Code 101940

Coordinator Nicole Bridges ([https://directory.westernsydney.edu.au/search/name/Nicole Bridges/](https://directory.westernsydney.edu.au/search/name/Nicole%20Bridges/))

Description This unit introduces understandings about events as forms of public relations typologies and promotional models. These include strategic public relations and management processes, researching the event promotion environment, infrastructure, organisational and event promotion processes and funding. Students will analyse behaviours of event publics, audiences and participants, matching event opportunities with publics, and conceptualising events as service experiences. Students will develop strategies for developing event partnerships, funding and sponsorship relationships. These include managing the development of the event setting/venue, programming and personnel affecting the on-site event experience, and developing appropriate merchandising strategies for events.

School Humanities & Comm Arts

Discipline Communication And Media Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) MKTG 1009

Equivalent Subjects COMM 3017 - Events Management

Assumed Knowledge

Basic knowledge of public relations theory and current public relations practice.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of events management terminology, definitions and models;
2. Articulate the diversity and significance of the role of events within host organisations and communities and major publics;
3. Demonstrate an understanding of and measure market demand and event experiences;
4. Promote an event to the media via the appropriate public relations tactics;
5. Implement planning processes for an event plan and management design;
6. Demonstrate an understanding of financial, resource and market sector aspects of events planning;
7. Present an event plan and management proposal using effective teamwork skills.

Subject Content

- Defining events, event typologies and event promotional Models in The public relations context
- strategic public relations & management processes for events. identifying and developing events as public relations mediums & as resident and tourist directed experiences.
- research needs of events. Researching The event promotion environment, infrastructure, organisational and event promotion processes, funding
- Analysing The behaviour of event publics, audiences & participants. Matching event opportunities with publics.
- Conceptualising, developing and attracting events as service experiences.
- event partnerships and sponsorships: strategies for identifying, securing and managing sponsor relationships
- managing The development of The event setting/venue, programming & personnel affecting The on-site event experience
- Merchandising strategies for events.
- sources of revenue and event budgeting, pricing, ticketing systems. Operational Issues of significance to events promoters and managers

Assessment

COMM 2016 Experimental Writing and Electronic Publication

Credit Points 10

Legacy Code 100584

Coordinator Anna Gibbs ([https://directory.westernsydney.edu.au/search/name/Anna Gibbs/](https://directory.westernsydney.edu.au/search/name/Anna%20Gibbs/))

Description Experimental Writing and Electronic Publication is a practical and experiential exploration of modernist writing practices. Students will be introduced to a range of innovative writing techniques designed to stimulate creative thinking and assist in the development of a regular writing practice. Areas of study include: exploration of pre-writing processes; experimental writing genres; power of language; evaluative process; and the development of individual and collaborative techniques for planning and executing writing projects. A primary component of this unit includes working on writing exercises both at home and in class. These exercises will be used to develop the end-of-unit major project.

School Humanities & Comm Arts

Discipline Written Communication

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Outline the history of modernist experimental writing and its relevance to contemporary writing practices
2. Analyse some key texts in the history of experimental writing practices
3. Employ strategies and techniques for overcoming 'writer's block'
4. Develop a major writing project based on class exercises
5. Display skills in writing and editing

Subject Content

Writing, games and play

Writing as process

Writing from dreams

Collage techniques

Writing structures

Experimenting with genre and form: history, poetry, auto/biography and hybrid genres

DIY publication

Digital writing

COMM 2017 Feature Writing

Credit Points 10

Legacy Code 102061

Coordinator Asha Chand ([https://directory.westernsydney.edu.au/search/name/Asha Chand/](https://directory.westernsydney.edu.au/search/name/Asha%20Chand/))

Description This subject takes students beyond event and reactionary reporting towards an understanding of the proactive process of exploration, interpretation and exposure in journalism. Students learn how to find, filter and file information in a dynamic and constantly changing environment. Given a lot more time to explore issues, students learn to add value to information while keeping the story current, to deadline and in the public sphere, while negotiating with the media industry to get their stories out into the public sphere. Students are encouraged to develop their unique writing styles while also focusing on social issues such as trauma, violence, mental health and wellbeing.

School Humanities & Comm Arts

Discipline Journalism

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) COMM 1018

Equivalent Subjects LGYA 0585 - Journalism Feature Writing COMM 2023 - Magazine Journalism

Assumed Knowledge

News sense. An interest in telling a story. Basic journalism writing skills and keenness to develop an interest in social issues. Broad understanding of the role of journalism in society. Basic computer skills.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Generate original story ideas suitable for developing into feature stories
2. Undertake newsgathering, research, writing and editing applicable to feature stories
3. Apply interviewing and writing skills appropriate to the generation of feature-length stories.
4. Analyse writing feature stories and the mediums for publication.
5. Adapt writing to various styles while writing tight to deadline.
6. Target a specific audience/publication.

7. Market stories to different publications/audiences as this will add value to student learning
8. Apply teamwork skills through the editing process.

Subject Content

1. Looking behind the scenes of issues and events to formulate feature stories
2. Understanding the interview process a principal tool of journalism research and writing;
3. Ways of adding value to a story such as Computer Assisted Reporting (CAR), use of databases, documents and other secondary sources/writing styles
4. The development of a feature article targeting a specific audience/publication.
5. Editing and critically analysing news in circulation to advance understanding of audience needs
6. Tailoring writing to specific markets to help hone skills (such as marketing your idea/story, revamping the structure) required in a professional setting
7. Reflecting on the processes to build the foundation to an appreciation of the many responsibilities of journalism as a profession.
8. Submitting work for journalism competition to gauge opportunities outside the publishing arena.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Professional Task	1,000 - 1,200 Words	35	N	Individual

COMM 2019 Interactive Design: Games

Credit Points 10

Legacy Code 102272

Coordinator Sarah Waterson ([https://directory.westernsydney.edu.au/search/name/Sarah Waterson/](https://directory.westernsydney.edu.au/search/name/Sarah%20Waterson/))

Description This unit focuses on game design from an interactive design perspective. Approaches utilising current digital technologies for advanced interactive design are explored. Students will design and produce simple games for mobile and/or desktop delivery. The focus of the unit is about the communication and experience design, rather than technical implementation. Interactive game design examples are examined from the context of shifting production languages, convergent technologies and the design professional contexts. This unit includes game development concepts, platforms, goals and genres, player elements, simple story and character development, gameplay, levels, interface, and the game development process. Students will play games, analyse them, and complete a game design with appropriate documentation.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects COMM 2018 - Interactive Design II

Assumed Knowledge

Computer literacy including working in a networked environment on a Macintosh computer; management, transportation and storage of digital information and digital production processes such as scanning, pdf production and file storage. Skills in design principles: layout, colour and typography. Literacy with image manipulation software - e.g. Photoshop.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of significant aspects of interactive design practice by producing a design document for an interactive game.
2. Define and implement strategies and research methodologies for producing interactive games within the project work.
3. Apply an appropriate balance of design, testing, critical reflection and refinement of strategy for interactive design through the production of a simple game.
4. Critique and evaluate game design to promote effective communication, interactivity, and user experiences through the

precedent appraisals within the design document, and the final presentation.

5. Identify and control relevant media and techniques (including digital technologies and other media and technologies relevant to the documentation of objectives, user needs and strategy) to the production of an interactive screen-based game.

Subject Content

- interaction design approaches and processes for simple games: planning, user- testing, evaluation, and Revision
- Game genres, goals and player elements
- Basic Gameplay, including: Rules of play, Game theory and challenges
- Basic character and story design for games
- Game development processes
- production processes for designing, developing and delivering interactive media
- interface, level and navigational design for games
- Lynda.com tutorials as appropriate

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Portfolio	1,200 words and design work	20	N	Individual

COMM 2020 Introduction to Film Studies

Credit Points 10

Legacy Code 100964

Coordinator Alex Ling ([https://directory.westernsydney.edu.au/search/name/Alex Ling/](https://directory.westernsydney.edu.au/search/name/Alex%20Ling/))

Description The unit will introduce students to the key theoretical strands of film studies and key concepts in the analysis of film. The unit will explore techniques of narrative, performance, genre, realism and spectatorship, as well as introducing methods to analyse the use

of editing, cinematography and sound. A case study of a key historical film movement or genre will introduce students to the study of cinema in its cultural contexts. The unit will also address the transformations in screen cultures as a result of digital technologies and new media.

School Humanities & Comm Arts

Discipline Audio Visual Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Restrictions

Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. explain key theoretical concepts in film studies
2. apply key concepts to an active viewing and analysis of film and video
3. demonstrate skills necessary for research and writing on cinema
4. show knowledge of at least one film movement and genre
5. think critically about the screen cultures they encounter in everyday life.

Subject Content

- key concepts in film theory: montage, mise en scene, style, genre, sound, performance, representation, narrative.
- key theoretical strands of screen studies.
- A major film movement or genre.
- Transformations in screen cultures as result of digital technologies and new media.

Assessment

COMM 2024 Media Law and Ethics

Credit Points 10

Legacy Code 101928

Coordinator Roger Dawkins ([https://directory.westernsydney.edu.au/search/name/Roger Dawkins/](https://directory.westernsydney.edu.au/search/name/Roger%20Dawkins/))

Description Media Law and Ethics focuses on the media and communication industries of public relations, journalism, advertising and media production, and examines issues including: the legal framework in which these creative communication industries operate, the role of ethics in decision-making in these industries, and the impact of regulation. It considers these issues in relation to their historical and philosophical contexts, and in terms of the contemporary

context of digital networked media. This unit provides a foundation for professional practice in the Communication and Creative Industries key programs.

School Humanities & Comm Arts

Discipline Journalism

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects COMM 2010 - Communication Law and Ethics

Restrictions Successful completion of 60 credit points at Level 1 in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

- apply a thorough understanding of the legal framework in which the communication industries operate and the ethical context of decision-making in the media professions
- explain the Australian legal system as it specifically relates to the key fields of professional communication practice
- articulate historical and philosophical contexts to contemporary practices involving ethical judgments and decision-making
- explain the impact of regulatory procedures upon the range of communication practice, and industry-specific solutions to legal and ethical concerns within media contexts
- apply key research skills to legal and ethical issues in a media context

Subject Content

Defamation, contempt and privacy laws

Fairness in research and reporting, including developing an awareness of anti-discrimination laws and other media guidelines as they apply to minority and/or vulnerable groups such as children and indigenous people

An overview of free speech issues, including the Freedom of Information Act

Understanding creators' rights, including copyright laws as they apply to the media professions

Contextualising journalism, advertising, public relations and media production pressures in contemporaneous terms

The legal framework for electronic communication such as the internet and email

Issues in the regulation and control of print, broadcast and electronic media

The professional codes of ethics that apply in all fields of communication practice

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	30 minutes	10	N	Individual
Case Study	Open book for one week: 1,000 words	30	N	Individual
Professional Task	600 words	20	N	Individual

Essay	1500 research paper worth 40%	40	N	Individual
-------	--	----	---	------------

COMM 2026 New Media Contexts (WSTC)

Credit Points 10

Legacy Code 700084

Coordinator Peta Downes ([https://directory.westernsydney.edu.au/search/name/Peta Downes/](https://directory.westernsydney.edu.au/search/name/Peta%20Downes/))

Description The convergences and diversifications in the communications media industries of the past two decades have completely altered the environment within which they operate for producers and consumers alike. Issues about digitalisation, convergence, globalisation, the network society and communications media governance require a complete reconceptualisation of the media in order to be able to understand the impact of these changes upon professional practices and consumer habits. This unit will introduce students to international perspectives on issues in the new media

contexts, and an appreciation of some of the social and cultural implications.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects COMM 2025 - New Media Contexts

Restrictions Students must be enrolled at Western Sydney University, The College in 7021 Associate Degree in Creative Industries

Assumed Knowledge

A basic knowledge of media and communications studies.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. After successful completion of this Unit, students will be able to:
2. identify, analyse and contextualise broad patterns of change in communications media;
3. analyse specific new media developments in public, commercial and community communications and media organizations;
4. examine and report on changes in consumer uses of media;
5. apply critical, reflective, and creative skills to make informed decisions in professional or applied communications contexts;
6. identify practices in media that will enhance their careers in the communications and media industries;
7. integrate theoretical and practical knowledge of the media and communications industries to analyse and solve problems;
8. demonstrate proficiency in a range of communication skills, social interaction, information research and assembly to solve problems, and skills in using technologies.

Subject Content

This subject will explore:

The meanings and implications of the ?new?f in the context of the established and newer media and the emerging globally networked media environment.

Tracking theoretical debates concerning the emerging role of new media industries within more traditional media market structures, and the policy implications of these.

Examination of the patterns of new media developments and operations and the influence on/in the broader social and cultural contexts.

Mediatization and social change.

The political economy of the media and its relation to globalisation.

Content modules will relate to case studies of changes in particular forms and practices in television, film and video, radio, music and the Internet, and mobile wireless communications.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Tutorial Presentation	7-8 minutes	25	N	Individual

New Media Review	750 words	30	N	Individual
Investigative Report	2000 words	45	N	Individual

Teaching Periods

COMM 2027 News Reporting

Credit Points 10

Legacy Code 102062

Coordinator Margot Dunphy ([https://directory.westernsydney.edu.au/search/name/Margot Dunphy/](https://directory.westernsydney.edu.au/search/name/Margot%20Dunphy/))

Description This unit introduces students to news gathering, research, story construction and news writing for delivery over a variety of platforms, from print-based to online, broadcast and social media. It gives students foundation skills which they can then apply in the subsequent electronic and feature units.

School Humanities & Comm Arts

Discipline Journalism

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) COMM 1018

Equivalent Subjects LGYB 0129 - Online Journalism COMM 2028 - News Reporting for Convergent Media

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Find and select appropriate issues and events for production as news stories for multi-platform delivery.
2. Select interviewees and conduct interviews.
3. Explain how to value add to stories with additional story elements
4. Explain how different delivery platforms, including social media, use different news gathering and production techniques.
5. Critically assess ethical and other issues in print and online-delivered journalism.
6. Explain the changes taking place in news media as a result of media convergence.
7. Apply general knowledge and knowledge of current events appropriate for conduct of basic journalistic tasks
8. Adequately assess the risk involved in professional production projects.

Subject Content

Developing a news sense and gathering information for news.
Journalistic interviewing and research.
Presenting news in various formats with a focus on developing news writing style.
Creating social media platforms, including blogs and website to host news stories.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Professional Task	2 x news stories (300 words each) and mission statement (150 words)	30	N	Individual
Professional Task	600 words - News story and report on the issue	30	N	Individual
Professional Task	2 x news stories (500 words each) & revised Stage 1 stories	40	N	Individual

COMM 2029 Photo Journalism

Credit Points 10

Legacy Code 100953

Coordinator Enrico Scotece ([https://directory.westernsydney.edu.au/search/name/Enrico Scotece/](https://directory.westernsydney.edu.au/search/name/Enrico%20Scotece/))

Description Students studying this unit examine the function of photojournalism in the process of newsgathering and production and examine the relationship between images and text and their communicative potential. The unit involves a variety of approaches to photojournalism using monochrome and colour photography and location lighting for social documentary for ultimate use in a range of published forms.

School Humanities & Comm Arts

Discipline Journalism

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects LGYA 0636 - Photo Journalism

Restrictions Successful completion of 80 credit points at Level 1.

Assumed Knowledge

Students must have a sound understanding of photography principles, and experience in photography processes.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the communicative potential of the discrete photographic image
2. Explain the legal and ethical issues involved in the use of images of people and property
3. Demonstrate in folio format visual narrative forms as a sequence or series of images in a visual essay
4. Recognize and isolate the necessary key visual elements of a narrative to construct a photo that communicates clearly
5. Prepare photographic images in the context of photojournalism towards publication formatted as both screen and print folios
6. Explain the newsroom structure and processes for negotiation with writers
7. Apply proficiency in monochrome and colour photography, contemporary print and printing systems, basic studio, portable as well as available lighting and digital capture
8. Adequately assess the risk involved in professional production projects.

Subject Content

The construction of meaning through single and sequential images. The role of the image in telling the story, what makes a good news or feature picture.

The use of the photographic image -subjectivity of the photographer and editor.

Skills in analysis, composition and editing of photographic imagery. Understanding the role of the photojournalist within an editorial team.

Understanding concepts of constructing and following a brief. Legal issues (defamation, copyright, privacy) and ethical issues associated with documentary photographic imagery.

The function of research in story development.

The photojournalist as reporter, the feature & investigative story.

The DSLR camera lighting, monochrome and colour photography.

Exposure for and natural and artificial lighting conditions.

Digital capture to publication, file set up for use in print and on-line/ screen publication. File sizes and compression.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	20 Questions	20	N	Individual
Applied Project	20 Images + Synopsis	30	N	Individual

COMM 2032 Professional Writing and Editing

Credit Points 10

Legacy Code 101929

Coordinator Myra Gurney ([https://directory.westernsydney.edu.au/search/name/Myra Gurney/](https://directory.westernsydney.edu.au/search/name/Myra%20Gurney/))

Description Professional communicators require advanced writing and editing skills. This unit explores the nature of writing and preparation of texts for use across different media platforms and in various contexts. In particular, the unit develops skills in editing and re-purposing of writing, and further develops understanding of key writing tools such as voice, emphasis, tone, grammar and punctuation and Plain English for professional purposes. Through in-class workshops and time-restricted editing tasks, students will demonstrate a range of professional writing skills from corporate communications to advanced editing. Through in class presentations, discussions and short written tasks, students will demonstrate an applied understanding of conceptual and theoretical issues related to writing and editing for diverse audiences and applied to a range of current issues.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Level Undergraduate Level 2 subject

Equivalent Subjects LGYA 0221 - Convergence and New Media COMM 2012 - Convergence and New Media COMM 2025 - New Media Contexts COMM 2026 - New Media Contexts (UWSC)

Restrictions Successful completion of 80 credit points at Level 1.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply theories of writing
2. Re-purpose information for a variety of media platforms
3. Identify and remediate instances of faulty writing
4. Use voice, coherence, emphasis, concision and Plain English appropriately
5. Use basic English grammar and punctuation effectively
6. Edit texts for length, audience, medium and purpose
7. Use professional layout, design and visuals/charts to enhance readability and professional presentation.

Subject Content

- The Topics include theoretical Background on The processing and function of language for rhetorical purposes, The nature of audience and The Importance of layout and Visual composition to reading and interpreting text.

- It will also include The function of professional Communications, editing texts for multi-platform delivery, editing and re-purposing of writing and key professional writing tools such as voice, emphasis, tone, Grammar and punctuation and The style of plain English for professional purposes.

- The principles are then applied through A variety of in-class and other writing tasks designed to demonstrate An advanced Understanding of professional writing styles.

Assessment

COMM 2035 Screen and Sound Practices 1

Credit Points 10

Legacy Code 102406

Coordinator Vincent Tay ([https://directory.westernsydney.edu.au/search/name/Vincent Tay/](https://directory.westernsydney.edu.au/search/name/Vincent%20Tay/))

Description This unit introduces students to the principles of screen and sound media production with an emphasis on digital video, new media, and short film drama production. Students develop an awareness of screen language through critical reflection upon classic and contemporary cinemas as well as practical exercises. Through a series of specialised modules and workshops, students develop their knowledge and skills in media production including camera coverage, visual storytelling, genre, narrative, montage, and sound design and editing. The unit is complemented by technical training in camera, sound and editing software.

School Humanities & Comm Arts

Discipline Communication And Media Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects COMM 2034 Screen and Sound Practices

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an in-depth knowledge of key media concepts, histories and practices, and their relevance within both Australian screen media industries and in an international context.
2. Examine the multiple ways in which screen media arts are connected with other related fields (design, visual arts, cultural studies and humanities).

3. Critique the short film form: aesthetics, production, narrative, and exhibition, and apply new directions and new technologies in short film production.
4. Demonstrate effective technical skills in camera and sound recording.
5. Differentiate among the key crew roles in producing a short film: Director, Producer, Cinematographer, Sound Designer, Production Designer, Editor, Writer.
6. Demonstrate knowledge of key aspects of Australian and international industries, festivals and markets to prepare students for professional careers in film and media across television, cinema, independent video, and new media.
7. Integrate theoretical and practical knowledge in the analysis and content creation of screen media applying critical, reflective, and creative skills.
8. Adequately assess the risk involved in professional production projects.

Subject Content

- concepts, techniques and practices in screen media production and Creative content production
- Australian screen industries
- short film development in non-fiction and fiction genres

Assessment

Coordinator Helen Koukoutsis ([https://directory.westernsydney.edu.au/search/name/Helen Koukoutsis/](https://directory.westernsydney.edu.au/search/name/Helen%20Koukoutsis/))

Description In this unit students explore, critically examine, and write in a range of fictional and essay forms. They critique a wide variety of published fiction in order to enhance their understanding of approaches, possibilities, and techniques, thereby developing a greater capacity to write and critically evaluate their own work. Students create their own fiction in the form of written exercises and assignments, which they will have the opportunity to workshop and present to peers in a supportive and constructive critical environment.

School Humanities & Comm Arts

Discipline Written Communication

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects LGYB 6562 - Creative Writing LGYB 4536 - Writing Fiction

Restrictions Successful completion of 40 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Compose a range of short and long critical and fictional pieces using numerous techniques explored in class.
2. Critically examine published texts in order to develop an awareness of the approaches and techniques employed in the writing of fiction.
3. Present to peers originally composed manuscripts of fiction for constructive feedback.
4. Evaluate a range of peers' fictional compositions through guided marking criteria and feedback.
5. Write and speak clearly and effectively.

Subject Content

1. The critiquing of published texts in order to examine the various approaches and techniques deployed in writing fiction.
2. The use of written exercises in order to give students practical experience of creating fiction using numerous techniques examined in class.

3. The setting of critical and creative assignments that give students the opportunity to demonstrate their awareness, understanding and practical mastery of these techniques and approaches.

4. The use of workshops to develop students' writing and awareness of the drafting process, as well as the implementation of blind peer-review of students' original compositions in a supportive environment.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

COMM 2047 Pitch: Podcasting Essentials

Credit Points 10

Legacy Code 102697

Coordinator Roger Dawkins ([https://directory.westernsydney.edu.au/search/name/Roger Dawkins/](https://directory.westernsydney.edu.au/search/name/Roger%20Dawkins/))

Description This unit will teach students the fundamentals of podcasting, giving them the expertise needed to produce their own podcast feature. Working with academics and industry experts students will learn research and communication skills for finding, pitching and developing audio stories (backgrounding, writing, interviewing, presentation, critical review) and basic technical skills in sound and editing. This unit will show students how to get the most out of their software and hardware, and how to maximise their distribution channels to reach target audiences. Students will also learn how to recognise and evaluate key legal and ethical issues in research and recording content for publication. There is no need to know any of these things already, or have a story ready to tell; this unit is for all levels of experience and disciplinary backgrounds.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse and evaluate existing podcasts in order to identify key characteristics of the audio genre;
2. Apply research and communication skills for pitching and developing audio stories (backgrounding, writing, interviewing, presentation, reflection);
3. Recognise and evaluate the importance of key legal issues and the role of ethics in research and recording content for publication;
4. Demonstrate technical skills to record, edit and publish an audio feature;
5. Apply collaboration and team work skills.

Subject Content

This subject will be comprised of three topic areas.

Topic 1: Intro to podcasting and storytelling fundamentals

Students will learn the concepts of narrative storytelling; the components of a podcast; how to pitch story ideas; and how to write their own stories about their area(s) of interest.

Topic 2: Understanding audiences, the law and ethics

Students learn basic audience research techniques; relevant legal issues in the context of podcasting (copyright, defamation and privacy) and key ethical issues, including privacy and cultural appropriation.

Topic 3: Production

Students will learn how to record, edit and publish an audio feature, using personal recording devices and their own computers; basic voice presentation techniques; to engage in peer review of others' work.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

COMM 2048 Communicating for Sustainability

Credit Points 10

Legacy Code 102705

Coordinator Tanya Notley ([https://directory.westernsydney.edu.au/search/name/Tanya Notley/](https://directory.westernsydney.edu.au/search/name/Tanya%20Notley/))

Description This unit will enable you to become an environmental sustainability leader by building your capacity to be a confident and effective communicator. Environmental sustainability is vital to human wellbeing and planetary health. Effective communication is required to bring about transformation at individual, organisational and societal scales. In this unit you will participate in three modules focused on the key ingredients required for communicating sustainability: strategy, design and storytelling. Weekly learning pods developed by industry and academic leaders are designed to demonstrate what has worked well in practice, across business, government, community and not-for-profit sectors. Assessments provide you with an opportunity to implement the models, concepts and ideas you've learnt during the weekly learning content. This unit is recommended for all students, regardless of discipline.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points. Please note that this subject is recommended for all students, regardless of discipline.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse a sustainability need or problem in relation to the local context.
2. Create a communication strategy based on key insights.
3. Develop a clear sustainability narrative to guide communication and public engagement.
4. Design processes to effectively engage communities in strategies.
5. Present information, ideas and media clearly, convincingly and with confidence.

Subject Content

Module 1: Strategies for Communicating Sustainability

This module focuses on developing a communication strategy: how will your intervention create or contribute to change?

Module 2: Storytelling for Sustainable Futures

This module focuses on storytelling: whose voice is being centred? What kind of genre and format will be most effective for creating change?

Module 3: Designing Sustainable Initiatives

This module focuses on design processes and practices: how do you work collaboratively in an ethical way to design appropriate and effective sustainability-focused initiatives?

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Proposal and Presentation	750 - 1,000 words, plus 1 minute in class pitch	30	N	Individual
Applied Project	500 words with visual storyboard	30	N	Individual
Presentation (30%) and Report (10%)	5 - 10 minute presentation plus 750-1,000 words, plus visual documentation	40	N	Both (Individual & Group)

COMM 2050 Multiliteracies

Credit Points 10

Legacy Code 102739

Coordinator Di Dickenson ([https://directory.westernsydney.edu.au/search/name/Di Dickenson/](https://directory.westernsydney.edu.au/search/name/Di%20Dickenson/))

Description This unit develops students' skills, knowledge and competencies to address a wide range of literacies across multiple technologies, platforms and contexts, including the digital, written, visual, aural, spatial, gestural, and tactile dimensions of meaning production. In any society there are a range of literacies, and contexts in which those literacies might be deployed. Multiliteracies go beyond the traditional textual models of literacy to describe the rich variety of cognitive and cultural tools we use to make sense of the everyday. Multiliteracy is key to our professional and personal effectiveness as well as to our functioning as individuals and citizens in a world characterised by increasing local diversity and global connectedness.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Engage critically with a range of multimodal texts
2. Develop and employ a repertoire of practices (knowledge, skills and strategies) appropriate for different purposes and audiences and in a range of cultural, social and domain-specific contexts
3. Examine the ways in which social and cultural diversity shapes literate practices by the application of different knowledges, approaches, orientations, attitudes and values
4. Work collaboratively in small groups to develop strategies and/or propose solutions to real-world problems
5. Practice peer and self-assessment to analyse and reflect on content and promote personal and professional development

Subject Content

This subject is modularized, in the following structure

Contextualizing introductory module: Critical multiliteracies

- What is multiliteracy, and why is it essential?
- The active and passive production of meaning across a range of new platforms and contexts
- What critical theory, tools and contextual understandings do we bring to creating? or seeking to understand? multimodal texts and textuality?
- Reading and Writing in the 21st century
- Multimodal reading
- Media and mediation
- Social and cultural diversity and the diversity of knowledges
- Embodiment and the sensorial literacies: making sense through the senses
- The senses and sense-making; sensory impairment/deprivation and multiliteracies
- Intersectional literacies: what sensory skills (or combination of skills) do we bring to the visual and the digital?
- Non-verbal communication
- Digital and technological literacies
- Computer literacy
- Informational literacy for an online world
- Curating identity in personal and professional life

Assessment

Teaching Periods

COMM 2051 Animation and Visual Effects

Credit Points 10

Legacy Code 102828

Coordinator Wendy Chandler ([https://directory.westernsydney.edu.au/search/name/Wendy Chandler/](https://directory.westernsydney.edu.au/search/name/Wendy%20Chandler/))

Description Explore the art and technology of animation and visual effects as applied to digital screen media production. In this unit, you will be introduced to the principles of animation and compositing and learn how to create effective motion sequences integrated with sound. Working with commercial software, you will explore the unique possibilities of animation and visual effects production and experiment with alternative, creative, narrative storytelling approaches. Develop critical, conceptual and practical skills within the context of animation and visual effects which will then enable you to deliver powerful and compelling visual stories on multiple media platforms.

COMM 2031 - Principles of Non-Linear Editing
COMM 2042 - Visual Effects
VISU 2007 - Animation and Visual Effects (WSTC)
COMM 2054 - Animation and Visual Effects (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate knowledge of current trends and processes of animation and visual effects in relation to digital screen media production.
2. Apply and critique the use of animation and visual effects in such a way to creatively produce relevant solutions to specific concept and design requirements.
3. Create, record and manipulate material for short form animation and visual effects production.
4. Demonstrate relevant technical and software skills in relation to animation and digital effects production. These include green screen studio technical and safety procedures and software training in relevant Adobe Creative Suite applications.
5. Assess the risk involved in professional production projects.

Subject Content

Animation and visual effects histories & case studies.

Animation and visual effects production practices and principles.

Green screen studio production and compositing.

Assessment

COMM 2052 Documentary: Factual Screen Media

Credit Points 10

Legacy Code 102830

Coordinator Maryella Hatfield ([https://directory.westernsydney.edu.au/search/name/Maryella Hatfield/](https://directory.westernsydney.edu.au/search/name/Maryella%20Hatfield/))

Description Documentary is an evolving area that continues to flux and change. Due to developments in media distribution, technological change and convergence, audiences are increasingly engaging with factual content in new and innovative ways. This unit explores both conceptual and production approaches to documentary in various forms. Students are introduced to key documentary histories and modes and examine a range of traditional and evolving practices including animated, online interactive and transmedia documentary outcomes. Students produce a short documentary project and in doing so develop professional skills and approaches to production roles as well as ethical relationships and responsibilities with participants and topics.

School Humanities & Comm Arts

Discipline Audio Visual Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) COMM 1015 OR COMM 1039

Co-requisite(s) COMM 1037

Equivalent Subjects COMM 2041 - Video Camera and Image Formation
COMM 2013 - Documentary Media

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the development of documentary histories, forms, concepts and production techniques.
2. Articulate a range of ways in which evolving forms and directions in documentary production influence current documentary media.
3. Research and write a documentary proposal.
4. Discuss the ways ethical issues related to documentary subjects and topics are reflected in documentary production.
5. Develop and produce a short documentary project.
6. Integrate theoretical and practical knowledge in the reflective analysis of content creation and production roles.

Subject Content

Documentary histories and concepts

Evolving documentary forms (animated, online interactive, transmedia)

Documentary research and proposal writing skills

Documentary practice (preproduction to postproduction)

Ethical considerations and responsibilities involved with working with subjects and topics

Reflective practice

Assessment

COMM 2053 Narrative: Fictional Screen Media

Credit Points 10

Legacy Code 102829

Coordinator Maryella Hatfield ([https://directory.westernsydney.edu.au/search/name/Maryella Hatfield/](https://directory.westernsydney.edu.au/search/name/Maryella%20Hatfield/))

Description In the 21st Century the nature of storytelling has evolved. Fictional screen narratives are now delivered across multiple platforms, devices and spaces. At the same time different platforms are strategically used to extend and add new layers to stories while deepening audience interaction and engagement. This unit introduces students to more advanced principles and processes in the production of fictional screen media. Students will learn how to work effectively in collaborative production teams across various key roles in pre-production, production and post-production. Working in teams, students produce a creative cross-platform narrative screen media project.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) COMM 1015 OR COMM 1039

Equivalent Subjects COMM 3020 - Media Arts Project

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply key concepts in cross platform fictional storytelling to project development.
2. Develop and write a proposal and script for a cross platform fictional project
3. Plan and produce a cross platform screen media project which includes a fictional narrative video.
4. Apply reflexive critical thinking to the creative process and to evaluation of their own and others' work.
5. Work independently and collaboratively on a cross platform fictional storytelling project.

Subject Content

1. Advanced fictional scriptwriting concepts and methods.
2. Cross platform and 360 transmedia storytelling.
3. Relevant skills in cross platform fictional screen media production.
4. Professional production practices and creative processes for screen media practitioners working in collaborative teams.
5. Reflective online content production and publishing

Assessment

Legacy Code 100849

Coordinator Christopher Conti ([https://directory.westernsydney.edu.au/search/name/Christopher Conti/](https://directory.westernsydney.edu.au/search/name/Christopher%20Conti/))

Description This unit aims to increase students' knowledge of the scope and variety of Australian writing. It examines a range of Australian texts from a number of contexts, usually organised along historical and/or thematic lines, and considers the role of writing both "high" literature and more popular forms in constructions of Australian culture. Issues of place, gender and race may be foregrounded, and consideration given to how these influence images of Australia. Film and television texts may also be included or emphasised.

School Humanities & Comm Arts

Discipline Written Communication

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYB 0186 - Australian Textual Studies LGYB 4976 - Australian Authors Special Study LGYB 4974 - Australian Literature The City and The Bush

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Students will increase their knowledge of the scope and heterogeneity of Australian texts.
2. Students will read and critically examine a range of representative Australian texts from a number of different social and cultural contexts.
3. Students will examine the relationship between Australian texts and ideas and traditions regarding the nature of Australian culture.
4. Students will explore the relationship between Australian literary culture and other cultural forms, such as film, television, journalism and the visual and performing arts.

Subject Content

Text and gender in Australian culture.

Landscape as text: writing Australian places and spaces; the city versus the bush.

Imagining community/ies: the textual construction of the Australian nation and national identity/ies.

Aboriginal texts, from pre 1788 cultural inscriptions to present-day writing.

Ethnic minority writing and questions of multiculturalism.

The concept of an Australian literature, its history and discontents.

Focus study of particular Australian authors.

Writing Australian drama, film and television.

Bastards from the Bush and Sentimental Blokes: Australian literature and popular culture; humour, irony and sentiment.

Australian modernity, Australian modernism.

Australian journalism and literary culture.

Australian literary criticism, its history and some of its major issues (for example, national versus universal culture, "the cultural cringe", radical nationalists versus New Critics, responses to post-structuralism and postcolonialism).

It is necessary to understand/That a poet may not exist (Ern Malley):

Australian literary hoaxes.

Australian writing and the visual arts.

Teaching Periods

COMM 3006 Cinema and Experience

Credit Points 10

Legacy Code 101984

Coordinator Alex Ling ([https://directory.westernsydney.edu.au/search/name/Alex Ling/](https://directory.westernsydney.edu.au/search/name/Alex%20Ling/))

Description Film Studies and Literary Studies share some common theoretical foundations and analytical methods. However, considered in its cultural contexts, the question of how a film is experienced by spectators becomes critical. Films engage spectators in an embodied and affective way. The unit will argue that we cannot understand how a film takes up thematic and cultural questions without exploring the dynamics of spectatorship. This unit will explore some key approaches to film spectatorship and will look at how cinematic techniques shape narrative, genre, character, and thematic and cultural questions into embodied and affective experience.

School Humanities & Comm Arts

Discipline Audio Visual Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYB 0027 - Film Genre and Affect LGYA 0256 - Film and Affect

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Engage in critical debates about cinema spectatorship
2. Identify diverse historical and cultural approaches to cinematic affect
3. Analyse the relationships between key methodologies in film studies
4. Demonstrate skills in film analysis
5. Critique the relationships between film techniques and cultural and thematic questions.

Subject Content

Concepts of classical narrative and their revision
 Comparative methodologies in film studies
 Textual analysis of film
 Cinema of attractions; cinema and modernity
 The role of embodiment in spectatorship
 Concepts of affect and mimetic experience
 Models of affect in narrative, genre, film sound, mise en scene, cinematography and performance
 Case studies of diverse film cultures and movements
 Function of fantasy in film production and consumption
 Contemporary forms of film production and experience

COMM 3008 Communication Research Project

Credit Points 10

Legacy Code 101930

Coordinator Raymond Archee ([https://directory.westernsydney.edu.au/search/name/Raymond Archee/](https://directory.westernsydney.edu.au/search/name/Raymond%20Archee/))

Description This final year unit provides a capstone experience as a bridge into professional work or as a precursor to further research studies. The 'open box' approach invites students to develop a concept for a research report or professional project, undertaking preparatory stages of collective and individual research in an area of interest that has emerged as a result of previous studies. Students will generate project options that draw on historical and contemporary research issues and approaches to guide the development of their own research questions and methods specific to their object of research. A range of methodological approaches will be explored, including practice-based methods, industry observation/shadowing, qualitative interviews, and quantitative digital methods. Students will develop their own reading lists, identify appropriate research methods and conduct some pilot testing and evaluation of findings for their project. Students will also learn how to read and consume academic and scholarly research in order to critique problematic issues in published research reports.

School Humanities & Comm Arts

Discipline Written Communication

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects COMM 3039 - Visual Thinking COMM 3019 - Media Analysis

Restrictions Successful completion of 80 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and develop a research question
2. Identify appropriate professional and academic contexts for research, and real world ethical practices
3. Present a rationale for a research project
4. Evaluate and use appropriate methods in your research
5. Articulate a potential research finding appropriate to the selected context
6. Adequately assess the risk involved in professional production projects
7. Be able to critique a research report for reliability, validity and ethical problems

Subject Content

- developing research directions and contexts - The research question and The place of research within academic and professional contexts
 - selected research themes linked to Core practices of Advertising, Journalism, public relations and media Arts production majors - case Study examples
 - Exemplars of published research reports in need of Issues being identified and critiqued
 - The use and Reporting of appropriate research methods and mixed methods research in A pilot research Study
 - developing A research evaluation of The pilot Study using selected methods and approaches

COMM 3010 Creative Industries Professional Project or Internship

Credit Points 10

Legacy Code 102433

Coordinator Kristen Marshall ([https://directory.westernsydney.edu.au/search/name/Kristen Marshall/](https://directory.westernsydney.edu.au/search/name/Kristen%20Marshall/))

Description Creative Industries Professional Project or Internship will allow students to work with Creative Industries practitioners in a 'real world' context. Students will collaborate with an industry

partner, applying design thinking to achieve creative solutions within an internship placement or develop their own creative industry project.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Students must be enrolled in Bachelor of Creative Industries or associated double degrees. Students must have successfully completed 160 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explore the relationship between discipline area and its contribution to creative industries and broader society.
2. Undertake appropriate critical thinking.
3. Use design thinking to solve challenges identified in the workplace and/or community setting.
4. Present a professional profile.
5. Demonstrate integrated disciplinary knowledge and skills in a workplace and/or project context.

Subject Content

Professional profile creation

Applied skills within industry of major/sub-major

Critical and design thinking

Applied problem solving

Creative application

Innovation and collaboration

Assessment

COMM 3012 Creative TEAMS 2

Credit Points 10

Legacy Code 102432

Coordinator John Greig ([https://directory.westernsydney.edu.au/search/name/John Greig/](https://directory.westernsydney.edu.au/search/name/John%20Greig/))

Description Creative TEAMS 2 will bring students together in interdisciplinary groups to work with Creative Industries practitioners on professional projects. Students will learn how to collaborate to develop original solutions with industry partners. Through research and planning, in relation to a set of relevant constraints: such as cultural, social, environmental, site and audience, students will develop a strategy that utilises the appropriate media, message and approach, to address the identified target audience, based on research findings.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) COMM 3011

Restrictions Students must be enrolled in Bachelor of Creative Industries or associated double degrees. Successful completion of 120 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate the elements of an ill-structured problem as a basis for research
2. Use appropriate research methods in collaboration with others
3. Use design thinking to develop a solution to a real problem
4. Use critical thinking to reflect on research
5. Work in teams to develop novel solutions to real problems
6. Present findings professionally in a range of formats
7. Demonstrate advanced communication skills

Subject Content

Applied Design thinking
 Applied Research skills
 Applied Critical thinking
 Collaborative problem solving
 Advanced professional communication
 Innovation and risk management

COMM 3013 Creative Writing Project

Credit Points 10

Legacy Code 100859

Coordinator Anna Gibbs ([https://directory.westernsydney.edu.au/search/name/Anna Gibbs/](https://directory.westernsydney.edu.au/search/name/Anna%20Gibbs/))

Description This unit extends students beyond the writing of individual stories and poems into larger areas of creative writing, such as the discontinuous narrative, the novella, and the cycle of related poems and/or stories. It involves students in the process of developing a major project from an initial set of ideas, through the stages of drafting to a "finished" product, using workshop techniques, individual interviews and peer critiquing. It aims to give each student some experience of a relationship with readers (fellow students) and an editor (the tutor).

School Humanities & Comm Arts

Discipline Written Communication

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Assumed Knowledge

It is highly desirable that students should have successfully completed one of the following Level 2 subjects: 100896 -Writing Fiction, 100856 - Creative Non-Fiction or 101011 - Writing Poetry.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically examine a range of published texts drawing upon their awareness of the variety of approaches and techniques employed in extended pieces of creative writing.
2. Write a developing series of drafts leading to the completion of an extended creative work.
3. Employ writing and editing skills through the workshop process.
4. Build capacities for critiquing and evaluating their own work through the development of editorial relationships.
5. Express themselves clearly, forcefully and effectively - to the level of their capacity.

Subject Content

The critiquing of published texts in order to examine the various approaches and techniques deployed in writing an extended piece of creative writing.

The use of workshops to develop students' writing and awareness of the drafting process.

The creation of a series of developing drafts in order to produce an effective creative work that improves with each draft.

The use of an editorial relationship to develop students' understanding of the editing process and their capacity for critical evaluation of their own work.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Writing exercises	1000 words	30	N	Individual
Major writing draft	1250 words	30	N	Individual
Major writing final	2500 words	40	N	Individual

Teaching Periods

COMM 3014 Digital Communication

Credit Points 20

Legacy Code 102518

Coordinator Kristen Marshall ([https://directory.westernsydney.edu.au/search/name/Kristen Marshall/](https://directory.westernsydney.edu.au/search/name/Kristen%20Marshall/))

Description This unit covers the theory and practice of social/digital media (SDM) for marketing and communication in a variety of business, advertising and public relations agency contexts. It provides an introduction to the areas of strategy, creative writing and media planning for SDM. It examines trends and issues surrounding the usage of SDM and application and development of practical and tactical tools. Case studies and examples are used to demonstrate best practices. Students develop a major project where they demonstrate appropriate

and professional usage of SDM strategies and tactics in a marketing communication context.

Discipline Communication And Media Studies

Student Contribution Band HECS Band 4 20cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MKTG 1001 OR
MKTG 1009 AND
COMM 2011

Equivalent Subjects COMM 3016 - Digital and Social Media Communications

Incompatible Subjects LGYA 1699 - Digital and Social Media Communication
COMM 3004 - Advertising Digital Media

Restrictions Successful completion of 80 credit points at Level 1.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate various digital tools, including social media.
2. Develop an informed and theoretically sound digital communication plan/strategy.
3. Apply the concepts and tools required to build and maintain an effective digital communication strategy.
4. Demonstrate the ability to use and analyse digital and social media in the business context.
5. Prepare basic and more complex writing tasks typically required of communication professionals for digital and social media channels.
6. Analyse how digital and social media is used and recommend improvements to real-world issues and problems.
7. Adequately assess the risk involved in developing a digital strategy to address a marketing communication challenge.

Subject Content

Covers the theory and practice of using social/digital media (SDM) for marketing and communication in a variety of business and public agency contexts. Provides an introduction to the areas of strategy, creative writing and media planning for SDM. Examines the trends and issues surrounding the usage of SDM and application and development of practical and tactical tools. Uses case studies and examples to demonstrate best practices. Students develop a major project where they demonstrate appropriate and professional usage of SDM strategies and tactics in a marketing communication context.

COMM 3015 Digital Journalism Production

Credit Points 20

Legacy Code 102057

Coordinator Margot Dunphy ([https://directory.westernsydney.edu.au/search/name/Margot Dunphy/](https://directory.westernsydney.edu.au/search/name/Margot%20Dunphy/))

Description Digital technologies have revolutionised news delivery. Journalists in every area of the profession now require video, audio, online and print skills to work across multiple platforms and contexts. This unit introduces students to multiplatform digital journalism and the ways in which multiple media can be used to tell stories for a range of contexts. Students develop their own blog site, that is populated using digital devices for working with video, audio and text to engage with a range of social media storytelling modes to extend stories across multiple media contexts. Based on an understanding of ethical and informed journalism practices, students are encouraged to develop their own voice as an independent thinker and writer into the public domain of online publishing.

School Humanities & Comm Arts

Discipline Audio Visual Studies

Student Contribution Band HECS Band 4 20cp

Level Undergraduate Level 3 subject

Equivalent Subjects COMM 3036 - Television Journalism COMM 3030 - Radio Journalism

Restrictions Successful completion of 80 credit points at Level 1 and at least 20 credit points from 102062 News Reporting, 102061 Feature Writing, 102017 Journalism Research & Investigation, 100953 Photo Journalism, 101526 Intro to Sound Technologies, 102266 Researching the Visual, 101538 Sound Synthesis and the Sound Environment or 101922 Web and Time Based Design.

Assumed Knowledge

Basics of news writing for broadcast media and news gathering. Knowledge of legal issues affecting journalism and Journalism Ethics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate practical skills in newsgathering, research and production
2. Use digital audio and video devices to record material appropriate for news stories
3. Use desktop editing systems and blog templates to assemble basic audio and video stories
4. Explain the legal and ethical issues relevant to digital journalism
5. Work in teams and individually.
6. Critically analyse multi-media journalism
7. Adequately assess the risk involved in professional production projects.

Subject Content

1. Video and audio news and current affairs
2. Finding stories
3. Scripting, narrating and constructing audio and video news stories
4. Use of digital video and audio capture equipment and desktop editing
5. Online and social media delivery of news material
6. The social role of digital journalism

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

COMM 3018 Internship

Credit Points 10

Legacy Code 101173

Coordinator John Greig ([https://directory.westernsydney.edu.au/search/name/John Greig/](https://directory.westernsydney.edu.au/search/name/John%20Greig/))

Description This unit provides students with the opportunity to apply the skills and knowledge they are developing during their studies to tasks within a workplace (the host organisation). The unit may involve substantial contact with the public through workplace placements and, for this reason, it is equivalent to a professional placement. The unit is recommended for students in their third year of study (or part time equivalent).

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 0737 - Advertising Internship LGYB 0070 - Professional Internship - Public Relations LGYB 0119 - Professional Internship - Journalism LGYB 0074 - Media Co-Productions DESN 3009 Professional Practice Design

Restrictions Successful completion of 120 credit points of study in the currently enrolled program and a minimum of 40 credit points from the Advertising, Journalism, Public Relations or Media Arts Production majors. NOTE: These restrictions do not apply to programs 1655 Bachelor of Arts (Dean's Scholars), 1692 Bachelor of Arts (Interpreting and Translation) Dean's Scholars, 1739 Bachelor of International Studies (Dean's Scholars), 1822 Bachelor of Arts (Pathway to Teaching Primary) Dean's Scholars and 1823 Bachelor of Arts (Pathway to Teaching Secondary) Dean's Scholars. Students who have enrolled in the sub-major SM1125 Advertising Studies must have successfully completed all 40 credit points of this sub-major prior to enrolling in this subject. Sydney City Campus students are required to obtain written approval from the program Contact (details below) prior to enrolling in this subject.

Assumed Knowledge

Students are expected to have thorough knowledge of professional skills required in their field of study, commensurate with those required to participate in a workplace.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate and apply integrated discipline (possibly including technical) knowledge across a relevant academic specialisation in a workplace context with depth in one or more core business disciplines

2. Apply technical and technological skills appropriate and effective for communication purposes and contexts
3. Investigate professional issues and situations through the effective analysis, evaluation and synthesis of theory and practice
4. Exercise independent judgment and initiative in adapting and applying knowledge and skills for effective planning, problem solving and decision making in diverse contexts

Subject Content

- The subject is designed for students in their third year of study (or part time equivalent). In addition to the following points, prospective students must apply for entry to their area supervisor.

- It is The responsibility of students to nominate suitable workplaces. students must provide adequate details of The placement they have been able to organise. students will be expected to play An active role in organising their own placement, either directly to workplaces or through The Western Sydney university placement Service. While, on occasion, academic staff may be able to help find A placement through contacts with employers, as well as offers from employers seeking students, students should not rely on anyone but themselves to arrange A suitable work placement.

Students will need to

1. find a suitable placement
2. discuss their choice with the program coordinator (phone or email will be acceptable)
3. complete the workplace agreement form

Assessment

COMM 3022 Media Memory

Credit Points 10

Legacy Code 101931

Coordinator Milissa Deitz ([https://directory.westernsydney.edu.au/search/name/Milissa Deitz/](https://directory.westernsydney.edu.au/search/name/Milissa%20Deitz/))

Description Media memory is now a critical field of study in journalism, advertising, visual communication and media. The media builds local, national and transnational identities through the representation of the past. Media industries such as advertising rely upon collective memories to design campaigns in order to reach particular audiences. Journalists increasingly 'assemble' stories from digital archives, recombining similar or related events from the past to build stories and features of the present. Individuals increasingly contribute to news events through their own 'witnessing' of events, capturing and sharing material using mobile and social media. This unit addresses these processes by providing a brief history and overview of approaches to thinking about media and memory, in the context of the significance of media convergence and digital memory within contemporary media ecologies. The unit provides students with a series of case studies that approach the memory of particular events, drawing on examples from advertising, public relations, visual communication, animation, film, broadcasting and journalism. Students develop a media research project that engages with the material presented in the unit.

School Humanities & Comm Arts

Discipline Communication And Media Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects COMM 3031 - Researching Media Audiences

Restrictions Successful completion of 80 credit points at Level 1

Assumed Knowledge

Knowledge gained from completion of Bachelor of Communication Years 2 and 3 major subjects.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse and evaluate different conceptualizations of media memory
2. Assess and critique the variety of contexts and frameworks that can be used to understand the complexities of the relationships between media environments and consumers
3. Examine the variety of methods for researching media memory and identify their use in a major project

Subject Content

1. A brief historical overview of approaches to thinking about media and memory
2. The significance of media convergence and digital memory within contemporary media ecologies
3. The complex relationships between media and memory, consumers and audiences generally
4. A series of four themes that engage with media memory to provide a focus for the major project. The major project can be developed in any one of the communication specialisations.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

COMM 3024 Modernity and Cinema

Credit Points 10

Legacy Code 101001

Coordinator Shane Hersey ([https://directory.westernsydney.edu.au/search/name/Shane Hersey/](https://directory.westernsydney.edu.au/search/name/Shane%20Hersey/))

Description This unit will engage with the question of how social and aesthetic issues interact in films by examining specific questions which are related to cinema history. Issues of identity will be used to focus upon the ways in which historical contexts interrelate with artistic practice. The unit will consider the process of creating emotions, the consideration of techniques of production and the manipulation of cinema language, the use of narrative or non-narrative form to convey the sense of reality, (or the unreal, the uncertain).

School Humanities & Comm Arts

Discipline Audio Visual Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYC 1620 - Modernity and Cinema

Restrictions Successful completion of 60 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. engage with social and aesthetic issues in film;
2. identify issues of identity in film, in particular in relation to the historical context;
3. identify areas of affect as an outcome of film making techniques; and
4. analyse methods of production and techniques of filmmaking as a mode of story-telling.

