

BEHV 5004 WELLBEING ECONOMY

Credit Points 10

Coordinator Tania Perich ([https://directory.westernsydney.edu.au/search/name/Tania Perich/](https://directory.westernsydney.edu.au/search/name/Tania%20Perich/))

Description The Wellbeing Economy is an emerging global movement aimed to disrupt and transform dominant macro-economic systems focused on economic growth. Proponents of the Wellbeing Economy argue that individual, community and societal wellbeing should be the measures of a successful economy. Major shifts in government and business sector accountability for social justice and 'wellness' outcomes are predicted over the coming decade. At the micro level, what will it mean to live, work and lead in a wellbeing economy? What new knowledge, skills and attitudes will be required on the ground? In this subject traditional and emerging theories and concepts of wellbeing will be explored, critiqued and reimagined. Real world examples of holistic approaches to wellbeing in business and industry contexts will be investigated and applied to your unique, authentic contexts. You will build your capacity to problem-solve and plan for wellbeing outcomes in your individual spheres of influence. Engaging leaders across industries will share their experiences through online learning activities and resources. At the conclusion of this subject, you will have enhanced knowledge and skills to develop, at scale, strategies and plans that support individual, community and organisational wellbeing.
