USER EXPERIENCE, TESTAMUR MAJOR (T154)

Western Sydney University Major Code: T154

Available to students in other Western Sydney University Programs: Yes. Check that your program has the available credit points required to complete the subjects in this field of study. Any requisite requirements must also be met. Consult your Program Advisor for further advice.

User experience (UX) is key to the success of organisations in shaping great products and services. Taking a user centred approach, students in this major design interactive digital applications, information systems and services that meet the needs of their target market. Students learn about design as a systematic and data driven process, backed up by up-to-date theoretical and practical knowledge, enabling them to design efficient and effective artefacts in a rapidly changing, fast paced environment. In this multidisciplinary field, students incorporate analytics, research, human factors, security and privacy into their designs using a range of technologies. Skills developed in this major prepare students for UX careers in a diverse range of business and industry environments, wherever interactions with clients or the general public are essential.
