Description Working in Professions focuses on developing career understandings and appreciating the personal attributes required for employability in the 'real world' of accounting, banking, economics, finance and property. This is a professional subject in the Bachelor of Business, but is also open to participants with an interest in examining and developing their knowledge of employability in these career areas. The subject involves examination of the evolving nature of work in a dynamic globalised context; applied labour market and industry structure analysis; and an exploration of employability attributes, capacities and opportunities across a range of career paths. Successful completion of the subject allows participants to gauge employer expectations, and to identify and reflect on career opportunities in their chosen fields.
