

INFO 3019 PROJECT MANAGEMENT

Credit Points 10

Description This subject is designed to provide students with the fundamental project management skills, theories and methods required in today's complex business environment with a focus on project conception, initiation, planning, monitoring and control in ICT. Students explore developing project solutions in various ICT areas, project management methodologies, time management, team management, and different knowledge areas contributing to the successful delivery of a project life cycle. Students work in teams under the supervision of a staff member, to plan and investigate their projects using a range of project management tools and techniques and integrate ethical principles into project planning, execution, and stakeholder interactions. Skills in project management and working with others on projects in the ICT context are in demand by employers.

School Computer, Data & Math Sciences
