Learning Outcomes

On successful completion of this subject, students should be able to:

1. Recognise the importance of a multi-factorial approach to design decision making in the construction industry
2. Review and evaluate the economic, environmental and social impacts of major building proposals
3. Identify potential areas of conflict between developer and community interests
4. Prioritise competing parameters in the establishment of a complex building project
5. Integrate knowledge of economic, environmental, regulatory and social constraints in the preparation of the brief for a major construction project

Subject Content

Design problem description
Constraint identification
Formulating the project budget
Identifying wants versus needs
Risks and benefits of the proposal
Triple bottom line assessment of building projects