Subject Content

Content will draw from, or elaborate upon, a number of the following topics:

- Introduction to aesthetic questions: film and art
- The relation of (psychological and physical) landscape to modernity in British and American film.
- Arthouse films: cinema of ideas
- The movement from modernity to postmodernity
- Issues of identity.

Teaching Periods

COMM 3025 News Teams

Credit Points 10

Legacy Code 102063

Coordinator Nadya El Gawley ([https://directory.westernsydney.edu.au/search/name/Nadya El Gawley/](https://directory.westernsydney.edu.au/search/name/Nadya%20El%20Gawley/))

Description This unit introduces students to the concept surrounding the editorial team process and the culture of the newsroom across all news media. It explores the social and organisational context of news production in commercial, public or community news organisations. It draws upon theory from communication, sociology, psychology, and management to provide a broad understanding of the principles and practices of effective and creative news teams. It critically analyses the structures, processes and techniques of news gathering to enable quality team outcomes. The unit encourages collaborative working relationships and develops students' own practice in a team.

School Humanities & Comm Arts

Discipline Journalism

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects COMM 3026 - News Teams and Newsroom Cultures

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Work in a news team to produce work for a range of media and understand news team processes, structures and management in a critical and experiential way
2. Apply appropriate principles and techniques to the editorial team process in a news production exercise

- Outline their own ideas about news team management, and being part of a news team
- Apply a critical perspective to the impact of newsroom organisation on the dominant news values expressed in the news product
- Construct or model their work (stories) for specific news organisations and understand the organisational context in which news teams operate
- Negotiate and function effectively as a team member.

Subject Content

- The subject introduces students to the concepts surrounding the editorial team process and the culture of the newsroom across all news media.
- It explores the social and organisational context of news production in commercial, public or community news organisations.
- The subject critically analyses the structures, processes and techniques of newsgathering
- It will encourage collaborative working relationships and develop the students own practice as team leaders, managers and members.

Assessment

COMM 3035 TV Production 2

Credit Points 10

Legacy Code 102409

Coordinator Maryella Hatfield ([https://directory.westernsydney.edu.au/search/name/Maryella Hatfield/](https://directory.westernsydney.edu.au/search/name/Maryella%20Hatfield/))

Description In 2023, this unit replaced by 102834 - Screen Media: Capstone Production. Television Production 2 is a practical and vocational unit that provides students with a range of advanced skills for working in the television production and broadcast sector. The course encourages multiplatform conceptualisation and distribution of projects exploring the futures of television in online, mobile and networked environments. Students build on their knowledge and experience from TV Production 1 across a range of roles including project planning, scriptwriting and research, filming, sound recording, video editing, and post production. Working in small teams students develop and produce a TV series with professional production values for broadcast through public media contexts.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) COMM 3034

Co-requisite(s) COMM 2036

Equivalent Subjects COMM 3021 - Media Arts Workshop COMM 3038 - Video Project COMM 3033 - TV Production COMM 3050 - Screen Media Capstone Production

Restrictions Students commencing mid-year may study this subject concurrently with 102407 Screen and Sound Practices 2.

Assumed Knowledge

Knowledge gained from completion of year 1 subject, Foundations of Media Arts and Production.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Demonstrate a range of skills for working in the television production and broadcast sector.
- Demonstrate a working knowledge and experience within a range of roles that exist within the sector and gain practical experience in filming, sound recording, video editing, postproduction, planning, scriptwriting and research.
- Apply skills to produce television projects with professional production values.
- Work in groups and individually while exploring a wide range of interconnected disciplines.
- Engage with community partners and events in Greater Western Sydney and make programs with a focus on community building.
- Adequately assess the risk involved in professional production projects.

Subject Content

Module 1: TV Series Proposal ? Planning, scripting, and producing a television series proposal and treatment for a series targeted to a specific audience.

Module 2: Series Post Production and Distribution ? Post-production and Distribution ? Broadcast requirements and conventions ? Graphics and titles ? Advanced editing and sound mixing ? Distributing television programmes ? Online distribution.

Module 3: Development and Production of a 30 second TV Commercial.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Treatment, Script and Distribution & Marketing Strategy. Includes Risk Management Plan.	Treatment and Strategy document 2000 words	20	N	Individual
Audio visual Production and post production of a TV Series (Panel; Scripted; Demonstration or Live Music)	Audio visual Production and post production of a TV Series (Panel; Scripted; Demonstration or Live Music)	50	N	Group
Reflective Report (Individual work)	1000 words approx	30	N	Individual

Teaching Periods

COMM 3037 Transmedia Production

Credit Points 10

Legacy Code 101939

Coordinator Wendy Chandler ([https://directory.westernsydney.edu.au/search/name/Wendy Chandler/](https://directory.westernsydney.edu.au/search/name/Wendy%20Chandler/))

Description In 2023, this unit replaced by 102833 - Screen Media: Capstone Development. Video is now delivered across multiple platforms and spaces, both online and offline via mobile networks; through festivals, public spaces and galleries and across social network sites. At the same time video productions are increasingly designed to be Transmedia where different platforms are strategically used to extend and add new layers to stories while deepening audience interaction and engagement. Students will learn about 360 degree storytelling as strategic communications. Students will develop a professional transmedia project proposal for a service, product or system that works across multiple platforms, engaging with audiences through social network sites. Students will explore how content can be meaningfully embedded and linked across multiple platforms to engage target audiences.

COMM 2018 OR
COMM 2018 OR
COMM 2034 OR
COMM 2042

Equivalent Subjects COMM 3021 - Media Arts Workshop COMM 3049 - Screen Media Capstone Development

Assumed Knowledge

Knowledge gained from completion of Bachelor of Communication Major year 1 subject (Foundations of Media Arts and Production).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a sound understanding of Transmedia production processes and techniques including 360 degree storytelling, creating video for the web and engaging with audiences through social network sites.
2. Demonstrate knowledge of a diverse range of Transmedia productions and the ability to analyse why these productions were or were not successful in achieving their goals.
3. Work in a production team to design and implement a Transmedia production.
4. Demonstrate knowledge of digital tools for tracking content flows across platforms as well as tools for audience engagement and experience in using selected tools.
5. Adequately assess the risk involved in professional production projects.

Subject Content

Module 1: Introduction to Transmedia production: explored through historical and current case studies. Here we will examine productions with a social, cultural and commercial focus and we will analyse their goals, aesthetic design, use of platforms, production practices and success. (3 classes)

Module 2: Designing a Transmedia production: working from a series of scenarios or from their own production proposals (these may have been developed prior to this subject), students will design a socially, culturally or commercially orientated Transmedia production. (3 classes)

Module 3: Transmedia production: Training in the use of Transmedia production tools, including web-based video tools and social network sites. Students will receive project-based mentoring from relevant tutors/lecturers. (4 classes)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Transmedia case study analysis	Group presentation 10-12 mins; Written component 250-500 words	20	N	Group
Transmedia production proposal draft - synopsis	Group presentation 10-12 mins; Written proposal - up to 1,000 words	20	N	Group
Transmedia production proposal draft 2 - including Audio-visual Production Plan	Group presentation 10-12 mins; Written proposal - up to 1,000 words	30	N	Group
Transmedia production proposal final. Critique of group project Audio-visual production final	Group class presentation 10-12 mins; Written components - up to 2,000 words; Audio-visual production 1-3 mins	30	N	Group

COMM 3041 Writing For Performance

Credit Points 10

Legacy Code 100895

Coordinator Sabrina Achilles ([https://directory.westernsydney.edu.au/search/name/Sabrina Achilles/](https://directory.westernsydney.edu.au/search/name/Sabrina%20Achilles/))

Description In this unit students will consider the history and theory of a selection of performance traditions including Greek tragedy, Elizabethan and Jacobean and modern drama and post-modern performance and write scripts for one or a number of media, including screen (film and television), dramatic theatre, performance poetry and song lyrics and contemporary performance.

School Humanities & Comm Arts

Discipline Written Communication

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYB 4928 - Writing for Performance LGYA 0302 - Writing for Screen and Stage

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. critique performance, both experientially and experimentally;
2. demonstrate an understanding of a range of performance genres, styles and traditions
3. create performance texts; and
4. collaborate in and critically explore the process of developing scripts for stage and/or screen and or environment.

Subject Content

Content will draw from, or elaborate upon, a number of the following topics:

- Dramatic styles, including Aristotelian poetics, psychological drama (Bergson), Jacobean theatre (Greenaway), non-bourgeois theatre (Brecht).
- contemporary lyrics, rap, performance poetry.
- Postmodern aesthetics and performance.
- Feminism and The politics of representation.
- The politics of media institutions.
- Theories of the author/auteur (Allen, Luhmann, Greenaway, Fassbinder).
- Voice and the performance text; writing for radio and video.
- Displacement of the stage as site of performance; text as performer/performing image; audience as performer, life as performance
- Technology in performance and as extended body.
- Theatrical traditions critiqued, including environmental theatre, Living Theatre, Grotowski's Poor Theatre, political theatre, guerilla theatre, ritual.

Prescribed Texts

- A book of primary readings prepared by the subject coordinator.

Teaching Periods

COMM 3042 Writing Poetry

Credit Points 10

Legacy Code 101011

Coordinator Kate Fagan ([https://directory.westernsydney.edu.au/search/name/Kate Fagan/](https://directory.westernsydney.edu.au/search/name/Kate%20Fagan/))

Description What does a poem look or sound like today? In this unit students examine poetic forms, styles and techniques from various cultures of the 20th and 21st centuries. Students are taught to analyse and write poetry via a series of guided workshop exercises. They learn that writing poetry also involves becoming a skilled reader of and about poetry. Students enrich their knowledge and love of poems by scrutinising a range of poetic types and methods including imagism, metaphor, free verse, humour, spoken word traditions, song-writing, ecological poetics, and visual and digital poetics. No previous experience in poetry writing is necessary.

School Humanities & Comm Arts

Discipline Written Communication

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYB 4537 - Writing Poetry

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. write a series of original poems using a range of forms, styles and techniques;
2. identify and apply poetic language, forms and methods;
3. use drafting, editing and in-class workshoping processes to write better poems;
4. analyse ways in which different cultural contexts shape and influence the writing and analysis of poems.

Subject Content

- Students will examine and compare a range of poetic forms, styles and techniques from various cultures of the 20th and 21st centuries including key periods in Australian and American poetry; contemporary poetries in translation; innovative poetics; perf
- students will examine A range of poetry criticism to equip them with Critical skills needed to become better readers of poetry.
- poetry will be studied as A Living art that exists and flourishes in diverse contemporary environments including in books, on streets, on stages and online.
- students will develop A more professional approach to writing poetry including using editing and drafting processes to write better poems, and where appropriate, sharing poems with others.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Applied Project	4 poems	20	N	Individual
Professional Task	4 x 150-word entries (20%) PLUS participation in one workshoping session (10%)	30	N	Individual
Portfolio	4 poems PLUS 1000-word essay PLUS single performance in end-of-year soiree	50	N	Individual

COMM 3043 Writing Portfolio

Credit Points 10

Legacy Code 100582

Coordinator Gretchen Shirm ([https://directory.westernsydney.edu.au/search/name/Gretchen Shirm/](https://directory.westernsydney.edu.au/search/name/Gretchen%20Shirm/))

Description In this level 3 foundation unit of the Creative Writing Major, students are guided by experienced, professional writers in producing an extended portfolio of original creative writing, in a genre (or genres) of their choice. Students will read closely from a wide range of literary texts while completing an intensive program of in-class writing and workshoping activities. They will gain skills in reading and interpreting texts from different genres, eras and contexts - including culturally diverse settings. Students will develop skills in drafting, editing and polishing their own creative work, and in situating their writing within the Australian literary and publishing industries.

School Humanities & Comm Arts

Discipline Written Communication

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply key techniques and concepts of creative writing.
2. Write short creative works (or series of works) using a range of techniques, styles and/or forms.
3. Develop drafting and editing processes to write more effective creative works.
4. Demonstrate a critical understanding of key creative writing concepts.
5. Identify ways in which different cultural contexts can shape and influence creative writing.

Subject Content

Content will draw from, or elaborate upon, a selection of the following topics:

- Close reading of contemporary literary texts from different genres, eras and contexts (including culturally diverse settings)
- Close reading of critical literary texts (including book reviews, critical essays, and texts directed towards developing writing skills)
- Practical creative writing skills for use across a range of writing genres (including short fiction, the contemporary novel, poetry and creative non-fiction)
- Techniques in drafting, editing and polishing one's own creative writing
- Ways of situating one's own creative writing within the broader Australian literary and publishing industries ? and where appropriate, in international and/or online settings

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Professional Task: Creative Work	2 x 500 words (or equiv. depending on genre)	25	N	Individual
Portfolio Part 1: Essay	1000 words	25	N	Individual

Portfolio Part 2000 words 50 N Individual

COMM 3045 Advertising: Campaigns

Credit Points 10

Legacy Code 102730

Coordinator John Greig ([https://directory.westernsydney.edu.au/search/name/John Greig/](https://directory.westernsydney.edu.au/search/name/John%20Greig/))

Description In this capstone unit students will learn to professionalise key aspects of the advertising management process. The unit provides the opportunity to link and apply theoretical understanding with research, writing, planning, creative development and media, and presentation skills in response to a live client brief provided by a multi-national advertising agency. The 'real world' situation allows students to demonstrate their capacity for problem analysis and to develop appropriate and timely solutions. Students will work within an allocated budget and to realistic industry deadlines to produce a campaign they can include in their portfolio. Assessment tasks will enable students to demonstrate emerging professional capacity and prepare themselves for a communication position, either in an advertising agency, media agency or consultancy.

School Humanities & Comm Arts

Discipline Communication And Media Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) COMM 2011 AND COMM 2006

Equivalent Subjects LGYA 1057 - Advertising Campaigns COMM 3007 - Communication Campaigns

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the importance of strategy and research in successful advertising campaigns across a range of different approaches and methodologies.
2. Critique advertising campaigns and describe best practice.
3. Undertake relevant research to develop and leverage strategies for campaigns and to develop relevant and strategic insights.
4. Create and present an advertising campaign based on a live agency brief for a real world client.
5. Apply a theoretical grounding in campaign development.

Subject Content

(1) Campaign Practice
Components include

- Research
 - Formulating objectives
 - Identifying and understanding the target audiences
 - Planning strategies and tactics
 - Creative development
 - Writing and design
 - Media planning
 - Budgeting
 - Meeting timelines and evaluation
 - (2) Campaign Theory
 - Reading and research on campaigns
 - Role of digital and traditional media
 - Examination of best practice
 - Reviewing others' work
 - Self-reflection
 - Developing a portfolio
 - Application of digital and traditional media
 - Planning advertising campaigns in a multidisciplinary, multicultural and multimodal context

COMM 3046 Personal Branding Strategies: Build and Manage Your Career Profile

Credit Points 10

Legacy Code 102780

Coordinator Kristen Marshall ([https://directory.westernsydney.edu.au/search/name/Kristen Marshall/](https://directory.westernsydney.edu.au/search/name/Kristen%20Marshall/))

Description A strong personal brand can open doors to career opportunities, promotions and partnerships in all industries. This unit is essential for anyone who wants to propel their career, build a reputation, capitalise on opportunities and stand out to future employers. Using user-centred theories and approaches, we'll teach you how to create a personal brand aligned to your values and goals in a way that engenders confidence, trust and credibility. You'll learn the skills to network so you can connect with and leverage the influencers who can accelerate your reputation. How to build and showcase your brand, both online and offline, and how to manage it over time. How to craft short talks and presentations (based on the philosophies and techniques of TED), to inspire your audience to action. This unit is recommended for all students, regardless of discipline.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Incompatible Subjects COMM 2049 - Personal Branding Strategies Build and Manage Your Career Profile

Restrictions Successful completion of 80 credit points. Please note that this subject is recommended for all students, regardless of discipline.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse and evaluate key characteristics of strong personal brands.
2. Apply research and communication skills to develop an authentic personal brand.
3. Craft a communications plan to present a clear and consistent message, both online and offline.
4. Create the personal brand components which best demonstrate your brand in your field.
5. Learn how to evaluate and evolve a personal brand over time.

Subject Content

Module 1: Introduction to personal branding

This module introduces the concept of personal branding, and explores its importance in the workplace of the future. We examine strong personal brands in a range of industries, and explore the differences in how those individuals achieve impact.

Module 2: Wayfinding

This module encourages students to explore their goals, beliefs and values concerning work, life and career. Students work through a series of exercises to ideate their future, clarifying what makes them feel fulfilled, engaged and empowered. This is an essential stage in working towards creating an authentic personal brand.

Module 3: Prototyping your brand

This module presents students with ways to create a prototype of their personal brand. Prototyping is an integral part of design thinking, and students will be encouraged to gather information and 'test out' a version of a potentially interesting future. Students will collaborate with external mentors in this module.

Module 4: Communicating your brand

This module focuses on the most effective online and offline channels in which to develop a visible presence (for example, websites, blogs, podcasts, social networks, events, presentations). Students will

COMM 3047 Episodic Screen Media

Credit Points 10

Legacy Code 102831

Coordinator Maryella Hatfield ([https://directory.westernsydney.edu.au/search/name/Maryella Hatfield/](https://directory.westernsydney.edu.au/search/name/Maryella%20Hatfield/))

Description In this subject students will analyse and develop an episodic narrative production proposal using concepts and production strategies for serialised narrative storytelling for online platforms. Students will be introduced to the University's broadcast television studio and operation. Students will build their knowledge and practical skills in the conceptualisation, planning, editing of serialised online web and streamed digital based narratives. This subject will require students' attendance in workshops delivered in blocks and participation in studio recording.

School Humanities & Comm Arts

Discipline Audio Visual Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects COMM 3021 - Media Arts Workshop

COMM 3038 - Video Project

COMM 3033 - TV Production

COMM 3034 - TV Production 1

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse and evaluate short form episodic and serialised digital media content across platforms
2. Analyse current screen production theory and practice in relation to text based episodic storytelling
3. Interpret and apply pre-production strategies to the conceptualisation and development of techniques to develop a pilot for an episodic narratives designed for a specific media platform
4. Apply knowledge of audio and video production theory, tools and techniques to digital media production
5. Edit video and audio in a digital software environment
6. Create and publish media content for online platforms

Subject Content

Module 1: Introduction to short form episodic and serialised digital media content across platforms and genres including: drama, light entertainment, web serials, radio, pod casting and new forms of content distribution ie: tik tok

Module 2: Analysis of screen production theory and practice in relation to text based episodic storytelling. Development of serialised narratives and narrative devices for audience engagement. Analysis of case studies with focus on format, production bibles, licensing and distribution of content

Module 3: Conceptualising and developing pre-production strategies in the development of a pilot for an episodic narratives designed for a specific media platform. Present pitch.

Module 4. Introduction to University broadcast television studio at Parramatta South. Apply knowledge of audio and video production theory, tools and techniques.

Module 5. In groups or individually film selected pilot and edit video and audio in a digital software environment. Finalise project pitch for submission to industry standards.

Module 6. Create and publish media content for online platforms and portfolio.

COMM 3048 Immersive Screen Technologies

Credit Points 10

Legacy Code 102832

Coordinator Rachel Bentley ([https://directory.westernsydney.edu.au/search/name/Rachel Bentley/](https://directory.westernsydney.edu.au/search/name/Rachel%20Bentley/))

Description New technology developments have facilitated the integration and design of immersive technologies to more fully engage audiences with narratives and brands. In this subject, students will study user engagement and visual effects theory and analyse the application of these theories and business models on innovative commercial and creative industries case studies. Students will be introduced to using immersive cross platform technologies and 360 filming. Students will develop a scoping and design template for their own project concept. The project proposal will outline the rationale, using visual design elements and compositing requirements, to build a multi-layered digital experience for a venue, project or brand.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse and evaluate a range of immersive technologies and their uses in business and creative industries
2. Explain the rationale for, and the range of, business models evolving in the development of trans media content
3. Analyse current user experience and visual design theories applied to case studies
4. Interpret and apply pre-production strategies to the conceptualisation and development of techniques to develop an immersive project
5. Apply creative scoping and project management to the development of audio and video production projects
6. Create and publish media content for online platforms

Subject Content

1. Production design and strategies for audience engagement
2. Immersive Technology tools and formats (immersive, 360, animated, online interactive, transmedia)
3. Case studies of commercial and innovative project design
4. Practice-base workshop in 360 filming and basic compositing
5. Reflecting on practice and publishing to a personal web portfolio

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Practical Project	3 minutes	30	N	Individual
Applied Project	1000 words	30	N	Group
Critical Review Responses	800 words and quizzes	30	N	Individual
Critical Review	250 words	10	N	Individual

COMM 3049 Screen Media: Capstone Development

Credit Points 10

Legacy Code 102833

Coordinator Wendy Chandler ([https://directory.westernsydney.edu.au/search/name/Wendy Chandler/](https://directory.westernsydney.edu.au/search/name/Wendy%20Chandler/))

Description In this unit students develop a major screen media project which will be produced in the unit Screen Media Capstone Production. The nature of the project may vary depending on students' interests and career aspirations. Projects may range from documentary, drama, episodic, animation, immersive, transmedia, interactive and other hybrid forms. Depending on the nature the project, projects maybe developed individually or in interdisciplinary groups. Projects may be original creative ideas or undertaken in collaboration with an industry and/or community partner.

School Humanities & Comm Arts

Discipline Audio Visual Studies

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) COMM 3047 AND COMM 3048

Equivalent Subjects COMM 3021 - Media Arts Workshop COMM 3037 - Transmedia Production

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Conduct research and analyse material to inform the creation of a screen media project.
2. Create a comprehensive project proposal document for a screen media project.
3. Produce industry standard planning documents relevant to screen media pre-production theory practices.
4. Explain contemporary business models and distribution platforms in the screen media industry.
5. Consolidate skills and knowledge in their preferred area of interest.
6. Reflect on collaborative work practices and methodologies and the work of self and others.

Subject Content

The development, writing and presentation of a major screen media project.

Industry standard planning and preproduction workflows.

Business skills and changes to distribution platforms in the screen media industry.

The refinement of skills and knowledge in a particular crew role or roles of interest.

Collaborative work practices and methodologies.

Critical reflection on the pre-production work of self and others.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
a) Proposal	1000 words or Equivalent	10	N	Individual
b)Presentation	5 minute presentation	10	N	Group

a) Proposal	2000 words or equivalent	30	N	Individual
b)Presentation	10 minute presentation	20	N	Group
Proposal	1000 words	15	N	Individual
Practical	1000 words or equivalent	15	N	Individual

Teaching Periods

COMM 3050 Screen Media: Capstone Production

Credit Points 10

Legacy Code 102834

Coordinator Wendy Chandler ([https://directory.westernsydney.edu.au/search/name/Wendy Chandler/](https://directory.westernsydney.edu.au/search/name/Wendy%20Chandler/))

Description In this unit students produce projects that were planned and developed in the previous unit, Screen Media: Capstone Development. This unit provides the opportunity for students to consolidate theoretical knowledge and practise-based skills acquired throughout their course to produce a substantial screen media project. Students may choose to take on a leadership role such as producer or director, or students may choose develop their skills targeted to their own area of interest. This may involve a specific production area or crew role which may be undertaken on more than one project. Students will also produce an online portfolio featuring key achievements made throughout the course, for the purpose of enhancing graduate employment prospects.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects COMM 3021 - Media Arts Workshop COMM 3038 - Video Project COMM 3033 - TV Production COMM 3035 - TV Production 2

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Produce a screen media project that incorporates relevant theory and industry standard production workflows and practices.
2. Consolidate skills and knowledge in a particular production role or roles of interest.
3. Work both independently and collaboratively to effectively produce an interdisciplinary screen media project.
4. Apply reflective practice strategies to guide and problem solve in relation to screen media production.
5. Produce a portfolio website.

Subject Content

Industry standard screen media production and post-production workflows.

The production and delivery of a screen media project to industry standards.

The refinement of skills and knowledge in a particular production role or roles of interest.

Critical reflection strategies in relation to screen media production.

Online portfolio production.

Assessment

Teaching Periods

COMM 7001 Adaptive Leadership, Management and Team Work

Credit Points 20

Legacy Code 102519

Coordinator Kate Richards ([https://directory.westernsydney.edu.au/search/name/Kate Richards/](https://directory.westernsydney.edu.au/search/name/Kate%20Richards/))

Description The Creative Industries provide opportunities for innovative and integrative working styles and methods, particularly in SMEs and multi-disciplinary collaborations. This industry-facing unit provides an understanding and application of specified theories and methods of leadership, management and collaboration, with a creative, technological and/or entrepreneurial focus. You will devise an individual, semester-long professional development challenge in leadership, management or collaboration and apply your learnings to problem-solve a current professional situation. A supplementary collaborative group project allows you to apply and customise industry roles, techniques and processes in a strategic response to a client brief. You will investigate and analyse one model of leadership, management or collaboration that is found in the creative industries.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 20cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Implement a professional development challenge in leading, managing or collaborating, supported by journaling or meditation, enhanced by self-reflection and applicable to the student's own professional context and development.
2. Apply the principles of leadership, management and collaboration in the creative industries.

3. Discern and qualify your own values and attributes in regards to leading, managing and collaborating.
4. Evaluate and apply appropriate leadership, management and collaboration methods to a group project.
5. Investigate a relevant and specified leadership, management or collaborative method, model or technique.

Subject Content

Overview of specified theories and models of leadership relevant to the Creative Industries.

Management and project management methods, techniques and tools to facilitate creative and technical teams to their best potential and to drive innovation.

Methods for effective and inclusive cross-disciplinary collaboration in the ideation, production, distribution cycle.

A semester-long, student-defined professional development challenge in either leading, managing or collaborating.

Tools for supporting professional development and creativity.

Collaborative group project in which students apply and customise industry roles, techniques and processes in a strategic response to a client brief.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Log/ workbook and presentation	10 entries of 200 words each throughout the semester; 10 minute presentation.	20	N	Individual
Devise and present a team structure, set of management methods and workflows for a creative industries project.	7,000 words, plus diagrams, tools as appropriate.	50	N	Group
Report	2,500 words	30	N	Individual

Teaching Periods

COMM 7002 Convergent Media Internship

Credit Points 10

Legacy Code 101426

Coordinator Anthony Burrett ([https://directory.westernsydney.edu.au/search/name/Anthony Burrett/](https://directory.westernsydney.edu.au/search/name/Anthony%20Burrett/))

Description This professionally oriented unit consists of a work internship placement with a corporate media or community communications division of an organisation. These agencies may

include WSU research centres, educational, community and cultural agencies within Sydney and corporate and professional organisations in Australia or off-shore, as agreed. The focus of the internship is to research and contribute to audience/community liaison and development, and/or to contribute to the cross media production and/or marketing plans of the organisation. During the placement students will develop documentation to capture and manage ideas about professional development, industry trends, professional links, case studies and associated documentation. On completion of the placement students will present a comprehensive report.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in program 1645/1804 Master of Convergent Media, 1805 Graduate Diploma in Convergent Media, 1646/1806 Graduate Certificate in Convergent Media, 1856 Master of Creative Industries, 1857 Graduate Diploma in Creative Industries or 1858 Graduate Certificate in Creative Industries.

Assumed Knowledge

Broad understanding of convergent media forms and processes. Students need extensive knowledge of the convergent media landscape and local industries to successfully research, prepare and undertake their Internships.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and articulate 2 - 3 areas of new learning within the creative industries context, including the student's professional experience and competency, and present this as a written report
2. Outline the conceptual and content planning stages of a media project in the internship progress updates for the organization.
3. Outline the prototype/pilot stages of a media project in the professional setting.
4. Apply advanced skills in self-directed learning
5. Demonstrate competency in industry research skills such as audience analysis and cross media marketing plans; technical and design development pathways; media content.
6. Apply advanced skills in self-directed learning

Subject Content

- research and approach An appropriate industry organisation/company for An internship placement
- Negotiation of individual learning Contract
- Industry placement - 40 hours minimum
- Development and ongoing population of a wiki, orientated towards professional development, new areas of learning and relevance to student's other courses
- Regular meetings with academic supervisor
- presentation of wiki and Overview of internship experience
- Development and ongoing population of experience, including inventory of tasks; roles in organisation; new learnings; self-reflection on the internship, learnings and future directions.
- presentation of The internship and An Overview of internship experience.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Industry Placement Plan - (2-3 new areas of learning, proposed hosts, CV) and 40 hours industry placement	40 hours	50	N	Individual
Short Answers - Creation and applied use of 8 microblog posts	8 x 250 words	20	N	Individual
Report and Presentation - A summary of the class of a maximum 10 slides and submission of a 1,000 word illustrated report to outline and reflect on the Internship experience	10 PowerPoint slides and 1,000 word Illustrated Report	30	N	Individual

Teaching Periods

COMM 7003 Foundations of Media Arts Production (PG)

Credit Points 10

Legacy Code 102300

Coordinator Maryella Hatfield ([https://directory.westernsydney.edu.au/search/name/Maryella Hatfield/](https://directory.westernsydney.edu.au/search/name/Maryella%20Hatfield/))

Description This unit explores creative and independent media arts practices across moving image, audio and participatory forms, and introduces students to fundamental principles of long-form sound and screen production. The unit maps theoretical and practical connections between the creation and study of images and sound across media formats through an integrated theory/practice programme focused on the processes through which long-form media artefacts are created. Students learn how to analyse and critically evaluate screen media and also to plan and make simple short works of their own. It introduces students to relevant media arts histories and contexts (with a focus

on cinema) in addition to a range of technologies, media practices and production techniques.

School Humanities & Comm Arts

Discipline Communication And Media Studies

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an awareness of the processes and practices of screen media arts production and the interdisciplinary and multi-platform nature of screen media arts production
2. Apply creative strategies and technical skills of screen media production in an environment that link them to theories and histories of screen media
3. Demonstrate an ability to critically review a screen media work
4. Make a simple screen media work in small groups work using accessible mobile and online tools and plan a distribution strategy for the work.

Subject Content

MODULE 1 - 1. Visual language and creative camera coverage. This topic will study how a scene is staged for the camera. It will include explorations into camera angles, shot sizes, camera movement, focus, depth of field, speed, lighting, colour, subjective and objective camera, composition and production design. Students will learn how to create storyboards and create shot lists.

2. Sound in Screen Media Production. This topic will explore the relationship between sound and screen media. It would explore how sound is recorded and mixed. It will analyse different components of sound in screen media such as atmospheric sounds and music.

3. Editing in Screen Media Production. This topic will explore the role of editing in Screen Media Production. It will analyse the strategies of editing from the two schools of editing: Continuity Editing and Montage.

MODULE 2 - 4. Critical Responses to Screen Media This topic will explore how screen media has been critically analysed. It will look at the principle arguments of the two main schools: Theory & Post-theory.

MODULE 3 - 5. Project development. This topic will explore how projects in Screen Media move from Idea to the Screen. It will study different models from the Hollywood Studio to crowd sourcing/funding. It will cover preparing briefs and concept documents for clients and potential funders.

MODULE 4 - 6. Project Production and Distribution. Stages of Screen Media Production This topic will explore the different stages of screen media production: Preproduction, Production and Postproduction. It will analyse the different roles involved media production with a focus on the director and producer. Legal issues affecting screen media such as licensing and defamation will be covered.

7. Media Distribution This topic will explore one of the most important issues related to screen media production - how media is distribution in offline and online environments. It will analyse concepts and practices such as 'windows' and peer-to-peer sharing.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Group Presentation	Mastery Task: workshop 1 hour; online quiz 1 hour	0	Y	Group
Creative coverage storyboard exercise	500 words equivalent	30	N	Individual
Review, analysis of film/TV program/game	1 500 words	30	N	Individual
Short Media Presentation	1 500 words equivalent plus visual work (maximum of 3 minutes)	40	N	Individual

Teaching Periods

COMM 7004 In the Realms of the Sensory: Ecologies of Word, Sound and Image

Credit Points 10

Legacy Code 102342

Coordinator Peter Mauch ([https://directory.westernsydney.edu.au/search/name/Peter Mauch/](https://directory.westernsydney.edu.au/search/name/Peter%20Mauch/))

Description This unit develops an awareness of the cultural, aesthetic and sensory contexts in which the communication, design and creative arts are practiced. It examines approaches to creative practice and the role that creativity and experimentation, as well as collaboration and social creativity, play in the research process. Particular attention is paid to visual, aural, and alphabetic technologies, and the form of augmented virtual realities and artefacts they create. Mimicry, novelty and improvisation, critique and speculation, 'handability' or tacit knowledge are some of the practices and concepts studied. While the unit is designed for students engaged in creative research, it has relevance for those analysing creative works as part of their research.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify theories of creative practice relevant to creative work
2. Apply, integrate and extend theoretical perspectives on creative work
3. Use creative practice as a method for the production of novel theoretical perspectives
4. Evaluate the cultural, technological and sensory aspects of creative work
5. Originate novel integrations of theory, research and practice.

Subject Content

- approaches to Creative practice and research
- theories of culture and communication
- Interfaces and affect
- Novelty, mimicry, and improvisation as forms of experimentation and research
- Sensory, virtual and augmented Realities
- Ontological design
- reflective practice
- Immanent listening
- Ontologies of music, voice and sound
- research led practice

Teaching Periods

COMM 7006 Media Project Production

Credit Points 20

Legacy Code 101745

Coordinator Maryella Hatfield ([https://directory.westernsydney.edu.au/search/name/Maryella Hatfield/](https://directory.westernsydney.edu.au/search/name/Maryella%20Hatfield/))

Description This unit offers an individual, or group of, student(s) the opportunity to develop, produce and evaluate a Media Project developed in the Media Project Proposal Unit. The project production will cover implementation and evaluation issues relevant to media products. The final product is intended to be a significant new media project prototype. Individual students can negotiate the project of their choice, but this should be based on the Media Project Proposal (or equivalent) developed in the Spring Semester, or first half of semester if you are a full time student. A 5,000 word report forms part of the assessment.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 20cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) COMM 7007

Equivalent Subjects LGYA 1411 - Media Production

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Broad understanding of convergent media forms and processes; specific knowledge of project development including concept and design development.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop an appropriate and detailed project production plan in relation to their proposal brief, including management of content, design and human resource components and applicable timelines.
2. Research and develop stages of the production of their proposal and apply to their project work.
3. Implement the prototype/pilot stage of a significant media project of marketable quality
4. Work as an effective part of a production team to produce a major project.
5. Demonstrate a high level of professional presentation skills through the pitch of the final project.
6. Evaluate a complex product using appropriately identified and applied evaluation techniques.
7. Apply advanced skills in self-directed learning.

Subject Content

- production planning and management
- Project production
- Product evaluation and user testing
- Product Revision
- Project presentation for peer and expert panel Review

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Major Project and Presentation	30 minutes duration and 12 powerpoint slides. Oral presentation of the convergent media prototype or pilot.	60	N	Individual
Written Report	5,000 words	40	N	Individual

Teaching Periods

COMM 7008 Media Research Project

Credit Points 20

Legacy Code 102521

Coordinator Kate Richards ([https://directory.westernsydney.edu.au/search/name/Kate Richards/](https://directory.westernsydney.edu.au/search/name/Kate%20Richards/))

Description This research-focused unit enables students to develop and produce a major work on a convergent media subject and theme, such as: communications and design theories and practices, data visualisation, content creation for convergent media, and digital humanities. The unit will cover methods for designing and implementing an academic or practice-based research project through workshops and exercises. Students may be introduced to techniques

for: differentiating appropriate research methodologies; integrating research techniques into the planning and creation of a research project; field research, action research and research-creation; devising a literature review and constructing a logical argument; and critical reading.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 20cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use various research methods and processes.
2. Identify the most suitable approach for a given research problem or question in the field of convergent media.
3. Develop a research question and a subsequent research plan.
4. Conduct research based on the research plan and selected methods.
5. Reflect critically upon research findings.
6. Present research findings and outcomes.

Subject Content

Research methods and processes.

Case studies in convergent media research.

The role of research in convergent media professions.

Establishment of an original research question.

Development of a research plan to include either an academic written essay or practice-based outcome.

Conducting research methods and processes as per research plan.

Presentation of final research outcome.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Research Proposal	1,200-1,500 words	15	N	Individual
Literature Review	10,000-12,000 words	25	N	Individual

a. Research Report OR b. Practical Research Report and Exegesis	a. 60 words OR b. Written exegesis 3,000 words plus practical convergent media project to be negotiated with the unit coordinator	N	Individual

COMM 7009 Mobile Media

Credit Points 10

Legacy Code 101743

Coordinator Kate Richards ([https://directory.westernsydney.edu.au/search/name/Kate Richards/](https://directory.westernsydney.edu.au/search/name/Kate%20Richards/))

Description The proliferation of the mobile device and the evolution of mobile networks has profoundly changed the social and interpersonal sphere and the global media landscape. This unit combines both theory and practice to engage with Mobile Communications and Society: the cultural, family and interpersonal consequences of mobile communication and its effect on every day life, social cohesion, political and economic activities, social development and change, and Mobile Media: current media production and distribution platforms, practices and trends. This unit includes the production of content for distribution via mobile devices.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the main theoretical issues associated with the adoption and use of mobile communication
2. Critically evaluate the social consequences of mobile communication
3. Independently identify an interesting research question about mobile communication and society and carry out an empirical or theoretical enquiry.
4. Contextualize mobile media production and distribution within the converged media landscape
5. Describe history of mobile media and the methods of mobile media production and distribution
6. Manage the production and delivery of mobile media content
7. Research, plan and pitch a mobile media project

Subject Content

- Mobile media and Communications introduction
- Mobiles and The personal sphere
- Mobiles and The public sphere: politics, Civil society, activism, social movements, social capital, regulation
- digital Divides: Mobiles for development and social mobility
- Mobile as A Mass medium
- characteristics of The Mobile medium
- content Distribution on Mobiles: types, modes and platforms
- content Standards and Formats for Mobile media production and delivery
- Streaming video/Mobile TV
- Walled Garden Vs Mobile internet
- Mobile Advertising
- Mobile media: business Models & Consumption Trends
- Mobile internet best practices

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Research Report: Mobile Communication and Society	1,500 words	40	N	Individual
Mobile Media Production		20	N	Individual
Mobile Media Campaign Pitch/ Presentation	15 minute powerpoint presentation 10-12 slides, and written report of maximum 1,500 words	40	N	Individual

Teaching Periods

COMM 7010 New Genres in Research Writing

Credit Points 10

Legacy Code 102662

Coordinator Anna Gibbs ([https://directory.westernsydney.edu.au/search/name/Anna Gibbs/](https://directory.westernsydney.edu.au/search/name/Anna%20Gibbs/))

Description This unit focuses on new, innovative, interdisciplinary genres of writing arising after the putative end of critique and with the rise of non-representational thought. These new writing practices mix genres and meld theoretical, critical and creative modes. Focusing on fictocriticism, creative nonfiction, documentary fiction and the multi-media essay, we explore the experimental ethos and affective and new materialist methodologies to which these forms lend themselves. Students will develop a body of original creative-critical work in any genre through a series of seminars and writing workshops.

School Humanities & Comm Arts

Discipline Written Communication

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically reflect on the new interdisciplinary forms of writing across the Humanities.
2. Explain writing as a research practice.
3. Critically evaluate complex information, perspectives, and theories relevant to new scholarly writing practices.
4. Creatively stage or perform theoretical propositions, methodologies and conclusions through analysis through critical-creative writing strategies.
5. Demonstrate creative and technical skills to bring complex concepts to life in a practical project.
6. Design and execute a substantial research-based project with a high level of autonomy and accountability.

Subject Content

Seminars will address the history and practice of new forms of writing arising across the humanities disciplines, with reference to particular examples. Students will also participate in writing workshops to develop their own projects on the basis of a series of individual and collaborative exercises engaging practically and experientially with the concepts addressed in the unit.

1. Writing, subjectivity and corporeality
2. Reflexivity and intertextuality in new research genres
3. The politics of form: genre, gender, race and ethnicity
4. Hybrid writing and generic mixing
5. Questions of address, authority and authorisation
6. After critique: experimental method
7. Affective and new materialist methodologies

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Short Answer - submission of 2 class exercises	1,000 words	35	N	Individual

Applied project - Critical Creative essay (4,000 words) OR Creative - Critical project plus (1,000 word) critical reflection (3,000 words total)	Essay - 4,000 words Creative project plus reflection 3,000 words	65	N	Individual

COMM 7011 Researching Convergent Media

Credit Points 10

Legacy Code 101962

Coordinator Hart Cohen ([https://directory.westernsydney.edu.au/search/name/Hart Cohen/](https://directory.westernsydney.edu.au/search/name/Hart%20Cohen/))

Description The contemporary creative industries landscape is characterised by the breakdown of traditional media silos and the transformation of media production and consumption practices. Media, marketing and creative professionals are now required to understand and connect with their audiences across multiple media platforms and to undertake diverse research deploying many new methodologies. The aim of this unit is to provide students with an historical, geopolitical and theoretical introduction to research in the creative industries. The case studies and topics covered vary from semester to semester and can include data visualisation, digital ethnography, digital games, community media, digital arts, activist networks, social media and cross platform projects. Using current media theory, design theories, and research methodologies, students will select, analyse and contextualise case studies.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 1632 - Methods and Case Studies in Convergent Media

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and articulate the key themes associated with creative industries research and contexts.
2. Explain the main theoretical issues associated with the theory and practice of convergent media through participation in the MCM wiki and written work.
3. Outline the precedents and archaeologies of convergent media and discuss them in relation to their research question.

4. Demonstrate competency in critically evaluating a research question and/or case study and the associated theoretical context.
5. Select and apply appropriate research methodologies to their research question in the case study/ paper assignment.
6. Apply advanced skills in self-directed research and writing to independently identify and articulate an appropriate research question for the case study or paper.
7. Identify and articulate the key themes associated with convergent media concepts, research, and contexts.
8. Explain the main theoretical issues associated with the theory and practice of research for the creative industries.
9. Outline the precedents and archaeologies of the creative industries and discuss them in relation to their research question.
10. Select and apply appropriate research methodologies to their research question in the case study/ paper assignment.
11. Apply advanced skills in self-directed research and writing to independently identify and articulate an appropriate research question for the case study or paper.

Subject Content

Module 1: Understanding Convergent Media precedents and archaeologies

Module 2: Researching Convergent Media design and practice

Module 3: Contextualising Convergent Media within current technological, social and political terrains

Topics covered can include: the cultural logic of convergent media; emerging ecologies and genres; affective experience and embodied cognition; the digital divide, economic development and convergent technologies; broadband futures; new media art; locative media; collective intelligence and social networking.

Understanding precedents and archaeologies in research for the creative industries.

Researching design and practice in the creative industries

Contextualising the creative industries within current technological, social and political terrains

Drawing from creative industries research case studies topics covered in this subject can include: emerging ecologies and genres in the creative industries; affective experience and embodied cognition; the digital divide, economic development and convergent technologies; broadband futures; new media art; locative media; collective intelligence and social networking.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Short Answer	500 words per entry	25	N	Individual
Annotated Bibliography	200 words per text source	25	N	Individual

COMM 7012 Strategic Communication

Credit Points 20

Legacy Code 102292

Coordinator Tanya Notley ([https://directory.westernsydney.edu.au/search/name/Tanya Notley/](https://directory.westernsydney.edu.au/search/name/Tanya%20Notley/))

Description Local and international industry trends show that strategic communication, particularly including agendas of innovation and ethics, are a growing force in the convergent media landscape. This unit introduces students to both the science and art of strategic communication. It is grounded in an advanced understanding of the complexity of human communication processes and driven by a conviction that systematic research and analysis is required to inform strategic communication responses. This unit is based around a series of assessments that require students to address a real-world business challenge or a social issue in ways that take advantage of convergent media environments.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 20cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 1704 - Strategic Communication

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the importance, historical foundations and current application of strategy in successful communication interventions, and be able to identify a diverse range of approaches and methodologies that can be applied to real world needs or problems.
2. Analyse and critique communication strategies embedded within government, corporate, and third sector interventions.
3. Establish criteria for evaluation of strategic convergent media interventions.
4. Undertake relevant research to develop and leverage strategies for 'real world' convergent media interventions; show experience in the use of research to apply theory and modelling to develop effective strategic communication responses.
5. Think critically and creatively to articulate a strategic vision that is based on evidence and driven by theory.

6. Consolidate research findings into a strategic brief/pitch presentation and a final strategic response document.

Subject Content

This subject is delivered in 3 modules:

Module 1: Introduction to strategic thinking and design. This module focuses on the origins and principles of strategic thinking and practice. Through historical case studies (largely from political and commercial domains), students will consider the way that underlying principle informs the formation and development of enlightened strategy. (3 weeks)

Module 2: The science of strategic communication. This module focuses on the gathering and interpretation of empirical and non-empirical data, with an emphasis on data as a key driver of insightful strategy formation. By working with real-life problems students will learn to source and analyse relevant data so as to see and understand a specific environment in ways that inform a strategic response. (4 weeks)

Module 3: The art of strategic communication. By working with the analysis undertaken in Module 2, students will learn to test, critique, and apply relevant models and theories to their analysis in order to design a strategic response to a real-life problem. This application will be used to design a strategic narrative intervention informed by research and driven by theory. (5 weeks).

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Strategic Communication Review. Students analyse and present two strategic communication initiatives	5 minute in class presentation	10	N	Individual
Project Proposal. Students identify a problem or need and propose a research plan and potential models and theories they will investigate to develop a strategic response	5-10 minute in-class presentation and 1,000 word proposal	15	N	Individual

Progress Reports. Students will receive one-on-one mentorship throughout this unit. Students' preparedness for meetings will be assessed	2 x meetings assessed on preparedness and responses	15	N	Individual
--	---	----	---	------------

Student Response. Students will design a strategic response that is based on their research and analysis	5-10 minute in-class presentation and a 4,000 word proposal OR production of design/ media prototype with a 1,000 word report	60	N	Individual
--	---	----	---	------------

Teaching Periods

COMM 7013 Ideate, Develop: Makerspace 1

Credit Points 10

Legacy Code 102717

Coordinator Kate Richards ([https://directory.westernsydney.edu.au/search/name/Kate Richards/](https://directory.westernsydney.edu.au/search/name/Kate%20Richards/))

Description Ideation is at the core of creative industries. This practice-led research unit will teach you how to ideate, develop and pitch a major project, which you can then produce in the Makerspace 2 unit. We will show you how to mobilise your own creative interests, how to identify and research a creative or market challenge, and teach you techniques for generating ideas and innovative solutions-based responses. You'll learn systemic methods and tools for creative ideation across multiple platforms and channels, including UX (user experience), UI (user interactivity), design thinking, IA (information architecture) and UCD (user centred design). We'll also teach you how to pitch your project so it captures the imagination and attention of clients and audiences.

School Humanities & Comm Arts

Discipline Communication and Media Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects COMM 7007 - Media Project Proposal

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Broad understanding of convergent media forms and processes.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply design practice and processes through using research methods in creative industries for the development of a creative industries project proposal.
2. Define and implement appropriate research methodologies for the background, technical design and creative processes involved in the ideation and development of a creative industries project proposal.
3. Identify, critique and evaluate precedent creative industries projects that promote effective communication, interaction, and user experiences through precedent appraisals within the project proposal document.
4. Apply a balanced approach for the design, testing and refinement of the strategy in the project proposal document and in planning for the production of a proof of concept or final project.
5. Demonstrate high level of professional presentation skills through pitching the project proposal stages.

Subject Content

1. The roles of ideation and creative development in creative industries projects and business models.
2. Methodologies and methods for identifying and applying ideation and creative developments methods to a core concept.
3. Choosing an appropriate and viable platform/channel.
4. The roles and methodologies of background, precedent and audience research.
5. User centred design strategies for creative and audience development, including branding, UX and IA.
6. Introduction to business models and understanding of their application.
7. Skillset for proposing a creative industries project including structure, writing and illustration.
8. Scoping and planning for pilot/proof of concept, and associated documentation artefacts.
9. Presentation skills for peer, teacher and industry review.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Proposal 1	1000 words	20	N	Individual
Presentation	10 slides and 10 minutes	10	N	Individual
Proposal 2	1000 words	20	N	Individual
Presentation	10 slides and 10 minutes	10	N	Individual
Final Proposal	1500 words	30	N	Individual
Presentation	10 – 15 slides and 15 minutes	10	N	Individual

Teaching Periods

COMM 7014 Innovate: The Entrepreneurial Mindset

Credit Points 10

Legacy Code 102719

Coordinator Kate Richards ([https://directory.westernsydney.edu.au/search/name/Kate Richards/](https://directory.westernsydney.edu.au/search/name/Kate%20Richards/))

Description This unit focuses on current trends and issues in innovation and entrepreneurship in the creative industries with a strong focus on small to media enterprises (SME), ventures within existing business and within government. The unit addresses methodologies for innovation, such as design-thinking and futuring; the role and efficacy of public and private incubators; the forms, foundations, qualities and capacity of entrepreneurship and business development strategies; and the role of networking and industry partnerships, with a focus on the capacities of social media to effect change in markets and partnerships, and business development strategies. The unit covers existing 'new' business models and emerging trends, such as social entrepreneurship and co-working spaces. The unit builds on previous capstone units Ideate, Develop: Makerspace 1 and Produce, Generate: Makerspace 2 in introducing further methods for creative ideation with a focus on technology.

School Humanities & Comm Arts

Discipline Communication And Media Studies

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects COMM 7005 - Innovation and Entrepreneurship PG

Restrictions

Students must be enrolled in a postgraduate program. Any postgraduate coursework students in the second year of study are encouraged to elect into this unit, for example from ICT, Computer Science, Business Studies, MBA, Advertising etc.

Assumed Knowledge

A general understanding of capitalism as an economic model; general understanding of how creative industries develop original IP into goods and services.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine specified methods for identifying innovation potential and relevant theories of entrepreneurship and entrepreneurialism.
2. Discern and critically evaluate trends and models in an innovation and entrepreneurship case study.
3. Contextualise creative industries projects within models of entrepreneurship.
4. Apply business development skills to a creative industries business plan.
5. Identify and apply the key drivers for fuelling innovation in the entrepreneurial eco-system.

Subject Content

1. Innovation as methodology and method.

2. Current trends such as creative economies, creative precincts and co-working.
3. Complexity theory and design thinking for innovation.
4. The 21st Century relationships between innovation and Entrepreneurship.
5. Theories and models of entrepreneurship.
6. Business development skills: planning, metrics, B2B, information requirements.
7. Roles of social media and digital marketing in innovation and entrepreneurship.

Innovation as methodology and method.

Current trends such as creative economies, creative precincts and co-working.

Complexity theory and design thinking for innovation.

The 21st Century relationships between innovation and Entrepreneurship.

Theories and models of entrepreneurship.

Business development skills: planning, metrics, B2B, information requirements.

Roles of social media and digital marketing in innovation and entrepreneurship.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Case Study	1,500 words	20	N	Individual
Presentation	10 minutes (10 slides)	10	N	Individual
Professional Task	1,000 words plus one-page business canvas	30	N	Individual
Professional Task	1,500 words	30	N	Individual
Presentation	10 minutes (10 slides)	10	N	Individual

COMP 0001 Introductory Programming (WSTC Prep)

Credit Points 10

Legacy Code 700204

Coordinator Zdenka Misanovic (<https://directory.westernsydney.edu.au/search/name/Zdenka Misanovic/>)

Description The unit introduces students to computer programming as an essential tool for problem-solving and data analysis in engineering and science. The focus is on using an algorithmic approach to problem solving. Students will learn how to analyse and solve problems by designing an algorithm and implementing it in a high-level programming language. This unit includes extensive practical work and problem-solving activities. It prepares students for the first year unit, Engineering Computing, in the Bachelor programs in Engineering. Students will also be able to use their acquired programming skills to perform calculations, analyse data and create graphs for their projects and reports in other units.

