

ENVL 3007 URBAN ENVIRONMENT

Credit Points 10

Legacy Code 300860

Coordinator Michelle Ryan ([https://directory.westernsydney.edu.au/search/name/Michelle Ryan/](https://directory.westernsydney.edu.au/search/name/Michelle%20Ryan/))

Description This subject explores the relationships between community, the natural environment and government within an urban context through considering how housing and urban development can influence population health. Concepts explored include "healthy housing", "active living" "safety by design" and "energy efficiency". Through a combination of case studies and practical field experience, students will develop the skills and knowledge appropriate to assessing the "healthiness" and sustainability of urban environments. The subject examines methods of construction and building regulation aimed at the preservation of health and amenity.

School Science

Discipline Environmental Studies, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Successful completion of 120 credit points

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Explain the requirements for sustainable and healthy urban design
2. Describe the principles of urban development assessment
3. Describe environmental, health and planning control of urban development projects
4. Describe the principles of liveable and healthy urban design
5. Analyse the relationship between disease prevention and housing design, including their relationship to \diamond gepidemics of today \diamond h - obesity, heart disease and depression
6. Research, evaluate, utilise and communicate relevant statutory and policy information

Subject Content

EHA professional accreditation requirements specific to the built environment;
Human health impacts of housing and urban development;
Healthy Housing, "Active Living", "Safety By Design" and "Energy Efficiency";
Assessment of "Healthiness" and sustainability of urban environments;

Environmental Planning and Assessment Act, Local Government Act, Public Health Act;

Building Code of Australia;
Development approval and control.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task
Online Discussion	Weekly	20	N	Individual
Online Quiz	1.5 hours	30	N	Individual
Individual Report	2000 words	50	N	Individual
