Assumed Knowledge

This is a research subject designed to be taken during the final year of the Bachelor of Construction Management standard program. Students should have a comprehensive knowledge of problem solving research in the construction industry.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Justify the role of research and strategic planning in the construction industry.
2. Plan and implement a practical research project in construction.
3. Critically analyse the existing body of knowledge in a defined area of this discipline.
4. Communicate their research ideas and plans through written forms of presentation.

Subject Content

Specific content will vary depending on the nature of the project and the research methodology adopted. However, some generic content may include:

- research topic selection and definition,
- literature review,
- critique,
- summarising,
- research methodology,
- research planning,

- research and analytical techniques, and
- technical/professional writing.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Item	Length	Percent	Threshold	Individual/Group Task
Report	1,000 words	25	N	Individual
Report	5,000 words	60	N	Individual
