

INFO 2002 TANGIBLE INTERACTION DESIGN

Credit Points 10

Legacy Code 301088

Coordinator Omar Mubin ([https://directory.westernsydney.edu.au/search/name/Omar Mubin/](https://directory.westernsydney.edu.au/search/name/Omar%20Mubin/))

Description This subject will provide students with the capacity to create interactive products that can sense environmental stimuli and exhibit an appropriate yet intelligent response. Students will be expected to write script based programs to control hardware circuits connecting various Input/Output peripherals (sensors, actuators). The range of interactive products studied and built by the students will be diverse; ranging from household everyday products to artifacts that can be used in public spaces.

School Eng, Design & Built Env

Discipline Information Technology, Not Elsewhere Classified.

Student Contribution Band HECS Band 2 10cp

Level Undergraduate Level 2 subject

Pre-requisite(s) INFO 3003

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Create electronic hardware that recognises input from human and environmental stimuli.
2. Create software to define logic that operates an interactive physical artefact.
3. Create, test and improve a physical prototype that responds to human behaviour or other sensory input.
4. Demonstrate fluency in critical making; through use of literature in tangible interaction and observation of existing products.
5. Combine hardware, software and functional design to create an interactive product that meets a design brief (e.g. for home, office or public contexts).

Subject Content

1. Tangible and Embedded Interaction (TEI)
2. Actuators and Sensors
3. Environmental Awareness and Recognition
4. I/O Programming (using various platforms such as Arduino, Phidgets, etc)
5. Hardware and Software Integration
6. Wearable Technology
7. Contextualising TEI and application areas (music, entertainment, education, socialisation, persuasion, etc)
8. Research Topics in TEI
9. Internet of Things

Assessment

The following table summarises the standard assessment tasks for this subject. Please note this is a guide only. Assessment tasks are

regularly updated, where there is a difference your Learning Guide takes precedence.

Type	Length	Percent	Threshold	Individual/ Group Task	Mandatory
Assessment 1: Interactive Concept	Develop computer code (500 lines equivalent), technical drawings (2 x A3 pages), presentation of 5 minute duration	20	N	Individual	
Assessment 2: Interactive Prototype	Develop circuit diagram, computer code (500 lines equivalent), technical drawings (2 x A3 pages), working scaled prototype	30	N	Individual	
Weekly Tutorial Exercises/ Labs	2 hour session (3-5 questions)	30	N	Individual	
In Class Quizzes x 2 each	1 hour	20	N	Individual
