The program is designed to provide students with a range of foundational skills and knowledge in building design and construction that are transferrable to a wide range of career options and future academic study. Through the program, students will understand the tasks performed by various roles in the building industry and investigate a wide scope of construction materials, processes, and technologies. This will develop students' ability to communicate effectively to construction stakeholders while performing ethically and socially responsibly. The Diploma program offers various avenues by which students can personalise learning and enhance their future employability. The inclusion of additional preparatory subjects is designed to assist students in the transition to study at University level.
