Description This subject provides an introduction to the provision of health, services and fields associated with the provision of health in Australia. The subject covers a range of health science concepts, including what health literacy is and why it is important and other concepts such as acute care, chronic care, National Health Priority Areas (NHPAs) in Australia, and health education. The subject also introduces examples of terminology used for measuring the distribution and determinants of disease and illness in varied population groups (epidemiology). This includes terms such as health data, morbidity, co-morbidities, mortality, quality of life and disability adjusted life years. This subject aims to give students an understanding of health science practice in Australia both in city and rural settings and identifies minority group issues and challenges in accessing healthcare and services.

Restrictions

Students must be enrolled at Western Sydney University, The College.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Define health literacy and understand its importance in making appropriate health decisions
2. Use common medical terminology as it relates to health
Demonstrate a foundational understanding of the impact that health education can have on health behaviour
3. Examine and evaluate minority group issues and challenges, regarding National Health Priority Areas, in Australia
4. Describe the role and impact of health professionals in primary and secondary schools regarding health literacy

Subject Content

1. Health Literacy- developing the capacity to obtain, process and understand basic health information and services needed to make appropriate health decisions.
2. Healthcare settings- an introduction to what healthcare encompasses and where it can be practised
3. National Health Priority Areas in Australia (including mental health)
4. Acute and chronic care defining the differences and how it impacts on individual health
5. Minority group issues and challenges in Australia in accessing health services and maintaining health

6. Health in schools- health professionals in schools both primary and secondary education
7. Health education purpose and dimensions to enhance individuals, families, community and society
8. Medical terminology- an introduction to and application of common word roots, prefixes and suffixes used in health science.
1. Health Literacy- developing the capacity to obtain, process and understand basic health information and services needed to make appropriate health decisions.
2. Healthcare settings- an introduction to what healthcare encompasses and where it can be practised