School Western Sydney The College

Discipline Programming

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 0 Preparatory subject

Equivalent Subjects COMP 0002 - Introductory Programming (UWSC)

Restrictions Students must be enrolled at Western Sydney University, The College.

Assumed Knowledge

The ability to create a mathematical expression for a given problem scenario. This would require knowledge of basic arithmetic, percentages and simple statistical measures.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply basic programming control structures (sequence, selection, iteration)
2. Apply algorithmic approaches to design solutions to simple problems in engineering (using a flowchart or pseudocode)
3. Create simple computer programs based on student-designed algorithmic solutions
4. Demonstrate skills in documenting, debugging and testing computer programs
5. Create structured programs and programs for analysis of large data sets

Subject Content

1. Introduction to programming (Weeks 1 & 2)
 - a. Introduction to problem solving
 - b. Introduction to programming design
 - c. Introduction to editing, building and testing.
2. Independent Programming (Weeks 3, 4 and 5)
 - a. Introduction to modularised algorithmic problem solving and robustness
 - b. Introduction to modularised algorithmic programming design
 - c. Intermediate editing, building and robustness testing
3. Engineering Data Analysis (Weeks 6, 7, 8 and 9)
 - a. Algorithms for acquiring and checking data
 - b. Algorithms for processing data
 - c. Algorithms for graphical and statistical analysis
 - d. Testing and verifying programs for data analysis
4. Advanced Programming design (Week 10 & 11)
 - a. Factorisation of code

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Practical	30 Minutes	5	N	Individual
Practical	30 Minutes	10	N	Individual
Practical	Approximately 10 up to 100 lines of code		N	Group
Practical	30 Minutes	15	N	Individual
Applied Project	Approx. up to 300 lines of code	20	N	Individual
End-of-session Exam	2 hours	40	N	Individual

Assumed Knowledge

The ability to create a mathematical expression for a given problem scenario. This would require knowledge of basic arithmetic, percentages and simple statistical measures.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe what is meant by the terms programming and structured programming.
2. Describe the steps involved in the program development process in solving problems.
3. Illustrate the steps involved in program development using IPO charts.
4. Explain what is meant by the term programming language.
5. Design an algorithm that applies structured programming techniques to solve a given problem.
6. Develop a set of input test data and deskcheck pseudocode.
7. Describe what is meant by modularisation, module cohesion and coupling and parameter passing with different aspects of cohesion and coupling.
8. Design and implement a program solution using an Integrated Development Environment.

Subject Content

1. Introduction to program design
2. Introduction to IPO charts flow charts and pseudocode algorithms
3. Introduction to selection control structures
4. Introduction to repetition control structures
5. Introduction to desk checking the solution algorithm
6. Introduction to modularisation, cohesion and coupling

COMP 1005 Programming Fundamentals

Credit Points 10

Legacy Code 300580

Coordinator Anton Bogdanovych ([https://directory.westernsydney.edu.au/search/name/Anton Bogdanovych/](https://directory.westernsydney.edu.au/search/name/Anton%20Bogdanovych/))

Description As a first unit in computer programming, Programming Fundamentals covers the basics of developing software with an emphasis on procedural programming. Students will learn about basic data structures, the concept of algorithms, fundamental programming constructs, common programming language features and functions, program design and good programming style. A high level programming language is combined with a highly visual framework to teach problem solving using software.

School Computer, Data & Math Sciences

Discipline Programming

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects COMP 1004 - Fundamentals of Programming LGYA 5799 - Programming Principles 1 LGYA 4364 - Business Application Development 1 COMP 1006 - Programming Fundamentals (WSTC)

Assumed Knowledge

High school mathematics at Year 10 level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. With a chosen programming language in mind, analyse a given problem and from a simple problem description, identify desired inputs, outputs, and the necessary processing operations to convert input into output;
2. Develop an algorithm that applies structured programming techniques that solve the given problem;
3. Choose suitable data types to store relevant data for the given problem;
4. Design and code programs which use standard programming concepts: variables, sequence, loops, decision making constructs, mathematical and boolean operators, as well as functions;
5. Apply top-down modular design principles to programming problems and implement the solution using the chosen programming language.

Subject Content

1. Fundamentals of procedural programming including: a. variables and data types; b. performing calculations; c. sequence; d. compound statements; e. decision making constructs; f. looping constructs; g. problem solving techniques; h. writing and using functions; i. one dimensional arrays
2. Keyboard input
3. Techniques of algorithm development
4. Using variables - selecting variable names and variable scope
5. Functions, function return values and parameter passing
6. Arrays

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	15 minutes	0	Y	Individual
Portfolio	2 hours per week	40	Y	Individual
Quiz	60 minutes	20	N	Individual
Applied Project	The solution file is expected to be approximately 500-700 lines of code.	20	N	Individual
Final Exam	2 hours, closed book	20	Y	Individual

COMP 1006 Programming Fundamentals (WSTC)

Credit Points 10

Legacy Code 700008

Coordinator Buddhima De Silva ([https://directory.westernsydney.edu.au/search/name/Buddhima De Silva/](https://directory.westernsydney.edu.au/search/name/Buddhima%20De%20Silva/))

Description As a first unit in computer programming, Programming Fundamentals covers the basics of developing software with an emphasis on procedural programming. Students will learn about basic data structures, the concept of algorithms, fundamental programming constructs, common programming language features and functions, program design and good programming style. A high level programming language is combined with a highly visual framework to teach problem solving using software.

School Computer, Data & Math Sciences

Discipline Programming

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Pre-requisite(s) Students enrolled in 7067 Diploma in Information and Communications Technology Extended must pass LANG 0002 Academic Communication 2 (WSTC Prep) or LANG 0032 English for

Tertiary Study 2 (WSTC Prep) or LANG 0039 Introduction to Academic Communication 2 (WSTC Prep) and must pass INFO 0008 Computer Studies (WSTC Prep) and must pass COMP 0003 Programming Design (WSTC Prep) and must pass MATH 0008 Mathematics 2 (WSTC Prep) before enrolling in this unit

Students enrolled in 6035 Diploma Bachelor of Information and Communications Technology 6036 Diploma in Information and Communications Technology Bachelor of Information Systems and 7005 Diploma in Information and Communications Technology must pass COMP 0003 Programming Design (WSTC Prep) before enrolling in this unit

Students enrolled in 6038 Dip in Information and Communications Technology BICT(HIM) 6039 Diploma in Information and Communications Technology BICT 6040 Diploma in Information and Communications Technology BIS 7067 Diploma in Information and Communications Technology Extended 7134 Diploma in Information and Communications Technology Extended - ICT 7138 Diploma in Information and Communications Technology Extended-ICT 7139 Diploma in Information and Communications Technology Extended - IS 7141 Diploma in Information and Communications Technology Extended-HIM 7163 Diploma in Information and Communications Technology (International) and 7164 Dip Information and Communications Technology (HIM) (International) must pass COMP 0003 Programming Design (WSTC Prep) and must pass MATH 0008 Mathematics 2 (WSTC Prep) before enrolling in this unit

Equivalent Subjects COMP 1004 - Fundamentals of Programming LGYA 5799 - Programming Principles 1 LGYA 4364 - Business Application Development 1 COMP 1005 - Programming Fundamentals

Restrictions Students must be enrolled at Western Sydney University, The College. Students enrolled in Extended Diplomas must pass 40 credit points from the preparatory subjects listed in the program structure prior to enrolling in this University level subject. Students enrolled in the combined Diploma/Bachelor programs listed below must pass all College Preparatory subjects listed in the program structure before progressing to the Year 2 subjects.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. With a chosen programming language in mind ? analyse a given problem and from a simple problem description, identify desired inputs, outputs and the necessary processing operations to convert input into output;
2. Develop an algorithm that applies structured programming techniques that solve the given problem;
3. Choose suitable data types to store relevant data for the given problem;
4. Design and code programs which use standard programming concepts; variables, sequence, loops, decision making constructs, mathematical and Boolean operators, as well as functions;
5. Apply top-down modular design principles to programming problems and implement the solution using the chosen programming language.

Subject Content

1. Fundamentals of procedural programming including:
 - a) variables and data types
 - b) performing calculations
 - c) sequence
 - d) compound statements
 - e) decision making constructs
 - f) looping constructs

- g) problem solving techniques
 - h) writing and using functions
 - i) one dimensional arrays
2. Keyboard input
 3. Techniques of algorithm development
 4. Using variables ? selecting variable names and variable scope
 5. Functions, function return values and parameter passing
 6. Arrays

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Portfolio	20 mins each wk	10%	N	Individual
Quizzes	X2 (10%) 60 mins each	20	N	Individual
Applied Project	700-800 lines of code	20%	N	Individual
End of Session Exam	2 hours	50%	Y	Individual

Block A

Credit Points 0

Legacy Code 300587

Coordinator Yun Bai ([https://directory.westernsydney.edu.au/search/name/Yun Bai/](https://directory.westernsydney.edu.au/search/name/Yun%20Bai/))

Description This unit is only for Bachelor of Computer Science (Advanced) students in year two of their studies. Students will participate in industry and research based extension activities (non-assessable). These activities will be identified with the goal of exposing students early in their degree and integrating them into a culture of academic enquiry, problem solving, knowledge generation and scholarship and an awareness of the challenges and current issues confronting the computing/IT industry. The unit will be used to record student activities and a satisfactory/ unsatisfactory grade will be applied at the end of each semester.

Coordinator Roozbeh Hazrat ([https://directory.westernsydney.edu.au/search/name/Roozbeh Hazrat/](https://directory.westernsydney.edu.au/search/name/Roozbeh%20Hazrat/))

Description This unit will introduce the popular computational software Mathematica, through which students will explore and investigate real-world mathematical problems. The unit promotes an experimental side of mathematics and will employ symbolic computation to gain insight and intuition into problems, to discover mathematical patterns and relationships, and create impressive graphics to expose mathematical structures.

School Computer, Data & Math Sciences

Discipline Mathematical Sciences

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) MATH 1014

Assumed Knowledge

Students should be comfortable with high school level of Mathematics and have passed Mathematics 1A. This is required to carry out more advanced projects in the subject.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

COMP 2004 Computer Networking

Credit Points 10

Legacy Code 300565

Coordinator Nabil Giweli ([https://directory.westernsydney.edu.au/search/name/Nabil Giweli/](https://directory.westernsydney.edu.au/search/name/Nabil%20Giweli/))

Description Computer Networking is an introductory unit in computer systems networking. It covers basic networking technologies, Ethernet fundamentals, ISO OSI model, routing, switching and subnetting, the Internet architecture, networking protocols including TCP/IP, important OSI layer 2 and 3 networking device fundamentals, basic network management and security issues. This unit is also the first of three units, which will prepare students for industry based networking certification (CCNA).

School Computer, Data & Math Sciences

Discipline Networks and Communications

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects COMP 2007 - Computer Networking Fundamentals
LGYA 5739 - Applied Data Communications and Networking
COMP 2006 - Computer Networking (WSTC)

Assumed Knowledge

Fundamentals of computer architecture, binary and hexadecimal numbering systems, and programming principles. They should also have a working knowledge of the World Wide Web.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Examine the fundamental concepts and protocols for computer networking and internetworking.
2. Investigate and analyse the Internet architecture.
3. Analyse the significance of the OSI and TCP/IP models, protocol stacks and their operation in computer networks.
4. Evaluate modern technologies in computer networking.
5. Investigate the functions of important OSI layer 2 and OSI layer 3 networking devices.
6. Assess the management practices and security requirements of computer networks.

7. Construct, test and troubleshoot a small LAN.
8. Subnet a small business network given design criteria.

Subject Content

- concepts of computer networking and internetworking.
- internet architecture.
- An introduction to The operation of The major protocols used in computer networking.
- The OSI model, TCP/IP Protocol stack and IP addressing.
- Understanding of The TCP/IP Protocol stack and its operation in data networks.
- modern data communication and networking technologies.
- management and security requirements of computer networks.
- identification and Review of networking media.
- introduction to Ethernet technologies and switching.
- Routing fundamentals and subnetting.
- construct and Evaluate Network performance in LANs.

Pre-requisite(s) Students enrolled in 7067 Diploma in Information and Communications Technology Extended and 7134 Diploma in Information and Communications Technology Extended – ICT must pass LANG 0002 Academic Communication 2 (WSTC Prep) or LANG 0032 English for Tertiary Study 2 (WSTC Prep) or LANG 0039 Introduction to Academic Communication 2 (WSTC Prep) and must pass INFO 0008 Computer Studies (WSTC Prep) before enrolling in this unit

Students enrolled in 7138 Diploma in Information and Communications Technology Extended-ICT 7139 Diploma in Information and Communications Technology Extended 7140 Diploma in Information and Communications Technology Extended-IS and 7141 Diploma in Information and Communications Technology Extended-HIM must pass LANG 0012 Academic Professional Communication (WSTC Prep)

and must pass INFO 0001 Academic Skills for ICT (WSTC Prep) before enrolling in this unit

Equivalent Subjects COMP 2007 - Computer Networking Fundamentals LGYA 5739 - Applied Data Communications and Networking COMP 2004 - Computer Networking

Restrictions Students must be enrolled at Western Sydney University, The College. Students enrolled in Extended Diploma programs must have passed 40 credit points of preparatory subjects in order to enrol in this subject. Students enrolled in the combined Diploma/Bachelor programs listed below must pass all College Preparatory subjects listed in the program structure before progressing to the Year 2 subjects.

Assumed Knowledge

Fundamentals of computer architecture, binary and hexadecimal numbering systems and programming principles. Students should also have a working knowledge of the World Wide Web.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify the basic concepts and protocols of computer networking and internetworking.
2. Describe and define the internet architecture.
3. Explain the significance of the OSI and TCP/IP models, protocol stacks and their operation in computer networks.
4. Identify and describe modern technologies in computer networking.
5. Examine and review the functions of important OSI layer 2 and OSI layer 3 networking devices.
6. Apply and utilise the basic management and security requirements of computer networks.
7. Design, construct and test a simple LAN.
8. Subnet a network given design criteria.

Subject Content

1. Basic concepts of computer networking and internetworking.
2. Internet architecture.
3. An introduction to the operation of the major protocols used in computer networking.
4. The OSI model, TCP/IP protocol stack and IP addressing.
5. Basic understanding of the TCP/IP protocol stack and its operation in data networks.
6. Modern data communication and networking technologies.
7. Basic management and security requirements of computer networks.
8. Identification and review of networking media.
9. Introduction to Ethernet technologies and switching.
10. Basic routing fundamentals and subnetting.
11. Construct and evaluate network performance in simple LANs.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Participation		10	N	
Quiz		15	N	
Practical Exam		20	N	
Quiz		5	N

COMP 2008 Computer Organisation

Credit Points 10

Legacy Code 300096

Coordinator Jianhua Yang ([https://directory.westernsydney.edu.au/search/name/Jianhua Yang/](https://directory.westernsydney.edu.au/search/name/Jianhua%20Yang/))

Description This unit is designed for computer science students, particularly those interested in systems programming and hardware development. The students will learn about the interface between the hardware and software of a computer system. This will involve study of some aspects of computer architecture and low level interfacing to gain an insight into central processing unit (CPU) organisation at the assembly language level. After completing this unit students will be able to write procedures in an assembly language, use their understanding of the relationship between the instruction set architecture and the implementation of high level languages to write efficient programs.

School Computer, Data & Math Sciences

Discipline Programming

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) The following pre-requisite unit applies to course 3771 only
ENGR 1045 Engineering Programming Fundamentals

The following pre-requisites apply to all courses except 3771

COMP 1005 Programming Fundamentals OR
ELEC 1006 Engineering Computing AND
MATH 1006 Discrete Mathematics OR
MATH 1016 Mathematics for Engineers 1

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Consider the Instruction Set Architecture (ISA) in order to carry out assembly programming tasks.
2. Examine the stored program concept and internal representation of different types of data.
3. Examine the memory hierarchy and how this relates to computer system performance.
4. Identify the hardware mechanisms that support interrupt handling and how the latter is used to implement I/O control.
5. Explain the structure of datapath and control as well as the basic instruction level parallelism using pipelining.
6. Critique fundamental issues in evaluating computer system performance.

Subject Content

1. Machine level representation of data including integer and floating point arithmetic, characters, and arrays; arithmetic and logical operations.
2. Assembly level machine organisation and assembly language programming including instruction set architecture, instruction formats, instruction execution cycle, addressing modes, subroutine call and return mechanisms.
3. Memory organisation and architecture including memory hierarchy, main memory, cache memories, virtual memory.
4. Types and characteristics of I/O devices, interfacing and communication within a computer system, physical organisation and performance of magnetic disks.
5. Hardware support for interrupts, programmed and interrupt-driven I/O, interrupt priority levels.
6. Pipelining and instruction level parallelism (ILP), pipeline hazards.
7. The basics of logic circuit design including fundamental building blocks and minimisation of logic expressions.
8. Functional level machine organisation, implementation of datapath and control unit.
9. Computer system performance measurements and benchmarking, Amdahl's law.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Laboratory exercises	11 x 2 hours	40	N	Individual
2 x In-class quizzes	2 x 20 minutes (per Quiz)	10	N	Individual
Final exam	2 hours	50	N	Individual

COMP 2009 Data Structures and Algorithms

Credit Points 10

Legacy Code 300103

Coordinator Dongmo Zhang ([https://directory.westernsydney.edu.au/search/name/Dongmo Zhang/](https://directory.westernsydney.edu.au/search/name/Dongmo%20Zhang/))

Description This unit introduces students to fundamental data structures and algorithms used in computing. The material covered forms the basis for further studies in programming and software engineering in later units and for further training in programming skills. The unit focuses on the ideas of data abstraction and algorithm efficiency. The issues of computational complexity of algorithms are addressed throughout the semester. The topics covered include the fundamental abstract data types (lists, stacks, queues, trees, hash tables, graphs), recursion, complexity of algorithms, sorting and searching algorithms, binary search trees and graphs.

School Computer, Data & Math Sciences

Discipline Data Structures

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) COMP 2014 OR
COMP 2015 OR
COMP 2016 OR
ENGR 1045

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Select appropriate data structures to solve moderately complex programming problems.
2. Discuss time and space tradeoffs among different data structures that could be used to represent specific information.
3. Perform time-complexity analysis against multiple implementations of various abstract data types.
4. Write programs that use the fundamental abstract data types: linked list, stack, queue, hash table, binary search tree, heap, graph.
5. Select efficient sorting and searching algorithms to solve moderately complex programming problems.

Subject Content

- Basic concepts: abstract data types, Big-O concept and Complexity analysis.
- Stacks and queues: ADT specification, implementation strategies and applications.
- variations of linked lists: Doubly linked lists and circular lists.
- recursion: recursive functions and divide-and-conquer approach.
- trees: Binary trees, Binary search trees, AVL trees, and heaps.
- Graphs: Adjacency matrix and Adjacency list implementations, depth-first search, breadth-first search, and minimum spanning tree algorithms.
- Searching: Sequential search, Binary search and hashing.
- Elementary sorting algorithms: insertion sort, selection sort, and bubble sort.
- advanced sorting algorithms: quick sort, heap sort, and shell sort.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical	2 hours (each 14 practical)		N	Individual
Quiz	30 minutes each	6	N	Individual
Applied Project	Around 600-800 lines of code and up to 4 A4 pages of algorithm description and analysis for each assignment	30	N	Individual
Final Exam	Two-hour	50	N	Individual

COMP 2011 Games Technology

Credit Points 10

Legacy Code 300491

Coordinator Sharon Griffith ([https://directory.westernsydney.edu.au/search/name/Sharon Griffith/](https://directory.westernsydney.edu.au/search/name/Sharon%20Griffith/))

Description This unit provides an introduction to the game industry as well as introducing students to the techniques of game design and construction. Students will be exposed to the history of game development and the key aspects of different genres of computer games.

School Computer, Data & Math Sciences

Discipline Artificial Intelligence

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects LGYA 5804 - Client Server Applications

Assumed Knowledge

A basic understanding of the principles of programming equivalent to Programming Principles 1.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the role of games in individual psychological and social development.
2. Identify the role of games in society.
3. Analyze the basic concepts of game design.
4. List the elements of computer game software
5. Classify the basic concepts of the software development process
6. Summarize the history of computer games and the various game genres.
7. Discuss the structure of the computer game industry.
8. Demonstrate the preparation and presentation of game design documents

Subject Content

- fundamentals: introduction to physiology, Psychology and sociology of play, games and computer games.
- Game design: interaction, dramatic elements, Rules and interface design Rules
- Game genres: action, strategy, role-playing, Sports, vehicle and construction & management Simulations, Adventure, Artificial life, Puzzle and online gaming
- Game Technology: elements of computer games, graphics, sounds, animation, Artificial Intelligence, physics and networking
- Game development: structure of The Game industry, software development process, testing & release

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Case Study	2,000 words	20	N	Individual
Report	3,000 words	30	N	Individual
Essay	2 hours	20	N	Individual
Final Exam	2 hours	30	Y	Individual

COMP 2013 LAN Workshop

Credit Points 10

Legacy Code 300138

Coordinator Jiansheng Huang ([https://directory.westernsydney.edu.au/search/name/Jiansheng Huang/](https://directory.westernsydney.edu.au/search/name/Jiansheng%20Huang/))

Description This unit provides students with the knowledge and skills necessary to install, test, tune, customise, repair and maintain networking hardware and software necessary to create a Local Area Network (LAN). Students also learn how to administer a LAN by setting up user accounts, access privileges, security procedures and back-up/recovery procedures.

School Computer, Data & Math Sciences

Discipline Networks and Communications

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects LGYA 6157 Networking Workshop

Assumed Knowledge

Ability to list, discuss and compare the elements of information coding and signal transmission. List, describe and explain the elements and functional relationships of communications hardware and software.

Identify, locate, distinguish and describe the individual hardware components of a personal computer (PC) and explain their purpose, functions and operations. Install PC components, devices and peripherals in accordance with installation procedures and operational standards.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Install and configure network protocols and applications according to client requirements.
2. Plan, organise and provide basic LAN systems administration and security functions.
3. Contribute to the preparation of a disaster recovery plan for a LAN and set up appropriate backup and recovery procedures.
4. Identify, diagnose, and correct network breakdowns, conflicts, errors and problems.
5. Install, connect, configure, monitor, and tune LAN systems comprising wiring, networking hardware, networking operating systems, and presentation layers.
6. Explain telecommunications systems performance measures and ensure adequate performance and reliability for a LAN.
7. Explain, install, and test networking equipment such as modems, multiplexors, ethernet components, bridges, routers, and terminal emulators.
8. Explain telecommunications requirements for transmission of voice, audio, data, still images, motion video, and multimedia.

Subject Content

- Domains, IP Addressing, Directory naming services.
- Network Addressing with subnets and host IDs using gateways, routers, and emulations.
- host machines and workstations, manual and automatic IP allocation.
- client user services and inter-application communications.
- access control and security.
- Disaster recovery planning, backup and recovery procedures.
- Network performance, Monitoring Measuring and tuning.
- Trouble-shooting, error detection, system maintenance and repair.
- Network policies, user accounts and services, Risk analysis.
- Network devices; cards, modems, multiplexors, routers, bridges, and emulators.
- Telecommunications transmission requirements, Standards, and specifications.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical	2 hours each class	10	N	Both (Individual & Group)
Multiple Choice	70 minutes	20	N	Individual
Applied Project	4-week subject project	30	N	Individual
Final Exam	2 hours	40	N	Individual

COMP 2014 Object Oriented Programming

Credit Points 10

Legacy Code 300147

Coordinator Alex Dong ([https://directory.westernsydney.edu.au/search/name/Alex Dong/](https://directory.westernsydney.edu.au/search/name/Alex%20Dong/))

Description This unit presents the concepts and principles of programming languages with the emphasis on object oriented paradigm. It addresses the importance of the separation of behaviour and implementation as well as effective use of encapsulation, inheritance and polymorphism. The students will gain intensive training in programming skills with supervised laboratory sessions and task oriented assignments.

School Computer, Data & Math Sciences

Discipline Programming

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) COMP 1005 OR ENGR 1045

Equivalent Subjects COMP 2015

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the principles of object oriented programming
2. Explain the concepts of abstract data types, encapsulation and information hiding, class inheritance and polymorphism.
3. Write programs to demonstrate understanding of encapsulation, data hiding, compositions and basic data operations.

- Write program in object oriented style to solve real-world problems using inheritance and polymorphism.

Subject Content

- Concepts and principles of object oriented programming languages
- Elements of syntax and semantics of programming languages
- OOP concepts: encapsulation, information hiding, class inheritance, and polymorphism
- Abstract classes and interfaces
- Programming styles, conventions, pitfalls and debugging
- API: utility classes, arrays, collections
- OO approach in other programming languages

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Professional Task	10 hour average workload	15	N	Individual
Professional Task	10 hour average workload	15	N	Individual
Practical	2 hours (for 12 weeks)	20	N	Individual
Final Exam	2 hours	50	N	Individual

COMP 2015 Programming Techniques

Credit Points 10

Legacy Code 300581

Coordinator Paul Davies ([https://directory.westernsydney.edu.au/search/name/Paul Davies/](https://directory.westernsydney.edu.au/search/name/Paul%20Davies/))

Description This unit is intended as a second unit of study in programming. It builds on a basic understanding of procedural programming as would be developed in a first unit. This unit continues the development of programming skills and methodologies required for professional programming and for further study in later computing units. Topics covered include multi-dimensional arrays, file I/O, searching and sorting, and an introduction to object-oriented programming involving classes and inheritance.

School Computer, Data & Math Sciences

Discipline Programming

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) COMP 1005

Equivalent Subjects LGYA 5800

COMP 2017

COMP 2014

Incompatible Subjects COMP 2016 - Programming Techniques (Advanced)

Learning Outcomes

On successful completion of this subject, students should be able to:

- With a chosen programming language in mind, analyse a given problem and: a). Develop an algorithm that applies structured programming techniques such as sequence, selection, iteration and modularisation that solve the given problem; b). Choose suitable data types to store relevant data for the given problem; c). Implement the solution algorithm using the chosen programming language, data types and control structures; d). Test and debug the program code to produce a working computer program.
- Write and implement programs that use data structures such as arrays to solve problems in programming involving multiple data items.
- Demonstrate how different searching and sorting methods operate and be able to implement them in working computer programs
- Store, retrieve and manipulate data programmatically from secondary storage
- Use object-oriented methodology to analyse relatively simple problems and develop object-oriented computer program solutions

Subject Content

- Revision and extension of procedural programming structures including: a. Data types b. I/O statements c. Calculations d. Problem solving techniques e. decision making constructs f. repetition structures g. writing and using functions h. one-dimensional arrays
- Multi-dimensional arrays
- Character strings and textual data
- Sorting and searching algorithms: Sequential Search, Binary Search, Selection Sort, Bubble Sort
- Object-Oriented Programming including: a. Introduction to classes and objects b. Class construction c. Constructors and destructors d. Inheritance e. Polymorphism
- Data files

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Professional Task	Two Practical Deliverables. 1 to 5 programming tasks per practical deliverable.	30	N	Individual
Applied Project	One deliverable. Typically the solution files will be approximately 800 to 1200 lines of code.	40	N	Individual
Professional Task	90 minutes	30	Y	Individual

COMP 2016 Programming Techniques (Advanced)

Credit Points 10

Legacy Code 300903

Coordinator Paul Davies ([https://directory.westernsydney.edu.au/search/name/Paul Davies/](https://directory.westernsydney.edu.au/search/name/Paul%20Davies/))

Description This unit builds on a basic understanding of procedural programming developed in previous units. Students continue to develop their programming skills and methodologies required for professional programming and for further study in later computing units. Topics covered include multi-dimensional arrays, file I/O, searching and sorting, and an introduction to object-oriented programming involving classes and inheritance. Students in this advanced unit will also investigate and apply advanced concepts such as function overloading and recursion.

School Computer, Data & Math Sciences

Discipline Programming

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) COMP 1005

Incompatible Subjects COMP 2015 - Programming Techniques

Restrictions Students must be enrolled in 3688 Bachelor of Information Systems Advanced or 3684 Bachelor of Information and Communication Technology (Advanced)

Assumed Knowledge

Software development methodologies; Software analysis and design modelling tools and techniques; Programming languages; Implementing databases management systems; Software construction and testing; System documentation; Project Management.

Learning Outcomes

On successful completion of this subject, students should be able to:

- With a chosen programming language in mind, analyse a given problem and: a). Develop an algorithm that applies structured programming techniques such as sequence, selection, iteration and modularisation that solve the given problem; b). Choose suitable data types to store relevant data for the given problem; c). Implement the solution algorithm using the chosen programming language, data types and control structures; d). Test and debug the program code to produce a working computer program.
- Write and implement programs that use data structures such as arrays to solve problems in programming involving multiple data items.
- Demonstrate how different searching and sorting methods operate and be able to implement them in working computer programs
- Store, retrieve and manipulate data programmatically from secondary storage

5. Use object-oriented methodology to analyse relatively simple problems and develop object-oriented computer program solutions
6. Write programs which utilise advanced object-oriented features such as function overloading
7. Apply recursive algorithms to suitable types of problems.
8. Solve programming problems by developing algorithms and fully tested/debugged program code that implement suitable structured programming techniques including appropriate choice of control and data structures.
9. Use object-oriented methodology to analyse relatively simple problems and write object-oriented computer program solutions.
10. Write programs which utilise more advanced object-oriented features such as function overloading, interfaces, aggregation, inheritance and polymorphism.

Subject Content

1. Revision and extension of procedural programming structures including: a. Data types b. I/O statements c. Calculations d. Problem solving techniques e. decision making constructs f. repetition structures g. writing and using functions h. one-dimensional arrays
2. Multi-dimensional arrays
3. Character strings and textual data
4. Sorting and searching algorithms: Sequential Search, Binary Search, Selection Sort, Bubble Sort
5. Object-Oriented Programming including: a. Introduction to classes and objects b. Class construction c. Constructors and destructors d. Inheritance e. Polymorphism
6. Data files
7. Function overloading
8. Recursion
5. Object-Oriented Programming including: a. Introduction to classes and objects b. Class construction c. Constructors and destructors d. Inheritance e. Polymorphism f. Aggregation g. Interfaces

Assessment

COMP 2017 Programming Techniques (WSTC)

Credit Points 10

Legacy Code 700257

Coordinator Buddhima De Silva ([https://directory.westernsydney.edu.au/search/name/Buddhima De Silva/](https://directory.westernsydney.edu.au/search/name/Buddhima%20De%20Silva/))

Description This unit is intended as a second unit of study in programming. It builds on a basic understanding of procedural programming as would be developed in a first unit. This unit continues the development of programming skills and methodologies required for professional programming and for further study in later computing units. Topics covered include multi-dimensional arrays, file I/O, searching and sorting, and an introduction to object-oriented programming involving classes and inheritance

School Computer, Data & Math Sciences

Discipline Programming

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) COMP 1006

Equivalent Subjects COMP 2015 - Programming Techniques LGYA 5800 - Programming Principles 2

Incompatible Subjects COMP 2016 - Programming Techniques (Advanced)

Restrictions Students must be enrolled at Western Sydney University, The College. Students enrolled in the Extended Diploma programs must have passed 40 credit points in order to enrol in this subject. Students enrolled in the combined Diploma/Bachelor programs listed below must pass all College Preparatory subjects listed in the program structure before progressing to the Year 2 subjects.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. With a chosen programming language in mind, analyse a given problem and: (a) Develop an algorithm that applies structured programming techniques such as sequence, selection, iteration and modularisation that solve the given problem; (b) Choose suitable data types to store relevant data for the given problem; (c) Implement the solution algorithm using the chosen programming language, data types and control structures; (d) Test and debug the program code to produce a working computer program.
2. Write and implement programs that use data structures such as arrays to solve problems in programming involving multiple data items.
3. Demonstrate how different searching and sorting methods operate and be able to implement them in working computer programs.
4. Store, retrieve and manipulate data programmatically from secondary storage.
5. Use object-oriented methodology to analyse relatively simple problems and develop object-oriented computer program solutions.

Subject Content

1. Revision and extension of procedural programming structures including:

- (a) Data types
- (b) I/O statements
- (c) Calculations
- (d) Problem solving techniques
- (e) Decision making constructs
- (f) Repetition structures
- (g) Writing and using functions
- (h) One-dimensional arrays

2. Multi-dimensional arrays

3. Character strings and textual data

4. Sorting and searching algorithms: sequential search, binary search, selection sort, bubble sort

5. Object-Oriented Programming including:

- (a) Introduction to classes and objects
- (b) Class construction
- (c) Constructors and destructors
- (d) Inheritance
- (e) Polymorphism

6. Data files

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical Exercises Two practical deliverables – 1 to 5 programming tasks per practical deliverable. Mostly developed in-class over 2 to 4 week period (15% per deliverable)	2 – 4 week duration	30	N	Individual
Programming Project One deliverable. Typically the solution files will be approximately 500 to 700 lines of code.	500 – 700 lines of code	40	N	Individual
Practical Programming Test (Partial open book)	90 mins	30	Y	Individual

Teaching Periods

COMP 2018 Simulation Fundamentals

Credit Points 10

Legacy Code 301167

Coordinator Ante Prodan ([https://directory.westernsydney.edu.au/search/name/Ante Prodan/](https://directory.westernsydney.edu.au/search/name/Ante%20Prodan/))

Description In the last couple of decades computer modelling and simulation has evolved into an important discipline used in nearly every aspect of life from computer games to banking. What was once a tool for training pilots is now a capability to better understand human behaviour, enterprise systems, disease proliferation, and much more. This is an introductory, problem-based unit, where students will learn by doing. Students will acquire ability to use different simulation methodologies and tools such as InsightMaker and AnyLogic to build new insights into the world around you and learn how to share these insights effectively with others.

School Computer, Data & Math Sciences

Discipline Computer Science, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the goals of simulations
2. Conclude the benefits and drawbacks of simulations
3. Demonstrate building simulations by using specific tools and techniques
4. Interpret standard simulation methods and practices

Subject Content

Goal of simulation

When simulation is an appropriate tool

When simulation is not appropriate

Examples of simulation techniques

Model thinking

Simulation methods

Modelling dynamic systems using various types of simulation software

Assessment

COMP 2016 OR

COMP 2020 OR

COMP 2014 OR

ELEC 1006 AND

ELEC 1001

Restrictions Students in Bachelor of Engineering, Bachelor of Engineering (Advanced) or Bachelor of Engineering Science must be enrolled in one of the Majors attached to the program.

Assumed Knowledge

This subject requires a knowledge base of at least the level of a completed first year in a professional Computing degree. Ability to apply fundamental concepts in data structures, algorithms, programming principles will be assumed.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Exhibit facility with the predominant systems programming language - C.
2. Demonstrate their understanding of the interface to the operating system by applying this knowledge to write and explain programs making system calls.
3. Discuss the nature of a systems program and put into practice the canons of good programming style and of sound software engineering in designing and writing short system utilities.
4. Analyse and maintain longer and more complex programs.
5. Demonstrate further development and reinforcement of their grasp on abstract concepts of data and programming structures by being able to explain how these ideas are realized in a specific programming language and environment.
6. Identify the Central role of concurrency in systems programming.
7. Be able to solve relatively simple problems requiring concurrency.

Subject Content

Nature of 'systems programming', requirements of a system programming language.

Applications of the Concepts of functions, scope, lifetimes and data abstraction in the specific case of C.

Error propagation and handling in C.

File systems, terminal control and signals.

Interface with the operating system: general properties and style of system calls, operating system structures, and how they can be accessed.

Systems administration functions, shell programming.

Event-driven programming: writing a video game.

Concepts and formalisms of concurrent programming, realization via UNIX system calls.

Interprocess communication, synchronous and asynchronous message passing, shared memory, mutual exclusion, interrupts and signals and application to operating principles of UNIX daemons and of client-server structures in general.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

COMP 2020 Technologies for Web Applications

Credit Points 10

Legacy Code 300582

Coordinator Paul Davies (<https://directory.westernsydney.edu.au/search/name/Paul Davies/>)

Description Building on material covered in Programming Fundamentals this unit introduces students to some of the key technologies for developing interactive and dynamic web applications from both the client and server perspective. The unit covers web site design, web site development, web page accessibility and usability, HTML, CSS, client side and server side scripting, database interaction, web site promotion (Search Engine Optimisation) and web security.

School Computer, Data & Math Sciences

Discipline Computer Science, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) COMP 1005

Equivalent Subjects COMP 2012 - Interactive Web Site Development

Incompatible Subjects LGYA 5748 - Creating and Managing Web Sites

Assumed Knowledge

Basic programming principles and program control structures equivalent to that covered in Programming Fundamentals. Basic file management and PC operation including how to access and search the World Wide Web.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Create simple web pages demonstrating a working knowledge of HTML and Cascading Style Sheets.
2. Create web pages that include appropriate multimedia content to enhance presentation and/or usability.
3. Create web-based forms incorporating client side scripting to validate user input on the browser.
4. Construct simple dynamic web pages with server side database interaction and server side scripting.
5. Create functional and usable web sites using technologies outlined in learning outcomes 1, 3 and 4 and incorporating: basic principles of human-computer interface design; current accessibility principles and standards; current search engine optimisation techniques.
6. Implement appropriate server-side code to provide simple authentication and access control to a web application.

Subject Content

- brief history of The internet & The World wide Web.
- web page design: use of HTML elements in web page layout, Cascading style sheets and Issues of human-computer interface design including current Standards in accessibility. incorporating sound, video, and animations into web pages.
- current techniques of search engine optimisation.
- HTML forms: input devices and their use for capturing client side information.
- client side scripting using A relevant scripting language (for example JavaScript): making use of client side scripts to enable interactivity with The user and to validate user input.
- Server side scripting & data bases: making use of Server side scripts to Create dynamic web applications that interface with online databases. environment Variables, SQL and Server side includes. A relevant scripting language and Server side scripting environment.
- web and internet security: Basic Server and client security, SSL, digital Certificates and enabling security through scripts.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Professional Task	90 minutes	30	Y	Individual
Professional Task	Two sets – 6 to 10 web pages each deliverable	40	N	Individual

COMP 2021 Software Engineering Fundamentals

Credit Points 10

Legacy Code 301343

Coordinator Yun Bai ([https://directory.westernsydney.edu.au/search/name/Yun Bai/](https://directory.westernsydney.edu.au/search/name/Yun%20Bai/))

Description This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This unit provides an introduction to software engineering principles including basic software lifecycle concepts, modern development methodologies, conceptual modelling and how these activities relate to programming. Students apply this knowledge together with essential team-based project management to design, build and deploy a simple web-based application.

COMP 2023 Mathematical Programming

Credit Points 10

Legacy Code 301375

Coordinator Roozbeh Hazrat ([https://directory.westernsydney.edu.au/search/name/Roozbeh Hazrat/](https://directory.westernsydney.edu.au/search/name/Roozbeh%20Hazrat/))

Description This unit will introduce the programming language Python, through which students will explore and investigate practical mathematical problems. Python is one of the most powerful versatile programming languages, and it is increasingly used by engineers and scientists as well as banks and financial institutions to tackle their computational problems. The unit promotes an experimental side of mathematics and will employ Python-based computational tools to gain insight and intuition into problems, to discover mathematical patterns and relationships, and to use visualisation techniques to expose mathematical structures.

School Computer, Data & Math Sciences

Discipline Programming

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects COMP 2003 Computer Algebra

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Compute complex numerical expressions by utilising the computational features of Python.
2. Combine different styles of programming (functional, procedural, and list-based) to write powerful code in Python.

- Analyse, investigate, gain insight and intuition into, and thus solve, practical mathematical problems by using Python.
- Create complex graphics and solve equations by combining Python graphics capabilities.
- Communicate computational approaches to mathematical problems effectively in both spoken and written form.

Subject Content

- introduction to Python and Jupyter Notebook
- finding, installing, and loading Python libraries
- working with variables and lists in Python
- writing expressions in Python
- debugging Python code
- handling user input in Python
- control structures (conditionals and loops) in Python
- creating functions in Python
- understanding, creating, and using NumPy/Pandas and data frames
- reading and writing files in Python
- producing basic graphs using Python
- data cleaning, indexing, querying, sorting, aggregating, and merging in Python
- object-oriented programming in Python
- using sets in Python
- list comprehension in Python
- database access in Python
- predictive analysis using Python
- data visualisation using Python
- (mini-projects) investigating practical problems using Python

COMP 2024 Computer Networking (UG Cert)

Credit Points 10

Legacy Code 500049

Coordinator Jack Isherwood ([https://directory.westernsydney.edu.au/search/name/Jack Isherwood/](https://directory.westernsydney.edu.au/search/name/Jack%20Isherwood/))

Description This is an introductory unit in computer systems networking. It covers basic networking technologies, Ethernet fundamentals, ISO OSI model, routing, switching and sub-netting, the internet architecture, networking protocols, including TCP/IP, important OSI layer 2 and 3 networking device fundamentals, basic network management and security issues. This unit is also the first of three units which will prepare students for industry-based networking certification (CCNA).

School Computer, Data & Math Sciences

Discipline Networks and Communications

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects COMP 2004 Computer Networking COMP 2007 Computer Networking Fundamentals LGYA 5739 Applied Data Communications and Networking COMP 2006 Computer Networking

Restrictions

Student need to be enrolled in: program 7174 - Undergraduate Certificate in ICT or program 7179 - Undergraduate Certificate in Cybersecurity, Cybercrime and Behaviour

Assumed Knowledge

Fundamentals of computer architecture, binary and hexadecimal numbering systems and programming principles. Students should also have a working knowledge of the World Wide Web.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Identify the basic concepts and protocols of computer networking and internetworking.
- Describe and define the internet architecture.
- Explain the significance of the OSI and TCP/IP models, protocol stacks and their operation in computer networks.
- Identify and describe modern technologies in computer networking.
- Examine and review the functions of important OSI layer 2 and OSI layer 3 networking devices.
- Apply and utilise the basic management and security requirements of computer networks.
- Design, construct and test a simple LAN.
- Subnet a network given design criteria.

Subject Content

- Basic concepts of computer networking and internetworking.
- Internet architecture.
- An introduction to the operation of the major protocols used in computer networking.
- The OSI model, TCP/IP protocol stack and IP addressing.

5. Basic understanding of the TCP/IP protocol stack and its operation in data networks.
6. Modern data communication and networking technologies.
7. Basic management and security requirements of computer networks.
8. Identification and review of networking media.
9. Introduction to Ethernet technologies and switching.
10. Basic routing fundamentals and subnetting.
11. Construct and evaluate network performance in simple LANs.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task

COMP 3002 Applications of Big Data

Credit Points 10

Legacy Code 301110

Coordinator Yi Guo ([https://directory.westernsydney.edu.au/search/name/Yi Guo/](https://directory.westernsydney.edu.au/search/name/Yi%20Guo/))

Description Many techniques and tools have been developed over the past decade to cope with the ever-growing needs for the processing and analysis of big data. This unit will cover the key techniques that have been widely used in big data applications, such as relational and Not Only Structured Query Language (NoSQL) databases, Web Services, parallel and cloud computing, MapReduce, Hadoop and its eco-system. It aims to introduce the emerging technologies and applications in big data to students, and keep up with the latest trends in the industry.

School Computer, Data & Math Sciences

Discipline Computer Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) COMP 1013 OR COMP 1005

Assumed Knowledge

Knowledge of computer software, databases, and entry-level statistics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the major trends and latest development in big data technology
2. Describe a selection of major techniques in use today for big data storage and processing, including NoSQL, MapReduce, cloud computing, web services
3. Build tools to obtain data from various sources and in different formats
4. Evaluate the relative strengths and limitations of relational and NoSQL database systems and recommend the most appropriate solution to data storage and access for different application scenarios
5. Employ HDFS and Hadoop for data storage and manipulation on parallel platforms
6. Select and apply appropriate tools from the Hadoop eco-system for big data management tasks

Subject Content

Sources and formats of big data
Relational Databases and SQL
NoSQL Databases
Web Scraping

Cloud computing platforms for big data

Data parallelism and the MapReduce framework

Data storage and processing with Hadoop Distributed File Systems (HDFS) and Hadoop

The Hadoop eco-system, including Pig, Hive, Spark, etc.

COMP 3003 Cloud Computing Architecture

Credit Points 10

Legacy Code 301204

Coordinator Rodrigo Neves Calheiros ([https://directory.westernsydney.edu.au/search/name/Rodrigo Neves Calheiros/](https://directory.westernsydney.edu.au/search/name/Rodrigo%20Neves%20Calheiros/))

Description This unit, the second part of the Amazon Web Services (AWS) Academy Cloud Computing Architecture curriculum, provides

deeper understanding about advanced cloud computing services and how to architect cloud applications that are scalable, reliable, and efficient in terms of cost and performance. Students will learn advanced cloud computing concepts including notification and messaging, serverless computing, API gateways, NoSQL databases, content delivery networks, stream processing, and long-term storage. The unit also covers advanced cloud security and infrastructure automation. All these aspects are explored in practice with AWS services. Upon completion of this unit, students will be prepared for the AWS Certified Solutions Architect - Associate exam.

School Computer, Data & Math Sciences

Discipline Computer Science, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) COMP 3012 AND COMP 1005

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Assess different design patterns for web-scale storage and recommend the most appropriate pattern for a specific problem
2. Analyze common design patterns and architectures for loosely coupled cloud computing systems and recommend the most appropriate pattern for a specific problem
3. Evaluate strategies to enable high scalability, reliability, cost-efficiency, and performance in a cloud-based system
4. Apply principles and applications of advanced cloud services such as notification and messaging, API gateways, stream processing, and serverless computing
5. Apply concepts of security and infrastructure automation in a cloud-based system
6. Design and deploy scalable, reliable, and efficient systems that utilise advanced cloud services

Subject Content

Design patterns for architecting loosely coupled cloud computing systems: microservices and serverless architectures

Design patterns for web-scale storage: content delivery networks, object storage, and relational and no-relational databases

Advanced cloud services: API gateways, stream processing, and serverless computing

Queueing and notification systems

Advanced cloud security

Reliability in clouds

Cost and performance efficiency in cloud computing

Infrastructure automation

Common cloud design patterns and cloud architectures

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Report	2,000 words	30	N	Individual
Applied Project	10 page report	40	N	Group

Quiz	10-20 minutes each for 10 quizzes	S/U	N	Individual
Practical	15 minutes each for 7 weeks	30	N	Individual

Teaching Periods

COMP 3006 Computer Graphics

Credit Points 10

Legacy Code 300093

Coordinator Hanh Vo ([https://directory.westernsydney.edu.au/search/name/Hanh Vo/](https://directory.westernsydney.edu.au/search/name/Hanh%20Vo/))

Description Computer Graphics will examine elementary graphics concepts, algorithms and programming skills for producing graphical applications, in both two-dimension (2D) and three-dimension (3D) using Open GL. Techniques and algorithms will be programmed in Processing, which is a very easy-to-learn programming language yet powerful and comprehensive.

School Computer, Data & Math Sciences

Discipline Computer Graphics

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) COMP 2014 OR COMP 2015 OR COMP 2016 OR COMP 2020

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the main concepts employed in two-dimension (2D) and three-dimension (3D) computer graphics
2. Apply colour, geometry, transformation interaction, animation techniques in 2D graphics
3. Evaluate image processing techniques in 2D graphics
4. Apply primitives, geometric objects, transformation and interaction in 3D graphics
5. Apply viewing, materials, lights, modelling, hierarchy, curves and surfaces in 3D graphics

Subject Content

Processing in context

Colours and shapes including coordinates, primitives and vertices

Variables, data types, arrays, arithmetic, control and functions

Curves, trigonometry, random and transformation

Interaction handling, motion and animation
Image processing techniques
Primitives in 3D
Geometric objects, transformations and interaction in 3D
Viewing, materials, lights and modelling and 3D

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical	2 hours for each session	15	N	Individual
Applied Project	A 2D Computer Graphics Program. The program may require a few hundred lines of code	20	N	Group
Applied Project	A 3D Computer Graphics Program. The program may require a few hundred lines of code	15	N	Group
Final Exam	2 hours	50	N	Individual

COMP 3007 Computer Networks and Internets

Credit Points 10

Legacy Code 300095

Coordinator Nabil Giweli (https://directory.westernsydney.edu.au/search/name/Nabil_Giweli/)

Description This subject extends on the work undertaken in the prerequisite unit, Computer Networking, and provides students with an in-depth understanding of the role of switching technologies and router operations that support small to medium business networks. It includes wireless local area networks (WLANs) and security concepts. Students will also learn key switching and routing concepts allowing them to perform basic network configuration and troubleshooting, identify and mitigate LAN security threats, and configure and secure

a basic WLAN. This is the second of three subjects that prepares the student for industry-based networking certification (CCNA).

School Computer, Data & Math Sciences

Discipline Networks and Communications

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) COMP 2004 OR
COMP 2005

Assumed Knowledge

Fundamentals of data communications and computer networking, such as that covered in the prerequisite subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Configure and manage switches, routers and wireless access points with various connectivity and security requirements
2. Use the network configuration skills to build networks from routers and switches to meet specified features and services.
3. Identify the requirements of implementing LAN and WLAN networks with various protocols for supporting security, availability, and redundancy.
4. Design and troubleshoot IPv4/IPv6 dynamic addressing and static routing on routers for small to medium networks.
5. Describe the operations of routers, switches and WLC.

Subject Content

- Switching, Routing and Wireless Essentials
- Switching Concepts & VLANs & Inter-VLAN Routing
- Redundant Networks
- Available and Reliable Networks
- Layer 2 Security and WLANs
- Routing Concepts & Configuration

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical	2 hours (per week)	20	N	Both (Individual & Group)
Practical Exam	45 minutes	20	N	Both (Individual & Group)
Intra-session Exam	1 hour	10	N	Individual
Final Exam	2 hours	50	N	Individual

Prescribed Texts

- None.

COMP 3009 Distributed Systems and Programming

Credit Points 10

Legacy Code 300115

Coordinator Evan Crawford ([https://directory.westernsydney.edu.au/search/name/Evan Crawford/](https://directory.westernsydney.edu.au/search/name/Evan%20Crawford/))

Description This unit covers the concepts, design, and programming of distributed systems. It builds on basic network communication protocols (specifically IP) to cover client server programming using both the system level socket interface and remote procedure calls. It also examines large scale distributed system architectures particularly those based on distributed objects and considers the complexities inherent in distributed transactions. Key concepts covered include data and algorithmic distribution, idempotent protocols, stateless and statefull servers, and distributed system transparency. Illustrative case studies are included.

