

HLTH 2005 EXERCISE PRESCRIPTION I

Credit Points 10

Legacy Code 401143

Coordinator Bobby Cheema ([https://directory.westernsydney.edu.au/search/name/Bobby Cheema/](https://directory.westernsydney.edu.au/search/name/Bobby%20Cheema/))

Description This subject is designed to give students an understanding of and experience in exercise prescription and fitness program construction for the general population (apparently healthy) across all ages and genders. It will focus on the development of general health-related exercise programs, which improve aerobic and anaerobic fitness, muscular strength and endurance, flexibility and body composition. Students will design, implement, supervise and evaluate a self-prescribed exercise program, and instruct training sessions for fellow students.

School Health Sciences

Discipline Physiotherapy

Student Contribution Band HECS Band 2 10cp

Check your fees via the Fees (https://www.westernsydney.edu.au/currentstudents/current_students/fees/) page.

Level Undergraduate Level 2 subject

Pre-requisite(s) HLTH 2003 AND SPRT 2002

Equivalent Subjects HLTH 2006 - Exercise Prescription for General Populations

Restrictions

Students must be enrolled in 4658 - Bachelor of Health Science (Sport and Exercise Science).

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Articulate the principles of exercise prescription with particular emphasis on aerobic training, resistance training, and flexibility training methods
 2. Describe how ageing and physical inactivity impact upon health-related physical fitness and how exercise can be used to mitigate these effects
 3. Describe the absolute and relative contraindications to exercise participation and criteria to terminate fitness tests of all types
 4. Administer and interpret a range of pre-exercise health screening tools to determine the risk for an individual and appropriate action
 5. Select, implement, interpret, and modify standard health-related physical fitness tests for low risk individuals
 6. Design, implement, supervise, and evaluate training programs in the primary areas of exercise prescription for low risk clients using in-person and telepractice service delivery methods
- a. aerobic training
 - b. flexibility training
 - c. high-intensity interval training
 - d. resistance training
 - e. circuit training and group-based exercise programming
4. Fundamentals of periodization
 5. Exercise prescription across the lifespan
 6. Exercise prescription for weight management
 7. Resistance training prescription for children and adolescents
 8. Exercise prescription during pregnancy
 9. Alternative training methods, yoga
 10. Design, implement, supervise and evaluate effective exercise prescriptions using in-person and telepractice service delivery methods

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/Group Task
Final Exam	2 hours	50	Y	Individual
Presentation	15 minutes	30	N	Group
Simulation	Weekly	20	N	Individual
