

CMPL 7004 CHINESE INTERNAL MEDICINE 2 (PG)

Credit Points 10

Legacy Code 400922

Coordinator Xiaoshu Zhu ([https://directory.westernsydney.edu.au/search/name/Xiaoshu Zhu/](https://directory.westernsydney.edu.au/search/name/Xiaoshu%20Zhu/))

Description This subject builds on Chinese Medicine 1 and extends the students ability to analyse, diagnose and treat common and difficult diseases in internal medicine with both acupuncture and herbal medicine and using a Traditional Chinese Medicine approach. Students will develop an understanding of the causes and pathophysiological mechanisms of a wide range of diseases.

School Health Sciences

Discipline Traditional Chinese Medicine

Level Postgraduate Coursework Level 7 subject

Incompatible Subjects LGYA 7251 - Chinese Internal Medicine 2

Assumed Knowledge

Traditional Chinese Medicine 3, Acupuncture Techniques, Chinese Medicinal Formulas.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the causes, pathophysiological mechanisms and clinical manifestations of common diseases, covered in this unit
2. Conduct a clinical examination including inspections, auscultation and olfaction, interrogation, and palpation in order to arrive at accurate diagnoses of specific diseases
3. Analyse symptoms and signs, and apply pattern differentiation to arrive at a TCM diagnosis
4. Design treatment principles, and write prescriptions (acupuncture and herbs) for common diseases of internal medicine. This is inclusive of required dietary or lifestyle changes
5. Analyse and critically examine practice protocols in TCM compared to orthodox management

Subject Content

1. Diseases and syndromes of Liver system (TCM)