School Computer, Data & Math Sciences

Discipline Programming

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) Successful completion of COMP 2004 Computer Networking and either COMP 2014 Object Oriented Programming or COMP 2015 Programming Techniques

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and explain distributed system models, client server in particular.
2. Write programs for client side applications (UDP and TCP sockets).
3. Write programs for iterative and concurrent servers (UDP and TCP sockets).
4. Describe and explain how RPC based systems work.
5. Explain the purpose and method of operation of system generated RPC based program code.
6. Write simple RPC based programs (client and server ends) and install/register such services.
7. Identify and describe the major distributed architectures in wide spread use, in particular those based on distributed object technologies.
8. Describe and explain the principal architectural components and working of one major distributed architecture implementation.
9. Explain how distributed transactions run in both partitioned and replicated data environments in terms of recovery, concurrency control, and commitment.
10. Deliver tested and documented programs and systems of significant complexity within specified project deadlines and in a form that meets IT professional standards

Subject Content

- Basic concepts of data and algorithmic distribution.
- client/Server Models: connection and connectionless orientations, stateless versus statefull servers, Server concurrency, socket interface programming.
- Distributed Name/Directory services.
- Remote procedure Calls (RPC): data exchange representations, port location services, RPC programming.
- Large scale architectures and Distributed Objects.
- Distributed data and databases: data replication/partitioning, Distributed transaction and their concurrency, recovery and commitment

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

COMP 3011 Internet Programming

Credit Points 10

Legacy Code 300130

Coordinator Chun Ruan ([https://directory.westernsydney.edu.au/search/name/Chun Ruan/](https://directory.westernsydney.edu.au/search/name/Chun+Ruan/))

Description This unit offers students basic concepts and latest technologies of internet programming and web-based application development. Utilising one of the popular internet programming languages, such as Java, it aims to develop the programming skills and methodologies required for both client-side and server-side programming as well as general purpose programming. The range of topics covered by the unit includes HTML, XML, Java applets, desktop application in Java, servlets, JavaServer Pages and JDBC.

School Computer, Data & Math Sciences

Discipline Programming

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) COMP 2014 OR
COMP 2015 OR
ELEC 1006 OR
COMP 2016

Equivalent Subjects LGYA 5876 - Internet Computing

Assumed Knowledge

Basic knowledge on internet browsing and any object-oriented programming language.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the basic principles and concepts in programming design and implementation for the Internet;
2. Write programs that efficiently utilize basic data structures and algorithms, applets, threads, and basic GUI components;
3. Design web pages by using web forms, applets and CGI scripts;
4. Apply the Java features for Internet application development, including Servlets, JSP, and JDBC;

5. Explain the concepts of encapsulation, inheritance and polymorphism in terms of the design and implementation of Java classes and applications;
6. Use Java API packages.

Subject Content

- brief introduction to web forms, CGI programming, and their Roles in website development
- concepts of encapsulation, inheritance and polymorphism in terms of Java programming language
- GUI, multi-threads
- events, exceptions and I/O
- Servlets and Java Server pages
- simple use of Java database connectivity
- TCP/IP, client and Server networking with The use of sockets
- internet security enforced via Java
- Java API packages

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Individual assignment	10-15 hours of work	15	N	Individual
Group assignment	900-1800 words	25	N	Group
Three practical exercises	1-2 hours of work each	15	N	Individual
Final examination	2 hours	45	N	Individual

Teaching Periods

COMP 3012 Introduction to Cloud Computing

Credit Points 10

Legacy Code 301203

Coordinator Bahman Javadi Jahantigh ([https://directory.westernsydney.edu.au/search/name/Bahman Javadi Jahantigh/](https://directory.westernsydney.edu.au/search/name/Bahman+Javadi+Jahantigh/))

Description This unit, the first half of Amazon Web Services (AWS) Academy Cloud Computing Architecture curriculum, provides deep understanding of fundamental cloud computing concepts and how it can be applied to build cost-effective; highly available and fault tolerant systems. Students will learn concepts including system virtualisation; virtual machines; cloud networks; basic cloud storage and cloud databases; security in clouds; and auto-scaling, load balancing, and monitoring. All these aspects are explored in practice with AWS services.

School Computer, Data & Math Sciences

Discipline Computer Science, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) COMP 2004 OR
COMP 2005

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the concept of system virtualisation
2. Explain and apply basic cloud services
3. Describe the main factors that affect the cost of cloud services and how they can be applied to minimise total cost of ownership
4. Explain and apply basic concepts of security, high availability, and fault tolerance in clouds
5. Analyse systems that utilise basic cloud services

Subject Content

1. System virtualization
2. Fundamentals of cloud computing and cloud networking
3. Basic cloud services: virtual machines, cloud storage, availability zones, auto-scaling, load balancing, and monitoring
4. Cost optimization in cloud services
5. Introduction to cloud security
6. Introduction to cloud databases
7. High availability and fault-tolerance in clouds

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical	15 minutes each for 10 labs	50	N	Individual
Quiz	10 minutes each for 9 quizzes	0	Y	Individual
Final Exam	2 hours	50	N	Individual

COMP 3013 Mobile Applications Development

Credit Points 10

Legacy Code 300960

Coordinator Quang Vinh Nguyen ([https://directory.westernsydney.edu.au/search/name/Quang Vinh Nguyen/](https://directory.westernsydney.edu.au/search/name/Quang%20Vinh%20Nguyen/))

Description This unit teaches technologies and programming languages for developing applications on common mobile platforms, such as Android and iOS. Students will learn skills for developing programs on the above platforms, along with in-class sample applications that highlight platform-specific implementation details.

School Computer, Data & Math Sciences

Discipline Programming

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) For students enrolled in 3687 Bachelor of Information Systems 3688 Bachelor of Information Systems Advanced 3744 Bachelor of Information Systems Bachelor of Business 3745 Bachelor of Information Systems Advanced Bachelor of Business 6036 Diploma in Information and Communications Technology Bachelor of Information Systems or 6040 Diploma in Information and Communications Technology Bachelor of Information Systems - COMP 2020 Technologies for Web Applications
For students enrolled in 3639 Bachelor of Information and Communications Technology - COMP 2015 Programming Techniques
For students enrolled in 3684 Bachelor of Information and Communications Technology (Advanced)- COMP 2016 Programming Techniques (Advanced)
For students enrolled in 3506 Bachelor of Computer Science - COMP 2014 Object Oriented Programming OR COMP 2020 Technologies for Web Applications

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the theoretical fundamental of mobile technologies
2. Identify strengths, opportunity and limitation of platforms, development tools and programming languages for mobile applications
3. Apply common user interface elements into applications
4. Install mobile development tools, such as Android and iOS
5. Develop programs for mobile platforms
6. Implement input and interaction
7. Manipulate files and databases
8. Employ advanced user interface methods to produce graphical applications
9. Apply data management and security in mobile applications

Subject Content

Data management and security
Advanced topics for mobile platforms, including file, database and advanced user interface
Input and Interaction for mobile platforms
Introduction to mobile technologies, including strengths, opportunity and limitation of development for mobile devices
Basic programming for mobile platforms, including variables, data types, arithmetic, control, function, arrays and objects
Overview, architecture and installation of programming languages for mobile platforms
Software development frameworks, tools and mobile applications
Mobile platform overview and common User Interface Elements

COMP 3014 Networked Systems Design

Credit Points 10

Legacy Code 300575

Coordinator Sharon Griffith ([https://directory.westernsydney.edu.au/search/name/Sharon Griffith/](https://directory.westernsydney.edu.au/search/name/Sharon%20Griffith/))

Description This unit builds on and consolidates the skills and knowledge gained in Computer Networking and Computer Networks and Internets. Students successfully completing this unit will acquire the necessary design skills and knowledge required to build and configure enterprise scale networks. The unit provides students with an opportunity to develop problem-solving techniques and decision-making skills to resolve networking issues. Students completing this unit and its prerequisites should also now be prepared to attempt world recognized network industry certification (CCNA).

School Computer, Data & Math Sciences

Discipline Networks and Communications

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) COMP 3007

Equivalent Subjects LGYA 5741 - Broadband Networking

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design the physical layout of the network and produce a specification diagram
2. Provide detailed network documentation in the appropriate format
3. Design an Internet Protocol (IP) subnetting scheme using Variable Length Subnet Mask (VLSM) & Classless Inter-Domain Routing (CIDR)
4. Design and propose appropriate router and switch configurations
5. Verify and troubleshoot various types of network connections
6. Provide a written final report/network design proposal to a professional standard
7. Correctly configure a Wireless Local Area Network (WLAN)
8. Correctly configure single-area Open Shortest Path First (OSPF) protocol
9. Correctly configure Virtual Local Area Networks (VLANs) and 802.1q trunking
10. Correctly configure Frame Relay
11. Correctly configure Dynamic Host Configuration Protocol (DHCP)
12. Correctly configure Network Address Translation (NAT)
13. Create and apply Access Control Lists (ACLs)
14. Create a Hierarchical Network Design

Subject Content

Sound Network Design Practices
 Hierarchical Network Design Principles
 Classless Routing
 Single-Area Open Shortest Path First (OSPF) Protocol
 Enhanced Interior Gateway Routing Protocol (EIGRP)
 Switch Configuration
 Spanning-Tree Protocol (STP)
 Virtual Local Area Networks (VLANs)

Virtual Trunking Protocol (VTP)
 Local Area Network (LAN) Aggregation & Redundancy
 Wireless Local Area Networks (WLANs)
 Scaling Internet Protocol (IP) Addresses

COMP 3015 Operating Systems Programming

Credit Points 10

Legacy Code 300698

Coordinator Evan Crawford ([https://directory.westernsydney.edu.au/search/name/Evan Crawford/](https://directory.westernsydney.edu.au/search/name/Evan%20Crawford/))

Description This unit provides the knowledge of the internal structure and functionality of Operating Systems. An operating system defines an abstraction of hardware behavior and provides a range of services more suitable for ICT application development than what raw hardware could deliver, in terms of convenience, efficiency and security. It is important that ICT Professionals have some understanding of how these services are realized. For ICT Professionals whose role includes supporting the operating system this unit provides the introduction to the relevant theory and practice.

School Computer, Data & Math Sciences

Discipline Programming

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) COMP 2015 OR
 COMP 2016 OR
 COMP 2014

Equivalent Subjects INFS 3014 - Operating Systems

Incompatible Subjects COMP 3016 - Operating Systems Programming (Advanced)

Assumed Knowledge

Students are expected to have a general understanding on computer systems; computer fundamentals, and programming techniques.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. identify the functions, services and basic structure of operating systems, and describe their role in a computer system;
2. discuss operating systems fundamental concepts: process, process synchronisation, process scheduling and dispatch, memory management, virtual memory, I/O system management, file systems, hierarchical directory systems;
3. identify some of the performance issues involved, and carry out elementary calculations in this regard;
4. identify the central role of concurrency in operating systems programming; and solve relatively simple problems requiring concurrency
5. write programs illustrating the application of the theoretical concepts, and explore these concepts in a simulated environment;
6. analyze and evaluate an operating systems suitability for a task based on requirement.

Subject Content

- Interface with the operating system: general properties and style of system calls; operating system structures, and how they can be accessed;

- process and thread concept, management, synchronisation, scheduling and The realisation of these in modern Operating systems.

- Inter-process communication; vis. Synchronous and asynchronous message passing, shared memory, mutual exclusion, interrupts and signals
- functions, services, Basic structure and The role of An Operating system in A computer system.
- Memory management
- File systems, directories
- security and protection at The Operating system level, protection matrix.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Case Study	Five problem-based Case Studies. 600 words or equivalent per case study.	50	N	Individual
Final Exam	2 hours	50	Y	Individual

COMP 3016 Operating Systems Programming (Advanced)

Credit Points 10

Legacy Code 300943

Coordinator Evan Crawford ([https://directory.westernsydney.edu.au/search/name/Evan Crawford/](https://directory.westernsydney.edu.au/search/name/Evan%20Crawford/))

Description This unit provides the knowledge of the internal structure and functionality of Operating Systems. Through the use of case studies the abstraction that Operating Systems provide will be investigated, and techniques for programming with these abstractions will be developed.

School Computer, Data & Math Sciences

Discipline Programming

Student Contribution Band HECS Band 2 10cp

COMP 3018 Professional Experience

Credit Points 10

Legacy Code 300579

Coordinator Rhys Tague ([https://directory.westernsydney.edu.au/search/name/Rhys Tague/](https://directory.westernsydney.edu.au/search/name/Rhys%20Tague/))

Description Professional Experience is a final year 'capstone' project unit. This unit provides opportunities for students to gain hands-on experience in software systems requirements definition, analysis, design and implementation, in a real-world setting. Students work in groups, guided by an academic supervisor or an industry mentor, in achieving the goals set by the client that provides the project. Suitable projects are sourced from external organisations or within Western Sydney University by way of giving the students professional experience in independent learning and reflective practice.

6034 Diploma/Bachelor of Information and Communications
Technology (Health Information Management)
6039 Diploma/Bachelor of Information and Communications
Technology
6040 Diploma in Information and Communications Technology /
Bachelor of Information Systems

Assumed Knowledge

Software development methodologies; Software analysis and design modelling tools and techniques; Programming languages; Implementing databases management systems; Software construction and testing.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Complete all tasks in the SDLC to produce a software product or a component of one, working independently and under constraints, in a group setting.
2. Produce a full set of professional level documents covering all phases of the SDLC.
3. Integrate skills and knowledge gained from previous units as required by your project.
4. Apply newly learned technologies to the completion of project activities.
5. Mitigate probable risks when planning, organising and controlling project activities.

- 6. Reflect back on your learning experience and the issues involved when managing software development projects.
- 7. Demonstrate verbal communication skills when presenting a developed system to a diverse audience.

Item	Length	Percent	Threshold	Individual/ Group Task
Applied Project	1.1 Project Plan - Approximately 3,500 words (7-10 pages) (5%) Group submission ** 1.2 Project Proposal - Approximately 3,500 words (7-10 Pages) (5%) Group submission ** 1.3 Systems Analysis & Design Report - Approximately 7,500 words (15-20 Pages) (15%) Group submission ** 1.4 Handover & Completion Report - Approximately 2,500 words (5-7 Pages) (5%) Group submission ** 1.5 Diary and Reflections Report Diary (at least 2 entries per week with each entry of 100-250 words of length). Reflections Report (600 words) 1-2 pages (5%). Individual submission. ** Used as part of the 'groupmark-component' in calculation of Individual Marks in the individual marks calculation tool.	35	N	Both (Individual & Group)

Subject Content

- 1. Software system lifecycle including requirements for a software system, software solutions that satisfy requirements, and tools and techniques for the assurance of quality and compliance of the software system throughout its development life cycle
- 2. Project planning and management
- 3. Stakeholder management
- 4. Negotiation, collaboration
- 5. Reflection for improved performance, professional development and lifelong learning
- 6. Documentation requirements for communicating software systems requirements and design (technical documentation & document version control)
- 7. Communication of designs, solutions, ideas to stakeholders

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Applied Project	2.1 Working Prototype - Demonstrable working prototype that gives the client an idea how the end product would look like (Full functionality is not required) (10%) Group submission **; 2.2 Completed Final System - Fully functional system, with appropriate base data (where required), that meets all system requirements identified. (40%) Group submission **; ** Used as part of the 'group-mark-component' in calculation of Individual Marks in the individual marks calculation tool.	50	N	Both (Individual & Group)
Applied Project	3.1 Final Presentation - (25 minutes) (10%) Group Presentation **; 3.2 Abstract & Video - Project Abstract 400 words (1 page) AND Video- (5-8 minutes) (5%) Group submission **	15	N	Group

COMP 3019 Professional Experience (Advanced)

Credit Points 10

Legacy Code 300900

Coordinator Rhys Tague ([https://directory.westernsydney.edu.au/search/name/Rhys Tague/](https://directory.westernsydney.edu.au/search/name/Rhys%20Tague/))

Description Professional Experience (Advanced) is a final year 'capstone' work-placement unit. This advanced unit provides the opportunity for students to gain hands-on experience in software systems requirements definition, analysis, design, implementation and project management, in an external organisation under the supervision of industry experts. During the work placement students work in a real-life project applying the theories and technical skills learned in previous units in an industry setting. Students are allowed to propose a work-placement of their choice within an external organisation. School will assess the suggested work-placement for its suitability in meeting the set unit outcomes, prior to approval.

INFO 3008

Incompatible Subjects LGYA 5744 Computing Project 2 INFO 3005 IT Support Practicum

Restrictions This subject is not an open elective. Permission is required to enrol in this subject for students not in programs 3684 Bachelor of Information and Communications Technology (Advanced); 3688 Bachelor of Information Systems Advanced or 2801 Bachelor of Information Systems Advanced/Bachelor of Laws. Students must be enrolled in any of the SCEM undergraduate computing degrees and must have a program GPA of 5.0 or more and be chosen as a suitable candidate for work placement by the pre-enrolment selection process.

Assumed Knowledge

Software development methodologies; Software analysis and design modelling tools and techniques; Programming languages;

Implementing databases management systems; Software construction and testing; System documentation; Project Management.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Contribute to software development/implementation projects in the industry covering all phases of SDLC.
2. Participate in creating professional level documentation as needed in a project.
3. Relate and apply academic theory to project activities and the general work environment.
4. Discover, investigate and self-learn technologies needed for the completion of project activities
5. Follow work practices and explain aspects related to professional code of conduct in the ICT profession.
6. Identify additional work-related skills acquired through work placement.
7. Reflect upon and critically evaluate their learning from the work placement.
8. Communicate orally and in writing with team members, supervisors, and mentors; also present outcomes to a professional panel and stakeholders.
9. Identify additional work related skills acquired through work placement, which may not have been covered through course studies
10. Reflect and critically evaluate their learning from the work placement.
11. Communicate orally and in writing with team members, supervisors, and mentors; and also present outcomes to a professional panel and stakeholders.

Subject Content

- participate in planning and Monitoring in Project activities.
- contribute to Preparing system documentation.
- work collaboratively with A group of professionals in achieving defined Project goals.
- manage Issues that may arise when Working in A team environment.
- Follow guidance and suggestions given by industry supervisors and Fellow team members of The work placement organisation and academic supervisors within university.
- Be self-directed and work independently managing one's self and time, to complete the activities assigned on time, under pressure and various other constraints present in a work environment.
- effectively communicate orally and in writing with team members, supervisors, mentors and present outcomes to A professional panel and stakeholders.
- learn from The experts and Adapt to The needs of The work environment.

COMP 3020 Social Web Analytics

Credit Points 10

Legacy Code 300958

Coordinator Gizem Intepe ([https://directory.westernsydney.edu.au/search/name/Gizem Intepe/](https://directory.westernsydney.edu.au/search/name/Gizem%20Intepe/))

Description The Social Web provides everyone with a voice; information from Facebook, Twitter and other social networks allows us to identify trends and relationships in society. Whilst this has interest on a personal level, the killer-apps will be in analysing social Web data for business, such as tracking the buzz around a new product, and understanding the relationships between customers and products. This unit will introduce its students to the Social Web data that is available, and blend data science and machine learning concepts to allow extraction and analysis of such data.

School Computer, Data & Math Sciences

Discipline Statistics

Student Contribution Band HECS Band 1 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) Students who are NOT enrolled in 1837 Bachelor of Cyber Security and Behaviour 3769 Bachelor of Data Science or 3770 Bachelor of Applied Data Science must have successfully completed one the following three units
Students enrolled in 1837 Bachelor of Cyber Security and Behaviour must have successfully completed the following two units
MATH 2006 Experimental Design and Analysis AND MATH 1002 Analytics Programming
MATH 1028 Statistical Decision Making OR MATH 1003 Biometry OR MATH 1030 Statistics for Business

Co-requisite(s) For students enrolled in courses 3769 Bachelor of Data Science or 3770 Bachelor of Applied Data Science
MATH 1033 Thinking About Data

Assumed Knowledge

Students are expected to be familiar with fundamental computer programming concepts.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. extract and process formatted data from social Web sources.
2. use computer algorithms to visualise complex social Web interactions.
3. use mathematical and statistical methods to identify significant trends in the social Web.
4. use mathematical and statistical techniques to identify critical regions of a social network.
5. partition a social network into clusters.
6. choose an appropriate metric to measure the interaction between social network nodes.
7. compute the popularity, authority and hub scores for network nodes.

Subject Content

Data extraction and formatting.
Visualisation of social networks.
Identifying trends in social networks.
Measuring similarity in multiple networks.
Clustering social network information
Finding authorities and hubs in a social network.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Short Answer	45 minutes	15	N	Individual
Report	2,000 words	25	N	Group
Quiz	15 minutes (per Quiz)	15	N	Individual
Final Exam	2 hours	45	Y	Individual

COMP 3021 Special Effects Programming

Credit Points 10

Legacy Code 301173

Coordinator Anton Bogdanovych ([https://directory.westernsydney.edu.au/search/name/Anton Bogdanovych/](https://directory.westernsydney.edu.au/search/name/Anton%20Bogdanovych/))

Description This unit will focus on develop programming code to write shaders to create special effects, such as fog, shadows, fire, water, clouds, lightning, motion blur and reflections. These type of shaders are often seen in games and movies. Students will also learn about generic programming algorithms involved in building special effects.

School Computer, Data & Math Sciences

Discipline Computer Graphics

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

- Create special effects with `eShaders` and test under controlled scenarios
- Demonstrate the ability to program a custom `eShader`
- Implement common special effects and test under controlled scenarios
- Develop transferrable practical skills in programming special effects for games

Subject Content

Shader Programming Basics
Creating Fog
Simulating Fire
Writing Water shaders
Generating Clouds
Motion Blur
Reflections

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Workshop Portfolios	1000 lines of code	50	N	Individual
Final Exam	2 Hours	50	N	Individual

Teaching Periods

COMP 3022 Systems Administration Programming

Credit Points 10

Legacy Code 300165

Coordinator Golenur Huq ([https://directory.westernsydney.edu.au/search/name/Golenur Huq/](https://directory.westernsydney.edu.au/search/name/Golenur%20Huq/))

Description This unit covers programming techniques and tools used to administer standalone and networked computer systems. The unit focuses on the use of high level interpretive scripting languages to automate everyday administrative tasks, and to monitor and control running systems. Techniques to extend scripting language capabilities by dynamic linking to compiled code are examined, particularly in terms of access to operating system level functions. The unit also examines the use of administrative programs and tools to monitor and adjust system performance and capacity.

School Computer, Data & Math Sciences

Discipline Programming

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) COMP 2019

Incompatible Subjects LGYA 6160 - Script programming

Assumed Knowledge

Students should have a thorough grounding in systems programming and operating systems basics.

Learning Outcomes

On successful completion of this subject, students should be able to:

- List and define the key types of system administration tasks that are suitable for full or partial automation programmatically.
- Select the most appropriate programming implementation method for a required system administration task from the range: shell scripts, scripting languages, and low level compiled languages; and explain the reasons for the selection.
- Write, test and document system administration programs in a scripting language for various administration tasks that are synchronised or asynchronised (serial, parallel, or event driven) in nature.
- Write programs to automate tasks like user management, software management, backup & recovery, and system security for both local (centralised) and distributed systems.
- Extend the capabilities of a high level scripting language.
- Explain the fundamental principles of performance and capacity planning in regards to systems administration.
- Write programs to collect performance and capacity data for performance and capacity planning purposes. Explain the meaning and significance of the data collected, recommend system administration actions based on this interpretation, and write programs to implement the recommended actions.
- Deliver tested and documented programs with significant complexity within specified project deadlines and in a form that meets IT professional standards.

Subject Content

- The strengths and weaknesses of different programming levels of abstraction, from low level compiled Code to High level interpretive scripts.
- Capabilities and limitations of High level dynamic interpretive languages.
- common systems administration tasks and their potential for automation through scripts, particularly The management of users, system software, security, and backup and recovery.

- using programs to control other programs: under serial, parallel, and event driven models.
- Extending scripting languages through dynamic Linking of compiled code.
- using scripting languages to Monitor and control system performance and capacity.
- CGI scripts for simple Server-side programming.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Laboratory work	Practical tasks along with associated project work	40	N	Individual
Quizzes	Ten quizzes, each quiz contains ten multiple choice questions	10	N	Individual
Final examination	Two hours, open book	50	N	Individual

Teaching Periods

COMP 3023 Systems and Network Management

Credit Points 10

Legacy Code 300166

Coordinator Weisheng Si ([https://directory.westernsydney.edu.au/search/name/Weisheng Si/](https://directory.westernsydney.edu.au/search/name/Weisheng%20Si/))

Description With the advent of the era of Internet of Things, the Internet has become a huge infrastructure in which various kinds of systems are running to deliver a plethora of network services. To ensure the efficient utilization of network resources (e.g., bandwidth) and the convenient access to network services, systems and networks must be managed in a proper way. Facing this demand, this unit covers the standards, protocols and skills pertinent to the management of systems and networks. Moreover, this unit introduces Software Defined Networking (SDN), a new paradigm for conducting network management with programmability, flexibility and scalability.

School Computer, Data & Math Sciences

Discipline Networks and Communications

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) COMP 3007 OR COMP 3025

Assumed Knowledge

Students should be familiar with the fundamentals of computer networking and data communications. In particular, they should have

a good understanding of the TCP/IP protocol suite, the OSI model, and current networking and internetworking technologies.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the basic components involved in network and system management.
2. Apply the network management architecture to an existing network.
3. Interpret data represented by the languages of ASN.1 or SMI.
4. Describe how an MIB is organised.
5. Explain how SNMPv1, SNMPv2 and SNMPv3 work, and apply them to manage a network.
6. Explain how RMON1 and RMON2 work, apply them to manage a network.
7. Configure Web servers, Email servers, DNS servers and DHCP servers.
8. Apply Software Defined Networking in campus networks and data centre networks.

Subject Content

Reviewing networking basics related to Network Management.

Ingredients of network management: agents, managers and management protocols.

Network Management Reference Models and Functionalities.

Abstract Syntax Notation One (ASN.1) and Structure of Management Information (SMI).

Management Information Base (MIB).

Simple Network Management Protocol: SNMPv1, SNMPv2 and SNMPv3.

Remote Monitoring: RMON1 and RMON2.

System configurations including web servers, email servers, DNS servers and DHCP servers.

Software Defined Networking (SDN): architecture, protocol and practice.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	0.5 hour per week	20	N	Individual
Report	1.5 hours per week	20	N	Individual
Report	5-10 pages	20	N	Individual
Final Exam	1 hour	40	N	Individual

Prescribed Texts

COMP 3024 Video Games Development

Credit Points 10

Legacy Code 300862

Coordinator Anton Bogdanovych ([https://directory.westernsydney.edu.au/search/name/Anton Bogdanovych/](https://directory.westernsydney.edu.au/search/name/Anton%20Bogdanovych/))

Description This unit provides students with an in-depth understanding of the development and structure of game engines. It provides the student with a unifying overview of the many modules that are incorporated in a game engine as well as a detailed examination of game-play and engine programming.

School Computer, Data & Math Sciences

Discipline Artificial Intelligence

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) COMP 1005

Equivalent Subjects LGYA 6086 - Games Theory and Design

Assumed Knowledge

Understanding of programming concepts and details of programming. Good programming skills in C#, Java or C++. Knowledge of systems analysis methods including object orientated analysis and design. Basic knowledge of vector algebra, matrixes and fundamentals of mathematics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the fundamental concepts behind computer game engines
2. Understand the technological details behind various modules that comprise a game engine
3. Write basic modules to interface with a game engine
4. Design modules to meet a given set of requirements
5. Develop their own game using the selected game engine

Subject Content

game architecture, data structures and design patterns

designing your own game from scratch

handling interaction from the player

fundamental and games artificial intelligence techniques

network programming with multiplayer games

2D programming

3D pipeline

animation

texture mapping and shading

particle systems

geometrical algorithms for collision detection, geometry simplification

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Tutorials	7 weeks	10	N	Individual
Assignment 1	5 weeks to complete	10	N	Both (Individual & Group)

Assignment 2	Requires a number of weeks to complete	40	N	Both (Individual & Group)
Final Examination	2 hours	40	N	Individual

COMP 3025 Wireless and Mobile Networks

Credit Points 10

Legacy Code 300952

Coordinator Nabil Giweli ([https://directory.westernsydney.edu.au/search/name/Nabil Giweli/](https://directory.westernsydney.edu.au/search/name/Nabil%20Giweli/))

Description This unit helps the students gain in depth knowledge in the core concepts and principles in the areas of wireless and cellular networks. It provides them with the technical skills needed to do requirement analysis and evaluate a range of wireless networked systems to plan their institution or expansion. The unit covers the communication characteristics and architecture of wireless systems along with various types of wireless networks, including wireless LANs, personal area networks, sensor networks, mesh networks, and broadband wireless networks. Given the widespread use of mobile phones and devices, a substantial part of the unit is devoted to the study of cellular networks. The unit also covers mobility management and wireless security issues and solutions. Upon completion of this unit, the students will have the capabilities needed for long term and independent learning in the rapidly evolving area of wireless and mobile networking.

School Computer, Data & Math Sciences

Discipline Networks and Communications

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) COMP 2004 OR COMP 2005

Equivalent Subjects LGYA 5741 - Broadband Networking

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an in-depth knowledge of characteristics and architecture of wireless and mobile networks

2. Describe, analyse, and manage the principle applications of wireless and mobile networks
3. Demonstrate a broad understanding of concepts and technologies relevant to wireless and mobile networks
4. Explain relevant industry standards
5. Demonstrate technical skills needed for managing mobility
6. Demonstrate creative skills to plan institution or expansion of wireless and mobile networks
7. Describe security issues in wireless and mobile networks and identify their remedies
8. Demonstrate capabilities for independent learning of evolving concepts in wireless and mobile networking and for communicating those concepts clearly

Subject Content

Overview of Enabling Technologies

Wireless and Mobile Communications and Networking Characteristics and Architecture

IEEE 802.11: Wireless LANs

Cellular Networks and Their Evolutions

IEEE 802.16: Wireless Broadband Access (WiMAX)

Mobility Management

Wireless Mesh Networks

Personal Area Networks

Wireless Sensor Networks

Security of Wireless and Mobile Networks

COMP 3027 Robotic Programming

Credit Points 10

Legacy Code 301205

Coordinator Vernon Asuncion ([https://directory.westernsydney.edu.au/search/name/Vernon Asuncion/](https://directory.westernsydney.edu.au/search/name/Vernon%20Asuncion/))

Description Robot Operating System (ROS) is a software integration system that is now widely used for robotics software deployment. The philosophy behind ROS is to modularise software that can work for other robots through small changes in the code. This unit focuses on the main concepts of software development under ROS by looking at the file hierarchical systems (e.g. Packages, Stacks, Messages, Services and others), module communication types through Nodes, Topics, Services, Messages, Bags, Master and how they integrate to operate robot sensors and actuators. This unit also looks at actual AI software examples using C++/Python and Answer Set Programming (ASP).

School Computer, Data & Math Sciences

Discipline Programming

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) COMP 2014 Object Oriented Programming and COMP 2019 Systems Programming 1

OR

COMP 2014 Object Oriented Programming and COMP 3015 Operating Systems Programming

OR

MECH 4003 Mobile Robotics

Assumed Knowledge

Basic knowledge of Linux, C++/Python and Object Oriented Programming (OOP).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the software systems for robotics.
2. Illustrate how drivers written for various robot parts are viewed as nodes and services under the ROS system framework.
3. Explain how different \diamond eprocesses \diamond f made for other applications can be incorporated onto their own software projects under ROS through the use of standard/predefined topics.
4. Describe how various state-of-the-art AI software can be embedded into a ROS system by having them as a backend for certain ROS processing tasks (nodes).
5. Develop software for interacting with sensor and controlling actuators using ROS tools.
6. Develop software using current state-of-the-art AI systems as backend for processes as ROS Nodes.

Subject Content

1. Overview and background of the Robot Operating System (ROS)
2. ROS file structures: Packages, Stacks, Messages, Services
3. ROS system components: Nodes, Topics, Services, Messages, Bags, Master and Parameter Server
4. System development under ROS: Navigation of ROS filesystem, creating workspaces (ROS workspace format or catkin), creating ROS packages, building ROS packages, creating nodes, creating msg and srv files, debugging and ROS computation graph visualisations
5. System deployment under ROS: calling ROS nodes, communication between nodes through messages and topics, using services and messages through the srv and msg files, using the Parameter Server
6. Basics of C++/Python building/runtime procedures for integration under ROS through the ROS libraries
7. Using Sensors and Actuators under ROS
8. Examples through 3D modelling and Simulation under ROS via TurtleSim, modelling robots through URDF and Xacro file formats
9. Answer Set Programming (ASP): syntax and semantics, minimal models, default negation and stable models
10. Planning domain using ASP
11. Using ASP solver systems GRINGO, CLASP and iCLINGO, and piping results (answer sets) to ROS nodes using the messages and topics object formats
12. Generating robot movement sequences from answer set outputs of ASP solvers

Assessment

Legacy Code 301349

Coordinator Yun Bai ([https://directory.westernsydney.edu.au/search/name/Yun Bai/](https://directory.westernsydney.edu.au/search/name/Yun%20Bai/))

Description This unit will be offered at Engineering Innovation Hub - Hassall St, Parramatta campus. This unit enables students to experience real-life involvement in designing and implementing a quality software system that conforms to stakeholder requirements in the domain of data analytics. It builds on the skills developed in previous project units in specifying requirements, managing projects, communicating, working in teams to achieve a completed system,

and reinforces skills in software design, coding, testing, reporting and the use of support tools. Students integrate these skills while learning about the domain and professional ways to liaise with the stakeholder to develop appropriate requirements, documentation and a final product.

Legacy Code 301435

Coordinator Yi Guo ([https://directory.westernsydney.edu.au/search/name/Yi Guo/](https://directory.westernsydney.edu.au/search/name/Yi%20Guo/))

Description Machine Learning is one of the most important technologies in the fields of Artificial Intelligence and Data Science used to explain large datasets, inform decisions and highlight risks. Machine Learning is relevant for solving a range of problems in many industries dealing with significant amounts of information and the structure of that information. In this unit, students put Machine Learning theory into action through widely used algorithms and practical applications for designing, training, and evaluating common learning models and systems. Students use Python programming and, as a result, learn about its important machine learning libraries and packages, such as Scikit-Learn, Keras and TensorFlow for solving practical problems and tasks.

Pre-requisite(s) MATH 1028 OR MATH 1033 OR MATH 1003 OR MATH 1030 AND COMP 1005 OR MATH 1002 OR COMP 3002

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply machine learning tasks such as clustering, dimensionality reduction, regression and classification.
2. Apply machine learning workflow when evaluating learning systems for given tasks.
3. Determine appropriate machine learning models and algorithms in various scenarios.
4. Apply Python programming skills and tools for solving common machine learning application problems.

Subject Content

1. Introduction to Machine Learning
2. Supervised Learning: Regression and Classification
3. Model Selection
4. Unsupervised Learning: Clustering, Dimensionality Reduction and Manifold Learning
5. Non-parametric methods, Tree based Methods, and Support Vector Machines
6. Deep Learning: Foundations of Neural Networks, Autoencoder, CNNs, GANs
7. Reinforcement Learning
8. Python based machine learning libraries, packages and applications

COMP 3033 Quantum Computing and Communication

Credit Points 10

Legacy Code 301437

Coordinator Weisheng Si ([https://directory.westernsydney.edu.au/search/name/Weisheng Si/](https://directory.westernsydney.edu.au/search/name/Weisheng%20Si/))

Description This unit introduces how computing and communication can be performed by harnessing quantum phenomena such as superposition and entanglement. From a computer science perspective,

this unit directly starts with the mathematical models delivered by those quantum phenomena while skipping the details of Quantum Mechanics. Based on these mathematical models, this unit introduces the concept of qubits and quantum circuits, and then discusses the design of quantum algorithms and communication protocols, with an emphasis on their applications in Cyber Security. Besides being highly mathematical, this unit is also highly practical: quantum programming will be done throughout the unit with a user-friendly quantum simulator. Students completing this unit will develop skills in designing quantum algorithms and protocols which will be highly sought after in the current and emerging job markets.

School Computer, Data & Math Sciences

Discipline Programming

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) INFO 3006 AND

MATH 1028 OR

MATH 1030

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the mathematical models enabled by Quantum Mechanics.
2. Compose quantum circuits to implement programming logics.
3. Design quantum algorithms that are faster than classical algorithms.
4. Design secure quantum communication protocols.
5. Apply techniques for correcting quantum errors.
6. Conduct quantum programming on a quantum simulator and some real quantum computers in clouds.

Subject Content

1. Introduction to qubit, superposition, entanglement, and measurement.
2. Guide to quantum programming on a quantum simulator and some real quantum computers in clouds.
3. Introduction to Complex Numbers for quantum computing.
4. Introduction to Linear Algebra for quantum computing.
5. Quantum gates and quantum circuits.
6. Elementary quantum algorithms: Deutsch-Jozsa's algorithm and Simon's algorithm
7. Quantum algorithms with applications: Grover's algorithm and Shor's algorithm
8. Quantum communication: Quantum Teleportation, BB84 protocol and B92 protocol
9. Quantum Error Correction
10. Using Quantum Algorithms and Protocols to help achieve UN?fs SDGs (Sustainable Development Goals)

COMP 6001 Neuromorphic Algorithms and Computation

Credit Points 10

Legacy Code 800232

Coordinator Saeed Afshar ([https://directory.westernsydney.edu.au/search/name/Saeed Afshar/](https://directory.westernsydney.edu.au/search/name/Saeed%20Afshar/))

Description Designing and implementing processing pipelines for event-based sensory data is a crucial skill for neuromorphic engineers to test novel hardware platforms or to develop new algorithms and learning mechanisms. This project-based unit focuses on principles of neuromorphic algorithm design and hardware-friendly neural architecture design for neuromorphic information processors. This unit consists of two streams of research: applied event-based algorithms and bio-inspired spiking networks. Through solving increasingly challenging tasks using distributed, event-based competitive processing elements, students will learn the differences between conventional and neuromorphic algorithm design, critically assessing real-world problems in a structured manner.

School Graduate Research School

Discipline Algorithms

Student Contribution Band HECS Band 2 10cp

Restrictions Must be enrolled in 8124 Master of Applied Neuromorphic Engineering

Learning Outcomes

On successful completion of this subject, students should be able to:

- Critically evaluate the advantages and disadvantages of event-based data processing in comparison to Conventional Frame-based data
- Assess the fundamental building blocks of neural computation in biology and Neuromorphic Systems
- Design and evaluate event-based algorithms on standard von Neumann architectures
- Propose novel neuromorphic processing methods relevant to distributed neuromorphic processors
- Develop a solution-oriented way of critically assessing real-world problems using Neuromorphic algorithms

6. Effectively communicate the significance and impact of a specific Neuromorphic system to an audience consisting of both specialist and non-specialists

Subject Content

- Encoding and Processing Conventional and Event-based data
- Architectures of Neural Computation
- Spiking Neural Networks in Biology, Software Simulation and Neuromorphic Hardware
- Event-based Classification
- Event-based Tracking
- Event-based Feature Extraction
- Designing a Novel Event-based Algorithm

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

COMP 6002 Neuromorphic Sensing

Credit Points 10

Legacy Code 800233

Coordinator Gregory Cohen ([https://directory.westernsydney.edu.au/search/name/Gregory Cohen/](https://directory.westernsydney.edu.au/search/name/Gregory%20Cohen/))

Description Neuromorphic sensors offer a new way to electronically sense and process data that have a unique structure based on principles found in biology. Understanding how they operate is integral to their effective use in practical situations, to the development of algorithms, process their data, and to the optimisation of their electronic designs. This unit focuses primarily on neuromorphic vision sensors, which are rapidly being adopted by multiple industries, including exciting applications in automotive and space. Students will develop an in-depth understanding of neuromorphic sensors and the skills to operate a neuromorphic sensor for acquiring data and solving real-world problems. This practical experience is in high demand from both research labs and the industry.

School Graduate Research School

Discipline Algorithms

Student Contribution Band HECS Band 2 10cp

Restrictions Students must be enrolled in 8124 Master of Applied Neuromorphic Engineering

Assumed Knowledge

Basic knowledge of:

- the physical nature of light
- analogue and digital electrical circuits (filtering, transistor logic)
- computer architectures (Van Neuman architectures, microcontrollers, buses, peripherals (USB, DAC, GPIO), communication protocols)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Synthesize the characteristics of a scene using data captured by an event-based vision sensor
2. Evaluate the differences between frame and event-based sensors
3. Design an experimental setup to gather valuable data from a neuromorphic sensor with a deep appreciation of different neuromorphic sensor characteristics
4. Assess the suitability of visio-tactile neuromorphic sensing for a real-world application
5. Critically appraise legal, ethical and cultural issues and considerations in the context of the emerging field of Neuromorphic research
6. Report data and analysis in accordance with professional standards

Subject Content

1. Physics of vision sensors
2. The different architectures of vision sensors
3. Biological sensors
 - Retina: organization, key experiments, optic nerve, 6 control muscle
 - Retina: organization, key experiments, optic nerve, 6 control muscle
 - Tactile
 - Olfactory
4. Neuromorphic vision sensors
 - The event-based pixel: architecture, characteristics
 - Sensors?f evolutions: ATIS, DAVIS, Celex.
5. Neuromorphic auditory sensors
 - Artificial cochlea: filters, analogue vs digital implementation
 - Auditory nerve: spike generation
 - Brainstem: Auditory feature extraction and analysis
6. Research methods
7. Sensing technology and emerging legal, ethical and cultural considerations
8. Data collection and analysis
9. Guidelines for journal paper writing

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical	3000 words or equivalent	20	N	Group
Practical	1000 words or equivalent	30	N	Individual
Report	4000 words or equivalent	50	N	Individual

Teaching Periods

COMP 7001 Advanced Routing

Credit Points 20

Legacy Code 301065

Coordinator Ante Prodan ([https://directory.westernsydney.edu.au/search/name/Ante Prodan/](https://directory.westernsydney.edu.au/search/name/Ante%20Prodan/))

Description As a Cisco Academy, Western Sydney University can offer students the opportunity to study the Cisco Certified Network Professional course Implementing Cisco IP Routing (ROUTE). This online unit will provide the knowledge, understanding and skills to deploy and manage a range of internal and external routing protocols for a large scale internetwork using Cisco equipment. Students will be expected to undertake individual research to contextualise Cisco in the broader networking environment. The unit provides hands-on lab experience via Netlabs?. If students successfully complete this unit they can progress to CCNP ROUTE certification.

School Computer, Data & Math Sciences

Discipline Networks and Communications

Student Contribution Band HECS Band 2 20cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in the online program Master of Advanced Networking or any other postgraduate Western Sydney University program where this subject can be taken as an unspecified elective and where there are sufficient credit points available in the study program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain how different layers co-exist in the campus design model and what routing/switching equipment operates at each level.
2. Outline the technological and theoretical constraints of the OSPF routing protocol and its interaction with other routing technologies.
3. Identify the proprietary nature of EIGRP and its operational constraints.
4. Estimate the commercial impact of ISIS, its relationship to OSPF and its technological and theoretical differences with other routing protocols.

5. Assess the redistribution between routing protocols and static routing entries, the technological and operational limitations imposed on a network infrastructure.
6. Review route management and the implementation of efficiency into a network infrastructure.
7. Identify address management, contrasting IPv4 with IPv6 implementation.
8. Explain an understanding of BGP as an interior and exterior routing protocol and its relationship and synchronisation with ISIS, OSPF and EIGRP.
9. Illustrate IP multicast and its utilisation in a network infrastructure.
10. Evaluate research, investigate and troubleshoot by means of appropriate practical and exploration-based activities throughout your learning materials.
11. Use direct feedback after Cisco and Packet Tracer assessments to evaluate your own learning.
12. Integrate knowledge from other sources to provide context to the Cisco view.
13. Communicate accurately and reliably, in a structured and coherent fashion, recognising purpose and audience.
14. Work effectively with others in a distance setting where the collaboration is undertaken via computer-mediated communication.
15. Formulate appropriate numerical and mathematical skills to analyse data.
16. Find and select information for a specific purpose, including via the web or a router/switch CLI.
17. Organise time, study methods and resources to suit the circumstances.
18. Demonstrate how to configure routers, implementing complex routed scenarios through online lab sessions.
19. Use specialist software tools.
20. Plan and organise yourself and your work appropriately when working in a group.

Subject Content

1. Pre CCNP review
2. Routing Services
3. Researching networking
4. Configuring EIGRP
5. Configuring the OSPF protocol
6. Manipulating routing updates
7. Implementing path control
8. Implementing a BGP Solution for ISP Connectivity
9. Implementing Routing Facilities for Branch Offices and Mobile Workers
10. Implementing IPv6 in an Enterprise Network

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
TMA - Develop a network, Evaluate protocols, Complete Cisco activities	1000 words	16	Y	Individual

TMA - Build a network, Critique a model, Complete Cisco activities	1000 words	17	Y	Individual
TMA - Group Case Study, Evaluate a protocol, Cisco final exam (not for accreditation)	1000 words	17	Y	Individual
Final Examination	3 hours	50	Y	Individual

Teaching Periods

COMP 7002 Advanced Topics in Networking

Credit Points 10

Legacy Code 300252

Coordinator Seyed Shahrestani ([https://directory.westernsydney.edu.au/search/name/Seyed Shahrestani/](https://directory.westernsydney.edu.au/search/name/Seyed%20Shahrestani/))

Description This unit focuses on the advanced features of networked systems and the emerging network technologies and services. The unit provides students with an in-depth understanding of relevant protocols, the emerging standards, and standards organisations. The emphasis of the unit is on development of the student skills to enable them to do proficient research and development works and studies in the computer networking discipline.

School Computer, Data & Math Sciences

Discipline Computer Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Assumed Knowledge

Students should be familiar with the fundamentals of computer networking. In particular, students should have a good understanding of the OSI model, the TCP/IP protocol suite, and current Internet and networking technologies. Therefore, it is strongly advised that students must have either taken an appropriate subject in computer networking (e.g., 300695 Network Technologies), or have equivalent knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the important concepts relevant to emerging networks and the Internet technologies and architecture.
2. Explain the contemporary issues in security, forensics, and reliability of modern networked systems.
3. Explain the important issues in modern applications and services relying on networked systems.

4. Evaluate the technologies and performance of emerging networks.
5. Demonstrate their proficiency with key research and development issues in the field of networking and network-based services.

Subject Content

Network Technologies Background
 Research, Resources, and Citation
 Contemporary Issues in Computer Networking
 Advanced Networked Systems Forensics, Security, and Reliability
 Advanced Network-based Services
 Trends in Networking and Internet Technologies
 Methodologies for Research in Networking

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Report	1,000-1,500 words, 10-20 minutes each	50	N	Individual

COMP 7003 Big Data

Credit Points 10

Legacy Code 301046

Coordinator Yi Guo ([https://directory.westernsydney.edu.au/search/name/Yi Guo/](https://directory.westernsydney.edu.au/search/name/Yi%20Guo/))

Description "Big data" is the label for the ever-increasing gigantic amount of data with which humanity has to cope. The availability of data and the development of cloud computing architectures to process and analyse these data have made data analytics a central tool in our endeavours. This unit will introduce students to the realm of "big data", covering the important principles and technologies of retrieving, processing and managing massive real-world data sets. It is designed to provide the basic techniques required by any discipline that needs to make sense out of the growing amount of data, and to equip students with the knowledge and key set of skills set to be competitive in the growing job market in the analytics field.

School Computer, Data & Math Sciences

Discipline Computer Science**Student Contribution Band** HECS Band 2 10cp**Level** Postgraduate Coursework Level 7 subject**Assumed Knowledge**

It is expected that students enrolled in this subject should have basic programming skills in any programming language and working knowledge in elementary probability and statistics, including the concepts of random variables, basic probability distributions, expectations, mean and variance.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the major trends in technology, business, and science behind big data
2. Analyse and compare a selection of major big data management techniques in use today, including parallel databases, NoSQL, MapReduce, cloud services
3. Evaluate the relative strengths and weaknesses of MapReduce and parallel database systems and apply the appropriate technique to tackle relevant big data problems
4. Apply proper methods of data pre-processing and cleaning for big data analysis

Subject Content

1. Foundations and recent trends of big data
2. Parallel database management systems
3. Data parallelism and the MapReduce framework
4. NoSQL databases and cloud services
5. Data processing and manipulation for big data analysis

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical	2 hours per Practical (10 in total at 2% each)	20	N	Individual
Report	A report of 2000 words + final presentation 10 minutes including question time. Final mark is made up of 70% (or 28 out of 40) for the written component and 30% (or 12 out of 40) for the presentation	40	N	Individual

Final Exam	90 minutes	40	Y	Individual
	open book exam including reading time

COMP 7004 Cloud Computing

Credit Points 10**Legacy Code** 301042

Coordinator Bahman Javadi Jahantigh ([https://directory.westernsydney.edu.au/search/name/Bahman Javadi Jahantigh/](https://directory.westernsydney.edu.au/search/name/Bahman%20Javadi%20Jahantigh/))

Description Cloud computing has become a driving force for information technology over the past several years, and it is moving towards a future in which we won't rely on local computers, but on centralised facilities operated by third-party compute and storage utilities. Governments, research institutes, and industry leaders are rushing to adopt Cloud Computing to solve their ever-increasing computing and storage problems arising in the Internet Age. This unit offers "Academy Cloud Foundations" (ACF) curriculum as part of Amazon Web Services (AWS) Academy. Students will develop knowledge and skills in the areas of virtualization technologies, cloud architecture, AWS core services and their pricing, security, architecture, and support.

School Computer, Data & Math Sciences**Discipline** Computer Science, Not Elsewhere Classified.**Student Contribution Band** HECS Band 2 10cp**Level** Postgraduate Coursework Level 7 subject**Restrictions**

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Basic knowledge of networking and computer systems.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Characterise fundamental architecture of Cloud computing
2. Analyse the basic service models in Cloud systems
3. Characterise different virtualisation technologies for Cloud computing
4. Examine compute, storage, network and database services in Cloud systems
5. Evaluate Cloud security and well-architected design principle in systems

Subject Content

1. Parallel and Distributed Computing
2. Virtualisation Technologies
3. Cloud Economics
4. Cloud Computing Services
5. Cloud Security
6. Cloud Architecting
7. Cloud Support Services

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Report	10 pages	30	N	Individual
Practical	15 minute each for 10 weeks	30	N	Individual
Quiz	10 minutes per quiz	0	Y	Individual
Final Exam	2 hours	40	N	Individual

COMP 7006 Data Science

Credit Points 10

Legacy Code 301044

Coordinator Liwan Liyanage ([https://directory.westernsydney.edu.au/search/name/Liwan Liyanage/](https://directory.westernsydney.edu.au/search/name/Liwan%20Liyanage/))

Description The explosion of data in the internet age opens up new possibilities for agencies and business to better serve and market to its customers. To take full advantage of these opportunities requires the ability to consolidate, manage and extract information from very large diverse data sets. In science, data sets are growing rapidly, with projects routinely generating terabytes of data. In this unit we examine the software tools and analytic methods that underpin a successful Data Science Project and gain experience in big data analytics.

School Computer, Data & Math Sciences

Discipline Statistics

Student Contribution Band HECS Band 1 10cp

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Basic Statistics, Computer Programming.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the issues (computational and social) in data science
2. Show when and how to apply the MapReduce paradigm to solve data analytics problems
3. Select and apply appropriate Machine learning and statistical algorithms to extract information from data
4. Evaluate and interpret the utility of information found using Data Science

Subject Content

1. Introduction to Data Science
2. The Map-Reduce paradigm for Big Data
3. Unsupervised Learning; Clustering, Dimension Reduction
4. Supervised Learning; Regression and Classification
5. Unstructured data
6. Visualisation and Visual Analytics

Assessment

COMP 7007 Information Security Management

Credit Points 10

Legacy Code 301162

Coordinator Yun Bai ([https://directory.westernsydney.edu.au/search/name/Yun Bai/](https://directory.westernsydney.edu.au/search/name/Yun%20Bai/))

Description Cyber Crime costs are increasing at an alarming speed. Security management skills are now essential for IT management. This unit provides the knowledge, skills, techniques and mechanisms on information security management for postgraduate students. It covers topics on management aspects of information security such as business and Cybercrime, security awareness, security risks, security fundamentals, risk assessment and security system design, planning and regulatory issues for information system security.

