

HORT 1001 CROP PRODUCTION

Credit Points 10

Legacy Code 300815

Coordinator Qaiyum Parvez ([https://directory.westernsydney.edu.au/search/name/Qaiyum Parvez/](https://directory.westernsydney.edu.au/search/name/Qaiyum%20Parvez/))

Description This subject aims to provide students with an understanding of the scientific basis of sustainable crop and food production and security. These include broad-acre cropping, fruits/orchards and vegetables. In this subject students will gain an understanding of the physiological controls on crop yield in the variable Australian environment in which crops are grown. Students will become familiar with the science and practice of sustainable crop production and develop crop management skills through the production of nursery crops, vegetables and fruits. Students will also gain an understanding of processing these crops after harvest, to develop an appreciation of factors impacting upon produce quality and safety.

Level Undergraduate Level 1 subject

Equivalent Subjects HORT 1003 - Horticultural Production 2 BIOS 2023 - Fruit Production LGYA 5943 - Floriculture HORT 1002 - Crop Production

Assumed Knowledge

Basic knowledge of plants.

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Mandatory Group Task
Crop Production words Report	1,000	15	N	Individual
Food Processing words and Analysis report	1,000	15	N	Individual
Field Work Project activities/ participation	N/A	10	N	Individual
Mid Semester Quiz	30 Minutes	10	N	Individual
Final Exam	2 Hours	50	N	Individual
