

PUBH 2012 HEALTH CARE SYSTEMS

Credit Points 10

Legacy Code 400965

Coordinator Alfred Colvin ([https://directory.westernsydney.edu.au/search/name/Alfred Colvin/](https://directory.westernsydney.edu.au/search/name/Alfred%20Colvin/))

Description The tools of economic appraisal and decision making permeate all aspect of modern life. Reliance on economic analysis is highly evident in contemporary health care systems. The funding and provision of health care/services is continually changing and subject to ever increasing demand for limited and finite resources. The subject explores, examines and reviews the impact these limitations have on selected health care systems. Students are encouraged to research and examine their own and other health care systems and investigate the differences in access, equity, and efficiency. Practical, contemporary and applied case studies/examples are continuously utilised and students are encouraged to channel the knowledge gained into key areas of interest at the macro and micro level.
