

NURS 7055 PERINATAL, INFANT AND CHILD MENTAL HEALTH

Credit Points 10

Legacy Code 401375

Coordinator Rachel Gregory-Wilson ([https://directory.westernsydney.edu.au/search/name/Rachel Gregory-Wilson/](https://directory.westernsydney.edu.au/search/name/Rachel%20Gregory-Wilson/))

Description This subject replaced by NURS 5003 - Perinatal, Infant and Child Mental Health in Spring 2023. This subject enables students to explore the complex issues related to Perinatal, Infant and Child mental health including: the importance of the parent infant relationship to maternal and infant mental health, antenatal and postnatal depression and anxiety, substance misuse and domestic violence. Through examination of these complex issues, students will gain knowledge of the risk and protective factors that influence outcomes for infants, children and families. Strategies to promote emotional wellbeing, positive parent-child relationships and social support for these families is an essential learning component supported by the concepts of targeted and specialist intervention, and early intervention. The knowledge gained in this subject will be consolidated through virtual clinical placement.

School Nursing & Midwifery

Discipline Mothercraft Nursing and Family and Child Health Nursing

Level Postgraduate Coursework Level 7 subject

Restrictions

Students must be enrolled in 4713 Master of Child and Family Health (Karitane), 4714 Graduate Diploma in Child and Family Health (Karitane) or 4715 Graduate Certificate in Child and Family Health (Karitane).

Assumed Knowledge

Fundamental concepts of mental health at undergraduate degree level. An understanding of professional frameworks and competencies for the Registered Nurse or Registered Midwife at a undergraduate level, augment experience at a general Registered Nurse or Registered Midwife level.

Learning Outcomes

On successful completion of this subject, students should be able to:

1. Discuss the importance of positive parent child relationships on emotional development as a predictor of child development.
2. Determine risk and protective factors that influence global outcomes for children and their families including intergenerational issues using a socioecological model
3. Recognise the risk factors and signs of anxiety and depression in childhood
4. Explain the impact of perinatal depression and anxiety on the infant-parent relationship and analyse the management and treatment of perinatal mood disorders

5. Evaluate the impact of domestic/family violence on the health and wellbeing of women, children and families and identify strategies to support families
6. Analyse how parental substance misuse impacts parenting capacity and family life
7. Based on best available evidence, discuss early prevention and intervention strategies and programs that promote the health and wellbeing of children
8. Prioritise and select appropriate skills as a self-reliant learner to effectively work in groups and teams

Subject Content

1. Parent - infant relationship and introduction to attachment theory
2. Emotional development
3. Transition to parenthood and parenting styles
4. Psychosocial assessment
5. Perinatal Mental Disorder (PMD) management
6. Risk and protective factors affecting mental wellbeing
7. Interventions to support families

Assessment