School Computer, Data & Math Sciences

Discipline Computer Science, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Basic knowledge of computer system, computer security and basic programming skills.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe major security issues in information systems
2. Explain security architecture for system security
3. Characterise Cybercrimes and fundamental security risks
4. Apply security measurement in security system design
5. Identify and analyse security management issues
6. Describe security requirement and solution

Subject Content

1. Globalization, Business and Cybercrimes
2. Information security Basics
3. Information Security awareness
4. Security risks
5. Security mechanisms
6. Risk assessment
7. Managing risk
8. Security architecture
9. Security system design
10. Planning and regulatory issues for security

COMP 7008 Internet of Things

Credit Points 10

Legacy Code 301175

Coordinator Seyed Shahrestani ([https://directory.westernsydney.edu.au/search/name/Seyed Shahrestani/](https://directory.westernsydney.edu.au/search/name/Seyed%20Shahrestani/))

Description The Internet of Things (IoT) is drastically changing the way organisations operate and how individuals interact with the world. IoT is an infrastructure consisting of fairly constantly communicating objects, or things, that may be smart and process or act on data. The IoT facilitates detailed and meaningful interactions between humans, digital devices, and many other industrial and household equipment, appliances, and things. The IoT is also the enabler of smart environments, including smart homes, buildings, cities, transport, and healthcare, among many others. This unit discusses IoT technologies and applications in detail. It also introduces the students to trends, challenges, and key research topics in relevant areas.

School Computer, Data & Math Sciences

Discipline Computer Science, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Students should be familiar with the fundamentals of computer networking. In particular, they should have a good understanding of the TCP/IP protocol suite, and current networking and wireless technologies. Therefore, it is strongly advisable that the students must have either taken an appropriate subject in computer networking (e.g., 300695 Network Technologies), or have equivalent knowledge.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an in-depth knowledge of the IoT characteristics, trends, and architecture.
2. Explain communication technologies of significant importance in the IoT.
3. Describe the major IoT applications and demonstrate creative skills to plan their establishment or expansion.
4. Describe security and privacy issues in the IoT and identify their remedies.
5. Discuss the emerging trends in the IoT and smart environments.

Subject Content

Overview of the IoT and enabling technologies

IoT Architecture

Wireless sensor networks

IoT applications

Smart environments

Privacy and security of the IoT

COMP 7009 Mobile Computing

Credit Points 10

Legacy Code 301043

Coordinator Quang Vinh Nguyen ([https://directory.westernsydney.edu.au/search/name/Quang Vinh Nguyen/](https://directory.westernsydney.edu.au/search/name/Quang%20Vinh%20Nguyen/))

Description This unit teaches technologies and programming languages for developing applications on common mobile platforms, such as Android and iOS. Students will learn skills for developing programs on the above platforms, along with in-class sample applications that highlight platform - specific implementation details.

School Computer, Data & Math Sciences

Discipline Programming

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) Students enrolled in 2761 Master of Business Administration Information and Communication Technology specialisation must have successfully completed COMP 7015 Programming Proficiency and INFS 7007 Systems Analysis and Database Management Systems
Students enrolled in all other courses must have successfully completed INFS 7009 Web Technologies

Restrictions

Successful completion of 40 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop programs for mobile platforms
2. Implement input and interaction in mobile applications
3. Manipulate files and databases in mobile applications
4. Employ advanced user interface methods to produce graphical applications
5. Apply data management and security in mobile applications
6. Explain the theoretical fundamental of mobile technologies
7. Identify strengths, opportunity and limitation of platforms, development tools and programming languages for mobile applications
8. Apply common user interface elements into applications
9. Install mobile development tools, such as Android and iOS

Subject Content

1. Data management and security
2. Advanced topics for mobile platforms, including file, database and advanced user interface
3. Input and Interaction for mobile platforms
4. Introduction to mobile technologies, including strengths, opportunity and limitation of development for mobile devices
5. Basic programming for mobile platforms, including variables, data types, arithmetic, control, function, arrays and objects
6. Overview, architecture and installation of programming languages for mobile platforms
7. Software development frameworks, tools and mobile applications
8. Mobile platform overview and common User Interface Elements

COMP 7011 Multimedia Communication Systems

Credit Points 10

Legacy Code 300256

Coordinator Hon Cheung ([https://directory.westernsydney.edu.au/search/name/Hon Cheung/](https://directory.westernsydney.edu.au/search/name/Hon%20Cheung/))

Description This unit covers advanced concepts and technologies used in emerging multimedia communication systems. Theory, practice and standards for IT professionals endeavouring to build data compression systems for multimedia applications are emphasised.

School Computer, Data & Math Sciences

Discipline Computer Science, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Basic knowledge in digital compression and coding, digital communication systems and fundamentals of data communication and networking.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of current data compression schemes for all sources of information: audio, data, images, and video.
2. Describe current compression standards and why the various design choices and tradeoffs were made.
3. Demonstrate an understanding of the main issues involved in designing, implementing, selecting and evaluating data compression methods, algorithms and standards for providing multimedia services.
4. Describe and analyse common protocols used in various contemporary networks for multimedia communication.

Subject Content

- Overview of multimedia and multimedia communication systems
- frequency domain coding
- still-Image compression Standard and Developments
- video compression techniques and Standards
- speech coding techniques and Standards
- multimedia conferencing Standards
- multimedia communication protocols and Standards
- multimedia Communications over networks
- Recent Advances in multimedia Communications

Credit Points 10

Legacy Code 300255

Coordinator Seyed Shahrestani ([https://directory.westernsydney.edu.au/search/name/Seyed Shahrestani/](https://directory.westernsydney.edu.au/search/name/Seyed%20Shahrestani/))

Description The performance of any modern organization is heavily dependent on their networked systems and how these systems are managed. The increasing demand for ICT services and the huge growth of the Internet have resulted in large heterogeneous networks. This unit addresses the issues relevant to management of such networks and the services that run on them. It covers the principles and current practices pertinent to integrated management of networks, systems, and services. The unit helps the students to understand relevant protocols, standards, and standards organizations. It also introduces them to trends and key research areas in management of networked systems.

School Computer, Data & Math Sciences

Discipline Information Systems

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 9360 - Management of Networked Systems

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Familiar with the fundamentals of computer networking and data communications. In particular, a good understanding of the OSI model, the internet protocol suite and current internet technologies.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe network management functions and architecture
2. Describe important standards and protocols for network and system management
3. Describe various management functions and applications
4. Explain important aspects of integrated management of services and applications
5. Explain the role and functions of network management software and platforms
6. Discuss the emerging trends in management of networked and distributed systems
7. Explain key research issues in management of networked systems

Subject Content

Overview of Networking and Network Management
Simple Network Management Protocol (SNMP) and Related Standards
Common Management Information Protocol (CMIP) and Related Standards
Broadband Network Management
Telecommunications Network Management
Network Management systems
Network Management Applications
Web-Based Management
Research in Network Management

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Pop quizzes - Multiple choice or short answer quizzes based on the material covered to the point.	Short quizzes 20 during Lecture sessions. There will be 4 quizzes. Each quiz is worth 5% and will last a maximum of 10 minutes.		N	Individual
Project or Case Study - Report and its Presentation	Report 10 pages long	30	N	Group
Final Exam	Two hour, closed book written exam	50	N	Individual

Teaching Periods

COMP 7013 Network Technologies

Credit Points 10

Legacy Code 300695

Coordinator Ante Prodan ([https://directory.westernsydney.edu.au/search/name/Ante Prodan/](https://directory.westernsydney.edu.au/search/name/Ante%20Prodan/))

Description Computer networking is one of the fastest growing technologies of our time. The Internet interconnects billions of computers providing many new exciting opportunities and challenges. The Internet and the World Wide Web have provided the communication and infrastructure needed for global collaboration and information exchange. As a result of the rapid growth of networked systems and the diverse applications that run on them, success in many professions depends on a sound understanding of the technologies underlying these systems and applications. This unit explores these issues and provides the students with such an understanding. It covers the principles and current practices pertinent to computer networking and communications. It describes some of the important technologies and devices used in modern networks for information distribution and data

sharing. The unit helps the students to understand important models, protocols and standards in networking and internetworking.

School Computer, Data & Math Sciences

Discipline Computer Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects LGYA 5883 - Network Technology and Data Communications

Restrictions

Students must be enrolled in a Postgraduate program.

Assumed Knowledge

The students should be familiar with the fundamentals of computer architecture and programming principles. They should also have a working knowledge of the World Wide Web.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Evaluate and analyse the primary concepts of networking and internetworking.
2. Evaluate the significance of the OSI and TCP/IP models and analyse the operation of their relevant protocol stacks for communications and networking.
3. Evaluate the functions of important communication devices such as, repeaters, bridges, routers, switches and gateways, create various types of network configurations and analyse their performance.
4. Analyse the operation of the major protocols used in local area and wide area networks including network security associated algorithms, applications and devices.
5. Analyse the Internet architecture and internetworking technologies, and create research reports on data communications, computer networking and internetworking technologies.

Subject Content

Overview of Networking Technologies
 The Internet and TCP/IP Protocol Suite
 Network Applications and Application Level Protocols
 Local Area Networks
 Internetworking and Routing Protocols
 Fundamentals of Network Management
 Fundamentals of Network Security
 Emerging Network Technologies
 Fundamentals of Wireless Networking and Mobile Computing
 Fundamentals of Multimedia Networking
 Practical aspects of basic LAN and WAN devices

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Practical	15 minutes per practical	20	N	Individual

Professional Task	60 minutes	30	N	Both (Individual & Group)
Case Study	Approximately 3,000 words for two students	25	N	Group
Intra-session Exam	60 minutes	25	N	Individual

Credit Points 20

Legacy Code 301067

Coordinator Ante Prodan ([https://directory.westernsydney.edu.au/search/name/Ante Prodan/](https://directory.westernsydney.edu.au/search/name/Ante%20Prodan/))

Description As a Cisco Academy, Western Sydney University can offer this Cisco Certified Network Professional course, 'Troubleshooting and Maintaining Cisco IP Networks' (TSHOOT). Cisco Systems are worldwide leaders in networking technologies, for telecommunication, corporate and private networking. This online unit will provide the knowledge, understanding and skills to troubleshoot communication on large-scale data networks using Cisco equipment and extend your research skills. Students will be provided with hands-on lab experience

via Netlabs?. Students who successfully complete this module can progress and complete the CCNP TSHOOT certification with Cisco.

School Computer, Data & Math Sciences

Discipline Networks and Communications

Student Contribution Band HECS Band 2 20cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) COMP 7001 AND COMP 7010

Restrictions

Students must be enrolled in the online program Master of Advanced Networking or any other postgraduate Western Sydney University program where this subject can be taken as an unspecified elective and where there are sufficient credit points available in the study program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Knowledge and understanding
2. 1. Explain troubleshooting and meeting the network requirement in a converged network environment.
3. 2. Describe how VoIP is implemented.
4. 3. Assess troubleshooting technologies and queue types used in IP QoS.
5. 4. Identify different troubleshooting methodologies to support traffic management.
6. 5. Identify the range of techniques in use to deliver a resilient routed, switched network infrastructure.
7. 6. Explain support and troubleshoot a wireless infrastructure and its impact on QoS and scalable networks.
8. Cognitive skills
9. 7. Research, investigate and troubleshoot.
10. 8. Use direct feedback after Cisco, Netlab and Packet Tracer assessments to evaluate your own learning.
11. 9. Integrate knowledge from other sources to gain a deeper understanding of the subject and provide context to the Cisco view.
12. Key skills
13. 10. Communicate accurately and reliably, in a structured and coherent fashion, recognising purpose and audience.
14. 11. Work effectively with others in a distance setting where the collaboration is undertaken via computer-mediated communication.
15. 12. Work effectively with others in a lab setting via moderated ALE on Netlab+.
16. 13. Use appropriate numerical and mathematical skills to analyse data.
17. 14. Find and select information for a specific purpose, including via the Web, Cisco SDM or a Router/Switch CLI.
18. 15. Organise time, study methods and resources to suit the circumstances.
19. 16. Use independent resources to undertake academic research in Advanced Networking.
20. Practical and/or professional skills
21. 17. Configure routers, implementing complex routed scenarios through online lab sessions.
22. 18. Use specialist software tools.
23. 19. Reflect on first-hand experience of configuring and managing network equipment (through attendance at the day school or alternative learning experience).

24. 20. Plan and organise work appropriately when working in a group (online lab sessions).

Subject Content

1. Planning maintenance for complex networks
2. Troubleshooting processes for complex enterprise networks
3. Using maintenance and troubleshooting tools and applications
4. Maintaining and Troubleshooting Campus Switched Solutions
5. Maintaining and Troubleshooting Routing Solutions
6. Troubleshooting Addressing Services
7. Troubleshooting Converged Networks
8. Troubleshooting Network Performance Issue
9. Maintaining and Troubleshooting Network Security Implementations
10. Troubleshooting Complex Enterprise Networks

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
TMA - Cisco activities; Discussion paper; Problem solving	800 words	16	Y	Individual
TMA - Cisco activities; Critical review; Problem solving	1000 words	17	Y	Individual
TMA - Cisco activities: Cisco final exam (not for accreditation); Individual Reflection on Group case study	Cisco activities: Cisco final exam (not for accreditation); - 1000 words; Individual Reflection on Group case study - 150 words	17	Y	Individual
Final examination	3 hours	50	Y	Individual

Teaching Periods

COMP 7015 Programming Proficiency

Credit Points 10

Legacy Code 301038

Coordinator Zhuhan Jiang ([https://directory.westernsydney.edu.au/search/name/Zhuhan Jiang/](https://directory.westernsydney.edu.au/search/name/Zhuhan%20Jiang/))

Description This unit is aimed at the students whose undergraduate study is in a discipline other than computing or information technology. This unit first covers the programming fundamentals on data types, conditional selections and loop structures, and then further develops

the problem solving skills through the use of user-defined functions, records, files, as well as the basic concept and techniques of object-oriented programming. A high level programming language is employed to implement all the problem solutions.

School Computer, Data & Math Sciences

Discipline Programming

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss and explain the concepts of data and procedural representation, programming languages, compilers, interpreters, and development environments.
2. Design and/or represent programs with flow chart and pseudo code.
3. Use effectively the basic data types, selection control, and loop structure.
4. Utilise a high-level programming language to develop problem solutions using standard IO or a proper user interface, files, and record or class structure.
5. Apply a modular design or an OO design to the software solution.
6. Explain the concept of object-oriented programming, and apply the concept to developing a software solution within an OOP environment.

Subject Content

1. The programming environment: computer systems architecture, hardware, operating systems, compilers, interpreters.
2. Data representation and basic data and multimedia types.
3. Program flowchart, pseudo code and the concept of algorithms.
4. Programming basics: syntax, declarations, operators, expressions, assignment, selection, iterations.
5. Other programming features: IO, GUI, functions, arrays, records, files, and classes.
6. Program design, and the coding, testing, and debugging of the programs.
7. The OOP paradigm, method overloading and overriding, inheritance and polymorphism.
8. The solution development within an OOP environment.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

COMP 7016 Visualisation

Credit Points 10

Legacy Code 301112

Coordinator Zhonglin Qu ([https://directory.westernsydney.edu.au/search/name/Zhonglin Qu/](https://directory.westernsydney.edu.au/search/name/Zhonglin%20Qu/))

Description This unit introduces the fundamentals and technologies of information visualisation. It covers the major concepts of information visualisation, human-computer perception and methods for visual data analysis. Students will learn the knowledge and skills required for identifying suitable visualisation techniques and tools appropriate for various data types and applications. The unit provides students with opportunities to explore recent research in the visualisation field.

School Computer, Data & Math Sciences

Discipline Computer Science

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects MATH 2014 Visual Analytics

Restrictions

Students must be enrolled in a postgraduate program.

Assumed Knowledge

Familiarity with computer software programs, such as Microsoft Office.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the purpose of information visualisation
2. Identify strengths, limitations and opportunity of visualisation techniques
3. Evaluate common visualisation techniques for relational data, multi-dimensional data and spatio-temporal data
4. Analyse interaction methods in visualisation
5. Apply common visualisation tools for data analysis
6. Evaluate visual analytics technologies and tools for data analysis

Subject Content

Information visualisation including main concepts and overview

Visual mappings and visual perception

Trees and graphs visualisation

Multi-dimensional data visualisation

Spatio-temporal data visualisation

Interaction

Using visualisation and tools to understand data

Visual Analytics

Assessment

COMP 7017 Wireless Networking

Credit Points 10

Legacy Code 300389

Coordinator Seyed Shahrestani ([https://directory.westernsydney.edu.au/search/name/Seyed Shahrestani/](https://directory.westernsydney.edu.au/search/name/Seyed%20Shahrestani/))

Description Wireless technologies are amongst the most exciting and rapidly growing areas in computing and information technology. They implement applications that profoundly impact our personal way of communication, as well as how business in a variety of industries and organisations are conducted. This unit goes into details of such issues. It discusses wireless networking technologies and their related applications. The main features of wireless and mobile communication systems and the networked services that are based on these systems are also presented. The unit provides students with an in-depth understanding of relevant protocols, the emerging standards and standard organisations. The students are also introduced to some of the relevant current key research issues of the field.

School Computer, Data & Math Sciences

Discipline Networks and Communications

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program offered by the School of Computer, Data and mathematical Sciences.

Assumed Knowledge

Students should be familiar with the fundamentals of computer networking and data communications. In particular, they should have a good understanding of the OSI model, the Internet protocol suite and current internet and networking technologies equivalent to satisfactory completion of an introductory networking subject at the undergraduate level such as 300086 offered at Western Sydney University or one year professional experience in networking. The subject is at an advanced level and students would not be able to complete the subject successfully unless they have a good understanding of fundamental issues in computer networking, Internet protocol suite and Internet technologies.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain advantages, the current use, and applications of major wireless technologies
2. Compare and contrast wireless and wired networks
3. Discuss the current wireless and mobile networking technologies
4. Explain various relevant industry standards and discuss their distinctions
5. Explain security features of wireless and mobile networks
6. Discuss the challenges in wireless networking
7. Discuss the emerging wireless networking technologies
8. Evaluate the performance of modern wireless networks
9. Explain key research issues in wireless networking and mobile computing

Subject Content

Overview of Networking and Enabling Technologies

Wireless Communication Technology

Cellular Wireless Networks

Cordless Systems

Narrowband and Broadband Fixed Wireless Access

Wireless LAN Technology
IEEE 802.11 Networks
Universal Short-range Wireless Standards
Mobile Networking
Wireless Application Protocol (WAP)
Research in Wireless Networking

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

COMP 7018 Advanced Cloud Computing

Credit Points 10

Legacy Code 301363

Coordinator Rodrigo Neves Calheiros ([https://directory.westernsydney.edu.au/search/name/Rodrigo Neves Calheiros/](https://directory.westernsydney.edu.au/search/name/Rodrigo%20Neves%20Calheiros/))

Description This unit offers the Amazon Web Services (AWS) Academy "Academy Cloud Architecting" (ACA) curriculum and provides deeper understanding of advanced cloud computing services and how to architect cloud solutions. Students will learn advanced cloud computing concepts including notification and messaging, serverless computing, API gateways, NoSQL databases, and content delivery networks. The unit also explores strategies to enable high scalability, reliability, cost-efficiency, performance, and operational excellence in a cloud-based system. All these aspects are explored in practice with AWS services. Upon completion of this unit, students will be prepared for the AWS Certified Solutions Architect - Associate exam.

School Computer, Data & Math Sciences

Discipline Computer Science, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Pre-requisite(s) COMP 7004

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Assess different design patterns for web-scale storage and recommend the most appropriate pattern for a specific problem.
2. Analyse common design patterns and architectures for loosely coupled cloud computing systems and recommend the most appropriate pattern for a specific problem.
3. Evaluate strategies to enable high scalability, reliability, cost-efficiency, performance, and operational excellence in a cloud-based system.
4. Examine concepts of security and infrastructure automation in a cloud-based system.
5. Design and deploy scalable, reliable, and efficient systems that utilise advanced cloud services.

Subject Content

- 1.Design patterns for loosely coupled cloud computing systems: microservices and serverless architectures
- 2.Design patterns for web-scale storage: content delivery networks, object storage, and relational and no-relational databases
- 3.Advanced cloud services: API gateways, stream processing, and serverless computing
- 4.Queueing and notification systems
- 5.Advanced cloud security
- 6.Reliability in clouds
- 7.Cost and performance efficiency in cloud computing
- 8.Infrastructure automation
- 9.Common cloud design patterns and cloud architectures

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	10 minutes for 13 quizzes	S/U	N	Individual
Practical	120 minutes (each)	30	N	Individual
Applied Project	10 pages	25	N	Group
Report	2500 words	30	N	Individual
Viva Voce	10 minutes	15	N	Individual

Teaching Periods

Spring

COMP 7019 Applied Machine Learning

Credit Points 10

Legacy Code 301312

Coordinator Vernon Asuncion ([https://directory.westernsydney.edu.au/search/name/Vernon Asuncion/](https://directory.westernsydney.edu.au/search/name/Vernon%20Asuncion/))

Description This unit introduces the foundation and concepts underpinning Machine Learning (ML) at a more abstract level, and provides more focus on its practical applications in areas such as: the classification and extraction of text data from various documents and web pages, image processing, Google's PageRank algorithm and relational data mining (RDM). These learning objectives are achieved through various ML software and a series of practicals and projects. The unit covers the concepts and notions of supervised, unsupervised and reinforcement learning, perceptron, neural networks, support vector machines (SVM), knowledge representation (KR) based RDM, and a comprehensive introduction to the Scikit-learn ML Python libraries.

School Computer, Data & Math Sciences

Discipline Artificial Intelligence

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

Some probability and statistics knowledge would be advantageous.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the scope of current machine learning approaches and applications for both current and future use.
2. Determine the most appropriate tools to use for machine learning tasks using software applications including Python and R programming languages.
3. Explain the core principles behind machine learning algorithms.
4. Distinguish between supervised, unsupervised and reinforcement learning notions.
5. Apply Machine Learning software to real-world problems.

Subject Content

1. Review of the fundamentals of probability theory, statistics and basic linear algebra notions.
2. Installation and introduction to common ML software, which includes the introduction on the use of R and Python as needed for this course.
3. Introduction to linear, multiple and logistic regression.
4. Model selection, regularization and cross-validation:
Applications I: Introduction to NLP and classifying text data using logistic regression and naive Bayes.
5. Introduction to support vector machines (SVM):
Applications II: Classifying text data using SVM classifiers.
6. Introduction to neural networks (NN):
Applications III: Classifying text data and image data using recurrent and convolutional NN.
7. Unsupervised learning: K-Means Clustering and Hierarchical Clustering:
Applications IV: Google's PageRank algorithm.
8. Introduce

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

COMP 7020 Artificial Intelligence Ethics and Organisations

Credit Points 10

Legacy Code 301314

Coordinator Jiansheng Huang ([https://directory.westernsydney.edu.au/search/name/Jiansheng Huang/](https://directory.westernsydney.edu.au/search/name/Jiansheng%20Huang/))

Description Artificial Intelligence Ethics and Organisations provides students with a comprehensive grounding in the ethical issues of AI technologies. Students will learn about the relevant laws, regulations and policies with respect to AI ethics, and the existing framework and research trend in the field. With a series of case studies, students will learn how to apply general principles and guidelines in practice. They will also learn to identify potential risks and impacts, to ensure AI ethics are followed in different circumstances regarding data governance, automatic decisions, predictive analytics, autonomous system design and deployment, and structure changes of labour markets.

School Computer, Data & Math Sciences

Discipline Artificial Intelligence

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

General knowledge of artificial intelligence technologies and applications, including machine learning, robotics and autonomous systems, natural language processing and expert systems.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply knowledge of existing laws, policies, and international, national, organisational framework of AI ethics and research trends in the field.
2. Identify potential risks of AI systems in practice.
3. Implement methods to confirm appropriate consent and avoid data breaches in information sharing (when data is collected, sold, shared, collated and used).
4. Determine designs for transparency, fairness and accountability of automatic decisions.
5. Identify bias and discrimination in AI predictive analytics.
6. Explain impacts of AI to labour markets as well as appropriate and flexible regulatory policies to expand social protection.
7. Justify through moral reasoning the use of autonomous systems.

Subject Content

- Emerging AI technologies and applications
- General principles and guidelines of AI ethics
- Existing laws, regulations, policies and ethical framework of AI systems
- Privacy and data governance
- Human oversight in automated decisions
- Bias and discriminations in AI predictive analytics
- Impacts of AI to the structures of labour markets
- Ethical rules of autonomous systems
- AI military ethics
- Applying principles in practices for ethical AI
- Research trend in AI ethics

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Essay type submission of literature review on AI ethics	1,000 words	20	N	Individual
A single quiz with written answer questions	2 Hours	30	N	Individual
Report: Solution to a case study on AI and ethics	2,000 words	50	N	Individual

COMP 7021 Knowledge Representation and Reasoning

Credit Points 10

Legacy Code 301315

Coordinator Yan Zhang ([https://directory.westernsydney.edu.au/search/name/Yan Zhang/](https://directory.westernsydney.edu.au/search/name/Yan%20Zhang/))

Description Knowledge representation and reasoning is one of the fundamental components of Artificial Intelligence. It studies ways to represent and reason about human knowledge effectively in formal computational models, and eventually to solve complex tasks using computer systems. This unit covers logic foundations of knowledge representation and reasoning, Answer Set Programming approaches for declarative problem solving, intelligent agent modelling, diagnostic and probabilistic reasoning. This unit is part of the important preparations for career paths to AI engineers, robotics engineers and intelligent software engineers.

School Computer, Data & Math Sciences

Discipline Artificial Intelligence

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must complete 60 credit points before enrolling into this Subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse the logic foundations of knowledge representation and reasoning in Artificial Intelligence;
2. Apply knowledge of the essentials of non-monotonic reasoning and applications of knowledge graphs;
3. Implement Answer Set Programming as a declarative programming language and its applications in general problem solving and in modelling dynamic domains
4. Use formal languages based on Answer Set Programming to represent planning and diagnostic agents
5. Communicate the language of knowledge representation in a professional manner to diverse audiences

Subject Content

1. Logical Foundations for Knowledge Representation and Reasoning
2. Knowledge Representation and Non-monotonic Reasoning
3. Answer Set Programming: Syntax and Semantics
4. Declarative Problem Solving Using Answer Set Programming
5. Algorithms for Computing Answer Sets
6. Modelling Dynamic Domains
7. Planning and Diagnostic Agents
8. Probabilistic Reasoning

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	1.5 hours	40	N	Individual
Practical	4 hours	30	N	Individual
Report	500 words + programming based demonstration (6 hours)	30	N	Individual

COMP 7022 Natural Language Understanding

Credit Points 10

Legacy Code 301313

Coordinator Manas Patra ([https://directory.westernsydney.edu.au/search/name/Manas Patra/](https://directory.westernsydney.edu.au/search/name/Manas%20Patra/))

Description Natural Language Understanding involves machine reading comprehension and the technologies using it are becoming increasingly widespread. This unit provides a foundation in using the Natural Language Toolkit, which is a leading platform for building Python programs working with 'human language' data, as well as an introduction to Python for Natural Language Processing. Students will use algorithms and explore accessing text corpora and processing raw text; categorising words and classifying text; understanding information from text and analysing sentence structures; and understanding semantic meanings of sentences. Students also gain real-world hands-on experience with Natural Language Understanding through the practical tasks and assignments.

School Computer, Data & Math Sciences

Discipline Artificial Intelligence

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Assumed Knowledge

There are no assumed knowledge for this subject although an undergraduate degree with some probability and statistics is advantageous.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Apply the Natural Language Toolkit to real world Natural Language Processing tasks.
- Use text corpora for the engineering and evaluation of Natural Language Processing systems.
- Determine the role of classification of words and text in Natural Language Processing algorithms.
- Clarify the function of Natural Language Processing algorithms in understanding information from text and the semantic meanings of sentences.
- Analyse artificial intelligence techniques employed in Natural Language Processing algorithms.
- Manage linguistic data.

Subject Content

- Installing and introducing the Natural Language Toolkit (NLKT):
 - Introducing the Python programming language with emphasise for Natural Language Processing (NLP);
 - Using Python string datatypes for the processing of words and texts.
- Accessing text corpora (i.e., ?etext repositories?f) and the processing of raw text:
 - Introduces the Gutenberg, Reuters, Inaugural Address and Annotated text corpus as well as Web and Chat text;
 - Looking at text corpus structure.
- Categorizing words and classifying text:
 - Tagging corpora;
 - Mapping words to properties through Python Dictionaries;
 - Transformation based tagging;
 - Determining the category of a word;
 - Supervised, decision trees, naive bayes and ent

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	1 hour (per Quiz)	30	Y	Individual
Practical	2 hours	30	N	Individual
Report	1,500 words	40	Y	Individual

CULT 0006 Key Concepts and Skills in the Social Sciences (WSTC Prep)

Credit Points 10

Legacy Code 700323

Coordinator Mona Shrestha ([https://directory.westernsydney.edu.au/search/name/Mona Shrestha/](https://directory.westernsydney.edu.au/search/name/Mona%20Shrestha/))

Description The unit will introduce academic skills allowing students to become successful, reflective and independent tertiary learners. Students will develop a foundational understanding of key theories, concepts, debates and perspectives relevant to the successive first year university units within the field of Social Sciences. This unit will support students towards completion of an interactive authentic task, designed to explore possible positive change in contemporary social life.

School Western Sydney The College

Discipline Society and Culture, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 0 Preparatory subject

Equivalent Subjects HUMN 0016 - Key Ideas in Arts and Social Science (WSTC Prep)

Restrictions Students must be enrolled at Western Sydney University, The College. Students must be enrolled in Extended or Standard Diploma programs in Social Science.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a foundational understanding of key theories, concepts, debates and perspectives relevant to first year university social science units.

- Identify some of the causes and consequences of key debates and perspectives in social science.
- Demonstrate an understanding of the importance of critical reflection when considering contemporary social problems.
- Demonstrate an emerging capacity to use critical thinking, research, writing, public speaking and creativity when proposing solutions to contemporary social problems.

Subject Content

Introduction to tertiary study skills and career aspirations.

The importance of personal integrity within university and professional fields.

Differentiating formal learning at university versus life-long learning.

Introducing critical analytical thinking, emotional intelligence, collaborative learning, and creativity in a social science context.

Introducing key concepts in social sciences including:

- social construction
- secularisation
- modernity
- post modernity
- risk society and insecurity
- social and environmental crises

Introduction to tertiary study skills and career aspirations.

The importance of personal integrity within university and professional fields.

Differentiating formal learning at university versus life-long learning.

Introducing key concepts in social sciences including:

- social construction
- secularisation
- modernity
- post modernity
- risk society and insecurity
- social and environmental crises

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Log/ Workbook	10 activities from weeks 1-10 – 20 to 30 minutes each week	25	N	Individual
Proposal	500 words	20	N	Individual
Presentation	500 words, 5 minutes + creative output	55	N	Individual

CULT 1001 Asia in the World

Credit Points 10

Legacy Code 101442

Coordinator Karen Entwistle ([https://directory.westernsydney.edu.au/search/name/Karen Entwistle/](https://directory.westernsydney.edu.au/search/name/Karen%20Entwistle/))

Description This unit introduces Asian societies, cultures, religions, and histories. Considering both traditional and contemporary times, it seeks to place Asia's diverse cultures in a global context. It examines issues such as how to define Asia, how Asian states related to each other, and how Western ideas of international relations have transformed these relations. The unit considers how the great religions/philosophies of Asian societies - Buddhism, Hinduism, Islam, Christianity and Confucianism - have influenced Asian states and relations between them. It explores other forces which have shaped the civilisations, politics and communities of Asia and how they have related to each other and the world beyond.

School Humanities & Comm Arts

Discipline Society and Culture, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects LGYA 0912 - Foundations of Asia

Learning Outcomes

On successful completion of this subject, students should be able to:

- Describe the diversity and complexity of Asia.
- Critique the social manifestations and international political impact of Islam, Hinduism, Christianity, Buddhism and Confucianism in an Asian context.
- Explain the balance between continuity and change in Asian traditions and contemporary societies.

4. Conduct research on traditional and modern concepts of international relations, particularly in an Asian context.

Subject Content

- Prehistoric Asia
- The Civilisation of Ancient India, China, Japan, Korea, and SE Asia
- Asian Religions
- Medieval SE Asia, Japan, Korea, China
- Imperialism in Asia
- Japan and The struggle for Asia

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

CULT 1005 Crime, Deviance and Society

Credit Points 10

Legacy Code 102039

Coordinator Ashlee Gore ([https://directory.westernsydney.edu.au/search/name/Ashlee Gore/](https://directory.westernsydney.edu.au/search/name/Ashlee%20Gore/))

Description This unit introduces students to the theory and practice of criminology and the sociology of deviance. It considers the ways in which social order is produced, maintained and transgressed from a range of perspectives, including the Chicago school, labelling and deviance theory, Marxism, feminism, and post-colonial theory. These perspectives are explored through a discussion of contemporary issues and controversies, such as terrorism, asylum seeking, the criminalisation of protest, Indigenous incarceration, alcohol and other drug use, and transnational crime.

Legacy Code 700156

Coordinator Paul Rouillon ([https://directory.westernsydney.edu.au/search/name/Paul Rouillon/](https://directory.westernsydney.edu.au/search/name/Paul_Rouillon/))

Description This unit introduces the major approaches to the study of criminology and the sociology of deviance. It considers the ways in which social order is produced, maintained and transgressed from a range of perspectives, including the Chicago school, labelling and deviance theory, Marxism, feminism and queer theory. These perspectives are explored through a discussion of contemporary issues and controversies, such as crime in Western Sydney, the media and moral panic, the criminalisation of HIV transmission, Indigenous incarceration, and alcohol and drug abuse. The unit also addresses the politics of law and order and the resurgence of neo-liberalism in debates over crime and deviance.

CULT 1007 Introduction to Crime and Criminal Justice

Credit Points 10

Legacy Code 101560

Coordinator Erin Kruger ([https://directory.westernsydney.edu.au/search/name/Erin Kruger/](https://directory.westernsydney.edu.au/search/name/Erin%20Kruger/))

Description In 2019 this unit replaced by 102709 - Introduction to Criminal Justice. This unit provides an introduction to the study of criminal justice from a critical criminological perspective. How crime is measured and explained, who are identified as criminals or victims, and how to effectively respond to crime is not straightforward. The unit examines the workings of the criminal justice system, and analyses how police, courts and corrections influence the processes of criminalisation and victimisation, and the societal context in which this occurs. The unit looks at other forms of control and prevention beyond those of the criminal justice system.

School Social Sciences

Discipline Criminology

Student Contribution Band HECS Band 4 10cp

Equivalent Subjects CULT 1024 - Introduction to Criminal Justice
 CULT 1025 - Introduction to Criminal Justice (WSTC)
 CULT 1008 - Introduction to Crime and Criminal Justice (WSTC)
 CULT 1003 - Crime and Criminal Justice

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define the concepts central to crime and criminal justice;
2. Summarise the benefits and limitations of theories, debates and policy developments in relation to crime through reference to relevant academic literature and policy sources as appropriate;
3. Identify and describe a range of stakeholders involved in responding to crime, the criminal justice process, these stakeholders of roles and responsibilities and relationships between them;

Subject Content

Defining and measuring crime
 Victims and victimology
 Criminal justice institutions and practices

Issues and themes in criminal justice

Alternatives to the criminal justice process

1. Defining justice, including links between justice and morality.
2. The purpose of justice, consideration of the role of justice in society.
3. Justice and crime, connecting notions of justice to the politics of social control.
4. The link between justice and law, including the separation of powers between parliament, judiciary and the executive branch of government.
5. Criminal justice institutions and practices, discussing the role of police, courts, and corrections.
6. Measuring justice, crime and victimisation, an introduction to and critique of existing data and methods.
7. The criminalisation process and social inequality.
8. Comparing and contrasting approaches to justice (traditional and alternative approaches e.g. restorative justice).

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

CULT 1012 Policing, Justice and Society

Credit Points 10

Legacy Code 102318

Coordinator Michael Kennedy ([https://directory.westernsydney.edu.au/search/name/Michael Kennedy/](https://directory.westernsydney.edu.au/search/name/Michael%20Kennedy/))

Description In this introductory unit to policing, who the police are, what they do and the practice of policing will be described explained and analysed. The unit will consider the communities, groups and individuals the practice of policing exposes the police and other criminal justice agencies to. Students will consider and critically think about contemporary strategies and approaches applied to policing practice in the 21st Century. Students in this unit will also explore policing theory and apply it to practice. As this is an introductory unit, a focus on developing students' academic skills such as writing for university, reading and annotating will feature throughout the delivery of content.

Credit Points 10

Legacy Code 101551

Coordinator Amie Matthews ([https://directory.westernsydney.edu.au/search/name/Amie Matthews/](https://directory.westernsydney.edu.au/search/name/Amie%20Matthews/))

Description Understanding Society introduces first year students to key sociological concepts, methods and theories used for the examination of individuals, social interactions, institutions and structures. Students explore how individual experiences are connected to wider social patterns. Considering questions of power, students will be introduced to various debates concerning structure and agency, and will examine social inequality. With a focus on contemporary social life, the unit provides opportunity for students to consider current social issues and processes of social change. At the conclusion of their studies in this unit students will have been presented with opportunities to develop skills in critical reading and sociological analysis.

CULT 1019 Understanding Society (WSTC)

Credit Points 10

Legacy Code 700049

Coordinator Mona Shrestha ([https://directory.westernsydney.edu.au/search/name/Mona Shrestha/](https://directory.westernsydney.edu.au/search/name/Mona%20Shrestha/))

Description Understanding Society introduces first year students to key sociological concepts, methods and theories used for the examination of individuals, social interactions, institutions and structures. Students explore how individual experiences are connected to wider social patterns. Considering questions of power, students will be introduced to various debates concerning structure and agency, and will examine social inequality. With a focus on contemporary social life, the unit provides opportunity for students to consider current social issues and processes of social change. At the conclusion of their studies in this

unit students will have been presented with opportunities to develop skills in critical reading and sociological analysis.

Discipline Society and Culture, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Co-requisite(s) Students enrolled in the combined DiplomaBachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year Two units

Equivalent Subjects CULT 1017 - Understanding Society

Restrictions Students must be enrolled at Western Sydney University, The College. Students enrolled in extended diplomas must pass 40 credit points from the preparatory subjects listed in the program structure prior to enrolling in this University level subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain key concepts in sociology.
2. Identify key characteristics of the major theoretical frameworks used in sociology.
3. Identify relevant sources, and assess approaches to and claims about social processes and institutions in contemporary society.
4. Apply a sociological understanding of power, social inequality and social change to case study materials.
5. Demonstrate reading, writing and referencing skills commensurate with university scholarship.

Subject Content

The sociological perspective
Individual and social identities
Social groups and relationships
Social institutions
Power, structure and agency
Social inequality
Social change

CULT 1020 Working with Communities

Credit Points 10

Legacy Code 101900

Coordinator Nidhi Wali ([https://directory.westernsydney.edu.au/search/name/Nidhi Wali/](https://directory.westernsydney.edu.au/search/name/Nidhi%20Wali/))

Description In 2021, this unit replaced by 102815 - Introduction to Indigenous Australia: Peoples, Places and Philosophies. A diverse range of professionals use social science research, theories and principles in their work with communities. In this unit students will explore common scholarly ideas and practices that inform work with communities and how these are applied in a range of professional settings. This unit introduces students to the methods and principles of community participation, capacity-building, community needs assessment, and resilience. Students will be guided to identify and analyse global, local, government and organisational aspects and interests in the development of their own and wider communities. Students will plan a professional approach to working with an example community by building and reporting on a chosen case study.

Incompatible Subjects WELF 1008 - Skills Development in the Human Services

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe key concepts and perspectives in community scholarship;
2. Explain how key concepts and perspectives are connected to their individual experience of community, and to a range of professions that work with communities;
3. Collect and analyse relevant information about an example community from scholarly and professional perspectives;
4. Propose an approach to working with an example community from a professional perspective;
5. Explain the importance of community empowerment, capacity-building, community diversity and social justice, to society and the individual;
6. Utilise online technologies to organise, share and communicate Indigenous-related topics and issues.

Subject Content

1. Threshold concepts and the main debates in community scholarship
2. 'Communities' as dynamic, social and cultural groups that are both political and contested entities and exist as multi-scalar (local, regional, international, and across time) collectives of interest, as virtual as well as place based.
3. Why community matters: power, social action, a sense of the past and future directions, contestation and decision-making
4. Assessing social needs and enacting change: How different organisations, stakeholders and groups within society can work together to achieve shared goals and visions
5. How different types of organisations and institutions – global to local – public and private – formal and informal- serve shared needs
6. Social justice and building community resilience

7. Ethical approaches to working with communities: Participatory methods, the issues of trust, cooperation, communication and collaboration in everyday life and in professional life
8. Communications – written and oral forms of communication in everyday and in professional practice to different intended audiences/ readerships, via a journal (assignment 1), a professional report (A2) and a website (A3).
9. Scholarly skills: ethical considerations and integrity, identifying issues, goal setting, time management, introductory research skills, analysing secondary data, writing professional reports and preparing a community engagement website.

Coordinator Mona Shrestha ([https://directory.westernsydney.edu.au/search/name/Mona Shrestha/](https://directory.westernsydney.edu.au/search/name/Mona%20Shrestha/))

Description This introductory unit provides foundational skills and knowledge required for professional practice in a range of social science related careers in which working with and as part of communities is essential. With an emphasis on practical understanding through both team-work and fieldwork it introduces students to a range of skills in interpersonal and written communication, and to community and organisational processes and structures. It enables students to identify issues of change; conflicting and collaborative interests; participation and collaboration. It provides practical experience in working with others to achieve shared objectives with mechanisms for goal setting, issues identification, information and resource sharing that operate in everyday life and all professional contexts

Credit Points 10

Legacy Code 101664

Coordinator Teddy Nagaddya ([https://directory.westernsydney.edu.au/search/name/Teddy Nagaddya/](https://directory.westernsydney.edu.au/search/name/Teddy%20Nagaddya/))

Description This unit is designed to develop student awareness of culture, identity and difference in the Australian context. Students are introduced to and expected to develop a working knowledge of the concepts of culture, identity, power relations, whiteness and difference. From these theoretical bases, issues of identity and difference and power relations are explored in the Australian context with particular focus on Indigenous/non-Indigenous relations and multiculturalism. In addition, the effects of socially constructed differences of race, gender, class, and sexuality are explored.

Equivalent Subjects CULT 1007 - Introduction to Crime and Criminal Justice CULT 1003 - Crime and Criminal Justice CULT 1008 - Introduction to Crime and Criminal Justice (WSTC) CULT 1025 - Introduction to Criminal Justice (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define the concepts central to understandings of justice generally and criminal justice specifically.
2. Explain how the Australian criminal justice system works with reference to each branch of the system; police, courts, and corrections.
3. Discuss Australian criminal justice systems and processes and alternative forms of delivering justice.
4. Articulate an appropriate understanding of theories and concepts used to inform policing, courts and corrections when working with communities, groups and individuals with whom they engage.

Subject Content

A holistic understanding of crime and its relation to criminal justice process.

Defining justice.

The purpose of justice, consideration of the role of justice in society.

Justice and crime, connecting notions of justice to the politics of social control.

The link between justice and law, including the separation of powers between parliament, judiciary and the executive branch of government.

Criminal justice institutions and practices: reporting on the role of police, courts, and corrections.

The criminalisation process and social inequality ? gender/sexuality, indigeneity/race and class.

The purpose of punishment and sentencing.

Comparing and contrasting approaches to justice (traditional and alternative approaches e.g. restorative justice).

Defining policing, including the historical context of policing in Australia as well as features of modern policing.

The impact of police discretion, culture, misconduct and moral vulnerability upon police accountability as well as emerging trends in policing.

CULT 1026 Understanding Society (UG Cert)

Credit Points 10

Legacy Code 500042

Coordinator Jack Isherwood ([https://directory.westernsydney.edu.au/search/name/Jack Isherwood/](https://directory.westernsydney.edu.au/search/name/Jack%20Isherwood/))

Description Understanding Society introduces students to key sociological concepts, methods and theories used for the examination of individuals, social interactions, institutions and structures. Students explore how individual experiences are connected to wider social patterns. Considering questions of power, students will be introduced to various debates concerning structure and agency and will examine social inequality. With a focus on contemporary social life, the unit provides opportunity for students to consider current social issues and processes of social change. At the conclusion of their studies in this unit students will have been presented with opportunities to develop skills in critical reading and sociological analysis.

Discipline Society and Culture, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects HUMN 1037 - Introduction to Sociology CULT 1017 - Understanding Society CULT 1019 - Understanding Society (WSTC)

Restrictions Students must be enrolled in program 7170 - Undergraduate Certificate in Mental Health and Counselling.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain key concepts in sociology.
2. Identify key characteristics of the major theoretical frameworks used in sociology.
3. Identify relevant sources and assess approaches to and claims about social processes and institutions in contemporary society.
4. Apply a sociological understanding of power, social inequality and social change to case study materials.
5. Demonstrate reading, writing and referencing skills commensurate with university scholarship.

Subject Content

The Sociological Perspective
Individual and social identities
Social groups and relationships
Social institutions
Power, structure and agency
Social Inequality
Social Change

Assessment

CULT 1027 Working with Communities (UG Cert)

Credit Points 10

Legacy Code 500043

Coordinator Jack Isherwood ([https://directory.westernsydney.edu.au/search/name/Jack Isherwood/](https://directory.westernsydney.edu.au/search/name/Jack%20Isherwood/))

Description A diverse range of professionals use social science research, theories and principles in their work with communities. In this unit students will explore common scholarly ideas and practices that inform work with communities and how these are applied in a range of professional settings. This unit introduces students to the methods and principles of community participation, capacity-building, community needs assessment, and resilience. Students will be guided to identify and analyse global, local, government and organisational aspects and interests in the development of their own and wider communities. Students will plan a professional approach to working with an example community by building and reporting on a chosen case study.

School Social Sciences

Discipline Society and Culture, Not Elsewhere Classified.

Level Undergraduate Level 1 subject

Equivalent Subjects CULT 1011 - Organisations Communities and Communication BUSM 1033 - Working with Communities CULT 1020 - Working With Communities CULT 1021 - Working with Communities (WSTC)

Restrictions Students must be enrolled in program 7170 - Undergraduate Certificate in Mental Health and Counselling.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe key concepts and perspectives in community scholarship.
2. Critically reflect on how key concepts and perspectives are connected to their individual experience of community, and to a range of professions that work with communities.
3. Collect and analyse relevant information about an example community from scholarly and professional perspectives.
4. Propose an approach to working with an example community from a professional perspective.

5. Explain the importance of community empowerment, capacity-building, identity, diversity and social justice, to society and the individual.
6. Utilise online technologies to organise, share and communicate Indigenous-related topics and issues.

Subject Content

Threshold concepts and the main debates in community scholarship. Communities as dynamic, social and cultural groups that are both political and contested entities and exist as multi-scalar (local, regional, international, and across time) collectives of interest, as virtual as well as place based.

Why community matters: power, social action, a sense of the past and future directions, contestation and decision-making.

Assessing social needs and enacting change: How different organisations

CULT 2004 Culture, Identity, Difference (Block Mode)

Credit Points 10

Legacy Code 101766

Coordinator Sonia Tascon ([https://directory.westernsydney.edu.au/search/name/Sonia Tascon/](https://directory.westernsydney.edu.au/search/name/Sonia%20Tascon/))

Description This unit introduces students to a range of contemporary theories and concepts that will develop their understanding and analysis of culture, identity and difference within the Australian context. Students will explore the historical and social aspects of culture and identity, and the power and positioning within these. Locations of difference will also be explored such as gender, race, class, ethnicity, sexuality, ability, geography in the Australian context.

School Social Sciences

Discipline Society and Culture, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects CULT 1022 - Working with Cultural Differences
CEDS 2002 - Working with Cultural Differences in Educational Settings
LGYA 7380 - Working with Cultural Differences in Educational Settings

Restrictions Students must be enrolled in 1689 Bachelor of Community and Social Development and must have successfully completed 30 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate understanding of contemporary theories and concepts of culture, identity and difference;
2. Analyse the operation of power in terms of culture, identity and difference in the Australian context;
3. Describe the historical and social contexts of cultural differences in Australia;
4. Demonstrate understanding of the concept of whiteness as a structure of authority and as a location of identity;
5. Explain the operation of sites of power and difference including class, race, gender, ethnicity, ability, geographic location, sexuality, religion.

Subject Content

Culture, cultural difference and identity
Historical and social perspectives on cultural differences in Australia
Narratives about difference and identities
Understanding of power and positionings within cultural differences
Whiteness as a structure of authority and as a location of identity
Discourses of Indigeneity, Multiculturalism and Belonging in recent Australian history
Locations of difference such as gender, race, class, ethnicity, sexuality, ability, geography in the Australian context

CULT 2005 Ethics in the Social Sciences

Credit Points 10

Legacy Code 101555

Coordinator Kathleen Openshaw ([https://directory.westernsydney.edu.au/search/name/Kathleen Openshaw/](https://directory.westernsydney.edu.au/search/name/Kathleen%20Openshaw/))

Description This unit introduces students to the nature of western ethics and moral discourses, to ethical methodology and to the possibilities and limits of ethical discourse and practice. It covers the history of the formalisation of ethics as well as its current philosophical, sociological, and professional dimensions. It also deals with various case studies of ethical issues and moral debates students may encounter in their everyday day and professional lives. Students will be invited to reflect on moral discourse(s), their own understanding of morality, and on the use of ethics for social justice and fairness.

School Social Sciences

Discipline Society and Culture, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Restrictions Successful completion of 40 credit points. This restriction does not apply to students enrolled in program 1874 Postgraduate Bridging Program (Social Work).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply skills in reflexivity to an understanding of everyday lives and social actions
2. Demonstrate how ethics are constructed, understood, and applied in everyday life and in a social structure
3. Identify the significance of key ethical concepts in the context of social justice and social fairness
4. Articulate the connections between historical and philosophical developments in ethics and their applications to contemporary ethical practice

Subject Content

History of ethics and moral philosophy
Theoretical frameworks (Consequentialism, Deontology, Virtue Ethics)
Personal and professional ethical frameworks
Applied ethics (Honesty & fidelity, sexual & personal relationships, health & medicine, environment & sustainability)

CULT 2006 Evidence, Investigations and Police Intelligence

Credit Points 10

Legacy Code 101567

Coordinator John Edwards ([https://directory.westernsydney.edu.au/search/name/John Edwards/](https://directory.westernsydney.edu.au/search/name/John%20Edwards/))

Description This unit aims to provide an overview of police investigations with a specific focus on understanding the interaction of police powers and the investigative process. The unit will introduce the common criminal offences in order to outline the investigative process through scenario based case studies. The unit will refer to both NSW and Commonwealth legislation. The unit will also examine the role of the courts in applying the rules of evidence to determine whether or not evidence gathered by investigators is sufficiently reliable to be admitted into evidence at a trial. The unit will examine the impact of technological change on the investigative process including the impact of forensic science. Whilst NSW legislation will be a significant focus, the investigative process is universally applicable.

