

LANG 3057 LANGUAGES AND GRAMMATICAL CONCEPTS 3A: ARABIC

Credit Points 20

Legacy Code 101709

Coordinator Zouhir Gabsi ([https://directory.westernsydney.edu.au/search/name/Zouhir Gabsi/](https://directory.westernsydney.edu.au/search/name/Zouhir%20Gabsi/))

Description This is an advanced Level 3 language and linguistics subject for students of modern Arabic. Lectures for the grammatical concepts component are held in English for students of all languages while other activities are language-specific. The aim of the subject is twofold. On the one hand it aims, to develop a practical and theoretical understanding of the ways in which major concepts used in everyday speech and writing are mapped and organized in the lexicon and the grammar of human languages, and how these forms develop in learners and users. On the other hand, it aims to develop advanced comprehension and production skills in Arabic language, including higher stages optional structures, through critical examination of contemporary and historical text and discourse samples from a variety of registers. An understanding of contemporary Arab culture and society is also fostered through comparative research projects on specific cultural, social and/or linguistic, aspects that are of interest to students. A range of CALL (Computer Assisted Language Learning) activities are utilised for this subject.
