

GRADUATE DIPLOMA IN CHILD HEALTH

Western Sydney University Program Code: 4793
AQF Level: 8

Program Status:

This program applies to students who commenced in mid year 2022 or later.

This program is designed for health professionals who are looking to develop paediatric skills to improve the health and wellbeing of children and young people. Students will gain skills, knowledge and confidence to identify, assess and manage common paediatric issues. Students will evaluate how social determinants can impact the care for children and make great impact in their role in advocating for paediatric patients. Completing this program will provide students with a stronger foundation in paediatric experience to support their daily practice in local region(s). Every aspect of the program is designed, developed and assessed by experienced academics and experts from Western Sydney University and the Sydney Children's Hospitals Network. Students will be provided with the opportunity to take part in extracurricular activities to help build skills and establish connections with the community.

Study Mode

One year full-time or two years part-time.