CULT 2007 International Politics of North Asia

Credit Points 10

Legacy Code 100872

Coordinator David Walton ([https://directory.westernsydney.edu.au/search/name/David Walton/](https://directory.westernsydney.edu.au/search/name/David%20Walton/))

Description This unit examines contemporary foreign policy issues in North Asia from the perspective of China and Japan. Core issues include a critical evaluation of contemporary Sino-Japanese relations, the role both countries play in regional affairs and why North Asia (in particular the Korean Peninsular) is an intersection point for geopolitics.

School Humanities & Comm Arts

Discipline Society and Culture, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects LGYA 0268 - International Relations of Northeast Asia

Restrictions Successful completion of 40 credit points at Level 1.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. provide an overview of political developments in post 1945 North Asia
2. understand core issues driving Chinese and Japanese foreign policy and regional diplomacy
3. critically engage in contemporary debates on key issues affecting North Asia (such as the ongoing Korean crisis, China's emergence as a great power and the implications of Japan's economic and political malaise).
4. demonstrate sensitivity to cross-cultural and cross-national issues

Subject Content

- Superpower rivalry in post War North Asia
- Regional diplomacy: substance and style
- Chinese politics and foreign policy
- Japanese politics and foreign relations
- Japan and China: strategic engagement or strategic competition?
- The role of Regional actors: Russia, Indonesia and Australia
- The North Korea dilemma
- The role of The United States in North Asia
- strategic Balance in Northeast Asia

Teaching Periods

CULT 2011 Prisons, Punishment and Criminal Justice

Credit Points 10

Legacy Code 102036

Coordinator Selda Dagistanli ([https://directory.westernsydney.edu.au/search/name/Selda Dagistanli/](https://directory.westernsydney.edu.au/search/name/Selda%20Dagistanli/))

Description The demise of corporal punishment and the regular use of imprisonment are defining features of control in modern states. This unit provides an historical and sociological examination of the models, practices and justifications for punishment and incarceration. It begins with an overview of early liberal notions of the social contract, the modern movement away from corporal punishment towards incarceration, and criminology's emphasis on treatment, reform and

rehabilitation. Following from this, the unit explores the development of probation and parole systems, decarceration, community corrections, mass imprisonment, and the contemporary control of risk and 'dangerous' populations. These themes are considered through the role of intersecting structural factors such as age, gender, sexuality, social class, racial/ethnic identity and disability, and the impact of imprisonment and corrections on different individuals and groups.

School Social Sciences

Discipline Criminology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects CULT 2010 - Prisons and Punishment

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate in written form the relationship between punishment and society, the history of the prison and its relationship to modernism;
2. Critically analyse how social practices of punishment affect certain sectors of the population, including highly marginalised groups;
3. Describe the impact of contemporary issues in public policy and penalty, including community-based measures, private prisons, the dispersal of punishment, restorative and therapeutic justice and vengeance;
4. Critically assess the contributions of philosophical approaches to contemporary debates about punishment goals and practices.

Subject Content

Punishment and criminal justice
 Philosophical justifications for punishment
 The rise of the prison
 Juvenile detention and punishment of youth
 Class, race, disadvantage and imprisonment
 Gender and punishment
 Non-custodial penalties and regulatory justice
 Penal reform, activism and prison politics
 Prison policies and correctional programmes
 Decarceration and recarceration
 Privatisation of prisons and corrections
 Risk, fear and 'dangerousness'?

Assumed Knowledge

An understanding of the basic criminal law offences in the Crimes and Summary Offences Act and Criminal Code Act (Cwlth), to allow non-Policing students to enrol in this subject as an elective without otherwise having to seek a rule waiver by the specification of a prerequisite subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain and utilise a range of investigative practices.
2. Apply relevant legislation to the investigative process.
3. Identify the role and limits of police powers and their interaction with the investigative process.
4. Compare and contrast reliable and unreliable evidence and the role of the courts to evidence gathered by investigators.
5. Describe the organisation, processes and governance of different investigative models.

Subject Content

The process of criminal investigation and the scientific method, including the impact of modern technological advances on the investigative process across a range of jurisdictions. Police powers of search and the rules of evidence as enacted by the Law Enforcement (Powers & Responsibilities) [LEPRA] Act. The different sources and types of evidence applied by police in accordance with the Evidence Act NSW. Models of investigation. International co-operation in investigation of transnational crime.

CULT 2017 Youth Justice and Practice

Credit Points 10

Legacy Code 102699

Coordinator Ana Rodas ([https://directory.westernsydney.edu.au/search/name/Ana Rodas/](https://directory.westernsydney.edu.au/search/name/Ana%20Rodas/))

Description This unit develops an understanding of the complexity of youth justice by addressing the historical, political, cultural and socio-economic factors associated with youth crime, constructions of youth, and, governmental strategies for regulating and preventing youth crime. Insights from legal practitioners, police, youth workers, adolescent psychologists, and juvenile justice case managers form part of the unit's inter-disciplinary framework. This is used to develop a critical appreciation of the impacts of the regulation of particular youth groups that are over-represented in the juvenile justice system, including Aboriginal and Torres Strait Islander youth, youth in out-of-home care, and other racial/ethnic minority youth. Lastly, the unit critically assesses a range of official interventions for working with young people within the youth justice system.

School Social Sciences

Discipline Criminology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Equivalent Subjects CULT 2009 - Juvenile Crime and Justice

Restrictions Successful completion of 40 credit points at Level 1.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate knowledge of the multi-disciplinary literature relating to youth justice.
2. Make effective decisions in response to individual cases by applying youth justice principles.
3. Assess the social and political forces that have shaped interventions for working with young people.
4. Communicate effectively using a range of methods commonly used in criminal justice settings.

Subject Content

Origins of a youth justice system
 The nature and extent of youth crime
 Correlates of offending and victimisation
 Youth governance models
 Responding to offending ? criminal and community justice
 Youth as ?esuspect?f

CULT 2018 Crime Prevention and Drugs

Credit Points 10

Legacy Code 102708

Coordinator Sharon Kwok ([https://directory.westernsydney.edu.au/search/name/Sharon Kwok/](https://directory.westernsydney.edu.au/search/name/Sharon%20Kwok/))

Description This unit will examine the theory, politics and practice of crime prevention while exploring how this relates to alcohol, illicit drug use and criminalisation. In particular, this unit will explore key elements of alcohol and other drugs (AOD) research, service delivery and policy approaches that are framed, both practically and symbolically as crime prevention measures. It will address current approaches to crime prevention, evaluate their effectiveness and examine emerging strategies in the field. Some key case studies in the field of critical drugs studies will be used throughout this unit to demonstrate some principles of crime prevention introduced in the first part of the unit.

School Social Sciences

Discipline Criminology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Incompatible Subjects CULT 3008 - Crime Prevention and Community

Restrictions Successful completion of 40 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and explain key theoretical frameworks underpinning approaches to crime prevention.
2. Analyse the concept of criminalization and its relationship to drug use and crime prevention.
3. Demonstrate knowledge of the link between critical drugs studies and crime prevention principles.
4. Communicate crime prevention strategies to community and industry stakeholders.

Subject Content

Origins and theoretical foundations of crime prevention.
Types of crime prevention (i.e. social, physical, neighbourhood).
Planning and crime prevention partnerships.
Crime and drugs nexus.
Drugs, crime and harm minimisation as crime prevention.
Criminalisation, decriminalisation and legalisation of drugs.

Credit Points 10

Legacy Code 102712

Coordinator Robyn Newitt ([https://directory.westernsydney.edu.au/search/name/Robyn Newitt/](https://directory.westernsydney.edu.au/search/name/Robyn%20Newitt/))

Description In 2022 this unit replaced by 102916 First Peoples and Criminal Justice. How does colonialism underscore the foundational narratives, knowledges and operation of the legal and criminal justice institutions of colonised nations? Focusing primarily on the Australian context of colonial invasion and settlement, this unit explores the plight of Indigenous peoples and their severe over-representation in the Australian criminal justice system. Studying the impact of colonisation and exploring Indigenous narratives, students will critically examine issues faced by Aboriginal and/or Torres Strait Islander people and their experience of criminal justice in Australia. Overall, the unit will equip students with an understanding of the relationship between dominant colonial narratives of race and institutional racism, while considering how Indigenous knowledge can inform better social and criminal justice outcomes for Indigenous populations. Comparative examples of criminal (in)justice for Indigenous populations in other colonised nations will also be considered.

Legacy Code 101265

Coordinator Nicola Burke ([https://directory.westernsydney.edu.au/search/name/Nicola Burke/](https://directory.westernsydney.edu.au/search/name/Nicola%20Burke/))

Description This unit explores the concept of children's culture and the diversity of cultures to which children belong. The unit focuses on current debates about childhood and children's culture, including the rise of children's consumer culture. Students will gain insights into children's lives and culture by critically engaging with a variety of objects and institutions that are part of children's lives, for example, toys, videogames, children's television programs, films and books. The unit will also examine the role of adults in children's culture, including in marketing and advertising to children.

School Humanities & Comm Arts

Discipline Other Society And Culture

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Engage in key debates about the relationship between children, childhood and children's culture.
2. Situate children's culture in the context of diverse social, cultural, economic and political changes.
3. Identify the varieties of cultures to which children belong.
4. Critique the rise of children's culture and its impact on children's lives.
5. Critically analyse a variety of cultural objects and institutions that are part of children's lives.
6. Identify children as social and cultural agents.

Subject Content

-What is children's culture? What is childhood? Relationship between children's culture and the discourses and societal assumptions about the nature of childhood.

-Historical perspectives on children's culture, for example, the development of books and toys made especially for children.

-Consideration of the diverse social, economic and political contexts that shape and influence children's culture. How can we discuss children's culture when experiences of childhood can vary so widely? Issues such as child labour, children's rights, will

-Children as social and cultural agents - children's play and games; relationship with peers, adults and their environment; children as cultural producers.

-Children's consumer culture key issues and debates - case studies, for example, Barbie, videogames, internet, children's film and television programs, marketing to children - issues and debates, including regulation, violence, adult involvement in childr

Coordinator Irena Veljanova ([https://directory.westernsydney.edu.au/search/name/Irena Veljanova/](https://directory.westernsydney.edu.au/search/name/Irena%20Veljanova/))

Description Focused upon professional practice this unit will provide Social Sciences students with an opportunity to improve their career readiness. Using a combination of practical and theoretical teaching framework, this unit will teach students how to translate their social science knowledge to professional, career relevant knowledge. In

doing so, it will also provide students an opportunity to engage with contemporary social issues related, for example, to diversity, work and employment, place, sustainability, violence and alternative to violence, health and cyberworld and cyber-experiences.

School Social Sciences

Discipline Society and Culture, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects CULT 3005 - Contemporary Debates in Social Sciences

Restrictions Students must have successfully completed 80 credit points. Students enrolled in 1734 Bachelor of Policing must have successfully completed the following subjects before enrolling in this subject. 102314 Policing Practices, 101557 The Individual in Society, 102170 People, Place and Social Difference, 102250 Ethical Leadership and 400337 Social Research Methods. Students enrolled in 1665 Bachelor of Community Welfare must have successfully completed the following subjects before enrolling in this subject. 101551 Understanding Society or 101557 The Individual in Society and 101555 Ethics in the Social Sciences, 102170 People, Place and Social Difference, 400337 Social Research Methods. Students enrolled in all other programs must have successfully completed the following subjects before enrolling in this subject. 101551 Understanding Society or 101557 The Individual in Society, And; 101555 Ethics in the Social Sciences, 101900 Working with Communities, 102170 People, Place and Social Difference, 400337 Social Research Methods.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Integrate advanced theoretical and empirical knowledge in dealing with discipline specific real-world social issues;
2. Critically evaluate, interpret and apply knowledge derived from social science relevant published research to solve complex and novel social problems;
3. Exercise critical thinking, reflective, technical and basic professional skills to make informed decisions in the professional and applied context;
4. Demonstrate practical employability skills that can be useful for professional career development;
5. Demonstrate understanding of debate as a process of inquiry and advocacy and ability to apply it in applied context.

Subject Content

There will be two main themes covered in this subject:[1] Introduction to professional practice and [2] Application of professional practice to real-life social issues.

Theme one: Introduction to professional practice:

Applied Social Sciences and professional practice

Mapping the professional domain: Using Social Science in the profession

From degree to Profession: Developing employability skills

Introducing debate: Applied debate in professional context

Hierarchies of knowledge

Power and decision making

Theme two: Application of professional practice to Real-life

Social Issues (such as social issues related to diversity, work and employment, place, sustainability, violence & alternatives to violence, health and cyberworld and cyber-experiences).

Two main themes are covered in this subject:

[1] Introduction to professional practice, and

[2] Application of professional practice to real-life social issues.

- Applied Social Sciences and professional practice
- Mapping the professional domain: Using Social Science in the profession

- From degree to Profession: Developing employability skills
- Introducing debate: Applied debate in professional context
- Hierarchies of knowledge
- Power and decision making

Theme two: Application of professional practice to Real-life Social Issues:

- Social issues related to diversity
- Work and employment
- Place
- Sustainability
- Violence & alternatives to violence
- Health
- Cyberworld and cyber-experiences

Students may source their own internship or work placement as a means to integrate social science theory as it applies to professional practice.

CULT 3008 Crime Prevention and Community

Credit Points 10

Legacy Code 102038

Coordinator Sharon Kwok ([https://directory.westernsydney.edu.au/search/name/Sharon Kwok/](https://directory.westernsydney.edu.au/search/name/Sharon%20Kwok/))

Description In Spring 2020 this unit replaced by 102708 - Crime Prevention and Drugs. This unit will examine the theory, politics and practice of crime prevention. It will address current approaches to crime prevention, evaluate their effectiveness and examine emerging strategies in the field. The unit will consider the diversity of crimes and the ways in which some are constructed as preventable and others are not, while discussing the challenges posed by unreported crime, fear of crime and the relation between patterns of victimisation and social disadvantage. The unit will draw on empirical literature linking individual, social and contextual factors to the production and prevention of deviant behaviours and explore the potential of crime prevention strategies for alleviating the social ills associated with crime and deviance.

CULT 3010 Culture and Crime

Credit Points 10

Legacy Code 101562

Coordinator Ken Yates ([https://directory.westernsydney.edu.au/search/name/Ken Yates/](https://directory.westernsydney.edu.au/search/name/Ken%20Yates/))

Description In 2020 this unit replaced by 102710 - Crime, Media, Culture. Contemporary societies are replete with images of crime, including in fiction, the media, film and television. In this unit we explore this phenomenon through the lens of cultural criminology and its interest in the exciting and adrenaline-inducing aspects of crime.

We explore the link between culture and crime by looking at both textual/visual and ethnographic research. This means studying the way crime is experienced as 'thrilling' not only by those who consume it via images but also by those who actually engage in violent and transgressive conduct. This unit examines the relationship between cultural images of crime, the lived experience of criminal activity and its social and cultural impact.

School Social Sciences

Discipline Criminology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects CULT 3024 - Crime Media Culture

Restrictions Successful completion of 80 credit points

Assumed Knowledge

A basic understanding of foundational criminological theory.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the theoretical accounts and topics of research that are part of Cultural Criminology.
2. Make appropriate links between theoretical accounts and independent research.
3. Demonstrate the capacity to disseminate theoretical and empirical evidence of the links between culture and crime to a professional audience.
4. Critically assess cultural depiction of crime, criminals and the criminal justice system
5. Evaluate the value of textual analysis and ethnographic research for the development of criminal justice policy.

Subject Content

1. An Introduction to Cultural Criminology: Introduces Cultural Criminology as a sub-discipline of Criminology.
2. Rebellion: Explores symbolic resistance and social justice.
3. The Spectacle: Explore how spectacular images are used to dramatise crime and criminal justice issues in ways that remove or simplify context.
4. Hyper-reality: Explores the blurred distinction between the represented and the real.
5. Method: Outlines the way Cultural Criminologists do research through both textual and ethnographic analysis.
6. Technology: Discusses how technology alters the way we receive and interact with information about crime.
7. News: Discusses the way the relationship between commercial interests and criminal activity inform and impact news about crime.
8. Film: Discusses how popular culture representations of crime in film impact social expectations about crime and criminal justice issues.
9. Pleasure: Discusses the role of pleasure and enjoyment in the consumption and commission of crime.
10. The Night-Time Economy: Discusses the way cultural fantasies are played out through illicit practices in night-time entertainment districts.
11. Violence: Discusses the relationship between the consumption and commission of violence and aggression.
12. Militarisation: Discusses the way military imagery and ideology is increasingly incorporated into representations of and practices associated with crime control.

CULT 3011 Ethical Leadership

Credit Points 10

Legacy Code 102250

Coordinator Robert Salama ([https://directory.westernsydney.edu.au/search/name/Robert Salama/](https://directory.westernsydney.edu.au/search/name/Robert%20Salama/))

Description This subject focuses on major ethical theories, challenges, and concepts in a cross disciplinary environment. Students' knowledge and understanding of ethics will be further developed through interdisciplinary lenses on critical ethical thinking and decision-making. Students will be required to analyse ethical frameworks and systemic failure to discuss and reflect on various cross disciplinary challenges in diverse settings. By applying ethical concepts to personal journeys as citizen scholars and future professionals, students will develop their own ethical framework and gain skills required for future success as emergent leaders.

School Graduate Research School

Discipline Society and Culture, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions

Students must have successfully completed 40 credit points of study in their course with a minimum GPA of 5.0 to enrol in this unit. Students who are enrolled in the Bachelor of Creative Leadership (BCL) must enrol in the unit under the BCL. Enrolment in the unit for students enrolled in the BCL is at the discretion of the Academy or the Director of Academic Program.

Learning Outcomes

1. Apply major theories and concepts of ethical leadership to ethical decision making and leadership approaches from various disciplinary perspectives.
2. Evaluate the contributions of various disciplines to contemporary discourse on ethical leadership and decision making.
3. Critically examine the key challenges and dilemmas that impact ethical decision making for organisations and leaders.

4. Synthesise ways of thinking about ethical decision making and leadership in creating an ethical framework inherent to personal and professional goals.

Subject Content

1. Ethics from a cross disciplinary perspective.
2. Ethical frameworks: values, morals, and ethics.
3. Major philosophical, theological, psychological, and sociological perspectives.
4. Ethical leadership and decision making: Developing a framework and taking responsibility.
5. Natural Law and Moral Law: Foundations of public freedoms.
6. Social justice and the common good: Ethics of justice and ethics of care.

CULT 3013 Gender, Crime and Violence

Credit Points 10

Legacy Code 101561

Coordinator Ashlee Gore ([https://directory.westernsydney.edu.au/search/name/Ashlee Gore/](https://directory.westernsydney.edu.au/search/name/Ashlee%20Gore/))

Description In recent decades, models and understanding of gender have become a major way of explaining crime and victimisation. Most obviously, feminist researchers have pioneered studies of the neglected victimisation of women from male violence and the impact of gendered discourses on the criminal justice system. This unit will critically engage with this material and also focus on contemporary accounts of the links between criminal offending and different violent

and non-violent masculinities. Lastly, the shifting regulation of different sexualities and their criminalisation will be analysed.

School Social Sciences

Discipline Criminology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) CULT 1024

Restrictions

Successful completion of 80 credit points including the pre-requisite subject listed above.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate understanding of explaining the relationship between violence, crime and gender.
2. Apply key feminist and critical masculinities theories to contemporary issues pertaining to crime and victimisation.
3. Understand and analyse the gendered aspects of the law and criminal justice system.
4. Develop policy and practice-orientated responses to gendered crimes and victimisation.

Subject Content

1. Feminist theories and research
2. Critical masculinities theory
3. Gendered perspectives on the law
4. Women's Victimization and Offending Nexus
5. Gender, War, and Militarization
6. Colonization and the Abuse of Indigenous Women: Now and Then
7. Sexual minority experiences of violence and victimisation
8. Critical perspectives on race, ethnicity and gendered crime
9. Technology Facilitated Violence against Women
10. Gender and Crimes of the Powerful
11. Prevention of gendered violence
12. Gender, justice and punishment

CULT 3014 Heritage Interpretation

Credit Points 10

Legacy Code 101643

Coordinator Felicity Picken ([https://directory.westernsydney.edu.au/search/name/Felicity Picken/](https://directory.westernsydney.edu.au/search/name/Felicity%20Picken/))

Description This unit examines the theory and practice of heritage interpretation for visitors at natural and cultural heritage sites. It examines the development of heritage interpretation within national parks and museums and explores the various issues facing contemporary interpretation in the context of multicultural and postcolonial societies and the advent of digital media.

School Social Sciences

Discipline Society and Culture, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 6067 Heritage Interpretation LGYA 1270 - Heritage Interpretation

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe heritage interpretation theory and its relationship to communications, museology, media and informal learning
2. Apply knowledge of heritage interpretation at a variety of heritage sites, and critically assess practice in terms of heritage interpretation theory
3. Produce a heritage interpretation plan, drawing on relevant theory and practice
4. Synthesise and critically evaluate issues in contemporary heritage interpretation, namely, cross-cultural interpretation, digital media, multi-cultural contexts, postcolonial contexts and emerging perspectives in the field, particularly embodiment and aesthetics

Subject Content

Introduction: defining the terrain of heritage interpretation

Early models of interpretation: Tilden, Uzzell & Vergo

Interpretation Strategies: Interpretation in practice at various Sydney sites

Models of material culture & the implications for heritage interpretation

The planning, the design & the evaluation of heritage interpretation Interpretation and communication

Targeted interpretation ? understanding the visitor

Interpretation, multicultural communities, postcolonial contexts and cross-cultural translation

Heritage interpretation charters of principles (international, national and state)

Future directions: embodiment, aesthetics and digital media

CULT 3015 Heritage and Tourism

Credit Points 10

Legacy Code 101599

Coordinator Zelmarie Cantillon ([https://directory.westernsydney.edu.au/search/name/Zelmarie Cantillon/](https://directory.westernsydney.edu.au/search/name/Zelmarie%20Cantillon/))

Description This unit examines the relationship between heritage (both cultural and natural) resources and tourism. It firstly provides an introduction to contemporary issues in heritage and tourism management. Secondly, it investigates the phenomenon of heritage and tourism - its nature, the market, visitors, the issues in planning and management - in the context of sustainable tourism praxis in Australia (and globally) as well as in the context of local communities.

School Social Sciences

Discipline Society and Culture, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Incompatible Subjects LGYA 6066 Cultural Heritage and Tourism LGYA 1269 Cultural Heritage and Tourism

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the nature and issues of heritage resources in relation to tourism planning and management practices in Australia.
2. Analyse the complexities of heritage tourism including its nature, the market, visitor characteristics & motivations, the planning dimensions, attraction types & the issues surrounding these (especially politics in government policies, guidelines & regulations).
3. Examine the principles and issues of heritage management with particular reference to sustainable tourism planning and visitor management.
4. Apply these various understandings and principles to case-studies & in particular field work at The Rocks, Sydney.

Subject Content

- Key concepts: What is heritage ? definitions, nature, uses ? plus key concepts (identity, power, discourse, authenticity, visibility)

- Key management processes: Cultural Heritage Management ? principles, planning, stakeholders, community consultation, visitor issues, dealing with change (national and international context)

- Key tourism components: Heritage/cultural tourism - its nature, the market, visitor characteristics & motivations, the planning dimensions, attraction types & the issues surrounding these (especially politics in government policies, guidelines & regulations).

- Key Issues: The politics of heritage tourism, the political economy of heritage tourism, Heritage tourism in a global context: (case study based explorations ? Diaspora, pilgrimage, the exotic ?eother?f, than tourism) Application: the application of contemporary heritage tourism theory & practice in ?ereal world?f case-studies within Sydney (The Rocks).

CULT 3016 Indigenous Cultures: A Global Perspective

Credit Points 10

Legacy Code 101905

Coordinator Donna James ([https://directory.westernsydney.edu.au/search/name/Donna James/](https://directory.westernsydney.edu.au/search/name/Donna%20James/))

Description Drawing on global case studies, this unit aims to introduce students to some of the pressing socio-cultural issues facing indigenous peoples around the world. The unit examines the complex relationships between globalisation, colonialism and post-colonialism and contemporary indigenous cultures and identities. It draws attention to the way in which issues of representation, cultural autonomy, cultural commodification, development and human rights play out with respect to indigenous peoples' lives. More specifically, the unit interrogates the power relations and politics central to many of these issues and examines the nature of contemporary indigenous and non-indigenous

interactions, particularly in the contexts of tourism and heritage, the cultural industries, the environment, development and urbanisation.

School Social Sciences

Discipline Society and Culture, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 5759 - Indigenous Tourism LGYA 0631 - Indigenous Cultures and Tourism A Global Perspective

Restrictions Successful completion of 60 credit points.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain how globalisation has complexified indigenous cultural identities.
2. Demonstrate a critical understanding of the historical and contemporary relationships between indigenous and non-indigenous peoples and cultures by discussing the theories and concepts of colonialism, postcolonialism, autonomy, participatory methods and self-determination.
3. Critically reflect on the issues of cultural representation and cultural consumption.
4. Analyse how politics, power, ethics, ontology and epistemology influence the treatment of indigenous peoples in one of the following contexts: tourism and heritage, the cultural industries, land management and the natural environment, and development.
5. Use online technologies to organise, share and communicate Indigenous-related topics and issues.

Subject Content

Understanding indigeneity in the changing world
Theories of colonialism and postcolonialism
Autonomy, self-determination and indigenous politics
Globalisation and indigenous identities and cultures
The representation and consumption of indigenous cultures
Mapping indigenous cultural landscape/s
Power, land rights, displacement and indigenous protected areas
Ethics, tourism, and cultural and environmental heritage
Sustainability, development and ethics in practice
Ethnography, travel and the Other

CULT 3017 Legislation, Courts and Policing

Credit Points 10

Legacy Code 101568

Coordinator Kate Linklater ([https://directory.westernsydney.edu.au/search/name/Kate Linklater/](https://directory.westernsydney.edu.au/search/name/Kate%20Linklater/))

Description This unit introduces students to the adversarial system, the legislative context of everyday policing, and the different forms of state and federal courts. It includes an emphasis on police powers (NSW and elsewhere), summary and indictable offences, and the role of enforcement and discretion. In particular alternative resolution and specialist courts are described and their role and function analysed. This unit is of value to students in policing, criminology, law, and community welfare.

School Social Sciences

Discipline Criminology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Incompatible Subjects JUST 2012 - Law Evidence and Procedure

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically analyse a criminal or traffic court matter.
2. Describe the general principles of criminal liability in relation to the major substantive criminal offence categories.
3. Explain the laws and acts which are most relevant to the policing role.
4. Consider alternatives available to police to prevent individuals entering the criminal justice system.

Subject Content

The adversarial system (exception of the coroner's court).
Awareness of issues specific to Aboriginal and Torres Strait Islander peoples, other indigenous peoples, and peoples from disadvantaged backgrounds.

Court processes (observation field trip).

The court system (Actus Reus and Mens Rea; indictable and summary offences; alternative resolutions; specialist courts).

Types of law; Acts, statutes (state, inter-state; commonwealth).
Law Enforcement (Powers and Responsibilities) Act 2002 (LEPRA) (NSW) (rule of law; enforcement and discretion).
Law and its interpretation concerning social disorder; property crime; prohibited drugs; crimes of violence (homicide; family violence; armed robbery; assault); Child Protection Act; fraud and computer/electronic crime.
Topical examples such as anti-terrorism laws, bike gang laws etc.

Assessment

CULT 3018 Perspectives in Criminology

Credit Points 10

Legacy Code 102037

Coordinator Erin Kruger ([https://directory.westernsydney.edu.au/search/name/Erin Kruger/](https://directory.westernsydney.edu.au/search/name/Erin%20Kruger/))

Description Contemporary criminological knowledge typically concerns explanations of offending, victimisation, prevention and safety, but debates about these matters also reflect unequal power, social division and exclusion. The unit will focus on the criminological concern with offenders across all domains, with particular attention to crimes of the powerful. Additionally, it will analyse the impacts of the blurred lines between the public and private, the national and global, citizens and

aliens, as well as evidence about the expansion of more intensive forms of governance in national and global contexts.

Level Undergraduate Level 3 subject

Pre-requisite(s) CULT 1005 AND CULT 1024

Equivalent Subjects CULT 3006 - Contemporary Perspectives in Criminology

Restrictions Successful completion of 80 credit points including the pre-requisite subjects listed above.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a critical understanding of the recent perspectives in criminology.
2. Demonstrate knowledge of crimes of the powerful including white collar, corporate/transnational, state crime and crimes against nature.
3. Apply different theoretical models of understanding state and global power.

Subject Content

The impact of contemporary models in criminology
Globalisation and the changing nature of criminal justice
Neoliberalism and shifting forms of crime prevention
Transnational crimes and the impact of its counter-measures
Law and order trends
Corporate and environmental crimes
Crime, space and social exclusion
State crimes, war crimes and crimes against humanity
Torture and detention without trial
Privatisation and the growth of criminal justice
Terrorism and counter-terrorism
Global criminal justice administration

CULT 3020 Representing Crime

Credit Points 10

Legacy Code 101005

Coordinator Sara Knox ([https://directory.westernsydney.edu.au/search/name/Sara Knox/](https://directory.westernsydney.edu.au/search/name/Sara%20Knox/))

Description This unit deals with the evolution of the figure of the detective and of the criminal; the development of an aesthetics of crime from the later 18th Century; the dynamic nature of fiction, film and television genres of detection. Literatures of sensation, detective fictions, true crime writing and the non-fiction novel will all be examined to allow an in-depth analysis of the changing ethical and psychological character of the detective, and of his nemeses. The crime story in film, television and in other new media may also be addressed to facilitate an analysis of changing cultural contexts for the crime story.

School Humanities & Comm Arts

Discipline Criminology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYC 1299 - Representing Crime

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. demonstrate an understanding of theories of crime fiction in the context of debates about violence, modernity and popular culture;
2. build analytical capacities in relation to concepts of genre, and the interdependence of different generic forms;
3. identify change and continuity in discourses around crime from the later 19th to the early 21st century;
4. analyse the relationship between textual forms of different media in the representation of crime and the figure of criminal and the detective.

Subject Content

Content may vary between semesters of offering dependant on the teaching staff expertise and interests. Content may draw from, or elaborate upon, the following pool of topics:

Contemporary crime fiction

The relationship between crime fiction and its readers.

Literatures of sensation

The Forensic Imagination

True crime: modern genres

The non-fiction crime novel

Crime narrative, visual and oral culture

The Spectacle of the criminal trial

Moral panic around dangerous classes of persons

The fame and infamy of the serial killer

Prescribed Texts

- A book of primary readings prepared by the subject coordinator.

CULT 3023 Global Citizenship and Engagement

Credit Points 5

Legacy Code 301218

Coordinator Liz Thyer ([https://directory.westernsydney.edu.au/search/name/Liz Thyer/](https://directory.westernsydney.edu.au/search/name/Liz%20Thyer/))

Description This is a 10 credit point year-long subject taken over two terms (5 credit point in each term). The subject claims to engage students with current global contexts to integrate professional knowledge and develop skills, attitudes and behaviours that support them to be global citizens with inter-cultural competence. As part of the subject students will be required to undertake a global learning experience relevant to their studies. This experience may involve travel to an overseas organisation and/or community, or participation with a local or online globally focused organisation. The subject is completed across a year of study, with the first semester a preparatory experience, mid-semester the opportunity to complete a global short program, and the final semester a time to reflect. Students will immerse themselves in their new global environment, make sense of the organisation's or a community's modes of action and meaning, and negotiate their ways of acting and being in the process of becoming a member and contributing to the organisation and/or community with which they engage. Students in this subject will reflect on global engagement experiences to discuss self-learning and how this learning informs personal and professional development.

School Health Sciences

Discipline Society and Culture, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 5cp

Level Undergraduate Level 3 subject

Pre-requisite(s) Students must have completed 120cp in their currently enrolled course prior to enrolling in this unit

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse the sociocultural practice of a community and evaluate its impact on the people working in that environment, including self.
2. Identify social, cultural or technical challenges associated with international travel and engagement, and implement strategies to address them either collaboratively in a team or as an individual.
3. Contribute to the productivity of an international community.
4. Analyse the contribution of global engagement for an organisation and community
5. Evaluate the impact of global connections on the outcomes for the community, your team and one's professional development.
6. Critically reflect on global engagement experiences to discuss self-learning and how this learning has supported personal and professional de

Subject Content

1. Cultural responsive behaviours, attitudes and actions, including communication skills will be explored for development of cultural competency.
2. Ethical challenges related to international travel and aid, and to student's profession when applied to different cultural/global contexts

Assessment

CULT 3024 Crime, Media, Culture

Credit Points 10

Legacy Code 102710

Coordinator Ken Yates ([https://directory.westernsydney.edu.au/search/name/Ken Yates/](https://directory.westernsydney.edu.au/search/name/Ken%20Yates/))

Description There is a close relationship between representations of crime in mass and social media, and policy and legal responses to

crime. Media consumers are producing and circulating content about crime and criminality through new media technologies, and some are using social media and the internet to engage in new forms of criminality. In this unit, we explore the complex role of mass media and 'new' media in debates over crime and crime control, and the facilitation of criminality by media technologies. This means studying contemporary media theory and its relevance for criminology, and the effects of social media and computing technology on representations and practices of criminality. The unit maintains a strong focus on the ways in which media and culture informs crime policy and criminal justice processes.

School Social Sciences

Discipline Criminology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects CULT 3010 - Culture and Crime

Restrictions

Successful completion of 80 credit points

Assumed Knowledge

A basic understanding of foundational criminological theory.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an understanding of the theoretical accounts and topics of research that are part of criminological media studies.
2. Make appropriate links between theoretical accounts and independent research.
3. Demonstrate the capacity to disseminate theoretical and empirical evidence of the links between culture, media and crime to a professional audience.
4. Critically assess cultural depiction of crime, criminals and the criminal justice system.

Subject Content

1. An introduction to criminological media studies
 - Explains the role and history of media studies within criminology.
2. The Spectacle and Hyper-Reality
 - Explore how spectacular images are used to dramatise crime and criminal justice issues in ways that remove or simplify context, and the blurred distinction between the represented and the real.
3. News and true crime
 - Examines how the relationship between commercial interests and criminal activity inform and impact news about crime, and how popular culture representations of crime in true crime media impact social expectations about crime and criminal justice issues.
4. Internet and social media
 - Introduces the internet as a 'new media technology' as a conduit for discourse and representations of criminality and also a potential instrument of criminality, with a focus on the effects of social media on contemporary society
5. Technology
 - Examines how key technologies, such as drones and video games, feature in discourses of policing and crime control, and the role of computing technologies in mystifying state violence.
6. Impact on policy and practice

- Provides case studies of the entanglement between media and cultural discourses of crime and public policy, legislative reform and policing practice.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

CULT 3025 Prisons, Punishment and Criminal Justice

Credit Points 10

Legacy Code 102711

Coordinator Selda Dagistanli ([https://directory.westernsydney.edu.au/search/name/Selda Dagistanli/](https://directory.westernsydney.edu.au/search/name/Selda%20Dagistanli/))

Description The demise of corporal punishment and the rise of incarceration are defining features of control in modern states. This unit provides an historical and sociological examination of the models, practices and justifications for punishment and incarceration. It begins with an overview of early liberal notions of the social contract, the modern movement away from corporal punishment towards incarceration, and a subsequent welfare oriented emphasis on treatment, reform and rehabilitation. Following from this, the unit explores the development of probation and parole systems, decarceration, community corrections, mass imprisonment, and the contemporary control of risk and 'dangerous' populations. These themes are considered through an intersectional analysis of structural factors such as age, gender, sexuality, social class, racial/ethnic identity and the impact of imprisonment and corrections on different individuals and groups. This unit pays particular attention to the over-representation of Indigenous populations in Australian prisons.

School Social Sciences

Discipline Criminology

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Incompatible Subjects CULT 2011 - Prisons Punishment and Criminal Justice (Level 2)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate the relationship between punishment and society, the history of the prison and its relationship to modernism;
2. Critically analyse how social practices of punishment affect certain sectors of the population, including highly marginalised groups;
3. Describe the impact of contemporary issues in public policy and penalty, including community-based measures, private prisons, the

dispersal of punishment, restorative and therapeutic justice and the law and order driven imperatives of retribution and vengeance;

4. Critically assess the contributions of philosophical approaches to contemporary debates about punishment goals and practices.

Subject Content

Punishment and criminal justice
 Philosophical justifications for punishment
 The rise of the prison
 Juvenile detention and punishment of youth
 Class, race, disadvantage and imprisonment: Indigenous over-representation
 Gender and punishment
 Non-custodial penalties and regulatory justice
 Penal reform, activism and prison politics
 Prison policies and correctional programmes
 Decarceration and recarceration
 Privatisation of prisons and corrections
 Risk, fear and ?dangerousness?f

CULT 7001 Economies and Ecologies

Credit Points 10

Legacy Code 800174

Coordinator Katherine Gibson ([https://directory.westernsydney.edu.au/search/name/Katherine Gibson/](https://directory.westernsydney.edu.au/search/name/Katherine%20Gibson/))

Description This unit examines how the economy is being reclaimed as a space of political decision in the Anthropocene, the new geological epoch in which human activity is having global impact on the Earth's ecosystems. It critically explores how different ways of thinking about economy shape the worlds we inhabit. It analyses contemporary examples of economic experimentation and human-non-human assemblages that are making 'other worlds' possible. It explores connections between ecological and economic thinking and asks how our conception of the economy and subjectivity changes when we consider the needs of other species as well as our own.

School Graduate Research School

Discipline Other Society And Culture

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a range of thinking practices that open up the economy as a site of possibility

2. Review and participate/engage with current debates about economic alternatives
3. Apply methods for social and political theoretical development
4. Apply skills in peer reading, reviewing, editing and re-writing

Subject Content

1. Thinking for the Anthropocene
2. Representations of Economy
3. Thinking from Ecology/Nature/Matter
4. Anti-Essentialism and Class
5. Rethinking Economic Subjectivity
6. Decentering Subjectivity
7. Feminist Economic Thought
8. Neoliberalism Scripts and their Effects
9. Unravelling Community
10. Thinking Strategies for Decolonization
11. More-than-HumanPost-Development

Teaching Periods

CULT 7002 Engaging Discursive Fields

Credit Points 10

Legacy Code 102340

Coordinator Tanya Notley ([https://directory.westernsydney.edu.au/search/name/Tanya Notley/](https://directory.westernsydney.edu.au/search/name/Tanya%20Notley/))

Description This unit creates an opportunity for intensive reading on the candidate's research project. Lectures and seminars direct students to identify classic texts, watershed publications, leading scholars, and current debates in their chosen field of research. While expanding their knowledge of existing scholarship, they will become aware of the discursive structures and academic protocols that govern their discipline. What theoretical approaches are used? What does the field of research require of its scholars? What makes their work authoritative? What sources do they use? What questions guide their research? In what context? How has the discursive field changed over time? Such questions direct the formulation of a research project of current relevance.

School Humanities & Comm Arts

Discipline Society and Culture, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Establish a broader knowledge of existing scholarship in their field of research
2. Identify key texts and theoretical approaches used within their field of research
3. Demonstrate awareness of protocols of research and scholarship that govern the field
4. Identify current debates and leading scholars in the field

5. Demonstrate advanced skills in discriminating bibliographic research.

Subject Content

- advanced research techniques
- genres of academic writing
- Expectations of academic research and writing across and within fields of research
- concepts of discourse and The formation of knowledge
- Understanding and recognising sources and uses of academic authority
- Varieties and uses of sources across various media
- relationships between research and its dissemination
- modes of research dissemination beyond Print

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Critical Review of Work Read	2,000-3,000 words	50	N	Individual
Annotated Bibliography: Bibliography of additional reading for future reference assessed on the relevance, and range of resources	1,000 - 1,500 words - dependent on the topic and discipline	25	N	Individual
Quiz: 5 online quizzes based on work read in common. Five questions in each quiz, multiple choice and/ or short answer.	30 minutes each	25	N	Individual

Teaching Periods

CULT 7003 Environmental Humanities

Credit Points 10

Legacy Code 102339

Coordinator Josh Wodak ([https://directory.westernsydney.edu.au/search/name/Josh Wodak/](https://directory.westernsydney.edu.au/search/name/Josh%20Wodak/))

Description This unit provides an overview of the emerging interdisciplinary field of Environmental Humanities. It provides a space

of dialogue for Humanities, Arts and Social Sciences (HASS) and Science, Technology, Engineering and Mathematics (STEM) students to work collaboratively in developing novel ways of thinking about the relationships between culture and nature. The Unit centres on emerging conceptual trends interrogating notions such as: Anthropocene, extinction, planetary boundaries, critical zones, socio-ecological change dynamics, as a way of engaging with fundamental questions of meaning, justice, value, responsibility and purpose in a time of rapid and escalating change. The unit also focuses on methodological issues and tackles questions of co-construction between HASS and STEM disciplines.

School Graduate Research School

Discipline Society and Culture, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate a critical awareness of the historical, philosophical and political implications of human transformation of the environment and the ways we rethink our relations with other non-human beings.
2. Define the major theoretical traditions in environmental humanities identifying the multiple subareas within environmental humanities and understanding their origins, connections, and divergences.
3. Use a range of methods to analyse, critically interrogate, and offer solutions to diverse perspectives on contemporary environmental concerns and dilemmas.
4. Use interdisciplinary approaches to tackling complex problems, including developing research, writing and presentation skills that successfully integrate knowledge from humanities, social sciences, science and technology, and the natural sciences.
5. Demonstrate the ability to translate and present research in an academic forum.

Subject Content

This subject is offered through a combination of online and face-to-face delivery. Students are required to attend 5 x 2 hour lectures, 10 x 2 hour seminars and 1 x 2 hour symposium. The subject makes extensive use of blended learning for accessing resources and activities. Students are expected to spend approximately 120 hours on this subject, working through the reading program, contributing to online discussions, completing the assessment tasks and attending the compulsory lectures/seminars.

Preliminary content include:

1. Conceptualising the environmental humanities: concepts and methods for studying cultures/natures
2. Understanding living systems and coupled socio-ecological dynamics
3. Living in the Anthropocene: exceeding planetary boundaries
4. Approaches in Environmental History
5. Debates in Environmental Anthropology
6. Sustainability and Design
7. Normative principles of Environmental Justice
8. Science, democracy and citizenship
9. Researching global change; interdisciplinary challenges.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Literature review	2,000 words	25	N	Individual

CULT 7004 Global Digital Futures

Credit Points 10

Legacy Code 102412

Coordinator Brett Neilson ([https://directory.westernsydney.edu.au/search/name/Brett Neilson/](https://directory.westernsydney.edu.au/search/name/Brett%20Neilson/))

Description This unit explores how innovation in the digital era is transforming society on a global scale. Reflecting on examples drawn from around the world, students learn about the latest trends in communication, media, computing and the knowledge economy. Current and future directions are surveyed in the context of contemporary issues such as big data, digital identity and privacy, social media and crowdsourcing, gaming and visualisation, geographical information systems, virtual environments and artificial intelligence.

School Humanities & Comm Arts

Discipline Society and Culture, Not Elsewhere Classified.

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Equivalent Subjects CULT 7007 - Text Media and Memory

Restrictions

Students must be enrolled in a postgraduate or a research program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Think critically about the implications of using digital technology and methods for compiling, storing, displaying, and disseminating humanities data.
2. Articulate the influence of earlier media, such as photography and film, on communication, research and information design so that digital innovations can be viewed in a broader context.
3. Appraise new formats, genres and methods for the production of knowledge, ranging from the personal and experimental to the institutional.
4. Articulate key ways in which the concepts of identity and community are changing in the digital information age.

Subject Content

The subject is structured around eight modules

1. Digital Futures
2. Data Politics and Algorithmic Governance
3. Digital Infrastructures - Data Centres and Undersea Cables
4. Artificial Intelligence/Machine Learning
5. High Frequency Trading and Flash Crashes
6. Contact Tracing
7. The Chinese Internet and the Digital Silk Road
8. Reverse Engineering

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Online Research and Learning Activities	Regular contribution to activities, totalling minimum 1,000 words	20	N	Individual
Oral Presentation	10 minutes	15	N	Individual
Project: a written work or a digital creative or critical work with an exegesis	3,000 words (or equivalent combination of digital work and written exegesis)	65	N	Individual

CULT 7006 Rethinking Culture and Society

Credit Points 10

Legacy Code 800196

Coordinator Gregory Noble ([https://directory.westernsydney.edu.au/search/name/Gregory Noble/](https://directory.westernsydney.edu.au/search/name/Gregory%20Noble/))

Description This unit explores key ideas in social and cultural analysis - such as culture, society, experience, power, nature, local/global, etc - as a way of helping students think through their own research projects. It draws on an approach to cultural and social research, developed at the Institute for Culture and Society, which addresses the contradictions of a world that is increasingly globalised, culturally diverse and technologically mediated. A key aspect of this approach is to revisit the central concepts of social and cultural theory, linked to an overview of existing approaches, developing skills of critical analysis and reflecting on the challenges of interdisciplinarity, methodological pluralism, cultural complexity and engaged research.

School Graduate Research School

Discipline Other Society And Culture

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

This subject is considered mandatory for students supervised within the Institute for Culture and Society

Learning Outcomes

On successful completion of this subject, students should be able to:

1. understand the processes in articulating and unpacking key theoretical ideas
2. develop a formulation of their own keywords
3. reflect upon the challenges of interdisciplinarity, methodological pluralism, cultural complexity and engagement
4. develop skills in critical analysis

Subject Content

1. exploration of key concepts of social and cultural analysis, eg: - culture, society, experience, practice, power, local/global, nature, economy, technology, etc
2. development of skills of advanced critical analysis
3. reflection on key challenges of: - interdisciplinarity, methodological pluralism, engaged research, cultural complexity
4. participation in ICS seminar series

Assessment

CULT 7010 Researching Post-Capitalist Possibilities (PhD Summer School)

Credit Points 10

Legacy Code 800216

Coordinator Stephen Healy ([https://directory.westernsydney.edu.au/search/name/Stephen Healy/](https://directory.westernsydney.edu.au/search/name/Stephen%20Healy/))

Description Researching Post-Capitalist Possibilities offers HDR students the opportunity to explore how the humanities and social sciences can play a role in making other worlds possible. It develops the thinking capacities we need as scholars to shape the world and reviews the ethical responsibilities that come with this work. It offers an opportunity to work with scholar members of the Community Economies Collective within the Institute for Culture and Society (ICS) who have been thinking outside or beyond capitalist relations since the publication of J.K. Gibson-Graham's *The End of Capitalism (As We Knew It)* in 1996.

School Graduate Research School

Discipline Other Society And Culture

Student Contribution Band HECS Band 4 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a Masters by research or PhD and must obtain permission from the subject Coordinator to enrol in the subject.

Assumed Knowledge

Students should have a working understanding of their disciplinary field at graduate level and familiarity with different social theoretical and methodological traditions in order to get maximum program benefit.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate key ideas of anti-essentialist political economy and feminist poststructuralism
2. Apply the thinking techniques and methodological approaches introduced in the course to student's current research.
3. Situate student-research within current theoretical debates in Feminist Political Economy, Science and Technology Studies and Environmental Humanities concerning economic and ecological futures
4. Design research strategies for instigating social and ecological transformation

Subject Content

This unit presents the conceptual foundations of feminist post-capitalist thinking and demonstrates its applicability. It will provide Master of Research and early stage PhD students with a demanding immersion in social theory debates.

1. Techniques of reading that open up possibility

Key theoretical concept: capitalocentrism

- Genealogy
- Deconstruction
- Queering

2. Theorizing subjects to open up possibility

Key theoretical concept: class as an entry point

- Marxian class analysis
- Anti-essentialist class analysis
- Class and subjectivity

3. Reframing 'the economy' to open up possibility

Key theoretical concept: diverse economies

- Reframing
- Inventory
- Reading for difference
- Performativity

4. Theorizing 'community' to open up possibility

Key theoretical concept: more than human community

- Reading 'property' for diversity
- From nouns to verbs: commons to commoning
- Applications of commoning
- Action research and assets based approaches

DESN 0001 Design Practice (WSTC Prep)

Credit Points 10

Legacy Code 700223

Coordinator Ben Fletcher ([https://directory.westernsydney.edu.au/search/name/Ben Fletcher/](https://directory.westernsydney.edu.au/search/name/Ben%20Fletcher/))

Description Design Practice introduces students to the fundamental principles of graphic design practice. This unit investigates how the design process is applied to real-world industry design briefs to create a visual design. Students develop an understanding of the processes and practices used to support collaboration between clients, designers and specialists when designing and producing visual communications. Students are guided through the process of interpreting a design brief, creating and pitching a design response, presenting work for critique, incorporating critique into a design solution and producing highly refined design outcomes to a professional standard. Students work on a number of design briefs using industry standard work practices, including time management strategies, multi-tasking, strict delivery deadlines, brief comprehension and job documentation as well as client/designer coordination and negotiation.

School Western Sydney The College

Discipline Graphic Design Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 0 Preparatory subject

Restrictions Students must be enrolled at Western Sydney University, The College.

Assumed Knowledge

Basic written English skills.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. describe and apply the processes and practices used to produce designs in the design industry and explain factors that influence these practices
2. apply the basic elements and principles of the design process to execute the design brief
3. describe and demonstrate the practices, techniques and processes used by designers in establishing briefs and in designing and producing designs that fulfil clients' needs
4. demonstrate competency in graphic design technology
5. conduct research and analysis as well as clearly communicate a rationale for design decisions
6. structure a brief
7. apply project and time management skills to achieve client deadlines
8. present, reflect and evaluate your own creative outcomes

9. maintain and store design documentation and job diaries at a professional standard

Subject Content

1. Design industry overview
2. Requirements and methodologies of design practice
3. The design brief
4. Core design techniques
5. Managing and communication with clients
6. Project management
7. Project delivery and presentation
8. Documenting and storing project documents
1. Design industry overview

DESN 0002 The Design Process (WSTC Prep)

Credit Points 10

Legacy Code 700197

Coordinator Ben Fletcher ([https://directory.westernsydney.edu.au/search/name/Ben Fletcher/](https://directory.westernsydney.edu.au/search/name/Ben+Fletcher/))

Description The Design Process introduces the elements and principles of design as well as design processes and methods required to explore and creatively apply the design process. The Design Process focuses on the skills and concepts that contribute to interpreting and responding to design briefs, as well as researching, developing and presenting innovative design solutions. The core of any design process is the design brief. The Design Process acknowledges the importance of this and how it informs relationships between the client, designer and specialists engaged to develop the design process. The unit addresses the purpose, sequence, major stages and application of the design process to synthesise solutions relevant to the design industry.

School Western Sydney The College

Discipline Graphic Arts and Design Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 0 Preparatory subject

Restrictions Students must be enrolled at Western Sydney University, The College.

