# CIVL 5001 BUILDING ENGINEERING

**Credit Points** 10

**Coordinator** Brendan Kirkland (https://directory.westernsydney.edu.au/search/name/Brendan Kirkland/)

**Description** This subject provides students with an understanding of the factors that contribute to decisions in building design, particularly compliance with the National Construction Code and related standards. Students apply their learning to real world contexts as they integrate the construction codes, standards and engineering structural principles to building engineering. Students build their skillset to assess the structural performance acceptability of buildings.

Level Postgraduate Coursework Level 5 subject

Equivalent Subjects CIVL 7011 - Building Engineering

#### Restrictions

Students enrolled in the 3693 Master of Engineering (Civil Engineering) cannot enrol in this subject.

## **Learning Outcomes**

- 1. Analyse the underlying concepts of building engineering.
- 2. Interpret soil classification and its implication on footing systems.
- 3. Determine structural design actions and strength of various structural members through simple performance evaluation.
- Interpret the performance requirements of the structural provisions of the National Construction Code as they relate to all classes of buildings.
- Apply various standards and codes of practice related to structural engineering.
- Evaluate existing structures in terms of the acceptability of their performance.

## Subject Content

- 1. Structural provisions of the National Construction Code (Volumes 1 and 2)
- 2. Structural design actions: dead and live load, wind effect
- 3. Load combinations and Limit State Design
- 4. Soil classification and footing systems
- 5. Structural engineering concepts
- 6. Behaviour of structural materials
- 7. Reinforced concrete members and prestressed concrete
- 8. Structural timber members and connections
- 9. Structural steel members: beams, columns, and tension members
- 10. Steel connections, frames, and composite members

## **Assessment**

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Туре	Length	Percent	Threshold	Individual/ Group Task	•
Quiz	3 x 30 minutes	30	N	Individual	N
Report	3000 words	30	N	Individual	N
Report	4000 words	40	Υ	Individual	Υ
