

BEHV 7035 PSYCHOLOGICAL APPROACHES TO DISABILITY: THEORY AND PRACTICE

Credit Points 10

Legacy Code 102692

Coordinator Michael Gascoigne ([https://directory.westernsydney.edu.au/search/name/Michael Gascoigne/](https://directory.westernsydney.edu.au/search/name/Michael%20Gascoigne/))

Description This subject offers students a contemporary understanding of the psychological assessment, intervention and evaluation techniques relevant to the support of people with disability. Biological, psychological social and community factors contributing to support will be presented. Ecological, functional and clinical approaches to planning across the life span will be taken, addressing early intervention, childhood, adolescence, adulthood and ageing. A key focus of the subject will be advancing inclusion and quality of life outcomes to enable people with disability to fully participate in society. Current legal, policy and ethical issues will also be discussed, including professional standards for working effectively across multicultural and multidisciplinary contexts.