Assumed Knowledge

Basic written English skills.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. implement a design process, including research, idea generation, prototyping and reflection, when responding to a brief
2. interpret the requirements of a design brief, the client, and a clearly defined audience and apply these to design work
3. use and apply specific research skills to collect ideas, information and resources relevant to the brief for inspiration, investigation, analysis and interpretation
4. develop the brief by identifying the client, their communication need/s, the purpose and context of the visual communication, the target audience and any constraints that affect the nature of the solution
5. explore a variety of design ideas that draw on the research and are appropriate to the brief
6. develop the concepts by selecting the preferred ideas and applying a range of methods, materials, media, design elements, design principles and presentation formats to create visual communications that address the brief
7. modify the design in response to feedback, reflection and evaluation against the brief
8. present and store work in a format which takes account of the need for professional presentation and potential need for samples in future work
9. select appropriate materials, tools and equipment required for the production of design samples in accordance with the brief
10. interpret and communicate the requirements of a design brief with the client, analyse their communication needs, the purpose of the visual communication and apply these to the design work

Subject Content

1. Stages of the design process
2. The design brief
3. Writing a design proposal
4. Research methods
5. Idea generation
6. Concept development
7. Evaluation, feedback and refinement
8. Creating and delivering an effective presentation

DESN 0003 Critical Thought in Design (WSTC Prep)

Credit Points 10

Legacy Code 700321

Coordinator Ben Fletcher (<https://directory.westernsydney.edu.au/search/name/Ben Fletcher/>)

Description Critical Thought in Design provides students with an understanding of the process designers use to structure their thinking and communicate ideas with clients, target audiences, other designers and specialists. The ability to think critically, creatively and independently is essential for success as a designer in generating and communicating innovative design solutions that meet the needs of the client and target audience. The aim of this unit is to provide students with the skills and techniques necessary to become an independent thinker able to research, analyse, argue and communicate effectively with clients. The unit examines a wide range of critical thinking and design, problem-solving methods including problem definition techniques, idea generation, brainstorming, as well as evaluation and analysis skills.

School Western Sydney The College

Discipline Graphic Arts and Design Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 0 Preparatory subject

Restrictions Students must be enrolled at Western Sydney The College

Assumed Knowledge

Basic written English skills.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply lateral thinking techniques to develop creative responses to project briefs.
2. Analyse and evaluate concepts, assumptions, explanations, arguments and solutions to design problems.
3. Identify, correct and prevent errors in thinking and problem solving in design processes.
4. Demonstrate critical and analytical skills in the interpretation and appreciation of works of design.
5. Apply design thinking techniques while conceiving, communicating and presenting ideas.
6. Demonstrate design thinking and research strategies within design practice.

7. Generate ideas and determine solutions using creative thinking methods, and conduct research, analyse, evaluate and communicate rationale for design decisions.
8. Conduct research, analyse, evaluate and communicate rationale for design decisions.

Subject Content

1. Creative thinking and design practice.
2. Critically analyse, consolidate and synthesise knowledge.
3. Creative thinking tools, eg mind mapping, brainstorming, metaphorical thinking, attribute listing, morphological synthesis, lateral thinking and the creative problem solving process.
4. Critical thinking techniques.
5. Lateral thinking and brainstorming.
6. Research and interpretation.
7. Evaluating, implementing and communicating new ideas.
1. Creative thinking and design practice.
2. Critically analyse, consolidate and synthesise knowledge.

DESN 1003 Design Histories and Futures

Credit Points 10

Legacy Code 102262

Coordinator Karen De Perthuis ([https://directory.westernsydney.edu.au/search/name/Karen De Perthuis/](https://directory.westernsydney.edu.au/search/name/Karen%20De%20Perthuis/))

Description This unit introduces students to historical accounts and theories of design from the dominant perspective of Modernism in the first half of the 20th century, through post-war consumerism and the ensuing movements of the 20th century, such as Postmodernism, Punk and New Wave; design reactions to corporate culture, design for change and activism; and the digital design enablers of the 21st century. Students learn a contextual history of 20th century design practice by studying the doctrines around which the modernist movement cohered, and the conditions under which these doctrines are challenged by later movements. The unit explores various roles of the visual designer through history-avant-garde, futurist, revolutionary, utopian design; client-service design; social activism, producer and digital enabler. These roles are expressed across a range of design outcomes such as photography, typography, illustration, print media, graphics, digital design, film and animation. Part of this exploration will examine the impacts of design histories on our past, present and future conditions, as well as changing the future for design. Students will complete visual and writing tasks that aim to build their understanding of design histories and futures, and scholarship in academic research and writing.

School Humanities & Comm Arts

Discipline Graphic Design Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects DESN 1001 - 20th Century Design Histories
DESN 1004 - Design Histories and Futures (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and analyse examples of design as part of historical contexts of visual practice/experimentation, ideas, social and/or cultural events.
2. Explain influential cultural themes, theories and doctrines that inform the design histories considered with reference to primary and secondary literature about exemplary design approaches.
3. Evaluate the contributions of select designers to these movements and periods of design practice by analysing examples, professional/cultural roles and relevant literature, and by making thinking visible through a design outcome.
4. Demonstrate understanding of the impact of design on contemporary society and the sustainability of the future.
5. Demonstrate research and English language literacy for critical thinking and writing about design history and scholarship

Subject Content

Introduction: Why study design history and theory? What are design histories and futures?

Modernism: the experience of industrial urbanism and cultural responses to modernity.

Experimental graphic design, Futurism and the European Modernist Avant-Garde.

Constructivism, Utopianism and the revolutionary role of the designer in the Soviet transformation.

The Bauhaus: Modernist principles and model of design education.

Photography, New Typography and the dissemination of graphic principles of the International Style of Modernism.

Consumerism and Corporate visual identity systems.

Disturbances: Postmodernism, New Wave and Punk graphics.

Digital design enablers of networked communication.

Revolution against corporate culture: the graphic designer, social responsibility and activism.

Imagining the future 1: design's speculations about future life and 'social dreaming'.

Imagining the future 2: sustainable futures and 'futuring'.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	1,000 words	25	N	Individual
Case Study	Visual design and 1,500 word essay	45	N	Individual
Applied Project	Visual work plus 500 word narrative	30	N	Individual

Co-requisite(s) Students enrolled in the combined Diploma/Bachelor courses listed below must pass all College Preparatory units listed in the course structure before progressing to the Year Two units

Equivalent Subjects DESN 1003 - Design Histories and Futures DESN 1001 - 20th Century Design Histories

Restrictions Students must be enrolled at Western Sydney University, The College. Students enrolled in extended diplomas must pass 40 credit points from the preparatory subjects listed in the program structure prior to enrolling in this University level subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and analyse examples of design as part of historical contexts of visual practice/ experimentation, ideas, social and/or cultural events.
2. Explain influential cultural themes, theories and doctrines that inform the design histories considered with reference to primary and secondary literature about exemplary design approaches.
3. Evaluate the contributions of select designers to these movements and periods of design practice by analysing examples, professional/cultural roles and relevant literature and by making thinking visible through a design outcome.
4. Demonstrate understanding of the impact of design on contemporary society and the sustainability of the future.
5. Demonstrate research and English language literacy for critical thinking and writing about design history and scholarship.
6. Demonstrate understanding of the impact of design on contemporary society and the sustainability of the future.

Subject Content

1. Introduction: understanding designs impact on the past, present and future.
2. Modernism: the experience of industrial urbanism and cultural response to modernity.
3. Experimental graphic design, futurism and European modernist avant garde.
4. Constructivism, utopianism and the revolutionary role of the designer in the Soviet transformation.
5. The Bauhaus: modernist principles and Eurocentric model of design education.
6. The new typography and the dissemination of graphic principles as the international style.

7. Consumerism and the assimilation of the international style into global corporate visual Identity systems.
 8. Postmodernism, new wave and punk graphics.
 9. Digital design enablers of networked communication.
 10. Revolution against corporate culture: the graphic designer, social responsibility and activism.
 11. Imagining the future: designs speculations about future life and social dreaming
 12. Sustainable design: sustainable futures and futuring
1. Introduction: understanding design?fs i

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Practical	Total of 1000 words for Quiz and Practical. Includes visual design.	25	N	Individual
Applied Project	Visual work plus 500 word narrative	25	N	Individual
Report	200 words	10	N	Individual
Essay	1500 words	40	N	Individual

DESN 1007 Graphic Design: Process and Practice

Credit Points 20

Legacy Code 102264

Coordinator Roman Goik ([https://directory.westernsydney.edu.au/search/name/Roman Goik/](https://directory.westernsydney.edu.au/search/name/Roman+Goik/))

Description This unit enables students to further develop their understanding of the design process within the context of project briefs that introduce areas of graphic design practice that include branding

and identity and information design. Students' understanding of a design brief, the client, and a clearly defined audience will deepen. Students will be introduced to some design specific research skills, such as mood board and persona development, which will help them begin to build a toolkit of methods which they will use throughout their degree. Students will develop their design process and a greater awareness of the role of research in the generation of ideas. Students will be introduced to further lateral thinking techniques and encouraged to develop creative responses to the project briefs within appropriate constraints for both client and audience needs. Further key software will be introduced and supported by online resources, and students will continue to develop their visual design skills in the fundamental areas of type, image and composition.

School Humanities & Comm Arts

Discipline Graphic Design Studies

Student Contribution Band HECS Band 2 20cp

Level Undergraduate Level 1 subject

Pre-requisite(s) DESN 1009

Equivalent Subjects DESN 1008 - Graphic Design Process and Practice (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Interpret the requirements of a design brief, the client, and a clearly defined audience and apply these to their design work.
2. Develop a range of design specific research skills and apply such methods as part of their design process.
3. Apply lateral thinking and design thinking techniques to develop creative responses to project briefs.
4. Utilise a range of appropriate visual approaches in the fundamental areas of type, image and composition.
5. Utilise a wider range of features of Adobe CC as an industry standard software application for production.
6. Create a brand identity in response to a client brief.
7. Interpret and communicate complex information to a specific audience.

Subject Content

Branding

- What is branding - it's more than just a logo
- what is A client? Defining your client - precedent and Documentary research skills
- what is An audience? Defining your audience
- mood boards and Personas - design specific research skills
- precedent research skills
- Brand personality, tone of voice, etc
- logo design
- Copywriting

Introduction to Information Design

- Basic Models of information design
- The role of purpose, audience and context within information design
- The taxonomy of organisation
- analysis and Mapping of The key elements of content
- Structuring and representation of information through The use of graphic language
- Lynda.com tutorials as specified: Illustrator CC fundamentals and creating Infographics with Illustrator

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Design Project - quick briefs	Design practice, therefore no length/ duration applicable	20	N	Both (Individual & Group)

DESN 1009 Graphic Design: Understanding the Principles

Credit Points 20

Legacy Code 102261

Coordinator Alison Barnes ([https://directory.westernsydney.edu.au/search/name/Alison Barnes/](https://directory.westernsydney.edu.au/search/name/Alison%20Barnes/))

Description This unit introduces students to the fundamental principles of visual language and graphic design practice. Through a series of workshops, exercises and project briefs, students will learn how elements such as colour, composition, text, typography and image can be used to communicate meaning in a variety of contexts. Through the project briefs students will begin to develop their awareness of graphic design as a problem solving activity and apply their understanding of the design process in relation to research skills, idea generation, reflective practice, and both written and verbal communication skills. Students will learn the importance of prototyping, developing and refining their ideas through practice, and aspects of the digital print

production process will also be introduced. Students will be introduced to design software packages and to support the ongoing development of their digital media skills they will be provided with access to resources for independent online learning.

Level Undergraduate Level 1 subject

Equivalent Subjects DESN 1013 - Image Design Illustration DESN 1015 - Introduction to Photomedia DESN 1012 - Image Design (WSTC)

Restrictions

Students must be enrolled in one of the following programs 1571 Bachelor of Design (Visual Communication), 1696 Bachelor of Communication, 1736 Bachelor of Communication (Dean's Scholars), 1737 Bachelor of Design - Visual Communication (Dean's Scholars), 1838 Bachelor of Creative Industries, 1839 Bachelor of Design/Bachelor of Creative Industries, 1840 Bachelor of Communication/Bachelor of Creative Industries, 1841 Bachelor of Music/Bachelor of Creative Industries, 1842 Bachelor of Arts/Bachelor of Creative Industries, 1843 Bachelor of Graphic Design (Pathway to Teaching Secondary), 6007 Diploma in Communication/Bachelor of Communication, 6009 Diploma in Communication/Bachelor of Creative Industries, 6011 Diploma in Design/Bachelor of Design (Visual Communication), 6013 Diploma in Design/Bachelor of Graphic Design (Pathway to Teaching Secondary), 6015 Diploma in Communication/Bachelor of Screen Media (Arts and Production).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Employ photographic techniques and principles for light and lens-based image making
2. Employ compositional devices and visual organisation in designed outcomes
3. Develop creative strategies using a range of photographic methods and techniques to convey meaning
4. Research historical and contemporary image-makers and visual communication outcomes
5. Utilize visual research in concept development
6. Generate solutions that demonstrate an understanding of the relationship between design brief, client and target audience

Subject Content

- Introduction to the image and photo-graphic methods as a tool of communication and research
- Introduction to the camera's functions and its use in the process of visual representation
- Light and lens-based capture and output

- Introduction to the history and use of the image in various genres, forms and applications
- Introduction to professional studio methods and workflows
- The construction of meaning through single, sequential images and editing

Special Requirements

Essential equipment

1 x 16 gig storage drive

Assessment

Restrictions Students must be enrolled at Western Sydney University, The College. Students enrolled in extended diplomas must pass 40 credit points from the preparatory subjects listed in the program structure prior to enrolling in this University level subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Identify and utilise the elements of design and compositional strategies used in the design of an image.
2. Create images that interpret verbal language and written concepts.
3. Analyse and interpret signs and signifiers used in visual communication and apply these principles to the construction of images.
4. Implement the use of visual metaphor and symbolism for image based practices.
5. Employ a range of image production methods.
6. Utilise appropriate methods of image organisation and manipulation.

Subject Content

Development of visual literacy skills for the effective analysis of image design.

Explore the relationship between visual and verbal language.

The impact of photographic and illustrative media on the reading of a designed image.

The potential of style, technique and media to communicate and evoke a range of image reading experiences.

The process of creating and evaluating photographic and illustrative images.

Appropriate research methodology skills.

Lynda.com tutorials as specified.

DESN 1018 Visual Storytelling

Credit Points 10

Legacy Code 101921

Coordinator Janet Saunders ([https://directory.westernsydney.edu.au/search/name/Janet Saunders/](https://directory.westernsydney.edu.au/search/name/Janet+Saunders/))

Description Visual storytelling is increasingly being used in a variety of contexts including websites, magazines, advertising, business and public affairs, exhibitions and events and television, often working across a number of platforms at the same time as requiring responsive design approaches for a diversity of viewing experiences. With access to increasing amounts and types of data, professional communicators need to be able to extract meaning to connect with a variety of different audiences in creative, dynamic, and emotional ways. This Unit introduces students to story archetypes, structure and flow. It encourages metaphorical and analogical storytelling using appropriation making reference to genre and research. This practical unit explores a range of traditional hands-on techniques and digital software commonly used across the communications sector. Students are encouraged to explore and develop their own mark and image making skills aimed at specific target audiences and communication contexts.

Level Undergraduate Level 1 subject

Equivalent Subjects LGYA 2353 - Design Principles 2D3D DESN 1005 - Design Thinking DESN 1019 - Visual Storytelling (WSTC)

Assumed Knowledge

Basic written English skills.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate understanding of the role of visual storytelling for exploring the relationship between content and context.
2. Evaluate visual communication contexts to identify principles and structures for visual storytelling.
3. Apply visual storytelling approaches using a range of digital media applications.
4. Apply visual approaches to generate relevant findings as storytelling outcomes for given briefs.

Subject Content

1. The subject introduces fundamental skills and literacies in visual design principles of layout for print and screen interfaces including readability, hierarchy, usage of information graphics and photography, typography and colour theory.
2. Visual storytelling principles are then applied through written and practical tasks that push understandings about the visual vocabulary of storytelling across a range of media platforms.

Assessment

Basic written English skills.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate understanding of the role of visual storytelling for exploring the relationship between content and context.
2. Evaluate visual communication contexts to identify principles and structures for visual storytelling.
3. Apply visual storytelling approaches using a range of digital media applications.
4. Apply visual approaches to generate relevant findings as storytelling outcomes for given briefs.
5. Articulate understanding of the role of visual storytelling for exploring the relationship between content and context.

Subject Content

The unit introduces fundamental skills and literacies in visual design principles of layout for print and screen interfaces including readability, hierarchy, usage of information graphics and photography, typography and colour theory.

Visual storytelling principles are then applied through written and practical tasks that push understandings about the visual vocabulary of storytelling across a range of media platforms.

The unit introduces fundamental skills and literacies in visual design principles of layout for print and screen interfaces including readability, hierarchy, usage of information graphics and photography, typography and colour theory.

Visual storytelling principles are then applied through written and practical tasks that push understandings about the visual vocabulary of storytelling across a range of media platforms.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Applied Project	1,250 words (600 words research responses, 650 words equivalent in visual presentation work.)	45	N	Individual
Applied Project	1,250 words	45	N	Individual

Quiz	50 words in total over 5 weeks (Each quiz is equivalent to 50 words in total and it consists of 20 questions in total)	10	N	Individual

DESN 1021 Web and Time-based Design

Credit Points 10

Legacy Code 101922

Coordinator Greg Hughes ([https://directory.westernsydney.edu.au/search/name/Greg Hughes/](https://directory.westernsydney.edu.au/search/name/Greg+Hughes/))

Description Students will develop fundamental computer software skills and design understandings appropriate to using major web and time based design technologies such as HTML and CSS. They will develop a working understanding of production literacies for online design and time-based design. Students will engage in practical studies of web authoring. Emphasis will be placed on understanding the roles, functions and features of key screen based technologies, design production context for online delivery, current industry best practices, and a working understanding of the responsibilities inherent in the digital design and production process.

School Humanities & Comm Arts

Discipline Graphic Design Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects DESN 1020 - Web and Time-based Design
DESN 1022 - Web and Time-based Design (WSTC)

Assumed Knowledge

Introductory level understanding of and skills in design principles particularly basic layout, colour and typographic knowledge. Digital

basics including working in a networked environment on a Macintosh computer. Ability to manage, transport and store digital information.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply graphic design concepts appropriate to the specific concerns of a time-based and/or online environment.
2. Apply methods and processes for planning web sites and time-based outcomes.
3. Demonstrate an applied understanding of designing to a brief with regard to online contexts, audiences and genres.
4. Use terminology and apply industry practices appropriate to preparing, generating and deploying web sites and time-based outcomes.
5. Demonstrate an applied understanding of the major technologies such as HTML, CSS and JQUERY as the basis for authoring web sites..
6. Demonstrate an applied understanding of the standard software applications for producing, optimising and manipulating images or artwork for web and/or time-based outcomes.

Subject Content

- introduction to key front-end web design and development languages: HTML and CSS.
- production processes for designing, developing and delivering online responsive websites.
- fundamental online concepts: responsive design, information architecture, interface design, navigation, user experience and user interaction.
- File formatting, naming conventions, File pathways and how to transfer files to and from A web server.
- Image optimization and preparation for online delivery.
- fundamental time based design concepts: Basic animation principles and graphics in motion.
- production processes for designing, developing and delivering time-based web elements.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Project 1 - Practical Assignment - Portfolio of 2 sequential exercises	1. Multi-page website; 2. Multi or single page (long scroll) website	50	N	Individual

Project 2 - Practical Assignment - Portfolio of 2 sequential projects	1. Web design and time-based element planning material, as a multi or single page (long scroll) website; 2. Multi or single page (long scroll) website, including time-based element	50	N	Individual

DESN 2001 Australian Design

Credit Points 10

Legacy Code 101923

Coordinator Karen De Perthuis ([https://directory.westernsydney.edu.au/search/name/Karen De Perthuis/](https://directory.westernsydney.edu.au/search/name/Karen+De+Perthuis/))

Description This unit continues the focus on academic and visual literacies for visual communication designers initiated in level one units. Students will investigate the Australian visual communication design profession, largely through the documentation of selected output and established methods across industry sectors producing graphic, photographic, illustrative, typographic, broadcast, interactive and online design. Lectures and selected case studies will outline professional scenarios and support the student in learning about the design industry's organisation and methods. Assessment tasks are designed to develop research and writing skills through the evaluation of professional resources and publications.

School Humanities & Comm Arts

Discipline Graphic Design Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Investigate the Australian visual communication design profession and methods of practice.
2. Review professional and academic publications and resources about Australian design.
3. Evaluate examples of professional profiles and case studies.

- Identify established approaches to design thinking and methods in industry practice.
- Develop investigative questions about professional practice and methods in response to existing documentation.

Subject Content

- industry sectors, professional resources, trade publications, associations, industry body websites, selected professional profiles and case studies
- Established design approaches and methods of Visual production and analysis in design.
- instruction on evaluation and writing for assessment tasks

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

DESN 2005 Graphic Design: Interactive Digital Media

Credit Points 20

Legacy Code 102265

Coordinator Sarah Waterson ([https://directory.westernsydney.edu.au/search/name/Sarah Waterson/](https://directory.westernsydney.edu.au/search/name/Sarah%20Waterson/))

Description Digital technology shapes the way we interact with our world. Design of these interactions is a crucial role for today's designers. This unit will develop students' critical interaction and visual design skills in the digital realm, including interface and experience design. Digital design specific research skills, methods and processes are covered. These include user research, persona development, storyboard development, lo-fi and hi-fi prototyping, wireframes and proof of concept methods. Students will engage with problem-based project briefs, and develop solutions that are appropriate for both client and audience needs across a range of devices. Outcomes include app, web and screen designs.

School Humanities & Comm Arts

Discipline Graphic Design Studies

Student Contribution Band HECS Band 2 20cp

Level Undergraduate Level 2 subject

Pre-requisite(s) DESN 1021

Assumed Knowledge

Students should have skills in producing documents or illustrations using Photoshop and Illustrator.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Employ a user-centric view in the context of the digital design process
- Implement a critical outlook and be able to identify key issues in designing for the digital realm
- Utilise a range of methods of describing a designed experience
- Define an experience design problem as well as resolve and present that resolution to design team colleagues
- Apply interactive design processes and planning methods
- Work effectively to produce a designed digital artefact.

Subject Content

- social, historical, technical and cultural contexts in which digital design occurs.
- experience design concepts and processes
- Instructional design basics
- Interaction design fundamentals and methods, including:
 - screen design basics
 - interface design: navigation systems and information architecture
 - goal directed design, implementation Models and mental Models, Understanding users, Personas and goals, scenarios and requirements
 - Qualitative research methods–UX design, adopt A user and needs Mapping
 - interactive digital media design processes, including planning, evaluation, Revision and testing

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Report	Visual design work, Blog posts Approx. 1,500 words	30	N	Individual
Proposal	Visual design work, annotations and precedent report. Approx. 1,500 words	30	N	Individual

Applied Project	Visual design work, annotations and brief user report. Approx. 1,000 words	40	N	Individual

DESN 2006 Graphic Design: The Professional Context

Credit Points 20

Legacy Code 102270

Coordinator Leo Robba ([https://directory.westernsydney.edu.au/search/name/Leo Robba/](https://directory.westernsydney.edu.au/search/name/Leo%20Robba/))

Description In this unit, students begin to situate their graphic design practice within a contemporary professional context. Designers today need to collaborate with colleagues or other professionals, and the majority of graphic design briefs require solutions that converge across a variety of media platforms and two, three or four dimensions. Students will undertake projects that extend their design thinking in these areas. Part of the unit requires students to work as part of a team, to develop content and a solution that engages the audience through a range of different media. Throughout this unit, students continue to extend their visual language, and associated material and digital skills.

School Humanities & Comm Arts

Discipline Graphic Design Studies

Student Contribution Band HECS Band 2 20cp

Level Undergraduate Level 2 subject

Pre-requisite(s) DESN 1007

Assumed Knowledge

120 credit points in 1571 Bachelor of Design (Visual Communication) or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use a range of communication skills that facilitate working collaboratively in design teams.
2. Devise and apply effective workflow strategies as an individual and as part of a team.
3. Evaluate a range of digital and material methods in relation to the execution of ideas and differentiate between the appropriateness of such methods in the development of a designed solution.
4. Use appropriate digital and material processes in response to the design brief, client and audience.

5. Employ a conceptual approach to the development of design ideas and apply this thinking into three dimensional form and multi-platform scenarios.

Subject Content

- Packaging Brand essence
- Three dimensional form and design
- Materiality and experience
- sustainability and environmental considerations
- design management
- cross-platform publishing
- The design of complex multi-page material
- Typography, layout and Image design
- Proofing, prototyping and production

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

DESN 2007 Illustrating Narrative

Credit Points 10

Legacy Code 101017

Coordinator Janet Saunders ([https://directory.westernsydney.edu.au/search/name/Janet Saunders/](https://directory.westernsydney.edu.au/search/name/Janet%20Saunders/))

Description This unit explores the conceptual, stylistic and format design of illustration for, and as, narrative. Through the design of an individual illustrated book project, students are encouraged to consider the design of different narrative forms, illustrative techniques and styles in relation to content, target audience, client, context, and genre.

School Humanities & Comm Arts

Discipline Graphic and Design Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) DESN 1013 OR

DESN 1011

Equivalent Subjects LGYA 0045 - Illustrative Narrative 3 and LGYA 0052 - Illustrative Narrative 4

Assumed Knowledge

An ability to use the computer programs 'In-Design, Photoshop, and Illustrator' in a Macintosh computer lab.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Employ a range of diverse illustrative mediums, techniques, styles and typography to create specific sequential 'reading' experiences through illustration.
2. Explain how the design elements and format of a book design can influence the 'reading' experience of the target audience.
3. Reflect on the effectiveness of image making strategies through illustrative practices.
4. Employ the compositional strategy of visual weight and directed tension in the design of an illustrated book.
5. Explain how the needs of the target audience, the content of the written text, and the social context of the proposed book influence the design criteria.
6. Employ concept mapping to identify the structure and communication options for illustrated narrative design.
7. Employ appropriate format design options for an illustrated book.
8. Demonstrate the development of professional accountability, through effective time management and participation in critical discussion in feedback, on project work.

Subject Content

1. Experimentation with a range of illustrative drawing, painterly mediums and with a diverse range of illustrative techniques and style, to convey conceptual content with relation to target audience needs.
2. Composition, format design, visual weight and directed tension in relation to designing illustration for books.
3. Visual strategies to convey concepts of space, time and movement.
4. Format design (page layout, the use of borders, the relationship of type to image, white space, colour and book format.)
5. Analysis of text for conceptual content and the development of appropriate visual signifiers.
6. Research and analysis of context, target audience and conceptual content of selected written text, with the purpose of developing suitable illustrations for that text.
7. Conceptual mapping of 'content'.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

DESN 2011 Motion Design

Credit Points 10

Legacy Code 102273

Coordinator Greg Hughes ([https://directory.westernsydney.edu.au/search/name/Greg Hughes/](https://directory.westernsydney.edu.au/search/name/Greg%20Hughes/))

Description This unit introduces students to the fundamentals of motion design practice. Students will discover how elements of static graphic design can be incorporated with sequence, time, space and sound to enhance the exchange of information and meaning in a variety of project contexts and kinetic media outcomes. Additionally, students will discover the purpose and function of motion design and be able to identify professional pathways associated with these skills and knowledge. Students will be exposed to a range of motion design preproduction and production methods, from fundamentals and guidelines to experimental and expressive approaches. Students will learn the importance of planning, mapping and evaluating linear narrative, in combination with the introduction of key software supported by online video courses, for successful motion design outcomes.

School Humanities & Comm Arts

Discipline Graphic Design Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) DESN 1021 OR
COMM 2042 OR
COMM 2051 OR
COMM 2051 AND
COMP 2020

Assumed Knowledge

Students are expected to have computer literacy including working in a networked environment on a Macintosh computer; management, transportation and storage of digital information and digital production processes such as scanning, pdf production and file storage. Literacy with image manipulation software - Photoshop and Illustrator is required.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Employ a motion design vocabulary for professional design production and group critique.
2. Analyse the purpose and function of motion design in historical, cultural, social, technological and industry contexts.
3. Synthesise motion design preproduction solutions utilising print and screen-based media to specific design briefs.
4. Produce motion design artefacts utilising time-based media and software to specific design briefs

5. Creatively apply kinetic typography as a means to enhance the relay of information and meaning for improved communication.
6. Apply graphic design knowledge in a time-based medium as a means to enhance the relay of information and meaning for improved communication.
7. Produce and present project work to a professional standard.

Subject Content

- Print-based graphic design fundamentals are reviewed and extended to screen-based and kinetic media considerations.
- The fundamentals of kinetic screen-based motion design, including: image, colour and typography: preproduction and production techniques: sequence, transitions, time and space; framing and editing; and sound.
- The purpose and function of Motion design in historical, cultural, linguistic, semiotic and technological contexts.
- Motion design industry pathways and key influential practitioner case studies.
- terms, principles and conventions of Motion design practice.
- preproduction and production processes and practical Activities for specific Motion design contexts.
- reflection, Discussion and deconstruction of Motion design processes and artefacts, from both industry and student work development, via peer and class presentation critique feedback activities.
- software skills development via in-class and online video course materials, Activities and engagement.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Applied Project	1. Static graphic design piece; 2. Production planning material (500 words or equivalent); 3. 20-30 second motion design video.	40	N	Individual
Applied Project	1. Production planning material (500-750 words or equivalent); 2. Documentatio of design development (500 words or equivalent); 3. 60-120 second motion graphics piece.	60	N	Individual

DESN 2013 Photomedia: Photographic Practice

Credit Points 10

Legacy Code 102268

Coordinator Enrico Scotece ([https://directory.westernsydney.edu.au/search/name/Enrico Scotece/](https://directory.westernsydney.edu.au/search/name/Enrico%20Scotece/))

Description This unit introduces and examines the multifaceted nature of photographic practice. Students will be introduced to current methods of photographic image production and design for the purpose of Visual Communication. It explores the relationship between photographic technique, genre and the reception of photographic imagery. Students will be introduced to photographic studio practice as the means of controlling image reception, through the intrinsic principles of the photographic medium, including the control of light, exposure in a studio situation and digital post production.

School Humanities & Comm Arts

Discipline Graphic Design Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) DESN 1015 OR DESN 1011

Equivalent Subjects DESN 2012 - Photomedia LGYA 0818 - Designing the Image LGYA 0835 - Photo Documentary LGYA 2354 - Introduction to Photomedia

Restrictions Students must be enrolled in 1571 Bachelor of Design (Visual Communication) or 1737 Bachelor of Design - Visual Communication (Dean's Scholars). Specialist photography facilities with limited space, equipment and limited specialist technical support preclude other students from taking this subject as an elective.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Exhibit proficiency in a range of specialization areas in Photographic practice.
2. Exhibit understanding of principals used to control lighting in the studio and on location.
3. Use both mainstream and alternative image production methods as a means of generating visual material.
4. Exhibit proficiency in visual narrative and image flow, for multi paged outcomes.
5. Art direct an idea from concept to final outcome.
6. Use appropriate visual methods to reach identified target audiences based on research.

Subject Content

- students will engage in Project-based resolutions to Image design problems
- Exercise work will explore The nature and function of photographic Image making, through The experience of areas of specialization within photographic practice.
- research and Project work will explore The process of thematic Image production for designed outcomes.
- The development of skills in visually communicating concepts in A design context, through The use of photographic imagery.
- through in class Activities, students will develop control of The medium, for use in client driven designed outcomes.
- Lynda.com courses: as determined.

Assessment

DESN 2014 Researching the Visual

Credit Points 10

Legacy Code 102266

Coordinator Michelle Catanzaro ([https://directory.westernsydney.edu.au/search/name/Michelle Catanzaro/](https://directory.westernsydney.edu.au/search/name/Michelle%20Catanzaro/))

Description This unit will introduce students to various ways of seeing and reading images in the visual environment. Students will learn how to conduct visual research using a tool kit of methods including semiotic analysis, content and thematic analysis, and basic observational research across the digital and material environments of visual communications design, and to apply their findings in the development of visual concepts. Students will continue to engage as reflective practitioners and learn to position themselves as visual researchers within a particular cultural and personal context.

School Humanities & Comm Arts

Discipline Graphic Arts and Design Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) DESN 1003 OR
DESN 1011 OR
DESN 1021

Restrictions

Students in program 1791 Bachelor of Screen Media (Arts and Production) must have successfully completed 60 credit points of Level 1 subjects.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Exhibit a critical understanding of visual languages at work in contemporary culture
2. Demonstrate a theoretical understanding of key concepts in visual research
3. Exhibit competency in designing, conducting and presenting visual research
4. Apply techniques of visual analysis to collected visual data
5. Effectively utilise visual research findings in the development of original design concepts

Subject Content

1. Introduction to visual research: an overview of approaches (sociology, archaeology, anthropology, semiotics)
2. Creative referencing
3. Mood boards
4. Content analysis
5. Thematic analysis
6. Semiotics, Decoding and Recoding
7. Visual Rhetoric
8. Ethics in visual research
9. Visual ethnography
10. Visual research for cultural contexts

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Presentation	5 minute presentation + PDF (750 words)	25	N	Group
Report	Images + 500 words	25	N	Individual
Report	750 words + images	50	N	Individual

Prescribed Texts

- There is no prescribed text for this subject. Each Lecture Topic will include a reference list that supports that topic and should be referred to as required by students in the completion of their work.

DESN 3001 Contextual Design Studies

Credit Points 10

Legacy Code 102275

Coordinator Alison Gill ([https://directory.westernsydney.edu.au/search/name/Alison Gill/](https://directory.westernsydney.edu.au/search/name/Alison%20Gill/))

Description Contextual design studies is the study of what happens around design practice - before, during and after - to explain its meaning and effect. Successful communication design has always depended on the connection between form, content, audience and context, and the designer's abilities to analyse, understand and clarify the contexts of communication have become more important to creative practice. In this unit students will learn to apply the theoretical frameworks of semiotic, thematic and rhetorical analysis used by the interdisciplinary field of Design Studies to interpret design's potential as cultural expression and communication. Students will analyse visual signs and conventions as both targeted and tacit responses to a range of contexts revealing design's interests in marketplaces, society and identity. Students will analyse various graphic examples, and design literature, as they investigate the significance and agency of design interactions, media artefacts and systems.

School Humanities & Comm Arts

Discipline Graphic Design Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) DESN 2014

Equivalent Subjects DESN 2003 - Design Issues

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply terminology and theoretical frameworks used in design studies to analyse what design means and does.
2. Research and investigate the social, economic and/or political contexts that inform visual design in explicit and tacit ways;
3. Critically evaluate examples of contemporary design practice that respond to these contexts.
4. Reconceptualise codes and conventions or redirect visual concepts to address an audience and construct a context for visual design including enriching social diversity and environmental sustainability.

5. Demonstrate advanced visual and text-based literacy skills in effective written and visual communication.

Subject Content

1. An overview of the interdisciplinary field of Design Studies and the cultural, communication and sociological theories required for analysing design contexts.
2. The subject content will investigate several scenarios where theoretical frameworks are employed to unpack the economic, social, and/or political contexts of design.
3. Examples of visual communication responses strategically informed by the analysis of various contexts might include:
 - The expanding commodity form and consumerist value system
 - Codes and conventions used in advertising consumer products and identities; for example, gender representation in visual culture.
 - Branding; product values and service systems.
 - Fast fashion cycles in the mediated marketplace; fashion, media and material impacts.
 - investigating The social and material intelligences deployed in The design of ?experiences?f as designers Seek A deeper Understanding of human behaviour, value systems and relationships.
 - Participatory design; working

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Applied Project	Visual, plus 200 words	30	N	Individual
Summary	1,000 words	30	N	Individual
Essay	1,800 words with visuals	40	N	Individual

DESN 3002 Data Visualisation

Credit Points 10

Legacy Code 102269

Coordinator Sarah Waterson ([https://directory.westernsydney.edu.au/search/name/Sarah Waterson/](https://directory.westernsydney.edu.au/search/name/Sarah%20Waterson/))

Description We live in an era of data. The designer's role is increasingly one of structuring and transforming data into accessible and meaningful information. In this unit students will be introduced to basic techniques for the visual representation of data. This unit covers

both how to design successful charts, maps, and diagrams, as well as how to use these graphics to compose cohesive storytelling pieces. Students will also discuss both practical and theoretical issues when visualising data, and how Graphic Design and Interactive Design principles apply to the visualisation of information. Students will learn how to design basic infographics and mock ups for interactive visualisations, and they will develop skills to start producing compelling and elegant infographics and data visualisation.

School Humanities & Comm Arts

Discipline Graphic Design Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) DESN 1021 OR
DESN 1007

Assumed Knowledge

Students should have at least moderate skills in producing documents or illustrations using Photoshop and Illustrator.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Demonstrate an applied understanding of the key techniques and theories used in visualisation, including data models, graphical perception and techniques for visual encoding and interaction
2. Identify the common data domains and corresponding analysis tasks, including multivariate data, networks, text and cartography.
3. Build and evaluate visualisations from data.
4. Use data to tell a story.

Subject Content

- how to analyse and critique Infographics and visualisations in newspapers, books, online and screen media, and how to propose alternatives that would improve them
- how to plan for data-based storytelling through charts, maps, and diagrams
- how to design Infographics and visualisations that are aesthetically pleasing, informative and accurate
- The foundations of graphic design and of interaction design, applied to Infographics and visualisations

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Report	1500 words (approx.)	20	N	Individual
Proposal	750 words (approx.) and design work	30	N	Individual
Applied Project	750 words (approx.) and design work	50	N	Individual

DESN 3003 Design Research Project

Credit Points 10

Legacy Code 102277

Coordinator Lucy Wang ([https://directory.westernsydney.edu.au/search/name/Lucy Wang/](https://directory.westernsydney.edu.au/search/name/Lucy%20Wang/))

Description This unit offers students the opportunity to develop a self-negotiated design project through exploring a variety of research methods, reflective practice, and concept prototyping. Students will develop a project that focuses on a particular area of interest in order to consolidate their portfolio, and for students enrolled in B Design (Vis Comm), lay the foundation for their fourth year major design project.

School Humanities & Comm Arts

Discipline Graphic Design Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) DESN 2014 OR
DESN 3013

Restrictions Students must be enrolled in program 1571 Bachelor of Design (Visual Communication), 1737 Bachelor of Design - Visual Communication (Dean's Scholars), 1839 Bachelor of Design/Bachelor of Creative Industries or 6011 Diploma in Design/Bachelor of Design (Visual Communication). Successful completion of 160 credit points of undergraduate study and one design field of study subject pairing.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Analyse and report on research outcomes, applying this to the design process.
2. Devise appropriate strategies for creative experimentation.
3. Iteratively develop ideas, and creative work.
4. Present design prototypes at industry standard.

Subject Content

Explore a variety of research methods in context.

Analyse and report on research findings.

Write a self-directed brief.

Undertake creative experiments.

Reflect on the design process.

Incorporate feedback into the iteration of design artefact/s.

Refine ideas and develop a design prototype.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Portfolio	1,000 words	30	N	Individual
Proposal	1,500 words	20	N	Individual
Applied Project	Visual work equivalent to 2,000 words	50	N	Individual

DESN 3005 Design Thinking

Credit Points 10

Legacy Code 101924

Coordinator Leon Cmielewski ([https://directory.westernsydney.edu.au/search/name/Leon Cmielewski/](https://directory.westernsydney.edu.au/search/name/Leon%20Cmielewski/))

Description Navigating and addressing the complexity of 21st Century problems and issues requires critical and creative thinking. This unit explores common attributes of design thinking to assist students in developing creative and intelligent responses to the complex scenarios of the contemporary world.

School Humanities & Comm Arts

Discipline Graphic Design Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Critically identify and explore the nature of ill-defined and wicked problems
2. Apply creative problem solving techniques to design appropriate interventions to help tackle a wicked problem
3. Demonstrate fluency and flexibility in generating and developing ideas

Subject Content

- Problem identification, exploration and solving
- Wicked problems
- thinking and Working visually
- Working across disciplines
- Responding to human- and environment-centred concerns

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Project presentation and folio/report	2,000 words or equivalent	50	N	Individual
Project presentation and folio/report	2,000 words or equivalent	50	N	Individual

DESN 3006 Graphic Design: Developing a Personal Portfolio

Credit Points 10

Legacy Code 102276

Coordinator Dan Johnston ([https://directory.westernsydney.edu.au/search/name/Dan Johnston/](https://directory.westernsydney.edu.au/search/name/Dan%20Johnston/))

Description This unit focuses on the development of your industry orientated practice and personal portfolio development. Throughout the previous core units and unit pairings you will have developed particular skills and interests that are beginning to define your design practice and your portfolio. The briefs set in this unit offer you the opportunity to specialise further and to develop your portfolio and will, where possible, include live briefs and competitions. You will continue to refine and develop your visual language, material and digital skills, and continue to develop as an independent learner. The unit will culminate in an industry event, where students will have the opportunity to get their portfolios critiqued by design industry representatives.

School Humanities & Comm Arts

Discipline Graphic Design Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) DESN 2006 OR
DESN 3001 OR
MKTG 2003 OR
MKTG 2003

Restrictions Successful completion of 160 credit points in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Generate creative and appropriate solutions to design briefs that are executed to industry standards
2. Critique and evaluate your own work in order to develop a design portfolio and a body of work suitable for exhibition
3. Define your specific disciplinary interests within the broad field of contemporary visual communication

4. Employ an independent approach to learning and your design practice.

Subject Content

- online lectures on design practitioners, graduate experiences and portfolio development
- all seminar discussions will be conducted via ZOOM.
- Workshops have been modified for online delivery.
- all presentations will be conducted via ZOOM.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Report	1,000 words	20	N	Individual

DESN 3007 Illustrating Popular Culture

Credit Points 10

Legacy Code 102271

Coordinator Leo Robba ([https://directory.westernsydney.edu.au/search/name/Leo Robba/](https://directory.westernsydney.edu.au/search/name/Leo%20Robba/))

Description This unit explores the powerful qualities of illustration when used as a visual communication strategy in the design of popular culture: within an advertising campaign and as social commentary through editorial illustration. The potential of a range of illustrative styles, mediums and techniques, will be explored through experimentation with a variety of visual strategies that utilize lateral thinking, linked to the design of professional concepts, developmental processes and media considerations.

School Humanities & Comm Arts

Discipline Graphic Design Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) DESN 1011

Equivalent Subjects DESN 2008 - Illustration Advertising and Editorial

Assumed Knowledge

An ability to use the computer programs "In-Design, Photoshop, and Illustrator" in a Macintosh computer lab.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Implement lateral thinking approaches to illustrative composition, style, technique and media to create illustration for specific design contexts.
2. Employ research findings in the development of a design concept.
3. Demonstrate an understanding of the interrelationship of the concept, client and target audience of an advertising campaign through illustrative design for specific publishing contexts.
4. Reflect on the effectiveness of illustrative communication strategies used in an advertising campaign.
5. Explain the design strategy and method of communication of the content of a range of editorial illustrations.
6. Explain how visual strategies such as metaphor, satire, symbolism and irony are used in editorial illustration.
7. Demonstrate the development of professional accountability, through effective time management and participation in critical discussion in feedback, on project work.

Subject Content

- development of A range of illustrative skills and lateral thinking approaches that include thumbnails, Working roughs, and experiments with illustrative mediums and techniques.
- illustrative style and its relationship to Target audience and design publishing context.
- how to interpret The design brief through illustration, understand The links between concept, client and Consumer needs, and be able to cost The illustrative design project.
- Analysis of "text" and design context in the creation of editorial illustration and illustration used in an advertising campaign.
- Utilise illustration as social commentary.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Illustrated Advertising Campaign	Visual work, 500 word research report	50	N	Individual
Editorial Illustration Project	Visual work and 250 word analysis	50	N	Individual

Teaching Periods

Spring

DESN 3008 Interactive Design: Apps

Credit Points 10

Legacy Code 102267

Coordinator Sarah Waterson ([https://directory.westernsydney.edu.au/search/name/Sarah Waterson/](https://directory.westernsydney.edu.au/search/name/Sarah%20Waterson/))

Description This unit focuses on design methodology for the development and delivery of interactive media applications (apps). Particular concepts addressed include conceptual integration and convergence of various media forms, screen design, navigational hierarchy and structures, and designing engaging interactive interfaces. General principles of interface, information architecture and interaction design will be introduced, alongside principles of digital media production.

School Humanities & Comm Arts

Discipline Graphic Design Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) ENGR 1021 OR DESN 1021

Equivalent Subjects DESN 2010 - Interactive Design 1

Assumed Knowledge

Computer literacy including working in a networked environment on a Macintosh computer; management, transportation and storage of digital information and digital production processes such as scanning, pdf production and file storage. Skills in design principles: layout, colour and typography. Literacy with image manipulation software - e.g. Photoshop.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Design and produce appropriate screen design, information architecture and interface design for a mobile/tablet app.
2. Produce a design document that successfully applies user scenario and user-centred design processes to project development.
3. Develop and produce an interactive app that demonstrates the appropriate application of interaction design principles.
4. Apply and select appropriate digital media formats and design processes within the project work, including planning, evaluation, revision and testing methods.
5. Identify key issues in the app design domain.

Subject Content

- screen design
- interface design, navigation systems and information architecture.
- interaction design fundamentals and methods, including user scenarios and personae.

- interactive and user centred design practice for digital media apps
- App design principles and processes, including planning, evaluation, Revision and testing
- Lynda.com software tutorials as specified.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Portfolio	1500 words and design work	20	N	Individual
Proposal	1500 words and design work	30	N	Individual
Report and Presentation	500 word report and 5 minute presentation	50	N	Individual

DESN 3011 Public Memory and Commemoration

Credit Points 10

Legacy Code 101253

Coordinator Pamela James ([https://directory.westernsydney.edu.au/search/name/Pamela James/](https://directory.westernsydney.edu.au/search/name/Pamela%20James/))

Description Throughout history various forms of material culture (such as art, architecture, sculpture, objects and photographs) have been used to memorialize individuals as well as to commemorate events, both personal and national. As such, an examination of commemorative works offer valuable insights into the production of public memory and history. This unit explores the particular contexts of such memorials; their meaning, design and, politics. The diverse expressions of commemoration in Australia and the consequent production of public memory provides the arena for such considerations.

School Humanities & Comm Arts

Discipline Graphic Arts and Design Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects LGYA 0528 - Dangerous Visions LGYA 1028 - Dangerous Visions

Restrictions Successful completion of 60 credit points of study in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Use particular examples to explore the construct of public memory through commemorative modes.
2. Describe the relationships between public memory, commemoration and political constructs.
3. Analyse the relationship between the commemorative object, public memory and the aesthetic models of a particular period.
4. Explore the consequences of changing perceptions of meaning in commemorative objects.

Subject Content

1. Design, politics and the construction of public memory.
2. The diverse expressions of commemoration
3. The changing meanings and contexts of memory: Rayner Hoff and Sacrifice
4. Public Memory, Mourning and Memorialisation: Road side memorials, funereal cultures and 'high' art commemorations.
5. Remembering and Re-Telling: Stories, images and meanings in personal collections.
6. Memento Mori and Memorabilia
7. Maintaining the past. The renovation of the Queen Victoria Building and State Theatre in Sydney and Captain Cook's cottage in Melbourne
8. Art and commemoration.

Teaching Periods

DESN 3012 Publications

Credit Points 20

Legacy Code 101013

Coordinator Dan Johnston ([https://directory.westernsydney.edu.au/search/name/Dan Johnston/](https://directory.westernsydney.edu.au/search/name/Dan%20Johnston/))

Description This unit examines the role of publication design as a promotional tool. Students explore a range of print and online promotional forms and are involved in the design and production of publications for specific target audiences, including approaches to layouts, image and text relationships, typography and graphic forms. Within a studio environment, students gain an understanding of publication production and visual narrative methodologies through the exploration of media areas appropriate to the project requirements.

School Humanities & Comm Arts

Discipline Graphic Design Studies

Student Contribution Band HECS Band 2 20cp

Level Undergraduate Level 3 subject

Pre-requisite(s) DESN 1006 OR DESN 1020

Assumed Knowledge

Students will have (a) advanced understanding of communication design processes and theories, (b) intermediate knowledge of one specific visual communication practice e.g. graphic design,

photomedia, illustration and/or interactive design, (c) ability to use the computer programs InDesign, Photoshop and Illustrator in a Macintosh computer lab.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop objectives and strategies in response to a project brief, emerging forms of contemporary publishing and the limitations and creative possibilities of working within a budget.
2. Organise complex information across multiple-page documents or online publications using typography, image, colour and grids.
3. Utilise cognitive problem-solving to organise creative imagery, typography, form and graphic messages.
4. Apply formal typesetting skills to compose large bodies of text.
5. Produce a body of work that demonstrates understanding of a variety of media appropriate to a project's requirement.

Subject Content

- Employ research findings to write An Article for A design magazine.
- Generate A sequence of magazine spreads that communicate The content of The written Article and magazine theme.
- Create and apply extra content and An appropriate style guide, layout strategies, logo and cover design.
- Evaluate The stages of The Visual design of The magazine spread in relation to theme, content and Target audience experience.
- Respond to team critique.

Teaching Periods

DESN 3013 Social Design: Research and Practice

Credit Points 10

Legacy Code 102274

Coordinator Leo Robba ([https://directory.westernsydney.edu.au/search/name/Leo Robba/](https://directory.westernsydney.edu.au/search/name/Leo%20Robba/))

Description This unit introduces students to the idea that graphic designers can be agents of change. Set project briefs will focus on social and political issues exploring the potential inherent in graphic design practice to make a real difference to society. The unit will encourage students to go beyond the definition of a problem solver, encouraging them to act as a problem seeker, who can use their design thinking skills to develop ideas that respond proactively to society's problems rather than reacting to a client's set brief. The unit will introduce further design-led, social and participatory research methods, that continue to build on the design process, and further expand the methods that underpin aspects of research and practice during the remainder of the degree. Students will refine and develop their visual language skills, in combination with material and digital skills, facilitating their development as an independent learner.

School Humanities & Comm Arts

Discipline Graphic Design Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) DESN 2006 OR DESN 2014

Equivalent Subjects DESN 3004 Design Research Training

Assumed Knowledge

Students should have completed one major pairing.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Undertake independent research relevant to a brief, with particular emphasis on the effective critical review of research findings and the translation of these into design strategy and outcome in an iterative process.
2. Exhibit a reflective and creative approach to project development and the design process
3. Employ a design process and practice in a context that requires sensitivity to, and an awareness of, social, cultural and environmental issues
4. Design an appropriately targeted communication strategy for a defined audience, group or stakeholder
5. Demonstrate ability to work collaboratively and respond effectively to feedback
6. Demonstrate ability to explain the process of design development and present soundly justified design concepts and ideas.

