Learning Outcomes

On successful completion of this subject, students should be able to:

1. Compare and contrast the global components of the health care system within Australia, with particular emphasis on funding arrangements for private and public sector funding.
2. Identify the key elements of a successful business plan, extrapolating these into a small business in a health care profession.
3. Outline the essential elements in establishing a small business, including business viability and raising capital.
4. Discuss the key issues in financial planning of a small business, with particular emphasis on taxation, insurance and related issues.
5. Manage a budget, with consideration to the income and types of expenditure required.
6. Delineate different business structures and employment arrangements, including partnerships, associates and affiliates.
7. Discuss the issues associated with the employment of staff, including employer and employee obligations.
8. Explore concepts and roles of leadership and management styles.
9. Identify the occupational health and safety issues within a small business and formulate ways in which a practice can be managed according to these guidelines.
10. Formulate methods of monitoring successful practice including the development and implementation of policies and procedures.