Subject Content

- introduction to social design
- Responding to A social design brief
- developing A theory of change to inform targeted and strategic design responses to The brief
- applying design research methods to immerse in The real World context defined by The brief
- engage stakeholders to learn more about The real World context defined by The brief
- developing design concepts in An iterative process of research, design development and reflection
- work collaboratively to refine design concepts
- Seek meaningful feedback from stakeholders and peers

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task

DESN 4005 Major Design Project

Credit Points 10

Legacy Code 102279

Coordinator Dan Johnston ([https://directory.westernsydney.edu.au/search/name/Dan Johnston/](https://directory.westernsydney.edu.au/search/name/Dan%20Johnston/))

Description This is a 20 credit point year-long subject taken over two terms (10 credit points in each term). In this year-long subject students will develop a self-directed project from proposal to production, in consultation with an academic supervisor. The first semester involves engaging in background research to facilitate creative development. Students will build a field survey of their topic area identifying precedents and contexts, leading to experimentation and exploration of a range of potential options and addressing any arising issues, to develop a sound proof of concept. In the second semester students will develop the work to a finished outcome, through an iterative process of prototyping, reflection and analysis. It is expected that there will be a consistent and documented developmental process undertaken across the year, resulting in the final work, which will be a professional level outcome, realised in a specific discipline field within Visual Communication. Students are expected to be self-motivated, and work as an independent professional practitioners, throughout the major design project work.

School Humanities & Comm Arts

Discipline Graphic Design Studies

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 4 subject

Pre-requisite(s) DESN 3004 OR DESN 3003

Equivalent Subjects DESN 4001 - Communication Design Major Project

Restrictions Students must be enrolled in 1571 B. Design (Visual Communication).

Assumed Knowledge

It is assumed that students have completed 240 credit points in program 1571 B Design (Visual Communication) before enrolling in this subject.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Develop a range of relevant research findings around a project theme, based on selected literature, precedent design examples, and project context..
2. Devise a self-directed brief that responds to an identified issue or area of interest within the broad discipline areas of Visual Communication.
3. Critically assess the appropriateness of a range of concepts, and the visualisation of these, in order to improve the design solution.
4. Produce and present a designed outcome that demonstrates an understanding of relevant professional contexts and utilises appropriate media, processes and strategies.
5. Employ an independent approach to learning and exercise an appropriate range of project management and communication skills.

Subject Content

- lectures on Creative inquiry and Project development
- Regular seminar discussions of student Project work in Progress, where students present A range of approaches in selected media forms towards their Project execution
- presentations of student work to lecturers and peer panels
- student Discussion forums where ongoing peer learning is encouraged

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

DESN 4006 Professional Design Experience: The Individual Practitioner

Credit Points 20

Legacy Code 102280

Coordinator Katrina Sandbach ([https://directory.westernsydney.edu.au/search/name/Katrina Sandbach/](https://directory.westernsydney.edu.au/search/name/Katrina%20Sandbach/))

Description Students will continue to work in the Burrow studio, but in this subject they are positioned as a junior designer who is working individually in response to a range of briefs with their tutor as Creative Director. Students will develop their capacity to manage projects independently from briefing, research, development, costing, and pitching. Through this capstone subject, students will also develop a self-promotion strategy, and increase their understanding of a range of professional practice issues as they relate to the individual practitioner, further preparing them for the industry.

School Humanities & Comm Arts

Discipline Graphic Design Studies

Student Contribution Band HECS Band 2 20cp

Level Undergraduate Level 4 subject

Pre-requisite(s) DESN 4007

Restrictions Successful completion of 240 credit points in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Further develop professional standards of communication and conduct in relation to working with colleagues, supervisors, clients, and suppliers
2. Identify and use relevant research methodologies to inform understanding of target audience and develop appropriate concepts for client-driven briefs
3. Practise industry-standard methods of project management, pitching, costing, delivery as an individual practitioner
4. Engage with a variety of design development and production processes that lead to appropriate finished outcomes

- Develop a design portfolio and self-promotion strategy for industry presentation.

Subject Content

- Online material that cover professional practice issues such as design ethics, project management, professional communication
- Resources and activities that introduce students to practical issues such as costing, invoicing, negotiation, pay rates
- Field work as relevant to the brief (e.g. site visits, online research, attendance of meetings/events)

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Live Brief Portfolio	Written and visual work equivalent to 2,000 words.	50	N	Individual
Self-Promotion Strategy and Collateral	Visual work equivalent to 2,000 words	50	N	Individual

DESN 4007 Professional Design Experience: The Studio

Credit Points 20

Legacy Code 102278

Coordinator Katrina Sandbach ([https://directory.westernsydney.edu.au/search/name/Katrina Sandbach/](https://directory.westernsydney.edu.au/search/name/Katrina%20Sandbach/))

Description The Burrow design studio simulates a professional environment where students heighten their design thinking and practice through work-integrated learning. In this subject, the student is positioned as a junior designer who is part of a team working in response to live briefs with real learning partners and tangible outcomes, under the guidance of tutors who act as creative directors. Students will develop their higher level professional design skills through working individually and collaboratively to manage projects from briefing, research, development, pitching, artworking, production and delivery. Through this subject, students will also advance their understanding of what the industry expects of junior designers, providing a bridge between study and work life.

School Humanities & Comm Arts

Discipline Graphic Design Studies

Student Contribution Band HECS Band 2 20cp

Level Undergraduate Level 4 subject

Pre-requisite(s) DESN 3006

Equivalent Subjects DESN 4008 - Professional Design Studio

Restrictions

Successful completion of 240 credit points in currently enrolled program.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Apply a range of skills in idea generation, concept development, reflective practice, artworking, presentation and production
- Develop professional and ethical standards of communication and conduct in relation to working with colleagues, supervisors, learning partners and suppliers
- Identify and use relevant research methodologies to inform understanding of target audience and develop appropriate concepts for learning partner briefs
- Practice industry-standard methods of project management, such as pitching, quoting and delivery as part of a studio team
- Engage with a variety of design development and production processes that lead to appropriate finished outcomes.

Subject Content

- Online material pertaining to professional practice issues such as ethics, project management, communication
- Studio team meetings
- Learning partner visits to receive formative feedback
- Field visits as required by the brief

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Applied Project	Equivalent to 1000 words	10	N	Group

EART 1004 Soils

Credit Points 10

Legacy Code 300823

Coordinator Jason Reynolds (<https://directory.westernsydney.edu.au/search/name/Jason Reynolds/>)

Description This unit provides students with a basic understanding of soil formation and erosion processes, soil physical, chemical and biological properties, and the diversity and classification of soils in the Australian landscape. These basic principles are explored in relation to the sustainable management of soils for horticultural and agricultural production and for environmental management, other land uses and in relation to forensic investigation and studies. The practical sessions are designed to reinforce the lecture material and include field description and analysis of soil profiles and properties, soil sampling principles and practice, laboratory measurement of soil physical and chemical properties essential/important for plant growth, soil biology and human and animal remains.

Teaching Periods

EART 2001 Climate Change Science

Credit Points 10

Legacy Code 300837

Coordinator Sally Power (<https://directory.westernsydney.edu.au/search/name/Sally Power/>)

Description A factual understanding of the energy balance of the globe, how this impacts on climate and how climate has varied in the past, is essential for any person working in the climate change area. This unit will introduce students to the concept of energy balance and climate, our understanding of how climate works, and how it has changed through time. Topics in basic atmospheric science will give students a critical understanding of current environmental concerns and debates about radiative forcing (the greenhouse effect), climate change, ozone depletion, photochemical pollution and acid precipitation.

School Science

Discipline Atmospheric Sciences

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) CHEM 1008 OR
CHEM 1003 AND
BIOS 1001

Equivalent Subjects LGYA 6248 - Atmospheric Science

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the composition and structural characteristics of the atmosphere as they relate to the energy balance of the Earth, including solar radiation, aerosols, particulates, water vapour, ozone, and greenhouse gasses.
2. Describe the major process components of the climate system, including elevated CO₂, temperature, precipitation, evaporation, transpiration, and wind, evaluate terrestrial feedbacks to climate change and how these may act to modify the rate of future change.
3. Describe the evidence for past climates (paleoclimates), including techniques to reconstruct climate through direct and indirect methods.
4. Explain the major theories and concepts of global climate change, including model scenarios of future climate regimes.
5. Evaluate the impact of climate change on physiology, growth, productivity and species interactions in biological systems. Understand the processes driving climate change impacts on ecosystem structure, diversity and function.
6. Evaluate human impacts - land use changes, industrial pollution, rapid population growth - on climate variables (CO₂, temperature, precipitation) and their potential impact on biological and socio-economic systems, including indigenous culture.
7. Use spreadsheets and statistical tools in analytical programs to analyse and graph data, in order to generate appropriately conclusions.
8. Communicate findings correctly in oral or written form using an appropriate style, accessing scientific literature to place findings into context.

Subject Content

1. Introduction to atmospheric science, the structure and composition of the atmosphere.
2. The Earth's energy balance - the role of water vapour, aerosols, particles and gasses.
3. Understanding processes driving the climate system.
4. Relationships between atmospheric composition and climate - historical evidence.
5. Introduction to climate models and climate predictions.
6. Impacts of elevated carbon dioxide and climate change on plant physiology and interactions among plants, animals and microbes.
7. Effects of climate change on natural and managed ecosystems, including agriculture.
8. The carbon cycle and ecosystem feedbacks.
9. Socio-economic drivers of (and responses to) climate change, including population growth, urbanisation and land use change.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Report	800 words	20	N	Individual
Report	1,500 words	20	N	Individual
Report	500 words	10	N	Individual
Presentation	4 - 6 mins for talk, 20 - 30 slides for presentation	20	N	Individual
Quiz	4 x 30 minutes	30	N	Individual

EART 3001 Biological Adaptation to Climate Change

Credit Points 10

Legacy Code 300909

Coordinator Justin Welbergen ([https://directory.westernsydney.edu.au/search/name/Justin Welbergen/](https://directory.westernsydney.edu.au/search/name/Justin%20Welbergen/))

Description This unit investigates how organisms respond to variation in climate and what can be done to reduce their vulnerability to anthropogenic climate change. The unit makes use of a novel conceptual framework that defines 'vulnerability' as a function of the 'exposure' and 'sensitivity' of organisms to climate change. Therefore, we will begin by exploring how organisms are exposed to climate change, from regional climatic changes acting at the scale of populations, to local climatological effects acting at the scale of individuals. Next, we will examine what determines the sensitivity of organisms, focusing on the physiological, behavioural, and life-history traits that affect the ability of organisms to cope with and adapt to climate change. Then, we will show how exposure and sensitivity combine to determine the vulnerability of organisms, including in both managed and natural ecosystems. Finally, we will discuss the 'mitigation' and 'adaptation' strategies that can prevent the worst of the potential impacts from becoming realised and help protect our biodiversity in the face of anthropogenic climate change.

School Science

Discipline Atmospheric Sciences

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 40 credit points at Level 2.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe how climate change will affect wildlife and ecosystems from local and global perspectives
2. Explain the significance of historical changes in climate in shaping ecosystems and species radiations
3. Evaluate climate change exposure at different temporal and spatial (global to microhabitat) scales
4. Evaluate climate change sensitivity at all levels of biological organisation
5. Analyse what drives vulnerability of organisms to climate change and what can help reduce impacts
6. Conduct investigations safely and ethically in the field and laboratory, using sampling methodology correctly to obtain valid data
7. Use spreadsheets and statistical tools in analytical programs to enter, analyse, and graph data; and use GIS and population modelling tools to draw appropriate conclusions from data
8. Communicate findings correctly in oral or in written form using an appropriate style, as well as accessing the scientific literature to place the findings in context

Subject Content

1. Overview on climate change impacts on biodiversity
2. Effects of climate change exposure at different temporal (means vs extremes) and spatial (global to microhabitat) scales
 - Historical climate change, recent and future global & regional climate change (climate change-velocity etc.)
 - Extreme events (changes in regimes)
 - climate change refugia, microhabitat buffering
3. Comparison of climate change sensitivity at all levels of biological organisation
 - Genetic change, acclimation/phenotypic plasticity Vs adaptation
 - Cellular & epigenetic processes
 - Plant physiology
 - Animal physiology
 - life-history, population dynamics
 - species interactions & phenology
 - Ecosystem function
4. Factors that drive vulnerability of organisms to climate change and can help reduce impacts
 - Vulnerability - focus on biodiversity
 - Vulnerability - focus on agriculture
 - Prioritisation & conservation action

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quizzes	1 hr	20	N	Individual
Applied Project and Multimedia activity	A minimum of four distinct website pages with full functionality on electronic devices	20	N	Individual

EART 3005 Statistical Hydrology

Credit Points 10

Legacy Code 300991

Coordinator Ataur Rahman ([https://directory.westernsydney.edu.au/search/name/Ataur Rahman/](https://directory.westernsydney.edu.au/search/name/Ataur%20Rahman/))

Description This unit covers the principles of statistical hydrology. It explores at-site flood frequency analysis, regional flood frequency analysis, trend analysis of hydrological data, linear regression analysis and multivariate statistical techniques to solve hydrological problems.

School Eng, Design & Built Env

Discipline Hydrology

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) EART 4001

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply at-site flood frequency analysis techniques to estimate design floods from recorded streamflow data.
2. Apply regional flood frequency analysis techniques to estimate design floods when no recorded streamflow data is available.
3. Apply trend analysis to rainfall and streamflow time series data to check the stationarity of the data.
4. Apply linear regression analysis to develop prediction models to estimate streamflow and rainfall indices.
5. Apply multivariate statistical techniques to hydrological problems.
6. Evaluate current Australian codes and software to solve statistical hydrological problems.
7. Critically evaluate current literature to benchmark recent problems and developments in statistical hydrology practice.
8. Design sustainable hydrology projects.

Subject Content

1. At-site flood frequency analysis
2. Regional flood frequency analysis
3. Trend analysis of hydrological data
4. Linear regression analysis as applied to hydrological problems
5. Multivariate statistical techniques as applied to hydrological problems

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
2 Quizzes (Short answer test) at 10% each = 20%	30 minutes each	20	N	Individual
Project (Students will produce group report, 3 students in a group, a group submits one report)	2,500 words	25	N	Individual
Final exam	2 hour	55	N	Individual

Teaching Periods

EART 3006 Science of the Anthropocene

Credit Points 10

Legacy Code 301212

Coordinator Jason Reynolds ([https://directory.westernsydney.edu.au/search/name/Jason Reynolds/](https://directory.westernsydney.edu.au/search/name/Jason%20Reynolds/))

Description The unit explores how the earth has been irreversibly altered through human activities. Topics include the composition of the ocean, land, and atmosphere, and the impacts humans have had on these systems. The unit looks at the detection and control of modern pollutants with a focus on field sampling and modelling of selected environmental systems. These topics will be brought to life in a two-day field trip to sites of significant anthropogenic impact.

School Science

Discipline Earth Sciences

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects EART 3002 Environmental Geochemistry
EART 3003 Environmental Geochemistry

Restrictions Must have completed 20 credit points at level 2

Assumed Knowledge

A basic understanding of scientific enquiry including the periodic table, equilibria, and pH. Introductory statistics including mean, standard deviation, and distributions.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the chemistry of the surface of the Earth, and how it is modified by human activity.
2. Construct and detail the geochemical cycles of various elements
3. Studying the effects of equilibrium for acidity and alkalinity
4. Explain current environmental issues with a focus on the anthropocene
5. Discuss environmental quality criteria in terms of their significance and monitoring, remediation, and rehabilitation of various human-impacted environments.
6. Develop skills used to monitor environmental materials, including the design, construction, testing, and evaluation of a pollutant removal device.
7. Synthesise information on the impacts of the anthropocene for presentation to peers and an academic audience.

Subject Content

The formation of the solar system and Earth
The geological principles relating to elemental mobility
The impacts of humans cycling of elements
The artefacts of the Anthropocene on Earth
Current environmental issues and remediation
Field visits to sites having significant anthropogenic impact
The design and testing of devices to remove anthropogenic pollutants

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Worksheets: Take-home worksheets	8 x 5%	40	N	Individual
Presentation: Student presentation	1 x 10 minutes	20	N	Individual
Multimedia/ video recording	1x10 minutes	20	N	Group
Essay	2,000 words	20	N	Individual

EART 3007 Land Degradation and Contamination

Credit Points 10

Legacy Code 301273

Coordinator Jason Reynolds ([https://directory.westernsydney.edu.au/search/name/Jason Reynolds/](https://directory.westernsydney.edu.au/search/name/Jason%20Reynolds/))

Description This unit will examine current interdisciplinary topics on land degradation and contamination in both urban, peri-urban and rural environments. The effects of the various human induced land degradation and contamination processes and pollutants in terrestrial environments will be explored and how impacts can be ameliorated and managed. The focus is on both the science of environmental pollutants and on the remediation strategies currently available. Topics include; basic concepts of soils, study of the processes, common soil pollutants, persistent organic contaminants and pesticides, acidification of soils, quantitative risk assessment, land reclamation, and landfill sites

School Science

Discipline Soil Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Restrictions Successful completion of 20 credit points at Level 2.

Assumed Knowledge

A basic understanding of scientific enquiry including the periodic table, equilibria, and pH. Introductory statistics including mean, standard deviation, and distributions.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Detail the interactions between land, human activities and pollutants
2. Evaluate land data to assess degradation and contamination
3. Explain current land degradation and contamination issues and processes
4. Discuss current environmental quality criteria in relation to land management
5. Demonstrate skills used to monitor degradation and contamination on land
6. Synthesise data for reporting to peers and an academic audience

Subject Content

1. Soil concepts
2. The history of land degradation and contamination in Australia
3. Land degradation due to erosion, salinity, organic matter and fertility decline, soil acidity and alkalinity and other related factors
4. Environmental contaminants and their fate in the environment
5. Pathways for contamination mobility on land surfaces
6. Analytical techniques for measuring contamination and degradation
7. Statistical and modelling approaches to land evaluation and assessment
8. Environmental quality criteria for land evaluation and assessment

EART 2004 Soils and Substrates

Credit Points 10

Legacy Code 301446

Coordinator Jason Reynolds ([https://directory.westernsydney.edu.au/search/name/Jason Reynolds/](https://directory.westernsydney.edu.au/search/name/Jason%20Reynolds/))

Description This unit provides you with a basic understanding of soil formation and erosion processes, soil physical, chemical and biological properties, and the diversity and classification of soils in the Australian landscape. These basic principles, along with alternative substrates, are explored in relation to the sustainable management of soils and substrates for horticultural and agricultural production and for environmental management and other land uses. The practical sessions are designed to reinforce the lecture material and include field description and analysis of soil profiles and properties, soil sampling principles and practice, laboratory measurement of soil and substrate physical and chemical properties essential/important for plant growth, soil/substrate biology.

School Science

Discipline Soil Science

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 3 subject

Restrictions Must have passed 60 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe soil and substrate properties and link their importance in the management for sustainable plant production
2. Design appropriate soil and substrate sampling protocols for use in professional and applied contexts
3. Perform basic field and laboratory tests of key soil and substrate physical and chemical properties for plant production and forensic evidence

- Evaluate the significance of test results for plant production, accessing relevant published information to aid in interpretation
- Develop information literacy and written communication skills through accessing, evaluating and integrating information from research journals in an essay on a soils topic of the student's choice

Subject Content

- Classification of Australian soils and their histories.
- Soil and substrate chemical & physical properties and their application.
- Functions of soil and substrate in biology and ecology.
- Managing soil and substrate fertility for environmental and agricultural improvement
- Regenerative approaches to improve soil and substrate fertility
- Carbon farming and data driven systems management.

Description This unit covers occurrence of groundwater, groundwater movement, groundwater hydraulics, water wells, quality of groundwater, groundwater modelling and groundwater management. The objectives of this unit are to enable students to learn the associated concept of groundwater and apply the learnt concepts in solving groundwater problems in advanced engineering practice.

School Eng, Design & Built Env

Discipline Hydrology

Student Contribution Band HECS Band 2 10cp

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in a postgraduate program

Learning Outcomes

On successful completion of this subject, students should be able to:

- Apply knowledge of groundwater movement, groundwater hydraulics and water wells to solve hydrogeological problems.
- Apply groundwater quality modelling techniques.
- Evaluate groundwater pollution and management problems.
- Analyse groundwater modelling and exploration techniques.
- Evaluate current Australian codes and software to solve groundwater problems.
- Critically evaluate current literature to benchmark recent problems and developments in groundwater engineering practice.
- Design sustainable groundwater engineering projects.

Subject Content

- Occurrence of groundwater
- Groundwater movement
- Groundwater and well hydraulics
- Water wells
- Groundwater levels and environmental influences
- Quality of groundwater
- Pollution of groundwater
- Management of groundwater
- Groundwater modelling
- Groundwater investigation

Level Undergraduate Level 0 Preparatory subject

Equivalent Subjects ECON 0001 - Economics (WSTC Prep)

Restrictions Students must be enrolled in a Western Sydney University, The College Foundation Studies program.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define and explain basic economic concepts and relationships
2. Interpret economic information presented in a variety of forms: text, graphs, statistics, illustrations, diagrams
3. Integrate descriptive economics, economic theory and applied economics
4. Select and organise economic information from a variety of sources for relevance and reliability
5. Describe trends in Australia's economic performance and discuss contemporary issues affecting this trend
6. Explain the operation of government micro and macro-economic policies

Subject Content

1. Economic Concepts and Systems

(including economic growth and its measurement) Types of economic systems.

2. The Circular Flow and Economic Fluctuations

The circular flow of income, national income, expenditure and income.

3. The Price Mechanism

Demand, supply and equilibrium, price elasticity.

4. Market Structures

Features of market structures and the Australian capitalist economy, contemporary market capitalism, government market intervention in the Australian economy.

5. The Australian Financial System and Money

Financial institutions, money and interest, financial deregulation, monetary policy.

6. Economic Policies

Macroeconomic management in Australia, fiscal policy, monetary policy (brief review), prices + incomes policy and external policy, the 'Policy Mix'

7. Australia in the International Economy and contemporary issues

ECON 1002 Consumers, Firms and Markets (WSTC)

Credit Points 10

Legacy Code 700249

Coordinator Abdullah Al Abed ([https://directory.westernsydney.edu.au/search/name/Abdullah Al Abed/](https://directory.westernsydney.edu.au/search/name/Abdullah%20Al%20Abed/))

Description This unit is an introduction to microeconomics. It provides students with an understanding of basic concepts such as value, rational consumer behaviour, the behaviour of firms in various market structures, the efficiency and failings of markets, the distribution of wealth and income, and the role of government regulation and intervention. It illuminates these concepts by considering and debating their application to contemporary economic and social issues such as: the influence of marketing on consumer choices, the concentration of market power in Australian industries, rising income and wealth inequality, minimum wage laws, and governmental responses to environmental problems and climate change.

ECON 1003 Financial Institutions and Markets

Credit Points 10

Legacy Code 200048

Coordinator Sean Toohey ([https://directory.westernsydney.edu.au/search/name/Sean Toohey/](https://directory.westernsydney.edu.au/search/name/Sean%20Toohey/))

Description The investment, financing and risk management decisions made by individuals, firms and governments are implemented by creating and trading financial instruments in financial markets, often with the involvement of a variety of institutions. Using the Australian financial system as an illustration, Financial Institutions and Markets introduces students to the theory and functions of financial institutions and markets. Students develop an understanding of the role and functions of bank and non-bank financial institutions and of markets in equities, debt, foreign exchange and derivatives.

School Business

Discipline Economics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects ECON 1004 - Financial Institutions and Markets (WSTC)

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the major institutional features of the Australian financial system;
2. Explain the function and operation of bank and non-bank financial institutions in the Australian financial system;
3. Explain the function and operation of markets in equities, debt, foreign exchange and derivatives;
4. Examine an element of the financial system and summarise and report relevant and contemporary information in the form of an oral presentation;
5. Examine an element of the financial system and summarise and report relevant and contemporary information in the form of a written report;
6. Evaluate the role of institutions, markets and regulators in the Australian financial system;
7. Perform calculations relevant to the use of various financial instruments.

ECON 1005 Globalisation and Australia

Credit Points 10

Legacy Code 200540

Coordinator Margaret Moussa ([https://directory.westernsydney.edu.au/search/name/Margaret Moussa/](https://directory.westernsydney.edu.au/search/name/Margaret%20Moussa/))

Description This unit provides an overview of the processes promoting globalisation and their impact upon Australian economic development. The unit stresses the interaction between the globalisation tendency and counteracting forces such as nationalism, and the contradictory economic, environmental, political, racial and class interests that have mediated and shaped the local impact of globalisation on the development of the Australian economy. The unit concludes by examining the socio-economic and environmental outcomes that ongoing globalisation is likely to produce in the 21st century for the world and Australia including the possibilities and prospects for indigenous economic development.

School Business

Discipline Economics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects ECON 1001 - Australia and the Global Economy
LGYB 8918 - Australian Economic History
LGYA 9817 - Australia and the Global Economy

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Outline the main causal mechanisms driving globalisation including the tendencies it promotes towards the freer flow of goods, services, capital and labour in the international economy and the consequent structural economic changes that the process involves.
2. Recognize factors such as nationalism, racial, social and political conflict and environmental impacts on mediating the historical process of globalisation with respect to Australian Economic Development.
3. Compare and distinguish the historical development of the international economy and the historical development of the Australian Economy.
4. Analyze the political basis of government economic strategy.
5. Evaluate the possible directions that globalisation will take in the future and the alternative policy options open to Australian governments with respect to both indigenous and non-indigenous people.
6. Classify and appraise the various impacts that ongoing globalisation are likely to have on local labour markets and career options for indigenous and non-indigenous people in the future as the international division of labour and the structural employment prospects in Australia continue to change and evolve.

Subject Content

- Causal mechanisms underpinning The process of globalisation during The Past Two centuries
- The changing phases of globalisation over The Past Two centuries
- The structural changes in international economic and political relations associated with globalisation over The Past Two centuries
- The impact of globalisation on Australian economic development from The eighteenth century to The present day for indigenous and non-indigenous people local Australian, economic, political (including race relations) and environmental Factors mediating and shaping The impact of globalisation on Australian development over The Past Two centuries
- Likely structural changes in production, distribution of income, labour markets, (for both indigenous and non-indigenous people) trade, capital flows and environmental considerations associated with ongoing globalisation in the 21st Century.
- Possible Australian government responses to the challenges of globalisation in the 21st century with respect to both indigenous and non-indigenous people.

Teaching Periods

ECON 1006 Introduction to Economic Methods

Credit Points 10

Legacy Code 200052

Coordinator Raja Mukherjee ([https://directory.westernsydney.edu.au/search/name/Raja Mukherjee/](https://directory.westernsydney.edu.au/search/name/Raja%20Mukherjee/))

Description Introduction to Economic Methods covers basic concepts in mathematics and statistics to help student understanding of subjects such as accounting, management, marketing, finance, and economics. Students taking this unit are expected to improve their numeracy and analytical skills. In particular, students will learn how to collect, analyse and interpret data using simple descriptive and inferential statistical methods including simple regression analysis. In addition, by working through applied exercises, students are expected to improve their problem solving skills and acquire a basic understanding of calculus relevant to fields such as finance.

Assumed Knowledge

HSC Mathematics or equivalent.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply concepts of simple algebra and calculus in describing economic concepts and solve elementary problems in unconstrained optimisation as applied in accounting, finance and economics;
2. Collect data and analyse its main features using descriptive statistics and computer software;
3. Apply probability concepts to solve problems;
4. Evaluate arguments involving discrete or continuous probability distributions;
5. Perform statistical inference involving interval estimation and hypothesis testing of statistical population parameters;
6. Analyse the relationship between two variables using statistical techniques.

Subject Content

- functions and relationships between economic phenomena
- The use of calculus to model Basic economic and business concepts
- Unconstrained and constrained optimisation in economics using calculus
- Descriptive statistics, frequency and relative frequency distributions
- The concept of A statistical experiment and Basic probability concepts
- Discrete probability distributions including The binomial Distribution
- Continuous probability distributions: The normal Distribution
- The Sampling Distribution of The sample mean and The central limit theorem
- Point and interval estimation of A population mean, population proportion and population variance (including business applications)
- Hypothesis testing of A population mean, population proportion and population variance (including business applications)
- inference involving The student's t Distribution and The chi-square Distribution
- Correlation analysis

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Quiz	Quizzes are non-compulsory. There are three online with each quiz having a weighting of 10%. 90 minutes are allowed per quiz for completion.	30	N	Individual
Report	800 words	10	N	Individual
Final Exam	3 hours	60	N	Individual

Prescribed Texts

- Comprehensive lecture notes will be provided for students on vUWS, and students will be referred to a variety of reference materials freely downloadable from the internet or available in the library.

ECON 1011 Principles of Economics

Credit Points 10

Legacy Code 200525

Coordinator Mamta Chowdhury ([https://directory.westernsydney.edu.au/search/name/Mamta Chowdhury/](https://directory.westernsydney.edu.au/search/name/Mamta%20Chowdhury/))

Description This unit is an introduction to economic concepts and contemporary economic issues. It introduces students to basic concepts such as markets and their operation, the behaviour of firms, the efficiency and potential failings of markets, the role of government, key macroeconomic problems such as recessions, inflation and unemployment, as well as contemporary fiscal and monetary policies. It illuminates concepts via application to contemporary economic issues and debates over different theoretical perspectives. This unit also exposes students to recent developments and policy controversies in economics.

Discipline Economics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects ECON 1007 - Introductory Economics ECON 1009 - Microeconomics ECON 1010 - Principles of Economics ECON 1012 - Principles of Economics (WSTC)

Restrictions External offerings for this subject during Autumn and Spring are only available to students who are enrolled in a Property program or field of study.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain and apply key economic concepts appropriately;
2. Interpret economic data and apply simple economic models to the analysis of relevant economic issues;
3. Present logical economic arguments in written or oral form;
4. Interpret and solve economic problems;
5. Explain and evaluate the likely effects of government economic policy.

Subject Content

- Foundations of markets: Demand, supply, equilibrium and institutional foundations; elasticities; production and costs
- Market structures: Perfectly competitive markets; monopolies; monopolistic competition; oligopolies and strategic decision-making
- Government intervention: Efficiency and economic welfare; externalities; public goods; market power
- key macroeconomic Variables and problems: GDP, economic growth, unemployment and inflation
- Explaining business cycles, and the unemployment-inflation trade-off; long-term economic growth
- financial sector: banking, money and interest rates
- Domestic macroeconomic policies: Monetary and fiscal policies. Policy stances; debates over policy
- international sector: Balance of payments, international trade and exchange rates

ECON 1013 The Australian Macroeconomy

Credit Points 10

Legacy Code 200549

Coordinator Andrew Marks ([https://directory.westernsydney.edu.au/search/name/Andrew Marks/](https://directory.westernsydney.edu.au/search/name/Andrew%20Marks/))

Description This unit is an introduction to macroeconomic concepts, analysis and issues in the Australian context. Basic concepts introduced and applied include: national income accounting, economic structure, price indexes and inflation, the balance of payments, and labour market aggregates. These concepts are applied in describing and explaining the recent evolution of the Australian economy in terms of growth, structural change, price stability, and employment. This leads to a discussion of major policy issues such as the role of governments in managing economic fluctuations, and the implications of Australia's foreign liabilities. The course ends with a brief introduction to modelling income determination.

School Business

Discipline Econometrics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects ECON 1008 - Macroeconomics

Assumed Knowledge

HSC Mathematics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define, understand and employ standard macroeconomic concepts to describe actual economies;
2. Describe the macroeconomic features of the Australian economy and their recent evolution;
3. Find, present, manipulate and interpret time-series data on important macroeconomic variables;
4. Identify the main instruments of government policy and explain their effects;
5. Discuss alternative views about macroeconomic policy;
6. Use simple models to make qualitative predictions on the likely macroeconomic effects of policy changes and external shocks.

Subject Content

- structural change and Global integration of The Australian economy
- The labour market, employment and unemployment in Australia
- national income accounting
- Measuring economic aggregates: income Expenditure model
- price and output volatility in Australia: AD-as model
- The financial system and Monetary instruments
- Monetary and fiscal policy
- investment, saving and growth in Australia
- international trade and Balance of payments accounting
- exchange rates and macro adjustment

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Presentation	a) One presentation or debate – up to 10 minutes in total. b) One impromptu presentation up to 5 minutes in total	15	N	Both (Individual & Group)
Essay	1,000 words	15	N	Individual

ECON 1014 Consumers, Firms and Markets

Credit Points 10

Legacy Code 201099

Coordinator Edward Mariyani-Squire ([https://directory.westernsydney.edu.au/search/name/Edward Mariyani-Squire/](https://directory.westernsydney.edu.au/search/name/Edward%20Mariyani-Squire/))

Description This subject is an introduction to microeconomics. It provides students with an understanding of basic concepts such as value, rational consumer behaviour, the behaviour of firms in various market structures, the efficiency and failings of markets, the distribution of wealth and income, and the role of government regulation and intervention. It illuminates these concepts by considering and debating their application to contemporary economic and social issues such as: the influence of marketing on consumer choices, the concentration of market power in Australian industries, rising income and wealth inequality, minimum wage laws, and governmental responses to environmental problems and climate change.

School Business

Discipline Economics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 1 subject

Equivalent Subjects ECON 1002 - Consumers Firms and Markets (WSTC) MKTG 1005 - Consumers Firms and Markets

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply microeconomic concepts to contemporary economic settings.
2. Apply geometric and mathematical concepts and techniques of analysis.
3. Interpret basic theoretical models of market structures.
4. Explain how microeconomic concepts have informed public policy debate on a variety of contemporary politico-economic issues.
5. Analyse critically with respect to theory and policy.

Subject Content

1. History and methodology.
2. Supply and demand.
3. Consumer choice and individual demand.
4. Anomalous consumer choice and individual demand.
5. Market demand and elasticities.
6. Production, costs and optimising.
7. Perfect and monopolistic competition.
8. Monopolies.

9. Oligopolies.
10. Labour markets.
11. Capital markets.
12. Externalities.
13. Public and common goods.

ECON 2002 Corporate Financial Management

Credit Points 10

Legacy Code 200488

Coordinator Girijasankar Mallik ([https://directory.westernsydney.edu.au/search/name/Girijasankar Mallik/](https://directory.westernsydney.edu.au/search/name/Girijasankar%20Mallik/))

Description This unit introduces the fundamental concepts of finance theory and the tools of financial decision making in the context of the Australian institutional environment. These concepts relate primarily to the time value of money, risk and return, capital budgeting and capital structure. The unit's purpose is to develop an understanding of the basic practices of financial management from the perspective of a firm (both large and small). Students examine the investment, financing and dividend decisions of corporations.

School Business

Discipline Economics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) ECON 1006 OR
MATH 1030

Equivalent Subjects ECON 2003 - Financial Management FINC 2001 - Corporate Financial Decision Making

Assumed Knowledge

Introductory economics or microeconomics, basic mathematics and statistics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain and analyse the investment, financing and dividend decisions of corporations;
2. Apply the concept of time value of money to financial decision making;
3. Have knowledge of the sources of finance, and evaluate their costs in the Australian financial environment;
4. Evaluate capital-expenditure projects and sources of finance;
5. Evaluate leasing as an instrument of financing;
6. Demonstrate the financial techniques used to manage current assets and liabilities;
7. Assess business risk and apply risk management tools.

Subject Content

- financial mathematics and time value of money
- valuation of Securities
- investment decisions
- financing decisions
- Dividend decisions
- capital markets in Australia
- short term financial management
- futures, options and international financial management
- leasing
- Mergers, acquisitions and corporate analysis

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

ECON 2004 Globalisation and Trade

Credit Points 10

Legacy Code 200541

Coordinator Heath Spong ([https://directory.westernsydney.edu.au/search/name/Heath Spong/](https://directory.westernsydney.edu.au/search/name/Heath%20Spong/))

Description Globalisation and Trade focuses on the role of trade in the process of globalisation. It covers the history and analytical methods of international trade theories and their applications in private industry and the public sector. The theories are applied to contemporary issues in their institutional settings, in particular to: growth and development; trading blocs; and trade strategies in the developed, underdeveloped and formerly planned economies. The unit provides students with a critical understanding of the major economic, environmental, social and ethical issues stemming from the process of globalisation and trade in the twenty first century.

School Business

Discipline Economics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) ECON 1011

Equivalent Subjects ECON 2006 - International Trade Theory and Policy

Assumed Knowledge

Basic understanding of microeconomic theory.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain key economic concepts used in international trade theory
2. Apply simple economic models to the analysis of trade related economic issues
3. Appraise the theoretical models used to explain international trade
4. Critique the economic concepts and models used in international trade theory and explain their limitations
5. Explain and evaluate the process of globalisation in terms of the role played by trade and factor flows
6. Assess government policies and private sector activities with respect to globalisation and trade in terms of their economic, social and ethical implications for both developed and developing economies

Subject Content

1. Analytical and historical aspects of the theoretical models used to explain international trade.
2. The determination of the terms of trade.
3. Instruments of trade policy.
4. Trade and the distribution of income.
5. The political economy of trade policy.
6. Trade and industry policy in developed countries including Australia.
7. Problems for developing countries.
8. Economic, environmental, social and ethical issues arising from globalisation and trade.

Prescribed Texts

- Krugman, P & Obstfeld, M 2012, International economics: theory and policy, 9th edn, Pearson, USA.

Teaching Periods

ECON 2005 History of Economic Thought

Credit Points 10

Legacy Code 200064

Coordinator James Farrell ([https://directory.westernsydney.edu.au/search/name/James Farrell/](https://directory.westernsydney.edu.au/search/name/James%20Farrell/))

Description This unit introduces the ideas of the most influential economic writers since Aristotle. Their theoretic contributions are discussed in the context of the political and philosophical debates and the economic issues of their times. The unit focuses on the theories of value and distribution; business cycles; and money and economic growth. It examines the criteria for progress in economic thought and considers the role of ideology and values. Students read selections from the writings of Smith, Ricardo, Mill, Marx, Marshall, Keynes and institutional writers.

School Business

Discipline Economics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) ECON 1009 AND ECON 1008 OR

ECON 1011 AND
ECON 1013

Learning Outcomes

On successful completion of this subject, students should be able to:

1. explain the development of economic and financial theory over time;
2. understand the competing perspectives in economic and financial thought;
3. consider and debate issues of economics and finance;
4. better understand some of the main areas of theoretical and policy debate in economics and finance today.

Subject Content

- The historical development of economics and finance, from the first considerations of conditions of production, exchange and money, through to modern economic thought;
- The major schools of thought (Classical, Keynesian, and Neoclassical) in historical sequence;
- Key areas of debate in economic and finance theory and methodology;
- Rival Continuing traditions in economic and financial thought today: Neoclassical, post Keynesian, Austrian, evolutionary, and ?gEconophysics?h.

Teaching Periods

ECON 2007 Macroeconomic Theory

Credit Points 10

Legacy Code 200547

Coordinator Mamta Chowdhury ([https://directory.westernsydney.edu.au/search/name/Mamta Chowdhury/](https://directory.westernsydney.edu.au/search/name/Mamta%20Chowdhury/))

Description Macroeconomic Theory aims to provide alternative theoretical explanations of the working of the macroeconomy. The unit will be based on the analytical narratives of macroeconomic developments taught in Australian Macroeconomy. Starting from the basic IS-LM model, it derives the aggregate demand (AD) curve and examines the components of commodity and money markets. It also analyses the labour market and derives the aggregate supply (AS) curve of an economy. Using the AD-AS model, it examines the interdependent nature of macroeconomic problems (e.g. inflation, unemployment), and the effectiveness of fiscal and monetary policies within a closed economy context. The basic model is then extended to analyse open economy issues (e.g., exchange rates and balance of payments, external shocks and international interdependence). Whenever appropriate, alternative approaches to macroeconomics are evaluated.

School Business

Discipline Econometrics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) ECON 1013

Equivalent Subjects LGYA 4311 - Macroeconomic Analysis

Assumed Knowledge

HSC Mathematics.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the nature of macroeconomic problems and policy dilemmas: inflation-unemployment trade-offs, government budget surpluses and deficits, current account deficits, and exchange rate movements
2. Describe unemployment: causes, consequences, and policies
3. Analyse inflation: causes, consequences, and policies
4. Illustrate the link between balance of payments, exchange rates and interest rates
5. Examine the role and effectiveness of fiscal and monetary policies.
6. Apply analytical models of macroeconomics to understand economic policy in a changing environment

Subject Content

1. Current macroeconomic problems and issues
2. Equilibrium in the commodity market (the IS curve)
3. Equilibrium in the money market with endogenous money supply (the LM and MP curves)
4. Equilibrium in Goods and Money markets (the IS-LM model, the IS-MP model, and the aggregate demand curve)
5. Labour market and Unemployment, the aggregate supply curve
6. Exchange rates and balance of payments
7. Nature of inflation and unemployment and the Phillips curve
8. Monetary and Fiscal policy

Legacy Code 200054

Coordinator Gulay Avsar ([https://directory.westernsydney.edu.au/search/name/Gulay Avsar/](https://directory.westernsydney.edu.au/search/name/Gulay%20Avsar/))

Description This unit builds on the econometric methods of Economic Modelling. The focus is on the linear model in econometrics in its application to economic and financial time series. The emphasis is on learning by doing in small group workshops.

School Business

Discipline Econometrics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MATH 2002 OR
ECON 3004

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Choose the appropriate econometric model to estimate in terms of: a.The theoretical foundations of the model; b.The empirical questions to be addressed, and; c.The nature of the data used to estimate the model
2. Identify variations on the classical linear model when using data which is both cross sectional and time series.
3. Explain issues of modelling with endogenous regressors.
4. Estimate and interpret and test models with limited dependent variables.

- Estimate and interpret linear econometric models using modern time series methods.
- Estimate models with panel data and show how they are related to modern policy evaluation.
- Have developed proficiency in the use of STATA for econometric modelling.

Subject Content

Review of Topics in Regression Analysis

Discrete Dependent Variables:

Binary Response Model

The Tobit Model

Instrumental Variable Estimation:

Omitted Variables/Two Stage Least Squares

Errors in Variables Problem

Testing for Endogeneity and Overidentification

Regression Analysis with Time Series:

OLS, Serial Correlation and Heteroscedasticity

Distributed Lag Models/Unit Root

Spurious Regression/Error Correction Model

Teaching Periods

ECON 3002 Corporations, Economic Power and Policy

Credit Points 10

Legacy Code 200923

Coordinator Partha Gangopadhyay ([https://directory.westernsydney.edu.au/search/name/Partha Gangopadhyay/](https://directory.westernsydney.edu.au/search/name/Partha%20Gangopadhyay/))

Description Australia's industrial, financial and retail sectors are dominated by powerful corporations which engage in a wide variety of competitive and cooperative behaviours. This unit examines how modern corporations position themselves in terms of investment in large-scale production, technological innovation, the manipulation of information, marketing, and cooperative strategies to gain market share and enhance their profitability. It also explores the effects of the interactions of corporate behaviour and public policy, including the governmental function of constructing and regulating explicit market rules of exchange.

School Business

Discipline Economics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Equivalent Subjects ECON 3018 - Microeconomic Theory and Applications

Assumed Knowledge

Knowledge gained around consumers and markets, the Australian economy, economic methods and analysis.

Learning Outcomes

On successful completion of this subject, students should be able to:

- Apply theoretical microeconomic concepts to the analysis of industry structure, conduct and performance;
- Develop further understanding and modelling of strategic behaviour within and between firms;

- Analyse microdynamic factors relating to strategic decision making of corporations;
- Critically evaluate interactions between government and corporations;
- Critically evaluate debates over industry and competition policy.

Subject Content

- Equilibrium and disequilibrium Models, Game theory and Rational Expectations

- Microstructure Models: inventory Models, information-based Models, strategic trader Models

- Industrial organisation and microdynamics: product selection, quality and marketing, vertical control and integration, dynamic price competition and tacit collusion, non-price competition, reputation and predation, R&D, innovation and new technologies

- Regulatory Issues: merger regulation, information provision, deceptive conduct, property rights, corporate welfare, Regulatory capture

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Presentation	10 minutes	20	N	Individual
Essay	2,000 words	30	N	Individual
Essay	2 hours	50	N	Individual

Prescribed Texts

- There is not a recommended textbook for this subject. Required readings will be made available through the vUWS site.

ECON 3003 Derivatives

Credit Points 10

Legacy Code 200079

Coordinator Mark Thomas ([https://directory.westernsydney.edu.au/search/name/Mark Thomas/](https://directory.westernsydney.edu.au/search/name/Mark%20Thomas/))

Description This unit provides an introduction to the major classes of derivatives: forwards, futures, swaps and options. It examines how these instruments can be used by companies for the purposes of hedging, speculation and arbitrage. Each of these categories of derivatives is examined in some detail. Considerable attention is also given to various models used to price derivative products. The historical background to contemporary risk management is also considered.

School Business

Discipline Economics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) ECON 1006 AND
ECON 2002

Equivalent Subjects LGYA 9824 - Risk Management LGYB 9004 -
Options Futures and Derivative Products

Assumed Knowledge

Knowledge of mathematics and statistics equivalent to that required for 200052, Introduction to Economic Methods.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Describe the operational mechanics of derivatives trading;
2. Identify and explain the role of key participants in derivatives markets;
3. Evaluate the institutional and organisational structure of key derivatives markets;
4. Examine the theoretical background to the pricing of various types of derivatives;
5. Illustrate the historical development of derivatives.

Subject Content

- options, futures and forwards Overview
- mechanics of futures and forward markets
- interest rate mathematics and analysis
- forward and futures price analysis
- Hedging strategies
- interest rate derivatives
- FRAs and swaps
- option market structure and mechanics
- option strategies
- option pricing Models

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Quiz	40 minutes	10	N	Individual
Portfolio	10 minutes	15	N	Individual
Intra-session Exam	1 hour	25	N	Individual
Final Exam	2 hours	50	N	Individual

ECON 3005 Economic Theories, Controversies and Policies

Credit Points 10

Legacy Code 200816

Coordinator Margaret Moussa ([https://directory.westernsydney.edu.au/search/name/Margaret Moussa/](https://directory.westernsydney.edu.au/search/name/Margaret%20Moussa/))

Description In 2016, this unit replaced by 200925 - Growth, Cycles and Crises. Economic Theories, Controversies and Policies presents alternative approaches to economic theories, controversies and policies. Topics may include recent developments or theoretical controversies in development economics, international trade, monetary economics, labour economics, environmental economics, managerial and industry economics, political economy, the economics of inequality, behavioural economics or feminist economics. Controversial contemporary policy debates, both in Australia and globally, will be

examined. This unit will be team taught to expose students to a range of perspectives.

School Business

Discipline Economics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) ECON 1011

Assumed Knowledge

Basic understanding of economic and financial concepts.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply critical, reflective and creative skills to solve problems.
2. Demonstrate contemporary and detailed knowledge of a business discipline in local, national and international settings.
3. Identify ethical and social issues and make recommendations for improved practice.

Subject Content

The content will vary according to the interest of students and staff, but may include:

Managerial economics and industry policy:

- debates in industrial organisation
- alternative theories of The firm
- microeconomic reform

Development economics:

- policy dilemmas in The Asia Pacific and other regions
- inclusive growth
- relative deprivation, policy applications
- polarisation of income and wealth
- achievement of millennium goals

Labour:

- human capital, education and Migration
- alternative perspectives on unemployment, Technology and happiness
- outsourcing and offshoring
- segmented labour markets and discrimination

Trade:

- new trade theories
- Unequal exchange
- role of international institutions

Environmental economics:

- The biodiversity Crisis and orthodox economics solution
- Ontological and Ethical Controversies in economics
- A critique of The orthodox theory of endangered species management
- Heterodox economics and The biodiversity Crisis

Alternatives to neo-classical theory and controversies in economic methodologies:

- Neoclassical economics and its critics
- Controversies in The theory of value
- Monopoly capital
- Conflicting theories of The economy and The state

Political economy of money:

- money and Keynesian uncertainty
- Endogenous money: Heterodox Controversies
- A theory of financial instability and debt-deflation
- A Marxian theory of money, Credit and Crisis

Other areas may also include, but are not limited to:

- Behavioural economics, Feminist economics or The economics of inequality.

Teaching Periods

ECON 3006 Economic and Financial Modelling

Credit Points 10

Legacy Code 200916

Coordinator Maria Estela Varua ([https://directory.westernsydney.edu.au/search/name/Maria Estela Varua/](https://directory.westernsydney.edu.au/search/name/Maria%20Estela%20Varua/))

Description Economic and Financial Modelling examines regression analysis and its use in business especially in economics, finance and accounting. Topics will include the properties of estimators, hypothesis testing, specification error, multicollinearity, dummy variables, heteroskedasticity, serial correlation. It also introduces other modelling techniques in finance and economics. Empirical assignments undertaken by the student form an integral part of the unit. The emphasis is on learning by doing in small group workshops.

School Business

Discipline Econometrics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Pre-requisite(s) MATH 1030 OR ECON 1006

Equivalent Subjects ECON 3004 - Economic Modelling

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Apply the basic elements of econometric modelling and forecasting.
2. Demonstrate how standard computer software may be used to analyse simple financial and economic problems with a statistical package.
3. Demonstrate hands-on experience in constructing econometric models.
4. Define business problems and analyse using appropriate quantitative techniques.

Subject Content

1. Econometrics and testing economic hypotheses. What should an econometrics report contain?
2. The probability foundations of econometrics.
3. Point estimation in the classical linear econometric model; least squares and likelihood criteria.
4. Hypothesis testing: the Wald, Lagrange multiplier and likelihood ratio tests.
5. Model diagnostics; heteroskedasticity, autocorrelation, model specification testing.
6. Generalised least squares, feasible generalised least squares including autocorrelated errors.
7. Dealing with binary independent variables.
8. Instrumental variable methods.
9. Model discrimination testing; nested tests and testing linear restrictions; non-nested tests.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Intra-session Exam	90 minutes	20	N	Individual
Report	Up to 10 pages (3,000 words equivalency)	20	N	Group
Participation	20 minutes each	10	N	Individual
Final Exam	3 hours	50	N	Individual

ECON 3007 Economics and Finance Engagement Project

Credit Points 10

Legacy Code 200537

Coordinator Kathy Tannous ([https://directory.westernsydney.edu.au/search/name/Kathy Tannous/](https://directory.westernsydney.edu.au/search/name/Kathy%20Tannous/))

Description This unit will provide students with exposure to problems with which economists and finance professionals are confronted in their daily work. They will learn about and examine the multi-dimensional nature of the issues addressed by economists and finance professionals in real-life. Students will need to consider the nature of the problems, propose solutions, as well as address how realistic the solutions they are proposing are. They will learn how to systematically reflect on their contribution to the industry or community setting with which they engage.

School Business

Discipline Economics

Student Contribution Band HECS Band 4 10cp

Level Undergraduate Level 3 subject

Restrictions Students in the following programs must have successfully completed 150 credit points: 2504 Bachelor of Economics, 2526 Bachelor of Economics/LLB, 2739 / 2753 Bachelor of Business and Commerce, 2741 / 2754 Bachelor of Business and Commerce (Advanced Business Leadership), 3655 Bachelor of Information and Communications Technology/ Bachelor of Business and Commerce, 3659 Bachelor of Science/ Bachelor of Business and Commerce, 2740 Bachelor of Business and Commerce / Bachelor of Laws.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Show an in-depth understanding of a real-life problem in their field of study;
2. Choose and apply knowledge they have gained in different units to examine a particular problem;
3. Select and evaluate practical solutions in light of industry or community needs.

Subject Content

After an introduction to engaged research, students will choose a particular problem in an industry or community setting and develop solutions that are beneficial to the industry partner as well as based on state-of-the-art knowledge in the discipline. Students will work alone or in groups depending on the problem to be solved, and will provide a concise and comprehensive report for the industry partner. Throughout the project, students will keep a reflective learning journal.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/ Group Task
Proposal	1,500 words	20	N	Individual
Report	5,000 words	50	N	Group
Reflection	2,000 words	30	N	Individual
